# Background

The Brookline School & Town Services Study Committee (STSSC) was formed by the Brookline Planning Board pursuant to a warrant article passed in March of 2021 by the citizens of Brookline.

The STSSC began its work on May 27, 2021 and conducted approximately 20 public meetings including but not limited to, as a full Committee, subcommittee activities and Planning Board meetings. The committee put in hundreds of hours of combined meetings, research, and consultation time. Members of the STSSC consulted with Brookline community entities, including but not limited to, the Brookline School District, the Brookline Fire Department, the Brookline Police Department, the Brookline Ambulance Department, Brookline Public Works and the Well Water Committee.

Additionally, members of the STSSC consulted with outside entities, including but not limited to; the Nashua Regional Planning Commission (NRPC), the New Hampshire Department of Environmental Services (NHDES), the New Hampshire Office of Strategic Initiatives (NH OSI), and the New Hampshire Municipal Association (NHMA). Members of the STSSC reviewed data from New England School Development Council (NESDEC), and reviewed Ordinances and Bylaws from towns within the State of New Hampshire.

# Summary of Growth Management Study

The Brookline School & Town Services Study Committee (STSSC) reviewed thousands of data points included in the datasets below. The culmination of the review of datasets resulted in a determination that Brookline’s growth is outpacing the Town’s ability to scale school and town service capacities.

Brookline’s growth is demonstrated by several datasets. The population data from 2020 U.S. Census Bureau shows that Brookline grew at a rate of 12.98% over the last 10 years, which is the highest growth rate in the Nashua Regional Planning Commission (NRPC) region. Brookline’s growth exceeded the regional average growth rate of (5.7%) by approximately 227%. Even more indicative of outsize growth, Brookline’s growth rate exceeded its direct abutters average growth rate (6.7%) by approximately 194%. The increasing issuance of building permits provides further evidence of Brookline’s rapid growth. Between 2011 and 2020, new home building permit activity increased from 7 to 32 new home permits - a 457% increase.

When the Growth Management Ordinance sunset in 2011, the Town had issued seven (7) building permits for that year. The number of building permits subsequently increased to fourteen (14) in 2012 then to twenty-six (26) in 2013, nearly 100% growth sustained for two years in a row.

In 2020, the Town issued thirty-two (32) building permits. This rate of development reflects an annual average growth rate equal to approximately 320% greater than the annual average growth rate of the NRPC region.

## Permits Issued By Year with Linear Trendline

In 2021, it appears there are approximately 30 pre-approved subdivision lots where a building permit has not yet been issued. If these homes were to be developed in the next year along with the building permits already issued for 2021 Brookline would reach an all-time high annual average growth rate of approximately 430% greater than the annual average growth rate of the NRPC region.

A linear trendline (figure above) is calculated by looking at all the data points and determining an equation that best predicts how many permits will be issued in a given year. This won't be entirely accurate – but it does provide a reasonable estimate of future increases in permits based on what Brookline has issued in new home permits in the last ten years. Based on the trendline calculation above, if Brookline took no action related to controlling growth, Brookline would issue approximately 179.75 building permits between 2021- 2025. Based on the U.S. Census Bureau Data of an average of 3.08 people per household in Brookline. The corresponding population increase just from new development would be approximately 553.63 people or 344% greater than the current annual average growth rate of the NRPC region. This population increase does not include organic growth through the expansion of families already in town or from homes which are sold and more people move into town than moved out of town.

While the Town of Brookline is currently under a moratorium for 2021, it is important to note that the 2021 annual average growth rate indicated above reflects building permits issued prior to the moratorium taking effect (approximately five (5) issued prior to the moratorium). Ten (10) building permits have been issued since the moratorium took effect, each deemed exempt from the moratorium. The remaining approximately 30 pre-approved subdivision lots where a building permit has not yet been issued are also exempt from the moratorium and could be built at any time, at the discretion of the developer.

In order for Brookline to manage its average annual growth rate to meet the annual average growth rate of the NRPC region under the current circumstances of pre-approved subdivision lots yet to be built, Brookline would have to stop issuing all building permits for a period of three (3) years, providing exceptions only for the pre-approved subdivisions. This would allow the effect of the average annual growth rate to stabilize.

The growth rate demonstrated above (12.98%), along with an enrollment increase of 14.2% from 2017 (514) - 2021(587) has had significant impacts on the Brookline School District. School data began to indicate that the Brookline School District was rapidly approaching capacity. In the 2020-2021 school year Brookline added a 4th full day Kindergarten class. In the 2021- 2022 the next school year (current school year) Brookline added a 5th full day Kindergarten class and 5th 1st grade class.

In response to the rapid growth rate, the strain being placed on the classroom space within the school buildings and the fact that children new to the school system are primarily entering the district in Kindergarten and First Grade, the Brookline School Board engaged the engineering firm Energy Efficient Investments, Inc. to conduct an analysis of the current capacity and potential capital improvements that the school district would require. Energy Efficient Investments, Inc. findings (Sep 2021) found a lack of physical space for education in both district buildings. The Brookline School Board is currently evaluating the findings to determine what if anything can be done to reduce the cost of the project.

Energy Efficient Investments, Inc. findings are summarized below.

Brookline Sch

1. Total costs for both school district buildings repairs, upgrades and expansion are projected to be approximately \$17.5 million
2. Costs strictly related to expansion for both school district buildings to accommodate growth in student populations, are projected to be approximately \$11 million

- a. Expansion for RMMS was proposed to be five (5) additional classrooms at a cost of approximately \$8 million
  - b. Expansion for CSDA: 6750 feet of classroom space; five (5) additional classrooms at a cost of approximately \$3 million
3. Other upgrades in the estimated project cost not related to expansion include ADA compliance (elevator, RMMS), boiler, and HVAC repairs amongst others.

#### Brookline School District

1. Current Number of Students Enrolled: 587
2. Current Number of classrooms being utilized at CSDA & RMMS: All
3. RMMS and CSDA could not support an additional class at this time based on the current School Board Policy IIB without reconfiguration of the building space.

#### Richard Maghakian Memorial School (RMMS)

1. Specialist teachers do not have their own classrooms and are now teaching “off of a cart.”
2. Library had to be split to facilitate additional classroom space.
3. There is an overall lack of space in the building for education needs.
4. There are needed ADA and code upgrades.
5. Building lacks a sprinkler system.
6. Building has three (3) inefficient oil boiler furnaces.
7. Ventilation systems are at the end of life.
8. No elevator for ADA access for lower level.
9. Main office is separated from the main entrance creating a security risk.
10. School lacks a modern kitchen and a dedicated cafeteria.

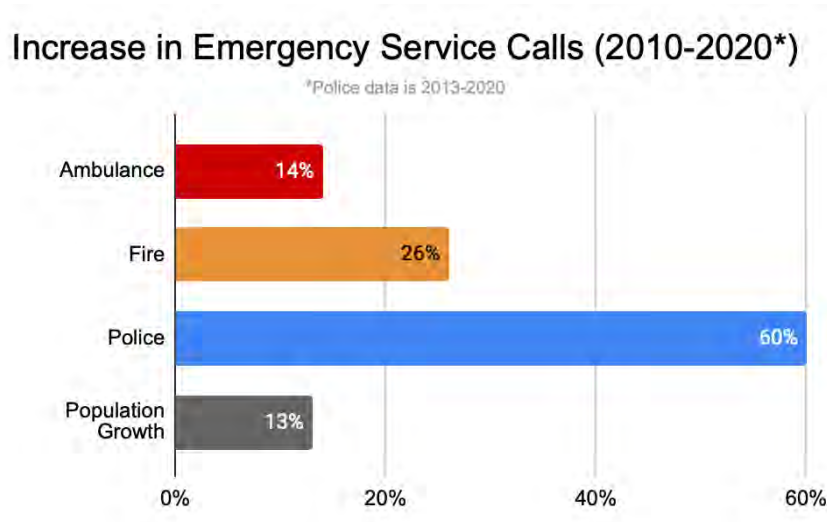

#### Captain Samuel Douglass Academy (CSDA)

1. School relies on modular classrooms as space inside the building is strained.
2. HVAC controls and fire alarm system nearing end of useful life.
3. HVAC system does not allow for dehumidification or recommended ASHRAE filtration.
4. Building has inefficient fluorescent lighting.
5. Cafeteria is undersized for student usage.
6. Building lacks a sprinkler system.

The rapid growth demonstrated above has also started to impact the availability of a potable water supply for residents. Residents in Brookline began reporting well-water issues immediately after new developments were added to their neighborhoods. In response, the Planning Board created a Well Water Committee (2020) to study how the Town could address the issue. The Well Water Committee published a report with findings and recommendations in the fall of 2020. The STSSC has incorporated those findings and recommendations into its findings.

Other town services have been similarly impacted. Data from 2020 US Census Bureau Data demonstrates that there was a 12.98% increase in Brookline’s population from 2010 - 2020. The STSSC analyzed the emergency services dataset included as part of the Growth Management Dataset and was able to determine the following correlating increase of Emergency Services:

- a. Brookline Fire Department: 26% increase in calls
- b. Brookline Ambulance Department: 14% increase in calls
- c. Brookline Police Department: 60% increase in calls (2013 – 2020)

The data shows that emergency services are being impacted at a rate even greater than the population growth rate.

Finally, growth in the town has resulted in the Town transitioning from a Road Agent to a full time Brookline Department of Public Works (BPW). The BPW is currently significantly understaffed, forcing the town to continue to rely on subcontractors. Based on research conducted by the STSSC, a town should have approximately one (1) BPW employee for every ten (10) miles of roads. Brookline has approximately sixty (60) miles of roads, requiring six (6) full time employees. Brookline is currently operating with only two (2) full time employees. Further, in 2020 Brookline Town Meeting approved the construction of a BPW building at a cost of \$2.67 million in response to the town’s growth and the corresponding need to provide public works services. The building is currently under construction, further hampering the Town’s ability to provide increased town services until such time that construction has been completed.

In summary, the STSSC reviewed thousands of data points included in the datasets below to compile the summary above. The culmination of the review of datasets resulted in a determination that Brookline’s growth is outpacing the Town’s ability to scale school and town service capacities. As a result of this determination, the Committee has made the following findings and recommendations.

# Committee Findings and Recommendations

## 1. Reinstate the Growth Management Ordinance

- a. With the goal to pace the growth in Brookline to meet our region's annual average rate of population growth while allowing the Town to:
  - i. meet the demand for high quality education and school services while maintaining classroom sizes in accordance with the current and long-standing school board policies;
  - ii. provide the town time to conduct a town-wide hydrogeological study of existing well water capacity and to protect existing water resources; and
  - iii. plan for increases in Town services in an efficient manner.

## 2. Update the Workforce Housing Ordinance to allow Workforce Housing development when the Town falls short of its Regional Fair Share of Workforce Housing by

- a. Providing long-term sustainable affordability;
- b. Removing square footage limitations and aligning with affordability standards in accordance with RSA 674:58;
- c. Updating Applicability Section to expand where mixed developments may occur;
- d. Providing reduced lot size and frontage requirements for Workforce Housing;
- e. Encouraging Mixed Developments;
- f. Providing greater clarity with conforming definitions (IAW RSA 674:58) and resolving a conflict in definitions between Town and State definitions (aligned with the RSA's) to provide greater flexibility in the use of 2, 3 or 4 family dwellings;
- g. Aligning paragraphs under the appropriate sections; and
- h. Requiring an annual determination by the Planning Board on workforce housing to determine the Town's compliance with RSA 672:1, III-e and RSA 674:59 in accordance with the provisions of RSA 674:59 III.

## 3. Implement a Well and Water Ordinance

- a. Provide wells that are able to supply long term sustainable water yields of at least four (4) gallons per minute over a four (4) hour period; and
- b. Provide wells that are safe for drinking and meet minimum testing requirements for potable water.

## 4. Update the Zoning Ordinance (Section 600, 900, 1500)

- a. Changing the Residential/Agricultural District minimum lot size to be two (2) acres.

5. Update the Subdivision, Cluster Development & Site Plan Regulations

- a. Requiring a hydrogeological study before subdivision approval; and
- b. Ensuring that Reasonable Standards including, but not limited to, Environmental Protection, Water Supply, Sanitary Disposal, Traffic Safety, Fire and Life Safety Protection are met for all new developments in Brookline; and
- c. Add language to allow for maintenance bonds for any subdivision, cluster development, and Site Plan that includes residential uses.

6. Update the Master Plan

- a. Revising the Housing Chapter with 2020 U.S. Census Data and current information on housing goals and objectives; and
- b. Conducting a review of the CIP, in light of faster than anticipated growth.

7. Update Impact Fee Schedule

- a. Potential additions and renovations to the two elementary schools.

Committee Recommendations for Future Work

1. Review and revise Phased Development, if needed;
2. Establish an Independent Well Water Committee reporting to the Select Board;
3. Evaluate the need for a community well water monitoring survey/program;
4. Updates to the Zoning Ordinance to include, but not be limited to, Definitions; and
5. Review of Zoning Ordinance - Review/Recommendations by NRPC.

About datasets used in this table

**Value Notes**

 Estimates are not comparable to other geographic levels due to methodology differences that may exist between different data sources.

Some estimates presented here come from sample data, and thus have sampling errors that may render some apparent differences between geographies statistically indistinguishable. Click the Quick Info  icon to row in TABLE view to learn about sampling error.

The vintage year (e.g., V2019) refers to the final year of the series (2010 thru 2019). *Different vintage years of estimates are not comparable.*

**Fact Notes**

- (a) Includes persons reporting only one race
- (c) Economic Census - Puerto Rico data are not comparable to U.S. Economic Census data
- (b) Hispanics may be of any race, so also are included in applicable race categories

**Value Flags**

- Either no or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest or upper open ended distribution.
- F Fewer than 25 firms
- D Suppressed to avoid disclosure of confidential information
- N Data for this geographic area cannot be displayed because the number of sample cases is too small.
- FN Footnote on this item in place of data
- X Not applicable
- S Suppressed; does not meet publication standards
- NA Not available
- Z Value greater than zero but less than half unit of measure shown

QuickFacts data are derived from: Population Estimates, American Community Survey, Census of Population and Housing, Current Population Survey, Small Area Health Insurance Estimates, Small Area Income and Estimates, State and County Housing Unit Estimates, County Business Patterns, Nonemployer Statistics, Economic Census, Survey of Business Owners, Building Permits.

# HOUSING NEEDS ASSESSMENT FOR THE NASHUA REGION

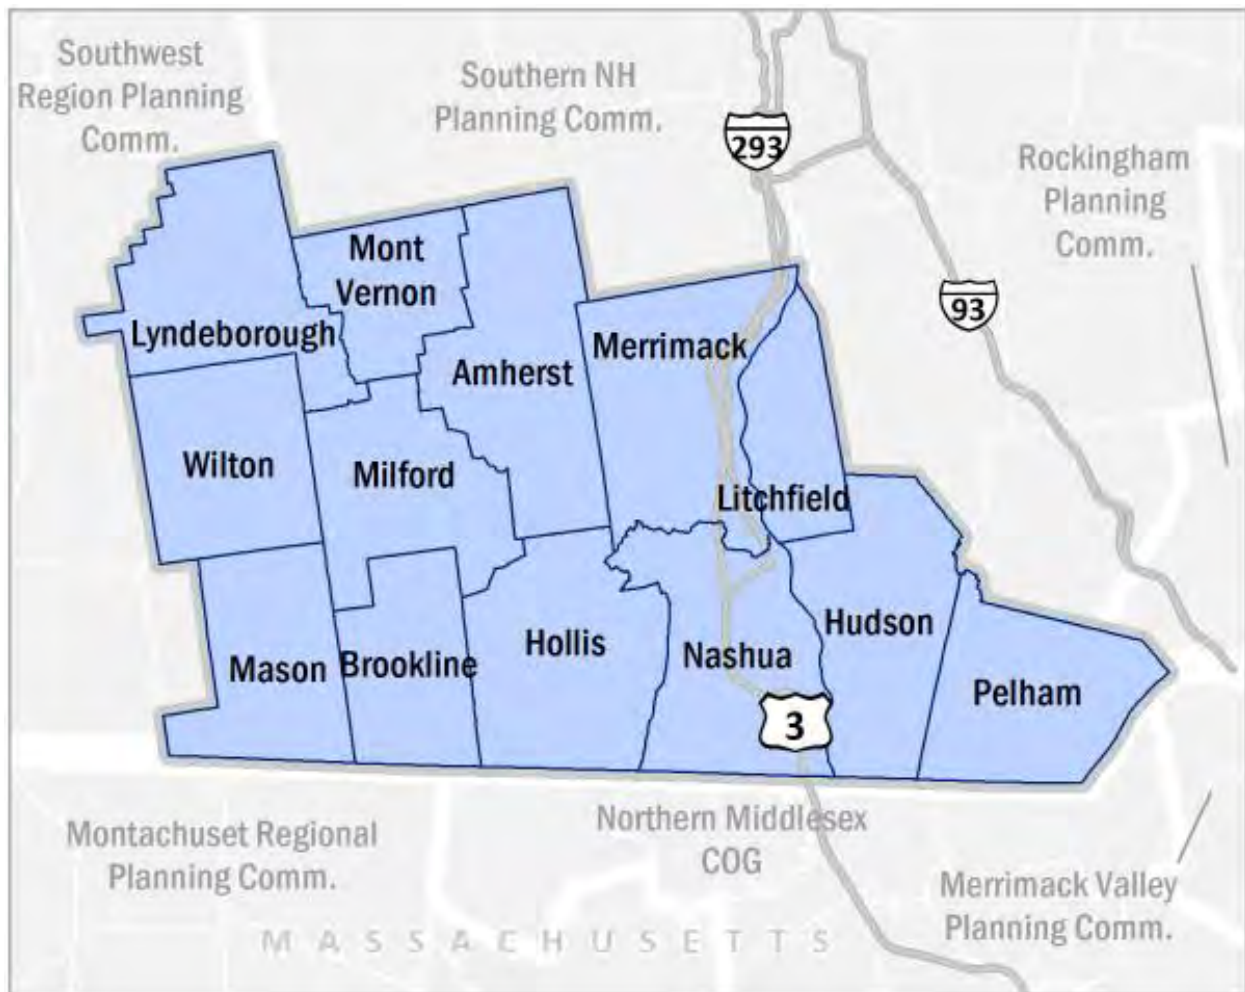

NASHUA REGIONAL  
PLANNING COMMISSION  
12/19/2019

## ABSTRACT

The Nashua Region boasts one of the most diverse range of housing options in the state with an abundant mix of home types, styles and settings including a large supply of multi-family housing, a variety of suburban single-family neighborhoods and extensive rural-residential areas. Proximity to large concentrations of employment in southern New Hampshire and Greater Boston, together with access to expansive recreational and cultural opportunities, makes the region a highly desirable place to live. The region's desirability, however, also creates pressures on the housing market in terms of both supply and affordability. In addition, changing demographics including an aging population and a trend toward smaller households has significant implications for housing type, size and cost. This Assessment is designed to provide an overview of the Region's housing supply by type, cost and location, together with an analysis of current and future needs. It is also designed to meet the requirements of NH RSA 36:47.

NRPC Region

## EXECUTIVE SUMMARY

The Nashua region has one of the most diverse housing supplies in the state. Housing options include a wide range of rental and owner-occupied multi-family homes at varying densities and cost levels; especially along our major transportation networks and within our city and town centers, as well as a large supply of single-family homes located throughout the region's urban, suburban and rural areas. The mix of housing options and variety of residential settings provides residents with the opportunity to enjoy access to open space and natural areas alongside urban conveniences and a wealth of job opportunities. Over the past few years, the region has recovered from the Great Recession of 2007-2009 and is currently experiencing record low unemployment, healthy job creation and rising home values. The pace of the strengthening economy however, coupled with residential construction levels that have failed to recover to pre-recessionary levels, has resulted in a housing market that is increasingly competitive.

Since 2010, the region has experienced a 7.7% growth in employment while the unemployment rate has fallen to 2.6%. Over the same period, the region's population has grown by only 1.45%, an indication that more workers and additional housing to accommodate them, is necessary to support a strong economy. Failure to accommodate the region's workforce needs on-the-other-hand, could stifle economic growth.

The region's lagging supply of housing coupled with strong demand is steadily driving housing prices up, especially in the rental housing market. Since the 2014 Housing Needs Assessment, there has been a continuing shift toward more renter-occupied housing units across all income levels and rental units now make up about 30% of all units in the region – up 3% since 2014. The location of these units remains heavily concentrated portions of the City of Nashua, downtown Milford, eastern Merrimack and parts of Hudson where public water and sewer are available to support higher housing densities. The remainder and far larger part of the region's housing stock is generally made up of single-family homes situated in suburban and rural settings. Other notable trends include an aging population and a decline in the number of households with children. Shifting housing preferences, declining household sizes and an aging population raise questions as to whether the region's existing housing stock is aligned with future demand. Recent building permit activity, however, suggests that development in the region is responding to demographic and market shifts and we are constructing a wider variety of housing options, including more duplexes and larger multi-family rental complexes, though demand continues to outpace supply. Single-family construction has also increased though, perhaps appropriately, it remains below pre-recessionary levels. Despite increasing housing costs, the region does provide an adequate supply of affordable housing overall, though housing cost, affordability and availability varies considerably across the region and many households remain cost burdened.

The term “affordable”, in this document generally aligns with the state and US Department of Housing and Urban Development (HUD) definition meaning housing costs that do not exceed 30% of a household's gross annual income. The term “workforce housing” is also defined by the state, meaning housing for sale which is affordable to a household with an income of no more than 100% of the median income for a 4-person household or housing for rent which is affordable to a household with an income

of no more than 60% of the median income for a 3-person household. These workforce housing limits are published annually by HUD for each metropolitan area. The Nashua metropolitan area income limits were used as the basis for calculations and comparisons and typically hovered around \$100,000 or 100% AMI for homeowner households and \$60,000 or 60% AMI for renter households.

This document contains a compilation of relevant demographic and housing data for the region's thirteen municipalities. In addition, the assessment identifies the need for overall and workforce housing in each municipality through 2040. Chapter sections are designed to help the region and its communities understand and plan for housing needs. The Regional Housing Needs Assessment includes an analysis of existing demographics, housing supply, market conditions, cost and affordability, projected housing demand, a regional fair share analysis and a description of workforce housing legislation and related issues. Additionally, it includes a review of existing resources available for meeting local housing needs. The assessment also includes a discussion of issues related to increasing diversity, race and ethnically, concentrated poverty, fair housing and housing discrimination.

To continue to be a great area to live, work and raise a family, the region needs to ensure that a sufficient range of housing options are available, affordable and well located in proximity to transportation and employment opportunities. Local land use regulations and policies need to be flexible and adaptable to respond to changing demographics, housing preferences and market conditions. The Regional Housing Needs Assessment is intended to assist communities in understanding the existing landscape for housing in the region and as a tool for meeting the housing needs of all current and future residents.

## INTRODUCTION

This Regional Housing Needs Assessment report has been completed by the Nashua Regional Planning Commission (NRPC) in accordance with RSA 36:47, II which states that:

“...each regional planning commission shall compile a regional housing needs assessment, which shall include an assessment of the regional need for housing for persons and families of all levels of income. The regional housing needs assessment shall be updated every 5 years and made available to all municipalities in the planning region.”

This report has been written as an update to the 2014 NRPC Regional Housing Needs Assessment and is also meant to aid member communities in complying with RSA 674:2, III (I), which states that a town’s master plan may include:

“A housing section which assesses local housing conditions and projects future housing needs of residents of all levels of income and ages in the municipality and the region as identified in the regional housing needs assessment performed by the regional planning commission pursuant to RSA 36:47, II, and which integrates the availability of human services with other planning undertaken by the community.”

In addition to the statutes stated above, and accordance with RSA 674:59, I, the State also required that:

“In every municipality that exercises the power to adopt land use ordinances and regulations, such ordinances and regulations shall provide reasonable and realistic opportunities for the development of workforce housing, including rental multi-family housing. In order to provide such opportunities, lot size and overall density requirements for workforce housing shall be reasonable. A municipality that adopts land use ordinances and regulations shall allow workforce housing to be located in a majority, but not necessarily all, of the land area that is zoned to permit residential uses within the municipality. Such a municipality shall have the discretion to determine what land areas are appropriate to meet this obligation. This obligation may be satisfied by the adoption of inclusionary zoning as defined in RSA 674:21, IV(a). This paragraph shall not be construed to require a municipality to allow for the development of multifamily housing in a majority of its land zoned to permit residential uses.”

This assessment contains seven sections which highlight various aspects of the region’s profile. Each section aggregates updated information and provides an analysis. The seven sections consist of:

- 1.) existing demographic conditions including population and household trends, public school enrollment, employment, commuter patterns and communities of interest;
- 2.) existing housing unit trends and characteristics including housing supply, building permit activity, occupancy, tenure and vacancy rates, age of housing stock, and assisted housing;
- 3.) housing market, costs and affordability including household income, home values, rental costs, market trends, and cost burdened households;
- 4.) housing choice opportunities and barriers including infrastructure, environment, transportation, employment, economic development and fair housing legislation;
- 5.) housing supply projections for both population and housing units, regional fair share of workforce housing, and housing preferences;
- 6.) resources for meeting local needs including alternative housing and regulatory options, local tools and resources, and state and federal programs; and
- 7.) workforce housing across the region including state definitions and a matrix of regulations implemented by each member community.

Primarily, data used in this report is from the 2010 US Census and the American Community Survey (ACS). However, figures from ACS data are estimates based on the 2010 Census and tend to have larger margins of error. In some cases, it has been noted within the document's text when ACS data should be more carefully considered. In addition to Census and ACS data, this assessment also utilizes information from the New Hampshire Housing and Finance Authority (NHHFA). In many cases, NHHFA is collecting their data directly from community departments and representatives, research agencies, internal and external housing experts, and community members. Some NHHFA data may readjust and build off decennial censuses, particularly the 2010 Census in this case. Because this report utilizes data in-between decennial censuses, all figures and trends should be critically examined for limitations and consider their potentially larger margins of error.

An understanding of the current housing supply, types, availability, affordability, projected population, shifting demographics and migration patterns, can be used to better predict future housing needs for both the region and individual member communities. Further, this information can be utilized to help establish and carry out policies that address and seek to improve the quality of life within the region.

There are certain factors that have an enormous impact on the demand and supply of housing in an area. First, the supply and cost of housing are influenced by the availability of necessary infrastructure, such as public water and sewer, and access to transportation routes. In addition, employment opportunities and income levels factored in with the cost of housing and consequently people's ability to afford adequate housing, must be evaluated. In addition, NHHFA has cited the 5L's which impede adequate housing development: land, labor, lumber, laws and loans (NHHFA, 2019). As a result, NHHFA suggests that the state, its regions and municipalities must critically consider areas where housing development is possible (land), what the current conditions are for workforce availability (labor), what are the development costs (lumber), are there regulatory practices that discourage or slow housing development (laws) and what type of financing is available to developers and borrowers (loans). These factors have shaped and influenced the state of housing within the NRPC region and will seemingly continue into the future.

There are thirteen communities which comprise the Nashua Regional Planning Commission: Amherst, Brookline, Hollis, Hudson, Litchfield, Lyndeborough, Mason, Merrimack, Milford, Mont Vernon, Nashua, Pelham and Wilton – all of which are in Hillsborough County. Generally, low-density residential development has characterized growth in the region’s outlying communities, while higher density development has occurred in the City of Nashua, along the F.E. Everett Turnpike/DW Highway corridor along the town line of Merrimack and Litchfield, in west-central Hudson and in the core of Milford. Generally, the region’s proximity to Greater Boston has been the most influential factor influencing growth together with access to the mountains, lakes, beaches and other recreational and cultural attractions.

(NRPC, 2019)

## EXISTING DEMOGRAPHIC CONDITIONS

### POPULATION

The region has more than tripled in population over the last 50 years. However, the rate of growth has been decreasing in more recent years. Between 2000-2010, the region grew by 4.5% and since, it has slowed to 1.45%. This evidence of a slower growth begs to question: does the region still need to increase housing supply given the slowing population growth or is the slowing population growth a result of decreased housing development?

The projected population for the NRPC region in 2040 is 220,967, a 12,209-person increase from the 2017 estimate of 208,758. The region's slowing growth rates could possibly be explained by lower fertility rates with the number of deaths exceeding births and a slowing of net migration. It is anticipated that the 2040 senior population will be 2 to 3 times the current levels. This would mean that one-fourth of the population in 2040 will be 65 years of age or older with limited change to the projected younger populations. Through there is recent evidence of a slight uptick in the net migration of young people (Johnson, 2018), the region needs to think about developing and maintaining a housing supply that meets the needs and preferences of an aging population, alongside strategies for creating and maintaining a housing stock that appeals to and retains younger individuals.

2010 - 2017 Population Growth in NRPC Region				
Community	2010 Census	2017	Numeric Growth	Percent Growth
Amherst	11,201	11,241	40	0.38%
Brookline	4,991	5,190	199	3.99%
Hollis	7,684	7,779	95	1.24%
Hudson	24,467	24,858	391	1.60%
Litchfield	8,271	8,424	153	1.85%
Lyndeborough	1,683	1,771	88	5.28%
Mason	1,382	1,489	107	7.74%
Merrimack	25,494	25,566	72	0.28%
Milford	15,115	15,288	209	1.14%
Mont Vernon	2,409	2,501	92	3.82%
Nashua	86,494	87,642	1,148	1.32%
Pelham	12,897	13,323	426	3.30%
Wilton	3,677	3,686	9	0.24%
<b>NRPC Region</b>	<b>205,765</b>	<b>208,758</b>	<b>3,553</b>	<b>1.45%</b>
<b>Hillsborough County</b>	<b>399,555</b>	<b>406,371</b>	<b>6,816</b>	<b>1.75%</b>
<b>New Hampshire</b>	<b>1,313,939</b>	<b>1,331,848</b>	<b>17,909</b>	<b>1.36%</b>

(US Census, 2013-2017 5-year Estimates)

Though the region's population growth rates are very similar to both Hillsborough County and the State, rates among the individual communities varied. Communities such as Lyndeborough and Mason

experienced larger percentage changes, 5.28% and 7.74% respectively, since 2010 due to their relatively small population bases. Their increases only amounted to a total of 195 people: 88 new residents for Lyndeborough and 107 for Mason. While Pelham experienced a modest 3.30% growth rate, that resulted in over 400 new residents to the community. Amherst and Merrimack experienced growth rates below 1%, while Wilton experienced nearly no growth.

## POPULATION BY AGE GROUP

Younger populations often struggle to balance their housing decisions between quality and affordability. Middle-aged populations have recognized that there are job opportunities in region but sometimes feel that price tag does not always meet their needs, wants or budget. Retirement-aged and elderly residents have expressed concern about the costs associated with aging in place; whether that be taxes, heating costs or access to transportation.

In the Nashua region, 24% of the population is under the age of 19, a decrease from 26.5% in 2010. Thirty percent of the population falls between the ages of 20 and 44, also a decrease from 31.5% in 2010. However, residents making up the 45 to 64 age brackets, now account for 32% of the total population, which is an increase from 30.4% in 2010. The rate of increase was even higher for those age 65 and older, now 14% of the total population and an increase from 11.6% in 2010.

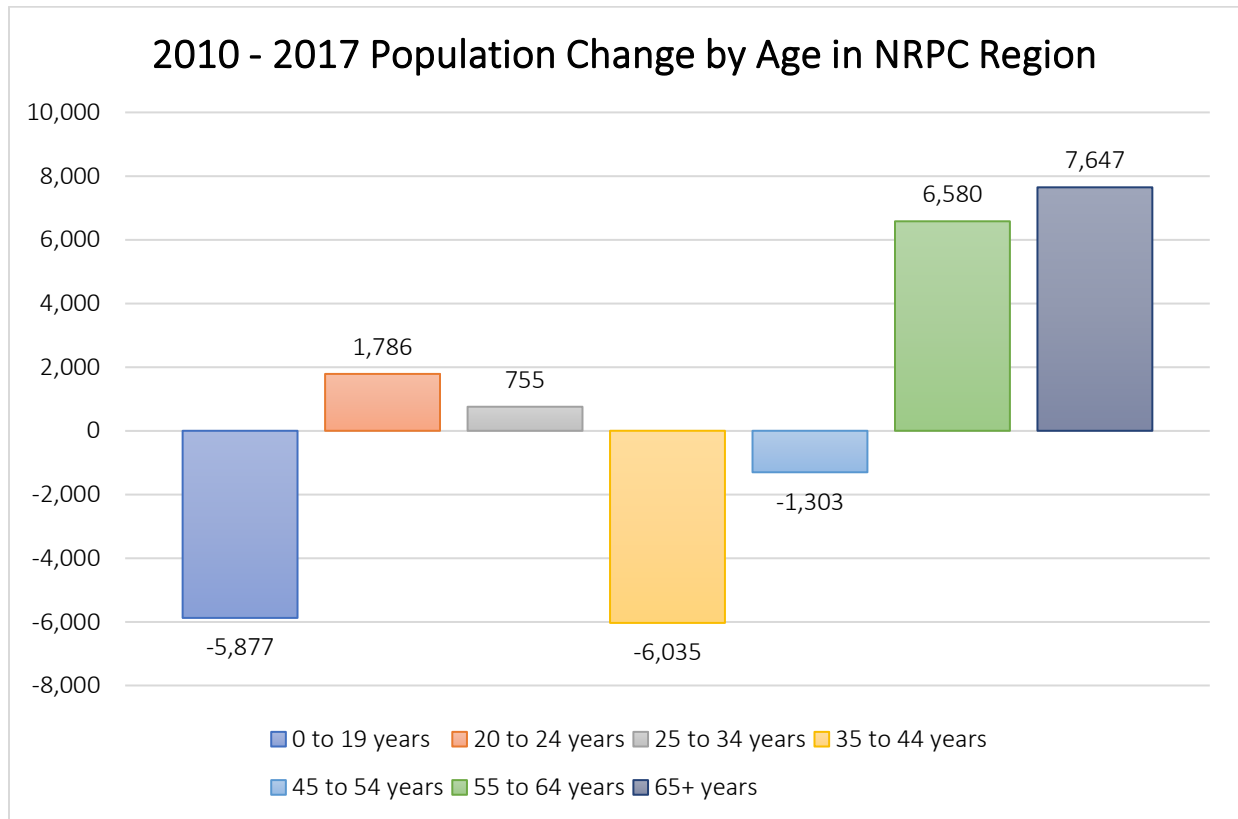

The percentage of the population under the age of 44 has been decreasing since 1990, while the “baby boomer” generation and those that are over the age of 65 has been increasing across the state and the nation.

(US Census, 2013-2017 5-year Estimates)

Population trends indicated in the graph below demonstrate the graying of the region. Most notably, are the significant decreases in children (0-19) and those in the 35-44 and 45-54 age ranges. The region has nearly 12,000 fewer residents within these age groups. These middle-aged populations are typically a large portion of homebuyers who are in their prime earning and purchasing years, often with children who are in their formative years and filling our schools.

As previously noted, the region has experienced significant growth in age groups over 55 years old. From 2010-2017, the region has gained approximately 14,000 residents within this age group. These populations make up a large percentage of homeowners without children in their residents and include those considering retirement, downsizing or aging place.

There were also modest increases for the young adult age groups, from 20-24 and 25-34 years old. These populations grew by over 2,500 from 2010-2017. This coincides with recent studies indicating a net in-migration of young adults that bucks the perception that young adults are leaving the region and state. These population groups are important because they impact both the homeownership and rental markets and are vital to maintaining a viable workforce. People in these age ranges are typically starting families, considering homebuying and contemplating short and long-term commitments to our region.

(US Census, 2013-2017 5-year Estimates)

## POPULATION BY RACE AND ETHNICITY

The US Census defines minorities as individuals who, when completing the US Census Decennial Survey, check any race other than white or more than one race on the race question or check any of the yes boxes on the Hispanic question. Conversely, whites are those who check only the white box on the race question and check the no box on the Hispanic question. Technically speaking, in contrast with minorities, whites are defined as “white-alone non-Hispanic” and minorities are all other persons.

## 2017 Population by Race in NRPC Region

(US Census, 2013-2017 5-year Estimates)

The Nashua Region is one of the most diverse in the State with 85% of the total population identified as white alone, compared to a State-wide average of 90%. Approximately 6.4% of the region’s population is Hispanic or Latino and nearly 4.4% are Asian. While minorities represented 13% in 2010 and 15% in 2017, they accounted for approximately 185% of the region’s growth during that same time period. Six communities saw a net decrease in minority populations while the remaining seven all experienced an uptick. Most notably were Nashua, Milford and Pelham with gains of 6,144, 776 and 398 people, respectively.

## 2010 - 2017 Population Growth by Race in NRPC Region

(US Census, 2013-2017 5-year Estimates)

The City of Nashua has the highest concentration of the region’s minority population. For most communities in the region, about 2-12% of the population is comprised of racial minorities. Within Nashua, approximately 26% of the overall population is comprised of minorities; nearly 8% of the population is Asian and 12.5% are Latino or Hispanic. Combined, the region’s largest communities (Nashua, Merrimack and Hudson) represent 66% of the overall population and 85% of the region’s minority population in 2010, compared to 68% and 87% respectively in 2000. This indicates a very slight shift of population away from the region’s more populous communities to more rural and suburban towns for all populations, regardless of race or ethnicity.

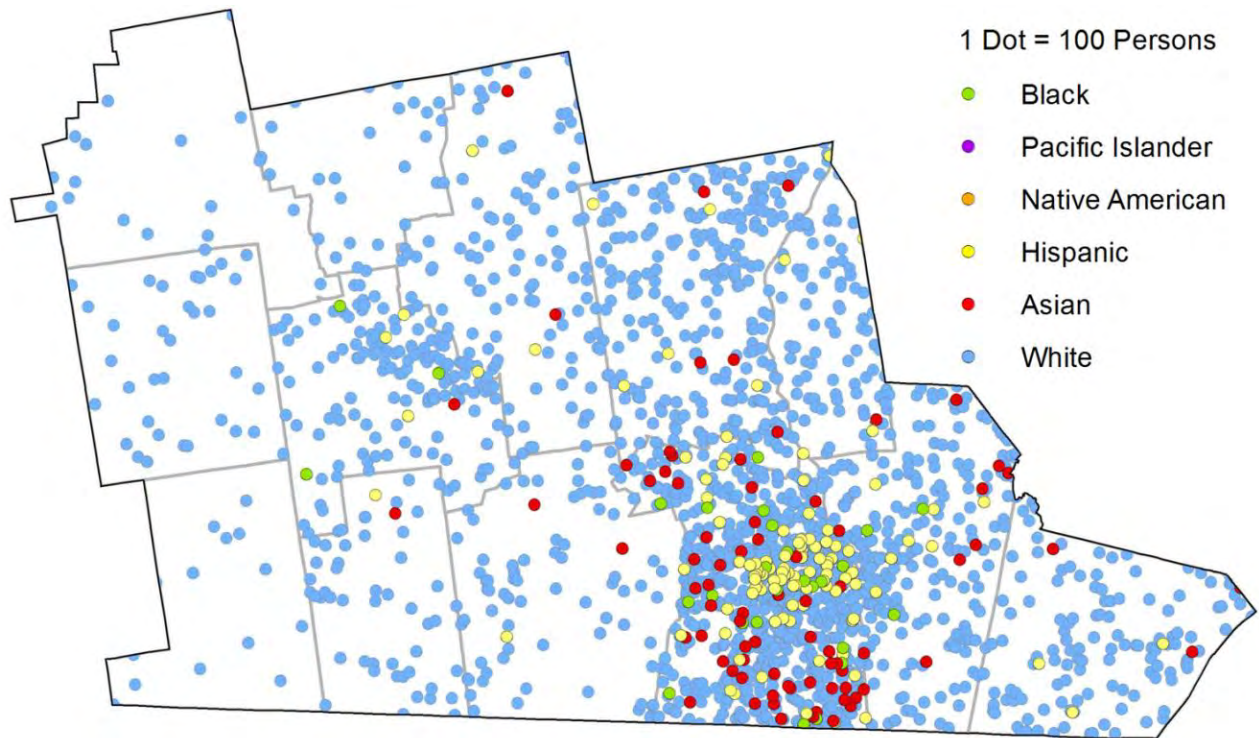

(US Census, 2013-2017 5-year Estimates)

Shown below is a 2010 Census population dot density map. Each dot represents 100 persons in the corresponding census tract and is shaded according to racial background. The map shows that our region is more densely settled in the east, concentrated in the City of Nashua and radiating outward along the region’s largest corridors such as the F.E. Everett Turnpike/ DW Highway running north and south, Route 101 westward through Milford, and Route 111 into Hudson. Similarly, the map depicts that the extent of racial heterogeneity is limited to the most populated locations and corridors.

## Population Density by Race and Ethnicity in NRPC Region

(US Census, 2010)

As the data is analyzed, some questions arise: on a conceptual level, to what degree does racial background, or other factors such as income, affect where people live? Additionally, to what degree do our planning and zoning practices affect who lives where, either purposefully or even inadvertently?

## HOUSEHOLDS

### HOUSEHOLD COMPOSITION

The US Census Bureau splits household composition into two primary categories: family households and non-family households. Family households consist of married couples or single householders living with other family members. Non-family households consist of those living alone or those living with unrelated occupants. As seen the following graphic, family households account for 70% of all households in the region, however it's important to note that approximately 14% of all households are made up of single parents, while 56% of the region is made up of specifically married couples. Conversely, non-family households make up the remaining 30% of all households.

## 2017 Occupied Housing Units by Household Composition in NRPC Region

(US Census, 2013-2017 5-year Estimates)

As a continuing trend of the 2000s, the years between 2010-2017 also indicated a decreasing percentage of family occupied units for married couples and single-parent households led males. During that same time period, there was substantial growth of occupied units with families led by single-parent females. The presence of children within families also decreased while those families without children increased at a similar rate. Units occupied by non-family households grew across the board. Those living alone had slight increase while non-family households which were not living alone, grew significantly from 2010-2017.

## 2010 - 2017 Household Composition Changes in NRPC Region

(US Census, 2013-2017 5-year Estimates)

As household compositions continue to shift away from larger, more traditional makeups, the region and its individual communities must question whether their current housing mix or development trajectory conforms with these changes. Approximately 61% of the region’s housing stock is single-family while 37% is made up multi-family units with the remaining 2% comprised of manufactured housing. However, in terms of the overall numbers, the city of Nashua contains about 64% of the region’s total number of multi-family units, down from 72% in 2010.

Implications: Do our current and/or ideal zoning practices match our existing and future land use visions? Specifically, is the predominance of single-family housing in most of our region meet the needs of younger, smaller households? Will older persons continue to prefer larger single-family homes?

---

## HOUSEHOLD SIZE AND AGE

In harmony to changes in household composition, the region is experiencing a continued shift toward smaller and older household heads. As of 2017, the average household size was 2.56-persons where about 77% of households were comprised of 3 people or less. In comparison, the last Regional Housing Needs Assessment reported that 75% of households at below the 3-person threshold. Overall, the region is showing a trend toward smaller families with fewer children. Other data shows that overall net migration has been modest, and that natural population is negative. The consequences of these demographic shifts are among the most significant issues facing the region.

(US Census , 2013-2017 5-year Estimates)

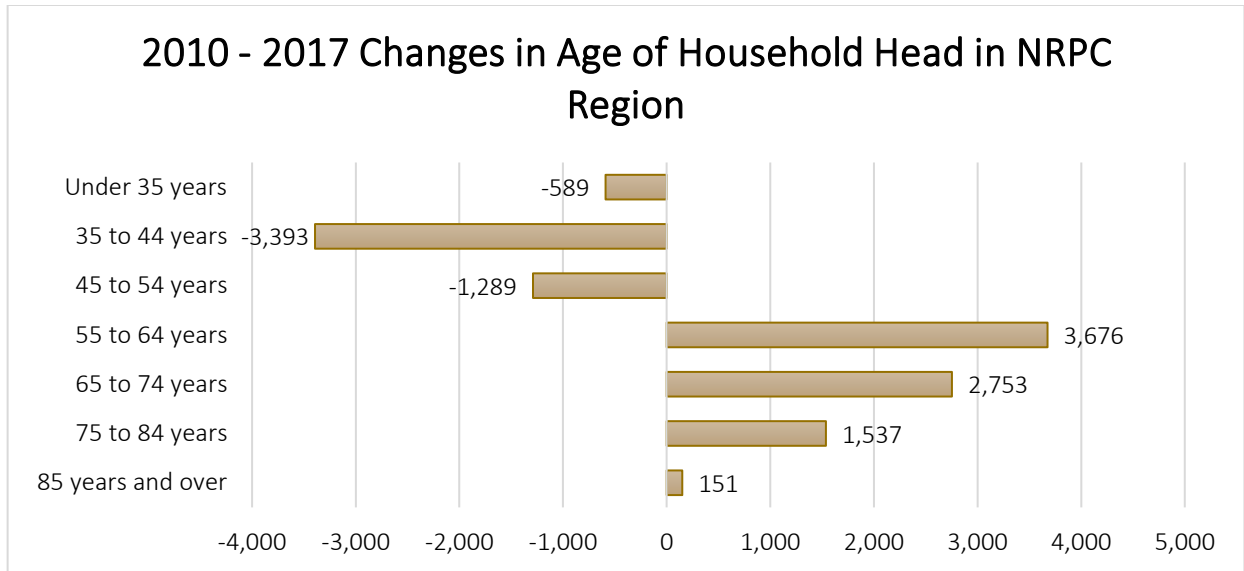

Significant contributors to smaller households include aging of the population and that younger households are delaying or avoiding marriage and child-rearing. Interestingly, the region has also experienced small growth in the number of 7-person households. The 7-person households may consist of large traditional families, group quarters with people splitting housing costs or multigenerational housing configurations. Large, multi-generational households or house-sharing among unrelated individuals can be a way of addressing the housing needs of a diverse range of family types and age groups while taking advantage of the region’s supply of larger single-family homes.

As of 2017, 15% of the region's households included heads aged 35 over younger, a slight decrease from the 16% in the 2010 Census. Additionally, 22% of household heads were identified to be 65 years or older, an increase from 19% in 2010. The percentage of household heads aged 35-64 decreased from 65% in 2010 to 63% in 2017. Though this trend continues to support our findings of an aging population.

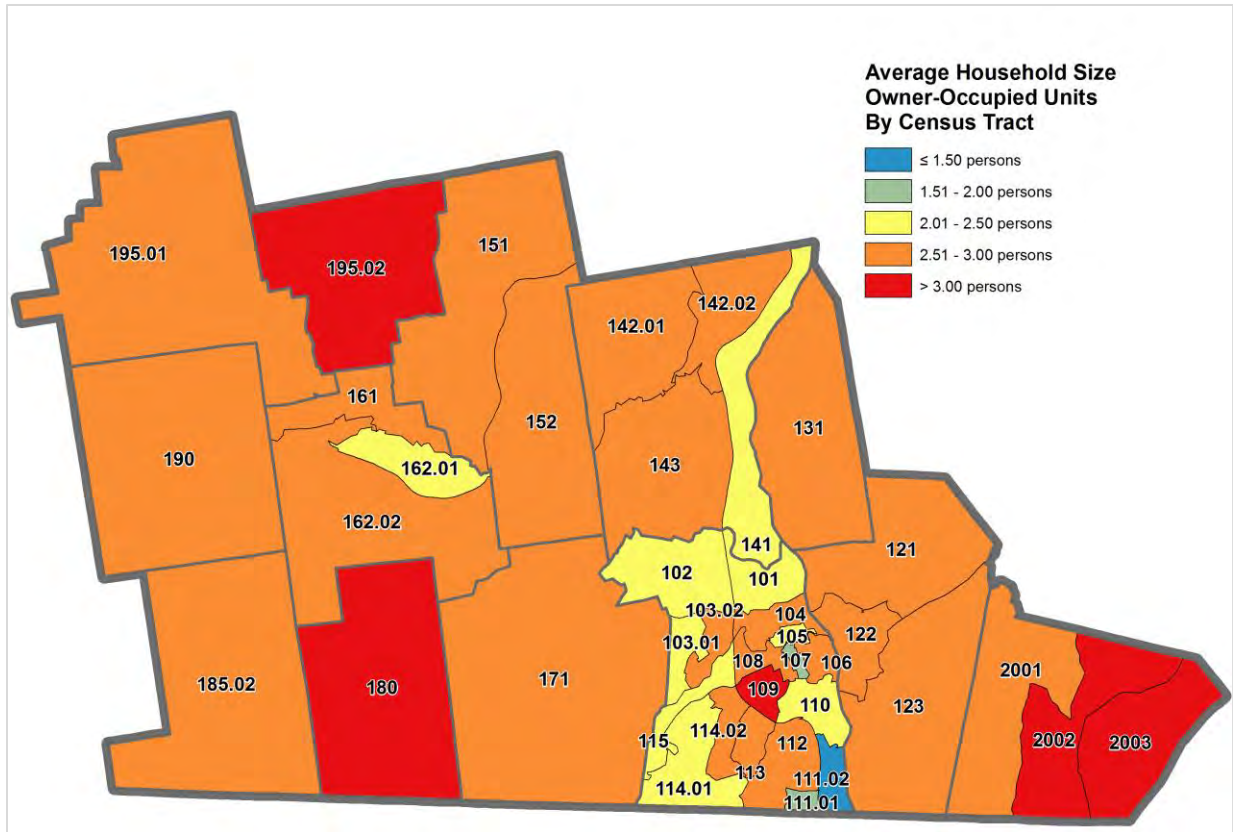

To put these percentages and their associated numerical changes into context, the following graphic further details these fluctuations from 2010-2017. The largest gain in household heads since 2010 was those aged 55-64 years old while the largest loss in household heads was for those aged 35-44. In total, household heads under 55 years old decreased by 5,271 and those aged over 55 years old increased by 8,117. These figures correspond to changes in the overall composition of the population discussed previously.

(US Census, 2013-2017 5-year Estimates)

## HOUSEHOLD DISTRIBUTION

Household distribution for owners and renters varies greatly throughout the region. Most notably, Mont Vernon, Brookline, a large portion of Pelham and a pocket of Nashua have the largest owner-occupied households averaging three or more people per unit. The smallest owner-occupied households are located in portions of central and southeast Nashua. Other portions of Nashua, areas along the F.E. Everett/DW Highway Corridor in Merrimack and the downtown core of Milford that have smaller average owner-occupied household sizes. Areas with smaller owner-occupied households tend to be characterized by high concentrations of multi-family units including condominiums which often attract homebuyers with smaller households or tend to have an older housing stock. Not surprisingly, larger households tend to be found in suburban and rural areas where large-lot single-family housing development dominates.

(US Census, 2013 - 2017 5-year Estimates)

When analyzing the distribution of renter-occupied households, the results vary greatly across the region. Renter households averaging more than three people per unit are found in south Merrimack, northern parts of Hudson and a small section of western Nashua. In contrast to owner-occupied housing units, renter-households in more suburban and rural areas tend to be smaller in size. This likely reflects both a smaller number of rental units available in rural and suburban areas as well as the possibility that a larger percentage of rental units in these areas are comprised of accessory dwelling units. This data can assist the region and individual communities to design appropriate housing. It may be more appropriate, for example to emphasize the development of smaller accessory dwelling units in rural and some suburban areas, a variety of smaller-scale multi-family options, such as duplexes and triplexes near town and city centers and larger multifamily rental developments in more urban areas with access to public water and sewer, transportation, employment and convenient services. It should be noted, though, that small scale multi-family developments can be uniquely integrated into rural areas, especially on larger lots where large existing homes with multiple additions out buildings are common.

(US Census, 2013 - 2017 5-year Estimates)

## NH PUBLIC SCHOOL ENROLLMENT

From 2000-2017, most of the State and region’s net population growth were for the ages of 55 and older, and for the same time period, school age population declined. In 2000, there was an average of 0.45 children per household for all structure types and 0.45 children per household in 2010.

A Study commissioned by NHHFA on Housing and School Enrollment in New Hampshire found that the number of children per household is tied to the number of bedrooms in the residence opposed to the type of home. The Census’s American Community Survey indicates that single family units generate fewer than 0.5 students on average. Structures with more units, typically garden-style apartment complexes generate only 0.17 students (school age children) per unit. We also know that the number of bedrooms is the principal variable structuring enrollment per unit. This is especially true among newer, larger houses. Overall, new housing generates an average of less than ½ a student (0.48) per unit.

For both new and existing housing units, the number of school age children on average per household, based on the number of bedrooms is:

- An average 0.73 children live in four-bedroom homes, regardless of the house’s age.
- New four-bedroom homes average 0.99 children per home.
- Among all 3-bedroom homes there are 0.29 children per household and in new homes 0.64.

- For 2- or less bedroom homes, the number of school age children on average per household compares at less than 0.1.

Overall, the study found that traditional single-family residential development with 3 or more bedrooms was the greatest generator of children. Why is that? Most families choose a larger home with more bedrooms to accommodate their family size. At the opposite end of the spectrum, multifamily residential with 5 or more units in the structure or 2 or less bedrooms, typically appeals to households without school-aged children, such as young professionals and empty nesters.

As our population ages and we have more households that are small and have fewer children, consideration should be given as to how we address changing housing needs within current planning and zoning practices. What will the housing demand be, and will the region have an oversupply of existing larger homes? If so, can these larger homes be reconfigured to provide for smaller households?

## EMPLOYMENT

The region has experienced considerable growth in employment since 2010 and the Great Recession. The table below depicts the number of jobs that located in the Nashua Region by municipality in 2010 and 2017, as calculated by the New Hampshire Employment Security. The number of jobs in the region totaled 91,049 in 2010 and then rose 98,079 jobs in 2017, equating to a 7.7% increase. Note that over the same period, the region's population grew by only 1.45%, an indication that lack of housing supply may be limiting population growth.

The communities in the western part of the region, Mont Vernon (14.8%), Lyndeborough (18.1%) and Wilton (13.4%) saw the greatest declines in total employment, though the small size of their employment bases make them susceptible to significant percentage swings. Hollis (2.1%) also experienced a slight decrease in the total number of jobs. All other communities in the region saw an increase in the total number of jobs: Brookline (22.7%), Merrimack (21.7%), Litchfield (16.7%) and Pelham (14.6%) all made substantial percentage gains in the number of jobs.

Overall, Nashua and Merrimack combined to add nearly 6,000 jobs which accounted for approximately 82% of all job growth in the region and was completely driven by the private sector. Government jobs across the region decreased by 243 jobs, or roughly 2.4%. Private sector jobs grew by 7,030 and equated to an 8.9% growth. However, the total number of jobs in 2017 is similar to the number of jobs in 2000, when there were roughly 11,000 less people. Given that unemployment rates have recently been at historic lows, this appears to reflect a decline in the number of people participating in the workforce due lingering impacts of the Great Recession, aging of the population and an increase in people commuting to jobs here from outside the region.

According to ACS data, the median age of workers in Hillsborough County has increased by a full year, from 43.6 years old in 2010 to 44.6 years old in 2017. While many of the communities had median ages for workers in the range of 44-47 years old, Wilton and Hollis had the oldest median worker ages at 49.7 and 50.6, respectfully (US Census, 2013-2017 5-year Estimates).

## 2010 - 2017 Changes in Employment per NRPC Community

Municipality	2010				2017				2010-2017			2010-2017		
	Total	Private	Gov't	% of NRPC Employ.	Total	Private	Gov't	% of NRPC Employ.	Change in Total	Change in Private	Change in Gov't	% Change in Total	% Change in Private	% Change in Gov't

(NHES, 2017)

As displayed in the follow graphics, the region’s employment can be further broken down into three main employment categories:

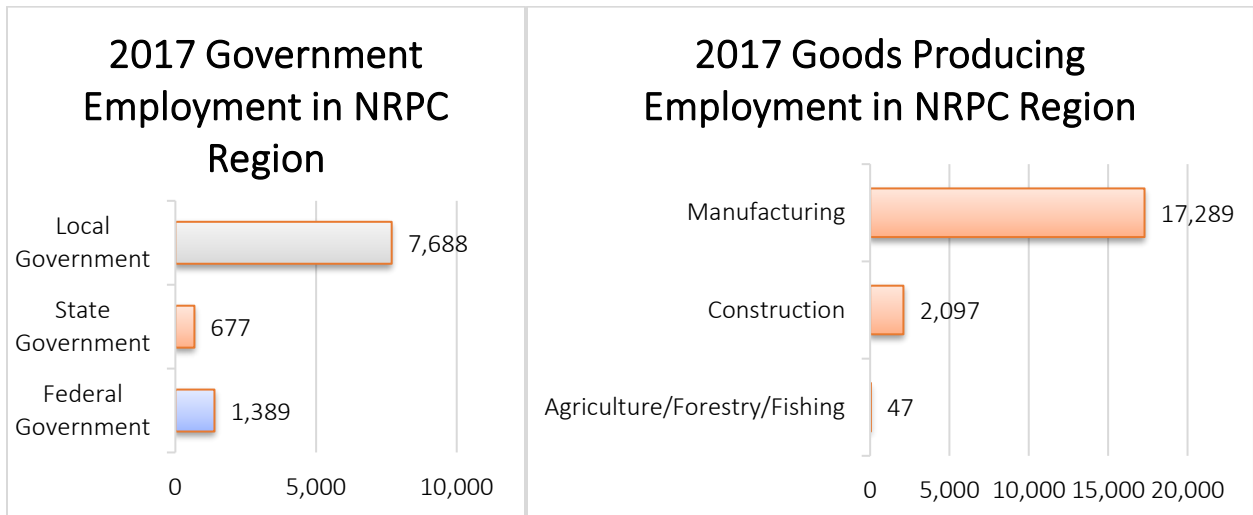

- Government including local, state and federal;
- Goods producing industries including construction and manufacturing; and
- Service providing industries like professional and technical services, retail, finance, health care accommodations and food.

(NHES, 2017)

Approximately two-thirds of the region’s 98,000 jobs were in service producing industries where the average wage was \$1,142 a week (\$28.55/hour, \$59,384/year). Goods producing industries accounted for 22% of employment and on average earned a worker \$1,593 a week (\$39.83/hour, \$82,836) with the highest wages, \$1,800 to \$1,900 a week, coming from manufacturing and construction for those in Merrimack and Nashua. Finally, about 10% of regional employment were for government jobs earning about \$1,044 a week (\$26.10/hour, \$54,288/year).

Tables with greater detail about employment numbers and wages can be found in Appendix A, under *Regional Employment and Wages*.

(NHES, 2017)

The goods producing industry (shown above) was driven by manufacturing with over 17,000 employees in the region. Wages within this sector were above industry average and paid approximately \$1,679 a week (\$42/hour, \$87,308/year). Some of the major manufacturing employers in the region include BAE Systems, Amphenol and Hitchiner Manufacturing.

Several areas stand out in the region’s service providing employment sector such as retail trade, health care, and accommodations food services. These three sectors accounted for nearly 51% of all employment. Some of the larger employers in the region in this sector include Fidelity Investments, Merrimack Premium Outlets, Southern New Hampshire Health and St. Joseph Hospital.

The growth in government jobs since 2005 has been relatively flat. However, the region has continued to shift toward more service providing industries rather than goods producing (i.e. manufacturing and construction). Major shifts since 2005 can be found in the following graph and more detailed tables can be found in Appendix A, *Regional Employment and Wages*.

## 2005-2017 Change in Employment by Sector in NRPC Region

All of the sectors listed are within the service providing industry except manufacturing and construction. Most relevant and worrisome to the production of housing, is the decreasing number of construction workers. The construction industry only employed 2,097 workers in 2017, a 1,738-worker decrease from 2005, and accounted for only 2.1% of the region's entire workforce, down from 3.9% in 2005. And while construction workers are earning moderate wages (\$30.2/hour, \$1,232/week and \$64,064), there is still a challenge of replacing the workers of past generations.

Empirical evidence within the region points to the lack of construction workers with skilled labor as a contributing reason why development costs are so high. As potential solutions to this issue, the region may want to consider further encouraging and educating our workforce about the pay and opportunities within the trades including professions such as construction managers, electricians, plumbers and mechanical technicians. Collaborations could be explored between high schoolers and workers in transition with technical schools, developers and construction firms.

## COMMUTER PATTERNS

### 2017 Commute Times to Work in NRPC Region

(US Census, 2013-2017 5-year Estimates)

Most of the region spends between 15-24 minutes commuting to work. The next most typical commute times were less than 15 minutes, followed by 45 minutes or more. Not surprisingly, communities with close access state roads have shorter commutes while those with longer commutes were further from these corridors, such as Lyndeborough and Mason.

Mean Commute Time (minutes)	
Amherst	33.5
Brookline	35.7
Hollis	31.1
Hudson	30.7
Litchfield	30.7
Lyndeborough	37.2
Mason	44.2
Merrimack	29.5
Milford	29.4
Mont Vernon	32.8
Nashua	26.9
Pelham	31.7
Wilton	30.9
NRPC Region	29.4
Hillsborough County	27.9
New Hampshire	27.2

(US Census, 2013-2017 5-year Estimates)

## COMMUNITIES OF INTEREST

Groups such as seniors and the elderly, minorities, single parents, individuals without access to a car, persons in poverty, those with limited English proficiency or disabilities often have lower household or family incomes and may find it difficult to secure safe, decent and affordable housing. The following

section looks at where there may be concentrations of such populations and their relative housing choice options.

## SENIORS AND ELDERLY

Seniors and the elderly often live on a limited income after retirement, limiting their housing choices if they don't already own their home or choose to downsize. As of 2017, 5.8% of the region was 75 years and older.

Nashua has the region's youngest population with a median age of 39, however approximately 6.6% of its population is 75 plus and has the greatest share of the region's oldest residents (7.3%). Further, within the City of Nashua there are several Census Tracts with what may be deemed a significant concentration of elderly persons. Lyndeborough, with the oldest median age (49.9) has about 5% of its population age 75 or older. While Litchfield is often cited as having a large share of age-restricted housing units, they have the smallest share of their population in this oldest cohort (2.4%).

(US Census, 2013-2017 5-year Estimates)

## SINGLE PARENTS

While many family households have two wage earners contributing to rent or a mortgage payment, single parent households typically do not have that benefit. Across the region approximately 14% of family households are led by single parents. Four percent of households are headed by single men with children under age 18 and 10% of households are led by single women with children. The thirteen communities are fairly homogeneous when it comes to single parent households, with no overall concentration. Those neighborhoods with the greatest number of single parent households are the same as those with the

highest rental cost burdens. In particular there are three Census Tracts in the City of Nashua where both the highest share of single parents and highest rental cost burdens coincide. Across the region, the percentage of single parents are lowest within Hollis at just under 5% and highest in Milford and Nashua at just over 10% each.

In past outreach efforts, single parents expressed that they feel hit harder than most sometimes. This is especially true for those that are just above the poverty line and receive no government assistance. These individuals said that as a single parent, finding housing that is affordable, safe, close to public transportation, amenities, and other services is extremely hard.

---

## PERSONS WITH DISABILITIES

Nearly 10% of non-institutionalized persons in the region have some form of disability. Living with a disability limits what housing may be suitable or available. Most common are ambulatory disabilities (43.4% of all disabilities) that limit an individual's ability to walk or climb stairs. Nearly 42% of disabled persons have difficulty living independently and 40.8% have cognitive difficulties. Thirty percent of the disabled have hearing difficulties. There is little to no concentration of individuals with disabilities within any of the region's municipalities. Nearly 12% of individuals have some form of disability in Nashua to a low of 4.9% of individuals in Mason. Within the City of Nashua however, there is a concentration of approximately 20% to 25% of all individuals living with disabilities in four Census Tracts.

During outreach conducted in 2014, we talked to residents who work with disabled adults in the Region. Their main concern was transportation, since many towns in the Region are rural and mostly residential neighborhoods it is sometimes hard to get them public transportation services in order to get to appointments and other services. Housing that is close to public transit access points and is in a safe and walkable community is most sought after for this population.

---

## LIMITED ENGLISH PROFICIENCY

Those with limited English skills face additional challenges when searching for housing. However, in the Nashua region the numbers of individuals who do not speak English well or not at all were so few, less than two percent of the population, that statistical analysis is unreliable. That said, using the data available, we know that there are virtually no individuals with limited English proficiency in Brookline, Lyndeborough, Mason, and Wilton. In Nashua, approximately fewer than 3.5 percent of individuals have limited English skills. The remaining communities in the region have one percent or fewer of their residents with limited language skills.

As a part of NRPC's outreach efforts in 2014, we heard from refugee advocates as well as refugees recently relocated to the Region and they mentioned that finding housing and other resources is challenging. There are many things standing in the way such as language barriers and sometimes even discrepancies based on ethnicity. Some felt that this demographic is often taken advantage of when finding housing, or possibly discriminated against due to accents and cultural or ethnic background.

---

## REFUGEES AND RECENT IMMIGRANTS

Between 1998 and 2013 the State of New Hampshire has been home to the relocation of over 7,000 refugees. The Nashua region has seen a total of 218 refugees since 2005. Years with the highest numbers of relocated persons were 2005 (51), 2012 (41), and 2013 (90). The only other municipality in the region where refugees have been placed is Milford, with a total of 8 refugees between 2000 and 2004. Except for 2009, every year since 2006 over 70% of refugees relocated to the state have found employment and in all but one year, over 80% found employment. Average hourly wages for fulltime employed refugees across the State have risen almost every year since 2006 (almost a one-dollar dip in 2010). In 2012 hourly wages reached \$9.63 meaning the average full-time refugee employee makes approximately \$20,000 per year before taxes. To qualify as affordable housing rent or mortgage costs should not exceed 30% of monthly income (roughly \$1,600 per employed person), leaving residents the choice of housing at or below around \$500 per month. After speaking to refugees during outreach it has been noted that finding affordable housing is indeed an issue in or near Nashua (NHDHHS, 2019).

---

## LIMITED VEHICLE AVAILABILITY

In a region where the 83% of workers drive their own vehicle to work, households without access to a vehicle are limited in their choice of where to live with few neighborhoods in the region having both jobs and transit in close proximity. In communities with lower shares of workers of driving alone to work (Lyndeborough at 77% and Mont Vernon at 78%), there is a much larger number of persons who work from home, which in turn requires access to high speed internet. Given that the City of Nashua is the only community in the region with regular transit service, it is not unexpected that there is a concentration of households without access to a car in the City (7.7% of households). Similarly, there are four tracts within the city with the highest concentrations of those without access to a car, with up to nearly 37% of households in one Census Tract.

(US Census, 2013 - 2017 5-year Estimates)

---

## VETERANS

The Department of Veterans Affairs which handles the entire State of New Hampshire is located just outside the Region in Manchester. This office provides veteran benefit services such as disability compensation, pensions, rehabilitation, specially adapted housing, and home loan guaranties to more than 130,000 veterans in the State of New Hampshire as well as New England, and New York State. Itinerant services provided outside the building are connected to the VA medical center in Manchester, VAMC clinic in Portsmouth, and the Portsmouth Naval Shipyard. Based on time served, disability, and other factors servicemen and women can be eligible for VA home loans which can be used for the following; buy a home or condominium unit in a VA-approved project, build a home, simultaneously purchase and improve a home, improve a home by installing energy related features or making energy efficient improvements, and buying a manufactured home or lot. When we heard from Veterans through outreach in 2014, many mentioned that they would like to see more affordable home choices and better public transportation infrastructure. These concerns are similar to most other communities of interest analyzed in this report, which coincides with the fact that New Hampshire has an affordability issue afflicting those looking to find housing (USVA, 2019; USVA Manchester, 2019).

---

## YOUTH

When we talked to youths in the region as a part of prior outreach efforts, overall, they were happy with their housing situations. A few had seen troubling displays of violence in their neighborhood but are positive about the resources available to them such as the PAL center in Nashua where they know they can be safe. Youth interviewed in the City of Nashua love amenities such as public pools and skateboard parks. Some said that there have been times their family couldn't afford rent which scared them. Like most interest groups in the region, public transportation systems are vital for youth to get to and from school and other activities and many of them travel alone, so it is imperative that this system is safe and reliable. We have heard from outreach that every so often a family in need will rent a room in one of the boarding houses in the region where children and youth are not legally allowed, which means that more affordable housing in safe neighborhoods is an inherent need in the greater Nashua area where this is most common.

Homelessness in the youth population has devastating side effects. Making sure there are resources available to all homeless people in the region but especially families with children should be a priority. According to a 1999 report published by the Institute for Children and Poverty, Center for Mental Health Services, and DHHS, it is shown that children are far more affected by homelessness. On average 47% of school-age children who are homeless experience anxiety and depression, 36% exhibit delinquent or aggressive behavior.

---

## HOMELESS POPULATIONS

Housing cost can be a significant factor in the number of homeless people in any given area. In the Nashua region average rental costs are over \$1,000 per month for two bedrooms. This is a barely attainable rental cost for those with entry level jobs or any profession making less than \$18 per hour. In

2003, the Continuum of Care, a collaborative group of service organizations in the Greater Nashua Region, conducted a one-day count of the homeless in the Greater Nashua Area and the count was over 800 people. In the Continuum of Care report on ending homelessness, they state that New Hampshire was recently ranked the 7th worst nationally in wage affordability index, making it hard for service level professionals to afford housing, and much harder for the homeless population. The state of New Hampshire Bureau of Homeless and Housing Services provides funding to 42 programs that offer shelter services for men, women and children, and victims of domestic abuse. Throughout the state more than 700 homeless persons are served nightly in emergency shelters, less than the total number of homeless people in Nashua alone (NHDHHS, 2019).

## CONCLUSIONS

The region's net population growth primarily came from age groups 45 years old and older and particularly, by the older subcategories: 55-64 and 65 years or older. At the same time, the number of children within the region continued to decline substantially. However, there has been a modest increase in the 20-24 age group, potentially indicating a trend toward greater in-migration or retention of the region's youth.

Population projections still indicate a decline in growth rates through 2040. This decrease can be explained by lower fertility rates, deaths expected to exceed births starting in 2020 and for all communities by 2025 and a slowing of overall net migration. Unless there is a change in one of these factors, the 2040 senior population is projected to be 2 to 3 times current population, a quarter of the population in 2040 will be 65 or older, and there will be limited change in younger populations. What considerations do we need to be thinking about as our population ages? Will our housing supply meet the needs and preferences of the aging population? With the little momentum the region has in attracting young, how can we further nurture, create and maintain housing stock that appeals to them?

Since 2000, the region has experienced changes in household composition and sizes. Households now consist of more non-traditional, unrelated, childless members and the number of household members has continued to decrease. Has the region adjusted, or should there be additional alterations to the way we approach and develop housing for shifting household composition and sizes? Contrary to this, there have been very slight upticks in the number of households with 7 or more people within them. Is this a continuing trend of multigenerational or shared housing?

How does the distribution of household sizes across the region affect the way we approach housing in a rural versus small town versus urban setting? Can distribution indicators help guide strategies and methods for addressing the different types of housing options. Do some of these implications guide strategies toward more accessory units, duplexes, triplexes, or larger complexes? Do we have the appropriate mix of housing types to meet demand of our demographic indicators including employment growth?

## EXISTING HOUSING UNIT TRENDS AND CHARACTERISTICS

### EXISTING HOUSING SUPPLY

The region experienced a 10.9% (8,147 units) growth in housing units from 2000 to 2010, according to the US Census. Then, from 2010 to 2017, the region's housing unit growth slowed to 4.3% by only adding a total of 3,544 units, according to the New Hampshire Office of Strategic Initiatives (OSI). Communities such as Litchfield, Milford, Mont Vernon, Brookline and Pelham all saw a growth in total housing units over 5% from 2010 to 2017. However, this is much less impressive than the double-digit growth rates nearly all communities were experiencing from 2000 to 2010. Given the turbulent housing market, it is somewhat surprising to see that Nashua was able to nearly replicate and stay consistent with their housing production between these two periods (the 2000's and 2010's). The significantly higher population, available resources and infrastructure could be reasons why Nashua have been able to steadily produce and maintain around 45% of all housing units in the region. Barring any major developments between 2018 and 2020, it is reasonable to expect that the region's overall growth rate and housing unit distribution levels for the decade will remain comparable to those reported in the table below.

The categorizing of row- or townhouses, often referred to as condominiums, is difficult. To avoid confusion across all municipalities, OSI made the decision in 1990 that any structure that is attached will be reported as a multi-family. This includes condominium units as well as structure that may have been single-family houses but now have accessory dwelling units (NHOSI, 2018).

## 2000 - 2017 Housing Unit Supply

### 2000 - 2017 Changes in Housing Units

(NHOSI, 2018)

The decreased production rates, or lack of significant growth, can be lingering effects of the Great Recession and its effect on various housing related markets such as real estate, construction and housing finance. Empirical evidence from housing industry experts contest that housing production has yet to fully recover to the pre-recession rates due to a shortage of skilled labor, high construction wages, high material costs, conservative consumer lending and lengthy permitting processes. NHHFA summarizes the five major impediments that affect the development of housing as the “5 L’s”: land, labor, lumber, laws and loans (NHHFA, 2019).

There is a significant variation in the nature of the regional housing stock. On a community-level, the number of housing units per community differs by over two orders of magnitude, from 593 units in Mason to over 38,800 units in Nashua. Housing patterns in the region are largely dictated by economic opportunity, access to assets such as roads, utilities (gas and 3-phase electric), schools, the price of land and zoning. While not all zoning ordinances currently permit the construction of new multi-family housing, all communities in the region have some existing multi-family options. Typically, the larger, more urban communities boast the more diverse housing options in the region, while the smaller, more rural communities tend to be predominantly limited to single-family housing.

(NHOSI, 2018)

Sixty-one percent of the region’s housing stock is single-family while the rest is made up of multi-family (37%) and manufactured housing (2%). However, in terms of overall numbers, approximately 91% the region’s multi-family housing units are in four of the thirteen communities; Nashua comprises of 64%, Hudson 10%, Merrimack 9% and Milford 8%, according to OSI. All four of these communities have near, or above, 30% of their of total housing stock designated as multi-family units, likely due to their proximity to economic opportunity and major transportation networks. It is also interesting to point out that Wilton, one of the region’s smallest and most rural communities, has also been able to provide diverse housing options for its community with similar percentages (29.7% of Wilton stock is multi-family) to the previously four larger, more urban communities. However, Wilton’s reasoning for a higher percentage of multi-family housing may be because of concentrated, historical development and lack of new development rather than proximity to economic hubs.

## 2017 Total Housing Units by Type in NRPC Region

Municipality	Total	Single-family		Multi-family			MFG housing			
	Numeric	Numeric	Percent of Community Total	Percent of Region Total	Numeric	Percent of Community Total	Percent of Region Total	Numeric	Percent of Community Total	Percent of Region Total

(NHOSI, 2018)

The following table further details building permit activity from 2010-2017 for each individual community, as reported by OSI. The 3,544 units that were produced during this time, 54.3% of them were for single-family units, 44.9% were for multi-family units and 0.8% were for manufactured housing. The region experienced an overall 3.8% growth for single-family, 5.3% for multi-family and 1.5% for manufactured since 2010. All but three communities, Litchfield, Milford and Nashua, had at least 75% their total housing construction driven by single-family housing. Nashua had a staggering 74.8% of their construction driven by multi-family units.

<b>2010 - 2017 Percentage of Building Permit Activity by Type</b>				
<b>Municipality</b>	<b>Total</b>	<b>Single-family</b>	<b>Multi-family</b>	<b>Manufactured</b>
Amherst	148	76.4%	24.3%	-0.7%
Brookline	129	94.6%	5.4%	0.0%
Hollis	100	93.0%	7.0%	0.0%
Hudson	393	87.8%	11.7%	0.0%
Litchfield	147	46.3%	53.7%	0.0%

<b>NRPC Region</b>	<b>3,544</b>	<b>54.3%</b>	<b>44.9%</b>	<b>0.8%</b>

(NHOSI, 2018)

The American Community Survey (ACS) goes into greater detail about the housing types in the region, however, it does report at a much higher margin of error so comparison between ACS and OSI numbers must be understood and taken in consideration. According to the ACS, and like OSI, they also report a 61% portion of all housing units are for detached single-family units. Housing identified as 1-unit attached in ACS were categorized as multi-family units in OSI reporting.

(US Census, 2013 - 2017 5-year Estimates)

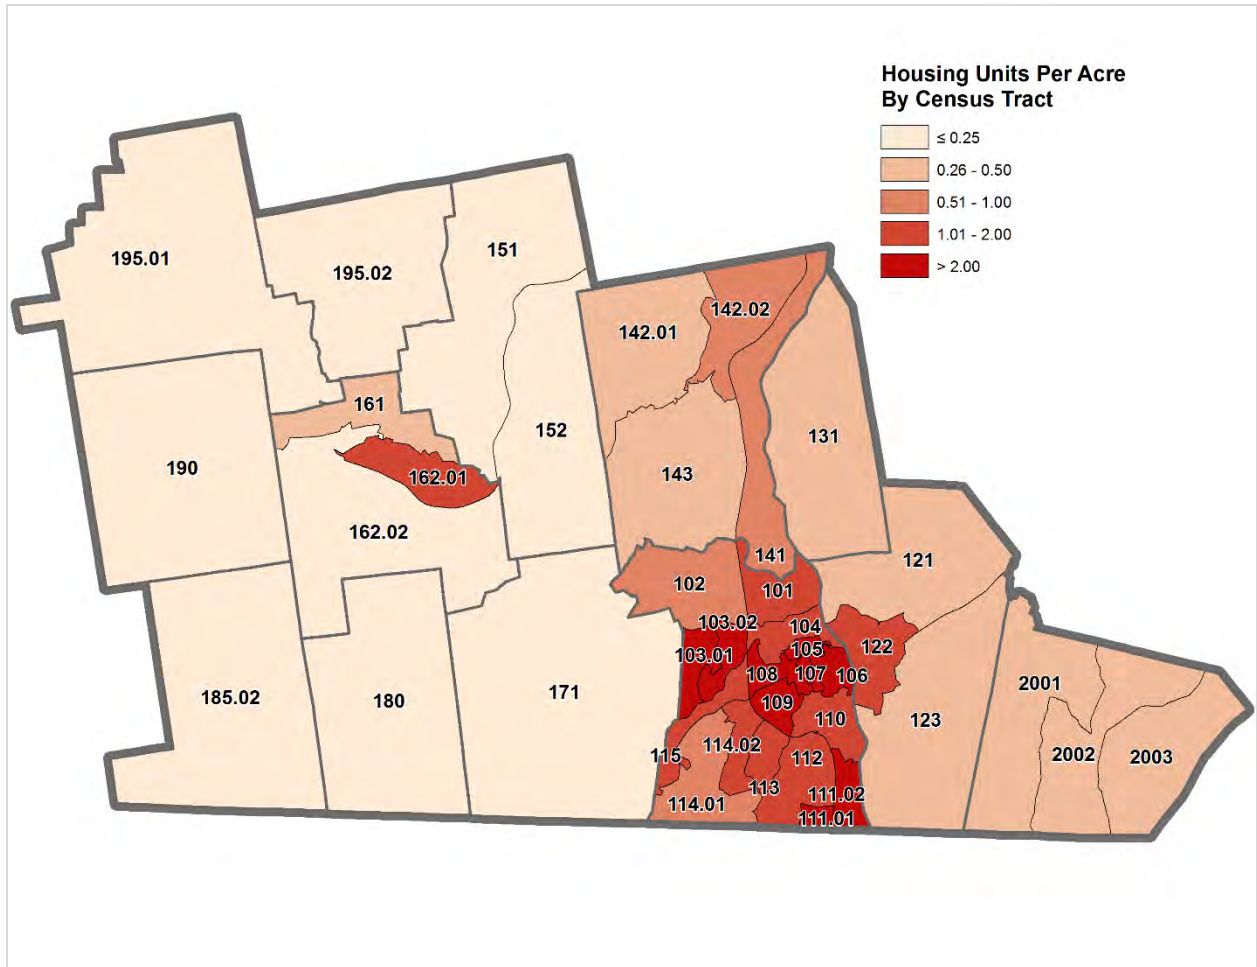

Reporting from 2010-2017 ACS, which does vary from OSI reported data, indicated significant growth among three housing types: single-family, 2-unit and 20-unit structures within the region. This growth reflects the likely structures that balance rural, small town and urban development. Other housing types such as 1-unit attached, 5-9-unit and 10-19-unit structure also experienced modest to small growth while 3-4-unit structures and mobile homes experienced moderate decreases.

(US Census, 2013 - 2017 5-year Estimates)

The variations of housing patterns in the region are largely dictated by zoning and access to assets, as previously stated. Housing density by census tracts can be seen in the following map.

(US Census, 2013 - 2017 5-year Estimates)

## BUILDING PERMIT ACTIVITY

Since 2000, building permit activity has greatly fluctuated. High building permit activity in the early 2000's was a result high demand and readily accessible consumer financing. However, this widely accessible financing came to be the detrimental to the years that followed. Major decreases in building permit activity, from roughly 2006 through 2011, coincided with the Great Recession and devastated many housing related industries, especially construction. Since its low point in 2011, building permit activity has slowly recovered but has not yet reached and sustained pre-recession levels.

(NHOSI, 2018)

From 2010 to 2017, there was a total of 3,544 residential building permits issued the region. Most permits (55.9% or 2,096) were issued for single-family housing units while multi-family and manufactured housing permits totaled 1,630 (43.5%) and 18 (<0.01%), respectively. In comparison to 2000 through 2009, the region experienced a split in residential housing permits of 71.1% for single-family units, 28.2% for multi-family units and <0.01% for manufactured housing.

The towns of Hollis, Hudson, Litchfield, Merrimack and Milford also displayed a significant level of commitment toward providing diverse housing options. Though this was a promising trend, it should be noted that Nashua accounted for approximately 57% of all new multi-family building permits from 2000-2017.

2000 - 2017 Building Permit Activity per NRPC Community							
Community	Total	Single-family		Multi-family		Manufactured Housing	
		Numeric	Percent	Numeric	Percent	Numeric	Percent
Amherst	659	586	88.9%	67	10.2%	6	0.9%
Brookline	469	455	97.0%	15	3.2%	-1	-0.2%
Hollis	475	360	75.8%	112	23.6%	3	0.6%
Hudson	1,472	1,056	71.7%	414	28.1%	2	0.1%
Litchfield	712	469	65.9%	243	34.1%	0	0.0%

<b>NRPC Region</b>	<b>11,509</b>	<b>7,614</b>	<b>66.2%</b>	<b>3,817</b>	<b>33.2%</b>	<b>78</b>	<b>0.7%</b>

(NHOSI, 2018)

Overall, the region and its municipalities should be encouraged by the recovering permit levels and the increasing mix of housing options. However, the region must also question where this development trend may go? What mix of permits and types of development are wanted and needed? Are there are areas where the permitting process can be improved and expedited? How should individual communities plan and disperse regional need in a more equitable manner among all communities?

## OCCUPANCY, VACANCY, AND TENURE

The total share of owner-occupied housing has hovered between 69% to 74% since 2000, according to the American Community Survey (ACS). Owner-occupied percentages in the region were highest in 2010, approximately 74%, during the Great Recession and eventually lowered to 70.5% in 2017. This resulted in a decrease in the number of homeowners from 57,276 down to 56,554. Reciprocal to these decreases, renters eventually came to occupy 29.5% of all housing units, an increase from 20,137 to 23,679 from 2010 to 2017.

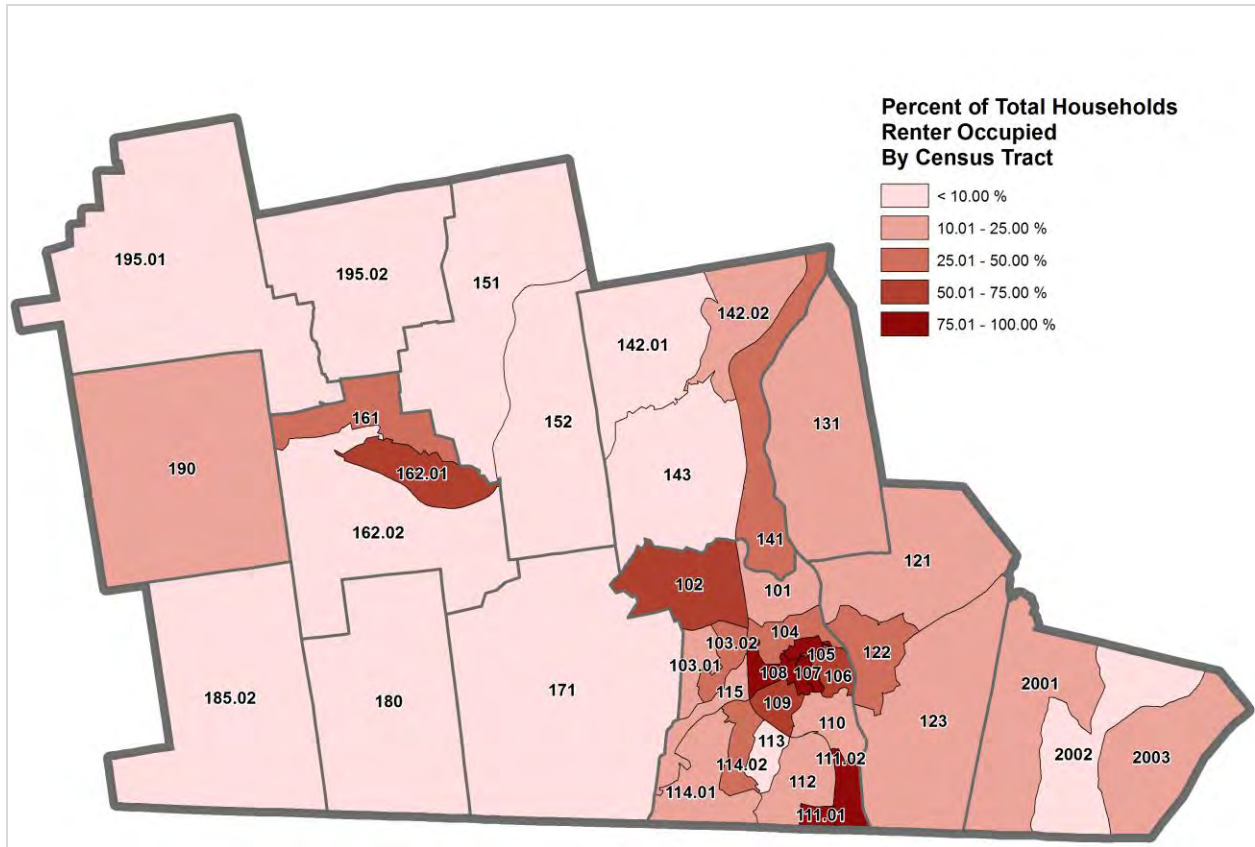

(US Census, 2013 - 2017 5-year Estimates)

The following chart further details the region’s substantial movement toward more renter-occupied units by housing composition. Overall, the percentage of owner-occupied units dropped by 1.3% while renter-occupied units grew by 17.6%. Any growth for owner-occupied units primarily came from non-traditional households which excluded married couples.

(US Census, 2013-2017 5-year Estimates)

(US Census, 2013 - 2017 5-year Estimates)

While an increased number of the region’s housing stock has been occupied by renters, most renters are located within the City of Nashua, the center of Milford, along the F.F. Everett/DW Highway corridor in Merrimack and west-central Hudson. It should also be noted that renter-occupied units are not always synonymous with multi-family housing. Rental housing options are vital for lower income, transient or younger households who do not have the equity or ability to purchase a home. There is anecdotal evidence that multi-generational households are on the rise and in-law attachments or accessory dwelling units are gaining in popularity. This could either mean that retired or elderly parents move into an attached dwelling with their children or choose to not downsize from their large single-family home so that they have room for children and grandchildren to stay when needed. However, these are sometimes difficult measures for the ACS or municipalities to capture.

The growth in renter households since 2010 has been noticeable and while changes in demographics and/or housing preferences may have contributed, there is considerable evidence that points toward the lack of affordable housing supply and economic conditions that lingered from the Great Recession, such as the ability to obtain loan and high construction costs (labor and lumber). The competition between first time home buyers and the aging population needing smaller housing, or more well-situated housing, has saturated demand for housing under \$300,000. Furthermore, new construction of single-family homes priced above \$300,000 have outpaced those below. The result has been more households into the rental market or more households becoming cost burdened by housing costs (NHHFA, 2019).

Only 8% of the owner-occupied units in our region are owned by minorities, while a slightly larger, 13% of renter-occupied units are inhabited by minorities.

### 2017 Owner-Occupied Housing Units in NRPC Region

(US Census, 2013-2017 5-year Estimates)

### 2017 Renter-Occupied Housing Units in NRPC Region

(US Census, 2013-2017 5-year Estimates)

The number of vacant units in the region rose from 1,683 units (2% of all units) in 2000, to 4,073 units (5% of all units) in 2010, according to the decennial US Census. During this time, the region experienced an uptick in owner-occupied units and a decrease in renter-occupied units. However, as a higher percentage of people became renters from 2010 to 2017, the number of vacant units in the region decreased by approximately 500 units down to a total of 3,554. For 2017, the ACS reported homeowner

vacancy rates below 1% and rental vacancy rates around 2.5% for the region. However, ACS data typically has higher margins of error and less accurate data in comparison to the Census. NHHFA reported a less than 1% rental vacancy rate for the region (NHHFA, 2019) and an approximate 3.5-month turnover rate from listing a home to closing (NHHFA, 2019).

(US Census Bureau, 2000, 2010; \*US Census Bureau, 2013-2017 5-year Estimates)

## 2017 Housing Units Occupied and Tenure

Municipality	Total units	Occupied		Vacant		Owner occupied		Renter occupied	
		Number	Percent	Number	Percent	Number	Percent	Number	Percent

Wilton	1,703	1,537	90.3%	166	9.7%	1,180	76.8%	357	23.2%
NRPC Region	83,787	80,233	95.8%	3,554	4.2%	56,554	70.5%	22,205	27.7%

(US Census, 2013 - 2017 5-year Estimates)

Whether referencing either the ACS or NHHFA, the impact of very low vacancy rates remains the same. A decreasing inventory of available housing “for sale” drives home prices up. As mentioned, this forces lower income households into the rental market until something more affordable comes online or forces them into a situation to take on more debt, become more cost burden with housing costs and less able to pay for other essential needs like medical services, transportation or groceries. Housing experts have stated that healthy vacancy rental rates typically hover around 6-8%, and healthy homeowner vacancy rates are closer to 2% or below (Florida, 2018; Kasulis, 2016). In addition to decreasing number of vacant units, the number of foreclosures across the state have significantly decreased; from about 4,000 a year at its peak in 2010, down to approximately 900 a year in 2018 (NHHFA, 2019). Simply put, the lack of a sufficient supply of affordable housing is driving vacancy rates down and prices up.

## AGE OF HOUSING STOCK

Like all other structures, housing units and their expensive components have a useful life. As housing units age, maintenance needs and costs increase. Additionally, older units may have fewer of the features and layouts that consumers are seeking. However, it should be noted that the historic nature of some older homes also appeals to certain households willing to preserve and update the units. In a more typical fashion, the older units move down through the housing market and are eventually replaced by newer stock. For analysis purposes, housing units aged 60 years or older has been identified as the threshold for those most likely to be in substandard condition. A large percentage of older units are found in two types of situations within the region: rural communities with relatively slow growth rates and the older town and city centers which developed in the earlier half of the 20th century.

2017 Housing Stock by Year Built in NRPC Region						
Municipality	Total housing units	Built pre-1960	Built 1960 to 1969	Built 1970 to 1979	Built 1980 to 1989	Built 1990 or later
Amherst	4,143	16.2%	16.1%	22.8%	19.8%	25.1%
Brookline	1,760	14.0%	5.0%	8.1%	19.0%	54.0%
Hollis	3,183	20.7%	6.8%	12.1%	24.2%	36.2%
Hudson	9,254	12.8%	10.9%	20.5%	29.2%	26.7%
Litchfield	3,080	3.7%	4.2%	24.4%	21.2%	46.4%
Lyndeborough	750	26.1%	4.1%	18.9%	17.9%	32.9%
Mason	632	22.5%	3.2%	14.2%	27.1%	33.0%
Merrimack	10,087	9.5%	12.0%	24.4%	29.7%	24.4%
Milford	6,368	26.6%	7.8%	13.1%	23.9%	28.6%
Mont Vernon	907	18.7%	2.3%	19.7%	20.0%	39.3%
Nashua	37,054	30.8%	12.9%	18.2%	23.5%	14.6%
Pelham	4,866	16.1%	13.8%	19.8%	15.0%	35.4%
Wilton	1,703	42.6%	5.9%	9.7%	18.1%	23.6%
<b>NRPC Region</b>	<b>83,787</b>	<b>22.6%</b>	<b>11.3%</b>	<b>1.5%</b>	<b>18.7%</b>	<b>36.4%</b>

(US Census, 2013 - 2017 5-year Estimates)

The rural communities of Wilton and Lyndeborough, which have experienced comparatively lower growth rates in the region, are comprised of larger portions of housing stock built before 1960; 42.6% and 26.1% respectively. The city and town centers of Nashua and Milford have high percentages, 30.8% and 26.6%, of pre-1960 housing stock due to their development in the decades earlier. The census tracts in the center of Nashua have the highest percentage of units built prior to 1960 as well as those built during the 1960's. In Tract 105 within Downtown Nashua, 80% of the housing stock was built before 1960. The newer, formerly rapidly developing suburbs of Litchfield, Merrimack and Hudson had some of the lowest percentages of older units.

It is reasonable to consider that older buildings in the region are not as energy efficient as newer structures and could result in households paying higher costs to heat homes through the winter. Nowadays, residents are interested in more energy efficient construction and heating options. Additionally, there is concern that older housing stock may be at higher risk for lead poisoning.

It is interesting to look further into the coming decades for communities which will have high percentage of housing stock 60 years or older. Those communities such as Brookline, Hudson, Merrimack, Nashua and Pelham all have over 30% of their housing stock built between 1960 and 1979. These communities will have a substantial percentage of their existing housing stock potentially susceptible to deteriorating conditions. Community representatives, homeowners and developers will need to prepare for the increased maintenance or replacements costs associated with an aging housing stock in addition to new demand.

(US Census, 2013 - 2017 5-year Estimates)

## ASSISTED HOUSING UNITS

Approximately 77.8% (or 1,848 of 2,373 units) of all assisted housing in the region is in the City of Nashua, the second largest concentration of assisted housing the State behind Manchester. The town of Milford (8.7% or 207 units) does provide a supplemental number of units outside of Nashua and while the other 11 communities in the region make up the remaining 13.5%, or 318 units.

2019 Assisted Housing Units in the NRPC Region							
Community	Total housing units	Assisted housing units					
		Total assisted housing units	Elderly	General occupancy	Transitional	Special needs	Substance abuse
Amherst	70	49	21	28	0	0	0
Hollis	24	24	24	0	0	0	0
Hudson	64	64	64	0	0	0	0
Litchfield	40	30	0	30	0	0	0
Merrimack	120	55	55	0	0	0	0
Milford	214	207	157	50	0	0	0
Nashua	2,174	1,848	1,125	554	100	13	56
Pelham	72	65	65	0	0	0	0
Wilton	33	31	31	0	0	0	0
<b>NRPC Region</b>	<b>2,811</b>	<b>2,373</b>	<b>1,542</b>	<b>662</b>	<b>100</b>	<b>13</b>	<b>56</b>

(NHHFA, 2019)

Past outreach efforts have shown that some residents in the region believe affordable housing options were scarce. Most residents said that they would like to see affordable housing options spread out in different neighborhoods; some also believe that zoning regulations are too stringent and would like to see more housing situated closer to employment and activity centers.

Assisted housing developments may include a mix of unit types including both rent assisted and market rate units (or only a percentage of units allocated as “assisted”). Therefore, not all housing units in such developments are classified as assisted and this difference can be seen when comparing “Total housing units” on the far left of the previous table to “Total assisted housing units” categorized under the Assisted housing units’ section. Approximately 65% of all assisted housing units are designated for elderly or senior populations. Of that, about 73% of those elderly or senior assisted living units are in Nashua, with another 10% in Milford. The remaining 17% of assisted housing for elders or seniors serves all other towns, a portion that makes up 49% of the total population. This has been concern raised in the past *Analyses of Impediments to Fair Housing Choice in New Hampshire*.

## CONCLUSIONS

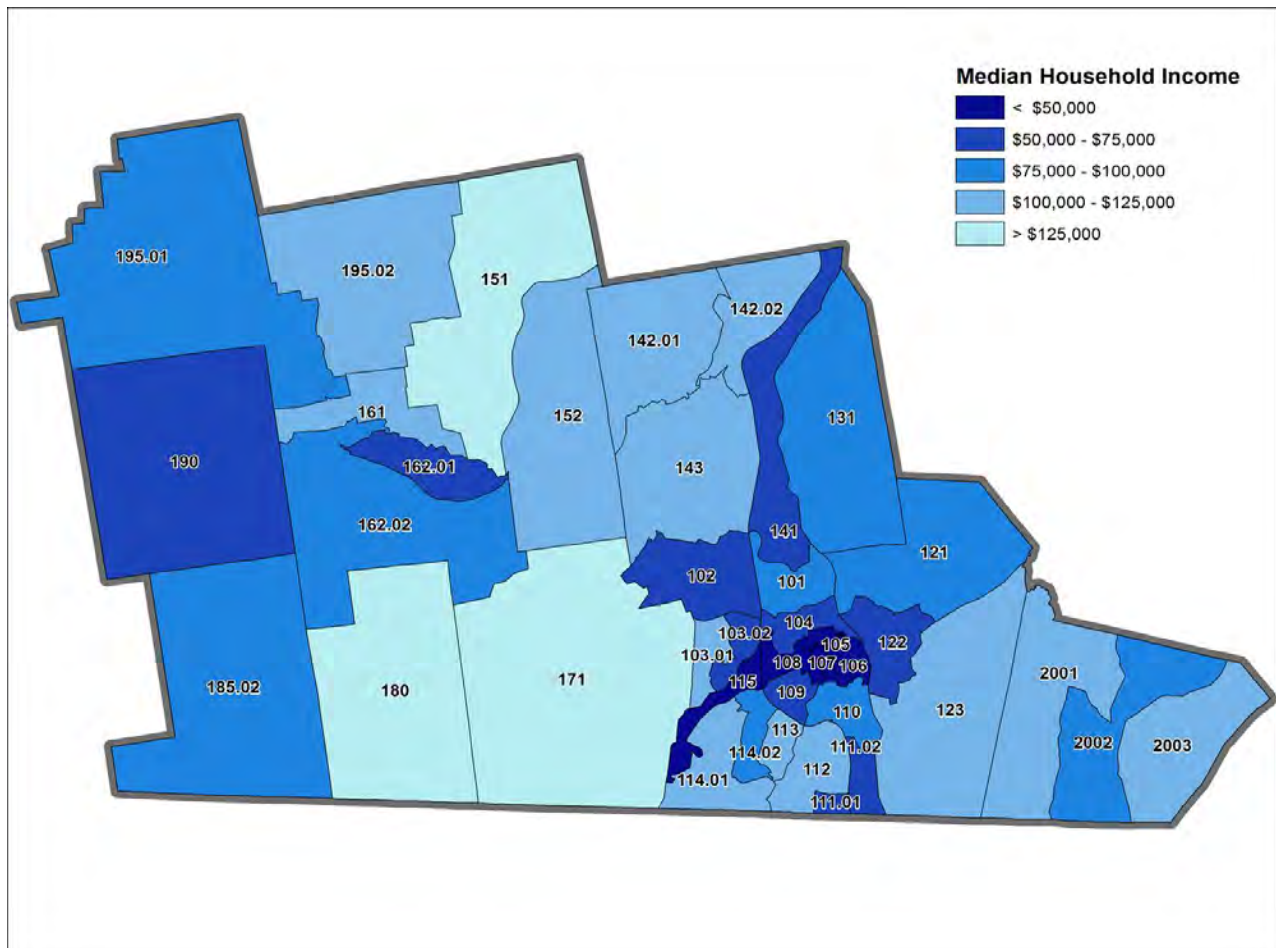

Approximately 61% of the region's housing stock is comprised of single-family housing and about 37% is designated as multi-family. Four of the thirteen communities encompass 91% of the region's multi-family stock. The total housing stock has increased by 15.7% or 11,691 units from 2000-2017. However, it should be noted that trends during this time-period did coincide with the Great Recession. From 2000-2010, 69.6% or 8,147 units were built while the remaining 30.4% or 3,544 additional units were constructed from 2010-2017. All communities throughout the region experienced significant decreases in construction levels from the decades before and after 2010 with one exception: Nashua. The city had similar construction levels when comparing the two time periods – 1,818 and 1,640 units per period – and accounted for approximately 30% of all housing construction in the region – 22.3% before 2010 and 46.3% after.

As the first half of the 2000s unfolded, housing construction was booming. From 2000 through 2005, the region averaged 990 building permits annually, roughly 24% of which were for multi-family units. From 2006 through 2011, building permits continued to decrease every year and had averaged 370 permits per year, with roughly 39% of them for multi-family units. Starting in 2012, there has been a slow recovery in building permit numbers. From 2012 through 2017, the region averaged 558 building permits a year with nearly 46% of them for multi-family units. The most encouraging takeaways were that 1.) in 2017, the number of building permits reached pre-2006 levels 2.) the percentage of multi-family has been rising and indicates a further diversifying of housing options for residents, and 3.) the region is finally able to start moving onto the next chapter of increasing overall stock which, ideally, would create healthier vacancy rates and lower housing costs. Questions going forward include: Will these production levels continue to rise? Will a variety of housing types continue to be built? How receptive will communities be increased production of multi-family housing? Do our zoning and land use regulations match our community visions and goals? How will municipalities and their voting residents maintain and update the zoning and land use regulations that govern the balance between development and community character? Does the predominance of single-family housing in most of our region align with changing demographics? How will housing preferences change over time?

## HOUSING MARKET, COST AND AFFORDABILITY

### MEDIAN HOUSEHOLD INCOME

Household income is the most important factor in determining housing affordability. The standard measure of household income, as reported by the U.S. Census, is median household income. The median household income is the mid-point in the distribution of incomes, with an equal number of households either higher or lower than the value. Household income measures all sources of income for all members of the household. A large disparity between household income and housing cost will lead to a variety of impacts on a region. If the cost of housing in a region is higher than the income earned by a typical household in that region, those households that cannot afford housing and have a limited number of strategies available to meet their housing needs. Housing experts have established a benchmark that the average household should not pay in excess of 30% of household income for gross housing costs, including rent and utilities. Once housing costs begin to exceed that figure, the household's ability to meet other normal expenses is compromised and the household is placed under increasing financial stress. These households are then categorized as being cost-burdened. The map below depicts the overall household income for each community and census tract in the region in 2017.

(US Census, 2013-2017 5-year Estimates)

Overall, the median household income for owner-occupied units ranged from the low- to mid- \$130,000 range for communities like Amherst, Brookline and Hollis to about \$80,000 in Wilton. The median household income for renter-occupied units ranged from the low- \$70,000 range for Amherst and Lyndeborough to about \$24,000 in Mason. The median household income for renters in Nashua was \$46,947, which was significant because 68.6% of all regional households renting were in Nashua. The median household income for owners in Hillsborough county was \$97,588 compared to \$44,730 for renters.

<b>2017 Median Household Income</b>			
<b>Municipality</b>	<b>All households</b>	<b>Owners</b>	<b>Renters</b>
Amherst	\$127,246	\$130,276	\$71,016
Brookline	\$127,222	\$134,079	\$45,000
Hollis	\$126,379	\$136,306	\$46,830
Hudson	\$93,042	\$104,215	\$58,633
Litchfield	\$93,715	\$108,592	\$69,730
Lyndeborough	\$84,948	\$87,891	\$71,250
Mason	\$94,653	\$97,813	\$23,571
Merrimack	\$97,400	\$105,419	\$56,750
Milford	\$73,601	\$97,667	\$42,002
Mont Vernon	\$107,143	\$114,167	\$52,667
Nashua	\$70,316	\$93,327	\$46,947
Pelham	\$102,577	\$111,779	\$51,250
Wilton	\$74,162	\$79,688	\$41,982
<b>Hillsborough</b>	<b>\$75,777</b>	<b>\$97,588</b>	<b>\$44,730</b>
<b>New Hampshire</b>	<b>\$71,305</b>	<b>\$87,002</b>	<b>\$41,638</b>

(US Census, 2013-2017 5-year Estimates)

HUD’s Comprehensive Housing Affordability Strategy (CHAS) tool provides a more detailed breakdown of the distribution of income per community, and more specifically, the number and percentage of households earning in comparison to the HUD Area Median Family Income (HAMFI). HAMFI is calculated by HUD for each jurisdiction, in order to determine Fair Market Rents (FMRs) and income limits for HUD programs. HAMFI will not necessarily be the same as other calculations of median income (such as a simple Census or ACS number), due to a series of adjustment that are made (HUD, 2019).

In 2016, the latest release date of CHAS calculated information, the median income for families in the Nashua metropolitan area was \$89,200 (HUD, 2016). The following two figures display household income distributions by community and relative to the \$89,200 HAMFI for the Nashua metropolitan area. Percentages of communities earning different income levels can be read from the x-axis, the numbers with each bar represent the number of households earning at each income level.

## 2016 Owner-Occupied Household Income Distribution as a Percentage of HAMFI

According to the figure above, the following summarizations can be made for owner-occupied households:

- Amherst, Brookline and Hollis were the only communities who had more than 70% of homeowners earning *more* than 100% of HAMFI.
- Milford, Nashua and Wilton all had over 40% of their homeowners earning *less* than 100% HAMFI.
- Litchfield, Milford, Nashua and Wilton all had about 15% of their homeowners earning *less* than 50% HAMFI.

## 2016 Renter-occupied Household Income Distribution as Percentage of HAMFI per Community

According to the figure above, the following summarizations can be made for renter-occupied households:

- All communities, except Amherst, Hudson, Litchfield and Lyndeborough, had over 60% of their renters earn *less* than 80% HAMFI.
- 60.0% of the entire region's renter households earn *less* than 80% HAMFI.
- 74.3% of all renter households earning *less* than 30% HAMFI are located within Nashua.

In 2017, the largest number of owner-occupied households in the region had incomes in excess of \$100,000 per year. The data, derived from the ACS, indicates that there were 29,815 households who met or exceed this \$100,000 income level, compared to 25,412 households in 2010. This group accounted for 51.7% of all owner-occupied units. The second and third largest groups for owner households was from \$50,000 to \$74,999 with 8,013 (13.9%) households and \$75,000 to \$99,999 with 7,747 (13.4%) households. In comparison to 2010, there were significant decreases in the percentage of homeowners who earned between \$50,000 and \$99,999; and conversely, significant increases in the percentage of homeowners earning \$150,000 or more.

2017 Percentage of Household Income by Tenure				
	2010	2017	2010	2017
	Owner-occupied	Owner-occupied	Renter-occupied	Renter-occupied
Less than \$25,000	6.2%	6.6%	28.8%	22.7%
\$25,000 to \$34,999	4.9%	4.5%	11.1%	11.0%
\$35,000 to \$49,999	8.8%	7.8%	17.6%	15.5%
\$50,000 to \$74,999	17.2%	13.9%	18.1%	17.1%
\$75,000 to \$99,999	17.5%	13.4%	10.3%	14.1%
\$100,000 to \$149,999	24.7%	25.7%	6.7%	10.0%
\$150,000 or more	18.8%	26.0%	2.1%	4.6%

(US Census, 2013-2017 5-year Estimates)

For renters in 2017, the lowest income group, earning less than \$25,000 per year, made up the largest percentage of renter households at 22.7%, or 5,567 households. The same was true in 2010 but curiously enough, the total number of households and their percentage of total renters significantly decreased. Where did low-income renters go? One could guess that they shifted up to a higher bracket, adjusted to a multi-generational living arrangement, cohabitated with non-family member or moved out of the region altogether. There were also other noteworthy shifts in the rental demand for higher income earners, as the following graphic will illustrate how housing tenure changed among the different income groups.

(US Census, 2013-2017 5-year Estimates)

Income groups earning \$75,000 or more all experienced hikes in their percentage of total renters in comparison to 2010. This trend potentially points to the possibility that previous homeowners moved into the rental market due to foreclosures, downsizing, reduced maintenance or housing preference. Furthermore, it is possible that young adults delayed their entry into homeownership as student loans, affordability, preference or lack of trust in the housing market. Even when considering the rate of

inflation between these two periods, both owner-occupied and renter-occupied units became increasingly inhabited by higher income households and provided less stock for low-income households.

The following graphic displays the same information in a different manner. One which shows net changes in housing tenure across each individual income group. The most drastic summarizations from this graphic are that the net number of renters across all income groups increased, except one, the lowest earning household income group making less than \$25,000 a year. The other takeaway is the decline in homeownership for households earning less than \$100,000 a year. Coincidentally, this threshold is right above to the 2017 household area median income of \$94,100 (HUD, 2017) for the Nashua metropolitan area and right below the 2018 mark of \$106,300 (HUD, 2018). This information drives home the point that it is becoming increasingly difficult for those earning less than the area median income to afford housing in the area.

(US Census, 2013-2017 5-year Estimates)

## HOMEOWNERSHIP MARKET

There are various reasons why households are moving toward the rental market, whether that be for affordability, proximity to amenities or services, employment opportunity, short-term living or just preference. However, one aspect that is contributing to this trend is the tightness of the housing market.

The following graphic, provided by NHHFA, gives light to the reason why the housing market is so tight. A promising trend from this graphic is that number of housing units being sold is increasing. This increasing trend tells us that homebuyers are more confident, demand is high and there is a sign of recovery from the Great Recession. However, the number of monthly listings is steadily decreasing.

One way that NHHFA assesses these two trends is through a measurement called *absorption rate*. Absorption rate is the average time it takes for a home to be listed and sold. The red line in the following graph indicates a decreasing trend that, as 2018, was about 3.3 months. The combination of low inventory and speedier absorption rates put upward pressure on overall housing prices.

(NHHFA, 2019)

Statewide information from NHHFA also indicates that the number of housing units listed under \$300,000 has now been surpassed by those listed above that mark in a 43/57-percent split (NHHFA, 2019). The region and State are in a challenging and competitive environment for housing under \$300,000. In this market, those competing for these homes are typically retirement-aged households looking to retire and younger first-time homebuyers. In this scenario, younger households typically lose out because they usually have more financial obligations, less cash for down payments, lower lines of credit and overall higher dependency on financial institutions. In-turn, this relates back higher levels of renters for young people or migration out of the region.

## Home Listings in New Hampshire

### MEDIAN HOME VALUES

The value of residential properties in the NRPC region was on a steady upward trend from 2000-2007 when demand was high, and lending was readily available. In 2000, the median price for all homes was \$160,000, while the median price for a new home was \$229,713, according to the NHHFA. Condominiums in 2000 had a median purchase price of \$110,900. The recession of the late 2000's led to a steep decline in values with the median purchase price hitting a low point in 2012. Since that time, median purchase prices for all homes has been increasing, reaching \$285,000 in 2018. This 6-year period, from 2012 to 2018, yielded an annual increase of 4.4% and resulted in home values near pre-recession, 2005 levels.

(NHHFA, 2019)

### AFFORDABLE OWNER-OCCUPIED HOUSING UNITS

In 2018, the estimated workforce housing purchase price (considered to be affordable) for the Nashua HUD Metropolitan Fair Market Area (HMFA) was \$352,500 for a family of four making 100% of the HUD median area income, which was \$106,300 per year. Using this reference point for analysis, approximately 74.2% of the housing sold in the NRPC for 2018 fell below HUD’s workforce housing purchase limit for affordability. Even though roughly three-quarters of the housing stock was identified as “affordable” for owners, it does not exhibit the extremely low vacancy rates and the fact that the number of homeowners in the lowest income brackets have decreased since 2010. It is reasonable to conject that buyers in 2018 were wealthier and did not need as much financing (i.e. had more cash for a down payment) to gain a competitive advantage over lower income, cash-strapped, heavily financed home buyers.

(NHHFA, 2019)

For households earning below the median income, the housing options become more limited. The following map shows the percentage of owner-occupied units which are less than \$300,000 by census tract. Due to ACS data limitations, the \$300,000 threshold was used as most comparable data point relative to HUD’s workforce housing purchase limit for affordability. Across the region, the percentage affordably owned housing was highly varied. Communities that are adjacent to the F.E. Everett Turnpike, DW Highway, and NH 101 typically had higher percentages of affordable housing. The town and city cores of Milford and Nashua had the highest percentage of affordable housing and Hollis had the least percentage of affordable housing. In a University of New Hampshire survey, 10% of residents in the region found housing to be very affordable in their community while 60% of residents found housing somewhat affordable, and 22% said not affordable.

(US Census, 2013 - 2017 5-year Estimates)

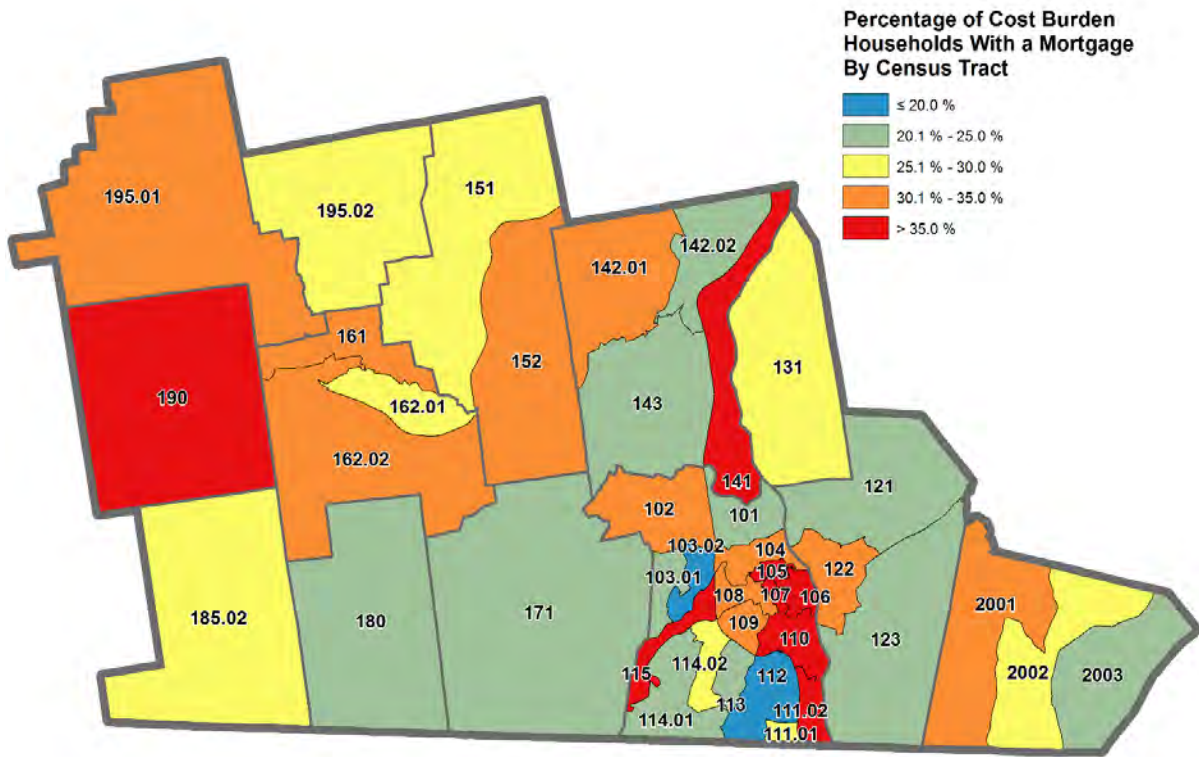

## COST BURDEN HOMEOWNERS

As affordable homes under the \$300,000 mark varied across the region and its census tracts, so did the percentage of household that are cost burdened. Cost burdened is defined as those households which pay more than 30% of their gross income on housing costs, including utilities. As of 2017, over 14,300 households or about 25% of owner-occupied households in the region were considered cost burdened.

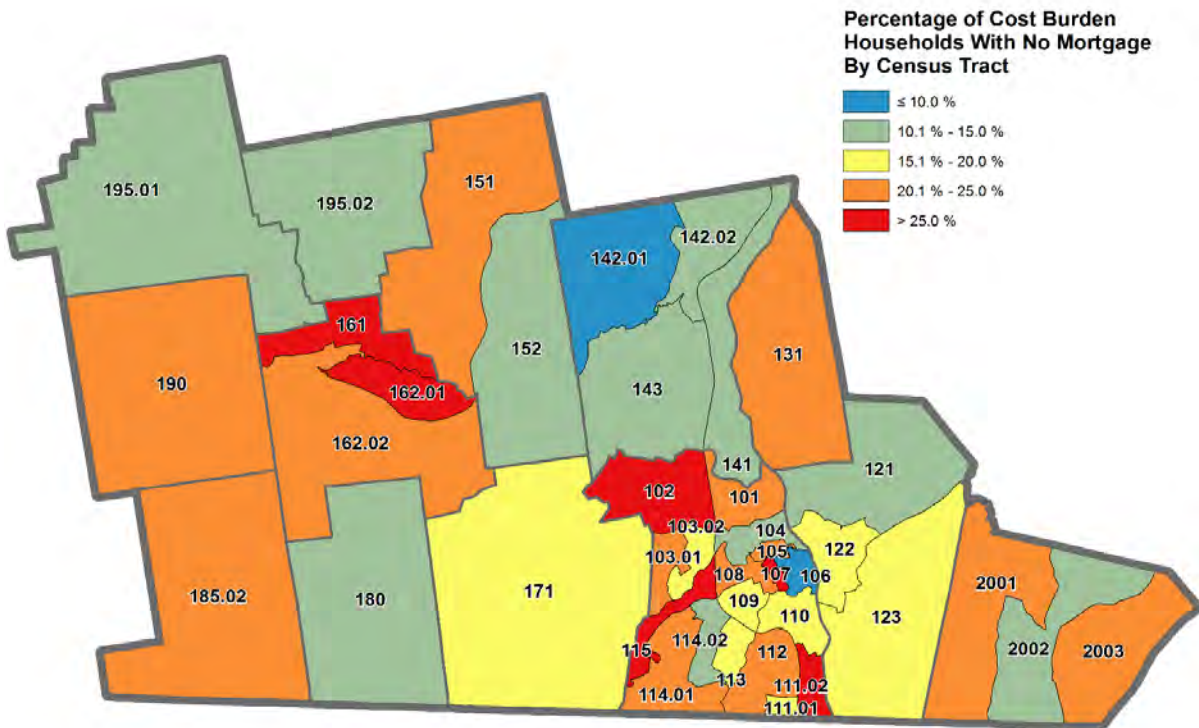

(US Census, 2013 - 2017 5-year Estimates)

Some census tracts may have affordable home prices, however, incomes within those tracts or more broadly those municipalities, may not support the purchase of a \$300,000 home. Once again, as the following maps show, the percentage of cost burden households varied greatly across the region. Even households without mortgages can be cost burdened by property taxes, utilities and maintenance, etc. Communities need to consider all aspects such as income, affordability and cost burden when drafting regulation changes, initiatives and housing strategies.

(US Census, 2013 - 2017 5-year Estimates)

(US Census, 2013 - 2017 5-year Estimates)

## RENTAL MARKET

As more people move from the homeownership to rental market, this applies pressure to supply and ultimately the prices of rental units. Before the Great Recession when the construction of home and the lending for them was rising, so were rental vacancy rates – more rental units were available, and prices were relatively flat. This trend continued right up to the collapse in 2009. Since then, rental vacancy rates have been on a steady decline and as 2018, were still at or below the 2% for all units. Early indications on 2019 report an even lower vacancy rate, at or below 1% (NHHFA, 2019).

(NHHFA, 2019)

## MEDIAN RENTAL COST

According to the NHHFA, the median gross rent per month in 2000 was \$834, \$1,048 in 2006, \$1,120 in 2012 and \$1,419 in 2018. This represented a 3.9% annual growth. Just from 2016 to 2018, the median rental cost jump \$163 per month and represented over a 13% hike. The lack of *available* overall stock for purchase has moved these potential homeowners into the rental market and driven demand for higher quality and more expensive rental units. This coupled with anecdotal evidence that households may prefer more downtown, walkable-centric housing, the overall rental market and cost to rent has steadily climbed.

(NHHFA, 2019)

Data from the 2017 ACS provides a snapshot of the median gross rents being paid by the households of individual communities across the region. Rents vary considerably across the region and except for Mont Vernon and Wilton, all were higher than the statewide median. Curiously, the town of Mason was indicated to have the highest median gross rent, but this should be taken lightly. The ACS data normally reflects higher margins of error than the Census and this is compounded by very small sample size for the Town. Amherst and Hollis have the next highest rents at \$1,592 and \$1,573. Milford and Nashua are home to the largest share of the region’s rental supply and had the fifth and seventh highest rental costs (US Census, 2013-2017 5-year Estimates).

2017 Median Gross Rent in NRPC Region	
Community	Estimate
Amherst	1,592
Brookline	1,172
Hollis	1,573
Hudson	1,336
Litchfield	1,214
Lyndeborough	1,163
Mason	1,750
Merrimack	1,426
Milford	1,123
Mont Vernon	927
Nashua	1,196
Pelham	1,168
Wilton	979

## AFFORDABLE RENTER-OCCUPIED HOUSING UNITS

The 2018 estimated workforce housing limit (considered to be affordable) for monthly rent in the Nashua HUD Metropolitan Fair Market Area was \$1,440 for a family of three making 60% of the HUD median area income, which was \$57,400. Based on the HUD’s workforce housing limit for affordable rental housing, approximately 62.8% of rental units in the region sampled in 2018 were affordable. However, residents in the region found it hard to find affordable rental properties that met their needs.

(NHHFA, 2019)

The following map shows the percentage of renter-occupied units which are less than \$1,500 a month by census tract. Due to ACS data limitations, the \$1,500 a month threshold was used as most comparable data point relative to HUD’s workforce rental limit of \$1,440 a month for a household earning 60% AMI. Across the region, the availability of the affordable rental housing was highly varied but there were some key indicators. Census tracts adjacent to the F.E. Everett Turnpike, DW Highway, and NH 101 typically had higher percentages of affordable housing. The town and city cores of Milford and Nashua also had high percentages of affordable housing while southern Nashua had the least percentage of affordable housing.

(US Census, 2013 - 2017 5-year Estimates)

## COST BURDENED RENTERS

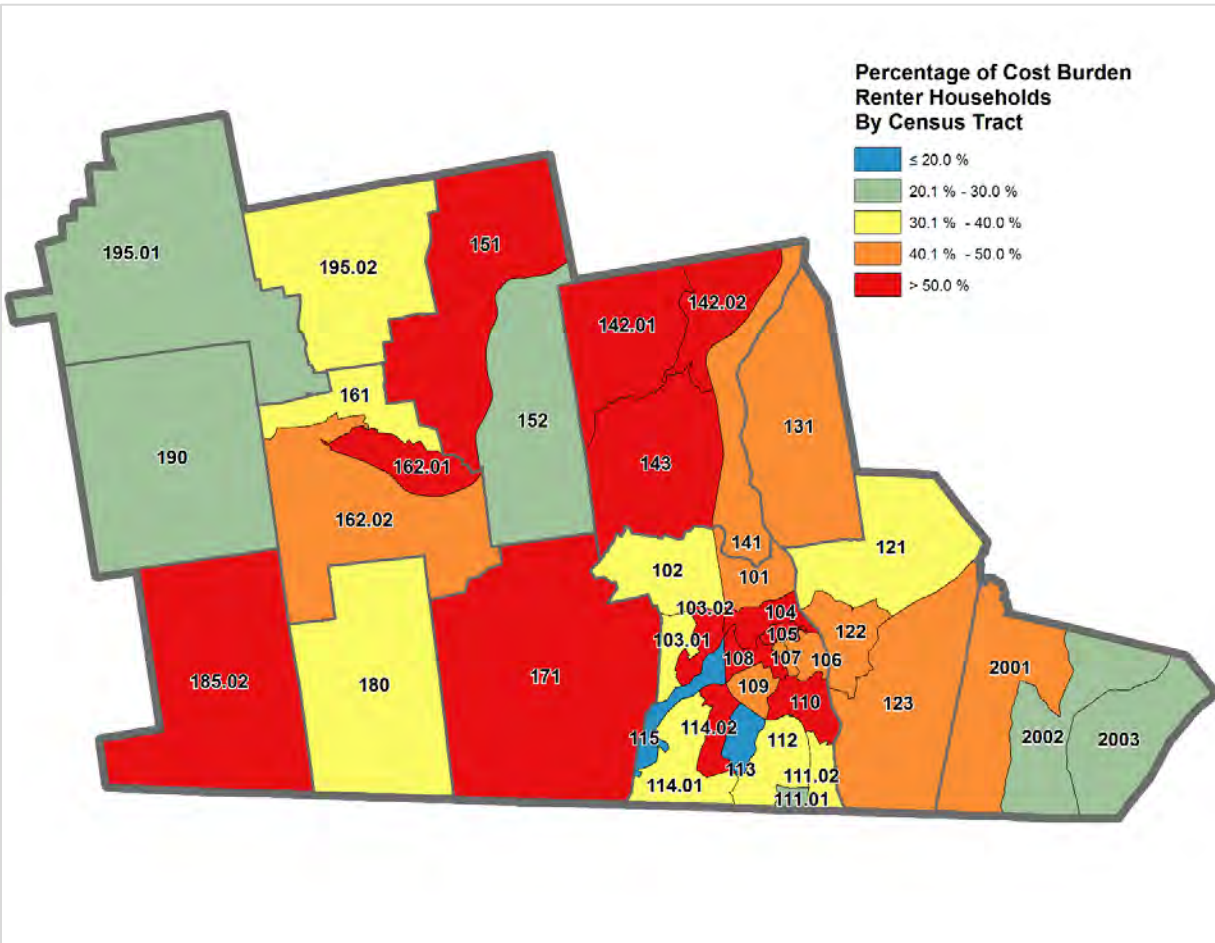

As rental units under the \$1,500 a month varied across the region and its census tracts, so did the percentage of households who were cost burdened. Cost burdened is defined as those households which pay more than 30% of their gross income on housing costs, including utilities. As of 2017, about 10,500 households or about 46% of all rental units were considered cost burdened.

## 2017 Housing Costs Relative to Income in NRPC Region

(US Census, 2013 - 2017 5-year Estimates)

Some census tracts may have affordable rental prices, however, incomes within those tracts or those renting these units may not have income that support a \$1,500 a month rent. Once again, as the following maps show, the percentage of cost burdened households varied greatly across the region.

(US Census, 2013 - 2017 5-year Estimates)

## CONCLUSIONS

The housing market, for both purchase and rent, has been increasingly tightening since the Great Recession. Between 2000 and 2007, the median purchase price of new and existing homes rose significantly. However, purchase prices steadily decreased from 2007 until about 2012 in response to the sub-prime lending and foreclosure crisis of the Great Recession. Then, from 2013-2018, median home prices for all homes grew at a rate of 4.5% per year from about \$240,000 in 2013 to \$285,000 in 2018. Early reports for 2019 also indicate a continuing trend of rising prices for both new and existing homes (NHHFA, 2019).

The 2018 estimated affordable purchase price for the Nashua HUD Metropolitan Fair Market Area is \$352,300 for a family of four making 100% of the HUD median area income, which was \$106,300. In 2018, about 70% of homes were considered affordable to households making the median income. However, the number of housing units being sold are rising and the number of units available are drastically decreasing. The absorption rate for home purchases has hit historic lows and currently sits around 3.3 months. Households earning below the median income are being pushed out of the home purchasing market by those higher earning, less-financed households. Furthermore, 25% of all owner-occupied units are categorized as being cost burdened.

Since 2010, the region has experienced greater portion of households becoming renters whether that be because of the price to income ratio, limited purchasing power, preference to more urban centric living or low maintenance housing options. This shift has driven down rental vacancy rates, created a demand for higher quality rental units and applied upward pressure to rental costs.

As rental prices averaged 2.3% annual price increase from 2000 through 2014, the annual price since then has ballooned to a 5.7% annual rate (NHHFA, 2019). The rental market and the cost to rent has steadily climbed with even greater demand for 2- bedroom units. While the 2018 estimated workforce housing limit has significantly risen, approximately 63% of all rental units in the region were affordable according to HUD's standards. However, 45% of renter households are cost burdened and paying more than 30% of their income to rental costs. While in theory there is a supply of affordable rents relative to incomes, those units are not always available when needed.

## HOUSING CHOICE OPPORTUNITIES AND BARRIERS

### INVESTMENT AND INFRASTRUCTURE

Land use controls and investments made by communities in infrastructure can either further or hinder opportunities for development of a wide range of housing options for all households; especially lower-income households.

---

#### LOCAL LAND USE CONTROLS

The 2015 Analysis of Impediments to Fair Housing Rights in New Hampshire identified local land use controls as one of the greatest barriers to the ability to construct affordable and equitable housing choice opportunities. In particular, land use regulations limit housing variety through restrictions on the creation of multi-family housing, incentives for age-restricted housing for older persons, and large lot requirements. These types of restrictions can have a distinct impact on minority households. Black and Latino households are more likely to live below the poverty line and generally need more affordable housing, likely multi-family rental homes (NHHFA, 2015). Most all communities in the NRPC region allow for multi-family housing under their existing zoning ordinances and those that don't have been actively working to develop new regulatory provisions that allow for multi-family homes.

Many communities in New Hampshire during the height of population growth established incentives for the development of housing for older persons as permitted under state and federal law. Given that the State has an aging population, the development of age restricted housing was partially in response to meeting a growing demand. Additionally, senior housing theoretically had lower tax implications to municipalities than housing with children, making it more desirable. While such developments are exempt from familial status and age discrimination complaints, their proliferation came at the detriment of meeting housing demands for families with children. Some communities, such as Litchfield and Pelham, have repealed such zoning provisions that might provide incentives to housing for older persons. By doing so, communities are allowing the market to act more independently.

Large lot zoning, two acres or more per lot, and additional requirements and fees placed on subdivisions can drive up the cost of single-family development. Again, where Blacks and Latinos have a lower median income than other households, housing options begin to decrease as costs increase. These additional requirements can put minorities at a disadvantage when trying to purchase a home in a higher cost more rural community. Across New Hampshire, the Workforce Housing Law requires that all communities ensure that the cumulative impact of their land use regulations and ordinances do not limit the ability to construct workforce housing in a majority of the residentially zoned land area. As a result, many communities such as Milford and Amherst have conducted an audit of their ordinances impact or developed amendments to allow for smaller lots and a greater variety of home types, sizes, and prices.

Participants at NRPC's 2013 housing workshop expressed the need for more flexible zoning and land use regulations to allow the housing market to adapt to the demand for smaller, more affordable homes, particularly for young adults and elderly relatives. Many spoke about instances where young adults are

“doubling-up” because they could not find an affordable rental home. Even more frequently noted was that too often zoning ordinances in the region limited the ability to create permanent or temporary smaller apartments, particularly accessory dwelling units, and in many instances where they were permitted they were limited to occupancy by a family member. Planning for the future, flexibility will be essential to meet changing demand and allow for accessory apartments to allow for tenancy regardless of age or relation. Specific examples of need included live in care for elderly residents seeking to age in place, or young adults seeking a chance to rent a small space and build savings for the future. In addition to flexible regulations, participants called for additional opportunities to enable development of affordable homes near community and employment centers.

As a result of this feedback and a tightening of the housing market, the state of New Hampshire established NH RSA 674:71-73 for Accessory Dwelling Units in 2017. The statutes require that any municipality that adopts a zoning ordinance shall allow accessory dwelling units as a matter of right or by conditional use. The subsection *Accessory Housing* within the *Resources for Meeting Local Needs* section further details the nuances of the statutes.

The City of Nashua’s Analysis of Impediments of Fair Housing further discussed the impact of land use regulations and building codes. Specifically related to building codes, often violations are under reported by minority groups out of fear of reprisal from landlords. Additionally, the City noted that its appointed boards making decisions for land use regulation and tax policy do not reflect the diverse population in Nashua. Within the City itself, lot area requirements are not restrictive and thus represent an opportunity. Further still less than 10% of the vacant lands in the City are constrained or have other characteristics that would prohibit development (City of Nashua, 2010).

---

## INFRASTRUCTURE AND ENVIRONMENT

The region’s public water and sewer supply is limited to the most densely settled locations. This limitation reduces the potential to develop at higher densities and can increase the costs of development for affordable housing in locations without infrastructure. A map of the region’s water and sewer infrastructure has, for several reasons, been one of the more difficult pieces of information to collect for assessment. Previous iterations have been included in past assessments, however, the most current mapping, as indicated by NH Department of Environmental Services (NHDES), has been only able to map a portion of the total system. It should be a top priority for both NRPC and individual communities to begin properly recording and maintaining the water and sewer infrastructure systems which dictate levels and dispersion of development throughout the region.

The region’s relatively older housing stock creates a higher risk of lead paint poisoning for families. The City of Nashua has an extensive lead paint prevention program that other communities in the region could benefit from. Educational materials could be shared and disseminated among communities across the region. The presence of lead paint is considered to be an impediment to fair housing for families with children, particularly in the City of Nashua (City of Nashua, 2010).

In a recent Workforce Housing Charrette with the town of Pelham, the need and desire to develop workforce was undeniably present however, the charrette concluded that the limiting factor to creating affordable workforce housing was due to the lack of water and sewer infrastructure. Developers eventually could not propose viable projects at affordable prices due to the restricted number of units possible based on engineering and septic requirements. This is a case for exemplifying the importance of water and sewer infrastructure and its ability to impeded affordable workforce housing developments. Mapping of this essential infrastructure data can be critical to the planning and feasibility of workforce housing in the future.

## TRANSPORTATION

Transportation is another key element in the development of workforce housing. Access to reliable transportation is not always possible for all residents in the region, whether that be access to an automobile, fixed bus routes, on-demand services and ADA compliant vehicles. However, the region fares well in regard to vehicle access. Nearly 95% of all households have access to at least one vehicle, with about 68% of households having access to two vehicles, and about 83% of workers drive alone to work. The mean commute times vary across the region. Reasonably, those communities located further from major state roads have higher commute times, specifically Lyndeborough and Mason. Even as the percentage of remote workers increases, it should be another top priority to maintain and improve transportation services and accessibility throughout the region.

---

### TRANSPORTATION CHOICES

According to ACS data, Nashua boasts the seventh highest share of residents who utilize public transit for commuting trips in New Hampshire, and the second highest share among cities with a population above 10,000. The region offers a couple of intercity transit services including Boston Express, a public-private bus service linking Nashua to Boston and the Manchester Transit Authority which operates its Nashua Express service between downtown Manchester and the Nashua Mall (FEE Turnpike Exit 6). This service allows a connection to the Nashua Transit System Routes 8 and 9 which run to the NTS Transit Center where passengers have full access to the Nashua Transit System route network.

As a share of commuting trips, residents of the region who walk or bike represent a relatively small share of the region, comprising only 2% of the population. Additionally, the region contains a handful of very walkable areas, proving a strong foundation for the expansion of pedestrian and bicycle-friendly infrastructure and development. Across the region, approximately 28% of residents and 27% of jobs are located within a half mile of downtowns or town centers with generally well-connected sidewalk networks.

---

### TRANSIT ACCESS

While HUD has prepared a transit accessibility index for some parts of the nation, this data is not available for the NRPC region. Instead, NRPC looked at the location of adults in poverty and those areas designated as low to moderate income areas in the region and their proximity to transit choices in the region. A low

to moderate income area is determined by HUD using special tabulations of Census data to determine areas where at least 51% of households have incomes at or below 80% of the area median income (AMI).

Nine out of the thirteen communities in the region have some access to transit services. Fixed route transit services provided by the Nashua Transit System (NTS), while limited to the City of Nashua, serves the greatest share of the region’s low-income population and low to moderate income areas. As of 2019, approximately 86% of Nashua households are within a quarter mile of an NTS fixed route; 97% are within a half mile and about 99% are within three-quarters of a mile. Additionally, there are three park and ride locations within the City which enable a central point for carpooling in the region. The Souhegan Valley Transportation Collaborative contracts with NTS to provide Souhegan Valley Rides, an on-demand transit service offering affordable, wheelchair accessible transportation for non-emergency healthcare appointments and other essential activities in six of the region’s communities. Due to funding requirement, this service is primarily geared towards seniors and residents living with disabilities. Additional on-demand transit service is available in Merrimack and Hudson.

(NRPC, 2019)

Within Nashua, parts of the central city enjoy significant transit use. For example, 9.4% of residents who live along the city’s downtown Main Street corridor (Census tract 107) reported taking transit to work.

That is the highest rate of transit ridership of any census tract in the state. Additionally, 5.5% of residents in the city’s ‘Tree Streets’ neighborhood (Census tract 108) reported taking transit for commuting trips, the 4th highest rate of transit use in the state. Higher transit ridership appears to be somewhat correlated to personal income in the region. Both census tracts have a poverty rate of approximately 30%, one of the highest rates in the region.

---

## HOUSING AND TRANSPORTATION COSTS

The U.S Department of Housing and Urban Development and Department of Transportation partnered to develop the Housing and Transportation Affordability Index. Given currently available data, they estimated housing and transportation costs at the Census block-group level. The Index covers 942 Core Based Statistical Areas (similar to metropolitan areas), accounting for 94% of the U.S. population. To calculate the housing and transportation costs for a given location, the model employs demographic data and features of the built environment known to influence these costs: income, average household size, average commuters per household, population density, walkability, transit access, and employment access. Using these inputs and statistical regression – a widely used statistical technique that assesses the relationship between one or more inputs and an output – the index generated a series of mathematical models for the relationship between all these data points and housing and transportation costs. By plugging data into these models, we can estimate components of housing and transportation costs at the Census block-group level that can then be used to calculate the Index. Further the model was used to produce estimates for different household types. The typical household is based upon the county’s average household size and median income. Low income households are estimated using a 3-person household earning 50% of the HUD Area Median Family Income.

Much as expected, the region’s more rural communities, located further away from regional employment centers and transit systems have greater household transportation costs, a greater number of cars per home, travel a greater number of vehicle miles each year and take fewer transit trips. Conversely, costs are lower in the city of Nashua where there is a greater reliance on transit and less need to travel a greater number of miles. Comparatively while the average household in the NRPC region spends just over 17% of their income on transportation costs, low income households contribute 26% of their income to transportation costs alone. While the typical household in the region contributes just under 50% of their income to their combined housing and transportation costs, low income households spend about 70% on their combined costs, leaving 30% of their income for food and other necessities.

<b>Housing and Transportation Costs as a Percent of Income in the NRPC Region</b>		
	<b>All Households</b>	<b>Low Income Households</b>
Housing & Transportation Costs - All	48.5%	70.6%
Housing & Transportation Costs - Owners	52.1%	76.0%
Housing & Transportation Costs - Renters	37.8%	57.2%
Transportation Costs	17.5%	26.0%
Vehicles per HH	2.0	1.8
Annual Household VMT	23,188	21,298

(HUD, 2014)

Detailed tables of housing and transportation costs by municipality can be found in Appendix A.

## EMPLOYMENT OPPORTUNITIES

Employment opportunities within the region are highly concentrated in the Nashua area, along the F.E. Everett/DW Highway corridor and in the core of Milford. Naturally, job density also aligns with regional zoning, population distribution and housing density. However, this also means that residents living in our more rural areas, or those further from major transportation networks, typically have to travel further distances for job opportunities, consider working remotely or possibly earn smaller wages closer to home.

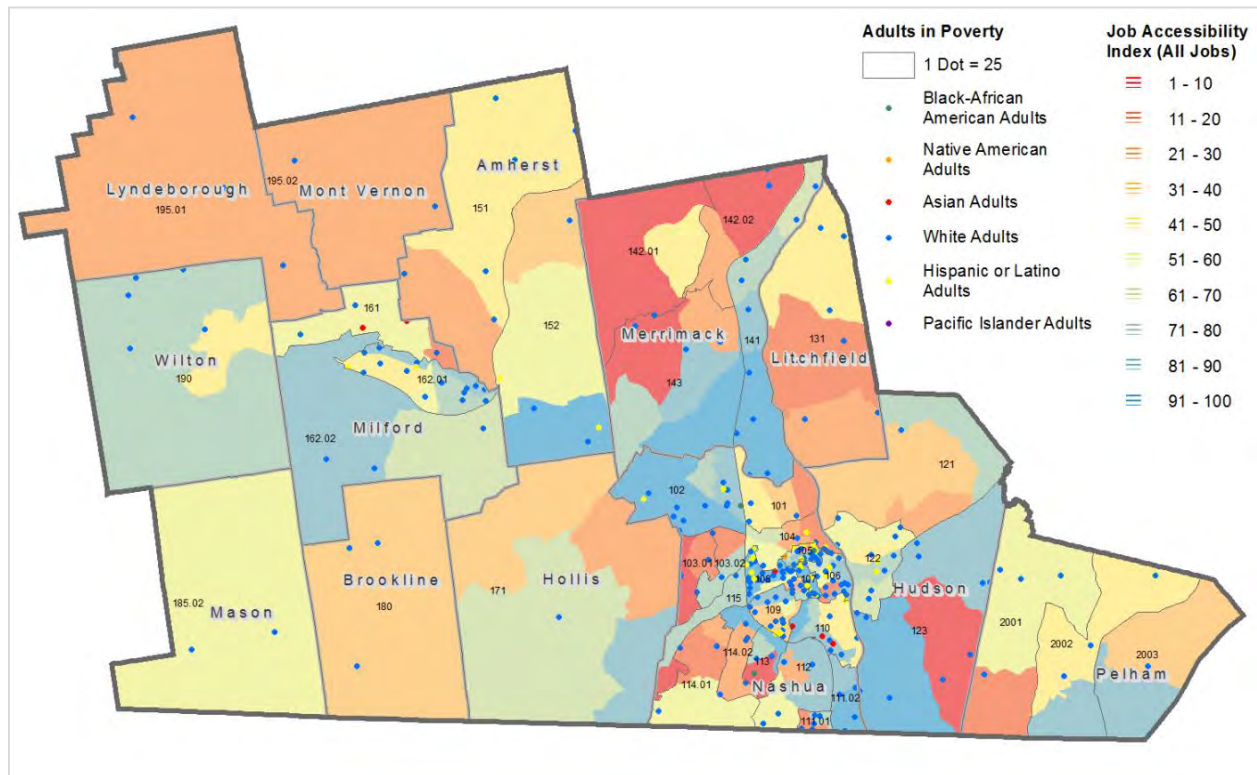

(HUD, 2019)

## JOB ACCESSIBILITY INDEX

The job access index summarizes the accessibility of a given residential neighborhood as a function of its distance to all job locations, with distance to larger employment centers weighted more heavily. Specifically, a gravity model is used, where the accessibility of a given residential block group is a summary description of the distance to all job locations, with the distance from any single job location positively weighted by the size of employment (job opportunities) at that location and inversely weighted by the labor supply (competition) to that location.

Considering the region as a whole, there are equally moderate levels of job accessibility for all populations, regardless of race, ethnicity or income. Variation in job accessibility instead occurs by neighborhood dependent on distance to employment centers. The regions more remote or rural communities have lower levels of job accessibility compared to those in community centers or along major regional corridors.

## Job Accessibility and Adults in Poverty by Race and Ethnicity

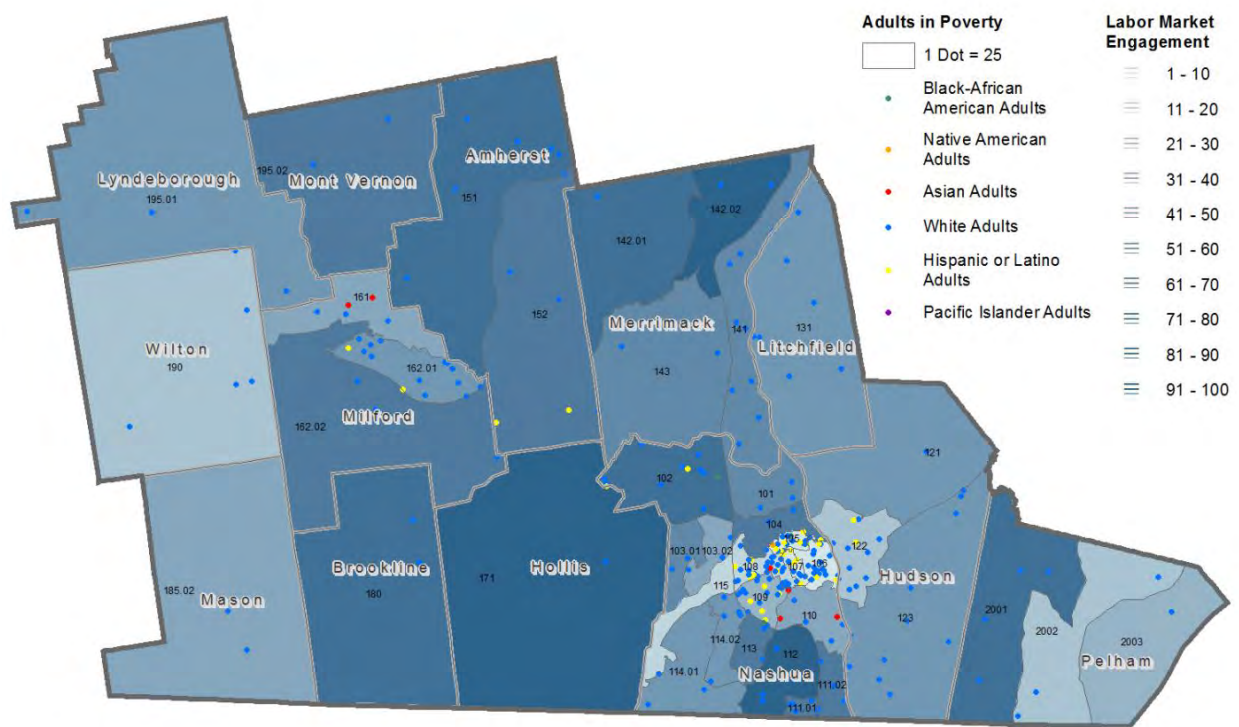

(HUD, 2013)

## LABOR MARKET ENGAGEMENT INDEX

The labor market engagement index provides a summary description of the relative intensity of labor market engagement and human capital in a neighborhood. This is based upon the level of employment, labor force participation and educational attainment in that neighborhood. Formally, the labor market engagement index is a linear combination of three standardized vectors: unemployment rate, labor force participation rate, and percent of the population with a bachelor's degree or higher.

Amherst, Hollis, Merrimack, and neighborhoods in Pelham and Nashua have some of the highest levels of labor market engagement given high levels of employment and education. However, there are neighborhoods in Nashua with very low levels of labor market engagement that are also home to many of the region's lowest income residents. Persons living below the poverty line, as well as Hispanic and Latino persons have moderate, but lower levels of labor market engagement than white or Asian persons in the region.

## Labor Market Engagement and Adults in Poverty by Race and Ethnicity

(HUD, 2012)

### FAIR HOUSING INFRASTRUCTURE

The following review of fair housing infrastructure is essential to further identify barriers and opportunities to the provision of affordable housing choices in the region. In particular, what are the existing statutes and case law that shape housing choices? What are the common complaints in the region? And what resources exist to help provide fair housing choices for all residents?

Fair housing was first legislated in 1968 during the civil rights movement and in the wake of Dr. Martin Luther King, Junior's assassination. The Federal Fair Housing Act (FHA) was initially adopted to prohibit discrimination based on race, color, national origin, and religion. It has since been amended to further

include gender or sex, familial status, disability and gender identity. Combined these represent the “protected classes.” The Act’s goals were to promote integration and suppress segregation in housing and to stop discriminatory practices against these protected classes in the housing arena. Since enactment of the FHA, The Department of Housing and Urban Development (HUD) has been active in promoting fair housing practices and requires all grantees to further fair housing opportunities. To support improvements in Fair Housing, HUD also houses a fair housing complaint process which allows residents to bring fair housing issues to the forefront.

Local efforts to promote fair housing in New Hampshire predate the FHA with adoption of the State’s anti-discrimination laws in 1965 (RSA 354-A), which created a legal obligation for those renting or selling to do so independent of an individual’s race, color, national origin, religion, gender, disability or familial status, and including age, marital status, or sexual orientation. New Hampshire Housing Finance Authority (NHHFA) was established in 1981 to further housing opportunities for NH residents. NHHFA furthers fair housing opportunities in the state through their grant funding programs for municipalities, affordable housing financing mechanisms, and education programs. They are also responsible for adoption of the State’s Analysis of Impediments to Fair Housing, which is the primary source for a complete understanding of fair housing barriers and opportunities in the in the State. Additionally, in 2014 NHHFA produced “Fair Housing for Regional and Municipal Planning: A Guidebook for New Hampshire Planners” that provides a full background of the legal history of federal and state fair housing law and case law, highlights of which follow. (Christine Wellington, NH Legal Assistance, 2014)

---

## FAIR HOUSING CASES AND LEGISLATION

There is wealth of existing reports on Fair Housing Cases and Legislation already published in:

- *Fair Housing for Regional and Municipal Planning: A Guidebook for New Hampshire Planners*, prepared for NH Housing Finance Authority by NH Legal Assistance.
- *Analysis of Impediments to Fair Housing Choice in New Hampshire*, prepared for NH Housing Finance Authority and NH Community Development Finance Authority by NH Legal Assistance.
- *Analysis of Impediments to Fair Housing*, City of Nashua, NH.

Readers are referred to the first resource, *Fair Housing for Regional and Municipal Planning*, for a thorough review of both federal and state cases of particular relevance to land use planning and zoning and related to each of the protected classes. The following is intended to provide relevant highlights of importance to planners from recent case law and legislation in New Hampshire that have either shaped or responded to the local fair housing landscape, planning, and zoning. Unless otherwise noted, the following was developed based upon information found in the three above noted reports.

**New Hampshire’s Constitution** plays a key role in protection from discrimination. Selected related provisions from the New Hampshire Bill of Rights include:

- *All men have certain natural, essential, and inherent rights among which are, the enjoying and defending of life and liberty; acquiring, possessing, and protection property; and, in a word, of*

*seeking and obtaining happiness. Equality of rights shall not be abridged by this state on account of race, creed, color, sex or national origin. (Article 2)*

- *Every member of the community has a right to be protected by it, in the enjoyment of his life, liberty, and prosperity. (Article 12)*
- *No subject shall be...deprived of his life, liberty, or estate, but by the judgment of his peers, or the law of the land [due process of law]. (Article 15)*

**Britton v. Town of Chester (1991)** is the landmark affordable housing case in New Hampshire that challenged the constitutionality of the Town's exclusionary zoning ordinances under which the construction of housing affordable to low- and moderate-income households was impossible. The State's Supreme Court ruled that every municipality must provide a reasonable and realistic opportunity for the development of affordable housing when exercising its zoning authority as enabled by NH's Legislature and granted the appellant a "builders remedy" allowing the multi-family units to be built. The decision also upheld the Mount Laurel, New Jersey cases, and reiterated that communities need to consider regional needs for and provide a proportionate "fair share" of affordable housing.

**Great Bridge Properties v. Town of Ossipee (2004-2005)** in many ways was similar to and enforced the Chester case. Great Bridge Properties was planning a multi-family housing project in Ossipee and found the zoning ordinance to be overly restrictive and discriminatory based on familial status. Again, the Court found that the Town did not provide opportunity for its "fair share" of affordable housing and that the zoning ordinances effectively precluded the construction of housing affordable to low- and moderate-income households.

**New Hampshire's Workforce Housing Law (RSA 674:58-61)** was established in 2008 by the State Legislature in an attempt to codify and clarify the findings of Britton v. Chester. The law requires communities to provide a reasonable and realistic opportunity for the provision of workforce housing, which is defined as owner occupied homes affordable at the median area income or rental homes affordable at 60% of the median area income.

Not all housing fair case law deals exclusively with affordability, in **Trovato v. City of Manchester (1997)** the plaintiff and her daughter filed a lawsuit against the City of Manchester when they were refused a request to construct a paved parking space in front of their home. Both plaintiffs were disabled, and a paved space was necessary for them to be able to navigate up to their front door safely. The City's Zoning Board had denied the request based on their belief that they did not have statutory authority to grant the variance. The Court ruled against the City and clarified that the injunction would terminate if and when the plaintiffs moved from their residence. The case highlighted that local ordinances are obligated to accommodate disabled persons under the Fair Housing Act and under such instances, a variance would not run with the land as is typical.

