Project Narrative

Subdivision of Lot F-34

Map F Parcel 34

NH Route 13

Brookline, New Hampshire

This site is located on Route 13, Brookline and is south of the intersection of NH Route 13 and Milford Street. The total property is 4.394 acres. The site consists of almost entirely forested land in its existing conditions slopes entirely away from the road towards the rear property line.

Wetlands were delineated on the southern side of the parcel by Thomas E. Carr, CWS, from this office in December of 2021, in accordance with "corps of engineers wetlands delineation manual, technical report Y-87-1, dated January 1987.

The following are existing soil types for the offsite areas that were determined using United States Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS) Web Soil Survey:

CmC Canton Stony Fine Sandy Loam, 3 to 8 Percent Slopes HSG B

The purpose of these plans is to depict the proposed Two (2) Lot Subdivision on the Easterly Side of NH Route 13. The project will involve the construction of a 75-foot common driveway that will service the two lots.

Stormwater on site in the developed conditions will be treated by Two (2) Infiltration Basins on the western side of the parcel. One (1) Basin will be located on the proposed F-34 lot and the other on the proposed F-34-1 lot.