As a result, the State's statutes relative to variances (**RSA 674:33, V**) were amended in 1998 to authorize zoning boards to grant variances for persons(s) with a recognized disability without a finding of hardship as would otherwise be required. Codifying the findings of Trovato v. Manchester the variance could be granted when reasonable accommodations were necessary for a person to reside in or use a property.

Such variances were to be granted only if in harmony with the zoning ordinance and were only valid as long as the person(s) continued to reside at or use the premises.

Additionally, in 2008 NH Legislature established the **Code for (Architectural) Barrier Free Design** that is intended to ensure architectural barriers do not prevent persons with disabilities access to publicly funded buildings and facilities. The Committee on Architectural Barrier Free Design, a permanent committee of the Governor's Commission on Disability, is responsible for enforcement of the Code, which names the 2010 Americans with Disabilities Act Standards for Accessible Design as its source. (NH Governor's Commission on Disability, 2010)

**Community Resources for Justice v. Manchester (2008)** was the second case filed by Community Resources for Justice (CRJ), a non-profit that sought to construct a halfway house for federal prisoners in the City. The City denied the application citing the prohibition of "correctional facilities" under the local zoning. In CRJ's appeal, the court found that the City's zoning ordinance violated the Zoning Enabling Act (RSA 674:26- 23) and did not "promote or provide for the general welfare of the community." Additionally, the court stated that there was no evidence that such a ban furthered an important government interest and thus violated CRJ's equal protection rights under the State Constitution.

To assist municipalities in meeting their fair housing obligations, the NH Legislature enabled the adoption of Inclusionary Zoning Ordinances under **NH RSA 674:21's Innovate Land Use Controls**. Additionally, NH's Regional Planning Commissions are to update a **Regional Housing Needs Assessment (NH RSA 36:47, II)**, this Chapter of the Regional Plan, to assist municipalities in their planning for housing needs.

New Hampshire **RSA 479, Mortgages of Realty**, was amended in 2007 to protect homeowners from predatory foreclosure "prevention" schemes. The 2010 updated to the Analysis of Impediments to Fair Housing Choice in New Hampshire noted that many members of protected classes, particularly low income and less informed borrowers, were targeted by these schemes that included high fees, transference of ownership to another party, and lease or buyback deals with impossible terms. The new statutory language required a foreclosure contract be provided that discloses and describes the terms, costs and services to be provided and is accompanied by a notice of the right to cancel the contract. The intent was to eliminate the unknowing loss of home ownership and provide specific protection to persons with limited English proficiency.

Data analysis of NHHFA's 2010 Fair Housing Survey (discussed in the following Indicators of Discrimination Section) found that domestic violence, among other factors, figured into respondents' perceptions of discrimination. Domestic violence survivors reported being denied rental housing, a mortgage or being evicted in higher numbers than those who did not report domestic violence. Simultaneously, the NH Legislature in 2010 included additional provisions in **NH RSA 540 Actions Against Tenants** to protect victims of domestic violence from eviction. Landlords may not terminate tenancy solely based on a household member having been a victim of domestic violence, sexual assault, or stalking, with the condition that the victim provides the landlord with written verification that they have obtained a valid protective order against the perpetrator. There are however exceptions for lessors or owners of single-family homes if the owner possesses three or fewer homes, rental units in owner-occupied buildings with

four or fewer dwelling units, and single-family homes acquired by banks or other mortgagees through foreclosure. The statute also provides support for sole eviction of the tenant or household member accused of domestic violence, sexual assault, or stalking through a court process. The statute does not protect against eviction due to nonpayment of rent. (NH General Court, 2010)

The most recent fair housing case in New Hampshire was **the Amanda D. et al, v. Margaret Hassan, Governor, et al. Class Action Settlement Agreement** issued in February 2014 by the US District Court in New Hampshire. The Agreement aims to provide adequate mental health services and housing in the State through the expansion of opportunities aimed to help thousands of persons with serious mental illness. Part of the agreement includes the establishment of 450 new supported housing units intended to serve 1,500 persons. These new supported housing units are to be integrated across scattered sites and permanent housing with mental health and tenancy support services. This is coupled with additional programs to expand employment opportunities and greater access to health care support designed to reduce the need for emergency room visits and inpatient beds. (United States District Court for the District of New Hampshire, 2014)

---

## INDICATORS AND ALLEGATIONS OF DISCRIMINATION WITHIN THE REGION

The 2010 Analysis of Impediments to Fair Housing in New Hampshire included the results of a Fair Housing Survey mailed to all heads of household on NHHFA's Housing Choice Voucher waiting list. While most of the data is only available on a statewide level, given the relatively large number of persons in Nashua on the waiting list, some data can be extracted specific to the City. The survey results can only be used to make inferences about those on the waiting list and cannot be used to draw conclusions to any populations beyond the waiting list. More than half of survey respondents live outside of the State's largest communities, 5.6% live in the City of Nashua, compared to 14% that live in Manchester, 5.5% in Concord, and 4% in Rochester.

Over 12% of survey respondents across the State perceived housing discrimination in their past, which is influenced by Manchester where only 11.7% perceived discrimination, compared to 16.4% in Nashua. Generally, among all respondents, households that had suffered domestic violence, women, families with children, and persons with a disability were more likely to have reported being denied rental housing or a mortgage, perceived rental housing discrimination, or have been evicted. Gender and marital status are more likely to affect the ability to obtain a mortgage than rental housing. Additionally, income level appears to impact evictions for non-payment, where the higher the income, the less likely to be evicted. Non-English-speaking households, experienced fewer or almost no rental or mortgage denials or perceptions of housing discrimination. However, removing Manchester, 11% of non-English speaking respondents cited they perceived discrimination. Non-Whites outside of Manchester, particularly Blacks and Native Americans, reported higher frequency of perceived housing discrimination than Whites, 20% compared to 12%, but reports of access to housing or eviction rates were about equal. The most frequent reasons cited for perceived housing discrimination were monetary, children, and disabilities.

Of those that reported perceived discrimination, over three-quarters took no action in response. Most often those that took no action noted that they did not think it would help or didn't know where to

complain. Nearly 14% complained to the person discriminating, who in more than half the instances was the landlord. Five percent filed a complaint with a government agency. Only 2% consulted a lawyer or other fair housing group and only 0.2% filed a lawsuit.

In New Hampshire there are three avenues individuals may take to file a fair housing complaint. The following reports on data collected from NH Legal Assistance (NHLA), the NH Human Rights Commission (HRC) and HUD's New England Office of Fair Housing for 2008 through 2013 (HRC reports on October 1-September 30 fiscal years). There is some duplication of numbers among the three organizations as a complaint may initially be received by NHLA and then forwarded to either HUD or HRC as appropriate.

Housing complaints represent instances when a person felt or perceived housing discrimination. Complaints may be resolved with a variety of outcomes including settlement arrangements without a finding of fault, withdrawal, or a finding of no probable cause. Complaints are withdrawn for several reasons including frustration, personal problems, or other priorities.

NH Legal Assistance receives and tracks intakes with a fair housing component by town and the protected class alleged. The adverse party for these intakes could be, but is not limited to, the town, a landlord, rental agent, etc. The outcome of these intakes varies on a case by case basis. Because these are New Hampshire Legal Assistance intakes there are a number of different paths these cases usually take including a resolution prior to a complaint being filed, a complaint being filed with HUD, or a complaint being filed with the NH Commission for Human Rights and resolution through court action. Generally, the types of relief that can be ordered for violation of the fair housing act include but are not limited to, damages and costs, education and/or monitoring. (Detailed table of intakes is included in Appendix A).

Fair housing complaints received by HUD may include cases forwarded by NHLA or received directly by HUD from the complainant. HUD tracks cases based upon the basis of the complaint – whether it was discrimination against a protected class or retaliation, as well as, the outcomes of the case. Again, detailed tables of complaints are included in Appendix A. There were no probable cause housing cases filed with the NH Human Rights Commission during fiscal years 2006 to 2014 (through 5/6/2014) within any of the 13 NRPC communities.

Discrimination against those with disabilities represents by far the largest share of complaints. More than two-thirds of NHLA's intakes for the NRPC region and 52% of cases filed with HUD in the NRPC region were based upon a disability compared to 47% of HUD's New Hampshire cases. Housing discrimination by familial status was relatively low in the region and accounted for 19% of cases filed with HUD and 7% of NHLA intakes in the region, compared to 29% of HUD cases statewide.

Discrimination by national origin was slightly higher in the region accounting for 19% of HUD cases and 7% of NHLA intakes for the region, compared to 13% of HUD cases statewide. Race represented 11% of NHLA intakes in the region and 7% of HUD cases, while the state levels were slightly higher at 11%.

While discrimination in the region was slightly lower for race, by color, it was slightly higher than state levels, 11% of regional cases and 4% State of cases. Data on gender is only available from NHLA where 7% of intakes in the region were due to gender. HUD data reports that 7% of cases in the region were due to

retaliation, consistent across the State. There is no data on discrimination by age, religion, marital status or sexual orientation for the NRPC region.

There were no fair housing complaints in many of the region's communities. As could be expected, complaints are roughly proportional to a community's share of the region's rental housing. As such, the largest share two-thirds of HUD cases and threequarters of NHLA intakes are within the City of Nashua, which is a HUD entitlement community that is required to complete its own Analysis of Impediments to fair housing. This chapter is not intended to reiterate all of Nashua's findings.

---

## CAPACITY TO RESPOND

There are numerous Federal, and State Resources dedicated to promoting and protecting fair housing opportunities for residents outlined in the Analysis of Impediments to Fair Housing in New Hampshire 2010 updated including:

- US Department of Housing and Urban Development is the federal agency designated to enforce federal fair housing laws and provisions. HUD maintains extensive resources online at [www.hud.gov](http://www.hud.gov) and receives housing discrimination complaints via telephone, web, fax or mail.
- The US Department of Justice, Civil Rights Division is responsible for prosecuting civil violations of federal housing discrimination laws.
- New Hampshire complainants, via the US Federal District Court, District of New Hampshire, have direct access to filing private discrimination lawsuits.
- NH Commission for Human Rights is the NH state agency with the responsibility to receive and investigate housing discrimination complaints as previously noted.
- NH's Attorney General's Office may receive referrals from the NH Human Rights Commission for cases that require injunctive relieve and may investigate and enforce NH Civil Rights Act violations.
- Housing discrimination complainants may bring cases to the NH State Courts after filing with the HRC and requesting to move the matter to court.
- As previously mentioned, NH Legal Assistance, a non-profit law firm serving low-income persons in New Hampshire is the only entity in NH that receives HUD funds for fair housing enforcement activities.
- The Disability Rights Center, another statewide non-profit law firm, provides legal service to disabled persons related to housing discrimination, among other legal advocacy roles.

## HOUSING SUPPLY PROJECTIONS

### POPULATION AND HOUSING PROJECTIONS

The region's population is projected grow by approximately 12,200 to 14,500 persons by the year 2040, according to the NHHFA's Population Headship Model (NHHFA, 2013), NHOSI's Population Projections by County Subdivisions (NHOSI, 2016) and NRPC's Individual Municipal Projections for Scenario Planning (NRPC, 2014). As of 2017, the average household size was 2.56 persons per household and vacancy rates were around 2%. By averaging the projected populations, dividing them by the average household size, and projecting a 2% vacancy rate, the region's future need for housing would equate to the construction of an additional 4,900-5,800 housing units. As the recent housing market has indicated, the limited stock and low vacancy rates (<2%) are putting additional stresses on households to find affordable units or avoid heavy cost burdens. If vacancy rates were projected at a healthier 5%, the region's future housing needs would be in the range of 5,000-6,000 units.

However, we know that shifts in demographics and housing preferences make projections like these more difficult to pinpoint. The most accurate need for future housing units will depend on household sizes and age, employment, personal preferences, healthy vacancy rates and factors alike. Will household sizes continue to shrink? How will household composition and size differ from one community to another? Will multigenerational and group housing continue to rise? While quantitative factors may provide a more structured and logic approach for projecting need, how will qualitative aspects be factored into the project? The region will need to consider a potential range of possibilities, both on the scale of the individual communities themselves and the broader, more holistic purview of the region.

---

### POPULATION HEADSHIP TENURE MODEL

The following housing forecast is based upon the Population Headship Tenure Model included in *The Evolving Environment and Housing's Future* produced by the NH Center for Public Policy Studies for NHHFA as part of the State's Housing Needs Assessment. The model estimates the future need for housing using anticipated changes in household size, tenure, and age group. Headship is defined as the ratio of the number of household heads relative to the total population. For this model the headship ratio is computed for each population cohort and the total population. The projections are based upon headship rates by age group.

The aging population has become a greater share of all households in the region and State, leading to decreased household sizes. Decreased fertility rates have further reduced household sizes with fewer children per household, and young families represent a smaller share of all households than they have historically. This model accounts for these trends in household formation and homeownership trends dependent on the age of the head of household, and thus presents a more accurate reflection of future housing production needs to meet demand of a changing demographic. As a result, there is a need for between 7,800 to 10,200 (depending on reference to ACS or NHHFA data for existing structures) additional units for roughly 12,500 persons in the region. However, it should be noted that new units do

not equal new structures. Many have looked to small apartment or accessory units within existing single-family homes as solutions; those better suited in size to single person households.

It is important to note, housing projections by tenure in the follow graph may be skewed or underestimates given ACS margin of error and the recently high production of rental units that were constructed before the projection was made by the model in 2013. The number of rental housing units estimated in 2017 by the ACS indicate an excess of 1,400 rental units when compared to the State’s 2020 projection. However, this may be an estimate issue with the ACS, or it may be an indication of an acceleration toward more renter-occupied units than projected. For the past few decades, the percentage of renter-occupied units has fluctuated between 27%-30%. As of 2017, it stands at 30% and it would reasonable to project a decreasing percentage if the region produces more affordable housing for single-family detached homeownership. Data collected during the next decennial Census will be vital for more accurate estimates.

A series of tables that walk through the process of developing the housing unit projections using the headship model can be found in Appendix A.

## Projected Housing Needs in NRPC Region, 2010-2040

■ Renter-occupied	839	947	888	751	689	364
■ Owner-occupied	1,497	3,049	2,702	2,163	1,161	473
Units/Year	467	799	718	583	370	167

■ Owner-occupied ■ Renter-occupied

(NHHFA, 2013)

These results are largely driven by the region’s demographic shift toward a greater share of households in the 65 plus range. The region’s traditionally larger households, those between 35 and 64 years of age, are projected to shrink by at least 3,000 households by 2025 and nearly 4,500 by 2040. Whereas, senior households, those age 65 plus are anticipated to add over 9,500 households by 2025 and 18,000 new households by 2040.

Homeownership is projected to remain strong as more senior households, where growth will be greatest, have higher homeownership rates compared to younger households. This model has approximated that 30% of all units are anticipated to be for the rental market to meet the demand of the youngest households.

Per the NH State Statutes, NH RSA 674:58-61, workforce housing is defined as purchase prices affordable to households earning 100% of the area median income (AMI) or rents affordable at 60% of AMI. It is estimated that 26,724 homeowners (39% of all homeowners) in the region will be earning at or below 100% AMI by 2040. It is also estimated 20,476 renters (57% of all renters) in the region will be earning below 60% AMI by 2040.

Refer to Appendix A for detailed estimates the number of households by tenure and income range.

---

## REGIONAL FAIR SHARE OF HOUSING

The fair share of workforce housing needs table on the following page gives a best estimate of the number of workforce housing units (owner and renter units combined) for each community in our region. This exercise is an attempt to give our member communities an idea of the number of workforce units they should be providing for their residents. The table will read left to right and the following descriptions are given to help each column:

Column	Description
A	Each member community
B	Estimated number of households per community for 2017 according to ACS. Projected number of households for the years 2025 and 2040 according to NHHFA's Population Headship Model.
C	Share of regional housing per community. These percentages were held constant throughout all time periods.
D	Percent of households earning less than HUD defined affordable incomes for owners (100% AMI) and renters (60% AMI). The number and relative percentage of households within each AMI, and the projections, were derived from NRPC's 2014 Housing Assessment. The detailed table "Projected 2025 and 2040 Households by Tenure, Income Range" can be found in Appendix A.
E	The estimated number of workforce housing units needed was a calculation of the number of estimated or projected households (column B) multiplied by percent earning below HUD's affordable AMI threshold (column D).
F	The number of workforce housing units needed in total and annually, per time period. A more detailed look into column E.

Since this exercise utilizes the projected the number of future households based on NHHFA's Population Headship Model, it does account the shifting dynamics of household size and composition. However, the Population Headship Model was based on the NRPC region as a whole and not the individual aggregation of each member community. As so, the share of regional households per community (column C) was kept constant when redistributing NHHFA's regional household projection for 2025 and 2040. It is reasonable to assume these regional share percentages would slightly differ as some communities grow and shrink at different rates. In addition, the exercise also assumed the percentage of households earning within each income range would remain constant (column D). It is important to stress that even though the percentage of households earning below the AMI threshold vary per municipality, a regional percent was used for the exercise because it's a *regional* fair share that coincides with the *regional* responsibilities defined by the workforce housing statute. The nuances of this exercise must obviously be considered when decision makers are referencing this information, but the intent and methodology are sound. This information is to serve as a guide for both the region and the individual member communities.

	% AMI	Income	Maximum Affordable
Home-owner	100%	\$106,300	\$352,500
Renter	60%	\$57,400	\$1440/mo

As the previous table indicated, the projected need for affordable housing between 2017-2025 is for 3,616 units and then, from 2025-2040, the need is for an additional 2,476 units. This front-loaded need is representative of the population trends projected by NHHFA. From 2017-2025, the region is expected to add more than 8,000 new households while in the ensuing 15 years after that, the region is only expected to add about 5,500 new households. NHHFA has also predicted that the regional ratio of owners-to-renters is to hover around a 72/28 split throughout these time periods. This will evidently vary for each community and impact their split of workforce housing among homes for purchase and those for rent. Communities should assess their current number of units, which fall within the State's workforce housing limits, in cross reference to these estimates and projections to see how they fare in providing their "fair share" of regional housing.

With the trend for both median house prices and median gross rents moving constantly higher, it seems likely that residents earning the median income in the RPC region will continue to find housing costs a challenge. Communities may also want to consider not only reaching these projected numbers but also surpassing them to help increase overall stock, cultivate healthy vacancy rates, alleviate housing prices, attract workforce residents, spur economic activity and ultimately increase their tax base. For many reasons stated throughout this assessment, the housing issue and its affects are not just a problem our individual communities are facing – it is statewide, countywide and regionally an issue that should be addressed as such. Housing strategies, incentives and the such should be implemented in a continuing, cooperative and comprehensive manner.

## HOUSING PREFERENCES

With the understanding that the demographic composition of the State is changing, New Hampshire Housing as part of its regular state housing needs assessment update conducted a new qualitative study of housing preferences across the State, *Big Houses, Small Households: Perceptions, Preferences and Assessment*. In addition to consulting with the nine regional planning commissions to collect and understand findings from the RPCs vast regional plan outreach efforts, the authors met with realtors, builders, local officials, and others connected to the housing market, to understand current preferences for different households. Through a series of focus groups, they asked questions such as how many bedrooms do people want in a home? How big of a home? Where do people prefer to live? And what impediments exist to meeting demand? Similarly, *Senior Housing Perspectives*, part three of Housing Needs in New Hampshire, looks at a series of quantitative research in conjunction with the focus group conversations to discern future housing demand to meet the needs of a rapidly growing senior population.

The following represents some of the key findings from these two studies of relevance to the NRPC region highlighting current issues and preferences that may impact future housing demand in the region and municipalities ability to enable housing supply that meets preferences and demand.

---

## CHANGING DEMAND

The existing supply of housing in New Hampshire is not well matched to changing demand. While projections call for a significant increase in the total number of dwelling units, this does not necessarily indicate a call for significant building of new dwelling units. Both the region and the State must adapt to slower population growth, smaller households with fewer children and declining school enrollments, and an indication that seniors are choosing to downsize to one-level living. These factors imply that large housing will be less in demand and preferences shifting to smaller houses. Many housing professionals and residents have reported that local regulations lack flexibility to provide temporary or more adaptable smaller homes such as accessory dwelling units – either for the rubber band generation of young adults returning to live with their parents because they cannot afford their own place or seniors no longer comfortable with independent living. Location preference is also changing, New Hampshire’s realtors have noted that residents are preferring to live closer to employment centers and that there has been a decline in home purchases and new housing growth beyond a radius of towns outside employment corridor (Delay & Thibeault, 2014).

---

## YOUNGER HOUSEHOLDS

New Hampshire’s young adults are delaying marriage and are less likely to form new households compared to their peers from the 1980s and the trend has been increasing since 1990. As a result, young adults are looking for flexibility and mobility in their housing preferences, including cost, type and location. Further, a decreasing percentage of younger households are likely to be homeowners. Homeownership among New Hampshire’s young adults aged 25-34 decreased from 52% 1990 down to 46% in 2010 and is estimated to be around 37% as of 2017. That being said, about 50% of participants in NeighborWorks Southern New Hampshire’s homebuyer education classes are between the age of 25 and 34, indicating that the interest is there, but that there are other factors precluding home purchase.

The Great Recession has influenced young adults housing preferences beyond affordability, being witness to recent housing declines associated with the recession, some young professionals are distrustful of the housing market, less inclined to purchase a home and do not find it a prudent investment. Additionally, young professionals are concerned about the level of services and school quality available; concerned that the recession has negatively impacted municipal budgets and as a result quality services and schools. When they settle down, they want to know there are quality schools for their children and services to support a family.

While the median house prices are lower in the region and across the State than prerecession prices, it is not necessarily more affordable for younger households or first time home buyers that the market depends upon to purchase the homes of those looking to “move-up” or “downsize.” Simultaneously, rental prices continued to increase, and vacancy rates have continued to decrease, further limiting housing choice options and increasing housing costs. Younger households are facing lower quality and lower-paying job prospects combined. Additionally, approximately 76% NH college graduates have some level of student debt, an average of about \$36,000, and over \$7,000 more than the national average (The

Institute for College Access and Success, 2019). Combined, high rents, low paying jobs, and student debt levels make it difficult to adequately save for a down payment or meet rigorous lending requirements.

As a result of limited market options and financial pressures, younger generations have gravitated toward more nonconventional and flexible housing solutions. Renters are often “doubling up” with friends or another couple to help share costs. Some are instead choosing to move back home and live with their parents, commuting longer distances or leaving the region altogether. The few that are purchasing homes are often purchasing a single- or multi-family where they can rent a room or apartment to defray costs. Some are taking the chance to purchase a fixer-upper, renovate, and then sell with the hopes of moving up (Delay & Thibeault, 2014).

---

## OLDER HOUSEHOLDS

Nearly 24,000 residents in the NRPC region were age 65 plus in 2010 and there will be an estimated 44,500 seniors in 2025 and 55,500 in 2040. Currently, the 65 plus population represents 14% of the total population but is projected to rise to 20% in 2025 and 25% in 2040, like statewide trends. While the senior population, including renters and homeowners, is expected to double over the next three decades there is little to no projected change among younger populations, resulting in seniors occupying a greater share of the region’s housing units, approximately one in three occupied homes by 2025.

Most commonly, senior households are comprised of only one or two persons, which are ideally served by two-bedroom homes. However, only slightly more than a third of the region’s homes (33,200) are two bedrooms or smaller, compared to the 50,600 units with three or more bedrooms. More than half of the two bedrooms or smaller homes are rentals. Given the relatively limited number of younger households in the region and the state and their lack of interest in purchasing homes, it is uncertain there will be enough interest from future buyers should the boomers decide to downsize. Residents entering retirement years prefer to “age in place” or stay in their own homes. When they do move, they prefer to remain in the same region. Given seniors preference to remain in their existing homes implies less possible demand for age restricted or 55 plus housing.

While seniors generally desire to age in place, this is limited by their ability to do so:

- 14.1% of seniors have a hearing difficulty;
- 5.1% of seniors have a vision difficulty;
- 6.9% of seniors have a cognitive difficulty;
- 17.4% of seniors have an ambulatory difficulty;
- 5.9% of seniors have a self-care difficulty; and
- 12.0% of seniors have an independent living difficulty.

The median income of the State’s senior households is slightly above half (55%) that of the State average for all households and while seniors tend to have more assets than other households, home equity is significantly reduced since the economic downturn. This limited income and savings contributes to the fact that 43% of all households age 65 plus pay more than 30% of their income to rent or mortgage

(compared to 54% across the State). Comparatively, 60% of renter households age 65 plus in the region pay 30% or more of their income to rent costs.

Slightly more than a third of the region's housing stock is more than 50 years old, and an even larger share of rental housing is older stock that tends to be multi-floored and less conducive to aging in place where the ideal home would include a first floor bedroom and bathroom, entrances without steps, and wide doorways. Lastly, given the projected shift in the ratio of younger to older persons there is a projected declining potential caregiver population. AARP defines the caregiver support ratio as the ratio between persons aged 45 to 64 to the age 80 and over population. In 2014, the NRPC region had 10.3 potential caregivers for each person over the age of 80, compared to 7 nationally and 8.1 for the State. By 2025 that ratio is expected to drop to 6.5 possible caregivers for each person over 80 in the NRPC region, compared to 4.8 at the State. That number is further expected to drop to 2.9 potential caregivers per person over 80 in 2040.

According to Medicare data it is not until age 85 that residents seek to move to an assisted living or other long-term care facility, and even then, 78% remain in a traditional home. Significant increases in the over 85 population are not anticipated until 2030. In 2017 there were 3,113 persons in the NRPC region age 85 or older which is projected to rise to 4,860 in 2025 and 10,820 in 2040.

---

## HOMEOWNERSHIP

There are several factors that continue to limit affordability or homeownership. Young college graduates in New Hampshire have one of the highest levels of student loan debt in the nation. Additionally, recovering demand and lack of additional has kept baby boomers in homes larger than their needs and limited options for seniors.

According to NHHFA November 2019 Housing Market Report:

“Foreclosures dropped 12% in Q3 2019 from the same period in 2018; the trend indicates that annual foreclosures in 2019 will be far lower than in 2018, when there were 860 foreclosures statewide. With the increase in median sales price and lack of inventory in the state, borrowers who cannot make their mortgage payments still have a favorable market to sell their homes, and thus avoid foreclosure”.

While New Hampshire's employment levels have slowly recovered since the Great Recession, a concern raised in “Housing Needs in New Hampshire” was that the growth in employment has been in lower wage sectors, particularly accommodation, food services, administrative and waste services, and retail trade. Such low skill industries pay below average wages limiting housing affordability and choices. Lastly, with a slow but continued economic recovery, housing prices have increased once again limit affordability (Delay & Thibeault, 2014).

The Route 3 and 101 corridors remain an attractive housing market and sellers are receiving multiple offers. However, both data trends and real estate professionals' observations noted a decline in demand in communities that are more than two towns removed from major transportation networks.

Comparatively, this places the Nashua region at an advantage to those further removed such as the North Country or Monadnock region (Delay & Thibeault, 2014).

## CONCLUSIONS

The housing supply across the region varies from dense urban centers with more multi-family and rental units, to rural and small-town communities that are dominated by owner-occupied, single-family-units. NHHFA's Population Headship Model projects that households within our region will continue to age and become smaller. The projected growth in households from 2017-2025 is expected to be near 8,000, while between 2025-2040, the projected growth in households is only expected to about 5,500 – primarily the result of slowed population growth during that time period. The percentage of renters within the region is predicted to remain around 28%, however, this will differ greatly from community-to-community.

The need for affordable housing across the region will also be reflective of population and household growth rates. There will be a greater need for affordable housing production between now and 2025 than there will be for the ensuring years leading up to 2040. Even though this assessment projects the number of workforce housing units needed across the region and within each community, the actual measurement and recording of affordable units currently within our communities will require a deeper dive with on-going updates. NRPC and its member communities should consider formalizing a method for recording the number of affordable units with the intent of comparing this to the projected need and including this information in the next housing needs assessment. Use of the more reliable 2020 Census data would be another valuable source for obtaining this information, however, it may require some manipulation or the use of internal recording mechanisms (town records) to ensure accuracy.

Even though the models presented in this section accounted for shifts in household size and composition, there are several other factors such as changing demand and housing preferences which are hard to predict. We currently see a rise in the percentage of renters within our region, but it is unclear whether this is the result of necessity or preference. Are there factors such as land use controls, transportation access or economic activity that are impacting affordability and preference? Though forecasting preferences is an inexact exercise at best, the empirical and quantitative evidence indicates that addressing the region's long-term housing needs requires cooperative and comprehensive solutions.

## RESOURCES FOR MEETING LOCAL NEEDS

The NRPC region's housing needs are broad and encompass a range of income groups and family types. Several methods for meeting these diverse housing needs are described in the following section, including incentives that can be provided through innovative local land use regulation as well as various state and federal government programs. Each community should assess its own housing needs within the context of local conditions. Communities that are currently updating or planning to update their master plan should provide a housing section in accordance with RSA 674:2 III.

## COMMUNITY CHARACTER

It is critical to balance the need for affordable housing with the desire to maintain community character. Community character should never have to be sacrificed to achieve affordable housing goals. There are several simple principals that should be considered and applied when a municipality, particularly rural communities, plans for affordable housing:

- Affordable housing developments should never out-scale the other structures near it. If the typical structure in a village is two stories and 4,000 square feet, the affordable housing should be of a similar size. Grouping several units within such a building would maintain community character while also enhancing affordability.
- Affordable housing should blend with other housing in its vicinity. The affordable housing should be constructed of materials that are typically found in other nearby structures. Housing that does not blend with its surroundings can stigmatize the project.

Affordable housing, particularly for very low-income individuals and the elderly should be located within walking distance of services. Individuals without automobiles will be isolated in poorly sited affordable housing developments. Rather, such housing should be located close to stores and medical services.

## ALTERNATIVE HOUSING AND REGULATORY OPTIONS

---

### ACCESSORY HOUSING

Under the state law, RSA 674:71-73, which went into effect on June 1, 2017, accessory dwelling units (ADUs) means:

“a residential living unit that is within or attached to a single-family dwelling, and that provides independent living facilities for one or more persons, including provisions for sleeping, eating, cooking, and sanitation on the same parcel of land as the principal dwelling unit it accompanies.” (NH RSA 674, 2019)

Municipalities that adopt a zoning ordinance pursuant to the authority granted by RSA 674, shall allow ADUs as a matter of right, by a conditional use permit or special exception in all zoning districts that permit single-family dwellings. If the municipality’s zoning ordinance is silent on the topic of ADUs, the municipality must allow at least one attached ADU in any single-family home. Municipalities are not

required to allow more than one ADU for each single-family dwelling, however, they may prohibit ADUs associated with multiple single-family dwellings. Regardless of how ADUs are allowed, the municipality cannot impose greater dimensional standards on homes with ADUs that it does for homes without ADUs. The state also leaves it to the Town's choice as to whether or not the ADU can be attached or detached. Other regulations included are, but not limited to (NH RSA 674, 2019):

- Municipalities may limit the maximum number of bedrooms to two, but not one;
- Municipalities can require off-street parking or some other demonstration of parking adequacy;
- Property owners must demonstrate the adequacy of water supply and sanitary disposal, but separate systems shall not be required for the principal and ADU;
- The owner may be required to have a new septic system designed and approved if the existing systems does not meet NH DES standards for the housing including the addition of the ADU;
- A new septic system does not need to be built unless the existing system is unlicensed or has failed;
- Municipality may require the owner to occupy one of the units;
- Municipalities may not limit ADUs occupancy to family members of the owners of the principal dwelling;
- Municipalities may establish standards for ADUs for the purpose of maintaining aesthetic continuity with the principal dwelling unit;
- Municipalities cannot require ADUs to be smaller than 750 square feet; and
- Accessory dwelling unit may be deemed a unit of workforce housing for the purposes of satisfying the municipality's obligation under RSA 674:59 if the unit meets the criteria in RSA 674:58, IV for rental units.

The last bulleted point is important because the state law provides another tool for communities to utilize and help provide workforce housing in new ways which are different from the traditionally larger developments that require a substantial amount of land and build significantly more units. The ADUs law provides for incremental development which may be more feasible and justifiable for many.

ADUs provide a housing alternative that can serve a wide range of needs. For the elderly, an accessory apartment can allow the individual to maintain a degree of independence while still receiving the support of family members. The same is true for younger family members. Where student housing is scarce, accessory dwelling units can provide a housing alternative within a family setting. For older or younger homeowners, the modest rent that may be received for such a unit may make home ownership a possibility that would otherwise not exist. Provisions restricting the size of the unit, its entrance, and other restrictions keep the unit from being rented as a traditional apartment thus maintaining the single-family character of the area. Furthermore, because such units are usually not separated from the principal residence, they can readily be reincorporated into the main dwelling.

Age-restricted or elderly housing zones are increasingly becoming a way that communities are addressing the need for specialized housing for older populations without allowing for general multi-family housing or overall increases in density. These usually take the form of overlay zones and function in a way similar to that of cluster ordinances. In a few communities, actual parcels of land have been zoned for age-restricted housing. In most cases, age-restricted housing ordinances provide for a far higher density than allowed in the underlying zone and contain a separate set of regulations and restrictions than those found in other zones. Some ordinances contain provisions for subsidized housing, others do not. Nearly all the communities in the NRPC region have some type of age-restricted housing zone. It is important to note that RSA 674:58- 61 specifically states that housing in which a majority of the units are limited to those 55 and over cannot be counted towards meeting the community's workforce housing need.

---

## CLUSTERED HOUSING

Clustered housing is a form of zoning that eases the dimensional standards for lots compared to the normally required standards. This regulatory strategy allows for greater flexibility in configuring structures, preserving open space and reflecting the community's local character while meeting overall density requirements. Ordinances around the state may identify similar provisions under the title of "cluster development", "open space development" or "conservation development".

Homes in cluster developments are generally configured on smaller lots that do not meet the community's traditional lot size, road frontage, and setback requirements. The altered design requirements are attractive to potential developers as it may reduce development costs and in-turn, increase profitability and reduce housing costs to potential buyers. In some cases, under the use of a clustered housing provision, municipalities may provide developers with the opportunity to earn housing density bonuses. A density bonus grants a developer additional housing unit density beyond that which is normally permitted, in exchange for more open space, recreational facilities, affordable housing, etc. The word "opportunity" is emphasized here because any proposed cluster development may or may not actually meet the density bonus requirements set forth in a community's zoning ordinance, and the developer may or may not be allowed to build more dwelling units than traditional regulations would permit. The permitted housing types, configurations, percentage of open space, required amenities and other conditions for meeting the clustered housing definition varies from one municipality to another.

---

## GROUP HOUSING

Group homes are an important means of providing housing for the elderly and for special needs groups such as deinstitutionalized individuals, the homeless, handicapped individuals and other special needs groups. Generally, a group home is a single-family home which houses several unrelated individuals with common needs. This allows for mutual support for people with common needs in a family type setting. The homes provide individual or shared bedrooms with common living areas.

A provision for group homes usually requires a community to amend its zoning ordinance to provide a definition of "family" that would allow for a group home to be placed in a single-family area. Because group homes are not subdivided, they are not considered to be multi-family housing. A typical ordinance

may provide a definition, for example, that would allow ten unrelated elderly, handicapped or de-institutionalized individuals to be considered a family for zoning purposes, provided that the home is not subdivided and that the individuals live together as a single housekeeping unit. An alternative would be to provide for group homes under a special exception provision.

The largest impediment to providing for group homes is neighborhood resistance. Individuals purchasing homes in single-family areas have an expectation that the neighborhood will be maintained with a certain character. While a house that is purchased for a small group of older residents may pose little threat to neighbors, a home for de-institutionalized mental health patients, ex-convicts or those battling opioid recovery may trigger such resistance. Great care must be provided to avoid disruption of existing neighborhoods. Regulations that may mitigate some of the potential negative impacts associated with the group homes in single-family areas would be similar to those found in ordinances governing home-occupations and accessory housing. The intent should be to provide restrictions related to parking, entrances, and the appearance of the home to maintain the single-family character of the area.

---

## INCLUSIONARY HOUSING

Inclusionary housing programs are a way of encouraging private developers to provide housing for moderate-, low- and very-low-income households in exchange for density bonuses or zoning changes. Generally, a residential developer seeking a higher density than normally allowed under the zoning ordinance would be required to set aside a certain percentage of the units for lower-income households. Many inclusionary housing programs also require a certain percentage of the units be designated for elderly or handicapped households. Depending on the ordinance, developers interested in applying for a density bonus or zone change apply either to the local zoning board of adjustment or to the planning board. New Hampshire statutes require inclusionary housing programs to be voluntary and ordinances typically apply only where the municipality attempts to use zoning as an incentive to provide for a recognized need within the community. The developer receives an incentive, usually increased density, which provides the impetus for developing the desired housing type. The percentage of units that must be set aside for target groups could vary based on the local ordinance.

In general, most ordinances require the below market rate units to be provided within the site. The units may be smaller than market rate and may lack some amenities but may not be recognizably different from the other units in the development. Some ordinances allow below market rate units to be clustered within a portion of the development. Other ordinances encourage the below market rate units to be distributed throughout the complex.

Because most ordinances require below market rate units to be provided on-site, the maintenance, management and marketing of the units remains a private responsibility. Local ordinances usually include a provision requiring that below market units, whether rental or owner-occupied, remain at below market levels for a fixed period of time. The time period can vary from 10 to 99 years. Municipalities, however, must take the responsibility of ensuring that below market units remain at target levels. This is particularly difficult for below market rate owner-occupied housing as the resale of the property must be regulated to ensure that a lower or moderate-income family can purchase the unit while allowing the

seller to capture some equity from the property. In most cases, the monitoring of inclusionary housing programs is the responsibility of a local housing authority, community development department, or planning department.

The greatest constraint to implementing an inclusionary housing program in the region's municipalities is the difficulty of administering the program. Although market studies have been done which indicate that developments with below market rate units do not suffer from lowered real estate values, public perception is difficult to overcome. Another barrier is the difficulty of amending zoning ordinances to allow for the flexibility to provide for density bonuses in many municipalities. The greatest advantages to inclusionary housing programs are that the below market rate units are generally built, managed, and maintained by private developers. The municipality avoids having to maintain an inventory of housing to manage and avoids the difficulty of locating sites and building needed housing.

By including a small number of moderate and low-income units within a mix of market rate units, the community avoids the problems associated with over concentration. The families that occupy the units are integrated with the greater community and are provided with the same level of maintenance and the same public facilities and services as the general population. Furthermore, programs that also encourage the provision of elderly and handicapped housing, as well as three-bedroom rental units, allow for an even greater integration of household types. In this way, the housing needs of most family types, including various age and income groups, can be accommodated within a single residential development with only minimal public sector involvement.

Communities interested in implementing an Inclusionary Housing Ordinance should consult the Innovative Land Use Planning Techniques Handbook, published by the NH Department of Environmental Services, which includes a model ordinance and background information for New Hampshire municipalities.

---

## MANUFACTURED HOUSING

Manufactured housing, as defined in RSA 674:31, is term that includes what are traditionally known as trailers or mobile homes. Although State legislation has been adopted that requires all municipalities to provide for reasonable opportunities for the location of manufactured housing, many communities still severely restrict such housing. This is often due to aesthetic considerations as well as the association of manufactured housing with lower-income groups. In general, manufactured housing is situated either in higher density parks, on individual lots or in manufactured housing subdivisions.

Manufactured housing parks can provide an important housing alternative for low and moderate-income groups. The purchase price is relatively low, because the lots in the park must be rented. As a result, many residents in manufactured housing parks face eviction if the land is sold. The lack of new manufactured housing parks makes relocation nearly impossible unless the family can afford to purchase a lot. Mobile homes on individual lots or within subdivisions are only a limited form of affordable housing due to the very high land costs within the region. Although a manufactured home on an individual lot may

be only 10% less expensive than a conventional home on a similar lot, this can make the difference in affordability for many moderate- and middle-income families.

---

## MULTIFAMILY HOUSING

Multi-family, as defined in RSA 674:58, is housing *for the purpose of workforce housing developments*, means a building or structure containing 5 or more dwelling units, each designed for occupancy by an individual household. The emphasis is on the italicized words specifically clarifies this definition as other State statutes define multi-family units to be any structure containing more than 2 dwelling units. This difference is important as structures with 5 or more dwelling would qualify under the “reasonable and realistic opportunity” for workforce housing, whereas anything less, would not.

Multi-family housing is a common way in which municipalities and developers can provide affordable housing options to residents within the region. The development of multi-family housing units typically looks to density and proximity as avenues to a solution. There higher densities are typically located in more centralized locations with access to a variety of employment opportunities, amenities and services. Development costs, landowner mortgages and overall maintenance costs are reduced when expenses are spread among more occupants, and ideally, these cost savings are then transferred over to eventual occupants. Although the basic idea of increasing density to spread expenses is sound, the strategy is not always implemented in a way that provides for more affordable housing. The combination of increasing demand among moderate- and high-income households into the urban cores, preference to the rental market and very low vacancy rates have, in-turn, increased the cost of multi-family housing.

## TOOLS

There is a significant amount of research, data, and guidance materials available to help communities in New Hampshire meet their local housing needs. The following represents some of the key resources and tools for municipalities in the NRPC region.

NH Housing’s [Meeting the Workforce Housing Challenge Guidebook](#) provides resources for municipalities to address the requirements of the State’s Workforce Housing Statute.

The [NH Innovative Land Use Handbook](#), published by the NH Department of Environmental Services, includes model ordinances and guidance on numerous means to create a flexible set of incentives to support more affordable choices, including:

- Cluster or Conservation Open Space Subdivisions,
- Mixed Use Development,
- Infill Development,
- Energy Efficient Development,
- Inclusionary Housing

NH Housing’s [Housing Solutions Handbook](#) includes examples and case studies from New Hampshire of zoning ordinances that provide workforce housing opportunities, such as:

- Flexible zoning and land use regulations that allow for a mix of housing choices,
- Planned unit and cluster development,
- Examples multi-unit structures that maintain rural and single-family character,
- Redevelopment of existing housing stock,
- Examples and case studies from New Hampshire of multi-unit structures that maintain rural and single-family character,
- Accessory dwelling units, and
- Regulatory provisions that encourage a variety of housing sizes and types (i.e. cottage housing, accessory dwelling units, condominiums, single family homes, etc.).

[NH Housing](#) collects and reports on a variety of [housing data](#) including demographic, purchase price and rental cost trends; HUD’s income limits and allowances; and assisted housing for every municipality in the State.

NRPC has developed several [fact sheets](#) including:

- Inclusionary Zoning,
- Overlay Districts,
- Performance Zoning,
- Village Plan Alternative, and
- Form Based Codes.

The NH Office of Energy and Planning [reports on building permits](#) issued in every NH community that municipalities can use to monitor rates of residential growth to assess whether future rates are projected to increase beyond current low levels of growth.

[The Planning Board in New Hampshire: A Handbook for Local Officials](#), written by the NH Office of Energy and Planning, provides guidance and resources to help municipalities prepare a Capital Improvements Program to ensure municipal services can keep pace with growth rates.

The Community Development Finance Authority’s [CDFA Neighborhood Stabilization Program](#), Community Development Block Grants and [Community Development Improvement Program](#) provide financial resources to help municipalities invest in existing neighborhoods.

NH RSA 79-e, the [Community Revitalization Tax Relief Incentive](#) enables communities to provide tax relief in exchange for investment designed to enhance downtowns and town centers, promote economic development and rehabilitate historic structures.

## LOCAL RESOURCES

In addition to the above tools and resources available statewide, there are several organizations within the NRPC region that can provide valuable support to municipalities.

---

## NEIGHBORWORKS SOUTHERN NH

NeighborWorks Southern New Hampshire is a non-profit organization dedicated to helping individuals and families in Southern New Hampshire region by providing access to quality housing services, revitalizing neighborhoods and supporting opportunities for personal empowerment. Based in Manchester, in recent years NeighborWorks expanded its service area to include the Nashua region and acquired the former Neighborhood Housing Services of Greater Nashua. Additionally, in the NRPC region, Neighborworks developed Casmir Place in Nashua (2006) and Hidden Pond Apartments in Amherst (fall 2013) and most recently (2019), purchased two residential buildings (8 units) on McLaren Ave and Ledge St in Nashua to begin capital improvements and energy upgrades totaling \$450,000. Additionally, NeighborWorks has been working with residents of Nashua's Tree Streets on various community initiatives including NeighborFest, a celebration of community among neighborhood residents, and the Neighborhood Mural Initiative, a project to fuse local art with significant historical events. Other major programs include:

- Home ownership: Help underserved families understand critical components of home ownership, including financial responsibilities, maintenance and repair; home ownership as an opportunity improve economic viability; and guidance and assistance in the loan process;
- Affordable housing development: Develop affordable housing for sale or rent for low- and moderate-income families and individuals;
- Resident services: Involve tenants and other community residents in the civic life of the community and provide a variety of enrichment services.

---

## SOUTHERN NEW HAMPSHIRE SERVICES

Southern New Hampshire Services (SNHS) assists low-income members of the region achieve self-sufficiency through a series of child development; health, food and nutrition; housing and homeless; workforce development; energy; volunteer, community, and multi-cultural services programs. Through their programs to prevent and address homelessness, SNHS provides shorter term assistance to those that are at risk of eviction or utility termination, connects homeless persons with the local service system, and provides supportive housing for the homeless. Mary's House, located in Nashua, NH, consists of forty rehabilitated apartments for homeless women. SNHS Management Corporation, a housing management subsidiary of SNHS, provides specialized elderly housing services, sponsors supportive housing for homeless projects, and serves as general contractor for construction projects that include low-income housing development and rehabilitation. Working with the City of Nashua Lead Paint program, SNHS conducts outreach and education relative to the dangers of lead paint and benefits of abatement. Lastly within the housing programs, SNHS provides supportive elderly housing to low-income senior citizens and has 6 properties with a total of 248 units in the City of Nashua (SNHS, 2019).

---

## HABOR HOMES

Harbor Homes is another non-profit serving low income and vulnerable populations in the NRPC region. While Harbor Homes works throughout the state, their primary focus is the greater Nashua area serving Nashua, Amherst, Brookline, Hollis, Hudson, Litchfield, Merrimack, Milford, Mont Vernon, Mason, Manchester, and Wilton. They provide residential, primary and behavioral health care, and supportive

services to more than 1,200 low-income individuals and families who are homeless, at risk of homelessness, or living with mental illness and other disabilities each year. Services provide a holistic approach to providing food, shelter, and basic needs to help families maintain sustainable independence. Harbor Homes focuses on providing affordable housing, health care, mental health care, workforce development and employment assistance, supportive services for veterans and homeless prevention (Harbor Homes, 2019).

---

## NASHUA HOUSING AUTHORITY

Historically, housing authorities were formed principally to develop lower income rental housing and to conduct urban renewal activities using financing and subsidies from the U. S. Department of Housing and Urban Development. Nashua Housing Authority oversees the local distribution of federal low- income Section 8 and Housing Choice Voucher programs for the City, working to place low-income individuals and families in affordable housing. According to the City of Nashua’s 2010 Analysis of Impediments to Fair Housing and as reiterated multiple sources as recently as 2014, the Nashua Housing Authority has a total of 662 housing units that it owns and manages including 188 for elderly residents, 221 for those with disabilities, and 253 for families. The NHA properties include 13 developments throughout Nashua, five of which are “scattered sites.” The authority also has 853 housing choice vouchers, 75 of which are for locations outside the City of Nashua (City of Nashua, 2010).

---

## OTHERS

While not expressly dedicated to meeting local housing production needs, there are several other organizations within the NRPC region that play a critical role in supporting residents housing needs and promoting equal opportunities. The City of Nashua has formed the **Cultural Connections Committee**, comprised of city officials and residents, was created to act as a sounding board for ethnic community problems, act as a communications link between organizations, assist in community program ideas and publications, inform and educate, and encourage awareness and appreciation of cultural differences. The Gate City Immigrant Initiative is a subcommittee of the Cultural Connections Committee. The Mission of the Gate City Immigrant Initiative is to provide support to orient and empower newcomers and the broader community to fully integrate as citizens of Greater Nashua in good health and well-being.

The **Continuum of Care** is a collaborative group of Federal, State and City governments, housing program directors, hospitals, veterans, social service agencies, homeless and formerly homeless individuals, financial community and private sector representatives, and religious institutions of several denominations that meet regularly to promote comprehensive, cohesive, and coordinated approaches to housing and community resources for homeless persons and families. The Continuum works to identify and address service gaps and risk factors in the community and prioritize unmet service needs for a system of prevention, intervention, outreach assessment, direct care and aftercare for homeless individuals and families. The collaborative group serves the communities of Nashua, Brookline, Amherst, Hollis, Merrimack, Milford, Mont Vernon, Hudson, Litchfield and Mason. Particularly the Continuum works to end homelessness and is funded through annual applications to HUD to provide housing and supportive services. The Greater Nashua COC is also responsible for the development and

implementation of the Greater Nashua Ten Year Plan for Ending Homelessness. (“Nashua Continuum of Care,” 2014)

Similarly, **Elder Wrap** is another social service community collaborative comprised of public and private agencies in the Greater Nashua area that recognizes that many elders have complex health, housing, support and social needs. A core group of agencies meets monthly to review specific cases and discuss broader community issues affecting elders. Professionals from other agencies are invited to join meetings when their specialized focus is relevant to the individuals being discussed. Sometimes elders and their families attend a Wrap Around meeting to participate in the discussion of their needs and services.

## STATE AND FEDERAL PROGRAMS

Within the State of New Hampshire, most federal and state housing programs are administered through the New Hampshire Housing Finance Authority (NHHFA). The NHHFA programs are described below. In addition to these programs, Veterans Administration (VA) and Federal Housing Administration (FHA) loans are available through those agencies.

---

### SECTION 8 HOUSING CHOICE VOUCHER PROGRAM

This rental assistance program provides a direct subsidy to the owner of rental housing to allow low-income families to occupy privately owned and maintained housing units without spending in excess of 30% of their total annual household income for shelter. Qualification is based on income and fair market rent guidelines established by the US Department of Housing and Urban Development (HUD). The intent of the program is to allow for federal housing assistance to low-income households without building government owned and operated housing. The owner of a unit qualified under the program is paid the difference between what the tenant can pay and the actual rent. Limited funds have restricted the program to very low-income female-headed households and very low-income elderly households. The program is administered by HUD through the NHHFA. Program eligibility and assistance is based upon income and household size. To be placed on the program, applicants must have incomes below 30% AMI, however, NHHFA is able to accept a limited number of admissions for applicants with incomes below 50% AMI.

---

### SECTION 8 NEW CONSTRUCTION AND SUBSTANTIAL REHAB PROGRAM

The New Construction and Substantial Rehabilitation Programs provide assistance to developers to rehabilitate existing rental housing or to construct new rental housing within HUD guidelines. The maximum term of assistance provided by HUD under the New Construction and Substantial Rehabilitation Programs for a project financed with the proceeds of a loan insured by the Federal Housing Administration is 20 years. Rather than allowing the Section 8 certificate to be used by a qualifying family to obtain housing in any qualifying rental unit, the program attaches the Section 8 certificate to the unit. This program encourages the construction of new rental housing for very low-income households. The voucher program merely provides a subsidy for existing units without increasing the housing stock available to low-income families.

---

## HOUSING CHOICE VOUCHER HOMEOWNERSHIP PROGRAM

New Hampshire Housing offers the option for households currently receiving a Housing Choice Voucher to apply it towards homeownership for first-time homebuyers. There are eligibility requirements established by HUD and New Hampshire Housing. Generally, for those under the age of 62 the household head must have been employed for at least 30 hours a week for a full year, earn minimum wage, have established credit and had a bank account for at least 6 months. Choosing to use a voucher for homeownership increases the mortgage a household can afford.

---

## EMERGENCY HOUSING PROGRAM

This program aids households in imminent danger of eviction due to financial difficulty with short-term assistance when local welfare programs are unable to offer assistance. New Hampshire Housing's Emergency Housing Program supports approximately 25 households at a time for a maximum of 3 months. Households must first seek any other possible source of assistance before turning to this program and their household income must be below 50% of the area median income.

---

## LOW-INCOME HOUSING TAX CREDITS

Low Income Housing Tax Credits (LIHTC) encourage private investment in new, affordable rental housing and is the most commonly used affordable multi-family rental financing mechanism today. Projects are selected by NH Housing on a competitive basis and use of the LIHTC requires that a project provide a minimum of 20% of its units to households earning up to 50% of the area median family income (AMFI). Alternatively, at least 40% of its units may be offered to renters at or below 60% of AMFI. The balance of the units may be rented at prevailing market rents. Mixed income projects may be feasible in stronger rental markets. Typically, an LIHTC development will be affordable to households earning 40-60% of AMFI. Most of today's LIHTC projects are not subsidized with project-based Section 8 contracts, though tenants holding vouchers may use them in such projects and may be necessary for those earning less than 40% AMFI to afford rents. Therefore, many of today's "subsidized rental housing" cannot reach the households with the lowest incomes, however, LIHTC rental housing does, support an important component of workforce rental housing.

The maximum LIHTC allocation that any single general occupancy project may receive in any single funding round is \$800,000. The maximum LIHTC allocation that any single age-restricted project may receive in any single funding round is \$600,000. From 2014 through 2018, the State received and allocated between \$2.1 and \$3.4 million per year (\$2.8 million on average) to affordable housing projects across the state. Some of the more recent assisted housing projects in the area since 2010 include (NHHFA, 2019):

- Cotton Mill, Nashua (2011-2012)
- Pine Valley Mill, Milford (2013)
- Salmon Brook Senior, Nashua (2015)

---

## FEDERAL HISTORIC PRESERVATION TAX CREDIT

Historical structures are key components to downtowns, village centers and rural settings across the region. The New Hampshire Division of Historical Resources administers the federal tax credit program in New Hampshire. The federal law provides a federal income tax credit equal to 20% of the cost of rehabilitating a historic building for commercial use – even residential properties or outbuildings have been, or can be, adapted to serve as income-producing uses. To qualify for the credit, the property must be a certified historic structure on the National Register of Historic Places or contributing to a registered historic district. Non-historic buildings built before 1936 qualify for a 10% tax credit. Substantial rehabilitation is necessary and must meet the Secretary of the Interior’s Standards for Rehabilitation. Applications for the credits are available through the State’s historic preservation office. Investment in the rehabilitation and continued use of these buildings makes a substantial contribution to preserving community character and maintaining a vibrant local economy.

---

## NEW MARKET TAX CREDITS

The New Markets Tax Credit (NMTC) program is administered by the US Department of Treasury and was designed to increase the flow of capital to businesses and low-income communities by providing a modest tax incentive to investors. NMTC investors provide capital to community development entities, and in exchange are awarded credits against their federal tax obligations. Investors can claim their allotted tax credits in as little as seven years – 5% of the investment for each of the first three years and 6% of the project for the remaining four years- for a total of 39% of the NMTC project. The credit is currently set to expire at the end of 2019 but two bills (H.R. 1680 and S.750) have been proposed to extend the program and are awaiting a decision from Congress.

---

## CONSTRUCTION LENDING PROGRAM

The Construction Lending Program provides construction financing for multi-family rental projects utilizing other New Hampshire Housing funding. In addition, funds may be used in certain circumstances to bridge investment from Low Income Housing Tax Credit investors. Rates and terms are competitive with the market, and this program offers the convenience and cost savings of a single source of financing for an affordable housing rental project.

---

## SPECIAL NEEDS HOUSING PROGRAM

The Special Needs Housing Program is designed to provide financing for projects serving populations that need more intense services than are typically provided in traditional rental housing. The financing may be primary or gap lending that is frequently structured on a deferred payment basis. Developers of these projects are typically service providers of such diverse groups as the homeless, the mentally or physically challenged, women and children in crisis, and families and children in need of transitional housing.

---

## TAX-EXEMPT BONDS FINANCING AND PORTFOLIO PRESERVATION PROGRAM

The Tax-Exempt Bond Financing and Portfolio Preservation Program is designed to provide construction and/or permanent debt financing through the sale of tax exempt or taxable bonds and equity financing through the use of the 4% Low Income Housing Tax Credit. The program is well-suited for the preservation of existing subsidized housing. Projects using this program typically have an income stream that allows the project to service significant long-term debt.

---

## COMMUNITY DEVELOPMENT BLOCK GRANTS

Community Development Block Grant (CDBG) funds can be combined with other funds to support the creation of housing units, or can be used for related community needs such as encouraging home ownership, developing infrastructure, revitalizing downtown, rehabilitating rental housing, and other uses that have a primary benefit to households earning less than 80% of AMFI. This program is sponsored by HUD and managed by NH's Community Development Finance Authority (CDFA). Grants are available to municipalities or counties, and non-profits if they have partnered with and are applying through a municipality. Grants are awarded for up to \$500,000 per applicant each year and NH receives approximately \$8-10 million annually, approximately half of which goes to housing and public facilities projects.

---

## OPPORTUNITY ZONES

The Opportunity Zones incentive is a new community investment tool established by Congress in the Tax Cuts and Jobs Act of 2017 to encourage long-term investments in low-income urban and rural communities nationwide. Opportunity Zones are low income census tracts nominated by governors and certified by the U.S. Department of the Treasury into which investors put capital to work financing new projects and enterprises in exchange for certain federal capital gains tax advantages. As of 2018, the State of New Hampshire has identified 27 census tracts throughout the state, 2 of which are located in the NRPC Region (both in Nashua).

---

## PUBLIC LAND/AFFORDABLE RENTAL HOUSING PROGRAM

The Public Land/Affordable Rental Housing Program is a State program passed by the General Court in 1986 (RSA 204-D). The program allows surplus public land to be transferred at no consideration to the NHHFA for the development of low-income housing. The intent of the program is to remove the land cost from the cost of development to allow for the construction of low-income housing that can be economically feasible. The NHHFA will self-finance, construct and manage the housing. The greatest limitation facing the program is the availability of properly zoned surplus lands.

---

## FEDERAL HOME LOAN BANK OF BOSTON AFFORDABLE HOUSING PROGRAM

The Federal Home Loan Bank of Boston offers both grants and loans to member institutions who are working with developers of affordable rental or home-ownership opportunities. In general, Affordable Housing Program (AHP) for ownership initiatives must benefit households earning less than 80% of AMFI; use of funds for rental developments is limited to projects having at least 20% occupancy by households at or below 50% of AMFI. For 2019, the subsidy limits for any one AHP application is \$650,000 in direct subsidy and \$1 million in total subsidy, including the subsidized advance interest-rate subsidy.

---

## SINGLE-FAMILY MORTGAGE PROGRAM

The Single-Family Mortgage Program is by far the most significant State housing program. The program provides low-interest loans for first-time homebuyers within established housing price and income guidelines. The program is financed through the issuance of tax-exempt bonds by the NHHFA. In general, a first-time homebuyer applies for a NHHFA loan through a conventional mortgage institution and generally approved if the applicant as well as the home qualifies. Loan products offered include funds for down payment and closing costs, low or no private mortgage insurance, purchase and rehabilitation programs, emergency home repair, voucher assisted mortgages, and a tax credit program. The program provides assistance to a large number of first-time homebuyers; and as of April 2014, increased its income limit to \$110,000 for all communities, counties and family sizes, capturing all families below the median income level.

---

## HOME HELP NH

HomeHelpNH is a statewide foreclosure counseling initiative sponsored by the New Hampshire Department of Justice, New Hampshire Banking Department and New Hampshire Housing Finance Authority. The initiative's goal is to help at-risk homeowners find solutions through free, comprehensive pre- and post-foreclosure counseling. Over the course of the first year of this three-year statewide initiative funded through the National Mortgage Servicing Settlement, HomeHelpNH counselors assisted more than 800 households and provided approximately 5,600 hours of free foreclosure guidance on mortgage modifications, mortgage document review, credit and budgeting analysis, rental help and legal service referrals to at-risk households.

---

## FEDERAL HOUSING ADMINISTRATION AND VETERANS ADMINISTRATION LOANS

These Federal Government programs are not administered through the NHHFA. Rather than provide low-interest loans, the programs provide assistance to qualifying home buyers primarily by: 1) allowing for a higher percentage of household income to be devoted to housing costs; 2) providing mortgage insurance or guarantees; and 3) by allowing for down payments as low as 5%. Both programs are far less restrictive than NHHFA single-family home programs and are less limited in terms of funding. These programs provide essential assistance to moderate-income households throughout the Nation.

---

## USDA RURAL DEVELOPMENT HOUSING AND COMMUNITY FACILITIES PROGRAMS

USDA's Housing and Community Facilities Programs help rural communities and individuals by providing loans and grants for housing and community facilities. Within the NRPC region, all communities except Hudson, Merrimack, and Nashua, are eligible for USDA's Rural Housing programs. Funding and programs assist with single family home purchase, apartments for low-income persons or the elderly, housing for farm laborers, and community facilities such as childcare centers, fire and police stations, hospitals, libraries, nursing homes, and schools.

---

## CONCLUSIONS

The greatest planning and zoning practice fair housing concern is the prevention disparate impacts, ensuring that regulations and practices do not have a discriminatory effect or distinct impact on a group of persons. Land use controls have been identified in New Hampshire's Analysis of Impediments of fair housing as key impediment to fair housing choice. Frequently through outreach NRPC heard many calls for flexible housing regulations to allow for a more adaptable housing market. Large lot zoning and fees drive up cost and limit financing options. Other limiting factors include water infrastructure, key to higher densities and an older housing stock leads to higher lead poisoning risks. Transportation improvements can reduce costs and provide greater access to opportunities. Economic development improves job opportunities and mitigates environmental hazards creating cleaner, safer neighborhoods.

There are many factors that influence housing options and can further support or hinder future opportunities. The Nashua Region is fortunate to have many great resources to help react and respond to local housing needs. The Story of the Hughes family included in "The Nashua Region: A Story Worth Telling" highlights many of the challenges faced by families across the region after the housing market crash and Recession. When jobs became scares and unemployment grew, many families went through foreclosures and struggled to find an affordable home. The Hughes family was able to recover thanks to hard work and great resources such as Anne Marie House, NeighborWorks Southern NH, and Habitat for Humanity.

## WORKFORCE HOUSING ACROSS THE REGION

Recent studies, on the national, state and local levels, have pointed to the significant role of local land use regulations have on the development of affordable workforce housing. These include traditional zoning provisions such as minimum lot sizes and density requirements, as well as alternative or “innovative” provisions such as cluster zoning, density bonuses, phasing requirements, and impact fees.

According to NH RSA 672:1, III-e:

“all citizens of the state benefit from a balanced supply of housing which is affordable to persons and families of low and moderate income. Establishment of housing, which is decent, safe, sanitary and affordable to low- and moderate-income persons and families is in the best interests of each community and the state of New Hampshire and serves a vital public need. Opportunity for development of such housing shall not be prohibited or unreasonably discouraged by use of municipal planning and zoning powers or by unreasonable interpretation of such powers”.

This remainder of this section will take a deeper dive into the workforce regulations which are being implemented throughout the region. The Definitions subsection will reiterate the meaning and thresholds for workforce housing and how the State measures the performance of municipalities who are obligated to provide workforce housing. The following subsection, Municipal Regulations, will detail what workforce housing strategies are being implemented by member communities within the region and their relative compliance to State requirements. The chapter will conclude with a summary and recommendations for regulatory improvements throughout the region.

## DEFINITIONS

### WORKFORCE HOUSING

"Workforce housing" means housing which is intended for sale and which is affordable to a household with an income of no more than 100% of the median income for a 4-person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development. "Workforce housing" also means rental housing which is affordable to a household with an income of no more than 60% of the median income for a 3-person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development. Housing developments that exclude minor children from more than 20% of the units, or in which more than 50% of the dwelling units have fewer than two bedrooms, shall not constitute workforce housing for the purposes of this subdivision. Per NH RSA 674:58.

In 2018, the 100% median income for a family of four was \$106,300 the 60% median income for a family of three was \$57,400. At these income levels, it was estimated that the affordable purchase limit for the family of four would be \$352,300 while affordable rent limit for the family of three would be \$1,440 per

month (NHHFA, 2018). These limits are 2019 have remained relatively unchanged with income limits of \$102,900 (4-person home purchasers) and \$55,620 (3-person renters), respectively (NHHFA, 2019).

---

## WORKFORCE HOUSING OPPORTUNITIES

The State measures a municipality's ability to provide workforce housing through a semi-subjective test that assess its capability to offer "reasonable and realistic opportunities for the development of workforce housing", as defined NH RSA 674:59. The statute references measurements of "opportunity" as they relate lot size, density, residential zoning, existing stock and its regional fair share of affordable housing. The State asserts that the all citizens benefit from a balanced supply of housing which is affordable to persons and families of low- and moderate-income, and that it's in the best interest of the state and each community, and that the opportunity for development shall not be prohibited discouraged by use of municipal planning and zoning powers, per NH RSA 672.

The State also includes some housing regulation examples of what may qualify as an opportunity, including but not limited to, multi-family housing which contains 5 or more dwelling units, inclusionary zoning for property owners to produce affordable housing units in exchange for density bonuses, growth control exemptions and/or streamlined application processes, and the implementation of accessory dwelling unit provisions which qualify as affordable.

The next section will summarize the workforce housing regulations which have been implemented across the region to identify strategies, review compliance, recognize gaps and opportunities, and provide suggestion. The governing state statutes for workforce housing, NH RSA 674:58-61, have been provided in their entirety below.

- I. In every municipality that exercises the power to adopt land use ordinances and regulations, such ordinances and regulations shall provide reasonable and realistic opportunities for the development of workforce housing, including rental multi-family housing. **In order to provide such opportunities, lot size and overall density requirements for workforce housing shall be reasonable.** A municipality that adopts land use ordinances and regulations shall allow workforce housing to be **located in a majority, but not necessarily all, of the land area that is zoned to permit residential uses** within the municipality. Such a municipality shall have the discretion to determine what land areas are appropriate to meet this obligation. This obligation may be satisfied by the adoption of inclusionary zoning as defined in RSA 674:21, IV(a). This paragraph shall not be construed to require a municipality to allow for the development of multifamily housing in a majority of its land zoned to permit residential uses.
- II. A municipality shall not fulfill the requirements of this section by adopting voluntary inclusionary zoning provisions that rely on inducements that render workforce housing developments economically unviable.

- III. **A municipality's existing housing stock shall be taken into consideration** in determining its compliance with this section. If a municipality's existing housing stock is **sufficient to accommodate its fair share of the current and reasonably foreseeable regional need** for such housing, the municipality shall be deemed to be in compliance with this subdivision and RSA 672:1, III-e.
- IV. Paragraph I shall not be construed to require municipalities to allow workforce housing that does not meet reasonable standards or conditions of approval related to environmental protection, water supply, sanitary disposal, traffic safety, and fire and life safety protection.

## MUNICIPAL REGULATIONS

As the previous section indicated, the State's measurement for reasonable and realistic opportunity for the development of workforce housing is mostly subjective. The only quantifiable measurement is whether some sort of workforce qualified housing provision is permitted within the *majority* of the residential districts. Furthermore, as of 2017, the State now requires that all municipalities which adopt zoning ordinances *shall* allow for accessory dwelling as a matter of right or by special exception, per NH RSA 674:72, and that accessory dwelling units may qualify for workforce housing for the purposes of satisfying the municipality's obligation for "reasonable and realistic opportunities" so long as they meet the 100% or 60% AMI thresholds. Essentially, the black and white measurement for assessing workforce housing has been boiled down to verifying that municipalities simply fulfill their state requirement to allow accessory units within a majority of their residential zones and if it is stated they must be deemed affordable.

This assessment, so far, has identified the number of existing affordable units for owners and renters, by census tract and community (Housing Market, Cost and Affordability chapter and appendix A), and has estimated the number of affordable units needed for each community (Housing Supply Projections chapter) to accommodate fair share throughout the region. This section will attempt to shed light on the current regulations which govern our local municipalities.

---

## REGIONAL MATRIX OF REGULATIONS

The following matrix identifies which workforce housing provisions have been implemented within each member municipality. To varying degrees, each municipality addresses their need for affordable/workforce housing in a number of different manners. All the municipalities have allowed for the opportunity for workforce housing development in the majority of their residential zones, most commonly through the permitted use of accessory dwelling units, clustered housing or multi-family development.

Residential Zoning Ordinances Across the NRPC Region									
	Accessory Units	Age-Restricted	Cluster/Open Space	Inclusionary	Manufactured/Mobile Home	Multi-family	Workforce Housing Specific Regulations	Workforce-Related Density Bonuses	Workforce-Related Modified Lots
Amherst	X	X	X	X	X	X	X	X	X
Brookline	X	X	X	X	X	X	X	X	X
Hollis	X	X	X	X	X	X	X	X	X
Hudson	X	X	X		X	X			
Litchfield	X		X		X	X			X
Lyndeborough	X		X		X				
Mason	X				X	X			
Merrimack	X	X	X		X	X			
Milford	X		X		X	X			
Mont Vernon	X	X			X	X			X
Nashua	X	X	X	X	X	X		X	X
Pelham	X		X		X	X		X	X
Wilton	X	X	X		X	X			

However, there are significant differences among the municipalities. Some have very comprehensive regulations that directly addressed multiple aspects of workforce housing regulations. Communities such as Amherst, Brookline and Hollis have dedicated individual chapters to defining workforce housing, including those which identify specific income ranges which would qualify, minimum percentage of total units which should be reserved for workforce qualified households, and density bonuses and reduced lot requirements for the inclusion of workforce housing units.

Other municipalities went with a more universal strategy for allowing for the reasonable and realistic opportunity for workforce housing. They included generalized regulations which allow for accessory dwelling units, housing for older persons, manufactured housing and multi-family structures. As these alternative types of housing were indicated in the last chapter as regulatory options for meeting local needs of affordability, they do not always result in housing for those categorized within the 60%-100% AMI range. However, in theory, they typically reduce the need for infrastructure and closely resemble the region’s need for smaller, 2-3-bedroom units – so this could be considered reasonable and realistic.

Across the entire region and within each alternative housing type and its associated regulations, there were varying aspects which further defined each type, like lot requirements and qualified zoning. More specifically, they varied on a few key points:

- Accessory Housing
  - Attached or detached to primary unit
  - Required to owner-occupied
  - Allowed by-right or conditional use
- Age-Restricted Housing
  - Threshold of 55 or 62 years old
  - Maximum number of units
  - Potential for density bonuses or if restricted to the underlying zoning
- Clustered Housing
  - Percentage of reserved open space, configuration of site, shared amenities
  - Potential for density bonuses or if restricted to the underlying zoning
  - Reference to a percentage of workforce units
- Inclusionary Housing/ Workforce Housing Specific Regulations
  - Percentage of units set aside for workforce qualified households
  - Level of density bonus increases
  - Architectural design and continuity within neighborhoods
- Manufactured/Mobile Housing
  - Reserved to designated parks or not
  - Allowable number of units and unit size
  - Temporary and/or permanent, any associated permitting
- Multi-Family Housing
  - Qualifying number of units to be considered a multi-family structure
  - Alignment with State definition for multi-family workforce housing
  - Architectural design and continuity within neighborhoods

In general, there was a wide range of strategies for encouraging and regulating affordable/workforce housing across the region. The most significant difference was in not the housing types which were being regulated, but rather, the level of intent, and specificity, which they were created and how they direct relate back the State's definition of workforce housing – i.e. how each community addressed income specific thresholds, density increases and/or allowable lot modifications. Some communities may be more defined and clearer with their regulations where others may be more relaxed and open to interpretation. It may be that the region as a whole should establish some common language and cultivate a cohesive strategy for regulating and fulfilling the need for workforce housing.

## CONCLUSIONS AND RECOMMENDATIONS

For some time now, the lack of affordable workforce housing has received extensive press coverage in New Hampshire, and there has been a number of interested parties who have come together in the context of conferences, forums, coalitions and committees at the local, regional, and statewide level to discuss, understand and implement possible solutions. Elected officials, local advocates, associations and even residents have identified the lack of workforce housing as a serious threat to the state's economy and demographic diversity. Some economic studies have cited that the tight workforce housing market may limit New Hampshire's to add new, essential and/or high-paying jobs, and a reduction of millions to the State's GDP and revenues. Furthermore, there has been increasing pressure in some areas within the region due the expanding challenges the Greater Boston area is also experiencing. For much of the past two decades, demographic research has shown a net loss in the number of young people and its entry level workers. However, in recent years, there is indication of a reversing trend which could emphasize the importance to continue the momentum, provide housing and retain that workforce and tax base.

As the need and awareness becomes more apparent, some towns, land use boards and local organizations have been making these developments a reality. In August of 2018, the Town of Merrimack Planning Board approved a site plan application from NeighborWorks Southern New Hampshire for the development of an 8-acre, 45-unit townhouse project along the DW Highway. The townhouses, slated for completion by October 2020, are planned to be offered as affordable housing options for low- and moderate-income families and individuals (Town of Merrimack, 2018; Houghton, Kimberly, 2019).

More recently, in June of 2019, the Town of Hudson Planning Board approved the subdivision and site plan of "Friars Court" along Lowell Road for the 11-acre development of workforce housing. It was noted in June 26<sup>th</sup>, 2019 Planning Board minutes that 75% of the proposed 81-unit development would be reserved as workforce housing units under the State's definition while the remaining 25% would be offered at market rate (Town of Hudson, 2019).

This attitude is further supported by NHHFA Executive Director Dean Christon when considering the relationship between the state's housing needs and economic prosperity.

"While the growth of our statewide median income offers a reassuring reflection of the state's economy, it also adds weight to the questions about where our workforce will live. There remains a significant challenge getting people to understand that for the economy to continue to flourish, you need a balanced level of housing" (Currie, 2019).

As recently as mid-2019, Governor Sununu formed a task force made up of the Governor's Office staff, state and local officials, and industry experts, to work together on recommendations to address what has become of New Hampshire's housing crisis (Office of the Governor, 2019). The Task Force's three key recommendations focus on:

- 1.) Enhancing local control by providing greater learning opportunities to local boards, emphasizing planning to define and plan for growth, enhancing cities and towns' capacity by providing a toolbox for zoning/planning tools and models;

- 2.) Improving process predictability for everyone by streamlining existing approval processes to ensure predictability, creating a fair and predictable appeals process, requiring all development fees to be public and transparent, improving definition of workforce housing and ensuring fairness in housing incentives.
- 3.) Accelerating investment in housing by expanding the use of Tax-Increment Financing (TIF) districts and Community Revitalization Tax Relief Program (NH RSA 79-E), using tax restricting to incentivize investment, establishing a housing champion certification program to incentivize housing development

The lack of affordable workforce housing has become an undeniably major influence on the economy and demographic diversity of our State and communities – our future growth will greatly depend on our ability to supply affordable workforce housing.

## MEASURING PROGRESS

### SHIFTING DEMOGRAPHICS AND HOUSEHOLDS

The region has experienced slow population growth since 2010 with most of that growth coming from those who are 55 years or older. There were significant decreases in workforce age groups, especially those 35-44 years old. Consequently, the region also experienced a significant decrease in the number of children. There were slight gains for people aged 20-24 years old which may indicate slight momentum toward attracting a younger workforce. In addition, the composition of the region's population is continuing to diversify as the largest net population gains were for Hispanics or Latinos and those of two or more races.

Household composition continued to shift toward more non-traditional families as married couples, single-parent fathers and families with children were the only groups who experienced net declines since 2010. Most households (over half) in the region are made up of 1- or 2-persons, while nearly three-quarters of all households are 3-persons or less. A trend toward these smaller households was evident as all three categories saw significant net increases. Like the aging population, the age of households had massive gains for those 55 years or older and substantial decreases for those 35-44 years old.

There is a broad range of housing options in the region, but current housing stock may not match housing references or future needs. Many elderly residents in the region are looking to age in place for as long as possible and for those who can't, new questions arise. Who will buy their larger homes? Will they be able to find a supportive living environment? The elderly, young adults, low income families, minorities, and new Americans alike are all in search of opportunities to maximize their home value and maintain access to transportation, supportive services, employment, shopping, and entertainment options. Many in the region called for greater flexibility in land use and zoning regulation to encourage smaller homes or accessory apartments to help meet shifting demands.

Benchmarks:

- **132%** projected increase in the region's senior population from 2010 to 2040.

- **14%** of the region’s population is over age 65 – up from 11% in 2010.
- **25%** of the region is projected to be over 65 by 2040.
- **5,877** decrease in the number of children from 2010 to 2017.
- **6,035** decrease in the number of adults aged 35-44 from 2010 to 2017.
- **59%** of all households are comprised 2 or fewer persons.
- **77%** of all households are comprised of 3 or fewer persons.
- **44%** of all households are comprised of non-family living situations or single parents.
- **8%** decrease in the total number of families with children in the region from 2010 to 2017.
- **23%** of persons in the region live alone – up from 13% in 2010.

---

## RECOVERING CONSTRUCTION, SHIFT TOWARD MULTI-FAMILY UNITS

As significant increases in older populations continue to rise and slight net increases for the youngest adults are gaining momentum, how has the region supplied housing to fit the needs of smaller households? The slow recovery from the Great Recession nearly 10 years ago has indicated a noticeable shift in the type of housing the region is producing. However, production has only just barely hit pre-recession levels and has yet to make up for the lost production of the previous decade. Housing stock remains low and the region will need to continue to improve and maintain production to adequately supply the region. We must ask if there are ways, we can craft legislation to help support this housing need. Can we strategically increase stock where these population prefer to reside – near employment centers, entertainment, transportation, amenities and services? Are there strategies for enabling developers to produce smaller homes and still turn a profit in the face of rising development costs?

Benchmarks:

- **37%** of the region’s housing supply is multi-family.
- **64%** of the region’s multi-family housing stock is located in the City of Nashua.
- **3,544** building permits have been issued since 2010, nearing pre-recession annual rates.
- **2,399** housing units were constructed for single-family, 2-unit and 20 plus unit structures – all roughly accounted 800 units each year since 2010.
- **46%** of building permit activity has been for multi-family units since 2011 – compared to 39% in the previous 6-year period (2006-2011) and 24% in the period (2000-2005) before that.
- **30%** of all housing units were renter occupied – up from 27% in 2010.
- **8%** of homes are owned by minorities – up from 5% in 2010.
- **13%** of renter-occupied unit are inhabited by minorities – down from 14% in 2010.
- **23%** of all homes in the region were built before 1960.
- **10%** of residents in the region have some form of a disability.
- **2,373** assisted housing units are within the region.
- **78%** of all assisted housing units are within the City of Nashua.

---

## TIGHT HOUSING MARKET, HIGH COST BURDENS

For many in the region, housing is affordable; household incomes in the region are high compared to other areas. However, housing costs and availability vary significantly by community, and the region continues to be impacted by a tight housing market. Lack of stock, rising rent and purchase prices and increasing student loan debt burdens make home ownership a challenge for many. Access to affordable housing in the NRPC region is also limited by transportation and credit issues and many young adults in the region are unable to find affordable rental housing near employment opportunities. Additionally, residents with a disability have limited accessible housing choices where most of the single-family housing supply is made up of older multi-storied homes. Large lot size requirements and restrictive zoning have often been cited as impediments to providing a greater diversity of housing options. Benchmarks:

- **\$106,300** median income in Nashua, NH HMFA in 2018 for households earning 100% AMI.
- **\$352,500** estimated maximum affordable purchase price for households earning 100% AMI in 2018.
- **3.7-month** absorption rate for homes for purchase.
- **74%** of homes for sale in 2018 were affordable to households earning 100% AMI.
- **25%** of all homeowners were cost burdened.
- **\$57,400** median income in Nashua, NH HMFA for households earning 60% AMI.
- **<2%** vacancy rate for rental units.
- **\$1,440** estimated maximum affordable rent for household earning 60% AMI.
- **63%** of rental units in 2018 were affordable to households earning 60% AMI.
- **46%** of all renters were cost burdened.

---

## LOCATION, LOCATION, LOCATION

Without question, residents love the combination of the region's rural character and small-town feel coupled with more urban amenities including businesses, economic development, jobs, and cultural offerings. While many residents want more walkable neighborhoods and mixed-use development, more than half wish to live in purely residential neighborhoods. Slightly more than half of residents (55%) in the region said they would prefer to live in a small home with a short commute rather than a large home with a long commute. There is a large share of assisted housing in the region; however, there is concern that is concentrated in a few neighborhoods where crime rates are often higher. That said most of the region's affordable housing is conveniently located to employment centers and transit.

### Benchmarks

- **64%** of residents prefer residential neighborhoods to mixed use neighborhoods
- **43%** of NRPC residents live near transit.
- **28%** of all homes in the region are within a half mile of a community center or downtown.

## PRIORITY PROJECT RECOMMENDATIONS

### **Development technical resources to help communities measure their regional housing needs**

*Description:* There are several technical assistance products that NRPC can develop to help communities measure and meet their regional housing needs. This housing needs assessment lays the groundwork for measuring housing needs. Data is regularly updated and markets continually changing. NRPC can continue to track trends and regularly provide data update bulletins.

*Implementation Strategy:* Publish a concise housing report for the region based on a multitude of measurements and indicators included within this and previous assessments. Also include new updates to housing policies, municipal ordinance changes, housing developments and initiatives.

*Frequency/Timeline:* Annual, first report to be published July 2020.

### **Develop a template process for communities to audit their regulations**

*Description:* Building upon regular data updates, once communities have established their quantitative projected needs the next step is to audit existing ordinance to discern whether it is feasible to meet projected needs and amend where needed. NRPC can develop template audit or process checklist that communities could use to assess their existing regulatory framework to ensure the existing language meets the objectives of the Workforce Housing Law.

*Implementation Strategy:* Work with individual communities to formalize a process for recording workforce qualified housing through annual Town Reports (i.e. standardize the categorization building permits reporting or Planning Board plan approvals). Create and maintain a database that tracks workforce qualified housing. Create a template questionnaire which town boards could verify compliance to Workforce Housing Law.

*Frequency/Timeline:* On-going, template process and questionnaire to be completed by September 2020.

### **Development model ordinances to help communities meet their regional housing needs**

*Description:* Once a community has established their projected needs and conducted an audit of existing ordinances to the next step is to amend or adopt new regulations where needed. NRPC can develop model ordinances and accompanying technical guidance to help communities take that next step toward implementation. This might include updating the Inclusionary Housing Ordinance currently found in the Innovative Land Use Handbook, a model multi-family housing ordinance, or even compiling basic regulatory quick fixes towns can apply to existing districts to minimize the cumulative impact of regulations on housing costs.

*Implementation Strategy:* For the immediate future, NRPC may utilize the existing resources such as NHDES's Innovative Land Use Handbook, NHHFA's Housing Solutions and Accessory Dwelling Unit Guides, and its own fact sheets. In time and as resources allow, NRPC could explore updating or drafting, workforce-housing-specific fact sheets and model ordinances. The drafting new and updating of existing

model ordinances should be done in conjunction with the NH Municipal Association, NHHFA and others as necessary.

*Frequency/Timeline:* On-going, initial fact sheets to be completed by January 2021 with more to follow as needed; model ordinance updates (inclusionary and ADUs) to be completed by June 2022 with more to follow as needed – potentially target multi-family structures which qualify as workforce housing for June 2023.

### **Illustrate well designed affordable and multi-family housing and how it can be achieved**

*Description:* One of the greatest impediments to adopting regulations that allow for affordable, workforce, or multi-family is the fear that it will be unattractive. There are many superb examples of such housing across the state and region that could illustrate the types of attractive housing that could be developed and meet local housing needs. To support, NRPC can develop design guidelines and case studies of well-designed housing developments in the region. This can be supplemented with model ordinances such as design guidelines, form-based codes and performance zoning model ordinances.

*Implementation Strategy:* Collect examples and case studies to be published with or integrated into fact sheets. Expand upon design guidelines and incorporate with model ordinances.

*Frequency/Timeline:* On-going, examples and case studies to be completed for January 2021; design guidelines to be completed with associated model ordinances by June 2022.

### **Map community key destinations and assets that enhance access to opportunity for residents**

*Description:* Residents in the NRPC region have identified access to amenities a key attraction to living in the NRPC region. Additionally, such features are indicative to locations where residents have greater access to opportunity. Mapping key destinations, recreation facilities and public spaces and identifying opportunities to access natural resources and open space will provide communities and decision makers with more complete information on key attractions in their region. Further the data can be used to analyze the various fiscal impacts of disperse versus more village like development patterns.

*Implementation Strategy:* Identify “key destinations” based historical feedback from public outreach, master plans, new developments and academic sources. Organize existing and new spatial data into a regional map which displays key destinations. Integrate key destinations into NRPC’s geographic information system platform and potentially create regional and municipal story maps for print.

*Frequency/Timeline:* On-going, to be partially completed as possible or fully completed by December 2024

### **Collaborate with City of Nashua’s Urban Programs to share programs of regional interest**

*Description:* Several of the projects that the City of Nashua’s Urban Programs Department has undertaken to fulfill the identified actions in the City’s Analysis of Impediments to Fair Housing are applicable to and of potential interest to several communities in the region. NRPC can identify transferable initiatives,

particularly education, outreach and technical assistance related, and work to share information and resources with other communities in the region. One such program is the Lead Paint program which has valuable education resources that would be of interest in numerous communities given the region's relatively older housing stock, particularly in rental housing.

Implementation Strategy: Schedule meetings/discussions between the two organizations on a regular and semi-frequent basis. Include a section in the 2024 Regional Housing Needs Assessment which reports on the interaction and results of the collaboration.

Frequency/Timeline: Quarterly meetings/discussions with on-going collaboration

### **Further education and outreach programs to promote affordable housing in the region**

*Description:* There are several existing initiatives in the region to promote affordable housing. Rather than establish duplicative efforts, NRPC can partner with local governments and non-profits to build upon existing efforts. For example, NRPC can collaborate with the City of Nashua to support area wide initiatives for workforce housing, to create diverse housing opportunities throughout the region. Another would be to assist and support fair housing education efforts, such as those provided by NH Legal Services and NeighborWorks Southern NH. Additionally, the Commission can promote Neighborworks Southern New Hampshire home buyer counselling programs.

Implementation Strategy: NRPC can identify education outreach programs across the region and consolidate these events into a centralized calendar on the NRPC website. Additionally, NRPC may conduct roundtable discussions with local boards and committees with specific emphasis on workforce housing.

Frequency/Timeline: As possible and on-going

APPENDIX A: DETAILED TABLES

NHOSI'S INDIVIDUAL MUNICIPAL POPULATION PROJECTION

U.S. Census Bureau Sources:		2010 Census, SF-1			U.S. Census Bureau, 2008-2012 American Community Survey					
Table:		QTP1	P5	P21	B25045	S1701	B16004	B25070	S1810	

\* While the values for some Census Tracts exceeded the identified concentration threshold, the analysis indicated that the data was not statistically significant or reliable. As such, those that were not statistically significant are not counted toward the area of concern score. Values that are statistically significant are shaded in yellow. Values that exceed the concentration threshold are bolded

## ACCESS TO NEIGHBORHOOD OPPORTUNITY INDICES BY CENSUS TRACT

Index Key	
Index	Description
0-20	Very Low (worst)
21-40	Low
41-60	Moderate
61-80	High
81-100	Very High (best)

# New Hampshire’s Housing Supply: Current Estimates and Trends

**2019 is sixth consecutive year to see an increase in building permits issued statewide; again driven by increase in multi-family units**

New Hampshire’s housing supply in 2019 increased by a greater amount than in any other year of this decade, with building permits representing 4,483 housing units being issued by municipalities. This is the sixth year in a row in which there was an increase in the total number of new housing units permitted statewide. However, the level of building activity continues to be less than half of the level at its peak in the early 2000s. The following graph shows the number of housing units for which permits were issued each year since 2001.

Single-family homes comprised 50.4% of permits issued statewide in 2018, while multi-family were 47.3%, and manufactured housing were 2.3%. The number of multi-family permits issued increased by over 200 compared to 2018, while the number of single-family permits increased by just 40. The total housing supply in the state in 2018 is estimated to be 646,889 units, 5.3% more than at the 2010 census.

**G**rowth by county in 2019 largely followed existing patterns of development around the state. Map 1, included after the analysis section, illustrates the number and proportion of building permits issued within the state in 2019, summarized by county. The highest number of single-family permits were in Rockingham County (579), followed by Hillsborough (537), Merrimack (290), and Carroll (200). The highest number of multi-family units permitted were in Hillsborough County (765), followed by Rockingham (696), Strafford (313), and Grafton (149).

**M**unicipalities in seven counties issued more permits overall for single-family housing units than for multi-family, while in three counties (Hillsborough, Rockingham, and Strafford) more multi-family units were permitted. (Note that these data cannot distinguish between multi-family rental units and multi-family condominiums or row houses.)

**A**t the community level, 33 towns across New Hampshire issued permits that added more than 1% to their single-family housing stock of the previous year, down from 40 towns in 2018. Salem issued permits for 67 single-family homes, the most in the state, while Hart's Location (3 permits, 4.9%) issued the most single-family permits as a percentage of their stock. 50 cities and towns issued multi-family permits that added more than 1% to their existing multi-family total, up from 42 in 2018. Gilsum added the highest number of permits as a percentage of its multi-family total: 2 units, or 50% growth. The town of Merrimack added the greatest number of multi-family units (358, a gain of 11.5%), and six other cities and towns (Salem, Bedford, Dover, Londonderry, Rochester, and Portsmouth) permitted more than 100 multi-family units in 2019.

2019

## Distribution of New Housing Units Permitted per County

Numerals next to each circle shows the total number of units permitted by municipalities in the county. Size of circle corresponds to total number of units.

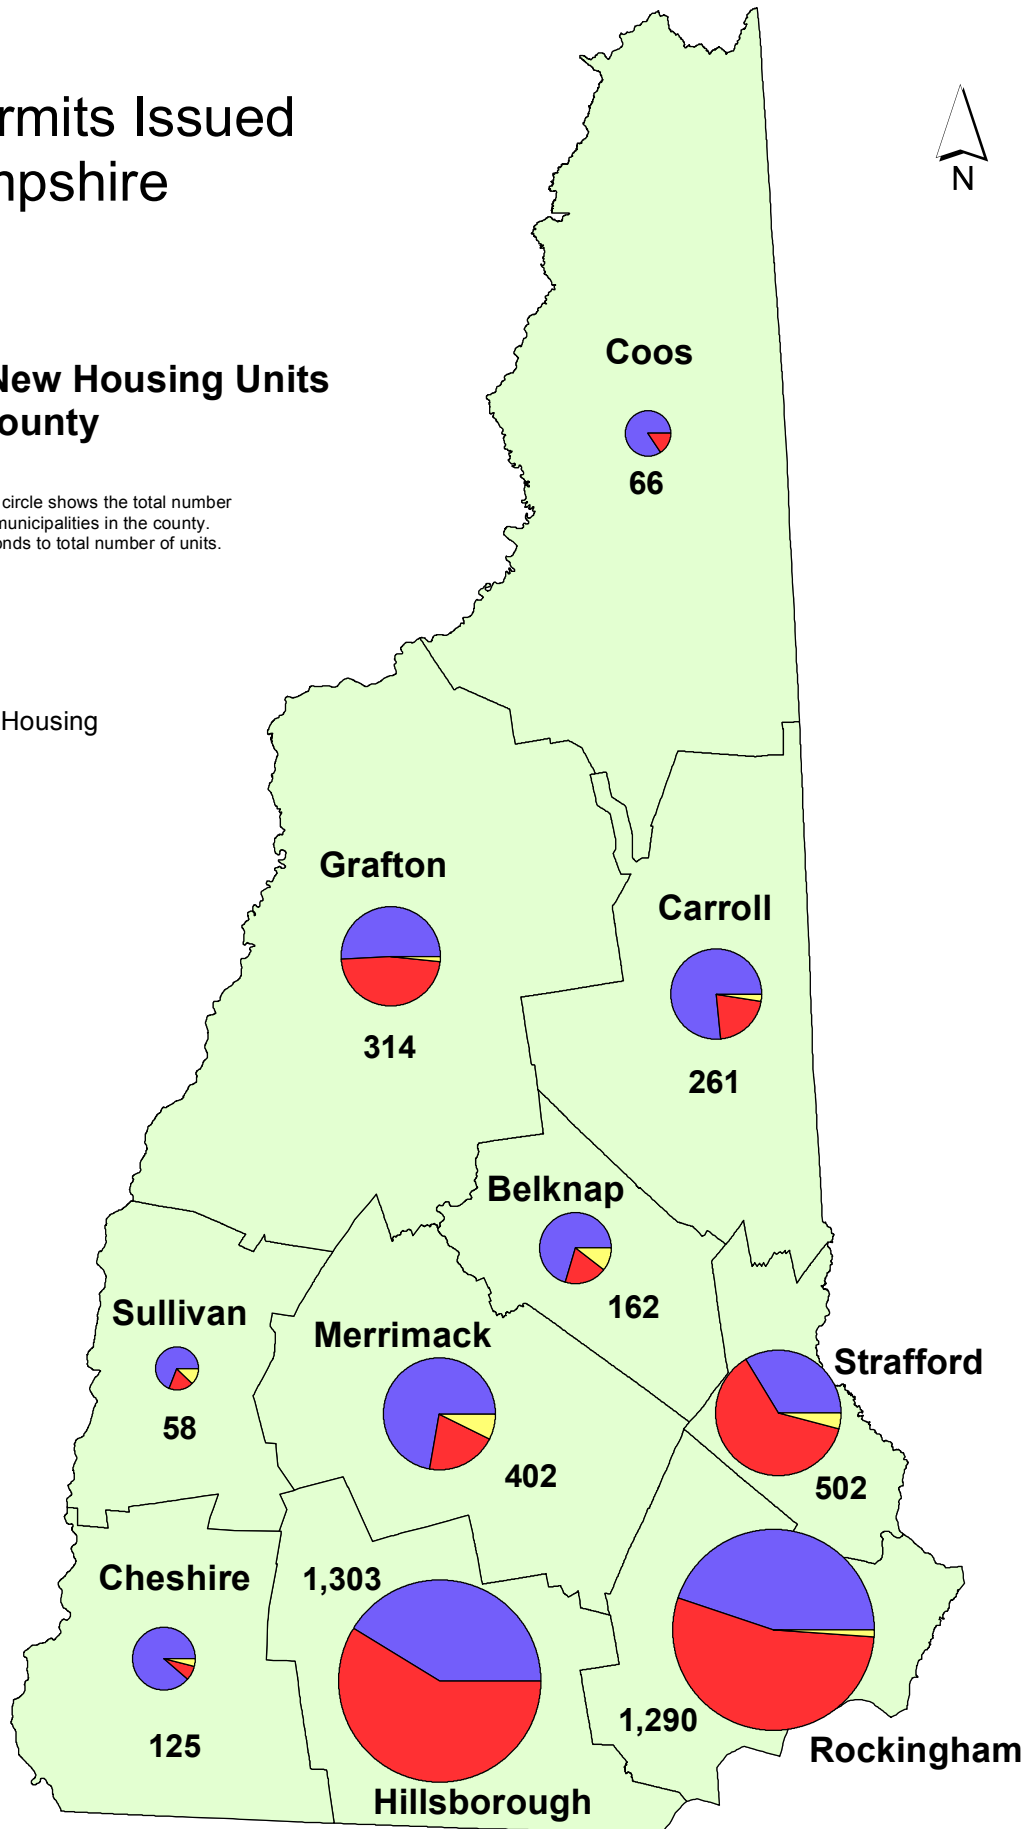

Single Family

Multi Family

Manufactured Housing

## About the data and this series

This report is one in a series of reports published as *Current Estimates and Trends in New Hampshire's Housing Supply*, last published in December 2019. The State Data Center at the Office of Strategic Initiatives (OSI) has been issuing this series of reports since the mid-1970s. The reports present data that show short- and long-term trends in housing construction and total housing supply.

The permit data in this report update the 2010 Census and American Community Survey data and are collected via an annual mail survey of municipalities. Thanks to the efforts of municipalities statewide, the survey enjoys a 100 percent response rate. OSI devotes considerable time checking and refining survey returns to ensure as much consistency as practical. OSI does not conduct any field checks as part of the quality control process and relies upon municipal responses for accuracy.

The *Housing Supply* series is intended to present the latest annual trends based on reported building permit activity. Data users interested in long-term housing trends (which may span two or three decades) are urged to analyze patterns shown by combining decennial census years with mid-decade permit data. Year-to-year comparisons that mix permits and census years are not valid.

## Definition change

To the extent possible, the figures contained herein represent total housing units. In prior years (pre 1990), our data represented only year-round housing units. From 1990 on, the data do not distinguish between year-round and seasonal units because virtually all homes were built with similar construction characteristics. All units are included in the census and permit data. Some housing units have all of the characteristics of year-round units, but are in fact used on a seasonal or leisure-time basis.

The data user should remember that the decennial census is essentially a questionnaire asking persons to respond. It is not a detailed field survey of characteristics of housing units. The census effort is not aimed at quantifying or analyzing the seasonal or leisure home sector. Nevertheless, this sector does have an impact on the year-round data.

The problem of distinguishing between seasonal and year-round units also applies to the permit data. Building permits usually do not request information regarding intended use. For this reason, all permits issued for new dwellings are included in this report.

## Data limitations

Accounting for conversions is another difficulty in compiling housing supply data. Conversions may increase or decrease the total housing stock. There are many types of conversions: for example, a dwelling could be converted to an office, a single family home may be converted to two or more dwelling units, or an accessory dwelling unit may be added. Many municipal permit systems are not adept at tabulating the pluses and minuses in dwelling units due to conversions. The same is true of demolitions. Often, a demolition permit does not require reporting the number of dwelling units involved.

The categorizing of row- or townhouses, often referred to as condominiums, is difficult. In the past, local officials were asked to report them under the single-family category. Nevertheless, this structure type has caused confusion among some local officials. Beginning with the 1990 report, any structure that is attached is reported as multi-family. This includes condominium units as well as structures that may have been single-family houses but now have accessory dwelling units.

Building permits are typically valid for one year. Some permits never result in actual construction and the permit expires. Starting in 1990, OSI requested each municipality to report any expired permits from the previous year. These figures should show the number of structures and units not completed due to the expiration of the building permit or change in plans by the builder. Without this information, there is a possibility of double counting if a permit is re-issued. When expired permits are reported, OSI reduces the number of permits reported in the prior year.

# **Current Estimates and Trends in New Hampshire's Housing Supply**

Update: 2010-2019

Kenneth R. Gallagher, Principal Planner

NH Office of Strategic Initiatives, Planning Division

# Welcome!

- Webinar presented January 8, 2021
- Please use the **chat** to ask questions

# New Hampshire State Data Center

- NH liaison to U.S. Census Bureau
- Distributes and interprets US Census data
- Supplies state data to the Census
- Conducts annual population estimates

# New Hampshire Population Estimates Program

- ▶ RSA 78-A:25 directs the Office of Strategic Initiatives (OSI) to “**estimate annually the resident population for all cities and towns...as of July 1 of the preceding year**”, and to certify to the state treasurer on or before August 19
- ▶ Purpose is to determine the distribution of the state meals and rooms tax to municipalities
- ▶ But the population estimates serve many other purposes

# Components of State Population Estimates

- Previous decennial census
- Change in dwelling units
- Change in group quarters population

# Dwelling Unit Method

- ▶ HU2010: Number of housing units at 2010 Census
- ▶ HU2011-18: Number of housing units permitted by each municipality
- ▶ OCC: 2010 Occupancy rate
- ▶ PPH: 2010 Population per household

Example:

$$\begin{aligned} & ((\text{HU2010} + \text{HU2011-18}) \times \text{OCC}) \times \text{PPH} = \text{HHPOP2019} \\ & (4,281 + 141) \qquad \qquad \qquad \times 0.501 \qquad \qquad \qquad \times 2.45 = \mathbf{5,428} \\ & 4,422 \qquad \qquad \qquad \times 0.501 \qquad \qquad \qquad \times 2.45 = \mathbf{5,428} \\ & \qquad \qquad \qquad 2,216 \qquad \qquad \qquad \times 2.45 = \mathbf{5,428} \end{aligned}$$

# Sample Dwelling Unit Survey

- Permits issued during Calendar Year 2019
- Assume constructed by July 1, 2020

## 2019 DWELLING UNIT RESPONSE FORM New Hampshire Office of Strategic Initiatives

Code Enforcement Officer  
Town of Conover  
123 Main Street  
Conover, NH 03000  
Central County  
Address Correction (if different from what is listed):

Completed by (please print clearly)  
Title  
Signature  
Telephone Number  
E-mail Address

Last year the response form was completed by: **Firstname Lastname, Code Enforcement Officer**

NOTE: The Office of Strategic Initiatives is interested only in permits that change the number of residential dwelling units in your community. Permits for alterations (room additions, decks/porches, sheds, etc.) or non-residential garages should not be tabulated on this form. If your community does not have a permit system in place, please use the best comparable information available (i.e., certificate of occupancy).

CALENDAR YEAR 2019  
(January 1, 2019 through December 31, 2019)  
Please review the instructions on the back of this form.

PERMITS ISSUED THAT RESULTED IN NEW RESIDENTIAL DWELLING UNITS	NEW RESIDENTIAL CONSTRUCTION		RESIDENTIAL DEMOLITIONS		EXPIRED RESIDENTIAL PERMITS FROM 2018 <u>NOT</u> RESULTING IN A NEW BUILDING FOR 2019 (see back of form)		FOR OSI USE ONLY
	NUMBER OF BUILDINGS	NUMBER OF DWELLING UNITS	NUMBER OF BUILDINGS	NUMBER OF DWELLING UNITS	NUMBER OF BUILDINGS	NUMBER OF DWELLING UNITS	TOTAL UNITS
1 Family*	20	20	3	3			17
2 Family**	3	6					6
3 or 4 Family	2	8					8
5+ Family							
Conversions***	2	3					3
Manufactured Housing	1	1	4	4			-3
<b>TOTAL HOUSING UNITS</b>	<b>28</b>	<b>38</b>	<b>7</b>	<b>7</b>			<b>31</b>

\* Excluding manufactured housing.

\*\* A new single family home with an ADU attached is counted as 2 family.

\*\*\* Conversions: Count only the number of residential units created or lost. Examples of conversions include: (a) conversion of a single family house to a multifamily house (increasing the number of dwelling units), (b) construction of accessory dwelling units (increasing the number of dwelling units), and (c) conversion of a residence to an office or restaurant or other non-residential use (decreasing the number of dwelling units - enter this number in the demolitions column).

Should you have questions, please contact Ken Gallager, Principal Planner, at 271-2155 or [ken.gallager@osi.nh.gov](mailto:ken.gallager@osi.nh.gov)

Submit completed form to:  
Office of Strategic Initiatives  
Johnson Hall, 107 Pleasant Street  
Concord, NH 03301  
Email: [ken.gallager@osi.nh.gov](mailto:ken.gallager@osi.nh.gov)

# Results

- ▶ Continued gradual increase in total housing units since 2011

**Net Annual Increase in Housing Units  
in New Hampshire, 2001-2019**  
Based on Building Permits Issued

# Permits issued – State totals

- ▶ 2019 - Permits issued for 4,483 dwelling units:
  - ▶ Single-family: 2,259 (50.4%)
  - ▶ Multi-family: 2,121 (47.3%)
  - ▶ Manufactured housing: 103 (2.3%)

*Compare to:*

- ▶ 2010 – Permits issued for 2,328 dwelling units:
  - ▶ Single-family: 1,546 (66.4%)
  - ▶ Multi-family: 740 (31.8%)
  - ▶ Manufactured: 42 (1.8%)

# Differences by county

- ▶ Most single-family units permitted:
  - ▶ Rockingham (579), Hillsborough (537), Merrimack (290), Carroll (200)
- ▶ Most multi-family units permitted:
  - ▶ Hillsborough (765), Rockingham (696), Strafford (313), Grafton (149)
- ▶ Three counties (Rockingham, Hillsborough, and Strafford) issued permits for more multi-family than single-family housing

# County Overview

# Municipalities

- ▶ Most single-family units permitted:
  - ▶ Salem (67)
  - ▶ As a percentage of existing stock: Hart's Location (3 units, 4.9%)
- ▶ Most multi-family units permitted:
  - ▶ Merrimack (358)
  - ▶ Salem, Bedford, Dover, Londonderry, Rochester and Portsmouth also issued permits for more than 100 units
  - ▶ As a percentage of existing stock: Gilsum (2 units, 50%)

# On-line viewer

# Takeaways

- Housing growth continues to be focused in the southern and eastern regions of the state
- Much of the growth is in towns/cities that are already larger
- Further research needed into relation between housing growth and towns/cities with innovative land use regulations
- 2020 Census data will reset the formula we use for estimating populations

# Accessing the Data

In 1990, the Merrimack County office of UNH Cooperative Extension provided a series of fact sheets about innovative zoning including: Incentive Zoning, Phased Development, Transfer of Development Rights, Planned Unit Development, Cluster Development, Performance Standards/Impact Zoning, Environmental Characteristics Zoning, Accessory Dwelling Unit Standards, and Floating Zone. These fact sheets were intended to give a brief overview of the land use controls listed in RSA 674:21. The fact sheets on the following pages are provided for historical reference.

## INNOVATIVE LAND USE CONTROLS

### *introduction to the series*

Conventional zoning is a means the municipality has to guide the growth and development of private property (RSA 674:16). Through zoning, voters are able to divide the municipality into districts and regulate the use of land and the use, height, and area of buildings in that district. The purpose of zoning is to avoid the undesirable side effects of development by segregating incompatible uses.

Legislative actions over the past several years have given municipal officials additional growth management tools to supplement traditional zoning and guide the growth of the municipality (RSA 674:21). ***Innovative Land Use Controls*** offer the municipality's legislative body the opportunity to adopt standards that could provide

cost savings, reduce design monotony, implement community goals (e.g. low cost housing, the "New England Village" look, or environmental protection) and be better able to address larger-scale development. Use of these innovative techniques may require greater planning expertise and often requires negotiation with the developer; but, they allow greater flexi-

bility in land use and design than traditional zoning.

This fact sheet series is intended to give a brief overview of the land use controls listed in RSA 674:21. Liberty has been taken to combine some of the control methods. Flexible and discretionary zoning is a general category covering numerous techniques. Three of them, planned unit development, incentive zoning, and trans-

fer of development rights, are listed in the RSA and are addressed in separate fact sheets. Overlay zoning, the most common technique to implement environmental characteristic zoning, is referenced in that fact sheet. Two other innovative techniques, conditional rezoning and contract zoning, don't apply to

#### ***The following innovative land-use control methods are covered in the series.***

- Incentive zoning
  - Timing incentives
  - Intensity and use incentive
  - Inclusionary zoning
- Phased development
- Transfer of development rights
- Planned unit development
- Cluster development
- Performance standards
  - Impact zoning
- Environmental characteristics zoning
- Accessory dwelling unit standards
- Floating zone (one of the flexible techniques)

New Hampshire.

Local officials are encouraged to search for land-use control techniques that will assist them in implementing the goals and objectives of their community. Professional assistance to develop master plans and ordinances is available through regional planning commissions and consultants. Technical, educational, and other assis-

tance also is available through the staff of the Office of State Planning, USDA Soil Conservation Service, UNH Cooperative Extension, and public interest groups (e.g. Society for the Protection of New Hampshire Forests, the Farm Bureau, County Conservation Districts, and the New Hampshire Timberland Owners Association).

### **Adoption and Implementation of Innovative Land Use Controls**

by William Klubben  
Executive Director

Central N.H. Regional Planning Commission

To be fully functional, innovative land use controls must be adopted as a zoning amendment according to standard procedures outlined in statute (RSA 675:1,II). The procedures include a properly noticed public hearing held by the planning board, access by the public to the full text of the amendment, and an affirmative vote by the legislative body. Depending on the form of local government, the legislative body is the city council, board of aldermen, town council, or town/precinct meeting.

The planning board, through subdivision and site plan review regulations, may partially implement innovative techniques which function like "phased development" and "environmental characteristics zoning." The planning board may adopt or amend its regulations, following a properly noticed public hearing, under the general authority granted by the town or city through RSA 674:35 and 43.

The amendment implementing any innovative land use control must contain the standards and criteria applicable under the control and should specify who has the authority to administer it and issue permits. If the planning board isn't designated to administer the control, the administrative procedure established must include review and comment by the planning board prior to final consideration of permit applications.

Due to the complex nature of innovative land use controls, and the lack of planning board experience with such techniques, professional planning assistance is recommended. Assistance is available through regional planning commissions and private consultants.

---

The idea and funding for this project came from the Merrimack County Commissioners, and members of the Delegation of Merrimack County. This concept was further developed through efforts of the Merrimack County UNH Cooperative Extension Council.

---

The authors of these fact sheets assume responsibility for content. All join to express appreciation to their advisors:

**Karen Bennett**, Committee Chair and Extension Educator, Forestry, Merrimack County

Attorney **David Harrigan**, Vice President for Policy of the Society for the Protection of New Hampshire Forests and Planning Board member from Pembroke

**Brooks McCandlish**, Extension Council member and member of the Bradford Planning Board

**James Rollins**, Office of State Planning

**William Klubben**, Director, Central NH Regional Planning Commission

*Special appreciation is extended to Marcia Keller of the Office of State Planning for her reviews of the material.*

**Table**

## INCENTIVE ZONING

by Lynda Brushett, Consultant  
Department of Resource Economics and Development

### Definition

Incentive zoning is a voluntary exchange of development incentives for public benefits between the community and a property owner. The community offers the property owner an incentive or bonus which reduces development costs or improves marketability. In exchange, the property owner contributes a desired amenity or benefit to the community that can't be mandated. The exchange system supplements existing land use regulations; it links specific development incentives with specific public benefits in predetermined formulas. Incentive zoning gives all parties to land use decision-making new opportunities to satisfy community and development needs frustrated by traditional zoning systems.

Zoning and subdivision regulations are inflexible by design. Lists of permitted or prohibited uses, specific design requirements, and the zoning map fix what can and can't be done on a given piece of property. In practice, traditional regulatory systems limit the community's options as well as the developer's. Both find great difficulty making land use decisions which respond to changing public policies, the peculiarities of individual land parcels, changes in building technology, innovative design principles, market needs, new development pressures,

development on the edge of zoning districts, the unforeseen effects of existing development, or the complex interplay of social, economic, and environmental issues that surround land development.

Incentive zoning helps overcome some of these limitations. Based on a mutual exchange of needs and interests, incentive zoning enables communities and developers to be more

sensitive to change and to individual development circumstances. It gives the community the opportunity to exercise site-specific land-use control and gives developers the opportunity for greater economic return.

*"Incentive zoning encourages improved building and site design, phased development, and lower development costs. In addition, community officials gain an improved ability to implement public policy goals related to social equity, fiscal responsibility, economic development, and environmental quality."*

### Technique

Incentive zoning systems are authorized by the community's legislative body and become part of the basic zoning ordinance. Regulations spell out formulas matching the provision of a development incentive to the provision of a public benefit. Participation is an option extended to the developer by the community.

Development incentives usually permit the developer to exceed the established requirements of the community's land use regulations. They can grant the developer a greater, more intensive, or different use of the property. They can speed the application review and approval process, change the effect of a growth manage-

ment ordinance, or alter the construction time frame of a project.

- **Intensity incentives** allow developers a greater or more intensive use of the property. Intensity incentives permit higher density in terms of lot sizes, units, floor area or height. Greater intensity can generate construction savings from consolidated utilities or roads or add income by increasing the number of units the developer can sell or lease.

- **Use incentives** permit mixing of uses in a development or provide for unspecified uses. For example, a convenience store might be allowed in a housing project, or residential units in a retail development. Use incentives can provide design flexibility and improve the economics of a development.

Public amenities or benefits which either go beyond the requirements of the community's regulations or are desired as a matter of public policy are given by the developer in exchange for the development incentive.

- Public benefits contributed by the developer include such items as parks, boat ramps, swimming or fishing access, recreational facilities, plazas, pedestrian facilities, day care centers, public transit access, observation decks, bike paths, parking, more open space, preservation of special environments, or cluster development design.

- **Inclusionary incentives** (sometimes called *inclusionary zoning*) help implement public goals to expand housing opportunities for racial minorities or low and moderate income residents. The inclusion of a specified number of affordable housing units is tied to a development incentive. For example, a zoning ordinance allowing one unit per acre as a right could

include an incentive of two additional units per every ten acres if the additional units were designed for low or moderate income families.

### Administrative Requirements

Incentive zoning requires well-designed basic zoning regulations which state what is permitted as by a right. The incentive zoning ordinance defines how much bonus or deviation is allowed. Development incentives should be attractive enough to encourage the participation of the developer while at the same time fulfilling the intent of the zoning ordinance.

Incentive zoning regulations must contain clearly stated purposes and policies, such as improving pedestrian traffic or encouraging certain housing mixes, and must relate to the goals and objectives of the master plan. Based on these purposes, specific benefits and amenities are selected, their values determined and the formula for the benefit incentive exchange defined. The regulation must state how the system will be administered, either as a right or through special permits.

Specialized expertise may be needed to decide how much of an incentive each benefit is worth and to ensure the rights of the public and the developers are protected. Incentive zoning systems should be reviewed periodically to ensure their continuing conformance with community policies and their effectiveness in producing desired results.

Legal concerns center on issues related to uniformity of treatment requirements, balance of costs and benefits and conformity to the master plan. There has been little litigation of incentive zoning schemes, perhaps because participation is voluntary. Careful drafting of the regulations should preclude legal challenges.

## PHASED DEVELOPMENT

by John F. Damon, Extension Specialist  
Community Planning  
Department of Resource Economics and Development

### Definition

Phased development is a land use technique which matches the rate of development with the capacity of the community to provide the facilities and services the development requires.

### Technique

If the legislative body in a New Hampshire town (town or city council or the town meeting) has adopted phased zoning, the planning board is authorized to evaluate the current infrastructure conditions in the community to determine if there's a need to require a developer to spread construction of a development over a specific period of time. Using the master planning and capital improvements program planning processes, the community has had the opportunity to develop a schedule for expansion of facilities and services that is consistent with projected growth of population and infrastructure needs. By limiting the number of units that can be built in a specific development in any one year, the community can ensure that the expansion of facilities and services is consistent with long-term community growth.

A phasing plan is developed at the beginning of the subdivision or site review process. The phasing plan details construction schedule, consequences of that schedule not being met, and the community's commitments to the developer. Examples of a community commitment

include: allowing the entire development to be built based on the regulations at the time of initial approval, relaxed requirements before occupancy permits are granted (e.g. final road finish), or density, or other incentive. (See *Incentive Zoning*, Fact Sheet #2.)

Phased development is situation specific. While other growth management techniques apply their criteria broadly to the entire community and to all development, phased development is applied only in situations for which the planning board feels it's appropriate, having determined that services aren't adequate to handle the added units for a specific application.

### Administrative Requirements

The zoning ordinance authorizing the planning board to require phasing of a development whenever the development would put a strain on services will need to give broad guidelines under which the board must operate. Needed are a statement of purpose which stresses that the intent is to accommodate development at a rate the services can support, and an indication of a time period over which the development is to be phased. The length of time doesn't need to be specific but does need to relate to the expansion of services.

A well-developed master plan and capital improvements plan are needed so the planning board will have a criteria to justify their actions.

## TRANSFER OF DEVELOPMENT RIGHTS

by D.E. Morris, Associate Professor  
Department of Resource Economics and Development

### Definition

Transfer of Development Rights is an innovative land use technique that allows the community to identify areas where higher density could occur (*receiving zone*), areas where there's a need or desire to limit development (*sending zone*); and it establishes development rights for various classes of property and allows development rights to be transferred from the sending zone to the receiving zone.

### Technique

Transfer of development rights (*TDR*) is based on the principle that there are a number of rights attached to real property. Among these are rights to minerals, water, air space, and development. A development right refers to the landowner's entitlement to the benefits of developing a given parcel of land for its highest valued use as defined by local zoning. In a TDR program, an unused development right can be removed from one parcel and transferred to another. The legality of transfer has been extensively reviewed and generally upheld by the courts. However, recent court rulings show that legal questions persist.

In a typical TDR program, a landowner is restricted from developing a parcel in the sending or preservation area and receives negotiable development right certificates (*DRC's*) as compensation. Landowners in the receiving or transfer zone are allowed to purchase *DRC's*, which enable them to develop parcels at higher densities than permitted by existing zoning.

### Administrative Requirements

TDR is a flexible land use tool which can be modified to the specific legal, political, or economic situation in a community. Nevertheless, there are three critical design issues which are common to all programs. These issues are: 1) whether the program is mandatory or voluntary; 2) how the development right certificates are allocated; and 3) how the transfer zone is designed.

TDR programs can be mandatory or voluntary, and both types of programs are currently in existence. The mandatory program automatically restricts development in the preservation zone and thus ensures that the resource will be protected. However, mandatory programs have been more susceptible to legal challenges. In *Fred F. French Investing Co., Inc. v. City of New York* (1976), the New York Court of Appeals concluded that the uncertain economic value of the particular development rights in that case violated the just compensation requirement of the U.S. Constitution. When there is some uncertainty concerning the marketability of the *DRC's*, a voluntary TDR program will obviate any legal challenge because landowners freely elect to give up their development rights. The trade-off is that the voluntary program may not provide adequate protection of the resource.

*DRC's* can be distributed in a number of different ways; but there are two primary ones: 1) distribution by area, and 2) distribution by value. In the first case, *DRC's* are awarded per unit of area (acreage or building lot). In the

second case, DRC's are assigned per unit of development value. It's much simpler to determine the number of DRC's using the area method; however, it's less equitable in areas where the land differs in quality. While the value method is more accurate and equitable, an economic model must necessarily be devised to estimate the development value for each parcel in the program.

The transfer or receiving zone can be structured in different ways. Transfers can be made between parcels owned by one or more landowners. Permitting transfers between landowners is the most flexible approach. In addition, transfer zones can be designated or they can float. Designated transfer zones are specific areas defined at the outset of the program. Floating transfer zones can be defined by a set of criteria (e.g., the presence of sewers and public water, or the absence of farmland and wetlands). The floating transfer zone approach lends flexibility to the program, but may violate good planning standards. The best solution may be to have a designated component and a floating component to the transfer zone.

The adoption of TDR programs in the Northeast has been very low in comparison to other land use programs. Considering this region has been the leader in development and adoption of innovative measures, the future of TDR's is uncertain. The continued success of preferential assessment programs and the growing support and implementation of purchase of development rights programs is presently overshadowing the TDR approach. Between 1972 and 1980, 12 counties or townships in the Northeast adopted TDR programs. Actual transfers have been few in number.

The fact that TDR ordinances have resulted in very few transfers doesn't altogether preclude the possibility that, with the proper planning and market conditions, TDR provisions would be used. There are a number of possible reasons for the lack of use of enacted ordinances:

1. Incentives for a landowner to sell aren't strong enough to induce a sale or offset the beliefs that a better price will exist in the future or zoning will be relaxed.
2. Incentives for a developer aren't great enough to compensate for additional costs and complication of transfer. In addition to the allowed increase in density, necessary incentives include assurance that the local government is committed to facilitating development in the development area.
3. Demand for development isn't great enough to justify higher densities (i.e., incentives provided for developers are irrelevant).
4. Opposition by neighbors to the development tract is too great.

## PLANNED UNIT DEVELOPMENT

*by Gerald W. Howe, Extension Specialist  
Community Resource Development  
Department of Resource Economics and Development*

### Definition

A planned unit contains a mix of building types, land uses, or densities, or a combination of these categories within a parcel. A planned unit development (PUD) is a development that integrates a variety of land uses within the same development proposal. A planned residential development (PRD) integrates a variety of residential types within the same development. And a planned unit residential development (PURD) combines both of these.

### Technique

Such development recreates a traditional rural village center that isn't possible using other types of zoning. The planned unit (PUD, PRD, or PURD) would be difficult to apply to the areas of a community that have already experienced growth and development; but, it would be a useful option for those outlying areas that are relatively undeveloped.

Planned units enhance community well-being by intermingling a variety of land uses. The enhancement might be proximity to services such as small grocery stores, laundromats, or restaurants. It's conceivable that a person could live, work, shop, and worship in the same development. That was the philosophy behind the old village center, which was a self-contained community that provided, within reason,

all that a person needed. It creates a neighborhood feeling and identity that many times is lost when other types of zoning are employed.

Traditional zoning that establishes zones for specific types of land use had been developed to separate incompatible uses from each other. This was a response to the threat to property values posed by land use conflicts.

The most appropriate use of planned units is to integrate compatible uses. As a community grows, the private sector support services that residents use get farther and farther away from the home. It makes sense to have a

***"It creates a neighborhood feeling and identity that many times is lost when other types of zoning are employed."***

commercial enterprise located near the people who'll use it. Planned units accomplish this. They can be used to create a mixture of residence types, recreational facilities, and businesses that would be a center of activity within a larger community.

The types of allowable uses to be integrated would be specified by the community that is using this innovative method of land use control. It might integrate multi-unit housing with single-family housing and allow some commercial sites to serve residents, or it might integrate light commercial with residential and recreational uses. Planned residential developments, simply a mix of residence types or densities, encourage different dwelling opportunities, but don't allow business or industrial uses.

At this time in New Hampshire's rural communities, it doesn't make sense to apply planned units to industrial developments or intensive commercial complexes. There are times when the scale of the commercial or industrial development might lend itself to the concept of planned unit developments; but, in those rare cases, it might be better to use something like discretionary zoning or special exceptions. There's a relative scale of use compatibility, and the closer together on that scale the uses are found, the more they'd lend themselves to being included in a planned unit.

### **Administrative Requirements**

The administrative requirements associated with planned units apply during the development approval process. They don't require continual monitoring. The planning board is responsible for evaluating them based on the criteria established by the community. There are no unique skills other than those required

for adequate site plan review or to operate the equipment necessary for the administrative process. The administrative requirements are very similar to those needed for traditional zoning, though applied on a much smaller scale.

Like cluster developments, planned units demand the most energy and resources during the developmental phase. Assistance could come from the regional planning commissions, the Office of State Planning, or from private sector consultants. Once developed, they don't have intensive administrative demands.

Planned units are a zoning tool, implemented like other zoning regulations by a town vote. The planning board drafts and proposes the ordinance based on the goals of the community master plan. They then hold public information sessions and place the ordinance before the community's appropriate legislative body, town meeting, or council meeting.

### **Definitions**

**Planned Unit** contains a mix of building types, land uses, or densities, or a combination of these categories within a parcel.

**Planned Unit Development (PUD)** is a development that integrates a variety of land uses within the same development proposal.

**Planned Residential Development (PRD)** integrates a variety of residential types within the same development.

**Planned Unit Residential Development (PURD)** combines PUD's and PRD's.

## CLUSTER DEVELOPMENT

by Gerald W. Howe, Extension Specialist  
Community Resource Development  
Department of Resource Economics and Development

### Definition

Cluster development is the grouping of residential, commercial or industrial units within a subdivision, reducing the size of the lot, and leaving the remaining undeveloped area undivided as *permanent open space*.

### Technique

Cluster development allows for an adjustment in the location and density of construction on a particular site as long as the total number of units involved doesn't exceed the allowed density for the entire parcel. The number of units may, in some instances, increase because less land within the parcel is needed for roads than would be in a "traditional" subdivision plan.

A cluster development can be designed to conform to the unique constraints and potential of a particular parcel or site. For example, slope, soil types, and wildlife, wetland and scenic area preservation can all be considered when a community allows a developer to use a cluster approach. Both the community and the developer benefit. Some communities offer a

bonus incentive to developers to encourage the use of clustering. The developer benefits from the reduction in cost of development: fewer feet of road to construct, smaller investment in providing utilities to the site, and less site work in general.

Clustering allows communities to protect and preserve environmentally sensitive areas, to lower the cost of providing community services, and to provide development and open space on

designated sites. It doesn't necessarily increase the developmental density in a community – it merely shifts the development on a site to meet the objectives as set forth in the master plan. Because the units are all in one area, the cost of providing services such as school bus

pick-up, snow removal, and road repair are minimized. If sites are served by public sewer, eliminating restrictions on lot size because on-site disposal isn't required, clustering becomes a viable option and should be considered. A secondary benefit to the community is diversity of landscape through the provision of the open space which is derived from cluster development.

In New Hampshire, the most appropriate use of cluster development would be to preserve, as

### Community Advantages of Cluster Development

- *Protects and preserves environmentally-sensitive areas*
- *Lowers the cost of providing community services*
  - *School bus pickup*
  - *Snow removal*
  - *Road repair*
- *Provides development and open space on designated sites, diversity of landscape*

much as possible, the open appearance and feel of the traditional rural community.

There are very few communities in the state that will escape the pressures of growth and development. Those communities that do experience the pressure will try to manage the change while preserving the traditional look and feel of the town. Minimum lot sizes applied equally across the entire community won't accomplish this since that approach tends to homogenize the look of the community. Clustering, on the other hand, does allow for the preservation of relatively large tracts of open space.

When a cluster development proposal is submitted to the planning board, the *entire* parcel is considered. The subdivision plan, when recorded with the registry of deeds, includes the protected open space. This ensures that the open space won't be developed in the future, one of the fears in communities when clustering is first considered. RSA 674:21-a addresses this issue by explaining that, while no recording at the Registry of Deeds is necessary, it *is* recommended to avoid uncertainty.

The ability to save open space could also be an important consideration for those with agricultural land who've been under considerable pressure to develop it. Agricultural producers who are faced with selling land, for whatever reason, can protect their most productive land by the use of cluster development.

Cluster development also creates a sense of community that many times is missing in new development in rural areas. The cluster can be planned in such a way that a rural feeling will be

achieved without the accompanying feeling of isolation that often occurs in sparsely settled areas.

Cluster development isn't the answer to problems of growth for every site in every community. However, it can provide the answer on specific sites in many communities.

### Administrative Requirements

The administrative requirements for clustering or cluster development are relatively simple. The community must first have an operative and contemporary master plan that clearly articulates the goals and objectives of the town. Cluster provisions must be in the zoning ordinance and implemented through subdivision regulation.

As with other subdivision regulations, the planning board is required to hold public hearings prior to the adoption of those that implement cluster development. The ordinance and the regulations must be specific enough to permit only "clusters" which are consistent with the concept and in keeping with the community master plan. However, the ordinance must be flexible enough to adapt to design features of diverse sites.

There is no specialized equipment or technical expertise required for the *administration* of this innovative land use technique. If additional expertise is needed, it would probably be in the drafting of the regulations for clustering. Help with this is available through the regional planning agencies, the Office of State Planning, or private sector consultants.

## PERFORMANCE STANDARDS/ IMPACT ZONING

*by Gerald W. Howe, Extension Specialist  
Community Resource Development  
Department of Resource Economics and Development*

### Definition

Performance standards/impact zoning establishes both the standards which must be met by a development and the process which determines the impact that development would have on the physical, social, economic, and environmental conditions within its community.

A performance standard, when applied to land use controls, is a "provision that substitutes a quantitative measurement of an effect for a qualitative description of that effect" [Office of State Planning OSP 1980]. It establishes definite measurements that determine whether the effects of a particular use will be within preestablished limits.

### Technique

Performance standards address the *effects* of a use, rather than the particular use itself. In performance standards zoning, undesirable *impacts* rather than *uses* are excluded. If a use performs to a set standard — one that has been quantitatively established by the overseeing body — then it's allowed.

The standards may be applied to the entire community or they may be used in conjunction

with traditional zoning, which would mean variable standards for different locations in a community.

The standards can be related to natural resources such as soil and groundwater or to the community infrastructure, such as roads, schools, or sewage capacity. Specifically, for example, they might relate to the size and illumination of signs, the amount of noise that's audible off-site, the generation of odor, and the increase in certain types of vehicle traffic.

These standards are set by the planning board, based on community concerns and acceptable limits. Performance standards allow for

flexibility of design and use, enabling the community to diversify areas by integrating compatible uses while protecting property values and community finances.

The development of performance standards that allow heavy industrial and residential uses to coexist requires a great deal of time. The standards are quite complex and cumbersome to administer. And for industry to comply with the standards requires substantial expense in either land or technology.

### *Examples of Categories for Performance Standards*

- soil and groundwater quality
- sewage capacity
- roads
- schools
- size and illumination of signs
- amount of noise audible off-site
- generation of odor
- vehicle traffic flow

## Administrative Requirements

The critical administrative component for performance standards is the technical analysis needed for development, monitoring, and enforcement. Monitoring, unlike traditional zoning, must be continuous. It increases the administrative burden; but this burden must be weighed against the community benefits of integrated development.

In the 1980 OSP publication, Performance Standards for New Hampshire Communities, there are three basic administrative requirements when considering any land use control: 1) equipment, 2) personnel/skills, and 3) finances.

**Equipment:** The equipment will vary with the technical complexity of the standards. For example, if a performance standard stipulates a maximum noise level, the community must have, or have access to, equipment that can measure noise in decibels. If the standard merely stipulates that the activity not be visible from the street, the necessary "equipment" is much less complex. It will be the level of sophistication and complexity of the standards that dictate the equipment necessary to monitor technical compliance.

**Personnel/Skills:** The monitoring is usually done by the Code Enforcement Officer. However, the number and skill level of these officers will depend on the complexity of both the standards and equipment necessary to monitor the standards. Also, because monitoring is

ongoing, the number of staff needed will be more than that needed for a one-time check. It might be possible to make arrangements with other communities to share monitors for checking compliance or to use computer-assisted evaluation tools when reviewing proposals under a performance standard system.

**Finances:** The cost of administering performance standards is tied directly to complexity of monitoring equipment and number of personnel required to enforce those standards. These costs, however, don't have to come out of community revenues. Many communities use application fees as a source of money to pay costs directly associated with the application. Equipment costs may also be borne by the applicant.

Performance Standard Zoning is a variation of traditional zoning that uses *performance standards* to regulate development instead of separating zones by *uses*. However, performance standards may also be used within traditional zoning to regulate certain kinds of uses.

The responsibility for developing performance standards is in the hands of the Planning Board. Once enacted, the administration of the standards are the responsibility of the person or board designated by the town.

## ENVIRONMENTAL CHARACTERISTICS ZONING

*by John M. Halstead, Assistant Professor, and  
John F. Damon, Extension Specialist  
Department of Resource Economics and Development*

### Definition

Environmental characteristics zoning is zoning which considers two factors: the potential impact of development on the environment, and the extent that change of these environmental features is acceptable.

### Technique

Ecologically, carrying capacity defines the point beyond which the environment cannot sustain further change without degradation of the target resource. For example, within a community, a piece of land has the ability to absorb and clean the waste water from a given number of septic systems. When that capacity is exceeded, it's likely the water will

become contaminated and/or waste water will surface and cause health and odor problems.

Environmental protection is necessary to assure people that their community's natural resources will be available when needed, and to protect the residents' health, safety, and property. Wetlands recharge groundwater, control flooding, and provide wildlife habitat. Floodplains serve as floodwater storage to protect downstream residents; and the "meandering" of rivers on floodplains slows the water, reducing

erosion. Farm and forest lands provide food, fuel, wildlife, lumber, open space, promote clean air and water, and supply potential recreation sites. Scenic areas provide both an added "quality of life" value and an economic benefit as a tourist attraction.

Often, we've been unaware of the damaging impact we can have on our environment, and the effect of that damage on our lives. Construction on wetlands leads to problems related to

foundation stability, wet basements, and sewage disposal. Building on floodplains eventually results in lost or damaged property. While the scenic value of steep slopes often draws us to them as construction sites, that results in problems for road building and re-

pair, utility and service access, and erosion. Aquifers are the present and future suppliers of significant amounts of water, and contamination is costly.

The extent human beings are permitted to affect this environment is determined by the standards set by the community, as well as state and federal laws. The establishment of community standards is done through the master planning process. The standards are set forth in the zoning ordinance, site review pro-

Although not commonly known as Environmental Characteristics Zoning, this method is commonly used in New Hampshire to regulate development.

Current and potential uses of this technique include limiting or prohibiting development that would adversely affect wetlands, floodplains, prime or important farmlands, unique forest or wildlife areas, steep slopes, aquifers, scenic areas, or other environmentally sensitive resources of importance to the community.

cedures, sub-division regulations, and other regulations that control operations within the community (e.g. gravel pits). They can be specific to a zone (such as agricultural, scenic view, or river corridor), or to a resource (such as aquifer or capacity of soils to accept effluent).

In the water quality area, an example of standards would be regulations related to construction and runoff from a construction site that influences the quality of water off-site. The water quality is changed but the standards set limits on how *much* it can be changed.

In some situations, planning to protect one environmental entity conflicts with other goals. For example, restrictions against building on steep slopes may be relaxed to provide additional setback for scenic vistas, even though this may also increase erosion. In these cases, the community has to decide which objective has highest priority.

The "overlay zone" technique (superimposing one zone over another) is one way to single out environmental concerns that have well-defined boundaries. It's a good technique to use to identify and control management of aquifers, wetlands, farmland, shorelines, scenic areas, and unique features. Environmental constraints are in addition to other restrictions placed on development by traditional zoning.

## Administrative and Monitoring Requirements

A natural resource inventory provides the basis for the *Environmental Characteristic Zoning* technique. This inventory becomes part of the Master Plan. It provides needed base information from which municipal officials and study committees decide the future use or change of these resources.

The inventory includes soils, surface and

ground water, farmland, slopes over 15 percent, floodplains, wetlands, and unique forest, wildlife, and scenic areas of importance to the community. It identifies what exists, the use and pressure on each resource, and the potential for use and mis-use in the near future.

A High Intensity Soil Survey (HISS) identifies soil types and their locations on specific parcels of land, providing soil characteristics accurate to twenty feet. This information is valuable to planners and developers for administering regulations and planning roads, lot sizes, wetlands, drainage, building location, and other features in a development.

Goals for the management of each resource need to be developed so there can't be any misinterpretation about a resource's importance to the community. There's usually negotiation between those who believe there should be no change and those who feel change is beneficial. Air and water quality are examples of standards that may require change if the current conditions are below acceptable levels.

The tools needed to reach these goals are created by the community legislative body (the town meeting, town council, or the city council) or the planning board, depending on the implementation technique. Zoning always needs to be approved by the legislative body.

Monitoring to guarantee standards are being met is necessary at the plan review stage, the construction stage, and periodically thereafter. The depth and frequency of review depends on the potential for degradation.

Specialized help in developing the inventory and environmental standards is available from the local Conservation Commission, Regional Planning Commissions, the U.S. Soil Conservation Service, UNH Cooperative Extension, Conservation Districts, and private consultants.

## ACCESSORY DWELLING UNIT STANDARDS

*by John F. Damon, Extension Specialist  
Community Planning  
Department of Resource Economics and Development*

### Definition

An accessory dwelling unit is a second dwelling unit, detached or attached, which is permitted on the same lot as the principal dwelling unit.

### Technique

A common practice in a residential zone is to limit residences in a building and on a lot to one household. A household is often defined as a family, a single person, or unrelated individuals (the number of whom is often limited) residing in a dwelling unit that includes eating, sanitary, living, and sleeping facilities.

There are situations in which the need for housing can be met by increasing the density of residences in areas already developed. This can be done in several ways: adding an accessory apartment to an existing structure by remodeling the interior of an existing building; adding living space to an existing building; or, adding a detached unit to the property.

Other advantages to accessory dwelling units are that they could help reduce sprawl, provide

older residents with income and/or labor to maintain property, or provide residences with "mother-in-law" units. When such units wouldn't adversely affect the intent and character of a zone, a relaxation of traditional rules may be appropriate.

### Administrative Requirements

The real challenge to the municipality will be to develop criteria that ensure that the second dwelling unit will actually be "accessory." To be accessory, it would need to be smaller than the main residence in size.

Conditions imposed to allow accessory dwelling units must be site-specific in order to predetermine whether the existing lot is adequate to provide on-site water and/or sewerage treatment (if applicable), proper setbacks from lot lines, and other amenities that affect the character of the zone.

The town meeting or town or city council must authorize the establishment of accessory dwelling unit standards as part of the zoning ordinance.

## FLOATING ZONE

### *a flexible zoning technique*

by John F. Damon, Extension Specialist  
Community Planning  
Department of Resource Economics and Development

#### Definition

A floating zone is a zoning district for which requirements have been developed in the written part of the ordinance but the location hasn't yet been noted on a zoning map. The location won't be indicated on the zoning map until an application for development has been made, the requirements met, and an amendment approved to the zoning map.

#### Technique

While not used extensively in New Hampshire, the floating zone can be used to accomplish a community objective while maintaining flexibility in terms of identifying the specific site.

The decision about site is influenced by criteria in the ordinance as accepted by the legislative body.

The technique has application to the future needs for manufactured housing developments, multi-family developments, industrial areas, and shopping centers.

The floating zone can control both type and amount of development. If, for example, a municipality needs 200 units of housing for the elderly, it can create a floating zone establishing acres, access, units per building, water,

sewer, recreation, screening, security, and other factors of importance to the community. This sends a message to those with business and development interests to look for and propose a development that will meet those criteria.

#### Administrative Requirements

Designers of the floating zone should be particularly careful to see that the criteria and process reflect the intent as developed in the master plan.

It should be clear that the floating zone serves an identified public need and not just a private need. If it can be shown that a floating zone ordinance is designed primarily to assist private special interests, it's likely the ordinance will be called "spot zoning" and be declared invalid.

Professional assistance is recommended in the development of criteria that need to be met by an applicant.

The application and review stages should be relatively straightforward.

If the criteria are met to the satisfaction of the review board (often the planning board) and an amendment is adopted by the legislative body of the community, the location is fixed on the zoning map.

Growth Management is Master Planning, and It Must Be Smart!	8

## Introduction

As a Planning Board Member you may be asked: What are you doing to control growth and sprawling development? What is smart growth? How can we plan growth to achieve sustainable development that balances community well-being, economic vitality, and environmental protection needs?

More people are asking these questions because of their importance to the quality of our living and working environments. People want Planning Boards to address traffic jams, open lands sold and subdivided, inadequate public facilities and services, and rising costs (i.e. taxes) to pay for public services.

The answer to these questions is the fundamental purpose of community planning. The art and science of planning has evolved from initial layouts aimed at arranging buildings and streets. The focus then was on architectural design and physical appearance. Today, the focus is as broad as the multiple issues that confront community decision-makers: population changes, economic development, social equity, housing development, transportation, education, health, and environment.

The community planning process consists of identifying issues, projecting needs, setting goals, developing options, making and implementing decisions. This process is comprehensive in scope, coordinated with other issues, and value added/results oriented. It recognizes growth and change are inevitable and aims to accommodate them with minimal, unintended consequences. Called by another name, it is growth management.

## Integrate Growth Management with Master Planning Activities

So to answer the questions, Planning Boards need to link growth management with traditional Master Planning. This Guide describes the elements of a growth management program and places it in the context of traditional planning activities, such as land use planning, zoning, and capital improvement programming. It will provide Planning Board members with ways to address growth management, and with policies and implementation strategies they can adopt and implement (e.g. growth permit process, development impact fees, transfer development rights).

Use of the Guide will increase understanding of planning concepts and their interrelationships, provide knowledge needed to implement planning techniques, meet local public demand to address this critical issue, and result in better policies to achieve sustainable development.

Aerial photo shows growth pattern resulting from mill development on the Lamprey River in Newmarket, NH

“ The problems of growth are not to be solved by limiting the scope, program or location of development. They must be resolved by rethinking the nature and quality of growth itself, in every context. People argue heatedly about growth: where, how much, what type, what density and if it is really necessary at all.”

“Any region with a high growth demand has several options. [The region] can try to limit overall growth; let the surrounding communities grow uncontrollably until they become a continuous mass; attempt to accommodate growth in re-development and infill locations, or plan new ... growth areas within reasonable transit proximity of the city center. Every region needs to find an appropriate mix of these very different options.”

*The New Urbanism*, 1994, p.xiii

Use Site Analysis to show current development as a first step in managing growth.

## Growth Management in New Hampshire

The concept of growth management evolves from state planning law. New Hampshire law, RSA 9-A:1:III (a), states: “the [state] comprehensive development plan shall include: state policies to provide for the orderly growth and development of the state and to maximize smart growth.”

Further New Hampshire law, RSA 9-A:1:IV, states: “local planning boards are encouraged to develop plans which are consistent with the policies and priorities established in the [state] comprehensive development plan.”

In addition, New Hampshire law, RSA 9-B:3, states: “smart growth means the control of haphazard and unplanned development and the use of land, which results over time, in the inflation of the amount of land used per unit of human development, and of the degree of dispersal between such land areas. “

And finally, New Hampshire law, RSA 674:22, states: “The local legislative body may ... regulate and control the timing of development. Any ordinance imposing such a control may be adopted only after preparation and adoption by the planning board of a master plan and a capital improvement program and shall be based upon a growth management process intended to assess and balance community development needs and consider regional development needs.”

## Growth Management in Communities

Within this context, many communities in NH are beginning to include growth management policies in their Master Plan. Managing growth (the development of land to accommodate population increases and related public facility and service needs) is the fundamental purpose of community planning. An effective community planning program is an effective growth management program. Is there any substantial difference between planning and growth management?

No! The purpose of growth management, as the RSAs state, is to regulate and control the timing of development to balance growth with competing needs both within the community and its region.

Similarly, the application of smart growth and sustainable development principles at the community level is intended to balance competing economic, fiscal, environmental, and social needs within a geographic location.

## Growth Management Issues

To manage growth a Planning Board needs planning policies and implementation strategies that address the amount, type, location, appearance, costs, timing, and financing of growth.

**Amount** The amount involves understanding demographics and projecting population and characteristics of people living and moving into the community. Planning and managing the amount of growth is important because the demand drives the need for the number, type, and cost of housing; the number and type of supporting land uses (e.g. commercial, grocery, and related support service stores); and public facility and service needs (e.g. streets, parks, police, schools, fire protection, water and sewage treatment).

**Type** The type involves identifying what kind of growth will be accommodated. Typically this is residential housing development, but may include other forms of growth for commercial, recreational, industrial, government, or other land uses.

**Location** The location involves identifying where several types of land uses will be located to accommodate the projected growth. This includes residential neighborhood areas whether in a town center, suburban, or rural locale; various commercial areas in a town center, neighborhood service, or regional service locale; industrial areas; recreation areas, and public facilities and services. This information should be in the Master Plan Land Use element.

**Appearance** The appearance involves what the development will look like. The appearance includes the site or subdivision design, as well as the physical appearance or architecture of the development.

**Costs** Growth costs money, but it also produces benefits. Planning smartly means knowing the costs as well as the benefits. Costs include construction and ongoing operation and maintenance of public facilities and services. They also include negative, sometimes unquantifiable, consequences, e.g., loss of open lands or views.

**Timing** The timing involves establishing when the growth will be accommodated. This is done by writing policies and strategies to stage or phase development over time. It may involve defining growth boundaries or limiting the number of residential building permits issued each year. Or it may mean only permitting development when timed with public and private infrastructure investments.

**Financing** The financing involves determining who will pay for additional public facilities and services, capital expenditures and operational costs, and how they will be paid for, e.g. bonds, annual budget, or developer payment of impact fees.

## Growth Management and the Master Plan

A local Master Plan describes a community's vision for the future and how it plans to achieve that vision. A Master Plan can address growth management by including these issues in each section of the Master Plan. The Land Use section addresses where; the Housing section addresses type and affordability; the Transportation section addresses how to move the population and goods; the Public Facilities section addresses service and facility needs; and the Capital Improvement Program addresses costs, timing, and financing.

By adding a Population and Growth Management section to your Master Plan, the community could address timing. This section should include policies that address the following questions:

- How much population growth does your community want?
- Where should the population be located?
- How should it be accommodated (i.e., single family, duplex, multi-family housing)?
- Will it be affordable by the target population?
- What will be the appearance or design for the development?
- How much will it cost?
- How will it be timed to balance it with environmental, public facilities and fiscal constraints of the municipality?
- How will the growth be financed?

Policy answers to these questions are linked to other Master Plan sections, such as land use, housing, public facilities, character and appearance, as well as the Capital Improvement Program. A well-developed population and growth management section will define how the community's population growth relates to the regional growth, the community's vision for growth, and the intended way to accommodate the growth. The population and growth management section for a Master Plan might include:

- Policies (i.e. what you want to achieve or commitments to do something—in the form of goals, principles, and standards).
- Implementation Strategies (i.e. how you intend to achieve it).
- Background research and analysis for the policies and implementation strategies (located in the Master Plan Appendix) including:
  - Description of existing population, social and economic demographic characteristics.
  - Population growth projections for the community and region.
  - Current housing stock by type and cost.
  - Current and projected costs.
  - Current and potential sources of revenue for costs.
  - Potential methods to reduce costs or accommodate growth more efficiently.

Appearance: New England style gas station complex in Durham, NH

*“For the region [New England] to retain its charms, and for our generation to do its part by leaving New England better than we found it, we must take an active interest in how the land is developed.”*

*“Development, depending on what it is, where it is sited, and how it is designed, can add or detract in various ways. Rarely is it all good or all bad. But what is built, where it is sited, and how it is designed, ends up making a real difference in how New England looks and feels, and how it functions, both economically and environmentally.”*

Appearance: Conventional design gas station in Any Town, NH

Timing and Amount: Milton, NH on the west bank of the Salmon Falls River

## Growth Management Issues During Site Plan or Subdivision Plan Review

When the Planning Board is reviewing site or subdivision plans, consider some growth management issues as well as the basic questions (see SRPC *How To Get the Development You Planned*):

Where is the proposed site development or subdivision located?

What type of land use is proposed? Is it consistent with the Master Plan?

What is the appearance or design of the development? Does it reflect smart growth management principles, e.g. nodal development, controlled access management, clustered residential neighborhood)? Does it reflect the traditional New England architectural character?

What is the timing of the site development or subdivision in relation to needed public facilities and services? Compare the development to the municipality's Six Year Capital Improvement Program. Is there an adopted Capital Improvement Program?

What is the overall impact (i.e., physical, social, environmental and fiscal) of the development? You may require the developer to conduct a growth impact analysis to help assess the impact the growth from the development will have on the area and determine what measures must be taken to minimize the impacts. For a full description of what should be included in a growth impact analysis, see the Strafford Regional Planning Commission's Guide to Growth Impact Analysis. A growth impact analysis may not answer all of your questions, or it may claim there are no impacts. The Planning Board may require a peer review by a professional planner. Payment for the review can be requested from the applicant.

How will the impacts of the site development or subdivision be mitigated, and how will the costs of development be paid? Will the costs be offset by the benefits? Should development impact fees be charged? (Does your community have a Development Impact Fee ordinance?) Is financing or bonding required? (Does your community have a standard Performance Guarantee Agreement to insure the site and any graded open areas are stabilized or infrastructure improvements completed in case the developer has difficulties and the project is terminated?)

Clear answers to these and other questions will provide your community with the best information to make an informed decision and insure you get the development you planned.

*“And you may ask yourself  
What is that beautiful house?  
And you may ask yourself  
Where does that highway go?  
And you may ask yourself  
Am I right? ... am I wrong?  
And you may tell yourself  
... what have I done?”*

Talking Heads, “Once in a Lifetime”, from the Remain in Light album, 1980.

## Growth Management & Smart Growth

Some people see smart growth and growth management as the same, and others see them as different. Similarly with community planning, some people say they have been implementing community planning and growth management programs for years. The issue is whether you are reviewing and permitting subdivisions or site plans based on implementing basic community planning. For example, your municipality may be permitting single lot subdivisions without implementing a design principle for creating a traditional, compact residential neighborhood. Or, you could be in the situation of making decisions without knowing which principles to apply to make “smart” planning decisions. It is like playing baseball in a sandlot game versus in a professionally coached, trained, and organized game with strategies, plays, and techniques.

To accomplish “smart” growth management—that is being effective—it is important to have professional community planning guidance and knowledge. Growing “smart” can save millions of dollars in the operating costs of your public facilities and services, as well as add millions of dollars to real property values and appreciation.

## Growth Management & Sustainable Development

The goal of “smart” growth management is to achieve sustainable development. Sustainable development balances three community goals: economic vitality, community well-being, and environmental resource management. When only one or two of these goals are considered, it usually results in an imbalance in another area. The objective is to understand the whole picture, not just the immediate impacts a project may have on the site. Any land use decision that disrupts this delicate balance can affect the community’s character. Sustainability is a goal that planners and community decision-makers strive for every time a decision is made affecting development. It is about ensuring a better quality of life now, and for generations to come. It is “smart growth planning.”

Again, the Master Plan describes what, where, when, and how smart growth or sustainable development should occur. It may address the need to protect open lands, which leads the Planning Board to make a recommendation to adopt new open space subdivision regulations. Or the Master Plan may state minimum lot sizes or maximum densities for residential development. The community’s land use regulations are driven by the Master Plan policies and standards. The Master Plan empowers the Planning Board to adopt “smart” growth regulations, and makes regulations easier to defend if challenged.

### NH Principles for Smart Growth

1. Maintain traditional compact settlement patterns to efficiently use land, resources, and investments in infrastructure;
2. Foster the traditional character of New Hampshire downtowns, villages, and neighborhoods by encouraging a human scale of development that is comfortable for pedestrians and conducive to community life;
3. Incorporate a mix of uses to provide a variety of housing, employment, shopping, services, and social opportunities for all members of the community;
4. Provide choices and safety in transportation to create livable, walkable communities that increase accessibility for people of all ages, whether on foot, bicycle, or in motor vehicles;
5. Preserve New Hampshire's working landscape by sustaining farms, forests, and rural resource lands to maintain contiguous tracts of open land and to minimize land use conflicts;
6. Protect environmental quality by minimizing impacts from human activities and planning for and maintaining natural areas that contribute to the health and quality of life of communities and people in New Hampshire;
7. Involve the community in planning and implementation to ensure that development retains and enhances the sense of place, traditions, goals, and values of the local community;
8. Manage growth locally in the New Hampshire tradition, and work with neighboring towns to achieve common goals and address common more effectively.

## **Growth Management is Master Planning and It Must be Smart!**

- Growth management is the fundamental purpose of Master Planning.
- Growth management guides the amount, type, location, appearance, costs, timing, and financing of development and public facilities and services.
- Smart growth includes the use of professional planning advice.
- Planning decision-makers can achieve sustainable development by adopting and implementing Master Plan policies for smart growth management.
- Smart growth implementation strategies include:
  - Land use zoning districts with densities and intensities of uses balanced with a ...
  - ...growth management ordinance to phase in the issuance of residential building permits
  - Adequate public facilities ordinance
  - Capital improvement ordinance
  - Impact fee ordinance

We can achieve sustainable development and improve the quality of life.

**1400.00 GROWTH MANAGEMENT / RESIDENTIAL PHASING ORDINANCE**

**1401.00 Purpose**

*1401.01* Based on the Master Plan, which assesses and balances community development needs and considers regional development needs, the following Ordinance is deemed necessary to manage the rate of growth in the Town for the following reasons:

The Town of Brookline has had a Growth Limitation Ordinance in place in recent years which combined a feature which controlled the issuance of building permits together with a conscious effort to impose phasing requirements as a condition of subdivision approval. Both of these mechanisms were necessary to address the growth issue in view of the inventory of existing lots. As part of the Town's continuing effort to review growth issues and to determine the efficacy or necessity of particular growth control regulations, the Town believes that it is now reasonable to replace the previously existing building permit limitation which provided for growth management, with a regulation that seeks to distribute the impact of any new subdivision over a period of time that will allow the Town to react to the provision of services occasioned by such development in a controlled and reasonable manner and to plan for those impacts in an orderly way. Accordingly, the purpose of this ordinance is to provide a mechanism which imposes a requirement of phasing as a condition of subdivision approval in a consistent and orderly manner, in order to:

- a. Promote public health, safety, convenience, welfare, and prosperity;
- b. Ensure that adequate and appropriate facilities are available to individuals who may come to be located in the Town of Brookline, New Hampshire, and allow the Town the opportunity to absorb increases in Town services in an orderly way;
- c. Prevent scattered or premature development of land as would involve danger or injury to health, safety, or prosperity by reason of the lack of drainage, transportation, schools, fire protection or other public services, or necessitate the excessive expenditure of public funds for the supply of such services;
- d. Provide for the harmonious development of the municipality and its environs; and
- e. Insure that Brookline does not receive more than its fair share of the regional population growth. As shown in the Master Plan, Brookline is growing faster in recent years than most of the communities in the Nashua region.

*1401.02* Providing for the phasing of all future subdivision approvals serves the Master Plan directed goal of allowing the Town a sufficient amount of time to plan for school and municipal expansions occasioned thereby.

**1402.00 Authority**

This ordinance is adopted as an Innovative Zoning Provision as provided for in RSA 674:21 (I)(b).

**1403.00 Application**

This article only applies to those lots shown on subdivision plans accepted by the Planning Board after November 24, 1993.

**1404.00 Definitions**

1404.01 Building Permit. A building permit obtained for the construction of a new single family home or duplex. (A duplex requires only one building permit). This Ordinance does not apply to non-residential building permits or permits for expansion or alteration of existing structures.

1404.02 Calendar Year. January 1 to December 31.

**1405.00 Effective Date**

This Ordinance will not become effective until January 1, 1994.

**1406.00 Annual Review and Minimum Permits Available**

1406.01 Annual Review

The growth rate which the Town has attempted to achieve in recent years has been a 3% growth rate based on the number of dwellings that were in existence on November 30<sup>th</sup> of any given year.

This growth rate has been based on an analysis of the appropriate factors as required by law. This ordinance seeks to create an objective standard for phasing which considers the size of the subdivision and allows for a phased build out, depending on the number of lots in the subdivision, which standards are set forth in the table and rules contained in the following sections. While the process contained herein does not correlate directly with the intended growth rate, it is the intent and desire of the Town that this rate of growth be maintained as nearly as possible in future years.

To that end, this ordinance will be reviewed annually by the Planning Board in order to determine the extent to which that goal was achieved and, in the event that modifications in the table or regulations are necessary to accomplish said goal, the planning board is directed to present appropriate modifications for the consideration of the voters at future meetings, in accordance with the process set forth in § 1407, below.

1406.02 Minimum Permits.

The intent of this section is to ensure that each developer will be assured a number of permits that is appropriate to the size of his/her subdivision and investment. The intent of this section is also to ensure that each subdivision receive a building permit, not for a subdivider to create small subdivisions or to sell off individual lots circumventing the purpose of this Ordinance.

**TOWN OF BROOKLINE, NH**  
**ZONING AND LAND USE ORDINANCE**

# of new building lots	Year One	Year Two	Year Three	Year Four	Year Five	Year Six	Year Seven	Year Eight	Year Nine	Year Ten	Year Eleven +
Less than 10	1 *	1	1	1	1	1	1	1	1		
10 - 19	2 *	2	2	2	2	2	2	2	2	1	
20 - 29	3 *	3	3	3	3	3	3	3	3	2	
30 - 39	4 *	4	4	4	4	4	4	4	4	3	
40 +	5 *	5	5	5	5	5	5	5	5	5	

**Notes:** This table shows the number of building permits available for various size subdivisions for the years following Brookline Planning Board approval. Year One denotes the year in which the subdivision was approved by the Brookline Planning Board. \* If there is no house on the original pre-existing undeveloped buildable lot (parent parcel), then an additional building permit is available the first year. The example provided for a subdivision of “Less than 10” lots is for a 9-lot subdivision. The other above examples provided are for the maximum size subdivision in each category (19, 29 and 39 lots, respectively) so as to illustrate the full build-out period for subdivisions in each size range. A 55-lot subdivision is illustrated for the “40+” size category. If more than 55 lots are involved, either a maximum of five or the remaining number of permits, whichever is less, are available in subsequent years until the total number of permits available in the subdivision is issued.

- a. Each subdivision may receive their building permit allocation at any time during the calendar year as illustrated in the table above.
- b. A subdivision may bank and carry over a maximum of one year’s building permit allocations to the next calendar year. Any allocation that is carried over from the first year and not used by the end of the second year is postponed to the end of the subdivision buildout.

The following examples are meant to help understand the intent of this section. The ability to hold permits and carry them over one (1) year may make capital expenditures, such as road construction, more affordable. It is not intended to allow additional permits to be issued, or more than the maximum of two (2) year’s permits to be issued in any calendar year. The carry over may be exercised multiple times, however, Example 3 demonstrates the risk of miscalculating.

*(Example 1) A 29-lot subdivision would be eligible for a maximum of three (3) building permits in a calendar year. If the developer chose to hold these permits until the following calendar year, there would then be a maximum of six (6) building permits available. If the entire six (6) available permits were used, the following calendar year there would only be three (3) permits available. The result of a carry over can never exceed a total of two (2) year’s available permits, in this example six (6) permits.*

*(Example 2) On a 29-lot subdivision, the developer has carried his maximum number of permits for the first year, three (3), over to the second year. There are now six (6) permits available. The developer only uses four (4) permits in the second year. There are now five (5) permits available in the third year – two (2) carried over from the previous year and three (3) permits available for the calendar year. Any portion of a previous year’s permits may be carried over to the following calendar year up to the maximum permits allowed in a two-year period.*

*(Example 3) On a 29-lot subdivision, the developer carried over his maximum number of permits for the first year, three (3), over to the second year. There are now six (6) permits available. The developer only uses one (1) permit, leaving five (5) unused permits for the second year. The developer may only carry over three (3) permits to the third year. The maximum number of permits that can be carried over to the following calendar year is three*

(3). *In this example, two (2) permits were deferred to the end of the subdivision buildout period because of a failure to use the permits in earlier years.*

1406.07 *Expiration.* A building permit expires and becomes invalid if construction, which is deemed to be installation of footing and foundation, has not started within six (6) months from the date of issuance (as explained in the Brookline Building Code).

1406.08 *Transferability.* A lot can be transferred with or without a building permit. Building permits are tied to lots and cannot be transferred between lots.

**1407.00 *Sunset Clause***

This article expires at Town Meeting 2011, unless the following occurs:

An annual review by the Planning Board to determine if the population and growth data, in conjunction with the CIP, justifies the continued application of this Ordinance. If, after making findings, the Board feels that this article is no longer appropriate, it is no longer effective. If, after making findings, the Board feels that this article is both appropriate and necessary to meet the purposes outlined above, this article would be effective for another year, when another annual review shall occur.

## ARTICLE XVI

## GROWTH MANAGEMENT ORDINANCE

Purpose

Based on the Master Plan, which assesses and balances community development needs and considers regional development needs, the following ordinance is deemed necessary to flatten the rate of growth in the Town for the following reasons:

- Meet the demand for the schools with the existing capacity, especially the Hollis/Brookline Junior High which is closest to capacity. The Elementary and High Schools are projected to be over capacity in 1995-1996. This is noted in Table IX-13 of the Master Plan.
- Provide taxpayers a slower rate of growth and prevent an unacceptably high growth in the tax rate;
- Allow the Town the opportunity to absorb increases in Town services in an orderly way;
- Insure that Brookline receives its fair share of the regional population growth. As shown in Table IX-2 of the Master Plan, Brookline is growing faster in recent years than all communities in the Nashua region.

The Master Plan recommends a 3% growth rate maximum. This would still allow Brookline to grow faster than all nearby communities while allowing the Town time to plan for school expansions.

Authority

This article is adopted as a growth management ordinance under RSA 674:22.

Application

This article only applies to those lots shown on subdivision plans accepted by the Planning Board after November 24, 1993.

Definitions

**Building Permit:** A building permit obtained for the construction of a new single family home or duplex. (A duplex requires only one building permit). This ordinance does not apply to non-residential building permits or permits for expansion or alteration of existing structures.

**Calendar Year:** January 1 to December 31.

Effective Date

This ordinance will not become effective until January 1, 1994.

Requirements

1. The number of building permits that may be issued to any individual, partnership, or corporation in any calendar year shall be limited to the following:
  - a) The total number of building permits which can be issued in a calendar year is stated in section 4. If the total number is not issued, then those can carry over to the next calendar year.
  - b) The building permits shall be distributed on a first-come-first-served basis. If there is a greater demand than supply, then a waiting list shall be established. Any permits that expire shall be given to the people on the waiting list (also first-come-first-served).
2. A building permit expires and becomes invalid if construction, which is deemed to be installation of footing and foundation, has not started within six (6) months from the date of issuance (as explained in the Brookline Building Code).
3. A lot can be transferred with or without a building permit. Building permits are tied to lots and cannot be transferred between lots.
- 4a. The maximum number of building permits that may be issued per year will reflect a 3% annual growth rate in dwellings.
- b. Although lots existing prior to November 24, 1993 are exempt from limitations on building permits, the building permits issued on those lots will be included in the building permit calculation.
- c. A minimum of 10 building permits may be issued annually.
5. For calculation purposes, the Planning Board has determined that the number of dwellings as of January 1, 1994 is 1,232.

Sunset Clause

This article expires at Town Meeting 1997, unless the following occurs:

An annual November review by the Planning Board to determine if the population and growth data, in conjunction with the CIP, justifies the continued application of this ordinance. If, after making findings, the Board feels that this article is no longer appropriate, it is no longer effective. If, after making findings, the Board feels that this article is both appropriate and necessary to meet the purposes outlined above, this article would be effective for another year, when another annual review shall occur. After making findings, the Planning Board may change the number of permits issued annually based on data received during the year to ensure the goals of the ordinance.

## SECTION 9: GROWTH MANAGEMENT ORDINANCE 18(Enacted March 14, 2006)

9.1 Authority This section of the Zoning Ordinance is enacted in accordance with RSAs 674:21 and 674:22.

9.2 Purpose -- The purposes of this section are as follows:

1. Promote public health, safety, convenience, welfare and prosperity; 2. Ensure that Deering does not receive more than its fair share of regional population growth; 3. Manage orderly growth in Deering in coordination with the Master Plan and Capital Improvements Program. 4. Ensure that adequate and appropriate facilities are available to individuals who may come to be located in Deering, and allow the Town the opportunity to absorb increases to Town services in an orderly manner. 5. Provide a temporary mechanism when municipal services are strained or overloaded to reduce the rate of residential growth and thereby allow the Town time to correct any deficiencies that have developed.

9.3 Findings -- The town hereby finds that:

9.3.1 According to the U.S. Census, Deering's population grew from 1,707 in 1990 to 1875 in 2,000, an increase of 168 people or slightly less than 1% per year (.9%) in the last decade. Since 2000, Deering's estimated population, (NH Office of Energy and Planning) has grown to 2,010, which is an annual rate of increase double that of the last decade, or slightly less than 2% (1.9%) per year. If this same rate of increase were to continue, over the next four years the town's growth would be 3.6% per year, or an increase of 289 or 14.4%, for a population of 2,299 by 2008.

9.3.2 In 2004 Deering had an increase in building permits from 17 in 2003 to 30. This is a 78% increase in permits over the 2003 level. Assuming conservatively that the building permit rate does not increase above the 2004 level rate, but remains 30 each year and each permit 91 represents a household of approximately 2.3 persons, this would mean an increase over the next four years of 120 buildings, or a population increase of 276 persons. The increase through 2011 would be 483, or 24% above the present population.

9.3.3 The Planning Board adopted an update to the Deering Master Plan in December 2004. As noted in the document, the overall Existing and Future Land Use Goal is to "maintain Deering's rural character and protect areas of special value to the Town while providing for population growth in ways compatible with other goals of this Master Plan."

9.3.4 Following a recommendation contained in the 2004 Master Plan, the Planning Board adopted the 2006-2011 Deering Capital Improvements Program (CIP) on December 14, 2005. The CIP examines tax rates, past municipal expenditure trends, and presents a detailed proposed schedule of capital expenditure over the next six years for use by the Budget Advisory Committee, Board of Selectmen, and all citizens of Deering.

9.3.5 The CIP outlined capital needs for the Police Department, Fire/Rescue Department, Emergency Management, Highway Department, Planning Board, Board of Selectmen, and Cemetery Committee. The projected impact of capital needs on the municipal portion of the tax rate ranges from \$2.05 to \$2.61 per thousand over the six-year period. 9.3.6 The 2004 full value tax rate for the Town of Deering was \$18.63 per thousand. This rate was higher than the average full value tax rate (\$18.01) of the six communities that directly abut Deering. Abutting communities are Antrim, Bennington, Frankestown, Henniker, Hillsborough, and Weare. 9.3.7

The Hillsborough Deering Cooperative School District (SAU #34) Long-Range Facilities Master Plan has identified a number of potential options for future facilities improvements, including a possible addition to H-D Elementary School or a new PK-2 school in Hillsborough or Deering. Future growth rates in Deering will be an important element in future decision making by the SAU.

9.3.8 Deering has many large undeveloped areas of residentially zoned land that if developed could put sizeable pressure on Town facilities, services and overall quality of life. Large developments could put an immediate strain on the Town's infrastructure.

9.4 Administration

9.4.1 Data: The baseline data for developing housing unit counts in Deering and the six abutting communities is the 2000 U.S. Census Summary Tape File 1. Building permits issued by each community are to be used in the Planning Board's annual reporting as described in section 9.4.2 below.

9.4.2 Annual Reporting: The operation of this section shall be reviewed by the Planning Board at its first regular February meeting each year to insure that the annual maximum growth rate has not become inconsistent with Deering's responsibility and capability of planning, developing, and implementing the necessary municipal systems and facilities to serve the growing town and to insure that Deering is assuming its fair share of housing growth.

9.4.3 In addition, the Planning Board at its first regular December meeting each year and thereafter as the Board deems beneficial or necessary, will report on the number of building permits issued for the previous calendar year for all residential dwelling units in Deering and the six abutting communities. In addition, the Planning Board will report on the overall annual average percent increase in residential dwelling units (based upon building permits issued) for the six abutting communities, as well as Deering, for the previous calendar year. The Planning Board shall also prepare the analysis of building permit data as required in Section

9.5.1. All reports prepared by the Planning Board relative to growth management shall remain on file at the Town Office for as long as the reports are in effect.

9.5 Equitable Allocation of Available Building Permits

9.5.1 The number of building permits available for the calendar year for the Town of Deering shall be determined by calculating the previous five year average percent increase in building permits in the six towns abutting the Town of Deering and calculating the previous five year average percent increase in building permits for the Town of Deering. These two five year averages shall be combined and divided by two, thus producing a combined weighted five year average for Deering and the surrounding six towns. The resultant weighted five year average shall be multiplied by the Town of Deering's housing unit base at the conclusion of the immediate past calendar year and shall be rounded up to the next whole unit to determine the number of available for the calendar year for the Town of Deering 93

9.5.2 To ensure equitable distribution of available permits, no individual, partnership, corporation, or other entity or its related or affiliated entities, or in the case of individuals, their relatives or persons associated with them in business, may receive more than twenty (20) percent of the permits, or permits for seven units, whichever is less, available during any given calendar year.

9.5.3 In order to be complete, building permit applications must be for lots approved by the Deering Planning Board and recorded in the Hillsborough County Registry of Deeds. Lots must meet all applicable state and local regulations.

9.5.4 Twenty five (25) percent of the available permits shall be reserved for owners of single lots, which are not part of a subdivision of three lots or more, and are not created within one (1) year from the date of the building permit application.

9.5.5 Permits issued shall lapse and be returned to the pool of available permits if substantial construction on the dwelling has not begun within one (1) year. Site preparation work shall not be considered construction.

9.5.6 In the event that more permits are requested than are available, the earlier application shall prevail based upon the date and time of receipt of the completed application at the Town office. The Building Inspector may maintain a waiting list in the event that another permit becomes available during that calendar year, or it can apply to the next calendar year.

9.5.7 In the event that any available permits for the year are not issued, they shall be carried forward and applied to the following year's quota. No more than two year's building permits shall be issued in any given calendar year.

9.5.8 Transferability: A residential building permit approved under this section shall be valid only for the site specified on the permit application. Should the property be conveyed, the permit shall be transferred to the new owner, but the expiration date shall remain unchanged, so long as the number of dwelling units remains the same.

9.5.9 Application: This section applies to building permits for new residential dwelling units, as well as repair, replacement, reconstruction, or alteration of any existing seasonal dwelling units if the proposed work results in year-round residency in the unit. This 94 section does not apply to non-residential building permits or permits for expansion or the alteration of existing year-round structures.

9.6 Subdivision Phasing --The intent of this section is to ensure that each developer will be assured a number of permits that is appropriate to the size of his/her subdivision and investment, within the overall number of available permits.

Table 9.1: Phasing Schedule by Subdivision Size Number of new building lots Year 1 Year 2 Year 3 Year 4 Year 5 Less than 5 2 2 - - - 5 - 9 3 3 3 - - 10 - 16 4 4 4 4 - 16 + 5 5 5 5 5 Notes: Table 9.1 shows the number of building permits available for various size subdivisions following Deering Planning Board approval. Year 1 denotes the year in which the subdivision was approved by the Planning Board. If there is no dwelling on the original pre-existing undeveloped buildable lot (parent lot), then an additional building permit is available the first year. The example provided for a subdivision of "less than 5" lots is for a 4-lot subdivision. Other examples provided are for the maximum size subdivision in each category (9 and 16 lots, respectively) so as to illustrate the full build out period for subdivisions in each size range. A 25- lot subdivision is illustrated for the "16+" category. If more than 25 lots are involved, either a maximum of five or the remaining number of permits, whichever is less, are available in subsequent years until the total number of permits available in the subdivision are issued.

9.7 Exceptions

9.7.1 Proposals for senior housing may be excluded from this Section upon a finding by the Planning Board that the proposed project does provide such housing.

9.7.2 In the event of damage, destruction, or demolition of any dwelling, the dwelling may be rebuilt, provided that construction is started within one year of its damage, destruction, or demolition and completed within two years.

9.7.3 In each December, the Planning Board shall review the number of permits issued to date during that calendar year, determine the number of available permits, and consider the issuance of additional permits (within the available permits) to applicants that had previously received their maximum number of permits as calculated in Sections 9.5 and 9.6.

# **Town Of Lyndeborough**

## **Growth Management Ordinance**

### **I. Background**

#### **A. Purpose of the Ordinance**

A major purpose of this Ordinance is to prevent a crisis condition caused by abnormal spurts of growth resulting in inadequate public facilities, loss of control over tax rates, and health and safety problems. The Master Plan specifically spells out the potential for these spurts unless some control mechanism is invoked. The Master Plan specifically refers to neighboring towns which have experienced unmanaged growth with extremely negative effects and predicts that Lyndeborough has a high probability of suffering the same condition. Thus it makes a specific recommendation for a growth ordinance such as this. It is in response to that recommendation that this Growth Management Plan is adopted, pursuant to RSA 674:22. In the case of Planned Residential Developments, growth permits will be limited to a total of one per year, as stipulated in the Planned Residential Development Ordinance.

#### **B. Growth in Lyndeborough**

Lyndeborough's growth is defined in a number of ways:

- 1) Both the Master Plan (Chapter 2) and the Capital Improvements Plan (Chapter 2) present estimates of population increase from the Office of State Planning (DSP) and the Nashua Regional Planning Commission (NRPC).
- 2) The Master Plan (Chapter 2) compares Lyndeborough's past and future population growth to that of surrounding towns.
- 3) The School Building Committee Report of November 12, 1987 indicates the actual number of pre-school children and projects a total school population for future years.
- 4) The Master Plan (Chapter 2) indicates the housing inventory for Lyndeborough and the number of dwelling units added and the number of building permits being issued.

All these measures indicate the level of growth that is taking place in Lyndeborough and the surrounding towns. Based on these measures a "normal" growth rate was arrived at. This was defined as a percentage increase in population from one year to the next, which would reflect the Town's ability to accommodate growth, and the Town's obligation to accommodate a "fair share" of the region's expected growth.

Lyndeborough's region is defined as Lyndeborough, the seven immediately surrounding towns, and the ring of fourteen surrounding those. Historically, as stated in the current Master Plan, the region's population has increased 3.2% per year. Lyndeborough has, therefore, adopted this figure for its planned annual growth, subject to periodic changes as may be required by changes in the region's annual growth rate. In addition, the 3.2%

figure is the rate used in the Capital Improvements Plan (CIP) to estimate the need for capital improvements.

Therefore this ordinance is based on allowing this 3.2% growth level. As shown in Table II-12 of the current Master Plan, the annual estimated population increases range from 3.23% to 3.58% through 1995, and the corresponding increase in the allowable growth permits range from 3.2% to 3.60% during that same period. Thus both categories always equal or exceed this 3.22% "fair share" projected growth rate.

#### C. Restrictions on Growth

Growth in Lyndeborough is restricted by means other than this Ordinance:

- 1) The Zoning By-Laws and the Sub-Division Regulations permit the Town to regulate development in conformity with the Master Plan. These restrictions were adopted for purposes of public benefit other than growth control as such.
- 2) The topography of the Town Of Lyndeborough presents a unique set of constraints to development due to the following characteristics which are more prevalent in Lyndeborough than in the neighboring communities: soils suitability, high elevations, steep slope conditions, extensive wetlands, and the like (Master Plan, Chapters 1 and 7). Such conditions place a natural limit of the kind, location and amount of growth Lyndeborough can accommodate.

#### D. Efforts to Increase Municipal Services

Through the Capital Improvements Plan and the Master Plan, the Town makes an "orderly" and "good faith" effort to increase municipal services at a reasonable rate consistent with the 3.2% forecasted annual growth rate described above. The Capital Improvements Plan is updated annually and outlines a budget and timetables for major capital outlays increase and improve facilities and services of the Town to meet the needs of growth. The adoption of such a plan (as indicated in the CIP document) shows a good faith effort on the part of the Town to provide those services at some later date.

#### E. Cost and Services to be Provided

The specific problem areas identified in the CIP (Chapter 5) and the Master Plan (Chapter 3) include: replacement of fire equipment and a new fire sub-station; additional and replacement of police vehicles and office facilities, a Town barn, gas tanks, replacement and additional road equipment, library facility upgrade, Town building renovation and expansion, local school expansion and cooperative school renovations. The schedule of costs is detailed in Chapter 5 of the CIP.

#### F. Ability of Town to Accommodate Tax Burden

The CIP covers the next six years and is designed to level scheduled expenditures to avoid major swings in the amounts to be raised by taxation each year (Chapter 4). Expenditures are targeted to increase at the same rate that is projected for the tax base (assessed valuation) to increase. This careful planning as well as other good financial management practices are essential in order to keep property taxes at a level where they do not become overly burdensome. This is a serious consideration as property tax

increases in Lyndeborough for the past ten years have consistently exceeded the rate of inflation (CIP, Chapter 3).

G. Use of the Dwellings

As indicated in Chapter 2 of the Master Plan, new dwelling units in Lyndeborough are year-round, single family units of the type which have historically incurred municipal services equal or greater in cost to the increase in taxes paid.

H. Availability of Land in Surrounding Towns

As indicated in Chapters 1 and 2 of the Master Plan, surrounding towns have different topography than Lyndeborough which allows for more concentrated development and as a result those towns are growing rapidly.

I. Overall Regional Growth

As pointed out above and in Chapter 2 of the Master Plan, regional growth is intense and Lyndeborough is attempting to bear its share of that growth. Passage of this ordinance assures that the rate of growth of the Town is consistent with that of the area and that the rate of growth will not exceed the planned rate of growth of the Town's services and facilities.

**II. Definitions**

- A. Dwelling Unit: a single unit providing complete, independent living facilities for one or more persons, including permanent provision for living, sleeping, eating, cooking and sanitation.
- B. New dwelling units: a newly constructed dwelling unit which is free-standing, part of, or included in an existing structure.
- C. Lot: a single, undivided parcel of land whose description and ownership are recorded at the Hillsborough County Registry of Deeds.
- D. Approved lot: a lot of suitable size and character, and with suitable soil conditions, to have received the necessary permits to allow construction of a dwelling unit.

**III. The Ordinance**

- A. One growth permit shall be required for the construction of each dwelling unit. Conversion of a single family dwelling to a two family dwelling shall require one growth permit for the additional dwelling unit.
- B. The number of growth permits available in any year is determined by referencing Chapter II in the current Master Plan.
- C. No record holder, either individual, partnership or corporation, may be issued more than two growth permits in a calendar year except under the circumstances explained in paragraph IV. D. below. "Record holder" shall mean the owner (s) of a lot or lots in

Lyndeborough on record at the time of application. Land owned as joint tenancy or as tenants in common shall not entitle the owners to more than the number of growth permits which would be available if the land were owned by one individual. If an applicant has any direct or indirect financial interest in any other lot or building for which a permit has been previously issued, in this permit year, under this Ordinance, the previously issued permit(s) shall be deducted from the number of permits which would otherwise be available to the applicant.

- D. The “growth permit year” is January 1 to December 31.
- E. Any unused growth permits at the end of the year, less the previous year’s rollover, will be rolled over, when the result is a positive number, and added to the number calculated to be available in the next year.
- F. This ordinance shall not apply to the repair, replacement, reconstruction or alteration of any existing structures, so long as no new dwelling units are created thereby.
- G. A growth permit will be valid for one year from the date of issuance. If the foundation has not been completed by that date the permit will be withdrawn and added to the pool for the current year. The applicant will have to re-apply in the normal manner.
- H. If a building permit is withdrawn by the permit holder, the corresponding growth permit will be withdrawn and added to the number available in the year of withdrawal. Should the applicant re-apply, such request will be processed as a new application and all rules then in effect will apply.
- I. Growth permits are not transferable for any reason, and shall apply to a specific project, location and applicant only. New owners of the same property must apply for their own permit and can not use the permit of someone else. However, if foundation construction is completed and continued construction would result in no more dwellings than originally applied for, such a partially completed structure may be completed without acquiring a new growth permit.

#### **IV. Issuance Procedure**

- A. To be considered for a growth permit, an applicant must have satisfied all the requirements for a building permit, i.e. septic approval, approved lot, house plans, etc., and must have executed a Growth Permit Application Form. However, owners of an approved lot of record who, in good faith, are prepared to go forward with a building project for a new dwelling unit may reserve a growth permit, if otherwise available, by indicating their intention to the building inspector. Any such reservation will expire automatically sixty days from the date of issuance if all requirements for a building permit have not been met, unless extended by the building inspector for good cause. The building inspector may, in his discretion, deny a reservation to anyone who, in his judgment, is not prepared to go forward in good faith.
- B. At the completion of the Building Permit evaluation process, if the applicant qualifies for a building permit, the building inspector will determine if the applicant qualifies for a growth permit. (This entails ensuring the applicant has not already received the maximum number of permits allowable and permits are still available.)

- C. If all permits for the present year have been issued, or if the applicant has been issued the maximum number allowable, the application and its relative sequential position will be held until permits are again available.
- D. Should there remain a number of unused permits as of December 1, applicants that have already been issued the allowed permits may apply for an additional single permit according to their relative sequential position. (3-14-06)
- E. It is only after the issuance of the growth permit that the Building Permit will be issued and construction can commence. Meeting all the requirements for a Building Permit in no way ensures the issuance of a growth permit.

**V. Annual Review and Termination of Ordinance**

- A. This Ordinance shall be reviewed by the Planning Board during the autumn of each year as follows:
  - 1) The Planning Board shall continue to determine the growth rate which is appropriate to the Town Of Lyndeborough and may use all information available including the Master Plan and Capital Improvements Plan and any updates of those that may exist.
  - 2) The Planning Board shall also consider whether the growth permit limitations are no longer necessary and should be abolished.
  - 3) The Planning Board shall recommend to the Town Meeting, Pursuant to RSA 675:3, proposed amendments to or repeal of this ordinance as a result of the review conducted according to 1 and 2 above.
- B. This ordinance shall terminate at the conclusion of Town Meeting in March 2009, unless sooner changed, cancelled or extended.

**VI. Severability**

Should any section or provisions of this Ordinance be declared by a court of appropriate jurisdiction to be invalid, such decision shall not invalidate any other section or provisions of the Ordinance.

## ***SECTION 1. AUTHORITY***

Pursuant to the authority vested in the Brookline Planning Board by the voters of the Town of Brookline, in accordance with the provisions of Chapter 674: Sections 35-37, 43-44 inclusive, NH Revised Statutes Annotated 1983 as amended, the Brookline Planning Board adopts the following regulations governing subdivision of land in the Town of Brookline, New Hampshire.

## ***SECTION 2. DEFINITIONS***

**Abutter**: Shall mean any person whose property is located in New Hampshire and adjoins or is directly across the street or stream from the land under consideration by the local land use board. For purposes of receiving testimony only, and not for purposes of notification, the term "abutter" shall include any person who is able to demonstrate that his land will be directly affected by the proposal under consideration. For purposes of receipt of notification by a municipality of a local land use board hearing, in the case of an abutting property being under a condominium or other collective form of ownership, the term abutter means the officers of the collective or association, as defined in RSA 356-B:3, XXIII. For purposes of receipt of notification by a municipality of a local land use board hearing, in the case of an abutting property being under a manufactured housing park from the ownership as defined in RSA 205-A:1, II, the term "abutter" includes the manufactured housing park owner and the tenants who own manufactured housing which adjoins or is directly across the street or stream from the land under consideration by the local land use board, as amended. **(08-19-2021)**

**Active and substantial development or building**: In the absence of a condition of approval by the Planning Board, specific to the subject project, in the absence of a specific finding by the Planning Board, active and substantial development or building shall be deemed to have occurred when at least twenty percent (25%) of the total building foundations or one building foundation – whichever is greater – on the site has been installed, inspected and approved by the Building Inspector, utilities have been extended to the site, and a certified plot plan of the foundation, if requested by the Building Inspector, has been submitted. All erosion control measures as specified on the approved plan for the area of disturbance must be installed.) (8/21/97) (08/02/2012)

**Agent**: Shall mean any person designated in writing by the owner to be the representative of the owner in any matter before the Board. (8/21/97)

**Approval**: Shall mean recognition by the Planning Board, certified by written endorsement on the plat, that the final plat submission meets the requirements of these regulations and satisfies, in the judgment of the Planning Board, all criteria of good planning and design.

**Approval, Conditional**: Shall mean an expression by the Planning Board that the Plat is approved but requires additional information or must meet specific conditions for the approval to be valid. Conditional Approval does not constitute, nor should it be construed as, approval, either implied or granted, of the final plat, nor does it bind the Planning Board to approval of the Final Plat.

**Board**: Shall mean the Planning Board of the Town of Brookline.

**Bond**: Shall mean a bond or other form of surety filed with the Selectboard whose purpose is to ensure that work specified by the Planning Board is completed satisfactorily. The amount of the Bond shall be determined by the Planning Board with such assistance as it deems necessary. The amount shall be sufficient to cover all costs for completion of the work by the Town in the event that the applicant defaults. In all other respects, the action of the Board shall be governed by NH RSA 674:36 III.

**County Conservation District**: Shall mean the Hillsborough County Conservation District (HCCD).

**Completion Bond**: A performance bond, letter of credit or other type of security which shall be filed with the Selectboard in an amount sufficient to ensure that the road system and other improvements approved by the Planning Board are constructed and installed properly. This bond shall comply with the requirements set out in sections 4.8 and 4.9. (9/7/93)

**Completed Application**: A completed application sufficient to invoke jurisdiction to obtain approval from the Planning Board shall mean that sufficient information is included or submitted to allow the Board to proceed with consideration

and to make an informed decision. A completed application is one which meets all of the requirements set out in section 4.6.05 of these regulations, and Appendix E of these regulations. (5/9/89)

Dwelling Unit: Shall mean one room or rooms connected together, constituting a separate, independent housekeeping establishment physically separated from any other dwelling units in the same structure, and containing independent cooking and sleeping facilities.

Disturbed Area: Shall mean any area where the ground cover is destroyed, changed or removed leaving the land subject to accelerated erosion.

Easement: Shall mean the land area created through authorization by a property owner for the use by another and for a specified purpose of any designated portion of his property.

Erosion: Shall mean the detachment and movement of soil or rock fragments by water, wind, ice, or gravity.

Final Plat: Shall mean the final drawing or drawings on which the subdivider's plat of subdivision is indicated, prepared as required under the provisions of section 4.

Grading: Shall mean the excavating, grubbing, filling, (including hydraulic fill), or stockpiling of earth materials and or combination thereof, including the land in its excavated or filled condition.

Site Specific Soils Map: Shall mean a soils map of a parcel of land being considered for development in accordance with the site specific soil mapping standards (SSSMS) for New Hampshire and Vermont as adopted by the Society of Soil Scientists of Northern New England. (9/05/02)

Inspector: Shall mean a duly designated inspector appointed by the Board to inspect all aspects of the project.

Licensed Land Surveyor: Shall mean a person who engages in the practice of land surveying and is licensed by the State of New Hampshire.

Licensed Professional Engineer: Shall mean a person who, by professional education and practical experience, is qualified and licensed to practice engineering by the State of New Hampshire.

Lot: Shall mean a parcel of land or any combination of several lots of record, created by subdivision to fulfill the minimum lot size requirements for building as provided in the Brookline Zoning Ordinance.

Lot Line Adjustment: Shall mean the subdivision of land which does not create buildable lots, or the creation of lots for non-building development purposes.

Maintenance Bond: A performance bond, letter of credit or other type of security which shall be filed with the Selectboard to ensure that the road system and other improvements were constructed and installed properly. This bond shall comply with the requirements set out in sections 4.8 and 4.9. (9/7/93)

Maintenance Guarantee: A required monetary commitment on the part of a construction contractor to ensure that the improvements to a development have been completed in a satisfactory manner for a fixed period of time. See Section 4.9.06. (08/02/2012)

Master Plan: Shall mean the comprehensive plan or plan of development for the Town of Brookline.

Performance Guarantee: A required monetary commitment on the part of a construction contractor to complete a development in a satisfactory manner, or when a specific activity ends, remove a potentially hazardous or undesirable situation. See Section 4.9.06. (08/02/2012)

Soils Scientist: Shall mean a person experienced in on-site field work pertaining to classifying and mapping soils by soil types according to physical characteristics of depth, color, horizon, texture, slope, and drainage under the Standards of the National Cooperative Soil Survey or other standard classification system. Such persons shall be subject to the approval of the Planning Board. Soil Scientist should be licensed in the State of New Hampshire. **(08-19-2021)**

Sediment: Shall mean any deposit of material, either mineral or organic, that is in suspension, is transported, or has been moved from its site of origin by erosion.

Soil Erosion and Sediment Control Plan: Shall mean a plan for soil erosion and sediment control developed as specified in the Erosion and Sediment Control Design Handbook for Developing Areas of New Hampshire (1981), as amended.

Street: Shall mean any existing public vehicular ways, except alleys. All streets shall be within dedicated rights-of-way which have been properly processed, approved and recorded.

Street, Local: Shall mean a street used primarily to give access to abutting properties.

Street, Collector: Shall mean a street which, in addition to giving access to abutting properties, serves primarily to carry traffic from local streets to arterial streets and to public and other centers of traffic concentration. A collector street may be further classified as major or minor, depending on average daily traffic counts.

Street, Arterial: Shall mean a street or highway used primarily for heavy and/or through traffic.

Subdivider: Shall mean the owner of record of the land to be subdivided, including any subsequent owner of record making any subdivision of such land or any part thereof, or the duly authorized agent of any such owner. (8/21/97)

Subdivision: Shall mean the division of the lot, tract, or parcel of land into two (2) or more lots, plats, sites, or other divisions of land for the purpose, whether immediate or future, of sale, rent, lease, condominium conveyance or building development. It includes re-subdivision and, when appropriate to the context, relates to the process of subdividing or to the land or territory subdivided. The division of a parcel of land held in common and subsequently divided into parts among the several owners shall be deemed a subdivision under this title.

Subdivision, Minor: Shall mean the subdivision of land into three (3) or fewer lots, with no potential for re-subdivision, and requiring no new roads, utilities or other municipal improvements.

Substantial Completion: In the absence of a condition of approval by the Planning Board, specific to the subject project, substantial completion of the development shall be deemed to have occurred when a Certificate of Occupancy for all buildings shown on the approved subdivision plan shall have been issued by the Brookline Building Inspector, and all other on-site and/or off-site improvements have been determined by the Town of Brookline or its agent to be in compliance with the approved subdivision plan or satisfactory financial guarantees remain on deposit with the Town to insure completion of such improvements. (08/02/2012) **(08-19-2021)**

Time Periods: Shall mean all time periods are calculated in terms of calendar days unless otherwise noted.

Winter Season: Shall mean the period of time between November 1st and May 1st. (8/21/97)

## **SECTION 3. PROCEDURE**

### **Section 3.1. General**

- 3.1.01. The Board shall, in the exercise of the authority granted pursuant to NH RSA 674:36, review all proposed subdivisions with a view toward determining the impact that the proposed subdivision will have on various Town services, and to that end, the Board shall also review all such proposed subdivisions with a view toward determining whether such proposed subdivision, if permitted, would create one of the following conditions:
- a. Constitute a scattered or premature subdivision of land as would involve danger or injury to health, safety, or prosperity by reason of the lack of water supply, drainage, transportation, schools, fire protection, or other public services,
  - b. Necessitate an excessive or unreasonable expenditure of public funds for the supply of such services.
- 3.1.02. The procedure for subdivision approval consists of: Preliminary Conceptual Consultation Phase, Design Review Phase and a Final Phase, as defined in NH RSA 676:4, II. **(08-19-2021)**
- a. Preliminary Conceptual Consultation Phase - is the conceptual review with the Planning Board and the Developer. This phase is optional and used for reviewing the basic concept of the proposal and suggestions which might be of assistance in resolving problems with meeting requirements during final consideration. It is strongly encouraged that all open space developments take advantage of the preliminary conceptual consultation phase and the design review phase in order to discuss general design concepts and determine the number of lots allowed on a tract. The applicants, their representatives or designees must attend a Conservation Commission meeting prior to discussion with the Planning Board. (07/16/2020).
  - b. Design Review Phase - consists of the review of the technical details of the subdivision application by the Planning Board. This phase is optional and used for reviewing more specific design and engineering details of the development.
  - c. Final Phase - begins upon acceptance of the application by the Planning Board. It is to ensure that all technical Requirements, State approvals, and legal data have been submitted as required.
- 3.1.03. Before any subdivision is made, or the transfer or sale of any part thereof, or before the construction of streets, or before the installation of municipal services therein, or before any application for a permit for the erection of a structure thereon shall be made, the owner thereof or his authorized agent, shall apply in writing to the Board and be granted approval of such subdivision. The application shall be made on the form provided by the Board.
- 3.1.04. All applications made to the Board shall be filed with the Board's Secretary at least thirty (30) days prior to the date of a Board meeting at which the applicant or his agent wishes to appear.
- 3.1.05. Applications and plats will be reviewed by the Board's Designated Representative within ten (10) days after the filing of the application to determine if the application and plats conform to the requirements of these regulations. Applicants will be notified of any deficiencies which must be corrected in order for the application to be considered complete and placed on a Board agenda for formal consideration.
- 3.1.06. After such notice of non-conformance, the applicant may revise the plat(s). The revised plat(s), which must meet the requirements of a completed application as determined by the Planning Board, shall be resubmitted at least fifteen (15) days prior to the Board's meeting at which the applicant or his agent wishes to appear. (5/9/89, 11/19/91) **(08-19-2021)**
- 3.1.07. Any plans, revisions, or re-submittals to be placed on the Board's agenda, must be submitted to the Planning Board secretary at least fifteen (15) days before the meeting at which the applicant or his agent wishes to appear. (5/9/89, 11/19/91)
- 3.1.08. A completed application sufficient to invoke jurisdiction of the Board, shall consist of all data required as reflected on an attached checklist (Appendix E) and section 4.6.05 of these regulations, a complete list of

abutters as indicated in Town records not more than five (5) days before the day of filing, the name and business address of every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the Board, payment of fees per the approved schedule, eight (8) prints of all drawings to be recorded, and eight (8) prints of topography and road profiles. (5/9/89, 11/7/95)

- 3.1.09. Adherence to these requirements will qualify a completed application to be placed on the Board's agenda. The Board will accept a completed application (as defined in Sections 3.1.08) only at a properly noticed public meeting of the Board. (5/9/89) **(08-19-2021)**
- 3.1.10. A sixty-five (65) day review period begins on the date of the meeting at which the completed application is formally accepted by the Board. The Board must begin formal consideration of the application within thirty (30) days of acceptance. If the Board fails to act on the application within the sixty-five (65) day period, the applicant may either apply to the Selectmen for an order directing the board to act on the application within 30 days, or consent to an extension of the sixty-five (65) day review period. If the planning board does not act within that time, then within 40 days of the issuance of the order, the selectmen shall certify on the applicant's application that the plat is approved unless the selectmen have identified some specific subdivision regulation, zoning, or other ordinance with which the application does not comply. If the selectmen do not issue an order or approve the subdivision, the applicant may appeal to superior court. (11/19/91) (9/05/02) (07/16/2020)
- 3.1.11. The Board may apply to the Selectmen for an extension not to exceed an additional sixty-five (65) days before acting to approve or disapprove an application. The applicant may waive the requirement for planning board action within the time periods specified in section 3.1.10 and consent to such extension as may be mutually agreeable. **(08-19-2021)**.
- 3.1.12. Abutters and applicant, as well as every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the Board will be notified by certified mail, return receipt requested, of the date and time of the meeting at which the application will be formally submitted to the Board for acceptance. Notice will be mailed at least ten (10) days prior to the meeting. Notice to the General Public shall also be given at the same time by posting in two (2) public places in the Town of Brookline at least ten (10) days prior to the meeting, or publication in a newspaper of general circulation. The notice will include a description of the proposal, the name of the applicant and the location of the proposal. If the time, date and place of an adjourned session of any properly noticed public hearing is made known at the hearing, additional notice for the continuance is not required. (11/7/95)
- 3.1.13. Application Fees shall be submitted in accordance with the fee schedule outlined in APPENDIX B: FEES and shall accompany the submission of subdivision plans. Failure to pay such costs shall constitute valid grounds for the Planning Board to terminate further consideration of the application. (5/6/99)
- 3.1.14. The Board may, at its discretion, and upon written request of the applicant, hold the acceptance and approval meeting, and the public hearing at the same time. Such an expedited review process shall be only for minor subdivisions.
- 3.1.15. No application for expedited review shall be approved without full and proper notice to abutters and the general public as is required elsewhere in these regulations.
- 3.1.16. Approval of the subdivision plat shall be by affirmative vote of the majority of the Board present at the meeting. The plan is certified by the signatures of the Board Chairman or Co-Chairman, Vice-chairman and Secretary and the date of approval on the plat. The Board will transmit the signed and dated mylar copy of the plat to the Hillsborough County Register of Deeds along with the recording fees paid by the applicant. The approved plat will not be recorded until all fees have been paid by the applicant. (11/7/95) (9/05/02)
- 3.1.17. The Board may grant conditional approval of an application if the remaining actions on the application: are administrative in nature; do not involve discretionary judgment by the Board; and/or involve the applicant's possession of permits and approvals granted by other boards or agencies, such as the NH DES or NH DOT. In these instances, final approval may be granted without further public hearing. A public hearing will be required to demonstrate compliance with the terms of all other conditions pursuant to RSA 676:4,I(i). Final approval will be granted when the conditions have been met to the satisfaction of the

Board. The plat will not be recorded at the Hillsborough County Registry of Deeds until all of the conditions have been met. Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat. (09/16/2010). **(08-19-2021)**.

- 3.1.18. If an application is not approved, the reasons for the disapproval will be clearly stated in the Board's records and in written notice provided to the applicant within ten working days of the public hearing. (11/7/95)
- 3.1.19. Every plan approved by the Planning Board and properly recorded in the registry of deeds shall be exempt from all subsequent changes in subdivision regulations and zoning ordinances as set forth in RSA 674:39, as that law is from time to time amended. For the purposes of RSA 674:39 and this section, "active and substantial development or building" is defined in section 2 of these regulations. (8/21/97)
- 3.1.20. The Board shall impose fees for subdivision procedures in accordance with the approved fee schedule contained in Appendix B. Expenses for plan review, pursuant to RSA 676:4,I(g) incurred by the Planning Board in having the proposed subdivision plan reviewed by a consulting engineer or other planning consultant, in making environmental impact, hydrological impact, ground water quality impact, traffic impact, and other special studies, or any other study deemed necessary by the Planning Board in order to make an informed decision on the subject plan; and in preparing or reviewing performance bonds, deeds and other documents shall be borne by the applicant. All plan reviews, impact studies, and document reviews shall be made by planners, surveyors, engineers, soil scientists, wetland scientists, technical consultants, attorneys, and other professionals retained by the Planning Board. No employment or other contractual relationship shall exist between the professional and the applicant. All expenses incurred by the Planning Board and the Town of Brookline in processing an application for subdivision approval and inspections of such subdivisions shall be borne by the applicant. (5/6/99)
- 3.1.21. For each minor and major subdivision plan, engineering review may be required at the discretion of the Planning Board at the expense of the applicant in accordance with RSA 676:4-I(g). Cost for such services shall be paid by the applicant to the Town of Brookline. (11/01/01) (2007) (08/02/2012)
- 3.1.22. Costs for engineering inspections, Town Planner review, Consultants hired by the Town of Brookline, and Town Counsel review of any legal document shall be borne by the applicant and paid to the Town of Brookline. Upon receipt of the invoice sent by the Town Engineer, Town Planner, Consultant, or Town Counsel for inspections and reviews performed, the Planning Board will bill the applicant directly. The applicant will be given a maximum period of 30 (thirty) days to pay the bill, by check or money order. If a payment is not received within the initial 30-day period, an administrative fee will be charged to the applicant to resend the bill. If a payment is not received within 30 (thirty) days after a second bill is sent to the applicant, all inspections will stop, and no building permit will be issued until the payment is received by the Town of Brookline. (2007) **(08-19-2021)**.
- Engineering review for subdivisions may be required by the Planning Board at the expense of the applicant in accordance with RSA 676:4I(g). Funds for such services shall be paid by the applicant and shall be deposited with the Town of Brookline in an escrow account, to be dispersed on a monthly basis upon satisfactory completion of services. The Planning Board reserves the right to add to and/or enlarge the Scope of Services agreed to be provided hereunder when and if the Planning Board, in the course of review of the application, determines that further advice of the engineer is necessary. Additional review shall commence upon deposit of fees to cover the cost of consultant services. **(08-19-2021)**
- 3.1.23. All State and Local approvals shall be obtained as required elsewhere herein, prior to the Final Approval by the Board.
- 3.1.24. Applications for proposed subdivisions may be presented in an optional Preliminary Conceptual Consultation Phase and/or an optional Design Review Phase and a Mandatory Final Phase (except in the case of minor subdivisions).
- 3.1.25. The subdivider is encouraged to appear before the Board in a Preliminary Conceptual Consultation Phase which carries no obligations. This is intended to provide an open forum for the discussion of general

concepts of a proposed subdivision and suggestions which might be of assistance in resolving problems with meeting requirements during final consideration, prior to the formal application procedure.

- 3.1.26. The subdivider is strongly encouraged to appear before the Board in a Design Review Phase for any subdivisions with more than seven (7) lots. This phase provides for non-binding discussions with the applicant and is intended to provide an open forum for the discussion of all technical requirements and engineering details applicable to the subdivision prior to the formal application. A notice to the general public and abutters is required as per section 3.1.12 of these regulations.
- 3.1.27. The Final Phase is intended to ensure that all technical requirements, State approvals, and legal data have been submitted as required.
- 3.1.28. The subdivider is encouraged to discuss his application with the Board's Designated Representative in order to discuss general concepts of a proposed subdivision and suggestions which might be of assistance in resolving problems with meeting requirements during final consideration, prior to the formal application procedure. (5/9/89)
- 3.1.29. Agreement with the concepts and design of a proposed subdivision in the Design Review Phase carries no assurance that approval will follow in the Final Phase, as discussions in the design review phase are non-binding.

***Section 3.2. Preliminary Conceptual Consultation Phase***

- 3.2.01. The Preliminary Conceptual Consultation Phase is a conceptual, first draft, review of a proposed subdivision.
- 3.2.02. Abutter notification is not necessary for the Preliminary Conceptual Consultation Phase.
- 3.2.03. The Preliminary Conceptual Consultation Phase implies no commitment by either the Planning Board or the Subdivider.

***Section 3.3. Design Review Phase***

- 3.3.01. The Design Review Phase are non-binding discussions with the applicant beyond conceptual and general discussions which involve more specific design and engineering details.
- 3.3.02. The Design Review Phase may proceed only after identification of and notice to abutters and the general public, as required.

***Section 3.4. Final Phase***

- 3.4.01. The Board shall review the plat(s) submitted in the Final phase from the point of view of a total project. Acceptance and approval by the Board shall constitute an agreement between the Town and the Applicant that the subdivision and development of the land in question shall be done as detailed on the final plat(s).
- 3.4.02. Deviation from the approved final plat(s) requires the approval of the Board.

## ***SECTION 4. PLAT REQUIREMENTS***

### ***Section 4.1. Compliance***

- 4.1.01. The subdivider shall be familiar with all State and Town regulations relative to health, buildings, roads and other pertinent data, so that he/she is aware of the obligations and standards expected.

### ***Section 4.2. Character of Land***

- 4.2.01. All land to be subdivided shall be, in the judgment of the Board, of such character that it can be used for the building purposes without danger to public health or safety, or to the environment.
- 4.2.02. Land of such character that cannot be safely used for building purposes because of exceptional danger to the health, or peril from fire, flood, or other menace shall not be plotted for residential occupancy, nor for any other uses as may increase danger to health, life, or property or aggravate the flood hazard until appropriate measures have been taken by the owner or his agent to lessen such hazards.
- 4.2.03. Lots created shall provide adequate capacity for sanitary sewage disposal.
- 4.2.04. Plats for the subdivision of land shall conform to all regulations of the Board, the Zoning Ordinances, NHDES Regulations, and other applicable by-laws, ordinances and regulations at the Federal, State and Local levels. **(08-19-2021)**
- 4.2.05. Reserve strips prohibiting access to streets or adjoining property shall not be permitted, except where, in the opinion of the Board, such strips shall be in the public interest.

### ***Section 4.3. Lot Layout***

- 4.3.01. The layout of lots shall conform to the requirements of the Zoning Ordinance and shall be appropriate for the intended construction.
- 4.3.02. Each lot shall have a width of not less than seventy (70) percent of the required frontage at all points between the lot sidelines, to a point half the depth of the lot, measured from the frontage line. Such width shall be measured along a line which is parallel to frontage line. Backlots are exempt from these provisions. **(08-19-2021)**.

### ***Section 4.4. Existing Features***

- 4.4.01. The subdivider shall preserve all existing trees and shrubbery to the fullest extent possible. Special consideration shall be given to the arrangement and ultimate improvement or development of the lots to this end. Precautions shall also be taken to protect existing trees, shrubbery, vegetation and stone walls during the construction of roads and utilities.

### ***Section 4.5. Fire Protection***

Any lot on which a dwelling unit, commercial building or occupied structure that requires a building permit shall be subject to the requirements of this section for the purpose of protecting life and safety. Any water supply constructed or upgraded for the purpose of fire protection shall be approved by the Planning Board, after consultation with the Board of Fire Engineers and Town Engineer, prior to final subdivision approval. The final determination to require the construction of a fire protection water supply and the type of water supply to be constructed rests with the Planning Board and the Board of Fire Engineers. (6/15/00) **(08-19-2021)**

- 4.5.01. General Provisions. Buildable lots, not within 2,500 feet of an approved water supply system (as measured by using driveways, roads and access areas for fire trucks as approved by the Board of Fire Engineers), and three lots or less can have a cistern or sprinklers. Four lots or greater will require a cistern(s) to be installed at a location approved by the Board of Fire Engineers in accordance with the provisions of Appendix G,. An alternative water supply system or fire protection measure may be presented to the Board of Fire Engineers for approval (or disapproval.) Sprinkler plans must be submitted by a fire sprinkler company in accordance with the requirements of Appendix H. (10/21/04) Notwithstanding the provisions above, when the Brookline Board of Fire Engineers so deems that, due to specific conditions, there is a sufficient threat to life and property, it may recommend to the planning board that additional fire protection measures be provided, even if sprinkler systems are proposed. **(08-19-2021)**.
- 4.5.02. Easements. An easement to the fire protection water supply shall be provided to the Town. All easements shall have standard language acceptable to the Town of Brookline and shall be reviewed and approved by Town Counsel and the Planning Board prior to final subdivision approval. (6/15/00)
- 4.5.03. Access to Gates. For commercial sites or locations in which a gate or chain is present, the placement of an approved “Knox Box” shall be required for emergency access to the property. (6/15/00)
- 4.5.04. Inspections. Inspections’ fee shall be paid in accordance with sections 3.1.22, 3.1.23, ~~7.6~~ **7.7** and Appendix B of the Town of Brookline, NH Subdivision Regulations. (6/15/00) (5/17/01) (11/15/07)
- The Board of Fire Engineers and Town Engineer or Inspector shall be notified with a minimum of (two) 2 full working days prior to commencement of any activity requiring inspection. Inspections shall typically include, but are not limited to:
- a. Erosion control measures
  - b. Compliance with State permits (dredge and fill)
  - c. Installations and compliance with specifications prior to back filling
  - d. Slopes and drainage ways prior to filling of water source
  - e. Witness pump and leak tests
  - f. Final inspection and approval. **(08-19-2021)**
- 4.5.05. Conditions and Bonding. Cisterns shall be completed and receive final inspection by Fire Engineer and Town Engineer, or be fully bonded, in accordance with section 4.9, Bonding, prior to the issuance of a Building Permit for any lot dependent on that water supply for fire protection. No Certificate of Occupancy shall be granted to dependent lots before presentation of the final inspection report from the Fire Engineer and the Town Engineer to the Building Inspector. (6/15/00) (9/05/02)

***Section 4.6. Submission Documents Required***

- 4.6.01. In all design review or final cases, applications shall include the names and addresses of the applicant and all abutters as indicated in the Town records not more that five (5) days before the filing of the application.
- Three (3) sets of names and addresses shall be provided on self adhesive labels for use on correspondence size envelopes.

**PRELIMINARY CONCEPTUAL CONSULTATION PHASE:**

- 4.6.02. Suggested guidelines for submission are as follows: plats may be drawn in pencil. Data may be tentative but shall be sufficiently clear to show site conditions. Any maps should be appropriately scaled to show the amount of detail required, but not more than one hundred (100) feet to the inch.
- 4.6.03. Preliminary Conceptual Consultation Phase plats and documents should include the following information:

- a. Site survey map showing boundary of subdivision area, topography, streams, existing features, and foliage lines, existing roads, structures, adjacent development, and soil type by U.S.S.C.S
- b. Site location map (at scale of municipal base map or official map) showing proposed subdivision in relation to major roads, community facilities, and utilities of the Town.

4.6.04. Suggested guidelines for Design Review Phase submission are as follows: plat(s) should be submitted in eight (8) paper print copies and one printable 11"x17" electronic format. Dimensions and data shall be sufficiently clear to illustrate all conditions and clarify the design requirements for the subdivision plat. Maps shall be at a scale of not more than one hundred (100) feet to the inch. The Design Review Phase plat(s) should contain at least the following information: (08/02/2012)

- a. Name and location of the subdivision, name and address of the subdivider, owner of record, applicant, engineer and designer.
- b. Names and addresses of abutting property owners; subdivisions, names and business addresses of every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the Board; location of wells, septic systems and buildings within one hundred (100) feet of the parcel of land to be subdivided; intersecting roads and driveways within two hundred (200) feet of the subdivision; and frontage on existing roads. (11/7/95)
- c. Location of all existing buildings.
- d. Existing and proposed street right-of-way lines, widths of streets, proposed names of new streets, existing and proposed lot lines.
- e. Location of existing and proposed easements, deed restrictions, building set back lines, parks, recreation facilities, conservation areas, and other open space, water courses with direction of flow indicated (including seasonal), foliage lines and significant natural and man-made features, storm water drainage structures and drainage ways, flood hazard areas.
- f. If utility company(s) requires an easement to provide service, no final approval shall be granted by the Board until such easements are secured. Also, a letter of intent to provide service from the utility company(s) must accompany the application.
- g. Boundaries of Zoning Districts lying within the subdivision, municipal boundary if any, land use designation per zoning.
- h. A general site location map at the scale of the Municipal base map, locating exactly the subdivision boundary and proposed streets in relation to at least two existing intersecting streets or other features shown on the municipal base map.
- i. A statement of conditions of land as to suitability for residential development based on data from Soils Potentials for Development, (HCCD 1986, as amended).
- j. A statement and contours in sufficient detail to indicate clearly the method of storm water drainage on and off the subdivision.
- k. A Site-Specific soil map shall be required, reviewed and certified by a licensed soil scientist (11/15/07)
- l. Watershed areas and drainage computations proving a no-net increase in rate or volume of offsite flow (11/15/07).
- m. Preliminary road profiles: cross sections may be requested by the Planning Board if warranted.
- n. Location of fire ponds and fire protection drafting sites, if any. (11/15/07)
- o. Access for fire fighting apparatus.
- p. Wet Areas as defined by Wetlands Ordinance, in square feet of wet and non-wet.
- q. A letter stating the proposed disposal of tree stumps. If they are to be disposed of on site, areas shall be shown on the plat, and a reclamation plan shall be submitted as part of the application. Stump

burial shall be directed to the side and rear set back areas along property boundaries as possible. Stump burial sites shall be located a minimum of 25' from the edge of septic systems, 75' from wells, and 75' from the edge of a wetland. (5/6/99)

- r. Location of soil test pits and accompanying test pit and perc test data.
- s. For subdivisions and site plans that involve land designated as "Special Flood Hazard Areas" (SFHA) by the National Flood Insurance Program (NFIP), the Planning Board shall:
  - A. Review the proposed development to assure that all necessary permits have been received from those governmental agencies from which approval is required by Federal or State law, including Section 404 of the Federal Water Pollution Control Act Amendment of 1972, 33I.S.C. 1334,
  - B. Require that all proposals for development greater than 50 lots or 5 acres, whichever is the lesser, include Base Flood Elevation (BFE) data within such proposals (i.e. floodplain boundary and 100-year flood elevation),
  - C. Require the applicant to submit sufficient evidence (construction drawings, grading and land treatment plans) so as to allow determination that:
    - (i) all such proposals are consistent with the need to minimize flood damage;
    - (ii) all public utilities and facilities, such as sewer, gas, electrical, and water systems are located and constructed to minimize or eliminate flood damage; and
    - (iii) adequate drainage is provided so as to reduce exposure to flood hazards. (8/21/97) (11/15/07)
- t. Location and size of the area considered necessary for septic leach fields and any proposed connections of alternative means for sewage disposal.
- u. Number of lots to be created.
- v. Magnetic and true north point.

**THE FINAL PHASE PLAT(s):**

4.6.05. Final Phase Plat(s) shall be in permanent black ink, on a reproducible Mylar (electrostatic Mylars are not acceptable). It shall be filed together with eight (8) blue (black) line prints on paper and one printable 11"x17" electronic format. Sheet sizes shall be in accordance with the requirements of the Register of Deeds, Hillsborough County. Space shall be reserved on the Plat for the endorsement by the Planning Board Chairman and Secretary. The plat shall contain the following statement: "The Subdivision Regulations of the Town of Brookline are a part of this plat, and approval of this plat is contingent on completion of all the requirements of said Subdivision Regulations, except any variances or modifications made in writing by the Board and attached hereto." In addition to the above information, the following shall be required: (08/02/2012) (07/16/2020)

- a. All suggested guidelines of the Design Review Phase.
- b. Name and seal of the engineer and land surveyor registered with the State of New Hampshire.
- c. Final disposition of land into lots, streets, open spaces, drainage courses and any easements running with the land.
- d. The subdivision plat shall be based on a boundary survey with a maximum error of closure of 1 in 10,000 the State of New Hampshire, distances shall be to the nearest 100th of a foot and bearings to the nearest 10 seconds.
- e. Stations, radii, curve data and paving widths for proposed streets.
- f. Lot dimensions, area in square feet and acres, and street numbers for the lots as determined by the Brookline Emergency Management Director; (8/21/97) (9/05/02)

- g. Accurate locations of all easements, either on or off the site.
- h. A written acknowledgment of the subdivider's responsibility for maintenance, and the assumption by him/her of liability for injuries and damages that may occur on any land to be dedicated for public use, until such land has been legally accepted by the Town.
- i. Names of proposed streets and roads cannot be duplicated nor bear phonetic resemblance with existing street names in the community; all streets will, as far as practical, follow past practice of naming streets after long-time Brookline families or residents; the Brookline Historical Society should be contacted for assistance. The applicant shall contact the Brookline Emergency Management Director with proposed street names for approval in coordination with State E911 requirements. **(08-19-2021)**.
- j. Accurate locations of all monuments to be set at street intersections, points of curvature and tangents of curved streets and angles of lots.
- k. Existing and proposed contours at five (5) foot intervals.
- l. Existing and proposed plans for telephone, electricity, and other public utilities; a letter of intent from the utility companies to provide service.
- m. Proposed twenty-five (25) year storm drainage accompanied by a drainage analysis map and computations for the entire watershed area. (5/6/99)
- n. Final road profiles.
- o. 75 foot well radii. (11/19/91)
- p. School bus stops and areas shown on plans. The Brookline School Board shall be contacted by the applicant for assistance. (9/7/93) **(08-19-2021)**
- q. If the subdivision abuts a State Highway, or if a proposed street intersects a State Highway, a driveway permit from the NH Department of Public Works and Highways approving said access.
- r. The Final plat shall contain a volume and page reference sufficient to indicate the subdivider's derivation of title in the event only one parent tract is involved, and if the subdivision constitutes an assemblage of several tracts, the plat shall contain a title reference of each and indicate where each of the lots shall be numbered so as to coincide with the Town of Brookline Tax Map numbers.
- s. Copies of all applicable federal, state and local approvals and permits, including:
  - N.H. Department of Environmental Services (NH DES) **(08-19-2021)**
  - New Hampshire Department of Transportation Curb Cut Permit (NH DOT). **(08-19-2021)**
- t. All permit numbers and written decisions including conditions of approval shall be noted on the plat. (8/21/97) (08/02/2012)
- u. All engineer prints shall be done by a qualified, registered engineer by the State of New Hampshire and have his seal affixed to each sheet.
- v. Provide a signed statement of off-site improvements agreed upon between the applicant/developer and the Selectboard.
- w. A check to the Town of Brookline to cover filing fees, mailing, advertising, recording, special investigative and consulting studies, and other costs.
- x. A traffic study, if required by the Board. (5/9/89)
- y. A fiscal impact analysis, if required by the Board. (5/9/89)
- z. Payment of a fee to update the Town's computerized parcel map as specified in Appendix B. (8/21/97)

### **Section 4.7. Legal Data Required**

- 4.7.01. When applicable to a specific subdivision, the following are required, in form and substance as approved by the Town Counsel **prior to the approval of the subdivision plat**:
- a. Agreement to convey to the Town land to be used for streets and other public purposes, with the transfer of title to such interests to be effective on such date as the Town accepts such land;
  - b. Covenants which shall include a definitive statement of the method of private ownership of the common land or open space (the intent herein is to guarantee that ownership and taxation of common land be equitably apportioned to individual owners for his/her lot/unit and common land);
  - c. Covenants permanently restricting the common land or open space from any future subdivision;
  - d. Easements and right-of-ways over property to remain in private ownership (e.g. drainage, conservation, utility easements, etc.);
  - e. Rights to drain onto or across other property, whether public or private, including a street; and
  - f. Performance Guarantee as detailed in section 4.9.01. (9/7/93) (08/02/2012)
- 4.7.02. Deeds covering any land to be used for public purposes, easements, right-of-ways over property to remain in private ownership, right to drain onto or across private property shall be submitted to, and approved by the Selectboard with approval of Town Counsel or any other appropriate Town agency or agent.
- 4.7.03. All documents required hereunder shall be submitted in final, executable, recordable form satisfactory to the Brookline Town Counsel as part of the Final Phase.
- 4.7.04. Information on the open space land included as part of an open space development to ensure its perpetual protection shall be submitted as part of the approval process. This shall include any deeds, covenants or easements used to protect the common open space. A notation in the notes section of the plan should also be included indicating how the open space is to be protected and maintained. (9/7/93)

### **Section 4.8. Roads**

Any subdivision which requires road system layout and construction shall have such improvements installed in accordance with the following:

- 4.8.01. Road Construction Specifications as specified in Appendix A.
- 4.8.02. The subdivider, developer, or his successors shall elect to comply with option (1) or option (2) as listed below and so notify the Planning Board prior to commencement of construction:
- Option (1). The road system shall be built according to the Current Specifications as stated in section 4.8.01 and accepted by the Town in the approved manner and deeded to the Town prior to the issuance of any building permit for any structure whose frontage would include any part of the proposed road system. This option carries a requirement to file a Performance Guarantee for the road top course, drainage, curbs and sidewalks as well as a Maintenance Guarantee for the maintenance of the entire road system. (8/21/97) (08/02/2012)
- Option (2). Upon provision of suitable financial guarantees acceptable to the Planning Board and town Counsel, building permits may be issued on any portion of a road covered by such Performance Guarantee or funding; however, no building permits shall be issued until the four (4) inch crushed gravel layer has been installed and approved by the Town's Consulting Engineer. The Performance Guarantee shall include separate itemized amounts for the completion of the base course and the top course. (8/21/97) (08/02/2012)
- 4.8.03. Until the road has been accepted, the subdivider, developer, or his successors shall be responsible for the maintenance of the streets, including winter maintenance of snow plowing, sanding, and other protection, which obligation shall be made part of the requirements of the Performance Guarantee. If required by the Planning Board or Selectboard, the developer shall provide a written agreement to undertake this maintenance with suitable sureties to guarantee performance. The road shall be posted "PRIVATE WAY" until accepted by the town. (9/7/93) (08/02/2012)

- 4.8.04. As-Built plans and profiles, including plans requirements by the Town Engineer, shall be submitted before any consideration of roadway acceptance. Upon satisfactory completion of the road system to such specifications as required by the approved plan, the Selectboard and Town's Consulting Engineer, said road system will be presented to the Selectboard, for acceptance. (8/21/97) (08/02/2012) **(08-19-2021)**.
- 4.8.05. Except for roads designated as private roads, all roads shall be properly deeded by the applicant to the Town of Brookline by a Warranty Deed or other suitable instrument as determined by the Planning Board or Town Counsel. (09/16/2010). (08/02/2012)
- 4.8.06. A Maintenance Guarantee needs to be filed once the work specified in the Performance Guarantee is completed and the road is accepted by the Planning Board and the Selectboard. (9/7/93) (08/02/2012)
- 4.8.07. Before acceptance of any legal deeds by the Town, the subdivider, developer, or his successors shall provide the Town with a Maintenance Guarantee for a period of two (2) years. (08/02/2012)

**Section 4.9. Financial Guarantees**

- 4.9.01. Prior to the issuance of a building permit, a Performance Guarantee or other surety shall be submitted to the Planning Board (for filing with the Selectboard), by the subdivider, developer, or his successors, in an amount sufficient to cover the cost of construction or completion of streets, utilities, public improvements, drainage structures, traffic signals, setting road bounds and bounds at all angles of individual lots, public parks or public recreation areas or other such improvements as required by the Board as shown on the Final Plat.(11/15/07) (08/02/2012) (09/17/2015)
- 4.9.02. Requirements of the Performance Guarantee shall identify, precisely, the work to be performed, the standards by which satisfactory performance shall be judged. The Consulting Engineer shall determine whether or not there has been satisfactory performance and shall be part of the Final phase approval. (08/02/2012)
- 4.9.03. This Performance Guarantee may be reviewed by Town Counsel and approved or disapproved as to compliance with the requirements and sureties by the Planning Board. (8/21/97) (08/02/2012)
- 4.9.04. As phases or portions of the secured improvements or installations are completed and approved by the Planning Board or its designee, the Town shall partially release said security to the extent reasonably calculated to reflect the value of such completed improvements or installations. (9/7/93)
- 4.9.05. After completion of a road system, or other improvements as required by the Board, a Maintenance Guarantee shall be filed with the Planning Board in such amount as to indemnify and save harmless the Town of Brookline from all claims, loss, damage, or expense of any kind involved in the maintenance of such system or improvement for a period of two (2) winter seasons from the date of road acceptance by the Selectmen, or a lesser term if approved by the Planning Board in consultation with the Consulting Engineer and/or Road Agent. (11/7/95) (8/21/97) (08/02/2012)

This amount should be between 10% and 20% of the total roadway construction cost, in an actual amount needed to complete the guaranteed improvements and installations. Various estimates, including actual contractual and competitively bid costs, should be compared by the Planning Board in consultation with the Consulting Engineer and/or Department of Public Works Director to ensure that the most appropriate amount in setting the Maintenance Guarantee is used. (08/02/2012) **(08-19-2021)**

The Planning Board is responsible for recommending the release of the Maintenance Guarantee when the time period established has expired. (9/7/93) (8/21/97) (08/02/2012)

- 4.9.06. **Performance/Maintenance Guarantee:** A surety provided through a cash savings account held by the Town of Brookline or a local regulated financial institution, by a Letter of Credit issued by a local regulated financial institution, or through a bond issued by a regulated insurance company authorized to do business in the State of New Hampshire. The Letter of Credit format must be approved by Town Counsel and must include a "self-calling" provision: *"If thirty (30) days before expiration, the issuer has not been advised in writing by the town of Brookline that all improvements and/or maintenance guaranteed by the letter of credit have been satisfactorily complete, the surety is automatically called fifteen (15) days prior to expiration. In such an event, the issuing institution shall immediately, without any action on the part of*

*the town, forward payment to the Town of Brookline in the amount of the Performance/Maintenance Guarantee". All Bonds must include a notification provision whereby BOTH the Planning Board AND the Selectboard receive any cancellation notices. All bonds must either be issued by a domestic New Hampshire insurance company or contain specific terms subjecting the issuer to the jurisdiction of New Hampshire Courts and to New Hampshire law other than "choice of law" provisions. All surety packages shall include language or a document explicitly authorizing the Town of Brookline to take ownership of the Guarantee proceeds upon any default by the applicant or successor in interest or any violation of Planning Board approval. All surety packages shall also include language or a document that, upon an event of default, explicitly grants the Town of Brookline the right to enter onto the subject private property in order to complete the work set forth and required by the Planning Board approval. (08/02/2012)*

#### **Section 4.10. Design for Open Space**

- 4.10.01. Where a proposed park, playground, or other open space shown on the Master Plan is located in whole or part in a proposed subdivision, the Board shall require substantial compliance with such master plan.
- 4.10.02. If not shown on the master plan, all subdivisions of twenty (20) acres or greater, and any other subdivisions which may produce a need for more open space and/or recreational areas within the community, may be required to provide one suitably located area as a park, playground, or other open space if this open space area is necessary to provide recreational open space for the subdivision's residents (5/9/89).
- 4.10.03. There are two approaches to determining the number of allowable lots in an open space development. The applicant may choose either method a. or method b.:
- a. Develop a preliminary conventional plan, showing at least:
    - (i) Site specific soils, major wetlands areas, steep slopes (9/05/02)
    - (ii) Preliminary road locations
    - (iii) Lot areas in square feet and/or acres
    - (iv) Amount of wetlands and non-wetlands
    - (v) Number of lots to be created
    - (vi) Floodplain data

After reviewing this design review plan to ensure that it is likely to meet the zoning for a conventional subdivision, the Planning Board will allow the applicant to propose an open space development with the number of lots which the Planning Board deems acceptable under the above conventional plan.
  - b. The applicant may use a general 1 unit per 80,000 square foot calculation, subtracting out slopes greater than 25% and wetlands. For this calculation, the applicant must present a plan showing:
    - (i) Site specific soils, major wetlands areas, steep slopes (9/05/02)
    - (ii) Amount of wetlands and non-wetlands
    - (iii) Floodplain data
- (08-19-2021).**
- 4.10.04. Areas set aside for parks, playgrounds, or open space shall be dedicated to the town for public use.
- 4.10.05. Whenever such dedication of land is required, the land shall be left in an acceptable state, clear of construction debris.
- 4.10.06. The Planning Board shall consult with the Recreation and Conservation Commissions as to the suitability of a proposed park or playground.
- 4.10.07. In the case of open space development, open space shall be not less in area than as provided in the Zoning Ordinances.

- 4.10.08. Such areas of open space, whether privately owned (as a result of Zoning Ordinances) or publicly owned (as a result of dedication to the Town), shall have a sufficient legal description and restrictions recorded in the Hillsborough County Register of Deeds Land Records to assure permanence of use as open space.
- 4.10.09. Open space land in private ownership shall be protected in such a way that it will assure operation or maintenance of the land in an orderly manner suitable for the purpose intended.
- 4.10.10. On land to be used as recreation space, undesirable growth and debris shall be removed. Wooded and brook areas shall be left in their natural state.
- 4.10.11. Recreation open spaces shall be graded properly to dispose of surface water and shall be seeded with lawn grass.
- 4.10.12. If an area, not to exceed one (1) acre, is to be used for the purpose of burying stumps, boulders, and other natural waste, it shall be designated on the Final Plat with appropriate State approvals.
- 4.10.13. This area must be filled in on an "as you go" basis and finally covered with at least four (4) inches of topsoil and seeded with lawn grass or other suitable ground cover such that the area is protected from erosion and is as close to its natural condition as possible two (2) years after the seeding.
- 4.10.14. There shall be no deposition, dumping, or storage of waste, or other natural or man-made material, supplies, or equipment on any subdivision land designated as open space excepting that specifically designated for the disposal of natural waste as described above.
- 4.10.15. No work, removal, or filling shall be done, nor shall the existing natural characteristics of open space land be altered from the original condition until a site plat, prepared by the surveyor or engineer licensed by the State of New Hampshire, shall have been approved by the Board.

***Section 4.11. Trees and Plantings***

- 4.11.01. Due consideration shall be given to the preservation of existing features, trees, scenic points, and other natural historic resources within subdivisions.
- 4.11.02. The Board may require additional tree planting and other landscaping appropriate to the area being developed.
- 4.11.03. Removal of topsoil or surplus materials from the subdivision area shall not be permitted unless in accordance with the Zoning Regulations.
- 4.11.04. Existing trees on lots and open space land shall be preserved wherever feasible, unless otherwise directed by the Board.
- 4.11.05. Proper permits for cutting must be obtained.

***Section 4.12. Open Space Development***

- 4.12.01. If allowed in the Zoning Ordinances, a subdivision plat may be designed for open space development, provided all requirements of the Zoning Ordinances and the Subdivision Regulations are met.
- 4.12.02. As noted in section 3.1.32 and 4.10.3, it is strongly encouraged that an open space development goes before the Planning Board. This will allow the Planning Board to determine the maximum number of lots allowable in the proposed open space development. **(08-19-2021)**  
This optional phase will present the applicant an opportunity to demonstrate why an open space development may not be appropriate on this site. (9/7/93)
- 4.12.03. The 50-foot perimeter setback, or a value as deemed necessary by the Planning Board, is a buffer between the structures in the open space development and any adjacent parcels. This area should include natural vegetation where it exists, or appropriate landscaping where there is no natural buffer. This buffer may include part of any house lot and/or the common open space. (9/7/93) (09/16/2010).
- 4.12.04. Open space land in an open space development shall be permanently protected through easement or deed or homeowners association. (9/7/93)

- 4.12.05. Open space as part of an open space development shall be left in an acceptable state, if possible, clear of construction debris. A pre-conveyance open space conservation easement deed shall be recorded and shall have an easement sunset upon conveyance to the Town or homeowners association. (9/7/93) (07/16/2020)

***Section 4.13. Phasing***

- 4.13.01. The Board may specify the extent to which the particular subdivision may be developed in any given year, and establish the maximum duration of time for the total development of the proposed subdivision in order to assure harmonious development of the town.

***Section 4.14. Hours of Construction***

- 4.14.01. All road construction activities related to plans approved by the Board shall take place within the hours of 7 a.m. to 7 p.m., except for Saturdays, Sundays and federal holidays when construction activities shall occur within the hours of 9 a.m. to 5 p.m., unless otherwise modified by the Board. (8/21/97)

## **SECTION 5. ROAD AND UTILITY STANDARDS**

### **Section 5.1. Street Design**

- 5.1.01. Street patterns shall give due consideration to contours and natural features.
- 5.1.02. Where required by the Board, provision shall be made for the extension of the street pattern to abutting and adjacent property by merely the indication on the plat of a sufficiently wide area of undeveloped land to provide future potential access.
- 5.1.03. Every proposed street in a subdivision shall be laid out and constructed as required by these regulations.
- 5.1.04. Where a subdivision abuts an existing street with an inadequate alignment, or right-of-way width, the subdivision plat shall include in the street dedication all land needed to meet the standards established by these regulations, and as approved by the Board.
- 5.1.05. Dead-end streets shall not exceed twelve hundred (1,200) feet in length and shall terminate with a minimum turn around of one hundred fifty (150) feet in diameter, i.e. seventy-five (75) feet from the center of the turn around to the outside of the right-of-way or a hammerhead with a minimum of 55 feet on each leg as measured from the centerline of the street. The length of the dead-end street shall be measured along the center line from the edge of the street, for the entire length of the road, including the turn around (5/9/89). (11/15/07)
- 5.1.06. Where land for future extensions to another outlet is approved by the Board, and where indicated on the plat, the full width of the right-of-way to the subdivision property line shall be deeded to the Town.
- 5.1.07. The intersection of any street shall have a corner rounding at the property line with a radius of one half (1/2) the width of the right-of-way.
- 5.1.08. The plat of any proposed subdivision shall show work required to connect and complete the improvements and utilities between the proposed street pattern and any connecting street in an existing subdivision.
- 5.1.09. All streets shall be constructed and paved, and all bridges, culverts, drainage structures, storm sewers, gutters, drainage ditches, and other improvements required by the subdivision plat and accompanying documents shall be installed in conformance with the Standards and Specifications as set forth in section 4.8.
- 5.1.10. All street intersections shall have all season safe sight distance which should be connected to designated speed limits in both directions. **(08-19-2021)**
- 5.1.11. All season safe sight distance is defined as a line which encounters no visual obstructions between two points, each at a height of three (3) feet nine (9) inches above the pavement, and so located as to represent the critical line of sight between the operator of a vehicle using the access and the operator of a vehicle approaching from either direction.

### **Section 5.2. Drainage**

- 5.2.01. An adequate surface storm water drainage system for the entire subdivision area shall be provided, based upon a 25-year storm event. (8/21/97)
- 5.2.02. Storm drainage shall be carried to existing water courses or connected to existing storm drains.
- 5.2.03. If the storm water drainage system creates any additional peak rate flow over any adjacent property, the subdivider shall obtain an easement therefore from the adjacent owner and shall hold the Town of Brookline harmless from any claims for damage resulting therefrom. (8/21/97)
- 5.2.04. In general, drainage shall be discussed with the Town Engineer and shall be based on New Hampshire Stormwater Manual for both peak flow rates and volumes. **(08-19-2021)**

### **Section 5.3. Utilities**

- 5.3.01. The Board may require the installation of street lighting meeting Town requirements in any subdivision where it deems them appropriate and/or necessary, especially at the intersection of a subdivision road,

way, drive, street or any other mean of access with an arterial or collector road. All required new street lights are done at the sole cost of the developer. All applications, including a single lot subdivision, which include the creation of a new or upgraded road, way, drive, street, driveway, or any other mean of access to a created lot for a new subdivision shall have underground utilities, installed according to specifications set by the appropriate utility companies. A new driveway shall have underground utilities the entire way to the house. If a single new lot is across the street from an existing utility pole, overhead wires could be used, if desired by the developer/homeowner, from the end of the new driveway to the house. Utilities shall be located a minimum of seventeen (17) feet off the centerline of the roadway pavement. Utilities shall be located so as not to conflict with new or existing roadside drainage systems. (8/21/97) (6/18/09) (9/17/15) (07/16/2020)

#### ***Section 5.4. Street Names***

Please, refer to section 4.6.06 (i). **(08-19-2021)**

#### ***Section 5.5. Site Reclamation Standards for On-Site Stump Burial***

- 5.5.01. The Planning Board or its designee shall periodically inspect subdivision operations and shall perform a final reclamation inspection in order to ensure that the approved plans have been followed.
- 5.5.02. No slope in soil material shall be left steeper than 3:1 (three horizontal feet for each one foot of vertical drop) unless it can be demonstrated by the applicant that a steeper grade can be adequately vegetated and stabilized. Under no case shall a soil material slope be left steeper than 2:1.
- 5.5.03. All debris, boulders, etc. shall be lawfully disposed of in a manner acceptable to the Regulator or its designee.
- 5.5.04. Ground levels and grades shall be established as shown on the approved reclamation plan to a maximum of 6 feet above the existing grade. Reclamation shall be completed as soon as practical but no later than one year after burial.
- 5.5.05. Reclaimed area shall be backfilled with 18” to 24” of select material above top level of stumps. Stockpiled topsoil shall be spread over select material to a 4-6” depth to allow and maintain vegetation. Additional topsoil may be brought onto the site if required by the Planning Board or its designee for proper reclamation. The disturbed area(s) shall be fertilized, if necessary, and seeded with a grass or grass-legume mixture.
- 5.5.06. Plantings in accordance with an approved reclamation plan shall be protected from erosion during an appropriate establishment period by mulch and structural erosion control devices. No area shall be left in such a condition that erosion of the area after completion of the work may result in water pollution by silt or other deleterious substances.
- 5.5.07. Upon completion of the reclamation operations, the topography of the land shall be left so that water draining from the site leaves the property according to the approved reclamation plan.
- 5.5.08. Unless waived in writing or otherwise stipulated by the Planning Board, areas adjacent to the stump burial (which location shall clearly noted on a recorded subdivision plan), including access points, from which trees have been removed shall be planted with two-year old plants or plants furnished under a standard nursery order. Type of plants selected shall be included in Trees and Shrubs in New Hampshire – A Guidebook for Natural Beauty Projects (Extension Bulletin No. 163, revised, published May 1980 by the Cooperative Extension Service of the University of New Hampshire, Durham, New Hampshire.) Seedlings without center buds or seedlings with pruned roots will not be accepted. **(08-19-2021)**
- 5.5.09. The applicant shall provide a reclamation plan with the Subdivision Application. On-site stump burial and reclamation plans shall comply with all requirements of these regulations and State of NH Requirements, as amended.

(Section 5.5 adopted 5/6/99)

## **SECTION 6. ADMINISTRATION AND ENFORCEMENT**

### **Section 6.1. Modification**

- 6.1.01. The requirements of the foregoing regulations may be modified when, in the opinion of the Board, specific circumstances surrounding a subdivision, or condition of the land in such subdivision, indicate that such modification will properly carry out the purposes and intent of the Master Plan and of these regulations.

### **Section 6.2. Acceptance of Streets**

- 6.2.01. Nothing herein is intended to modify the requirements of the law with reference to the acceptance of streets by the Town. Nothing herein is intended to modify or control the construction, reconstruction, or extension of roads by the Town or State.

### **Section 6.3. Other Regulations**

- 6.3.01. Where these regulations are in conflict with other Local or State Ordinances, the more stringent shall apply.

### **Section 6.4. Enforcement**

- 6.4.01. These regulations shall be enforced by the Selectboard or its duly authorized representative.

### **Section 6.5. Violations and Penalties**

- 6.5.01. If, during the course of execution of a subdivision, the subdivider, developer, or his successors shall violate the conditions of the subdivision approval, Zoning Ordinances, or the Subdivision Regulations of the Town of Brookline, the Planning Board may notify the Selectmen of such violation and request that no further building permits be issued until the violation has been satisfactorily corrected.
- 6.5.02. As per RSA 676:16, any owner, or agent of the owner of any land located within a subdivision who transfers or sells any land before a plat of the subdivision has been approved by the Board and filed in the Office of the Register of Deeds shall forfeit and pay a penalty of Five Hundred (500) Dollars for each lot or parcel so transferred or sold; and the description by metes and bounds in the instrument of transfer or other document used in the process of selling or transferring shall not exempt the transaction from such penalties.

### **Section 6.6. Appeals**

- 6.6.01. Any person aggrieved by an official action of the Board, may appeal therefrom to the Superior Court as provided by RSA 677:15.

### **Section 6.7. Validity**

- 6.7.01. If any Section, Subsection, or phrase of these subdivision regulations is found for any reason to be invalid by a court of competent jurisdiction, such decision shall not affect the validity of the remaining portion of these regulations.

## **SECTION 7. DRIVEWAY REGULATIONS**

Pursuant to the provisions of RSA 236:13, the following driveway regulations are hereby established for the Town of Brookline, NH and shall comply with the Zoning and Land Use Ordinance, Section 1800.00, Driveway Ordinance. (11/15/07).

### **Section 7.1. Purpose**

7.1.01. The purposes of these regulations are as follows:

- a. In as much as driveways and entrances are, in effect, intersections, they require certain controls as to size and location in order to provide safe and efficient access to property fronting on the road, as well as to provide for the proper and suitable discharge and control of surface drainage in and around said driveway.
- b. Ensure public safety through the orderly control of traffic movement onto and from highways, streets, and roadways.
- c. Provide a uniform practice and procedure relative to the design and construction of driveway entrances and exits.
- d. Enhance the access to buildings and properties for emergency services. (11/15/07)

### **Section 7.2. Definition**

7.2.01. The term "driveway" is defined as an improved or unimproved area serving as an entrance, exit, or approach from any street or to any parcel of land, regardless of public or private ownership.

### **Section 7.3. Design Features (11/15/07) (10/16/2014)**

Any newly constructed driveway shall be constructed in a manner to ensure public safety, accessibility for all emergency vehicles and to keep water away from the public way with adequate drainage and slopes. This shall be accomplished by constructing the driveway in the following manner:

- a. Approach to the public way shall be as near 90 degrees as possible.
- b. Maximum grade shall be ten (10) percent with the Building Inspector and the Fire Department approval and at the discretion of the Planning Board.
- c. Grade shall be pitched away from the public way for the first five (5) feet.
- d. The driveway shall be paved fifteen (15) feet from the edge of existing pavement or to the property line, whichever distance is less.
- e. Culverts or water crossings must comply with Section 6 of Appendix A: *Road Construction Specifications* of these regulations.
- f. For driveways one thousand (1,000) feet or more in length, the issuance of a driveway permit will require a drainage plan by a New Hampshire licensed engineer, or other source acceptable to the Building Inspector, to ensure that stormwater and spring meltwater will not result in erosion, endanger the integrity of the driveway surface, or cause siltation of drainage systems or surface waters.
- g. (Section removed 07/16/2020)

### **Section 7.4. Permit and Penalty**

7.4.01. Anyone desiring to construct, alter or relocate a driveway in order to obtain access to an existing or proposed street or roadway, shall first apply for and obtain a permit from the Building Inspector's Office, which permit shall provide for the construction, alteration or relocation of such driveway in accordance with the following specifications.

7.4.02. No construction of any driveway shall be allowed without such permit.

- 7.4.03. Anyone violating the provisions of this regulation may be punished by a fine not to exceed fifty (\$50) dollars for each offense and may be enjoined from causing vehicular traffic to traverse any part of town property to gain access to the town road from other property.

**Section 7.5. Common Driveways** (Section amended 06-15-2000 – Revised 11-15-2007 – 10-16-2014)

Common driveways will be permitted in the Town of Brookline in accordance with the following specifications. The common driveway is defined as that portion of the driveway that provides access to two or more individual parcels. The common driveway becomes a private access at the point at which it provides access to one parcel. A plan and profile shall be prepared by a licensed professional engineer and submitted for approval by the Planning Board.

- 7.5.01. Number of Lots. A maximum of four (4) lots can be served by one (1) common driveway.
- 7.5.02. Length. The common portion of the driveway shall not exceed 1,200 feet in length. A turnaround for emergency vehicles shall be provided at the end of the common driveway. (11/15/07).
- 7.5.03. Design. Common driveways shall be designed and built in accordance with the approved subdivision plan to allow for the passage of all vehicles expected to use the driveway year-round.
- a. The traveled way shall be a minimum of fourteen (14) feet with three-foot maintained shoulders on each side. (9/05/02).
  - b. Maximum grade shall be ten (10) percent with the DPW Director and the Fire Department approval and at the discretion of the Planning Board. **(08-19-2021)**.
  - c. Minimum grade shall be 0.5 percent.
  - d. Grades at intersecting roadways shall not exceed 3 percent for the first thirty (30) feet from the sideline of the intersecting edge of pavement.
  - e. The driveway may be gravel or paved. A minimum gravel base of twelve inches (gravel shall have no aggregate larger than 6 inches) shall be required. An additional two (2) inch wearing surface shall be dense, graded, crushed stone for all common driveways.
  - f. The driveway shall be paved fifteen (15) feet from the edge of existing pavement or to the property line, whichever distance is lesser.
  - g. Culverts or water crossings must comply with Section 6 of Appendix A: *Road Construction Specifications* of these regulations.
  - h. For driveways one thousand (1,000) feet or more in length, the issuance of a driveway permit will require a drainage plan by a New Hampshire licensed engineer, or other source acceptable to the DPW Director to ensure that stormwater and spring meltwater will not result in erosion, endanger the integrity of the driveway surface, or cause siltation of drainage systems or surface waters. **(08-19-2021)**.
  - i. Grade shall be pitched away from public ways for the first five (5) feet.
- 7.5.04. Common Driveway Identification. All common driveways, regardless of how many homes they serve, shall have a permanent granite marker, of minimal dimensions five (5) feet in height from grade level, two (2) feet in width and seven (7) inches in depth, and shall be placed two and one half (2.5) feet below grade level at the end of the driveway where it meets the public way. The marker shall be single faced and placed at an optimal angle and location to the road. The granite marker shall be engraved with a diagram of the driveways showing locations and street numbers. The bottom edge of the diagram shall be a minimum of 30 inches above the finished grade. Should the common driveway split, a permanent granite marker complying to the above regulations, indicating which homes are located on either side of the split, must also be placed at the intersections. All common driveways shall be designated a “Way”, with the name and house numbering as designated by the Brookline Emergency Management Director. In addition to the granite marker, a standard Town street sign must also be placed at the entrance to the “Way” prior to the issuance of a Certificate of Occupancy by the Building Inspector. (6/03/04) **(08-19-2021)**

- 7.5.05. Guarantee. Reference Section 1800.00, Driveway Ordinance, of the zoning ordinance for bonding requirements. (08/02/2012)
- 7.5.06. Inspections. All common drives shall be inspected by the Town Engineer to ensure the use of the required materials and proper construction. Any cost for engineering inspections shall be borne by the applicant as set forth in section 3.1.22, Procedure and Appendix B of the Subdivision Regulations. (11/15/07) **(08-19-2021)**.
- 7.5.07. Building Permits and Certificates of Occupancy. The common driveway must be complete up to a point fifteen feet beyond the common access point, between the home and the Town road, including drainage, crushed gravel and grading, and all identification markers must be installed prior to the issuance of a building permit. The Certificate of Occupancy for the last building shall not be issued until after a final satisfactory inspection report is submitted to the Planning Board, the DPW Director, and the Building Inspector by the Town Engineer. (08/02/2012) **(08-19-2021)**.

***Section 7.6. Easement and Performance Guarantee – For Single and/or Common Driveways***

- 7.6.01. The applicant may, at the discretion of the Selectboard, as a condition of the granting of the permit, be required to provide to the Town of Brookline, an easement to the extent deemed necessary by the said Selectboard for the purposes of entering upon the premises of the applicant to control or maintain surface drainage and to do all things necessary for and incidental to such drainage. To that end, and where appropriate and necessary, in the discretion of the Planning Board, the applicant may be required to provide a Performance Guarantee in such sum as is deemed necessary for the proper construction of such culvert, piping, ditching or other efforts incidental to and necessary for the proper discharge and control of surface and subsurface drainage in and around the vicinity of the proposed driveway, both on the property of the applicant or on the property of the Town. (11/19/91) (8/21/97) (08/02/2012)

***Section 7.7. Fees***

- 7.7.01. No permit shall be issued until a payment of a fee, which fee shall be established from time to time by the Selectboard as they see fit, said fee to be paid to the Town of Brookline.

(Section 7 adopted 5/9/89 – **Last revision: August 19, 2021**)

(Brookline Portion) ..... 25**

**D. Impact Fee Schedule – New Police Station ..... 27**

## ***APPENDIX A: ROAD CONSTRUCTION SPECIFICATIONS***

### ***A.1 Location and Alignment***

- a. Proposed streets in the subdivision shall be coordinated with each other and with existing streets with due consideration given to contours and other natural features.
- b. Provision may be made for the projection of streets to adjoining property which is not subdivided.
- c. Reserve strips prohibiting access to streets or adjoining property will not be permitted, except where, in the opinion of the Board such strips shall be in the public interest.
- d. Streets entering opposite sides of another street shall be laid out either directly opposite one another or with a minimum offset of 125 feet between their center lines.
- e. The minimum center line radii of curved streets shall be 150 feet for local and 300 feet for collector and arterial streets. Sight Distance shall refer to AASHTO Guidelines. All reverse curves shall be separated by a tangent of at least 100 feet. (8/21/97) (9/05/02) **(08-19-2021)**.
- f. Streets shall be laid out so as to intersect as nearly as possible at right angles. No street shall intersect any other street at less than sixty (60) degrees.
- g. Property lines at street intersections shall be cut back to provide for a property line radius of not less than twenty-five (25) feet.
- h. Street right of way widths shall be a minimum of fifty (50) feet.
- i. A design speed of 30 miles per hour shall be used. However, some sites may benefit from a lower design speed to limit the impact from a development. (8/21/97) **(08-19-2021)**.

### ***A.2 Grade***

- a. The minimum center line grade for any street shall not be less than 0.75%.
- b. The maximum center line grade shall not be more than eight (8) percent except where in the opinion of the Board a greater grade is required for short distances due to unusual topographic conditions. However, in no case shall the grade be more than ten (10) percent. (8/21/97)
- c. Grades at intersecting roadways shall not exceed three (3) percent for the first 75 feet from the sideline of the intersecting edge of pavement. (8/21/97)
- d. Grades at cul-de-sacs shall be restricted to a maximum of four (4) percent along the roadway baseline and perpendicular to it.
- f. All changes in grade exceeding three (3) percent shall be connected by vertical curves of sufficient length to provide a sight distance of at least 200 feet for all local and collector streets and 300 feet for arterial streets. (8/21/97)

### ***A.3 Dead End Streets***

- a. Dead-end streets shall not exceed twelve hundred (1,200) feet in length and shall terminate in a circular turnaround 150 feet in diameter, with an outside paved diameter of 138 feet. The width of the paved roadway shall not be diminished at the turn around. (5/9/89) (11/15/07) **(08-19-2021)**

### ***A.4 Easements***

- a. Easements for storm drains, water courses, utilities and other purposes shall be provided where such are located outside the right-of-way and shall be at least 25 feet in width.
- b. Where possible easements shall be on rear or side lot lines.
- c. All lines of all easements will be calculated, described and shown on the final plat with bearings and distance.

#### **A.5 Construction**

- a. As a minimum, roadway construction shall conform to the typical cross section included with these regulations. Where specifications relative to materials and construction requirements are not included in these regulations, the specifications found in the Standard Specifications for Highways and Bridges, State of NH DOT, in its latest issue shall be used. (11/19/91)
- b. The entire area of each right-of-way shall be cleared of all stumps, brush, roots, and trees not designated for preservation.
- c. The full length and width of the entire proposed roadway section (including the fill sections, road and shoulder areas) shall be excavated or filled as necessary, to a depth of at least nineteen (19) inches below the finished grade as shown on the profile. However, if the soil is soft and yielding, or contains undesirable material such as loam, peat, soft clay, or any other material detrimental to the base gravel grade, such material shall be removed and replaced with suitable well compacted material. In fill areas, no stone greater than one (1) foot in largest dimensions shall be placed within two (2) feet of the gravel base. (8/21/97) **(08-19-2021)**.
- d. The center line of the paved roadway area shall coincide with the center line of the right-of-way unless a minor variance is specifically approved by the Board.
- e. As a minimum, the paved roadway shall be provided with a foundation of 12" of gravel and 6" of crushed gravel. These materials shall conform to the State of NH Standard Specifications 304.2 gravel, and 304.3 crushed gravel for both material quality and construction requirements. (11/19/91, 11/7/95) **(08-19-2021)**
- f. The gravel shall be spread and then rolled true to line and grade with a roller of proper size. Any depressions that appear during or after rolling shall be filled with additional gravel and re-rolled until the surface is true and even.
- g. The wearing surface shall consist of 4 inches of plant mixed bituminous concrete. It shall be applied in two (2) courses, 2" base course and 1" top course. There shall be a minimum of one (1) year and a maximum of five (5) years between placing the base pavement and the completion of the finish paving course. (8/21/97) (09/16/2010). **(08-19-2021)**
- h. Stabilized shoulders having a width of 4'-0" shall be constructed on each side of the paved roadway as shown on the typical cross section. (11/19/91)
- i. The area in back of the shoulders shall be sloped no steeper than a rate of three feet horizontal to one foot vertical to a point where it coincides with the ditchline or the finished grade of abutting lots. Loam shall be applied to a depth of four (4) inches, rolled and seeded or covered with other suitable mulching materials. (8/21/97)
- j. Guardrails shall be installed in locations where required in the AASHTO Guidelines for Roadside Design and constructed in accordance with NH DOT Standards and Details. (11/19/91, 8/21/97) **(08-19-2021)**.

#### **A.6 Drainage**

- a. Storm drains, culverts, and related installations, including catch basins, gutters and manholes shall be installed within the subdivision as necessary to adequately dispose of surface water. Where ground water conditions necessitate it, the Board may require the use of sub drain to drain the base course of the road.
- b. Storm drains shall be reinforced concrete pipe, corrugated plastic pipe, or plain aluminum corrugated pipe. The minimum size of pipe shall be 12 inches inside diameter and shall be of greater size when required by the Board. The minimum pitch shall be 0.5%. All drains shall be laid to uniform grades and carefully back filled so that the pipe is supported throughout its entire length with compacted earth. (8/21/97) (11/15/07)
- c. Catch basins, where required, shall be installed on both sides of the roadway at intervals of not more than 350 feet, at low points, and near the corners of the roadway grade, at intersecting streets. Any change in alignment or grade, if not normally the location of a catch basin, shall be made by using a manhole.

- d. Catch basins shall comply with NH DOT Specifications and Details. (8/21/97) **(08-19-2021)**.
- e. Where adjacent property is not subdivided, provision shall be made for the extension of the drainage system by continuing appropriate drains to the exterior boundaries of the subdivision, at such size and grade as will allow for their proper future connection. (8/21/97)
- f. Ditches when designed for drainage in cut sections shall have their flowline grade at least 27" below center line finished grade. (11/19/91, 8/21/97)

**A.7 Monuments**

- a. Monuments shall be installed on both sides of the right-of-way, at all street intersections, at all points of change of direction or curvature of streets and at other points where in the opinion of the Board, permanent monuments are necessary. Such monuments shall be of granite or reinforced concrete not less than four (4) inches square and not less than four (4) feet long set flush with the finished grade. When surface ledge is encountered, a one (1) foot by three quarter inch 1" x 3/4" iron pin inserted in the ledge may be substituted.
- b. No monuments shall be installed until all construction which would destroy or disturb the monument is completed.
- c. The setting of the monuments shall be supervised by a registered land surveyor.

**A.8 Street Signs**

- a. The subdivider shall furnish and erect street signs at all street intersections. These signs shall be of the same type being used in the Town at the same time of Subdivision approval.
- b. The subdivider shall also furnish and set such other traffic control signs as the Board shall require. (5/9/89)

**A.9 Clean up**

- a. Upon completion of all work on the ground, the subdivider shall remove from the streets and adjoining property, all temporary structures and all surplus material and rubbish which may have accumulated during construction and shall leave the work site in a neat and orderly condition.

**A.10 Inspection**

- a. The Board shall designate an inspector for all construction in an approved subdivision to ensure full compliance with the foregoing rules and regulations. This inspector shall not authorize any changes from these regulations or from the approved record plan for the subdivision without specific approval of the Board. He/she will inspect the work in progress during reasonable hours as he will see fit; but in any case it will be the subdivider's responsibility to request his inspection at the following progress steps:
  1. After grubbing stumps, but before any fill is placed. (8/21/97)
  2. After excavation and/or filling has been started but before the gravel placement operation has been started.
  3. After drainage system is installed, but before it is covered. The inspector shall check the pipe alignment and any defective runs shall be corrected before approval is given.
  4. After each type of gravel has been placed and shaped and before the bituminous concrete surface has been applied. (8/21/97)
  5. After bituminous concrete surface has been placed and while shoulder work is in progress.
  6. Before acceptance by the Town of Brookline.
  7. At other specific times deemed necessary by the Board.
- b. The subdivider shall give at least 24 hours notice to the inspector whenever an inspection is indicated. He shall also furnish the necessary baseline and grade stakes to allow the inspector to properly carry out his function.

- c. Records of inspections shall be kept on file at the Town Hall and shall be signed and dated by the authorized inspector.

**APPENDIX B: FEES  
BROOKLINE PLANNING BOARD**

**FEE SCHEDULE**

**Subdivision Development:**

\$60.00 (sixty) per lot (including parent lot)	\$ _____
\$40.00 (forty) for the first Mylar sheet	\$ _____
\$30.00 (thirty) for each additional Mylar sheet to be recorded	\$ _____
\$25.00 (twenty five) <b>to</b> Hillsborough County Treasurer (plan recording)	\$ _____

**Lot Line Adjustment Fee:**

\$50.00 (fifty) for the entire adjustment (not per lot)	\$ _____
\$40.00 (forty) for the Mylar sheet	\$ _____
\$25.00 (twenty-five) <b>to</b> Hillsborough County Treasurer (plan recording)	\$ _____

**Notification Fee:**

Postage Cost <b>plus</b> \$2.00 (two) per abutter	\$ _____
---	----------

**Discretionary Easement Applications:**

\$30.00 (thirty) application fee	\$ _____
----------------------------------	----------

**Parcel Boundary Digitizing Fee:**

\$10.00 (ten) per lot (not applicable if digital file is provided)	\$ _____
--	----------

**Total Amount Due:** \$ \_\_\_\_\_

---

---

**Other Fees:**

- Nashua Regional Planning Commission
- Town Planner
- Town Counsel Review
- Site Inspections
- Town Engineer
- Road Inspector
- Other Consulting
- Off-Site Improvement Agreement, plat or legal document Recording

**To be billed separately, based on time spent for reviews and inspections**

(Fees amended 10/3/89, 11/19/91, 11/7/95, 8/21/97, 5/6/99, 5/17/01, 10/04/01, 11/15/07 and 06/18/09)

***APPENDIX C: APPLICATIONS***

***BROOKLINE PLANNING BOARD***

***APPLICATION FOR PRELIMINARY CONCEPTUAL CONSULTATION PHASE***

Case # \_\_\_\_\_ Date \_\_\_\_\_

Name \_\_\_\_\_

Address \_\_\_\_\_

Telephone \_\_\_\_\_ Fax \_\_\_\_\_

Email Address \_\_\_\_\_

I respectfully request a meeting with the Brookline Planning Board to discuss in general terms the Board's subdivision regulations and how they pertain to a potential subdivision I am considering. I understand that this discussion, by law, can only be conceptual in nature and that the proposal can only be discussed in general terms. Such consultation shall not bind either myself or the Planning Board, and statements made by Planning Board members shall not be the basis for disqualifying said members or invalidating any action taken.

I also understand that this meeting is informal in nature and is separate and apart from subdivision consideration, and that the time limits for Planning Board action provided in NH R.S.A. 676:4(I)(c) as amended, do not apply.

Signed \_\_\_\_\_

Name of Agent \_\_\_\_\_

Address of Agent \_\_\_\_\_

The names and addresses of abutters (as defined by NH R.S.A. 672:3) on three (3) sets of adhesive labels need to be attached with this application.

I respectfully request a meeting with the Brookline Planning Board to discuss a preliminary layout of the above proposed subdivision. I understand that the Planning Board must have this application on file fifteen (15) days prior to a regularly scheduled meeting of the Brookline Planning Board in order to provide adequate time to notify abutters as required by NH R.S.A. 676:4 (I)(d) and the Brookline subdivision regulations. Such consultation shall not bind either myself or the Planning Board, and statements made by Planning Board members shall not be the basis for disqualifying said members or invalidating any action taken.

I also understand that this meeting is informal in nature and is separate and apart from formal subdivision consideration, and that the time limits for Planning Board action provided in NH R.S.A. 676:4(I)(c) as amended, do not apply.

The undersigned subdivider hereby submits to the Brookline Planning Board on \_\_\_\_\_, 20\_\_\_\_, a Completed Application as required by the Brookline Planning Board subdivision regulations and respectfully requests its approval of said Application. In consideration for approval and the privileges occurring thereto, the Applicant hereby agrees:

1. To carry out the improvements agreed upon and as shown and intended by said plat, including any work made necessary by unforeseen conditions which become apparent during construction.
2. To post all streets "Private" until accepted by the Town and to provide and install standard street signs as approved by the Town for all street intersections.
3. To give the Town on demand, proper deeds for land or rights-of-way reserved on the plat for streets, drainage or other purposes as agreed upon.
4. To save the Town harmless from any obligation it may incur, or repairs it may make, because of my failure to carry out any of the foregoing provisions.
5. To make no changes whatsoever in the Final Plat as approved by the Board unless a revised plat or a plat of re-subdivision is submitted to and approved by the Board.
6. To agree to pay for all engineering studies and reviews contracted for by the Town (5/9/89).

The undersigned subdivider understands that the Brookline Planning Board must have on file a Completed Application as outlined in its subdivision regulations thirty (30) days prior to a regularly scheduled meeting of the Board and that once the Board accepts the Completed Application at a regularly scheduled meeting, it has ninety (90) days to approve or disapprove the Completed Application subject to extension or waiver as provided in accordance with New Hampshire R.S.A. 676:4 (I)(f), as amended.

**APPENDIX D: SAMPLE FORM OF ACCEPTABLE LETTER OF CREDIT**

(Today's date)

Selectboard  
Town of Brookline  
PO Box 360  
Brookline, NH 03033

Re: Irrevocable Letter of Credit #: \_\_\_\_\_  
Project: \_\_\_\_\_ Tax Map \_\_\_\_\_ Lot \_\_\_\_\_  
(Name of Subdivision)

Developer(s) name: \_\_\_\_\_  
Developer(s) address: \_\_\_\_\_  
Bank: \_\_\_\_\_ Credit Amount: \_\_\_\_\_  
Expiration Date: \_\_\_\_\_ Termination/Completion Date: \_\_\_\_\_

By this document the Bank establishes an Irrevocable Letter of Credit Number \_\_\_\_\_ in favor of the Town of Brookline at the request of the Developer(s) of the above Project. This Irrevocable Letter of Credit is issued to guarantee completion of all improvements required by the Brookline Planning Board and the Brookline subdivision regulations in conjunction with a plan entitled \_\_\_\_\_, which was approved by the Brookline Planning Board on: \_\_\_\_\_.

Funds up to the Credit Amount shall be available at sight drawn on the Bank by draft executed by the Chairman of the Town of Brookline Planning Board which shall refer to the Developer as above, identify the Project as above, and make a demand for a specific sum. All draft must be marked "Drawn under the [bank name] Irrevocable Letter of Credit # \_\_\_\_\_, dated \_\_\_\_\_.

All drafts as provided for in this Irrevocable Letter of Credit must be received by the Bank not later than the expiration date, after which date all liability of the Bank shall cease. If all improvements guaranteed by this Irrevocable Letter of Credit are not completed by \_\_\_\_\_, and if a final road inspection has not been made by the road inspector for this project, then this Letter of Credit shall automatically be considered to be called without further action of the Brookline Planning Board. The Bank shall then forward a check to the Town in the amount of the Credit Amount to be used for completion of the guaranteed work. The funds forwarded to the Town of Brookline shall be used exclusively for the completion of work on this project. Any funds not used shall be returned to the Bank.

The Bank engages with the Town of Brookline that drafts drawn under and in compliance with the terms of this Irrevocable Letter of Credit will be duly honored by us up to the Credit Amount on delivery.

Except as otherwise expressly stated, this Irrevocable Letter of Credit is subject to the Uniform Customs and Practice for Documentary Credits of the International Chamber of Commerce.

**BANK** BY: \_\_\_\_\_ DATE: \_\_\_\_\_

I have read this letter of credit and agree to its terms.

***APPENDIX E: CHECKLIST FOR SUBDIVISION REVIEW***

**BROOKLINE PLANNING BOARD**

This checklist is to be used as a guide for complying with the Town of Brookline's subdivisions site plan review regulations. It is to be used for each individual subdivision site plan review application submitted.

The following information shall be required for a **completed application**. (Section 4.6.06 of the regulations) The information with an asterisk (\*) next to it is also recommended for the design review phase. All references are to the current Brookline subdivision regulations.

**Y N NA**

- Eight (8) (black) print copies *and one printable 11"x17" electronic .pdf format* prepared by a registered land surveyor. [4.6.05](\*) (08/02/2012)
- Scale is not more than one hundred (100) feet per inch. [4.6.05](\*)
- Parcel tax lot number and total acreage. [4.6.05a, 4.6.06f](\*)
- Name of the subdivision.[4.6.05a](\*)
- Name and address of the owner of record.[4.6.05a](\*)
- Name and address of the subdivider and designer.[4.6.05a](\*)
- Names and addresses of every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the Board.
- Boundaries of zoning districts lying within the subdivision and any municipal boundaries.[4.6.05g](\*)
- Location or "locus" map at the scale of the municipal base map.[4.6.05h](\*)
- Date the plans were first drafted. Any revision(s) made to any of the sheets first submitted are to be so noted in the **Revision Block**. The Revision Block is to be placed on the Mylar original(s) of the revised sheet(s). Additional paper copies are to be made and submitted to the Planning Board to replace those sheets previously submitted.(\*)
- Topography for site with the contour interval not to exceed five (5) feet.[4.6.05j, 4.6.06k](\*)

**Abutting Property Information**

- The names and addresses of all abutting property owners (with three sets of labels) as indicated in the Town records not more than five (5) days before the date of filing.[4.6.05b](\*)
- Name(s) and location(s) of abutting subdivisions.[4.6.05b](\*)
- Name(s) and location(s) of abutting streets, easements, and alleys within one hundred (100) feet of the parcel to be subdivided.[4.6.05b,d,e](\*)
- Name(s) and location(s) of abutting parks and open space.[4.6.05e](\*)
- Location of existing abutting buildings.[4.6.05b](\*)

- Location of existing abutting water supply wells or springs.[4.6.05b](\*)
- Location of existing abutting septic system leach field(s).[4.6.05b](\*)
- Road and/or driveway intersection(s) within two hundred (200) feet of property lines.[4.6.05b](\*)
- Fees paid to secretary.[3.1.13](\*)
- Properly completed application form. [Entire Appendix C](\*)

**Existing Property Information**

- Location of property lines, dimensions and bearings and lot areas, and the source of that information.(\*)
- Location and dimensions of all easements.[4.6.05e](\*)
- Location and dimensions of all buildings.[4.6.05c](\*)
- Location of all building setback lines.[4.6.05e](\*)
- Location of electric or other utilities, both for existing and proposed subdivision property with letter of intent from utilities companies.[4.6.05f] (08/02/2012)
- High Intensity Soil Survey.[4.6.05k](9/7/93)
- Watershed areas and drainage computations.[4.6.05l](\*)
- Location, name, and widths of streets with their grades, profiles, both existing and proposed. Design criteria for proposed roads also need to be shown.[4.6.05m](\*)
- Location of fire ponds and fire protection drafting sites, if any.[4.6.05n](\*) (11/15/07)
- Access for fire fighting apparatus.[4.6.05o](\*)
- Wet areas as defined by the Wet Lands Ordinance, in square feet of wet and non-wet.[4.6.05p](\*)
- A letter stating the proposed disposal of tree stumps. If they are to be disposed of on-site, areas shall be shown on the plat.[4.6.05q](\*)
- Location of soil test pits and accompanying test pit and perc test data.[4.6.05r](\*)
- Location of Special Flood Hazard Areas (SFHA) designated by the National Flood Insurance Program (NFIP), permits received from SFHA and NFIP. Subdivisions with any development within a SFHA shall submit evidence (construction drawings, grading and land treatment plans) so as to allow determination that (i) all such proposals are consistent with the need to minimize flood damage (ii) all public utilities and facilities, such as sewer, gas, electrical, and water systems are located and constructed to minimize or eliminate flood damage and (iii) adequate drainage is provided so as to reduce exposure to flood hazards. [4.6.05s](\*) (8/21/97) (11/15/07)
- Base Flood Elevation (BFE) data for subdivisions greater than fifty (50) lots or five (5) acres, whichever is lesser. [4.6.05s](\*) (8/21/97)

- Location and size of the area considered necessary for septic leach fields and any proposed connections of alternative means for disposal of sewage. [4.6.05t](\*)
- Number of lots to be created.[4.6.05u](\*)
- Magnetic and true north point.[4.6.05v](\*)
- Eight (8) blue (black) print copies *and one printable 11"x17" electronic .pdf format* of the Final Plat.[4.6.06] (08/02/2012)
- One (1) permanent, reproducible mylar copy suitable for recording.[4.6.06]
- Name and seal of the engineer and land surveyor registered with the State of New Hampshire.[4.6.06b]
- Final disposition of land into lots, streets, open spaces, drainage courses and any easements running with the land.[4.6.06c]
- Sufficient, acceptable information to readily determine the location, bearing, and length of every street line, lot line, and property boundary line and to reproduce such lines on the ground. Dimensions shall be shown to hundredths of a foot and bearings to the nearest second. The error of closure shall not exceed 1 to 10,000.[4.6.06d]
- Stations, radii, curve data and paving widths for proposed streets. [4.6.06e]
- Lot dimensions, area in square feet and acres, street numbers for the lots as determined by the Brookline Emergency Management Director.[4.6.06f] (8/21/97) (08/02/2012)
- Location and engineering design calculations for culverts, drainage requirements and connection of alternative means to provide water supply and disposal of surface drainage.
- Location of all parcels of land to be dedicated to public use, the conditions of such dedication, and a copy of applicable deed restrictions.
- Proposed twenty-five (25) year storm drainage accompanied by a drainage analysis map and computations for the entire watershed area.[4.6.06m] (5/6/99)
- 75 foot well radii [4.6.06o] (11/19/91).
- If the subdivision abuts a State Highway, or if a proposed street intersects a State Highway, a driveway permit from the NH Department of Transportation approving said access.[4.6.06q] (8/21/97)
- Plan and profile for common driveways (Added August, 2003)
- Building Inspector review (Added June, 2003)
- Determination of off-site improvements by the Planning Board based on a special study or letter from the DPW Director. The Planning Board needs to send a letter to the Selectmen on recommendation prior to final action on the plan. (Added April, 2004)

- The Final plat shall contain a volume and page reference sufficient to indicate the subdivider's derivation of title in the event only one parent tract is involved, and if the subdivision constitutes an assemblage of several tracts, the plat shall contain a title reference of each and indicate where each of the lots shall be numbered so as to coincide with the Town of Brookline Tax Map numbers. [4.6.06r]
  
- Copies of all applicable approvals and permits [4.6.06s] (8/21/97) (08/02/2012)
 

NHWSPC	#	_____
NH Site Specific	#	_____
NH Dredge & fill	#	_____
Army Corp. Dredge & Fill	#	_____
NH DOT Curb Cut	#	_____
  
- All final permit numbers and written decisions including conditions of approval and **requirement for streetlights (at the sole cost of the developer)** noted on the final plat. [4.6.05t] [5.3.01] (8/21/97) (08/02/2012)
  
- School bus stops and areas shown on plans. The Brookline School Board should be contacted for assistance. [4.6.06p] (9/7/93)
  
- Open Space determination made.
  
- All engineer prints shall be done by a qualified, registered engineer by the State of New Hampshire and have his seal affixed to each sheet. [4.6.06u]
  
- A statement of off-site improvements requested, based on a meeting with the Selectmen. [4.6.06v]
  
- Separate, permanent, reproducible sheets (24" x 36") with three (3) prints thereof, **for each street or way within the subdivision.** Plan view and profile of the street is to be at a horizontal scale of forty (40) feet per inch and at a vertical scale of four (4) feet per inch. Profile shall also show this size, elevation, and location of existing and proposed storm drains and shall extend on hundred (100) feet into adjacent land. The plan is to show street dimensions, bearings, curve lengths, center line stationing, proposed bound location, lot numbers, radii, curve data paving widths, and the location of all existing and proposed utilities.
  
- A check payable to the Town of Brookline to cover filing fees, mailing, advertising, recording, special investigative and consulting studies, and other costs.[4.6.06w]
  
- A traffic study, if required by the Board. [4.6.06x] (5/9/89)
  
- A fiscal impact analysis, if required by the Board [4.6.06y], (5/9/89).
  
- Payment of a fee to update the Town's computerized parcel map as specified in Appendix B. [4.6.06z] (8/21/97)
  
- All necessary and/or required legal data in form and substance as approved by town Counsel prior to the approval of the final plan [4.7] (08/02/2012)
  
- Any other information felt necessary by the Planning Board to allow the Board to proceed with consideration and to make an informed decision.

## ***APPENDIX F: DRAFTING BASIN SPECIFICATIONS***

### ***BROOKLINE FIRE DEPARTMENT***

1. The pipe shall be ~~either ductile iron or a galvanized corrugated metal pipe~~, minimum 18" HDPE in diameter, with bands at each coupling. **Rip rap shall be added to weigh the pipe down. (2021)**
2. The pipe will be level from the pond to the basin with no bends in the pipe. Minimum pipe cover will be 5' to be well below the frost line.
3. The inlet pipe must be a minimum of 2' off the bottom of the water source.
4. There shall be a 2' sump below the invert of the basin pipe. The inlet pipe penetration into the draft basin shall be sealed to prevent silt infiltration.
5. The basin shall be a standard concrete manhole with a minimum 4' inside diameter and with minimum 5" reinforced concrete walls.
6. The basin will have a vertical wall from the bottom to the top at the steps location. Cast iron or aluminum steps shall be provided at maximum 12" on center, vertically, for the full height of the basin.
7. The base section will be a concrete structure having a solid bottom.
8. The top shall have a 24" diameter cast iron manhole cover and frame centered over the steps.
9. The lift of water shall not exceed 12' between the bottom of the pipe and the top of the manhole cover.
10. The manhole cover is to be flush with the ground level. A paved apron of asphalt, at least 2" thick, shall extend for 30' in front and 10' behind and to each side of the basin, and shall slope 1/4" per foot away from the cover.
11. The bollard shall be set 4' below ground level, in concrete and shall extend 3' above ground, 4' directly behind manhole cover. **The bollard shall be painted red. (6/15.00) (11/15/07) (2021)**
12. A minimum of 12" of well compacted bank run gravel with a minimum 4" top course of crushed gravel is required for the access road to the fire pond and basin. (6/15.00)
13. The vehicle pad shall be paved and of sufficient length to permit convenient access to the basin when the pumper is set at 45 degrees to the road. (11/15/07)
14. The area adjacent to the fire pond needs to have a place for a second fire truck to pump directly out of the pond.
15. All construction, backfill, and grading materials to be in accordance with proper construction practices and acceptable to the fire department.
16. The basin shall be situated for year-round, all weather access and away from traffic. The location is to be approved by the Planning Board with input from the Fire Engineers and the Town Engineer during the Subdivision or Site Plan Review Process.(6/15/00)

17. The contractor/developer shall provide a drawing of the location, design, and elevation to the fire department for approval prior to the start of any construction
18. All permits and approvals are to be accomplished by the contractor/developer at their expense, prior to the start of any construction.
19. The basin must be tested by the fire department before final acceptance.
20. The contractor/developer shall notify the fire department at least two (2) business days before construction of the fire pond or basin. (11/15/07)
21. The 50,000-gallon water source shall be completed and operational before any occupancy permits will be issued pursuant to final inspection by Fire Engineer and Town Engineer. (6/15.00)
22. The contractor/developer is responsible for maintaining access to the pond and basin until acceptance of the road by the Town. Snowplowing shall be done at the same time the road is cleared.
23. **“No Parking” sign(s) shall be installed before and after the drafting site. (2021)**

## ***APPENDIX G: CISTERN SPECIFICATIONS***

### ***BROOKLINE FIRE DEPARTMENT***

1. The Brookline Fire Department expects the design of a cistern to be trouble free and last a lifetime.
2. The minimum cistern capacity is to be 30,000 gallons.
3. The suction piping system is to be capable of delivering a minimum of 1,000 gallons per minute for three quarters of the cistern capacity. (Velocity and friction losses plus static head may not exceed 16 feet.)
4. The design of the cistern is to be submitted to the Planning Board for approval prior to construction. All plans must be signed and stamped by a professional structural engineer registered in the State of New Hampshire. (6/15.00)
5. The entire cistern is to be rated for H-20 highway loading.
6. The attached drawings are only a guide and are not to be used as the design.
7. Each cistern must be sited to the particular location by a registered professional engineer and approved by the Planning Board. (6/15.00)
8. Cast-in-place concrete is to achieve a minimum twenty-eight (28) day strength of 3,000 psi. It must be vibrated in place.
9. The concrete is to be mixed, placed, and cured without the use of calcium chloride. Winter placement and curing must follow the accepted ACI codes.
10. All suction and fill pipe are to be ASTM Schedule 40 galvanized steel **and painted red**. All vent piping is to be ASTM Schedule 40 PVC with glued joints. (2021).
11. All PVC piping is to have glued joints.
12. The final suction connection is to be 5" National Hose male thread. It must be capped with a hydrant cap with a safety chain. The safety chain shall be connected to the pipe so that the cap is not lost. (6.15.00) (11/15/07)
13. The filler pipe is to have a 4-inch Storz Coupling with a 90-degree elbow, cap and chain. The chain shall be connected to the pipe to prevent the cap from being lost. (11/15/07)
14. The entire cistern is to be completed and inspected by a town engineer before any backfilling is done. The tank may then be backfilled but not covered for a four-week leak test. (11/15/07)
15. The completed cistern **shall be subject to a financial guarantee** for 1 year from the date of acceptance by the town. This guarantee includes watertightness of the tank and all appurtenances associated with the operation of the cistern. The completed cistern will be inspected for compliance by the ~~road inspector~~ **Town Engineer** prior to the release of the maintenance bond, and a report to that effect will be submitted to the Town. (2021).
16. All backfill material shall be screened gravel with no stones larger than 1-1/2 inches and shall be compacted to 95% of maximum, ASTM 1557.

17. Bedding for the cistern shall be a minimum of 12 inches of 3/4 to 1-1/2 inch crushed, washed stone, compacted. No other fill shall be allowed under this stone.
18. The filler and vent pipes are to be 36 inches above finish grade. **Pipes shall be painted red.** (11/15/07) (2021).
19. The suction pipe connection is to be 20 - 24 inches above the level of the fire truck wheels when the cistern is in use.
20. Pipe bollards or minimum 1 cubic yard boulders are to be placed 2 feet off each side and 12 inches in front of the suction pipe for the protection of the pipe. Bollards shall be set in concrete 4 feet below ground level and shall extend 10 inches above the suction pipe. **Bollards shall be painted red** (11/15/07) (2021).
21. Suction pipe is to be supported by the top of the tank.
22. The cistern must be designed so that it will not float when empty. (6/15.00)
23. The perimeter of the tank at floor/wall joint, if not monolithic, is to be sealed a water stop. (6/15.00)
24. Backfill over tank shall be:
  - a) 4 feet of fill; or
  - b) the top and highest 2 feet of the sides of the cistern shall be insulated with a vermin resistant foam insulation, minimum 2" thick, and 2 feet of fill.
25. All backfill shall extend 10 feet beyond the edge of the cistern, then maximum 3:1 slope, loamed and seeded.
26. After backfilling, the tank is to be protected by fencing or large stones.
27. The bottom of suction pipe to pumper connection vertical distance must not exceed 14 feet.
28. Pitch of shoulder and vehicle pad from edge of pavement to pumper connection must be 1 - 6% downgrade.
29. **The apron, and any other components of the access road to the cistern, must be paved with a 2" binder base and 1" layer of top. (2021)**
30. Shoulder and vehicle pad must be of sufficient length to permit convenient access to suction connection when pumper is set at 45 degrees to road.
31. All construction, backfill, and grading materials are to be in accordance with proper construction practices and acceptable to the Planning Board in accordance with the approved design. (6/15.00)
32. All horizontal suction piping must slope slightly uphill (1 - 3%) towards the pumper connection.
33. **Before the cistern is filled with water, the interior must be inspected by the Fire Chief or Fire Inspector. (2021).**
34. Installer is responsible for completely filling cistern until accepted by the Fire Department. This includes refilling after each flow test until acceptance.

35. Two (2) “No Parking – Fire Lane” signs must be installed. The placement of these signs will be one at either side of the cistern easement. (11/15/07)

## ***APPENDIX H: RESIDENTIAL SPRINKLER SYSTEM REQUIREMENTS***

### ***BROOKLINE FIRE DEPARTMENT***

- 1. Requirements for approval to install:**
  - A. Submit drawings showing pipe sizes, lengths, and type of pipe used.
  - B. Submit a cut sheet and performance graph for the pump.
  - C. Submit sprinkler head cut sheets.
  - D. Submit pressure switch cut sheets.
  - E. Documentation of type and concentration of antifreeze solution used.
  - F. Submit 1 and 2 sprinkler head operating calculations.
  - G. Submit details of the tank size.
  - H. Provide a description of the tank type.
  - I. An electric bell Number 2N (sprinkler system shall have an external electric bell that will activate when the pump is running). (2021)**
  - J. The pump shall make the detectors go off if it turns on Number 2 O (sprinkler system shall be interconnected with the fire alarm system). (2021).**
  
- 2. Additional requirements for inspection approval:**
  - A. An attached garage shall be sprinkled.
  - B. The attic shall be sprinkled if utilities are present.
  - C. The pump shall have 10 PSI between off and on.
  - D. Closets shall NOT have sidewall heads.
  - E. Sprinkler heads shall be located from all heat sources per table 3-5,2.3 of NFPA 13-D.
  - F. The Tank shall have a level indicator.
  - G. A manual fill line shall be provided.
  - H. A vent for the tank shall be provided.
  - I. All sprinkler control valves should be locked-open.
  - J. A lock to the pump circuit breakers shall be installed.
  - K. A lock shall be provided to any pump power switches.
  - L. All wiring from the pump to the electric breaker panel shall be in metal conduit.
  - M. All bathrooms shall be sprinkled.
  
- 3. Inspections:**
  - A. Pipe rough in. (if additional fittings or major changes are made from the approved Drawings, a new calculation sheet shall be required.)
  - B. Inspection fee. (2021)**
  - C. Final Inspection and function test.

The Fire Department must be notified at least five (5) working days in advance for approvals and inspections. (11/15/07)

## **APPENDIX I: IMPACT FEE SCHEDULE**

The Planning Board may modify the following fee schedules from time to time, after public hearing, when data becomes available indicating that the variables used in the impact fee schedule calculations have changed or are no longer in effect.

### **A. Impact Fee Schedule – Captain Samuel Douglas Academy**

\*Article I, March 6, 1999 Brookline School District Annual Meeting

**I. Variables.** Variables may be re-assessed by the Planning Board on an annual basis, or periodically as better information becomes available, after public hearing. The following is a residential impact fee.

1.	Total Project Cost (principal and interest)	\$8,793,563.98
2.	Principal only	\$5,367,912.00
3.	State of NH reimbursement for capital projects (30% of principal)	\$1,610,373.60
4.	Net Debt (# 1 - # 3)	\$7,183,190.30
5.	Current Enrollment (2003-2004)	198
6.	Total Capacity	300
7.	Future demand capacity (#6 - #5)	102
8.	Cost per student (based on total students: #4 / #6)	\$23,943.97
9.	<b>Total Impact Future Demand (#8 x #7)</b>	\$2,442,284.94
10.	CSDA students per housing unit	.12
11.	<b>Impact Fee per Housing Unit (#10 x #8)</b>	<b>\$2,873.28</b>

**II. Credits.** Credits are estimated in order to factor out the amount in taxes a unit subject to an impact fee is likely to pay for the portion of project cost that is likely to be financed through impact fees. The Planning Board may adjust the calculation of credits on an annual basis if changes are made to the variables located above in section I.

1.	Total assessed valuation of Brookline, 2003:	\$406,476,988
2.	Total residential buildings and land, 2003:	\$386,508,200
3.	Average residential assessment (#2 / 1,478 housing units)	\$261,507.58
4.	Total impact future demand (#9 above / total assessed valuation)	.0060
5.	Credit per Housing Unit (#4 x #3)	\$1,569.04

**III. Calculation of Fee.** The Planning Board may adjust the calculation of credits on an annual basis if changes are made to the variables located above in section I and resulting changes to section II.

1.	Impact Fee per Housing Unit	\$2,873.28
2.	Credit per Housing Unit	\$1,569.04
3.	<b>Net Fee per Housing Unit (Includes all new housing units)</b>	<b>\$1,304.24</b>

**IV. Number of Permits to be Issued.** When the impact fee is established, a tally of the number of impact fees that have been paid shall be recorded. The impact fee will automatically be terminated when the total number of permits issued, as herein described, has been reached. The Planning Board may adjust the total number of permits to be issued on an annual basis or when better information becomes available, if changes are made to the variables located in section I.

1.	Average number of units built in Town each year:	40
2.	Number of housing units to be assessed impact fee: 102 future students / .12 CSDA students per unit =	850
3.	Subtract out the number of building permits that have been issued since the school became operational in 1998-1999: 850 – 223 =	<b>627</b>
4.	The total amount to be collected through impact fees: 627 units x \$1,304.24 =	<b>\$817,758.48</b>
5.	The CSDA impact fee will sunset when <b>627</b> building permits have been issued.	

**V. Other exemptions.** In addition to the types of development excluded from a residential impact fee in the zoning ordinance, the following conditions and circumstances shall be precluded from the payment of a CSDA impact fee and shall not be included in the number of permits to be issued:

Elderly housing units developed under the Housing for Older Persons section of the Brookline Zoning Ordinance.

This impact fee shall become effective on January 1, 2004.

## B. Impact Fee Schedule – New Ambulance Facility

\* Article 3, March 13, 2003 (Continuation) Brookline Town Meeting

**I. Variables.** Variables may be re-assessed by the Planning Board on an annual basis, or periodically as better information becomes available, after public hearing. The following is a residential impact fee.

### Assumptions:

- The current ambulance facility is 3,011 sq.ft., the new facility will be 5,426.5 sq.ft.
- It is assumed that this increase in space will accommodate the Town's population through the life of the bond (*20 year bond*) Since the number of housing units in 20 years is estimated at 2,358 (1,478 in 2003 plus 880 (20 years x 44 units per year), and since the size of the planned facility is 5,426.5 sq.ft., it can be assumed that the amount of ambulance space needed per housing units is 2.30 sq.ft. (facility sq.ft. / future number of housing units).

1.	Total amount of ambulance space needed to accommodate the current number of housing units (1,478 units x 2.30 sq.ft.) =	3,399.40 sq.ft.
2.	Amount of the new facility to accommodate new growth: 3,399.40 sq.ft. / 5,426.5 sq.ft. = .626 1.00 (entire demand) - .626 (proportion existing demand) = .374 or	37.4%
3.	Total project cost:	\$1,392,500.00
4.	Project cost attributable to new development (#3 x #2)	\$520,795.00
5.	Approx. 85.7% of all ambulance calls are attributable to residences. Therefore the <b>total impact future demand</b> = #4 x 85.7% =	\$446,321.32
6.	Impact fee per unit (#5 / 880 future units) =	<b>\$507.18</b>

**II. Credits.** Credits are estimated in order to factor out the amount in taxes a unit subject to an impact fee is likely to pay for the portion of project cost that is likely to be financed through impact fees. The Planning Board may adjust the calculation of credits on an annual basis if changes are made to the variables located above in section I.

1.	Total assessed valuation of Brookline, 2003:	\$406,476,988
2.	Total residential buildings and land, 2003:	\$386,508,200
3.	Average residential assessment (#2 / 1,478 housing units)	\$261,507.58
4.	Total impact future demand (#5 above / total assessed valuation)	.00109
5.	Credit per Housing Unit (#4 x #3)	<b>\$ 285.04</b>

**III. Calculation of Fee.** The Planning Board may adjust the calculation of credits on an annual basis if changes are made to the variables located above in section I and resulting changes to section II.

1.	Impact Fee per Housing Unit	\$507.18
2.	Credit per Housing Unit	\$285.04
3.	<b>Net Fee per Housing Unit (Includes all new housing units)</b>	<b>\$222.14</b>

**IV. Number of Permits to be Issued.** When the impact fee is established, a tally of the number of impact fees that have been paid shall be recorded. The impact fee will automatically be terminated when the total number of permits issued, as herein described, has been reached. The Planning Board may adjust the total number of permits to be issued on an annual basis or when better information becomes available, if changes are made to the variables located in section I.

1.	Impact Fee per housing unit	\$222.14
2.	Life of the bond	20 years
3.	880 new housing units to be built over the life of the facility and to be charged ambulance impact fee.	
4.	The total amount to be collected through impact fees: 880 units x \$222.14 =	<b>\$195,483.20</b>
5.	The ambulance facility impact fee will sunset when <b>880</b> building permits have been issued from 2/01/04.	

**V. Other exemptions.** In addition to the types of development excluded from a residential impact fee in the zoning ordinance, the following conditions and circumstances shall be precluded from the payment of an ambulance facility impact fee and shall not be included in the number of permits to be issued:

Commercial and Industrial.

This impact fee shall become effective on January 1, 2004.

**C. Residential Impact Fee Schedule - H/B Cooperative Middle School Renovation/Expansion\*  
(Brookline Portion)**

\* Article 4, March 3-4, 2004 Hollis Brookline Cooperative School District Annual Meeting

**I. VARIABLES:** Annual or periodic review is necessary by the Planning Board as updated or better information becomes available. A public hearing is required to amend this fee schedule. A change in methodology requires a zoning amendment at Town meeting.

1	Total Project Cost (Gross Debt) (Principal and Interest)	\$12,349,166.09
2	Project Cost (Principal Only)	\$7,900,000.00
3	State of NH reimbursement for capital projects (40% of principal)	\$3,160,000.00
4	Net Project Cost (Net Debt) (#1 - #3)	\$9,189,166.09
5	Brookline's share of Net Debt is 36%	\$3,308,099.79
6	Current Brookline Enrollment - grades 7 & 8 (2004-2005)	182
7	Total HBMS (classroom) Capacity (Brookline and Hollis)	550
8	Brookline average proportion of students at HBMS (38.7%)	0.387
9	Brookline's future total capacity (38.7% of 550) - Per apportionment	213
10	Brookline's future demand capacity (#9 - #6)	31
11	Cost per student (Brookline) (#5 / #9)	\$15,530.98
12	Total Impact Future Demand (Brookline) (#10 x #11)	\$481,460.53
13	HBMS students per housing unit (Brookline)	0.139
14	<b>IMPACT FEE per HOUSING UNIT (#13 x #11)</b>	<b>\$2,155.11</b>

**II. CREDITS:** A credit provided for estimated taxes likely to be paid per housing unit (Brookline) for the portion of the HBMS expansion likely to be paid for by Impact Fees. The Planning Board may adjust the calculation of credits on an annual basis or periodically concurrent with changes made to the variables located above in Section I.

1	Total assessed valuation of Brookline (2004)	\$414,965,696.00
2	Total assessed value of residential buildings and land (2004)	\$412,302,729.00
3	Average residential assessment (#2 / 1,535 housing units) <i>Source: 12/18/03 Growth Mgmt. Building Inspectors Report through 2004</i>	\$268,601.13
4	TOTAL IMPACT FUTURE DEMAND (#12 (sec. I) / #1 (sec. II))	0.0012
5	<b>CREDIT per HOUSING UNIT (#4 x #3)</b>	<b>\$311.64</b>

**III. CALCULATION of FEE:** The Planning Board may adjust the calculation of the Net Impact Fee on an annual basis or periodically concurrent with changes made to variables located in Section I and Section II above.

1	Impact Fee per Housing Unit	\$2,155.11
2	Credit per Housing Unit	\$311.64
3	<b>NET IMPACT FEE per Housing Unit (Includes all new housing units)</b>	<b>\$1,843.47</b>

**IV. NUMBER of PERMITS to be ISSUED:** As of the effective date noted below, there shall be a record kept of all building permits issued for new housing units assessed an impact fee under the Hollis Brookline Cooperative Middle School Renovation. The impact fee shall automatically expire when the number of housing units to be assessed an impact fee in Section IV, 5 has been reached. The Planning Board may adjust the total number of permits on an annual basis or periodically as better information becomes available concurrent with changes made to the variables located above in Section I.

1	Average number of housing units built in Town each year ( 1994-2004) <i>Source:</i> <i>Building Inspectors Report</i>	44
2	Number of housing units to be assessed impact fee: 31 future students/.139 HBMS students per housing unit (Sec. I. #10/Sec. I. #13) =	223
3	Deduct the number of building permits issued for housing units since the renovation/expansion was completed.	0
4	The total amount to be collected through the HBMS impact fee: housing units(#2 - #3) x \$1,843.47 (Sec. III. #3) =	\$411,838.48
5	The HBMS impact fee will sunset when 223 building permits for housing units have been issued. (#2 - #3)	<b>223</b>

**V. OTHER EXEMPTIONS:** In addition to the types of development excluded from a residential impact fee, the following shall be exempt from payment of the Hollis Brookline Cooperative Middle School Renovation impact fee and shall not be included in the number of housing units to be assessed an impact fee in Section IV, 5.

1	Elderly housing units under Brookline's Housing for Older Persons zoning ordinance	
---	--	--

**This Impact Fee shall become effective on: August 4, 2005**

#2101-26-1

## D. Impact Fee Schedule – New Police Station

Article # 3, March 14, 2012 Brookline Town Meeting

**I. Variables.** Variables may be re-assessed by the Planning Board on an annual basis, or periodically as better information becomes available, after public hearing. The following is a residential impact fee.

### Assumptions:

- The current police station is 1,570 sq.ft. The new facility will be 6,050 sq.ft.
- It is assumed that this increase in space will accommodate the Town's population through the life of the bond (*20 year bond*). Since the number of housing units in 20 years is estimated at 2,288 (1,688 in 2012 plus 600 (20 years x 30 units per year\*)), and since the size of the planned facility is 6,050 sq.ft. it can be assumed that the amount of police space needed per housing units is 2.64 sq.ft. (New facility sq.ft. / Future number of housing units).

1.	Total amount of police station space needed to accommodate the current number of housing units (1,688 units x 2.64 sq.ft.) =	4,456.32 sq.ft.
2.	Amount of the new facility to accommodate new growth: 4456.32 sq.ft. / 6050.00 sq.ft. = .737 1.00 (entire demand) - .737 (proportion existing demand) = .263 or	26.3 %
3.	Total project cost:	\$1,390,000.00
4.	Project cost attributable to new development (#3 x #2)	\$365,570.00
5.	Approx. 82% of all police calls are attributable to residences. Therefore the <b>total impact future demand</b> = #4 x 82% =	\$299,767.40
6.	Impact fee per unit (#5 / 600 future units) =	<b>\$499.61</b>

**II. Credits.** Credits are estimated in order to factor out the amount in taxes a unit subject to an impact fee is likely to pay for the portion of project cost that is likely to be financed through impact fees. The Planning Board may adjust the calculation of credits on an annual basis if changes are made to the variables located above in section I.

1.	Total assessed valuation of Brookline, **	\$591,633,209.00
2.	Total residential buildings and land ***	\$508,980,400.00
3.	Average residential assessment (#2 / 1,688 housing units)	\$301,528.67
4.	Total impact future demand (#5 above / total assessed valuation)	.00051
5.	Credit per Housing Unit (#4 x #3)	<b>\$ 153.78</b>

**III. Calculation of Fee.** The Planning Board may adjust the calculation of credits on an annual basis if changes are made to the variables located above in section I and resulting changes to section II.

1.	Impact Fee per Housing Unit	\$499.61
2.	Credit per Housing Unit	\$153.78
3.	<b>Net Fee per Housing Unit (Includes <u>all</u> new housing units)</b>	<b>\$345.83</b>

**IV. Number of Permits to be Issued.** When the impact fee is established, a tally of the number of impact fees that have been paid shall be recorded. The impact fee will automatically be terminated when the total number of permits issued, as herein described, has been reached. The Planning Board may adjust the total number of permits to be issued on an annual basis or when better information becomes available, if changes are made to the variables located in section I.

1.	Impact Fee per housing unit	\$345.83
2.	Life of the bond	20 years
3.	600 new housing units to be built over the life of the facility and to be charged police impact fee.	
4.	The total amount to be collected through impact fees: 600 units x \$345.83 =	<b>\$207,498.00</b>
5.	The New Police Station impact fee will sunset when 600 building permits have been issued from March 01, 2013.	

**V. Other exemptions.** In addition to the types of development excluded from a residential impact fee in the zoning ordinance, the following conditions and circumstances shall be precluded from the payment of a Police Department facility impact fee and shall not be included in the number of permits to be issued:

***Commercial and Industrial***

This impact fee shall become effective on **March 01, 2013**.

Amended February 21, 2013.

- \* Average number of building permits issued over past 10 years (Jan. 2002 – Dec. 2011)
- \*\* As of April 01, 2012 (Summary Inventory of Valuation, Form MS-1)
- \*\*\* As of April 01, 2012 (Assessors’ Office – Parcel Count)

**100.00     *PREAMBLE***

In pursuance of authority conferred by New Hampshire Revised Statutes Annotated Chapter 674:16 through Chapter 674:34 inclusive as amended and for the purpose of promoting the health, safety, morals, and general welfare of the inhabitants of the incorporated Town of Brookline, New Hampshire, by securing safety from fire, panic, and other dangers, providing adequate areas between buildings and various rights-of-way, by preserving the rural charm of the town, preventing the overcrowding of land, avoiding undue concentration of population, facilitating the adequate provisions for transportation, water, sewage, schools, parks, and other public requirements, and by other means in accordance with a comprehensive plan, the following ordinance is hereby adopted by the voters of the Town of Brookline, New Hampshire, in official Town meeting convened.

## **200.00 DEFINITIONS**

Accessory Building. A subordinate building located on the same lot with the main building or use, the use of which is customarily incidental to that of the main building or to the use of the land.

Accessory Dwelling Unit (ADU). A secondary dwelling unit which is accessory and subordinate to a permitted principal single family dwelling unit or to an accessory building.

Accessory Use. A use customarily incidental to that of the main building or to the use of the land, not including the exterior storage of junk, dismantled or abandoned cars, or any other storage detrimental to health, safety, or general welfare.

Adult Sexually Oriented Business. A business where one of its purposes is for the display and sale of sexually explicit goods and services including, but not limited to sexually explicit books, videos, movies, computer software, or other visual or audio representations, including ones which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 571-B:1; or instruments, devices, or paraphernalia which are designed or used in connection with “sexual conduct” as set forth in RSA 571-B:1, other than birth control devices. Examples of adult sexually oriented business uses include, but are not limited to places where a regular and substantial course of business operation involves the sale and display of sexually explicit goods and services such as: adult motels and theaters where sexually explicit films or videos are shown; places with mini-motion picture or coin operated displays; motels and theaters where sexually explicit films or videos are shown; adult cabaret; nude modeling studios; adult bookstores; escort agencies; or sexual encounter centers.

Alteration. Any change or modification to a building which modifies the structural plan, manner of construction, or the kind of material used, or in any way varies the character or its use.

Attached. Joined or connected.

Apartment Building. A building intended to be occupied by three or more families living independently of each other.

Back Lots. Lots which have less than the minimum frontage requirement but which meet lot size and setback requirements and can be serviced by a private driveway leading to a public road.

Buildable Area. An area capable to accommodate a house site (or commercial structure if so planned) and all required utilities such as water supply and wastewater disposal. The buildable area is the area of a lot excluding wetlands, land with slopes over twenty-five (25) percent, water bodies, regulatory floodways, setback requirements and land restricted from development by easements, covenants or other legal restrictions. The buildable area is intended to ensure that the lot is capable of meeting all Town of Brookline zoning requirements.

Camp. A building of such a nature that it may only be used for recreational and dwelling purposes during seasonal parts of the year.

Dwelling. A structure that is designed or used as a place of residence for one or more families.

Dwelling Unit. A single unit providing complete independent living facilities for one or more persons with permanent provisions for living, sleeping, eating, cooking and sanitation.

Elderly. For the purposes of this Ordinance shall mean that portion of the population 65 years and older.

Family. One or more persons related by blood, marriage, legal adoption or those placed in the home for adoption, and foster children, or a group of not more than five persons (excluding no more than two servants) not related by blood or marriage, living together as a single non-profit housekeeping unit.

Farm. Land on which farming takes place.

Farm Stand. A structure for the seasonal sale of agricultural, horticultural or silvicultural products.

Farming. This term shall have the same meaning as that set forth in RSA 21:34-a, as that term is from time to time amended. The definition of this term as of the date of the passage of this Ordinance is set forth as follows: Any land or buildings or structures on or in which agriculture and farming operations are carried on and shall include the residence or residences of owners, occupants, or employees located on such land. Farming shall mean all operations of a farm such as the cultivation, conserving, and tillage of the soil, dairying, greenhouse operations, the production, cultivation, growing and harvesting of any agricultural, floricultural, sod or horticultural commodities, the raising of livestock, bees, fur-bearing animals, fresh water fish or poultry, or any practices on the farm as an incident to or in conjunction with such farming operations including, but not necessarily restricted to, the following: preparation for market, delivery to storage or to market, or to carriers for transportation to market, of any products or materials from the farm; the transportation to the farm of supplies and materials; the transportation of farm workers; forestry or lumbering operations; the marketing or selling at wholesale or retail or in any other manner any products from the farm and of other supplies that do not exceed in average yearly dollar volume the value of products from such farm.

Floor Area. The gross horizontal area of a floor of the building excluding areas used for accessory garage purpose and basement areas. All horizontal dimensions shall be taken from the exterior faces of walls, including walls or other enclosures.

Forestry. The science of silviculture and the practice and art of managing and using for human benefit forestlands and the natural resources that occur in association with forestlands, including trees, other plants, animals, soil, water, and related air and climate. Forestry is exempt from site plan review if no off-site products are for sale, or if there is no change or expansion of use.

Free Standing Sign. A sign supported by one or more upright poles, columns, or braces placed in or on the ground and not attached to any building or structure.

Front Yard. A yard extending across the full width of the lot and lying between the front line of the lot and the nearest line of the principal building.

Frontage. That continuous portion of a lot line bordering on a highway, street, or right-of-way of class five or better.

Funeral Home. A building or part thereof used for the preparation of the deceased for burial and the display of the deceased and rituals connected therewith before burial or cremation. Such building may contain space and facilities for embalming and the performance of other services used in preparation of the deceased for burial; the performance of autopsies and other surgical procedures; the storage of caskets, funeral urns, and other related funeral supplies; and the storage of funeral vehicles, but shall not include facilities for cremation. Where a funeral home is permitted, a funeral chapel shall also be permitted.

Home Business. A small-scale business operated within a residence and/or accessory structure whose primary commercial activity takes place at the location of the residence and/or the accessory structure *or* a business in which employees, other than employees who are residents of the home, are required to be on the property in a work related capacity. The business must be incidental and subordinate to the use of the lot for residential purposes and not detract from the residential character of the lot. All home businesses must comply with the criteria set forth in Section 1702.00 through Section 1706.

Junk. Unregistered motor vehicles no longer intended or in condition for legal use on the public highways; used parts of motor vehicles or old or used iron, metal, glass, paper, cordage, plastic, rubber, cotton, or woolen wastes or discarded or second-hand material which has been a part or intended to be a part of any motor vehicle; or any

machinery, scrap metal or other worn out, cast off, or discarded articles or materials ready for destruction or collected or stored for salvage or conversion to some use. Any article or material which unaltered or unchanged and without further reconditioning can be used for its original purpose as readily as when new, shall not be considered as junk. Farm trucks, tractors, and machinery are excluded from the above definition.

Junkyard. Any business and any place of storage or deposit, whether in connection with another business or not, which has stored or deposited 2 or more unregistered motor vehicles which are no longer intended or in condition for legal use on the public highways, or used parts of motor vehicles or old iron, metal, glass, paper, cordage, or other waste, or discarded or secondhand material which has been a part, or intended to be a part, of any motor vehicle, the sum of which parts or material shall be equal to 2 or more motor vehicles. Junk yard shall also include any place of business or storage or deposit of motor vehicles purchased for the purpose of dismantling the vehicles for parts or for use of the metal for scrap and where it is intended to burn material which are parts of a motor vehicle or cut up the parts thereof. This definition includes garbage dumps and sanitary landfills. This definition does not include any motor vehicle dealers registered with the director of motor vehicles under RSA 261:104 and controlled under RSA 236:126.

Lot. A lot is a registered or recorded parcel of land, occupied or capable of being occupied by one building or use and the building or uses accessory thereto, including such open spaces and yards as are required by this Ordinance. A lot may or may not be the land shown or described as a lot on the recorded deed or plan.

Lot Line. The established division line between lots or between a lot and a street.

Manufactured Housing. This term shall have the same meaning as that set forth in RSA 674:31, as that term is from time to time amended. The definition of this term as of the date of the passage of this Ordinance is set forth as follows: Any structure, transportable in one or more sections, which, in the traveling mode, is 8 body feet or more in width and 40 body feet or more in length, or when erected on site, is 320 square feet or more, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to required utilities, which include plumbing, heating and electrical heating systems contained therein.

Motel. A building or buildings containing units consisting of a room or a suite of rooms; each unit having a separate exterior entrance, to be offered as sleeping accommodations for transient guests for compensation, and where a general kitchen and dining room may be provided within the central building or in an accessory building.

Nonconforming Lot. A lot which does not conform to the frontage or area requirements of the district in which it is located.

#### Nonconformities

Nonconforming Structure. A structure that legally existed prior to the adoption of the Ordinance and does not conform to the current ordinance requirements for the district in which it is located.

Nonconforming Use. A non-conforming use is the use of any building or land lawfully occupied at the time of the passage of this Ordinance which does not conform to the regulations of the district in which it is located.

Personal Services. Establishments primarily engaged in providing services involving the care of a person or his or her personal goods or apparel, such as beauty shops, dry cleaners and domestic services.

Public Right-of-Way. All town, state, and federal highways and roads and the land on either side of the same as covered by statutes to determine the widths of rights-of-ways.

Rear Yard. A yard extending across the full width of the lot and lying between the rear lot line of the lot and the nearest line of the principal building.

Regulatory Floodway. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

Restaurant. An establishment in which food and drink are prepared, served and consumed primarily within the principal building.

Setback. The minimum horizontal distance between the street or way line and the line of the building.

Side Yard. A yard extending between the side lot line of the lot and the nearest line of the principal building and then extending from the front yard to the rear yard.

Sign. Any device visible from a public place that displays either commercial or noncommercial messages by means of graphic presentation of alphabetic or pictorial symbols or representations. Noncommercial flags or any flags displayed from flagpoles or staffs will not be considered to be signs.

Sign, Abandoned. Any sign that does not display a well-maintained message for a consecutive 120-day period – A sign the owner of which cannot be located after reasonable efforts have been made – A sign no longer fully supported, by the structure designed to support the sign, for a consecutive 120-day period – Any sign no longer advertising bona fide business and/or products sold.

Sign, Alteration. Any change or modification to a sign which modifies the structural plan, manner of construction or the kind of material used, or in any way varies the character or its use.

Sign, Animated. Any sign which includes action or motion, such as changing electronic sign or electronic message center. Also see “Moving, Blinking, flashing and rotating signs”

Sign, Area. The space, on the largest single face of a sign, within and including a perimeter which forms the outside shape of a sign.

Sign, Awning. A sign painted on or attached flat or flush against the surface of the awning, but not extending above, below or beyond the awning or attached to the underside. The copy area on awnings is computed as all or portion of the allowed wall sign area.

Sign, Background Area. The total area of a sign face on which copy could be placed, often referenced to in connection with wall signs.

Sign, Banner. A temporary sign of lightweight material (paper, plastic or fabric) hung either with or without frames. Flags and insignias containing markings or any government, corporation or business are not considered banners, and are defined as flags. Banner signs are regulated as “Long-Term Temporary Signs” for the purpose of this ordinance.

Sign, Billboard. See “Sign, Off-Premises”

Sign, Blinking. See “Sign, Flashing”

Sign, Canopy or Marquee. Any sign attached to or part of a canopy or marquee. The copy area on such signs is computed as all or a portion of the allowed wall sign area.

Sign, Changeable (manual). A sign that is designed so that the message, characters, letters or illustrations can be manually (as opposed to electronically) changed or rearranged without altering the face or the surface of the sign. A sign permit is required for the initial establishment of the sign. (Also, see “Changing Sign (electronic)”, “Electronic Message Center”, “Temporary Sign” and “Portable Sign”.

Sign, Changing (electronic). A sign that is either electronically or electrically controlled to illustrate different copy changes on the same sign. This sign's message may be changed by electronic switching or automatic switching of lamps or alteration in the level of illumination or other illumination source to form words, letters, designs, figures, numerals and pictures often through the apparent vertical or horizontal movement of light. Such signs shall not include a flashing light source. In the case of a changing sign (electronic), flashing shall be defined as an interval of illumination less than five (5) minutes in duration; provided, however, that time and temperature text shall be maintained for a period of fixed illumination of not less than five (5) seconds in duration. A changing sign includes, without limitation, time, temperature, date and message centers or reader boards, indexing signs, and those known as electronic message centers (Also, see "Flashing Sign").

Sign, Copy. Those letters, numerals, figures, symbols, logos and graphic elements comprising the content or message of a sign, excluding numerals identifying a street address only.

Sign, Directional. Any sign that is designed and erected for the purpose of providing direction and/or orientation for pedestrian or vehicular traffic.

Sign, Electronic Message Board or Center. An electrically activated changeable sign whose variable message capability can be electronically programmed (Also, see "Changing Sign (electronic)").

Sign, Fascia. See "Sign, Wall".

Sign, Flashing. A flashing sign contains an intermittent light source or includes the illusion of intermittent light by means of animation or an externally mounted intermittent light source. Flashing signs are prohibited in all zoning districts in the town (See section 1604.09).

Sign, Free Standing. See "Sign, Monument".

Sign, Government. Sign authorized by the Town of Brookline, another governmental agency, the State of New Hampshire, or the federal government such as directional, warning, or information signs.

Sign, Ground. A sign supported by one or more uprights, poles, pylons, or foundation elements in or upon the ground and not attached to a building.

Sign, Illuminated. A sign characterized by the use of artificial light, either projecting through its surface(s) (internally illuminated); or reflecting off its surface(s) (externally illuminated).

Sign, Long-Term Temporary (LTT). Any sign established for a temporary period of not more than six (6) months.

Sign, Marquee. See "Sign, Canopy".

Sign, Monument. A sign established on a freestanding frame, mast or pole and not attached to any building. Where such signs are established back to back the larger face shall be calculated for the purposes of determining allowable area. Also known as detached sign, freestanding sign, pole sign, ground sign and pylon sign.

Sign, Moving. Characterized by repetitive motions and/or rotation activated by a mechanical system powered by electric motors or other mechanically induced means. Also animated signs or devices motivated by wind, thermal changes or other natural environmental input. Includes spinners, pinwheels, pennant strings, and/or other devices or displays that respond to naturally occurring external motivation. Moving signs are prohibited in all zoning districts in the town (See section 1604.09).

Sign, Off-Premise. Any sign visible from a public right-of-way identifying or advertising a business, person, activities, goods, products or services not located on the premises where the sign is installed and maintained.

Sign, On-Premises. Any sign visible from a public right-of-way identifying or advertising a business, person, activity, goods, products or services located on the premises where the sign is installed and maintained.

Sign, Permanent. A permanent sign is any sign established for a period of greater than six (6) months.

Sign, Portable. A sign that is not permanently affixed to a building, other unmovable structure, or the ground.

Sign, Roof. A sign mounted on, and supported by, the main roof portion of a building, or above the uppermost edge of a parapet wall of a building and which is wholly or partially supported by such a building. Signs mounted on mansards facades, pent eaves and architectural projections such as canopies or marquees shall not be considered to be roof signs.

Sign, Rotating. See “Sign, Moving”

Sign, Short-Term Temporary (STT). Any sign which is established for no more than fourteen (14) calendar days.

Sign Structure. Any structure supporting a sign.

Sign, Temporary. A sign intended for use for a limited period of time (See Sign, Long-Term and Sign, Short-Term)

Sign, Time and Temperature. A Sign which typically refers to the current time and temperature only.

Sign, Wall. Any external sign which is painted on, incorporated into, or affixed to the wall or roof of a building.

Sign, Window. A sign affixed to the surface of a window with its message intended to be visible to and readable from the public way or from adjacent property.

Structure. Anything constructed that is of necessity attached directly or indirectly to the ground.

Subdivision Sign. A sign intended to identify the name of a residential subdivision.

Temporary Sign. A sign intended for use for a limited period of time.

Tourist Home. A dwelling in which accommodations are provided or offered for transient guests for compensation.

Tourist or Motor Courts. Two or more overnight cabins operated as part of a single business.

Two Dwelling Unit Dwelling. A dwelling occupied by two families with two separate housekeeping units.

**300.00 GENERAL PROVISIONS**

**301.00** No junk yard or place for the storage of discarded machinery, vehicles, glass, paper, cordage, garbage, refuse, or other waste or discarded materials shall be maintained in the Town, exclusive of the area known as the Town Dump.

**302.00** No owner or occupant of the land shall permit fire or other ruins to be left, but shall remove same to ground level within one year.

**303.00 Sanitary Protection**

**303.01** No waste waters or sewage shall be permitted to run free into a public water body or be discharged in any way that may be offensive or detrimental to health.

**303.02** All dwellings and sanitary systems should be constructed and maintained in accordance with standards set and enforced by the New Hampshire Water Supply and Pollution Control Commission.

**304.00** Within the Regulatory Floodway, any development or encroachment (including fill) which would result in any increase in flood levels during the base flood discharge is prohibited.

**305.00** No subsurface storage of petroleum or related products (including gasoline) and the subsurface transmission of petroleum or related products through pipelines shall be allowed within Town, with the following exceptions: 1) Propane or liquefied natural gas; 2) Storage tanks not in excess of 1,100 gallons. Storage tanks in excess of 1,100 gallons must comply with the New Hampshire Water Supply and Pollution Control Division's Code of Administrative Rules Part Ws 411, Control of Nonresidential Underground Storage and Handling of Oil and Petroleum Liquids.

**306.00** For the purpose of this part, "development" is defined to mean "any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations."

**307.00** **Building Permits** – The State of New Hampshire Building Code pursuant to RSA 155-A including adopted Appendix Chapters and amendments, shall govern and regulate the construction, alteration, movement, enlargement, replacement, repair, equipment, location, removal and demolition of all dwelling units and all commercial and industrial buildings in the Town of Brookline, said Codes also provide for the issuance of permits and collection of fees. Accessory Buildings of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements.

**400.00**     ***DISTRICTS***

For the purpose of this Ordinance the entire Town of Brookline shall be divided into two districts which shall be called:

- A. Industrial-Commercial District
- B. Residential-Agricultural District

These two districts may also include areas designated Regulatory Floodway as delineated on the Flood Insurance Maps of the Town of Brookline dated May 19, 1987, as prepared by the Federal Emergency Management Agency - Federal Insurance Administration, or as amended.

Other overlay zones include the Wetlands Conservation District and the Aquifer Protection District.

ZONING DISTRICTS**

Town of  
**BROOKLINE**  
ZONING MAP

**KEY**

-  INDUSTRIAL/COMMERCIAL
-  RESIDENTIAL/AGRICULTURAL

The districts shown on this map are approximate. Please refer to the Brookline Zoning Ordinance for exact boundaries.

Zoning prepared by NRPC  
Amended by NRPC - Date Printed: 4-8-97.

**500.00 INDUSTRIAL-COMMERCIAL DISTRICT**

**501.00 Location**

The Industrial-Commercial District shall be:

- a. bounded by NH Route 13 to the east; the portion of all lots (excluding lots J-41 and J-41-1) within 500 feet of NH Route 13, between the Massachusetts State Line and northern boundary of lot J-20; and lot J-19.
- b. bounded by NH Route 13 to the east; Lot G-27; the portion of lot G-52 east of the old tract line (approximately 528 feet west of lot G-27); lot G-52-2; G-59; lot G-52-1; the portion of lot G-53 within 500 feet of NH Route 13, lot G-55; lot G-53-1; and lot G-54.
- c. the area within 500 feet of NH Route 13 from a point 500 feet south of Route 130 North to North Mason Rd. on both sides of NH Route 13; and lot C-42.
- d. Lots K-76, K-77.
- e. the area within 500 feet east of NH Route 13 from Bond St. south to South Main St., then following South Main St. to the southern boundary of Lot H-23-1.
- f. Lot G-20.
- g. Lots K-81 and K-75.
- h. A portion of Tax Map Parcel A-6 of approximately 35 acres, located within the following boundaries:

Beginning at a point on the northerly side of the North Mason Road, said point being 800 feet easterly of the centerline intersection of North Mason Road and Ben Farnsworth Road; thence by said northerly sideline of said North Mason Road

  1. Easterly 250 feet to a point; thence through said Tax Map Parcel A-6
  2. Northerly perpendicular to the Brookline/Milford Town Line to a point on said Town Line; thence by said Town Line
  3. Westerly to a point, said point being 200 feet easterly of and perpendicular to the easterly sideline of Spaulding Brook Road; thence by a line 200 feet easterly from and parallel to said easterly sideline of Spaulding Brook Road
  4. Southwesterly and Southeasterly to a point that is 200 feet northerly of and perpendicular to said northerly sideline of North Mason Road; thence by a line that is 200 feet northerly from and parallel to said northerly sideline of North Mason Road
  5. Easterly to a point that is directly opposite and perpendicular to the point of beginning; thence
  6. Southerly 200 feet to the point of beginning.
- i. Lots F-2 and F-4.
- j. Lot K-26

**502.00 Uses Permitted**

- a. Excavations (as per Section 1000)
- b. Establishments offering goods for sale including dry goods, foods, hardware, clothing and apparel, motorized vehicles, and other general retail commodities
- c. Farming & Forestry
- d. Lumber Yards and lumber mills
- e. Health care facilities
- f. Theaters
- g. Hotels/motels
- h. Warehousing, assembling & manufacturing
- i. Office parks
- j. Residential dwelling units existing prior to March 14, 1992 and home businesses within these units subject to the provisions of Section 1700
- k. Banks and financial institutions
- l. Restaurants
- m. Professional offices
- n. Personal services and offices
- o. Churches and associated parsonages
- p. Public, private, or non-profit recreational facilities, fraternal orders, or membership clubs
- q. Schools, nurseries and day care centers
- r. Funeral homes
- s. Automobile fueling, service and repair stations
- t. Post offices
- u. Police and fire stations
- v. Any commercial use which does not offend by emission of smoke, dust, gas, noise, odor, or fumes
- w. Telecommunication towers and co-location of telecommunication facilities on existing towers or structures which are in compliance with Section 1900 and subject to Planning Board review and approval under the Non-Residential Site Plan regulations
- x. Adult sexually oriented businesses in accordance with Section 504.00 of this Ordinance

**503.00**     ***Lot Requirements***

**503.01**     ***Frontage.*** Every building lot shall have at least 150 feet of frontage.

503.02 Setbacks:

- a. *Front.* Each structure shall be setback at least 30 feet from the front lot line.
- b. *Side and Rear.* Each structure shall be at least 15 feet from side and rear lot lines. In the case of a corner lot, the side distance shall be increased to 25 feet on the side bordering the frontage.

503.03 Land Area. Each building lot shall be at least one (1) contiguous acre excluding wetlands.

503.04 Site Coverage. No more than seventy-five percent (75%) of the gross area of any lot may be occupied by structures and impervious surfaces. Commercial buildings, structures and parking areas in existence as of March 12, 1996 that exceed the permitted lot coverage within the district may be maintained at, or rebuilt to, the existing level. Any increase in impervious area will not be permitted.

503.05 Building Requirements.

1. Height: Except for structures not intended for human occupation (such as chimneys, water towers, and church spires), maximum building height is 35 feet, calculated from the average finished ground level adjoining the building at all exterior walls.
2. Accessory Buildings: Accessory buildings of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements and Section 300.00, General Provisions.

**504.00 *Adult Sexually Oriented Businesses***

The purpose of this ordinance is to establish reasonable and uniform regulations to prevent the concentration of adult sexually oriented businesses within the Town of Brookline, NH; to promote the health, safety and general welfare of its citizens; and, to prevent problems of blight and deterioration which accompany and are brought about by the concentration of adult sexually oriented businesses. The provisions of this ordinance have neither the purpose nor the effect of imposing limitations or restrictions on the content of any communicative materials, including sexually oriented materials. It is neither the intent nor the effect of this article to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent nor effect of this article to condone or legitimize the distribution of obscene material.

- a. No adult sexually oriented business shall be permitted within five hundred (500) feet of a Residential-Agricultural District. With the exception of distances between two separate adult businesses, distance shall be measured in a straight line, without regard to intervening structures, from the closest property line or boundary of any adjacent district, place or use to the closest exterior wall or temporary or permanent physical divider for the structure housing the adult sexually oriented business.
- b. No adult sexually oriented business shall be permitted within seven hundred fifty (750) feet of any public sports/ recreation park, church, place of worship, parish house, convent, public, parochial, or private school, drug free zone, kindergarten, licensed day care or nursery school, or State approved day care center.
- c. No adult sexually oriented business shall be permitted within five hundred (500) feet of town boundaries.

- d. No adult sexually oriented business shall be permitted within seven hundred fifty (750) feet of another existing adult sexually oriented business or one for which a non-residential site plan has been submitted. Distance shall be measured in a straight line, without regard to intervening structures, from the closest exterior wall or temporary or permanent physical divider for the a structure housing an adult sexually oriented business to the closest exterior wall or temporary or permanent physical divider for another structure housing an adult sexually oriented business.
- e. No adult sexually oriented business shall be permitted within a property, building, premise, structure, or other facility that contains an existing adult sexually oriented business or within one for which a certificate of occupancy has been applied.
- f. No sexually explicit material or advertising shall be visible from outside the building.
- g. No private viewing rooms or booths shall be constructed unless one side is always lighted and open to a public central area.
- h. For those uses permitted in the district which sell sexually explicit goods and paraphernalia, such sexually explicit goods and paraphernalia must not be located within ready view to children and minors under the age of 18.
- i. Hours of operation - 10 AM to 11 PM Monday to Saturday and 12 noon to 9 PM Sundays.
- j. No one under 18 years of age allowed on the premises of an adult sexually oriented business.
- k. The site shall be maintained daily in a condition that is free and clear of litter. All discarded sexual paraphernalia and/or packaging materials shall be placed in a locked dumpster.
- l. The use shall not create undue traffic, congestion or hazard, including vehicular and pedestrian movement.
- m. When reviewing site plan applications the planning board may impose reasonable restrictions for buffering, outdoor lighting, and landscaping and building aesthetics as provided in the 'Town of Brookline: Non-Residential Site Plan Regulations'.
- n. Such a use will be subject to all other federal, state statutes and local permitting requirements.

**600.00 RESIDENTIAL-AGRICULTURAL DISTRICT**

**601.00 Location**

The Residential-Agricultural District shall be:

- a. All areas of town not designated as the Industrial-Commercial District.

**602.00 Uses Permitted**

- a. Single dwelling unit dwellings, two dwelling unit dwellings.
- b. Churches, synagogues, parish houses, convents, day nurseries, kindergartens, and day care centers.
- c. Municipal buildings, schools, and institutions of higher learning.
- d. Recreation and community center buildings and grounds for games and sports.
- e. Farming and Forestry activities are permitted when incidental to primary residential use.
- f. Farm stands, provided that the stand is set back a minimum of 30 feet from abutting road right-of-way lines; the building area of the farm stand is not greater than two hundred (200) square feet; a minimum of two off-street parking spaces meeting the dimensional requirements of this Ordinance are provided; and the stand does not pose a threat to public health, safety and welfare. Year-round, permanent structures for the sale of farm products must receive Non-Residential Site Plan approval from the Planning Board.
- g. Manufactured housing in approved Manufactured Housing Districts subject to the provisions of Section 700.
- h. Any use injurious, obnoxious, or offensive to the neighborhood is prohibited.
- i. Telecommunication towers and co-location of telecommunication facilities on existing towers or structures which are in compliance with Section 1900 and subject to Planning Board review and approval under the Non-Residential Site Plan regulations.

**602.01 Uses Permitted by Special Permit**

- a. **Home businesses** shall be allowed by special permit, and pursuant to authority provided by RSA 674:21, the Planning Board is authorized to determine whether such special permit shall issue, after a hearing in which the Planning Board determines that the proposed use is capable of being carried out in a manner consistent with the standards set forth in Section 1700 of this ordinance. Applications to the Planning Board to such a special permit shall be made in the same manner and subject to the same approval requirements of an application for non-residential site plan approval, as identified in section 6.2.A, submission requirements for home businesses.
- b. **Bed and Breakfasts** shall be allowed by special permit, and pursuant to authority provided by RSA 674:21. The Planning Board is authorized to determine whether such special permit shall be issued, after a hearing in which the Planning board determines that the proposed use is capable of

being carried out in a manner consistent with the standard set forth in Section 2400 (Bed and Breakfast) of this ordinance. Applications to the Planning Board for such a special permit shall be made in the same manner and subject to the same approval requirements of an application for non-residential site plan approval, as identified in Section 6.2.B, submission requirements for Bed and Breakfasts.

**603.00**     ***Lot Requirements***

603.01     Frontage. Every building lot shall have at least 200 feet of frontage except back lots.

603.02     Setbacks:

- a.   *Front*. Each structure shall be setback at least 30 feet from the front lot line.
- b.   *Side and Rear*. Each structure shall be at least 15 feet from side and rear lot lines. In the case of a corner lot, the side distance shall be increased to 30 feet on the side bordering the frontage.

603.03     Land Area. Each building lot shall have at least 80,000 contiguous square feet, excluding wetlands.

603.04     Number of Dwelling Units. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A two-family dwelling unit shall require at least 160,000 contiguous square feet of land excluding wetlands.

603.05     Building Requirements.

1. Height: Except for structures not intended for human occupation (such as chimneys, water towers, and church spires), maximum building height is 35 feet, calculated from the average finished ground level adjoining the building at all exterior walls.
2. Square Footage: Any new dwelling unit shall contain at least 576 square feet of first floor living area and manufactured housing to have 320 square feet.
3. Accessory Building: Accessory Building of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements and Section 300.00, General Provisions.

603.06     Back Lots.

- a.   Requires a minimum lot area of at least five (5) acres with a buildable area of at least 80,000 contiguous square feet of land excluding wetlands.
- b.   A back lot requires minimum frontage of 30 feet.
- c.   No building shall be erected closer than 100 feet from an existing public road.
- d.   A two-family dwelling unit requires a minimum lot area of ten (10) acres with a buildable area of at least 160,000 contiguous square feet of land excluding wetlands.

**610.00**     ***LEFT INTENTIONALLY BLANK***

**620.00**     ***WORKFORCE HOUSING OPTION***

**621.00 Purpose**

The purpose of this Section is to provide an option for including workforce housing as a permitted use in the Residential-Agricultural District, consistent with the requirements of NH RSA 674:58-61. The section is intended to:

1. Provide opportunity for the development of affordable workforce housing;
2. Ensure the continued availability of a diverse supply of home ownership and rental opportunities;
3. Meet the goal of providing safe, affordable housing opportunities as set forth in the town’s Master Plan;
4. Address the regional need for workforce housing as documented in the Nashua Regional Planning Commission’s most recent Needs Assessment; and
5. Be consistent with the planning goals in the Town of Brookline, NH.

**622.00 Authority**

This section is adopted under the authority of RSA 674:21, Innovative Land Use Controls, and is intended as an “Inclusionary Zoning” provision as defined in RSA 674:21(I)(k) and also intended to comply with NH RSA 674:58 – 61, inclusive.

**623.00 Applicability**

1. Permitted Uses

Single family, duplex, multi-family and manufactured housing can qualify as workforce housing. A mix of housing types within the same development is permitted only along the NH Route 13 corridor, defined as land in the Residential / Agricultural District within 500 feet of the NH Route 13 right of way on both sides of the highway. Only single family and duplex units outside of the NH Route 13 corridor are permitted in the Residential / Agricultural District as workforce housing. A multi-family building unit shall have no more than five (5) contiguous/attached units per building on at least three (3) acres. The proposed development could consist entirely of workforce housing units or could be a mix of workforce and market rate units.

**624.00 Procedural Requirements**

Any applicant who applies to the Planning Board for approval of a development that is intended to qualify as workforce housing under this section shall follow the Town’s normal application procedure for a subdivision approval as defined in the Town’s Subdivision Regulations. Any such applicant shall also file a written statement of such intent as part of the application as per RSA 674:60.

**625.00 Definitions**

The following terms as used in this section shall have the following definitions and are intended to be consistent with NH RSA 674:58 Definitions, as amended.

1. Affordable: Housing with combined rental and utility costs or combined mortgage loan debt services, property taxes, and required insurance that do not exceed 30 percent of a household’s gross annual income.
2. Multi-family Building: For the purpose of this ordinance, means a building or structure containing no less than two (2) and no more than five (5) dwelling units, each designed for occupancy by an individual household.

3. Reasonable and Realistic Opportunities for the Development of Workforce Housing: Opportunities to develop economically viable workforce housing within the framework of Brookline's municipal ordinances and regulations adopted pursuant to this chapter and consistent with RSA 672:1, III-e.
4. Workforce Housing - Owner occupied: housing which is intended for sale and which is affordable to a household with an income of no more than 100 percent of the median income for a 4-person household for the metropolitan area in which the housing is located as published annually by the US Department of Housing and Urban Development. Brookline is located within the greater Nashua metropolitan area.
5. Workforce housing - Renter occupied: rental housing which is affordable to a household with an income of no more than 60 percent of the median income for a 3-person household for the metropolitan area or county in which the housing is located as published annually by the US Department of Housing and Urban Development. Housing developments that exclude minor children from more than 20 percent of the units, or in which more than 50 percent of the dwelling units have fewer than two bedrooms, shall not constitute workforce housing for the purposes of this ordinance.
6. Area Median Income (AMI): the median income of the greater region, the HUD Fair Market Rent Area to Brookline's, as established and updated annually by the US Department of Housing and Urban Development. Income considers both wage income and assets.

**626.00      *General Requirements of Workforce Housing Units***

1. Dwelling Units qualifying as workforce housing shall be compatible in architectural style and exterior appearance with the market rate dwellings of similar type in the proposed development. For a proposed mixed development consisting of market rate and work force housing units, the split should be 50% market rate and 50% workforce housing, allowing for a variation of 10%. When possible, the workforce housing units should be interspersed throughout the overall development and not concentrated in a separate area of the development.
2. The minimum parcel size for a workforce housing development shall be at least ten (10) contiguous acres excluding wetlands.
3. The minimum lot size for a single family market value unit or a single family workforce housing unit shall be one (1) contiguous acre excluding wetlands. The minimum lot size for a two-family dwelling unit shall be one and one half (1.5) contiguous acres excluding wetlands. The minimum lot size for a three (3), four (4) or five (5) unit multi-family building shall be three (3) contiguous acres excluding wetlands.
4. The frontage shall be as follows: for a single family unit eighty (80) feet; for a duplex one hundred twenty five (125) feet; for a multi-family building two hundred forty (240) feet.
5. The development shall have a vegetated buffer of fifty (50) feet or a value as deemed necessary by the Planning Board on all boundaries of the original parcel except for access to connecting roads.
6. The minimum building setback shall be fifteen (15) feet on the back and side and thirty (30) feet on the front of each individual lot created.
7. The single family dwelling units should have a maximum of 1,500 square feet of gross living area above ground and no more than a two (2) car garage (max. 600 square feet). There should be no limitation in square footage for market value dwellings.
8. There shall be no increase in the amount of gross living area above ground.

9. For units designated and approved as workforce housing, Section 1400 Growth Management / Residential Phasing Ordinance shall not apply. Section 1400 shall apply for market rate units.
10. At the time of application, the applicant or developer shall identify the organization responsible for compliance with Section 629.00 of this ordinance.
11. At the time of application the applicant or developer shall prepare a management plan, acceptable to the Planning Board, that demonstrates compliance with this ordinance.

**627.00      *Density Bonus***

1. The Planning Board may also allow a reduction of the minimum lot size up to 25% per unit in order to accommodate increased site density as long as soil conditions permit the siting of septic system and water supply system within the decreased lot size.
2. The following are considerations in the Planning Board's granting of a reduction in the minimum lot size:
  - a) Designation of 100% of the units as workforce housing units;
  - b) Provision for building design consistent with Brookline's historic architectural style and blends in with the surrounding neighborhood;
  - c) Minimization of impact to environmental resources through the use of low impact design features;
  - d) Provision of a trail or green space connection with adjacent properties; and
  - e) Incorporation of energy saving techniques or the equivalent of Energy Star rating in all building designs.

**628.00      *Road, Way, Access to Development***

1. Access to development containing multi-family units shall be accessed from the Route 13 corridor as described in Section 623.00.
2. Construction, maintenance, plowing, sanding, cleaning of roads, ways, driveways and any other means of access to a workforce housing development shall be, at all times, the entire responsibility of the developer and/or the organization or property management entity.
3. Unless deemed unnecessary by the Planning Board, access to a development shall be via a through roadway connecting existing roads and neighborhoods in order to provide a safe and rapid access to the development / dwelling units for all emergency vehicles.

**629.00      *Affordability***

1. Affordability Compliance

All of the workforce housing units approved under this provision must meet the affordability requirements for workforce ownership housing in Section 625.00 of this ordinance.

2. Assurance of continued affordability

Workforce ownership housing units must retain the development criteria and affordability standards herein for a minimum period of thirty (30) years with a renewable clause through a suitable deed restriction, easement and/or mortgage deed instrument deemed acceptable to the Brookline Planning Board and as monitored through reports provided to the Brookline Planning Board by the designated third-party agent prior to the time of unit sale or resale.

**630.00 Administration**

A third party non-profit or for-profit organization or property management entity shall be responsible for income verification and ongoing affordability compliance. The designated organization or company shall provide appropriate reports to the Brookline Planning Board on these two issues, when necessary.

**631.00 Conflict**

If any provision of this Section is in conflict with the provisions of any other provisions of this ordinance, the more restrictive provision shall apply, except for any provision relating to reductions in standards for lot size, setbacks, or density, in which case the provisions of this Section shall apply.

**632.00 Effective Date**

The effective date of this ordinance shall be as stated in RSA 674:58-61.

**700.00**     **MANUFACTURED HOUSING**

**701.00**     No trailer or manufactured house shall be occupied or maintained as a living unit except in an approved Manufactured Housing District.

**701.01**     Manufactured Housing District Requirements. The Planning Board may approve the location and designation of Manufactured Housing Districts within the Residential-Agricultural District and shall allow the placement of manufactured housing on individual lots within Manufactured Housing Districts intended for occupancy as permanent single dwelling unit dwellings. Any area approved as a Manufactured Housing District, in addition to conforming to the Zoning Ordinance, shall also satisfy the following conditions:

- a. Each proposed Manufactured Housing District must be a minimum of twenty (20) contiguous acres in size excluding wetlands.
- b. Each proposed Manufactured Housing District must contain a vegetated buffer of fifty (50) feet wide, or a value as deemed necessary by the Planning board, on all boundaries of the original parcel except for access to connecting roads.
- c. Each proposed Manufactured Housing District shall conform to the Subdivision Regulations now in existence or as may be amended.
- d. Any dwelling unit shall contain at least 320 square feet of living area.

**701.02**     Application. Any application for the establishment and designation of a Manufactured Housing District shall be an attachment to, and a part of, the application for subdivision approval required by the Subdivision Regulations and shall contain certification by the owner (if different from applicant) of the request for Manufactured Housing District Designations.

**702.00**     The provisions of this section shall not apply to the continued use and occupancy of any manufactured housing used as a dwelling as of the date of the passage of this section, nor to a manufactured house hereafter acquired as a replacement by the owner of a manufactured house so used.

**703.00**     The placement of manufactured housing is prohibited within the designated Regulatory Floodway, except in existing manufactured housing parks.

## **800.00      *NONCONFORMING USES, STRUCTURES AND LOTS***

The purpose of this section is to allow for the lawful continuance of nonconforming uses, structures and lots, in accordance with the criteria outlined below and to allow for a reasonable level of alteration, expansion or change to occur by special exception when it can be demonstrated that the proposed alteration, expansion or change will not change the nature of the use, unduly impact the neighborhood or provide inadequate subsurface disposal of waste.

### *800.01      Nonconforming Uses*

- a. Any nonconforming use may continue in its present use, however, it shall not be changed to another nonconforming use.
- b. Whenever a nonconforming use has been intentionally discontinued or abandoned for a period of one year the use shall not be reestablished.
- c. Except for proposal “B” (see diagram in section 800.03), any alteration, expansion or change of a nonconforming use or structure shall only be permitted by special exception by the Zoning Board of Adjustment if it finds that:
  1. The proposed alteration, expansion or change will not change the nature and purpose of the original use; and
  2. The proposed alteration, expansion or change would involve no substantially different effect on the neighborhood; and
  3. Any increase in heated living space which, in the judgment of the Zoning Board of Adjustment, is capable of increasing the number of bedrooms for a nonconforming dwelling or lot, may require that the septic system be approved by the NH Division of Water Supply and Pollution Control and the Town of Brookline in accordance with the provisions of RSA 485-A:38 and the Town’s regulations for the number of bedrooms currently in the home or proposed for the home.

### *800.02      Nonconforming Lots*

- a. A nonconforming lot that has been developed with a structure may continue in its present use; however any alteration or expansion, shall comply with Section 800.01 c.
- b. A nonconforming lot which is recorded and taxed as a lot of record at the time of passage of this Ordinance may be used for any permitted use in the district in which it is located. Every attempt shall be made to conform to the lot size/setback requirements of the zone.
- c. Where two (2) or more nonconforming, undersized, lots abut and are under common ownership, prior to the issuance of a building permit the parcels shall be merged into one lot and shall comply with the zoning requirements to the best of their ability. Every attempt shall be made to conform to the lot size/setback requirements of the zone.
- d. Any changes to existing septic systems on nonconforming lots must comply with all local and state requirements for septic systems to the maximum extent possible.

800.03 *Nonconforming Structures*

Any lawful nonconforming structure existing at the time of adoption of this Ordinance, may be occupied, operated and maintained; however, any alteration, expansion or change of the structure that further aggravates a front, side or rear setback shall only be permitted by special exception in accordance with Section 800.01 c and the diagram below.

**Expansions of structures with nonconforming setbacks**  
(Not drawn to scale)

**Explanation:** Proposal “A” requires a special exception;  
Proposal “B” requires no action by the Board of Adjustment;  
Proposal “C” requires a grant of variance by the Board of Adjustment, provided, however, that in addition to meeting the legal standard for a variance, the proposal also meets the general criteria for a special exception found in this Ordinance;  
Accessory structures that can meet the setbacks do not require a special exception.

**900.00 LOT OF RECORD**

**901.00 Ownership Classifications**

901.01 Where a lot in separate ownership, the deed to which is duly recorded on or before 12 March 1968 and which is recorded and taxed according to the 1972 tax records of the Town of Brookline, NH, does not conform to the area and frontage requirements of the zone in which it is located, such lot may be used for any purpose permitted in that zone on said date provided that such use conforms with the requirements of the Water Supply and Pollution Control Commission (WSPCC).

901.02 Any lot in separate ownership the deed to which is duly recorded between 13 March 1968 and 29 October 1971 and which is recorded and taxed according to the 1972 tax records of the Town of Brookline, NH, may be used for any purpose permitted between said dates in the zone in which it is located provided that it contains an area of 40,000 square feet, has a frontage of not less than 150 feet, and complies with the requirements of the WSPCC.

**902.00 Requirements**

902.01 Any person having a lot size of 40,000 square feet for a single dwelling unit dwelling or 80,000 square feet for a two-family dwelling, 150 feet of frontage, and who can meet the set back and side line requirements as set forth in the Zoning and Land Use Ordinance shall not require a variance in order to obtain a building permit.

902.02 Any person having a lot size of less than 40,000 square feet for a single dwelling unit dwelling or 80,000 square feet for a two-family dwelling, and/or less than 150 feet of frontage or who cannot meet the Zoning Ordinance requirements shall require a variance prior to the issuance of a building permit if the changes will either:

- a. increase the exterior dimensions of the structure so that is not in compliance with the Building Code\* (See Appendix A: Table of Amendments, 2010) and Zoning Ordinance; or
- b. increase the sewage flow as determined by New Hampshire Water Supply and Pollution Control Commission and the Brookline Health Codes.

902.03 An application requesting a permit to occupy a lot not conforming in size and/or frontage as otherwise required under this Ordinance shall be accompanied by the original or a certified copy of the recorded deed in question.

902.04 A lot shall not be used as a building site unless it has frontage in the amount specified in the Ordinance on a Class V or better road and access is obtained directly from a Class V or better road.

**1000.00 EARTH REMOVAL**

**1000.01** Excavation shall be deemed to be a use allowed by special exception in the Industrial-Commercial District as provided in RSA 674:33 IV.

**1000.02** Excavations performed exclusively for the lawful construction, reconstruction, or maintenance of a class IV or V highway by the Town of Brookline shall be permitted within Town by special exception as provided in RSA 674:33 IV.

**1000.03** The Zoning Board of Adjustment shall grant such a special exception upon a finding that the applicant has demonstrated that:

- a. The excavation will not cause an unreasonable diminution in area property value or unreasonably change the character of the neighborhood;
- b. The excavation will not unreasonably accelerate the deterioration of highways or create safety hazards in the use thereof;
- c. The excavation will not create any unreasonable nuisance or create health or safety hazards;
- d. The excavation site shall contain natural buffers or other visual buffers to adequately protect the health, safety, and welfare of abutters and Town residents. This buffer shall be used to minimize noise impact, dust impact, visual impact and biological impact of the excavation;
- e. The excavation will not cause erosion of adjacent property;
- f. The excavation will not destroy a habitat of an endangered species.

**1001.00** The Planning Board shall not grant an extension of an excavation permit unless extenuating circumstances exist. A limit of one extension of an excavation permit shall not exceed a period of one (1) year.

**1002.00** No new development can be approved or built on a lot which has an existing excavation until reclamation has been completed, as this will be considered premature development.

**1003.00** Any excavation must also meet the Excavation Regulations and get an Excavation Permit from the Planning Board.

**1004.00** In addition, the excavation will adhere to the Brookline Zoning and Land Use Ordinance including, but not limited to the Aquifer Protection Ordinance and Wetlands Conservation District.

## **1100.00 WETLANDS CONSERVATION DISTRICT**

### **1101.00 Purpose and Intent**

The purpose of the Wetlands Conservation District is to protect the public health, safety and general welfare by controlling and guiding the use of land areas which have been found to be subject to high water tables for extended periods of time. It is intended that this Ordinance shall:

- a. Prevent the destruction of, or significant changes to, natural wetlands which provide flood protection, discharge and recharge of groundwater supplies, and continuing existence of important wildlife areas;
- b. Prevent the development of structures and land uses on naturally occurring wetlands, which would contribute to pollution of surface and groundwater by sewage or toxic substances;
- c. Protect sensitive, unique and unusual natural areas;
- d. Protect the quality and quantity of existing and potential water supplies, aquifers and aquifer recharge areas;
- e. Encourage those uses that can be appropriately and safely located in wetland areas.

### **1102.00 Definitions**

For the purposes of the Wetlands Conservation District the following definitions apply:

**1102.01** Accessory Structure: For purposes of this Ordinance an accessory structure shall be considered any structure that serves and is in addition to a primary structure. Examples of an accessory structure include, but are not limited to sheds, gazebos and detached garages.

**1102.02** Best Management Practices: When referring to forestry *Best Management Practices* are defined in a publication entitled "Best Management Practices for Erosion Control on Timber Harvesting Operations in New Hampshire" prepared by the New Hampshire Department of Resources and Economic Development, and Wt. 304.05 Logging Operations, Rules Governing Wetlands, April 21, 1997, as amended. When referring to stormwater management and erosion and sediment control, technical standards are contained in "Stormwater Management and Erosion and Sediment Control for Urban and Developing Areas in New Hampshire", DES, RCCD, 1992 and "Manual of Best Management Practices to Control Non-point Source Pollution: A Guide for Citizens and Town Officials," DES, November, 1997. When referring to agriculture, Best Management Practices are defined in the publications entitled "Manual of Best Management Practices for Agriculture in New Hampshire", Department of Agriculture, Markets & Food, June 1995, and "Best Management Wetlands Practices For Agriculture" July 1993, as amended.

**1102.03** Bog: A wetland area distinguished by stunted evergreen trees and shrubs, peat deposits, poor drainage and/or highly acidic soil and/or water conditions.

**1102.04** Buffer Zone: An upland area adjacent to a wetland or surface water where construction is not permitted.

**1102.05** Certified Soil Scientist: A person qualified in soil classification and mapping who is certified by the State of New Hampshire Board of Natural Scientists, as defined by RSA 310-A:76, II.

- 1102.06 Certified Wetland Scientist: A person qualified to delineate wetland boundaries and prepare wetland maps who is certified by the State of New Hampshire Board of Natural Scientists, as defined by RSA 310-A:76, II-a.
- 1102.07 Erosion Control Measures: For purposes of this district, all construction and/or development shall incorporate design standards for erosion and sedimentation control which at a minimum reflect the standards set forth in the document, "Stormwater Management & Erosion & Sediment Control for Urban & Developing Areas in New Hampshire", DES, RCCD, 1992, and Chapter Env-Ws 415 of the NH Code of Administrative Rules.
- 1102.08 Hydric Soils: Soils that are saturated or flooded during a sufficient portion of the growing season to develop anaerobic conditions in the upper soil layers.
- 1102.09 Natural Vegetative Buffer: For purposes of this district shall mean, where existing, a natural woodland buffer shall be maintained within the Wetland Conservation District.
- 1102.10 Prime Wetland: Under the New Hampshire statute (RSA 482-A) for protecting wetlands from "despoliation and unregulated alteration", municipalities are able to designate some of their high value wetlands as "Prime Wetlands" (RSA 482-A:15). These designated wetlands are given special consideration by the Wetlands Board in permit application reviews within the scope of RSA 483-A and NH Code of Administrative Rules WT 700.
- 1102.11 Primary Structure: For purposes of this Ordinance a primary structure shall be considered the main structure on a lot that serves as a residence or a place of business.
- 1102.12 Site Specific Soils Map: A map developed from information prepared in accordance with "Site Specific Soils Mapping Standards for New Hampshire and Vermont," Society of Soil Scientists of Northern New England Publication No. 3, 1997, as amended.
- 1102.13 Special Exception: A use of land or buildings that may be permitted, subject to specific conditions that are set forth in the Ordinance. RSA 674:33 gives the local zoning board the power to grant those exceptions, which are clearly specified in the Ordinance.
- 1102.14 Surface Waters: Those waters, as defined by RSA 484-A:4, which have standing or flowing water at or on the surface of the ground. This includes but is not limited to rivers, streams, lakes, and ponds.
- 1102.15 Wetland: An area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal conditions, does support a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include, but are not limited to, swamps, marshes, bogs, vernal pools and similar areas. For the purpose of determining buffer zones for site plan and subdivision review wetland boundaries shall be delineated on the basis of hydrophytic vegetation, hydric soils, and wetlands, by either a certified soil scientist or a certified wetland scientist according to the Corps of Engineers Wetlands Delineation Manual, 1987, and the Regional Field Indicators for Identifying Hydric Soils in New England, 1998.
- 1102.16 Wetlands Conservation District: The Town of Brookline Wetlands Conservation District is defined as all wetland areas, surface water bodies, and the associated buffers as defined in Section 1102.04 Buffer Zone. The limits of the Wetlands Conservation District are determined to include designated Prime Wetlands, as described in the Brookline Prime Wetlands Report dated January 1992.
- 1102.17 Wet Meadow: An area typically dominated by herbaceous non-woody vegetation less than three feet in height, saturated for long periods during the growing season, but seldom flooded. Wet

meadows develop on predominantly poorly drained soil conditions as defined by “Site Specific Soils Mapping Standards for New Hampshire and Vermont,” Society of Northern New England Publication No. 3, 1997, as amended.

1102.18 *Vernal Pool:* A confined basin depression which, at least in most years, holds water for a minimum of two continuous months during the spring and/or summer, provides essential breeding habitat for certain amphibians and invertebrates and is free of adult fish populations.

**1103.00 *Jurisdiction***

1103.01 *Relation to Other Districts.* In all cases where the Wetlands Conservation District is superimposed over another zoning district in the Town of Brookline, that district whose regulations are more restrictive shall apply.

1103.02 *State and Federal Regulations.* The Town of Brookline Wetlands Conservation District Ordinance is in addition to state and federal regulations governing wetlands and surface waters, including any permitting process.

1103.03 *Existing Unimproved Lots.* This Ordinance shall not prohibit the construction of, or additions to, principal and accessory structures within the buffer zone on unimproved lots that were approved for subdivision by the Planning Board or which otherwise legally existed on or before March 9, 1999. Unimproved lots that have been approved for subdivision or which otherwise legally existed on or before March 10, 2004 may use wetlands to satisfy up to 25% of the minimum lot area requirements. New construction on a legal previously approved vacant lot will only be permitted upon determination by the Planning Board that it is not reasonably feasible to locate the structure outside of the buffer zone, prior to the issuance of a building permit. Any construction permitted within the buffer zone shall minimize harm to the wetland or surface water. The Planning Board may seek input from the Conservation Commission during the review process. (March 10, 2004)

1103.04 *Existing Improved Lots.* For lots with improvements legally existing on or before March 9, 1999, all additions to principal and accessory structures, and the erection of new accessory structures within the Wetland Conservation District require a wetland special exception prior to the issuance of a building Permit.

1103.06 *Preexisting Uses.* This Ordinance shall not prohibit the continuation of a legally preexisting use in the Wetland Conservation District, however, the use may not be expanded without a special exception granted by the ZBA.

1103.07 *Prime Wetlands.* These wetlands are described in the Brookline Prime Wetlands Report dated January 1992, and are as follows:

<u>Wetland Number</u>	<u>Location</u>	<u>Tax Map Sheet</u>
2	W. of Route 13 near Milford	B
3	Scabbard Mill Brook N.	B
5	Palmer land w. of Route 13	B
6	Scabbard Mill Brook S.	B, D
9	Spaulding Brook	A, C
10	North Stream	C, E
12	Lake Potanipo	E, L
15	Talbot-Taylor area	G
16	Pout Pond	H
18	Wallace Brook	J
20	Nissitissit River/Campbell's Meadow	K

**1103.08** Prime Wetland Designation. The designation of each prime wetland is included on separate maps correlated to the report. Both the aforementioned maps and report are incorporated in this Ordinance by reference and are on file at Town Hall. Designated prime wetland boundaries shall be delineated by either a certified soil scientist or a certified wetland scientist according to the Corps of Engineers Wetlands Delineation Manual, 1987, and the Regional Field Indicators for Identifying Hydric Soils in New England, 1998.

**1103.09** Wetlands Incorrectly Delineated. In the event that an area has been incorrectly delineated as part of the Wetland Conservation District or as a Prime Wetland, and evidence to that effect is presented to the satisfaction of the Planning Board or their representative in site plan reviews or subdivision, or to the satisfaction of the Selectboard or their representative in other cases, or the Conservation Commission, the restrictions contained in this Ordinance shall not apply. Wetland boundaries shall be delineated by either a certified soil scientist or a certified wetland scientist according to the Corps of Engineers Wetlands Delineation Manual, 1987, and the Regional Field Indicators for Identifying Hydric Soils in New England, 1998.

**1103.10** Wetlands Exempt. The regulations and restrictions set forth in this District shall not apply to the following wetland areas or their buffer zones:

- a. manmade ditches and swales
- b. sedimentation/detention basins or ponds
- c. manmade agricultural/irrigation ponds and swales
- d. fire ponds, drafting basins and cisterns
- e. a septage or manure lagoon
- f. silage pits
- g. an isolated wetland or surface water of 3000 s.f. or less which does not meet the definition of a bog, vernal pool, or wet meadow

**1104.00** Wetlands Conservation District Permitted Uses

1104.01 Permitted uses are those that do not result in the erection of any structure or alter the surface configuration by the addition of fill, and that are otherwise permitted by the Brookline Zoning Ordinance. Such uses include the following:

- a. Forestry and tree farming, using the best management practices, as defined in Section 1102.02, to protect streams from damage and to prevent sedimentation;
- b. Cultivation and harvesting of crops according to recognized soil conservation practices, as defined in “Best Management Practices for Agriculture in New Hampshire”, Department of Agriculture, Markets and Food, June, 1995, including the protection of wetlands from pollution caused by fertilizers, pesticides and herbicides used in such cultivation;
- c. State-approved water impoundments;
- d. Construction of wells and water feed lines for water supply;
- e. Maintenance of existing drainage ways, such as streams, creeks or other paths of normal runoff water;
- f. Conservation areas, nature trails, parks and recreation uses consistent with the purpose and intent of this Ordinance;
- g. Dry hydrants, drafting basins and fire protection ponds.

1104.02 The following uses shall be permitted in the Wetland Conservation District, provided applicable erosion control measures are in place, there is repair and restoration of any disturbed areas and all available mitigation measures to address changes in water quality and quantity as required by Town Staff and recommended by the Conservation Commission are employed. However, all projects listed below together with any disturbance of the buffer zones involved therein shall be presented to the Conservation Commission, with a request for review in writing, as required by the New Hampshire Wetlands Bureau, for its intervention, opinion, recommendations and/or approval.

- a. Streets, roads, driveways and other access ways and utility right of way easements, including power lines and pipe lines, if essential to the productive use of land not so zoned and if so located and constructed as to minimize any detrimental impact of such uses upon the Wetlands Conservation District;
- b. Drainageways, swales, culverts, and other devices to control the volume and timing of stormwater runoff.
- c. Stormwater detention basins, settling basins and other methods of improving the quality of stormwater runoff.
- d. Regrading of the ground surface within the buffer zone of the Wetland Conservation District but not inside the wetland boundaries.

**1105.00 Prohibited Uses in the Wetland Conservation District**

Land uses that pose a particular threat to wetlands and surface waters shall be prohibited within the Wetland Conservation District:

- a. Salt storage sheds

- b. Automobile junk yards
- c. Solid or hazardous waste facilities
- d. Use of fertilizer, except lime and/or wood ash
- e. Bulk storage of chemicals, petroleum products or hazardous materials
- f. Sand and gravel excavations as defined in RSA 155-E
- g. Processing of excavated materials
- h. Dumping or disposal of snow collected from roadways or parking areas

**1106.00 General Requirements**

- a. The buffer zone shall include an area of fifty (50) feet, measured on a horizontal plane from the delineated edge of a wetland or the mean high water mark of a surface water, as appropriate.
- b. Appropriate erosion control measures must be in place prior to construction, properly inspected and maintained through stabilization, and removed with appropriate disposal of silt, debris and erosion control materials.
- c. Any disturbance to the surrounding buffer zone due to construction must be repaired upon completion of the project.
- d. Provision must be made for wildlife access corridors to promote the free migration of wildlife along the length of the Wetland Conservation District.
- e. Construction or enlargement of septic tank or leach field shall follow New Hampshire State regulations regarding setbacks from wetland areas (50'), except in those locations where the soil type is coarse textured with rapid to very rapid permeability, as referenced in the Soil Survey for Hillsborough County, where a 125' setback shall be required from the edge of any wetland that shall be protected by the Wetland Conservation District.
- f. Construction involving the erection of any structure and alteration of the ground surface configuration, which requires a building permit, shall not occur within any portion of the Wetland Conservation District, without required approvals. The applicant must provide written documentation in compliance with Section 1102.15 to the Building Inspector, prior to the issuance of a building permit, verifying that the proposed construction is in compliance with the buffer zone requirements of this Ordinance.
- g. There shall be no net increase in peak flow or overall volume of stormwater runoff in the Wetland Conservation District as a result of any development, in accordance with "Stormwater Management and Erosion and Sediment Control for Urban and Developing Areas in New Hampshire", DES, RCCD, 1992, and Chapter ENV-Ws 415 of the "NH Code of Administrative Rules. Calculations shall be based on 2 and 10 year storm events.
- h. The Brookline Conservation Commission may require design construction and maintenance methods be prepared by a professional engineer (PE) and shall include restoration of the site, as nearly as possible to its original grade and condition. In the case of a development which involves only a single-family or a two-family dwelling unit or the carving out of a single lot

designated for construction of only a single-family or two-family dwelling unit, this requirement may be waived by the BCC, with a written request by the applicant.

- i. Construction shall not proceed until all applicable state and federal permits have been issued.

## **1107.00 Special Exceptions**

### *1107.01 Procedure*

- a. The application for Special Exception must be submitted to the Conservation Commission for review. The Conservation Commission may require review by the Natural Resources Conservation Service, upon submission of applicable fees by the applicant for this service. The Conservation Commission shall make findings of fact regarding the quality of the affected wetlands and the suitability of the proposal.
- b. Evidence to support the application shall be submitted in writing to the Zoning Board of Adjustment, with fees for proper notification, accompanied by written findings of fact from the Conservation Commission.

### *1107.02 Additions to existing structures within the buffer zone*

#### *a. Requirements*

- i. Structures within the buffer zone are permitted to expand within the buffer zone up to 600 square feet beyond the footprint that existed on March 9, 1999.
- ii. Expansion may only be permitted to occur away from the edge of the wetland or high water mark, unless a finding made in accordance with Section 1107.04 determines that there will be no negative impact on the wetland and a previous disturbance prior to the adoption of this Ordinance is documented, in which case the expansion may extend to encompass the previous disturbance, but in no case should the buffer be reduced to less than 25 feet.
- iii. Expansion outside the buffer zone is not limited by this Section of the Ordinance.

#### *b. Criteria*

The Zoning Board of Adjustment shall grant a special exception permitting the expansion of an existing structure within the buffer zone upon determining that, in light of findings of fact from the Brookline Conservation Commission, the proposed expansion does not conflict with the purpose of the Wetland Conservation District and is otherwise permitted by the Zoning Ordinance.

### *1107.03 Accessory structures within the buffer zone*

#### *a. Requirements*

- i. The accessory structure shall not exceed twenty feet in height.
- ii. The accessory structure must have a total building footprint no larger than two hundred fifty (250) square feet.
- iii. The accessory structure and associated limits of construction must be set back at least 25 feet from the delineated edge of the wetland or surface.

- iv. The land on which the accessory structure is to be built must have a slope no greater than 25%.

b. *Criteria*

The Zoning Board of Adjustment shall grant a special exception permitting an accessory structure within the buffer zone upon determining that, in light of findings of fact from the Brookline Conservation Commission, the accessory structure does not conflict with the purpose of the Wetland Conservation District and there is no land outside the buffer zone where the accessory structure could reasonably be placed.

1107.04 *Reduction of the Wetland Conservation District Buffer Zone*

a. *Requirements*

- i. A Wetland Functions and Values Assessment (using the New Hampshire Method for the Evaluation of Wetlands) shall be performed by a Certified Soil Scientist or Certified Wetland Scientist, at the applicant's expense.
- ii. Under no circumstances shall a reduction be permitted to the buffer surrounding any designated Prime Wetland.

b. *Criteria*

The Zoning Board of Adjustment shall grant a special exception permitting a reduction of the buffer zone upon determining that, in light of findings of fact from the Brookline Conservation Commission, the results of the Wetland Functions and Values Assessment indicate that the wetland is of such value that the proposed use will not conflict with the purpose of this Ordinance.

1107.05 *Use of wetlands to satisfy minimum lot size requirements*

a. *Requirements*

- i. The lot must be unimproved.
- ii. The lot must have been approved for subdivision or must otherwise have legally existed on or before March 10, 2004.

b. *Criteria*

The Zoning Board of Adjustment shall grant a special exception permitting the use of wetlands to satisfy up to 25% of the minimum lot size requirements upon determining that, in light of findings of fact from the Brookline Conservation Commission, the proposed use will not conflict with the purpose of this Ordinance.

1108.00 ***Severability***

If any section, provision, portion, clause or phrase of this Ordinance shall be held to be invalid or unconstitutional by any court or competent authority, such holding shall not affect, impair, or invalidate any other section, provision, portion, clause or phrase of this Ordinance.

## **1200.00 FLOODPLAIN ORDINANCE**

*The following regulations shall apply to all lands designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its "Flood Insurance Study for the County of Hillsborough, N.H." dated September 25, 2009 or as amended, together with the associated Flood Insurance Rate Maps dated September 25, 2009 or as amended, which are declared to be a part of this ordinance.*

### **1201.00 Definition of Terms**

- 1201.01 Area of Special Flood Hazard. The land in the floodplain within the Town of Brookline subject to a one percent (1%) or greater chance of flooding in any given year. The area is designated as Zone A on the Flood Insurance Rate Map.
- 1201.02 Base Flood. The flood having a one percent (1%) chance of being equaled or exceeded in any given year.
- 1201.03 Basement. Any area of the building having its floor subgrade (below ground level) on all sides.
- 1201.04 Building. See Structure.
- 1201.05 Breakaway Wall. A wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or supporting foundation.
- 1201.06 Development. Any man-made change to improved or unimproved real estate, including, but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operation or storage of equipment or materials.
- 1201.07 FEMA. Federal Emergency Management Agency.
- 1201.08 Flood or Flooding. A general and temporary condition of partial or complete inundation of normally dry land areas from:
- a. The overflow of inland or tidal waters.
  - b. The unusual and rapid accumulation or runoff of surface waters from any source.
- 1201.09 Flood Elevation Study. An examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevation, or an examination, evaluation and determination of mudslide (i.e., mudflow) and/or flood related erosion hazards.
- 1201.10 Flood Hazard Boundary Map. (FHBM) an official map of a community, issued by the Federal Emergency Management Agency, where the boundaries of the flood, mudslide (i.e., mudflow) related erosion areas having special hazards have been designated as Zones A, M, and/or E.
- 1201.11 Flood Insurance Rate Map. (FIRM) an official map of a community, on which the Federal Emergency Management Agency has delineated both the special hazard areas and the risk premium zones applicable to the community.
- 1201.12 Flood Insurance Study. See Flood Elevation study.

- 1201.13 Flood Plain or Flood-Prone Area. Any land area susceptible to being inundated by water from any source (see definition of flooding).
- 1201.14 Floodproofing. Any combination of structural and non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.
- 1201.15 Floodway. See Regulatory Floodway.
- 1201.16 Functional Dependent Use. A use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship facilities, but does not include long-term storage or related manufacturing facilities.
- 1201.17 Highest Adjacent Grade. Means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.
- 1201.18 Historic Structure. Any structure that is:
- a. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
  - b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
  - c. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
  - d. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
    1. By an approved state program as determined by the Secretary of the Interior, or
    2. Directly by the Secretary of the Interior in states without approved programs.
- 1201.19 Lowest Floor. The lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a buildings lowest floor provided that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this Ordinance.
- 1201.20 Mean Sea Level. For purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.
- 1201.21 Manufactured Home. A structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. For floodplain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on a site for greater than 180 consecutive days. This includes manufactured homes located in a manufactured home park or subdivision.

- 1201.22 Manufactured Home Park or Subdivision. A parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.
- 1201.23 New Construction. For the purposes of determining insurance rates, structures for which the “start of construction” commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, “new construction” means structures for which the “start of construction” commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.
- 1201.24 100-year Flood. See Base Flood.
- 1201.25 Recreational Vehicle. A vehicle which is (i) built on a single chassis; (ii) 400 square feet or less when measured at the largest horizontal projection; (iii) designed to be self-propelled or permanently towable by a light duty truck, and (iv) designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.
- 1201.26 Regulatory Floodway. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot at any point. These areas are designated as floodways on the Flood Boundary and Floodway Maps.
- 1201.27 Riverine. Relating to, formed by, or resembling a river (including tributaries), stream, brook, etc.
- 1201.28 Special Flood Hazard Area. See “Area of Special Flood Hazard”.
- 1201.29 Structure. For floodplain management purposes, a walled and roofed building, including a gas or liquid storage tank, that is principally above ground, as well as a manufactured home.
- 1201.30 Start of Construction. Includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds, not occupied as dwelling units or not part of the main structure.
- 1201.31 Substantial Damage. Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.
- 1201.32 Substantial Improvement. Any combination of repairs, reconstruction, alteration, or improvements to a structure in which the cumulative cost equals or exceeds fifty (50) percent of the market value of the structure. The market value of the structure should be (1) the appraised value of the structure prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage occurring. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or any alteration of a structure listed on the National Register of Historic Places.

1201.33 *Violation.* The failure of a structure or other development to be fully compliant with the community's flood plain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44CFR Chapter I, part 60.3(b)(5), (c)(4), (c)(10), (d)(3), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided.

1201.34 *Water Surface Elevation.* The height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, (or other datum, where specified) of floods of various magnitudes and frequencies in flood plains of coastal or riverine areas.

## **1202.00 Provisions**

1202.01 All proposed development in any special flood hazard areas shall require a permit.

1202.02 The Building Inspector shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is in a flood-prone area, all new construction and substantial improvements shall;

- a. be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic load, including the effects of buoyancy,
- b. be constructed with materials resistant to flood damage,
- c. be constructed by methods and practices that minimize flood damages,
- d. be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located components during conditions of flooding.

1202.03 Where new and replacement water and sewer systems (including on-site systems) are proposed in flood-prone areas the applicant shall provide the Building Inspector with assurance that new and replacement sanitary sewage systems will be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems will be located to avoid impairment to them or contamination from them during periods of flooding.

1202.04 The Building Inspector shall maintain for public inspection, and furnish upon request, any certification of flood-proofing and the as built elevation (in relation to mean sea level) of the lowest floor (including basement) of all new or substantially improved structures, and include whether or not such structures contain a basement. If the structure has been floodproofed, the as built elevation (in relation to mean sea level) to which the structure was floodproofed. This information must be furnished by the applicant.

1202.05 The Building Inspector shall review proposed developments to assure that all necessary permits have been received from those governmental agencies from which approval is required by Federal or State law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334. It shall be the responsibility of the applicant to certify these assurances to the Building Inspector.

1202.06 In riverine situations, prior to the alteration or relocation of a watercourse, the applicant for such authorization shall notify the Wetlands Bureau of the New Hampshire Department of Environmental Services and submit copies of such notification to the Building Inspector, in addition to the copies

required by the RSA 482-A:3. Further, the applicant shall be required to submit copies of said notification to those adjacent communities as determined by the Building Inspector, including notice of all scheduled hearings before the Wetlands Bureau.

With the altered or relocated portion of any watercourse, the applicant shall submit to the Building Inspector, certification provided by a registered professional engineer assuring that the flood carrying capacity of the watercourse has been maintained.

Along watercourses that have a designated Regulatory Floodway no encroachments, including fill, new construction, substantial improvements, and other development are allowed within the designated Regulatory Floodway that would result in any increase in flood levels within the community during the base flood discharge. The Building Inspector shall obtain, review, and reasonably utilize any floodway data available from a Federal, State, or other source as criteria for requiring that all developments located in Zone A meet the floodway requirements: *“No encroachments, including fill, new construction, substantial improvements and other developments are allowed within the floodway that would result in any increase in flood levels with the community during the base flood discharge”*.

1202.07 In Zone A, the Building Inspector shall obtain, review and reasonably utilize any 100-year flood elevation data available from any Federal, State or other sources including data submitted for development proposals submitted to the community (i.e., subdivisions, site plan approvals).

1202.08 The Building Inspector's 100 year flood elevation determination will be used as criteria for requiring in Zone A that:

- a. All new construction and substantial improvements of residential structures have the lowest floor (including basement) elevated to or above the 100 year flood level;
- b. All new construction and substantial improvements of nonresidential structures have the lowest floor (including basement) elevated to or above the 100 year flood level; or together with attendant utility and sanitary facilities, shall;
  1. Be floodproofed so that below the 100 year flood elevation the structure is watertight with walls substantially impermeable to the passage of water or be constructed with materials resistant to flood damage;
  2. Have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy and;
  3. Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section;
- c. All manufactured homes to be placed or substantially improved within special flood hazard areas shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the base flood level; and be securely anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces;
- d. Recreational vehicles placed on sites within Zone A shall either (i) be on the site for fewer than 180 consecutive days, (ii) be fully licensed and ready for highway use, or (iii) meet all standards of 44CFR Chapter I part 60.3 (b) (1) of the National Flood Insurance Program regulations and

the elevation and anchoring requirements for Manufactured Homes in paragraph (c) (6) of section 60.3

- e. For all new construction and substantial improvements, fully enclosed areas below the lowest floor that are subject to flooding are permitted providing the enclosed areas meet the following requirements:
  - 1. The enclosed area is unfinished or flood resistant, usable solely for parking of vehicles, building access or storage;
  - 2. The area is not a basement;
  - 3. Shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria:
    - a) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
    - b) The bottom of all openings shall be no higher than one foot above grade.
    - c) Openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters;

*1202.09* This Ordinance may be amended by a majority vote of any legal Town meeting when such amendment is included in the Official Town Warrant.

*1202.10* It shall be the duty of the Selectboard to enforce the provisions of this Ordinance.

*1202.11* The Building Inspector shall not in any case be liable for any damage resulting from construction done under his permit whether or not such construction is in conformity with the provisions of the Ordinance.

*1202.12* The invalidity of any provision or part of a provision of this Ordinance shall not affect the validity of any other provisions.

*1202.13* Every person, persons, firm, or corporation violating any of the provisions of this Ordinance shall be fined as determined by the Selectboard for each day such violation may exist.

### ***1203.00 Variance and Appeals Procedure***

*1203.01* Any order, requirement, decision or determination of the building inspector made under this Ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.

*1203.02* If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I(b), the applicant shall have the burden of showing in addition to the usual variance standards under state law:

- a. that the variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expense.
- b. that if the requested variance is for activity within a designated regulatory floodway, no increase in flood levels during the base flood discharge will result.

c. that the variance is the minimum necessary, considering the flood hazard, to afford relief.

*1203.03* The Zoning Board of Adjustment shall notify the applicant in writing that: (i) the issuance of a variance to construct below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction below the base flood level increases risks to life and property. Such notification shall be maintained with a record of all variance actions.

*1203.04* The community shall (i) maintain a record of all variance actions, including their justification for their issuance, and (ii) report such variances issued in its annual or biennial report submitted to FEMA's Federal Insurance Administrator.

## **1300.00 *AQUIFER PROTECTION ORDINANCE***

### **1301.00 *Purpose and Intent***

The Town of Brookline adopts this Ordinance for the promotion of the health, safety, and general welfare of its residents by preserving, maintaining and protecting from contamination the existing and potential ground water resources of the Town and protecting the surface waters that are fed by groundwater. The purpose is to be accomplished by regulating land use practices generally related to commercial-industrial land use (such as but not limited to the disposal or storage of solid wastes, sludge, subsurface waste disposal, road salting materials, gas or other petroleum products), and including home businesses, that might reduce the quality of water that is now -- and in the future will be -- available for use by municipalities, individuals and industries.

### **1302.00 *Definitions***

Any term not defined here shall have the same meaning as defined in Section 200 of this Ordinance.

1302.01 *Aquifer*. Geologic formation composed of rock, stratified sand and/or gravel that contains significant amounts of potentially recoverable water.

1302.02 *Domestic Wastewater*. Wastewater from human sanitary uses including, but not limited to bathing, clothes washing and toilets.

13.02.03 *Ground Water*. Subsurface water that occurs beneath the water table in soils and geologic formations. In this Ordinance the term refers to the slowly moving subsurface water present in aquifer recharge areas.

1302.04 *Hazardous Waste*. Materials or liquids that pose a threat to the environment, whether in use, storage, or transit, including without exception hazardous wastes identified and listed in accordance with the State of New Hampshire Department of Environmental Services Hazardous Waste Rules, Env-Wm 110-1000.

1302.05 *Impervious*. Not readily permitting the infiltration of water.

1302.06 *Impervious Surface*. A surface through which regulated substances cannot pass when spilled. Impervious surfaces include concrete unless unsealed cracks or holes are present. Asphalt, earthen, wooden, or gravel surfaces, or other surfaces which could react with or dissolve when in contact with the substances stored on them are not considered impervious surfaces.

1302.07 *Junkyard*. Any business and any place of storage or deposit, whether in connection with another business or not, which has stored or deposited 2 or more unregistered motor vehicles which are no longer intended or in condition for legal use on the public highways, or used parts of motor vehicles or old iron, metal, glass, paper, cordage, or other waste, or discarded or secondhand material which has been a part, or intended to be a part, of any motor vehicle, the sum of which parts or material shall be equal to 2 or more motor vehicles. Junk yard shall also include any place of business or storage or deposit of motor vehicles purchased for the purpose of dismantling the vehicles for parts or for use of the metal for scrap and where it is intended to burn material which are parts of a motor vehicle or cut up the parts thereof. This definition includes garbage dumps and sanitary landfills. This definition does not include any motor vehicle dealers registered with the director of motor vehicles under RSA 261:104 and controlled under RSA 236:126.

- 1302.08 Leachable Wastes. Waste materials, including solid wastes, sludge and agricultural wastes that are capable of releasing contaminants to the surrounding environment.
- 1302.09 Non-Conforming Use. Any building or land lawfully occupied by a use at the time of passage of the Ordinance or amendment thereto which does not conform after the passage of this Ordinance or amendment thereto with the regulations of the district in which it is situated.
- 1302.10 Non-domestic Wastewater. Wastewater generated from other than human sanitary uses including but not limited to industrial and commercial wastewater, and a combination of domestic and non-domestic wastewater (for example a home business that would generate wastewater amounts in excess of a normal household).
- 1302.11 Outdoor Storage. Storage of materials where they are not protected from the elements by a roof, walls and a floor with an impervious surface.
- 1302.12 Protective Well Radius. The area around a well which must be maintained in its natural state as required by Env-Ws 378 or 379 (for community water systems) and Env-Ws 372.13 (for other public water systems).
- 1302.13 Public Water System. A system for the provision to the public of piped water for human consumption, if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year.
- 1302.14 Regulated Substance. Petroleum, petroleum products, including gasoline; and substances listed under 40 CFR 302, 7-1-90 edition, excluding the following substances: ammonia; sodium hypochlorite; sodium hydroxide; acetic acid; sulfuric acid; potassium hydroxide; potassium permanganate; and propane and other liquefied fuels which exist as gases at normal atmospheric temperature and pressure.
- 1302.15 Secondary Containment. A structure such as a berm or dike with an impervious surface which is adequate to hold at least 110% of the volume of the largest regulated substances container that will be stored there.
- 1302.16 Solid Wastes. Useless, unwanted, or discarded solid material with insufficient liquid content to be free flowing. This includes but is not limited to rubbish, garbage, scrap materials, junk, refuse, inert fill material, landscape refuse and sludge.
- 1302.17 Structure. Anything constructed or erected, except a boundary wall or fence, the use of which requires location on the ground or attachment to something on the ground. For the purposes of this Ordinance, buildings are structures.
- 1302.18 Surface Water. Streams, lakes, ponds and tidal waters, including marshes, water courses, and other bodies of water, natural or artificial.

**1303.00 District Boundaries**

The extent of the Aquifer Protection District shall be the outermost edge of the surficial extent of all aquifer deposits presently designated as stratified drift, as supported by information included in the U.S.G.S. (United States Geological Survey) Aquifer Delineation study entitled "Geohydrologic Appraisal of the Nashua Area, South-central New Hampshire, by K. W. Toppin, (1986)" or most recent studies. The Aquifer Protection District is a zoning overlay district which imposes additional requirements and restrictions to those of the underlying, base district. In all cases, the more restrictive requirement(s) and permitted uses shall apply.

**1304.00 Permitted Uses**

Permitted uses, with the exception of those expressly prohibited in Section 1305.00, shall be the same as the underlying zoning districts within which the aquifer lies. All uses must comply with the Performance Standards unless specifically exempt under Section 1309.00. Other permitted uses are:

- a. Industrial or commercial uses, including home businesses, which do not discharge non-domestic wastewater on site (domestic wastewater only in approved septic systems);
- b. Residential and Agricultural Development;
- c. Other Uses:
  1. Activities designed for conservation of soil, water, plants, and wildlife.
  2. Outdoor recreation, nature study, boating, fishing and hunting where otherwise legally permitted.
- d. Subsurface storage of propane/liquefied natural gas.

**1305.00 Prohibited Uses**

The following uses are prohibited:

- a. Outdoor storage and disposal of solid wastes, other than above ground brush and stump dumps less than 6 (six) feet above the E.S.H.W.T. (Estimated Seasonal High Water Table);
- b. **Any** storage of regulated substances, including gasoline, and the subsurface transmission of regulated substances, including gasoline, through pipelines, except by conditional use permit approval;
- c. The disposal of non-domestic wastewater, including animal manure;
- d. The covering of more than 15% of the lot in the Residential Zone and 15% of the lot in the Commercial-Industrial Zone by impervious surfaces, except by conditional use permit approval;
- e. Storage of road salt or other de-icing chemicals unless covered and on an impervious surface with berms on any open sides;
- f. Excavation of sand or gravel, excepting fire ponds and operations conducted in accordance with an approved Earth Removal Permit issued pursuant to Section 1000 of the Town of Brookline Zoning Ordinance where such operations will be permitted to within 6 (six) feet of the ESHWT;
- g. Storage/treatment/disposal of hazardous waste or the siting or operation of a hazardous waste disposal facility as defined under RSA 147-A;
- h. Dumping of snow containing de-icing chemicals brought in from other parts of town(s);
- i. The siting or operation of a junkyard;
- j. The siting or operation of a wastewater or septage lagoon; and
- k. The siting or operation of a solid waste landfill.

**1306.00 Conditional Uses**

1306.01 The Planning Board may grant a conditional use permit for a use which is otherwise permitted within the underlying district, if the use is or involves:

- a. Above ground storage, handling and use of regulated substances in quantities exceeding 100 gallons (aggregate) or 800 pounds dry weight (aggregate) at any one time, provided that an adequate plan is in place to prevent, contain and minimize releases from catastrophic events such as spills or fires which may cause large releases of regulated substances.
- b. Any use that will render impervious more than 15% or 2,500 square feet of any lot, whichever is greater, up to a maximum of 30% of a lot in the Residential District and 60% of the lot in the Industrial-Commercial District, provided that the Planning Board finds in its judgment, that the proposed additional impervious area can be implemented without unreasonable departure from the purposes of the Aquifer Protection District.

Any applicant granted such a Conditional Use Permit by the Planning Board shall be required to adhere to the following additional conditions in the conduct of the use:

1. No use may be conducted on the site which is the subject of the Conditional Use Permit that is a Prohibited Use defined under Section 1305.00
2. Any such use will continuously be conducted so as to be in compliance with the applicable Performance Standards of Section 1307.
3. The use shall be maintained in compliance with all applicable local, state and federal requirements.

1306.02 The Planning Board may, at its discretion, require a performance guarantee or bond, in an amount and with surety conditions satisfactory to the Board, to be posted to ensure completion of construction of any facilities required for compliance with the Performance Standards.

**1307.00 Performance Standards**

The following Performance Standards apply to all uses in the Aquifer Protection District unless exempt under Section 1309.00.

- a. For any use that will render impervious more than 15% or more than 2,500 square feet of any lot, whichever is greater, a stormwater management plan shall be prepared which the Planning Board determines is consistent with the Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire, Rockingham County Conservation District, August 1992, and Best Management Practices for Urban Stormwater Runoff, NH Department of Environmental Services, January 1996, as updated and amended.
- b. Stormwater management plans prepared pursuant to Paragraph a. shall demonstrate that stormwater recharged to groundwater will not result in violation of Ambient Groundwater Quality Standards (Env-Wm 1403) at the property boundary.
- c. Animal manure, fertilizers, and compost must be stored in accordance with the Manual of Best Management Practices for Agriculture in New Hampshire, NH Department of Agriculture, Markets and Food, August 1998, and any subsequent revisions.
- d. All regulated substances stored in containers with a capacity of 5 gallons or more must be stored in product-tight containers on an impervious surface designed and maintained to prevent flow to

exposed soils, floor drains and outside drains in accordance with Env-Wq 401, Best Management Practices for Groundwater Protection (formerly Env-Ws 421).

- e. Facilities where regulated substances are stored must be inspected bi-weekly by the facility owner or his designate and must be secured against unauthorized entry by means of doors and/or gates which are locked when authorized personnel are not present.
- f. Outdoor storage areas for regulated substances must be protected from exposure to precipitation and must be located at least 50 feet from surface water or storm drains, at least 75 feet from private wells and outside the protective well radius of public water supplies, in accordance with Env-Wq 401.
- g. Secondary containment must be provided for outdoor storage of regulated substances in an aggregate of 275 gallons or more on any particular property, in accordance with Env-Wq 401.
- h. Containers in which regulated substances are stored must be clearly and visibly labeled and must be kept closed and sealed when material is not being transferred from one container to another.
- i. Whenever a business is required to notify the NH Department of Environmental Services (DES) of a release, including but not limited to the requirements of Env-Wm 4112 and Env-Wm 1403, the Town of Brookline Emergency Management (EM) Director must also be notified. Furthermore, the EM Director must also be notified when a business notifies the NH DES of a failed tank tightness test.

#### **1308.00 Existing Non-Conforming Uses**

Existing nonconforming uses may continue without expanding or changing to another nonconforming use, but must be in compliance with all applicable state and federal requirements, including Env-Wq 401, Best Management Practices and Performance Standards c, d, e and h of Section 1307.

#### **1309.00 Exemptions**

The following uses are exempt from the specified provisions of this Ordinance as long as they are in compliance with all applicable local, state and federal requirements.

- a. Any private residence is exempt from all Performance Standards except 1307.00 c. Animal wastes shall be handled in accordance with a manure storage and management plan approved by the Hillsborough County Conservation District.
- b. Any business or facility, including home businesses, where regulated substances are in quantities of less than 5 gallons is exempt from Performance Standards 1307.00 e through g.
- c. Storage of heating fuels for on-site use or fuels for emergency electric generation provided that storage tanks are indoors on a concrete floor or have corrosion control, leak detection for both tank and piping, and secondary containment in place is exempt from Performance Standard 1307.00 e.
- d. Storage of motor fuel in tanks attached to vehicles and fitted with permanent fuel lines to enable the fuel to be used by that vehicle is exempt from Performance Standards 1307.00 e through h.
- e. Storage and use of office supplies is exempt from Performance Standards 1307.00 e through h.

- f. Temporary storage of construction materials on a site where they are to be used is exempt from Performance Standards 1307.00 e through g.
- g. The sale, transportation and use of pesticides, if compliant with RSA 430:49 XXVL, are exempt from all provisions of this Ordinance.
- h. Household hazardous waste collection projects regulated under NH Code of Administrative Rules Env-Wm 401.03(b)(1) and 501.01(b) are exempt from Performance Standards 1307.00 e through g.
- i. Underground storage tank systems and aboveground storage tank systems that are in compliance with applicable state rules are exempt from inspection under Section 1310.00 of this Ordinance provided adequate documentation, including but not limited to state tank registrations, state permit to operate, inventory monitoring records and tank tightness test, is available and is on file with the Brookline Fire Department and the Emergency Management Director.

**1310.00 Maintenance and Inspection**

1310.01 For uses requiring Planning Board approval for any reason, a narrative description of maintenance requirements for structures required to comply with the Performance Standards shall be recorded so as to run with the land on which the structures are located at the Hillsborough County Registry of Deeds. The description shall comply with the requirements of RSA 478:4-a.

1310.02 Inspections

- a. Inspections may be required to verify compliance with Performance Standards. Such inspections will be performed by the Conservation Commission at reasonable times with prior notice to the landowner.
- b. All properties within the Aquifer Protection District known to the Conservation Commission as using or storing regulated substances in containers with a capacity of 5 gallons or more, except for facilities where all regulated substances storage is exempt from this Ordinance under Section 1309.00, shall be subject to inspections under this section.
- c. The Selectboard may require a fee for compliance inspections. The fee shall be paid by the property owner. A fee schedule shall be established by the Selectboard as provided for in RSA 41-9:a.

**1311.00 Releases and Tank Tightness Test Failures**

Whenever a business is required to notify the NH Department of Environmental Services of a release, including but not limited to the requirements of Env-Wm 4112 and Env-Wm 1403, the Town of Brookline Emergency Management Director must also be notified. Furthermore, the EM Director must also be notified when a business notifies the NH DES of a failed tank tightness test.

**1312.00 Administration**

All subdivision proposals and other proposed new developments within the Aquifer Protection District shall be reviewed by the Planning Board and shall conform to the provisions of this Ordinance, and further shall assure that:

- a. All such proposals are consistent with the need to protect the groundwater of the Town of Brookline and adjacent communities;

- b. For the purpose of minimizing or eliminating leakage or discharges from septic systems into the groundwater, all systems shall be at least 4 (four) feet above the estimated seasonal high water table;
- c. On-site waste disposal systems shall be located to avoid or minimize groundwater contamination;
- d. Streets, roads, and parking areas are constructed so that direct application of road salt is not required for winter safety, and so that runoff from such uses is channeled to avoid or minimize groundwater contamination;
- e. Any increase in surface storm water generated by development is kept on-site and handled in such a manner as to allow the water to infiltrate into the ground before leaving the site;
- f. Written approval of the State of New Hampshire Water Supply and Pollution Control Division has been obtained.

**1313.00 Conservation Commission Review**

The Conservation Commission shall review, within a reasonable time (not to exceed 60 days from date of submittal of a plan to the Planning Board), each plan for development in the Aquifer Protection District and shall make a recommendation to the Planning Board to approve, approve with conditions and/or recommendations, or disapprove the plan, with reasons for disapproval.

**1314.00 Incorrectly Delineated Zones**

Where the bounds, as delineated, are in doubt or in dispute, the burden of proof shall be upon the owner(s) of the land in question to show where they should be properly located. At the request of the owner(s), the Town may engage a professional geologist or soil scientist to determine more accurately the location and extent of an aquifer, and may charge the owner(s) for all or part of the cost of the investigation. The delineation can be modified by the Planning Board upon receipt of findings of the detailed on-site survey techniques.

**1315.00 Enforcement**

These regulations shall be enforced by the Selectboard or its duly authorized representatives.

**1316.00 Validity and Conflict with Other Ordinances**

*1316.01* Validity. Should any section or provisions of this Ordinance be declared by the courts to be invalid, such decision shall not invalidate any other section or provision of this Ordinance.

*1316.02* Conflict With Other Ordinances. This Ordinance shall not repeal, annual, or in any way impair or remove the necessity of compliance with any other ordinance, law, regulation or by-law. Where this Ordinance imposes a higher standard for the promotion and protection of health, safety and welfare, the provisions of this Ordinance shall prevail.

***1400.00 GROWTH MANAGEMENT / RESIDENTIAL PHASING ORDINANCE***

**Deleted March 2011**

(Reference to HB 1260 and NHRSA 674:22 and 23 – Effective July 8, 2008)

**1500.00 OPEN SPACE DEVELOPMENT**

Open Space Development is necessary to meet the goals established in this article and in the Brookline Master Plan. Therefore, an Open Space Development plan will be required for all developments of the minimum tract size or greater. An Open Space Development plan will not be required when in the judgment of the Planning Board topography, wetlands, soils or other considerations prevent the proposal from accomplishing the purposes of this article, or when an Open Space Development is unnecessary to meet the purposes of this Ordinance. All conventional subdivision plan applicants shall submit evidence to the Planning Board, at a public hearing, documenting the constraints that make a conventional subdivision a preferable choice.

**1501.00 Purpose**

- a. To promote the conservation of the natural environment, and the development of the community in harmony with the natural features of the land.
- b. To provide for an efficient use of land, streets, and utility systems.
- c. To stimulate alternative approaches to land and community development.
- d. To establish living areas within the Town that provide for a balance of community needs, such community needs as adequate recreation and open space areas, and pedestrian and vehicular safety.
- e. To maintain the rural character of Brookline.
- f. To maintain the current density of Brookline (1 unit per 80,000 sq. ft.)
- g. To promote residential construction on the most appropriate and buildable areas of a tract of land.

**1502.00 Zone/Location**

1502.01 The use of an Open Space Development is limited to the Residential-Agricultural District as shown on the Zoning Map.

**1503.00 Permitted Uses**

1503.01 All uses allowed in the Residential-Agricultural District are allowed in an Open Space Development.

**1504.00 Open Space**

1504.01 All land not devoted to house lots, roads, and driveways shall be set aside as permanent open space.

1504.02 A minimum of thirty-five (35) percent of the gross tract area shall be set aside as open space for low-impact recreation, agriculture, or conservation uses, intended for the use and enjoyment of the residents of this development and/or the general public. This open space shall be permanently restricted through easement or deed. Though the open space cannot be resubdivided, accessory structures and improvements appropriate for low-impact recreation, agriculture, or conservation uses are allowed subject to Planning Board approval.

1504.03 Not more than 45 percent of the open space shall consist of open water, wetlands and slopes greater than 25 percent.

**1505.00 Dimensional Requirements**

1505.01 *Density.* The maximum density of an Open Space Development shall be the same as for a conventional development in the Residential-Agricultural District. An Open Space Development shall have no more lots than can be created using conventional development on the same land.

1505.02 *Frontage.* 80 feet minimum per lot.

1505.03 *Setbacks.* 15 foot setback from the front, rear, and side per lot, measured from the property lines.

1505.04 *Site Perimeter Buffer.* Each development must be situated within a permanently protected undeveloped site perimeter buffer, where no structure shall be built, identified on the site plan, not less than **50 feet** wide or a value as deemed necessary by the Planning Board on all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall not count towards the required minimum protected open space.

1505.05 *Lot Size.* Each building lot shall have a minimum of 1 acre, excluding wetlands. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A two-family structure shall require two times the minimum land area.

1505.06 *Development Tract Size.* An Open Space Development tract shall have a minimum of 20 acres.

**1506.00 Open Space Ownership and Management**

1506.01 The open space shall be conveyed to a homeowners association whose membership includes all the owners of lots or units contained in the tract. Where the Planning Board feels that it is in the best interests of the Town, this land may be conveyed to the Town or shall be permanently protected in other suitable ways which would ensure the continued use of the land for intended purposes and proper maintenance of the land. A pre-conveyance open space conservation easement deed shall be recorded and shall have an easement sunset upon conveyance to the Town or homeowner association.

1506.02 The developer shall be responsible for the formation of the homeowners association of which the developer or owner shall be a member until a majority of the lots of record are sold.

1506.03 The homeowners association shall be structured so as to provide that the membership and obligation of unit purchasers in the homeowners association will be automatic upon the conveyance of title or lease of dwelling units.

1506.04 Open Space Development land which counts towards the minimum open space requirements or towards the minimum lot size cannot be put in current use.

**1507.00 Procedures**

1507.01 All Open Space Developments, as is the case with conventional developments, shall go through the subdivision review process and meet the review criteria as outlined in the subdivision regulations.

**1508.00 Other Provisions**

1508.01 All Open Space Developments must also meet the requirements listed in other articles of this Zoning Ordinance, except those which are superseded in this article.

**1600.00 SIGN ORDINANCE**

**1601.00 Purpose and Intent**

The purpose of this Ordinance is to:

- a. Encourage the effective use of signs as a means of communication in the Town of Brookline,
- b. Preserve the aesthetics and rural character of Brookline,
- c. Enhance pedestrian and vehicle traffic safety,
- d. Encourage signage and lighting which aid communication, orientation, identify activities, and express local history and character,
- e. Retain the Town's ability to attract and encourage economic development and growth,
- f. Address new technologies,
- g. Enable fair and consistent enforcement of the sign regulations.

**1602.00 Conditional Use Permit (new section)**

Any signs, banners, flags, or other advertising devices covered under this ordinance shall require the issuance of a Conditional Use Permit by the **Planning Board** pursuant to RSA 674:21 and in accord with procedures established by the Planning Board, **unless** the proposed sign fully complies with the provision of this ordinance, in which case the Building Inspector may issue a sign permit. If the Building Inspector issues a permit for a fully compliant sign, he shall submit a record of such permit to the Planning Board, which shall include the dimensions of the sign, the lighting (if any) of the sign and a photograph or accurate and to scale rendering of the sign. If the application requires a waiver of any provision, no matter how minor, the applicant shall apply to the Planning Board, which shall consider the application for a waiver during a regularly scheduled public hearing with notice to abutters and the public.

**1602.01** The Planning Board, in its review of a Conditional Use application, shall conduct a hearing and the Planning Board shall grant approval for such conditional use only upon a showing by the applicant that the proposal meets the following requirements:

- (a) The use is specifically authorized in the Ordinance as a conditional use,
- (b) If completed as proposed by the applicant, the development in its proposed location will comply with all requirements of this section, and with the specific conditions or standards established in this Ordinance for the particular use,
- (c) The use will be compatible with the neighborhood and with adjoining or abutting uses in the area in which it to be located,
- (d) The use will not have a substantial adverse impact on vehicular or pedestrian safety,
- (e) The use will not have a substantial adverse impact on the appearance and visual quality of the surrounding neighborhood. In evaluating visual impact, the Planning Board may consider architectural and design elements, and
- (f) The use will be adequately serviced by necessary public utilities and by community facilities and services of a sufficient capacity to ensure the proper operation of the proposed use.

**1602.02 Stipulations of Approval** - In granting a Conditional Use Permit application, the Planning Board may attach reasonable conditions to its approval, including but not limited to the

phasing of a development, where such conditions are shown to be necessary to further the objectives of this Ordinance or the Master Plan, or which would otherwise allow the general conditions of this Section to be satisfied. Representations made at a public hearing or in material submitted to the Planning Board by an applicant in order to obtain a Conditional Use Permit shall be deemed to be conditions of the issuance of the permit. The Planning Board may require that conditions of approval be annotated on a Site Plan or Subdivision plat, or otherwise recorded at the Hillsborough County Registry of Deeds. In the case of approval conditions, a Conditional Use Permit shall be null and void unless all such conditions have been fulfilled within six (6) months, or other time limit as approved. Following fulfillment of approval conditions, or from date of approval if there are no approval conditions, a Conditional Use Permit shall be null and void if active and substantial development or building has not begun within two (2) years, unless approved for a longer period of time. A Conditional Use Permit so implemented continues with the land, irrespective of ownership.

**1603.00 General Provisions**

1603.01 Sign Permits. Unless specifically exempted or otherwise regulated in this ordinance, a permit is required for all permanent signs.

1603.02 Application. Any person intending to erect or make a major alteration to a sign shall, before doing so, obtain a permit from the Building Inspector. Repairs, general upkeep, and minor alterations of wording and graphics shall be exempt from the permit process.

Applicants shall submit design documents that include:

- a. A scale drawing of the proposed sign, showing size, height, lighting, and single or double sided.
- b. All proposed materials shall be indicated, including the support system configuration and design.
- c. The location of the proposed sign on the lot shall be included, showing all dimensions and measurements to property lot lines, principal building, edge of roadways and other permanent structures.

1603.03 Fees. Permit fees shall be established by the Selectboard and paid upon application.

1603.04 Administration.

- a. Reviews
  1. The Building Inspector shall review and act upon all applications for sign permits and amendments thereto, within 5 working days after filing. If the application or amendment conforms to the Sign Ordinance and is complete, the Building Inspector shall issue the sign permit. If the application or amendment does not conform or is not complete, the Building Inspector shall notify the applicant in writing, stating any deficiencies and advising the applicant of the right to amend and resubmit the application.
  2. Any permit issued shall become invalid if the sign is not erected within 6 months after the date of issuance.

b. Appeal

*Any persons aggrieved by a Planning Board decision on a Conditional Use Permit may appeal that decision to the Superior Court, as provided for in RSA 677:15. A Planning Board decision on the issuance of a Conditional use Permit cannot be appealed to the Zoning Board of Adjustment (RSA 676:5, III)*

c. Violations

If the Building Inspector finds that any sign does not comply with this ordinance or is in his opinion unsafe, or in disrepair, then he shall immediately notify the owners to correct the improper condition. Owners or any other persons violating any of the provisions of the zoning ordinance shall be subject to a fine as authorized by RSA 676:17, and may also be subject to other enforcement procedures as authorized by RSA 676. Per the provisions of 676:17 (II), in the event that any legal action is brought by the Town to enforce this ordinance by way of injunctive relief or to seek the payment of any fine levied per RSA 676:17, the Town shall recover its costs and reasonable attorney's fees actually expended in pursuing the legal action if it is found to be prevailing party in the action.

1603.05 Exempt Signs. The following signs are exempt from this ordinance but must comply with other applicable State Regulations:

- a. Political signs.
- b. Event Specific signs for non-profit organizations.
- c. Historical signs/plaques.
- d. Trail signs.
- e. Official notices authorized by a court, public body or public safety official.
- f. Government signs.

1603.06 Trades signs. Trades people shall be allowed one temporary sign not to exceed 16 square feet on a property without a permit while their work is actively being performed on the property.

1603.07 Real Estate Signs. A real estate sign is a temporary sign advertising the sale, lease or rental of the property or premises upon which it is located.

Without review or approval, any sign advertising the sale, lease or rental of the premises, or a portion thereof, upon which the sign is located can remain until 15 days after the closing of the sale, the rental or lease of the premises. Any sign must conform to the following standards:

- a. Only one wall or ground sign per premises, two on corner lots.
- b. Maximum area: 6 square feet for residential signs, 32 square feet for Commercial-industrial signs.
- c. Off-site real estate signs advertising the location of a property for sale, an open house or a subdivision are limited to one sign per intersection per Real Estate Company. Name riders shall not be permitted on off premise signs. A maximum of two off premise for sale signs will be permitted for any particular property. In addition, two (2) open house signs may be displayed off-site. In the case of subdivision marketing and multiple listings by a real estate company, a maximum of two (2) off premise signs will be permitted.

1603.08 Subdivision Signs

- a. Signs **associated with the development, construction, and financing of a subdivision** are allowed only with Planning Board approval and shall be removed prior to the sale of the last lot and it shall be the responsibility of the owner of record to remove all signs associated with the development.
- b. The Town of Brookline reserves the right to take down such signs not removed within six (6) month after the issuance of the last Certificate of Occupancy.
- c. Signs “**Naming**” a new subdivision or “Estates’ signs (“White Pine Estates” for example) are allowed only with Planning Board approval. These signs shall be kept in good repair for reasons of public safety and aesthetics. It shall be at the discretion of the Building Inspector to require repair or removal.

1603.09 Prohibited Signs

- a. Wall signs that extend above the roof peak of the building.
- b. Moving, blinking, flashing and rotating signs that interfere, obstruct or impair vision or traffic or in any manner create a hazard to the health and welfare of the general public.
- c. Signs in the road right-of-way.
- d. Any other signs that interfere obstruct or impair vision or traffic or in any manner create a hazard to the health and welfare of the general public.
- e. Electronic message boards, video display panels or other electronic matrix display devices.
- f. Balloons, streamers or pinwheels except those temporarily displayed as part of a special sale, promotion or community event. For the purposes of this subsection, “temporarily” means no more than 20 days in any calendar year.

1603.10 Non-Conforming Signs (previously “Grandfather Clause” section)

- a. All **legally** existing signs which did not conform to the provisions of this ordinance on March 11, 2014, shall be considered non-conforming structures.
- b. **Continuance:** A nonconforming sign lawfully existing at the time of adoption or subsequent amendment of this Section may continue, although such sign does not conform to the provisions of this Section. Portable signs with permanent and/or changeable copy (including trucks and trailers) are exempt from treatment under this section for continuance and shall, therefore, require sign permits and compliance with the provisions of this Section.
- c. **Maintenance:** A non-conforming sign must be maintained in good repair for reasons of public safety and aesthetics. Ordinary maintenance and minor repairs shall not include replacement of the structural framing and supports, enlargement of the area of a sign face, or relocation of the sign.
- d. **Alteration, relocation and replacement:** Alterations, relocation and/or replacement of a legal non-conforming sign structure is permitted when damage or deterioration does not exceed fifty percent (50%) of the area of the sign and structure. A non-conforming sign that is damaged by

any casualty or force majeure may be replaced by an identical sign in the same location that is identical to the damaged sign. The replacement sign retains its status as a permitted, non-conforming use.

e. Removal: A non-conforming sign shall be removed within three hundred and sixty-five (365) days if any one of the following conditions exists:

1. If the damage or deterioration of the sign structure exceeds fifty percent (50%) of the area;  
or,
2. If the building to which the sign structure is accessory is damaged or demolished to an extent exceeding fifty percent (50%) of the building's appraised value and no plans have been submitted for the building's reconstruction or restoration pursuant to applicable codes and ordinances, or,
3. If the sign has been abandoned for at least three hundred sixty-five (365) days.

f. Any sign that has been removed due to any of the conditions listed in 1602.10 (e.) above shall not be replaced and any succeeding sign shall conform to the provisions of this Section. If any portion of the sign structure is removed, then all parts and components of the sign shall also be removed.

#### **1604.00 General Sign Requirements**

1604.01 Design guidelines. All signs shall be constructed of durable material and maintained in good condition at all times. Signs should complement the building on which they are located and add to the community image as a whole. Materials, color, lettering, and shape should be compatible with surrounding building materials, colors, and textures. Use of sandblasted, carved, or painted signs of traditional materials, such as wood, granite, or metal, is encouraged.

1604.02 Lighting. Lighting for the Commercial/Industrial district as well as Residential Home Businesses shall comply with the Lighting ordinance (Section 2300), with NFPA 70 as well as any requirements in this ordinance.

1604.03 Portable Signs: Portable signs shall be permitted only in the Commercial/Industrial District, subject to the following limitations:

- a. No more than one such sign may be displayed on any property.
- b. Such signs shall be displayed not more than 20 days in any calendar year.
- c. Any electrical portable signs shall comply with NFPA 70.
- d. No portable sign shall be displayed prior to obtaining a sign permit.

1604.04 Supporting structure. Size of supporting structure and framework not containing the signs are not included in computation of signs size.

1604.05 Maintenance. All signs shall be kept in a good repair for reasons of public safety and aesthetics. It will be at the discretion of the Building Inspector to require repair or removal.

#### **1605.00 Residential/Agricultural District Requirements**

1605.01 Number. Only **approved home businesses** are allowed one sign per street or road on which they have frontage. Corner lot properties are allowed one sign on each street or road.

1605.02 Size. Total square footage of signs shall be 32 square feet or less, with individual signs not exceeding 16 square feet. On two-sided signs, only one side is used to compute the sign's area.

1605.03 Height. Signs shall not exceed 8 feet in height. This is measured from the top of the sign to the surrounding grade of the ground.

1605.04 Lighting.

- a. Internally lit signs are not allowed.
- b. Bottom mounted sign lighting shall not be used.
- c. Hours of sign lighting must not exceed the hours of operation.

1605.05 Long-Term Temporary On-Premise Signs

- a. Number per site = 2
- b. Total Area per sign and permit: For properties consisting of less than 5 acres of land, maximum area permitted is 5 square feet. For properties 5 acres or larger, maximum area permitted is 12 square feet without a permit and 16 square feet with a permit
- c. Permit required for signs with an area greater than 12 square feet.
- d. Such signs shall be displayed no more than 6 months

1606.00 **Commercial/Industrial District Requirements**

1606.01 Requirements.

**Awning / Marquee / Canopy Signs**

- a. Number per site = 3
- b. Total area = 50% of the storefront's linear measure or maximum 100 square feet, whichever is less
- c. The total amount is included with the total allowed square footage of the Wall Signs

**Wall Signs**

- a. Number per store front = 1
- b. Total area = 50 % of the storefront's linear measure or maximum 100 square feet, whichever is less
- c. The total amount is included with the total allowed square footage of the awning/marquee/canopy signs

**Monument Signs**

- a. Number per site = 1
- b. Total area = 75 square feet
- c. Total height = 15 feet

**Directional Signs**

- a. Total area = 4 square feet
- b. Directional information ("in", "out", "parking", etc.) must be at least 65% of the area of the sign
- c. No permit required if part of Sign Master Plan

**Short-Term Temporary On-Premise Signs**

- a. Number per site = 2
- b. Total area per sign = 50 square feet
- c. Permit required for signs with an area greater than 12 square feet.
- d. Such signs shall be displayed no more than 14 days in any calendar year

**1607.00 Off-Premise Signs**

The purpose of this section is to allow permanent, off-premise signs to provide direction to businesses and points of interest.

**1607.01** Size. Off-premise signs shall conform to the following dimensions: 30 inches wide, 8 inches high. Letter size shall be a minimum of 3 inches and a maximum of 4 inches in height.

**1607.02** Number. No more than one off-premise sign is allowed per lot in the residential district, and no more than one sign per 100 feet of lot frontage in the commercial-industrial district.

**1608.00 Sign Master Plan**

Master Sign Plan Required: All landlords or single-owner controlled multiple-occupancy development complexes such as shopping centers, shall submit to the **Planning Board** a Master Sign Plan prior to the issuance of new sign permits. The Master Sign Plan shall establish standards and criteria for all signs in the complex that require permits, and shall address, at a minimum, the following:

- Proposed sign locations
- Materials
- Type of illumination
- Design of free-standing sign structures
- Size
- Quantity
- Uniform standards for non-business signage, including directional and informational signs

Development Complex Sign: In addition to the free-standing business identification signs otherwise allowed by this ordinance, every multiple-occupancy development complex shall be entitled to one free-standing sign per street front, at the maximum size permitted for business identification free-standing signs, to identify the development complex. No business identification shall be permitted on a development complex sign. Any free-standing sign otherwise permitted under this ordinance may identify the name of the development complex.

Compliance with Master Sign Plan: All applications for sign permits for signage within a multiple-occupancy development complex shall comply with the Master Sign Plan.

Amendments: Any amendments to an approved Master Sign Plan shall be approved by the Planning Board and must be signed and approved by the owner(s) within the development complex before such amendment will become effective.

1609.00 Conditional use Permit Application

**Brookline Planning Board  
Conditional Use Permit Sign Application**

This application must be submitted to the Planning Board Secretary /Town Planner at least 30 days prior to the date of the Planning Board meeting at which the applicant wishes to appear.  
(Section 3.2 of the Non-Residential Site Plan Regulations, Submission Procedure)

**1700.00 HOME BUSINESSES**

**1701.00 Purpose and Intent**

The Town of Brookline receives a relatively large number of applications for home-based businesses, owing to the rural character of the town and to the rising popularity of home employment due to technological advances. While the town may legally prohibit all commercial activities in the residential-agricultural district, it recognizes that many Home Businesses may be beneficial to the community as a whole and can be carried on with minimal or no impact on the neighborhood in which they are situated. Therefore, the Town of Brookline has determined that the right to conduct a home business should be subject to an initial screening by an appropriate land use board to determine if the proposed use complies with the standards enunciated herein and, upon such determination, the issuance of a special permit to conduct such use. Therefore, pursuant to RSA 674:21, the Planning Board is authorized to conduct a hearing on any request for a special permit to conduct a home business, and shall determine, at said hearing, whether the proposed use is compatible with the standards set forth below. The Planning Board, in exercising this authority, following hearing, may grant the permit, deny the permit, or grant the permit subject to reasonable restrictions, as it deems necessary to preserve the character of residential neighborhoods and to provide residents freedom from nuisance and potential negative impacts resulting from commercial activity in residential areas.

**1701.01 Definition of a Home Business**

A small-scale business operated within a residence and/or accessory structure whose primary commercial activity takes place at the location of the residence and/or the accessory structure *or* a business in which employees, other than employees who are residents of the home, are required to be on the property in a work related capacity. The business must be incidental and subordinate to the use of the lot for residential purposes and not detract from the residential character of the lot. All home businesses must comply with the criteria set forth in Section 1702.00 through Section 1706. (March 10, 2004)

**1702.00 General Requirements**

1702.01 A Home Business which is evident to the general public shall be required to apply for and obtain an approval pursuant to the Non-Residential Site Plan Review regulations adopted by the planning board that govern such uses. Evidence of the Home Business includes but is not limited to the following: increased traffic, external signs, external display of goods, vehicle or equipment parking and storage, septic expansion, and request for a building permit.

1702.02 The Home Business shall be secondary to the use of the property as a residence. The home business can occupy up to 25% of the combined gross floor area of the existing home and/or any accessory structures, or 1,500 sq.ft., whichever is less.

1702.03 No additions or changes shall be made to the residence that will make it impractical to revert the building to purely residential use.

1702.04 Objectionable circumstances such as noise, vibration, dust, smoke, excessive traffic, electrical disturbances, odors, heat, glare, visual disharmony or other offensive emissions shall not be produced in excess of that normally associated with residential use. .

- 1702.05 Home Businesses shall be conducted by the resident, resident members of the owner's family, a resident tenant, or resident members of the tenant's family. Two employees at any one time, in addition to home inhabitants, are permitted to work on the premises.
- 1702.06 All signs must comply with the requirements of Section 1600, Sign Ordinance.
- 1702.07 Home business activities apparent to the general public shall be limited to the hours between 8:00 a.m. and 7:00 p.m.
- 1702.08 Sufficient off-street parking shall be provided for any non-resident employees, customers and suppliers who may be normally expected to need parking spaces at one time. Driveways may be used for client parking.
- 1702.09 Home Businesses shall be conducted in accordance with all Town regulations, state laws and licensing requirements.
- 1702.10 Once a proposed home business has obtained a special permit from the Planning Board and operation of the use has commenced, the continuation of such use shall remain subject to compliance with the standards of this section. In the event that a home business is operated in a manner that violates the standards of this section, then the Building Inspector may direct such business to be brought into compliance, or, alternatively, to cease such violation. Any such directive shall be appealable to the Zoning Board of Adjustment pursuant to RSA 676:5.

**1703.00 *Non-Conforming Home Businesses***

- 1703.01 The following shall apply to any nonconforming home business in existence at the time of the passage of this ordinance, and as amended. Although such a home business may not conform to the standards specified in this section, the following provisions shall apply:
- a. No nonconforming home business may be extended to occupy a greater area of land upon which the business is situated than is owned by the property owner at the time of adoption of this ordinance, and as amended.
  - b. If any nonconforming use is discontinued, changed, or abandoned, any subsequent home business shall conform to the standards specified in this ordinance.
  - c. If any use is wholly discontinued for any reason, except pursuant to a valid order of a court of law, for a period of six months, it shall be conclusively presumed that such use has been abandoned, and all future home businesses shall comply with the standards of this ordinance.

**1704.00 *Day Care as a Home Business***

- 1704.01 Child day care operations operated out of a private home must comply with the standards provided herein. All day care operations must satisfy the applicable criteria as set forth in RSA 170-E and the rules of the New Hampshire Department of Health and Human Services.
- 1704.02 A child day care operation involving a household's own children and up to three (3) unrelated non-resident children does not require a home business site plan review and does not require a state license. However, such a day care operation must comply with all other federal, state and local health code and other requirements that may apply.

1704.03 A child day care operation involving four (4) to twelve (12) non-resident children requires home business site plan review and a state license. Such a day care operation must provide at least 35 square feet of heated floor space per child, and the total must comply with the 25% rule (1702.02) to qualify as a home business. A day care operation involving greater than twelve (12) non-resident children is considered a group child care center, which shall be considered a full business use not permitted as a home occupation.

1704.04 Any non-exempt child care business operated in a non-residential building requires a home business site plan review and a state license. Such a day care operation must provide at least 35 square feet of heated floor space per child.

**1705.00 *Prohibited Uses and Limitations***

1705.01 The home business may not involve any process which results in the discharge of any hazardous material (as defined by the State of New Hampshire) into the ground or into any surface waters.

1705.02 The Home Business cannot involve any use hazardous to the public health, safety and welfare.

1705.03 The maintenance or repair of automobiles or motor vehicles shall not be permitted as a home business.

1705.04 Home businesses shall not involve the on-site use or storage of heavy equipment such as back-hoes, graders, dump trucks, tractor trailers, semi-trucks and other large vehicles or stationary equipment of an industrial nature. When a controversy arises as to whether a certain piece of equipment or vehicle falls into the class of prohibited heavy equipment, the Planning Board shall make a finding as to whether or not such equipment or vehicle is prohibited as part of the home business operation prior to taking final action on the application.

1705.05 Traffic generated by the Home Business shall not create safety hazards or be substantially greater in volume than would normally be expected with residential use. Any business that generates more than an average of twenty-four (24) business-related trips per day is prohibited.

**1706.00 *Procedure***

1706.01 Requests for Home Businesses shall be presented to the Planning Board in accordance with Sections 3.2, Submission Procedures, and 6.2, Submission Requirements for Home Businesses, of the Non-Residential Site Plan Review regulations.

**1800.00 DRIVEWAY ORDINANCE**

**1801.00 Authority**

Pursuant to the provisions of RSA 236:13, the following Driveway Ordinance is hereby established for the Town of Brookline, NH

**1802.00 Purpose**

1802.01 In as much as driveways and entrances are, in effect, intersections, they require certain controls as to size and location in order to provide safe and efficient access to property fronting on the road.

1802.02 To provide for the proper and suitable discharge and control of surface drainage in and around the driveway.

1802.03 To ensure the public safety through the orderly control of traffic movement onto and from highways, streets, and roadways.

1802.04 To provide a uniform practice and procedure relative to the design and construction of driveway entrances and exits.

1802.05 To prevent the existence of unsafe conditions resulting from improper placements of any driveway.

1802.06 To prevent erosion or other damage to existing Town roads from the construction of driveways.

**1803.00 Definitions**

1803.01 Driveway. Any improved or unimproved area serving as entrance, exit, or approach from any or to any parcel of land, regardless of public or private ownership.

1803.02 Common Driveway. A private driveway that serves as a common access from a public road for two (2) or more lots.

1803.03 Driveway Inspector. A local official designated by the Selectboard with the responsibility of certifying that the specifications set forth in this Ordinance are met.

**1804.00 Permit and Penalty**

1804.01 Anyone desiring to construct, alter or relocate a driveway in order to obtain access to an existing or proposed street or roadway, shall first apply for and obtain a permit from the Building Inspector's office.

1804.02 This permit shall provide for the construction, alteration or relocation of such driveway in accordance with the following specifications:

- a. No use of such driveway (except of a temporary nature during construction) shall take place until the Driveway Inspector inspects the construction of the driveway and certifies that the driveway conforms to the specifications set forth in this Ordinance.

**1805.00 Requirements**

**1805.01 Design Features**

- a. Maximum width at property line--Twenty-five (25) feet
- b. Minimum distance from intersection--One hundred (100) feet
- c. Minimum sight distance--Two hundred (200) feet
- d. No driveway shall intersect the street at less than a sixty (60) degree angle

1805.02 Driveways shall be so located as to most adequately protect the safety of the traveling public.

1805.03 On any paved road, the driveway apron shall be paved 15 feet from the edge of existing pavement or to the property line, whichever distance is lesser, unless other specifications are made by the Driveway Inspector as per this article.

All driveway aprons shall be paved or bonded to be paved prior to the issuance of a Certificate of Occupancy. From April 1 to September 30 the driveway apron shall be paved prior to the issuance of a Certificate of Occupancy. Driveway aprons that cannot be paved between October 1 and March 31 shall provide the Town with a bond for paving prior to the issuance of a Certificate of Occupancy. All bonded driveways shall be paved between April 1 and July 1 of the following spring. Arrangements shall be made with the Driveway Inspector to schedule.

1805.04 Upon any application for a driveway permit, the applicant shall confer with the Driveway Inspector who shall determine specifications as to sloping, culverts, and other aspects of construction of said driveway in order to properly provide for adequate drainage, snow removal, safety, etc. to prevent undue interference with the proper use of existing access roads. It shall be a requirement of construction that such specifications of the Driveway Inspector be complied with prior to use of such driveway.

**1806.00 Common Driveways**

A common driveway is permitted to serve as access to all legal frontage lots in all zoning districts in accordance with all other provisions of the Zoning Ordinance and Section 7 of the Town of Brookline Subdivision Regulations to a maximum of four (4) lots.

**1807.00 Easement and Bond**

1807.01 The applicant shall as a condition of the granting of the permit, be required to provide to the Town of Brookline, an easement to the extent deemed necessary for the purposes of entering upon the premises of the applicant to control or maintain surface drainage.

The applicant shall provide a letter of credit or cash bond in the sum of \$1,000.00 or up to an amount necessary as security for the proper construction of the paved portion of the driveway, and such culvert, piping, ditching, loaming and seeding, or other efforts incidental to and necessary for the proper discharge and control of surface and sub-surface drainage in and around the vicinity of the proposed driveway, both on the property of the applicant or on the property of the Town. The performance surety shall also cover damages to the road surface, edges and shoulders along the frontage of the property.

*1807.02* All funds provided to the Town in satisfaction of this obligation shall be deposited in an escrow savings account maintained by the Town for said purpose, and portions of said funds may be withdrawn by the Selectboard from time to time to apply against the cost of any portion of said construction which the Town is obliged to undertake to complete. Provided, however, that no funds shall be expended by the Town at any site in excess of the amount on deposit pertaining to such site.

***1808.00 Fees***

*1808.01* No permit shall be issued until payment of a fee, which shall be established by the Selectboard, is paid to the Town of Brookline.

***1809.00 Other Provisions***

*1809.01* Driveways existing as of March 12, 1996 are exempt from this Ordinance unless the driveway is being relocated.

**TOWN OF BROOKLINE, NEW HAMPSHIRE**  
**DRIVEWAY PERMIT APPLICATION**

Application Date: \_\_\_\_\_

Permit Number: \_\_\_\_\_

Lot Number: \_\_\_\_\_

Subdivision (if applicable): \_\_\_\_\_

Owner (or applicant): \_\_\_\_\_

Address of Applicant: \_\_\_\_\_

Phone Number of Applicant: \_\_\_\_\_

Street Address of Driveway: \_\_\_\_\_

- 
- 
- 1) The driveway will be inspected by the Driveway Inspector, who will ensure that the driveway is in compliance with Section 7 of the Brookline Subdivision Regulations.
  - 2) The fee for a driveway permit, as established by the Brookline Selectboard. I have submitted this fee.
  - 3) Any necessary State permits such as Wetlands, Timber Cutting, and Curb Cut permits have already been obtained. Curb cuts need to be shown on the subdivision plans.
  - 4) On any paved road, the driveway needs to be paved 15 feet from the edge of the road, or from the road to the property line, whichever distance is smaller, to encourage proper drainage and sedimentation & erosion control. This paving is required unless other specifications are made by the Department of Public Works Director as per Section 1800 of the Zoning Ordinance.

I have read and understand the above and Section 7 and Section 1800 (attached) which pertain to driveways. The driveway that I propose is in compliance with those regulations.

**1900.00 TELECOMMUNICATION FACILITIES ORDINANCE**

**1901.00 Authority**

This Ordinance is adopted by the Town of Brookline in accordance with the authority granted in New Hampshire Revised Statutes Annotated 674:16 and 674:21 and procedurally under 675:1, II.

**1902.00 Purpose and Goals**

In recognition of the requirements of the federal Telecommunications Act of 1996, this Ordinance is designed and intended to balance the interests of the residents of Brookline, telecommunications providers, and telecommunications customers in the siting of telecommunications facilities within the town of Brookline so as to ensure coordinated development of communications infrastructure while preserving the health, safety and welfare of the Town and its residents. This Ordinance establishes general guidelines for the siting of telecommunications towers and antennas to enhance and fulfill the following goals:

- a. Preserve the authority of Brookline to regulate and to provide for reasonable opportunity for the siting of telecommunications facilities, by enhancing the ability of providers of telecommunications services to provide such services to the community quickly, effectively, and efficiently;
- b. Reduce adverse impacts such facilities may create, including, but not limited to, impacts on aesthetics, environmentally sensitive areas, historically significant locations, flight corridors, health and safety by injurious accidents to person and property, and prosperity through protection of property values;
- c. Provide for co-location and minimal impact siting options through assessment of technology, current locational options, future available locations, innovative siting techniques, and siting possibilities beyond the political jurisdiction of the Town;
- d. Permit the construction of new towers only where all other reasonable opportunities have been exhausted, and to encourage the users of towers and antennas to configure them in a way that minimizes the adverse visual impact of the towers and antennas;
- e. Require cooperation and co-location, to the highest extent possible, between competitors in order to reduce cumulative negative impacts upon the Town;
- f. Provide constant maintenance and safety inspections for any and all facilities;
- g. Provide for the removal of abandoned facilities that are no longer inspected for safety concerns and Building Code\* (See Appendix A: Table of Amendments, 2010) compliance. Provide a mechanism for the Town to remove these abandoned towers to protect the citizens from imminent harm and danger; and
- h. Provide for the removal or upgrade of facilities that are technologically outdated.

**1903.00 Definitions**

- 1903.01 Alternative Tower Structure. Innovative siting techniques such as artificial trees, clock towers, bell towers, steeples, light poles, and similar alternative design mounting structures that camouflage or conceal the presence of antennas or towers.
- 1903.02 Antenna. Any exterior apparatus designed for telephonic, radio, television, personal communications service (PCS), pager network, or any other communications through the sending and/or receiving of electromagnetic waves of any bandwidth.
- 1903.03 Co-Location. The use of an existing tower or an existing telecommunications facility, for multiple purposes or users.
- 1903.04 Elevation. The measurement of height above sea level.
- 1903.05 Guy wires. A cable used to secure and steady a tower.
- 1903.06 Guyed Tower. A monopole or lattice tower that is tied to the ground or other surface by diagonal cables.
- 1903.07 Height. The vertical distance measured from the average elevation of the finished grade surrounding the tower or other structure to the highest point on the tower or other structure, including antennas.
- 1903.08 Lattice Tower. A type of mount that is self-supporting with multiple legs and cross-bracing of structural steel.
- 1903.09 Monopole. A type of mount that is self-supporting with a single shaft of wood, steel or concrete and a platform (or racks) for panel antennas arrayed at the top, constructed without guy wires.
- 1903.10 Preexisting towers and antennas. Any tower or antenna lawfully constructed or permitted prior to the adoption of this Ordinance. Also, any tower or antenna lawfully constructed in accordance with this Ordinance that predates an application currently before the Town.
- 1903.10 Secondary Use. A use of land or of a building or portion thereof which is unrelated to the principal use of the land or building.
- 1903.11 Telecommunications Facilities. Any structure, antenna, tower, or other device that provides commercial mobile wireless services, unlicensed wireless services, cellular phone services, specialized mobile radio communications (SMR), and personal communications services (PCS), and common carrier wireless exchange access services.
- 1903.12 Tower. A structure that is designed and constructed primarily for the purpose of supporting one or more antennas, including self-supporting lattice or monopole towers but not including guyed towers. The term includes radio and television transmission towers, microwave towers, common carrier towers, cellular telephone towers, alternative tower structures, and the like.

**1904.00**    ***Applicability***

1904.01    *Public Property*

Antennas or towers located on property owned, leased, or otherwise controlled by the Town may be exempt from the requirements of this Ordinance, except that uses are only permitted in the zones and areas as delineated in Section 1904.03. This partial exemption shall be available if a license or lease authorizing such antenna or tower has been approved by the governing body and the governing body elects, subject to state law and local ordinance, to seek the partial exemption from this Ordinance.

1904.02    *Amateur Radio, Receive-Only Antennas*

This Ordinance shall not govern any tower, or the installation of any antenna that is under 70 feet in height and is owned and operated by a federally-licensed amateur radio station operator or is used exclusively for receive only antennas. This application adopts the provisions and limitations as referenced in RSA 674:16, IV. In addition, no commercial uses/providers shall operate on a private, amateur or receive only tower.

1904.03    *Essential Services and Public Utilities*

Telecommunications facilities shall not be considered infrastructure, essential services, or public utilities, as defined or used elsewhere in the Town's Ordinances and Regulations. Siting for telecommunications facilities is a use of land, and is subject to the Town's Zoning Ordinance and all other applicable Ordinances and Regulations.

**1905.00**    ***Siting Standards***

1905.01    *General Provisions*

The uses listed in this section are deemed to be permitted uses in the designated district in accordance with all other applicable Ordinances and Regulations of the Town including Non-residential Site Plan Review and approval by the Planning Board.

- a. Antennas and towers may be considered either principal or secondary uses. A different existing use or an existing structure on the same lot shall not preclude the installation of an antenna or tower on such lot.
- b. For purposes of determining whether the installation of a tower or antenna complies with district development standards, the dimensions of the entire lot shall control, even though the antennas and towers may be located on leased parcels within such lots.
- c. Towers that are constructed, and antennas that are installed, in accordance with the provisions of this Ordinance, shall not be deemed to constitute the expansion of a nonconforming use or structure.
- d. Applicants receiving approval to construct new telecommunication towers must execute a written agreement with the Town specifying that the applicant agrees to provide for maximum shared use of the tower with other telecommunication providers and with governmental agencies at industry standard lease rates. This agreement shall include use by the Town for municipal communication purposes. The applicant shall also provide notice to all commercial carriers in the region that a new facility is to be erected and that an opportunity for co-location exists.

1905.02 Districts Permitted

New tower construction and co-location of telecommunication facilities shall be permitted in the Industrial-Commercial District and Residential-Agricultural District subject to all applicable local, state and federal regulations and Non-Residential Site Plan review and approval by the Planning Board.

1906.00 **Bonding, Security, and Insurance**

Recognizing the extremely hazardous situation presented by abandoned and unmonitored towers, the Planning Board shall set the form and amount of security that represents the cost for removal and disposal of abandoned towers in the event that the tower is abandoned and the tower owner is incapable and/or unwilling to remove the tower in accordance with Section 1907. Bonding and surety shall be consistent with the provisions in the Subdivision Regulations. Furthermore, the Planning Board shall require submission of proof of adequate insurance covering accident or damage.

1907.00 **Removal of Abandoned Antennas and Towers**

Any antenna or tower that is not operated for a continuous period of twelve (12) months shall be considered abandoned and hazardous to the public health and safety, unless the owner of said tower provides proof of quarterly inspections. The owner shall remove the abandoned structure within ninety (90) days of receipt of a declaration of abandonment from the Town notify the owner of such abandonment. A declaration of abandonment shall only be issued following a public hearing, noticed according to RSA 676:4, with notice to abutters and the last known owner/operator of the tower. If the abandoned tower is not removed within ninety (90) days, the Town may execute the security and have the tower removed. If there are two or more uses of a single tower, this provision shall not become effective until all uses cease using the tower.

1908.00 **Waivers**

1908.01 General

The Planning Board may approve waivers to the requirements of Section 1900 where it finds that extraordinary hardships, practical difficulties, or unnecessary and unreasonable expense would result from strict compliance with the foregoing terms, or the purposes of these regulations may be served to a greater extent by an alternative proposal. The purpose of granting waivers under the provisions of this Ordinance shall be to insure that an applicant is not unduly burdened as opposed to merely inconvenienced by the terms of the Ordinance. The Board shall not approve any waiver(s) unless a majority of those present and voting shall find that all of the following apply:

- a. The granting of the waiver will not be detrimental to the public safety, health, or welfare or be injurious to other property and will promote the public interest.
- b. The waiver will not, in any manner, vary the provisions of the Town's Zoning Ordinance or Master Plan.
- c. The waiver will substantially secure the objectives, standards, and requirements of this Ordinance.
- d. A particular and identifiable hardship exists or a specific circumstance warrants the granting of a waiver. Factors to be considered in determining the existence of a hardship shall include, but not be limited to:

1. Topography and other site features.
2. Availability of alternative site locations.
3. Geographic location of the property.
4. Size/magnitude of the project being evaluated and availability of co-location.

*1908.02*     Conditions

In approving waivers, the Board may impose such conditions as it deems appropriate to substantially secure the objectives of the standards or requirements of this Ordinance.

*1908.03*     Procedures

A petition for any such waiver shall be submitted in writing by the applicant with the application for Planning Board Review. The petition shall state fully the grounds for the waiver and all of the facts relied on by the applicant. Failure to submit petition in writing shall require an automatic denial of the waiver request.”

## **2000.00 ACCESSORY DWELLING UNITS**

### **2001.00 Purpose**

To provide expanded housing opportunities and flexibility in household arrangements of a permitted, owner occupied, single-family dwelling, while maintaining aesthetics and residential use compatible with homes in the neighborhood.

### **2002.00 Requirements/Limitations**

Accessory dwelling units (ADU) shall be permitted in the Residential/Agricultural district by special exception granted by the Zoning Board of Adjustment and shall remain with the property. In addition to meeting the criteria for a special exception, the accessory dwelling unit shall meet or adhere to the following:

- 2002.01 Accessory dwelling units shall be within or attached to a principal single-family dwelling unit or accessory building. The accessory dwelling unit shall be connected to the containing or attached structure by a door in an interior common wall. Any exterior entrances or exits shall be located to the side or rear of the building.
- 2002.02 One of the two dwelling units shall be the primary residence and legal domicile of the property owner.
- 2002.03 Only one accessory dwelling unit shall be allowed per principal dwelling unit and/or lot .
- 2002.04 The gross living area of an accessory dwelling unit shall not be less than 350 square feet and not greater than 1,000 square feet and shall contain no more than two bedrooms.
- 2002.05 The creation of the accessory dwelling unit shall not reduce the floor area of the principal dwelling to less than that of the accessory dwelling unit.
- 2002.06 A building permit for an accessory dwelling unit shall be approved and issued prior to the start of any construction. The Emergency Management Director shall determine the house number for the accessory dwelling unit at the time of building permit application.
- 2002.07 The accessory dwelling unit shall have a fire alarm system that is interconnected with the rest of the principal dwelling unit and any applicable accessory building in such a manner that the activation of one alarm will activate all of the alarms in the principal dwelling unit and any applicable accessory building.
- 2002.08 The driveway shall be designed to appear as a driveway of a single-family residence, and no new curb cut from the street shall be constructed.
- 2002.09 The existing, replacement or proposed septic system shall be certified by a licensed septic designer or engineer as adequate to support the accessory dwelling unit in accordance with New Hampshire RSA 485-A:38 and the Town of Brookline septic regulations.

### **2003.00 Change of Ownership**

If a property containing an approved accessory dwelling unit is conveyed and the new owner wishes to maintain the accessory unit, the new owner shall comply with this section.

**2004.00**    ***Procedural Requirements***

An application for a special exception under the auspices of this Section shall be filed with the Zoning Board of Adjustment. Such application shall meet the following requirements:

2004.01    Plans approved by the Fire Department and the Building Inspector denoting, describing and/or identifying the intended accessory dwelling unit area as such shall be submitted with any application for an accessory dwelling unit and shall show two (2) means of egress from the accessory dwelling unit, other than a window.

2004.02    A building permit application shall have been submitted to the Building Inspector.

**2005.00**    ***Special Exceptions***

The Zoning Board of Adjustment shall grant a special exception permitting an accessory dwelling unit upon finding that the applicant has demonstrated the following:

- a.    The use of the accessory dwelling unit is secondary and accessory to that of the structure in which the accessory dwelling unit is contained or to which it is attached.
- b.    The accessory dwelling unit is developed in a manner which does not alter the character or appearance of the principal dwelling unit as a single-family residence.

**2006.00**    ***Failure to Comply***

2006.01    If the owner fails to comply with the requirements of this section, the use of the accessory dwelling unit shall be terminated within 6 months of the date of notice from the Selectboard [Building Inspector]. The owner shall be subject to penalty under RSA 676:17 for each day the accessory dwelling unit fails to comply with the requirements of this section after March 9, 1999.

**2007.00**    ***Enforcement Authority***

2007.01    The Selectboard shall be the final authority on compliance and enforcement issues of this article.

**2100.00 IMPACT FEES**

**2101.00 Purpose**

2101.01 This ordinance is enacted pursuant to RSA 674:16 and 674:21, and in order to:

- a. Promote public health, safety, convenience, welfare, and prosperity;
- b. Ensure that adequate and appropriate facilities are available to individuals who may come to be located in the Town of Brookline, New Hampshire;
- c. Prevent scattered or premature development of land as would involve danger or injury to health, safety, or prosperity by reason of the lack of drainage, transportation, schools, fire protection or other public services, or necessitate the excessive expenditure of public funds for the supply of such services;
- d. Provide for the harmonious development of the municipality and its environs; and
- e. Ensure the proper arrangement and coordination of streets.

**2102.00 Definitions**

Any term not defined here shall have the same meaning as defined in Section 200.00 of this Ordinance.

2102.01 Impact Fee. A fee or assessment imposed upon development, including subdivision, building construction or other land use change, in order to help meet the needs occasioned by that development for the construction or improvement of capital facilities owned or operated by the municipality, including and limited to water treatment and distribution facilities; wastewater treatment and disposal facilities; sanitary sewers; storm water, drainage and flood control facilities; public road systems and rights-of-way; municipal office facilities; public school facilities; the municipality's proportional share of capital facilities of a cooperative or regional school district of which the municipality is a member; public safety facilities; solid waste collection, transfer, recycling, processing and disposal facilities; public library facilities; and public recreational facilities not including public open space.

2102.02 Off-site Improvement / Exaction. Those improvements that are necessitated by a development but which are located outside the boundaries of the property that is subject to a subdivision plat or site plan approval by the planning board. Such off-site improvements shall be limited to any necessary highway, drainage and sewer and water upgrades pertinent to that development.

**2103.00 Authority**

2103.01 The Planning Board may, as a condition of approval of any subdivision or non-residential site plan, and when consistent with applicable Board regulations, require an applicant to pay an impact fee for the applicant's fair share of off-site improvements to public facilities affected by the development.

2103.02 Nothing in this section shall be construed to limit the existing authority of the Planning Board to disapprove proposed development which is scattered or premature, or which would require an excessive expenditure of public funds, or which would otherwise violate applicable ordinances and regulations. Nothing in this section shall be construed to limit the Planning Board's authority to require off-site work to be performed by the applicant in lieu of paying an impact fee, or the Board's authority to impose other types of conditions of approval. Nothing in this section shall be construed to affect types of fees governed by other statutes, town ordinances or regulations.

**2104.00 *Assessment Methodology and Establishment and Review of Fees***

2104.01 *Proportionality*

The amount of the impact fee shall be calculated by the Planning Board to be a proportional share of municipal capital improvement costs which is reasonably related to the capital needs created by the development, and to the benefits accruing to the development from the capital improvements financed by the fee.

2104.02 *Existing Deficiencies*

Upgrading of existing facilities and infrastructures, the need for which is not created by new development, shall not be paid for by impact fees.

2104.03 *Impact Fee Schedule*

The Impact Fee Schedule shall be prepared in accordance with RSA 674:21, and shall be calculated using the following factors, based upon the most recent data available or a conservative estimate:

- a. A determination of the size of the capital facility.
- b. An estimate of the proportion of users from future Brookline households subject to the impact fee that will use the facility when it has reached its capacity.
- c. Projections of future users based upon residential building permit projections.
- d. Estimates of the cost of the facility to the Town of Brookline, including financing and excluding non-municipal funding sources.
- e. Credits subtracted from a base fee accounting for property taxes paid by the proportion of the project to be financed by impact fees.
- f. A fee assessed per housing unit or the most appropriate factor for the specific impact fee being charged.
- g. A determination of the number of building permits that will need to be issued in order to finance the impact fee.
- h. An accounting of the number of permits issued, with a maximum number of permits to be assessed an impact fee prior to the fee's termination.
- i. Exemptions, if any.

2104.04 *Computation of Impact Fees*

- a. The amounts of the impact fees shall be determined using the values contained in the Impact Fee Schedules for the following types of facilities:
  1. School Facilities
  2. Municipal Facilities
  3. Public Libraries
  4. Public Recreation Facilities

**2104.05**     Review of Impact Fees

The Planning Board shall review an established impact fee schedule on an annual basis, based upon a recommendation of the Capital Improvements Committee. The Planning Board shall modify the impact fee schedule if it finds that new data is available that will refine the schedule. This may include the replacement of figures used in the impact fee schedule with more accurate or recent projections, data and figures.

**2104.06**     Relationship to the Capital Improvements Program

Whenever an impact fee or off-site improvement is assessed in accordance with this ordinance, the project shall become part of the Capital Improvements Program (CIP) as an administrative adjustment. The CIP, when modified by the Town, shall include all projects that are funded through impact fees and all off-site improvements / exactions.

**2105.00**     ***Off-site Improvements / Exactions***

**2105.01**     Ability to assess off-site improvements / exactions

An improvement that is required by the Planning Board for either a site plan or subdivision that is necessary for the project to operate properly shall be considered to be an off-site improvement or exaction. Off-site improvements for site specific applications shall be assessed on a case by case basis and shall be in addition to other impact fees imposed pursuant to this ordinance. The applicant shall be assessed their proportionate share for the need for the project. In cases where it is determined that such an improvement is necessary for the proper functioning of the project, the Planning Board shall so notify the applicant and the applicant may be required to present to the Board a study which identifies the proportionate share of the cost of such improvement that the applicant's project necessitates. The Board may, at the expense of the applicant, refer such study to a consultant of its own to determine the reliability of the findings which shall be considered by the Board to arrive at a resolution of this issue. The applicant shall be assessed their proportionate share for the need for the project. In cases where it is determined that an improvement is necessary for the proper functioning of a site plan or subdivision, but that the applicant, for whatever reason, is determined to contribute more than its proportionate share to the improvement under this section, and, therefore, that the improvement will also accommodate other future development, the Town, at the request and expense of the applicant, may establish a separate project related impact fee that assesses other future site plans or subdivision for their proportionate share of the improvement to reimburse the applicant for such disproportionate share of the improvement to reimburse the applicant for such disproportionate contribution. Such impact fees shall be provided to the original applicant with any interest.

**2106.00**     ***Administration***

2106.01 Accounting

In accord with RSA 673:16, II and RSA 674:21, V(c), impact fees shall be accounted for separately, shall be segregated from the Town's general fund, may be spent upon order of the Selectboard, and shall be used solely for the capital improvements for which they are collected, or to recoup the cost of capital improvements made in anticipation of the needs for which the fees were collected to meet.

2106.02 Assessment

All impact fees imposed pursuant to this section shall be assessed prior to, or as a condition for, the issuance of a building permit or other appropriate permission to proceed with development, as determined by the Planning Board. . The amount of the impact fee to be imposed is that which is in place at the time of subdivision or site plan approval.

2106.03 Reserved

2106.04 Collection

Impact fees shall be collected as a condition for the issuance of a certificate of occupancy; provided, however, in projects where off-site improvements are to be constructed simultaneously with a project's development, and where a municipality has appropriated the necessary funds to cover such portions of the work for which it will be responsible, that municipality may advance the time of collection of the impact fee to the issuance of a building permit. Nothing in this section shall prevent the Planning Board and the assessed party from establishing an alternate, mutually acceptable schedule of payment.

2106.05 Refund

Any portion of an impact fee which has not become encumbered or otherwise legally bound to be spent for the purpose for which it was collected, shall be refunded, with any accrued interest, to the assessed party or successor in interest:

- a. When the subdivision or site plan approval expires under the respective rules of the Planning Board, or under the terms of the decision, without having become vested under RSA 674:39, and without any extension being granted by the Planning Board; OR
- b. When such approval is revoked under RSA 676:4-a; OR
- c. Six years after its collection, or, if any extension of approval is granted by the Planning Board, six years after such extension is granted; OR
- d. Six years after its collection, whenever the calculation of an impact fee has been predicated upon some portion of capital improvement costs being borne by the Town, and the Legislative Body of the Town has failed to appropriate the Town's share of the capital improvement costs.

**2107.00**    *Appeals*

In accord with RSA 676:5, III, appeals of the decision of the Planning Board in administering this ordinance may be made to Superior Court, as provided in RSA 677:15.

## **2200.00 HOUSING FOR OLDER PERSONS DEVELOPMENTS**

The Town of Brookline recognizes the need to provide special housing opportunities for older persons. Such housing must be well sited and designed to meet the special needs of this age group. Housing for Older Person Developments may be located as an overlay zone wherever the conditions described in the sitting requirement standards, below, can be met. Housing for Older Person Developments shall be reviewed under the **site plan regulations** of the Town of Brookline in addition to the requirements of this ordinance. Whenever a conflict occurs between this ordinance and the site plan regulations, the more restrictive requirements shall apply.

### **2201.00 Purpose and Intent**

- a. It is a goal of the Town of Brookline to promote the development of housing designed to meet the special needs of older persons.
- b. This ordinance operates as an Overlay Zoning District.
- c. It is the intent of the Town of Brookline to provide for the special needs of older persons by allowing for Housing for Older Persons developments with unique dimensional and institutional requirements that meet the social, mobility and safety needs of this age group.
- d. Housing developed in this section must be established and maintained in compliance with all applicable state and federal laws with respect to such housing and/or medical care, including the Fair Housing Act, as amended, 42 USC Sec 3601 et seq., NH RSA 354-A:15 and the NH Code of Administrative Rules, Hum 300 et seq.
- e. Pursuant to RSA 354-A:15, II and III, it is recognized that prohibitions against housing discrimination do not apply to housing for older persons, which conforms to all applicable rules and regulations.
- f. The intent of this ordinance is to foster development of housing for older persons while detailing local planning standards and, where practical, promoting consistency with land use policies in the Brookline master plan, zoning ordinance and subdivision and site plan regulations.
- g. It is the intent of this ordinance to regulate the intensity and mix of different types of dwelling units required to meet the needs of those citizens so as to provide ample indoor and outdoor livable space and to retain a sense of personal identity, intimacy and human scale within the development.
- h. It is the intent of this ordinance to review the density, scale and spacing of buildings, and the traffic circulation and parking pattern within the development to ensure that adequate light, air, privacy, community space, landscaping and open space for passive and active recreation are provided within the development.

**2202.00 Definitions**

**2202.01 Housing for Older Persons (HOP)**

A development qualifies as HOP when in compliance with all applicable Federal, State and Local laws, regulations and rules. Section 2200.00 of Brookline's zoning ordinance references some specific statutes, rules and requirements. The Fair Housing Amendments Act of 1988, 42 U.S.C. 3607(b)(2), as amended, including the Housing for Older Persons Act (HOPA) of 1995, supports the Town of Brookline's requirement that restrictions shall be established in legal covenant and approved by Town Counsel, which restricts the occupancy of units within a development specifically designed for older persons as defined in RSA 354-A:15 III, where units are intended for, and occupied by at least one person 55 years of age or older per unit.

Housing for Older Person developments must meet all the standards of this ordinance as described herein. HOP is an Open Space/Cluster development and is an Innovative Land Use Control as set forth in RSA 674:21, I,(f) and subject to additional requirements found in Brookline's zoning ordinance and site plan regulation.

**2202.02 Undeveloped**

Land that has not been subject to any man-made change including, but not limited to, building, mining, dredging, filling, grading, paving, excavation or drilling operations.

**2203.00 Siting Requirements**

**2203.01 Development Tract Size.** A single parcel of land with a minimum of ten (10) contiguous acres of land. Multiple lots must be consolidated prior to approval under this ordinance. As an Overlay District, and requiring a single parcel of land, HOP developments are exempt from the single dwelling per building lot requirement of the zoning ordinance, as approved by the Planning Board following Site Plan review and recorded at the Hillsborough County Registry of Deeds (HCRD). Land divided by a legally accepted or dedicated pre-existing public road shall not be deemed contiguous. Following approval, the development site may not be re-subdivided.

**2203.02 Development and Unit Requirements.**

- a. Open Space – There shall be an open space component to every housing for older persons development. At least twenty (20) percent of the total tract area must be set aside as permanently protected open space for low-impact recreation, conservation, agriculture or forestry-related uses. No more than 45% of the required open space can consist of wetlands or slopes exceeding 25%. At least fifty (50) percent of the required open space area shall be available and managed for the passive or active recreational activities of the residents. This area may consist of walking trails, informal meeting areas, gardens, active recreation areas, or other recreational amenities.

The open space shall be either conveyed to an association of unit owners in the development, or, where the Planning Board finds it in the public interest, this land may be conveyed to the Town or shall be permanently protected in other suitable ways which would ensure the continued use and maintenance of the land for its intended purpose.

b. Dimensional Requirements

1. Frontage: Tracts being developed for Housing for Older Persons developments require at least fifty (50) feet of frontage on a public road.

2. Dwelling Unit Density:

a) Residential/Agricultural District: Each dwelling unit requires a minimum of one-half (.5) acre of contiguous non-steep slope upland associated with it. Adequate and appropriate on-site space must be provided for parking, buildings, wells, septic systems and all other infrastructure and utilities, regardless of the maximum allowable density. The tract must be able to accommodate wells and septic systems for all units in a manner that meets Brookline and State of New Hampshire requirements. Community well and septic systems are permitted provided they meet all Brookline and State of New Hampshire requirements.

b) Commercial/Industrial District: There shall be no more than six (6) bedrooms per acre of usable land. Adequate and appropriate on-site space must be provided for parking, buildings, well, septic systems and all other infrastructure and utilities, regardless of the maximum allowable density. Community well and septic systems are permitted provided they meet all Local and State requirements.

3. Site Perimeter Buffer:

a) Residential/Agricultural District: Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall not count towards the required minimum protected open space.

b) Commercial/Industrial District: When abutting residential/agricultural properties, each development must provide a permanently protected undeveloped buffer not less than 50 feet wide from the common property line or a value as deemed necessary by the Planning board on the boundaries of the

original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The 50 feet buffer shall not count towards the required minimum protected open space.

4. Setbacks and unit separation: All structures shall be set back at least 25 feet from the 50-foot site perimeter buffer. In addition, developments located on public roads must meet the standard building setbacks as specified for the applicable district in the Brookline Zoning Ordinance. One (1) story buildings must be separated by at least twenty-five (25) feet. Two (2) or more story buildings must be separated by at least thirty-five (35) feet.

5. Unit Standards:

- a) Residential/Agricultural District: There shall be no more than two (2) bedrooms per dwelling unit. One (1) bedroom units must contain at least five hundred-fifty (550) square feet of heated living space. Two (2) bedroom units must contain at least seven hundred and fifty (750) square feet of heated living space. Units may be single and detached or attached in duplex fashion, with a maximum of four (4) units per building. Attached garages and breezeways are acceptable but do not count towards the minimum required living space. Each building with dwelling unit(s) can be a one or a two-story structure.

- b) Commercial/Industrial District: There shall be no more than two (2) bedrooms per dwelling unit. One (1) bedroom units must contain at least five hundred-fifty (550) square feet of heated living space. Two (2) bedroom units must contain at least seven hundred and fifty (750) square feet of heated living space. Units may be single detached or attached in duplex fashion, or be part of an apartment building. Each apartment building must not be more than a 3-story structure.

The following standards will be reviewed in accordance with the Town of Brookline site plan regulations and/or design guidelines:

- c. Building Design

Architectural renderings of a typical unit, the community center and all accessory buildings shall be provided to the Planning Board for evaluation in accordance with the site plan review regulations and design guidelines to ensure that the proposed development is appropriate in scale and arrangement in relation to the underlying district, the prominence of the site, viewsheds, adjacent land uses and the surrounding neighborhood.

- d. Landscape Plan

A landscaping plan describing the number, species and location of all plantings within the site perimeter buffer and the development itself shall be submitted for the Planning Board's review. No invasive species may be used as planting materials.

e. Parking

There shall be a minimum of one (1) off-street parking space per dwelling unit. Where deemed to enhance the appearance, design and functionality of the development, shared driveways for up to four (4) dwelling units are acceptable.

f. Pedestrian Linkage and Circulation

The use of interconnecting walkways, trails and natural walking paths shall be an integral part of all Housing for Older Persons developments. These pedestrian amenities shall be designed to facilitate access between housing units, the Community Center, active recreation areas, open space areas and public trails, ways that may exist outside of the development, and provide access to stores/businesses when an HOP development is part of a commercial/retail development. Primary (paved) walkways in proximity to housing units and the Community Center shall meet American with Disabilities (ADA) requirements. Natural walking and hiking trails are exempt from this requirement.

g. Lighting

All roads, primary walkways and access to buildings shall be adequately lighted. The use of "full cut-off" lighting is required. Every effort shall be made to prevent light trespass, nuisance glare and over illumination due to excess wattage or inappropriate light fixtures. A lighting plan shall be submitted for the Planning Board's review, which shall be consistent with the standards found in the current lighting ordinance and site plan regulations. Lighting of common and public areas shall be independently controlled from that for the residential units.

**2204.00 Community Center**

2204.01 Community Center requirements. Each Housing for Older Persons development must provide a Community Center intended to serve as the locus of community life and activities for the residents. Whenever possible, the Community Center shall be centrally located in relation to the housing units. The Community Center must be a minimum of one thousand (1,000) square feet in size, and must include an activities / social room as well as a kitchen, laundry room and bathroom facilities. The main entrance to the community center must be handicapped accessible. The community center requires one parking space to be provided per 200 sq.ft. of interior heated space. At least two handicapped parking spaces must be provided adjacent to the handicapped accessible main entrance.

## **2205.00 *Safety Considerations***

### **2205.01 Unit Identification**

Each dwelling unit identification shall be subject to final approval from the Brookline Emergency Management Director.

### **2205.02 Common Driveway Identification**

All common driveways must be identified with signage and markers per the requirements of section 1806.00, Common Driveways, of the Brookline Zoning Ordinance; and section 7.4, Common Driveways, of the Brookline Driveway Regulations.

## **2206.00 *Exemptions***

Housing for Older Persons developments shall be exempt from the Brookline Growth Management Ordinance, due to the minimal impacts on Town services associated with this type of development.

## **2207.00 *Compliance***

It is the responsibility of applicants to certify at the time of an application before the Planning Board that a development will comply with all applicable rules and regulations established by the New Hampshire Human Rights Commission, for age discrimination in housing, including, if required by the Human Rights Commission, that every development shall provide significant facilities and services specifically designed to meet the physical and social needs of older persons, or if the provision of such facilities and services is not practicable, that such housing is necessary to provide important housing opportunities for older persons, as set forth in NH Administrative Rules Hum 302.03, as the same may from time to time be amended. Furthermore, while the Planning Board will not define what constitutes significant facilities and services, information that may be required by the Human Rights Commission in evaluating an application shall be submitted to the Planning Board, including a description of applicable provisions of the Human Rights Commission administrative rules and regulations, and whether there are requests for exemptions.

In the event the foregoing 55 year old age restriction is determined to be in violation of the laws of the State of New Hampshire, then in order to qualify as Housing For Older Persons, the development must contain an age restriction that complies with New Hampshire RSA 354-A:15, and as the same may from time to time be amended.

Every Older Persons development shall certify annually their full compliance with the age requirements set forth in this section and the method for determining compliance shall be incorporated in the Association Documents, and approved by Town Counsel. A notarized legal copy of the annual age certification shall be provided to the Towns designated enforcement body (Selectboard/Code Enforcement Officer) and to the Planning Board, to verify compliance.

**2208.00** *Enforcement, Conflict and Severability*

Enforcement, conflict and severability shall be in accordance with Sections 2400.00, ENFORCEMENT, 2800.00, CONFLICT and SEVERABILITY of the Brookline zoning ordinance. Additional enforcement action under applicable local, state and federal law shall insure full compliance with the purpose and intent and specific requirements of the Housing for Older Persons ordinance and Brookline's Land Use Laws.

## **2300.00 OUTDOOR LIGHTING**

### **2301.00 Purpose and Intent**

The purpose of this ordinance is to preserve the rural atmosphere and dark skies of Brookline. One key difference between rural towns and cities is the darkness of the night sky and the amount of glare and sky glow resulting from outdoor lighting. Natural dark skies are the nighttime aspect of rural character. Increasing light pollution and glare from inappropriate lighting degrades such rural character. Effective outdoor lighting can help preserve the dark night sky while maximizing safety and security by minimizing glare and light trespass. This regulation is intended to enhance public safety and welfare by providing for adequate and appropriate outdoor lighting, providing for lighting that will complement the character of the town, reduce glare, minimize light trespass, reduce the cost and waste of unnecessary energy consumption and prevent the degradation of the night sky.

### **2302.00 Definitions**

- a. Full-Cutoff. A light fixture such that all of its light output is aimed below horizontal to the ground. Full cut-off fixtures cut off all upward transmission of light.
- b. Flood or Spot Luminaires. Any downward facing light fixture or lamp that incorporates a reflector or refractor to concentrate the light output into a directed beam in a particular direction.
- c. Glare. Direct view of a light source that results in discomfort to the observer and possible temporary visual impairment.
- d. IESNA. Illuminating Engineering Society of North America. An organization that recommends standards for the lighting industry.
- e. Light Trespass. The shining of light produced by a luminaire beyond the boundaries of the property on which it is located.
- f. Light Pollution. Night-sky brightness (skyglow) caused by the scattering of light in the atmosphere. Sources include light projected above the horizontal plane or light reflected from illuminated sources such as roadways.
- g. Lumen. A measure of light energy generated by a light source.
- h. Luminaire. Complete lighting unit including fixture, lamp, and other parts.
- i. Temporary Lighting. The specific illumination of an outside area or object by any man-made device located outdoors that produces light by any means for a period of less than 30 days, with at least 180 days passing before being used again. All seasonal and temporary lighting should be rated less than 1,800 lumens.

### **2303.00 Applicability**

The lighting requirements of this section shall apply to all new non-residential developments requiring site plan approval from the Brookline Planning Board.

Though they are not subject to permitting through this ordinance, residential homeowners are encouraged to use full cutoff lighting fixtures and prevent light trespass onto neighboring properties. Residential lighting guidelines can be obtained at Town Hall during normal business hours.

**2304.00**    ***Lighting Standards***

- a. Any luminaire or lamp of 4,000 or more lumens shall be full cutoff as installed.
- b. Flood or spot luminaires shall be full cutoff if they are 1,500 lumens or more. The center beam from flood or spot lights shall not be angled any greater than 45 degrees from a downward pointing direction.
- c. The maximum height of any luminaire shall not exceed 25 feet.
- d. Commercial lighting shall meet minimum IESNA illumination levels while not exceeding IESNA uniformity ratios and average illuminance recommendations.
- e. Outdoor signage illumination shall comply with these regulations. In addition, there shall be no light trespass to any other property or glare when viewed from the road. Bottom-mounted outdoor sign lighting shall not be used.
- f. Outdoor lighting at places of business or public venues shall be turned off no later than one hour after closing, except what is needed for basic security. Vacant parking lots shall not remain lighted except as needed for basic security and as specified in section 1602.00 of the Brookline Zoning Ordinance. In addition, there shall be no light trespass to any other property or glare when viewed from the road.
- g. No outdoor sporting or entertainment event requiring outdoor lighting shall start after 10:00 p.m. or extend beyond 11:00 p.m.

**2305.00**    ***Special Uses***

- a. All temporary emergency lighting needed by police or fire departments or other emergency vehicles shall be exempt from these requirements.
- b. Hazard warning lighting required by federal regulatory agencies are exempt, except that all such night lighting must be red and must be shown to be close to the federally required minimum lumen output required for such task.
- c. The use of searchlights by civil authorities for public safety.
- d. Temporary lighting of low wattage for public festivals, celebrations or holiday observances, are exempt except where they create a hazard or nuisance from glare. Such light shall not light trespass. Wherever possible, lighting should be full cut-off.
- e. Airport lighting for navigational purposes is exempt.
- f. Sports venue lighting is exempt from any lumens per acre standards for the playing field only. Full-cutoff fixture design is required and light trespass requirements apply.

**2306.00 Prohibitions**

- a. The use of search lights for advertising purposes is prohibited.
- b. The nighttime use of white or white strobe lighting on communications towers is prohibited.
- c. Illumination of outdoor advertising off-site signs between the hours of 11:00 p.m. and sunrise is prohibited.
- d. The use of laser source light or any similar high intensity light for outdoor advertising or entertainment, when projected above the horizontal, is prohibited.

**2307.00 Grandfathering of Nonconforming Luminaires**

- a. Any luminaire lawfully in place prior to this ordinance shall be grandfathered indefinitely except in the case of change, repositioning or replacement described below.
- b. Any significant change or replacement to an existing luminaire, such as lamp type, structural alteration, movement, repositioning, replacement or removal of the luminaire cover must meet the standards of this ordinance.

**2308.00 Lighting Plan**

Applicants for site plan or subdivision review with outdoor lighting fixtures shall submit evidence that the proposed work will comply with the standards of this ordinance. The evidence submitted shall contain but not be limited to the following:

- a. The location of the site where outdoor lighting fixtures will be installed.
- b. Scaled plans indicating the location of outdoor lighting fixtures on the site, the height of each fixture and the type(s) of outdoor lighting proposed and the level of wattage and initial lumens for all light sources.
- c. A description of the outdoor lighting fixtures including but not limited to manufacturer's catalog descriptions and drawings. The required plans and descriptions shall be sufficiently complete to enable the Planning Board to readily determine compliance with the requirements of this ordinance. If such plans and descriptions cannot enable this ready determination, by reason of the nature or configuration of the devices, fixtures, or lamps proposed, the applicant shall submit further evidence of compliance enabling such determination. Examples of recommended lighting fixtures are available from the Town Planning Board Office and the Building Inspectors Office.
- d. For plans showing a high level of illumination, the Planning Board may require an iso-lux / footcandle plan indicating levels of illumination, in footcandles, at ground level. The maintained horizontal illuminance standards set by the Illuminating Engineering Society of North America (IESNA) shall be observed.
- e. If any subdivision proposes to have installed street or common or public area outdoor lighting, the final plat shall contain a statement certifying that the applicable provisions of the Town of Brookline will be adhered to.
- f. Should any outdoor light fixture, or the type of light source therein, be changed after the permit has been issued, a change request must be submitted to the building inspector for his

approval, together with adequate information to assure compliance with this code, which must be received prior to substitution.

**2309.00** *Law Governing Conflicts*

Where any provision of local, county, state or federal law conflicts with any provision of this ordinance, the most restrictive shall govern unless otherwise specified by law.

**2310.00** *Separability*

The invalidity of a section of this ordinance shall not have any effect upon the validity of any other section or provision.

## **2400.00 *BED AND BREAKFASTS***

### **2401.00 *Purpose and Intent***

While the Town of Brookline may legally prohibit all commercial activities in the residential-agricultural district, it recognizes that Bed and Breakfast entities may be beneficial to the community as a whole provided they demonstrate that they can be carried on with minimal or no impact on the neighborhood in which they could be situated and that residential character of the neighborhood can be preserved and the neighborhood be protected from nuisances and/or potential negative impacts from such use. Therefore, the Town of Brookline has determined, pursuant to RSA 674:21, (I)(i) (flexible and discretionary zoning), that the operation of a Bed and Breakfast establishment may be permitted conditioned on obtaining a special permit from the Planning Board following a public hearing and a determination by the planning board that the applicant has demonstrated that such use may be conducted in a manner that complies with the standards enunciated herein compatible with the standards set forth below. The Planning Board, in exercising this authority, following the hearing, may grant the permit, deny the permit, or grant the permit subject to reasonable restrictions, as it deems necessary to preserve the character of residential neighborhoods and to provide residents freedom from nuisance and potential negative impacts resulting from commercial activity in residential areas.

### **2402.00 *Definition of a Bed and Breakfast***

A transient lodging and feeding establishment that is the personal residence of its owner, is occupied by the owner at the time of rental to a patron, and in which the only meal served is breakfast to in-house patrons. The establishment must be incidental to the main residential use of the building. Individual guests are prohibited from staying at a particular Bed and Breakfast establishment for more than thirty (30) days in one year period. A bed and breakfast shall have an area of dining capable of accommodating the number of registered patrons. Posted room rates shall include breakfast.

### **2403.00 *Hearing Before Planning Board and Standards for Issuance of Permit***

Upon submission of an application for a special permit for a Bed and Breakfast use, the Planning Board is hereby authorized pursuant to RSA 674:21 to conduct a hearing with notice in the same manner as required for site plan applications. The Planning Board shall hear the evidence presented in support of the application and, following such hearing, shall determine whether the applicant has presented sufficient evidence to allow the Planning Board to make the findings that the use as proposed:

1. Will not detract from the residential character of the lot.
2. Will have an area of dining capable of accommodating the number of registered patrons.
3. Is subordinate and incidental to the main residential use of the building.
4. Will not create excessive traffic, noise or odors in the neighborhood where it is proposed.
5. Will not adversely affect the neighborhood, nor otherwise be injurious, obnoxious or offensive.

### **2404.00 *Issuance of the Permit***

The Planning Board may approve such permit only after making findings that the conditions set forth in the above section have been demonstrated. Such permit, however, shall be subject to the requirement that the applicant also comply with all the General Requirements set forth in the following section, which requirements shall constitute performance standards that must

be complied with during the life of the use, failing which the permit shall be subject to revocation or other enforcement action as indicated in Section 2402.10 below.

**2405.00    *General Requirements***

A Bed and Breakfast establishment shall be subject to the following regulations:

- 2405.01    Rooms used for sleeping shall be part of the primary residential structure and shall not have been specifically constructed for rental purposes. “Cottages” or the use of an axillary structure is prohibited.
- 2405.02    No exterior alterations, other than those required by law to ensure safety of the structure and to preserve the residential and rural aesthetic of the surrounding neighborhood, shall be made to any building for the purpose of providing a bed and breakfast establishment.
- 2405.03    The bed and breakfast operation shall not use more than 50% of the heated floor area of the principal residence. Areas such as kitchens and bathrooms are not included in this calculation.
- 2405.04    Adequate sewage disposal service shall be provided.
- 2405.05    All signs must comply with the requirements of Section 1600, Sign Ordinance.
- 2405.06    Off-street parking shall be provided for non-residents and shall be limited to one per guestroom. A minimum of two parking spaces for the dwelling unit and one additional for each guest room shall be required.
- 2405.07    A Bed and Breakfast shall be conducted in accordance with all applicable Town regulations, state laws and licensing requirements.
- 2405.08    Once a proposed bed and breakfast has obtained a special permit from the Planning Board and operation of the use has commenced, the continuation of such use shall remain subject to compliance with the standards of this section. For safety reasons, a yearly inspection of the entire establishment shall be conducted by the Fire Department. In the event that a bed and breakfast is operated in a manner that violates the standards of this section, then the Code Enforcement Officer may direct such business to be brought into compliance, or, alternatively, to cease such operation. Any such directive shall be appealable to the Zoning Board of Adjustment pursuant to RSA 676:5.
- 2405.09    Special Permits to operate a bed and breakfast **are not transferable** upon change of property ownership.

**2406.00    *Procedure***

Requests for Bed and Breakfasts shall be presented to the Planning Board in accordance with Sections 3.2, Submission Procedures, and 6.2.B, Submission Requirements for Bed and Breakfasts, of the Non-Residential Site Plan Review regulations, and in accordance with building codes, Fire codes, Rules for the Sanitary Products and Distribution of Food, and all local and State requirement for business owners.

**2500.00 ENFORCEMENT**

2501.00 It shall be the duty of the Selectboard and the Board is hereby given power and authority to enforce the provisions of this Ordinance. The Selectboard has the authority to appoint a Code Enforcement Officer (CEO) to enforce this Ordinance under their general supervisory authority.

2502.00 Upon well-founded information that this Ordinance is being violated, the Selectboard or Code Enforcement Officer shall take immediate steps to enforce the provisions of this Ordinance pursuant to applicable laws, including but not limited to RSA 676:15-17, as amended.

2503.01 *Procedures.* The Selectboard may adopt rules of procedure for governing the manner in which the Code Enforcement Officer will be expected to address land use violation complaints. Information of alleged violation of these ordinances shall be provided in writing to the Code Enforcement Officer or Selectboard and shall be investigated by the Code Enforcement Officer, the Selectboard or their designee.

- a. Minimum written information of alleged violations of these ordinances shall include a description of the alleged violation(s), the location of the alleged violation, the name, address and telephone number of the individual providing the information of the alleged violation(s) and the date of submission to the town authority.
- b. The Brookline Code Enforcement Officer or the Selectboard shall provide a copy of the complaint to the owner of the property of the alleged violation.
- c. An appeal of an administrative decision may be made pursuant to applicable to laws, including but not limited to RSA 676:5, Appeals to the Board of Adjustment, as amended.

**2600.00 BOARD OF ADJUSTMENT**

The Selectboard shall make appointments to a Board of Adjustment of five members conforming in duties to the provisions of Chapter 674:33 of the NH RSA as amended. Thereafter as terms expire or vacancies occur, the Selectboard shall be responsible for filling vacancies and maintaining full membership on the Board of Adjustment. The Board of Adjustment here provided shall conform in membership and terms of office to the provisions of Chapter 673:5 of the NH RSA as amended. In addition to the general powers granted, the Board of Adjustment by Chapter 673:5 of the NH RSA, may, in harmony with and subject to its provisions:

- a. Permit a non-conforming temporary use for an initial period of not more than one year. A permit may be renewed by the Board of Adjustment for a period of not more than one year at a time.
- b. Permit in the Residential-Agricultural District an industrial or commercial use which a public hearing demonstrates that it can meet the requirements of Section 500, paragraphs 502 (v) and 503 and is not otherwise detrimental to the neighborhood.

**2700.00 AMENDMENTS**

**2701.00** This Ordinance may be amended in accordance with RSA Chapter 675, Enactment and Adoption Procedures, as amended.

**2800.00 FINES AND PENALTIES**

The penalties for violation of any of the provisions of this title, including but not limited to any local ordinance, code, regulation, or any provision, specification or condition of any application, plat or plan approved by, or any requirement or condition of a permit or decision issued by any local administrator or Land Use Board acting under the authority of this title shall be subject to such sanctions as are authorized by the Court pursuant to applicable laws, including, but not limited to RSA 676:15-17, as amended.

**2900.00 CONFLICT AND SEVERABILITY**

**2900.01** If any section of this Ordinance is found to be in conflict with any other section of the Ordinance or with any local, state, or federal regulation, the more stringent standard shall apply. The invalidity, unconstitutionality or illegality of any Section or provision of this Ordinance or of any zoning district boundary shown on the zoning map shall not have any effect upon the validity, constitutionality or legality of any other Section, provision or zoning district boundary.

**3000.00 WHEN EFFECTIVE**

This Ordinance shall take effect upon its passage.

This Ordinance was passed at the annual Town Meeting of March 12, 1968 and was amended by a vote of the townspeople at the annual Town Meetings of March 7, 1972, March 6, 1973, March 8, 1977, November 2, 1982, March 12, 1985, March 10, 1987, March 8, 1988, March 15, 1989, March 13, 1990, March 12, 1991, March 10, 1992, March 9, 1993, March 8, 1994, March 12, 1996, March

11, 1997, March 10, 1998, March 9, 1999, March 14, 2000, March 13, 2001, March 13, 2003, March 10, 2004, March 8, 2005, March 14, 2006, March 14, 2007, March 12, 2008, March 10, 2009, September 25, 2009, March 09, 2010, March 8, 2011, March 13, 2012, March 11, 2014, March 10, 2015, March 10, 2016, March 21, 2017, March 13, 2019, and March 12, 2019. Amendments have been incorporated in this Ordinance as printed.

***APPENDIX A: TABLE OF AMENDMENTS***

- IV, A***     ***1997:***   Add portion of Tax Map Parcel A-6 to district (*new section 501*).
- B***       ***1997:***   Clarify list of permitted uses by specifying 11 previously unspecified activities. Add home businesses as permitted use (*new section 502*).
- C***       ***1997:***   Reduce frontage, side and rear setback, and land area requirements. Add building height limitation (*new section 503*).
- V, B***       ***1997:***   Replace “single (two) family dwelling” terminology with “single (two) dwelling unit dwelling”. Add farm stands as new permitted use. Specify manufactured housing as currently permitted use (*new section 602*).
- VI***         ***1997:***   Replace “Mobile Home” terminology with “Manufactured Housing” (*new section 700*).
- VII,A***      ***1997:***   Reword provision #2. Delete provision #4 which prohibits rebuilding after damage exceeding 50% of value (*new section 800*).
- VIII***       ***1997:***   Update definitions for dwelling unit and manufactured housing. Remove home produce and products definition. Replace “Two-family house” term with “two dwelling unit dwelling”. Add definitions for farm, farm stand, farming, funeral home, personal services, and restaurant (*new section 200*).
- XIII, D***     ***1997:***   Clarify dry area requirement (*new section 1104.01*).
- XVI, F***      ***1997:***   Add description of building permit allocation procedure. Add provisions to allow a minimum number of building permits based on subdivision size, and to allocate permits on a quarterly basis. (*new section 1406*)
- XVIII, H***   ***1997:***   Add new provision for a sign permit process (*new section 1608*).
- 200.23***      ***2000:***   Add a new definition as *Section 200.23, Junkyard*, and renumber subsequent sections.
- 200.30***      ***2000:***   Add a new definition as *Section 200.30, Off-Premise Sign*, and renumber subsequent sections.
- 800.00***      ***2000:***   Amend *Section 800.00, Non-Conforming Uses and Buildings*, to better define non-conforming uses, structures and lots, and to allow for reasonable expansion and alteration. (See *Sections 800.00 - 800.03*.)
- 1000.00***     ***2000:***   Amend *Section 1000.00, Earth Removal*, to allow for some flexibility in the amount of material that can be removed on an annual basis while maintaining the maximum for the 3-year time frame.
- 1000.03***     ***2000:***   Special Exception, Item d amended.

- 1105.01**     **2000:** Amend the Special Provisions Section of the Wetlands Conservation District to allow a maximum of 25% of the minimum lot area to be wetland.
- 1106.01**     **2000:** Amend the Special Exceptions section of the Wetlands Conservation District to eliminate the written review of findings of fact from the Planning Board. Also amend Item 3 to clarify the conditions under which expansions of existing structures within the buffer will be permitted.
- 1300.00**     **2000:** Repeal the existing language in *Section 1300.00, Brookline Aquifer Protection Ordinance*, and replace with a new *Section 1300.00, Aquifer Protection Ordinance*.
- 1406.02**     **2000:** Amend *Section 1406.02, Minimum Permits*, Item c, of the Growth Management Ordinance to allow a subdivision to bank and carry over a maximum of one year's building permit allocations.
- 1603.05**     **2000:** Amend *Section 1603.05*, which limits the application of the Sign Ordinance to signs larger than 3 square feet to exclude off-premise signs.
- 1604.04**     **2000:** Delete *Section 1604.04* of the Sign Ordinance dealing with real estate rental/sale signs and replace it with newly worded *Section 1604.04*.
- 1605.01**     **2000:** Delete *Section 1605.01*, dealing with off-premise signs, and replace it with *Section 1607.00, Off-Premise Signs*, and renumber subsequent sections.
- 1607.00**     **2000:** Replacement section for Off-Premise Signs. (See also new *Sections 1607.01 & 1607.02*.)
- 1800.00**     **2000:** Amend *Section 1800.00, Driveway Ordinance*, to define (*Section 1803.01*) and allow for the use of common driveways to serve more than one dwelling unit (*1806.00*), and renumber subsequent sections.
- 1805.03**     **2000:** Amend *Section 1805.03* to clarify when driveways are to be paved or bonded prior to the issuance of a certificate of occupancy.
- 2000.00**     **2000:** Amend *Section 2000.00, Accessory Dwelling Units*, to remove the reference to elderly (*2001.00*), to clarify who is to determine the house numbers for the accessory dwelling unit (*2002.15*), to eliminate the terms for a special exception, and replace it with the requirement that new owners of a home with an accessory dwelling unit obtain a certificate of occupancy to certify that the home is owner-occupied (*Section 2003.00* eliminated and replaced), and to eliminate the reference to "existing legal non-conforming" accessory dwelling units from the title of *Section 2005.00*.
- 2500.00**     **2000:** Delete *Section 2500.00, Saving Clause*, and replace it with a new *Section 2500.00, Conflict and Severability*.
- 200.04**       **2001:** Add a new definition as *Section 200.04, Adult Sexually Oriented Business*, and renumber subsequent sections.
- 502.00**       **2001:** Amend the Industrial-Commercial District, *Section 502.00, Permitted Uses*, to allow Adult Sexually Oriented Businesses as a permitted use.
- 504.00**       **2001:** Add a new section to the Industrial-Commercial District, *Section 504.00, Adult Sexually Oriented Business*, to define the location and operation standards for these types of businesses within the district.

- 1000.03**     **2001:**     Amend the criteria for granting a special exception for Earth Removal, *Section 1000.03*, by deleting the limitation on the maximum amount of material that can be removed in a three year period and by deleting the three year time limit on excavation permits.
- 1300.00**     **2001:**     Amend *Section 1300.00 Aquifer Protection Ordinance*, by replacing the terms “human waste” and “non-human waste” with the terms “domestic wastewater” and “non-domestic wastewater” throughout this Section and add definitions for “domestic wastewater” and “non-domestic wastewater” to *Section 1302.00, Definitions*, and renumber subsequent sections.
- 1904.02**     **2001:**     Amend the Telecommunications Ordinance, *Section 1904.02, Amateur Radio, Receive Only Facilities*, to prohibit commercial use of private amateur radio towers.
- 2100.00**     **2001:**     Add a new section, *Section 2100.00, Impact Fees*, to allow for the assessment of fees imposed upon new development, including subdivision and non-residential site plans, and renumber subsequent sections.
- 2200.00**     **2001:**     Renumber to become *Section 2300.00* and change all references to such within the Ordinance.
- 2300.00**     **2001:**     Renumber to become *Section 2400.00* and change all references to such within the Ordinance.
- 2400.00**     **2001:**     Delete *Section 2400.00, Penalty* and replace it with a new section, *Section 2400.00, Fines and Penalties*. Renumber to become *Section 2500.00* and change all references to such within the Ordinance.
- 2600.00**     **2001:**     Renumber to become *Section 2600* and change all references to such within the Ordinance.
- 1106.01**     **2003:**     Amend the wetland ordinance such that certain minor work in the wetland buffer zone no longer requires a special exception.
- 2200.00**     **2003:**     Add a new section, “Housing for Older Persons Developments”, and renumber subsequent sections accordingly.
- 2300.00**     **2003:**     Add a new section, “Outdoor Lighting”, and renumber subsequent sections accordingly.
- 200.22**       **2004:**     Include a new definition of home business consistent with the revised text of section 1700.
- 602.01**       **2004:**     Provide a new subsection 602.01 to provide for the granting of special permits by the Planning Board for home businesses that meet the requirements of section 1700.
- 603.05 (f)**   **2004:**     Delete this section of the back lot provisions so as not to allow the use of wetlands to satisfy the minimum lot size requirements and renumber subsequent sections accordingly.
- 1103.04**     **2004:**     Amend this section to state that the ordinance will not prohibit the use of wetlands to satisfy 25% of the minimum lot size on unimproved lots that were approved for subdivision by the Planning Board or which otherwise legally existed on or before March 10, 2004.
- 1105.01**     **2004:**     Delete this section of the wetland ordinance entirely so as not to allow the use of wetlands to satisfy minimum lot size requirements and renumber subsequent sections.

- 1106.01 (c) 2004:** Add a new section to provide for special exception review by the ZBA to allow up to 25% of the required minimum lot size to be wetlands for unimproved lots which existed prior to March 10, 2004.
- 1700.00 2004:** Provide for the granting of home business permits by special permit from the Planning Board and develop more specific standards for home business review in other sections of the ordinance accordingly.
- 2100.00 2004:** Amend the Impact Fee ordinance to reference and describe the factors used to calculate the Impact Fee schedules, as well as to provide for the collection of off-site improvements, as distinct from impact fees, to address specific capital improvements necessitated by development.
- 2100.00 2005** AMEND Section 2100.00, *Impact Fees*, to replace the definition in section 2101.02, Off-site Improvement/Exaction, to match State statute; to clarify section 2105.01, *Ability to assess off-site improvements/exactions*, by replacing "shall" with "may" regarding the requirement of providing a study to the Planning Board identifying the proportionate share of costs; to clarify section 2106.02, *Assessment*, that impact fees are assessed at the time of subdivision or site plan approval, to maintains compliance with amended State statutes and recent case law; and to remove and reserve section 2106.03, *Security*.
- 1400.00 2005** AMEND Section 1400.00, *Growth Management Ordinance*, to adopt a comprehensive update replacing the existing text. This amendment simplifies many of the existing provisions and clarifies the number of building permits available to approved subdivisions in a calendar year. The overall intent of the existing ordinance is maintained.
- 1600.00 2005** AMEND Section 1600.00, *Sign Ordinance*, to adopt a comprehensive update replacing the existing text. This amendment updates the sign ordinance to preserve the aesthetic and rural character of the Town while maintaining highway safety and allowing reasonably positioned and sized signs to advertise local businesses attractions and events. The ordinance would allow a greater square footage of sign but prohibit electronic message boards, video display panels and moving, blinking and rotating signs.
- 501.00 2006** AMEND Section 501.00, Location; to add text to section "b" **to correct an error in the current textual description of the Industrial-Commercial District boundaries** that should include all of lot G-52-2 and the portion of all lots north of lot G-52-2 within 500 feet of NH Route 13 to the east, and the northern boundary of lot G-53-1. This correction is supported in Planning Board minutes regarding the original zoning amendment, is depicted on the current Zoning District map and has historically been in commercial use.
- In addition; to combine and simplify the text in 501.00, a, and b, and place it into section "b"; to move and simplify a portion of the existing text from section "d" and place it into section "a." This begins an ongoing process of logically reorganizing and simplifying this portion of the ordinance.
- 501.00 (b) 2006** AMEND Sections 501.00, b; to include lot G-53-1 (Big Bear/B4 Function Hall) in its entirety (As recorded as of March 14, 2006) within the Industrial Commercial District, which converts the Residential-Agricultural portion of the parcels to Industrial-Commercial. This is the beginning of an ongoing program by the Planning Board to eliminate "split-zoned" lots, wherever possible, within the Town, and is supported by the landowners.

- 501.00 (c) 2006** AMEND Sections 501.00, c; to include lot C-42 (former Tapply Lumber) in its entirety (As recorded as of March 14, 2006) within the Industrial Commercial District, which converts the Residential-Agricultural portion of the parcel to Industrial-Commercial; and to simplify the textual description in section “c”. This is the beginning of an ongoing program by the Planning Board to eliminate “split-zoned” lots, wherever possible, within the Town, and is supported by the landowners.
- 603.03 2006** AMEND Sections 603.03, Land Area, 603.05 a, and d, Back Lots, and 1505.04, Lot Size; to add “excluding wetlands” when determining minimum lot size for standard residential, back lots, and open space building lots.
- 603.05 (a,d) 1505.04**
- 603.04 2006** AMEND Sections 603.04, Number of Dwelling Units; 603.05, b, and c, Back Lots; 1505.01, Density; 1505.04, Lot Size, to clarify one dwelling unit is permitted per building lot by; replacing the existing text in Sections 603.04 and 1505.04, “...permitted per minimum land area” with “...permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units.” Delete 603.05, b, which is repetitive. Delete “...for each dwelling unit,” from 603.05, c. Delete “(1 unit per 80,000 square feet) in 1505.01.”
- 603.05 (b,c) 1505.01 1505.04**
- 2200.00 2006** AMEND Section 2200.00, Housing for Older Persons (HOP); to clarify HOP developments as an overlay district and references applicable statutes in the 2201.00, Purpose and Intent; and 2202.01, Definitions; to add section 2204.00, Compliance, referencing applicable statutes and requiring annual reporting to the Town of proof of compliance with the ordinance; and add section 2205.00, Enforcement, Conflict and Severability; to specify enforcement and reference applicable sections of the zoning ordinance.
- 2400.00 2006** AMEND Section 2400.00, Enforcement; to clarify the authority of the Selectboard to designate a Code Enforcement Officer (CEO) to enforce Brookline Land Use Laws (Ordinance) as provided in state statutes; to provide for the Selectboard to adopt procedures for how the CEO will address land use violation complaints; to identify procedures for receiving notice of violations; and referencing the statute for appeals to the Board of Adjustments.
- 2600.00 2006** AMEND Section 2600.00, Amendments; to simplify section 2601.00 to reference RSA Chapter 675, Enactment and Adoption Procedures.
- 2700.00 2006** AMEND Section 2700.00, Fines and Penalty; to simplify and reference RSA 676:15-17.
- 200.00 2007** AMEND Section 200.30, Non-Conforming Use to replace the word “regulations” with “permitted uses”. The intent was to clarify that a use is nonconforming if it is not one of the **uses** that is permitted in the district it is located in when the nonconforming Ordinance was passed and  
ADD a definition to Section 200.30 to define the term which is used in Section 800.03, Nonconforming Structures. Section 200.30 was renamed “Nonconformities” with the definitions for Nonconforming Structure and Nonconforming Use included in this section as a. and b. respectfully.
- 800.00 2007** AMEND Section 800.02, Nonconforming Lots, to replace the reference to Section 800.03c with Section 800.01c. The reference to Section 800.03 c was incorrect.
- 1200.00 2007** AMEND Section 1200.00, Floodplain Ordinance, to include required ordinance changes by the most recent “compliance review” conducted by the NH Office of Energy and Planning. The changes needed to be made and adopted by the Town in order to remain compliant in the NFIP Program.

- 1300.00**    **2007**    AMEND the Aquifer Protection Ordinance, Section 1305.00, Prohibited Uses, b and d, to clarify that conditional use permits are necessary for **any** storage of regulated substances and covering of impervious surfaces greater than 15%. This clarification is consistent with Section 1306.01, conditional uses, which allows the Planning Board to grant a conditional use permit for any use that proposes up to 30% impervious surface on a lot in the Agricultural-Residential District and up to 60% impervious surface on a lot in the Industrial-Commercial District and  
AMEND Section 1306.00, Conditional Uses, to give the Planning board more guidance as to how to consider a request for conditional use permit as well as to make their role more statutorily appropriate. This change required that Section 1306.01 be renumbered to 1306.02 because the (former) Section 1306.02 was merged with Section 1306.01.
- 1500.00**    **2007**    AMEND the Open Space Development Ordinance, Section 1505.03, Setbacks, to clarify both the setbacks between lots in a newly subdivided Open Space Development and the 50-foot setback around the perimeter of the **entire** development. The setbacks footage was not changed, only the definition, to create a clearer setback requirement.
- 1600.00**    **2007**    AMEND the Sign Ordinance, Section 1602.04, Exempt Signs, to replace the word “except” with “exempt” to correct a grammatical error.
- 2200.00**    **2007**    AMEND the Housing for Older Persons, to ADD Section 2202.02, Undeveloped, to define the term which is used in Section 2203.02, b, 3, to clarify the meaning of undeveloped and the required protection of the site perimeter buffer in a Housing for Older Persons Development.
- 2300.00**    **2007**    AMEND the Outdoor Lighting Ordinance, Section 2302.00, Definitions, to remove “with a shield” in order to remove repetitive language.
- 200.00**      **2008**    AMEND Section 200.02, Definitions, to update the definition of Accessory Dwelling Units.
- 500.00**      **2008**    AMEND Section 500.01, Industrial-Commercial District, Location, to change the zoning district for lots J-41 and J-41-1 and make them part of the residential-agricultural district in their entirety. Properties are surrounded by residential properties or commercial properties with residential uses.
- 1400.00**    **2008**    AMEND Section 1407.00, Growth Management / Residential Phasing Ordinance, Sunset Clause, to change the date to year 2011 for the Planning Board to revisit the Growth in Brookline.
- 2000.00**    **2008**    AMEND Section 2000.00, Accessory Dwelling Units. The entire section has been amended in order to redefine that the ordinance is intended to provide a temporary living arrangement and expand housing opportunities.
- 2500.00**    **2008**    AMEND Section 2500.00, Board of Adjustment, to refer to the correct NH RSA’s that guide the board of Adjustment in its duties.
- 600.00**      **2009**    ADD Section 620.00, Workforce Housing Option.
- 1200.00**    **2009**    AMEND Floodplain Ordinance – Amended **September 25, 2009** – Per RSA 674:57 and per NH Office of Energy and Planning, after the Selectboard voted to adopt the Flood Insurance Map (FIRM).

- 200.00**      **2010**      AMEND the definition of “Accessory Dwelling Units” – ADD a definition of “Attached” – AMEND the entire definition of “Family”.
- 300.00**      **2010**      AMEND Section 305.00, General Provision, to specify that Storage tanks shall NOT be in excess of 1,100 gallons
- 600.00**      **2010**      ADD Section 603.05, Building Height in R/A district, and renumber subsequent section
- 620.00**      **2010**      AMEND Workforce Housing Ordinance:
- 623.00, Applicability, to read: “A multi-family building shall have no more than 5 contiguous/attached units
  - 625.00, Definitions of Multi-family building (...) containing more less 2 and no more than 5 dwelling units
  - 626.00, General Requirements, (3) to read: The minimum lot size for a single family market value unit shall (...)
  - 626.00, General Requirements (5) to read: The development shall have a vegetated buffer of 50 feet or a value as deemed necessary by the Planning Board on all boundaries of the original parcel except for access to connecting roads.
  - 626.00, General Requirements (6) New Section: “The minimum building setback shall be 15 feet on the back and side and 30 feet on the front of each individual lot created.
  - 626-00, General Requirements (7) to read: (...) should have a maximum of 1,500 sq/ft of gross living area above ground and no more than 2 car garage (max. 600 sq/ft). There should be no limitation in square footage for market value dwellings.
  - 626-00, General Requirements (8) to read: “There shall be no increase in the amount of gross living area above ground”.
  - 628.00 New Section, Road, Way, Access to Development
    - 1. Access to development containing multi-family units shall be accessed from the Route 13 corridor as described in Section 623.00.
    - 2. Construction, maintenance, plowing, sanding, cleaning of roads, ways, driveways and any other means of access to a workforce housing development shall be, at all times, the entire responsibility of the developer and/or the organization or property management entity.
    - Renumber subsequent sections.
- 800.00**      **2010**      AMEND Section 801 (c), nonconforming uses, to read: “except for proposal “B” (see diagram in section 800.03), any alteration, expansion or change (...)”  
AMEND Section 803.03, diagram, to replace the work “yard” by “Setback”
- 1800.00**      **2010**      AMEND Section 1803.01, driveway Ordinance, definition of Driveway, to remove “area of access”
- 2000.00**      **2010**      AMEND Accessory Dwelling Ordinance:
- 2001.00, Purpose, to read: “To provide expanded housing opportunities (...), owner or owner’s family occupied, (...). Accessory dwelling units (ADU) shall be permitted in the R/A district by special exception granted by the Board of Adjustment and shall remain with the property.”
  - 2002.01, Requirements/Limitations, to read: “Accessory Dwelling Units shall be secondary and accessory to a principal single family dwelling unit or accessory building.”
  - 2002.07, Requirements/Limitation, to put back the entire section that was removed in 2008 and that reads: “An accessory dwelling unit shall not be considered to be an additional dwelling unit for the purpose of determining minimum lot size.”

<b>2200.00</b>	<b>2010</b>	AMEND Section 2203.02 (b) 3, Housing for Older Persons Developments, Site Perimeter Buffer, to read: “Each development (...) of fifty (50) feet or a value as deemed necessary by the Planning Board (...)
<b>2500.00</b>	<b>2010</b>	AMEND Section 2500.00 (a), Board of Adjustment, to read: “(...) for a period of not more than one year at the time.”
<b>Building Code</b>	<b>2010</b>	<p>REPEAL the Town of Brookline Building Code adopted in 1971 and as subsequently amended. <u>Note</u>: As off March 9, 2010, in accordance with RSA 115-A, the Building Department will be enforcing the State of New Hampshire Building Codes as amended:</p> <p>For all Commercial or Industrial Construction, including renovations, alterations and additions:</p> <ul style="list-style-type: none"> <li>- International Building Code</li> <li>- International Energy Conservation Code</li> <li>- National Electrical Code</li> <li>- International Mechanical Code</li> <li>- International Plumbing Code</li> </ul> <p>For all Residential construction, including renovations, alterations and additions:</p> <ul style="list-style-type: none"> <li>- International Residential Code (building, plumbing, electrical, gas piping, etc.)</li> <li>- International Energy Conservation Code</li> </ul> <p>For all gas piping work:</p> <ul style="list-style-type: none"> <li>- NFPA 54 and NFPA 58</li> </ul>
<b>100.00</b>	<b>2011</b>	AMEND the Preamble to refer to the correct NHRSA 674:16. – NHRSA Chapters 31:60 to 89 were repealed in 1983 and replaced by chapter 674, “Local Land Use Planning and Regulations Powers”.
<b>300.00</b>	<b>2011</b>	ADD Section 307.00 – Building Permits – To specify that the Town of Brookline follows the State of NH Building Code, pursuant to RSA 155-A and require that accessory building of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements. ( <u>Note</u> : the Brookline Building Code repealed March 2010 town meeting)
<b>500.00</b>	<b>2011</b>	AMEND Sections 503.03 and 503.05 – Exclude wetlands from the minimum lot size. Rename Section Building Height with “Building Requirements” keeping current wording and specifying how 35 feet building height is calculated and that an accessory building of 100 feet or less does not require a building permit but must meet all setback requirements. ( <u>Note</u> : the Brookline Building Code was repealed at the March 2010 town meeting)
<b>600.00</b>	<b>2011</b>	AMEND Section 603.05 – Rename Section Building Height with “Building Requirements” keeping current wording and specifying the minimum square footage for any new dwelling unit and for manufactured housing and that an accessory building of 100 feet or less does not require a building permit but must meet all setback requirements. ( <u>Note</u> : the Brookline Building Code repealed March 2010 town meeting)
<b>620.00</b>	<b>2011</b>	<p>AMEND Section 620.00 (Workforce Housing Option) – 626.00, general requirements: (2.) To specify that the minimum parcel size shall be for a workforce housing development shall be at least ten (10) contiguous acres excluding wetlands; (3.) To specify that the minimum lot size for market value and single workforce housing units, duplexes and multi-family buildings shall exclude wetlands; (10.) to correct reference so section 629.00 instead of 628.00.</p> <p>ADD Section 628.00 (3.) to specify requirement to access to the development.</p>

- 700.00**      **2011**      AMEND Section 700.00 (Manufactured Housing) – 701.01, requirement: to exclude wetlands from the minimum parcel size and specify requirements for a vegetated buffer.
- 1400.00**      **2011**      DELETE Section 1400.00 (Growth Management) – Section Deleted, expired March 2011 (referring to HB 1260 and NHRSA 674:22 and 23, effective July 8, 2008.)
- 200.00**      **2012**      ADD definition of Buildable Area: An area capable to accommodate a house site (or commercial structure if so planned) and all required utilities such as water supply and wastewater disposal. The buildable area is the area of a lot excluding wetlands, land with slopes over twenty-five (25) percent, water bodies, regulatory floodways, setback requirements and land restricted from development by easements, covenants or other legal restrictions. The buildable area is intended to ensure that the lot is capable of meeting all Town of Brookline zoning requirements.
- 500.00**      **2012**      AMEND Section 502.03 Land Area. Each building lot shall be at least one (1) *contiguous* acre excluding wetlands
- 600.00**      **2012**      AMEND Section 603.02 Land Area. Each building lot shall have at least 80,000 *contiguous* square feet, excluding wetlands.
- AMEND Section 603.04 Number of Dwelling Units. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A ~~two-family house~~ *two-family dwelling unit* shall require ~~two times the minimum land area~~ *at least 160,000 contiguous square feet of land excluding wetlands.*
- AMEND Section 603.06 Back Lots, sub-sections a. and d.
- a. Requires a minimum lot area of *at least five* (5) acres *with a buildable area of at least 80,000 contiguous square feet of land* excluding wetlands.
- d. ~~Duplexes~~ *A two-family dwelling unit* requires *a minimum lot area of* ten (10) acres ~~minimum lot size~~ *with a buildable area of at least 160,000 contiguous square feet of land* excluding wetlands.
- 620.00**      **2012**      AMEND Section 626.00, 3. - The minimum lot size for a single family market value *unit* or a single *family* workforce housing unit shall be one (1) *contiguous* acre excluding wetlands. The minimum lot size for a ~~duplex~~ *two-family dwelling unit* shall be one and one half (1.5) *contiguous* acres excluding wetlands. The minimum lot size for a *three (3), four (4)* or five (5) unit multi-family building shall be three (3) *contiguous* acres excluding wetlands.
- 1500.00**      **2012**      AMEND Section 1505.03 Setbacks. 15 foot setback from the front, rear, and side per lot, measured from the property lines. ~~The subdivision perimeter will contain a 50-foot setback where no structure shall be built.~~

ADD Section 1505.04 Site Perimeter Buffer: *Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique*

*circumstances of an abutting use or property warrant. The site perimeter buffer shall **NOT** count towards the required minimum protected open space.*

AMEND Section 1505.04 and RENUMBER to 1505.05 - Lot Size. *Each building lot shall have a minimum of one (1) contiguous acre excluding wetlands. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A two-family ~~structure~~ dwelling unit shall require ~~two times the minimum land area~~ a minimum of two (2) contiguous acres, excluding wetlands.*

Subsequent sections were renumbered

- 2000.00**    **2012**    AMEND Section 2002.11 - The gross living area of an accessory dwelling unit shall not be less than 350 square feet *and* ~~or~~ not greater than 1,000 square feet. (To clarify that both conditions are required)
- 2200.00**    **2012**    AMEND Section 2203.02. b. 3) Site Perimeter Buffer: Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall **NOT** count towards the required minimum protected open space.
- 200.00**    **2014**    **Definitions** - ADD all necessary definitions related to the revised Sign Ordinance (see below, section 1600.00)
- 500.00**    **2014**    AMEND Section 502.00, Uses Permitted, to add the word "**Commercial**" to subsection v. to read as follow: "Any commercial use which does not offend by emission of smoke, dust, gas, noise, odor, or fumes".
- 1600.00**    **2014**    AMEND the entire Section 1600.00, Sign Ordinance. The revised ordinance gives more flexibility to the Planning Board when reviewing a sign application and act on a case by case basis by having the authority to grant a *Conditional Use Permit* as allow by the RSA instead of having an applicant going to go to the Zoning Board of Adjustment.
- 1700.00**    **2014**    AMEND the Home Business ordinance, subsection 1702.05 to ADD "at any one time" to read as follow: "Home Business shall be conducted by the resident, resident members of the owner's family, a resident tenant, or resident members of the tenant's family. Two employees **at any one time**, in addition to home inhabitants, are permitted to work on the premises."
- 2200.00**    **2015**    AMEND the entire Section 2200.00, Housing for Older Persons Developments. Summary of amendments:
- Change the age requirement for residents from 62 to 55 years and older,
  - Reduce the minimum development tract size to 10 acres and reduce the minimum percentage of the total tract area to be set aside as open space to 20 percent,
  - Provide alternative options when such developments are proposed in the Residential/Agricultural district or the Commercial/Industrial district such as:
    - Dwelling unit density
    - Site perimeter buffer

- Setbacks and unit separation
  - Unit standards
  - Pedestrian linkage and circulation
- 600.00**     **2016**     ADD Bed & Breakfast as a Use Permitted by Special Permit in the Residential / Agricultural District.
- 2000.00**     **2016**     AMEND Accessory Dwelling Units (ADUs) ordinance:
- Clarify that ADUs shall be within or attached to the building which houses it,
  - Property owner must occupy one of the two dwelling units,
  - Shall comply with fire alarm system interconnections requirements,
  - Clarify that in case of change of ownership, new owner must comply with the entire section 2000.00,
  - Edit section 2004.00 to provide steps that must be taken prior to applying for a special exception.
- 2400.00**     **2016**     CREATE a New Section: Bed & Breakfast and renumber the subsequent sections.
- 200.00**     **2017**     REVISE the definition of “frontage”.
- 603.06**     **2017**     REMOVE “on a Class I, II, or V road” from the back lot minimum frontage requirements.
- 1102.04**     **2017**     REVISE “buffer zone” definition to combine it with (to be deleted) section 1103.01 (jurisdiction, buffer zone).
- 1105.01**     **2017**     CHANGE septic system setback from wetland areas from 75’ to 50’ in order to match State requirements.
- 1300.00**     **2017**     UPDATE the “Aquifer Protection District Performance Standards” reference related to Best Management Practices to be consistent with the NH DES code numbering to ENV-Wq 401.
- 1505.03**     **2017**     REMOVE “The subdivision perimeter will contain a 50’ setback where no structure shall be built”.
- 1505.04**     **2017**     ADD “where no structure shall be built” after “protected undeveloped site perimeter buffer”.
- 2002.00**     **2017**     AMEND the entire Accessory Dwelling Units (ADUs) ordinance in order to comply with SB 146 that will take effect on June 1, 2017.
- 1506.01**     **2018**     REMOVE “subject to the approval of voters at Town Meeting”.
- 2002.02**     **2018**     AMEND to read: One of the two dwelling units shall be the primary residence and the legal domicile of the property owner.
- 500.00**     **2019**     AMEND the Industrial-Commercial District (By Petition) to include Lot K-26 (Brookline Animal Hospital) in the Town I-C district, which already abuts the I-C District along Route 13.
- 1100.00**     **2019**     AMEND the entire Wetland Conservation District Ordinance to reorganize its section to make the ordinance clearer. No major changes were proposed.

1506.01 2020 AMEND the Open Space Development Ordinance and add the following language to the end of the existing paragraph: “A pre-conveyance open space conservation easement deed shall be recorded and shall have an easement sunset upon conveyance to the Town or homeowner association”.

1800.00 2020 AMEND the Driveway Ordinance. Paragraph #4 of the Driveway Permit Application: change “Road Agent” to “Department of Public Works Director”.

<b>APPENDIX A: TABLE OF AMENDMENTS</b> .....	<b>98</b>

An ordinance to promote the health, safety, morals, and general welfare of the community by regulating the use of land in the Town of Hollis.

## **PREAMBLE**

In pursuance of authority conferred by Chapter 674:16-34; New Hampshire Revised Statutes Annotated as amended and for the purpose of promoting the health, safety, morals, and general welfare of the inhabitants of the incorporated Town of Hollis, New Hampshire, by securing safety from fire, panic, and other dangers, providing adequate areas between buildings and various rights-of-way, by preventing the overcrowding of land, avoiding undue concentration of population, facilitating the adequate provisions for transportation, water, sewage, schools, parks, and other public requirements, and by other means in accordance with a comprehensive plan, the following ordinance is hereby adopted by the voters of the Town of Hollis, New Hampshire, in official Town meeting convened.

## **SECTION I: AUTHORITY**

- A. AUTHORITY:** This ordinance has been adopted by Town Meeting Vote of the Town of Hollis, New Hampshire.
- B. AMENDMENTS:** This ordinance may be amended by a majority vote of any legal Town Meeting in accordance with provisions of the New Hampshire Revised Statutes Annotated. The Planning Board has the authority to assign such section numbers to this ordinance and to the Building Code as it may deem appropriate, provided that no substantive change shall occur as a result of such renumbering.
- C. PLANNING BOARD:** The Planning Board is authorized to require, when the scope of the impact of a proposed application warrants, an applicant to participate in a preliminary conceptual consultation or design review

## **SECTION II: SEPARABILITY CLAUSE**

The invalidity of any provisions of this Ordinance shall not affect the validity of any other provision.

## **SECTION III: WHEN EFFECTIVE**

This Ordinance shall take effect upon its passage.

## **SECTION IV: ENFORCEMENT AND ADMINISTRATION**

- A.** The Building Inspector established under RSA 673:1 shall also serve as the Code Enforcement Officer.
- B.** The Code Enforcement Officer, or the Board of Selectmen's designee, shall have the duty, and is hereby authorized, to enforce the provisions of this ordinance.
- C.** Upon any violation of this Ordinance, the Selectmen shall, on their own initiative, take immediate steps to enforce the provisions of this ordinance by seeking an injunction in the Superior Court or by any other proper legal action.
- D.** All applications for building permits shall be accompanied by a plat drawn to a scale of not smaller than 1" =100', showing the actual dimensions of each lot to be built upon, the size and location of each building to be erected upon each lot, and such other information as may be necessary to enable the Building Inspector to determine that the proposed structure and use of land will conform to the provisions of this Ordinance. A record of such applications and plats shall be kept in the office of the Building Inspector.
- E.** No excavation for foundation, nor erection, construction or structural alteration of any structure or part of a structure, or occupancy of streets or alleys with building materials or temporary structures for construction purposes shall be undertaken until a permit shall have been issued by the Building Inspector. No such permit shall be issued before application has been made for a Certificate of Occupancy.
- F.** No vacant land shall be occupied until a Certificate of Occupancy shall have been issued by the Building Inspector.
- G.** A Certificate of Occupancy (CO), either for the whole or part of a new building or for the alteration of an existing building shall be applied for at the same time as the application for a building permit is applied for. The CO shall be issued within 90 days after notice of erection or alteration of such building or part of such building and shall have been completed in conformity with the provisions of this Ordinance.
- H.** A Certificate of Occupancy for the use or occupancy of vacant land, or for a change in the use of an existing building, shall be applied for and issued before any such land shall be occupied or used, or such land or building changed in use, and such certificate shall be issued within 15 days after application has been made, provided such proposed use is in conformity with the provisions of this Ordinance.

- I. A record of all Certificates of Occupancy shall be kept on file in the office of the Building Inspector and a copy shall be furnished on request to any person having proprietary and tenancy interest in the building or land affected.
- J. A building permit shall be valid for one year from the date of issuance. Said permit period may be extended for one or more times with the approval of the Building Inspector. If said permit expires, the building materials and equipment on the ground shall be removed or stored according to the requirements of the Building Inspector.

### ***SECTION V: PENALTIES AND FINES***

Pursuant to NH RSA 676:17, any violation of this Ordinance, or any other regulation adopted pursuant to Title LXIV of the NH Revised Statutes Annotated, by the Town of Hollis, shall be punishable by either:

- A. A civil fine of not more than \$100 for each day that such violation is found by a court to continue after the conviction date, or after the date on which the violator receives written notice from the municipality that he/she is in violation of such ordinance or regulations, whichever date is earlier; or
- B. A criminal penalty, which shall be;
  - 1. a misdemeanor if the violation is committed by a natural person; or
  - 2. a felony if the violation is committed by any other person.
- C. Additionally, the Town of Hollis hereby adopts by reference Paragraphs II through IV of NH RSA 676:17 regarding the recovery of municipal attorneys' fees and costs, other municipal costs, and the posting of a bond by alleged violators with the Superior Court.

### ***SECTION VI: BOARD OF ADJUSTMENT***

- A. The Board of Selectmen shall make appointment to a Board of Adjustment consisting of five members conforming in duties to the provisions of Chapter 674:33 of the NH Revised Statutes Annotated, as amended. Thereafter, as terms expire or vacancies occur, the appointing Authority shall be responsible for filling vacancies and maintaining full membership on the Board of Adjustment. The Board of Adjustment shall conform in membership and term of office to the provisions of Section 5, Chapter 673, NH Revised Statutes Annotated, as amended. In addition to the general powers granted to the Board of Adjustment by Chapter 674:33, it may, if in harmony with and subject to its provisions, authorize the following exceptions to be made and permits to be issued:
  - 1. For the erection or use of a structure in any District by a public utility corporation when such erection or use is reasonably necessary for the service of the public and not unreasonably detrimental to the character of the development.
  - 2. For a cemetery or a municipal utility in any District.
  - 3. For churches, religious buildings, auditoriums, municipal buildings, and other similar places of public assembly.
- B. In the determination of a decision with regard to an exception, the Board of Adjustment shall consider that:
  - 1. The use shall not be detrimental to the character, environment, scenic value or general welfare of the Town; and
  - 2. The use shall not materially affect traffic or the physical condition of the Town roads.

**SECTION VII: ZONING**

**A. ZONING DISTRICTS**

The zoning map officially entitled, “Hollis Zoning Map” is hereby adopted as part of this ordinance. It shows a division of the Town into the following zones:

1. **AGRICULTURAL AND BUSINESS ZONE (A&B):** To include the entirety of the following lots:

17-15	52-5	52-16	52-26	52-36	53-7
17-15.1	52-6	52-17	52-27	52-37	53-13
17-16	52-7	52-18	52-28	52-38	53-14
17-16.1	52-8	52-19	52-29	52-39	53-15
17-17	52-9	52-20	52-30	52-41	53-16
17-21	52-10	52-21	52-31	52-42	53-17
	52-12	52-22	52-32	52-43	
18-4	52-13	52-23	52-33	53-3	56-1
18-5	52-14	52-24	52-34	53-4	56-27
	52-15	52-25	52-35	53-6	

Also to include a portion of the following lots, consistent with the Zoning Map:

17-18	18-9	24-2	52-11	53-8
17-19			52-40	

Also to include an area on both sides of Silver Lake Road to a depth of three hundred (300) feet, north of the intersection of Ames Road to the Amherst line.

2. **COMMERCIAL ZONE (C):** To include an area east of Route 111, north of the Mobile Home-2 Zone, and west of the Recreational Zone, centered on part of a private road known as Pineola Drive.
3. **INDUSTRIAL ZONE (IN):** To include land in an area on Proctor Hill Road to a depth of 1,000 feet on the south side and 2,000 feet on the north side, extending 2,000 feet easterly into Hollis from the Brookline line, and all the land westerly from Runnells Bridge Road (Route 111) to a depth of 1,500’ from the northern boundary of the Trailer Park Zone thence northerly to Twiss Lane and Depot Road.
- i. **MOBILE HOME-1 ZONE (MH-1):** To include land on the west side of the Runnells Bridge Road as shown on the official zoning map as follows: Starting from an iron pipe 600’ north of the Pepperell line on the west side of Rt. 111; South 87° 38’ 54”, West 1,320’ to an iron pipe, thence North 0° 14’ 42”, West 1,291.10’ to a stone bound, thence South 88° 45’ 00”, East 404’ to an iron pipe, thence North 4° 00’ 00”, East 99’ to a stone bound, thence North 89° 00’ 00”, East 1,160’ to a stone bound on Route 111, thence South 9° 46’ 00”, West 1,369.98’ to the point of beginning.
  - ii. **MOBILE HOME-2 ZONE (MH-2):** To include approximately 110 acres; extending east from the northeastern-most boundary of the trailer park to the Recreational Zone and to follow the Recreational Zone south/southwest to the Massachusetts line, then west to Route 111, thence in a northerly direction along Route 111 to the starting point.
  - iii. **RECREATIONAL ZONE (R):** To include all the land within 600’ of the shores of Silver Lake, Pennichuck Pond, Rocky Pond, Flint Pond, the Nissitissit River, Nashua River, and Dunklee Pond.
  - iv. **RESIDENTIAL AND AGRICULTURAL ZONE (R&A):** To include those areas as shown on the official Hollis Zoning Map.
  - v. **RURAL LANDS ZONE (RL):** To include those areas as shown on the official Hollis Zoning Map.
  - vi. **TOWN CENTER ZONE (TC):** To include that area as defined on the official Hollis Zoning Map.

- vii. **WATER SUPPLY CONSERVATION ZONE (WSC):** To include all of the area between Proctor Hill Road and the Recreational Zone west of Silver Lake delineated by the U.S.G.S. as having a stratified drift aquifer, and as delineated by the Aquifer Protection Overlay Zone (APO); also to include the area of Map 17, Lot 12 and the area between the delineated aquifer and the intersection of Proctor Hill Road and Rocky Pond Road.

**B. OVERLAY ZONING DISTRICTS**

- 1. **AQUIFER PROTECTION OVERLAY ZONE (APO):** To include those areas indicated as having stratified drift aquifers, as shown on maps produced by the U.S. Geological Survey as part of its study, Hydrogeology of Stratified-Drift Aquifers and Water Quality in the Nashua Regional Planning Commission Area South-Central New Hampshire, 1987, and as delineated on the map, "Stratified Drift Aquifers, Town of Hollis, NRPC, 1991."

- viii. **FLOOD PLAIN OVERLAY ZONE (FPO):** To include land within the 100 year flood boundary as shown on the Flood Insurance Rate Map for the Town of Hollis, NH, published by U.S. Department of Housing and Urban Development, Federal Insurance Administration, effective 16 April 1979. Community Panel Numbers 330091 0005 B and 0330091 0010 B.

**WETLAND CONSERVATION OVERLAY ZONE (WCO):** To include wetlands, surface waters, hydric soils, and a buffer zone of one hundred (100) feet around these wetlands, hydric soils and surface waters. All measurements for determining the buffer zone, which are under the jurisdiction of the Town of Hollis, shall be taken from the mean high water mark of a surface water, the delineated edge of a wetland, or the limits of hydric soils (whichever is most restrictive).

**MULTI-FAMILY ZONE:** To include those land areas zoned R & A located east of the Nashua River.

**C. COPIES OF ZONING MAP**

Regardless of the existence of other printed copies of the zoning map, which from time to time may be made or published, the official zoning map shall be located in the Office of the Planning Board and shall be signed by the Chairman of the Planning Board. Where there is conflict between the official zoning map and the text of this ordinance, the text of this ordinance shall control and shall be the final authority as to current zoning status of the land and water areas, buildings, and other structures in the Town.

**D. BOUNDARIES**

- 1. **LOCATION OF BOUNDARIES:** Boundaries shown within the lines of roads, streams, and transportation rights-of-way shall be deemed to follow the center lines. The abandonment and non-use of roads shall not affect the location of such boundaries. When the Building Inspector cannot definitely determine the location of a boundary by such center lines, by the scale or dimensions stated on the zoning map, or by the fact that it clearly coincides with the property line, s/he shall refuse action, and the Board of Adjustment, upon appeal, shall interpret the location of the boundary with reference to the scale of the zoning map and the purposes set forth in all relevant provisions of this ordinance.

**xi. LOTS DIVIDED BY A ZONING DISTRICT BOUNDARY**

- 1. The Zoning Board of Adjustment may grant by Special Exception a reasonable extension of the regulations of either District over a lot divided by a district boundary line, when all parts of such lots are held under the same ownership at the time of the passage of this paragraph of this Ordinance. This shall not, however, allow for the extension of other district regulations into either the Recreational or Water Supply Conservation Districts, and it shall not relieve an owner of meeting the standards of any overlay zone.
- 2. The standards of an overlay zone shall only apply to that portion of a lot where the overlay zone appears.

## ***SECTION VIII: DEFINITIONS***

For the purpose of this ordinance, certain terms or words used herein are defined as follows:

***ACCEPTABLE LAND:*** Acceptable land is land which consists of the following soil drainage classes: excessively drained, well drained and/or moderately well drained. These soil drainage classes are considered acceptable because they indicate soils that have slight to moderate limitations for building site and leach field development. The remaining soil drainage classes and delineated wetlands indicate soils that have severe limitations for building site and leach field development because they have a high water table or are otherwise unsuitable for development because of wetland and hydric conditions. Soil information shall be determined, at the Planning Board's discretion, by a certified soil scientist in accordance with Site Specific Soil Mapping Standards for New Hampshire and Vermont, Society of Soil Scientists of Northern New England Publication No.3, 1997. Please see the buildable lot definition for the amount of acceptable land required in each type of residential lot found in Hollis.

***ACCESSORY BUILDING OR USE, CUSTOMARY:***

- a. A customary accessory building or use is one which:
  - (i) is secondary to and serves the principal building or principal use;
  - (ii) is secondary in area, extent, or purpose to the principal building or principal use served;
  - (iii) contributes to the comfort, convenience, or necessity of occupants of the principal building or principal use served;
  - (iv) is located on the same lot as the principal building or principal use served; and
  - (v) contributes activity to the principal use;
- b. Attached garages, porches and other appenditures, and other attached structures are considered a part of the principal building and are not considered an accessory building or use;
- c. All accessory structures greater than 250 square feet building footprint or greater than 12 feet in height must comply with the setback requirements for principal buildings.

***AGRICULTURAL ENTERPRISE:*** Any duly-permitted farm, agricultural or farming activity as defined in NH RSA 21:34-a.

***ALTERNATIVE TREATMENT CENTER:*** An "alternative treatment center" as defined in RSA 126-X:1, I, namely, a not-for-profit entity registered under RSA 126-X:7 that acquires, possesses, cultivates, manufactures, delivers, transfers, transports, sells, supplies, and dispenses cannabis, and related supplies and educational materials, to qualifying patients and alternative treatment centers. Alternative Treatment Centers are defined as one of two types of facilities:

- a. ***Alternative Treatment Center - Cultivation Location:*** A "cultivation location" as defined in RSA 126-X:1, IV, namely, a locked and enclosed site under the control of an alternative treatment center where cannabis is cultivated, secured with one or more locks or other security devices in accordance with RSA 126-X and the Department of Health and Human Service's administrative rules.
- b. ***Alternative Treatment Center - Non-Cultivation Location:*** An alternative treatment center operated in accordance with RSA 126-X and the Department of Health and Human Services administrative rules that has a separate location for the cultivation of cannabis.

***APPLICABLE ACRES:*** Applicable acres refers only to undeveloped land. Land within the minimum lot area of a residence on a developed lot, areas within required buffers, required recreation lands or open space, lands within road ways or public rights-of-way, and sand and gravel excavations shall be considered to be developed land for the purposes of this ordinance. Conservation lands or agricultural lands shall not be considered developed land for the purposes of this ordinance.

***ARTERIAL STREET:*** Arterial streets serve to move large volumes of traffic through a town or to connect one section of town with another section. These streets include and are limited to: NH Route 111 & 111A, NH Route 130, NH Route 122, NH Route 101A, Broad Street and Depot Road.

***BACKLAND LOTS:*** Lots which have a reduced minimum frontage requirement, but which have a greater minimum lot size requirement and which can be serviced by a private driveway leading to a public road.

**BED AND BREAKFAST:** A Bed and Breakfast is defined as a transient lodging facility, that is the personal residence of its owner, is occupied by the owner at the time of rental to a patron, and in which the only meal served is breakfast to in-house patrons. Residents, patrons and non-resident employees must be provided with off-street parking. The bed and breakfast must also comply with all state regulations and have an adequate septic system.

**BUILDABLE LOT:** A lot will be deemed buildable for residential purposes when it contains a minimum of one and one-half (1 1/2) contiguous acres of acceptable land which is not divided by utility easements, rights-of-way or waterways. HOSPD lots are required to contain a minimum of one contiguous acre of acceptable land. For all lots, the contiguous area of acceptable land must be able to contain a Building Area. The Planning Board reserves the right to require that a Site Specific Soil Map be performed for any lot, or portion of a lot, in a subdivision for which Planning Board approval is sought.

**BUILDING AREA:** An area on a buildable lot that is capable of accommodating a house site (or commercial structure if so planned) and all required utilities such as water supply and wastewater disposal. The Building Area shall be made up of Acceptable Land and may be either a rectangle measuring one hundred (100) feet by two hundred (200) feet or a circle with a diameter of one hundred sixty (160) feet. No portion of the Building Area may be located within a building setback or wetland buffer or on altered/unaltered slopes greater than 25%. The home or building is not required to be placed within the building area. Rather, the building area is intended to ensure that the lot is capable of meeting all Town of Hollis zoning requirements. The applicant shall demonstrate that driveway access from the lot's Frontage can be provided to the Building Area without the need for any waivers. Said driveway shall lie entirely on the subject lot.

**CLUSTER HOUSING:** Cluster housing is an attached unit housing style where common, soundproof and fireproof walls vertically join the separate units, which are side by side. No separate dwelling units may be placed one above the other.

**CONGREGATE CARE FACILITY:** An elderly housing development with communal dining facilities and services, such as housekeeping, organized social and recreational activities, transportation services, and other support services appropriate for the residents.

**DENSITY:** The quantity of dwelling units per acre.

**DWELLING UNIT:** A dwelling unit is a single residential unit of living space, with its own living area, sleeping area, bathroom, and facilities for cooking, approved for occupancy by the Town of Hollis. Dwelling units may be attached, as in accessory dwelling units, apartments, or multifamily configurations, or detached single family structures

**DWELLING, ATTACHED:** A dwelling unit which is attached to one or more dwelling units, each of which has independent access to the outside of the building to ground level and which has no less than 2 exterior walls fully exposed and not in common with the exterior walls of any other unit.

**DWELLING, SINGLE FAMILY:** A dwelling unit which is unattached to any other dwelling unit.

**DWELLING, TWO FAMILY:** Two dwelling units attached, designed, arranged, or used exclusively for 2 families living independently of each other. This definition does not include accessory apartments.

**EARNED RIGHT:** Building Rights earned by a record holder based on the ownership of land within Hollis during the building year.

**ESSENTIAL SERVICES:** The erection, construction, alteration, or maintenance by public utilities, municipal or other governmental agencies of underground or overhead gas, electrical, steam or water transmission or distribution systems, collection, communication, supply or disposal systems; including poles, wires, mains, drains, sewers, pipes, conduits, cables, fire alarm boxes, traffic signals, hydrants, and other similar equipment and accessories reasonably necessary for furnishing adequate service or for the public health, safety, or general welfare.

**EXTERIOR STORAGE:** The outdoor storing of equipment or materials on a permanent or long-term basis without permanent protection from the elements, such that these materials or equipment are in plain view from surrounding properties. This does not include registered personal vehicles or one registered business vehicle per residence.

**FAMILY:** One or more persons occupying the premises and living as a single housekeeping unit.

**FARM STAND:** An Agricultural Enterprise which displays and sells agricultural products raised, produced and processed on the premises, and which may include a Structure(s) used in the operation. All Farm Stands Structures must be set back at least 35 feet from the adjacent Public Road and have adequate off street parking. A Farm Stand shall remain an Agricultural Enterprise and shall not be considered a commercial use, provided that at least 35% of the products sales in dollar volume are attributable to products produced on the farm or farms of the stand owner. Owners

of Farm Stands, based upon review by town staff, may be required to obtain site plan review approval from the Planning Board.

**FLEA MARKET:** An informal market place for sellers of used and new goods. Usually a seasonal operation, with open air tables and stands.

**FLOATING ZONE:** A floating zone refers to flexible regulations which may be overlaid on any residential zone. The regulations of a floating zone (i.e., HOSPD) may vary the normal requirements of the zone overlaid.

**FLOOD: 100-Year Frequency:** The highest level of flooding that, on the average, is likely to occur once every 100 years, according to studies performed for the National Flood Insurance Program and adopted by the Town.

**FLOOD PLAIN OR FLOOD PRONE AREA:** Any normally dry land area that is susceptible to being inundated by water from any source, as defined under the Flood insurance rate maps.

**FRONTAGE:** That continuous portion of a lot line bordering on a highway, street or right-of-way of class V or better, capable of providing the principal route of access to the lot in a manner that meets all Town of Hollis land-use ordinances and regulations without requiring any waivers there from.

**FRONT YARD:** An open unoccupied space extending for the full width of a lot between the extreme front line of the building thereon and the nearest existing edge of the public road.

**HOME OCCUPATION:** Professional occupations or those occupations traditionally carried on in the home.

**HOSPD:** A Hollis Open Space Planned Development (HOSPD) is a floating zone development standard for land subdivision where the density of dwelling units is no greater than that which would be permitted in the district in which the HOSPD is located, but where the lot size and other dimensional standards may be reduced in exchange for the preservation of permanently-protected open space, recreational land, forests, and/or farmland.

**HOUSING FOR OLDER PERSONS:** The occupancy of units within a development specifically designed for older persons and their families. The age of the occupants of the project will be regulated by private covenants in a manner that will insure that it complies with the federal and state laws relating to Housing for Older Persons as that term is defined in RSA 354-A:15 as well as any federal counterpart of that statute as they may be amended.

**IMPROVED LAND:** Land that is occupied by a principal or accessory structure, utilities, roads or driveways suitable for automobiles, or other manmade improvements, including impervious surfaces, related to occupation of the land for habitation or commercial uses.

**JUNK:** Any old metal, bottles, paper, plastic, or rubber products, cotton or woolen wastes, two or more unregistered motor vehicles which are unfit for use on the highways, used parts and materials of motor vehicles, the accumulation of which is detrimental or injurious to the neighborhood.

**LANDSCAPE MATERIALS YARD:** A facility for the processing, storage and sale of landscaping materials including loam, landscape stone of various sizes, mulch, stumps and brush, sawdust and compost. The property on which the proposed use will operate shall be a minimum of 30 acres, consisting of one or more contiguous lots under common ownership.

**LEASABLE AREA, GROSS:** The total floor area designed for tenant occupancy and exclusive use, measured from the exterior walls and including all tenant-related interior space, but not to include common areas accessible to more than one tenant and which are not directly related to the tenants' business.

**LOT:** A parcel of land or any combination of several contiguous lots of record, occupied or intended to be occupied by a principal building or a building group, as permitted herein, together with their accessory buildings or uses and such access, yards, and open space required under this ordinance.

**LOT OF RECORD:** A parcel of land described according to a specific plat, survey or deed which has been officially accepted under the terms of this ordinance and any other applicable ordinances and regulations of the Town and statutes and regulations of the State, and recorded in the Hillsborough County Registry of Deeds.

**LOW-INCOME HOUSING:** Housing developed to remain affordable for a period of not less than twenty (20) years to households with gross annual incomes at or below 80% of the median household income for the Nashua PMSA.

**MAJOR COLLECTOR STREET:** Collector streets act to feed traffic to and from local roads and Arterials. Collector roads provide direct access to abutting properties and distribute it to or from Arterials. South Merrimack Road is a Major Collector Street.

**MOBILE HOME:** Any mobile structure which is intended, designed, and used for the permanent or temporary residence of a person, family, or a household, mounted upon wheels or supports, or supported and/or capable of being moved or transported by another vehicle. For the purpose of this ordinance, the removal of wheels and/or the attachment of a foundation to said mobile structure shall not change its classification. Double width mobile structures, which are fabricated on individual chassis with wheels and are designed to be joined, shall be considered a mobile home for purposes of this ordinance.

**MODERATE-INCOME HOUSING:** Housing developed to remain affordable for a period of not less than twenty (20) years to households with gross annual incomes at or below 100% of the median household income for the Nashua PMSA.

**NET TRACT AREA:** The net tract area of the parcel is determined by subtracting the total area calculated for wetlands, surface waters, hydric soils, flood plain, road rights-of-way, and altered/unaltered slopes greater than 25% from the total (gross) tract area.

**MULTI-FAMILY DWELLINGS:** Three (3) or more dwelling units attached, designed, or arranged as separate housekeeping units.

**NONCONFORMING LOT:** A lot which was lawfully created but which does not conform to the current minimum dimensional requirements specified for the zone in which it is located.

**NONCONFORMING USE OR STRUCTURE:** An activity or a building, sign, fence, structure, or a portion thereof, which lawfully existed before the adoption or amendment of this ordinance, but which does not conform to all of the current terms and standards contained in this ordinance.

**OPEN SPACE:** Any area of essentially unimproved land designated on a plan as reserved for public or private use.

**PUBLIC ROAD:** A road or highway approved or maintained by the Town or State of New Hampshire including any federal Highway.

**RECORD HOLDER:** A legal owner of record with clear title to any land in the Town of Hollis, NH.

**RESTAURANT, GENERAL:** An establishment in which food is prepared and served and customers' orders are taken and served at dining tables or a dining counter; a single inside takeout station, serviced by one cash register, shall be allowed. This definition excludes those uses defined by "Fast-Food Restaurant."

**RESTAURANT, FAST FOOD:** An establishment for the sale of food or drink prepared on or off premises and served in disposable containers or wrappers for immediate consumption on or off premises unless such sales are wholly incidental to a General Restaurant or other permitted use. Orders are taken and served at a service counter, and table service is not regularly provided. This definition shall include any establishment utilizing either 'drive-in' or 'drive-through' service.

**RETIREMENT COMMUNITY:** A large-scale elderly housing development that includes recreational facilities specifically designed for the residents of the development, and that may also include the following: congregate care facilities, medical facilities for the care of the residents of the development; commercial establishments intended to serve the needs of the residents of the development. Retirement communities shall accommodate the needs of an older population seeking living arrangements capable of providing a continuum of care in a campus setting

**Setback:** The minimum distance between the nearest portion of a building or structure, a lot line, a right-of-way line, a leachfield, a well, or a terrain feature such as shoreline or wetlands area. Setbacks are required in this ordinance to support the purposes of Zoning Ordinances as specified in state law. (2020)

**SEASONAL AGRICULTURAL SIGN:** Sign displayed by an agricultural enterprise during the harvest season for the on-site sale of the enterprise's site-grown product. Such sign may be either off-premises or on-premise.

**SIGN:** Any fabricated sign or outdoor display structure, including its structure, consisting of any letter, figure, character, mark, point, plane, marquee sign, design, poster, pictorial, picture, stroke, stripe, line, trademark, reading matter or illuminating device, which is constructed, attached, erected, fastened or manufactured in any manner so that the same shall be used for the attraction of the public to any place, subject, person, firm, corporation, public performance, article, machine or merchandise, and displayed in any manner out of doors, or indoors as a window sign, for recognized advertising purposes. See sign ordinance for other definitions.

**SITE SPECIFIC SOIL MAP:** A map developed from information prepared in accordance with Site Specific Soil Mapping Standards for New Hampshire and Vermont, Society of Soil Scientists of Northern New England Publication

No. 3, 1997, as amended.

**STRUCTURE AND/OR BUILDING:** That which is erected or assembled using a combination of materials for occupancy or use, whether portable or affixed to the ground. This includes structures of permanent or temporary construction, plastic, fabric, and/or canvas covered frame structures, structures for agricultural uses, structures installed on skids, blocks or permanent foundations and all sheds and storage facilities. All structures will require a building permit. Structures shall not include fences, basketball and tennis courts.

**SUBDIVISION:** The division of a lot, tract, or parcel of land into two or more lots, plats, sites, or other divisions of land for the purpose, whether immediate or future, of sale, rent, lease, transfer, condominium conveyance, or building development. It includes a re-subdivision and, when appropriate to the context, relates to the process of subdividing or to the land or territory subdivided. The division of a parcel of land held in common and subsequently divided into parts among the several owners shall be deemed a subdivision.

**TEMPORARY STRUCTURE:** A structure, which is designed, built, created or occupied for short and/or intermittent periods of time. This shall include, but is not limited to, plastic, fabric, and/or canvas covered frame structures. All temporary structures will require a building permit. Temporary structures shall comply with all applicable setbacks, except as noted in the Farm Stand definition, and/or height requirements for accessory or principal structures, as outlined in Section X. Zoning Districts. Structures which are in use for a period of less than 7 days are exempt from the permit requirement. Temporary structures located within the Historic District shall be appropriately screened from public view and must obtain prior approval from the Historic District Commission.

**TRAILER PARKS:** An area set aside for occupancy and use by house trailers or mobile homes.

**TOWN RIGHTS:** The rights to residential building permits earned by the Town of Hollis based on the total applicable acreage under Town ownership.

**UNALTERED SLOPES:** Slopes that are unaltered by human activity since December 1, 1999, except for legally permitted uses such as gravel pits.

**UNIMPROVED LAND:** Land that has not been developed with a principal building or other structures, utilities, roads or driveways suitable for automobiles, or other manmade improvements, including impervious surfaces, related to occupation of the land for habitation or commercial uses.

**USE, PERMITTED:** A use, which may be lawfully established in a particular zone, provided it conforms with all requirements of such zone.

**WETLAND:** A wetland is an area that is inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal conditions, does support a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include, but are not limited to, swamps, marshes, bogs, and similar areas. For the purpose of determining buffer zones for site plan and subdivision review, wetland boundaries shall be delineated by either a certified soil scientist or a professional wetland scientist according to the Corps of Engineers Wetlands Delineation Manual, 1987, and the Regional Field Indicators for Identifying Hydric Soils in New England, 1998.

## **SECTION IX: GENERAL PROVISIONS**

### **A. DAMAGED STRUCTURES**

No owner of land in any district shall permit fire or other ruins to be left, but shall remove the same to ground level, or repair or rebuild the structure within one year from written notice from the Board of Selectmen.

### **B. JUNK STORAGE**

No place for the storage of junk shall be maintained in any district. See Definitions, Section VIII.

### **C. MOBILE HOMES**

Mobile homes shall be permitted in the Mobile Home-1 (MH-1) Zone and in the Mobile Home-2 (MH-2) Zone as allowed in Section VIII or for those persons who are in the process of building a new home or rebuilding one which was destroyed by fire or other involuntary acts. Before use of a mobile home, except in the MH-1 or MH-2 Zones, a permit must be obtained from the Building Inspector for a 12 month period, with one 6 month extension allowable for demonstrated hardship only. No further extension may be granted. Upon receipt of a permit annually renewable by the Building Inspector, an unoccupied mobile home (excluding recreational vehicles) may be stored on its owner's property, but not within 25' of a public right of way or within 35' of front lot lines or within 15' of side and rear lot lines. The Building Inspector shall determine a reasonable location on the property for such storage.

### **D. ONSITE WASTEWATER TREATMENT**

1. No cesspool, or sewage disposal leach field, including the associated limits of disturbance, shall be constructed less than one hundred (100) feet from wetlands and surface waters or from wells. Septic tanks must be at least seventy-five (75) feet from a private water supply well. No cesspool, septic tank or sewage disposal system shall be constructed within seventy-five (75) feet of drainage swales and/or stormwater detention basins.
2. No waste waters or sewage shall be permitted to run free into wetlands or surface waters or be discharged in any way that may be offensive or detrimental to the health of others. All such waste shall be conveyed away underground through use of an accepted sanitary system or in such a way that it will not be offensive or detrimental to health.
3. All sanitary systems shall be constructed and maintained in accordance with standards set and enforced by the Department of Environmental Services.
4. Where ledge and high seasonal water tables are involved, at least four (4) feet of in-place soil shall exist above ledge or any other impermeable strata and two (2) feet of in-place soil shall exist above the seasonal high water mark before fill. In the Aquifer Protection Overlay Zone, at least four (4) feet of in-place soil shall exist above the seasonal high water table before fill, and the bottom of the leaching field shall be at least six (6) feet above the seasonal high water table.
5. The Town Septic Inspector may waive the provisions of this section for the repair or replacement of pre-existing septic systems.

### **E. IMPERMEABLE SURFACES AND BUILDING COVERAGE**

Impermeable surfaces shall include buildings, paved and unpaved vehicular access and parking areas, and any other area generally incapable of percolating water at a rate comparable to dry uncompacted ground.

1. Impermeable surfaces may cover no more than the following percentages of a lot in the indicated district:
  - a. Industrial (I) and Commercial (C): 60%
  - b. Agriculture & Business (A&B): 50%
2. Buildings may cover no more than the following percentages of a lot in the indicated district:
  - a. Industrial (I) and Commercial (C): 50%
  - b. Agriculture & Business (A&B): 35%
3. Except for the Industrial Zone, impermeable surfaces may cover no more than 15% of any lot in the Aquifer Protection Overlay Zone and the Wetland Conservation Overlay Zone.
4. In all other districts, maximum impermeable surface coverage shall be 25%.

5. Where Planning Board review is required, new development shall be permitted by the Planning Board only upon provision by the developer of mitigation measures designed to maintain stormwater runoff at the same level as before the new development. The Planning Board may, at its discretion, require greater mitigation measures. Mitigation measures shall consider both the need to control stormwater flow and the need to enhance infiltration/groundwater recharge.
6. For other standards relating to open space, see Hollis Open Space Planned Development, XX.

**F. SWIMMING POOLS, OUTDOOR STORAGE TANKS, COMMERCIAL FISHING PONDS**

Any facility for water recreation such as private swimming pools, outdoor water storage tanks, swimming clubs, and commercial fishing ponds, or any other water storage facility such as reservoirs, fish hatcheries, lobster ponds, and sewage lagoons shall comply with the following requirements:

1. The facility shall conform with the setback requirements for principal buildings. Except for in-ground swimming pools which shall conform with the setback requirements for an accessory structure.
2. Any swimming pool shall be enclosed by a fence no less than four (4) feet high with a self-closing gate to prevent uncontrolled access.
3. The facility, if operated to attract visitors, shall comply with parking requirements established under this ordinance.
4. All swimming pools require a building permit from the Hollis Building Inspector.
5. Where appropriate and necessary, in the opinion of the Building Inspector, the applicant will be required to provide a bond of a minimum of \$2,000 for an in-ground swimming pool or \$500 for an above-ground swimming pool, or other amount as set by the Building Inspector, as security for the proper construction of a fence around the area of the swimming pool as required by the Town's building code.

**G. OFF STREET LOADING**

1. **SPACES REQUIRED:** Every non-residential building or structure, which is used for acceptance or distribution of materials or merchandise by vehicles, and having up to 5,000 square feet of gross floor area, shall provide at least one loading and/or unloading space. One additional space shall be provided for every additional 10,000 square feet of gross floor area in the building. If it can be shown that these requirements are too restrictive for the operation in question, the Planning Board may reduce these requirements during its site plan review.
2. **SIZE OF OFF-STREET LOADING SPACE:** Each off-street loading space shall be at least 12 feet in width and at least 60 feet in length, exclusive of aisle and maneuvering spaces and shall have a vertical clearance of at least 14 feet; however, when it is demonstrated that a particular loading space will be used by shorter trucks, the minimum length may be reduced to 35 feet.
3. **LOCATION:** All required loading and/or unloading spaces shall be located on the same lot as the use served. No loading space for vehicles over 2 ton capacity shall be closer than 50 feet to any property in a residential zone unless completely enclosed by a fence, wall, or screen that will serve as an effective barrier to sound and exhaust.
4. **OFF-STREET LOADING SPACES** shall be designed and constructed so that all maneuvering for loading and/or unloading can take place entirely within the property lines of the use. Off-street loading spaces shall not hinder the free movement of pedestrians and vehicles over a sidewalk, street, road, highway, or deeded rights-of-way.
5. **ENLARGEMENT OF BUILDINGS:** The off-street loading requirements, shall apply at any time any building is enlarged or increased in capacity.
6. **SCREENING:** Parking and loading areas shall be screened from adjacent residentially-zoned properties, as required by Section IX.I.

**H. SCREENING**

1. Screening shall be provided for visual separation of incompatible uses as required in each zone. When screening is required it shall provide a reasonably effective year-round visual buffer by:
  - a. Use of existing vegetation and terrain where possible or,
  - b. New plantings, grade separations, fences.
2. Where screening is required, it must be approved by the Building Inspector before issuance of a certificate of

occupancy. For non-residential projects, screening shall be reviewed by the Planning Board during its site plan review procedure.

**I. HEIGHT REGULATIONS:**

1. **MAXIMUM HEIGHT:** Structures shall not exceed 38 feet in height in any district.
2. **EXCEPTIONS:**
  - a. Non-residential farming structures.
  - b. Non-residential structures such as church spires, utility and communication towers, smoke stacks, cupolas, etc.
  - c. Commercial and industrial structures if approved by the Planning Board according to its Site Plan Review Regulations.
3. **METHOD OF MEASUREMENT:** Height shall be measured vertically from the average elevation of the finished grade within 5 feet of the structure to the highest point on the roof.
4. **BUILDING PERMITS:** A single building permit shall be issued for each structure, irrespective of the number of attached dwelling units within each structure. The Planning Board shall determine whether or not the dwelling units have been attached in accordance with the requirements of the site plan regulations for housing for older persons.
5. **MINIMUM SAFETY STANDARDS**
  - a. The development shall meet all applicable building codes and life safety codes that have been adopted by the Town of Hollis, as well as other State and Federal statutes and regulations.
  - b. The Planning Board and/or Building Inspector may make requirements that exceed Federal and State requirements.

**J. NUMBER OF RESIDENTIAL UNITS WHICH MAY BE CONSTRUCTED ON A LOT**

One single family dwelling unit, or one 2 family dwelling unit, as the case may be, may be constructed on a single lot, except under the provisions of the accessory dwelling units, elderly/disabled housing, and condominium sections of this Ordinance, where the number of dwelling units which may be permitted on a lot is determined by a Special Exception granted by the Board of Adjustment and/or approval by the Planning Board under its Site Plan Review Regulations, as required.

**K. ACCESSORY DWELLING UNITS (Adopted March 1993, Amended March 2017)**

1. **PURPOSE:** For the purpose of providing expanded housing opportunities and flexibility in household arrangements, accessory dwelling units (in-law apartments) shall be permitted by special exception granted by the Board of Adjustment in any district in conformance with these regulations.
2. **DEFINITION:** As defined by RSA 674:71 as amended "Accessory Dwelling Unit" means a residential living unit that is within or attached to a single family dwelling, and that provides independent living facilities for one or more persons, including provisions for sleeping, eating, cooking and sanitation on the same parcel of land as the principal dwelling unit it accompanies.
3. **REQUIREMENTS/LIMITATIONS:**
  - a. Accessory dwelling units are intended to be secondary and accessory to a principal single-family dwelling unit. In granting a special exception, the Board of Adjustment must find that the secondary dwelling unit is developed in a manner which does not alter the character or appearance of the principal dwelling unit as a single-family residence. Only one accessory dwelling unit shall be allowed per principal dwelling unit and/or lot. The accessory dwelling unit shall have a separate house number from the principal dwelling.
  - b. There shall be no exterior alterations, enlargements, or extensions of the structure which alter its character or appearance as a single-family residence (or other detached accessory structure, when applicable). Any necessary additional entrances or exits shall be located to the side or rear of the building whenever possible.
  - c. An accessory dwelling unit shall not be considered to be an additional dwelling unit for the purposes of determining minimum lot size.

- d. Detached accessory dwelling units are only allowable when located on a lot that has twice the minimum lot size required in the applicable district for that type of lot (e.g., backland lot). Detached accessory dwelling units cannot be converted to a principal dwelling unit.
  - e. An accessory dwelling unit shall have an area of no less than 300 square feet and no greater than 800 square feet measured by the outside dimension of the exterior wall or the interior dimension of a common wall. An attached accessory dwelling unit shall occupy no more than 30 % of the total heated, above grade floor area of the total dwelling unit, including the accessory dwelling unit.
  - f. Attached accessory dwelling units shall be designed to allow for re-incorporation into the principal dwelling units. Internal access to the principal dwelling unit shall be maintained or constructed. The accessory dwelling units and principal dwelling units must share internal heated living space access through a common wall.
  - g. The existing or proposed septic systems must be certified by a licensed septic designer or engineer as adequate to handle and treat the increased waste volumes generated by the accessory dwelling unit in accordance with New Hampshire RSA 485-A:38 and the Town of Hollis septic regulations. If the existing septic system is not capable of adequately handling and treating the waste of the principal dwelling unit and the accessory dwelling unit in accordance with New Hampshire RSA 485-A:38 and the Town of Hollis septic regulations, a new or upgraded septic system conforming to the most recent state and local septic standards and regulations shall be required.
  - h. Adequate off-street parking shall be provided.
  - i. Adequate provisions must exist or be made for ingress, egress and turning of vehicles within the site.
  - j. The use of an ADU shall not be deemed to include such transient occupancies as hotels, motels, rooming or boarding houses. This limitation includes short-term rentals (less than four weeks at a time) of dwelling units. Short-term rentals are only authorized as specifically provided for Bed and Breakfast (Inn) establishments.
4. **EXISTING NONCONFORMING ACCESSORY DWELLING UNITS:** To be considered a nonconforming use, an accessory dwelling unit must have either:
- a. Been constructed or installed prior to January 21, 1952, or
  - b. Have otherwise been legally granted a building permit or certificate of occupancy between the year 1952 and the date of passage of the occupancy dwelling unit amendment.
5. **EXISTING ILLEGAL ACCESSORY DWELLING UNITS:** Accessory dwelling units constructed after January 21, 1952 and before March 1992, which do not have either a building permit or certificate of occupancy, shall apply to the Building Inspector for a determination of compliance with Section IX.K.3 Applications shall be accompanied by the filing fee, plans and other documentation requested by the Building Inspector to enable him/her to evaluate compliance with Section IX.K.3 The Building Inspector shall issue one of the following:
- a. A determination of compliance with Section IX.K.3 and a certificate of occupancy;
  - b. A conditional determination of compliance with Section IX.K.3 and a description of the corrective changes needed to bring the accessory dwelling unit into compliance. The required changes shall be completed within 90 days of the date of the determination of conditional compliance. Upon successful completion of the required changes, the Building Inspector shall issue a certificate of occupancy; or
  - c. A determination of non-compliance with one or more of the requirements of Section IX.K.3, together with a listing of those requirements and conditions for which compliance cannot be achieved through corrective changes.
6. **FAILURE TO COMPLY:** If an owner fails to comply with the requirements of this section, the use of the accessory dwelling unit shall be terminated within 6 months of the date of notice from the Building Inspector. The owner shall be subject to penalty under RSA 676:17 for each day the accessory dwelling unit fails to comply with the requirements of this section after March 31, 1994.
7. **OWNER OCCUPIED:** The principal dwelling unit or the Accessory dwelling unit shall be owner occupied. If the property owner cannot comply with this provision due to hardship such as but not limited to, job relocation

or a medical/family emergency; the owner may apply to the Board of Adjustment for a Special Exception. Such relief may be reviewed by the Board of Adjustment annually but in no case shall the relief granted be greater than two years.

**L. *SITE PLAN REVIEW***

Pursuant to RSA 674:43, the Planning Board shall review and approve or disapprove site plans for the development or change or expansion of use of tracts for nonresidential uses or for multi-family dwelling units, which are defined as any structures containing more than two (2) dwelling units, whether or not such development includes a subdivision or resubdivision of the site. A complete site plan review may be waived by the Planning Board when a proposed new use is similar in scope to the previous one.

**M. *MAXIMUM DRIVEWAY SLOPE***

All new driveways established to serve structures intended for human occupancy shall have a maximum grade of 8%. The purpose of the maximum grade requirement is to ensure public safety and accessibility for emergency vehicles. This standard shall not apply to driveways intended to serve non-occupancy structures, such as utility service buildings, and other private ways intended for purposes such as logging, silviculture, agriculture, and recreational access.

**N. *UNREGISTERED VEHICLES***

No more than one disabled or unregistered motor vehicle shall be visible from public view on any property, other than a permitted business in that zone. Registered vehicles shall have current inspections.

**O. *DETERMINATION OF DENSITY FOR CONDOMINIUM DEVELOPMENTS.***

The number of permissible dwelling units in a condominium subdivision shall be the same as that which would be applicable for a conventional subdivision of the contemplated housing type. Similarly, any buildings proposed to be built as part of a condominium development shall be required to demonstrate compliance with the Building Area requirements set forth herein

**P. *CONDITIONAL USE PERMIT- LANDSCAPE MATERIALS YARD***

1. ***PLANNING BOARD TO ADMINISTER:*** Wherever a conditional use is authorized by this ordinance, the authority to administer or grant conditional use permits shall be vested in the Planning Board.
2. ***APPLICATION AND REVIEW PROCEDURE:*** An Application for a conditional use shall be initiated by filing with the Planning Board for an application for a conditional use permit. The following procedures shall apply to the processing of such application:
  - a. Site Plan Approval Required. A site plan application shall be submitted with any application for a Conditional Use Permit. The application and review procedure for a conditional use permit shall be made concurrently and in accordance with the Site Plan Regulations as applicable to the particular development.
3. ***STANDARDS OF REVIEW:*** Following a fully noticed public hearing on the proposed use, the Planning Board may issue a conditional use permit, if it finds, based on the information and testimony submitted with respect to the application, that:
  - a. The use is specifically authorized by Section X.G. as a conditional use;
  - b. The development in its proposed location will comply with all requirements of the Hollis Site Plan Regulations, as well as specific conditions established by the Planning Board. In considering the proposal, the Planning Board will consider all requirements of the Site Plan Regulations in particular (but not limited to) those set forth in Section IV.2.C,D,E and F;
  - c. The use will not materially endanger the public health or safety;
  - d. The use will not have a substantial adverse impact on highway or pedestrian safety;
  - e. Access to the site shall be achieved from frontage on a State road;
  - f. Appropriate Best Management Practices shall be employed to address all processes associated with a Landscape Materials Yard.

**Q. *CONDITIONAL USE PERMIT- ALTERNATIVE TREATMENT CENTERS***

1. **AUTHORITY:** Pursuant to the authority provided in RSA 674:21, the Planning Board may grant a Conditional Use Permit for Alternative Treatment Centers (Cultivation and Non-Cultivation Locations) within the Industrial District. (Rt. 130 – Industrial District Only)
2. **PURPOSE & INTENT:** The purpose of this Section is to implement NH RSA 126-X, authorizing the use of therapeutic cannabis and to regulate the locations and operations of Alternative Treatment Center uses so as to promote and protect the public health, safety, and welfare of the residents of Hollis. The intent of this Section is to:
  - a. Provide for the safe sale and distribution of therapeutic cannabis to patients who qualify to obtain, possess, and use cannabis for medical purposes under RSA 126-X and as managed by the New Hampshire Department of Health & Human Services; and
  - b. Protect public health and safety through reasonable limitations on business operations as they relate to noise, air and water quality, food safety, building safety, neighborhood and patient safety, security for the business and its personnel and other health safety concerns.
3. **STANDARDS OF REVIEW:** Following a fully noticed public hearing on the proposed use, the Planning Board may issue a Conditional Use Permit, if it finds, based on the information and testimony submitted with respect to the application, that:
  - a. The use is specifically authorized by Section X Zoning Districts as a conditional use;
  - b. The development in its proposed location will comply with all requirements of the Hollis Site Plan Regulations, as well as specific conditions established by the Planning Board.
  - c. The use will not materially endanger the public health or safety;
  - d. The use shall provide adequate vegetative buffering to ensure adjacent property values are not adversely impacted. Buffering may be provided by maintaining existing vegetation or through the installation of site specific landscaping or a combination of both. The buffering shall be of such quality & quantity as to adhere to and meet the Objectives of the Hollis Rural Character Preservation Ordinance.
  - e. In granting a conditional use permit pursuant to this section, the planning board may impose any reasonable conditions or restrictions deemed necessary to carry out the intended purpose of this ordinance.
4. **MINIMUM CONDITIONS:** If the planning board grants a conditional use permit pursuant to this section, any such use shall be conducted in a manner compliant with any conditions imposed by the planning board as well as the following minimum standards:
  - a. An Alternative Treatment Center shall not be located within a pre-existing designated drug free school zone or within 1,000 feet of the property line of a pre-existing public or private school and daycare facility; and
  - b. The Alternative Treatment Center shall be located in a permanent structure and may not be located in a trailer, manufactured home, cargo container, or any structure that has axles with wheels. Drive-Thru services at an Alternative Treatment Center are prohibited; and
  - c. The Alternative Treatment Center shall provide for the proper disposal of cannabis remnants or byproducts, which remnants or byproducts shall not be placed in the facility's exterior refuse containers; and
  - d. The applicant shall provide a detailed narrative and floor plan, as well as any other relevant documentation, describing how the Alternative Treatment Center shall be secured. The security plan must take into account the measures that will be taken to ensure the safe delivery of any product to the facility (including permitted times for delivery), how the product will be secured on site, and how patient transactions will be facilitated in order to ensure safety. The security plan shall be reviewed and approved by the Hollis Police Department; and
  - e. The use of cannabis on the premises is prohibited; and
  - f. The Alternative Treatment Center shall emit no cannabis related fumes, vapors or odors which can be smelled or otherwise perceived from beyond the lot lines of the property where the facility is located.
  - g. Official written comments shall be received from both the Fire Chief and Police Chief.
  - h. Alternative Treatment Centers that have received a Conditional Use Permit and Site Plan approval from the Planning Board shall be subject to the applicable requirements of the NH Health & Human Services Department (DHHS) Administrative Rules He-C 400, as most recently published or amended by DHHS) pertaining to Advertising Restrictions.

- i. An Alternative Treatment Center shall not be allowed as a Home Based Business.

**R. *PLANNED UNIT DEVELOPMENT (PUD) SETBACK REQUIREMENTS***

For those residential subdivisions that were approved by the Planning Board under the former Planned Unit Development ordinance (pre 1993), building setback requirements shall adhere to the Building Setbacks provisions outlined in Section XX Hollis Open Space Planned Development, Section 5e Building Setbacks.

## **SECTION X: ZONING DISTRICTS**

### **A. AGRICULTURAL AND BUSINESS ZONE (A&B)**

**INTENT:** The Agricultural and Business Zone is intended to provide for an accessible, well planned area for local community shopping functions. Clusters of shops or small scale shopping centers as well as individual shops are encouraged for this zone. Large regional shopping type uses, such as department stores, are not permitted. In addition, the wholesale/retail sale of vehicle fuel is prohibited.

#### **1. PERMITTED USES IN THE AGRICULTURAL AND BUSINESS ZONE:**

- a. Agricultural uses  
Also, the following retail sales or services are permitted:
- b. Antique shops
- c. Art supply and gallery sales
- d. Bakeries
- e. Banks
- f. Barber shops
- g. Beauty shops
- h. Book or stationary stores
- i. Camera and photo supplies
- j. Candy, soda fountain, or ice cream stores
- k. Clothing stores
- l. Craft or hobby shops
- m. Delicatessens
- n. Drug stores
- o. Dry cleaners
- p. Florist shops
- q. Furniture stores
- r. Food store/local supermarket
- s. Funeral Home
- t. Gift or notion shop
- u. Glass, china, jewelry stores
- v. Garden shops
- w. Home produce - may be bought, sold, and exposed for sale
- x. Hardware stores
- y. Laundromat
- z. Music stores
- aa. Offices (professional, medical, business)
- bb. Paint and wallpaper stores
- cc. Personal and professional service operations, except tattoo parlors
- dd. Police and fire stations
- ee. Post Office

- ff. Recreational equipment
- gg. Repair shops
- hh. Restaurants, General
- ii. Shoe stores
- jj. Single family residences
- kk. Small appliance stores
- ll. Studios for professional work (art, dance, photography)
- mm. Tailor shops
- nn. Utilities: essential services
- oo. Mixed-Use Occupancy - a permitted business or commercial use along with a dwelling unit(s) that occupies up to 50% of the total heated above-grade floor area of the building, provided all other ordinance and regulation requirements are met.
- pp. Temporary structures.
- qq. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.
- rr. Private Schools and Day Cares

**2. OTHER RELATED PERMITTED USES IN THE AGRICULTURAL AND BUSINESS ZONE:**

- a. Housing for older persons, subject to the procedures in Section IX.L.

**3. SPECIAL EXCEPTIONS IN THE AGRICULTURAL AND BUSINESS ZONE**

- a. Home based businesses as defined and described in Section XXII.
- b. Accessory dwelling units according to Section IX.K.

**4. ACCESSORY USES PERMITTED IN THE AGRICULTURAL AND BUSINESS ZONE:**

- a. Uses, which are customary accessory uses to a legal conforming use in this zone, providing site plan approval is given by the Planning Board.
- b. Signs as regulated in Section XIV.

**5. PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE AGRICULTURAL AND BUSINESS ZONE:**

- a. Mixed-Use Occupancy II – A permitted business or commercial use along with a dwelling unit(s) that occupies up to 50% of the total heated above-grade floor area of the building, provided all other ordinance and regulation requirements are met. Dwelling units occupying 100% of the total above-grade floor area of a building may be permitted, provided that 25% of the total units are workforce housing units/renter occupied, according to the provisions detailed in Section XVIII, Workforce Housing Ordinance.
- b. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**6. AREA AND HEIGHT REQUIREMENTS IN THE AGRICULTURAL AND BUSINESS ZONE (Amended 1994): (NOTE: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction).**

- a. **MINIMUM LOT SIZE:** 3/4 acre for individual businesses. Clusters of shops require three-quarter 3/4 acre minimum plus adequate space to meet all parking, loading, setback and open space requirements of this ordinance; for residences the minimum lot size shall be 2 acres per dwelling unit, except as provided in section X.A.1.qq above.
- b. **MINIMUM FRONT YARD SETBACK:** 50 feet from public roads, 25 feet from internal roads.

- c. **MINIMUM SIDE YARD:** 15 feet; 35 feet when abutting a residential zone.
- d. **MINIMUM REAR YARD:** 15 feet; 35 feet when abutting a residential zone.
- e. **MAXIMUM BUILDING HEIGHT:** 38 feet. (Section IX.I)
- f. **FRONTAGE:** 100 feet.
- g. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.

**BACKLAND LOTS:**

- (i) Backland lots for commercial uses shall be at least 1.5 acres; backland lots for residential uses shall be at least 4 acres.
- (ii) On public roads, a minimum frontage of 20 feet must be provided for each backland lot.
- (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.
- h. **MAXIMUM COMMERCIAL BUILDING SIZE:** 12,000 square feet total floor area.

**7. OTHER DEVELOPMENT REGULATIONS IN THE AGRICULTURAL AND BUSINESS ZONE:**

a. **PARKING:**

- (i) **Adequacy.** Adequate off-street parking facilities shall be made available for workers and the patrons of businesses with drives and roadways with clear visibility and non-hazardous access to the public road. Parking requirements and required loading and unloading areas and design standards must conform to Sections IX,H and I and Planning Board’s site plan review.
- (ii) **Location and Design.** Parking for all uses except single family residences shall be laid out in a manner that minimizes visual impact from the public way. In all cases, establishment of parking areas in the front of commercial buildings shall not be permitted, unless parking in the rear, which is preferable, or on the sides is not possible, as determined by the Planning Board. Landscaping shall be provided to minimize the impact of headlights on abutting and nearby residential properties.
- b. **OPEN SPACE:** 20% of the total lot area must be landscaped open space. A minimum 15-foot-wide strip of landscaped open space is required between internal roads or parking areas and the adjacent public right-of-way.
- c. **OUTDOOR STORAGE:** No outdoor storage of any material (usable or waste) shall be permitted, except within enclosed containers and/or visually screened (fences or shrubbery) areas. Customary outdoor displays of goods for sale which are in keeping with the surrounding area and are inoffensive are permitted.
- d. **SCREENING:** Screening shall be provided according to Section IX,I of this Ordinance and according to the Town’s Site Plan Review Regulations.

**8. A CERTIFICATE OF OCCUPANCY IS REQUIRED IN THE AGRICULTURAL AND BUSINESS ZONE.**

- 9. **HISTORIC DISTRICT ORDINANCE:** The portion of the A&B Zone that falls within the Town's Historic District also falls under the jurisdiction of the Historic District Ordinance and the Historic District Design Guidelines and Regulations.

**B. COMMERCIAL ZONE (C)**

**INTENT:** The Commercial Zone is intended to provide for the location of general retail uses.

**1. PERMITTED USES IN THE COMMERCIAL ZONE:**

- a. Retail and wholesale sales
- b. Business services
- c. Professional offices
- d. Banks
- e. Restaurants, general
- f. Restaurants, fast-food
- g. Funeral homes
- h. Theaters, halls, and clubs
- i. Motels and hotels
- j. Vehicular, trailer, and recreational vehicles sale and service facilities
- k. Storage facilities
- l. Essential services
- m. Hospitals, clinics, nursing homes, and rehabilitation centers
- n. Filling stations and/or service stations
- o. Veterinary hospitals
- p. Kennels, with a minimum lot size of five acres and a setback of 100 feet from all lot lines for all structures
- q. Day care centers
- r. All uses permitted in the Agriculture and Business (A&B) Zone, except single family residences.
- s. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**2. AREA AND HEIGHT REQUIREMENTS IN THE COMMERCIAL ZONE. (NOTE: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)**

- a. **MINIMUM LOT SIZE:** One acre for individual businesses.
- b. **MINIMUM FRONT YARD SETBACK:** 50 feet from public roads, 25 feet from internal roads.
- c. **MINIMUM SIDE YARD:** 15 feet; 35 feet when abutting a residential zone.
- d. **MINIMUM REAR YARD:** 15 feet; 35 feet when abutting a residential zone.
- e. **MAXIMUM BUILDING HEIGHT:** 38 feet. (Section IX.I)
- f. **MAXIMUM BUILDING COVERAGE:** 50% of the lot
- g. **FRONTAGE:** 200 feet.
- h. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.
- i. **BACKLAND LOTS:**
  - (i) Backland lots for commercial uses shall be at least 1.5 acres;
  - (ii) Minimum frontage: 20 feet;
  - (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.

**3. OTHER DEVELOPMENT REGULATIONS IN THE COMMERCIAL ZONE:**

- a. **PARKING:** Adequate off-street parking facilities shall be made available for workers and the patrons of businesses with drives and roadways with clear visibility and non-hazardous access to the public road. Parking requirements and required loading and unloading areas and design standards must conform to Sections IX. I and J and Planning Board's site plan review.
- b. **OPEN SPACE:** 20% of the total lot area must be landscaped open space. A minimum 15-foot-wide strip of landscaped open space is required between internal roads or parking areas and the adjacent public right-of-way.
- c. **OUTDOOR STORAGE:** No outdoor storage of any material (usable or waste) shall be permitted, except within enclosed containers and/or visually screened (fences or shrubbery) areas. Customary outdoor displays of goods for sale which are in keeping with the surrounding area and are inoffensive are permitted.
- d. **SCREENING:** Screening shall be provided according to Section IX.H of this Ordinance and according to the provisions of the Town's Site Plan Review Regulations.

**4. PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE COMMERCIAL ZONE:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

### **C. INDUSTRIAL ZONE (I)**

**INTENT:** The Industrial Zone is intended to provide for the location of industry and light manufacturing and the Special Exceptions uses noted in paragraph 4.

1. **PERMITTED USES IN THE INDUSTRIAL ZONE:** Within this district only the following uses will be permitted subject to the following regulations:
  - a. Offices, laboratories, contractor's storage and equipment yards, machine shops, printing, publishing shops, business or industrial schools, saw mills, and wood yards.
  - b. Manufacturing - provided that smoke emitted by any stack shall not equal or exceed in density Ringelman No. 2 for periods aggregating more than 4 minutes in any half-hour period, and that all state air quality standards are met. In order to ensure that noise outside of lot lines is not objectionable due to intermittence, beat frequency, or shrillness, noise shall be limited to no more than that of average weekday traffic on the surrounding streets. No objectionable, obnoxious, or dangerous concentrations or quantities of odor, dust, fly ash, gases, or fumes are emitted and no excessive vibration is caused. The items listed under prohibited uses are intended as a guide and not a complete list. Waste water must be of equal quality to that of the proposed receiving waters.
  - c. Storage or wholesaling and warehousing in enclosed building which meets fire safety recommendations. Retail facilities permitted in conjunction with other permitted uses.
  - d. Trucking terminals.
  - e. Essential services (as defined by this ordinance).
  - f. Tattoo parlors
  - g. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.
  - h. Indoor sports or fitness businesses, including but not limited to batting cages, health clubs, golf driving ranges, and gymnastic clubs.
  
2. **PROHIBITED USES IN THE INDUSTRIAL ZONE:** The following uses are specifically prohibited in this area:
  - a. Abattoir operations
  - b. Any use which consumes large quantities of water or which requires special waste treatment.
  - c. Cremation except cemeteries
  - d. Electro plating
  - e. Industrial fermentation
  - f. Kiln firing or drying of materials other than wood
  - g. Leather tanning or processing
  - h. Manufacture, compounding, or processing of chemicals
  - i. Manufacture of charcoal
  - j. Manufacture or compounding of solvent, water or oil based paints, varnishes or coatings.
  - k. Petroleum or tar refining or processing
  - l. "Recycling" of metals, organic or inorganic chemicals
  - m. Smelting or melting of metals and ores
  - n. Synthesis or blending of artificial or natural fertilizers
  - o. Stockyards and feed lots

3. **AREA AND LOT REQUIREMENTS IN THE INDUSTRIAL ZONE:** (NOTE: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)

- a. **MINIMUM LOT SIZE:** One acre (providing all requirements of this ordinance can be met).
- b. **MINIMUM FRONTAGE:** 200 feet.
- c. **MINIMUM SETBACK FOR FRONT YARDS:** 100 feet when abutting a state highway and 50 feet on all other roads.
- d. **MINIMUM SIDE AND REAR YARD SETBACKS:** 1 story buildings shall set back 25 feet from side and rear lot lines, with increased setback from side and rear lot lines of 25 feet for each additional floor of height.
- e. **MAXIMUM HEIGHT:** 38 feet or as approved by the Planning Board in site plan review. (see Section IX.I)
- f. **MAXIMUM BUILDING AREA:** Buildings may occupy no more than 50 percent of the lot on which they are located.
- g. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.

4. **SPECIAL EXCEPTIONS IN THE INDUSTRIAL ZONE:**

The following uses may be permitted if granted a special exception by the Board of Adjustment, if site plan approval is granted by the Planning Board and the use is in keeping with an industrial zone:

- a. Building materials sales yard.
- b. Sales and service of heavy vehicles or machinery (trucks, construction equipment, farm equipment).
- c. Sales and/or service of heavy residential, commercial, or industrial equipment, appliances, utilities and conveniences.

5. **OTHER DEVELOPMENT REGULATIONS IN THE INDUSTRIAL ZONE:**

- a. Parking and loading areas as required by Sections IX,H and I of this ordinance.
- b. Signs as regulated by Section XIV of this ordinance.
- c. No waste may be stored which may cause leaching of chemicals or other pollutants into the surrounding water table or surface runoff, or the emission of toxic or harmful gases. Fluid discharges from the plant must be adequately treated so as not to pollute the surrounding water table or surface runoff.
- d. Screening:
  - (i) Side and rear yards: 25 feet wide, wherever industrial uses abut residential zones or uses;
  - (ii) Front yards: 50 feet wide.

6. **A CERTIFICATE OF OCCUPANCY IS REQUIRED IN THE INDUSTRIAL ZONE.**

7. **PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE INDUSTRIAL ZONE:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.
- b. Alternative Treatment Centers: Pursuant to the authority provided in RSA 674:21, the Planning Board may grant a Conditional Use Permit for an Alternative Treatment Center, Cultivation & Non-cultivation, subject to the requirements of Section IX General Provisions, Paragraph P. This use shall be limited to that portion of the Industrial Zone located along Proctor Hill Road (NH Rt. 130)

**D. MOBILE HOME-1 ZONE (MH-1)**

**INTENT:** The Mobile Home-1 Zone is intended to provide an area in Town in which individual lots for mobile homes as well as mobile-home parks are allowed.

**1. PERMITTED USES IN THE MOBILE HOME-1 ZONE:**

- a. Mobile Homes
- b. Temporary structures
- c. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission

**2. ACCESSORY USES IN THE MOBILE HOME-1 ZONE:**

- a. Customary accessory buildings and uses.
- b. Other accessory structures needed to operate the park such as storage sheds, community centers, permanent residence of owner/operator as approved by the Planning Board under site plan review.

**3. SPECIAL EXCEPTIONS IN THE MOBILE HOME-1 ZONE:** As granted by the Board of Adjustment.

- a. Public and private recreational facilities which serve the park residents.
- b. Home based businesses according to Section XXII.

**4. AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE MOBILE HOME-1 ZONE:** (Note: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)

- a. **MINIMUM LOT AREA/MOBILE HOME:** 15,000 square feet (5,000 of which must be unencumbered open space).
- b. **MINIMUM LOT WIDTH:** 100 feet at the minimum setback line.
- c. **MINIMUM SIDE YARD:** 15 feet.
- d. **MINIMUM FRONT YARD:** 25 feet.
- e. **MINIMUM WIDTH OF MOBILE HOME PARK ROAD RIGHTS-OF-WAY:** 40 feet.
- f. **MINIMUM SIZE OF MOBILE HOME PARK:** 10 acres.

**5. OTHER DEVELOPMENT REGULATIONS IN THE MOBILE HOME-1 ZONE:**

- a. No mobile home shall be parked closer than 15 feet square feet to the side or rear lot lines of the park.
- b. Each mobile home shall have a minimum of 150 square feet for each resident and in any event a mobile home shall have a minimum of 300 square feet of floor space.
- c. Mobile home park sanitary regulations promulgated by the State Board of Health under authority of Chapter 147, NH Revised Statutes Annotated, shall be adhered to.

**6. PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE MOBILE HOME-1 ZONE:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

## **E. MOBILE HOME-2 ZONE (MH-2)**

**INTENT:** The Mobile Home-2 Zone is intended to provide an area in Town in which individual lots for mobile homes as well as residential development and agricultural purposes are allowed.

### **1. PERMITTED USES IN THE MOBILE HOME-2 ZONE:**

- a. Mobile Homes.
- b. Farms.
- c. Farm Stand.
- d. Stables.
- e. Hollis Open Space Planned Development according to Section XX.
- f. Housing for older persons, subject to the procedures in Section XXI.
- g. Condominiums according to the provisions of RSA 356-B.
- h. Customary accessory buildings and uses.
- i. Signs according to Section XIV.
- j. Temporary structures.
- k. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

### **2. SPECIAL EXCEPTIONS IN THE MOBILE HOME-2 ZONE:** As granted by the Board of Adjustment.

- a. Cemeteries.
- b. Churches and other buildings for the purpose of religious worship providing they are located adjacent to an arterial street.
- c. Day care for more than six (6) children.
- d. Police and fire stations provided they are located adjacent to an arterial street.
- e. Public and private schools provided they are adjacent to an arterial street.
- f. Post Offices if adjacent to an arterial street.
- g. Publicly owned and/or operated parks, playgrounds, golf courses, community recreational centers, including public swimming pools, and libraries.
- h. Recreational uses, privately owned as follows:
  - (i) Golf courses,
  - (ii) Country Clubs,
  - (iii) Semi-public swimming pools,
  - (iv) Tennis courts/clubs,
  - (v) Fishing lakes,
  - (vi) Sporting Clubs.
- i. Municipal buildings and public or private facilities for Town services provided it is located on an arterial or major collector street.
- j. Riding academies.
- k. Home based businesses according to Section XXII.

3. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE MOBILE HOME-2 ZONE:** (NOTE: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)

- a. **MINIMUM LOT AREA:** Two acres/dwelling unit.
- b. **MINIMUM FRONTAGE ON A PUBLIC ROAD:** 200 feet.
- c. **MINIMUM FRONT YARD DEPTH:** 50 feet (100 feet on scenic roads).
- d. **MINIMUM SIDE YARD WIDTH:** 35 feet from house or principal structures to the property line. 15 feet from accessory structures
- e. **MINIMUM REAR YARD DEPTH:** 35 feet for principal structures, 15 feet for accessory structures or uses.
- f. **MAXIMUM HEIGHT:** 38 feet (see Section IX.I)
- g. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.
- h. **BACKLAND LOTS:**
  - (i) Each building lot shall be at least 4 acres. Minimum lot area 4 acres per dwelling unit.
  - (ii) A minimum frontage on a public road of 20 feet for each dwelling on a back lot.
  - (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.

4. **PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE MOBILE HOME-2 ZONE:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

## F. RECREATIONAL ZONE (R)

**INTENT:** The recreational zone is intended to allow residential and recreational development around local bodies of water while protecting water quality and the recreational aspects of the area. Careful placement of homes and cautious septic system construction and reconstruction are imperative.

### 1. **PERMITTED USES IN THE RECREATIONAL ZONE:**

- a. Single and two family dwellings.
- b. Farm.
- c. Farm Stand.
- d. Hollis Open Space Planned development according to Section XX.
- e. Condominiums according to the provisions of RSA 356-B.
- f. Customary accessory buildings and uses.
- g. Signs according to Section XIV.
- h. Temporary structures.
- i. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

### 2. **SPECIAL EXCEPTIONS IN THE RECREATIONAL ZONE:** As granted by the Board of Adjustment.

- a. Publicly owned and/or operated parks, playgrounds, golf courses, community recreational centers, including public swimming pools, and libraries.
- b. Recreational uses, privately owned as follows:
  - (i) Golf courses,
  - (ii) Country Clubs,
  - (iii) Semi-public swimming pools,
  - (iv) Tennis courts/clubs,
  - (v) Fishing lakes,
  - (vi) Sporting Clubs.
- c. Home based businesses according to Section XXII.
- d. Accessory dwelling units according to Section IX.K.

### 3. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE RECREATIONAL ZONE: (NOTE: Per RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)**

- a. **MINIMUM LOT AREA:** Two acres/dwelling unit.
- b. **MINIMUM FRONTAGE:** Two hundred feet on a road and the waterfront where applicable.
- c. **MINIMUM FRONT YARD DEPTH:** Fifty feet (100 feet on scenic roads).
- d. **MINIMUM SIDE YARD DEPTH:** 35 feet from house or principal structure to the property line, 15 feet for accessory structures or 50 feet from high water line, if applicable.
- e. **MINIMUM REAR YARD DEPTH:** 35 feet for principal structures or 50 feet from the high water line, 15 feet for accessory structures.
- f. **MAXIMUM HEIGHT:** 38 feet (see Section IX.I)
- g. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.

h. ***BACKLAND LOTS:***

(i) Each building lot shall be at least 4 acres. Minimum lot area 4 acres per dwelling unit.

(ii) A minimum frontage on a public road of 20 feet for each dwelling on a back lot.

No building shall be erected on backland under this regulation closer than 200 feet from an existing public road or 50 feet from the high water line.

4. ***PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE RECREATIONAL ZONE:***

a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**G. RESIDENTIAL AND AGRICULTURAL DISTRICT (R & A)**

**INTENT:** The two-fold intent of the R & A zone is to encourage farming in Town while recognizing that growth and development will occur and should therefore be located in these areas where physical site conditions may be favorable, and critical Town services are available without costly extensions to the Town.

**1. PERMITTED USES IN THE RESIDENTIAL AND AGRICULTURAL DISTRICT:**

- a. (i) Single and two family dwellings.
- (ii) Conversion of Existing Residential Buildings. A residential building existing prior to January 21, 1952, may be converted to provide for not more than three (3) families provided the structure is not increased in volume and meets the Town of Hollis fire and health regulations.
- b. Farms.
- c. Farm Stand.
- d. Stables.
- e. Hollis Open Space Planned Development according to Section XX.
- f. Housing for older persons, subject to the procedures in Section IXI.
- g. Condominiums according to the provisions of RSA 356-B.
- h. Customary accessory buildings and uses.
- i. Signs according to Section XIV.
- j. Retirement community.
- k. Temporary structures.
- l. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**2. SPECIAL EXCEPTIONS IN THE RESIDENTIAL AND AGRICULTURAL DISTRICT:** As granted by the Board of Adjustment.

- a. Cemeteries.
- b. Churches and other buildings for the purpose of religious worship providing they are located adjacent to an arterial street.
- c. Day care for more than six (6) children.
- d. Police and fire stations provided they are located adjacent to an arterial street.
- e. Public and private schools provided they are located adjacent to an arterial street.
- f. Post offices if adjacent to an arterial street.
- g. Publicly owned and/or operated parks, playgrounds, golf courses, community recreational centers, including public swimming pools and libraries.
- h. Recreational uses, privately owned as follows:
  - (i) Golf courses,
  - (ii) Country Clubs,
  - (iii) Semi-public swimming pools,
  - (iv) Tennis courts/clubs,
  - (v) Fishing lakes,
  - (vi) Sporting Clubs.
- i. Municipal buildings and public or private facilities for Town services provided they are located on an arterial or major collector street

- j. Riding academies.
  - k. Home based businesses according to Section XXII.
  - l. Accessory dwelling units according to Section IX.K.
  - m. Bed and Breakfast, according to the definition in Section VIII.
3. ***USES ALLOWED BY CONDITIONAL USE PERMIT IN THE RESIDENTIAL AND AGRICULTURAL DISTRICT:***
- a. Landscape Materials Yard
  - b. A residential building existing prior to January 21, 1952, may be converted to provide for not more than four (4) families provided the structure is not increased in volume and meets the Town of Hollis fire and health regulations and one of the units qualifies as a workforce housing unit/renter occupied, as more particularly specified in Section XVIII of this ordinance.
  - c. Workforce housing units as specified in Section XVIII.
  - d. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.
4. ***AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE RESIDENTIAL AND AGRICULTURAL DISTRICT: (NOTE: Per NH RSA 289:3, III, a 25' buffer is required around all cemeteries for the purposes of new construction.)***
- a. ***MINIMUM LOT AREA:*** Two acres/dwelling unit.
  - b. ***MINIMUM FRONTAGE ON A PUBLIC ROAD:*** 200 feet.
  - c. ***MINIMUM FRONT YARD DEPTH:*** 50 feet (100 feet on scenic roads).
  - d. ***MINIMUM SIDE YARD WIDTH:*** 35 feet from house or principal structure to the property line, 15 feet for accessory structures.
  - e. ***MINIMUM REAR YARD DEPTH:*** 35 feet for principal structures, 15 feet for accessory structures or uses.
  - f. ***MAXIMUM HEIGHT:*** 38 feet (see Section IX.I)
  - g. ***BUILDING AREA:*** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.
  - h. ***BACKLAND LOTS:***
    - (i) Each building lot shall be at least 4 acres. Minimum lot area 4 acres per dwelling unit.
    - (ii) A minimum frontage on a public road of 20 feet for each dwelling on a back lot.
    - (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.

## **H. RURAL LANDS ZONE (RL)**

**INTENT:** The two-fold intent of the Rural Lands Zone is to encourage farming in Town and to permit limited development in areas where physical site conditions are problematic or access to Town services is restricted.

### **1. PERMITTED USES IN THE RURAL LANDS ZONE:**

- a. Single and two family dwellings.
- b. Farms.
- c. Farm Stand.
- d. Stables.
- e. Hollis Open Space Planned Development according to Section XX.
- f. Condominiums according to the provisions of RSA 356-B
- g. Temporary structures
- h. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

### **2. ACCESSORY USES IN THE RURAL LANDS ZONE:**

- a. Customary accessory buildings and uses.
- b. Signs, according to Section XIV.

### **3. SPECIAL EXCEPTIONS IN THE RURAL LANDS ZONE:** As granted by the Board of Adjustment.

- a. Cemeteries.
- b. Churches and other buildings for the purpose of religious worship providing they are located adjacent to an arterial street.
- c. Day care for more than six (6) children.
- d. Police and fire stations provided they are located adjacent to an arterial street.
- e. Publicly owned and/or operated parks, playgrounds, golf courses, community recreational centers, including public swimming pools, and libraries.
- f. Recreational uses, privately owned as follows:
  - (i) Golf courses,
  - (ii) Country Clubs,
  - (iii) Semi-public swimming pools,
  - (iv) Tennis courts/clubs,
  - (v) Fishing lakes,
  - (vi) Sporting Clubs.
- g. Municipal buildings and public or private facilities for town and school services, provided the facility is located on an arterial or major collector street.
- h. Home based businesses according to Section XXII.
- i. Accessory dwelling units according to Section IX.K.
- j. Riding Academies

4. **AREA HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE RURAL LANDS ZONE:** (NOTE: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)

- a. **MINIMUM LOT AREA:** 2 acres/dwelling unit.
- b. **MINIMUM FRONTAGE:** 200 feet.
- c. **MINIMUM FRONT YARD DEPTH:** 50 feet (100 feet on scenic roads).
- d. **MINIMUM SIDE YARD DEPTH:** 35 feet from house or principal structures to the property line. Accessory structures must be at least 15 feet from the property line.
- e. **MINIMUM REAR YARD DEPTH:** 35 feet for principal structures, 15 feet for accessory structures.
- f. **MAXIMUM HEIGHT:** 38 feet. (see Section IX.I)
- g. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.
- h. **BACKLAND LOTS:**
  - (i) Each building lot shall be at least 4 acres. Minimum lot area 4 acres per dwelling unit.
  - (ii) A minimum frontage on a public road of 20 feet must be provided for each dwelling on a back lot.
  - (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.

5. **PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE RURAL LAND ZONE:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

## **I. TOWN CENTER (TC)**

**INTENT:** The Town Center Zone designates the non-commercial part of the Town's Historic District. All permitted uses in the Town Center zone are subject to the regulations of the Historic District Ordinance.

### **1. PERMITTED USES IN THE TOWN CENTER:**

- a. (i) Single and two family dwellings.
- (ii) Conversion of Existing Residential Buildings. A residential building existing prior to January 21, 1952, may be converted to provide for not more than three (3) families provided the structure is not increased in volume and meets the Town of Hollis fire and health regulations.
- b. Farms.
- c. Farm Stand.
- d. Stables.
- e. Hollis Open Space Planned Development according to Section XX.
- f. Housing for older persons subject to the procedures in Section XXI.
- g. Condominiums according to the provisions of RSA 356-B.
- h. Retirement community.
- i. Temporary structures.
- j. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

### **2. ACCESSORY USES IN THE TOWN CENTER:**

- a. Customary accessory buildings and uses.
- b. Signs according to Section XIV.

### **3. SPECIAL EXCEPTIONS IN THE TOWN CENTER:** As granted by the Board of Adjustment.

- a. Cemeteries.
- b. Churches and other buildings for the purpose of religious worship providing they are located adjacent to an arterial street.
- c. Institutions for higher education providing they are located adjacent to an arterial street.
- d. Nursery Schools.
- e. Police and fire stations provided they are located adjacent to an arterial street.
- f. Public and parochial schools provided they are located adjacent to an arterial street.
- g. Post offices if adjacent to an arterial street.
- h. Publicly owned and/or operated parks, playgrounds, golf courses, community recreational centers, including public swimming pools, libraries, and tennis courts.
- i. Recreational uses, privately owned as follows:
  - (i) Golf courses,
  - (ii) Country Clubs,
  - (iii) Semi-public swimming pools,
  - (iv) Tennis courts/clubs,
  - (v) Fishing lakes,
  - (vi) Sporting Clubs.

- j. Municipal buildings and public or private facilities for Town services.
  - k. Home based businesses according to Section XXII.
  - l. Accessory dwelling units according to Section IX.K.
4. ***USES ALLOWED BY CONDITIONAL USE PERMIT IN THE TOWN CENTER DISTRICT:***
- a. A residential building existing prior to January 21, 1952, may be converted to provide for not more than four (4) families provided the structure is not increased in volume and meets the Town of Hollis fire and health regulations and one of the units qualifies as a workforce housing unit/renter occupied, as more particularly specified in Section XVIII of this ordinance.
  - b. Workforce housing units as specified in Section XVIII.
  - c. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.
5. ***AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE TOWN CENTER: (NOTE: Per RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)***
- a. ***MINIMUM LOT AREA:*** 2 acres/dwelling unit.
  - b. ***MINIMUM FRONTAGE:*** 200 feet.
  - c. ***MINIMUM FRONT YARD DEPTH:*** 50 feet (100 feet on scenic roads).
  - d. ***MINIMUM SIDE YARD WIDTH:*** 35 feet from house or principal structure to property line, 15 feet from accessory structures to property line, and one hundred 100 feet minimum between houses.
  - e. ***MINIMUM REAR YARD DEPTH:*** 35 feet for principal structures, 15 feet for accessory buildings.
  - f. ***MAXIMUM HEIGHT:*** 38 feet. (See Section IX.I)
  - g. ***BUILDING AREA:*** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.
  - h. ***BACKLAND LOTS:***
    - (i) Each building lot shall be at least 4 acres per dwelling unit.
    - (ii) A minimum frontage on a public road of 20 feet for each dwelling on a back lot.
    - (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.

**J. WATER SUPPLY CONSERVATION ZONE (WSC)**

**INTENT:** The Water Supply Conservation Zone represents an area of large, high quality underground water, which is serving the Hollis school system and some residences with water. Some nearby areas of older, small lot development may eventually experience pollution from closely placed sewage disposal systems, requiring provisions of a public water system. The large amounts of good quality water in the WSC Zone should, therefore, be protected from pollution to keep this resource as a future water supply area.

**1. PERMITTED USES IN THE WATER SUPPLY CONSERVATION ZONE:**

- a. Single family dwellings
- b. Forestry, tree farming
- c. Wildlife refuge
- d. Temporary structures
- e. Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**2. ACCESSORY USES IN THE WATER SUPPLY CONSERVATION ZONE:**

- a. Customary accessory buildings and uses.
- b. Signs, according to Section XIV.

**3. SPECIAL EXCEPTIONS IN THE WATER SUPPLY CONSERVATION ZONE:** As granted by the Board of Adjustment.

- a. Home based businesses according to Section XXII.
- b. Accessory dwelling units according to Section IX.K.

**4. AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE WATER SUPPLY CONSERVATION ZONE: (NOTE: Per NH RSA 289:3.III, a 25' buffer is required around all cemeteries for the purposes of new construction.)**

- a. **MINIMUM LOT AREA:** 2 acres/dwelling unit.
- b. **MINIMUM FRONTAGE:** 200 feet.
- c. **MINIMUM FRONT YARD DEPTH:** 50 feet (100 feet on scenic roads).
- d. **MINIMUM SIDE YARD WIDTH:** 35 feet from house of principal structure to the property line, 15 feet for accessory structures.
- e. **MINIMUM REAR YARD DEPTH:** 35 feet for principal structure, 15 feet for accessory structures.
- f. **MAXIMUM HEIGHT:** 38 feet. (see Section IX.I)
- g. **BUILDING AREA:** No lot shall be subdivided unless it contains a compliant building area as described in Section VIII.6 (Definitions) of the Hollis Zoning Ordinance.
- h. **BACKLAND LOTS :** 4 acres for backland, provided that:
  - (i) Each building lot shall be at least 4 acres. Minimum lot area 4 acres per dwelling unit.
  - (ii) A minimum frontage on a public road of 20 feet for each dwelling on a 4 acre lot.
  - (iii) No building shall be erected on backland under this regulation closer than 200 feet from an existing public road.

**5. OTHER DEVELOPMENT REGULATIONS IN THE WATER SUPPLY CONSERVATION ZONE:**

- a. No septic tank or leach field shall be located closer than 150 feet to any wetland or standing water. All sewage disposal systems must be designed by a professional sanitary engineer.

**6. PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE WATER SUPPLY CONSERVATION ZONE:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

## **SECTION XI: OVERLAY ZONING DISTRICTS**

### **A. AQUIFER PROTECTION OVERLAY ZONE (APO) (Amended March 2017)**

**INTENT:** By the authority granted in New Hampshire RSA 674:16-17 and 674:20, the Aquifer Protection Overlay Zone is intended to protect, preserve and maintain existing and potential groundwater supply and groundwater recharge area of known aquifers, as delineated by the United States Geological Survey (as identified on the Hollis stratified drift aquifer map available in the Planning Department) thereby assuring the proper use of natural resources and thus protecting public health, safety and general welfare of the people in the Town of Hollis from adverse development, land uses, practices and activities which might result in their depletion or contamination. Additional purposes of the APO Zone include, but are not limited to:

- Assuring adequate private and public drinking water supply
- Assuring the hydrologic integrity of surface waters and wetlands
- Reducing the effects of non-point source pollution
- Protecting in-stream habitat for fish and wildlife
- Limiting the development of structures and land uses which contribute to the pollution of ground water by sewage and hazardous substances
- Encouraging those uses that can be safely and appropriately located in the APO Zone
- Assuring adequate water supply for domestic, agricultural, commercial and industrial uses
- Assuring adequate water supply for recreational uses

The standards used in the Aquifer Protection Overlay Zone reflect the recommendations of the Town of Hollis Master Plan, 1998, the Town of Hollis Water Resources Management Plan, 1989, and the recommendations of the Town of Hollis Conservation Commission Water Resources Subcommittee. The Aquifer Protection Overlay Zone is a zoning overlay district, which imposes additional requirements and restrictions to those of the underlying district zoning. In all cases the more restrictive requirement(s) shall apply.

#### **1. LOCATION**

The extent of the Aquifer Protection Overlay Zone shall be the outermost edge of the surficial extent of all aquifer deposits presently designated as stratified drift in the USGS study, Hydrogeology of Stratified-Drift Aquifers and Water Quality in the Nashua Regional Planning Commission Area, South-Central New Hampshire, 1987.

- a. When the actual boundary of the Aquifer Protection Overlay Zone is in dispute by any owner or abutter actually affected by said boundary, the Planning Board (or the Board of Adjustment or other Town authority, as appropriate), at the owner's or abutter's expense and request, may engage a certified soil scientist to conduct a Site Specific Soil Map of the area in dispute. Areas determined by the USGS as containing stratified drift aquifer and which also have excessively drained soils will be presumed to lie within the APO Zone.
- b. If the results of the Site Specific Soil Mapping are inconclusive or are unsatisfactory to the Planning Board, the owner, or the abutter, the Planning Board, at the owner's or abutter's expense, may engage a professional geologist or hydrologist to conduct a hydrogeological study of the area to determine more accurately the precise boundary of the APO Zone.

#### **2. DEFINITIONS:** For purposes of the Aquifer Protection Overlay Zone, the following definitions shall apply:

- a. **Groundwater:** Subsurface water that occurs beneath the water table in soils and geologic formations.
- b. **Surface Water:** Those waters, which have standing or flowing water at or on the surface of the ground. This includes but is not limited to, rivers, streams, lakes, ponds and tidal waters.
- c. **Water Related Resources:** A natural resource that is dependent on water, such as fish, amphibians and plants.
- d. **Wetland:** Areas as defined in Section VIII of the Hollis Zoning Ordinance.

#### **3. DIMENSIONAL STANDARDS IN THE AQUIFER PROTECTION OVERLAY ZONE**

The standards of the underlying zone shall apply except as specified below

- a. ***IMPERMEABLE SURFACE COVERAGE:*** Impermeable surfaces may cover no more than 15% of any lot in the APO Zone. However, in the underlying Industrial Zone, the Planning Board may grant a waiver from the maximum 15% standard, but in no case more than 30%, provided that the applicant shows that the proposal is otherwise incapable of reasonably complying with this standard. Any such waiver shall be conditioned on the following:
  - (i) The applicant shall submit a stormwater management plan, prepared by a New Hampshire licensed professional engineer and approved by the Planning Board.
  - (ii) The plan shall comply with all performance standards under Section XI.A. 4.a. of the Hollis Zoning Ordinance.
  - (iii) Regardless of the area of disturbance, all groundwater infiltration shall be in compliance with the State of New Hampshire Alteration of Terrain Best Management Practices.
- b. ***SEWAGE DISPOSAL SYSTEMS:*** At least four (4) feet of in-place soil shall exist above the seasonal high water table before fill; the bottom of the leaching field shall be at least six (6) feet above the seasonal high water table. This subparagraph shall not apply to lots approved for subdivision by the Planning Board on or before March 11, 1997.

**4. PERFORMANCE STANDARDS IN THE AQUIFER PROTECTION OVERLAY ZONE:**

- a. Uses shall conform to the standards and practices delineated in the following documents on file with the Planning Board, unless this Ordinance specifies more strict standards:
  - (i) Manual of Best Management Practices for Agriculture in New Hampshire, NH Dept. of Agriculture, June 1993, or as amended.
  - (ii) Pesticide Management Guidelines for Groundwater Protection, UNH Cooperative Extension, November 1992, or as amended.
  - (iii) Buffers for Wetlands and Surface Waters: A Guidebook for New Hampshire Municipalities, Audubon Society of NH, NH Office of State Planning, UNH Cooperative Extension, and NRCS, November 1995, or as amended.
  - (iv) Manual of Best Management Practices--Biosolids, UNH Cooperative Extension, 1995, or as amended.
  - (v) Best Management Practices to Control Nonpoint Source Pollution--A Guide for Citizens and Town Officials, NH DES, May 1994, or as amended.
  - (vi) Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire, NH DES, August 1992, or as amended.
  - (vii) Best Management Practices, New Hampshire Code of Administrative Rules, Env-Ws 421, or as amended.
  - (viii) State of New Hampshire Septage and Sludge Management Rules, New Hampshire Code of Administrative Rules, Env-Ws 800, or as amended.
  - (ix) Best Management Practices for Erosion Control on Timber Harvesting Operations in New Hampshire; NH DES, August 1992, or as amended.
  - (x) Hazardous or Toxic Materials: Any materials, as defined under RSA 147-A (as amended) which pose a present or potential hazard to human health or the environment when improperly handled, stored, transported for off-site disposal, or otherwise managed. Activities that engage in the handling and/or generation of hazardous and/or toxic materials shall demonstrate to the satisfaction of the Planning Board, through site plan review, that proper controls for the storage, handling, transportation and off-site disposal of these substances are in place and maintained and conform to the Performance Standards and BMP's noted in this Section. If proper handling, use and storage safeguards cannot be adequately demonstrated to the satisfaction of the Planning Board, then the storage and use of said material shall be prohibited.

Exemptions to this review shall include:

- a. Any private residence,
  - b. Any business or facility where Hazardous or Toxic Materials are stored in containers with a capacity of less than five gallons;
  - c. Storage of heating fuels for on-site use or fuels for emergency electric generation, provided that storage tanks are indoors on a concrete floor or have corrosion control, leak detection, and secondary containment in place;
  - d. Storage of motor fuel in tanks attached to vehicles and fitted with permanent fuel lines to enable the fuel to be used by that vehicle;
  - e. Storage and use of office supplies;
  - f. Temporary storage of construction materials on a site where they are to be used;
  - g. The sale, transportation, and use of pesticides as defined in RSA 430:29 XXVI;
  - h. Household hazardous waste collection projects regulated under NH Code of Administrative Rules Env-Wm 401.03(b)(1) and 501.01(b); and
  - i. Underground storage tank systems and aboveground storage tank systems that are in compliance with applicable state rules.
- b. The Planning Board, while reviewing any development application (including, but not limited to subdivisions, site plans, and excavations) shall apply the following criteria when the development occurs in the APOZ:
- (i) The proposed use will not detrimentally affect the quality of the groundwater contained in the aquifer by directly contributing to pollution or by increasing the long-term susceptibility of the aquifer to potential pollutants;
  - (ii) The proposed use will discharge no wastewater on site other than that typically discharged by domestic wastewater disposal systems. not cause a significant reduction in the long term volume of water contained in the aquifer or in the storage capacity of the aquifer;
  - (iii) The proposed use will discharge no wastewater on site other than that typically discharged by domestic wastewater disposal systems.
  - (iv) The proposed use complies with all other applicable sections of this ordinance.
- c. The Planning Board may require that the applicant provide data or reports prepared by a professional engineer or qualified groundwater consultant, hydrologist, or fisheries biologist to assess any potential damage to the aquifer that may result from the proposed use. The Planning Board shall engage such professional assistance as it requires to adequately evaluate such reports and to evaluate, in general, the proposed use in light of the above criteria. Costs for any of the above mentioned services shall be charged to the applicant. When assessing impacts, the following may be required:
- Preliminary water resource and water related resource use and inventory
  - Estimation and verification of effects of the activity. Based upon the potential for impacts, monitoring shall be conducted to verify worst-case conditions (i.e. low flow summer conditions, maximum impact). Monitoring may have a range of sampling designs, including but not limited to single season evaluation or pre and post implementation evaluation.
  - Final water resources and water related resources and uses inventory.
  - Description of the impacts to water resources and water related resources used and inventory.

**5. PERMITTED USES IN THE AQUIFER PROTECTION OVERLAY ZONE:**

- a. All uses permitted, by right or by special exception, in the underlying zone shall be permitted unless said use shall be in conflict with the intent and purpose of the Aquifer Protection Overlay Zone, and/or unless the use is specifically prohibited, below. In all cases, the more restrictive requirement(s) shall apply.\

- 6. PROHIBITED USES IN THE AQUIFER PROTECTION OVERLAY ZONE:** The following uses shall not be permitted in the Aquifer Protection Overlay Zone:
- a. Disposal of solid waste other than brush or stumps.
  - b. Disposal of liquid or leachate wastes, except from single or multi-family residential subsurface disposal systems.
  - c. Outdoor unenclosed or uncovered storage of road salts.
  - d. Dumping of snow brought from outside the Aquifer Protection Overlay Zone.
  - e. Commercial animal feedlots.
  - f. Excavation of sand or gravel except where conducted in accordance with an approved excavation or movement of earth materials permit.
  - g. Automotive service and/or repair shops.
  - h. Junk and salvage.
  - i. Car washes.
  - j. Laundromats
  - k. Landfills, solid waste transfer stations and recycling facilities and incinerators.
  - l. Subsurface storage of petroleum, other refined petroleum products, or other Hazardous or Toxic Materials as defined in RSA 147-A.

**7. NONCONFORMING USES IN THE AQUIFER PROTECTION OVERLAY ZONE:**

- a. Any nonconforming use may continue and may be maintained, repaired and/or replaced, and to the extent that it shall be made less nonconforming improved, unless such use is determined to be an imminent hazard to public health and safety by the Selectmen and/or Health Officer. No nonconforming use may be expanded, changed to another nonconforming use, or renewed after it has been discontinued for a period of 12 months or more.
- b. Notwithstanding subparagraph 7. a. above, no underground storage tanks for petroleum, other refined petroleum products, or hazardous materials may be repaired or replaced unless repaired or replaced in kind with no expansion or modification to approved site plans. All failed underground storage tanks must be removed according to standards established by NH state statutes and regulations.

**B. FLOOD PLAIN OVERLAY ZONE (FPO)** (Adopted March 1990, amended March 1994, 2007 & 2009)

Certain areas of the Town of Hollis, New Hampshire, are subject to periodic flooding, causing serious damages to properties within these areas. Relief is available in the form of flood insurance as authorized by the National Flood Insurance Act of 1968. Therefore, the Town of Hollis, New Hampshire, has chosen to become a participating community in the National Flood Insurance Program, and agrees to comply with the requirements of the National Flood Insurance Act of 1968 (P.I. 90-488, as amended) as detailed in this Floodplain Management Ordinance

**AUTHORITY:** This ordinance, adopted pursuant to the authority of RSA 674:16, shall be known as the Town of Hollis Flood Plain Development Ordinance and shall be considered part of the Zoning Ordinance for purposes of administration and appeals under state law. If any provision of this ordinance differs or appears to conflict with any provision of the Zoning Ordinance or other ordinance or regulation, the provision imposing the greater restriction or more stringent standard shall be controlling.

**INTENT:** All lands designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its "Flood Insurance Study for the County of Hillsborough, NH" dated September 25, 2009, together with the associated Flood Insurance Rate Maps dated September 25, 2009, are declared to be part of the Hollis Flood Plain Ordinance and are hereby incorporated by reference.

1. **DEFINITIONS:** The following definitions shall apply only to this Flood Plain Development Ordinance and shall not be affected by the provisions of any other ordinance of the Town of Hollis.
  - a. **AREA OF SPECIAL FLOOD HAZARD:** is the land in the flood plain within the Town of Hollis subject to a 1 percent or greater possibility of flooding in any given year. The area is designated as zone A and AE on the Flood Insurance Rate Map.
  - b. **BASE FLOOD:** means the flood having a 1% possibility of being equaled or exceeded in any given year.
  - c. **BASEMENT:** means any area of a building having its floor subgrade on all sides.
  - d. **BUILDING:** see "structure".
  - e. **DEVELOPMENT:** means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation, drilling operations, or storage of equipment or materials.
  - f. **FEMA:** means the Federal emergency management agency.
  - g. **FLOOD OR FLOODING:** means a general and temporary condition of partial or complete inundation of normally dry land areas from:
    - (i) the overflow of inland or tidal waters;
    - (ii) the unusual and rapid accumulation or runoff of surface waters from any source.
  - h. **FLOOD INSURANCE RATE MAP (FIRM):** means an official map incorporated with this ordinance on which FEMA has delineated both the special flood hazard areas and the risk premium zones applicable to the Town of Hollis.
  - i. **FLOOD INSURANCE STUDY:** means an examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevations, or an examination, evaluation and determination of mudslide (i.e. mudflow) and/or flood-related erosion hazards.
  - j. **FLOOD PLAIN OR FLOOD-PRONE AREA:** means any land area susceptible to being inundated by water from any source (see definition of "Flooding").
  - k. **FLOOD PROOFING:** means any combination of structural and non structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitation facilities, structures and their contents.
  - l. **FLOODWAY:** see Regulatory Floodway.
  - m. **FUNCTIONALLY DEPENDENT USE:** means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking and port facilities that are necessary for the loading/unloading of cargo or passengers, and ship building/repair facilities but does not include long-term storage or related manufacturing facilities.

- n. **HIGHEST ADJACENT GRADE:** means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure
- o. **HISTORIC STRUCTURE:** means any structure that is:
- (i) Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register; or
  - (ii) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district; or
  - (iii) Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
  - (iv) Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
    - By an approved state program as determined by the Secretary of the Interior, or
    - Directly by the Secretary of the Interior in states without approved programs.
- p. **LOWEST FLOOR:** means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided that such an enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this ordinance.
- q. **MANUFACTURED HOME:** means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For flood plain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on site for greater than 180 consecutive days. This includes manufactured homes located in a manufactured home park or subdivision.
- r. **MANUFACTURED HOME PARK OR SUBDIVISION:** means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.
- s. **MEAN SEA LEVEL:** means the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a communities Flood insurance rate map are referenced.
- t. **NEW CONSTRUCTION:** means, for the purposes of determining insurance rates, structures for which the start of construction commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, *new construction* means structures for which the *start of construction* commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.
- u. **100-YEAR FLOOD:** see base flood.
- v. **RECREATIONAL VEHICLE:** means a vehicle which is
- (i) built on a single chassis;
  - (ii) 400 square feet or less when measured at the largest horizontal projection;
  - (iii) designed to be self propelled or permanently towable by a light duty truck; and
  - (iv) designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.
- w. **REGULATORY FLOODWAY:** means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without increasing the water surface elevation more than a designated height.
- x. **SPECIAL FLOOD HAZARD AREA:** see "Area of Special Flood Hazard".

- y. **STRUCTURE:** means for flood plain management purposes, a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.
  - z. **START OF CONSTRUCTION:** includes substantial improvements and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvements was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of street and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwellings units or part of the main structure.
  - aa. **SUBSTANTIAL DAMAGE:** means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 % of the market value of the structure before the damage occurred.
  - bb. **SUBSTANTIAL IMPROVEMENT:** means any combination of repairs, reconstruction, alteration, or improvements to a structure in which the cumulative cost equals or exceeds 50 % of the market value of the structure. The market value of the structure should equal:
    - (i) the appraised value prior to the start of the initial repair or improvement, or
    - (ii) in the case of damage, the value of the structure prior to the damage occurring. For the purposes of this definition, substantial improvement is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. This term does not, however, include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or any alteration of a historic structure, provided that the alteration will not preclude the structure's continued designation as a historic structure.
  - cc. **VIOLATION:** means the failure of a structure or other development to be fully compliant with the community's flood plain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44CFR & 60.3(b)(5), (c)(4), (c)(10), (d)(3), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided.
  - dd. **WATER SURFACE ELEVATION:** means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929 (or other datum where specified) of floods of various magnitudes and frequencies in the flood plains.
2. All proposed development in any special flood hazard area shall require a permit. The Building Inspector shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is located in an area of special flood hazard, all new construction or substantial improvements shall:
    - a. be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy, and
    - b. be constructed with materials resistant to flood damage, and
    - c. be constructed by methods and practices that minimize flood damages, and
    - d. be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment, and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.
  3. Where new or replacement water and sewer systems (including on-site systems) are proposed in a special flood hazard area the applicant shall provide the Building Inspector with assurance that these systems will be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems will be located to avoid impairment to them or contamination from

them during periods of flooding.

4. For all new or substantially improved structures located in Zones A or AE, the applicant shall furnish the following information to the building inspector:
  - a. The as-built elevation (in relation to NGVD) of the lowest floor (including basement) and whether or not such structures contain a basement.
  - b. If the structure has been flood proofed, the as-built elevation (in relation to NGVD) to which the structure was flood proofed.
  - c. Any certification of flood proofing
  - d. The Building Inspector shall maintain for public inspection and shall furnish such information upon request.
5. The Building Inspector shall not grant a building permit until the applicant certifies that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334.
6. In riverine situations, prior to the alteration or relocation of a watercourse, the applicant for such authorization shall notify the Wetlands Board of the New Hampshire Environmental Services Department and submit copies of such notification to the Building Inspector, in addition to the copies required by RSA 482-A:3. Further, the applicant shall be required to submit copies of said notification to those adjacent communities as determined by the Building Inspector, including notice of all scheduled hearings before the Wetlands Board.
  - a. The applicant shall submit to the Building Inspector certification, provided by a registered professional engineer, assuring that the flood carrying capacity of an altered or relocated watercourse can and will be maintained.
  - b. Along watercourses with a designated Regulatory Floodway no encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practices that the proposed encroachment would not result in any increase in flood levels within the community during the base flood discharge.
  - c. Until a Regulatory Floodway is designated along watercourses, no new construction, substantial improvements, or other development (including fill) shall be permitted within Zone AE on the FIRM, unless it is demonstrated by the applicant that the cumulative effect of the proposed development, when combined with all existing and anticipated development, will not increase the water surface elevation of the base flood more than one foot at any point within the community.
  - d. The Building Inspector shall obtain, review, and reasonably utilize any floodway data available from Federal, State, or other sources as criteria for requiring that all development located in Zone A meet the following floodway requirement: "No encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway that would result in any increase in flood levels within the community during the base flood discharge".

#### **7. BUILDING IN THE FLOOD PLAIN**

- a. In special flood hazard areas the Building Inspector shall determine the 100 year flood elevation in the following order of precedence according to the data available:
  - (i) In zone AE refer to the elevation data provided in the community's Flood insurance study and accompanying FIRM.
  - (ii) In Zone A the Building Inspector shall obtain, review, and reasonably utilize any 100 year flood elevation data available from any federal, state, or other source including data submitted for development proposals submitted to the community (i.e. subdivisions, site approvals).
  - (iii) In zone AO the flood elevation is determined by adding the elevation of the highest adjacent grade to the depth number specified on the FIRM or if no depth number is specified on the FIRM at least 2'.
- b. The Building Inspector's 100 year flood elevation determination will be used as criteria for requiring in zones

A and AE that:

- (i) All new construction or substantial improvement of residential structures have the lowest floor (including basement) elevated to or above the 100 year flood elevation;
  - (ii) That all new construction or substantial improvements of non-residential structures have the lowest floor (including basement) elevated to or above the 100 year flood level; or together with attendant utility and sanitary facilities, shall:
  - (iii) Be flood proofed so that below the 100 year flood elevation the structure is watertight with walls substantially impermeable to the passage of water;
  - (iv) Have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and
  - (v) Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section.
- c. All recreational vehicles placed on sites within Zones A and AE shall either:
- (i) be on site for fewer than 120 consecutive days,
  - (ii) be fully licensed and ready for highway use, or
  - (iii) meet all standards of Section 60.3 (b) (1) of the National Flood Insurance Program Regulations and the elevation and anchoring requirements for Manufactured Homes in paragraph (c) (6) of Section 60.3
- d. for all new construction and substantial improvements, fully enclosed areas below the lowest floor that are subject to flooding are permitted provided they meet the following requirements:
- (i) the enclosed area is unfinished or flood resistant, usable solely for the parking of vehicles, building access or storage;
  - (ii) the area is not a basement;
  - (iii) shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria: a minimum of 2 openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwater.
- e. All manufactured homes to be placed or substantially improved within special flood hazard areas shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the base flood level; and be securely anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

**8. VARIANCES AND APPEALS IN THE FLOOD PLAIN:**

- a. Any order, requirement, decision or determination of the Building Inspector made under this ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.
- b. If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I (b), the applicant shall have the burden of showing in addition to the usual variance standards under state law:
  - (i) that the variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expense;
  - (ii) that if the requested variance is for activity within a designated regulatory floodway, no increase in flood levels during the base flood discharge will result;
  - (iii) that the variance is necessary, considering the flood hazard, to afford relief.
- c. The Zoning Board of Adjustment shall notify the applicant in writing that: (i) the issuance of a variance to

construct below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25.00 for \$100.00 of insurance coverage and (ii) such construction below the base flood level increases risks to life and property. Such notification shall be maintained with a record of all variance action.

- d. The community shall (i) maintain a record of all variance actions, including the justification for their issuance, and (ii) report such variances issued in its annual or biennial report submitted to FEMA's Federal Insurance Administrator.

### C. **WETLAND CONSERVATION OVERLAY ZONE (WCO)**

#### 1. **PURPOSE**

By the authority granted in New Hampshire RSA 674:16-17 and 674:20-21, the purpose of the Wetland Conservation Overlay Zone is to protect the wetlands, surface waters and their buffer zones, to assure the proper use of natural resources and thereby protect the public health, safety and general welfare of the people in the Town of Hollis. Additional purposes of the WCO Zone include, but are not limited to:

- a. Protecting persons and property from flood damage by preserving the natural flood storage area;
- b. Reducing the effects of non-point pollution;
- c. Reducing sedimentation of wetlands and surface waters;
- d. Protecting surface waters, groundwater and aquifers as current or potential drinking water supply sources;
- e. Limiting the development of structures and land uses which contribute to the
- f. Pollution of surface and groundwater by sewage, hazardous substances or siltation;
- g. Protecting and promoting fish and wildlife habitat;
- h. Conserving natural beauty and open space;
- i. Encouraging those uses that can be appropriately and safely located in the WCO Zone;
- j. Preventing those uses that could harm or degrade the wetland buffer, the wetlands, or surface waters.

#### 2. **DEFINITIONS**

For the purposes of the WCO Zone Ordinance, the following definitions apply:

- a. **BEST MANAGEMENT PRACTICES:** When referring to forestry, Best Management Practices are defined in a publication entitled Best Management Practices for Erosion Control on Timber Harvesting Operations in New Hampshire prepared by the New Hampshire Department of Resources and Economic Development, and Wt. 304.05 Logging Operations, NH Code of Administrative Rules, April 21, 1997, as amended. When referring to agriculture, Best Management Practices are defined in the publications entitled Manual of Best Management Practices for Agriculture in New Hampshire as prepared by the Agricultural Best Management Practices Task Force and the USDA Natural Resources Conservation Service for the New Hampshire Department of Agriculture, and Best Management Wetlands Practices For Agriculture July, 1993, as amended. Other sources of technical information and standards used for performance guidance include, Stormwater Management and Erosion and Sediment Control for Urban and Developing Areas in New Hampshire, DES, RCCD, 1992, as amended; Manual of Best Management Practices to Control Nonpoint Source Pollution: A Guide for Citizens and Town Officials, DES, November, 1997, as amended; BMP's: Biosolids- UNH Cooperative Extension Service, June 1995, as amended; BMP's-Env-WS 421 (hazardous materials), as amended; and BMP's for Urban Stormwater Runoff, DES, WSPCD, January 1996, as amended and BMP's for Erosion Control During Trail Maintenance and Construction, as amended.
- b. **BOG:** A wetland area distinguished by stunted evergreen trees and shrubs, peat deposits, poor drainage and/or highly acidic soil and/or water conditions, Wt. 101.08, N.H. Code of Administrative Rules, April 21, 1997, as amended.
- c. **BUFFER ZONE:** An upland area adjacent to a wetland or surface water. This buffer zone, under the jurisdiction of the Town of Hollis, shall include an area of one hundred (100) feet, measured on a horizontal plane from the mean high water mark of a surface water, the delineated edge of a wetland, or the limits of hydric soils (whichever is most restrictive).
- d. **BULK WATER TRANSPORTER;** Bulk water transporters are those companies that offer services such as

filling swimming pools, hydro seeding, fertilizer and pesticide applications, spraying for dust control and roadbed compaction at construction sites, and similar activities that often withdraw water from surface waters at convenient access points on a short-term or occasional basis.

- e. **CERTIFIED SOIL SCIENTIST:** A person qualified in soil classification and mapping who is certified by the State of New Hampshire Board of Natural Scientists.
- f. **CERTIFIED WETLAND SCIENTIST:** A person qualified to delineate wetland boundaries and prepare wetland maps who is certified by the State of New Hampshire Board of Natural Scientists, as defined by RSA 310-A:76, II-a.
- g. **EROSION CONTROL MEASURES:** For purposes of this ordinance, all construction and/or development shall incorporate design standards for erosion and sedimentation control which at a minimum reflect the standards set forth in the document, " Stormwater Management & Erosion & Sediment Control Handbook for Urban & Developing Areas of New Hampshire", August, 1992, as amended and Env-Ws 415.
- h. **HYDRIC SOILS:** Soils that are saturated or flooded during a sufficient portion of the growing season to develop anaerobic conditions in the upper soil layers. Hydric soils consist of very poorly drained and poorly drained soil drainage classes as defined in "Field Indicators for Identifying Hydric Soils in New England", Version 2, July 1998.
- i. **IMPROVED LOT:** A parcel of land or any combination of several contiguous lots of record occupied by a principal building or a building group, as permitted herein, together with their existing accessory buildings or uses and such access, yards, and open space required under this ordinance.
- j. **MAJOR WETLAND PROJECT:** A project involving alteration of wetlands and surface waters in excess of 20,000 square feet. Major wetland projects of such size and scope have the potential to create significant impacts on wetlands or surface waters, pursuant to NH Code of Administrative Rules, Wt 303.02, April 21, 1997. Projects altering wetlands and surface waters are under the jurisdiction of the State of New Hampshire and require permitting.
- k. **MINIMUM WETLAND IMPACT PROJECT:** A project involving alteration of wetlands and surface waters less than 3,000 square feet. A minimum wetland impact project, by virtue of its size and nature, is likely to have a negligible impact by itself or in the aggregate pursuant to NH Code of Administrative Rules, Wt 303.04, provided adequate measures are employed to protect the environment. Projects altering wetlands and surface waters are under the jurisdiction of the State of New Hampshire and require permitting.
- l. **MINOR WETLAND PROJECT:** A project involving alteration of wetlands and surface waters less than 20,000 square feet. A minor wetland project is of such size, scope or nature that it has the potential of having more than a negligible impact upon wetlands or surface waters pursuant to NH Code of Administrative Rules, Wt 303.03, provided adequate measures are employed to protect the environment. Projects altering wetlands and surface waters are under the jurisdiction of the State of New Hampshire and require permitting.
- m. **PRIMARY STRUCTURE:** For purposes of this ordinance a primary structure shall be considered the main or principal structure on a lot that serves as a residence or a place of business.
- n. **PRIME WETLAND:** Under the New Hampshire statute (RSA 482-A) for protecting wetlands from "despoliation and unregulated alteration", municipalities are able to designate some of their high value wetlands as "Prime Wetlands" (RSA 482-A:15). These designated wetlands are given special consideration by the Wetlands Board in permit application reviews. At this time the Town of Hollis has no wetlands designated as "Prime Wetlands", however, the Hollis Master Plan (1998) and the Conservation Commission have recognized the following surface waters and associated wetlands in the Town of Hollis as sensitive environmental areas that should be given special consideration and protection during application reviews.
  - (i) Bailey Brook- from Hayden Reservoir to the entrance of Hayden's Mill Pond
  - (ii) Birch Brook – from Birch Hill to Witches Brook
  - (iii) Flints Brook- from Flints Pond to the Nashua River
  - (iv) Beaver Brook- from Rocky Pond Road to the Nissitissit River
  - (v) Rocky Pond Brook- from Rocky Pond to the Hollis town border
  - (vi) Witches Brook- from Hayden's Reservoir to the Hollis town border

- (vii) Pennichuck Brook- from Dunklee Pond to Pennichuck Pond
  - (viii) Muddy Brook- from Parker Pond to Pennichuck Pond
  - (ix) Nashua River
  - (x) Nissitissit River
  - (xi) Flint Pond
  - (xii) Pennichuck Pond
  - (xiii) Dunklee Pond
  - (xiv) Rocky Pond
  - (xv) Silver Lake
  - (xvi) Hayden's Mill Pond
  - (xvii) Hayden's Reservoir
  - (xviii) Parker Pond
  - (xix) Worcester Pond
  - (xx) Sucker Brook - from Jewett Lane to the Nashua River
  - (xxi) High School Brook - from the Hollis -Brookline High School to Jewett Lane
- o. **SITE SPECIFIC SOILS MAP:** A map developed from information prepared in accordance with Site Specific Soils Mapping Standards for New Hampshire and Vermont, Society of Soil Scientists of Northern New England Publication NO. 3, 1997, as amended.
  - p. **SPECIAL EXCEPTION:** A use of land or buildings that is permitted, subject to specific conditions that are set forth in the ordinance. RSA 674:33 gives the local zoning board the power to grant those exceptions which are clearly specified in the ordinance.
  - q. **SURFACE WATERS:** Those waters which have standing or flowing water at or on the surface of the ground. This includes but is not limited to rivers, streams, lakes, ponds and tidal waters.
  - r. **UNIMPROVED LOT:** A parcel of land or any combination of several contiguous lots of record not currently occupied by a principal or accessory building or use.
  - s. **WETLAND:** Areas as defined in Section VIII.50 of the Zoning Ordinance.
  - t. **WETLAND CONSERVATION OVERLAY ZONE (WCO):** Areas as defined in Section VII.B.3. of the Zoning Ordinance.
  - u. **WET MEADOW:** An herb-dominated area typically with non-woody vegetation less than three feet in height, saturated for long periods during the growing season, but seldom flooded. Wet meadows develop on predominantly poorly drained soil conditions as defined by Env-Ws 1014.02.
  - v. **VERNAL POOL:** A confined basin depression which, at least in most years, holds water for a minimum of two continuous months during the spring and/or summer, provides essential breeding habitat for certain amphibians and invertebrates and is free of adult fish populations

### 3. JURISDICTION

- a. The town recognizes that the state and federal governments have regulations, including a permitting process, governing the alteration of wetlands and surface waters. However, the Town of Hollis has jurisdiction over the one hundred (100) foot buffer zone and all Dredge and Fill Applications must first be reviewed by Planning Board Staff and approved by the Planning Board and the Conservation Commission for compliance with this ordinance.
- b. The WCO Zone shall be considered as overlaying any other zone established by this Ordinance. Any use permitted in the portions of the zone so overlaid shall only be permitted subject to all provisions of this section.
- c. **EXISTING LOTS:** This ordinance shall not prohibit the construction of principal and accessory structures

on an unimproved lot or the expansion of a legally pre-existing use on a lot that legally existed before March 11, 1997. However, such construction or expansion will only be permitted upon determination by Planning Staff (or Planning Board per staff recommendation) that:

- (i) it is not feasible to place the structure outside the buffer zone
  - (ii) the structure must be set back as far as possible from the delineated edge of the wetland or surface water
  - (iii) appropriate erosion control measures must be in place prior to and during construction
  - (iv) any disturbance to the surrounding buffer zone must be repaired and restored upon completion of construction
  - (v) all available mitigation measures to address changes in water quality and quantity be implemented, if required by Planning Staff/ Planning Board
- d. The 100 foot buffer regulations and restrictions set forth in this Ordinance shall not apply to the following wetland areas or their buffer zones:
- (i) manmade ditches and swales
  - (ii) sedimentation/detention basins or ponds
  - (iii) manmade agricultural/irrigation ponds and swales
  - (iv) fire ponds
  - (v) a septage or manure lagoon
  - (vi) silage pits
  - (vii) a wetland or surface water of 3,000 square feet or less not associated with any other wetland, drainage-way, or surface water which does not meet the definition of a bog or vernal pool

**4. LOT REQUIREMENT AREA:** Wetland area excluding surface water may be used to satisfy minimum lot area requirements provided that seventy-five (75) percent of the minimum required lot size is contiguous non-wetland. For two (2) acre minimum lots, one and one-half (1 1/2) acres must be contiguous non-wetland. For four (4) acre minimum back lots, three (3) acres must be contiguous non-wetland.

**5. DRAINAGE**

- a. There shall be no net increase in peak flow or overall volume of stormwater runoff in the WCO Zone as a result of any development.
- b. Calculations shall be based on 2, 5 and 25-year storm events in accordance with NRCS Technical Release 55 or Technical Release 20, or other calculation methods as approved by the Planning Staff.
- c. Drainage design shall be in accordance with the Town of Hollis Subdivision and Site Plan regulations.

**6. PERMITTED USES WITHIN THE WETLAND CONSERVATION OVERLAY ZONE:**

- a. The following uses shall be permitted in the WCO Zone without a special exception:
  - (i) Forestry performed in accordance with Best Management Practices as defined in Section XI.C.2. of this ordinance
  - (ii) Agriculture, including growing and harvesting of crops, in accordance with Best Management Practices as defined in Section XI.C.2. of this ordinance.
- b. Water withdrawals from surface waters for bulk transport and delivery are permitted with the following conditions and limitations:
  - (i) Anti-backflow devices are required on all vehicles withdrawing water from surface waters in the Town of Hollis.
  - (ii) The withdrawal must have permission of the property owner whose frontage is on the river, stream, lake or pond from which the withdrawal is being made.
  - (iii) The withdrawal must not create an adverse impact on aquatic life, recreation, or other public use of

the water body. Adverse impacts include, but are not limited to: lowering of stream flow or lake levels and introducing potential pesticides and pollutants into the waters through backflow discharge or spillage. (Any discharges, including accidental discharges, are subject to enforcement action and penalties by the NH Department of Environmental Services under the provisions of the Clean Water Act.)

- (iv) The withdrawal must be “reasonable” in that it will not impact the drinking water supply, health of the indigenous aquatic life, public recreational activities and other uses dependent on the surface water.
  - (v) Large water withdrawals from single locations that exceed 20,000 gallons per day averaged over any 7-day period or that exceed a total of 600,000 gallons during any 30-day period must be registered with the DES-NH Geological Survey. (Chapter Env-Wr 700 Water Use Registration and Water Use Reporting, under RSA 482:87).
  - (vi) Water withdrawals from vernal pools and wetlands (other than constructed fire ponds and farm irrigation ponds) are prohibited.
  - (vii) Water withdrawals for emergency services are exempt from this ordinance.
  - (viii) If it is determined that the foregoing areas of regulation are or have been pre-empted by the State of New Hampshire, such sections shall be void.
- c. The following uses which do not alter the surface configuration by the addition of fill, do not obstruct or change in any manner the natural flow or quality of ground or surface water, and that are otherwise permitted by the Zoning Ordinance shall be permitted in the WCO Zone without a special exception, provided applicable necessary mitigation measures to address changes in water quality and quantity are in place, and there is restoration and repair of any disturbed area.
- (i) Conservation areas, and wildlife refuges
  - (ii) Open space as permitted by subdivision regulations and other sections of this ordinance. Only the buffer zone may be used in the calculation of open space. Jurisdictional wetlands, surface waters, flood plains, and unaltered slopes greater than 25% are excluded from this calculation.
  - (iii) Parks and outdoor recreational uses and activities as are consistent with the purposes and intentions of the WCO Zone
  - (iv) Planting of native species and wetland vegetation as identified by NHDES publication "Native Shoreland/Riparian Buffer Plantings for New Hampshire", dated March 2006 as amended.
  - (v) Monitoring wells for observation purposes
  - (vi) The removal of dead, diseased, unsafe, or fallen trees, however stumps and their root systems shall be left intact in the ground within one hundred (100) feet of the delineated edge of the wetland boundary. Dead trees that provide dens and nesting sites for wildlife are encouraged to be preserved
  - (vii) All projects detailed in Wt 303.05 Projects in Jurisdiction That Do Not Require a Permit, NH Code of Administrative Rules, April 23, 1997, except for (i)- landscaping, gardening, deck or stair construction in the upland (delete tidal) buffer zone which are not permitted by this ordinance. This shall be replaced with: The Town of Hollis WCO Ordinance requires that the existing woodland buffer shall be maintained in its natural state. A copy of this document is on file at the planning office.
- d. The following uses shall be permitted in the WCO Zone without a special exception, provided applicable erosion control measures are in place, there is repair and restoration of any disturbed area and all available mitigation measures to address changes in water quality and quantity as required by staff and recommended by the Conservation Commission are employed. However, all projects listed below together with any disturbance of the buffer zones involved therein shall be presented to the Conservation Commission, with a request for review in writing, as required by the New Hampshire Wetlands Bureau, for its intervention, opinion, recommendations and/or approval. The results of such intervention by the Conservation Commission, together with its written opinion, recommendations, and/or approval shall be forwarded to the Planning Board, within twenty (20) days from the date of the first Conservation Commission meeting at which it receives such project details. These "minimum wetlands impact" projects are defined in full detail

in Wt. 303.04, NH Code of Administrative Rules, April 21, 1997, and after approval by Town Boards require a permit from the New Hampshire Wetlands Bureau.

- (i) Seasonal docks on non-tidal frontage for two (2) slips
- (ii) Repair or replacement of existing retaining walls
- (iii) Decks raised above the ground in such a manner as to permit the natural flow of any surface water.
- (iv) Potable water supply wells
- (v) Maintenance of existing docking structures
- (vi) Control of aquatic weeds by harvesting
- (vii) Control of exotic weeds in accordance with NH RSA 487:17
- (viii) Installation of culverts or rock fords for driveways or woods roads where wetland impact is less than three thousand square feet on existing lots approved prior to March 11, 1997
- (ix) Bridge crossings
- (x) Temporary crossings for maintenance of utility pipes or lines, or for transportation of forestry products
- (xi) Projects located in the right-of way of an existing public road
- (xii) Temporary coffer dams for repair or replacement of existing structures
- (xiii) Pond construction in poorly drained soils only
- (xiv) Restoration of altered or dredged wetlands
- (xv) Construction of nature trails in accordance with BMP's for Erosion Control During Trail Maintenance and Construction, as amended.
- (xvi) Buffer disturbances for driveway access. Buffer disturbances do not need approval from the NH Wetlands Bureau.
- (xvii) Buffer disturbances for Planning Board approved subdivision road access.
- (xviii) Stormwater management facilities in accordance with New Hampshire Department of Environmental Services Alteration of Terrain Regulations.

**7. SPECIAL EXCEPTIONS IN THE WETLANDS CONSERVATION OVERLAY ZONE:**

- a. A special exception may be granted by the Zoning Board of Adjustment for projects classified as “minor wetlands impact” as set forth in NH Code of Administrative Rules, Wt. 303.03, April 21, 1997, as amended, and as defined in Section XI.C.2 of this ordinance provided:
  - It is not feasible for the proposed use, including necessary mitigation measures, to be placed outside the buffer zone.
  - The proposed use is designed to have the least amount of impact on the wetland and the buffer
  - With the exception of Town approved and State permitted wetlands crossings, and stormwater management facilities in accordance with the New Hampshire Department of Environmental Services Alteration of Terrain Regulations, the non-disturbance buffer zone shall be maintained to at least 50 feet from the delineated edge of the wetland unless the lot existed prior to March 11, 1997.
  - The Zoning Board of Adjustment will consider (but is not necessarily bound by) the recommendations of the Planning Board and the Hollis Conservation Commission.
- b. Application Procedure: The following outlines the application requirements and procedures for special exceptions to the Wetlands Conservation Overlay Zone:
  - (i) Submit written request for review of special exception concurrently to the Conservation Commission and the Planning Board no later than fifteen (15) days prior to their respective next meeting dates. This request must include:

- delineation of the impacted wetland and the buffer zone by a certified soil or certified wetland scientist
- design, construction, and maintenance methods including erosion control measures for the site
- restoration and repair measures for the site

The Conservation Commission and the Planning Board may require additional information including but not limited to:

- water quality calculations
  - mitigation measures to address changes in water quality and quantity
  - wildlife assessment performed by a natural resource professional (wetland scientist, soil scientist, wildlife biologist or forestry professional as appropriate)
  - hydrological calculations based on drainage requirements in accordance with Section XI.C.4.b. of this Ordinance.
- (ii) Submit an application for special exception, including all supporting plans, documentation and recommendations from the Conservation Commission and the Planning Board to the Zoning Board of Adjustment at least fifteen (15) days prior to a Zoning Board of Adjustment meeting following the Planning Board meeting at which the request is scheduled for input.
- (iii) Upon approval of the Zoning Board of Adjustment, submit dredge and fill application to the State if applicable.

**8. PROHIBITED USES WITHIN THE WETLAND CONSERVATION OVERLAY ZONE**

a. The following uses are specifically prohibited within the WCO Zone:

- (i) Any project classified as "major wetland impact" as set forth in NH Code of Administrative Rules, Wt 303.02, April 21, 1997, as amended, and as defined in Section XI.C.2 of this ordinance.
- (ii) Location of a primary structure and related improvements, including the associated limits of construction, within the WCO Zone unless the lot legally existed before March 11, 1997, in accordance with Section XI.C.3.c. of this ordinance.
- (iii) Location of an accessory structure and related improvements, including the associated limits of construction, within the WCO Zone unless the conditions for a special exception in accordance with Section XI.C.7 of this ordinance are met or the lot legally existed before March 11, 1997, in accordance with Section XI.C.3.c of this ordinance
- (iv) All other construction activity, including but not limited to parking lots, except in cases where the proposed use meets the criteria for a special exception (Section XI.C.7) and such a permit has been issued.
- (v) Any land use that harms or degrades the wetlands buffer, the wetland or surface waters, including but not limited to:
- uncovered or unenclosed storage of road salt and salt storage sheds
  - automobile junk yards/salvage
  - hazardous waste facilities
  - use of fertilizers except for lime and/or wood ash, on lawns or areas with grass
  - bulk storage of chemicals; petroleum products or hazardous materials
  - sand and gravel excavations as defined in RSA 155-E
  - processing of excavated materials
  - dumping or disposal of snow and ice collected from roadways or parking areas.
  - disposal of solid waste, landfills, solid waste transfer stations, recycling facilities, incinerators, and composting facilities.

- laundromats
- car washes
- automotive service and/or repair shops
- commercial animal feedlots
- disposal of liquid or leachate wastes
- storage or disposal of animal waste or byproducts
- trails, paths, tracks, or other ways, if the traffic caused by these uses compacts and erodes soils in the wetlands buffer or the wetlands.

**D. MULTI-FAMILY ZONE (MF) (Workforce Housing)**

**1. PURPOSE**

The intent of this Section is to define the requirements related to the development of multi-family housing. The opportunity to construct multi-family housing must include considerations to prevent overutilizing of the land. The development plan must follow all applicable federal, state, and local laws with respect to such housing. Compliance with local planning standards, land use policies, good building design, and requirements for the health, safety, and general welfare of all the inhabitants of the Town must be ensured.

**2. GENERAL STANDARDS**

In order to provide for a variety of workforce housing units in the community, which includes both owner and renter occupied units, the following criteria shall be required for developments proposed in the Multi-family Zone:

- a. Dwelling unit density shall be no greater than four (4) units per acre, based upon the Net Tract Area of the property or the minimum number of units required to make the project economically viable whichever is less.
- b. For any multi-family workforce housing development proposal, a minimum of 25% of the total number of rental units (market rate and affordable) shall be designated as workforce housing/renter occupied units. For any multi-family workforce housing/owner occupied development proposal, a minimum of 30% of the total number of owner occupied units (market rate and affordable) shall be designated as workforce housing/owner occupied units.
- c. Multi-family development projects shall consist of one or two bedroom units. At least 50% of workforce housing units shall consist of two bedroom units.
- d. Adequate on-site space must be provided for off-street parking, water and sewage disposal systems. The applicant shall demonstrate that the site can accommodate the permitted density as it pertains to its impact on soil as part of the application for review by the Planning Board.
- e. Building types and styles, including exterior aesthetics and unit arrangements, shall be suitable and appropriate for their intended purpose, in light of the size and scale of the project, the prominence and the visibility of the proposed project in the community, the surrounding neighborhood, and other similar factors.
- f. The dwellings qualifying as workforce housing units shall be compatible in architectural style and appearance with the market rate units in the proposed development. The workforce housing units should be interspersed throughout the overall development and not clustered together in one area.
- g. Workforce housing developments shall be exempted from Section IX.J., which limits the number of dwelling units that can be constructed on a lot.
- h. The minimum lot area shall be 4 acres and the lot shall have at least 50 feet of frontage. Garden style structure shall be limited to two stories. Townhouse style may be two stories, provided that a portion of the first floor area is allocated to a garage use.
- i. Multi-family workforce housing developments submitted under this section shall to the maximum extent practicable, seek to infiltrate the volumetric increase between the existing condition and the proposed condition for the 24-hour, 25-year storm. Standard practices used in hydrology shall be used to determine the volumetric increase and the recharge capacity of the stormwater management system. All groundwater infiltration shall be in compliance with the State of New Hampshire Alteration of Terrain Best Management Practices.

- j. The development shall be landscaped so as to enhance its compatibility with the Town with emphasis given to the use of existing, natural features where possible.
- k. In order to minimize potential intrusion on neighboring land uses, the Planning Board shall require the installation of a 50 foot landscaped buffer strip along the perimeter of the site. The Planning Board shall determine the exact nature of the buffer strip, after taking into consideration existing vegetation, topography and other relevant factors.
- l. The development shall provide for 40% open space, exclusive of wetlands, surface waters, hydric soils, flood plain, and altered/unaltered slopes greater than 25%.
- m. A proposed site shall have adequate soil to accommodate on-site wastewater treatment. Water supply shall be adequate for, and the water system shall be designed to provide, the maximum flow practical for firefighting purposes.
- n. To ensure that the application is completed as permitted, a phasing plan for the project shall provide for the development of workforce housing units concurrently with the market rate housing units. The dwellings qualifying as workforce housing shall be made available for occupancy on approximately the same schedule as a project's market rate housing units, except that the certificates of occupancy for the last 10 percent of the market rate housing units shall be withheld until certificates of occupancy have been issued for all the workforce housing units. A schedule setting forth the phasing of the total number of units in a project under this section, along with a schedule setting forth the phasing of the required workforce housing units shall be established prior to the issuance of a building permit for any development subject to the provisions of this section.

**3. *BUILDING RIGHTS LIMITATION***

- a. Multi-family workforce housing developments, both market rate housing and workforce housing units shall be exempt from the provisions of Section XIII, Residential Construction Timing and Phasing Ordinance. (Repealed March 2017)

## **SECTION XII: NONCONFORMING USES, STRUCTURES AND LOTS** (*Amended 1993*)

**INTENT:** The intent of this section is to allow for the lawful continuance of nonconforming uses, structures and lots, and to allow a certain reasonable level of alteration, expansion or change to occur by special exception when it can be demonstrated that the proposed alteration, expansion or change will not change the nature of the use, unduly impact the neighborhood or provide inadequate subsurface disposal of waste. Of particular concern is the preservation of the quality of the groundwater, which is Hollis' source of domestic drinking water. Specific attention to the potential of groundwater contamination arising from septic systems which are inadequate or located without adequate setbacks from other septic systems and/or drinking water wells was given in the development of this ordinance.

### **A. NONCONFORMING USES**

1. **CONTINUANCE:** A nonconforming use may be continued although such use does not conform to the current provisions of this ordinance.
2. **DISCONTINUED USE:** Whenever a nonconforming use has been discontinued for more than two (2) years for any reason, such nonconforming use shall not thereafter be reestablished, and the future use of the property shall be in conformity with the provisions of this ordinance.
3. **ALTERATIONS:** Alteration, expansion or change of a nonconforming use or structure shall only be permitted by Special Exception by the Zoning Board of Adjustment if it finds that:
  - a. the proposed alteration, expansion or change will not change the nature and purpose of the original use, and
  - b. the proposed alteration, expansion or change would involve no substantially different effect on the neighborhood, and
  - c. any increase in heated living space, as proposed by the plans submitted which, in the judgment of the Zoning Board of Adjustment, is reasonably capable of increasing the number of bedrooms for a nonconforming dwelling or lot, may require the septic system to be approved by the New Hampshire Division of Water Supply and Pollution Control and the Town of Hollis in accordance with the provisions of New Hampshire RSA 485-A: 38 and the Town of Hollis' septic regulations for the number of bedrooms currently in the home or proposed for the home.

### **B. NONCONFORMING LOTS**

1. A nonconforming lot which has been developed with a structure may be continued for the same use but any alteration, expansion, new construction or change shall only be permitted according to the provisions set forth in item number 3, ALTERATIONS, as described above for A. NONCONFORMING USES. Provided, however, that any alteration, expansion, new construction or change that can be accomplished in a manner that will comply with the applicable setbacks for that district, shall be permitted.
2. A separate lot which does not conform to the provisions of this Ordinance, which is recorded and taxed as a lot of record at the time of passage of this Ordinance may be used for any conforming use of this district.
3. Any changes to existing septic systems on nonconforming lots must meet the Town of Hollis' Board of Health Subsurface Disposal Regulations.
4. The Zoning Board of Adjustment may grant a special exception to setback requirements for non-conforming lots of less than two acres in the Historic District if the Zoning Board finds that:
  - a. Strict adherence to the existing setbacks would detrimentally impact the Historic District and disturb the streetscape; or
  - b. Strict adherence to the existing setbacks would cause inconsistency in the massing of buildings; or
  - c. Strict adherence to the existing setbacks would be inconsistent with setbacks of existing adjacent buildings; or
  - d. If the structure as designed takes into consideration architectural and spatial elements of adjacent buildings an exception may be granted.
  - e. The ZBA will consider (but is not necessarily bound by) the recommendations of the HDC.

**C. NONCONFORMING STRUCTURE:**

**CONTINUANCE:** Any lawful nonconforming structure existing at the time of adoption of this Ordinance, may be occupied, operated, and maintained in a state of good repair, but any alteration, expansion, new construction or change of such structure that does not further aggravate a front, side, or rear yard setback nonconformity shall only be permitted according to the provisions set forth in item number 3, ALTERATIONS, paragraphs a and b, as described above for A. NONCONFORMING USES, and according to the diagram below.

**Expansions of structures with nonconforming setbacks**

(Not drawn to scale. Assume that the lot is conforming.)

**Explanation:** Proposal “A” requires a special exception;  
Proposal “B” requires no action by the Board of Adjustment;  
Proposal “C” requires a grant of variance by the Board of Adjustment. Proposal C does not include landings or stairs.

**SECTION XIII: RESIDENTIAL CONSTRUCTION TIMING AND PHASING ORDINANCE**  
(Adopted March 1992, March 2017 Repealed by Town Vote)

**SECTION XIV: SIGN ORDINANCE** (*Adopted March 1994, Amended 1996, 2004, 2012, 2013, 2014, 2016, 2017*)

- A. **SCOPE:** This Sign Ordinance provides for the installation, maintenance and display of signs in the Town of Hollis. The provisions of this section shall govern the construction, alteration, repair and maintenance of all signs together with the associated appurtenant and auxiliary devices in respect to structural and fire safety.

When reading and using this document, the INTENT of each section should carry more weight in decision making than the specific wording of each section. An attempt is made to state the intent at the beginning of each section. This statement of intent should be used as a guide to interpretation of any specific paragraph, article or provision.

It is the intent of this Sign Ordinance to support the general provisions of the 1991 Hollis Town Master Plan which seeks to preserve the visual New England rural character of Hollis and its Historic District. The following provisions were designed to encourage reasonable uniformity in the size, treatment and presentation of signs used to call attention to the existence of a business, activity, product or service. The ultimate goal of this Sign Ordinance is to ensure traffic safety, prevent obstructions in rights-of-ways, allow the existence of signs that aid orientation and identification of uses and activities to the public without degradation of the surrounding property or properties in any area, while, at the same time, understanding and meeting the need for adequate business identification and advertising.

B. **DEFINITIONS**

**ADMINISTRATIVE BOARD:** The person(s) or board appointed by the Board of Selectmen to be responsible for the interpretation and administration of the provisions of this Sign Ordinance.

**AWNING SIGN:** Any visual message incorporated into an awning attached to a building.

**COPY-CHANGE SIGN:** A sign on which the visual message may be periodically changed. Example: Reader boards.

**DIRECTIONAL SIGN:** A sign limited to providing directional or guide information on the most direct or simple route for on-site public safety and convenience. Directional signs may be located adjacent to driveways. Examples: "IN", "OUT", "ENTRANCE", "EXIT", and "PARKING".

**EVENT-SPECIFIC SIGN:** A non-prohibited temporary sign to be used to announce a non-profit organization event such as a festival, dance, meeting, fund-raiser, parade and other events which have a short term conclusion. These signs shall not promote a business.

**FREE STANDING SIGN:** A self-supporting sign not attached to any building, wall or fence but separate and affixed in or upon the ground. Included are pole signs, pylon signs, monolith and masonry wall-type signs. This does not include portable or mobile trailer type signs.

**GRANDFATHERED SIGN:** A non-conforming sign which legally exists and is allowed to remain even though it may not meet the terms of this ordinance.

**GROUND SIGN:** A sign supported by uprights or braces in or upon the ground surface.

**HISTORIC PLAQUE:** A marker, erected by federal, state, or local authority, identifying a historic place, name and/or date.

**HOLIDAY PERIOD:** A 30 day, or less, period of time surrounding a state recognized holiday, all of which time may be spent before or after the holiday.

**HOME OCCUPATION SIGN:** A sign which identifies a home occupation.

**ILLUMINATED SIGN:** Any sign illuminated by electricity, gas or other artificial light either from the interior or exterior of the sign and which includes reflective and/or phosphorescent surfaces.

**INFORMATION SIGN:** A sign, without advertising, designed and intended to convey information about a permitted use, to convey regulations or restrictions, or otherwise to provide needed guidance to the general public.

**LINEAL BUILDING FRONTAGE:** The length of a ground level straight line or lines parallel to and equaling the length of the building front that includes the main public entrance(s) or the side of the building fronting on the principal roadway. In the case of a multi-unit development, the frontage of each separate building is additive for the purpose of determining permissible sign area.

**MOBILE SIGN:** See Portable Sign.

**NON-CONFORMING SIGN:** A sign which does not comply with the provisions of this ordinance, but which

legally existed prior to the adoption of this Sign Ordinance.

**OFF-PREMISES SIGN:** A sign unrelated to a business or a profession conducted, or to a commodity or service sold or offered, upon the premises where such sign is located and/or a sign placed more than 300 feet from the main vehicular entrance to the advertised business or activity.

**PERSON:** Any individual, corporation, unincorporated association or other legal entity.

**PORTABLE SIGN:** A sign capable of being readily removed or relocated, and not attached to the ground, a building, a structure or another sign. This includes moveable signs mounted on a chassis, "A" frame and/or wheels, or supported by legs.

**PROJECTING SIGN:** A sign that is attached to the building wall or structure and which extends horizontally more than 6 inches from the plane of such wall, or a sign which is placed perpendicular to or at no less than a 45 degree angle to the face of such wall or structure.

**REAL ESTATE SUBDIVISION SIGN:** A sign that is erected to inform the public that a subdivision is being constructed and that one or more real estate agents represent the sale of lots or buildings within this subdivision.

**REFLECTING SIGN:** A sign which uses glass beads or some artificial substance whose primary purpose is to reflect light and cause this sign to "glow" when illuminated.

**REPRESENTATIONAL SIGN:** A three-dimensional sign built to physically represent the object advertised.

**RESIDENTIAL SIGN:** A sign which gives a name to a residence or farm such as "LAZY ACRES".

**ROOF SIGN:** A sign which is erected, constructed and maintained above the roof of the building. This includes any painting on the roof of a structure or design in the roofing material which effectively constitutes a sign.

**SIGN:** Any fabricated sign or outdoor display structure, including its structure, consisting of any letter, figure, character, mark, point, plane, marquee, design, poster, pictorial, picture, stroke, stripe, line, trademark, reading matter or illuminating device, which is constructed attached, erected, fastened or manufactured in any manner so that the same shall be used for the attraction of the public to any place, subject, person, firm, corporation, public performance, article, machine or merchandise, and displayed in any manner out of doors, or indoors as a window sign, for advertising purposes.

**SIGN DIRECTORY:** A listing of two or more business enterprises, consisting of a matrix and sign components.

**SIGN STRUCTURE:** The supports, uprights, bracing and framework for the sign.

**SIGN SURFACE AREA:** The entire area within a single, continuous perimeter enclosing all elements which form an integral part of the sign. The structure supporting a sign and pole covers or architectural embellishments shall be excluded unless the structure is designed in a way to form an integral background for the display. For purposes of calculating sign surface area, only one face of a double-faced, free-standing sign shall be included as surface or area of such sign. In the case of a sign consisting of 2 or more sides where the angle formed between any 2 or more sides or the projections exceed 30 degrees, each side shall be considered a separate sign area.

**SUBDIVISION SIGN:** A sign which states the name of the subdivision only and does not advertise lots and/or homes for sale nor agents to contact for such sales. Examples of such signs are: "CRESTWOOD", "FIELDSTONE", "RICHLAND ESTATES", and "SUNSET HEIGHTS".

**TEMPORARY SIGN:** A sign constructed of cloth, fabric, or other lightweight temporary material with or without a structural frame intended for a limited period of display.

**TOWN:** The Town of Hollis and/or its governing body.

**WALL SIGN:** A sign that is painted on, incorporated into or affixed parallel to the wall of a building and which extends not more than 6 inches from the surface of the building.

**WINDOW SIGN:** A sign visible from a sidewalk, street or other public place, painted onto or affixed to glass or other window material, or located inside within 2 feet of the window, but not including graphics in connection with customary window display of products.

- C. **ADMINISTRATION:** This section contains the requirement and application procedures that govern all matters concerning any sign which is to be erected, displayed, altered, reconstructed or maintained, including its supporting structure and any associated auxiliary devices in respect to structural and fire safety.

1. **ADMINISTRATION:** The Board of Selectmen shall appoint an Administrative Board or the Building Inspector/Code Enforcement Officer to interpret and administer this Sign Ordinance. The Building Inspector/Code Enforcement Officer has great discretion in many areas, as spelled out in the Ordinance.
2. **RELIEF:** Any relief, exception or variance sought from this Sign Ordinance, having been denied by the Building Inspector/Code Enforcement Officer may be brought before the Hollis Zoning Board of Adjustment.
3. **ENFORCEMENT:** The Building Inspector/Code Enforcement Officer shall be the enforcement authority of all provisions of this Ordinance. The Building Inspector/Code Enforcement Officer shall notify the violator(s) of the violation(s), along with any corrective action required.

#### **D. GENERAL REQUIREMENTS**

1. Unless otherwise specifically provided for in other sections of this Ordinance, no person shall erect, display, relocate, repair or reconstruct any sign, sign structure or outdoor display structure, in any district without first obtaining a permit from the Building Department
2. All signs and their structures that are to be erected, altered, relocated, repaired or reconstructed in any district must be approved by the Building Inspector/Code Enforcement Officer.
3. In the Historic District, all signs and their structures that are to be erected, altered, relocated, maintained, repaired or reconstructed are subject to the provisions of the Historic District Ordinance and must be approved by the Historic District Commission.
4. A permit and/or approval from the Building Inspector/Code Enforcement Officer is not required for maintenance of an existing sign as long as the maintenance does not include the cutting away of the sign structure or any alteration changing the original sign's appearance including, but not limited to, color, wording, and other sign attributes.

#### **E. APPLICATION FOR PERMIT**

1. All applications for sign permits shall be filed, by the property owner, building owner or owner in fee. Applications shall be filed with the Building Inspector, on forms provided by the Building Department. All applications shall bear the signature of the building or property owner or shall include a signed affidavit, by the owner, granting authorization for the applicant to apply for and install the proposed sign. All approved applications shall bear the signature of the Building Inspector/Code Enforcement Officer, Historic District Commission or Zoning Board of Adjustment, whichever applies.
2. All applicants for sign permits shall indicate all proposed materials to be used, including the support system configuration and design. The location of the proposed sign shall be included, showing all dimensions and measurements to property lot lines, principal building and other permanent structures.
3. All applicants for sign permits shall submit construction documents that include a scale drawing of the proposed sign showing size, color and lettering styles.
4. All applicants for sign permits shall include any and all information deemed necessary by the Building Inspector, to insure that the proposed sign complies with all applicable codes and Zoning Ordinance regulations.
5. All applicants for sign permits shall be required to submit a fee for filing and no permit shall be deemed complete until all applicable fees are paid to the Town of Hollis, NH. A schedule of fees for sign permits will be established and/or amended from time to time by the Board of Selectmen. Such fee changes shall not be deemed to be an amendment to this Ordinance.

#### **F. PERMITS**

1. The Building Inspector shall review and act upon all applications for sign permits and amendments thereto, within 7 days after filing. If the application or the construction documents conform to the Sign Ordinance or Building Code and are complete. The Building Inspector/Code Enforcement Officer shall issue a permit within 30 days. If the application or the construction documents do not conform or are not complete, the Building Inspector/Code Enforcement Officer shall notify the applicant in writing, stating the deficiencies and advising the applicant of his right to amend and resubmit the application or appeal directly to the Zoning Board of Adjustment.
2. Any permit issued shall become invalid if the sign is not erected within 6 months after the date of issuance.
3. Any person, applicant or agency representing a property owner who has been denied a permit can appeal such

decision to the Zoning Board of Adjustment, within 20 days after receipt of the notice of denial for a permit.

4. Violations of this Ordinance shall be subject to fines and penalties specified in the NH Revised Statutes Annotated.

**G. GENERAL PROVISIONS:** Unless specifically addressed under a particular section, all signs must comply with the general provisions listed under this section. This section also provides guidance and standards for construction of signs requiring permits and shall also serve as guidance for the construction of exempt signs.

1. **SIZE:** Reference by this Ordinance to size of a sign shall mean the sign surface area of a sign as defined herein.
2. All signs and sign structures shall be painted/fabricated in a professional manner in keeping with generally accepted construction standards of quality and design.
3. All signs, sign structures, and their appurtenant illumination devices shall be constructed in accordance with the Town adopted codes and regulations.

**H. PROHIBITED SIGNS:** This section intends to list specifically some prohibited signs. This list is not meant to be inclusive. Rather, it should be representative of the kinds of signs, which are prohibited in the community. The following are examples of prohibited signs:

1. Animated or moving signs, or signs which are made to appear to move;
2. Any internally lit signs, reflecting signs or "neon" signs which emit light or utilize any flashing light;
3. Any off premises sign (unless where expressly permitted);
4. Any off-premises directional signs bearing advertising or which are not a part of an approved Sign Master Plan;
5. Mobile or portable signs except as may be permitted in Section XIV.P.2 of this ordinance;
6. Roof signs;
7. Free standing signs exceeding 16 feet in height as measured from the average ground or road elevation, whichever is greater, to the top of the sign or its supporting structure;
8. Signs which impair or cause confusion of vehicular or pedestrian traffic in their design, color, placement or display characteristics. No sign shall impair visibility for the motorist at a street corner or intersection by placement and location within 25 feet of the intersection of the street or highway lines;
9. Banners, pennants, ribbons, streamers, spinners or similar moving fluttering or revolving devices except OPEN FLAGS as described in EXEMPTIONS section;
10. An advertising message extended over more than one sign placed along a street or highway unless as an integral part of a Sign Master Plan;
11. Signs attached to fences, trees, utility poles, rocks or other parts of a natural landscape, or in a position that will obstruct or impair traffic or in any manner create a hazard or disturbance to the health, safety and welfare of the general public;
12. Two permitted or exempt signs combined to create a larger sign;
13. Representational signs;
14. Outdoor displays or display structures, except that display stands on a farm premises shall be permitted, subject to other provisions of the Zoning Ordinance;
15. Temporary signs except as may be permitted as an EVENT-SPECIFIC sign;
16. Umbrella signs except as may be permitted by the discretion of the Building Inspector/Code Enforcement Officer;
17. Any other sign not expressly permitted by this Sign Ordinance.

**I. EVENT-SPECIFIC SIGNS:** This section provides for any sign, which is not intended for permanent display with the exception of some real estate signs as described in the REAL ESTATE SIGNS section and seasonal agricultural signs. This section is intended to allow for event-oriented signs including but not limited to signs which display information about political candidates, festivals, dances, business openings, sales, meetings, fund-raisers, parades and events which have a definite short term conclusion. It is the intent of this section that a single physical sign, with the exception of copy-change signs, or different signs displayed consecutively shall be considered as one sign and the

days that these signs are displayed shall be cumulative. Such signs shall not be displayed for more than 35 days in any 12 month period (this is not intended to mean a calendar year).

Any sign which is displayed for more than 35 days in any consecutive 12 month period is considered a permanent sign and shall not be considered under this section of the Ordinance. It will be the discretion of the Building Inspector/Code Enforcement Officer to require a permanent sign such as a copy-change sign, window sign, etc. as an alternative to a proposed event-specific sign.

1. Event-specific signs must have permission of the property owner.
2. An application for event-specific signs must be submitted to and approved by the Building Department. A sticker will be issued upon approval, and must be displayed on the sign.
3. Event-specific signs may be displayed no more than 30 days in advance of an event (including the date of the event) and must be removed no more than 5 days after the event.
4. Event-specific signs may not be attached to utility poles nor positioned where they will obstruct or impair traffic or in any manner create a hazard or disturbance to the health, safety and welfare of the public.
5. Event-specific signs shall not exceed 32 square feet of sign surface area.
6. No one parcel shall be allowed more than three event-specific signs at one time.
7. The Building Inspector/Code Enforcement Officer has the discretion to vary the terms and conditions identified in this EVENT-SPECIFIC SIGNS section.

**J. ILLUMINATION STANDARDS:** This section is intended to allow for the illumination of signs for public visibility during non-daylight hours. Any device and/or electrical component shall illuminate the sign only and shall not cast light, glare or reflected light on adjacent buildings or roadways or create a nuisance to abutters. Nor shall such illumination cause distraction to drivers of passing vehicles. Illumination shall be of low intensity and shall be directed so that the sign is adequately lit with a subdued light falling only on the subject sign. The minimum amount of lighting required to allow this sign to be visible shall be used and be appropriate to the character of the sign and surroundings.

1. A sign shall be illuminated only by a steady or continuous white light.
2. A sign must not flash either from interior or exterior light sources.
3. A sign shall not contain any "neon" lighting.
4. Holiday displays are the only instance when illuminated bulbs or strings of lights are allowed, except for those lights directed at and intended to illuminate a sign. Holiday displays may only remain lighted during the specific Holiday period.
5. Signs shall be illuminated so that no hazard is created to pedestrian or vehicular traffic due to intensity or direction of illumination.

**K. CONSTRUCTION AND SAFETY STANDARDS:** This section provides for signs and sign structures that will be structurally sound and built to withstand New England weather. This section also intends to provide for the safety of the general public with respect to any erected sign.

1. All signs and sign structures are to be constructed of good quality material and should be structurally safe in design and installation.
2. Signs shall not be permitted to be poorly located, improperly maintained, abandoned, or allowed to deteriorate, so as to pose a threat to public safety or to degrade the aesthetic appearance of the Town.
3. Signs shall not impede the visibility of traffic or create other dangerous conditions with respect to vehicular drivers and/or pedestrians.
4. Permanent signs should be built to last ten years or more.
5. All signs should be kept in proper repair and should not be allowed to deteriorate structurally or fade beyond recognition.
6. All signs, sign finishes, supports and electric work shall be kept clean, neatly painted and free from all hazards, such as, but not limited to, faulty wiring and loose supports, braces, guys and anchors.
7. All signs should be constructed to withstand 80 mile per hour winds and shall be maintained to continue to meet

this safety standard.

8. All signs, with the exception of OPEN FLAGS, shall be securely anchored.
9. The Historic District Commission, when acting on a sign permit application for property within the Historic District, may determine specific requirements as outlined in its policies.

**L. EXEMPTIONS:** The following types of signs may be erected and maintained without permits or fees, provided that such signs otherwise comply with the general requirements of this Sign Ordinance, and adhere to general construction and safety standards and other conditions specifically imposed by all other regulations. Signs otherwise exempt, may nonetheless require review by the Historic District Commission, as noted below. Any sign required by state or federal regulations may supersede the requirements of this Ordinance.

1. Signs erected or posted and/or maintained for public safety and welfare or pursuant to governmental function, law, regulation or ordinance.
2. Directional signs solely indicating entrance and exit placed at driveway locations. These should contain no advertising and shall not exceed 3 square feet of sign surface area nor extend higher than 4 feet above the average ground level. Subject to Historic District Commission approval within the Historic District.
3. Signs relating to trespassing, and/or hunting, hiking, walking. These signs shall not exceed 2 square feet of sign surface area unless part of a Conservation Area Sign Master Plan. Subject to Historic District Commission approval within the Historic District.
4. Historic plaques which depict a historic site, stone, monument, marker or other item/place of historic significance. These such markers shall not exceed 2 square feet in sign surface area. This paragraph shall not be deemed to regulate any plaque which is mounted on and is a part of the historic monument, but merely the plaque which advertises such an item or place. For example, a list of names mounted on a monumental stone or other edifice shall not be regulated under this Ordinance, subject to Historic District Commission approval within the Historic District.
5. Open Flags: These are flags of approximately 3 feet by 5 feet in size, usually red, white and blue in color and solely contain the word "OPEN". Properties are limited to one Open Flag unless the property is located on a corner and has 2 sides on a public way in which case that property may use 2 Open Flags.
6. Flags and insignia of any government except when displayed in connection with commercial promotion.
7. Number and name plates identifying residents, mounted on a house, an apartment, or a mailbox, not exceeding 2 square feet in sign surface area.
8. Lawn signs identifying residents with no more than 2 faces and not exceeding 2 square feet of sign surface area per face. Such signs are to be non-illuminated except by a light which is an integral part of a lamp post if used as a support with no advertising message thereon.
9. Yard Sale/Private owner merchandise sale signs for garage sales and auctions, not exceeding 2 square feet of sign surface area for a period not exceeding 7 days.
10. Temporary non-illuminated "FOR SALE", "FOR RENT", real estate signs and signs of similar nature, concerning the premises upon which the sign is located. All such signs shall not exceed 5 square feet of sign surface area and must be removed within 3 days after the sale, lease or rental of the premises. Refer to REAL ESTATE SIGNS section.
11. Non-illuminated window signs and posters not exceeding 25% of the window surface on which the sign(s) is displayed.
12. Holiday decorations and lighting may be displayed without a permit.
13. Integral graphics or attached price signs on fuel pumps at automobile service stations.
14. Decals used to reference authorized services (e.g. credit or bank cards) when not exceeding 144 square inches in total display area per business.
15. Political signs, which are regulated under RSA 664:17 as amended.

**M. RESIDENTIAL AND SUBDIVISION SIGNS:** This section addresses those signs, which pertain to residences and subdivisions.

1. Residential signs (signs which names a residence such as 'LAZY ACRES') and permitted Home Occupation signs can contain no more than 4 (four) square feet of sign surface area.
  2. Subdivision signs (which state the name of the subdivision) shall contain the name of the subdivision only and shall not exceed 16 square feet of sign surface area. Subdivision signs shall not advertise lots and/or homes for sale nor agents to contact for such sales. Examples of such signs are: "CRESTWOOD", "FIELDSTONE", "RICHLAND ESTATES", "SUNSET HEIGHTS"
- N. *AGRICULTURAL SIGNS:*** This section addresses signs erected by agricultural enterprises and is intended to give more latitude to agricultural enterprises in keeping with the goals of the Hollis Town Master Plan to preserve the rural/agricultural character and assets of Hollis.
1. Permanent agricultural signs: When affixed to a building, a sign shall not exceed 20 square feet of sign surface area. A free standing sign shall not exceed 20 square feet of surface area with no one horizontal or vertical dimension greater than 6 feet. Posts supporting a free-standing sign shall have a total width of no more than 1 foot (unless specified otherwise by building code requirements).
  2. Seasonal agricultural signs.
    - a. General. All seasonal agricultural signs:
      - i. Shall be removed within one week of the end of the pertinent harvest season;
      - ii. Shall conform to the pertinent substantive requirements of the Hollis Sign Ordinance; and;
      - iii. Shall not require approval by the Historic District Commission.
    - b. On-premises seasonal agricultural signs. All such signs:
      - i. Shall not exceed 20 square feet of sign surface area with no one horizontal or vertical dimension being greater than 6 feet.
      - ii. May be placed at any location on the enterprise's premises;
      - iii. Shall be limited in number to one sign, with the exception of pick-your-own opportunities, where 1 (one) additional sign may be displayed per crop picked where it has been grown (such as "Apples", "Peaches" & "Strawberries", etc.) provided that it displays directional information;
      - iv. Shall not require approval by the Building Inspector/Code Enforcement Officer; and
      - v. Shall not require approval by the Building Department.
    - c. Off-premises seasonal agricultural signs. All such signs:
      - i. Shall not exceed 4 (four) square feet of sign surface area;
      - ii. Shall contain directional information;
      - iii. Shall require initial permits from the Building Inspector/Code Enforcement Officer and the Building Department, which permits shall automatically renew for subsequent seasons; and
      - iv. May be relocated by permit only.
      - v. A maximum of 3 (three) off-premises seasonal signs are permitted per each Agricultural Enterprise.
  3. An Agricultural Enterprise may adopt a Sign Master Plan to increase the maximum amount of sign surface area available for marketing purposes at the enterprise's primary location. Refer to the SIGN MASTER PLAN section.
- O. *REAL ESTATE SIGNS:*** This section provides for those signs normally used by real estate agents in the advertising of lots or homes for sale. Such signs are considered "Sales Signs" and are not those signs which are erected to inform the public that a subdivision is being constructed and that one or more real estate agents represent the sale of lots or buildings within the subdivision. This latter type of sign is considered a "Real Estate Subdivision Sign", is an advertisement and should not be construed to be a SUBDIVISION SIGN as described in the RESIDENTIAL AND SUBDIVISION SIGNS section.

This section allows a new subdivision to erect a larger sign than is normally permitted at its entrance, for the purpose of marketing of lots and buildings. It is not intended to allow for the marketing of older or pre-sold homes or lots. Real Estate Subdivision Signs shall not be erected to advertise one or more lots or buildings on a particular street after the newly built subdivision has been marketed. This type of marketing calls for “Sales Signs.”

1. Sales Signs do not require a permit or approval by the Historic District Commission.
2. Sales Signs may not exceed 5 square feet of sign surface area.
3. Sales Signs shall not exceed one per lot except that corner or double frontage lots may have one on each front.
4. Sales signs shall not be used as off-premises advertising.
5. Sales Signs must be removed within 3 days after a sales transaction is complete.
6. Off-premises directional signs are allowed for the purpose of directing the public to an “OPEN HOUSE” and do not require a permit. Such signs may not exceed 4 square feet of sign surface area. Messages shall be limited to name or identification, arrow or direction, and distance. Off-premises directional signs may be erected no earlier than three (3) days prior to the “OPEN HOUSE” has begun and must be removed no later than one (1) day after the “OPEN HOUSE” has ended.
7. Real Estate Subdivision Signs require a permit.
8. Real Estate Subdivision Signs located within the Historic District shall not exceed 20 square feet of sign surface area and will be single-faced.
9. Real Estate Subdivision Signs located within an Industrial Zone shall not exceed 32 square feet of sign surface area and may be double-faced.
10. Real Estate Signs located in areas not mentioned above shall not exceed 32 square feet of sign surface area and will be single-faced.
11. Real Estate Subdivision Signs shall be removed when the active marketing of unsold lots or homes has ceased.

**P. HISTORIC DISTRICT SIGNS:** The intent of this section is to ensure the appropriateness of the placement, design, size, color and execution of signs within the Historic District so that they are visually compatible with structures and environment in the area.

1. Any proposed sign, sign structure or existing sign to be changed in either size, color, or lettering, and other similar attributes is subject to approval by the Historic District Commission. The following are required for application to the Historic District Commission:
  - a. A detailed, to scale drawing showing the type of lettering, all dimensions and colors;
  - b. A description of materials to be used and methods of illumination, if any; and
  - c. A plan showing the sign’s location on the building or property.
2. Signs should not contain more than 3 colors, except in instances of an illustration. Dark backgrounds with light colored lettering are encouraged. Signs with white background and traditionally colored lettering are allowed. Fluorescent or glowing colors are prohibited.
3. Signs shall not obscure important architectural details or features such as windows, transom panels, sills, moldings or cornices.
4. Signs on adjacent storefronts, within the same building, shall be coordinated in design, height, and proportion.
5. A storefront should not have more than 2 signs, one primary and one secondary.
6. Colors should harmonize with the facade color of the building.
7. The size of the signs should be restricted to ensure that signs do not overpower the facades to which they are affixed. Not more than 1.5 square feet of total signage area will be permitted per lineal foot of the storefront, not to exceed 32 square feet. The width of the primary sign shall be 2/3 of the width of the building street frontage or less.
8. Awnings can serve as signs with contrasting letters painted or sewn onto the valance. Usually, 6 to 8 inch letters are sufficient.

**Q. BUSINESS AND INDUSTRIAL SIGNS:** This section provides for those signs used by business entities in the Agricultural & Business Zone, Commercial Zone, and the Industrial Zone. This section is meant to address anything which advertises, names, calls attention to or informs the general public of any product sold or service performed on the premises.

**1. GENERAL REQUIREMENTS**

- a. A single business, single building, may have one sign per entrance not to exceed 32 square feet of sign surface area.
- b. A single business, single building, which is located on a corner lot may have 2 signs facing each public view. The total maximum sign surface area is not to exceed 32 square feet.
- c. A group of 2 or more businesses and/or industrial buildings may have one sign per entrance from a public road. Each sign is limited to a maximum of 32 square feet of sign surface area and must be free standing. Individual occupants within a building or collection of buildings may have, in addition, 1 sign with up to 6 square feet of sign surface area per occupant on the exterior of the building. In addition to the above, each individual occupant may have 1 sign with up to 2 square feet of sign surface area at its rear entrance.
- d. A group of 2 or more industrial buildings located in an Industrial Zone may have one sign per entrance from a public road. Each sign is limited to a maximum of 50 square feet of sign surface area and must be free-standing. Individual occupants within a building or collection of buildings may have, in addition, one sign with up to 6 square feet of sign surface area per occupant on the exterior of the building. In addition to the above, each individual occupant may have one sign with up to 2 square feet of sign surface area at its rear entrance.
- e. The total cumulative area of all signs permitted on any lot shall not exceed 2 square feet of sign surface area per lineal foot of building street frontage and in no case shall exceed 80 square feet, whichever is less, except as allowed in Sign Master Plans.

**2. MOBILE AND PORTABLE SIGNS**

- a. One self-supporting freestanding ("A-frame style") sign, which meets the construction standards of the ordinance, will be permitted at individual places of business. The maximum sign size is 25" x 36", with the top to be no more than 46" from the ground. Signs must be taken in at the close of business each day. These signs are used to promote a business and shall be placed on the parcel (lot) where the business resides out of the town/state right-of-way.
- b. An application for these signs must be submitted to and approved annually by the Building Inspector/Code Enforcement Officer using the same procedure as for event-specific signs. A sticker will be issued upon approval, which must be displayed on the sign.

**3. PROJECTING SIGNS**

- a. May not exceed 6 square feet of sign surface area.
- b. May have a structure that is attached to the building wall or structure and extends horizontally more than 6 inches from the plane of such wall or structure and can be no closer than 2 feet from the public right of way.
- c. Must be placed at a perpendicular angle or at an angle no less than 45 degrees from the wall or structure.
- d. Shall conform to Town-adopted ground clearance codes.
- e. Which overhang a public way, private street/road or sidewalk or path where pedestrians travel shall be covered by a public liability insurance policy which indemnifies the Town of Hollis. A certificate of insurance shall be forwarded to the Town which shall also be notified by insurance company should the coverage be discontinued for any reason.
- f. Must not interfere with fire and rescue operations.

**4. AWNINGS**

- a. Graphics may be painted, affixed or flat on the surface of the front or sides.
- b. Graphics shall indicate only the name and/or address of the enterprise or premises.

c. Shall conform to Town-adopted ground clearance codes.

**5. COPY-CHANGE SIGNS**

a. Are allowed to display daily specials

b. Must be part of the permanent signage and adhere to general construction standards and be professionally manufactured. Lettering is limited to 4 inches in height and should be made from rigid polycarbonate materials.

6. **CONTRACTOR'S SIGNS** shall not exceed 4 square feet of sign surface area and may be displayed while the contractor is actually working on the property and shall not be displayed more than one week prior to such work commencing and no later than one week after the work is complete.

**R. VENDING MACHINES:** It is the intent of this section to control where and when exterior vending machines are allowed. This section means to provide a special process for dealing with vending machines on an individual basis.

1. Exterior vending machines are permitted by special exception in any zoning district where they are compatible with the surroundings.

2. Any applicant who applies for a special exception to install a vending machine shall also specifically address in the application the method of lighting desired, if any. Approval of a vending machine does not automatically grant approval of lighting.

3. The Zoning Board of Adjustment shall hear and act on a vending machine request in the same manner as it acts on other special exception applications except that, in cases where a special exception is requested for a vending machine for a location within the Historic District, the Zoning Board of Adjustment may consider, but not necessarily be bound by, recommendations of the Historic District Commission.

**S. SIGN MASTER PLANS:** This section details additional signage allowed for those clusters of businesses and/or buildings, agricultural enterprises, and land conservation areas where adherence to the standard provisions of this Ordinance could result in a clutter of signs and detract from the aesthetic appearance of the environment. The intent of this section is to promote a uniform and aesthetic message presentation that is designed to provide information to the general public through its design and coordination of elements.

1. Unless specifically provided for in this section or at the discretion of the Building Inspector/Code Enforcement Officer, the general provisions of the other sections of this Sign Ordinance shall govern.

2. Sign Master Plans are encouraged in the following situations:

a. Where groups of 3 or more contiguous commercial and/or industrial units/lots are to be located together in a development.

b. Where one or two businesses total not less than 20,000 square feet of gross leasable area.

c. Where 3 or more individual businesses on contiguous lots so elect.

d. For all agricultural enterprises.

e. For land conservation areas.

3. The development (described in b. above) may adopt a Sign Master Plan to govern advertising and shall present such plan to the Building Inspector/Code Enforcement Officer for approval.

4. A Sign Master Plan approved by the Building Inspector/Code Enforcement Officer shall detail the placement, design, color coordination, visibility, informational messages and compatibility with the general design of the cluster of businesses or development.

**5. GENERAL REQUIREMENTS**

a. Total signage area for the entire development or cluster shall be calculated at the rate of 2 square feet of sign surface area per foot of lineal building front if applicable.

b. Each Sign Master Plan may provide for one common, free standing, sign denoting the name of the facility, not exceeding 80 square feet in sign surface area and with a bottom panel not less than 6 feet above the average ground or road elevation, whichever is greater, and a maximum height of 16 feet as measured from the same point.

- c. All secondary signs in the Sign Master Plan shall be attached to buildings, or walls and shall be coordinated in material, shape, lettering, color and/or decorative elements.
- d. Informational and directional signs, with the exception of uniform traffic control devices, shall be consistent with the general sign design of the development or cluster and are exempt from the total sign area calculation provided they do not contain advertising.

**T. GRANDFATHERED SIGNS:** It is the intention of this Ordinance to encourage GRANDFATHERED signs to come into conformity with the provisions of this Ordinance. The Building Inspector/Code Enforcement Officer shall use its discretionary powers to grant incentives to any person who presents a plan to reconstruct their GRANDFATHERED sign to meet or better approximate the provisions of this Ordinance. Ultimately, any GRANDFATHERED sign which is to be structurally altered, relocated or replaced so as to be more compliant with other provisions of this Ordinance shall be allowed at the discretion of the Building Inspector/Code Enforcement Officer.

1. GRANDFATHERED signs are allowed to remain even though these signs may not meet the terms of this Ordinance. These signs may be maintained and continue to exist as long as they present the same message and image to the public eye.
2. A GRANDFATHERED sign shall not be enlarged or replaced by another more non-conforming sign.

**SECTION XV: HOLLIS RURAL CHARACTER PRESERVATION ORDINANCE** (Adopted March 2004)

- A. **AUTHORITY:** This ordinance is promulgated by the Town of Hollis Town Meeting as an amendment to the existing zoning ordinance, pursuant to the authority provided to said Town by RSA 674:15.
- B. **APPLICABILITY:** This ordinance applies to the entire area of the Town of Hollis and to every zoning district therein as an overlay district. The provisions of this ordinance do not alter the list of permissible uses or the dimensional requirements of any district in any way, but address the manner in which development occurs and its placement on the landscape. All subdivision plans and site plans for commercial or industrial uses are required to comply with the provisions of this section. The Planning Board is empowered to modify or waive the requirements of this section as described in Section E below. The Planning Board is also empowered to adopt regulations to implement the intent of purposes of this ordinance.
- C. **OBJECTIVE:** To preserve and maintain Hollis' scenic vistas and rural character, particularly as seen from Public Roads, and maintain woodlands and open spaces through the use of visually unobtrusive and environmentally sound development, while permitting the landowner to exercise his/her property rights in a manner that does not affect the density of development.

**Means:** This ordinance shall provide a mechanism for the Planning Board to reasonably regulate the design, placement and buffering or screening of buildings, other structures, roads and driveways in the process of subdivision and site plan application review, in such a way as to best preserve the rural and scenic qualities of Hollis' landscape, in order to:

- 1. Eliminate the siting of new construction on or near the crest of prominent hilltops and ridges, particularly as seen from Public Roads.
- 2. Fit development into the landscape to minimize significant landscape alterations.
- 3. Buffer or screen development with vegetation where a natural wooded buffer or screen is sparse or non-existent.

**D. DEFINITIONS**

- 1. **ANLA STANDARDS:** Refers to the American Nursery and Landscape Association's publication, "American Standards for Nursery Stock", as amended.
- 2. **BUFFERING:** The use of vegetation or other visual barriers to soften or reduce the visual impact of buildings, manmade features and/or clearings associated with development.
- 3. **SCREENING:** The use of vegetation or other visual barriers to block the view of buildings and manmade features associated with development.
- 4. **CLEAR-CUTTING:** For purposes of this ordinance, clear-cutting is defined as the cutting of at least 50% of the total forest cover on a lot.
- 5. **FOREST COVER:** The total canopy expanse of a contiguous group of trees.
- 6. **NATIVE SPECIES/NATIVE VEGETATION:** Those species whose presence in the area extends to pre-Colonial times.
- 7. **RETAINING STRUCTURES:** A wall or other structure designed by a qualified professional engineer and placed at the toe (bottom) of a slope.
- 8. **RIDGELINE:** The long, relatively narrow crest or horizontal line of hills, usually at the highest elevation.

**E. WAIVERS**

The Planning Board is expressly empowered to modify or waive any requirement of this Rural Character Preservation Ordinance when requested in writing, if the applicant demonstrates and the Planning Board finds, after a hearing, that:

- 1. The requirements of this ordinance will prevent the applicant from being able to develop the subject property to a density otherwise acceptable to the Hollis Planning Board and permitted in the Hollis Zoning Ordinance; and,
- 2. The requested waiver is the minimum deviation necessary to permit the applicant the maximum permissible density acceptable to the Hollis Planning Board, and that the remainder of the submission, to the extent possible, conforms to the purposes and intent of this ordinance.

## **F. DESIGN STANDARDS**

It is the intent of this ordinance to complement the Hollis zoning ordinance and subdivision and site plan regulations. This ordinance protects the scenic landscape of Hollis through standards governing the placement and buffering or screening of structures and other man-made features on the landscape.

### **1. Standards for vegetative buffering and screening of building sites and cleared areas**

Screening should be placed in the open space areas of developments as much as possible. Open space in subdivisions should be configured so as to maximize the buffering and/or screening of building sites and disturbed areas. The Planning Board may determine whether buffering and/or screening is appropriate in each situation. The following design standards should be used where appropriate.

- a. Minimize the removal of existing vegetation that serves to buffer or screen proposed buildings and other manmade features. Trees may only be removed for the construction of streets, driveways, structures, well and septic systems and lawn or meadow areas or as part of a timberstand improvement program.
- b. Do not use stone riprap as a substitute for plantings in areas disturbed by earthmoving operations. Such areas are to be re-vegetated by appropriate means for screening, buffering and/or erosion control, and using appropriate plants. (See also 4, Road and Driveway Design and Placement Standards, paragraph f.)
- c. Use plantings to screen or buffer buildings in open or visibly prominent areas. If existing vegetation provides insufficient buffering or screening, use plantings that are compatible with existing vegetation, and/or are composed of native species. Plant trees in random clusters, not in rows, to simulate the appearance of natural tree stands.
- d. Do not use plants considered to be exotic invasive by the New Hampshire Department of Agriculture, and/or included on the State of New Hampshire's list of Prohibited Plants, or Prohibited Plants with restrictions.
- e. Follow the most current ANLA minimum size standards for plants used as vegetative buffering or screening as follows:
  - Deciduous shade trees: not less than 2 inch caliper and 8 feet tall
  - Deciduous ornamental trees: not less than 1.5 inch caliper and 6 feet tall
  - Deciduous shrubs: not less than 3 to 4 feet tall
  - Coniferous evergreen trees: not less than 5 feet tall
  - Coniferous and broadleaved evergreen shrubs: not less than 24 to 30 inches tall, or wide, if of a spreading nature.
- f. Plant vegetative buffering or screening of such a size and density to provide a reasonable expectation of buffering or screening development within five years.
- g. Include a canopy layer and an understory layer in vegetative buffering or screening, unless the specific situation warrants otherwise.
- h. Submit a management plan describing maintenance procedures for all plantings with the subdivision or site plan application. The management plan should address such issues as the schedule of planting, watering, fertilizing, pest control, trimming/tree maintenance and similar matters.
- i. Any property that has been clear-cut within the preceding ten (10) year period, and/or will be as a result of any proposed development, shall be required to conduct revegetation or other mitigation as deemed necessary by the Planning Board in order to comply with the intent and purposes of this ordinance.

### **2. Standards pertaining to construction on slopes, hillsides and/or ridgeline situations.**

- a. In the course of its review of a subdivision or site plan, the Planning Board may identify any characteristic, view or vista, as seen from a Public Road, that it deems of sufficient importance to warrant consideration pursuant to this ordinance. Once such characteristics, view or vista are so identified, the design of the project shall be governed by the following:
  - Building sites (structures plus the lawn area cleared of trees) and aboveground utilities, shall be located downgrade of the ridgeline whenever possible, and located so they do not interfere with the identified

characteristic or view or vista identified in the course of Planning Board review.

- In addressing this standard, the Planning Board may require the applicant to locate building sites downgrade from the identified characteristic, view or vista and may impose conditions limiting the vertical or horizontal distance of the building site(s) from the identified characteristic, view or vista so as to give effect to the purposes and objectives of this ordinance.
  - The Planning Board can modify this requirement when doing so does not detract from the purpose of this ordinance, and mitigation measures, such as plantings or topographical features, effectively screen the building site or otherwise mitigate any impact to the identified characteristic, view or vista as seen from a Public Road.
- b. Maintain the natural appearance of the crest of a hill or ridgeline with tree planting and other landscaping measures so the post-development profile of the ridgeline or crest matches, or very closely approximates, its pre-development profile.
  - c. Conduct grading or earth moving operations so the final, post-development contours appear to be consistent with the pre-development terrain, both on and adjacent to building sites.
  - d. Employ "contour grading" techniques where feasible. "Contour grading" means creating artificial slopes with curves of varying slope ratios in the horizontal plan designed to match the appearance of the surrounding natural terrain. Use the following techniques to accomplish this:
    - (i) Incorporate varied cut and fill banks and drainage terraces to alleviate monotony and allow for natural appearing landscaping.
    - (ii) Incorporate berms at the top of slopes and other locations to screen and direct drainage away from steep slopes.
    - (iii) Use retaining structures, compatible with the natural surroundings, when they will significantly reduce grading and land disturbance.
  - e. Avoid long linear slopes, except in cases where the natural slopes, except in cases where the natural slope configuration displays this form. When appropriate, cut and fill slopes shall have curved configurations that reflect the surrounding topographical context. Round the toe (bottom) and top of slopes to avoid forms at the convergence of manufactured and natural slopes.
3. Standards for development in open fields and other situations with sparse existing vegetation
- a. Locate buildings in the least visually intrusive manner possible. Locate buildings on the edge of open fields, or just within the edge of bordering woodlands, or create new tree lines, buffers or screening measures.
  - b. Locate new roads and driveways in the least visually intrusive manner possible. Follow existing contours instead of cutting across the field at the shortest distance between the building and the roadway.
  - c. When development is proposed on land in active agricultural use, it is preferable to keep some land in agricultural production through means such as limited development, agricultural restrictions, easements and other planning tools.
  - d. Cluster building lots and structures (whether or not the application in also a HOSPD subdivision) to preserve open areas and vistas into and out of the site.
  - e. Use landscaping and plantings to buffer and/or screen buildings in open or visibly prominent areas. Use landscaping and plantings that are compatible with existing vegetation. Any plant used as vegetative buffering or screening must not be considered to be an exotic invasive, by the New Hampshire Department of Agriculture and/or included on the State of New Hampshire's list of Prohibited Plants, or Prohibited Plants with Restrictions.
  - f. Plant trees in random clusters, not in rows, to simulate the appearance of natural tree stands.
  - g. Retain existing stone walls and stone foundations and incorporate them into the overall landscaping design.
  - h. Create or recreate meadows in disturbed open areas by mechanical seeding and/or landscaping. Use plants that are appropriate to the conditions of the site, with an emphasis on the use of native species. Do not use the seeds or roots of plants that are considered to be exotic/invasive by the New Hampshire Department of Agriculture, and/or included on the State of New Hampshire's list of Prohibited Plants, or Prohibited Plants

with Restrictions.

**4. Road and Driveway Placement Design Standards**

- a. Align roadways and driveways to conform to the natural contours of the land.
- b. Avoid long stretches of straight road by using gentle horizontal and vertical curves,
- c. Do not place roadways parallel to one another to avoid creating a "shelving" effect on hillsides.
- d. Use cul-de-sacs, loop streets, and common driveways to reduce the amount of impermeable surfaces, without sacrificing legitimate safety and road maintenance concerns.
- e. Reduce roadway width when such design minimizes the amount of necessary earthwork and does not compromise safety concerns.
- f. Stabilize and restore cuts and fills on slopes by using plantings and other measures approved by Town staff.

**5. Utilities**

- a. Construct and route utilities underground except in those situations where natural features prevent their underground siting or where or where safety considerations necessitate aboveground construction or routing.
- b. Construct and route aboveground utilities to minimize detrimental effects on the scenic qualities of the site and surrounding area.

**6. Erosion Control**

- a. Restrict the post development runoff rate and volume to match the pre-development rate or volume for each offsite flow area based upon a ten-year rainfall event. The first 1/2 inch of runoff from all impervious areas is to be retained on site. Treated runoff should infiltrate into the ground in an amount approximately equaling pre-development runoff conditions. Roof runoff is considered "treated" for the purposes of infiltration. If, after a recommendation by the Town Engineer, the Planning Board makes the determination that strict adherence to the above rate and volume regulations may cause more environmental harm than good, then offsite rates and/or volumes may be increased above pre-development conditions by as much as 25%. However, drainage in wetland conservation overlay (WCO) zones must adhere to the standards provided in Section XI.C.4 of the Hollis Zoning Ordinance, which requires that there be no net increase in peak flow or overall volume of stormwater runoff in the WCO zone as a result of any development. At no time shall offsite flow increases be allowed onto an objecting abutter's property.
- b. Use appropriate sediment and erosion control measures to minimize the impacts during and after construction. Any such measures using man-made materials such as woven synthetic textiles must be removed from the site after the soils are stabilized and vegetation is established.

**SECTION XVI: ADULT SEXUALLY ORIENTED BUSINESSES ORDINANCE.** (Adopted March 2006).

**A. PURPOSE:** The purpose of this ordinance is to establish reasonable and uniform regulations to prevent the concentration of adult sexually oriented businesses within the Town of Hollis, NH; to promote the health, safety and general welfare of its citizens; and, to prevent problems of blight and deterioration which accompany and are brought about by the concentration of adult sexually oriented businesses. The provisions of this ordinance have neither the purpose nor the effect of imposing limitations or restrictions on the content of any communicative materials, including sexually oriented materials. It is neither the intent nor the effect of this article to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent nor effect of this article to condone or legitimize the distribution of obscene material.

**C. DEFINITIONS:**

**1. ADULT SEXUALLY ORIENTED BUSINESS:** A business where one of its purposes is for the display and sale of sexually explicit goods and services including, but not limited to, sexually explicit books, videos, movies, computer software, or other visual or audio representations, including ones which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 671-B:1; or instruments, devices, or paraphernalia which are designed or used in connection with “sexual conduct” as set forth in RSA 571-B:1, other than birth control devices. Examples of adult sexually oriented business uses include, but are not limited to, places where a regular and substantial course of business operation involves the sale and display of sexually explicit goods and services such as: adult motels and theaters where sexually explicit films or videos are shown; places with mini-motion picture or coin operated displays; motels and theaters where sexually explicit films or videos are shown; adult cabaret; nude modeling studios; adult bookstores; escort agencies; or sexual encounter centers.

**C. GENERAL REQUIREMENTS**

2. Adult sexually business shall be permitted only within the Industrial and/or Commercial Zones. With the exception of distances between two separate adult businesses, distance shall be measured in a straight line, without regard to intervening structures, from the closest property line or boundary of any adjacent district, place or use to the closest exterior wall or temporary or permanent physical divider for the structure housing the adult sexually oriented business.
3. No adult sexually oriented business shall be permitted within seven hundred fifty (750) feet of any public sports/recreation park, church, place of worship, parish house, convent, public, parochial, or private school, drug free zone, kindergarten, licensed day care or nursery school, or State approved day care center.
4. No adult sexually oriented business shall be permitted within five hundred (500) feet of town boundaries.
5. No adult sexually oriented business shall be permitted within seven hundred fifty (750) feet of another existing adult sexually oriented business or one for which a non-residential site plan has been submitted. Distance shall be measured in a straight line, without regard to intervening structures, from the closest exterior wall or temporary or permanent physical divider for a structure housing an adult sexually oriented business to the closest exterior wall or temporary or permanent physical divider for another structure housing an adult sexually oriented business.
6. No adult sexually oriented business shall be permitted within a property, building, premise, structure, or other facility that contains an existing adult sexually oriented business or within one for which a certificate of occupancy has been applied.
7. No sexually explicit material or advertising shall be visible from outside the building.
8. No private viewing rooms or booth shall be constructed unless one side is always lighted and open to a public central area.
9. For those uses permitted in the district which sell sexually explicit goods and paraphernalia, such sexually explicit goods and paraphernalia must not be located within ready view to children and minors under the age of 18.
10. Hours of operation – 10 AM to 11 PM Monday to Saturday and 12 noon to 9 PM Sundays.
11. No one under 18 years of age allowed on the premises or an adult sexually oriented business.
12. The site shall be maintained daily in a condition that is free and clear of litter. All discarded sexual paraphernalia and/or packaging materials shall be placed in a locked dumpster.

- 13.** The use shall not create undue traffic, congestion or hazard, including vehicular and pedestrian movement.
- 14.** When reviewing site plan applications the planning board may impose reasonable restrictions for buffering, outdoor lighting, and landscaping and building aesthetics.
- 15.** Such a use will be subject to all other federal and state statutes and local permitting requirements.

**SECTION XVII: HISTORIC DISTRICT ORDINANCE.** (Adopted March 2008)

A. **PURPOSE:** By Ordinance, adopted in 1971 the Town of Hollis has established a Historic District. As set forth in RSA 674:45, the preservation of cultural resources, and particularly of Structures and places of historic, architectural and community value is hereby declared to be a public purpose. The heritage of the municipality will be safeguarded by:

1. Preserving districts in the municipality which reflect elements of its cultural, social, economic, political, community and architectural history;
2. Conserving property values in such districts;
3. Fostering civic beauty;
4. Strengthening the local economy; and
5. Promoting the use of historic districts for the education, pleasure and welfare of the citizens of the municipality.

B. **BOUNDARIES OF THE HISTORIC DISTRICT**

The Historic District is defined on the town zoning maps, which are on file in the Town Clerk's office of the Town of Hollis.

C. **DEFINITIONS**

1. **ACCESSORY BUILDING OR USE, CUSTOMARY:** Refer to Section VIII, Definitions.
2. **ALTERATION:** any repair, reconstruction, restoration, replacement, rehabilitation, demolition, addition, or new construction proposed for the exterior of a building or its site. The work may involve changes in materials, dimensions, design, configuration, texture, color, or visual appearance.
3. **ARCHITECTURAL FEATURE:** the architectural style, design, detail or general arrangement of outer surfaces of a structure and or building that, if altered or removed, would affect its appearance and character. Examples of architectural features include, but are not limited to, building materials, windows, doors, cornices, roofs, porticos, storefronts, and signs.
4. **CERTIFICATE OF APPROVAL (COA):** written authorization from the Commission to the building owner or project applicant that allows the owner/applicant to conduct any of the regulated activities specified in this ordinance.
5. **COMMERCIAL USE:** any use that requires site plan review under the zoning ordinance and regulations of the planning board
6. **DEMOLITION:** the razing, destruction, removal, or relocation, entirely or in significant part and including its facade, of a building, structure or other resource.
7. **LANDSCAPING:** The use of existing vegetation and terrain, or new permanent plantings, grade separations and/or fences intended to screen a building, structure, or place.
8. **MAINTENANCE:** see Repair.
9. **PUBLIC ROAD:** Refer to Section VIII, Definitions.
10. **RECONSTRUCTION:** the act of recreating a property that has been destroyed, through documentary research and the use of new materials
11. **REHABILITATION:** the process of returning a property to a state of utility, through repair or alteration, which makes possible an efficient contemporary use while preserving the character-defining features that are significant to its architectural, historical and cultural values.
12. **RELOCATION:** the act of removing a building, structure or other feature from its existing foundation or location to another foundation or location, including on the same site. For purposes of this ordinance, applications for relocation shall be subject to the same standards as demolition.
13. **REPAIR:** any work, which will involve no change in materials, dimensions, or design.

14. **SIGNIFICANT TREE:** Any tree that contributes to the character of the district and that exceeds 15” in diameter at a height of 4’ above grade and is located forward of the main building on the property and/or provides a canopy to the street.

15. **STRUCTURE AND OR BUILDING:** Refer to Section VIII, Definitions.

16. **TEMPORARY STRUCTURE:** Refer to Section VIII, Definitions.

**D. SCOPE OF REVIEW AND CERTIFICATE OF APPROVAL**

Uses permitted within the District shall be those permitted in the underlying zoning district. Notwithstanding any inconsistent ordinance, local law, code, rule or regulation concerning the issuing of building permits, no change in any Architectural Feature or other activities (as defined below in Section E) that is visible from a Public Road shall be commenced without a Certificate of Approval from the Historic District Commission, herein called the Commission, nor shall any building permit for such change be granted without such a Certificate of Approval having first been issued. The Certificate of Approval required by this section shall be in addition to and not in lieu of, any building permit that may be required by any ordinance, local law, code, rule or regulation of the Town of Hollis.

**E. ACTIVITIES REQUIRING REVIEW**

The following activities, if visible from a Public Road, shall require a Certificate of Approval from the Commission, whether or not such activity requires the issuance of a building permit. Screening by Landscaping shall not exempt an activity from review.

1. Erection, construction, Alteration, Relocation, or Demolition of a Building, Accessory Structure and or Building;
2. Erection, construction, Alteration, Relocation or Demolition of any Architectural Feature of a Structure and or Building;
3. Construction, erection, Reconstruction, significant Repair or removal of any stonewall, fence, granite work, walkway, sidewalk, paving (new or expansion of existing), exterior lighting, street light, or permanent sign;
4. Removal of a Significant tree(s), except where removal of such tree(s) is necessary for safety reasons as determined by a professional arborist or other qualified professional or by authorization of the Board of Selectmen in accordance with RSA 213:145;
5. Any site work involving changes to the grade, topography, or Landscaping of new multifamily dwellings or new commercial construction will be reviewed for visual appropriateness. The Planning Board may consider, but not necessarily be bound by, recommendations of the Commission for site work;
6. Any change or expansion in use will be reviewed for visual appropriateness. The Planning Board may consider, but not necessarily be bound by, recommendations of the Commission for any such changes;
7. Addition or Alteration of existing exterior siding (e.g. vinyl, aluminum, stucco, wood, glass, etc.), windows or doors of a Structure and or Building;
8. Painting in part or whole of a brick, stone, masonry, or concrete Structure and or Building; and
9. Erection of a Temporary Structure.

Roof Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**F. ACTIVITIES EXEMPT FROM REVIEW**

The following activities shall not require a Certificate of Approval from the Commission.

1. Ordinary Maintenance and Repair of any Architectural Feature, which does not involve a change in the design, dimensions, materials or appearance of the feature or involve removal thereof;
2. Painting or repainting of a wood surface and/or an already painted brick, stone, masonry, or concrete Structure and or Building on the condition that the color is selected from the Commission’s palette of colors and is registered with the Commission;
3. Alteration or replacement of any existing roof covering or surface, provided that said Alteration or replacement is with the same material, patterns and colors of the existing roof covering or surface, and provided the roof plane

remains the same;

4. Installation or replacement of storm doors and storm windows provided that the historic Architectural Features are not altered, obscured, removed or demolished;
5. Landscaping on properties in residential use, with the exception of the removal of a Significant tree as described under Section E.4 and any site work described under Section E.5;
6. Interior Alterations;
7. Activity that is not visible from a Public Road and where lack of visibility is not due to screening by Landscaping as determined by the Commission and the Code Enforcement Officer; and
8. Agricultural greenhouses, including high hoop tunnels.

**G. INTERPRETATION**

As set forth in RSA 674:48, nothing in this subdivision shall be construed to prevent ordinary Maintenance or Repair of any Structure or place within any historic district nor to prevent the construction, Alteration, Repair, moving or Demolition of any Structure under a permit issued by the building inspector or other duly delegated authority prior to the establishment of any historic district.

**H. PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE HISTORIC DISTRICT:**

- a. Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**SECTION XVIII: WORKFORCE HOUSING** (Adopted March 2009 - Amended March 2020)

- A. PURPOSE.** The purpose of this section is as follows: 1. To encourage and provide for the development of affordable workforce housing; 2. To ensure the continued availability of a diverse supply of home ownership and rental opportunities for low to moderate income households; 3. To meet the goals related to affordable housing provisions set forth in the town's Master Plan; and 4. To comply with the requirements of SB 342, an Act establishing a mechanism for expediting relief from municipal actions which deny, impede, or delay qualified proposals for workforce housing (RSA 674:58-61).
- B. AUTHORITY:** This innovative land use control section is adopted under the authority of RSA 674:21, and is intended as an "Inclusionary Zoning" provision as defined in RSA 674:21(I) (k) and 674:21(IV)(a), as well as RSA 672:1, III-e, effective July 2009.

RSA 674:21 II provides the authority for Planning Boards to grant Conditional Use Permits.

**C. APPLICABILITY:**

1. Workforce Housing Developments, constructed in accordance with the provisions of this section, are permitted as a Conditional Use Permit within the following zoning districts as defined in this zoning ordinance:
  - a. Agricultural and Business Zone (A&B)
  - b. Residential and Agricultural Zone (R&A)
  - c. Town Center (TC)
  - d. Multi-family Overlay Zone
2. Permitted Uses: Single family, duplex, and multi-family units are permitted within an application under this Section.

**D. CONDITIONAL USE PERMIT CRITERIA:**

The Planning Board may issue a Conditional Use Permit (CUP) if it finds, based on the information and testimony submitted with respect to the Workforce Housing Application, that:

- a. The application is consistent with the stated Purpose of the Workforce Housing Ordinance.
- b. If completed, the development in its proposed location will comply with all requirements of Section XVIII and other applicable workforce housing provisions contained in other sections of the zoning ordinance without the benefit of waivers.
- c. The applicant has demonstrated that the proposed use shall meet reasonable standards or conditions of approval related to environmental protection, water supply, sanitary disposal, traffic safety, and fire and life safety protection.
- d. Adequate provisions have been made to ensure that workforce housing units remain affordable consistent with Section G Assurance of Continued Affordability.

**E. DEFINITIONS:**

**Affordable:** Affordable means housing with combined rental and utility costs or combined mortgage loan debt services, property taxes, and required insurance that do not exceed 30 percent of a household's gross annual income.

**Workforce housing units/owner occupied:** Housing which is intended for sale and which is affordable to a household with an income of no more than 100 percent of the median income for a 4-person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development. Housing developments that exclude minor children from more than 20 percent of the units, or in which more than 50 percent of the dwelling units have fewer than two bedrooms, shall not constitute Workforce housing units for the purposes of this subdivision.

**Workforce housing units/renter occupied:** Rental housing which is affordable to a household with an income of no more than 60 percent of the median income for a 3-person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development. Housing developments that exclude minor children from more than 20 percent of the units, or in which more than 50 percent of the dwelling units have fewer than two bedrooms, shall not constitute Workforce housing units for the purposes of this subdivision.

**Area Median Income (AMI):** The median income of the greater region, either the HUD Metropolitan or Non-Metropolitan Fair Market Rent Area to which the community belongs, as is established and updated annually by the United States Department of Housing and Urban Development. Income considers both wage income and assets.

**Market Rate Housing:** Any units or lots within a development, whether the unit is to be owner or renter occupied, that is intended to be available for sale or occupancy at the prevailing market value for the area similar to comparable real estate transactions.

**F. *WORKFORCE HOUSING INCENTIVES:***

As noted in Section C, as well as specified in other sections of the zoning ordinance, workforce housing developments are a permitted use through a Planning Board approved Conditional Use Permit (CUP) process in the following zoning districts: Agricultural and Business; Residential and Agricultural; Town Center, as well as in the Multi-family Overlay Zone, provided that the workforce housing criteria outlined in Section XVIII and elsewhere in the zoning ordinance are met. Residential unit densities shall be permitted to increase so as to afford a reasonable and realistic opportunity for the development of workforce housing units.

**G. *WORKFORCE HOUSING GENERAL REQUIREMENTS:***

1. In order to be considered as a “completed” application eligible for “acceptance” under RSA 676:4.I, and application under this section must contain, at a minimum, the following information:
  - a. Calculation of the number of units provided under this section and how these units will be consistent with the Purpose of the Ordinance.
  - b. Description of each unit’s size, type, estimated cost and other relevant data.
  - c. Documentation of affordable household eligibility as required in Section H.
  - d. The Planning Board shall request additional information if, in their judgment, it is necessary to make a meaningful determination of affordability.
2. At the Planning Board’s discretion, the applicant shall be required to submit project cost estimates including land, development and construction costs; financing, profit, and sales costs; and other cost factors shall be provided. The planning board shall request updates of these cost reports as the project progresses.

**H. *ASSURANCE OF CONTINUED AFFORDABILITY:***

In order to qualify as workforce housing under this section, the application shall make a binding commitment that the workforce housing units will remain affordable for a period of years. This shall be enforced through a deed restriction, restrictive covenant, or some other contractual arrangement through a local, state or federal housing authority or other non-profit housing trust or agency or through the town itself as selected by the Planning Board to administer this provision. No workforce housing unit shall be occupied until written confirmation of the income eligibility of the tenant or buyer of the unit has been documented and all required legal documents outlined in the administrative rules have been completed and recorded. The planning board shall adopt a set of administrative rules detailing the parameters to enforce this binding commitment.

**I. *ADMINISTRATION, COMPLIANCE AND MONITORING:***

1. This article shall be administered by the Planning Board. Applications for the provisions provided under this section shall be made to the Planning Board and shall be part of the submission of an application for site plan or subdivision plan approval.
2. The Planning Board shall not approve any workforce housing proposal unless it complies with all applicable standards of this ordinance including but not limited to environmental protection, water supply, sanitary disposal, traffic safety, and fire and life safety protection.

**SECTION XIX: EXCAVATION OR MOVEMENT OF EARTH MATERIALS**

A copy of the REGULATIONS GOVERNING THE EXCAVATION, REMOVAL OR MOVEMENT OF EARTH IN THE TOWN OF HOLLIS, NH (EXCAVATION Regulations) may be obtained at the Planning Board Office in the Town Hall.

**A. PURPOSE AND AUTHORITY:** Pursuant to NH RSA 674:16 (Grant of Power) and 674:17 (Purposes of Zoning Ordinance), the Town of Hollis hereby establishes the locations and zoning districts in which the excavation or movement of earth materials shall be a permitted use. The intent of this Ordinance is to establish the locations in which excavations may be permitted, while also protecting sensitive natural resources, cultural and historic areas, and existing residences from the adverse impacts of excavations.

**B. EXCAVATIONS:** Districts where permitted, prohibited and allowed by special exception:

a. Excavation or movement of earth materials shall be permitted or prohibited within certain zoning districts as follows:

(i) Permitted: Within the boundaries of the Industrial Zone-(I);

(ii) Prohibited: Within the boundaries of each of the following zones:

NAME	ABBREVIATION
Town Center	TC
Agriculture and Business	A&B
Commercial	C
Recreation	R
Mobile Home-1	MH-1
Mobile Home-2	MH-2
Water Supply Conservation	WSC
Wetland Conservation Overlay	WCO

(iii) Within all other zones (Rural Lands (RL), Residential and Agricultural (R&A), Flood Plain Overlay (FPO), and Aquifer Protection Overlay (APO)), excavations of less than 5,000 cubic yards/year may be permitted by the Regulator in accordance with the Town’s Excavation Regulations (promulgated 11/28/83, and as amended) provided that:

- No more than 50% of abutting property (as determined in Section IX,A.3.a, below) is used for residential purposes at the time of application;
- Traffic generated by the excavation does not increase average weekday traffic by more than 20% on any affected roadway; and
- No permit shall be granted for a duration of more than one year, but may be renewable at Regulator’s option if conditions existing at issuance of permit have not materially changed.

(iv) Within all other districts (Rural Lands (RL), Residential & Agricultural (R&A), Flood Plain Overlay (FPO), and Aquifer Protection Overlay (APO)), excavation of more than 5,000 cubic yards/year shall be permitted only by special exception granted by the Hollis Zoning Board of Adjustment, pursuant to paragraphs 3-6 of this sub-section.

(v) Any excavation or movement of earth materials, whether permitted by right or by special exception granted by the Zoning Board of Adjustment, shall also be required to obtain a permit from the Regulator in accordance with all regulations governing such activity as have been adopted or amended or shall be adopted or amended.

- C. **SPECIAL EXCEPTIONS:** The Hollis Zoning Board of Adjustment, in acting on requests for special exceptions under this Ordinance, shall be guided in its deliberations by the following considerations:
- a. **THE PROXIMITY OF EXISTING RESIDENCES** to the site of the proposed excavation, such that no excavation shall be permitted which cannot maintain the required 75-foot buffer from all property lines. Generally, excavations shall not be permitted where 50% or more of abutting property is used for residential purposes at the time of application. This standard shall be interpreted to mean:
    - (i) an abutting property shall be deemed used for residential purposes where a residential structure is located within 200' of the excavation site property line; and
    - (ii) the percentage of residentially-used abutting property is determined by measuring the length of shared property boundary between such abutting property and the excavation site, relative to the total external dimensions of the excavation site property.
  - b. **TRAFFIC AND TRANSPORTATION** impacts such that: To the extent feasible all excavations shall take direct access from a “collector” class street or better. Additionally, all proposed excavations shall submit to the Zoning Board of Adjustment a proposed truck-routing plan and traffic impact study which estimates annual, weekly, and daily truck trips to and from the site, as well as actual traffic counts for all roads to be affected by the excavation. Any excavation proposal which will have the effect of increasing average hourly volume during weekday periods of operation by 20% or more on any affected road shall be prohibited. Excavations shall only take access from or to a designated scenic road where the Zoning Board of Adjustment determines that use will not adversely affect the roadway’s physical capacity or quality of its scenic character.
  - c. **WATER RESOURCE PROTECTION:** Such that any excavation proposed to occur in the Aquifer Protection Overlay Zone (APO) shall not be permitted to be excavated to a depth of less than 8 feet above the seasonal high water mark, unless development rights are deeded to the Town of Hollis for such areas, in which case excavation shall not be permitted within 2 feet of the seasonal high water mark. Acceptance of such development rights shall be at the discretion of the Regulator.
  - d. **DIMINUTION OF VALUE** of surrounding or abutting property shall be considered. Any excavation which will have the effect of permanently and unavoidably diminishing the value of abutting properties shall not be permitted. Temporary (up to 3 years) impacts on property values shall not be the sole basis of denial of a special exception for excavations.
  - e. **PROJECT SCALE, INTENSITY, AND DURATION:** Reasonable limitations on the amount of material to be excavated, the traffic generated, and the duration of the proposed excavation may be established by the Zoning Board of Adjustment in approving special exceptions.
  - f. **OTHER PROHIBITED PROJECTS** as described in NH RSA 155-E:4, shall not be permitted by special exception. Any excavation proposed to occur below road level within 100' of any public right of way, unless such excavation is for the purpose of such right of way, shall be prohibited.
2. **NOTHING IN THIS ORDINANCE** shall limit or abridge the jurisdiction of the Hollis Planning Board to act as “Regulator” of excavation or removal of earth materials pursuant to RSA Chapter 155-E and regulations lawfully promulgated pursuant thereto.
  3. **THIS ORDINANCE SHALL NOT** apply to such excavation or removal of earth materials as is excepted from the effect of RSA 155-E by the provisions of RSA 155-E:2, provided, however, that excavation excepted under RSA 155-E:2 shall continue to be subject to this Ordinance.
  4. **APPEALS:** Decisions of the Zoning Board of Adjustment regarding excavations may be reheard by the Zoning Board of Adjustment pursuant to RSA 676:5-7. Decisions of the Planning Board, acting as Regulator, may be reheard by the Planning Board, pursuant to RSA 155-E:9.
  5. **EARTH** or **EARTH MATERIALS** shall mean sand, gravel, rock, soil, or construction aggregate.
  6. **REGULATOR** shall mean the Hollis Planning Board acting in its capacity and powers under RSA Chapter 155-E.

**SECTION XX: HOLLIS OPEN SPACE PLANNED DEVELOPMENT** (*Adopted March 1993, Amended March 1994*).

1. **AUTHORITY:** This ordinance has been adopted by Town Meeting Vote of the Town of Hollis, New Hampshire pursuant to RSA 674:21, Innovative Land Use Controls.
2. **DEFINITION:** A Hollis Open Space Planned Development (HOSPD) is a land subdivision where the density of dwelling units is no greater than would be permitted in the district in which the HOSPD is located, but where the lot size and other dimensional standards may be reduced in exchange for the preservation of permanently protected open space, recreational land, forests, and/or farmland.
3. **PURPOSE:** The purpose of the HOSPD is to:
  - a. Promote a more efficient use of land requiring a smaller network of streets and utilities;
  - b. Promote the preservation of open space, farmland, recreation areas, green space, fields and woods, valuable wildlife habitat, and outstanding topographic, natural, and historic features;
  - c. Discourage the sprawling, land-consuming form of development usually resulting from conventional subdivisions;
  - d. Promote the efficient provision of municipal services and protect existing and potential water supplies;
  - e. Maintain the rural and scenic character of the Town of Hollis;
  - f. Promote siting of buildings which is sensitive to existing natural and historic features;
  - g. Protect the value of real property; and
  - h. Provide a variety of types of living spaces and environments.

**4. APPLICABILITY AND PROCEDURES IN A HOSPD**

- a. **APPLICABILITY:** To facilitate achievement of the goals of the Hollis Master Plan, all major subdivisions shall be presented to the Planning Board in accordance with the Hollis Open Space Planned Development (HOSPD) standards as specified in this section and in the Land Subdivision Regulations. In all cases it shall be assumed that a HOSPD plan is necessary to meet the goals and objectives of this section and of the Master Plan. In cases where the Planning Board determines that a parcel is unsuited to development as a HOSPD, it may waive the requirements of this Section IX,J and permit the parcel to be developed as a conventional subdivision subject to the Point Criteria System, below.
- b. **EXEMPTIONS:** Subdivisions creating five (5) or fewer lots are exempt from this requirement, provided there is no potential for further subdivision of any of the lots therein or the parent parcel. However, an applicant, may, at his/her option, develop subdivisions of five (5) or fewer lots according to HOSPD standards. Any major subdivision not subject to HOSPD requirements shall meet the Point Criteria System.

Subdivisions solely creating lots which will not be used for building purposes shall be exempt from HOSPD requirements.

Subdivisions where each lot is at least 5 acres shall be exempt from HOSPD requirements, provided the deed for each lot contains a restriction prohibiting the further subdivision of the lot, such deeds to be presented to the Planning Board for recording in the Hillsborough County Registry of Deeds within one month after final approval of the subdivision, and further provided that a note shall be included on the final subdivision plan containing the same restriction and specifically identifying the lots so restricted.

- c. **CONCEPTUAL LONG RANGE PLAN:** When a subdivision plan is proposed to include lots which are capable of further subdivision, or, when after subdivision a parcel(s) remains which is capable of further subdivision, the Planning Board may require that a conceptual long range plan for the entire parent parcel be presented so that the board may consider the entirety of a project and its impacts. This long range plan is non-binding, and is intended to guide the Planning Board in its assessment of the environmental, social, and economic impacts of current and possible future development. In such cases, point system review per the Land Subdivision Regulations shall be based on the long range plan.
- d. **PROCEDURES:** HOSPD plan submission, review and approval procedures shall be as described in the Hollis Land Subdivision regulations.

**5. DENSITY, DIMENSIONAL, OPEN SPACE AND HEALTH REQUIREMENTS IN A HOSPD**

**a. DENSITY**

- (i) The density of dwelling units in a HOSPD shall be no greater than one dwelling unit per 2 acres of Net Tract Area.
- (ii) The number of dwelling units permitted in a HOSPD shall be no greater than the number of units that would be possible if the parent parcel were wholly subdivided in a conventional manner (i.e.: without an open-space set-aside). In order to arrive at this number, the applicant may either submit a conceptual plan showing how the parcel could be subdivided in a conventional manner, or otherwise demonstrate the possible number of conventional lots in a manner acceptable to the Planning Board. The possible number of conceptual conventional lots will be determined with the use of Site Specific Soil Mapping. For purposes of determining the number of HOSPD lots, each conceptual conventional lot must meet the requirements of a buildable lot as defined in the Hollis Zoning Ordinance, and meet all other applicable requirements of the Zoning Ordinance and Land Subdivision Regulations.

**b. LOT SIZE**

- (i) While the overall density of dwelling units in a HOSPD shall be no greater than one dwelling unit per 2 acres, individual lots may be reduced to a minimum of one acre, provided that all lots have a contiguous area of at least one acre of acceptable land.
- (ii) Backland lots in a HOSPD may be reduced to a minimum of 2 acres, provided they have a minimum of 20 feet of frontage and a contiguous area of at least one and one-half (1 1/2) acres of acceptable land.
- (iii) All lots in a HOSPD need not necessarily be reduced in size or frontage as compared to lots in a conventional subdivision. The Planning Board encourages a diversity of lots sizes and styles so as to ensure that a diversity of housing types and lifestyles remains available in the Town.
- (iv) HOSPD lots developed on a preexisting road shall have a minimum size of two (2) acres.
- (v) No portion of a reduced acreage HOSPD lot (less than two acres per lot, or less than four acres per backland lot) shall be located within two hundred feet of an existing road. Reduced acreage lots shall be separated from existing roads by open space, as described in Section IX.J.5.d below. "Existing road" shall mean any public highway not developed as a part of a PUD or HOSPD.

**c. FRONTAGE**

- (i) For HOSPD lots developed along a pre-existing Town road: 200 feet minimum per lot.
- (ii) For HOSPD lots developed along a new subdivision road: 125 feet average per lot. The absolute minimum frontage for a HOSPD building lot on a new subdivision road shall be 100 feet.
- (iii) For Backland lots: 20 feet minimum per lot. Backland lot frontage shall not be included in calculating the average frontages cited in Section IX.J.5.c.(i-ii).

**d. OPEN SPACE REQUIREMENTS**

- (i) Open space, as defined in Section VIII of the Hollis Zoning Ordinance, shall have a shape, dimension, character and location suitable to assure its use for park, recreation, conservation or agricultural purposes. In determining whether the intent of this section has been satisfied, the Planning Board shall consider the extent to which land having one or more of the following characteristics is included in the proposed open space:
  - Preservation of land for the town greenway system as described in the Hollis Master Plan
  - Preservation and utilization of areas designated as prime agricultural soils as mapped by the NRCS (Natural Resources Conservation Service) in their latest report.
  - Preservation and utilization of active farmland or orchards
  - Preservation of large tracts of interconnected woodlands, wetlands, or other wildlife habitat, or preservation of open lands that connect to protected land in adjacent parcel(s).

- Provision of active and/or passive outdoor recreational areas
  - Protection of land along scenic roads and highways
  - Protection of existing trail networks on land on which new trails will be developed as part of the HOSPD for integration into an existing trail network.
- (ii) For a HOSPD with a density of 3 or more acres per one dwelling unit of the gross tract area: 40% of the tract must be set aside as permanently protected open space for recreation, conservation, or agricultural uses. No portion of the open space land may consist of wetlands, hydric soils, surface waters, flood plains, and areas with unaltered slopes greater than 25%. Roadways rights-of-way and driveways shall not be counted as open land.
- (iii) For a HOSPD with a density of less than 3 acres per one dwelling unit of the gross tract area: 50% of the tract must be set aside as permanently protected open space for recreation, conservation, or agricultural uses. No portion of the open space land may consist of wetlands, hydric soils, surface waters, flood plains, and areas with unaltered slopes greater than 25%. Roadway rights-of-way and driveways shall not be counted as open space land.
- (iv) The open or common land must be contiguous to each house lot in the HOSPD. The Planning Board may waive this requirement only when conditions of topography, wetlands, or other physical site constraints prevent such an arrangement; or when the land best suited for open land use, in the judgment of the Planning Board, is situated towards one end of the tract or contiguous to existing conservation lands. In such cases, the open land must be configured so as to achieve the conservation or recreation objectives of this section.
- (v) When, due to physical constraints such as soils, topography, wetlands or other natural features, application of the open space requirements cited in Section IX,J.5.a and Section IX,J.5.b prevents an applicant from realizing the same number of lots/units as would be possible by a conventional subdivision, the Planning Board may consider and approve a reduction of the open space requirement. Such a reduction shall nonetheless otherwise maximize open space.
- (vi) **OPEN SPACE OWNERSHIP AND MANAGEMENT** Open space shall be conveyed to a homeowner's association, whose membership includes all the owners of lots or units contained in the tract, or shall be permanently protected in other suitable ways which would ensure the continued use of the land for intended purposes and proper maintenance of the land. Conveyance of open space to the Town would be another option available to the developer with agreement from the Conservation Commission and the Board of Selectmen.

e. ***BUILDING SETBACKS***

The following setbacks shall apply to all principal structures, except that no principal structure may be located within the 35 feet of the perimeter boundary of a HOSPD development:

- Front Yard: 50 feet
- Side Yard: 17 ½ feet
- Rear Yard: 17 ½ feet

Accessory Structures shall be a minimum of 15 feet (fifteen feet) from side and rear lot lines.

**6. *WORKFORCE HOUSING UNITS/OWNER OCCUPIED***

Single family workforce housing units/owner occupied are permitted, provided the following criteria are adhered to:

1. **Density:** The maximum number of allowable dwelling units that could be developed under the provisions outlined in Section 5.a shall be determined following the standard practice for a Market Rate Housing development. Once the number of HOSPD lots has been determined and agreed to by the Planning Board then that lot figure may be increased by up to 20% if it is shown that construction of workforce housing would otherwise not be economically viable. These additional lots shall be designated as workforce housing units/owner occupied.
2. **Lot Size:** There is no minimum lot size for workforce housing units. The proposed site shall have adequate soils to accommodate on-site wastewater treatment and an adequate water supply adhering to both local and state requirements. A Building Area shall be required and at least 50% of the lot shall be Acceptable Land. In addition,

wells serving both workforce housing and market rate housing lots may be located in designated Open Space areas.

With the goal of meeting the Open Space requirements in Section 5.d., the size of Market Rate Housing lots, as outlined in Section 5.b. may be reduced in order to accommodate the permitted workforce housing units. If it is determined, to the satisfaction of the Planning Board, that market Rate Housing lots cannot be reduced enough or at all because of septic and/or water supply regulations in order to accommodate the total permitted housing unit density, then the Planning Board may consider one or more of the following options in order to accommodate the increased density:

- a. The building area requirement for Market Rate Housing lots may be reduced in size.
  - b. Open space areas can be used to satisfy lot area requirements. The amount of Open Space area used shall be the minimum needed in order to accommodate the permitted project density.
  - c. Septic system areas may be located in designated Open Space areas. The Planning Board shall consider the following: the environmental sensitivity of the Open Space; the proximity of wetland areas; the ability to consolidate septic systems in one area to create an “open field” environment; the quality of the Open Space soils and other factors deemed appropriate by the Planning Board.
3. Frontage: Workforce housing lots shall have a minimum of 20 feet of frontage. Workforce housing lots shall not be developed or front along an existing road. In order to meet the lot size and open space goals noted above, the frontage requirements outlined in Section 5.c.ii may be reduced for Market Rate lots if deemed necessary by the Planning Board in order to meet the Purpose of Section XVIII.
  4. Building Setbacks: Shall be as noted in Section 5.e.
  5. The dwellings qualifying as Workforce housing units shall be compatible in architectural style and appearance with the Market Rate units in the proposed development. To achieve this, workforce housing units may be interspersed throughout the overall development, or clustered together in one or more area(s).
  6. Workforce housing units shall contain no more than three bedrooms.
  7. To ensure that the application is completed as permitted, a phasing plan for the project shall provide for the development of workforce housing units concurrently with the market rate housing units. The dwellings qualifying as workforce housing shall be made available for occupancy on approximately the same schedule as a project’s market rate housing units, except that the certificates of occupancy for the last 10 percent of the market rate housing units shall be withheld until certificates of occupancy have been issued for all the workforce housing units. A schedule setting forth the phasing of the total number of units in a project under this section, along with a schedule setting forth the phasing of the required workforce housing units shall be established prior to the issuance of a building permit for any development subject to the provisions of this section.
  8. Projects proposing to include workforce housing units shall be exempt from the provisions of Section XIII, Residential Construction Timing and Phasing Ordinance for both market rate housing and workforce housing units. (Repealed March 2107)

## **SECTION XXI: HOUSING FOR OLDER PERSONS** (Amended March 2017)

**A. PURPOSE:** The regulations in this section have been established for the purpose of encouraging the construction of housing for older persons. The intent is to provide for such housing by the provision of a waiver from the otherwise applicable density requirements while complying with all applicable state and federal laws with respect to such housing, and at the same time, ensuring compliance with local planning standards, land use policies, good building design, and the requirements for the health, safety, and general welfare of all the inhabitants of the Town.

**1. GENERAL STANDARDS:** All housing for older persons shall conform to the following standards:

- a. Dwelling unit density shall not be greater than one (1) two-bedroom dwelling units /net tract acre when the type of housing that is being proposed is that which complies with NH RSA 354-A:15, Housing for Older Persons.
- b. Adequate on-site space must be provided for off-street parking, water, and sewage disposal systems, regardless of maximum allowable densities. The applicant shall demonstrate that that the site can accommodate the permitted density through a Site Specific Soil Survey as part of the application for review by the Planning Board.
- c. Building types and styles, including exterior aesthetics and unit arrangements, shall be suitable and appropriate for their intended purpose, in light of the size and scale of the project, the relevant zoning district, the prominence and the visibility of the proposed project in the community, the surrounding neighborhood, and other similar factors, in accordance with the requirements of the site plan regulations for housing for older persons.
- d. Housing developments for older persons shall be exempted from the provision, which allows only one dwelling unit to be constructed on each lot.
- e. The minimum lot area shall be 30 acres and the lot shall have at least 50 feet of frontage on those roadways listed in Section XXI.A11.
- f. No more than fifteen (15%) percent of the tract may be covered by impermeable surfaces.
- g. The design and site layout of the development shall emphasize the rural character of the Town, maximize the privacy of the dwelling units, preserve the natural character of land, provide for the separation of parking and living areas, and consider such factors as orientation, energy usage, views.
- h. The development shall be landscaped so as to enhance its compatibility with the Town with emphasis given to the use of existing, natural features where possible.
- i. The perimeter of the development shall be treated with a landscaped buffer strip to minimize its intrusion on neighboring land uses.
- j. The development shall provide for 40% open space, exclusive of wetlands, surface waters, hydric soils, flood plain, and unaltered steep slopes greater than 25%.
- k. A proposed site shall have adequate soil to accommodate on-site wastewater treatment. Water supply shall be adequate for, and the water system shall be designed to provide, the maximum flow practical for fire-fighting purposes.
- l. For reasons of public and resident safety and timely emergency response, housing for older persons developments shall only be sited where the frontage and primary access for such developments is located along the following roadways: NH Route 130, NH Route 122, NH Route 111, NH Route 111A (South Depot Road), NH Route 101A, or Depot Road.

**2. PLANNING BOARD APPROVAL:** The Planning Board shall review and approve or disapprove the location and site plans for all proposed housing for older persons. The Planning Board may impose additional conditions not inconsistent with this or other sections of the Zoning Ordinance and all state and federal applicable laws.

**3. MAXIMUM PERMITTED DWELLING UNITS:** The maximum number of housing for older persons dwelling units shall not exceed 10% of the total number of dwelling units in town.

**4. BUILDING PERMITS:** A single building permit shall be issued for each structure, irrespective of the number of attached dwelling units within each structure. The Planning Board shall determine whether or not the dwelling units have been attached in accordance with the requirements of the site plan regulations for housing for older

persons.

**5. MINIMUM SAFETY STANDARDS**

- a. The development shall meet all applicable building codes and life safety codes that have been adopted by the Town of Hollis, as well as other State and Federal statutes and regulations.
- b. The Planning Board and/or Building Inspector may make requirements that exceed Federal and State requirements.

- 6. BUILDING RIGHTS LIMITATION:** The Planning Board, in its consideration of a proposal for housing for older persons, may determine that the proposal, when implemented, will have less impact on the availability of town services and other impacts on the community than would be the case for a conventional housing development. If such a finding is made, the Planning Board is authorized, in its judgment, to waive the application of all or part of the building rights limitation regulations (Section XIII of the Ordinance, Repealed March 2017), as the same may apply to the proposal, or any previously approved proposal, thus allowing the accelerated construction of the housing units contemplated hereby.

## **SECTION XXII: HOME BASED BUSINESSES**

- A. PURPOSE:** The Town of Hollis recognizes the need for some citizens to use their residence for limited business use. However, the Town believes that it is important to protect the residential character of neighborhoods. Therefore, the purpose of this section is to allow a limited business use in a residential area only to the extent that the business use does not adversely affect the appearance, character or condition of the residence or surrounding area. Only one Home Occupation or Home Shop use shall be allowed per residential unit.

### **1. DEFINITIONS:**

- a. **HOME-BASED BUSINESS:** Any business, occupation or activity for gain, operated by the resident of the residential dwelling unit. The home-based business shall be secondary to the use of the property as a residence. If the home-based business is located within the residential unit, it shall not occupy a space greater than fifty (50) percent of the total heated floor space of the unit. If it is located in a structure other than the principal residential structure, no specific space limitation shall apply, but the home-based business shall nonetheless remain secondary to the use of the property as a residence.
- b. **HOME OCCUPATION:** A home-based business which is conducted on the premises by the resident of the dwelling and may have customers/clients on the premises.
- c. **HOME OFFICE:** A home-based business, which is conducted on the premises by a resident of the dwelling that has no employees other than the owner and no customers/clients on the premises.
- a. **HOME SHOP:** A home-based business, which provides sales and/or service operations off the premises and will not have customers/clients on the premises.

### **2. HOME OFFICES**

- a. Home offices, which include intellectual products and services provided by the resident of the dwelling and conducted on the premises, shall be permitted without a special exception provided the following criteria are met; however if written approval is necessary for tax and/or insurance purposes, a Conditional Use permit may be issued by the Building Inspector:
  - (i) Home offices shall be conducted in a manner which does not impact the character of the neighborhood.
  - (ii) Home offices shall have no specialized vehicles or exterior equipment.
  - (iii) Home offices shall have no customer/client visitations and no regular deliveries.
  - (iv) Home offices shall have no merchandise, stock, commodities or parts stored or transferred on the premises.
  - (v) Home offices shall not employ any persons who are not residents of the dwelling.
  - (vi) Home offices shall not display any exterior commercial signage.

### **3. HOME OCCUPATIONS**

- a. Home occupations shall be permitted only as a special exception upon approval of the Board of Adjustment. In granting such exceptions, the Board must find such home occupations to be in compliance with the provisions of this section as well as the general provisions of the Town Zoning Ordinance for the district in which the proposed home occupation is located.
- b. A home occupation shall meet the following criteria:
  - (i) Home occupations shall be conducted in a manner which does not affect the residential character of the neighborhood.
  - (ii) One sign announcing the home occupation is allowed, provided that it does not exceed 4 square feet of sign surface area. Mailboxes designed as an advertisement shall not be allowed for a home

occupation. No business vehicle or equipment may be parked in such a way as to be used as advertising for the home occupation.

- (iii) No merchandise, stock, commodities, or parts shall be offered for sale to the public on the premises.
  - (iv) No more than one non-resident of the dwelling shall work on the premises of the home occupation.
  - (v) Except as otherwise provided, the home occupation shall not create any exterior evidence of its activity (e.g. outside storage of material, specialized equipment, etc.) or create any visual variation from the residential character of the property.
  - (vi) Any motor vehicle and equipment used for the commercial purposes of the home occupation shall not be visible from the public way or any surrounding properties.
  - (vii) Parking for customers/clients and non-resident employee must be provided with off-street parking. No more than three (3) parking spaces shall be provided for business use and not more than three (3) vehicles shall be parked simultaneously on the premises at any time for business purposes.
  - (viii) The home occupation may not generate more than an average of 12 vehicular trips per day on days of operation, with the exception of childcare service, which may generate a maximum of 24 vehicular trips per day. "Trip" shall be as defined in the ITE Trip Generation Manual, 5th Ed.
  - (ix) Objectionable circumstances such as noise, vibration, dust, smoke, excessive traffic, electrical disturbances, odors, heat, or glare shall not be produced.
  - (x) The home occupation may not involve any process, which results in the discharge of any hazardous material (as defined by the State of New Hampshire) into the air, ground or into any surface water bodies.
  - (xi) Any home occupation, which will involve the use, production, or storage of any hazardous material (as defined by the State of New Hampshire) shall submit a written request for review to the Hollis Fire Department, prior to submitting an application for special exception. This request shall list all such materials that may be used, produced or stored for the home occupation. The ZBA may deny or conditionally approve said application, based on the Hollis Fire Department's written recommendations, if it is determined that said operation may be a potential public hazard.
  - (xii) The existing or proposed septic systems must be certified by a licensed septic designer or engineer as adequate to handle and treat the increased waste volumes generated by the home occupation in accordance with New Hampshire RSA 485-A:38 and the Town of Hollis septic regulations. If the existing septic system is not capable of adequately handling and treating the waste of the principal dwelling unit and the home occupation in accordance with New Hampshire RSA 485-A:38 and the Town of Hollis septic regulations, a new or upgraded septic system conforming to the most recent state and local septic standards and regulations shall be required.
- c. Childcare may be permitted as a Home Occupation but shall be limited to a maximum of 6 children who are not residents of the dwelling.
  - d. The maintenance or repair of automobiles, motor vehicles or small engines shall not be permitted as a home occupation.

#### **4. HOME SHOPS**

- a. Home shops shall be permitted only as a special exception upon approval of the Board of Adjustment. In granting such exceptions, the Board must find such home shops to be in compliance with the provisions of this section as well as the general provisions of the Town Zoning Ordinance for the district in which the proposed home shop is located.
- b. A home shop shall be any business which provides sales and/or service operations off the premises and meets the following criteria:
  - (i) Home shops shall be conducted in a manner which does not affect the character of the neighborhood.
  - (ii) One sign announcing the home shop is allowed, provided that it does not exceed 4 square feet of sign surface area. Mailboxes designed as an advertisement shall not be allowed for a home shop. No business vehicle or equipment may be parked in such a way as to be used as advertising for the home

shop.

- (iii) No merchandise, stock, commodities, or parts shall be offered for sale to the public on the premises.
- (iv) Not more than three (3) employees are permitted on the premises at any time, including the resident employee(s). Parking for these employees must be off-street.
- (v) Except as otherwise provided, the home shop shall not create any exterior evidence of its activity (e.g. outside storage of material, specialized equipment, etc.) or create any visual variation from the residential character of the property
- (vi) Any motor vehicles and equipment used for the commercial purposes of the home shop shall not be visible from the public way or any surrounding properties.
- (vii) The home shop may not generate more than an average of 12 vehicular trips per day on days of operation. "Trip" shall be as defined in the ITE Trip Generation Manual, 5th Ed.
- (viii) Objectionable circumstances such as noise, vibration, dust, smoke, excessive traffic, electrical disturbances, odors, heat, or glare shall not be produced.
- (ix) The home shop may not involve any process which results in the discharge of any hazardous material (as defined by the State of New Hampshire) into the air, ground, or into any surface water bodies.
- (x) Any home shop, which will involve the use, production, or storage of any hazardous material (as defined by the State of New Hampshire) shall submit a written request for review to the Hollis Fire Department, prior to submitting application for special exception. This request shall list all such materials that may be used, produced or stored for the home shop. The ZBA may deny or conditionally approve said application, based on the Hollis Fire Department's written recommendations, if it is determined that said operation may be a potential public hazard.
- (xi) The existing or proposed septic systems must be certified by a licensed septic designer or engineer as adequate to handle and treat the increased waste volumes generated by the home shop in accordance with New Hampshire RSA 485:-A:38 and the Town of Hollis septic regulations. If the existing septic system is not capable of adequately handling and treating the waste of the principal dwelling unit and the home shop in accordance with New Hampshire RSA 485-A:38 and the Town of Hollis septic regulations, a new or upgraded septic system conforming to the most recent state and local septic standards and regulations shall be required.

#### **5. *EXISTING NONCONFORMING USE.***

To be considered a nonconforming use, a home-based business must have been legally established prior to any zoning ordinance that restricts such use. Although such a home-based business may not conform to the regulations specified in this section, the following provisions shall apply:

- a. No nonconforming home-based business may be extended to occupy a greater area of land upon which the business is situated than is owned by the property owner at the time of adoption of this ordinance.
- b. If any nonconforming home-based business is discontinued for any reason for a period of (1) year, except pursuant to a valid order of a court of law, it shall be conclusively presumed that such use has been abandoned within the meaning of this title, and all future home-based businesses shall comply with the regulations as specified in this ordinance.

## **SECTION XXIII: TELECOMMUNICATIONS**

This ordinance is adopted pursuant to RSA 674:16 and 674:21.

### **1. PURPOSE AND GOALS**

In recognition of the requirements of the Federal Telecommunications Act of 1996, this ordinance is designed and intended to balance the interests of the residents of Hollis, telecommunications providers, and telecommunications customers in the siting of telecommunications facilities within the Town of Hollis so as to ensure coordinated development of communications infrastructure while preserving the health, safety and welfare of the Town and its residents. This ordinance establishes general guidelines for the siting of telecommunications towers and antennas to enhance and fulfill the following goals:

- a. Preserve the authority of Hollis to regulate and to provide for reasonable opportunity for the siting of telecommunications facilities, by enhancing the ability of providers of telecommunications services to provide such services to the community quickly, effectively, and efficiently;
- b. Reduce adverse impact such facilities may create, including, but not limited to, impacts on aesthetics, environmentally sensitive areas, historically significant locations, flight corridors, health and safety by injurious accidents to persons and property, and prosperity through protection of property values;
- c. Provide for co-location and minimal impact siting options through assessment of technology, current location options, future available locations, innovative siting techniques, and siting possibilities beyond the political jurisdiction of the Town;
- d. Permit the construction of new towers only where all other reasonable opportunities have been exhausted, and to encourage the users of towers and antennas to configure them in a way that minimizes the adverse visual impact of the towers upon the Town;
- e. Require cooperation and co-location, to the greatest extent possible, between competitors in order to reduce cumulative negative impacts upon the Town;
- f. Provide consistent maintenance and safety inspections for any and all facilities;
- g. Provide for the removal of abandoned facilities. Provide a mechanism for the Town to remove these abandoned towers to protect the citizens from imminent harm and danger; and
- h. Provide for the removal or upgrade of facilities that are technologically outdated.

### **2. DEFINITIONS**

- a. **ALTERNATIVE TOWER STRUCTURE.** Innovative siting techniques such as artificial trees, clock towers, bell towers, steeples, utility poles, and similar alternative design mounting structures that camouflage or otherwise conceal the presence of antennas or towers.
- b. **ANTENNA.** Any exterior apparatus designed for telephonic, radio, television, personal communications service (PCS), pager network, or any other communications through the sending and/or receiving of electromagnetic waves of any bandwidth.
- c. **CO-LOCATION.** The use of an existing tower or an existing telecommunications facility for multiple purposes of users.
- d. **GUY WIRE.** A cable used to secure and steady a tower.
- e. **HEIGHT OF TELECOMMUNICATIONS FACILITY.** The vertical distance between the lowest point of the natural terrain 15 feet from the base of the telecommunications facility to the highest point of the telecommunications facility, including antennas and other tower components.
- f. **HEIGHT OF SURROUNDING EXISTING VEGETATION.** The average height of dominant species within 200 feet of the site as measured by or available from a Certified Land Surveyor or Professional Civil Engineer at the time the application for a telecommunications facility is submitted.
- g. **MONOPOLE.** A tower that is self-supporting with a single shaft of wood, steel, or concrete and a platform (or racks) for antennae arrayed at the top.
- h. **PREEXISTING TOWERS AND ANTENNAS.** Any tower or antenna lawfully constructed or permitted

prior to the adoption of this ordinance. Also, any tower or antenna lawfully constructed in accordance with this ordinance that predates and application currently before the Town.

- i. **PRINCIPAL USE.** The primary use of land or of a building or a portion thereof.
- a. **SECONDARY USE.** A use of land or of a building or portion thereof that is unrelated to the principal use of the land or building.
- b. **TELECOMMUNICATIONS FACILITIES.** Any structure, antenna, tower, or other device that provides commercial mobile wireless services, unlicensed wireless services, cellular phone services, specialized mobile radio communications (SMR), personal communications services (PCS), common carrier wireless exchange access services, and any other personal wireless service as defined by the Telecommunications Act of 1996.
- c. **TOWER.** A structure that is designed and constructed primarily for the purpose of supporting one or more antennas, including self-supporting lattice towers, guyed towers, or monopole towers. The term includes radio and television transmission towers, microwave towers, common carrier towers, cellular telephone towers, alternative tower structures, and the like.

### 3. **APPLICABILITY**

- a. **ESSENTIAL SERVICES AND PUBLIC UTILITIES:** Telecommunications facilities shall not be considered infrastructure, essential services, or public utilities, as defined or used elsewhere in the Town's ordinances and regulations. Siting for telecommunications facilities is a use of land, and is subject to the Town's zoning ordinance and all other applicable ordinances and regulations.

### 4. **SITING STANDARDS**

#### a. **GENERAL PROVISIONS**

- (i) The uses listed in this section are deemed to be permitted uses in the designated district in accordance with all other applicable ordinances and regulations of the Town including Telecommunications Site Plan Review and approval by the Hollis Planning Board.
- (ii) Antennas and towers may be considered either principal or secondary uses. A different existing use or an existing structure on the same lot shall not preclude the installation of an antenna or tower on such lot.
- (iii) For purposes of determining whether the installation of a tower or antenna complies with district development standards, the dimensions of the entire lot shall control, even though the antennas or towers may be located on leased parcels within such lots.
- (iv) Towers that are constructed, and antennas that are installed, in accordance with the provisions of this ordinance on a nonconforming lot or in conjunction with a nonconforming use, shall not be deemed to constitute the expansion of a nonconforming use or structure.

- b. **DISTRICTS PERMITTED.** New tower construction and co-location of telecommunications facilities shall be permitted in all zoning districts, subject to a Conditional Use Permit granted by the Planning Board, but towers shall be prohibited from the Town's Historic District. All telecommunications facilities shall be subject to Telecommunications Site Plan Review by the Planning Board.

- c. **CONDITIONAL USE PERMIT.** All new telecommunications facilities and the replacement of or significant modification of telecommunications facilities built before or after the passage of this ordinance shall require a Conditional Use Permit granted by the Planning Board, pursuant to authority granted by RSA 674:21,II. While reviewing an application for a Conditional Use Permit for a telecommunications facility, the Planning Board shall determine the following:

- (i) That the use shall not be detrimental to the character, environment, scenic value or general welfare of the Town.
- (ii) That a good faith effort has been made by the applicant to determine that no feasible and appropriate opportunities for co-location exist.
- (iii) That the proposed facility is necessary to meet the regional telecommunications needs of the applicant. Telecommunications facilities built on speculation shall not be permitted.

A Conditional Use Permit shall expire if substantial work is not performed within two years of approval. Conditional Use Permits shall require renewal every five (5) years, starting from the date of approval.

Telecommunications Site Plan Review shall be in addition to the Conditional Use Permit.

- d. **GENERAL DEVELOPMENT STANDARDS.** Towers and antennae shall be no higher than 10 feet above surrounding existing vegetation, unless an alternative tower structure or other camouflage device is used that effectively conceals the presence of the tower and antennae. Where existing vegetation is used as a buffer, it must effectively conceal the presence of the tower and antennae, and a conservation easement protecting that vegetation, enforceable by the Town pursuant to RSA 674:21-a, shall be recorded in the registry of deeds in form approved by the Planning Board.

**5. BONDING SECURITY AND INSURANCE**

Recognizing the extremely hazardous situation presented by abandoned and unmonitored towers, the Planning Board shall set the form and amount of security that represents the cost for removal and disposal of abandoned towers in the event that the tower is abandoned and the tower owner is incapable and/or unwilling to remove the tower in accordance with this ordinance. Bonding and surety shall be consistent with the provisions in the Subdivision Regulations. The Planning Board shall require submission of proof of adequate insurance covering accident or damage.

**6. REMOVAL OF ABANDONED ANTENNAS AND TOWERS**

Any antenna or tower that is not operated for a continuous period of twelve (12) months shall be considered abandoned and hazardous to the public health and safety, unless the owner of said tower provides proof of quarterly inspections to the satisfaction of the Building Inspector. The owner shall remove the abandoned structure within ninety (90) days of receipt of a declaration of abandonment from the Town. A declaration of abandonment shall only be issued following a public hearing, noticed in accordance with RSA 676:4. With notice to abutters and the last known owner/operator of the tower. If the abandoned tower is not removed within ninety (90) days, the Town may execute the security and have the tower removed. If there are two or more uses of a single tower, this provision shall not become effective until all uses cease.

**7. TELECOMMUNICATIONS SITE PLAN REVIEW REGULATIONS**

The Planning Board shall have the authority to adopt Telecommunications Site Plan Review Regulations to implement this ordinance, pursuant to RSA 674:43-44.

**8. SEVERABILITY**

The invalidity of any portion of this Ordinance shall not affect the validity of any other portion.

**9. EFFECTIVE DATE**

This Ordinance shall take effect March 10, 1998

## **SECTION XXIV: SOLAR ENERGY SYSTEMS** (Adopted March 2016)

**A. AUTHORITY AND PURPOSE** This renewable energy systems ordinance is enacted in accordance with RSA 674:17(I)(j), 674:62-66, and the purposes outlined in RSA 672:1-III-a as amended. The purpose of this ordinance is to accommodate Solar Energy Systems and Distributed Generation Resources in appropriate locations, while protecting the public's health, safety and welfare. The Town of Hollis intends to facilitate the State and National goals of developing clean, safe, renewable energy resources in accordance with the enumerated polices of NH RSA 374-G and 362-F that include national security and economic and environmental sustainability.

### **B. GOALS**

- a. Allow for the use of Solar Energy Systems in the community while maintaining Hollis's scenic vistas.
- b. Preserve the community's rural character, particularly as seen from public roads.
- c. Minimize potential adverse impacts of Solar Energy Systems in the community by ensuring that such facilities are properly screened and are properly sited within existing topographic features of the property.
- d. Ensure consistent maintenance and safety procedures are in place to protect public health.

### **C. DEFINITIONS**

Solar Access: The access of a Solar Energy System to direct sunlight. Solar Collector: A device, structure or a part of a device or structure for which the primary purpose is to transform solar radiant energy into thermal, mechanical, chemical, or electrical energy.

Solar Energy: Radiant energy received from the sun that can be collected in the form of heat or light by a Solar Collector.

Solar Energy System: An arrangement of Solar Collectors and other electrical and/or mechanical devices, located on the property of a Customer-Generator, and whose primary purpose is to transform solar energy into electricity or another form of energy, using mechanical, electrical, or chemical means. Solar Energy Systems shall not exceed a footprint greater than 15% of the land area of lots 3 acres or less and no more than 20% of a lot greater than 3 acres. In no case shall any Solar Energy System exceed 43,560 square feet in area. The footprint of the Solar Energy System shall include all above ground components and Solar Access ways and shall be calculated by including the entire area within a single, continuous perimeter enclosing all elements of the Solar Energy System.

Solar Energy System, Ground-Mounted: A Solar Energy System that is structurally mounted to the ground and is not roof-mounted.

Solar Energy System, Roof-Mounted: A Solar Energy System that is structurally mounted to the roof of a building or structure; may be of any size.

Solar Thermal System: A Solar Energy System that uses collectors to convert the sun's rays into useful forms of energy for water heating, space heating, or space cooling.

### **D. SOLAR ENERGY SYSTEM CONDITIONAL USE PERMITS**

1. **Permit Required**: No Solar Energy Systems, except Roof Mounted Systems, shall be erected, constructed, installed or modified without first receiving a Conditional Use Permit (CUP) from the Planning Board. All Roof-mounted Solar Energy Systems shall be reviewed by Planning Staff prior to the issuance of a building permit. The CUP shall clearly set forth all conditions of approval and shall list all plans, drawings and other submittals that are part of the approved use. Everything shown or otherwise indicated on a plan or submittal that is listed on the CUP shall be considered to be a condition of approval.
2. **Application and Review Procedure**: An Application for a Conditional Use shall be initiated by filing with the Planning Board for an application for a Conditional Use Permit. The following procedures shall apply to the processing of such application: **Site Plan Approval Required**: A site plan application shall be submitted with any application for a Solar Energy System Conditional Use Permit. The application and review procedure for a CUP shall be made concurrently and in accordance with the Site Plan Regulations as applicable to the particular development.

3. Standards of Review: Following a fully noticed public hearing on the proposed use, the Planning Board may issue a Conditional Use Permit, if it finds, based on the information and testimony submitted with respect to the application, that:
  - a. The use is specifically authorized by Section X as a conditional use;
  - b. The development in its proposed location will comply with all requirements of the Hollis Site Plan Regulations, as well as specific conditions established by the Planning Board.
  - c. The use will not materially endanger the public health or safety;
  - d. The use shall provide adequate screening to ensure adjacent property values are not adversely impacted. Screening may be provided by maintaining existing vegetation or through the installation of site specific evergreen landscaping, suitable fencing, or a combination thereof. Such screening shall be maintained during the operative lifetime of the Solar Energy System Conditional Use Permit. The screening shall be of such quality & quantity as to adhere to and meet the Objectives of the Hollis Rural Character Preservation Ordinance.
  - e. In granting a conditional use permit pursuant to this section, the Planning Board may impose any reasonable conditions or restrictions deemed necessary to carry out the intended purpose of this ordinance.
  - f. The Planning Board reserves the right to waive the Height conditions of the Conditional Use Permit if the Applicant proves to the Planning Board that the requested waiver will not be detrimental to public safety, adjacent property values or the rural character.
  
4. Duration of Solar Energy System Conditional Use Permit: Any ground-mounted solar energy system which has been abandoned or is no longer operational shall be removed. The owner or operator shall physically remove the installation no more than 150 days after the date of discontinued operations. The owner or operator shall notify the Planning Board by certified mail of the proposed date of discontinued operations and plans for removal.
  
- E. Minimum dimensional regulations: If the Planning Board grants a Conditional Use Permit pursuant to this section, any such use shall be conducted in a manner compliant with any conditions imposed by the Planning Board as well as the following minimum standards:
  1. Height  
The maximum height of any ground mounted Solar Energy System shall be 10 feet off the ground. Roof Mounted Solar Energy Systems shall be considered exempt for height requirements as allowed for in Section IX, General Provisions, 1. Height Regulations, 2. Exceptions, b.
  
  2. Setbacks  
All ground-mounted Solar Energy Systems shall adhere to applicable required front, side and rear yard requirements, along with all required Wetland Setbacks, and shall not be considered accessory structures when determining required setback provisions. A detailed screening plan, as determined necessary by the Planning Board, may be required to address specific neighborhood sensitivities, mitigate visual impacts, and maintain the rural character of the neighborhood. Based upon the specific character of neighborhood, greater setbacks may be required by the Planning Board in order to meet the goals of the Rural Character Preservation Ordinance.
  
- F. Minimum Construction Standards
  1. All Solar Energy Systems shall conform to applicable building, electrical codes and fire codes.

## APPENDIX A: TABLE OF AMENDMENTS

**SECTION I: AUTHORITY. 1998.** entire ordinance amended to replace all references to “High Intensity Soil Surveys (HISS) and/or Order 1 Soil Surveys” with “Site Specific Soil Map(s).”

**C. 2006:** Add new section **PLANNING BOARD** authorizing pre-application review. *Justification for amendment:* Provide authority for site plan and subdivision regulations enabling planning board to require pre-application review.

### **SECTION IV: ENFORCEMENT AND ADMINISTRATION**

**A. & B. 2010:** Clarification that the Building Inspector is the Code Enforcement Officer and is authorized to enforce the Hollis Zoning Ordinance.

**B. 2011:** Wording adding to provide flexibility as to who can enforce the provisions of the Hollis Zoning Ordinance

### **SECTION V: PENALTIES AND FINES**

**A. 1996:** generally amended.

### **SECTION VI: BOARD OF ADJUSTMENT**

**C. 2009:** Delete C. referencing specific fee amount.

### **SECTION VII: ZONING**

**A. ZONING DISTRICTS 1996:** amended to eliminate need for Town Clerk to certify zoning map.

- 1. AGRICULTURAL AND BUSINESS ZONE (A&B). 1996:** redefined boundaries of zone to follow lot lines; added to zone, extending it eastward to Wheeler Road and westward to vicinity of Rocky Pond Road; generally amended. **1998:** corrected typographical error by deleting Map 17, Lot 18 from section VII,A.1. **2013:** Permitted Uses; r. added Sale of vehicle fuel prohibited ; added to cc. except tattoo parlors; removed ii. Sale of motor vehicles; section 6, Area and Height Requirements; removed e. minimum separation between commercial buildings; 30 feet
- 2. COMMERCIAL ZONE (C). 1996:** created new zone in vicinity of Pineola Drive. **2013:** Permitted Uses; added r. Tattoo parlors; section 2, Area and Height Requirements; removed e. minimum separation between commercial buildings; 50 feet
- 3. FLOOD PLAIN ZONE. 1996: moved to SECTION VII.B.2. OVERLAY ZONING DISTRICTS**
- 4. INDUSTRIAL ZONE (IN). 1996:** reduced depth of zone on south side of Proctor Hill Road from 4,000 feet to 2,000 feet.
- 5. MOBILE HOME-1 ZONE (MH-1). 1996:** changed name from Trailer Park (Mobile Home) Zone.
- 6. MOBILE HOME-2 ZONE (MH-2). 1996:** changed name from Mobile Home Zone; generally amended.
- 7. RESIDENTIAL AND AGRICULTURAL ZONE (R&A). 1996:** generally amended.
- 8. RURAL LANDS ZONE (RL). 1996:** generally amended.
- 9. TOWN CENTER ZONE (TC). 1996:** changed name from Historical Center Zone; generally amended.
- 10. WATER SUPPLY CONSERVATION ZONE (WSC). 1996:** redefined zone generally to match the boundary of the underlying stratified drift aquifer.

**B. OVERLAY ZONING DISTRICTS. 1996:** created new section.

**7. PROTECTION OVERLAY ZONE (APO). 1996:** added description of zone boundaries. 2013: Performance Standards in the Aquifer protection Overlay Zone; added (x) Hazardous or Toxic Materials; section 2, Area and Height Requirements; removed e. minimum separation section b. (ii) removed; not cause a significant reduction in the long term volume of water contained in the aquifer or in the storage

capacity of the aquifer.

1. **FLOOD PLAIN OVERLAY ZONE (FPO). 1996:** moved from Section VII.A; generally amended.
  2. **WETLAND CONSERVATION OVERLAY ZONE (WCO). 1996:** moved from Section VII.A; redefined to refer to Hillsborough County Soil Survey soil drainage classifications.  
**1997:** Added 100-foot buffer; deleted reference to soil types; added reference to delineated wetland. **1999:** amend description of the Overlay Zoning District to be consistent with the Revised Wetland Conservation Overlay Zone Ordinance. **2000: Justification for amendment:** When the definition of wetlands changed to the three parameter approach in accordance with state and federal definitions, some hydric soils which used to be included by the Town in the Wetland Conservation Overlay District were no longer protected by the buffer. This ensures that all hydric soils are once again protected.
  4. **2009:** Added 4. **MULTI-FAMILY ZONE:** to include those land areas zoned R&A located east of the Nashua River.
- C. **COPIES OF ZONING MAP. 1996:** requires Chairman of Planning Board to sign official copy of zoning map; changed to make text of zoning ordinance control in cases of conflict between text and map; formerly Section VII.B.
- D. **BOUNDARIES. 1996:** formerly Section VII.C; amended to include gender neutral language.
1. **1998:** existing section renumbered VII.D.1 and titled “**LOCATION OF BOUNDARIES;**
  2. **1998.** added new section VII.D.2 “**LOTS DIVIDED BY A ZONING DISTRICT BOUNDARY.**”

**SECTION VIII DEFINITIONS. 1996:** changed from letters to numeral sequence. Note: numbers omitted to facilitate additions, deletions and amendments to definitions.

**ACCEPTABLE LAND. 1996:** changed “SCS” to “NRCS”. **1997:** First sentence: inserted “the following.” Third sentence: inserted “and delineated wetlands”; deleted reference to wetland soils; inserted “or are otherwise unsuitable for development because of wetland and hydric conditions.” **1999:** Amend definition to include the provision that Site Specific Soil Mapping Standards for New England and Vermont, Society of Soil Scientists of Northern New England Publication No.3, 1997, shall be used by a certified soil scientist to determine soils information.

**ACCESSORY BUILDING OR USE, CUSTOMARY. 1996:** reorganized to clarify intent. **1999:** Clarify that the 250 sq. ft. building footprint rather than floor area determines the setback of a structure, and add that structures greater than 12 feet in height must also comply with setback requirements for principal buildings.

**APPLICABLE ACRES. 1996:** changed “under” to “within”.

**ARTERIAL STREET. 2011:** new definition. The purpose of adding this definition is to define which streets in Town are considered Arterial Streets. This term is used elsewhere in the ordinance.

**BACKLAND LOTS. 1996:** generally amended.

**BUILDING AREA. 2008:** generally amended. **2012:** Add sentence clarifying the requirement for driveway access

**BUILDABLE LOT. 1996:** added “soils” following “non-wetland”; deleted reference to standard and backland lots; changed reference to High Intensity or Order 1 Soil Survey from “site specific soil analysis”; generally amended. **1997:** First sentence: deleted “non wetland soils” and inserted “acceptable land and/or land with soil drainage class ‘somewhat poorly drained’” **1998:** replaced dimensional specifications with “Building Area.” **2000: Justification for amendment:** The minimum contiguous area provides enough land for house, driveway, septic, garage, and accessory structures without the need to disrupt sensitive lands and wetland buffers.

**BUILDING AREA. 1998:** new definition. **1999:** amend definition to exclude land with slopes greater than 25% from the Building Area. **2000: Justification for amendment:** The intent of this amendment is to deter construction on excessively steep slopes to prevent erosion, loss of vegetation, and for viewshed protection. **2005:** Clarify that building does not have to be placed in the building area. **2008:** Definition

amended to include “altered” slopes as well as “unaltered” slopes.

**BUILDING RIGHT. 1996:** added “The certificate is not transferable, except under the terms of this ordinance” for clarification.

**CLUSTER HOUSING. 1996:** changed “are” to “may be”.

**CONGREGATE CARE FACILITY. 1997:** *new section.*

**DENSITY. 2000:** new definition added. *Justification for Amendment:* The intent is to state the meaning of density as applied in various sections of the ordinance.

**DWELLING UNIT. 2000:** Amended definition *Justification for Amendment:* The intent is to state the meaning of density as applied in various sections of the ordinance.

**DWELLING UNIT, TWO FAMILY:** Dwelling, two family. **1996:** added “two”; added “This definition does not include accessory apartments.”

**ELDERLY HOUSING. 1996:** added “specifically designed for elderly or disabled individuals and their families” following “development”; generally amended. **2000:** ~~deleted~~ and replaced with **HOUSING FOR OLDER PERSONS**

**EXTERIOR STORAGE. 1996:** generally amended.

**FAMILY. 1996:** deleted “related by blood, marriage, or adoption” following “persons”.

**FLOATING ZONE. 1996:** generally amended.

**FLOOD PLAIN OR FLOOD PRONE AREA. 1996:** deleted “Hollis” following “under the”.

**FRONTAGE. 1999:** Clarify that in order for land to be considered as having frontage, it must abut a Class V or better road, and the land must be capable of providing access, without seeking relief from any other part of the Hollis Zoning Ordinance. **2005:** Clarify that frontage be capable of providing the primary means of access to a lot without requiring waivers.

**FRONT YARD. 1996:** deleted “residential lot” following “width of a”.

**HOSPD. 1996:** added “floating zone development standard for” following “is a”; generally amended.

**HOUSING FOR OLDER PERSONS. 2000:** new definition added. *Justification for amendment:* The purpose of this definition change is to comply with State and Federal definitions of elderly housing.

**IMPROVED LAND. 2003:** *New definition.*

**LANDSCAPE MATERIALS YARD. 2011:** New definition. The purpose of this amendment is to define and set requirements for the establishment of a Landscape Materials Yard.

**LEASABLE AREA, GROSS. 1996:** added “but not to include common areas accessible to more than one tenant and which are not directly related to the tenants’ business” following “interior space”.

**LOT OF RECORD. 1996:** added “under the terms of this ordinance and any other applicable ordinances and regulations of the Town and statutes and regulations of the State” following “officially accepted”.

**LOW-INCOME HOUSING. 1996:** *generally amended.*

**MAJOR COLLECTOR STREET. 2011:** New definition. The purpose of adding this definition is to define which streets in Town are considered Major Collector Streets. This term is used elsewhere in the ordinance.

**MODERATE-INCOME HOUSING. 1996:** *generally amended.*

**MULTI-FAMILY DWELLINGS. 1996:** added “Three”.

**NET TRACK AREA. 2000:** new definition added. *Justification for amendment:* The intent is to spell out the specific land types to be subtracted from the tract before calculating density or open space. **2008:** Amended to add road rights-of way and altered slopes to the land types to be subtracted before calculating the density or open space.

**NONCONFORMING LOT. 1996:** deleted “area of” following “minimum”.

**NONCONFORMING USE OR STRUCTURE. 1996:** changed “regulations” to “terms and standards”.

**NON-WETLAND SOIL. 1996:** generally amended. **1997:** deleted.

**OPEN SPACE. 2003:** New definition.

**PUBLIC ROAD. 1996:** deleted reference to Town of Hollis Highway Map.

**RESTAURANT, FAST FOOD. 1996:** new definition added.

**RESTAURANT, GENERAL. 1996:** new definition added.

**RETIREMENT COMMUNITY. 1997:** new section. **2000: Justification for amendment:** The purpose of this amendment is to include a concise description of the unique features of the retirement community.

**SIGN. 1996:** generally amended.

**SITE SPECIFIC SOIL MAP. 1998:** new section.

**STRUCTURE AND/OR BUILDING. 2006.** new definition added. The **purpose** of this amendment is to define *Structures and/or Buildings* and add them as permitted uses to various zoning districts. **2011:** Definition amended to exclude fences, basketball and tennis courts. The purpose of this amendment it to clarify that fences, basketball and tennis courts are not considered structures and do not have to meet lot setback requirements.

**TEMPORARY STRUCTURE. 2006.** new definition added. The **purpose** of this amendment is to define *Temporary Structures* and add them as permitted uses to various zoning districts. **2008:** Definition amended to delete “for residential properties”. **2013:** added; except as noted in the Farm Stand definition,

**UNALTERED SLOPES. 2000:** new definition added. **Justification for amendment:** The intent of this amendment is to provide a definition of slopes that have not been disturbed by man prior to December 1, 1999, to clarify from what date steep slopes may not be included in certain calculations in the ordinance. The purpose is to deter construction on excessively steep slopes to prevent erosion and vegetation loss, and to provide viewshed protection. **2008:** generally amended. Replaces “man” with “human activity”.

**UNIMPROVED LAND. 2003:** New definition.

**WETLAND SOILS. 1996:** generally amended. **1997:** entirely replaced with federal/state wetland definition under new title “Wetland.” **1999:** Change the manner in which the Town defines wetlands to match state and federal definitions, particularly regarding the method for delineating wetlands.

**AGRICULTURAL ENTERPRISE. 2013:** New Definition.

**FARM STAND. 2013:** New Definition

**SEASONAL AGRICULTURAL SIGN. 2013:** New Definition

**BUILDING AREA: 2013:** added; Said driveway shall lie entirely on the subject lot.

#### **SECTION IX. GENERAL PROVISIONS.**

**1996:** Moved IX.E. **SIGN ORDINANCE** to new Section XIV and renumbered accordingly.

**2011. Reconfigured. Moved IX. A. EXCAVATION OR MOVEMENT OF EARTH MATERIALS** to new Section XIX. Moved K. **HOLLIS OPEN SPACE PLANNED DEVELOPMENT** to new Section XX. Moved M. **HOUSING FOR OLDER PERSONS** (formerly Housing for Elderly and Disabled) to new Section XXI. Moved N. **HOME BASED BUSINESSES** (formerly Home Occupations) to new Section XXII. Moved T. **TELECOMMUNICATIONS** to new Section XXIII. Entire Section IX. amended accordingly.

**DAMAGED STRUCTURES: 2011. Formerly B.**

A. **JUNK STORAGE: 2011.** Formerly C.

B. **MOBILE HOMES 1996:** generally amended. **2011.** Formerly D.

D. **2011: Amended lettering Formerly E. SEWAGE DISPOSAL SYSTEMS. 1996:** generally amended. **1997:** Title: added “and structural setbacks from wetlands”. **1999: Delete Sewage Disposal Systems and rename ONSITE WASTEWATER TREATMENT.**

1. **1997:** Changed “75” to “one hundred (100) feet”; deleted “the edge of” and inserted “a wetland, from hydric soils, from” **1999:** Amend to prohibit any portion of a septic system, including associated grading, to encroach into the wetland buffer, and delete “from a wetland, from hydric soils, from a public body of water, from a well, or from a dwelling other than that to which it is appurtenant” and change to “from

wetlands and surface waters or from wells.” **2000: Justification for amendment:** In order to ensure the quality of stormwater run-off, it makes sense to provide a reasonable distance of 75' from septic wastewater. **2005:** Clarify setback of 100' to leach fields and 75' setback for septic tanks from private wells. Revise requirement for in-place soil to 4 feet above ledge. Amend to allow septic inspector to grant waivers to expedite repair of failed septic systems.

2. **1999:** clarify language
3. **1999:** amend to correct enforcement agency.
4. **1997:** added second sentence.
5. **1997:** new section. **1999:** delete section **2005:** new section *Justification: This section gives the Town Septic Inspector authority to waive provisions of this section.*
6. **1997:** new section. **1999:** delete section

**E. (Formerly F.) IMPERMEABLE SURFACES AND BUILDING COVERAGE. 1996:** replaced entire section entitled “Required Open Space”.

- 1.a **1999:** Decrease the area of impermeable coverage allowed in Industrial and Commercial Zones from 75% to 60%.
3. **1997:** inserted new section; renumbered succeeding sections. **1999:** Add Wetland Conservation Overlay Zone to areas not permitted more than 15% impermeable surface coverage. **2010:** Impermeable Surface Coverage. Amended to modify the 15% maximum coverage requirement to allow for the reasonable development or expansion of existing businesses located in the Industrial Zone only. New State requirements are in place that mandate groundwater recharge and regulate the quality of water that is recharged, and any waiver is conditioned on adherence with these standards as well as a stormwater management plan.
5. **1999:** Amend to require that any change to a property requiring Planning Board review would include mitigation measures to maintain stormwater runoff at the same level as prior to development.

**F. (Formerly G.) SWIMMING POOLS, OUTDOOR STORAGE TANKS, COMMERCIAL FISHING PONDS 1996:** generally amended. **2004:** add item to allow for bonding of swimming pool fence. *Justification for amendment:* To add a provision for a bond as security for the proper construction of a fence around the area of the swimming pool as required by the Town's building code. **2005:** Distinguish bond amount for in-ground vs. above-ground pools.

**(Formerly H.) OFF-STREET PARKING. 1996:** added “or existing use expanded” following “new use is established; generally amended. **2002: Delete section IX.H. Off-Street Parking. Justification for amendment:** The purpose of this amendment is to delete the parking standards from the zoning ordinance. Revised parking standards have been adopted as a Planning Board Regulation to allow for greater flexibility.

**G. OFF STREET LOADING 2002: Renamed and amended lettering due to deletion of former section IX, H Off Street Parking**

3. **LOCATION. 1996:** added “that will serve as an effective barrier to sound and exhaust” following “fence, wall, or screen”.

**H. (Formerly J.) SCREENING 1996: generally amended. 2002:**

**I. Formerly L. HEIGHT REGULATIONS. 1996:** generally amended. **2003:** Renumbered to IX. K **2011.** Re-lettered I.

2. **EXCEPTIONS:** b. Add cupolas to the list of exceptions.

3. Amend to reduce the distance for measuring the average height of building from 15' to 5'.

**J. (Formerly O.) 2011. NUMBER OF RESIDENTIAL UNITS WHICH MAY BE CONSTRUCTED ON A LOT. 1996:** generally amended. **2003:** Renumbered IX,N: **2011:** Renumbered (K) Amended to add “and condominium”. The purpose of this amendment is to clarify that condominiums are also allowed as an exception to the number of units that can be constructed on a lot.

- K. ACCESSORY DWELLING UNITS (Adopted 1993).** 1996: generally amended. 2003: Renumbered IX,O. 2008: Amend item f. The purpose of this amendment is to require accessory dwelling units to share internal living space with the principal dwelling unity through a common wall. 2011:
3. **REQUIREMENTS/LIMITATIONS:** 1999: P.3.e. Clarify that the above grade floor area of the total dwelling unit includes the accessory dwelling unit. 2001: P.3.b. delete "existing". P.3.f. delete "existing", add "or constructed". *Justification for Amendments:* The intent of the changes is to clarify the requirement for internal access in an accessory dwelling unit.
- L. SITE PLAN REVIEW.** 1996: new section added. 2003: Renumbered IX, P. 2011. Re-lettered L.
- M. MAXIMUM DRIVEWAY SLOPE.** Formerly (R). 1998: new section. 2000: Section re-lettered from T to S. 2002: Added The purpose of the maximum grade requirement is to ensure public safety and accessibility for emergency vehicles. Deleted: This standard also shall not apply to lots of record or to lots that have otherwise been approved for subdivision and that have been recorded in the Registry of Deeds prior to March 10, 1998. *Justification for amendment:* The purpose of this amendment is to clarify the intent of this section and to delete the "grandfathering" provision for lots of record. 2003: Re-lettered S to R.
- N. UNREGISTERED VEHICLES.** Formerly S. 2000: new section. *Justification:* The purpose of this new section is to restrict the number of unregistered vehicles permitted on any property to avoid potential unsightly storage of vehicles, which detracts from the character of neighborhoods. 2003: Re-lettered T to S 2005: Clarify language re: Permitted businesses.
- O. 2011:** Add new section. **DETERMINATION OF DENSITY FOR CONDOMINIUM DEVELOPMENTS.** The purpose of this amendment is to allow non-conforming structures to be expanded without ZBA approval, provided they adhere to applicable zoning district setbacks.
- P. 2011:** New Section. **CONDITIONAL USE PERMIT.** The purpose of this amendment is to outline the specific procedures and requirements for obtaining a Conditional Use Permit. 2012: 3. Standards of Review. e. Clarification: Reword to read Access to the site shall be achieved directly from a State road.
- (T.) 2007: CUL-DE-SAC LENGTH.** Add new Item. The purpose of this amendment is to establish a maximum length for cul-de-sacs for the purpose of safety. 2011: Delete paragraph in its entirety. The purpose of this amendment is to remove this section from the ordinance, and to insert this provision into the Subdivision Regulations.

**SECTION X: ZONING DISTRICTS: SPECIAL EXCEPTIONS.** The purpose of this amendment is to delete any reference to site plan review for Special Exceptions in Zoning Districts **MH-1, MH-2, Recreational, R&A, RL, Town Center, and Water Supply Conservation Zone**. Site plan review is required for some , but not all, categories of Special Exceptions. The Site Plan Review Regulations govern what activities require review.

**A. AGRICULTURAL AND BUSINESS ZONE**

1. **PERMITTED USES IN THE AGRICULTURAL AND BUSINESS ZONE.** 1996: changed “Restaurants, EXCEPT drive-ins and fast food restaurants” to “Restaurants, general”; added “Single Family Residences”. 2004: add new item qq: Mixed Use Occupancy. *Justification for amendment:* to allow for mixed use occupancy in the Agricultural and Business Zone. 2006: add new item rr: Temporary Structures added as a permitted use.
2. **OTHER RELATED PERMITTED USES.** 1996: added “or disabled” following “elderly”. 2003: Delete home occupations.
  - a. 2000: *Justification for amendment:* The reference to elderly housing as a permitted use was changed to housing for older persons in all sections to be consistent with the amended definition of elderly housing.
3. 2003: Add new section **SPECIAL EXCEPTIONS** for home occupations and accessory dwelling units.
4. Formerly 3. **ACCESSORY USES PERMITTED IN THE AGRICULTURAL AND BUSINESS ZONE.**
5. 2009: Added. **PERMITTED USES ALLOWED BY CONDITIONAL USE PERMIT IN THE A&B**

- ZONE:**
- a. MIXED-USE OCCUPANCY II.**
6. Formerly 5. **AREA AND HEIGHT REQUIREMENTS.** 1996: generally amended. 201?. Note added regarding the requirement of a 25' buffer around all cemeteries for the purposes of new construction.
- a. MINIMUM LOT SIZE.** 1996: added "for residences the minimum lot size shall be 2 acres per dwelling unit".
- h. BUILDING AREA.** 2003: add section to require compliant building area. 2004: Amend to read "...except as provided in section X.A.1.qq above".
- (i). Backland Lots. 1996: changed "Each backland lot shall be at least 1.5 acres" to "Backland lots for commercial uses shall be at least 1.5 acres; backland lots for residential uses shall be at least 4 acres"; generally amended.
- i. MAXIMUM COMMERCIAL BUILDING SIZE.** 1996: new section added.
7. **OTHER DEVELOPMENT REGULATIONS IN THE AGRICULTURAL AND BUSINESS ZONE:**
- b. OPEN SPACE.** 1996: deleted "Buildings in the commercial zones used for commercial purposes shall occupy no more than 50% of the lot upon which they are located and"; changed "arterial street" to "public right-of-way".
- d. SCREENING.** 1996: added section title; replace section text with "Screening shall be provided according to Section IX,J of this Ordinance and according to the Town's Site Plan Review Regulations".
9. A&B Zone. **HISTORIC DISTRICT ORDINANCE. 2001: Justification for amendment:** This change more clearly defines the portion of the A&B zone that falls under the jurisdiction of the Historic District Overlay.
- B. COMMERCIAL ZONE.** 1996: new section added.
2. **AREA AND HEIGHT REQUIREMENTS IN THE COMMERCIAL ZONE**
- h. MAXIMUM IMPERMEABLE SURFACE COVERAGE.** 2000: deleted. **Justification for amendment:** This section is deleted because impermeable surfaces are covered in Section IX,E. which was amended in 1999, to 60% maximum permeable coverage, and is not consistent with this section
- i. BUILDING AREA.** 2003: add section to require compliant building area.
- C. INDUSTRIAL ZONE.**
3. **AREA AND LOT REQUIREMENTS IN THE INDUSTRIAL ZONE**
- g. BUILDING AREA.** 2003: add section to require compliant building area.
6. 1996: deleted reference to Site Plan Review, formerly X,C.6.
- D. MOBILE HOME-1 ZONE.** 1996: changed name of zone from "Trailer Park (Mobile Home) Zone".
1. **PERMITTED USES IN THE MOBILE HOME-1 ZONE.**
- b. 2006:** Added Temporary Structures as a permitted use.
3. **SPECIAL EXCEPTIONS IN THE MOBILE HOME-1 ZONE.** Remove reference to site plan
- b. 2003:** add new item to permit Home based businesses (formerly home occupations) by special exception
- E. MOBILE HOME-2 ZONE.** 1996: changed name of zone from "Mobile Home Zone"
1. **PERMITTED USES.**
- f. 2000: Justification for amendment:** The reference to elderly housing as a permitted use was changed to housing for older persons in all sections to be consistent with the amended definition of elderly housing.
- i. 2003**Add new item – Home occupations. **2003:** Delete Home occupations. **2006:** add new item **j.** Temporary Structures added as a permitted use.

2. **SPECIAL EXCEPTIONS IN THE MOBILE HOME-2 ZONE. 2009:** Delete reference to site plan review.
    - h. (v) **1999.** Amend list of exceptions, delete “and clubs” and add (vi) sporting clubs. **2012:** Delete j. Farm Stands. The purpose of this amendment is to clarify that farm stands are an allowed use in this district. Re-letter k. Riding academies
  3. **AREA AND HEIGHT REULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE MOBILE HOME-2 ZONE**
    - g. **2003. BUILDING AREA:** add section to require compliant building area.
- F. RECREATIONAL ZONE. 1996:** generally amended.
1. **PERMITTED USES IN THE RECREATIONAL ZONE.**
    - 2003: g and i.** Delete home occupations and accessory dwelling units.
    - 2006:** add new item h. Temporary Structures added as a permitted use.
  2. **SPECIAL EXCEPTIONS IN THE RECREATIONAL ZONE. 2009:** Delete reference to site plan review.
    - b. (v) amend list of exceptions, delete “and clubs” and add (vi) sporting clubs.
    - c and d. **2003:** Add new items to permit home occupations and accessory dwelling units by special exception.
  3. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE RECREATIONAL ZONE.**
    - d. **1999:** delete “length” and replace with “depth”.
    - g. **2003. BUILDING AREA.** Add section to require compliant building area.
- G. RESIDENTIAL AND AGRICULTURAL ZONE. 1996:** generally amended.
1. **PERMITTED USES IN THE RESIDENTIAL AND AGRICULTURAL ZONE. 2009.**
    - a. Delete Section a. and replace with a.(i) Single and Two Family Dwellings and (ii) Conversion of Existing Residential Buildings.
      - f. Rename. Housing for Older Persons, subject to the procedures in **Section XXI. 2000: Justification for amendment:** The reference to elderly housing as a permitted use was changed to housing for older persons in all sections to be consistent with the amended definition of elderly
      - i. and k. **2003:** Delete home occupations and accessory dwelling units. **2006:** add new item k. Temporary Structures added as a permitted use.
  2. **SPECIAL EXCEPTIONS IN THE RESIDENTIAL AND AGRICULTURAL ZONE. 2009.** Delete reference to site plan review.
    - j. **2012:** Delete Farm Stands (re-letter J. Riding Academies). The purpose of this amendment is to clarify that farm stands are a permitted use in this district.
    - h. (v) **1999:** amend list of exceptions, delete “and clubs” and add (vi) sporting clubs.
    - i. and m. **2003:** Add new items to permit home occupations and accessory dwelling units by special exception. **2012.** Re-letter l. to k. and rename Home based businesses according to Section XXII. Re-letter m. to l.
  3. **2009: New Section added. USES ALLOWED BY CONDITIONAL USE PERMIT IN THE R&A ZONE.** The purpose of this amendment is to allow for workforce housing.
    - a. **2011:** Landscape Materials Yard added to uses allowed in the R&A Zone by conditional use permit.
  3. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE RESIDENTIAL AND AGRICULTURAL DISTRICT.**
    - g. **2003. BUILDING AREA.** add section to require compliant building area.

- H. RURAL LANDS ZONE. 1996:** added “Lands” to section title. **2009:** Delete reference to site plan review.
1. **g. 2006:** add new item g. Temporary Structures added as a permitted use.
  2. **b. and d. 2003:** Delete and accessory dwelling units
  3. **SPECIAL EXCEPTIONS IN THE RURAL LANDS ZONE.**
    - f.(v) 1999:** amend list of exceptions, delete “and clubs” and add **(vi)** sporting clubs.
    - h and i 2003:** Add new items to permit Home based businesses (formerly home occupations) and accessory dwelling units by special exception.
    - j. 2012:** Add Riding Academies. The purpose of this amendment is to allow riding academies by special exception in this zoning district, which the Planning Board feels is appropriate.
  4. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE RURAL LANDS ZONE.**
    - g. BUILDING AREA. 2003:** Add section to require compliant building area.
- I. TOWN CENTER ZONE. 1996:** changed name of zone from “Historic Center” to “Town Center”.
1. **PERMITTED USES IN THE TOWN CENTER ZONE.**
    - a. 2009:** Delete Section and replace with **a. (i)**, Single and Two Family Dwellings and **(ii)**, Conversion of Existing Residential Buildings
    - f. 2000: Justification for amendment:** The reference to elderly housing as a permitted use was changed to housing for older persons in all sections to be consistent with the amended definition of elderly housing.
    - i. 2006:** add new item **i.** Temporary Structures added as a permitted use.
  2. **ACCESSORY USES IN THE TOWN CENTER ZONE**
    - b. and d. 2003:** Delete home occupations and accessory dwelling units.
  3. **SPECIAL EXCEPTIONS IN THE TOWN CENTER ZONE. 2001:** delete "see Section VII".  
**Justification for amendment:** This is a housekeeping change.**2009:** Delete reference to site plan review.
    - i.(v) 1999:** amend list of exceptions, delete “and clubs” and add **(vi)** sporting clubs.
    - k. and l. 2003:** Add new items to permit Home based businesses (formerly home occupations) and Accessory dwelling units by special exception.
  4. **2009:** Add Uses allowed by Conditional Use Permit in the Town Center Zone a. and b. Amend numbering. The purpose of this amendment is to allow workforce housing.
  5. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE TOWN CENTER ZONE.**
    - d. 2000: Justification for amendment:** Dimensional requirements for accessory structures were added to this section because it was not addressed under Area and Height Requirements for the Town Center zone as it was in all other zones in the ordinance.
    - g. 2003. BUILDING AREA.** add section to require compliant building area.
- J. WATER SUPPLY CONSERVATION ZONE. 1996:** generally amended.
2. **ACCESSORY USES IN THE WATER SUPPLY CONSERVATION ZONE.**
    - b. 2003.** Delete home occupations.
  3. **SPECIAL EXCEPTIONS IN THE WATER SUPPLY CONSERVATION ZONE. 2009:** Delete reference to site plan review.
    - 3.b. and c. 2003:** Add new items to permit Home based businesses (formerly home occupations) and Accessory dwelling units by special exception.

4. **AREA AND HEIGHT REGULATIONS FOR PERMITTED USES AND SPECIAL EXCEPTIONS IN THE WATER SUPPLY CONSERVATION ZONE.**

g. **2003. BUILDING AREA.** add section to require compliant building area.

h. **2003. BACKLAND LOTS.** Formerly g.

**SECTION XI. OVERLAY ZONING DISTRICTS. 1996:** new section added, replacing and including Section XI. Aquifer Protection Overlay Zone

A. **AQUIFER PROTECTION OVERLAY ZONE. 1996:** generally amended. **1997:** Preamble: generally amended; added references to Master Plan, etc. **2003:** Intent: Amend and expand section.

1. **LOCATION. 1997:** generally amended; added procedure allowing use of certified soil scientist.

2. **2003:** new section – **DEFINITIONS** Renumbered sections. **2013:** removed numbering.

**1997:** new section.

3 **Formerly 2. 1997:** new section. **2010: DIMENSIONAL STANDARDS IN THE AQUIFER PROTECTION OVERLAY ZONE.** Amended because of new State requirements for groundwater recharge.

4. **2003: PERFORMANCE STANDARDS.** Expand section to specify what additional studies may be required.

5. **1996: PERMITTED USES IN THE AQUIFER PROTECTION OVERLAY ZONE.** added “and/or unless the use is specifically prohibited, below.”

6. **PROHIBITED USES IN THE AQUIFER PROTECTION OVERLAY ZONE.**

e. **1996:** deleted “containing de-icing chemicals” following “Dumping of snow”. **1997:** added “Aquifer Protection”

f. Prohibited Uses. **1996:** deleted “where animals are kept” following “animal feedlots”. **1997:** deleted “where animals are kept”

k.-m. **1997:** new sections. **2011: m.** Delete “and composting facilities”

**1998:** delete section and renumber section XI,A.7 as new XI,A.6.

7. **1997:** new section. **NONCONFORMING USES IN THE AQUIFER PROTECTION OVERLAY ZONE:**

b. Addresses underground storage tanks

B. **FLOOD PLAIN OVERLAY ZONE. 1996:** moved from Section X. **2007:** Generally amended to comply with the requirements of the National Flood Insurance Program.

7. **BUILDING IN THE FLOOD PLAIN**

e. **2009:** Amended Sec. 7(e). to comply with the requirements of the National Flood Insurance Program

C. **WETLAND CONSERVATION OVERLAY ZONE. 1996:** changed name of section from “Wetland Conservation Areas”; generally amended. **1998:** Renumber sections 2-4 as 3-5, respectively; add new section 2 “Jurisdiction.” **1999:** Delete Section XI.C. in its entirety and replace with revised Wetlands Conservation Overlay Zone Ordinance. **2000: Justification for amendment:** The majority of amendments to the WCO Zone Ordinance were clarifications to sections that were vague or caused problems with implementation. There were a few specific changes to sections intended to provide further protection to wetlands and surface waters. Most other amendments were suggested by the ZBA, Conservation Commission, Planning Board, or Staff to make the ordinance clearer to the public and easier to administer. Among these amendments were organizational changes to the sections addressing the wetland special exception process. **2002:** generally amended. *Justification for amendments:* The purpose of this amendment is to streamline application procedures for "grandfathered" lots and to give Town boards flexibility in determining submission requirements for special exception applications. The amendments reflect procedural changes only and do not affect rules and restrictions regarding wetlands, surface waters and the one hundred foot buffer zone.

1. **PURPOSE.**

j. **2003:** add additional purpose statement.

2. **DEFINITIONS. 2002:** Delete Accessory Structures definition. *Justification for amendment:* Defined in Section VIII.2. Add BMPs for Erosion Control During Trail Maintenance and Construction, as amended. *Justification for amendment:* Adoption of state guidelines for trails construction and maintenance in and around wetlands and surface waters.

**2006:** Add definition for Bulk Water Transporter

3. **JURISDICTION.**

a. **2000:** The amendment to **Section XI.C.3.a** specifies that applications involving alterations to wetlands, which are under State jurisdiction, go through the appropriate Town process to protect the buffer.

b. **2002:** Grammatical corrections and deletion of last sentence. *Justification for amendment:* Sentence already included in Section XI.7.

c. **2002:** Delete wording that states applicants on grandfathered lots must go to Planning Board. *Justification for amendment:* Eliminates inequity in review of applications for existing lots and streamlines process to allow planning staff to review and approve construction and expansion in the buffer for existing lots of record.

c (v). **2002:** Add: Planning Board. *Justification for amendment:* Provision for review by Planning Staff/Planning Board.

d. **2002: Delete (i) and (ii).** *Justification for amendment:* Allows all improvements/expansions on grandfathered lots to be dealt with by Planning Staff/Planning Board eliminating the need for ZBA approval for expansions greater than 250 sq.ft. Add: 100 foot buffer *Justification for amendment:* clarification.

d. **2002: (iv)** Delete: cisterns. *Justification for amendment:* Cisterns do not need buffers

5. **2010: DRAINAGE.** Delete paragraphs c. and d. The purpose of these amendments are to comply with the NH DES Alteration of Terrain rules for groundwater treatment and recharge.

6. **PERMITTED USES WITHIN THE WETLAND CONSERVATION OVERLAY ZONE.**

b. **2006:** Add new section b. to address water withdrawal from surface waters for bulk transport and delivery. *Justification for amendment:* To establish conditions and limitations in accordance with State regulations for water withdrawals for bulk transport and delivery from surface waters.

c.(ii). **2002:** Add: greater than 25%. *Justification for amendment:* clarification.

d. (xv.) Add: reference to BMPs. *Justification for amendment:* Adds reference to guidance document for performance standards.

d.(xvi.) Add: Buffer disturbances for driveway access. Buffer disturbances do not need approval from the NH Wetlands Bureau. *Justification for amendment:* To allow Conservation and Planning Staff/Planning Board to review and set conditions on applications that show wetland buffer disturbance for driveway access (including common driveways for no more than two lots)

d. **2010: add section (xvii) and (xviii).** Amendment allows buffer disturbances for Planning Board approved subdivision road access, putting review and approval of these cases under the jurisdiction of the Planning Board and its engineering consultant. Allows the placement of stormwater management facilities in the WCO Zone in accordance with the NH Department of Environmental Service Alteration of Terrain Regulations.

7. **SPECIAL EXCEPTIONS IN THE WETLAND CONSERVATION OVERLAY ZONE. 2002:** a. Amend entire section. *Justification for amendment:* Clarifies ZBA criteria for granting special exceptions.

a. **2010:** Amend item a. This amendment allows stormwater management facilities to be located to within 50' of a wetland as long as the facilities comply with the State Regulations.

b. Application Procedure: Amend entire section. *Justification for amendment:* Entire section revised to give boards flexibility in determining information needed for special exception hearing on a site specific

basis.

**c. Delete section c.** Reword and replace in section 7.a. *Justification for amendment:* Puts criteria for granting special exceptions at beginning of section.

**8. PROHIBITED USES WITHIN THE WETLAND CONSERVATION OVERLAY ZONE. 2003: a. (iv). 2010:** Amend item (iv). Delete ~~roadways and~~ from the paragraph. The purpose of this amendment is to allow buffer disturbances for Planning Board approved subdivision road access, putting review and approval of these cases under the jurisdiction of the Planning Board and its engineering consultant

**a.(v.)**Add two additional items and amend generally to broaden the scope of prohibited land uses that harm or degrade the wetland buffer and/or wetlands.

**D. 2009:** Add D. **MULTI-FAMILY ZONE.**

**2. 2012: GENERAL STANDARDS.**

**b.** Delete paragraph in its entirety. The purpose of this amendment is to eliminate the requirement that a portion of a multi-family project shall be owner occupied. This complies with the State Statute.

## **SECTION XII. NONCONFORMING USES, STRUCTURES AND LOTS. 1993. generally amended.**

### **A. NONCONFORMING USES.**

#### **3. ALTERATIONS.**

**c. 1999:** Clarify the language so that it is clear that only the changes proposed by the plans submitted are to be considered, and not possible future alterations.

**d. e. Nonconforming Uses: 2000:** new sections added intended to clarify alteration of a nonconforming use. **2001:** delete sections d. and e. *Justification of amendment:* This change eliminates text inserted by petition in 2001 for one specific case.

### **B. NONCONFORMING LOTS:**

**1. 2011:** Add new text. ...”Provided, however, that any alteration, expansion, new construction or change that can be accomplished in a manner that will comply with the applicable setbacks for that district, shall be permitted. The purpose of this amendment is to allow non-conforming structures to be expanded without ZBA approval, provided the structures adhere to applicable zoning district setbacks.

**4. 2000:** new section. *Justification for amendment:* The intent of these changes is to allow special exceptions to zoning setback requirements on non-conforming lots in the Historic District where strict adherence to these zoning setback requirements may not be desirable.

**C. NONCONFORMING STRUCTURE., CONTINUANCE: 1997:** inserted “that does not further aggravate a front, side, or rear yard setback nonconformity” and “and according to the diagram below”; added diagram and explanatory text. **1999:** Clarify the intent of this section by limiting the provisions for an expansion or change of use to consideration of the provisions in Section XII.A.3 Alterations: paragraphs a and b.

**2006:** Add to item C. Non-conforming structure – “Proposal C does not include landings or stairs”. **2012:** Explanation of Diagram-Add. Proposal “C” requires a grant of variance by the ZBA. The purpose of this amendment is to clarify that a variance, not a special exception, is required for proposal “C”.

## **SECTION XIV. SIGN ORDINANCE. 1996:** moved from Section XI; changed “Regulations” to “Ordinance” in section title; changed “Administrating Board” to “Administrative Board” throughout.

**A. SCOPE. 1996:** generally amended.

### **B. DEFINITIONS.**

**1. ADMINISTRATIVE BOARD. 1996:** added “or board” following “person(s)”.

**5. EVENT SPECIFIC SIGN. 1996:** generally amended. **2013:** added; non-profit event; These signs shall not promote a business; removed business opening, sale

- 9. **HISTORIC PLAQUE.** 1996: generally amended.
- 11. **HOME OCCUPATION SIGN.** 1996: generally amended.
- 12. **ILLUMINATED SIGN.** 1996: changed “light/paint” to “surfaces”.
- 13. **INFORMATION SIGN.** 1996: generally amended.
- 14. **LINEAL BUILDING FRONTAGE.** 1996: changed “additive” to “cumulative”.
- 16. **NON-CONFORMING SIGN.** 1996: added “but which legally existed prior to the adoption of this Sign Ordinance”.
- 28. **SIGN.** 1996: generally amended.
- 32. **SUBDIVISION SIGN.** 1996: deleted “in this or any other development” following “such sales”.
- 36. **WINDOW SIGN.** 1996: generally amended.
- I. **EVENT SPECIFIC SIGNS:** 7. Removed; Multi business locations with Master Sign will not
- N. **AGRICULTURAL SIGNS: 2013:** changed section
- 2. **MOBILE AND PORTABLE SIGNS: 2013:** (a) added; “These signs are used to promote a business...resides.”
- C. **ADMINISTRATION.** 1996: generally amended.
- D. **GENERAL REQUIREMENTS.** 1996: generally amended.
- E. **APPLICATION FOR PERMIT.** 1996: generally amended.
- F. **PERMITS.**
  - 4. 1996: changed “Planning and Land Use Regulations” to “Revised Statutes Annotated”.
- G. **GENERAL PROVISIONS.** 1996: generally amended.
- H. **PROHIBITED SIGNS.** 1996: deleted “The primary intention here is to ensure that signs be constructed of standard material with standard paint”; generally amended.
  - 1. 1996: added “or signs which are made to appear to move” following “moving signs”.
  - 5. 2004: Add new item 5. for section reference.
  - 14. 1996: added “except that display stands on a farm premises shall be permitted, subject to other provisions of the Zoning Ordinance” following “display structures”.
- I. **EVENT-SPECIFIC SIGNS.** 1996: generally amended. 2012: This amendment clarifies procedures for obtaining a permit for an event-specific sign 2004:
  - 7. Add new item 7. *Justification for amendment:* clarify standards for event-specific signs..
- J. **ILLUMINATION STANDARDS.** 1996: deleted “A sign must not contain motorized or electronic parts which cause it to move or appear to move”; generally amended.
- K. **CONSTRUCTION AND SAFETY STANDARDS.** 1996: generally amended.
- L. **EXEMPTIONS.** 1996: generally amended.
- M. **RESIDENTIAL AND SUBDIVISION SIGNS.** 1996: added “and Subdivision” following “Residential”; generally amended.
- O. **REAL ESTATE SIGNS.** 1996: generally amended.
  - 6. Formerly 10. 1996: Off premise directional signs. added “must be” before “removed; changed “within 3 days” to “no later than one (1) day”.
- P. **HISTORIC DISTRICT SIGNS.** 1996: generally amended.
  - 4. 1996: added “design” following “coordinated in”.

- Q. BUSINESS AND INDUSTRIAL SIGNS. 1996:** added “Agricultural and” before “Business”; added “Commercial”; generally amended. **2004:**
2. Add new section for **MOBILE AND PORTABLE SIGNS.** Justification for amendment: to permit freestanding A-frame type signs in front of businesses. **2012:**
    - b. **2012.**The purpose of this amendment is to clarify procedures for obtaining permits for mobile and portable signs
- R. VENDING MACHINES. 1996:** generally amended.
3. **2001:** delete "shall sit jointly with the" added "may consider, but not necessarily be bound by, recommendations of" **Justification for amendment:** This change allows the Zoning Board of Adjustment to consider, but not necessarily be bound by, recommendations from the Historic District Commission.
- S. SIGN MASTER PLANS. 1996:** generally amended.
- T. GRANDFATHERED SIGNS. 1996:** generally amended.
- U. SEPARABILITY. 1996:** deleted section.

**SECTION XV. HOLLIS RURAL CHARACTER PRESERVATION ORDINANCE. 2004:** Add new section, *Justification for amendment:* To preserve and maintain Hollis' scenic vistas and open spaces through the use of visually unobtrusive and environmentally sound development, while permitting the landowner to exercise his/her property rights in a manner that does not affect the density of development.

**C. OBJECTIVE: 2010:** and C.1. Amended to replace “public ways” with “public roads” .

**D. DEFINITIONS. 2006:** Amend definition of Clear-Cutting. Add new definition for Forest Cover.

**F. DESIGN STANDARDS.**

1. **b.** Insert new item regarding use of stone rip-rap.

**h.** Revise item regarding clear-cutting. *Justification for amendments:* To require revegetation for property that is to be clear-cut for future development and to require revegetation in areas disturbed by earthmoving operations.

2. **a. 2010:** Delete entire text and replace with new wording. The purpose of this amendment is to delete all references to “public way” and replace with “public road”. This will clarify the location(s) from which the feature(s), which are proposed to be protected may be viewed. This amendment also allows the Planning Board flexibility in siting considerations for proposed construction along or near significant features.

4. **e. 2009:** Delete: “The minimum paved width of a road is 20 feet”. The **purpose** of this amendment is to delete a specific road standard from the Zoning Ordinance because: (1) the number is no longer correct, and (2) this standard is found in the Subdivision Regulations.

**SECTION XVI. ADULT SEXUALLY ORIENTED BUSINESSES ORDINANCE. 2006:** Add new section – *Justification for amendment:* To establish locations and conditions under which adult sexually oriented businesses are allowed in order to provide the Town of Hollis the opportunity to regulate this activity.

**SECTION XVII. HISTORIC DISTRICT ORDINANCE. 2008:** Add new section – **2013:** Section E.5; added or expansion in use; removed in use from residential to commercial.

**SECTION XVIII. WORK FORCE HOUSING ORDINANCE. 2009:** Add new section-

**SECTION XIX. EXCAVATION OR MOVEMENT OF EARTH MATERIALS: 2011.** Reconfigured: Moved **Section IX. A.** to new **Section XIX.** Renumbered and re-lettered.

**SECTION IX amendments.**

**A. EXCAVATION OR MOVEMENT OF EARTH MATERIALS**

- 2.a(ii) 1996: added Wetland Conservation Overlay Zone; generally amended.
- 2.a(iii) 1996: added Aquifer Protection Overlay Zone; generally amended.
- 2.a(iv) 1996: generally amended.
- 2.b. 1996: generally amended.
- 3. **SPECIAL EXCEPTIONS: 1996:** generally amended.
- 5. **THIS ORDINANCE SHALL NOT...1997:** added (ii).

**SECTION XX. HOLLIS OPEN SPACE PLANNED DEVELOPMENT (HOSPD)** Adopted March 1993. Amended March 1994. Renumbered new Section 2011. Formerly in Section IX

**2003:** Renumbered Section. Open Space Requirements. **2003:** Add new item (i). Add language to insure that open space in HOSPDs will be useable for park, recreation, conservation or agricultural purposes. **2008:** Amend section J. Hollis Open Space Planned Development (HOSPD). Amend item 5.a. Density (i) The purpose of this amendment is to revise the standards for determining HOSPD density to reflect Net Tract Area rather than gross parcel area. Amend 5.d. (ii) and (iii) to clarify the method of determining HOSPD open space. **2009:** Add new section 6. Workforce Housing Units/Owner Occupied.

4. **APPLICABILITY AND PROCEDURES IN A HOSPD**

- a. **APPLICABILITY 1997:** added third sentence.
- b. **EXEMPTIONS. 1996:** deleted “Minor”; generally amended. **1997:** added “Any major subdivision not subject to HOSPD requirements shall meet the Point Criteria System. **1997:** deleted “each lot has less than 200 feet of frontage or is otherwise incapable of further subdivision”; replaced with “the deed for each lot..”
- d. **PROCEDURES. 1996:** deleted “Sections III. 1, SUBDIVISION PROCEDURE, and IV. 1, GENERAL REQUIREMENTS”.

5. **DENSITY. 1996:** generally amended.

- a. **(i) 2000: Justification for amendment:** This would provide a density based on buildable land, and increase the protection of sensitive areas. Open space would become totally usable.
- b. **LOT SIZE**
  - (ii) 2000: Justification for amendment:** The purpose of this amendment is to keep minimum lot requirements for HOSPD backland lots consistent with contiguous area requirements for all lots.
  - (iv-v) 1997:** new sections.
- c. **FRONTAGE**
  - (i) 1997:** changed to “For HOSPD lots developed along a pre-existing Town road: 200 feet minimum per lot.”
- d. **OPEN SPACE REQUIREMENTS(**
  - ii) 1999:** Increase open space area requirement from 30% to 40% for HOSPD lots with a density of one dwelling unit per 3 to 5 acres. **2000: Justification for amendment:** Open space would become more desirable because it would increase usable land and have the potential to serve a number of purposes, depending upon the location. Sensitive areas would be further protected. Subdivisions could be designed with a true conservation approach by carving out the sensitive land first, enabling the protection of systems, rather than creating isolated pockets.
  - (iii) 1999:** Increase the open space area requirement from 40% to 50% for HOSPD lots with a density of one dwelling unit per 2 to 3 acres. **2000: Justification for amendment:** Open space would become more desirable because it would increase usable land and have the potential to serve a number of purposes, depending upon the location. Sensitive areas would be further protected. Subdivisions could be designed with a true conservation approach by carving out the sensitive land first, enabling the protection of systems, rather than creating isolated pockets.

(v) **1996:** changed “development” to “subdivision” following “conventional”; changed “to the minimum feasible extent required to achieve the density possible by a conventional development” to “Such a reduction shall nonetheless otherwise maximize open space.”

(vi) **OPEN SPACE OWNERSHIP AND MANAGEMENT. 2000: Justification for Amendment:** This section was added to require that the conveyance of open space land and its management be clearly indicated on the plan and in the appropriate deeds and covenants as part of the plan approval, in accordance with recommendations from the Town Attorney.

- e. **BUILDING SETBACKS. 1998:** new section. **2013:** added; Accessory Structures 15 feet side and rear lot lines.

**SECTION XXI. HOUSING FOR OLDER PERSONS:** formerly Section XIII. **Elderly Housing.** Generally amended. New section 2011.

**1996:** deleted “Subsidized” from section title and added “and Disabled”; added “and disabled” throughout section following “elderly”; generally amended. **1997:** deleted limitation to one mile radius from Monument Square; deleted limitation to 3% of total dwelling units in Town. **2000:** Entire section deleted and replaced with CONDITIONS FOR THE WAIVER OF THE HOUSING DENSITY REQUIREMENTS **Justification for amendment:** The intent of these ordinance amendments is to provide housing for older persons that meets community needs while complying with applicable State and Federal laws, by providing a waiver to otherwise applicable density requirements, allowing four times single family density. Depending upon the predetermined age of occupants of a community for older persons the ordinance specifies the varying levels of compliance prescribed by statute for the provision of community facilities and services and provides the same waiver of conventional density requirements to all. Additionally, the ordinance amendments, along with the recently approved Housing for Older Persons Site Plan Regulations, will ensure that this type of housing provides community amenities in a setting that is characteristic of the surrounding community. The new Section M incorporates most of the provisions of deleted Section R: Retirement Community, with the exception of discretionary items, which were incorporated into regulations for elderly housing.

**Retirement Community. 1997:** new section. **2000:** Section entirely deleted and replaced with new section IX. M. **Justification for amendment:** The intent of these ordinance amendments is to provide housing for older persons that meets community needs while complying with applicable State and Federal laws, by providing a waiver to otherwise applicable density requirements, allowing four times single family density. Depending upon the predetermined age of occupants of a community for older persons the ordinance specifies the varying levels of compliance prescribed by statute for the provision of community facilities and services and provides the same waiver of conventional density requirements to all. Additionally, the ordinance amendments, along with the recently approved Housing for Older Persons Site Plan Regulations, will ensure that this type of housing provides community amenities in a setting that is characteristic of the surrounding community. The new Section M incorporates most of the provisions of deleted Section R: Retirement Community, with the exception of discretionary items, which were incorporated into regulations for elderly housing.

**2001:** Renamed, "Housing For Older Persons". **2003:** Renumbered IX. L.

- A. Purpose: **2001:** delete "housing units determined to be desirable for the town as well as necessary to meet community needs, including, but not limited to"
1. **GENERAL STANDARDS: 2001:** delete Section a.1 and a.2. Replace with a. to establish dwelling unit density. Amend d. delete "elderly and disabled", change to "older persons". Amend e. increase minimum lot acreage to 30 acres. Add l. restricting development to sites with frontage on specific roads.
  3. Maximum Permitted Dwelling Units: **2001:** delete "fifteen percent (15%)", change to "ten percent (10%)".
  7. Retirement Community. **2001:** delete entire section, replace with new 6. "Building Rights Limitation".

**Justification for Amendments:** These changes were made to better enable the development of Housing for Older Persons. The changes include: restricts projects to persons 62 years of age and older; revises minimum lot size; restricts development location to specific roadways; replaces "building rights" with construction phasing; eliminates Retirement Community category.

**SECTION XXII. HOME BASED BUSINESSES.** Formerly Section IX. N. **HOME OCCUPATIONS (Adopted March 1989).** **1996:** generally amended. **2003:** Renumbered IX, M. Special Exceptions. **1996:** added reference to use, production, and storage of hazardous materials, **2013:** Purpose: added; Only one Home Occupation or Home Shop use shall be allowed

per residential unit.

formerly found at IX,O.16.

6. **1997:** deleted “and shall not physically occupy an area greater than 15% of the total heated floor space of the home and shall not exceed 300 square feet”; added second sentence.
9. **2001:** amended to clarify that only one non-resident is permitted to be employed at the work site of a home occupation.
13. **1996:** changed “6” to “12”; changed “12” to “24”; added “‘Trip’ shall be as defined in the ITE Trip Generation Manual, 5th Ed.”.
17. **1996:** added “on the premises” following “sales or services”. **2008.** Add new item **M. 17.** The purpose of this amendment is to allow the Zoning Board of Adjustment to review septic system capacity as part of the home occupation criteria)

**2009:** Delete entire section and replace with new section: **HOME BASED BUSINESSES** with three sections: **2. HOME OFFICES**; **3. HOME OCCUPATIONS**; and **4. HOME SHOPS**. The purpose of this amendment is to allow a limited business use in a residential area by Special Exception from the Zoning Board of Adjustment.

**3.4. & 5. 2010:** Amended to prohibit a non-conforming home based business, home occupation or home shop from extending its activity beyond the boundary within which it was originally permitted; and to address home based businesses, home occupations and home shops that have “substantially change” or been abandoned.

**3. HOME OCCUPATIONS. 2012:** b(ii) and **4. HOME SHOPS. b (ii).** Amended to resolve a conflict between the Home Shop and the Sign Ordinance with respect to the allowable size for signs.

**SECTION XXIII. TELECOMMUNICATIONS. Formerly Section IX.S. Personal Wireless Facilities. 1997:** new section. **1998:** delete section and replace with “Telecommunications.” **2000:** Section re-lettered from **S** to **R** **2003:** Re-lettered **R** to **Q.** **2011:** moved to new section XXIII. Telecommunications.

**S(Q).1999:** Amend definition **2.e.** Height of telecommunications facility and add definition **2.f.** Height of surrounding existing vegetation to be consistent with definitions in Telecommunications Facilities Regulations. Change lettering for remaining definitions.

#### **March 2014**

##### **Section XIV, Sign Ordinance, paragraph m; Residential and Subdivision Signs**

1. Remove the words .....or farm.

##### **Section XIV, Sign Ordinance, paragraph n; Agricultural Signs; c; Off-Premises seasonal agricultural signs,**

1. Change to read not to exceed 4 (four) square feet

##### **Section XIV, Sign Ordinance, paragraph n; Agricultural Signs; b, On-Premises seasonal agricultural signs,**

1. Remove product and change to read; Crop picked where it has been grown (such as “Apples”; “Peaches” & “Strawberries” etc.) provided that it displays directional information.

##### **Section IX, General Provisions, paragraph p; Conditional Use Permit-Landscaping Material Yard, 3, Standards and Review, e;**

1. Remove directly from a State Road and change to from frontage on a State Road.

##### **Section XI, Overlay Zoning District, paragraph c; Wetland Conservation Overlay Zone, 6.c (iv)**

1. Remove or naturalized and the United States Fish and Wildlife Service.....New Hampshire
2. Change to read Planting of native.....NHDES publication “Native Shoreland/Riparian Planting for New Hampshire date March 2006, as amended.

**Section XI, General Provisions, paragraph K; Accessory Dwelling Unit.**

1. Add new paragraph 7, Owner Occupied; The principal dwelling unit or accessory dwelling unit shall be owner occupied. If the property owner cannot comply with the provision due to hardship such as, but not limited to, job relocation or a medical/family emergency; the owner may apply to the Board of Adjustment for a Special Exception, such relief may be reviewed by the Board of Adjustment annually but in no case shall the relief be granted be greater than 2 years

**March 2015**

Amended **Section X Zoning Districts: Paragraph: G. Residential/Agricultural Zone. 2. Special Exception** by adding the following new use:

m. Bed and Breakfast according to the definition in Section VIII

and amended Section VIII – Definitions by adding the following new definition:

Bed and Breakfast: A Bed and Breakfast is defined as a transient lodging facility, that is the personal residence of its owner, is occupied by the owner at the time of the rental to a patron, and in which the only meal served is breakfast to in-house patrons. Residents, patrons and non-resident employees must be provided with off-street parking. The bed and breakfast must also comply with all state regulations and have an adequate septic system.

Amended **Section IX General Provisions, F Swimming Pools, Outdoor Storage Tanks, Commercial Fishing Ponds** by amending paragraph 1 as follows:

The facility shall conform with the setback requirements for principal buildings. (Except for in-ground swimming pools which shall conform with the setback requirements for an accessory structure)

Amended existing **Section IX General Provisions, Section K Accessory Dwelling Unit, 3e** by amending the existing Section as follows:

An accessory dwelling unit shall have an area of no less than 300 square feet and no greater than 800 square feet. (Measured by the outside dimension of the exterior wall or the interior dimension of a common wall) An attached accessory dwelling unit shall occupy no more than 30% of the total heated, above grade floor area of the total dwelling unit, including the accessory dwelling unit.

Amended **Section IX: General Provisions**, by adding the following new paragraph:

Q. Planned Unit Development (PUD) setback requirements: For those residential subdivisions that were approved by the Planning Board under the former Planned Unit Development ordinance (pre 1993), building setback requirements shall adhere to the Building Setbacks provisions outlined in Section XX Hollis Open Space Planned Development, Section 5e Building Setbacks.

Amended **Existing Section XII: NONCONFORMING Uses, Structures and Lots, Section B. Nonconforming Lots, 2** to read as follows:

A separate lot which does not conform to the provisions of this Ordinance, which is recorded and taxed as a lot of record at the time of passage of this Ordinance may be used for any conforming use of this district.

Amended existing **Section XII: NONCONFORMING Uses, Structures and Lots, Section A. Nonconforming Uses, 2 Discontinued Use** as follows:

Whenever a nonconforming use has been discontinued for more than two years for any reason, such nonconforming use shall not thereafter be reestablished, and the future use of the property shall be in conformity with the provisions of this ordinance.

**March 2016**

**By creating new Section XXIV; Solar Energy Systems**

**Amend Section X, Zoning Districts Agriculture and Business Zone A&B, Commercial Zone (C), Industrial Zone (I), Mobile Home-1 Zone (MH-1) and Mobile Home -2 Zone (MH-2), Recreation Zone (R), Residential and Agriculture District (R&A), Rural Lands Zone (RL), Town Center (TC), Water Supply Conservation Zone & Historic District (HC) to allow Solar Energy Systems uses as follows:**

**Permitted Uses**

Roof-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**Uses Allowed by Conditional Use Permit**

Ground-Mounted Solar Energy Systems. All proposals in the Historic District shall be reviewed and approved by the Historic District Commission.

**Amend Section X Zoning Districts, Section B. Section C, Industrial Zone (I) by adding a new paragraph: 7. Uses Allowed by Conditional Use Permit:**

Alternative Treatment Centers: Pursuant to the authority provided in RSA 674:21, the Planning Board may grant a Conditional Use Permit for an Alternative Treatment Center, Cultivation & Non-cultivation, subject to the requirements of Section IX General Provisions, Paragraph P. This use shall be limited to that portion of the Industrial Zone located along Proctor Hill Road (NH Rt. 130).

**March 2017**

**Amended Section IX General Provisions, paragraph K Accessory Dwelling Units, 2. Definition, Accessory Dwelling Unit (ADU) by deleting the existing definition and replacing it with the following:** As defined by RSA 674:71 as amended, “means a residential living unit that is within or attached to a single family dwelling, and that provides independent living facilities for one or more persons, including provisions for sleeping, eating, cooking, and sanitation on the same parcel of land as the principle dwelling unit it accompanies.”

**In addition, amended Section 3 Requirements/Limitations by adding the following:** The use of an ADU shall not be deemed to include such transient occupancies as hotels, motels, rooming or boarding houses. This limitation includes short-term rentals (less than four weeks at a time) of dwelling units. Short-term rentals are only authorized as specifically provided for Bed and Breakfast (Inn) establishments.

**Amended Section VIII Definitions, Structure and/or Building, by adding the following to the existing paragraph:** Structures and/or Building(s) 120 square feet or less shall not require a building permit, but shall be required to meet all setback requirements.

**Amended SECTION XIV: SIGN ORDINANCE as follows: Amend paragraph C. Administration, D. General Requirements, E. Application for Permit, F. Permits, H. Prohibited Signs and I. Event-Specific Signs by deleting reference to the Administrative Board and replacing it with the Building Inspector/Code Enforcement Officer. In addition, clarify the roles of the Board of Selectmen and the Zoning Board of Adjustment as it relates to the sign code.**

**Amended by deleting, in its entirety, Section XIII Residential Construction Timing and Phasing Ordinance, along with the Definitions outlined in Section VIII; Building Right, Building Year and Transferred Rights.**

**Amended Section XXI Housing for Older Persons as follows:**

GENERAL STANDARDS: All housing for older persons shall conform to the following standards:

Dwelling unit density shall not be greater than two (2) ~~one (1)~~ two-bedroom dwelling units or two (2) one-bedroom dwelling units/net tract acre when the type of housing that is being proposed is that which complies with NH RSA 354-A:15, II Housing for Older Persons, ~~which provides an exception to the rule against restricted housing for housing that is "... (II) Intended for, and solely occupied by, persons 62 years of age or older."~~

The minimum lot area shall be 20-~~30~~ acres and the lot shall have at least 50 feet of frontage on those roadways listed in Section XXI, A,1,L.

MAXIMUM PERMITTED DWELLING UNITS: The maximum number of housing for older persons dwelling units approved in a calendar year, when added to all previously approved units of housing for older persons, shall not exceed twenty-five ~~ten~~ percent (~~10%~~) (25%) of the total dwelling units existing in the Town for the previous year.

**Amended Section XI Overlay Zoning Districts as follows:**

6. PROHIBITED USES IN THE AQUIFER PROTECTION OVERLAY ZONE: The following uses shall not be permitted in the Aquifer Protection Overlay Zone: ~~b. Subsurface storage of petroleum or other refined petroleum products.~~

7. NONCONFORMING USES IN THE AQUIFER PROTECTION OVERLAY ZONE:

~~b. Notwithstanding subparagraph 7.a above, no underground storage tank for petroleum or other refined petroleum products may be repaired or replaced. All failed underground storage tanks must be removed according to standards established in state statutes and regulations.~~

**Amended Section X: Zoning Districts by adding the following Intent Sections as follows:**

C. INDUSTRIAL ZONE (I)

INTENT: The Industrial Zone is intended to provide for the location of industry and light manufacturing and the Special Exceptions uses noted in paragraph 4.

D. MOBILE HOME-1 ZONE (MH-1)

INTENT: The Mobile Home-1 Zone is intended to provide an area in Town in which individual lots for mobile homes as well as mobile-home parks are allowed.

H. RURAL LANDS ZONE (RL)

INTENT: The two-fold intent of the Rural Lands Zone is to encourage farming in Town and to permit limited development in areas where physical site conditions are problematic or access to Town services is restricted.

**March 2018**

**Amend Section X Zoning Districts, Agriculture/Business Zone**

1. Permitted Uses in the Agriculture and Business Zone, to allow private schools and day care providers as allowable uses.

**Amend Section XIV Sign Ordinance by removing reference to Administrative Board** in Sections N.2.Ciii; Q.2.b.; S.1.3.4.; and T. and replace with the term Building Inspector/Code Enforcement Officer.

**Amend Section IV Enforcement and Administration**, paragraph J. by deleting the paragraph in its entirety ~~If, after the issuance of a permit, the operations authorized there under are not commenced within one year after day of permit or, if after the commencement of operations the work is discontinued for a period of one year, such permit shall be void and work may not again be commenced until a new permit shall have been issued for the original work, and building materials and equipment on the ground shall be removed or stored according to the requirements of the Building Inspector~~ and replacing it with "A building permit shall be valid for one year from the date of issuance. Said permit period may be extended for one or more times with approval of the Building Inspector. If said permit expires, the building materials and equipment on the ground shall be removed or stored according to the requirements of the Building Inspector.

**Amend Section VIII Definitions, Structure and/or Building**, by deleting the last sentence in the paragraph. That which is erected or assembled using a combination of materials for occupancy or use, whether portable or affixed to the ground. This includes structures of permanent or temporary construction, plastic, fabric, and/or canvas covered frame structures, structures for agricultural uses, structures installed on skids, blocks or permanent foundations and all sheds and storage facilities. All structures will require a building permit. Structures shall not include fences, basketball and tennis courts. ~~Structures and/or Building(s) 120 square feet or less shall not require a building permit, but shall be required to meet all setback requirements.~~

**Amend Section XIV Sign Ordinance, N Agriculture Signs**, by deleting paragraph 1. ~~Permanent agricultural signs shall not exceed 20 square feet of sign surface area.~~ And replacing it with the following: Permanent agricultural signs: When affixed to a building, a sign shall not exceed 20 square feet of sign surface area. A free-standing sign shall not exceed 20 square feet of surface area with no one horizontal or vertical dimension greater than 6 feet. Posts supporting a free-standing sign shall have a total width of no more than 1 foot (unless specified otherwise by building code requirements). In addition, amend Section

N.2. Seasonal agricultural signs, b. i. by deleting ~~Shall not exceed 20 square feet of sign surface area~~ and replacing it as follows: Shall not exceed 20 square feet of sign surface area with no one horizontal or vertical dimension being greater than 6 feet.

### March 2020

**Amended Section VIII, Definitions**, by adding the following: **Setback** - The minimum distance between the nearest portion of a building or structure, a lot line, a right-of-way line, a leachfield, a well, or a terrain feature such as shoreline or wetlands area. Setbacks are required in this ordinance to support the purposes of Zoning Ordinances as specified in state law.

**Amended Section XI, D: Multifamily zone (MF) (Workforce Housing) by changing the following:**

**1. PURPOSE**

The intent of this Section is to ~~define the requirements related to the development of multi-family housing and to prevent the overcrowding of land while provide for the opportunity to construct multi-family housing by the provision of a waiver from the otherwise applicable density requirements, while complying with all applicable state and federal laws with respect to such housing and at the same time,~~ ensuring compliance with local planning standards, land use policies, good building design, and requirements for the health, safety, and general welfare of all the inhabitants of the Town.

**2. GENERAL STANDARDS**

In order to provide for a variety of workforce housing units in the community, which includes both owner and renter occupied units, the following criteria shall be required for developments proposed in the Multi-family Zone:

- a. Dwelling unit density shall be no greater than four (4) units per acre, based upon the Net Tract Area of the property ~~or the minimum number of units required to make the project economically viable whichever is less.~~
- h. The minimum lot area shall be 4 acres and the lot shall have at least 50 feet of frontage. Garden style structure shall be limited to two stories. Townhouse style may be ~~three-two~~ stories, provided that a portion of the first floor area is allocated to a garage use.
- i. Multi-family workforce housing developments submitted under this section shall ~~be exempt from the requirement of Section IX, General Provisions, F, 1-4, Impermeable Surface and Building Coverage and Section XI, Aquifer Protection Overlay Zone (APO), A.3. Dimensional Standards in ch APO provided that all development proposals shall,~~ to the maximum extent practicable, seek to infiltrate the volumetric increase between the existing condition and the proposed condition for the 24-hour, 25-year storm. ...
- k. In order to minimize potential intrusion on neighboring land uses, the Planning Board ~~may shall~~ require the installation of a 100 foot landscaped buffer strip along the perimeter of the site. The Planning Board shall determine the exact nature of the buffer strip, after taking into consideration existing vegetation, topography and other relevant factors.

**Amended Section XVIII: Workforce Housing by changing the following:**

**A. PURPOSE.** The purposes of this section are as follows:

~~The purpose of this section is to define the requirements related to the development of workforce housing in compliance with RSA 674:58-61 and to prevent the overcrowding of land while complying with all applicable state and federal laws with respect to such housing and at the same time, ensuring compliance with local planning standards, land use policies, good building design, and requirements for the health, safety, and general welfare of all the inhabitants of the Town. 1. To encourage and provide for the development of affordable workforce housing;~~

~~2. To ensure the continued availability of a diverse supply of home ownership and rental opportunities for low to moderate income households;~~

~~3. To meet the goals related to affordable housing provisions set forth in the town's Master Plan; and~~

~~4. To comply with the requirements of SB 342, an Act establishing a mechanism for expediting relief from municipal actions which deny, impede, or delay qualified proposals for workforce housing (RSA 674:58-61).~~

**B. AUTHORITY:** This innovative land use control section is adopted under the authority of RSA 674:21, and is intended as an "Inclusionary Zoning" provision as defined in RSA 674:21(I) (k) and 674:21(IV)(a), as well as RSA 672:1, IIIe, effective July 2009. ,which states: "All citizens of the state benefit from a balanced supply of housing which is affordable to persons and families of low and moderate income. Establishment of housing which is decent, safe, sanitary and affordable to low and moderate income persons and families is in the best interests of each community and the State of New Hampshire, and serves a vital public need. Opportunity for development of such housing shall not be prohibited or unreasonably discouraged by use of municipal planning and zoning powers or by unreasonable interpretation of such powers". In addition RSA 674:21 II also provides the authority for Planning Boards to grant Conditional Use Permits.

2. Permitted Uses: Single family, duplex, and multi-family units ~~or mix of housing types within the same development, or a mix of commercial and multi-family housing is~~ are permitted within an application under this Section.

**D. CONDITIONAL USE PERMIT CRITERIA:**

The Planning Board ~~shall~~ may issue a Conditional Use Permit (CUP) if it finds, based on the information and testimony submitted with respect to the Workforce Housing Application, that:...

- b. If completed, the development in its proposed location will comply with all requirements of Section XVIII and other applicable workforce housing provisions contained in other sections of the zoning ordinance without the benefit of waivers.

**G. WORKFORCE HOUSING GENERAL REQUIREMENTS:**

- 1. In order to be considered as a “completed” application eligible for “acceptance” under RSA 676:4.I, an application under this section must contain, at a minimum, the following information:
  - a. Calculation of the number of units provided under this section and how these units will be consistent with the Purpose of the Ordinance.
  - b. Description of each unit’s size, type, estimated cost and other relevant data.
  - c. Documentation of affordable household eligibility as required in Section H
  - ~~d. The Planning Board may request additional information if, in their judgment, it is necessary to make a meaningful determination of affordability.~~
- 2. ~~At the Planning Board’s discretion, the applicant may be required to submit project cost estimates~~ Documentation to establish the economic viability of the proposal including land, development and construction costs; financing, profit, and sales costs; and other cost factors shall be provided. The planning board shall request updates of these cost reports as the project progresses.

**H. ASSURANCE OF CONTINUED AFFORDABILITY:**

In order to qualify as workforce housing under this section, the application shall make a binding commitment that the workforce housing units will remain affordable for a period of years. This shall be enforced through a deed restriction, restrictive covenant, or some other contractual arrangement through a local, state or federal housing authority or other non-profit housing trust or agency or through the town itself as selected by the Planning Board to administer this provision.

**I. ADMINISTRATION, COMPLIANCE AND MONITORING:**

- 2. Where workforce housing applicants propose a development of single family homes or ~~mixed single family and multi-family homes~~, all provisions of the subdivision and site plan regulations shall apply ~~unless waived by the Planning Board. Where workforce housing applicants propose a development of multi-family units or mixed commercial and multi-family units, the site plan regulations shall apply unless waived by the Planning Board.~~
- 3. The Planning Board shall not approve any workforce housing proposal unless it complies with all applicable standards of this ordinance including but not limited to ~~related to~~ environmental protection, water supply, sanitary disposal, traffic safety, and fire and life safety protection.

**Amended Section XX: Hollis Open Space Planned Development by changing the following:**

3. **PURPOSE:** The purpose of the HOSPD is to:

- a. Promote a more efficient use of land requiring a smaller network of streets and utilities;
- b. Promote the preservation of open space, farmland, recreation areas, green space, fields and woods, valuable wildlife habitat, and outstanding topographic, natural, and historic features;
- c. ~~Deleted Discourage the sprawling, land-consuming form of development usually resulting from conventional subdivision;~~
- d. Promote the efficient provision of municipal services and protect existing and potential water supplies;
- e. Maintain the rural and scenic character of the Town of Hollis;
- f. Promote siting of buildings which is sensitive to existing natural and historic features;
- g. Protect the value of real property; and
- ~~h. Provide a variety of types of living spaces and environments.~~

**4. APPLICABILITY AND PROCEDURES IN A HOSPD**

- a. **APPLICABILITY:**, ~~To facilitate achievement of the goals of the Hollis Master Plan, a~~ All major subdivisions shall be presented to the Planning Board in accordance with the Hollis Open Space Planned Development (HOSPD)

standards as specified in this section and in the Land Subdivision Regulations ~~In all cases it shall be assumed that a HOSPD plan is necessary to meet the goals and objectives of this section and of the Master Plan, unless the contrary is demonstrated by the applicant.~~ In cases where the Planning Board determines that a parcel is unsuited to development as a HOSPD, it may waive the requirements of this Section IX,J and permit the parcel to be developed as a conventional subdivision subject to the Point Criteria System, below.

## **6. WORKFORCE HOUSING UNITS/OWNER OCCUPIED**

Single ~~and two~~ family workforce housing units/owner occupied are permitted, provided the following criteria are adhered to:

1. Density: The maximum number of allowable dwelling units that could be developed under the provisions outlined in Section 5.a shall be determined following the standard practice for a Market Rate Housing development. Once the number of HOSPD lots has been determined and agreed to by the Planning Board then that lot figure may be increased by up to 30% ~~10%~~ if it is shown that construction of workforce housing would otherwise not be economically viable. These additional lots shall be designated as workforce housing units/owner occupied.
2. Lot Size: There is no minimum lot size for workforce housing units. The proposed site shall have adequate soils to accommodate on-site wastewater treatment and an adequate water supply adhering to both local and state requirements. A Building Area shall ~~not be required~~ and however at least 50% of the lot shall be Acceptable Land. In addition, wells serving both workforce housing and market rate housing lots may be located in designated Open Space areas. With the goal of meeting the Open Space requirements in Section 5.d., the size of Market Rate Housing lots, as outlined in Section 5.b. may be reduced in order to accommodate the permitted workforce housing units. If it is determined, to the satisfaction of the Planning Board, that market Rate Housing lots cannot be reduced enough or at all because of septic and/or water supply regulations in order to accommodate the total permitted housing unit density, then the Planning Board may consider one or more of the following options in order to accommodate the increased density
6. Workforce housing units shall contain no more than ~~three~~ two bedrooms.

### **March 2021**

**Amend Article XIV, Sign Ordinance, paragraph I, Event Specific Signs** by removing the reference to “political candidates”, deletes 6. ~~Political posters shall not exceed 6 square feet of sign surface area.~~ In addition, amend **paragraph L. Exemptions** by adding a new 15. Political signs, which are regulated under RSA 664:17 as amended.

**Amend Article XXI: Housing For Older Persons, I. General Standards, a.** as follows: “Dwelling unit density shall not be greater than ~~one two (1 2)~~ two-bedroom dwelling units ~~or two (2) one bedroom dwelling units~~/net tract acre..”, and e. “The minimum lot area shall be ~~20 30~~ acres and..”. **paragraph 3. MAXIMUM PERMITTED DWELLING UNITS:** The maximum number of housing for older persons dwelling units ~~approved in a calendar year~~ **shall not exceed 10% of the total number of dwelling units existing in town.** ~~, when added to all previously approved units of housing for older persons, shall not exceed twenty five percent (25%) of the total dwelling units existing in the Town for the previous year.~~

**Amend Section XI, Overlay Zoning Districts, A. Aquifer Protection Overlay Zone (APO), paragraph 6. PROHIBITED USES IN THE AQUIFER PROTECTION OVERLAY ZONE,** by adding the following: *A. Subsurface storage of petroleum, other refined petroleum products, or other Hazardous or Toxic Materials as defined in RSA 147-A.* **And paragraph 7. NONCONFORMING USES IN THE AQUIFER PROTECTION OVERLAY ZONE,** by adding a new **paragraph b.** *Notwithstanding subparagraph 7. a. above, no underground storage tanks for petroleum, other refined petroleum products, or hazardous materials may be repaired or replaced unless repaired or replaced in kind with no expansion or modification to approved site plans. All failed underground storage tanks must be removed according to standards established by NH state statutes and regulations.*

**Amend Section X, Zoning Districts, (C) Industrial Zone (I), 1 Permitted Uses in the Industrial Zone, b.** as follows: Manufacturing - provided that smoke emitted by any stack shall not equal or exceed in density Ringelman No. 2 for periods aggregating more than 4 minutes in any half-hour period, and that all state air quality standards are met. ***In order to ensure that noise outside of lot lines is not objectionable due to intermittence, beat frequency, or shrillness, noise shall be limited to no more than that of average weekday traffic on the surrounding streets. No objectionable, obnoxious, or dangerous concentrations or quantities of odor, dust, fly ash, gases, or fumes are emitted and no excessive vibration is caused.*** ~~Provided also, that noise outside of lot lines does not exceed in intensity that of average weekday traffic on the surrounding streets so as not to be objectionable due to intermittence, beat frequency, or shrillness, and no objectionable, obnoxious, or dangerous concentrations or quantities of odor, dust, fly ash, gases, or fumes are emitted and no excessive vibration is caused~~ The items listed under prohibited uses are intended as a guide and not a complete list. Wastewater must be of equal quality to

that of the proposed receiving waters.

**Amend Section XI: Overlay Zoning Districts, D. Multi-family Zone, Paragraph 1 Purpose**, to read as follows: *The intent of this Section is to define the requirements related to the development of multi-family housing. The opportunity to construct multi-family housing must include considerations to prevent overutilizing of the land. The development plan must follow all applicable federal, state, and local laws with respect to such housing. Compliance with local planning standards, land use policies, good building design, and requirements for the health, safety, and general welfare of all the inhabitants of the Town must be ensured.* ~~The intent of this Section is to define the requirements related to the development of multi-family housing and prevent overcrowding of land while ensuring compliance with local planning standards, land use policies, good building design, and requirements for the health, safety, and general welfare of all the inhabitants of the Town.~~  
**Amend 2. General Standards, Amend paragraph k.** as follows: “In order to minimize potential intrusion on neighboring land uses, the Planning Board shall require the installation of a ~~400~~ **50** foot *landscaped* buffer strip along the perimeter of the site.”

**Amend Section XVIII Workforce Housing, Section A, Purpose**, as follows: *The purpose of this section is as follows: 1. To encourage and provide for the development of affordable workforce housing; 2. To ensure the continued availability of a diverse supply of home ownership and rental opportunities for low to moderate income households; 3. To meet the goals related to affordable housing provisions set forth in the town’s Master Plan; and 4. To comply with the requirements of SB 342, an Act establishing a mechanism for expediting relief from municipal actions which deny, impede, or delay qualified proposals for workforce housing (RSA 674:58-61).* ~~is to define the requirements related to the development of workforce housing in compliance with RSA 674:58-61 and to prevent the overcrowding of land while complying with all applicable state and federal laws with respect to such housing and at the same time, ensuring compliance with local planning standards, land use policies, good building design, and requirements for the health, safety, and general welfare of all the inhabitants of the Town.~~

**Amend Section G, Workforce Housing General Requirements**, by adding the following: *d. The Planning Board shall request additional information if, in their judgment, it is necessary to make a meaningful determination of affordability.* And 2. ~~Documentation to establish the economic viability of the proposal~~ *At the Planning Board’s discretion, the applicant shall be required to submit project cost estimates* including land, development and construction costs; financing, profit, and sales costs; and other cost factors ~~will~~ *shall* be provided. The planning board shall request updates of these cost reports as the project progresses. **Amend Section I. Administration, Compliance and Monitoring, paragraph 2.** by deleting the sentence: ~~Where workforce housing applicants propose a development of single family homes all provisions of the subdivision and site plan regulations shall apply.~~

**Amend Section XX: Hollis Open Space Planned Development, Section 3. Purpose**, as follows: by adding c. *Discourage the sprawling, land-consuming form of development usually resulting from conventional subdivision and h. Provide a variety of types of living spaces and environments.* **Amend Section 4. Applicability and Procedures in a HOSPD** as follows: A. Applicability: *To facilitate achievement of the goals of the Hollis Master Plan*, all major subdivisions shall be presented to the Planning Board in accordance with the Hollis Open Space Planned Development (HOSPD) standards as specified in this section and in the Land Subdivision Regulations. *In all cases it shall be assumed that a HOSPD plan is necessary to meet the goals and objectives of this section and of the Master Plan.* **Amend Section 6. Workforce Housing Units/Owner Occupied, paragraph 1. Density:** The maximum number of allowable dwelling units that could be developed under the provisions outlined in Section 5.a shall be determined following the standard practice for a Market Rate Housing development. Once the number of HOSPD lots has been determined and agreed to by the Planning Board then that lot figure may be increased by up to ~~40~~ **20%** if it is shown that construction of workforce housing would otherwise not be economically viable. These additional lots shall be designated as workforce housing units/owner occupied. Amend paragraph 6 to read as follows: Workforce housing units shall contain no more than ~~three~~ **two** bedrooms.

# THE PLANNING ORDINANCE OF 1967

## TOWN OF MASON

(Incorporating Amendments through March 2011)

### ARTICLE I: PREAMBLE AND TITLE

#### A. Preamble

In pursuance of authority conferred by Chapter 674, Sections 16-50, and Chapter 672, Sections 10-14, of the State of New Hampshire Revised Statutes Annotated, 1955, and as it may be amended and for the purpose of promoting the health, safety, morals, prosperity, convenience or general welfare, as well as efficiency and economy in the process of development of the incorporated Town of Mason, New Hampshire, by securing from fire, panic and other dangers, providing adequate areas between buildings and various rights of way, by preserving the rural charm now attached to the town, the promotion of good civic design and arrangements, wise and efficient expenditure of public funds, and the adequate provision of public utilities and other public requirements and by other means, now therefore, the following ordinance is hereby enacted by the voters of The Town of Mason, New Hampshire in official meeting convened.

#### B. Title

This ordinance shall be known and may be cited as the "Town of Mason Planning Ordinance of 1967" hereinafter referred to as "this Ordinance".

### ARTICLE II: ESTABLISHMENT OF ZONING DISTRICTS

#### A. Districts

For the purpose of this Ordinance the Town of Mason is divided into the following three zoning districts hereinafter referred as "District" and including the following: (1) Village Residential (VR) District; (2) General Residential, Agricultural, and Forestry (GRAF) District; (3) Historic Preservation (HP) District.

#### B. Zoning Map

The Zoning districts listed above shall be bounded as shown on the Map entitled "Town of Mason Zoning Map of 1967" which map is attached hereto and made part of this Ordinance and is hereinafter referred to as the "Zoning Map".

#### C. Boundaries

Unless otherwise indicated, District boundaries as shown on the Zoning Map, are the centerlines of highways and streets, the middle of the channel of waterways or other bodies of water, or where such boundary is also a town boundary then to the limits of the town boundary. Where boundaries are so indicated that they parallel the centerline of highways or streets, such

boundaries shall be interpreted as parallel thereto and the distance therefrom as shown on the Zoning Map. Any boundary within ten feet of a property line shall be considered as the property line. Where no dimension is given on the Zoning Map, distances shall be determined by the scale shown on the map.

### **ARTICLE III: INTERPRETATION AND APPLICATION**

#### **A. Interpretation**

In interpreting any provision of this Ordinance, it shall be held as the minimum requirement, adopted for the promotion of the public health, morals, safety or the general welfare. Whenever any requirement of this Ordinance is at variance with the requirements of any other lawfully adopted rules, regulations, or ordinances, the most restrictive, or that imposing the highest standard, shall govern.

#### **B. Application**

The provision of this Ordinance shall apply to all uses, structures, and lots within the Town of Mason, New Hampshire, except those publicly owned by a unit of government. Whenever any existing use or structure is not in conformity with the provisions of this Ordinance, it may continue to exist subject to the provisions of Article VI. Any use not listed as a permitted use shall be construed to be prohibited. No conforming use or structure shall become nonconforming or any nonconforming use or structure become further nonconforming by any manner or action whatsoever except in accordance with the provisions of this Ordinance or by other legal action of a jurisdiction setting aside a provision of this Ordinance.

### **ARTICLE IV: GENERAL PROVISIONS**

- A. No junk yard or place for the storage of discarded machinery, vehicles, or other scrap materials shall be permitted in any Districts, except that after a public hearing in which evidence on both sides is heard, the Board of Adjustment shall have authority to decide whether the permit shall be issued or not, and then only in the GRAF District and as approved in accordance with New Hampshire Revised Statutes Annotated, 1955, as amended in 1965, Chapter 236:111-129, MOTOR VEHICLE JUNK YARDS.
- B. No owner or occupant of land shall permit fire or other ruins to be left, but shall remove the same within one year.
- C. Any use that may be obnoxious or injurious by reason of the production or emission of odor, dust, smoke, refuse matter, fumes, noise, vibrations, glare, or similar conditions, or that are dangerous to the comfort, peace, enjoyment, health or safety of the community or lending to its disturbance or annoyance are prohibited.
- D. The removal of clay, sod, loam, sand, or gravel is permitted in any District, provided that:
  - 1. No sod or loam is taken out of the town, (sod grown commercially on a sod farm is exempt from this restriction);
  - 2. Such removal shall require, as the Board of Selectmen deem necessary:
    - a. control of the unfinished level and grading;

- b. control of the placing of topsoil upon completion of excavation, seeding, and planting with approved materials to restore the area to a usable condition protected from erosion and reforested as necessary;
  - c. control of temporary and permanent drainage;
  - d. disposition of boulders, vegetation, stumps and other debris including unused material and any structure used in connection with the operation;
  - e. the construction of necessary fencing to protect against hazards;
  - f. vegetation to remain as a visual barrier;
  - g. hours of operation, except that, hours of operation will not be limited during the normal working day;
  - h. routing and means (including load limits) for transportation of materials;
  - i. posting of a performance bond with sufficient sureties or other security in the amount sufficient to cover items "a" through "f" and any other conditions said Board may require.
3. The removal of more than 1000 cubic yards of clay, sand, gravel or peat in any one year shall require in addition a permit from the Board of Selectmen.
- E. The production, cutting, and processing of forest products shall be permitted in any District provided that no processing or attendant operation, except cutting, shall be carried on or slash left within 100 ft. of any dwelling or residence, 50 ft. from the edge of any roadway, and 25 ft. from any other property line.
- F. In any District, no person shall be permitted to live in a cellar or basement for longer than one year pending completion of the upper portion of the residence.
- G. No privy, septic tank, or any portion of a sewage disposal area shall be constructed or maintained less than 75 feet from the edge of a public water body, from a well, from adjoining property, or from a building or dwelling other than that to which it is appurtenant.
- H. No waste waters or sewage shall be permitted to run free into a public water body or be discharged in any way that may be offensive or detrimental to the health of others. All such waste shall be conveyed away underground through use of an accepted sanitary system or in such a way that it will not be offensive or detrimental to health.
- I. All buildings and sanitary systems shall be constructed and maintained in accordance with the standards set and enforced by the New Hampshire State Department of Health and by the New Hampshire Water Pollution Commission. (A set of such standards is on file with the Town Clerk.)
- J. A private well or other private water system shall be constructed and maintained in accordance with the requirements of the Public Health Service Drinking Water Standards. (A set of such standards is on file with the Town Clerk.)
- K. If any proposed use is such as to attract vehicles, ample space shall be provided on the property to accommodate all such vehicles attracted by the use. If vehicles attracted by use may cause damage to roads because of weight, size, operation or spillage, a bond satisfactory to the Selectmen shall be posted to cover anticipated repair costs.
- L. (Deleted.)

- M. The use of land for the accommodation or storage of recreational vehicles and/or mobile homes for payment is prohibited. Any property owner or lessee may accommodate a recreational vehicle of a non-paying guest for a period not exceeding ninety (90) days in any one year. Mobile homes may be used as permanent dwellings only in the GRAF District, providing that they comply with all area, frontage, setback and other requirements as set forth for that District. Mobile homes shall be in accord with US Department of Housing and Urban Development Mobile Home Construction and Safety Standards. This Section shall apply only to mobile homes utilized for residential purposes and is not intended to restrict the storage or parking of a single recreational vehicle. A single mobile home may be stored on the premises of the owner during periods of non-use, upon approval of the Board of Selectmen.
- N. Dwellings shall require a full frost-free foundation which complies with the current Mason Building Code.
- O. Commercial advertising signs in Mason, with the exception of directional signs described in paragraph O.1.b below, must be on the property on which the enterprise being advertised is located. Such signs shall conform to the following provisions:
1. Signs in the GRAF district (as defined in Article V) in Mason are subject to these stipulations:
    - a. Signs advertising enterprises in Mason must conform to one of the following classes:
      1. Class 1: A single free-standing sign is allowed. The total area of the signboard shall not exceed fifteen square feet in area; both sides of the signboard may be used. The top of the signboard shall not exceed twelve feet in height.
      2. Class 2: Signs affixed to the building housing the enterprise are allowed. The total area of the sign or signs shall not exceed fifteen square feet in aggregate area. None of these signs shall be attached to or protrude above the roof.
      3. Class 3: A single temporary sign is allowed, only for purposes of indicating that the property is for sale or lease. This sign may be either: free-standing, in which case it must conform to the provisions in paragraph O.1.a.1; or affixed to the building, in which case it must conform to the provisions in paragraph O.1.a.2.
    - b. In addition, directional signs may be placed on property other than that on which the enterprise is located, but only with the consent of the owner of the property. These signs shall not be in the town or state right of way. Each sign is restricted to no more than one and one-half square feet in area. For a given enterprise, no more than one sign shall be placed within any two-mile section of road; with the exception that if directional signs are required at more than one corner within a two-mile section of road, such additional signs shall be allowed. No enterprise shall have more than twelve directional signs within the town of Mason.

- c. No sign shall be neon, animated, or flashing. All illumination of signs shall conform to the requirements of Article XXIII, Outdoor Lighting Ordinance.
  - d. No sign for a business shall be positioned in such a manner that it impedes the line of sight of drivers in or on public ways.
2. Signs in the VR district (as defined in Article V) in Mason shall comply with the requirements listed in O.1 and further shall be limited to fifteen square feet in aggregate area, not including a temporary sign as defined in paragraph O.1.b.
  3. Signs in the Historic District (as defined in Article V) in Mason shall comply with the requirements listed in O.1, shall be limited to fifteen square feet in aggregate area, not including a temporary sign as defined in paragraph O.1.b, and must be approved by the Historic District Commission.
  4. Existing signs on enterprises in Mason at the time of this amendment are exempt from the amended provisions. However, if an existing sign is changed or removed, by intent or act of God, any replacement must conform to the amended provisions.
- P. Conventional accessory structures such as play equipment, tent, mail box, outdoor fireplace, and similar structures normally found on such lots, also roadside stands, fences, warning signs, walls, trees, shrubs and all vegetation may be located on the lot in any location that does not interfere with the normal flow of traffic on a public right-of-way.

**ARTICLE V: ZONING DISTRICTS**

The following Districts shall be established for the following purposes and shall be subject to the following provisions:

**A. The Village Residential (VR) District**

The Village Residential (VR) District shall enjoy the following provisions: (It shall be mainly a District of dwellings.)

1. One-family, year-round, seasonal or farm dwelling.
2. Home produce and products may be bought and sold, and exposed for sale in this District.
3. Dwellings may be used to house such uses by the owner or tenant as offices for doctor, engineer, architect, lawyer, real estate and insurance, or other recognized profession, or such home occupation as hairdressing, dressmaking, manufacture of craft products for sale, or manufacture of food products, provided: (a) official residence shall be maintained on the premises in question, (b) professional home-occupation use shall not occupy more than forty percent of the floor area of the dwelling, and (c) not more than one non-resident shall be employed therein.
4. Uses by Special Exception as outlined in Article VIII, Section A2.

5. Accessory buildings such as barn, shed, kennel, private garage, or similar outbuildings normally found in residential and farm areas and not involving the conduct of a business, except for the exclusive sale of home produce and products.
6. Frontage and Lot Area. The minimum frontage shall be 200 ft. on a Class V highway or better and the minimum lot size shall be 88,000 sq. ft. per dwelling.
7. Front, Side and Rear Set Back. No building shall be located within 35 ft. of any right-of-way or lot line.

**B. The General Residential, Agricultural, And Forestry (Graf) District**

The General Residential, Agricultural, And Forestry (GRAF) District shall enjoy the following provisions: (It shall be mainly a District of farms, dwellings and woodlands.)

1. Any use permitted in the VR District subject to the same provisions of use.
2. Mobile homes (excluding recreational vehicles) when placed on a permanent foundation as set forth in Article IV, Section M of this Ordinance.
3. General farming, including horticulture, dairying, livestock and poultry raising, and other agricultural enterprises or uses, general forestry and granite quarrying.
4. Frontage and Lot Area. A conventional lot shall be 350 ft. on a Class V highway or better and the minimum lot area shall be 174,240 sq. ft. per dwelling unit.

Notwithstanding the frontage and lot area imposed by this section, a lot approved by the Planning Board prior to March 11, 2008 shall be deemed conforming to the minimum size and frontage requirements of the GRAF zone.

5. Front, Side and Rear Set Back. No building shall be located within 35 ft. of any road right-of-way or of any other lot.

**C. The Historic Preservation (Hp) District**

The Historic Preservation (HP) District shall enjoy the following provisions: (The purpose shall be to preserve and protect from encroachment the historical heritage of buildings and lands in the District.)

1. Any use permitted in the VR District subject to the same provisions of use and area, with the additional provision that the existing colonial or other architectural treatment of the District shall be maintained in any alterations or improvements to existing buildings or in the construction of new buildings.

**ARTICLE VI: NONCONFORMING USES AND STRUCTURES**

- A. Any nonconforming use or structure may continue in its present use and form, except that any nonconforming use or structure may not be:
  1. Altered for use for a purpose or in a manner substantially different from the use to which it was put before alteration.

2. Changed to another nonconforming use.
3. Re-established after discontinuance for one year except to a use and structure conforming to the District in which it is located.

## **ARTICLE VII: ADMINISTRATION AND ENFORCEMENT**

### **A. Duty**

It shall be the duty of the Selectmen and they are hereby given power and authority to administer and enforce the provisions of this Ordinance. The Selectmen shall appoint a Building Inspector to accept and issue permits and inspect, but not to enforce this Ordinance.

### **B. Permit Issuance**

The Building Inspector shall issue any and all permits requested when such permit is in accordance with the provisions of this Ordinance.

### **C. Permit Required**

After passage of this Ordinance, it shall be unlawful to erect and use any structure, sign, or building, or relocate any building (except an accessory building less than 200 sq. ft. in size not for human occupancy), in any District without first obtaining a permit from the Building Inspector.

### **D. Remodeling**

No permit shall be required for remodeling or repairing where the purpose for which the building or structure is to be used is not changed, or the building is not enlarged or the use extended.

### **E. Enforcement**

Upon any well-founded information that this Ordinance is being violated, the Selectmen shall take immediate steps to enforce the provisions of this Ordinance by notifying the violator and by seeking an injunction in Superior Court.

## **ARTICLE VIII: BOARD OF ADJUSTMENT**

A Board of Adjustment is hereby created and its members shall be appointed by the Board of Selectmen in accordance with, and shall have the terms and powers hereby conferred upon the Board of Adjustment by the provisions of Chapter 673:3 and 674:3, New Hampshire Revised Statutes Annotated, 1955, and as may be amended. Hereafter as terms expire or vacancies occur, the Board of Selectmen shall be responsible for filling vacancies and maintaining full membership on the Board of Adjustment. The Board of Adjustment shall adopt rules to govern its proceedings in accordance with the provisions of this Ordinance, and the provisions of Chapter 673, New Hampshire Revised Statutes Annotated, 1955, and as may be amended. The Board of Adjustment may hear and decide a case where it is alleged there is an error in any order, requirement, decision, or determination made by the Selectmen or the Building Inspector in the enforcement of this Ordinance.

- A. In addition to the general powers granted said Board by said Chapter 674:33, it may, in harmony with and subject to its provisions:

1. Waive the Residential frontage requirements where there are unusual conditions of street curvature. In such cases, however, the average width of the lot shall be equal to or greater than the frontage requirements.
  
2. Special Exceptions: The following uses may be permitted as special exceptions in the districts designated, subject to the satisfaction of the requirements and standards set forth herein in addition to all other requirements and standards of this Ordinance. The Board of Adjustment shall have the power to grant special exceptions after due notice and hearing, and each case shall be deemed to be unique and shall be considered individually.
  - a. Uses Permitted by Special Exception in the Historic Preservation District: church, school and municipal facility.
  
  - b. Uses Permitted by Special Exception in the Village Residential District: any use permitted in the Historic Preservation District, plus inn, tourist home or lodging house (including such retail business within these permitted buildings as are conducted exclusively for the convenience of the residents or guests), retail store or service establishment (the principal activities of which shall be the offering within the building or on the premises of goods or services at retail for the use or consumption within the building or off the premises), restaurant, a business or professional office, bank, indoor live theater or hall, health care facility.
  
  - c. Uses Permitted by Special Exception in the General Residential, Agricultural and Forestry District: any use permitted in the Village Residential District plus light manufacturing enterprise, automobile repair shop, service station, recycling center, office building, public utilities (telephone exchange, transformer station, and pumping station) and seasonal outdoor entertainment use (limited to three (3) or less events per week from Memorial Day Weekend to and including Columbus Day Weekend, ending no later than eleven (11) PM holidays and weekends and ten (10) PM on weekdays).
  
  - d. Standards:
    - (A) Before such approval shall be given, the Board of Adjustment shall determine:
      1. that the use will be in harmony with and promote the general purposes and intent of this ordinance;
      2. that the safety, the health, the welfare and the order of the Town will not be adversely affected by the proposed use and its location;
      3. that the use will not prevent the orderly and reasonable use of permitted or legally established uses in the district wherein the proposed use is to be located or of permitted or legally established uses in adjacent use districts;
      4. that the use will not prevent the orderly and reasonable use of adjacent properties or of properties in adjacent use districts.

- (B) In making a decision, the Board of Adjustment shall determine:
1. that the intent of the preamble is upheld;
  2. that the character of the existing and probable development of uses in the district, and the peculiar suitability of such district for the location of any of such permissive uses;
  3. that the most appropriate use of the land is encouraged and that there will be no devaluation of surrounding properties;
  4. that the location of the proposed use will not overburden the public streets or highways;
  5. that there will be adequately surfaced space for purposes of off-street parking of vehicles incidental to the use, and whether such space is reasonably adequate and appropriate and can be furnished by the owner of the plot sought to be used within or adjacent to the plot wherein the use shall be had;
  6. that there will be adequate and proper facilities for the treatment, removal or discharge of sewage, refuse or other effluent (whether liquid, solid, gaseous or otherwise) that may be caused or created by or as a result of the use;
  7. that the use or materials incidental thereto, or produced thereby, will not give off obnoxious gases, odors, smoke or soot;
  8. that the use will not cause excessive emission of electrical discharges, dust, light, vibration or noise;
  9. that no hazard to life, limb or property because of fire, flood, erosion or panic will be created by reason of, or as a result of the use, or by the structures to be used therefore, or by the inaccessibility of the property or structures thereon for the convenience of entry and operation of fire and other emergency apparatus or by the undue concentration or assemblage of persons upon such plot;
  10. that the use, or the structures to be used therefore, will not cause an overcrowding of land or undue concentration of population;
  11. that the plot area is sufficient, appropriate and adequate for the use and the reasonable anticipated operation and expansion thereof;
  12. that the use to be operated is not unreasonably near to a church, school, theater, recreational area or other place of public assembly; and,
  13. that the use will be adequately landscaped including greenbelts and or setbacks as necessary to preserve the rural charm.

**ARTICLE IX: AMENDMENT**

This ordinance may be amended in accordance with the provisions of Chapters 675:3 through 675:9, New Hampshire Revised Statutes Annotated, 1955, and as may be amended.

**ARTICLE X: PENALTY**

Every person, persons, firm or corporation violating any of the provisions of this Ordinance shall be fined not more than Fifty Dollars (\$50) upon conviction for each day such violation exists.

**ARTICLE XI: SAVING CLAUSE**

The invalidity of any provision of this Ordinance shall not affect the validity of any other provision.

**ARTICLE XII: WHEN EFFECTIVE**

This Ordinance shall take effect immediately upon its passage.

**ARTICLE XIII: (DELETED)**

**ARTICLE XIV: DEFINITIONS**

A. For the purposes of this Ordinance, certain terms, phrases and words shall have the meaning given herein. Words used in the present tense include the future; the singular includes the plural and the plural, the singular; the word "used" shall be constructed as though followed by the words "or intended or designed to be used"; the words "building", "structure", "lot", or "premises" shall be constructed as though followed by the words "or any portion thereof", and the word "structure" includes the word "building". The word "shall" is always mandatory and not merely directory.

1. ***Accessory Building*** - a detached building subordinate to the main building on a lot and used for purposes customarily incidental to those of the main building.
2. ***Accessory Use*** - a land use located on the same lot which is incidental and subordinate to the main structure or use of the land.
3. ***Building*** - a structure having a roof and intended for the shelter, housing or enclosure of persons, animals or chattel.
4. ***Dwelling*** - one or more living or sleeping rooms arranged for the use of one or more individuals living as a single housekeeping unit with cooking, living, sanitary and sleeping facilities.
5. ***Family*** - one or more persons related by blood, marriage or adoption, or maintaining a single household on the premises and living as a single housekeeping unit.
6. ***Granite Quarrying*** - the extraction and processing of granite, but not including stone crushing.
7. ***Home Produce and Products*** - includes everything of an agricultural nature grown, produced, conditioned or otherwise carried on the property of the resident; also such

articles that are manufactured or altered by members of the household or the bona-fide resident of the property.

8. **Junk** - any old metals; old bottles; cotton, woolen, or wood-mill wastes; unfinished cloth; unfinished cotton or woolen-mill yarns; old paper products; old rubber products; two or more unregistered motor vehicles which are unfit for use on highways, used parts and materials for motor vehicles; and other second-hand articles.
9. **Lot** - a parcel of land occupied or capable of being occupied by one structure or use and the structures or uses accessory thereto including such open spaces and setbacks as are required by this Ordinance. A lot may or may not be the land shown or described as a lot on a recorded deed or plan.
10. **Mobile Home** - a manufactured residential dwelling unit designed for transportation after fabrication, on streets or highways, on its own wheels or on a flatbed or other trailer, and arriving on the site where it is to be occupied as a dwelling complete and ready for occupancy except for minor and incidental unpacking and assembly, location on a foundation, connections to utilities and the like. A recreational vehicle is not to be considered a mobile home.
11. **Recreational Vehicle** - a travel trailer, motor home, camper, van, or the like.
12. **Permanent Resident** - a family who have used any building continuously as a residence for a period of six months or more.
13. **Public Hearing** - a hearing as defined by New Hampshire Revised Statutes Annotated, 1955, Chapter 675:7, and as amended.
14. **Right-of-Way** - all state, town and federal highways and the land on either side of same as covered by statutes to determine the width of rights of way.
15. **Seasonal Building** - a building of a design or character suitable for seasonal purposes, or not more than 180 days occupancy in any one calendar year.
16. **Sign** - any device for visual communication that is used for the purpose of bringing the subject thereof to the attention of the public.
17. **Structure** - anything constructed or erected, the uses of which require location on the ground and includes a building or sign.
18. **Structure, Nonconforming** - a structure which is lawfully maintained at the time this Ordinance became effective and which does not conform with the regulations of the District in which it is located.
19. **Substantially Different Use** - a use not permitted within the District in which the particular use in question is located.
20. **Inn, Motel, Tourist Home or Lodging House** - a building, or portion thereof, or a group of buildings on a single lot, intended to be used for temporary accommodation, consisting of not more than six (6) lodging units with or without meals and which major

provision for cooking may be made in a central kitchen, but may not be in the individual rooms or suites.

21. **Rooming or Boarding House** - a building or premises, other than an inn, motel, tourist court or lodging house, where rooms are let and where meals may be regularly served by prearrangement for compensation; not open to transient guests, in contrast to restaurants and tourist homes, which are open to transients.
22. **Travel Trailer** - a vehicle designed for temporary recreational use and not intended for residential purposes.
23. **Use, Nonconforming** - a use which lawfully occupied or used a structure or lot at the time this Ordinance became effective and which does not conform with use regulations of the District in which it is located.
24. **Year-Round Building** - a building of a design or character suitable for year-round purposes, or more than 180 days occupancy in any one calendar year.
25. **Service Station** - a structure or lot used for the sale of gasoline and minor servicing. No storage beyond seventy-two (72) hours of such motor vehicles on the premises other than those in process or awaiting repair or pickup after repair.
26. **Auto Repair Shop** - a shop or garage for major repair of motor vehicles and sale of gasoline. All vehicles in storage shall be screened from public view.
27. **Store** - an establishment where merchandise is sold.
28. **Establishment** - a place of business together with its employees, merchandise, etc.
29. **Recycling Center** - a structure or area, singular or in combination, devoted to the collection, packaging and dispersal of refuse (excluding garbage). It must be enclosed by a fence not less than ten (10) feet high, surrounded by a natural buffer zone not less than two hundred (200) feet in depth on all sides and situated on a minimum ten (10) acre site. The operating equipment shall not exceed the height of the buffer zone.
30. **Light Manufacturing Enterprise** - a facility limited to six (6) employees, not greater than 2,500 enclosed square feet, subject to all aforementioned standards; e.g. noise, pollution, waste generation.
31. **Commercial Use** - the buying and selling of goods and services in retail businesses, wholesale buying and selling, and financial establishments.
32. **Industrial Use** - the manufacture, fabrication, processing, reduction or destruction of any article, substance or commodity, or any other treatment thereof in such a manner as to change the form, character or appearance thereof, and including storage elevators, truck storage yards, warehouses, wholesale storage and other similar types of enterprise.

**ARTICLE XV: DISTRICT BOUNDARIES****A. Boundaries of Village Residential (VR) District**

Due east from the intersection of Darling Hill Rd. and the Mason town line for exactly one mile; thence, south-south-easterly in a direct line to the intersection of the Boston and Maine RR and Jackson Rd., thence southerly along the railroad tracks to the Mason town-line; westerly along the Mason line to Mason Brook, thence northerly along Mason Brook to a point due east of the southeast corner of Greenville, thence due west to Greenville's southeast Corner, and northerly along the Mason town-line to Darling Hill Rd. The area included in the HP District is not part of the VR District.

**B. Boundaries of Historical Preservation (HP) District**

From a point on Mason Brook 500 ft. north of Merriam Hill Rd. in a straight line northeasterly to a point on Darling Hill Rd. due west of the intersection of Meeting House Hill Rd. and Scripps Lane; thence, easterly across Meeting House Hill Rd. to a point 500 ft. northeasterly on Scripps Lane; southwesterly then southeasterly along Meeting House Hill Rd. and Valley Rd. keeping 500 ft. from the road at all times to a point due east of the intersection of Cascade Rd. and Valley Rd., due west to the intersection, westerly along Cascade Rd., to Mason Brook, thence northerly along Mason Brook to point of origin.

**C. Boundaries of the General Residential, Agricultural, and Forestry (GRAF) District**

The boundaries of the GRAF District shall be the Town Boundaries, excluding the land included in the VR and HP Districts.

**ARTICLE XVI: WETLANDS CONSERVATION DISTRICT ORDINANCE****A. Purpose And Intent**

In the interest of public health, safety, and welfare, the regulations of this District are intended to guide the use of areas of land with extended periods of high water tables:

1. To prevent the development of structures and land uses on naturally occurring wetlands which would contribute to pollution of surface and groundwater.
2. To prevent the destruction of natural wetlands which provide flood protection, recharge of groundwater supply, and augmentation of stream flow during dry periods.
3. To protect potential water supplies and existing aquifers (water-bearing strata) and aquifer recharge areas.
4. To prevent unnecessary or excessive expenses to the Town to provide and maintain essential services and utilities.
5. To encourage those uses that can safely and appropriately be located in wetland areas.

**B. District Boundaries**

1. Wetlands Conservation District Defined

The Wetlands Conservation District is hereby determined to be all surface waters and wetlands as determined by the following criteria. The edge of the wetland shall be defined by NH RSA 482-A:2, X as established and defined by the Corps of Engineers Wetlands Delineation Manual, Technical Report Y-87-1, Environmental Laboratory, Department of the Army, 1987:

“Wetlands” means an area that is inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support, and that under normal conditions does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.

## 2. Delineation of Wetlands

Wetlands in the Town of Mason shall be determined in accordance with NH RSA 482-A and the criteria referenced under Article XVI.B.1 through site specific delineation conducted by a soil or wetland scientist certified by the State of New Hampshire. A certified soil or wetlands scientist determination is not required for minimum impact projects unless they are part of a subdivision.

## 3. Wetlands Incorrectly Delineated

In the event that the Planning Board or the Zoning Board of Adjustment disputes the delineation of an area as determined by the applicant’s certified soil or wetland scientist, the Planning Board or Zoning Board of Adjustment may, at the expense of the applicant, retain its own soil or wetland scientist certified by the State of New Hampshire to delineate the area in question.

## C. Relation To Other Districts

In all cases where the Wetlands Conservation District conflicts with the provisions of another zoning district in the Town of Mason, that district whose regulations are more restrictive shall apply.

## D. Permitted Uses

Any use that does not result in the erection of any structure or alter the surface configuration by the addition of fill and that is otherwise permitted by the zoning ordinance:

1. Forestry, tree farming, using best management practices in order to protect streams from damage and to prevent erosion and sedimentation;
2. Cultivation and harvesting of crops according to recognized soil conservation practices, including the protection of wetlands from pollution caused by fertilizers, pesticides, and herbicides used in such cultivation;
3. Water impoundments and construction of wells for water supply;
4. Maintenance of existing drainage ways - streams, creeks, or other paths of normal runoff water;
5. Wildlife habitat management;

6. Parks and such recreational uses as are consistent with the purposes and intent of this ordinance;
7. Conservation areas and nature trails;
8. Open space as permitted by subdivision regulations or zoning ordinance.

#### **E. Special Exceptions**

Special exceptions may be granted by the Board of Adjustment for the following uses within the Wetland Conservation District. The Mason Conservation Commission will be requested to comment on applications requiring special exception.

1. Streets, roads, and other access ways and utility rights of way easements including power lines and pipe lines if essential to the productive use of land not so zoned and if so located and constructed as to minimize any detrimental impact of such uses upon the wetlands;
2. The undertaking of a use not otherwise permitted in the Wetland Conservation District, which may include the erection of a structure, dredging, filling, draining, or otherwise altering the surface configuration of the land, if it can be shown that such proposed use will not conflict with the purpose and intentions of this ordinance and if such proposed use is otherwise permitted by the zoning ordinance. Proper evidence to this effect shall be submitted in writing to the Board of Adjustment and shall be accompanied by the findings of a review by the Hillsborough County Conservation District.

#### **F. Special Provisions**

1. No septic tank or leach field may be constructed or enlarged closer than seventy-five (75) feet to any wetland.
2. Wetland areas may be used to satisfy minimum lot areas and setback requirements provided that at least one and one-half acres per lot exist that can fulfill all state standards for sewage disposal and water supply. For on-site septic tank and leach field systems, this shall include both a primary and secondary leach field location.

### **ARTICLE XVII: GROWTH MANAGEMENT ORDINANCE**

Enacted September 1987, repealed March 1991.

### **ARTICLE XVIII: FLOODPLAIN DEVELOPMENT ORDINANCE**

The Federal Emergency Management Agency (FEMA) New Hampshire Model Floodplain Ordinance for Communities with Special Flood Hazard Areas, Meets the Minimum Requirements of Section 60.3(b) of the National Flood Insurance Program Regulations, dated February 21, 1975, as reissued with an effective date of December 1, 1992, and any revisions thereafter, are declared to be a part of this ordinance and are hereby incorporated by reference. The text of this model ordinance is reproduced below in Appendix A. Copies of later revisions, as they become available, will be kept for public inspection at the Town Offices.

**ARTICLE XIX: TELECOMMUNICATIONS FACILITITES ORDINANCE**

**ITEM I AUTHORITY:**

This Ordinance is adopted by the Town of Mason on March 8, 2005 in accordance with the authority granted by the New Hampshire Revised Statutes Annotated 674:16 and 21, II.

**ITEM II PURPOSE:**

These regulations have been enacted in order to establish general guidelines for the siting of towers and antennas and to enhance and fulfill the following goals:

1. Preserve the authority of the Town of Mason to regulate and provide for reasonable opportunity for the siting of telecommunications facilities.
2. Enhance the ability of providers of telecommunications services to provide such services to the community effectively and efficiently.
3. Reduce the adverse impacts such facilities may create on, including, but not limited to: migratory bird flight corridors, impacts on aesthetics, environmentally sensitive areas, historically significant locations, health and safety by injurious accidents to person and property, and diminution of property values.
4. Preserve unique viewsheds and scenic values.

**ITEM III DEFINITIONS:**

1. Antenna - Means any exterior apparatus designed for telephonic, radio, television, personal communications service, pager network, or any other communications through the sending and/or receiving of electromagnetic waves of any frequency and bandwidth.
2. Average Tree Canopy Height - Means the average height found by inventorying the height above ground level of all trees over 20 feet in height for a radius of 150 feet.
3. Tower - Means any structure that is designed and constructed primarily for the purpose of supporting one or more antennas.
4. Telecommunications Facilities - Means any antenna, tower, or other structure intended for use in connection with the transmission or reception of radio or television signals or any other electromagnetic transmission/receptions.

**ITEM IV LOCATION OF TELECOMMUNICATIONS FACILITIES**

Telecommunications facilities may be permitted in all districts, provided that they are camouflaged, hidden or disguised. Historic Districts are specifically exempted from this provision. In no case, however, shall such a facility be sited in a location that would impact any scenic view.

**ITEM V PERMITTED USES**

1. ***Principal or Secondary Use*** - Telecommunications facilities may be considered either principal or secondary uses. Having an existing-permitted use on site shall not preclude the addition of a facility as a Secondary Use as long as all other provisions of the Ordinance are met. A different existing use or an existing structure on the same lot shall not preclude the installation of a facility on such lot. For purposes of determining whether the installation complies with district development regulations, including but not limited to setback and lot coverage requirements, the dimensions of the entire lot shall control, even though the facility may be located on leased parcels within such lots. Facilities that are installed in accordance with the provisions of this Ordinance shall not be deemed to constitute the expansion of a nonconforming use or structure.

Any alteration of the original permitted use and device configuration of the facility will require a new approval.

2. ***Amateur Radio; Receive-Only Antennas*** - This Ordinance does not apply to any antenna used exclusively in the amateur radio services that is eligible under the Amateur Radio Preemption, 101 FCC 2nd 952 (1985).
3. ***Essential Services & Public Utilities*** - Telecommunication facilities shall not be considered infrastructure, essential services, or public facilities, as defined or used elsewhere in the Town's ordinances and regulations. Siting for telecommunications is a use of land, and is addressed by this Section.

**ITEM VI CONSTRUCTION PERFORMANCE REQUIREMENTS**

1. ***Federal Requirements*** - All facilities must meet or exceed current standards and regulations of the FAA, FCC, and any other agency of the federal government with the authority to regulate such facilities. If such standards and regulations are changed, the owners of facilities governed by this Ordinance shall bring these into compliance within six (6) months of the effective date of the changes, unless a more stringent compliance schedule is mandated by the controlling federal agency. Failure to bring facilities into compliance with any changes shall constitute grounds for the removal of the tower or antenna at the owner's expense, in accordance with Section X through the execution of the posted security.
2. ***Building Codes/Safety Standards*** - To ensure the structural integrity of towers and antennas, all facilities will be inspected every (one, two, three? Years) by an engineer approved by the Town, with the cost to be paid by the owner. The engineer will submit a report to the Town. If the report concludes that a tower fails to comply with such codes and standards and constitutes a danger to persons or property, the owner will receive notice that he/she has 30 days to bring such tower into compliance with the standards. If the owner fails to comply within 30 days, such action shall constitute an abandonment and grounds for the removal, in accordance with Section X, of the tower or antenna, at the owner's expense through execution of the posted security.
3. ***Additional Requirements for Telecommunications Facilities*** - These requirements shall supersede any and all other applicable standards found elsewhere in Town Ordinances or Regulations that are less strict.

4. **Height** - All efforts should be made to keep tower height at a minimum; in no case shall a tower exceed 200 feet.
5. **Setbacks and Separation** - In addition to compliance with the minimum zoning district setback requirements for all structures, towers shall be set back a distance equal to 125% of the height of the tower from all property lines.
6. **Security Fencing** - Towers shall be enclosed by security fencing not less than six (6) feet in height and shall also be equipped with an appropriate anti-climbing device.
7. **Landscaping** - A buffer shall be provided that effectively screens the view of the compound from adjacent residential property. The standard buffer shall consist of a landscaped strip at least 10 feet wide outside the perimeter of the compound. Natural vegetation is preferred.

In locations where the visual impact of the compound would be minimal or non-existent, the landscaping requirement may be reduced or waived entirely.

Existing mature tree growth and natural landforms on the site shall be preserved to the maximum extent possible. In some cases, such as towers sited on large wooded lots, natural growth around the property may be deemed a sufficient buffer.

8. **Camouflaging** –
  - a. At a tower site, the design of the buildings and related structures shall, to the maximum extent possible, use materials, colors, textures, screening, and landscaping that will blend the tower facilities with the natural setting and built environment.
  - b. If an antenna is installed on a structure other than a tower, the antenna and supporting electrical and mechanical equipment must be of a neutral color that is identical to, or closely compatible with, the color of the supporting structure so as to make the antenna and related equipment visually unobtrusive.
9. **Balloon Test** - The applicant shall provide notice of a date on which a balloon (or balloons) will be floated at the proposed site, and provide pictures from all locations around town and within 20 miles from which the balloon(s) is visible.

## ITEM VII CONDITIONAL USE PERMITS

1. **General** - Telecommunications Facilities are permitted only after obtaining a Conditional Use Permit from the Planning Board. All such uses must comply with other applicable ordinances and regulations of the Town of Mason.
2. **Issuance of Conditional Use Permits** - In granting the Conditional Use Permit, the Planning Board may impose conditions to the extent the Board concludes such conditions are necessary to minimize any adverse effect of the proposed tower on adjoining properties, and preserve the intent of this Ordinance.
3. **Permit Renewal** - Permits shall be renewable annually. When possible, this time frame shall be consistent with the timing for performance bond renewal.

**ITEM VIII PROCEDURE ON APPLICATION**

The Planning Board shall act upon the application in accordance with the procedural requirements of the Site Plan Review Regulations and RSA 676:4.

All towns within 20 miles of the proposed location will be notified of the public hearing, by certified mail, to be paid by the applicant. A notice will also be posted in the newspaper customarily used for legal notices by these municipalities. Such notice shall be published not less than 7 days nor more than 21 days prior to the public hearing date.

All decisions shall be rendered in writing. A denial must be based upon substantial evidence contained in the written record.

**ITEM IX PLAN REQUIREMENTS**

Each applicant requesting a Conditional Use Permit under this Ordinance shall submit a scaled plan showing or accompanied by the following information:

1. Title block that shows the name of the development or project.
2. North arrow, date of plat, scale; name, address and seal of all persons preparing the plat.
3. Signature block for Planning Board endorsement.
4. Vicinity sketch and zoning district(s).
5. Total area of the parcel in acres and square feet.
6. Lot frontage.
7. Boundary lines and approximate dimensions and bearings.
8. Tax map and lot numbers.
9. Locations and descriptions of any existing or proposed easements, deed restrictions, or covenants.
10. Physical features on the site and within 200 feet of the site.
11. Soil information based on the Hillsborough County Soil Survey.
12. All natural features, such as streams, ponds, wetlands, etc.
13. Existing and proposed grades and contours, and base flood elevations.
14. Shape, size, height, location and use of existing and proposed structures on the site.
15. Existing buildings and structures within 500 feet of the site.
16. Access to the site, with location and width of existing and proposed driveways.

17. A driveway permit been granted from either the NH DOT or the Town of Mason.
18. Locations, names, right-of-way and travel widths of any existing and proposed roads on the property and within 200 feet of the site.
19. Final road profiles and cross sections for any new roads.
20. Locations and sizes of all electric and telephone lines on the site.
21. Existing and proposed fire hydrants and/or fire ponds.
22. Existing and proposed methods of handling stormwater runoff, and the direction of the flow indicated by arrows.
23. Sizes and locations of all stormwater drainage lines, catch basins, drywells, drainage ditches, retention basins, and culverts.
24. Location, types, and sizes of all existing and proposed landscaping and screening.
25. Location of any proposed lighting.

Other Information Required:

In order to assess compliance with this Ordinance, the Planning Board shall require the applicant to submit the following prior to any approval by the Board:

1. Propagation map showing proposed radio frequency coverage.
2. Photographic documentation of the balloon test(s).
3. The applicant shall submit written proof that the proposed use/facility complies with the FCC regulations on radio frequency (RF) exposure guidelines.
4. The applicant shall submit written proof that it has conducted an evaluation of any requirements of the National Environmental Policy Act (NEPA) pertaining to the proposed facility, as may be required under applicable FCC rules, and the results of any such evaluation. If an Environmental Assessment (EA) or an Environmental Impact Statement (EIS) is required under the FCC rules and/or NEPA, the applicant shall submit the EA or EIS to the Board prior to the beginning of the federal 30-day comment period; the Town proceedings with respect to the proposed facility shall become part of the FCC application requirements.
5. The applicant will provide the Board with the following information:
  - a. the number of sites for telecommunication facilities each provider will require;
  - b. sites outside of the Town for the particular coverage area that are being considered;

- c. how the siting of a telecommunication facility will affect the ability to allow a competitor's antennas on the same property;
6. The applicant will provide the Board with studies of alternative sites in Town that have been considered for siting.
7. The applicant shall submit an agreement with the Town that allows for the maximum allowance of co-location upon the new structure. Such statement shall, at a minimum, require the applicant to supply available co-location for reasonable fees and costs to other wireless telecommunication providers. An opportunity for co-location is not to be considered a justification for excessive height of towers. Co-location opportunities shall also not exclude the investigation of alternative sites.
8. The applicant will provide the Board with any copies of the federal license from the FCC proving that they, or their contracted client, are eligible to deploy their systems under the Federal Telecommunications Act of 1996.
9. Upon request, the applicant will provide:
  - a. detailed maps showing all of the carrier's current externally visible tower and monopole locations in the state within a 20-mile radius, both active and inactive; and
  - b. site descriptions for each of the above locations showing the antenna height and diameter, and all externally visible structures.
10. The applicant will submit an agreement to the Town to the effect that the Town will be held harmless for any extraordinary fire or safety events.

#### **ITEM X WAIVERS**

1. Any portion of these regulations may be waived or modified when, in the opinion of the Board, strict conformity would pose an unnecessary hardship to the applicant and such waiver would not be contrary to the spirit and intent of these regulations.
2. Conditions - In approving waivers, the Board may impose such conditions as it deems appropriate to substantially secure the objectives of the standards or requirements of these regulations.
3. Procedures - A petition for any such waiver shall be submitted in writing by the applicant for Board review. The petition shall state fully the grounds for the waiver and all of the facts relied upon by the applicant.

#### **ITEM XI BONDING AND SECURITY INSURANCE**

The applicant shall provide a bond to the Town in an amount that would be sufficient to cover the costs of removal and disposal of the facility components. The Planning Board shall set the form and amount of the security. The Planning Board shall also require the applicant to submit proof of appropriate liability insurance with respect to the proposed facilities prior to construction.

The term of the bond shall be negotiated with the Planning Board and administered by the Selectmen. In addition, if the Board requires an engineering assessment in order to set the amount of the bond, the cost shall be borne by the applicant.

**ITEM XII REMOVAL OF ABANDONED ANTENNAS AND TOWERS**

Any antenna or tower that is not operated for a continuous period of 12 months shall be considered abandoned and hazardous to the public health and safety, unless the owner of said tower provides proof of quarterly inspections. The owner shall remove the abandoned structure within 90 days of receipt of a declaration of abandonment from the Town. A declaration of abandonment shall only be issued following a public hearing, noticed per Town regulations, with notice to abutters and the last known owner/operator of the tower. If the abandoned tower is not removed within 90 days, the Town may execute the security and have the tower removed. If there are two or more users of a single tower, this provision shall not become effective until all users cease using the tower.

In cases of co-location, the agreement shall make clear which owner is responsible for the removal of which facilities and pieces of equipment.

**ITEM XIII ADMINISTRATION AND ENFORCEMENT**

It shall be the duty of the Board of Selectmen, and they are hereby given the power and authority, to enforce the provisions of this ordinance. The Selectmen may appoint an agent to enforce this ordinance.

Upon any well-founded information that this ordinance is being violated, the Selectmen shall take immediate steps to enforce the provisions of this ordinance by seeking an injunction in the Superior Court or by any other legal action.

**ITEM XIV SEVERABILITY**

The invalidity of any provision of this ordinance shall not affect the validity of any other provision.

**ITEM XV APPEALS**

Pursuant to RSA 676:5, any decision made under this ordinance cannot be appealed to the Board of Adjustment, but to the superior court as provided by RSA 677:15.

**ARTICLE XX: ACCESSORY DWELLING UNIT ORDINANCE**

An Accessory Dwelling Unit (ADU) is a second dwelling unit permitted by this ordinance to be located on the same lot as the principal dwelling unit. The ADU may be attached or interior to the principal dwelling unit. It is a complete housekeeping unit with independent cooking, living, sanitary and sleeping facilities.

**A. Purpose and Intent**

1. To provide expanded rental housing opportunities in the Town of Mason, including rental opportunities that qualify as workforce housing.

2. To provide flexibility in household arrangements by permitting a second dwelling unit on a single residential lot, to the benefit of the owner occupants and tenants (elderly persons, extended family members, etc).
3. To preserve the single-family residential character of the neighborhood by ensuring that the accessory dwelling unit preserves the appearance of the principal dwelling unit as a residence, is permitted only on owner-occupied property, and does not endanger the health, safety and welfare of the public.

## **B. Authority**

This ordinance is adopted under the authority of RSA 674:21, Innovative Land Use Controls and the authority of NH RSA 674:58 – 61, Workforce Housing.

RSA 674:58, IV states: "Workforce housing" ... means rental housing which is affordable to a household with an income of no more than 60 percent of the median income for a 3-person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development. Housing developments that exclude minor children from more than 20 percent of the units, or in which more than 50 percent of the dwelling units have fewer than two bedrooms, shall not constitute workforce housing for the purposes of this subdivision.

Rental housing provided by ADUs is not constructed in developments, but by individual landowners. Landowners designing ADUs shall be made aware of these criteria; however, these shall not be requirements for ADUs under this Ordinance.

## **C. Requirements and Limitations**

1. An accessory dwelling unit shall be secondary and accessory to a principal single family dwelling unit.
2. Accessory dwelling units may be established in the General Residential, Agricultural and Forestry zone (GRAF), the Village Residential zone (VR) or the Historic Preservation district (HP).
3. One accessory dwelling unit shall be allowed on a lot containing a single residential structure.
4. The ADU shall be similar in appearance to the principal dwelling unit and not change the character of the principal dwelling unit as a single family residence.
5. In relationship to the principal dwelling unit, an ADU may be:
  - a. Interior to the principal dwelling.
  - b. Attached to the principal dwelling.
6. Accessory dwelling units shall be designed to allow for reincorporation with the principal dwelling unit.
7. The owner of record of the principal dwelling unit must reside in either the principal dwelling unit or the accessory dwelling unit.

8. Size limitations:
  - a. The gross living area above ground (GLAAG) of an ADU shall be a minimum of 350 square feet for a 1-bedroom ADU, 500 sq. ft. for a 2-bedroom ADU and a maximum of 1,000 sq. ft. for any ADU.
  - b. Attached accessory dwelling units shall occupy no more than 40% of the GLAAG of the principal dwelling. (E.g. Existing principal dwelling = 2,000 sq. ft. - 40% of 2,000 sq. ft. = 800 sq. ft ADU maximum size).
  - c. Where interior to the principal dwelling, the ADU shall not reduce the principal dwelling GLAAG to less than 1200 sq. ft. (E.g. Before ADU, principal dwelling GLAAG = 2,000 sq. ft. – Interior ADU = 800 sq. ft., leaving a remainder of 1,200 sq. ft. as principal dwelling GLAAG)
9. Access:
  - a. ADUs shall have one interior direct access between the ADU and the principal dwelling unit, and one exterior access.
  - b. If an exterior access requires stairs to a level higher than the entry level of the principal dwelling unit, it shall be at the side or rear of the ADU.
10. Vehicular Access:
  - a. Adequate space shall be provided within the property for ingress, turning around and egress of vehicles.
  - b. Adequate off street parking shall be provided for the combined needs of the principal dwelling unit and the accessory dwelling unit.
11. Health and Safety:
  - a. An accessory dwelling unit shall meet all fire and building safety codes.
  - b. The existing, replacement and/or new septic system shall be certified by a licensed septic designer or engineer as adequate to support the accessory dwelling unit and principal dwelling unit in accordance with New Hampshire regulations.
  - c. Well capacity shall be demonstrated to be sufficient to support the accessory dwelling unit and principal dwelling unit.

#### **D. Procedural Requirements**

An accessory dwelling unit (ADU) shall be granted a Special Exception by the Board of Adjustment provided the Board of Adjustment finds the submitted complete plan set for the ADU to be in compliance with all requirements specified in Section C of this article.

1. Establishment of an accessory dwelling unit requires:

- a. A Special Exception for an ADU shall be granted to the owner of record of the principal dwelling unit by the Board of Adjustment before a building permit can be obtained (Appeal period shall expire prior to final approval and granting of Certificate of Occupancy).
  - b. A Building Permit for an ADU shall be approved and issued by the Building Inspector prior to the construction of an accessory dwelling unit.
  - c. A Certificate of Occupancy shall be approved and issued by the Building Inspector. Required inspections of the accessory dwelling unit shall be performed by the Town Building Inspector, Fire Chief, or their designees.
  - d. A License to Rent shall be obtained by the property owner before any tenant can reside in an accessory dwelling unit, or within 12 months of the date the Certificate of Occupancy was granted, whichever comes first.
  - e. The License to Rent requires inspection(s) of the accessory dwelling unit by the Town Building Inspector, Fire Chief, or their designees. If the inspections required to obtain the Certificate of Occupancy have occurred within the previous 90 days, these inspections may be waived.
2. Maintenance of an accessory dwelling unit requires:
- a. The License to Rent is issued for a period of 3 years. The License must be renewed before expiration, unless the ADU is discontinued. Renewal requires inspections to be performed by the Town Building Inspector and Fire Chief, or their designees.
  - b. If the license is not renewed before its expiration date, a fine shall be levied to the owner of the property, according to the provisions of RSA 676:17-a, Cease and Desist Orders. This fine shall be \$25 per day, commencing 14 days after the license expiration and continuing until the license is renewed or the accessory dwelling unit is discontinued.
3. Discontinuance of an accessory dwelling unit:
- a. A property owner can notify the Board of Selectmen in writing that he or she wishes to discontinue use of an accessory dwelling unit.
  - b. The accessory dwelling unit shall not be occupied at the time it is discontinued.
  - c. An accessory dwelling unit is deemed to be discontinued when the Board of Selectmen revokes the Certificate of Occupancy and the License to Rent.
4. If the owner of record of the property ceases to reside on the property, a fine shall be levied to the owner of the property, according to the provisions of RSA 676:17-a, Cease and Desist Orders. This fine shall be \$50 per day, commencing 14 days after the owner is no longer a resident and continuing until an owner resides on the property or the accessory dwelling unit is discontinued.

- a. Owners who are temporarily absent from the property, such as members of the armed forces called to active duty, may apply for relief from this provision to the Board of Selectmen. (Reference: Service-members Civil Relief Act, Public Law 108-189, December 2003.)
- 5. If a property with an accessory dwelling unit is conveyed to a new owner, the new owner may either:
  - a. Obtain a new License to Rent to continue use of the accessory dwelling unit, following the provisions above, or
  - b. Discontinue the accessory dwelling unit, following the provisions above.
  - c. If a new license is not obtained or the use is not discontinued, a fine shall be levied to the owner of the property, according to the provisions of RSA 676:17-a, Cease and Desist Orders. This fine shall be \$25 per day, commencing 14 days after the property has been conveyed to the new owner and continuing until the license is renewed or the accessory dwelling unit is discontinued.

**E. Enforcement Authority**

The Board of Selectmen and/or their designated code enforcement officer shall be the final authority on compliance and enforcement of this article.

**ARTICLE XXI: MULTI-FAMILY HOUSING OVERLAY DISTRICT ORDINANCE**

Multi-family housing is defined in the New Hampshire RSA 674:58, Workforce Housing Definitions, as five (5) or more dwelling units within a single structure. RSA 674:59 states that a municipality must allow development of multi-family housing at some locations within its borders. The Institute of Transportation Engineers (ITE) Trip Generation, 6th edition, Average Vehicle Trip Ends (one way) per dwelling unit (Low-Rise Apartment/Multi-Family) average about seven (7) trip ends per day. A five (5) unit multi-family dwelling could therefore generate an average of 35 trips per day, either incoming or outgoing.

Consequently, the Multi-Family Housing Overlay District is located along State Highway 31 (NH 31), a state maintained roadway with a good line of sight along the portions within the Town of Mason.

**A. Purpose and Intent**

To provide a reasonable and realistic opportunity for affordable multi-family housing as required by New Hampshire RSA 674:58-61.

**B. Authority**

The Multi-Family Housing Overlay District Ordinance defines an overlay district which imposes additional permitted uses, requirements and restrictions to those of the underlying base district. It is established under the powers granted under NH RSA 674:21, Innovative Land Use Controls.

If any provision of this Ordinance is in conflict with other provisions of the Town of Mason Planning Ordinance or other Town ordinances or regulations, the more restrictive provision shall

apply, except for any provision relating to standards for duplex or multiple family dwellings, lot size, frontage, or setbacks, in which case the provisions of this Ordinance shall apply.

**C. Location**

The Multi-Family Housing Overlay District overlays the General Residential, Agricultural, and Forestry (GRAF) District along both sides of NH State Highway 31, and is comprised of lots that meet the following frontage and size requirements:

1. The lot meets the minimum frontage requirement of the underlying zoning district and the minimum frontage used to meet this requirement is located along NH 31.
2. The lot meets the minimum lot size of the underlying zoning district.

Additional lot size requirements may apply as described in Section E.

**D. Permitted Use**

Multi-family residential units are permitted on lots that belong to the Multi-Family Housing Overlay District and meet the requirements of this Ordinance. A multi-family residential unit, for the purpose of this Ordinance, is defined as a single structure containing between two (2) and five (5) residential dwellings.

**E. Requirements for Multi-Family Housing Units**

1. The lot shall belong to the Multi-Family Housing Overlay District.
2. The lot shall contain one acre, exclusive of wetlands, steep slopes (25% or greater) or rock outcroppings, for each planned and existing residential dwelling.
3. A setback of 75 feet from all boundaries of the lot shall be required for any structure existing or to be constructed.
4. More than one multi-family structure may be located on one lot, provided all lot location, size, frontage and setback requirements are met. If multiple multi-family structures are to be located on one lot, the access way to residential structures must be constructed to Class V road standards as prescribed in applicable Town of Mason regulations.
5. The water supply or supplies shall meet all State design and permitting requirements and submitted plans shall carry the seal of a qualified NH licensed engineer/professional.
6. The septic disposal system or systems for the site shall meet all state design and permitting requirements and submitted plans shall carry the seal of a qualified NH licensed engineer/professional.
7. No residential structure shall be greater than 2 stories in height, to protect the safety of residents.
8. All structures must comply with the Town of Mason Building Code.

9. The site design shall take into consideration any natural, historic or cultural resources located on the lot.
10. The site design shall reserve areas for recreation and/or open space preservation for the benefit of the residents.
11. If a Site Layout Design Process has been incorporated into the Town of Mason Subdivision Regulations, the site shall be designed cooperatively with the Town of Mason Planning Board.
12. A site plan review is required.
13. Exterior design shall be compatible with Mason's rural New England village character.

## **ARTICLE XXII: AQUIFER AND WELLHEAD PROTECTION OVERLAY DISTRICT ORDINANCE**

### **A. Authority**

The Town of Mason hereby adopts this Aquifer and Wellhead Protection Overlay District Ordinance pursuant to the authority granted under RSA 674:16 and RSA 674:21.

### **B. Purpose**

The Aquifer and Wellhead Protection (AWP) Overlay District Ordinance is established for the purpose of protecting the quality and quantity of Groundwater resources available to be used as current and/or future drinking water supplies. This Ordinance is intended to:

1. Maintain public health and welfare by protecting existing and potential sources of Groundwater and associated recharge areas.
2. Prevent land use practices and development that could reduce the volume of recharge available to Aquifers identified as current or potential sources of drinking water.
3. Prevent land use practices and development that could contaminate or adversely impair the quality of Groundwater within Aquifers identified as current or potential sources of drinking water.
4. Provide for future growth, in accordance with the Town's Master Plan, by protecting the long-term availability of clean, safe potable water.
5. Identify land uses that can safely be sited in Aquifer recharge areas and in the proximity of water supply wells.

### **C. Definitions**

1. **Animal Feedlot:** A lot or building or combination of lots and buildings intended for the confined feeding, breeding, raising, or holding of animals and specifically designed as a confinement area in which manure may accumulate, or where the concentration of animals is such that a vegetative cover cannot be maintained within the enclosure. Confined winter shelter areas are not considered feedlots.

2. **Aquifer:** A geologic formation composed of rock, sand, or gravel that contains significant amounts of potentially recoverable water.
3. **Bulk Petroleum Plant or Terminal:** That portion of a property where petroleum products are received by tank vessel, pipeline, tank car, or tank vehicle and are stored or blended in bulk for the purpose of distributing such liquids by tank vessel, pipeline, tank car, tank vehicle, portable tank, or container.
4. **Best Management Practices:** A method or technique that has consistently shown results superior to those achieved with other means, and that is used as a benchmark. In addition, a "best" practice can evolve to become better as improvements are discovered. BMP's derived from public agencies or other sources shall be utilized as guidelines, the Planning Board may approve an alternative method if it is found to achieve a similar result.

The most recent editions of the following publications are considered Best Management Practices:

- a. Best Management Practices for Erosion Control on Timber Harvesting Operations in New Hampshire, prepared by the New Hampshire Department of Resources and Economic Development;
  - b. Manual of Best Management Practices for Agriculture in New Hampshire, prepared by the Agricultural Best Management Practices Task Force and the USDA Natural Resources Conservation Service for the New Hampshire Department of Agriculture;
  - c. Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire, prepared by the New Hampshire Department of Environmental Services in conjunction with the Rockingham County Conservation District;
  - d. Manual of Best Management Practices to Control Nonpoint Source Pollution: A Guide for Citizens and Town Officials prepared by the New Hampshire Department of Environmental Services; and
  - e. Rock Blasting and Water Quality Measures That Can Be Taken to Protect Water Quality and Mitigate Impacts, prepared by Brandon Kernen, NHDES Drinking Water Source Protection Program.
5. **Community Water System:** A Public Water System having at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents. The well serving the Mason Elementary School and the Mann House is designated as a community water facility.
  6. **Groundwater:** Subsurface water that occurs beneath the water table in soils and geologic formations.

7. **Gasoline Station:** Means that portion of a property where petroleum products are received by tank vessel, pipeline, tank car, or tank vehicle and distributed for the purposes of retail sale.
8. **Hazardous Waste:** Any solid, semisolid, liquid or contained gaseous waste, or any combination of these wastes, which:
  - a. May cause or contribute to an increase in irreversible or incapacitating reversible illness.
  - b. Poses a present or potential threat to human health or the environment if improperly managed.
  - c. Has been identified as a hazardous waste by the New Hampshire Department of Environmental Services Waste Management Division.
9. **Impervious:** Not readily permitting the infiltration of water, including packed gravel surfaces such as parking areas, driveways or traveled ways.
10. **Impervious Surface:** A surface through which Regulated Substances cannot pass when spilled. Impervious Surfaces include concrete unless unsealed cracks or holes are present. Earthen, wooden, or gravel surfaces, or other surfaces which could react with or dissolve when in contact with substances stored on them, are not considered Impervious Surfaces.
11. **Injection Well:** A well where hazardous wastes are injected.
12. **Junkyard:** An establishment or place of business which is maintained, operated, or used for storing, keeping, buying, or selling junk, or for the maintenance or operation of an automotive recycling yard, as defined in RSA 236:112, as amended. The word does not include any motor vehicle dealers registered with the Director of Motor Vehicles under RSA 261:104 and controlled under RSA 236:126.
13. **Outdoor Storage:** Storage of materials not protected from the elements by a roof, walls, and a floor with an Impervious Surface.
14. **Positive Limiting Barrier:** A depression (e.g., groove) in the surface of an otherwise level impervious area designed to impede the flow of and contain spilled substances within the perimeter of the impervious area. These are typically constructed and maintained to contain small spills or releases (five to fifteen gallons).
15. **Regulated Substance:** Any of the following, with the exclusion of ammonia, sodium hypochlorite, sodium hydroxide, acetic acid, sulfuric acid, potassium hydroxide, potassium permanganate, propane or other liquefied fuels which exist as gases at normal atmospheric temperature and pressure:
  - a. Oil as defined in RSA 146-A:2, III;
  - b. Any substance that contains a regulated contaminant for which an ambient groundwater quality standard has been established pursuant to RSA 485-C:6; and

- c. Any substance listed in 40 CFR 302, 7-1-05 edition, as amended.
16. **Sanitary Protective Radius:** The area around a public water supply well which must be maintained in its natural state as required by Env-Dw 301 or 302 (for community water systems); Env-Dw 373.12 and Env-Dw 372.14 (for other Community Water Systems), as amended.
  17. **Seasonal High Water Table:** The depth from the mineral soil surface to the upper most soil horizon that contains 2% or more distinct or prominent redoximorphic features that increase in percentage with increasing depth as determined by a Licensed Hydrogeologist, Soil Scientist, Wetlands Scientist, Engineer or other qualified professional approved by the Planning Board.
  18. **Secondary Containment:** A structure such as a berm or dike with an Impervious Surface which is adequate to hold at least 110 percent of the volume of the largest regulated-substance container stored within.
  19. **Snow Dump:** For the purposes of this Ordinance, a location where snow, which is cleared from roadways and/or motor vehicle parking areas situated beyond the Aquifer and Wellhead Protection District, is placed for disposal.
  20. **Stratified-Drift Aquifer:** A geologic formation of predominantly well-sorted sediment deposited by or in bodies of glacial meltwater, including gravel, sand, silt, or clay, which contains sufficient saturated permeable material to yield significant quantities of water to wells.
  21. **Surface Water:** Streams, lakes, ponds and wetlands, including marshes, water-courses and other bodies of water, natural or artificial.
  22. **Wellhead Protection Area:** The surface and subsurface area surrounding a water well or wellfield supplying a Community Water System, through which contaminants are likely to move toward and reach such water well or wellfield.

#### **D. Applicability**

This Ordinance shall apply to all uses of land situated within the Aquifer and Wellhead Protection Overlay District, except for those uses exempt under Section H of this Ordinance.

#### **E. District Boundaries**

1. Aquifer and Wellhead Protection (AWP) Overlay District boundaries are as identified on a map on file with the Town Clerk entitled “Aquifer and Wellhead Protection Overlay District Map”.
2. The AWP is an Overlay District which is superimposed over all underlying Districts.
3. Data resources used to produce the map include:
  - a. Aquifer areas as delineated on a map prepared by the U.S. Geological Survey entitled: “Saturated Thickness, Transmissivity, and Materials of Stratified-Drift

Aquifers in the Middle Merrimack Basin, South-Central New Hampshire”. This map is found in a study entitled: “Geohydrology and Water Quality of Stratified-Drift Aquifers in the Middle Merrimack River Basin, South-Central New Hampshire”, prepared Ayotte, J.D. and Toppin, H.W., 1995: U.S. Geological Survey Water-Resources Investigation Report 92-4192, and as may be amended or superseded by the U.S.G.S.

- b. Wellhead Protection Areas associated with public water supply wells shown on the AWP District map and New Hampshire Department of Environmental Services.
4. Incorrectly Designated Zones. In instances where the actual boundary of the Aquifer and Wellhead Protection Overlay District are disputed, the Planning Board, at the Applicant's expense and authorization, may engage a qualified professional geologist or hydrogeologist to determine the precise location of the AWP District boundaries. A report of the professional's findings shall be submitted to the Planning Board, which shall include but not be limited to the following:
    - a. A revised soils map of the area in question along with a written report of on-site field inspection and test boring data.
  5. If the information provided to the Planning Board is accepted by the Board, the boundary of the AWP District shall be adjusted based on the evidence provided. The Planning Board may reserve the right to withhold action on any application pending the results of an on-site inspection by the Board or its appointed agent.

#### **F. Permitted Uses**

All uses permitted in the underlying Zoning District are permitted in the Aquifer and Wellhead Protection Overlay District unless identified as Prohibited Use or Conditional Use under this Ordinance. All uses within the AWP District shall comply with Performance Standards specified in Section K unless specifically exempt under Section H of this Ordinance.

#### **G. Prohibited Uses**

1. The following uses are prohibited in the Aquifer and Wellhead Protection Overlay District:
  - a. Development or operation of a Hazardous Waste Disposal Facility, as defined under RSA 147-A, as amended;
  - b. Development or operation of a Solid Waste Landfill, as defined under RSA 149-M, as amended;
  - c. Outdoor Storage of road salt or other deicing compounds;
  - d. Development or operation of a Junkyard;
  - e. Development or operation of a Snow Dump;

- f. Development or operation of a wastewater or septage lagoon;
- g. Subsurface storage of regulated substances, including gasoline, diesel fuel, oil and other refined petroleum products, and the subsurface transmission of regulated substances, including gasoline, diesel fuel, oil, natural gas and other refined petroleum products through pipelines.
- h. Development or operation of Gasoline Stations;
- i. Development or operation of Injection Wells;
- j. Development or operation of an Animal Feedlot;
- k. Development or operation of a dry cleaning facility, using or storing dry cleaning chemicals on site;
- l. Non-municipal wells that may result in an aquifer volume reduction that exceeds the recharge rate.

#### **H. Exempted Uses**

- 1. The following uses shall be exempt from the provisions of this Ordinance provided they remain in compliance with all applicable local, state, and federal requirements:
  - a. Any single family dwelling, including a single family dwelling with an Accessory Dwelling Unit;
  - b. Any business or facility where Regulated Substances are stored in containers having a capacity of not more than five gallons per container;
  - c. Storage of heating fuels for onsite use, or fuels for emergency electric power generation, provided that storage tanks are indoors on a concrete floor or have corrosion control and leak detection, and Secondary Containment accommodations;
  - d. Storage of motor fuel in tanks attached to vehicles fitted with permanent fuel lines to enable the fuel to be used by that vehicle;
  - e. Storage and use of office supplies;
  - f. Temporary storage of construction materials on a site where they are intended to be used;
  - g. The transportation and storage of pesticides, as defined in RSA 430:29 XXVI, as amended;
  - h. Household hazardous waste collection projects regulated under NH Code of Administrative Rules Env-Wm 401.03(b)(1) and 501.01(b);
  - i. Agricultural uses as defined under RSA 21:34-a, as amended, provided such uses do not meet the criteria of an Animal Feedlot operation.

**I. Conditional Uses**

1. Any use not Prohibited under Section G, but which will require one or more of the following conditions, shall only be permitted by a conditional use permit issued by the planning board in accordance with the following sections. A conditional use permit under this section shall be required for any of the following:
  - a. Storage, handling, and use of Regulated Substances in quantities exceeding 55 gallons or 660 pounds dry weight at any one time, provided an adequate Spill Prevention Control and Countermeasure (SPCC) Plan, prepared in accordance with Section J of this Ordinance, and is approved by the Fire Department;
  - b. Any activities that involve blasting of bedrock;
  - c. Truck and automotive repair facilities; or
  - d. Expansion of existing non-conforming uses or structures shall be allowed when demonstrated that the expansion will result in a more conforming site or use with greater protection for groundwater resources.
2. In granting such approval the Planning Board shall find such use or uses will remain in compliance with the Performance Standards in Section K of this Ordinance as well as all applicable local, state and federal requirements. The Planning Board may, at its discretion, require a performance guarantee or bond in an amount and form acceptable to the Board, be posted to insure compliance with terms and conditions of the Conditional Use Permit.

**J. Conditional Use Permit Application Procedures**

1. Application for a Conditional Use Permit shall be made on forms supplied by the Planning Board and shall include a narrative and/or site plan containing the following information on one or more pages at a scale suitable to illustrate relevant details of the project, as well as a report demonstrating compliance with applicable requirements of Section I of this Ordinance. As a minimum, each application shall depict or identify:
  - a. North arrow and date of site plan preparation;
  - b. Property boundaries and total parcel area;
  - c. Location of Aquifer and Wellhead Protection Overlay District boundaries;
  - d. Names and addresses of applicant, owners, abutters and holders of conservation restrictions and easements on abutting properties;
  - e. Location of Wetland Conservation District boundaries;
  - f. Soil mapping units;
  - g. Topographic contours at intervals not more than 2 feet;

- h. Existing and proposed development, including removal of vegetation and alteration of terrain;
  - i. Stormwater management accommodations, both existing and proposed. The applicant shall demonstrate:
    - 1) Post development peak stormwater discharge volumes exiting the site are less than or equal to predevelopment discharge volumes for the 10-year return frequency design storm;
    - 2) Volume of site generated stormwater to be infiltrated on site under post-development conditions is greater than or equal to the volume infiltrated under the predevelopment condition based on evaluation of the 2 year return frequency design storm;
    - 3) Stormwater management facilities shall provide for the removal of sediment;
  - j. Identification of potential risks to the District anticipated as a result of proposed site development together with proposals for mitigation;
  - k. Identification of hazardous materials to be stored or used on site together with a plan for proper management of the same;
  - l. If required by the Planning Board, provisions for monitoring of Groundwater and/or Surface Water quality.
2. Proposals for Conditional Uses, which involve Regulated Substances, shall also be required to submit a Spill Prevention Control and Countermeasure (SPCC) Plan to the Fire Department for review and approval. A SPCC Plan shall include:
- a. A description of the physical layout and a facility diagram, including all surrounding Surface Waters, Wellhead Protection Areas and all water supply facilities on the property or within 100 feet of the property boundaries;
  - b. A contact list with telephone numbers (including cell phone) and email addresses of the facility response coordinator, cleanup contractors, and all appropriate federal, state, and local agencies who must be contacted upon release to the environment;
  - c. A list of all Regulated Substances to be stored on the premise;
  - d. A description of containment and/or diversionary structures or equipment to prevent Regulated Substances from infiltrating into the ground.
3. The Planning Board shall: Consider all relevant facts and information prior to making a decision on any application for a Conditional Use Permit; find the proposal is consistent with the stated Purpose of this Ordinance; and find that to the extent possible, the project avoids and minimizes impacts to land situated within the District, including but not limited to the following:
- a. The proposed activity minimizes degradation of land situated within the District.

- b. The proposed activity will have no significant negative environmental impact to abutting or downstream properties and/or hydrologically connected water resources.
  - c. The proposed activity incorporates the use of those Best Management Practices recommended by the New Hampshire Department of Environmental Services and/or other State Agencies having jurisdiction.
  - d. All applicable Federal and/or State Permit(s) have been received for the proposed activity in accordance with New Hampshire Code of Administrative Rules – Part Env-Wt 100-800 and Section 404 of the Federal Clean Water Act, as amended.
  - e. Prior to making a decision in regard to the possible approval of any Conditional Use Permit application, the Planning Board shall afford the Conservation Commission an opportunity to review and comment on the application. The Conservation Commission, after consideration and review of an application for a Conditional Use Permit, may recommend the Planning Board impose conditions of approval, if deemed necessary, to mitigate the potential for adverse effects caused by the proposed activity or use.
4. All costs associated with the Conditional Use Permit application and review will be at the Applicant's expense.

**K. Performance Standards**

The following Performance Standards shall apply to all uses of land in the Aquifer and Wellhead Protection Overlay District unless such use or uses enjoy an exemption under Section H of this Ordinance:

1. For any use that will render more than 15 percent of the total parcel area Impervious, a stormwater management plan consistent with New Hampshire Stormwater Manual Volumes 1-3, December 2008, as amended; published by NH Department of Environmental Services, shall be prepared and submitted to the Planning Board.
2. Conditional uses, as defined under Section I, shall develop stormwater management and pollution prevention plans and include information consistent with *Developing Your Stormwater Pollution Prevention Plan: A Guide for Industrial Operators* (US EPA, Feb 2009, as amended). The plan shall:
  - a. Meet minimum stormwater discharge setbacks between water supply wells and constructed stormwater practices as found within the *Innovative Land Use Planning Techniques: A Handbook for Sustainable Development*, Section 2.1 Permanent (Post-Construction) Stormwater Management, (NHDES 2008, as amended);
  - b. Minimize, through a source control plan that identifies pollution prevention measures, the release of Regulated Substances into stormwater;
  - c. Stipulate that expansion or redevelopment activities shall require an amended stormwater plan and may not infiltrate stormwater through areas containing

- contaminated soils without completing a Phase I Environmental Site Assessment in conformance with ASTM E 1527-05; and
- d. Maintain a vertical separation of not less than four feet between the bottom of a stormwater management facility which infiltrates or filters and the seasonal high water table elevation as determined by a Licensed Hydrogeologist, Soil Scientist, Engineer or other qualified professional as determined by the Planning Board.
3. The proposed use, either alone or on a cumulative basis, will not cause a significant reduction in the long-term volume of water contained in the underlying aquifer or in the storage capacity of the aquifer.
  4. Animal manures, fertilizers, and compost must be stored in accordance with Manual of Best Management Practices for Agriculture in New Hampshire, NH Department of Agriculture, Markets, and Food, June 2011 or as updated;
  5. All Regulated Substances stored in containers with a capacity of more than five gallons must be stored in product-tight containers on an Impervious surface designed and maintained to prevent flow to exposed soils, floor drains, and the out-of-doors;
  6. Facilities where Regulated Substances are stored must be secured against unauthorized entry by means of a door and/or gate that is locked when authorized personnel are not present and must be inspected weekly by the facility owner;
  7. Outdoor Storage areas for Regulated Substances, associated material or waste must be protected from exposure to precipitation and must be located at least 50 feet from Surface Water or storm drains; and outside of protective radii of wells;
  8. Secondary Containment must be provided for Outdoor Storage of Regulated Substances in regulated containers and the containment structure must include a cover to minimize accumulation of water in the containment area and contact between precipitation and storage container(s);
  9. Containers in which Regulated Substances are stored must be clearly and visibly labeled and must be kept closed and sealed when material is not being transferred from one container to another;
  10. Prior to any land clearing or alteration of terrain, any inactive wells on the property shall be identified and must be decommissioned in accordance with Part We 604 Abandonment of Wells of the New Hampshire Water Well Board Rules, as amended. Proposed site activity shall not impact the integrity of any well located on the property.
  11. Blasting activities shall be planned and conducted in a manner consistent with best management practices published by the NHDES to minimize Groundwater contamination.
  12. All transfers of petroleum products from delivery trucks and storage containers over five gallons in capacity shall be conducted over an Impervious Surface having a Positive Limiting Barrier at its perimeter.

13. At the option of the Planning Board, monitoring wells may be established for all industrial and commercial uses utilizing or storing hazardous or toxic materials. The number and location of monitoring wells shall be determined by the Planning Board. The required frequency and protocol for sampling and testing of Groundwater shall be specified by the Planning Board.
14. Storage of pesticides, herbicides, fertilizers, manure, and other potentially dangerous leachable substances shall be setback from water supply wells in accordance with state regulations including Chapter PES 500, managed in accordance with NH Best Management Practices for Agriculture, and controlled in a manner determined by the Planning Board. Appropriate and applicable Best Practices shall be implemented as recommended by the New Hampshire Department of Environmental Services.
15. When an industrial or commercial use within the AWP District changes to one which involves the use, storage, or disposal of hazardous or toxic materials (Regulated Substances), a Site Plan Review shall be required.
16. Not more than 35% of the total area of any lot or parcel shall be rendered Impervious.
17. Sodium chloride salt stored and used for deicing activities shall be properly managed and applied in accordance with accepted best management practices as published by NHDES to minimize impacts to groundwater and reduce the amount necessary for public safety. Alternatives such as calcium magnesium acetate (CMA) and/or potassium acetate (KA) are encouraged.
18. Floor drains are prohibited unless drain is directed to a dry well used to temporarily store fluids until such time they are legally removed.
19. An impermeable barrier membrane (minimum 20 mil) shall be installed beneath slab floors to prevent the infiltration of any spilled liquids within the building from percolating into the ground. The Planning Board has the discretion to impose any other requirements as necessary to achieve the stated purpose.

**L. Existing Nonconforming Uses**

Existing nonconforming uses may continue to operate without complying with the terms of this Ordinance provided that any expansion of said use shall require that a Conditional Use Permit be obtained as provided for herein. Existing non-conforming uses must be in compliance with all applicable state and federal requirements, including Env-Wq 401, Best Management Practices Rules.

**M. Administration and Enforcement**

See Article VII, Section E, "Enforcement".

## ARTICLE XXIII: OUTDOOR LIGHTING ORDINANCE

### A. Purpose

The purpose of this ordinance is to enhance public safety and welfare by providing for adequate and appropriate outdoor lighting, while preserving the natural dark skies that are an important aspect of the rural character of the Town of Mason. This ordinance recognizes the importance of lighting for safety and security while encouraging energy efficiency and reduction of light pollution and glare.

### B. Definitions

1. **Luminaire:** A lighting fixture that includes a lamp or lamps.
2. **Lamp:** The component of a luminaire that produces light.
3. **Glare:** Light emitted by a lamp in direct line-of-sight contact with the viewer.
4. **Light trespass:** Light that is produced by a luminaire beyond the property line on which it is located.
5. **Sky glow:** Light from a luminaire that is emitted above the horizontal plane that passes through the lowest part of the luminaire.
6. **Fully-shielded lighting:** Lighting in which the light rays emitted by the fixture are projected no higher than the horizontal plane that passes through the lowest part of the luminaire.

Fully Shielded Lighting Fixture

### C. Requirements

1. Applicability

All Commercial and Industrial outdoor lighting installed in the Town of Mason shall comply with the requirements specified below. Private residential lighting is encouraged to comply with these specifications.

2. General Lighting Restrictions
  - a. All luminaires shall be fully shielded and not cause sky glow.
  - b. No luminaire shall emit glare beyond a property line or be positioned such that it impedes the vision or line of sight of drivers in or on public ways.
  - c. Lighting shall be turned off after business hours except for lighting necessary for security or safety. It is recommended that motion detectors be used with security lighting.
  - d. It is recommended that total illumination be the lowest intensity possible for the intended use.
3. Gas Station-Type Canopies
  - a. Luminaires mounted on a canopy shall be recessed in the ceiling of the canopy so that the lens cover is recessed or mounted flush with the ceiling of the canopy and fully shielded. Luminaires shall not be mounted on the sides or top of the canopy, and the sides or fascias of the canopy shall not be illuminated.
4. Lighted Advertising Signs
  - a. Signs may be illuminated only by externally mounted white light sources.
  - b. Bottom-mounted lighting is prohibited.
  - c. Moving, blinking, or flashing lights or signs and electronic message signs are prohibited.
  - d. The outdoor operation of searchlights, lasers, or other high-intensity beams for advertising purposes is prohibited.
5. Pre-existing Outdoor Lighting
  - a. Any luminaire that replaces a non-conforming, pre-existing luminaire, or any luminaire that is moved, shall meet the standards of this Ordinance.

**D. Exceptions**

The following are exempt from this Ordinance:

- a. Temporary luminaires required for construction projects.
- b. Luminaires related to police, fire, or other emergency services.
- c. Luminaires used for signal illumination to ensure roadway safety.
- d. Hazard warning luminaries required by federal regulatory agencies.
- e. Low-intensity temporary seasonal lighting.

## **APPENDIX A: NH MODEL FLOODPLAIN DEVELOPMENT ORDINANCE**

### **New Hampshire Model Floodplain Development Ordinance For Communities with Special Flood Hazard Areas**

Meets the Minimum Requirements of Section 60.3(b) of the National Flood Insurance  
Program Regulations

Written by the Federal Emergency Management Agency (FEMA)

This ordinance, adopted pursuant to the authority of RSA 674:16, shall be known as the *Town of Mason Floodplain Development Ordinance*. The regulations in this ordinance shall overlay and supplement the regulations in the Town of Mason Planning (Zoning) Ordinance, and shall be considered part of the Planning (Zoning) Ordinance for purposes of administration and appeals under state law. If any provision of this ordinance differs or appears to conflict with any provision of the Planning (Zoning) Ordinance or other ordinance or regulation, the provision imposing the greater restriction or more stringent standard shall be controlling.

The following regulations in this ordinance shall apply to all lands designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its "Flood Insurance Study for the County of Hillsborough, NH" dated September 25, 2009 or as amended, together with the associated Flood Insurance Rate Maps (FIRM) dated September 25, 2009 or as amended, which are declared to be a part of this ordinance and are hereby incorporated by reference.

#### **Item I Definition of Terms:**

The following definitions shall apply only to this Floodplain Development Ordinance, and shall not be affected by, the provisions of any other ordinance of the Town of Mason.

**"Area of Special Flood Hazard"** is the land in the floodplain within the Town of Mason subject to a one-percent or greater possibility of flooding in any given year. The area designated as Zone(s) A on the Flood Insurance Rate Map (FIRM).

**"Base Flood"** means the flood having a one-percent possibility of being equaled or exceeded in any given year.

**"Basement"** means any area of a building having its floor subgrade on all sides.

**"Building"** - see "structure".

**"Development"** means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation, drilling operation, or storage of equipment or materials.

"**FEMA**" means the Federal Emergency Management Agency.

"**Flood**" or "**Flooding**" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (1) the overflow of inland or tidal waters.
- (2) the unusual and rapid accumulation or runoff of surface waters from any source.

"**Flood Insurance Study**" means an examination, evaluation, and determination of flood hazards and if appropriate, corresponding water surface elevations, or an examination and determination of mudslide or flood related erosion hazards.

"**Flood Insurance Rate Map**" (FIRM) means an official map incorporated with this ordinance, on which FEMA has delineated both the special flood hazard areas and the risk premium zones applicable to the Town of Mason.

"**Floodplain**" or "**Flood-prone area**" means any land area susceptible to being inundated by water from any source (see definition of "Flooding").

"**Flood proofing**" means any combination of structural and non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitation facilities, structures and their contents.

"**Floodway**" - see "Regulatory Floodway".

"**Functionally dependent use**" means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking and port facilities that are necessary for the loading/unloading of cargo or passengers, and ship building/repair facilities but does not include long-term storage or related manufacturing facilities.

"**Highest adjacent grade**" means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

"**Historic Structure**" means any structure that is:

- (a) Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- (b) Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- (c) Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
- (d) Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:

- (1) By an approved state program as determined by the Secretary of the Interior, or
- (2) Directly by the Secretary of the Interior in states without approved programs.

**"Lowest Floor"** means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such an enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this ordinance.

**"Manufactured Home"** means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on site for greater than 180 days. This includes manufactured homes located in a manufactured home park or subdivision.

**"Manufactured home park or subdivision"** means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

**"Mean sea level"** means the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a communities Flood Insurance Rate Map are referenced.

**"New Construction"** means, for the purposes of determining insurance rates, structures for which the "start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, *new construction* means structures for which the *start of construction* commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such improvements.

**"100-year flood"** - see "base flood"

**"Recreational vehicle"** means a vehicle which is (a) built on a single chassis; (b) 400 square feet or less when measure at the largest horizontal projection; (c) designed to be self-propelled or permanently towable by a light-duty truck; and (d) designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

**"Regulatory floodway"** means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height. These areas are designated as floodways on the Flood Boundary and Floodway Map.

**"Special flood hazard area"** (See - "Area of Special Flood Hazard")

**"Structure"** means for floodplain management purposes, a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

**"Start of Construction"** includes substantial improvements, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling ; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or part of the main structure.

**"Substantial damage"** means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

**"Substantial Improvement"** means any combination of repairs, reconstruction, alteration, or improvements to a structure in which the cumulative cost equals or exceeds fifty percent of the market value of the structure. The market value of the structure should equal: (1) the appraised value prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage occurring. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. This term includes structures which have incurred substantial damage, regardless of actual repair work performed. The term does not, however, include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

**"Violation"** means the failure of a structure or other development to be fully compliant with the community's flood plain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44 Code of Federal Regulations (CFR) §60.3(b)(5), (c)(4), (c) (10), (d)(3), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided.

**"Water surface elevation"** means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, (or other datum, where specified) of floods of various magnitudes and frequencies in the floodplains.

**Item II.**

All proposed development in any special flood hazard areas shall require a building permit.

**Item III.**

The building inspector shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is located in a special flood hazard area, all new construction or substantial improvements shall:

- (i) be designed (or modified) and adequately anchored to prevent floatation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy,
- (ii) be constructed with materials resistant to flood damage,
- (iii) be constructed by methods and practices that minimize flood damages,
- (iv) be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment, and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

**Item IV.**

Where new or replacement water and sewer systems (including on-site systems) are proposed in a special flood hazard area the applicant shall provide the Building Inspector with assurance that these systems will be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems will be located to avoid impairment to them or contamination from them during periods of flooding.

**Item V.**

For all new or substantially improved structures located in special flood hazard areas, the applicant shall furnish the following information to the building inspector:

- (a) the as-built elevation (in relation to NGVD) of the lowest floor (including basement) and include whether or not such structures contain a basement.
- (b) if the structure has been floodproofed, the as-built elevation (in relation to NGVD) to which the structure was floodproofed.
- (c) any certification of floodproofing.

The Building Inspector shall maintain for public inspection, and shall furnish such information upon request.

**Item VI.**

The Building Inspector shall not grant a building permit until the applicant certifies that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U. S. C. 1334.

**Item VII.**

1. In riverine situations, prior to the alteration or relocation of a watercourse the applicant for such authorization shall notify the Wetlands Board of the New Hampshire Environmental Services Department and submit copies of such notification to the Building Inspector, in addition to the copies required by the RSA 482-A:3. Further, the applicant shall be required to submit copies of said notification to those adjacent communities as determined by the Building Inspector, including notice of all scheduled hearings before the Wetlands Bureau.
2. The applicant shall submit to the Building Inspector, certification provided by a registered professional engineer, assuring that the flood carrying capacity of an altered or relocated watercourse can and will be maintained.
3. The Building Inspector shall obtain, review, and reasonably utilize any floodway data available from Federal, State, or other sources as criteria for requiring that all development located Zone A meet the following floodway requirement:

"No encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway that would result in any increase in flood levels within the community during the base flood discharge."

**Item VIII.**

1. The Building Inspector shall obtain, review, and reasonably utilize any 100 year flood elevation data available from any federal, state or other source including data submitted for development proposals submitted to the community (i.e. subdivisions, site approvals).
2. The Building Inspector's 100 year flood elevation determination will be used as criteria for requiring in zone A that:
  - a. all new construction or substantial improvement of residential structures have the lowest floor (including basement) elevated to or above the 100 year flood elevation;
  - b. that all new construction or substantial improvements of non-residential structures have the lowest floor (including basement) elevated to or above the 100 year flood level; or together with attendant utility and sanitary facilities, shall:
    - (i) be floodproofed so that below the 100 year flood elevation the structure is watertight with walls substantially impermeable to the passage of water;

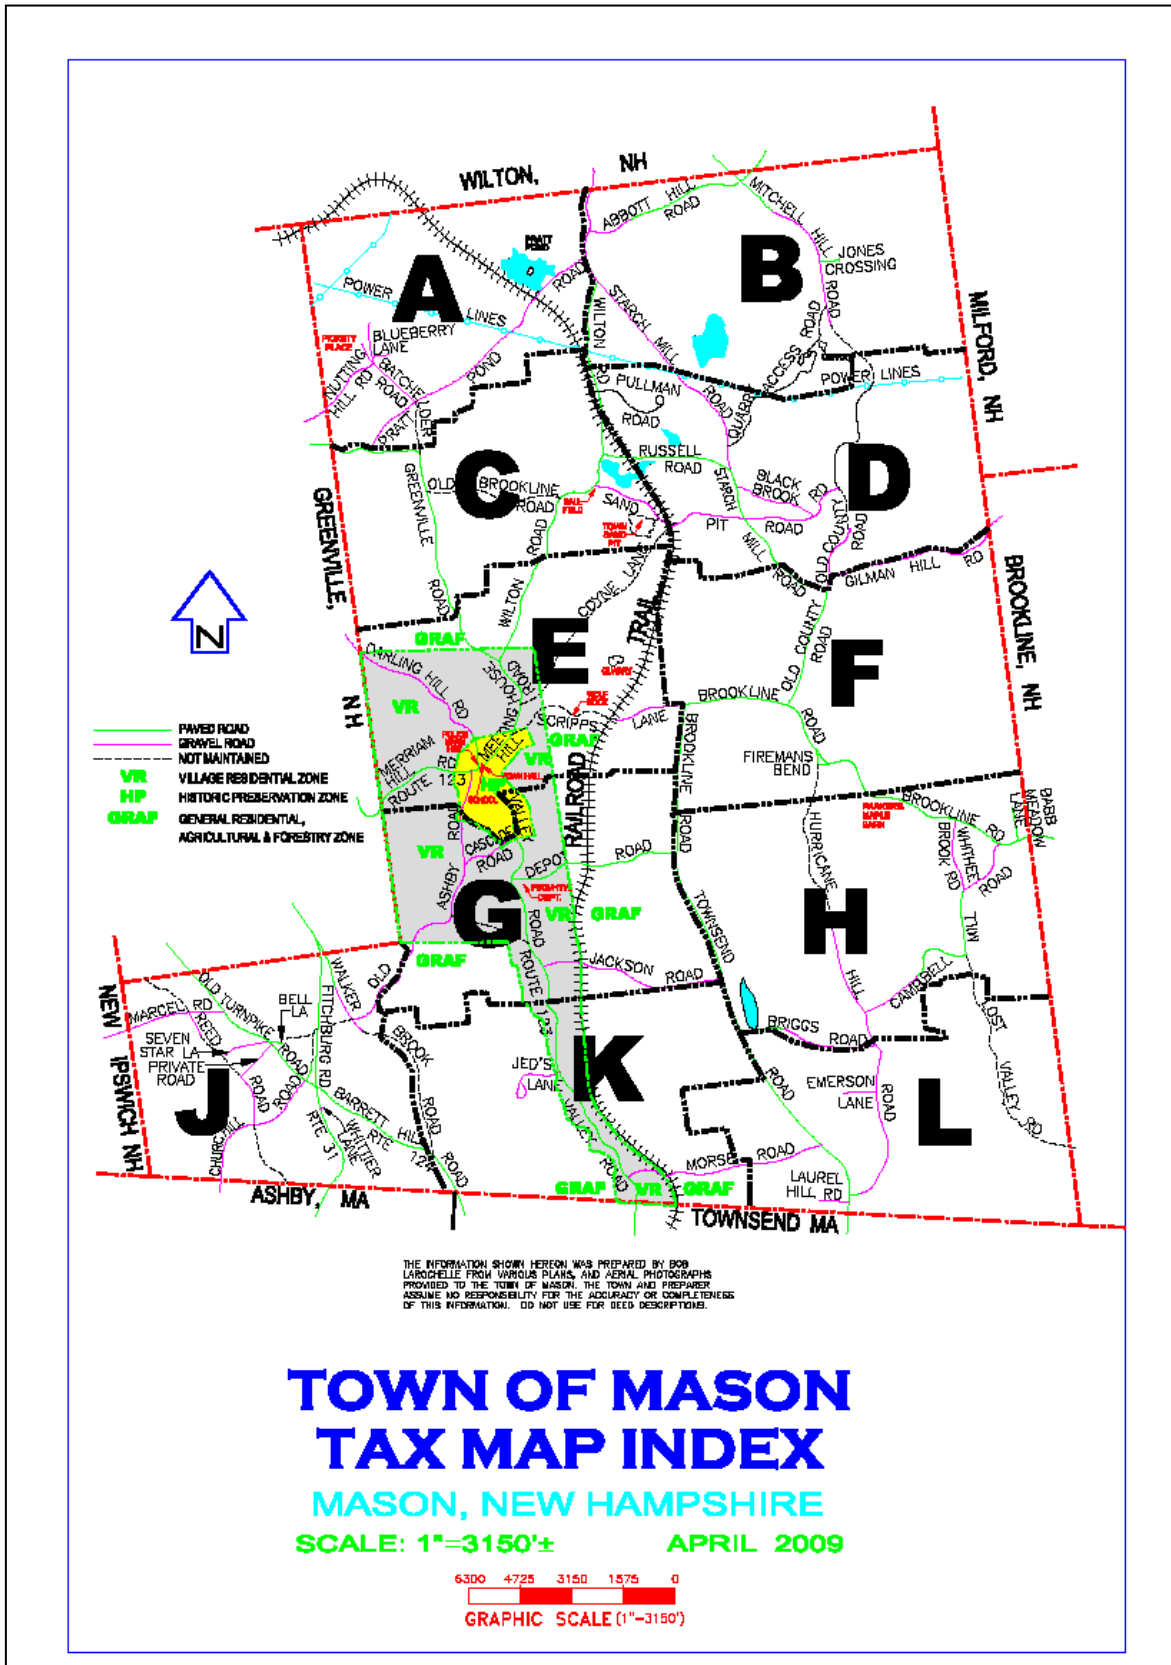

- (ii) have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and
  - (iii) be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section;
- c. all manufactured homes to be placed or substantially improved within special flood hazard areas shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the 100 year flood elevation; and be securely anchored to resist floatation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces;
- d. recreational vehicles placed on sites within zone A shall either (i) be on the site for fewer than 120 consecutive days; (ii) be fully licensed and ready for highway use; or (iii) meet all standards of Section 60.3,(b) (1) of the National Flood Insurance Program Regulations and the elevation and anchoring requirements for "Manufactured Homes" in Paragraph (c) (6) of Section 60.3.
- e. for all new Construction and substantial improvements, fully enclosed areas below the lowest floor that are subject to flooding are permitted provided they meet the following requirements: (1) the enclosed area is unfinished or flood resistant, usable solely for the parking of vehicles, building access or storage; (2) the area is not a basement; (3) shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria: A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwater.

#### **Item IX Variances and Appeals:**

1. Any order, requirement, decision or determination of the building inspector made under this ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.
2. If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I(b), the applicant shall have the burden of showing in addition to the usual variance standards under state law:
  - (a) that the variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expense.

- (b) that if the requested variance is for activity within a designated regulatory floodway, no increase in flood levels during the base flood discharge will result.
  - (c) that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- 3. The Zoning Board of Adjustment shall notify the applicant in writing that: (i) the issuance of a variance to construct below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction below the base flood level increases risks to life and property. Such notification shall be maintained with a record of all variance actions.
- 4. The community shall (i) maintain a record of all variance actions, including their justification for their issuance, and (ii) report such variances issued in its annual or biennial report submitted to FEMA's Federal Insurance Administrator.

## **ARTICLE I: INTRODUCTION**

### **1.01.0 PURPOSE**

The regulations set down in this Ordinance are for the purpose of promoting the public health, safety, morals, general welfare and civil rights of the inhabitants of the Town of Milford as provided by Title 64 of the NH RSA, Chapters 672-677 inclusive and, as such may be amended from time to time. (1986)

### **1.02.0 AUTHORIZATION**

**1.02.1** The Planning Board is hereby authorized to make such textual revisions as may be necessary and appropriate to correctly restate statutory citations throughout the remainder of the Ordinance so as to achieve consistency with the purpose and authority, provided that such changes result in no contradictions within the Ordinance or with state law, and further provided that no substantive changes shall occur as a result of any such correction. (1985)

**1.02.2** The Planning Board has the authority to assign such section numbers to the Zoning Ordinance as it may deem appropriate provided that no substantive change to the Ordinance shall occur as a result of this renumbering. (1985)

**1.02.3** Provisions of this Ordinance are activated by “shall” when required, “should” when recommended and “may” when optional. (2012)

### **1.03.0 AMENDMENTS**

This Ordinance may be amended by a majority vote of any legally constituted Town vote when such amendment has received public notices and hearings in accordance with the procedure established in Chapter 31, NH RSA, 1955 as amended.

### **1.04.0 EFFECTIVE DATE**

This Ordinance shall take effect immediately upon its passage.

### **1.05.0 OTHER REGULATIONS, ORDINANCES AND STATUTES**

In addition to complying with the regulations established herein, the applicant shall comply with all other applicable regulations, Ordinances and Statutes of the Town, the State of New Hampshire, and the United States Government, particularly but not limited to the Zoning Ordinance, Open Space and Conservation Zoning District, Wetland Conservation District, Flood Plain Management Ordinance, Development Regulations, Road Specifications, Building Codes and Permits, and the State of New Hampshire Statutes and Regulations relating to land sales and pollution.

### **1.06.0 SEVERABILITY**

If any section, clause, provision, portion or phrase of this Ordinance shall be held to be invalid or unconstitutional by any court of competent jurisdiction, such holding shall not affect, impair or invalidate any other section, clause, provision, portion or phrase of this Ordinance.

**ARTICLE II: GENERAL PROVISIONS**

**2.01.0 LOT OF RECORD (2012)**

Lot of record shall be considered to meet the minimum lot size and frontage requirements of the Ordinance if it was in existence prior to the adoption of the Zoning Ordinance (3/11/69) as long as the lot of record has fifteen (15) feet of frontage on a Class V or better road.

**2.02.0 NON-CONFORMING USES AND STRUCTURES (2013)**

A use or structure lawfully existing prior to the enactment of the Zoning Ordinance (3/11/69), and that is maintained after the effective date of the Ordinance, although it does not comply with the zoning restrictions applicable to the district in which it is situated.

**2.03.0 NON-CONFORMING USE AND STRUCTURES – CONTINUANCE, DISCONTINUANCE, OR CHANGE (2013)**

**2.03.1 INTENT:** The intent of this section is to allow for the lawful continuance of non-conforming uses, and/or structures and to allow a certain reasonable level of alteration, expansion or change that will not change the nature of the use and unduly impact the neighborhood.

- A. **Continuance:** A non-conforming use or structure may be continued, although such use or structure does not conform to the current provisions of this Ordinance.
- B. **Discontinued use:** Whenever a non-conforming use has been discontinued for more than one (1) year for any reason, such non-conforming use shall not thereafter be reestablished, and the future use of the property shall be in conformity with the provisions of this Ordinance.
- C. **Alteration, Expansion, or Change:** Alterations, expansion or change of a non-conforming use or structure shall only be permitted by Special Exception by the Zoning Board of Adjustment if it finds that:
  - 1. The proposed alteration, expansion or change shall not change the nature of the original use or structure and the proposed alteration, expansion, or change shall involve no substantially different effect on the neighborhood; or, (2013)
  - 2. In the case of Home Based Businesses (Article VII, Section 7.12.0), Accessory Dwelling Units (ADU) (Article X, Sec. 10.02.6) and Office in the Residence A and B Districts (Article X Sec. 10.02.7), the proposed alteration, expansion, or change to a non-conforming use or structure complies with those specific Special Exception criteria governing those uses.

**2.04.0 PUBLIC NUISANCE (2008)**

No residential, business, commercial or industrial use shall be permitted which could cause any undue hazard to health or safety or which is offensive to the public because of noise, vibration, noxious odor, smoke or other similar reason.

### **2.05.0 USES/STRUCTURES NOT PERMITTED**

Any uses of land and/or structures not specifically included in each zoning district as either acceptable or acceptable by special exception shall be considered as not permitted within that zoning district. (1997)

### **2.06.0 EQUITABLE WAIVER (2012)**

Entire section moved to Section 10.7.0

## **ARTICLE III: ZONING MAP - ZONING DISTRICT CHANGES (2014)**

### **3.01.0 DISTRICTS**

For the purpose of this Ordinance, the Town of Milford is hereby divided into districts located and bounded as shown on the map entitled "Official Zoning Map, Town of Milford, New Hampshire", as amended to reflect most current zoning districts per town vote, copies of which are on file and may be obtained in the Town offices. The Official Zoning Map, as amended from time to time, with all accompanying explanatory material, is hereby made a part of this Ordinance. The Official Zoning Map shall be revised by the Planning Board to incorporate such amendments as may be made by Town vote. This Official Zoning Map shall be the final authority as to the current zoning status of land in the Town. (2010)

#### **RE-ZONING OF THE FOLLOWING LOTS:**

- 1996 Rezone the following parcels on Elm St. from Industrial to ICI (Integrated Commercial-Industrial): Map 11, Lots 11 and 12; Map 12, Lot 15, also, Map 12, Lot 14 on Elm St. from Commercial to ICI (Integrated Commercial-Industrial).
- 1996 Rezone the following parcels on Nashua St. from Industrial to ICI (Integrated Commercial-Industrial): Map 44, Lots 12, 13 and 13-1.
- 1996 Rezone the following parcels on Nashua St. from Residence "B" to Limited Commercial-Business: Map 32, Lots 2, 3, 4, 5, and 6; Map 43, Lots 51, 52 and 53; and Map 44, Lot 3.
- 1997 Rezone the following parcels on Emerson Rd. from Residence "R" to ICI (Integrated Commercial-Industrial): Map 48, Lots 35, 35-1, 35-2, 37, 38 and 39.
- 2003 Rezone the following parcels on Emerson Rd. from ICI (Integrated Commercial-Industrial) to "C" Commercial: Map 48, Lots 35, 35-1, 35-2, 37, 38 and 39.
- 2003 Rezone the following parcels on Emerson Rd. from Residence "R" to "C" - Commercial: Map 48, Lots 36, 36-1, and that portion of Lot 52 lying westerly of a line beginning at a point on the southerly right-of-way line of Emerson Road, said point being 223.67 feet westerly of the northeasterly corner of Lot 52; said line extending in a southeasterly direction to a point on the southerly boundary line of Lot 52 lying 234.52 feet southwest of the southeast property corner of said lot.
- 2003 Rezone the following parcels on Emerson Rd. and Federal Hill Rd. from Residence "A" to "C" - Commercial: Map 48, Lot 42, and that portion of Map 48, Lot 41 lying northerly of a line extended from the southeasterly corner of Map 48, Lot 44 to the southwesterly corner of Map 48, Lot 52.

- 2005 Rezone the following parcels of land on: Bear Court, Bobby Lane, Colburn Road, Dear Lane, Federal Hill Road, Foster Road, Fox Run Road, Heritage Way, Mountain View Court, Ponemah Hill Road, Settlement Lane, Stone Court, Tarry Lane, Wallingford Road, and Wildflower Way from Residence "A" to Residence "R": Map 48, Lot 15-1 (that portion zoned "A" only), Lots 20, 20-1, 21, 22, 23, 23-1, 24, 25, 26, 27, 28, 29, 30, 46, 47, 51; Map 53, Lots 1, 2, 2-1, 2-2, 2-3, 3, 3-1, 4, 5, 6, 6-1, 6-2, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 21-1, 21-2, 21-3, 21-4, 22, 22-A, 23, 23-1, 24, 25, 29, 30, 30-1, 30-2, 31, 32, 33, 33-1, 34, 34-1, 34-2, 34-3, 34-4, 34-5, 34-6, 35, 35-1, 35-2, 35-3, 35-4, 35-5, 35-6, 35-7, 35-8, 35-9, 35-10, 35-11, 35-12, 35-13, 35-14, 35-15, 35-16, 35-17, 35-18, 35-19, 35-20, 35-21, 35-22, 35-23, 35-24, 35-25, 35-26, 35-27, 35-28, 35-29, 35-30, 35-31, 35-32, 35-33, 35-34, 35-35, 35-36, 35-37, 35-38, 35-39, 35-40, 35-41, 35-42, 35-43, 35-44, 35-45, 35-46, 35-47, 35-48, 35-49, 36, 37, 37-1, 37-2, 38, 38-1, 38-2, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 67-1, 67-2, 68, 69, 70, 70-1, 71, 72, 79-1, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, PSNH R.O.W, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106; Map 56, Lots: 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, PSNH R.O.W., 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43.
- 2007 From Industrial (I) to Integrated Commercial-Industrial 2 (ICI-2): Map 7, Lots 16, 16-1, 18, 19, 20, 21, 22, 23, 25, 26, 27, and 28; Map 14, Lots 4 and 5; Map 38, Lots 3,4,5,5-1, 6,9,10,11,12, 13 and 14; from Residence "R" to Integrated Commercial-Industrial 2 (ICI-2) that portion of Map 38, Lot 9 currently zoned "R"; and from Industrial "I" to Residence "R" that portion of Map 38, Lot 50 currently zoned "I".
- 2014 Rezone the following parcels of land: a portion of Map 43, Lot 20 from Residence A to Limited Commercial Business "LCB", and a portion from Residence A to Commercial "C"; a portion of Map 43, Lot 69 from Residence "B" to Limited Commercial Business "LCB" and a portion from Residence B to Commercial "C".

## **ARTICLE IV: DEFINITIONS**

### **4.01.0 PURPOSE**

For the purpose of this Ordinance, the word "shall" is mandatory, the word "may" is permissive, and the following terms shall have the following meanings.

**Abutter:** Any person whose property is located in New Hampshire and adjoins or is directly across the street or stream from the land under consideration by the local land use Board. For purposes of receiving testimony only, and not for purposes of notification, the term "abutter" shall include any person who is able to demonstrate that his/her land will be directly affected by the proposal under consideration. For purposes of receipt of notification by a municipality of a local land use Board hearing, in the case of an abutting property being under a condominium or other collective form of ownership, the term abutter means the officers of the collective or association, as defined in NH RSA 356-B:3, XXIII. For purposes of receipt of notification by a municipality of a local land use Board hearing, in the case of an abutting property being under a manufactured housing park form of ownership defined in NH RSA 205-A:1, the term "abutter" includes the manufactured housing park owner and the tenants who own manufactured housing which adjoins or is directly across the street or stream from the land under consideration by the local land use Board. (2007)

**Accessory Dwelling Unit (ADU):** A residential living unit that is within or attached to a single-family dwelling, or its detached accessory structure, or as a stand-alone dwelling unit subordinate to the principal single-family dwelling unit, and that provides independent living facilities for one or more persons, including provisions for sleeping, eating, cooking, and sanitation on the same parcel of land as the principal dwelling unit it accompanies. For the purpose of this Ordinance, an accessory dwelling unit is not considered an accessory use or structure(s). (2017)

**Accessory Use or Structure:** A use or structure on the same lot with, and of a nature incidental and subordinate to, the principal use or structure. For the purpose of this Ordinance an accessory dwelling unit is not considered an accessory use or structure(s). (2013)

**Agriculture:** (Deleted 2010)

**Agriculture and Farming:** As defined in NH RSA 21:34-a, and as amended from time to time, shall mean all operations of a farm, including: the cultivation, conservation, and tillage of the soil; the storage, use of, and spreading of commercial fertilizer, lime, wood ash, sawdust, compost, animal manure, septage, and, where permitted by municipal and state rules and regulations, other lawful soil amendments; the use of and application of agricultural chemicals; the raising and sale of livestock, which shall include, but not be limited to, dairy cows and the production of milk, beef animals, swine, sheep, goats, as well as domesticated strains of buffalo or bison, llamas, alpacas, emus, ostriches, yaks, elk (*Cervus elephus Canadensis*), fallow deer (*Dama dama*), red deer (*Cervus elephus*), and reindeer (*Rangifer tarandus*); the breeding, boarding, raising, training, riding instruction, and selling of equines; the commercial raising, harvesting, and sale of fresh water fish or other aquaculture products; the raising, breeding, or sale of poultry or game birds; the raising of bees; the raising, breeding, or sale of domesticated strains of fur-bearing animals; the production of greenhouse crops; the production, cultivation, growing, harvesting, and sale of any agricultural, floricultural, viticultural, forestry, or horticultural crops including, but not limited to, berries, herbs, honey, maple syrup, fruit, vegetables,

tree fruit, grapes, flowers, seeds, grasses, nursery stock, sod, trees and tree products. Christmas trees grown as part of a commercial Christmas tree operation, trees grown for short rotation tree fiber, compost, or any other plant that can be legally grown and harvested extensively for profit or subsistence.

Agriculture and farming shall also mean any practice on the farm incident to, or in conjunction with such farming operations, including, but not necessarily restricted to: preparation for market, delivery to storage or to market, or to carriers for transportation to market of any products or materials from the farm; the transportation to the farm of supplies and materials; the transportation of farm workers; forestry or lumbering operations; the marketing or selling at wholesale or retail, on-site and off-site, products from the farm; irrigation of growing crops from private water supplies or public water supplies where not prohibited by State or local regulation; the use of dogs for herding, working, or guarding livestock as allowed above; the production and storage of compost and the materials necessary to produce compost, whether such materials originate, in whole or in part, from operations of the farm. (2010)

**Animal feedlot:** Deleted. (2015)

**Aquifer:** Geological formation composed of rock or sand and/or gravel that contains significant amounts of potentially recoverable potable water.

**Assisted Living Facility:** An Assisted Living Facility shall include, but not be limited to, a facility where rooms, meals, personal care and supervision of self-administered medication are provided pursuant to NH RSA 151:9, VII(a) and He-P 804.3 or as amended. Other services may be provided as an accessory use only, such as recreational activities, financial services, and transportation. (2011)

**Bed & Breakfast:** A building for transient occupancy which also provides breakfast to registered guests only and is owner occupied. (1997)

**Building:** Any structure used or intended for supporting or sheltering any use or occupancy. (1992)

**Church:** A building or structure, or groups of buildings or structures that by design and construction are primarily intended for conducting organized religious services. See also House of Worship (1996)

**Community Center:** A building used for recreational, social, educational and cultural activities, open to the public or a designated part of the public, usually owned and operated by a public or non-profit group or agency. (1996)

**Congregate Care Facility:** A Congregate Care Facility shall include, but not be limited to, a facility where communal dining facilities and services such as housekeeping, organized social and recreational activities, transportation services, and other support services appropriate for the residents are provided pursuant to NH RSA 151:9, VII(a) and He-P 814.3 or as amended. (2011)

**Day Care Facility:** Those facilities, as licensed by the State of New Hampshire, and defined by NH RSA 170-E:2 as providing child care under one or more of the following categories: (2007)

**A. Pre-School Program** - A facility regularly providing a structured program up to five (5) hours per day for seven (7) or more children who are three (3) years of age or older and who are not attending a full-day school program. The number of children shall include all children present during the period of the program.

**B. Group Pre-School Center** - A facility regularly providing full-day or half-day child care for thirteen (13) or more pre-school children, whether or not the service is known as a day nursery, nursery school, kindergarten, cooperative, child development center, day care center, center for the developmentally disabled, progressive school, Montessori school, or by any other name.

**C. After-School Program** - A facility in which child care is regularly provided up to five (5) hours per school day, before and/or after regular school holidays, for six (6) or more children who are enrolled in a full day program.

Day Care facility, for the purposes of this Ordinance, does not include "family day care home" as defined in NH RSA 170-E:2.

**Density:** For the purposes of this Ordinance, density is used to define residential dwelling units per acre, and is based on the allowable units per acre in each residential district. High density refers to allowable densities in the Residence "B" District, medium density refers to allowable densities in the Residence "A" District; and low density refers to allowable densities in the Residence "R" District. (1997)

**Distribution and Mailing Facilities:** Uses which constitute the temporary storage and/or shipping of goods, including mail order processing, package distribution and mailing. (1995)

**Drive Aisle:** The traveled passageway by which vehicles enter and depart parking spaces. (2002)

**Driveway:** A vehicular passageway providing access between a road and a parcel of land. (2002)

**Driveway, common commercial/industrial:** A single driveway that provides access between a road and two (2) or more conforming commercial and industrial lots. (2002)

**Driveway, common residential:** A single driveway that provides access between a road and not more than two (2) conforming residential lots. (2002)

**Dwelling Unit:** One room or rooms connected together, constituting a separate, independent housekeeping establishment physically separated from any other dwelling units in the same structure, and containing independent cooking and sleeping facilities.

**Dwelling, Single-family:** A detached residential dwelling unit, other than a mobile home, designed for one family only.

**Dwelling, Two-family:** A structure which contains two (2) separate dwelling units, each provided with complete and independent living facilities for one or more persons, including provisions for living, sleeping, eating, cooking, and sanitation as well as independent access and egress to and from each dwelling unit. (2013)

**Dwelling, Multi-family:** A structure consisting of three (3) or more dwelling units designed for occupancy by three or more families. (1995)

**Dwelling, Mixed-use:** One room or rooms connected together and designed for use as a dwelling unit; located in a non-residential building with no more than two (2) dwelling units that are in addition to the primary non-residential use. (2012)

**Family:** One or more persons occupying a dwelling unit and living as a single non-profit housekeeping unit.

**Family Day Care Home:** An occupied residence in which child care is regularly provided for less than twenty-four (24) hours per day, except in emergencies, for one (1) to six (6) children from one or more unrelated families. The six (6) children shall include any foster children residing in the home and all children who are related to the caregiver except children who are (ten) 10 years of age or older. In addition to the six (6) children, one (1) to three (3) children attending a full-day school program may also be cared for up to five (5) hours per day on school days and all day during school holidays. (1994)

**Farm:** As defined in NH RSA 21:34-a, and as amended from time to time, shall mean any land, buildings, or structures on or in which agriculture and farming activities are carried out or conducted and shall include the residence or residences of owners, occupants, or employees located on such land. Structures shall include all farm outbuildings used in the care of livestock, and in the production and storage of fruit, vegetables, or nursery stock; in the production of maple syrup; greenhouses for the production of annual or perennial plants; and any other structures used for 'agriculture' and 'farming' as defined in this Ordinance. A Farm may include a 'Farm roadside stand' as defined by this Ordinance. A farm may include wholesale and retail sale of feed and grain products, incidental and subordinate to agriculture and farming activities, produced either on-site or off-site, along with accessory structures utilized for feed and grain product storage. (2010)

**Farm roadside stand:** An agricultural operation, and not be considered commercial, where at least thirty-five percent (35%) of the product sales in dollar volume is attributable to products produced on the farm or farms of the farm roadside stand owner. Product sales not attributable to the farm or farms of the farm stand owner or farm stand operator shall be agriculturally related and may include, but not necessarily limited to, the sale of garden accessories, cheese, home crafts, cut flowers, dried flowers, value added products such as jams, jellies and baked goods from a licensed kitchen. Proof of farm income may be required to determine conformity with these provisions. (2010)

**Farmer's market:** A seasonal outdoor event or seasonal outdoor series of events, subject to applicable Town health and safety codes, at which two (2) or more vendors of agricultural commodities gather for purposes of offering for sale such commodities to the public. Commodities offered for sale must include, but are not limited to, products of agriculture as defined in this Ordinance. A 'farmer's market' shall not include any event held upon the premises owned, leased, or otherwise controlled by any individual vendor selling therein. (2010)

**Filling Station:** A building or structure, or part thereof, or any premises used in connection with tanks, pumps, and other appliances for supplying motor vehicles with gasoline, oil, water, compressed air and similar supplies, but not used for the purpose of making repairs. (1995)

**Floor Area, Gross:** The floor area within the inside perimeter of the exterior walls of the building under consideration, exclusive of vent shafts and courts, without deduction for corridors, stairways, closets, the thickness of interior walls, columns or other features. The gross floor area shall not include shafts with no openings or interior courts. (2016)

**Frontage, minimum:** That continuous portion of a lot bordering on a road(s) from which access can be taken, that meets the minimum requirements of the underlying zoning district. (2006)

**Funeral Home:** A building used for the preparation of the deceased for burial and the display of the deceased and rituals connected therewith before burial or cremation. (1996)

**Groundwater:** Subsurface water that occurs beneath the water table in soils and geologic formations. [NH RSA 485-C, Groundwater Protection Act] (2015)

**Groundwater Recharge Areas:** Areas composed of permeable stratified sand and/or gravel and certain wetlands, which collect precipitation surface water and carry it to aquifers.

**Harvesting of Natural Resources:** the removal of natural resources, such as timber, freshwater, and earth materials from their existing natural state on-site. (2011)

**Hazardous or Toxic Materials or Liquids:** Materials or liquids that pose a threat present or future to the environment whether in use, storage or transit, including without exception hazardous waste identified and listed in accordance with Section 3001 of the Resource Conservation and Recovery Act of 1976 as amended. (1993)

**Health Service Facilities:** A Health Service Facility shall include but not be limited to a facility providing clinically related outpatient diagnostic, treatment, or rehabilitative services, as well as preventative services, and includes, without limitation, alcohol, drug abuse, and mental health services. (2011)

**Height:** The height of a building or structure shall mean the vertical distance from the average elevation of the finished grade within five feet of the building or structure to the highest point of the building or structure. (2005)

**Home Based Business:** A business use conducted on a property within a dwelling or an accessory building that is secondary and incidental to a primary residential use. (2019)

**Hospice house:** A Hospice House shall include but not be limited to free standing 24-hour residential setting licensed under NH RSA 151 as a supported residential care facility for terminally ill individuals with less than one year to live who no longer have a home or cannot remain safely there. Palliative care such as room, meals, personal care, medication monitoring and emotional support, is provided. Additional health care services may be provided to residents through arrangements with outside organizations as is currently available if the resident was in his/her home. (2011)

**Hospital:** A Hospital shall include but not be limited to an institution licensed by the State of New Hampshire which is engaged in providing to patients, under supervision of physicians, inpatient and outpatient diagnostic and therapeutic services for medical diagnosis, treatment and care of injured, disabled, or sick persons, or rehabilitation services for the rehabilitation of such persons. The term hospital includes psychiatric and substance abuse treatment facilities. (2011)

**Hotel:** A facility offering transient lodging accommodations to the general public supervised by a person in charge at all hours, and which may include additional facilities and services such as restaurants, bars, meeting and function rooms, entertainment, personal services, and recreational facilities. (2011)

**Hotel/Motel:** Deleted. (2011)

**House of Worship:** A building or structure, or groups of buildings or structures, that by design and construction are primarily intended for conducting organized religious services. See also Church (2001)

**Independent Senior Housing Units:** Deleted. (2015)

**Junkyard:** An establishment or place of business which is maintained, operated, or used for storing and keeping, or storing and selling, trading or otherwise transferring old or scrap copper, brass, rope, rags, batteries, paper, trash, rubber debris, waste or junked, dismantled or wrecked motor vehicles, or parts thereof, iron, steel or other old or scrap ferrous or nonferrous material. Junkyard shall also include any place of business for the maintenance or operation of an automotive recycling yard, and includes garbage dumps and sanitary fills. Also includes any business and any place of storage or deposit, whether in connection with another business or not, which has stored or deposited two (2) or more unregistered motor vehicles which are no longer intended or in condition for legal use on the public highways, or used parts of motor vehicles or old iron, metal, glass, paper, cordage, or other waste or discarded or second-hand material which has been a part, or intended to be a part, of any motor vehicle, the sum of which parts or material shall be equal in bulk to two (2) or more motor vehicles. Junkyard shall also include any place of business or storage or deposit of motor vehicles purchased for the purpose of dismantling the vehicles for parts or for use of the metal for scrap and where it is intended to burn material, which are parts of a motor vehicle or cut up the parts thereof. Also, includes any yard or field used as a place of storage in which there is displayed to the public view, junk machinery or scrap metal that occupies an area of five hundred (500) square feet and as amended by NH RSA 236:112. (2009)

**Kennel:** Deleted. (2012)

**Leachable Wastes:** Deleted. (2015)

**Lot:** The whole area of a single parcel of land, with assertable boundaries in single or joint ownership undivided by a street and established by deeds of record. (1999)

**Lot line, front:** The lot line of record separating a lot from a road. (2002)

**Lot of Record:** Lot of record shall be considered to meet the minimum lot size and frontage requirements of the Ordinance if it was in existence prior to the adoption of the Zoning Ordinance (3/11/1969) as long as the lot of record has fifteen feet (15') of frontage on a Class V or better road. (2012)

**Lot Use:** A parcel of land occupied or capable of being occupied by a building(s) or use(s), and the buildings or uses accessory thereto, including such open spaces and yards as are required by this Ordinance. (2007)

**Manufactured Housing:** A structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term manufactured housing does not include a recreational vehicle. Generally, manufactured homes must meet the same requirements as stick built or conventional housing. Because they are usually residential buildings, they must be elevated so that the lowest floor is above the Base Flood Elevation (BFE). (2015)

**Manufactured Housing Park:** A parcel of land upon which two (2) or more manufactured homes are, or are intended to be, placed and occupied as dwellings. (1995)

**Manufacturing:** The making of goods or materials from raw materials or unfinished products, includes assembling and processing. (1997)

**Mining of Land:** The removal or relocation of geological materials such as topsoil, sand, gravel, metallic ores or bedrock.

**Motor Vehicle Repair Facility:** A building or structure or part thereof, or any premises used for making changes, adjustments or repairs to motor vehicles, may also include structural repairs, painting and work involving use of machinery. May also include retail sale of motor vehicle parts and accessories and retail sale of petroleum products. (1995)

**Motorized Vehicles Sales Facility:** A building or structure, or part thereof, or any premises used for the commercial display, sale, lease, or rental of new or used internal combustion engine vehicles in operable condition and where no repair work is done. (2007)

**Net Tract Area:** Deleted. (2007)

**Nursery:** Deleted. (2012)

**Nursery Stock:** Deleted. (2012)

**Nursing home or facility:** A Nursing Home or Facility shall include but not be limited to a facility, licensed by the State of New Hampshire, which shall provide, for two (2) or more persons, basic domiciliary services (room, board, and laundry), continuing health supervision under competent professional medical and nursing direction, and continuous nursing care as may be individually required. (2011)

**Office:** The building, room or series of rooms in which the affairs of a business, profession or branch of government are conducted. (1995)

**Open space:** Permeable surface on a lot that is unoccupied by buildings, unobstructed to the sky, not devoted to service driveways or off-street parking that is available to all occupants of the premises. (1995)

**Parking Space:** An off-street space sufficient in size to accommodate the parking of one motor vehicle exclusive of the area necessary for internal access driveways and passageways on any site. The Planning Board shall develop such standards and requirements regulating the size and arrangement of parking spaces, as it may deem necessary and appropriate. (1985)

**Person:** Any individual, firm, co-partnership, corporation, company, association, joint stock association or body politic, trustee, receiver, assignee, or other similar representative thereof.

**Portable Sign:** Deleted. (2013)

**Pre-site Built Housing:** Any structure designed primarily for residential occupancy which is wholly or in substantial part made, fabricated, formed or assembled in off-site manufacturing facilities in conformance with the United States Department of Housing and Urban Development minimum property

standards and local building codes, for installation, or assembly and installation on the building site. For the purposes of this definition, pre-site built housing does not include manufactured housing. (See manufactured housing) (1995)

**Principal Route of Access:** Deleted. (2009)

**Private Way:** A driveway which the Town has no duty to maintain which provides access to no more than two (2) building lots but not including any Class VI Highway as defined by NH RSA and subject to Section 7.040 Private Ways. (See Driveway; Driveway, Common) (1995)

**Processing and Warehousing:** The storage of materials in a warehouse or terminal where such materials may be combined, broken down, or aggregated for distribution or storage and where the original material is not chemically or physically changed. Processing and warehousing is considered to be storage and shipment as opposed to manufacturing. (1997)

**Processing of Natural Resources:** A series of operations, usually in a continuous and regular action or succession of actions, performed to create products from materials supplied by nature. (1997)

**Public Utility:** Deleted (2014)

**Recreation, active:** Leisure time activities, usually of a formal nature and often performed with others, requiring equipment and taking place at prescribed places, sites, or fields. (2002)

**Recreation, passive:** Leisure time activities that involve relatively inactive or less energetic activities such as walking, sitting, picnicking, card games, chess, checkers, or similar table games. (2002)

**Recreational Facility, Commercial:** A place designed and equipped for the conduct of leisure-time activities, operated as a business for profit and open to the public for a fee. This includes, but is not limited to, places of amusement such as bowling alleys, miniature golf courses, movie theaters, health and fitness clubs, sports fields, golf courses, accessory food service and concessions, and similar types of establishments. (1997)

**Recreational Facility, Not-for-Profit:** A place designed and equipped for the conduct of leisure-time activities open to the general public, owned and operated by a not-for-profit organization. (1996)

**Recreational Vehicle:** A temporary dwelling for travel, recreation, and vacation use including but not limited to, camping trailer, travel trailer, pick-up coach to be mounted on a truck chassis, or a self-propelled motor home.

**Research and Development:** A place devoted to activities engaged in refinement, investigation or experimental study of methods to improve processes or products. Manufacturing of products is not included within this definition. (1994)

**Retail Businesses:** Uses which constitute the sale of goods or the delivery of service and/or repair. (1994)

**Right-of-way:** A section of land acquired by easement, reservation, dedication, prescription, or condemnation, duly recorded in the Hillsborough County Registry of Deeds, and intended to be occupied by a road, crosswalk, railroad, utility lines, and/or other similar uses; and furthermore, the right to pass over the property of another. (2002)

**Road:** Any vehicular right-of-way that: (1) is an existing federal, state, Town, or privately owned and maintained roadway; (2) is shown upon a plan approved pursuant to NH RSAs; (3) is shown on a plan duly filed and recorded in the Office of the Hillsborough County Registry of Deeds; or (4) is approved by any other official action of the Town of Milford. A road contains all the land within the right-of-way. (2002)

**Roadway:** The traveled portion of a road within a right-of-way. (2002)

**Self-Storage Facility:** A building, group of buildings or other facility having compartments, rooms, spaces, containers or other type of units that are individually leased, rented, sold or otherwise contracted for, by customers solely for the storage of personal or business goods or property. Items prohibited from being stored include: flammable liquids, hazardous or toxic chemicals or explosives (including fireworks) and/or items that would create noxious or offensive odors, dust, noise, or vibration. Self-storage facilities are those where the facility owner/operator has limited access to the units. For purposes of this Ordinance, "self-storage facility" shall be considered synonymous with self-storage warehouse, self-service storage facility, mini-warehouse or mini-storage, and/or portable storage containers. (2019)

**Setback:** That horizontal distance measured between the right-of-way of a road or a side or rear lot line and the closest point of any building or structure contained on the lot.

**Schools:** Any building, part thereof, or group of buildings, the use of which meets State requirements for elementary, secondary, vocational or higher education. (1996)

**Sign:** Any device for visual communication that is used for the purpose of bringing the subject thereof to the attention of the public, but not including any flag.

**Small Wind Energy Systems (SWES):** A wind energy conversion system consisting of a wind turbine, a generator, a tower and associated control or conversion electronics, which has a rated capacity of 100 kilowatts or less and will be used primarily for onsite consumption. (2009)

**Solid Waste Disposal Sites:** Areas for disposal of any matter consisting of putrescible material, refuse, or residue from an air pollution control facility; and other discarded or abandoned material. It includes solid, liquid, semi-solid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations and from community activities. For the purpose of this Chapter, namely NH RSA 149-M and the rules specified in ENV-WM 101.01 Applicability, "it does not include hazardous wastes as defined in NH RSA 147-A:2; solid or dissolved materials in irrigation return flows; cut or uprooted tree stumps incident to clearing of land depicted on a site plan showing burial locations and mailed to the director, provided that such burial locations are not located within seventy-five (75) feet of any well as defined in NH RSA 485:37; municipal and industrial discharges which are point sources subject to permits under Section 402 of the Federal Water Pollution Control Act, as amended; source, special nuclear or by-product materials as defined by the atomic energy act of 1954, as amended, or septage or sludge as defined in NH RSA 485-a:2, IX-a and XI a" ("Solid Waste" shall not include deceased persons). (1995)

**Solid Wastes:** Useless, unwanted, or discarded solid material with insufficient liquid content to be free flowing including, but not limited to rubbish, garbage, scrap materials, junk refuse, inert fill material and landscape refuse.

**Structure:** A combination of materials for occupancy or use, such as, but not limited to, a building, bridge, trestle, tower, tunnel, pier, wharf, fences and retaining walls over six (6) feet in height above grade, and swimming pools. (1992) (amended 2001)

**Structure, Non-conforming:** A structure which is lawfully maintained at the time this Ordinance became effective and which does not conform with the regulations of the district in which it is located.

**Usable land:** Land that does not consist of wetland and slopes over fifteen (15) percent. (2002)

**Use, Non-conforming:** A use existing prior to the enactment of the Zoning Ordinance (3/11/69) and that is maintained after the effective date of the Ordinance, although it does not comply with the zoning restrictions applicable to the district in which it is situated. (2012)

**Utility, public or private:** Any agency that, under public franchise or private ownership, or under certificate of convenience or necessity, or by grant of authority by a government agency, provides the public, or itself with electricity, gas, heat, steam, communication, transportation, water, sewerage collection, stormwater collection, or similar service. (2017)

**Veterinary Clinics:** A structure in which animals are given medical or surgical treatment and are cared for during the time of treatment only. (1994)

**Warehouse:** A building used primarily for the storage of goods and materials. (1997)

**Wetland:** An area that is inundated or saturated by surface or ground water at a frequency or duration sufficient to support, and under normal conditions, does support a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands include, but are not limited to, swamps, marshes, bogs and similar areas. (1996)

**Wholesale Businesses:** Uses which constitute the sale of goods in quantity, usually for resale. (1994)

**Yard:** A required open space parallel to the lot lines which is open to the sky and unoccupied and unobstructed by a building or buildings.

**Yard, Front:** A yard between the building and front lot line, extending the full width of the lot or, in case of a corner lot extending along all streets.

**Yard, Rear:** A yard extending between side lot lines across the rear of the lot.

**Yard, Side:** A yard extending from the rear line of the required front yard to the front line of the required rear yard.

## **ARTICLE V: ZONING DISTRICTS AND REGULATIONS**

### **5.01.0 (Intentionally Blank)**

### **5.02.0 RESIDENCE "A" DISTRICT (1995)**

**INTENT:** The intent of the Residence "A" District is to provide for low-density or low-intensity uses, primarily single-family residential on individual lots.

#### **5.02.1 ACCEPTABLE USES**

- A. Single-family dwellings and their accessory uses and structures
- B. Telecommunication facilities (2000)
- C. Farm roadside stands (2010)
- D. Solar Collection Systems in accordance with Section 7.11.0 (2019)
- E. Home Based Business in accordance with Section 7.12.0 (2019)

#### **5.02.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

##### **A. Special Exception**

- 1. Home Based Business in accordance with Section 7.12.0 (2019)
- 2. Recreational facility, not-for-profit (1997)
- 3. Day care facilities
- 4. Family day care homes
- 5. Churches or Houses of Worship (2011)
- 6. Deleted (2014)
- 7. Schools
- 8. Reduced front, side and rear setbacks (2001)
- 9. Bed & breakfast (1997)
- 10. Recreational facility, commercial (1997)
- 11. Building and structure height greater than allowed in 5.02.6:A and 5.02.6:B (2005)
- 12. Deleted (2015)
- 13. Accessory Dwelling Units (2008)
- 14. Utility, public or private (2011)
- 15. Office in accordance with Section 10.02.7 (2011)

##### **B. Conditional Use Permit (2009)**

- 1. Small Wind Energy Systems (2009)

#### **5.02.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the "A" District as acceptable, acceptable by Special Exception, or acceptable by Conditional Use Permit shall be considered as not permitted.

#### **5.02.4 LOT SIZES AND FRONTAGES (2009)**

The minimum lot size and frontage for single-family residence and all other acceptable uses in the Residence "A" District shall be:

- A. Those areas serviced by both municipal sewerage and water systems shall have lots not less than fifteen thousand (15,000) square feet in area with one hundred (100) feet of frontage on a Class V or better road.
- B. Those areas not serviced by both municipal sewerage and water systems shall have single-family lots not less in area than forty thousand (40,000) square feet, or larger depending on soil and slope conditions, as may be suitable to sustain development according to State standards, with one hundred fifty feet (150') of frontage on a Class V or better road.

#### **5.02.5 YARD REQUIREMENTS (1996)**

- A. Each structure shall be set back at least thirty (30) feet from the front property line.
- B. Each structure shall be at least fifteen (15) feet from the side and rear property lines. In case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the street, lane or public way.
- C. Accessory structures, one hundred-twenty (120) square feet or less, shall have a minimum setback from the side and rear property lines of six (6) feet. (2011)

#### **5.02.6 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Residence "A" District shall be thirty-five (35) feet, except as noted in B. below.
- B. The maximum height of school and municipal buildings or structures in the Residence "A" District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

### **5.03.0 RESIDENCE "B" DISTRICT (1995)**

**INTENT:** The intent of the Residence "B" District is to provide areas for increased residential density and other uses which are compatible with these residential densities.

#### **5.03.1 ACCEPTABLE USES**

- A. Single-family dwellings and their accessory uses and structures
- B. Two-family dwellings and their accessory uses and structures
- C. Multi-family dwellings with municipal sewerage and water systems and their accessory uses and structures
- D. Telecommunication facilities (2000)
- E. Deleted (2015)
- F. Farm roadside stands (2010)
- G. Solar Collection Systems in accordance with Section 7.11.0 (2019)
- H. Home Based Business in accordance with Section 7.12.0 (2019)

#### **5.03.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

##### **A. Special Exception**

- 1. Hospital and/or related facilities licensed by the State of NH
- 2. Schools
- 3. Funeral homes
- 4. Home Based Business in accordance with Section 7.12.0 (2019)
- 5. Day care facilities
- 6. Family day care homes
- 7. Recreational facility, commercial (1997)
- 8. Recreational facility, not-for-profit (1997)
- 9. Deleted (2014)
- 10. Bed & breakfast (1997)
- 11. Reduced front, side and rear setbacks (amended 2001)
- 12. Building and structure height greater than allowed in 5.03.8:A and 5.03.8:B (2005)
- 13. Accessory Dwelling Units (2008)
- 14. Hospice House (2011)
- 15. Nursing home or facility (2011)
- 16. Utility, public or private (2011)
- 17. Office in accordance with Section 10.02.7 (2011)

##### **B. Conditional Use Permit (2009)**

- 1. Small Wind Energy Systems (2009)

#### **5.03.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the "B" District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not permitted.

#### **5.03.4 ALLOWABLE DENSITY**

Multi-family residences in the Residence "B" District shall adhere to the following conditions for development:

- A. Multi-family dwellings shall be served by both municipal sewerage and water systems and may have a maximum of five (5) units per acre. The maximum density may be reduced by the Planning Board based on recommendations of other qualified consultants.
  - 1. Section Deleted. (2007)
- B. In the conversion of an existing house to apartments or multi-family dwellings, a maximum of five (5) units per acre of land associated with the existing house shall be permitted, given the following conditions:
  - 1. The proposal meets the standards set forth for maximum density 5.03.4, yard requirements 5.03.6 and usable open space 5.03.7. (1996)

#### **5.03.5 LOT SIZES AND FRONTAGES**

- A. The following provisions shall apply to all other acceptable uses in this District, except single-family residences. (2009)
  - 1. In those areas serviced by both municipal sewerage and water systems, the minimum lot size in Residence "B" shall have as a minimum, twenty thousand (20,000) square feet in area with one hundred fifty (150) feet of frontage on a Class V or better road.
  - 2. In those Residential "B" areas not serviced by both municipal sewerage and water systems, the minimum lot size shall be sixty thousand (60,000) square feet in area or larger, depending on soil and slope conditions, as may be necessary to sustain development according to state standard with two hundred, twenty-five (225) feet of frontage on a Class V or better road.
  - 3. The minimum lot size and frontage for a single-family residence in this District shall be the same as those set forth for the Residence "A" District in section 5.02.4 of this article.

#### **5.03.6 YARD REQUIREMENTS (2011)**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be at least fifteen (15) feet from side and rear property lines. In case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the street, lane or public way.
- C. Accessory Structures, one hundred-twenty (120) square feet or less shall have a minimum setback from the side and rear property lines of six (6) feet.

#### **5.03.7 OPEN SPACE**

Open space shall be provided for all uses, other than single-family and two-family dwellings in an amount equal to not less than thirty (30) percent of the total lot area.

#### **5.03.8 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Residence "B" District shall be thirty-five (35) feet, except as noted in B. below.

- B. The maximum height of school and municipal buildings or structures in the Residence "B" District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

#### **5.04.0 RESIDENCE "R" DISTRICT (2001)**

**INTENT:** The intent of the Residence "R" District is to provide for low-density residential and agricultural land uses, and other compatible land uses, that are sensitive to the rural character and environmental constraints existing in the district.

#### **5.04.1 ACCEPTABLE USES**

- A. One single-family dwelling and its accessory uses and structures, per lot
- B. Agriculture and Farming (2010)
- C. One single-family manufactured housing unit, per lot
- D. Harvesting of natural resources
- E. Telecommunication facilities (2000)
- F. Deleted (2011)
- G. Farm Roadside Stands (2010)
- H. Solar Collection Systems in accordance with Section 7.11.0 (2019)
- I. Home Based Business in accordance with Section 7.12.0 (2019)

#### **5.04.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

##### **A. Special Exception**

- 1. One two-family dwelling per lot (2001)
- 2. Veterinary clinics
- 3. Home Based Business in accordance with Section 7.12.0 (2019)
- 4. Day care facilities
- 5. Family day care home
- 6. Schools
- 7. Reduced front, side and rear setbacks (2001)
- 8. Bed & breakfast (1997)
- 9. Processing of natural resources on parcels of a minimum five (5) acres in size (2011)
- 10. Recreational facility, not-for-profit (1997)
- 11. Recreational facility, commercial (1997)
- 12. Churches or Houses of Worship (2011)
- 13. Building and structure height greater than allowed in 5.04.7:A or 5.04.7:B (2005)
- 14. Accessory Dwelling Units (2008)
- 15. Hospice house (2011)
- 16. Nursing home or facility (2011)
- 17. Utility, public or private (2011)

##### **B. Conditional Use Permit (2009)**

- 1. Small Wind Energy Systems (2009)
- 2. Solar Collection Systems in accordance with Section 7.11.0 (2019)
- 3. Home Based Business in accordance with Section 7.12.0 (2019)

#### **5.04.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the "R" District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not permitted.

#### **5.04.4 LOT SIZES AND FRONTAGES (2009)**

- A. The minimum lot size and frontage for a single-family dwelling or a single-family manufactured housing unit and all other permitted uses, unless stated otherwise, in the residence "R" District shall be two (2) acres (87,120 SF), or greater, depending on soil and slope conditions, with a minimum two hundred (200) feet of frontage on a Class V or better road.
- B. The minimum lot size and frontage for a two-family dwelling as allowed by Special Exception in the Residence "R" District shall be four (4) acres (174,240 SF), or greater, depending on soil and slope conditions, with a minimum three hundred (300) feet of frontage on a Class V or better road.

#### **5.04.5 YARD REQUIREMENTS (2011)**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be at least fifteen (15) feet from side and rear property lines. In case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the street, lane or public way.
- C. Accessory Structures, one hundred-twenty (120) square feet or less shall have a minimum setback from the side and rear property lines of six (6) feet.

#### **5.04.6 OPEN SPACE**

Open space shall be provided for all uses, other than single-family and two-family dwellings, in an amount equal to not less than thirty (30) percent of the total lot area.

#### **5.04.7 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Residence "R" District shall be thirty-five (35) feet, except as noted in B. below.
- B. The maximum height of school and municipal buildings or structures in the Residence "R" District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

### **5.05.0 COMMERCIAL “C” DISTRICT (1995)**

**INTENT:** The intent of this District is to provide areas for those businesses, institutional, financial, governmental and compatible residential uses which constitute the commercial requirements of the Town.

#### **5.05.1 ACCEPTABLE USES**

- A. Retail businesses
- B. Wholesale businesses
- C. Restaurants
- D. Filling stations (2011)
- E. Offices
- F. Banks and financial institutions
- G. Hospitals (2011)
- H. Schools
- I. Hotels (2011)
- J. Churches or Houses of Worship (2011)
- K. Bed & breakfast (1997)
- L. Deleted (2011)
- M. Newspaper and job printing
- N. Funeral homes
- O. Single-family dwellings and their accessory uses and structures, with their respective related conditions set forth in Residence "A" District
- P. Two-family and multi-family dwellings and their accessory uses and structures, with their respective related conditions set forth in Residence "B"
- Q. Deleted (2019)
- R. Recreational facility, not-for-profit (1997)
- S. Recreational facility, commercial (1997)
- T. Telecommunication facilities (2000)
- U. Motor vehicles sales facilities (2011)
- V. Deleted (2015)
- W. Farm roadside stands (2010)
- X. Farmer's market (2010)
- Y. Day care facilities (2011)
- Z. Motor vehicle repair facilities (2011)
- AA. Health services facilities (2011)
- BB. Hospice house (2011)
- CC. Veterinary clinics (2011)
- DD. Nursing home or facility (2011)
- EE. Agriculture and farming (2011)
- FF. Utility, public or private (2011)
- GG. Dwelling, Mixed-use (2012)
- HH. Solar Collection Systems in accordance with Section 7.11.0 (2019)

### **5.05.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

#### **A. Special Exception**

1. Deleted (2011)
2. Family day care homes
3. Reduced front, side and rear setbacks
4. Manufacturing (2011)
5. Building and structure greater than allowed in 5.05.8:A and 5.05.8:B (2005)
6. Accessory Dwelling Units (2008)
7. Distribution and mailing facilities (2011)
8. Research and development (2011)

#### **B. Conditional Use Permit (2009)**

1. Small Wind Energy Systems (2009)

### **5.05.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the Commercial District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not permitted.

### **5.05.4 LOT SIZES AND FRONTAGES (2009)**

- A. In those areas serviced by both municipal sewerage and water systems, the minimum lot size in Commercial District shall be twenty thousand (20,000) square feet, together with one hundred and fifty (150) feet of frontage on Class V or better road.
- B. In those commercial areas not serviced by municipal sewerage and water systems, the minimum lot size shall be sixty thousand (60,000) square feet, together with two hundred twenty-five (225) feet of frontage on a Class V or better road.

### **5.05.5 YARD REQUIREMENTS (1995)**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be at least fifteen (15) feet from side and rear property lines. In case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the street, lane or public way.

### **5.05.6 OPEN SPACE**

Open space shall be provided for all uses, other than single-family and two-family dwellings, in an amount equal to not less than thirty (30) percent of the total lot area.

**5.05.7 OVAL SUBDISTRICT:**

**EXEMPTION FROM YARD AND OPEN SPACE REQUIREMENTS (2007)**

The following area shall be exempt from the open space and yard requirements for all allowable uses in the Commercial District except multi-family residences: bounded by and beginning at the intersection of Great Brook and the Souhegan River, proceeding East along the southern bank of the Souhegan River to the Swinging Bridge, proceeding south along the west line of Pine Street to the intersection with Nashua Street, continuing south along the west line of Franklin Street to its intersection with High Street, then proceeding west along the north line of High Street and continuing west along the south line of Lot 39 on Tax Map 25 to the southwest corner of that parcel intersection with Great Brook and then proceeding north along the east bank of Great Brook to the beginning.

**5.05.8 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Commercial District shall be forty (40) feet, except as noted in B. below.
- B. The maximum height of school and municipal buildings or structures in the Commercial District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

### **5.06.0 INDUSTRIAL “I” DISTRICT (1995)**

**INTENT:** The intent of the Industrial District is to provide areas for manufacturing, processing, assembly, wholesaling, research and development.

#### **5.06.1 ACCEPTABLE USES**

- A. Harvesting of natural resources (2011)
- B. Manufacturing (from Light manufacturing 2003)
- C. Offices (2011)
- D. Research and development
- E. Distribution and mailing facilities
- F. Processing and warehousing
- G. Telecommunication facilities (2000)
- H. Farm roadside stands (2010)
- I. Processing of natural resources (2011)
- J. Newspaper and job printing (2011)
- K. Agriculture and farming (2011)
- L. Utility, public or private (2011)
- M. Solar Collection Systems in accordance with Section 7.11.0 (2019)
- N. Home Based Business in accordance with Section 7.12.0 (2019)

#### **5.06.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

##### **A. Special Exception**

- 1. Building and structure greater than allowed in 5.06.7:A and 5.06.7:B (2005)
- 2. Accessory Dwelling Units for existing single-family dwellings (2008)
- 3. Reduced front, side and rear setbacks (2009)
- 4. Hotels (2011)

##### **B. Conditional Use Permit (2009)**

- 1. Small Wind Energy Systems (2009)
- 2. Solar Collection Systems in accordance with Section 7.11.0 (2019)

#### **5.06.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the Industrial District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not permitted.

#### **5.06.4 LOT SIZES AND FRONTAGES**

- A. In those areas serviced by both municipal sewerage and water systems, no minimum lot size and frontage shall be required, other than those requirements that relate to usable open space so long as access to sewer and water is obtained.

- B. In those areas not serviced by municipal sewerage and water systems, a minimum of forty thousand (40,000) square feet shall be required, depending on soil and slope. No minimum frontage shall be required.

**5.06.5 YARD REQUIREMENTS**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be at least fifteen (15) feet from side and rear property lines. In case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the street, lane or public way.

**5.06.6 OPEN SPACE**

Open space shall be provided for all uses in an amount equal to not less than thirty (30) percent of the total lot area.

**5.06.7 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Industrial District shall be forty (40) feet, except as noted in B. below.
- B. The maximum height of school and municipal buildings or structures in the Industrial District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

### **5.07.0 LIMITED COMMERCIAL-BUSINESS “LCB” DISTRICT**

**INTENT:** The intent of the Limited Commercial-Business District is to provide areas for those business activities which are compatible with surrounding residential neighborhoods.

#### **5.07.1 ACCEPTABLE USES**

- A. Offices
- B. Health service facilities (2011)
- C. Schools
- D. Bed and breakfast
- E. Churches or Houses of Worship (2011)
- F. Funeral homes
- G. Single-family dwellings and their accessory uses and structures, with their respective related conditions set forth in the Residence "A" District
- H. Two-family and multi-family dwellings and their accessory uses and structures, with their related conditions set forth in the Residence "B" District
- I. Deleted (2019)
- J. Telecommunication facilities (2000)
- K. Deleted (2015)
- L. Farm roadside stands (2010)
- M. Day care facilities (2011)
- N. Hospice house (2011)
- O. Utilities, public or private (2011)
- P. Dwelling, Mixed-use (2012)
- Q. Solar Collection Systems in accordance with Section 7.11.0 (2019)

#### **5.07.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

##### **A. Special Exception**

- 1. Deleted (2011)
- 2. Family day care homes
- 3. Recreational facility, not-for-profit (1997)
- 4. Reduced front, side and rear setbacks
- 5. Building and structure height greater than allowed in 5.07.7:A and 5.07.7:B (2005)
- 6. Accessory Dwelling Units (2008)

##### **B. Conditional Use Permit (2009)**

- 1. Small Wind Energy Systems (2009)

#### **5.07.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the Limited Commercial-Business District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not permitted.

#### **5.07.4 LOT SIZES AND FRONTAGES (2009)**

- A. In those areas serviced by both municipal sewerage and water systems, the minimum lot size in Limited Commercial-Business District shall be twenty thousand (20,000) square feet, together with one hundred and fifty (150) feet of frontage on a Class V or better road.
- B. In those Limited Commercial-Business areas not serviced by municipal sewerage and water systems, the minimum lot size shall be sixty-thousand (60,000) square feet, together with two hundred twenty-five (225) feet of frontage on a Class V or better road.

#### **5.07.5 YARD REQUIREMENTS**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be at least fifteen (15) feet from the side and rear property lines. In case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the street, lane or public way.

#### **5.07.6 OPEN SPACE**

Open space shall be provided for all uses, other than single-family and two-family dwellings, in an amount equal to not less than thirty (30) percent of the total lot area.

#### **5.07.7 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Limited Commercial-Business District shall be thirty-five (35) feet, except as noted in B. below.
- B. The maximum height of school and municipal buildings or structures in the Limited Commercial-Business District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

### **5.08.0 INTEGRATED COMMERCIAL-INDUSTRIAL “ICI” DISTRICT (1995)**

**INTENT:** The intent of the Integrated Commercial-Industrial District is to provide an area for sales and service activities, both wholesale and retail, as well as industrial activities. This District is intended to be the area in which vehicular oriented business can occur.

#### **5.08.1 ACCEPTABLE USES**

- A. Wholesale businesses
- B. Retail businesses
- C. Restaurants
- D. Offices
- E. Hotels (2011)
- F. Day care facilities (2011)
- G. Utility, public or private (2011)
- H. Manufacturing (from Light manufacturing 2003)
- I. Distribution and mailing facilities
- J. Research and development (2011)
- K. Motor vehicle repair facilities
- L. Harvesting of natural resources
- M. Banks and financial institutions
- N. Processing and warehousing (1997)
- O. Adult Entertainment Businesses (2000)
- P. Telecommunication facilities (2000)
- Q. Motor vehicle sales facilities (2011)
- R. Farm roadside stands (2010)
- S. Farmer’s market (2010)
- T. Bed and breakfast (2011)
- U. Churches or Houses of Worship (2011)
- V. Processing of natural resources (2011)
- W. Hospitals (2011)
- X. Health services facilities (2011)
- Y. Newspaper and job printing (2011)
- Z. Veterinary clinics (2011)
- AA. Nursing home or facility (2011)
- BB. Agriculture and farming (2011)
- CC. Dwelling, Mixed-use (2012)
- DD. Filling Station (2012)
- EE. Solar Collection Systems in accordance with Section 7.11.0 (2019)
- FF. Home Based Business in accordance with Section 7.12.0 (2019)

## **5.08.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

### **A. Special Exception**

1. Schools
2. Recreational facility, not-for-profit (1997)
3. Recreational facility, commercial (1997)
4. Deleted (2011)
5. Building and structure height greater than allowed in 5.087.A and 5.087.B (2005)
6. Deleted (2015)
7. Accessory Dwelling Units for existing single-family dwellings (2008)
8. Reduced front, side and rear setbacks (2009)

### **B. Conditional Use Permit (2009)**

1. Small Wind Energy Systems (2009)
2. Solar Collection Systems in accordance with Section 7.11.0 (2019)

## **5.08.3 USES NOT SPECIFIED (2010)**

Any uses of land and/or structures not specifically included in the ICI (Integrated Commercial-Industrial) District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not permitted.

## **5.08.4 LOT SIZES AND FRONTAGES (2009)**

- A. In those areas serviced by both municipal sewerage and water systems, the minimum lot size in the Integrated Commercial-Industrial District shall be twenty thousand (20,000) square feet, together with a minimum of one hundred fifty (150) feet of frontage on a Class V or better road.
- B. In those areas not serviced by municipal sewerage and water systems, a minimum of forty thousand (40,000) square feet shall be required, depending upon soil and slope conditions, together with a minimum of one hundred fifty (150) feet of frontage on a Class V or better road.

## **5.08.5 YARD REQUIREMENTS**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be set back at least fifteen (15) feet from side and rear property lines. In the case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the public way.

## **5.08.6 OPEN SPACE**

Open space shall be provided in an amount equal to not less than thirty (30) percent of the total lot area.

## **5.08.7 HEIGHT REQUIREMENTS (2005)**

- A. The maximum height of a building or structure in the Integrated Commercial-Industrial District shall be forty (40) feet, except as noted in B. below.

- B. The maximum height of school and municipal buildings or structures in the Integrated Commercial-Industrial District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

## **5.09.0 INTEGRATED COMMERCIAL-INDUSTRIAL 2 “ICI-2” DISTRICT (2007)**

**Intent:** The intent of the Integrated Commercial-Industrial 2 District is to provide an area for mixed commercial and industrial development in commercial and industrial park-like settings.

### **5.09.1 ACCEPTABLE USES**

- A. Wholesale businesses
- B. Retail businesses
- C. Restaurants
- D. Offices
- E. Hotels (2011)
- F. Day care facilities (2011)
- G. Utilities, public or private (2011)
- H. Manufacturing
- I. Distribution and mailing facilities
- J. Research and development
- K. Motor vehicle repair facilities
- L. Harvesting of natural resources
- M. Processing and warehousing
- N. Telecommunication facilities
- O. Recreational facility, commercial
- P. Farm roadside stands (2010)
- Q. Farmer’s market (2010)
- R. Banks and financial institutions (2011)
- S. Bed and breakfast (2011)
- T. Churches and Houses of Worship (2011)
- U. Hospitals (2011)
- V. Health services facilities (2011)
- W. Processing of natural resources (2011)
- X. Filling stations (2011)
- Y. Nursing home or facility (2011)
- Z. Newspaper and job printing (2011)
- AA. Veterinary clinics (2011)
- BB. Hospice house (2011)
- CC. Agriculture and farming (2011)
- DD. Solar Collection Systems in accordance with Section 7.11.0 (2019)

### **5.09.2 ACCEPTABLE USES AND YARD REQUIREMENTS BY: (2009)**

#### **A. Special Exception**

- 1. Schools
- 2. Deleted (2011)
- 3. Building and structure height greater than allowed in 5.09.7:A and 5.09.7:B
- 4. Accessory Dwelling Units for existing single-family dwellings (2008)

5. Reduced front, side and rear setbacks (2009)

**B. Conditional Use Permit (2009)**

1. Small Wind Energy Systems (2009)
2. Solar Collection Systems in accordance with Section 7.11.0 (2019)

**5.09.3 USES NOT SPECIFIED**

Any uses of land and/or structures not specifically included in the ICI-2 (Integrated Commercial-Industrial 2) District as acceptable, acceptable by Special Exception or acceptable by Conditional Use Permit shall be considered as not Permitted.

**5.09.4 LOT SIZES AND FRONTAGES (2009)**

- A. In those areas serviced by both municipal sewerage and water systems, the minimum lot size in the ICI-2 (Integrated Commercial-Industrial 2) District shall be twenty thousand (20,000) square feet, together with a minimum of one hundred fifty (150) feet of frontage on a Class V or better road.
- B. In those areas not serviced by municipal sewerage and water systems, a minimum of forty thousand (40,000) square feet shall be required, depending upon soil and slope conditions, together with a minimum of one hundred fifty (150) feet of frontage on a Class V or better road.

**5.09.5 YARD REQUIREMENTS**

- A. Each structure shall be set back at least thirty (30) feet from the front lot line.
- B. Each structure shall be set back at least (15) feet from side and rear property lines. In the case of a corner lot, the side distance shall be increased to thirty (30) feet on the side bordering the public way.

**5.09.6 OPEN SPACE**

Open space shall be provided in an amount equal to not less than thirty (30) percent of the total lot area.

**5.09.7 HEIGHT REQUIREMENTS**

- A. The maximum height of a building or structure in the Integrated Commercial-Industrial 2 (ICI-2) District shall be forty (40) feet, except as noted in B. below.
- B. The maximum height of school and municipal buildings or structures in the Integrated Commercial-Industrial 2 (ICI-2) District shall be forty-five (45) feet.
- C. A Special Exception shall be required for heights greater than allowed in either A or B above.

**ARTICLE VI: OVERLAY DISTRICTS**

**6.01.0 GROUNDWATER PROTECTION DISTRICT (2003)**

**6.01.1 GENERAL**

- A. **Purpose:** In the interest of public health, safety, and general welfare, the purpose of this Ordinance is to preserve, maintain, and protect from contamination existing and potential groundwater supply areas.

This is to be accomplished by regulating land uses that could contribute pollutants to existing and/or planned public and/or private wells and/or ground water resources identified as being needed for present and/or future public water supply.

- B. **Definitions:**

**Groundwater:** subsurface water that occurs beneath the water table in soils and geologic formations. [NH RSA 485-C, Groundwater Protection Act]

**Impervious:** (with respect to stormwater infiltration) not readily permitting the infiltration of water.

**Impervious surface:** (with respect to containment of regulated substances) a surface through which regulated substances cannot pass when spilled. Impervious surfaces include concrete unless unsealed cracks or holes are present. Asphalt, earthen, wooden, or gravel surfaces; or other surfaces which could react with or dissolve when in contact with the substances stored on them are not considered impervious surfaces. [Env-Ws 421.03(c)]

**Junkyard:** An establishment or place of business which is maintained, operated, or used for storing and keeping, or storing and selling, trading or otherwise transferring old or scrap copper, brass, rope, rags, batteries, paper, trash, rubber debris, waste or junked, dismantled or wrecked motor vehicles, or parts thereof, iron, steel or other old or scrap ferrous or nonferrous material. Junkyard shall also include any place of business for the maintenance or operation of an automotive recycling yard, and includes garbage dumps and sanitary fills. Also includes any business and any place of storage or deposit, whether in connection with another business or not, which has stored or deposited two (2) or more unregistered motor vehicles which are no longer intended or in condition for legal use on the public highways, or used parts of motor vehicles or old iron, metal, glass, paper, cordage, or other waste or discarded or second-hand material which has been a part, or intended to be a part, of any motor vehicle, the sum of which parts or material shall be equal in bulk to two (2) or more motor vehicles. Junkyard shall also include any place of business or storage or deposit of motor vehicles purchased for the purpose of dismantling the vehicles for parts or for use of the metal for scrap and where it is intended to burn material, which are parts of a motor vehicle or cut up the parts thereof. Also, includes any yard or field used as a place of storage in which there is displayed to the public view, junk machinery or scrap metal that occupies an area of five hundred (500) square feet and as amended by NH RSA 236:112. (2013)

**Liquid Petroleum Products:** Any petroleum product that maintains a liquid state when exposed to ambient temperature and atmospheric pressure. Such as but not limited to: gasoline, diesel, home heating fuel, motor oil, etc. (2011)

**Outdoor storage:** storage of materials where they are not protected from the elements by a roof, walls, and a floor with an impervious surface.

**Public water system:** a system for the provision to the public of piped water for human consumption, if such system has at least fifteen (15) service connections or regularly serves an average of at least twenty-five (25) individuals daily at least sixty (60) days out of the year. [NH RSA 485:1-a, XV]

**Regulated substance:** petroleum, petroleum products, and substances listed under 40 CFR 302, 7-1-90 edition or as amended, excluding the following substances: (1) ammonia, (2) sodium hypochlorite, (3) sodium hydroxide, (4) acetic acid, (5) sulfuric acid, (6) potassium hydroxide, (7) potassium permanganate, and (8) propane and other liquefied fuels which exist as gases at normal atmospheric temperature and pressure. [1-7 are used in the treatment of water supplies and are not considered to pose a significant risk to groundwater]

**Sanitary protective radius:** The area around a well, which must be maintained in its natural state as required by Env-Ws 378 or 379 (for community water systems) and Env-Ws 372.13 (for other public water systems).

**Secondary containment:** a structure such as a berm or a dike with an impervious surface that is adequate to hold at least one hundred ten (110) percent of the volume of the largest regulated substance container that will be stored. [Env-Ws 421.03(g)]

**Snow dump:** a location where snow, which is cleared from roadways and/or motor vehicle parking areas, is placed for disposal.

**Stratified-drift aquifer:** A geologic formation of predominantly well-sorted sediment deposited by or in bodies of glacial meltwater including gravel, sand, silt, or clay, which contains sufficient saturated permeable material to yield significant quantities of water to wells. [NH RSA 485-C:2, XIV]

**Surface water:** streams, lakes and ponds, including marshes, watercourses and other bodies of water, natural or artificial. [NH RSA 485-A:2 XIV]

**Temporary Storage:** means storage for less than six months.

**Wellhead protection area:** The surface and subsurface area surrounding a water well or well-field supplying a community water system, through which contaminants are reasonably likely to move toward and reach such water well or well-field. [NH RSA 485-C:2, XVIII]

- C. **Location:** The Groundwater Protection District includes all land areas designated as Level I and/or Level II Protection Areas on the map entitled "Groundwater Protection District - Milford, NH", dated October 24, 2002 or as amended. A copy of the map is located in the offices of the Town of Milford

Planning Department. The Groundwater Protection District is an overlay district which is superimposed over the existing underlying zoning.

**D. Applicability:** The Groundwater Protection District applies to all uses in the District, except for those uses exempt under 6.01.3:E. (2010)

1. The Groundwater Protection District is an overlay district which imposes additional requirements and restrictions to those of the underlying base district established under the powers granted under NH RSA 674:21. In case of conflict between the requirements of Section 6.01.0 and the requirements presented elsewhere in the Milford Zoning Ordinance, the provisions of 6.01.0 shall apply.

### **6.01.2 PERFORMANCE STANDARDS**

The following Performance Standards apply to all uses in the Groundwater Protection District unless exempt under 6.01.3:E.

- A. For any use that will render impervious more than fifteen (15) percent or more than two thousand five hundred (2,500) square feet of any lot, whichever is greater, a stormwater management plan shall be prepared which the Planning Board determines is consistent with Town of Milford Regulations;
- B. Stormwater management plans prepared pursuant to paragraph A shall demonstrate that stormwater recharged to groundwater will not result in violation of Ambient Groundwater Quality Standards (Env-Wm 1403.05) at the property boundary;
- C. All stormwater discharges to surface waters must be in compliance with EPA Phase II regulations;
- D. Post development stormwater discharges must be no greater than predevelopment stormwater discharges;
- E. Animal manures, fertilizers, and compost must be stored in accordance with Manual of Best Management Practices for Agriculture in New Hampshire, NH Department of Agriculture, Markets, and Food, August 1998, and any subsequent revisions;
- F. All regulated substances stored in containers with a capacity of five (5) gallons or more must be stored in product-tight containers on an impervious surface designed and maintained to prevent flow to exposed soils, floor drains, and outside drains;
- G. Facilities where regulated substances are stored must be secured against unauthorized entry by means of a door and/or gate which is locked when authorized personnel are not present;
- H. Outdoor storage areas for regulated substances must be protected from exposure to precipitation and must be located at least one hundred (100) feet from surface water or storm drains, at least seventy-five (75) feet from private wells, and outside the sanitary protective radius of wells used by public water systems;

- I. Secondary containment must be provided for outdoor storage of regulated substances if an aggregate of three hundred thirty (330) gallons or more of regulated substances are stored outdoors on any particular property;
- J. Containers in which regulated substances are stored must be clearly and visibly labeled and must be kept closed and sealed when material is not being transferred from one container to another.

**6.01.3 USES**

**A. Permitted Uses**

All uses permitted by Milford Zoning Ordinance in the underlying district or allowed by special exception in the underlying district are permitted in the Groundwater Protection District unless they are Prohibited Uses, 6.01.3:B or Uses Requiring a Permit, 6.01.3:C. All uses must comply with 6.01.2 Performance Standards unless specifically exempt under section 6.01.3:E.

**B. Prohibited Uses**

The following uses are prohibited in the Groundwater Protection District Level I Protection Area:

- 1. The siting or operation of a hazardous waste disposal facility as defined under NH RSA 147-A;
- 2. The siting or operation of a solid waste landfill;
- 3. The outdoor storage of road salt or other deicing chemicals in bulk;
- 4. The siting or operation of a junkyard;
- 5. The siting or operation of a snow dump;
- 6. The siting or operation of a wastewater or septage lagoon;
- 7. Storage of liquid petroleum products, except the following:
  - a. That product necessary for the private business use occupying the lot, subject to all applicable State and Federal requirements. The aggregate tank capacity on each lot shall not exceed five thousand (5,000) gallons. No wholesale or retail sale of petroleum products.
  - b. Normal household use and heating of a structure;
  - c. Waste oil retention facilities required by statute, rule, or regulation;
  - d. Emergency generators required by statute, rule, or regulation;
  - e. Treatment works approved by NHDES for treatment of ground or surface waters;

Provided that such storage, listed in items a. through e. above, is in free-standing containers within buildings or above ground with secondary containment adequate to contain a spill one hundred ten (110) percent the size of the aggregate capacity of the stored containers.

**C. Uses Requiring a Permit in Level I and/or Level II**

- 1. The Code Administrator may grant a Permit for a use which is otherwise permitted within the underlying district, if the permitted use is or is involved in the storage, handling and/or use of a regulated substance in quantities exceeding five (5) gallons or forty (40) pounds dry weight at any one time. Prior to issuing a permit, a containment plan shall be provided or in place to prevent, contain, and/or minimize releases from a spill, which may cause large releases of regulated substances.

2. Planning Board approval is required for any use that will render impervious more than fifteen (15) percent or two thousand five hundred (2,500) square feet of any lot, whichever is greater.
  - a. Prior to the granting of such approval, the Code Administrator must first determine that the proposed use is not a prohibited use.
  - b. The Planning Board shall determine that the use will be in compliance with all the Performance Standards as well as all applicable local, state and federal requirements. The Planning Board may, at its discretion, require a performance guarantee or bond, in an amount and with surety conditions satisfactory to the Board, to be posted to ensure completion of construction of any facilities required for compliance with the Performance Standards.

#### **D. Existing Non-Conforming Uses**

Existing nonconforming uses may continue without expanding or changing to another nonconforming use, but must be in compliance with all applicable state and federal requirements, including NH Code of Administrative Rules Env-Ws 421, Best Management Practices.

#### **E. Exemptions**

The following uses are exempt from the specified provisions of this Ordinance as long as they are in compliance with all applicable local, state, and federal requirements:

1. All private residences are exempt from the provisions of this Ordinance provided no portion of the residence is part of a home business that violates the standards or conditions set forth in sections 6.01.2 and 6.01.3 of this Ordinance;
2. Any business or facility where regulated substances are not stored in containers with a capacity of five (5) gallons or more is exempt from Performance Standards G through J;
3. Storage of heating fuels for on-site use or fuels for emergency electric generation, provided that storage tanks are indoors on an impervious concrete floor or have corrosion control, leak detection, and secondary containment in place, is exempt from Performance Standard G;
4. Storage of motor fuel in tanks attached to vehicles and fitted with permanent fuel lines to enable the fuel to be used by that vehicle is exempt from Performance Standards G through J;
5. Storage and use of office supplies is exempt from Performance Standards G through J;
6. Temporary storage of construction materials on a site where they are to be used is exempt from Performance Standards G through J;
7. The sale, transportation, and use of pesticides as defined in NH RSA 430:29 XXVI. are exempt from all provisions of this Ordinance;
8. Household hazardous waste collection projects regulated under NH Code of Administrative Rules Env-Wm 401.03(b)(1) & 501.01(b) are exempt from Performance Standards G through J.

### **6.01.4 ADMINISTRATIVE**

#### **A. Relationship Between State and Local Requirements**

Where both the State and the municipality have existing requirements the more stringent shall govern.

#### **B. Maintenance and Inspection**

1. For uses requiring Planning Board approval for any reason, a narrative description of maintenance requirements for structures required to comply with 6.01.2 Performance Standards, shall be recorded so as to run with the land on which such structures are located, at the Town of Milford Planning Department. All maintenance required is the responsibility of the owner and as such shall be maintained by the owner. The description so prepared shall comply with the requirements of NH RSA 478:4-a.
2. Inspections may be required to verify compliance with 6.01.2 Performance Standards. Such inspections shall be performed by the Code Administrator at reasonable times with prior notice to the landowner.
3. All properties within the Groundwater Protection District known to the Code Administrator as using or storing regulated substances in containers with a capacity of five (5) gallons or more, except for facilities where all regulated substances storage is exempt from this Ordinance under section 6.01.3:E, shall be subject to inspections under this section.
4. The Board of Selectmen may require a fee for compliance inspections. The fee shall be paid by the property owner. A fee schedule shall be established by the Board of Selectmen as provided for in NH RSA 41:9-a.
5. Underground storage tank systems and above-ground storage tank systems that are in compliance with applicable state rules are exempt from inspections under 6.01.4:B of this Ordinance.

#### **C. Enforcement Procedures and Penalties**

Any violation of the requirements of this Ordinance shall be subject to the enforcement procedures and penalties in NH RSA 676.

#### **D. Saving Clause**

If any provision of this Ordinance is found to be unenforceable, such provision shall be considered separable and shall not be construed to invalidate the remainder of the Ordinance.

## **6.02.0 WETLAND CONSERVATION DISTRICT (2017)**

### **6.02.1 GENERAL**

- A. The Wetland Conservation District shall be considered as overlaying any other district established by this Ordinance. Any use permitted in the portions of the district so overlaid shall only be permitted subject to all provisions of this section.
- B. Except for the permitted uses as listed in 6.02.5 of this section, there shall be no impact of wetlands or surface waters, unless all federal, state and local permits are in place.
- C. All impacts to wetlands shall be regulated in accordance with NH Code of Administrative Rules, Wt. Env-Wt 100-900 as may be amended from time to time and require the receipt of the appropriate permit from the State of New Hampshire Department of Environmental Services Wetlands Bureau. The state process requires a review by the Milford Conservation Commission. (2017)
- D. The Milford Conservation Commission, established under NH RSA 36-A, has statutory standing before the Department of Environmental Services under NH RSA 482-A:11, III and provides a local source of assistance to both the department and the applicants for Dredge & Fill Permits.
- E. A special exception approved by the Milford Zoning Board of Adjustment shall be required for any use within the wetland except for those listed in 6.02.5. Note that state and/or federal permits may be required for uses not requiring a special exception under this Ordinance.
- F. The Wetland Conservation District is an overlay district which imposes additional requirements and restrictions to those of the underlying base district established under the powers granted under NH RSA 674:21. In case of conflict between the requirements of Section 6.02.0 and the requirements presented elsewhere in the Milford Zoning Ordinance, the provisions of 6.02.0 shall apply. (2010)

### **6.02.2 PURPOSE**

By the authority granted in NH RSA 674:16-17 and 674:20-21, the purpose of the Wetlands Conservation District is to protect the values and functions of wetlands, surface waters and their associated buffer zones. It is further intended, but shall not be limited to, the following:

- A. Protect the public health, safety, general welfare and property;
- B. Reduce sedimentation of wetlands and surface waters;
- C. Aid in the control of non-point source pollution; (2017)
- D. Provide a vegetative cover in the case of the buffer zones for filtration of runoff and the prevention of erosion;
- E. Protect fish spawning grounds, aquatic life, and bird and other wildlife habitats;
- F. Conserve natural beauty and open spaces;
- G. Preserve ponds, rivers and streams in their natural state,
- H. Protect persons and property from flood damage by preserving the natural flood storage areas,
- I. Control the development of structures and land uses which contribute to the pollution of surface and groundwater by sewerage, hazardous substances or siltation;

- J. Protect aquifers, which serve as existing or potential water supplies as well as the aquifer recharge system;
- K. Prevent unnecessary or excessive expenses to the Town to provide and maintain essential services and utilities which arise because of the inharmonious use of wetlands;

### 6.02.3 LOCATION OF THE WETLAND CONSERVATION DISTRICT

The areas within the town of Milford to which this section applies are as follows:

- A. **Streams:** This includes both perennial and intermittent streams wherever fresh water flows for sufficient time to develop and maintain a defined channel. The area of the stream shall lie within the banks as defined by the ordinary high water mark established by the fluctuations of water and indicated by physical characteristics such as a clear natural line impressed on the immediate bank, or shelving, or changes in the character of the soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas.
- B. **Ponds:** The pond area shall be the extent of water at the full pond as determined by the top of the impoundment structure in artificial ponds or by the natural high water mark in natural ponds.
- C. **Wetlands:** A wetland area shall be delineated based on hydrophytic vegetation, hydric soils and wetland hydrology in accordance with techniques outlined in the Corps of Engineers wetlands Delineation Manual, Technical Report Y-87-1 (January 1987) and defined by NH RSA 482-A:2.X (as amended). (2017)
- D. **Buffers:** The buffer area shall be measured from the edge of any stream, pond, or wetland in a horizontal plane. The buffer is the area adjacent to a wetland and/or open water which should be kept free of uses that may introduce or facilitate pollution, sedimentation or other harmful effects to the wetland. The buffer shall include the area within twenty-five (25) feet from any wetland, stream, or pond area, or vernal pool. For the water bodies named in 6.02.3:E, the buffer shall be fifty (50) feet from the edge of any stream, pond, or wetland in a horizontal plane. (2017)
- E. **Surface waters with 50 foot buffer area:** The following water bodies together with any adjacent very poorly drained wetlands are protected by a fifty (50) foot buffer. These 2<sup>nd</sup> Order and higher streams are described in the Conservation Plan, an Appendix of the Town Master Plan. (2017)
  - 1. **Birch Brook:** from its commencement at the wetland lying between Whitten Road and Chappell Drive to its junction with Great Brook,
  - 2. **Compressor Brook:** from its commencement as follows:
    - a. Compressor Brook, East Branch: from its entry into Milford at the Milford/Brookline Town Line in the southeast portion of Milford to its junction with Compressor Brook south of Melendy Road and east of Ruonala Road,
    - b. Compressor Brook, West Branch: from its beginning at a wetland on the west side of Ball Hill Road to its junction with Compressor Brook, East Branch, as described in a. above,

- c. **Compressor Brook:** from the junction of the East Branch and the West Branch south of Melendy Road and east of Ruonala Road to its junction with Great Brook,
- 3. **Great Brook:** from its commencement at Mile Slip Road, approximately one thousand five hundred (1,500) feet south of Mason Rd. to Railroad Pond, and from Railroad Pond to the Souhegan River, including its passage through said pond,
- 4. **Hartshorn Brook:** from the Mont Vernon/Milford Town line, through Hartshorn Pond to its junction with the Souhegan River,
- 5. **Mitchell Brook:** from its entrance into Milford at the Milford/Mason Town line to its junction with Spaulding Brook,
- 6. **Ox Brook:** from its beginning in a wetland west of Melendy Road to its junction with Compressor Brook,
- 7. **Purgatory Brook:** from its entrance into Milford at the Milford/Lyndeborough Town line, to its junction with the Souhegan River,
- 8. **Spaulding Brook:** from its entrance into Milford at the Milford/Mason Town line to its exit from Milford at the Milford/Brookline Town line,
- 9. **Tucker Brook:** from its entrance into Milford in the vicinity of the granite bound on the Milford/Wilton Town line, to its junction with the Souhegan River,
- 10. **Compressor Pond,**
- 11. **Hartshorn Pond,**
- 12. **Railroad Pond,**
- 13. **Osgood Pond,**
- 14. **Souhegan River, see 6.02.3.G.**

F. Surface waters with one hundred (100) foot buffer:

**Peatlands:** Due to their rarity and fragility, these unique wetlands shall be protected by a one hundred (100) foot buffer.

G. Shoreland Water Quality Protection Act (2017)

Osgood Pond and the Souhegan River with the exception of the Urbanized Exemption Parcels are subject to the Shoreland Water Quality Protection Act, NH RSA 483-b as may be amended from time to time. The Shoreland Water Quality Protection Act addresses activities within two hundred and fifty (250) feet of great ponds and fourth order streams. The Souhegan River is a fourth order stream.

#### 6.02.4 DEFINITIONS

**Bank/Edge of Wet:** The transitional slope immediately adjacent to the edge of a surface water body, the upper limit of which is usually defined by a break in slope, or, for a wetland, where a line delineated in accordance with New Hampshire Code of Administrative Rules Chapter Env-Wt 301.01 indicates a change from wetland to upland. (2017)

**Buffer:** An upland area adjacent to a wetland and/or surface water which serves to filter surface water flowing into the wetland.

**Bog:** A wetland distinguished by stunted evergreen trees and shrubs, peat deposits, poor drainage, and/or highly acidic soils and/or water conditions.

**Great Pond:** Any natural water body having an area of ten (10) acres or more.

**Fen:** Unique wetlands characterized by saturated organic soils (well-decomposed peat) fed by neutral to somewhat alkaline groundwater.

**Marsh:** A wetland that is distinguished by the absence of trees and shrubs, which is dominated by soft-stemmed herbaceous plants such as grasses, reeds, and sedges; and where the water table is at or above the surface throughout the year, but can fluctuate seasonally.

**Peatlands:** Wetlands with thick organic soil, often with a characteristic floating mat of mosses, sedges, shrubs, and/or trees in very acidic conditions, includes bogs and fens.

**Stream, Intermittent:** A place where water flows for sufficient duration and/or in sufficient quantity to maintain a channel.

**Stream, Perennial:** Any channel, natural or manmade, which has water present for twelve (12) months of a normal year but which may dry up during a period in which the rainfall is less than sixty (60) per cent of average for more than three consecutive months.

**Surface water:** Streams, lakes and ponds, including marshes, watercourses and other bodies of water, natural or artificial. [NH RSA 485-A:2 XIV]. (2015)

**Vernal Pool:** A surface water or wetland, including an area intentionally created for purposes of compensatory mitigation, which provides breeding habitat for amphibians and invertebrates that have adapted to the unique environments provided by such pools and further defined in New Hampshire Code of Administrative Rules Chapter Env-Wt 101.108 (as amended). (2017)

**Very poorly drained:** Water is removed from the soil so slowly that free water remains at or on the surface during most of the growing season.

**Wetland:** An area that is inundated or saturated by surface or ground water at a frequency and duration sufficient to support and that under normal conditions does support, a prevalence of vegetation typically adapted for life in saturated soil conditions.

### 6.02.5 ACCEPTED USES: (2017)

- A. **Wetlands:** Any of the following uses, the execution, construction or placement of which do not permanently and significantly alter the natural flow of ground or surface water, and that are otherwise permitted by the Zoning Ordinance. (2011)
1. Projects that fall under the Wetland Bureau's Minimum Impact Expedited Permit Application. These projects, however, must be approved by the Conservation Commission prior to approval by the Wetlands Bureau. (2017)
  2. Repair or reconstruction of an existing legal structure that meets the following conditions:
    - a. Where the size, location and configuration remain the same
    - b. The work shall not require the utilization of tracked or wheeled equipment in the water or wetland; (2017)
    - c. The work shall not require the utilization of tracked or wheeled equipment in the water or wetland;
    - d. The structure has not been abandoned. Failure to maintain an existing structure in a state so that it is functional, and intact, for a period of five (5) years shall be prima facie evidence of abandonment or non-use.
  3. Mowing or cutting of vegetation in a wet meadow, red maple swamp, hemlock swamp, spruce/fir swamp, or white pine swamp, provided that the roots of the vegetation are not disturbed, and that the ground is frozen or sufficiently dry to avoid making ruts and that the area is stabilized once thawed and that the project is not located in prime wetlands.
  4. Hand raking of leaves or other organic debris from the shoreline or lake bed provided that:
    - a. At the time raking is done, the area is exposed by draw down, or
    - b. Raking does not disturb vegetative roots and is limited to less than nine-hundred (900) square feet of area.
  5. Management of a beaver dam as provided in NH RSA 210:9 (as amended). (2017)
  6. Removal of a beaver dam by hand or machine provided:
    - a. Machinery does not enter the water or create any impact by filling or dredging to adjacent surface waters, wetlands, or their banks;
    - b. All dredged materials are placed out of wetlands and out of the defined buffer area, and
    - c. Removal of the dam is done in a gradual manner that does not allow a sudden release of impounded water to cause erosion or siltation.
  7. Addition of native vegetation to enhance wetlands, but not the removal of wetlands vegetation except as provided in 6.02.5:A.3.
  8. Drilling of test wells by a public agency for purposes of exploring for public water supplies or hazardous materials.
  9. Other activities as noted in NH Wetlands Bureau Code of Administrative Rules Wt. 303.05.
- B. **Buffer Zones:** Any of the following uses that do not alter the surface configuration by the addition of fill, removal of soil, or obstruct in any manner the natural flow of ground or surface water, or disturb in any manner the ground itself to any depth and that are otherwise permitted by the Zoning Ordinance.

1. Forestry, subject to the provisions of RSA 227-J:6, as amended, and tree farming in accordance with good silvicultural practices, outlined in *Good Forestry in the Granite State: Recommended Voluntary Management Practices for New Hampshire*, as amended. (2017)
2. Agriculture, as defined in NH RSA 21:34-a, as amended, including growing and harvesting of crops using best management practices detailed in *best Management Wetland Practices for Agriculture in NH*, as amended. (2017)
3. Buildings and structures not to exceed one hundred twenty (120) square feet and without sanitary plumbing and raised above-ground on concrete or similar blocks placed on the ground surface in such a manner as to permit the natural flow of any surface water,
4. Decks raised above the ground so as to permit the natural flow of any surface waters,
5. Potable water supply wells and their associated water lines and associated power lines, provided there are adequate erosion control measures in place during work and repair of any disturbance,
6. Monitoring wells for observation purposes, provided there are adequate erosion control measures in place during work and there is repair of any disturbance,

#### **6.02.6 A SPECIAL EXCEPTION IS REQUIRED FOR:**

- A. **Wetlands:** A Special Exception Permit from the Board of Adjustment is required for any project not listed in 6.02.5:A that is located within a wetland and is not in the right-of-way of a public road. (2017)
- B. **Buffer:** A Special Exception from the Board of Adjustment is required for any project not listed in 6.02.5 that is located within a wetland buffer and not in the right-of-way of a public road. (2011)
- C. The Board of Adjustment, in acting on an application for a special exception in the Wetlands Conservation District, shall take into consideration the conditions as noted in 10.02.1.
- D. The Board of Adjustment may grant a Special Exception for such projects after the application for the Special Exception has been reviewed and reported upon by the Milford Conservation Commission and forwarded to the Board of Adjustment within forty (40) days of a public meeting at which the Conservation Commission first received detailed plans on the project.
- E. The Planning Board may also be required to submit a report to the Board of Adjustment, if requested by the Board of Adjustment. The Planning Board shall submit its report within the above specified forty (40) day period.

#### **6.02.7 CRITERIA FOR EVALUATION**

- A. For all projects requiring a Special Exception the applicant shall demonstrate by plan or example that the following factors have been considered in their design:
  1. The need for the proposed project;
  2. The plan proposed is the alternative with the least impact to the wetlands, surface waters and/or their associated buffers;
  3. The impact on plants, fish and wildlife;
  4. The impact on the quantity and/or quality of surface and ground water;

5. The potential to cause or increase flooding, erosion, or sedimentation;
  6. The cumulative impact that would result if all parties owning or abutting a portion of the affected wetland, wetland complex and/or buffer area were also permitted alterations to the wetland and buffer proportional to the extent of their property rights;
  7. The impact of the proposed project on the values and functions of the total wetland or wetland complex.
- B. The Town of Milford shall place emphasis in preserving peatlands and marshes. This priority shall be based upon the rarity of those environments and the difficulty in restoration of the value and function of those environments.

### **6.03.0 FLOODPLAIN MANAGEMENT DISTRICT (2020)**

#### **6.03.1 PURPOSE**

A. This ordinance, adopted pursuant to the authority of RSA 674:16, RSA 674:17, and 674:56, shall be known as the Town of Milford Floodplain Management Ordinance (“Ordinance”). The regulations in this Ordinance shall overlay and supplement the regulations in the Town of Milford Zoning Ordinance, and shall be considered part of the Zoning Ordinance for purposes of administration and appeals under state law.

B. The purpose of this Ordinance is to promote the public health, safety, and general welfare; minimize hazards to persons and property from flooding; to protect watercourses from encroachment; and to maintain the capability of floodplains to retain and carry off floodwaters.

#### **6.03.2 FINDINGS OF FACT AND APPLICABILITY**

A. Certain areas of the Town of Milford are subject to periodic flooding, causing serious damages to properties within these areas. Relief is available in the form of flood insurance as authorized by the National Flood Insurance Act of 1968. Therefore, the Town of Milford chosen to become a participating community in the National Flood Insurance Program (NFIP), and agrees to comply with the requirements of the National Flood Insurance Act of 1968 (P.L. 90-488, as amended) as detailed in this Ordinance.

B. The following regulations in this Ordinance shall apply to all lands within Town of Milford and designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its “Flood Insurance Study (FIS) for Town of Milford, NH” dated September 25, 2009 together with the associated Flood Insurance Rate Map (FIRM) panels 33011C0451D, 33011C0452D, 33011C0453D, 33011C0454D, 33011C0456D, 33011C0457D, 33011C0458D, 33011C0459D, 33011C0465D, 33011C0470D, 33011C0478D, 33011C0486D dated September 25, 2009 and associated amendments and revisions, which are declared to be a part of this Ordinance and are hereby incorporated by reference.

C. This Ordinance establishes a permit system and review procedure for development in a special flood hazard area of the Town of Milford.

#### **6.03.3 ADMINISTRATIVE PROVISIONS**

A. If any provision of this Ordinance differs or appears in conflict with any other ordinance or regulation, the provision imposing the greater restriction or more stringent standard shall be controlling.

B. Should any section or provision of this Ordinance be declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of the Ordinance as a whole, or any part thereof other than the part so declared to be unconstitutional or invalid.

C. In accordance with RSA 676, the Floodplain Administrator shall enforce and administer the provisions of this Ordinance.

D. The degree of flood protection required by this Ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur, and flood heights may be increased by man-made or natural causes. This Ordinance does not imply that land outside of a special flood hazard area or uses that are permitted within such areas will be free from flooding or flood damage.

#### **6.03.4 DEFINITIONS**

The following definitions shall apply only to this Floodplain Management Ordinance, and shall not be affected by the provisions of any other Ordinance.

**Accessory Structure** means a structure which is: 1) detached from and clearly incidental and subordinate to the principal use or structure on a lot, 2) located on the same lot as the principal structure or use, 3) clearly and customarily related to the principal structure or use, and 4) only used for vehicle parking, storage, or primarily building access. Examples include garages, garden and tool sheds, and playhouses.

**Base Flood or 1 Percent Annual Chance Flood** means the flood having a one-percent possibility of being equaled or exceeded in any given year.

**Base Flood Elevation (BFE)** means the elevation of the base (one-percent annual chance) flood referenced to a specified vertical datum (National Geodetic Vertical Datum of 1929 or North American Vertical Datum of 1988).

**Basement** means any area of a structure having its floor subgrade (below ground-level) on all sides.

**Building** - see "Structure".

**Conditional Letter of Map Revision (CLOMR)** means FEMA's comment on a proposed project that would, upon construction, affect the hydrologic and/or hydraulic characteristics of a flooding source and thus result in the modification of the existing floodway, base flood elevation, or the special flood hazard area. CLOMRs do not revise an effective FIRM since they do not reflect as-built conditions.

**Development** means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavating or drilling operations or storage of equipment or materials.

**Elevation Certificate** means a form developed by FEMA to collect surveyed elevations and other information about a building, which can be used for the purposes of compliance with a community's floodplain regulations, flood insurance rating, and Letters of Map Amendment applications.

**Enclosed Area** means an area created by a crawlspace or solid walls that fully enclose an area below an elevated building.

**FEMA** means the Federal Emergency Management Agency.

**Flood or Flooding** means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- a. the overflow of inland or tidal waters, or
- b. the unusual and rapid accumulation or runoff of surface waters from any source.

**Flood Damage-Resistant Materials** means any building product (material, component or system) capable of withstanding direct and prolonged contact with floodwaters without sustaining significant damage. See FEMA "Technical Bulletin 2, Flood Damage- Resistant Materials Requirements."

**Flood Insurance Rate Map (FIRM)** means the official map incorporated with this Ordinance, on which FEMA has delineated both the special flood hazard areas and the risk premium zones applicable to the community. The FIRM is a graphic representation of the data contained in the accompanying Flood Insurance Study.

**Flood Insurance Study (FIS)** means a compilation and presentation of flood risk data for specific watercourses, lakes, and coastal flood hazard areas within a community. The FIS report contains detailed flood elevation data in flood profiles and data tables.

**Flood Opening** means an opening in a foundation or enclosure wall that allows automatic entry and exit of floodwaters. See FEMA "Technical Bulletin 1, Openings in Foundation Walls and Walls of Enclosures."

**Floodplain or Flood-prone Area** means any land area susceptible to being inundated by water from any source (see definition of "Flooding").

**Floodplain Administrator** means a person responsible for administering and implementing the community's local floodplain ordinance and ensuring that the community is complying with minimum NFIP standards and enforcing any locally imposed higher standards.

**Floodproofed or Floodproofing** means any combination of structural and non-structural additions, changes, or adjustments to structures that reduce or eliminate flood damage to real estate or improved real property, water and sanitation facilities, structures and their contents.

**Floodproofing Certificate for Non-Residential Structures** means the form developed by FEMA for use in the certification of non-residential dry floodproofing designs.

**Floodproofing, Dry** means making a structure watertight below the level that needs flood protection to prevent floodwaters from entering.

**Floodproofing**, Wet means permanent or contingent measures applied to a structure and/or its contents that prevent or provide resistance to damage from flooding by allowing flood waters to enter the structure.

**Floodway** means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height Highest Adjacent Grade means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

**Historic Structure** means any structure that is:

- a. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
- c. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
- d. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
  - (i) by an approved state program as determined by the Secretary of the Interior; or
  - (ii) directly by the Secretary of the Interior in states without approved programs.

**Letter of Map Change** means an official document issued by FEMA that revises or amends the flood hazard information shown on the FIRM without requiring the FIRM to be physically revised and/or re-published. Letters of Map Change can include Letters of Map Amendment, Letters of Map Revision, and Letters of Map Revision Based on Fill.

**Letter of Map Revision (LOMR)** means FEMA's modification to an effective FIRM, usually as a result of physical changes to the flooding source and floodplain that result in the modification of the existing Regulatory floodway, base flood elevations, or special flood hazard area. LOMRs are a cost effective way to keep FIRMs up to date without republishing an entire map panel or panels. The LOMR is generally accompanied by an annotated copy of the affected portions of the FIRM and/or FIS report.

**Lowest Floor** means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such an enclosure is built in compliance with the applicable non-elevation design requirements in this Ordinance.

**Manufactured Home** means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on site for greater than 180 consecutive days. This includes manufactured homes located in a manufactured home park or subdivision.

**Manufactured Home Park or Subdivision** means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

**Mean Sea Level** means the National Geodetic Vertical Datum (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, or other vertical datum to which base flood elevations shown on a community's FIRMs are referenced.

**National Flood Insurance Program (NFIP)** means the program created by the Congress of the United States in 1968 through the National Flood Insurance Act of 1968 (P.L. 90-448). The program enables property owners in participating communities to purchase insurance protection, administered by the government, against losses from flooding.

**Natural Grade** means the grade unaffected by construction techniques such as fill, landscaping or berming.

**New Construction** means structures for which the start of construction commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.

**Recreational Vehicle** means a vehicle:

- a. built on a single chassis;
- b. 400 square feet or less when measured at the largest horizontal projection;
- c. designed to be self-propelled or permanently towable by a light duty truck; and
- d. designed primarily not for use as a permanent dwelling but as temporary living quarters (less than 180 consecutive days) for recreational, camping, travel or seasonal use.

**Special Flood Hazard Area (SFHA)** means the land in the floodplain subject to a one-percent or greater possibility of flooding in any given year. The area is designated on the FIRM as Zones A, AO, A1-30, AE, or VE.

**Start of Construction** includes substantial improvements, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of

excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or part of the main structure.

**State Building Code** means the current codes adopted by the state of New Hampshire.

**State NFIP Coordinating Agency** means the agency of the state government (or other office designated by the Governor of the state or by state statute) that, at the request of the Federal Insurance Administrator, assists in the implementation of the National Flood Insurance Program (NFIP) in that state.

**Structure** means a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

**Substantial Damage** means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred. The market value of the structure should equal the appraised value of the structure prior to the damage occurring.

**Substantial Improvement** means any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure before the “start of construction” of the improvement. This term includes structures which have incurred “substantial damage”, regardless of the actual repair work performed. The term does not, however, include either:

- a. Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or
- b. Any alteration of a “historic structure,” provided that the alteration will not preclude the structure's continued designation as a “historic structure”.

**Violation** means the failure of a structure or other development to be fully compliant with the community's floodplain management regulations.

### **6.03.5 FLOODPLAIN ADMINISTRATOR DUTIES AND RESPONSIBILITIES**

A. The Building Inspector is hereby appointed to administer and implement these regulations and is referred to herein as the “Floodplain Administrator.”

B. The duties and responsibilities of the Floodplain Administrator shall include, but are not limited to:

1. Ensure that permits are obtained for proposed development in a special flood hazard area.
2. Review all permit applications for completeness and accuracy, and coordinate with the applicant for corrections or further documentation, as needed.
3. Interpret the special flood hazard area and floodway boundaries and determine whether a proposed development is located in a special flood hazard area, and if so, whether it is also located in a floodway.
4. Provide available flood zone and base flood elevation information pertinent to the proposed development.
5. Make the determination as to whether a structure will be substantially improved or has incurred substantial damage as defined in this Ordinance and enforce the provisions of this Ordinance for any structure determined to be substantially improved or substantially damaged.
6. Issue or deny a permit based on review of the permit application and any required accompanying documentation.
7. Ensure prior to any alteration or relocation of a watercourse that the required submittal and notification requirements in this Ordinance are met.
8. Review all required as-built documentation and other documentation submitted by the applicant for completeness and accuracy and verify that all permit conditions have been completed in compliance with this Ordinance.
9. Notify the applicant in writing of either compliance or non-compliance with the provisions of this Ordinance.
10. Ensure the administrative and enforcement procedures detailed in RSA 676 are followed for any violations of this Ordinance.
11. Submit to FEMA, or require applicants to submit to FEMA, data and information necessary to maintain FIRMs, including hydrologic and hydraulic engineering analyses prepared by or for the Town of Milford, within six months after such data and information becomes available if the analyses indicate changes in base flood elevations, special flood hazard area and/or floodway boundaries.
12. Maintain and permanently keep and make available for public inspection all records that are necessary for the administration of these regulations, including: local permit documents, flood zone and base flood elevation determinations, substantial improvement and damage

determinations, variance and enforcement documentation, and as-built elevation and dry floodproofing data for structures subject to this Ordinance.

13. Delegate duties and responsibilities set forth in these regulations to qualified technical personnel, inspectors, or other community officials as needed.

#### **6.03.6 FLOOD ZONE AND FLOODWAY DETERMINATIONS**

A. The Floodplain Administrator shall determine whether any portion of a proposed development is located in a special flood hazard area and if so, whether it is also located in a floodway, using the effective FIRM. If the development is located wholly or partially in a special flood hazard area, the Floodplain Administrator shall determine the flood zone and the applicable requirements in the Ordinance that shall apply to the development.

B. Where it is unclear whether a site is in a special flood hazard area and/or in a floodway, the Floodplain Administrator may require additional information from the applicant to determine the development's location on the effective FIRM.

C. If any portion of a development including a structure and its attachments (e.g., deck posts, stairs) is located in multiple flood zones, the flood zone with the more restrictive requirements documented in this Ordinance shall apply.

D. Where a conflict exists between the floodplain limits illustrated on the FIRM and actual natural ground elevation, the base flood elevation(s) in relation to the actual natural ground elevation shall be the governing factor in locating the regulatory floodplain limits.

E. Within a riverine special flood hazard area designated as Zone A, the Floodplain Administrator shall obtain, review, and reasonably utilize any floodway data available from Federal, State, or other sources. If floodway data is available, the applicant shall meet the floodway requirements in Section 6.03.13 (floodway requirements) of this Ordinance.

#### **6.03.7 SUBSTANTIAL IMPROVEMENT AND DEMANAGE DETERMINATIONS**

A. For all development in a special flood hazard area that proposes to improve an existing structure, including alterations, movement, enlargement, replacement, repair, additions, rehabilitations, renovations, repairs of damage from any origin (such as, but not limited to flood, fire, wind or snow) and any other improvement of or work on such structure including within its existing footprint, the Floodplain Administrator, in coordination with any other applicable community official(s), shall be responsible for the following:

1. Review description of proposed work submitted by the applicant.

2. Use the community's current assessed value of the structure (excluding the land) to determine the market value of the structure prior to the start of the initial repair or improvement, or in the case of damage, the market value prior to the damage occurring. If the applicant disagrees with the use of the community's assessed value of the

structure, the applicant is responsible for engaging a licensed property appraiser to submit a comparable property appraisal for the total market value of only the structure.

3. Review cost estimates of the proposed work including donated or discounted materials and owner and volunteer labor submitted by the applicant. Determine if the costs are reasonable for the proposed work, or use other acceptable methods, such as those prepared by licensed contractors or professional construction cost estimators and from building valuation tables, to estimate the costs.

4. Determine if the proposed work constitutes substantial improvement or repair of substantial damage as defined in this Ordinance.

5. Notify the applicant in writing of the result of the substantial improvement or damage determination. If the determination is that the work constitutes substantial improvement or substantial damage, the written documentation shall state that full compliance with the provisions of this Ordinance is required.

6. Repair, alteration, additions, rehabilitation, or other improvements of historic structures shall not be subject to the elevation and dry floodproofing requirements of this Ordinance if the proposed work will not affect the structure's designation as a historic structure. The documentation of a structure's continued eligibility and designation as a historic structure shall be required by the Floodplain Administrator in approving this exemption.

#### **6.03.8 FLOODPLAIN PERMITTING REQUIREMENTS**

A. All proposed development within a special flood hazard area shall require a permit from the Town of Milford, prior to the commencement of any development activities. Development, as defined in this Ordinance, includes both building and non-building activities.

B. To obtain a permit, the applicant shall first submit a completed application in writing on a form furnished by the Town of Milford, for that purpose. Every application shall include, but is not limited to:

1. The name, address and phone number of the applicant, owner, and contractor(s);
2. A map indicating the location of the proposed development sufficient to accurately locate property and structure(s) in relation to existing roads and waterbodies;
3. A description of the proposed development and the use or occupancy for which the proposed development is intended;
4. If the development involves proposed work on an existing structure, a description of the total costs of the proposed work including all materials and labor;

5. In a Zone A, for proposed developments either greater than 50 lots or greater than 5 acres, the base flood elevation(s) established for the area, including any data such as hydraulic and hydrologic analyses, used to determine the elevation(s);

6. Submittal of evidence that all necessary permits have been obtained from those Federal, State, or local government agencies from which prior approval is required; and

7. Such other material and information as may be requested by the Floodplain Administrator to determine conformance with, and provide enforcement of, this Ordinance.

C. The Floodplain Administrator shall review all permit applications for completeness and accuracy, and coordinate with the applicant for corrections or further documentation, as needed. If the proposed development will comply with this Ordinance, the Floodplain Administrator shall approve the application and issue a permit. If the proposed development will not comply with this Ordinance, the Floodplain Administrator shall deny the permit application and return to the applicant with a written explanation of denial.

D. Following completion of new construction of a structure or an existing structure that was substantially improved or replaced, or that incurred substantial damage, or the placement or substantial improvement of a manufactured home, the applicant shall submit the following to the Floodplain Administrator:

1. A completed and certified copy of an Elevation Certificate that includes the as-built elevation (in relation to mean sea level) of the lowest floor of the structure and whether or not the structure has a basement.

2. If a non-residential structure includes dry floodproofing, a completed and certified copy of the Floodproofing Certificate for Non-Residential Structures that includes the as-built elevation (in relation to mean sea level) to which the structure was dry floodproofed and certification of floodproofing.

E. The Floodplain Administrator shall review all required as-built documentation and other documentation submitted by the applicant for completeness and accuracy and verify that all permit conditions have been completed in compliance with this Ordinance.

The Floodplain Administrator shall either:

1. Issue a Certificate of Compliance to the applicant if it has been determined that full compliance with this Ordinance has been met; or

2. Notify the applicant in writing of any violation of this Ordinance and the actions required to bring the development into compliance with this Ordinance if it has been determined that full compliance with this Ordinance has not been met.

### **6.03.9 FLOOD ELEVATION DETERMINATIONS**

A. The Floodplain Administrator shall determine the flood elevation for a structure as applicable for each permit application in the following flood zones:

1. For Zone AE, the base flood elevation is determined from the data provided in the community's FIS and accompanying FIRM.
2. For Zone A with no base flood elevation shown in the FIS or on the FIRM:
  - a. The Floodplain Administrator shall obtain, review, and reasonably utilize any base flood elevation data available from any Federal, State or other source including data submitted to the community for development proposals (i.e. subdivisions, site plan approvals).
  - b. Where a base flood elevation is not available or not known, the base flood elevation shall be determined to be at least 2 feet above the highest adjacent grade.
  - c. For a development either greater than 50 lots or greater than 5 acres, the applicant shall develop a base flood elevation for the site and provide it to the Floodplain Administrator with their permit application.

B. If a structure is affected by multiple base flood elevations, the highest base flood elevation shall apply.

### **6.03.10 FLOODPLAIN DEVELOPMENT REQUIREMENTS**

A. All development located in a special flood hazard area shall be:

1. Reasonably safe from flooding;
2. Designed and constructed with methods and practices that minimize flood damage;
3. Designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement (including structures and above ground gas or liquid storage tanks);
4. Constructed with flood damage-resistant materials;
5. Constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment, and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding;
6. Adequately drained to reduce exposure to flood hazards.

### 6.03.11 STRUCTURE REQUIREMENTS

A. New construction of a residential structure, or an existing residential structure to be substantially improved or replaced, or that has incurred substantial damage, located in a special flood hazard area shall have the lowest floor elevated at least to the base flood elevation.

B. New construction of a non-residential structure, or an existing non-residential structure to be substantially improved or replaced, or that has incurred substantial damage, located in a special flood hazard area shall:

1. Have the lowest floor elevated at least to the base flood elevation; or
2. Together with attendant utility and sanitary facilities:
  - a. Be floodproofed at least one foot above the base flood elevation so that below this elevation the structure is watertight with walls substantially impermeable to the passage of water;
  - b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and
  - c. Be certified by a registered professional engineer or architect that the dry floodproofing design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section. Such certification shall be provided to the Floodplain Administrator in the form of a completed and signed Floodproofing Certificate for Non-Residential Structures.

C. A fully enclosed area for new construction of a structure, or an existing structure to be substantially improved or replaced, or that has incurred substantial damage located in a special flood hazard area that is below the lowest floor of a structure, below the base flood elevation, and therefore subject to flooding, shall meet the following requirements:

1. Be constructed with flood damage-resistant materials;
2. Be used solely for the parking of vehicles, building access, or storage;
3. Be constructed with the floor of the enclosed area at grade on at least one side of the structure; and
4. Be constructed with flood openings installed in the enclosure walls so that they are designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria:

- a. A minimum of two flood openings on different sides of each enclosed area having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided;
- b. The bottom of all flood openings shall be no higher on the enclosure wall than one foot above either the interior or exterior grade, whichever is higher; and
- c. Flood openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters.

D. A fully enclosed area that has a floor that is below grade on all sides, including below-grade crawlspaces and basements are prohibited for new structures, existing structures to be substantially improved or replaced, or that have incurred substantial damage located in a special flood hazard area.

#### **6.03.12 MANUFACTURED HOMES AND RECREATIONAL VEHICLES**

A. A new manufactured home to be placed, or an existing manufactured home to be substantially improved or replaced, or that has incurred substantial damage, located in a special flood hazard area shall:

1. Have the lowest floor elevated at least to the base flood elevation;
2. Be on a permanent, reinforced foundation;
3. Be installed using methods and practices which minimize flood damage;
4. Be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement. Methods of anchoring are authorized to include, but are not to be limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces; and
5. Comply with the requirements of Section 10(C) of this Ordinance in cases where fully enclosed areas are present below an elevated manufactured home, including enclosures surrounded by rigid skirting or other material attached to the frame or foundation. Flexible skirting and rigid skirting not attached to the frame or foundation of a manufactured home are not required to have flood openings.

B. A recreational vehicle located within a special flood hazard area shall meet one of the following requirements:

1. Be on a site for fewer than 180 consecutive days; or
2. Be fully licensed, on wheels or jacking system, attached to the site only by quick disconnect type utilities and security devices, and have no permanently attached additions; or

3. Meet the requirements for “manufactured homes” as stated in Section 12(A) of this Ordinance.

### **6.03.13 WATER SUPPLY AND SEWAGE DISPOSAL SYSTEMS**

A. The following standards shall apply to all water supply, sanitary sewage, and on-site waste disposal systems located in a special flood hazard area:

1. All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the systems;
2. New and replacement sanitary sewage systems shall be designed and located to minimize or eliminate infiltration of flood waters into the systems and discharge from the system into flood waters; and
3. On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during flooding.

### **6.03.14 FLOODWAY REQUIREMENTS**

A. Within a floodway, for any development, including fill, new construction, substantial improvements and other development or land disturbing-activity the applicant must, prior to a permit being issued by the Floodplain Administrator, submit certification prepared by a registered professional engineer, along with supporting technical data and analyses, that demonstrates that such development will not cause any increase in the base flood elevation at any location in the community.

If the analyses demonstrate that the proposed activities will result in any increase in the base flood elevation, the applicant must obtain a Conditional Letter of Map Revision (CLOMR) from FEMA prior to permit issuance by the Floodplain Administrator. The Floodplain Administrator reserves the right to deny a permit for the project if concerns about the development being reasonably safe from flooding remain following issuance of the CLOMR. If a permit is issued and the project completed, the applicant must also obtain a Letter of Map Revision (LOMR) from FEMA. CLOMR and LOMR submittal requirements and fees shall be the responsibility of the applicant.

B. Within a riverine special flood hazard area where a base flood elevation has been determined but a floodway has not been designated, for any development, including fill, new construction, substantial improvements and other development or land disturbing-activity, the applicant must, prior to a permit being issued by the Floodplain Administrator, submit certification prepared by a registered professional engineer, along with supporting technical data and analyses, that demonstrates that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will not increase the base flood elevation more than one (1) foot at any point within the community.

If the analyses demonstrate that the proposed activities will result in more than a one (1) foot increase in the base flood elevation, the applicant must obtain a Conditional Letter of Map Revision (CLOMR) from FEMA prior to permit issuance by the Floodplain Administrator. The Floodplain Administrator reserves the right to deny a permit for the project if concerns about the development being reasonably safe from flooding remain following issuance of the CLOMR. If a permit is issued and the project completed, the applicant must also obtain a Letter of Map Revision (LOMR) from FEMA. CLOMR and LOMR submittal requirements and fees shall be the responsibility of the applicant.

### **6.03.15 WATERCOURSE ALTERATIONS**

A. Prior to a permit being issued by the Floodplain Administrator for any alteration or relocation of any riverine watercourse, the applicant shall:

1. Notify the Wetlands Bureau of the New Hampshire Department of Environmental Services and submit copies of such notification to the Floodplain Administrator, in addition to the copies required by RSA 482-A: 3; and
2. Submit to the Floodplain Administrator certification provided by a registered professional engineer, assuring that the flood carrying capacity of an altered or relocated watercourse can and will be maintained.

B. Prior to a permit being issued for any alteration or relocation of any riverine watercourse, the Floodplain Administrator shall notify adjacent communities and the State NFIP Coordinating Agency, and submit copies of such notification to FEMA's Federal Insurance Administrator.

### **6.03.16 VARIANCES AND APPEALS**

A. Any order, requirement, decision or determination of the Floodplain Administrator made under this Ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.

B. If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I (b), the applicant shall have the burden of showing in addition to the variance standards under state law that:

1. The variance will not result in increased flood heights of any magnitude, additional threats to public safety, fraud on or victimization of the public; or extraordinary public expense;
2. The issuance of the variance will not conflict with other State, Federal or local laws or Ordinances;
3. If the requested variance is for activity within a floodway, no increase in flood levels during the base flood discharge will result; and
4. The variance is the minimum necessary, considering the flood hazard, to afford relief.

C. The Zoning Board of Adjustment shall notify the applicant in writing that:

1. The issuance of a variance to construct below the base flood elevation may result in increased premium rates for flood insurance coverage; and
2. Such construction below the base flood elevation increases risks to life and property.

Such notification shall be maintained with a record of all variance actions.

D. The community shall:

1. Maintain a record of all variance actions, including their justification for their issuance; and
2. Report such variances issued in its annual or biennial report submitted to FEMA's Federal Insurance Administrator.

## **6.04.0 OPEN SPACE AND CONSERVATION DISTRICT (2018)**

### **6.04.1 PURPOSE**

The Open Space and Conservation District is intended to encourage environmentally sound planning to permanently protect open space in order to retain and protect important natural and cultural features, and provide for efficient use of land and community services to advance the goals stated in the master plan. This section is being adopted pursuant to the authority of RSA 674:21 and it is expressly intended to establish an innovative land use provision that allows the Planning Board the discretion to establish the scope and intensity of a proposal under this section.

### **6.04.2 OBJECTIVES AND STANDARDS**

The standards that shall guide the Planning Board in the administration of this section are set forth as follows:

- A. To create permanently protected open space without decreasing the allowable density of the site;
- B. To promote the preservation of and to minimize the adverse impacts on environmental resources and areas of highest ecological value, including but not limited to: streams, ponds, floodplains, wetlands, drinking water supplies, steep slopes, scenic views, open fields, farmland, forests, wildlife habitat, unfragmented blocks of undeveloped land, habitat of rare and endangered species, and historic, archaeological, and cultural sites and features;
- C. To enhance the quality of life with the provision of space for low impact passive recreation and aesthetic enjoyment;
- D. To promote development that incorporates efficient design and siting of the transportation network and infrastructure, to reduce the use of and the impact on natural resources and to minimize maintenance costs;
- E. To maintain rural character;
- F. To locate buildings and structures on those portions of the site that are the most appropriate for development, avoiding constraints such as, but not limited to: poor soil conditions, high water table, areas subject to frequent flooding and excessively steep slopes (greater than 25%).
- G. To create a contiguous network of open spaces or “greenways” by linking the common open spaces within the subdivision to open space on adjoining lands wherever possible.
- H. To reduce impacts on water resources by minimizing land disturbance, impervious surfaces and stormwater runoff.
- I. To minimize the impact of residential development on the municipality, neighboring properties, and the natural environment.
- J. To exclude high functioning wetlands from house lots when practicable.

### **6.04.3 GENERAL REGULATIONS**

- A. Any plan submitted under the Open Space and Conservation District section of Milford's Zoning Ordinance (hereinafter Open Space Preservation Design or OSPD) shall mean a development in which the provisions of this Section are met.
- B. All Open Space shall be dedicated as permanently preserved from future development.
- C. The overall dwelling unit density shall not exceed that which would be allowed in the underlying zoning district.
- D. Open Space set asides are ineligible as contributing land area in any subsequent development.
- E. Permitted uses are the same as those allowed in the underlying zoning district.

### **6.04.4 LOCATION AND SCOPE OF AUTHORITY**

- A. The Open Space and Conservation District is an overlay district which imposes additional requirements and restrictions to those of the underlying base zoning district established under the powers granted by NH RSA 674:21. In case of conflict between the requirements of 6.04.0 and the requirements presented elsewhere in the Milford Zoning Ordinance, the provisions of 6.04.0 shall apply. (2010)
- B. All subdivisions of land into five (5) or more residential lots, or developments of five (5) or more dwelling units, must incorporate the criteria in OSPD, except as set forth below. The Planning Board will examine the subdivision proposal using the list of resources desirable for preservation (see Open Space Design 6.04.6.D.1) to ensure that the proposed open space is consistent with the criteria set forth and the purpose of the zoning district. At the discretion of the Planning Board, and if the proposed development does not meet the criteria, the development may be required to incorporate the criteria of a conventional subdivision as permitted by the underlying zoning district.
- C. Properties with subdivision proposals of four (4) or fewer residential lots or for development of four (4) or fewer dwelling units will be examined by the Planning Board using the list of resources desirable for preservation (see Open Space Design 6.04.6.D.1). At the discretion of the Planning Board, these developments may be required to incorporate the criteria in OSPD.
- D. Developments of four (4) or fewer lots, or four (4) or fewer dwelling units, that have not been identified by the Planning Board as needing to comply with OSPD, are exempt from the OSPD requirement, provided there is no potential for further subdivision or development of any lots or dwelling units therein or of the parcel from which the four (4) or fewer lots or dwelling units have been subdivided.
- E. Residential subdivisions of land in any zoning district, where each lot is at least 5 times the size required in the underlying zoning district, shall be exempt from OSPD requirements, provided the deed and the subdivision plan for each lot(s) contains a restriction prohibiting the further subdivision of the lot(s).

- F. When a subdivision or development is proposed which includes a lot(s) which may be capable of further subdivision or development, the Planning Board may require that a conceptual, long range plan for the entire parent parcel be presented so that the Board may consider the entirety of a parcel and its impacts. This long-range plan is non-binding. Any future development of the lot or lots will be reviewed by the Planning Board with reference to this long-range plan.

In accordance with Section 5.011 of the Town of Milford Development Regulations, the Planning Board, with input from the Conservation Commission, may require the applicant to submit an 'Environmental Study'.

#### **6.04.5 REVIEW PROCESS**

All applicants for review of Open Space subdivisions are required to follow the review process stated in the Milford Development Regulations ARTICLE IV: PERMITTING PROCEDURE – SITE PLAN AND SUBDIVISION APPLICATIONS.

#### **6.04.6 OPEN SPACE DESIGN**

- A. Every OSPD shall avoid or minimize adverse impacts on and promote the protection and enhancement of the town's natural, cultural and historic resources by incorporating permanently protected Open Space into the design.

#### **B. Minimum Required Open Space:**

1. Subdivisions in Residence A and B shall have a minimum of fifteen (15%) percent of the gross tract area placed into permanently protected open space. The amount to be included in open space shall include land deemed to serve the public's interest by the Planning Board. Features deemed in the public interest include but are not limited to: land for bike lanes, public walkways, trail connections, public transit stops, pocket parks, stormwater management, and high value natural resources such as the Souhegan River, its tributaries, wetlands and buffers.
2. Subdivisions in Residence R shall place not less than forty (40) percent of the gross tract area into permanently protected open space.

- C. Of the minimum required Open Space fifty (50) percent must consist of non-wetland soils and soils with slopes less than twenty-five (25) percent. The remaining fifty (50) percent may consist of a mix of high value natural resources as listed in D.1 below and buildable land.

#### **D. Design Standards:**

##### **1. List of Resources to Consider for Preservation:**

- a. Open water, waterways, stream channels, floodplains and very poorly drained soils, including adjacent buffer areas as defined in 6.02.0 Wetland Protection District;
- b. The habitat of species listed as endangered, threatened, or of special concern by the NH Natural Heritage Inventory or by the NH Fish & Game Department's Non-game & Endangered Wildlife Program;
- c. Moderate slopes, fifteen to twenty-five (15-25) percent, and steep slopes, greater than twenty-five (25) percent, particularly those adjoining water courses and ponds.

- d. Prime (Federal designation) and Important (State designation) Agricultural Soils, as shown on the Agricultural Soils Map in the current Milford Conservation Plan;
- e. Historic sites and features;
- f. Existing or planned trails connecting the tract to other locations, including, but not limited to, the trails on the town trails map maintained by the Milford Conservation Commission of formal and informal trails;
- g. Other space or resources as required by the Planning Board for low-impact recreational or public interest use consistent with Section 6.04.1.
- h. Scenic views and elements of the town's rural character such as forested margins and agricultural fields.
- i. Undeveloped frontage along existing roads to manage increased density by minimizing views of new development from existing roads.

**2. Design and Use considerations for preserved Open Space:**

- a. The preserved open space shall include as many of the resources listed in Section 6.04.6.D.1 (Resources to Consider for Preservation) as practical;
- b. The preserved open space shall be free of all structures except historic sites, features, and structures related to permitted open space uses;
- c. Subsurface disposal systems may not be placed in the preserved open space;
- d. Water supplies may be placed in the preserved open space;
- e. Stormwater management systems may, at the discretion of the Planning Board, be placed in the preserved open space;
- f. Preserved open space shall be accessible to all the lots or units within the development,
- g. Narrow open space strips (of less than fifty (50') feet) shall not be permitted unless the incorporation of the open space strips provides a logical and practical link to, or expansion of, existing or known planned adjacent preserved open space;
- h. Preserved open spaces shall be interconnected wherever possible to provide a contiguous network of open space lands within and adjoining to the development;
- i. Public access, regardless of ownership, shall be provided to trails within open space if they are linked to other publicly accessible pathway systems.

**6.04.7 Protection and Ownership:**

- A. All open space shall be permanently protected by a conservation easement or by covenants and restrictions in perpetuity, approved by the Planning Board after review by the Conservation Commission. The Planning Board may require further legal review of any documents submitted, the cost of which shall be borne by the applicant.
- B. All approved open space shall be marked in the field by the developer with signage approved by the Conservation Commission to distinguish these areas from house lots. The signage for a lot must be in place prior to issuance of a Certificate of Occupancy for that lot.

- C. The Planning Board will be responsible for providing a recommendation, with input from the Conservation Commission, on ownership of the preserved open space to the Board of Selectmen for its consideration and acceptance.
- D. At the completion of the project, the open space shall be owned in one of the following ways:
  - 1. Owned by the Town of Milford and managed by the Conservation Commission.
  - 2. Owned by a Non-Profit Organization dedicated to conservation principles.
  - 3. Owned by a private individual or organization.

**6.04.8 DENSITY AND DIMENSIONAL STANDARDS**

**A. Density:**

- 1. The density of the proposed development shall be equal to or less than the density allowed in the underlying zoning district;
- 2. The maximum density of a proposed development shall be established by one of the following two methods. The method used is at the discretion of the Applicant:

- a. Conventional Plan Approach:

A preliminary plan, based on accurate topographic field survey information, shall show the number of lots or units which could be laid out in a conventional subdivision or site plan without the need to obtain variances, special exceptions, and/or waivers for lot frontage, setbacks, area, road and driveway grades, and soil types for subsurface disposal systems (if used).

The purpose of the conventional subdivision or site plan is to provide the applicant at the completion of the design review stage a maximum number of lots or dwelling units to proceed to final design. However, if more detailed final engineering indicates the maximum number of lots/dwelling units approved at the design review stage cannot be reasonably incorporated into the final plan based on the elements noted above, the Planning Board reserves the right to reduce the allowable number of lots/units in the final design.

- b. Formula Approach: Under the formula approach, the base number of dwelling units is determined by the following formula:

$[Total\ Area\ of\ Parcel - (Wetlands + Steep\ Slopes)] \times Factor \div Minimum\ Lot\ Size = Maximum\ Number\ Dwelling\ Units$

Percentage of Parcel that is Wetlands and/or Steep Slopes* [*≥25%]	Factor
0 – <10%	0.75
10 – <20%	0.70
20– <30%	0.65
30% or more	0.60

**B. Dimensional Standards:**

**1. Lot Size**

Once the maximum number of lots has been determined utilizing one of the methods outlined above, the actual minimum size of the individual lots in the subdivision may be determined by the Planning Board which may establish lots in sizes smaller than the prevailing minimum lot size requirement applicable in the underlying zoning district; provided, nevertheless, all such approved lots shall have the required area to meet applicable safety and health requirements.

**2. Other Dimensional Standards:**

All lots, including lots the size of which is reduced pursuant to Section B.1, above, shall comply with the following additional dimensional standards provided; nevertheless, the Planning Board, at its discretion, may expressly waive any of the other dimensional requirements set forth (below):

- a. The minimum lot frontage shall be fifty (50) feet.
- b. The building shall be setback at least thirty (30) feet from the front property line. The building shall be at least fifteen (15) feet from the side and rear property lines.

**3. Waiver Process**

The Planning Board, when exercising the discretion to establish minimum lot sizes under Section B.1, above and to waive otherwise applicable dimensional standards under Sections B.2, above, shall consider evidence relating to the same at a noticed public hearing and, pursuant thereto, shall grant such waivers and/or reduce the minimum lot sizes, only after the Planning Board determines that the waiver and/or reduction, if allowed, will meet the standards set forth in Section 6.04.2.

**C. Miscellaneous Requirements:**

- 1. Village Plan alternatives as outlined in NH RSA 674:21.VI shall be permitted. No increase in density will be permitted.

2. The Planning Board may require site plans for individual lots containing slopes greater than fifteen (15) percent, soils rated as having "severe" limitations for septic systems if not on municipal sewer (as determined by the USDA), very poorly drained soils, or when the Board questions the adequacy of a proposed lot to support a dwelling unit and related structures.

## **6.05.0 NASHUA AND ELM STREETS CORRIDOR DISTRICT (2012)**

### **6.05.1 AUTHORITY**

- A. Title: This Ordinance shall be known as the Nashua and Elm Streets Corridor District. (2012)
- B. Authority: The Planning Board is hereby authorized to administer this Ordinance under the provisions set forth in NH RSA 674:21, Innovative Land Use Controls.

### **6.05.2 PURPOSE**

The purpose of this Ordinance is to implement the Town of Milford's vision for the future as set forth in the Community Character Chapter of the Master Plan 2007 Update:

*Goal No. 2: Foster the traditional character of Milford's neighborhoods by encouraging a human scale of development that is similar in setbacks, size and height, and that is comfortable and safe for pedestrians and non-motorized vehicles while allowing for an efficient and safe roadway network.*

In carrying out this goal, this Ordinance is designed to accomplish the following:

- A. Promote development that reflects the intended character of Milford's residential, commercial, and industrial neighborhoods relative to height, lot coverage, and setbacks.
- B. Encourage the development of entryway corridors and gateways relative to architectural and historic heritage, landscaping, stormwater management, traffic management, and parking.
- C. Preserve and enhance the architectural and visual character of the corridors.
- D. Encourage development to reflect the historic pattern of development in Town and enhance Milford's sense of community and place.
- E. Encourage attractive pedestrian scale development.
- F. Improve the overall streetscape of major corridors.
- G. Improve transportation efficiency.
- H. Promote alternative modes of transportation, particularly pedestrian and biking.

The following standards are tools that create a flexible framework to guide the appearance of future development that is compatible with the historic nature of Milford, while allowing for innovation and architectural creativity in order to enhance a special place.

### **6.05.3 FINDINGS**

- A. The Nashua and Elm Streets corridor is becoming increasingly congested due to additional curb cuts and traffic from both local and regional development.
- B. Access management will increase the efficiency, safety and mobility of the corridor.

- C. Inter-site connections are needed to reduce the potential conflict points along major corridors.
- D. Milford's historical architecture is recognized as an important element of community character.
- E. Non-residential development that is indifferent to Milford's architectural heritage constitutes a significant threat to the character and future of the community.
- F. Future development can be guided to encourage building design that is functional, aesthetically pleasing and compatible with the architectural heritage of the community.
- G. The architecture of the community is varied and necessarily will evolve as the community grows. The regulation of architectural design must allow for flexibility, creativity and innovation within the context of an articulated framework.

**6.05.4 APPLICABILITY**

The provisions as set forth in this Ordinance shall apply to the following activities within the Corridor Overlay District:

- A. Applications for site plan and subdivision review.
- B. New building construction used for non-residential or multi-family purposes.
- C. Additions or alterations to buildings used for non-residential or multi-family purposes which significantly increases or decreases the square footage of a building.
- D. Additions or alterations to a site plan or buildings used for non-residential or multi-family purposes which significantly alter the visual appearance of the site or a façade visible from a public way.
- E. The Nashua and Elm Streets Corridor District is an overlay district which imposes additional requirements and restrictions to those of the underlying base district established under the powers granted under NH RSA 674:21. In case of a conflict between the requirements of 6.05.0 and the requirements presented elsewhere in the Milford Zoning Ordinance, the provisions of 6.05.0 shall apply. (2010)

**6.05.5 DISTRICT BOUNDARIES (2012)**

The Nashua and Elm Streets Corridor District boundaries include the area along Nashua and Elm Streets from Ponemah Hill Road to (and including) Granite Town Plaza, more fully depicted on the map entitled "Nashua and Elm Streets Corridor Overlay District Boundaries" dated 8/6/07, and incorporating the Tax Map lots as listed in Appendix I.

**6.05.6 PERFORMANCE STANDARDS**

**A. General**

1. Pre-Application Review. The Community Development Director, or designee, shall review all proposals to determine applicability as stated in Section 6.05.4 above.

2. **Development Review.** Upon determination by the Community Development Director, or designee, that an application meets the Section 6.05.4 applicability requirements, the applicant shall consult with the Planning Board using the Development Review Procedure set forth in the Town of Milford Development Regulations.
3. **Consistency with Plans.** In addition to providing the required development review information, the applicant shall demonstrate how the proposed plan will address the specific site recommendations as well as the general principles set forth in the following studies and documents:
  - a. *Evaluation of Highway Improvement Alternatives in Milford, NH (2002)*; Prepared by Hoyle, Tanner and Associates
  - b. *Route 101A Corridor Master Plan and Improvements Program, (2002)*; Prepared by VHB and Nashua Regional Planning Commission
  - c. *Milford Transportation and Community Systems Preservation (TCSP) Plan (2006)*; Prepared by Nashua Regional Planning Commission
  - d. *Town of Milford Nashua and Elm Street Corridor Design Guidelines (2007)*; Prepared by Nashua Regional Planning Commission

## **B. Transportation Standards**

1. **Access Management:**
  - a. All projects subject shall construct wherever feasible interconnecting driveways to adjacent properties or provide secure future connections through easements to adjacent property boundaries. This includes bicycle-pedestrian access to adjacent residential developments, where practical.
  - b. New access points onto Nashua or Elm streets shall only be created when it is not feasible to combine or share existing access points.
  - c. Interior parking lots shall provide for shared use and interconnected drives
  - d. Interior driveways should provide adequate throat length for vehicle stacking (queuing) and unobstructed views for exiting safely.
  - e. Interconnecting driveways shall promote vehicular and pedestrian access between adjacent lots without accessing the roadway.
2. **Transit Facilities.** The development of future transit facilities shall be incorporated within all major site plan developments that could generate high volumes of transit use, particularly senior housing or other multi-family housing as well as retail areas.
  - a. Potential transit routes, access points, bus pull-outs, bus stop, signage and shelter locations may be designated along major roadways and within the perimeter of such projects, and easements reserved for such facilities.
  - b. Transit facilities shall be provided in a manner to encourage transit as an alternative mode of travel.

3. **Bicycle Facilities.** Separate bicycle facilities may be required by the Planning Board where recommended by the studies listed in section VI.A.2. or where otherwise appropriate.
  - a. Bicycle routes may be provided in the form of a separate off-street path or on-street marked bicycle lanes.
  - b. Bicycle racks and other amenities may be required for all developments and shall be located in a convenient and secure location.
4. **Pedestrian Facilities.** Sidewalks shall be constructed as recommended by the studies listed in section VI.A.2. or where otherwise appropriate.
  - a. Sidewalk corridors shall be easily accessible to all users, whatever their level of ability and comply with the Americans with Disabilities Act (ADA) standards.
  - b. The sidewalk shall provide for a landscaped buffer (esplanade) between the roadway pavement and the sidewalk where adequate right of way exists.
  - c. The walking route along a sidewalk corridor shall connect destinations and shall not require pedestrians to travel out of their way unnecessarily.
  - d. Buildings should be sited so as to create pedestrian-scale plazas and gathering places.
  - e. Sidewalk construction shall be in accordance with Department of Public Works specifications.
5. **Gateways.** Some locations contribute to the landscape character of the community because of their location and scenic qualities. Many such properties and approaches act as gateways, providing first impressions and reinforcing Milford's sense of place. Consideration should be given towards complementing these resources through the careful siting of new buildings, and the application of the Site Design Standards. The locations of proposed gateways are identified on the Nashua and Elm Streets Corridor Overlay District Boundaries Map. In these areas, appropriate landscaping or other improvements may be required.
  - Nashua Street Neighborhood Gateway – Ponemah Hill Road and Nashua Street
  - Elm Street Neighborhood Gateway – Elm Street at Granite Town Plaza
  - Oval Area Gateways –
    - Elm Street and Cottage Street
    - Nashua Street and Tonella Road
  - Other potential gateway locations outside of the District which should be considered for special treatment include:
    - Amherst Street and Souhegan Street (outside of St. Patrick's Church)
    - Mont Vernon Street and Granite Street
    - South Street and Lincoln/Prospect Street

## C. Site Design Standards

1. **Natural Features.** Buildings, lots, impervious surfaces and accessory structures shall be sited in those portions of the site that have the most suitable conditions for development.
  - a. Environmentally sensitive areas, including but not limited to, wetlands, steep slopes in excess of 15%, floodplains, significant wildlife habitats and corridors, wooded areas, fisheries, scenic areas, habitat for rare and endangered plants and animals, unique natural communities and natural areas, and sand and gravel aquifers, shall be maintained and preserved to the maximum extent.
  - b. Natural drainage areas shall be preserved to the maximum extent. The development shall include appropriate measures for protecting these resources, including but not limited to, modification of the proposed design of the site, timing of construction, and limiting the extent of excavation.
2. **Parking Areas**
  - a. Parking lots shall be located to the rear or side of a building.
  - b. Parking shall not be permitted in front of a building or along the frontage of a lot.
  - c. Side yard parking shall be well buffered from the street.
  - d. Shared parking provisions for any combination of uses on site and adjacent sites are encouraged.
  - e. Offsite parking shall be protected with a shared parking easement agreement which shall be reviewed and recorded with the approved plans, except in areas exempt from parking standards such as but not limited to the Oval Sub-district.
3. **Build-to-Zone.** Building setbacks influence the character of the street. New structures shall be constructed so as to maintain a traditional streetscape edge. The setbacks of adjacent structures and context of spacing between buildings shall be considered in determining the appropriate building setback. At a minimum, a new structure shall be constructed within a Build-to-Zone between 15' and 35' from the public street right of way. If site circumstances dictate a new structure may be constructed within 10' of the public street right of way.
4. **Landscaping.** Required landscaping coverage shall be in accordance with the Town of Milford Subdivision and Site Plan Regulations, and shall be required for all proposals in the Nashua and Elm Streets Corridor District.
  - a. Trees. Required street trees should be species which are native to New Hampshire as set forth on the "*List of NH Native Trees*" (as amended) published by UNH Cooperative Extension (See Appendix II). Recognizing that site and growing conditions vary other appropriate street trees may be considered and approved by the Planning Board.
  - b. Landscaping plants. Landscaping with native plants and materials is strongly encouraged. However, recognizing the need to accommodate varying site and growing conditions, non-native landscaping plants may be permitted in accordance with published recommendations from the UNH Cooperative Extension and Hillsborough County Conservation District. See "*Alternatives to Invasive Landscape Plants*", UNH Cooperative Extension (as amended).
  - c. Prohibited Plants and Trees. Plant species as listed on the "*NH Prohibited Invasive Species List*" (as amended) by the NH Department of Agriculture are prohibited. As of 2007, the list includes the species listed in Appendix III. (2012)

## D. Architectural Design Standards

### 1. General Criteria

- a. Plans shall show all building elevations and portray the design of all buildings and the relationship of the development to surrounding properties, buildings, natural features and built features.
  - b. The Planning Board may require that development proposals be reviewed by an historic preservation consultant or architect, and be designed by a NH licensed architect at the cost of the applicant.
2. **Building Orientation.** New structures shall orient their main entrance or storefront to a public street.
- a. New structures shall maintain an appropriate street edge in relationship to adjacent structures. (See 6.05.6:C.3 Build-to-Zone)
  - b. Buildings shall be sited so that entrances are clearly identifiable and directly accessible from a sidewalk and shall be accessible for pedestrians, bicyclists and future public transit users.
3. **Building Massing, Forms and Pedestrian Scale.** The size, mass and form of new structures must relate to the appropriate scale of neighboring buildings as well as the context of the corridor. The following architectural features and treatments should be used to enhance the character of new development and the corridor:
- a. Avoid blank walls at ground-floor levels through the use of windows, trellises, wall articulation.
  - b. Arcades, materials changes, awnings or other features.
  - c. Reduce the apparent scale of the building by introducing small-scaled architectural features, creating an irregular footprint and variations in roof forms and height of roof elements.
  - d. Enhance definition of each floor of the building through terracing, articulated structural elements, changes in materials, belt courses and horizontal trim bands.
4. **Building Heights.** Building heights shall be generally compatible with and transition from the height of adjacent development within the historic context of the corridor. The overall building height and number of floors shall comply with the dimensional requirements of the Town of Milford Zoning Ordinance; however, wall plane heights shall be “stepped back” to minimize the mass of the structure along the frontage or public way.
5. **Roof Forms and Materials.** Rooflines shall be characteristically sloped and articulated with architectural features such as dormers, chimneys, gables, cupolas, etc.
- a. Rooflines shall not run in continuous planes, and shall be broken into appropriately scaled masses.
  - b. Flat roofs are prohibited unless the Planning Board finds that a proposal can provide appropriate visual appeal and does not detract from the character of the corridor.
  - c. Where appropriate roofs shall provide adequate overhangs for pedestrian activity.
  - d. Roof materials shall be composed of high quality, durable and architecturally consistent materials, including but not limited to concrete tile, asphalt shingles and standing seam metal.

6. **Architectural Features and Materials.** Architectural features and details shall be considered in every building design.
  - a. Traditional features and details such as columns, pilasters, canopies, porticos, awnings or arches associated with Milford's architectural heritage are strongly encouraged.
  - b. Long expanses of repetitive architectural elements and flat unarticulated wall surfaces shall be avoided.
  - c. Use of traditional materials or materials that have the same visual effect shall be used including but not limited to wood, brick, tile, or stone.
7. **Windows.** With the exception of retail storefronts, modestly scaled vertically proportioned windows are the most appropriate to the local building vernacular.
  - a. Building facades should have an abundance of windows that use clear non-reflective glass.
  - b. Windows on higher floors should align vertically with windows below, if possible.
  - c. Walls facing streets and pedestrian approaches shall have display windows, recessed windows, detailed entry areas, awnings or prominent sills and a pedestrian scaled lighting element. Storefronts should use windows to reveal indoor amenities, activities and displays.
8. **Building Entrances.** All building entrances shall be clearly defined and highly visible using a variety of the following details (*Please refer to the Town of Milford Design Guidelines for examples*):
  - a. Porticos
  - b. Canopies
  - c. Overhangs
  - d. Arcades
  - e. Recesses or projections
  - f. Raised cornice parapets over doors
  - g. Arches with detail (tile work or moldings) integrated with the building
  - h. Outdoor patios
  - i. Display windows
  - j. Integral planters
  - k. Wing walls with planters or seating
9. **Mechanical Equipment and Building Accessory Screening.** All rooftop air conditioning, heating equipment, other large mechanical equipment and building accessories such as dumpsters shall be screened from public view. The screening may be part of the articulation of the building.
10. **Existing Structures.** Existing buildings and structures of historic value should be preserved and if renovated or expanded done so in a manner that is respectful of the character, features and details of the existing structure.

11. **Signs.** Signs shall comply with the Town of Milford Sign Ordinance and should be designed to meet the needs of the individual uses while complementing the building, site and surroundings.
  - a. Wall signs shall be appropriately scaled to the building or surface on which it is placed and should not obscure important architectural features.
  - b. Signs shall be readable for both pedestrians and drivers approaching a site.
  - c. Consideration should be given to form, color, lighting and materials that are compatible with the building and its surroundings.
12. **Lighting.** All new developments shall include pedestrian-scaled light fixtures that are appropriate to the building and location. The use of floodlights, wall packs and tall light posts intended for lighting large areas shall be prohibited.

#### **6.05.7 WAIVER PROVISION**

There may be unusual or exceptional circumstances that exist where the application of one or more of the Performance Standards of Section 6.05.6 would entail practical difficulty or unreasonable hardship when balanced against the public purposes sought to be achieved by this Ordinance. In such circumstances, the Planning Board may waive the applicability of some or all of the Performance Standards in accordance with the Development Regulations waiver process (Section 5.020).

#### **6.05.8 APPEALS**

A decision of the Planning Board made pursuant to the Nashua and Elm Streets Corridor District shall not be appealed to the Zoning Board of Adjustment, but rather shall be appealed to the Superior Court as provided by NH RSA 677:15 and NH RSA 676:5, III.

#### **6.05.9 SAVING CLAUSE**

Where any provision of this Ordinance is found to be invalid, such determination shall not affect the validity of the remainder of this Ordinance.

#### **6.05.10 EFFECTIVE DATE**

The Nashua and Elm Streets Corridor District Ordinance was adopted by the Town of Milford on Tuesday, March 11, 2008 and is effective the same date.

**Appendix I – Parcels included in the Nashua and Elm Streets Corridor District**

**Map and Lot Numbers:** 19/3 thru 19/8, 19/10-19/14, 19/15-1, 19/15-2, 19/16, 19/16-1, 19/17, 19/21, 19/25, 19/25-1 thru 19/25-9, 20/44, 20/45, 20/47, 20/49 thru 20/52, 20/54 thru 20/61, 25/1 thru 25/7, 25/9, 25/9-1, 25/10, 25/11, 25/11-1, 25/12 thru 25/27, 25/32 thru 25/36, 25/38 thru 25/40, 25/42 thru 25/52, 25/56 thru 25/76, 25/112 thru 25/120, 25/122 thru 25/126, 25/126-1, 25/127 thru 25/133, 26/90 thru 26/99, 26/99-1, 26/100 thru 26/103, 26/103-1, 26/104 thru 26/109, 26/111 thru 26/166, 26/166-1, 26/167 thru 26/184, 26/184-1, 30/1 thru 30/4, 30/9, 30/10, 30/31 thru 30/37, 30/40 thru 30/53, 30/57 thru 30/63, 30/63-1, 30/64, 30/65, 30/65-1, 30/66, 31/2 thru 31/13, 31/32, 31/32-1, 31/32-2, 31/33, 31/52 thru 31/55, 32/1 thru 32/7, 32/11, 32/16, 32/17, 32/19 thru 32/24, 32/24-1, 32/28 thru 32/30, 43/46 thru 43/51 and 43/54.

**Appendix II – “List of NH Native Trees”**

Arborvitae	Hackberry	Poplar
Ash	Hawthorn	Sassafras
Basswood	Hemlock	Serviceberry
Beech	Hickory	Spruce
Birch	Hophornbeam	Sumac
Cherry	Juniper	Sycamore
Chestnut	Larch	Viburnum
Dogwood	Maple	Walnut
Elm	Mountain ash	White cedar
Fir	Oak	Willow
Gum	Pine	Witch-hazel

**Appendix III – Invasive Species**

Tree of Heaven	European Frogbit	Yellow Floating Heart
Garlic Mustard	Water-flag	Common Reed
European Barberry	Blunt-leaved Privet	Japanese Knotweed
Flowering Rush	Showy Bush Honeysuckle	Curly-leaf Pondweed
Fanwort	Japanese Honeysuckle	Common Buckthorn
Oriental Bittersweet	Morrow’s Honeysuckle	Glossy Buckthorn
Black Swallow-wort	Tartarian Honeysuckle	Multiflora Rose
Pale Swallow-wort	Purple loosestrife	Water Chestnut
Brazilian elodea	Parrot Feather	Burning Bush
Autumn Olive	Variable Milfoil	Norway Maple
Giant Hogweed	European Water-Milfoil	Japanese Barberry
Hydrilla	European Naiad	

## **6.06.0 COMMERCE AND COMMUNITY DISTRICT**

Entire article removed in 2020.

**6.07.0 WEST ELM STREET GATEWAY DISTRICT**

**6.07.1 AUTHORITY**

- A. Title: This Ordinance shall be known as the West Elm Street Gateway District.
- B. Authority: The Planning Board is hereby authorized to administer this Ordinance under the provisions set forth in NH RSA 674:21, Innovative Land Use Controls.

**6.07.2 PURPOSE**

The intent of this District is to encourage economic development in the West Elm Street Gateway District by enhancing, preserving and protecting the natural, historic and cultural resources of the Town. The purpose of this Ordinance is to implement the Town of Milford’s vision for the future as set forth in the Community Character Chapter of the Master Plan 2007 Update:

*Goal No. 2: Foster the traditional character of Milford’s neighborhoods by encouraging a human scale of development that is similar in setbacks, size and height, and that is comfortable and safe for pedestrians and non-motorized vehicles while allowing for an efficient and safe roadway network.*

The Ordinance implements the Master Plan vision for Milford’s gateway corridors and is designed to accomplish the following:

- A. Encourage and promote commercial, industrial and mixed use development sensitive to Milford’s agricultural, architectural and historic heritage by preserving and enhancing the streetscape, the unique scenic vistas, views of the Souhegan River, and visual character of the corridor.
- B. Encourage development to reflect the historic pattern of development in Town and enhance Milford’s sense of community and place.
- C. Encourage attractive pedestrian scale development.
- D. Improve transportation efficiency, landscaping, stormwater management, traffic management, and parking.
- E. Promote alternative modes of transportation, particularly pedestrian and biking.
- F. Promote development that reflects the intended character of Milford’s residential, commercial, and industrial neighborhoods relative to height, lot coverage, and setbacks.

The following standards are tools that create a flexible framework to guide the appearance of future development that is compatible with the historic nature of Milford, while allowing for innovation and architectural creativity in order to enhance a special place.

**6.07.3 FINDINGS**

- A. Milford’s West Elm Gateway District is a unique area with distinctive natural features, scenic vistas and a streetscape that reflects Milford’s agricultural and commercial history.

- B. Non-residential development that is indifferent to Milford’s history and economic needs constitutes a significant threat to the character and future of the community.
- C. Future development can be guided to encourage building design that is functional, aesthetically pleasing and harmonious with the agricultural and architectural heritage of the community as well as provide positive economic return to the Town and property owners.
- D. The architecture of the community is varied and necessarily will evolve as the community grows. The regulation of architectural design must allow for flexibility, creativity and innovation within the context of an articulated framework.
- E. Access management will increase the efficiency, safety and mobility of the corridor, and inter-site connections are needed to reduce the potential conflict points along the corridors.
- F. Future development should incorporate bicycle, pedestrian, and public transportation amenities as important features that add to Milford’s character, sense of place and public health.

**6.07.4 APPLICABILITY**

The provisions as set forth in this Ordinance shall apply to the following activities within the Corridor Overlay District:

- A. Applications for site plan and subdivision review.
- B. New building construction for non-residential or multi-family purposes greater than 600 SF.
- C. Additions or alterations to buildings for non-residential or multi-family purposes greater than 600 SF.
- D. Additions or alterations to a site plan or buildings used for non-residential or multi-family purposes which significantly alter the visual appearance of the site or a façade visible from a public way.
- E. The West Elm Street Gateway District is an overlay district which imposes additional requirements and restrictions to those of the underlying base district established under the powers granted under NH RSA 674:21. In case of a conflict between the requirements of 6.07.0 and the requirements presented elsewhere in the Milford Zoning Ordinance, the provisions of 6.07.0 shall apply.

**6.07.5 DISTRICT BOUNDARIES**

**6.07.6 PERFORMANCE STANDARDS**

“The West Elm Street Gateway District consists of a significant portion of Elm St and Route 101, from the Granite Town Plaza to the Wilton Town Line. It is bounded to the north by the Souhegan River until the fork at Wilton Road and Elm Street, where it is then bounded by North River Road and Wilton Road. The study area is bounded to the south by Elm Street and both sides of Old Wilton Road, and Route 101. The southern boundary also includes Meadowbrook Drive, Scarborough Lane and two large parcels just south of Route 101 and west of Savage Road. The area is fully depicted on the map entitled “West Elm Street Gateway District Boundaries”.

## A. General

The West Elm Street Gateway District is a major economic driver in Town and contributes to the overall character of the community because of its location, landscape and scenic qualities. This District provides a first impression and should reinforce Milford's sense of place. Consideration shall be given towards complementing these resources through the careful siting of new buildings, appropriate landscaping and the application of the Site Design Standards.

1. **Pre-Application Review.** The Community Development Director, or designee, shall review all proposals to determine applicability as stated in Section 6.07.4 above.
2. **Development Review.** Upon determination by the Community Development Director, or designee, that an application meets the Section 6.07.4 applicability requirements, the applicant shall submit an application to the Planning Board in accordance with the Development Review Procedure set forth in the Town of Milford Development Regulations.
3. **Consistency with Plans.** In addition to providing the required development review information, the applicant shall demonstrate how the proposed plan will address the specific site recommendations as well as the general principles set forth in the following studies and documents:
  - a. *The Milford Master Plan and subsequent updates.*
  - b. *Town of Milford West Elm Street Gateway District Design Guidelines (2011);* Prepared by Nashua Regional Planning Commission.

## B. General Provisions

1. **General**
2. **Viewshed:** Development must take into account the varied and natural beauty of the corridor. Building scale and siting must foster and enhance the unique natural amenities and landscape.
  - a. Wooded and agricultural areas shall be maintained and preserved to the maximum extent possible.
  - b. Development along the Souhegan River shall be situated to provide views from adjacent buildings as well as pedestrian amenities and lookouts near the River's edge. Natural drainage areas shall be preserved to the maximum extent. The development shall include appropriate measures for protecting these resources, including but not limited to, modification of the proposed design of the site, timing of construction, and limiting the extent of excavation.
  - c. Development should be situated in such a way as to not impede views of Dram Cup Hill and Pack Monadnock. Where possible buildings and pedestrian areas should be located to maximize views of these natural features.
3. **Underground Utility Lines:** Utility lines shall be located underground whenever possible in all new developments and during significant upgrades and renovations to existing sites.

4. **Streetscaping:** Amenities such as public art, lighting, street furniture, special sidewalk treatments and banners should be incorporated into site design proposals.
5. **Gateways:** Some locations contribute to the landscape character of the community because of their location and scenic qualities. Many such properties and approaches act as gateways, providing first impressions and reinforcing Milford's sense of place. Consideration should be given towards complementing these resources through the careful siting of new buildings, and the application of the Site Design Standards. The locations of proposed gateways are identified on the West Milford Gateway District Design Guidelines, *Corridor Overlay District and Potential Gateways Map*.

In these areas, appropriate landscaping or other improvements may be required.

- a. Near the Wilton Town Line on Route 101
  - b. North River Road just north of the Elm Street / Route 101 intersection
  - c. Near Map 7, Lot 12 on Elm Street
  - d. Just west of the Route 13 / Route 101 intersection
6. **Screened Loading Docks and Storage Areas:**
    - a. All loading docks shall be well screened to conceal delivery trucks and bays from public right-of-way and viewsheds.
    - b. Supplies should be stored inside of buildings.
    - c. Outside storage of supplies shall be heavily screened with attractive landscaping or fencing.
  7. **Natural Features:** Buildings, lots, impervious surfaces and accessory structures shall be sited in those portions of the site that have the most suitable conditions for development.
    - a. Environmentally sensitive areas, including but not limited to, wetlands, steep slopes in excess of 15%, floodplains, significant wildlife habitats and corridors, wooded areas, fisheries, scenic areas, habitat for rare and endangered plants and animals, unique natural communities and natural areas, and sand and gravel aquifers, shall be maintained and preserved to the maximum extent.
    - b. Natural drainage areas shall be preserved to the maximum extent. The development shall include appropriate measures for protecting these resources, including but not limited to, modification of the proposed design of the site, timing of construction, and limiting the extent of excavation.

C. **Mixed Use Development:** Mixed use development as permitted under the Zoning Ordinance can include a combination of residential, commercial or industrial development in either the same building or on the same site.

1. On mixed use development sites, the design shall complement the multiple uses with care placed on creating visual integration of features such as building setbacks, driveways, building entrances, windows, landscaping and pedestrian amenities.
2. In general, any residential uses should be in upper stories of multi-storied buildings with the commercial or industrial use below.

D. **Commercial Development:** Commercial development should be scaled appropriately to provide for a mix of building styles and traditional architectural features and materials, that foster Milford's sense of place.

1. Buildings and building entrances shall be human scale and close to the street when practical.
2. Building siting shall be such that the mass is scaled smaller in appearance.
3. Parking should be situated to the side and rear of the building whenever possible.

E. **Mixed Use and Commercial – Design**

1. **Building Orientation** - New structures shall orient their main entrance or storefront to a public street.

- a. New structures shall maintain an appropriate street edge in relationship to adjacent structures.
- b. Buildings shall be sited so that entrances are clearly identifiable and directly accessible from a sidewalk and shall be accessible for pedestrians, bicyclists and future public transit users.

2. **Building Massing, Form and Height**

The mass, form and height of new structures must relate to the appropriate scale of neighboring buildings as well as the context of the corridor. The following architectural features and treatments should be used to enhance the character of new development and the corridor:

- a. Reduce the apparent scale of the building by introducing small-scaled architectural features, creating an irregular footprint and variations in roof forms and height of roof elements.
- b. Enhance definition of each floor of the building through terracing, material changes, articulated structural elements, changes in materials and horizontal trim bands.

3. **Architectural Features and Materials**

Architectural features and details shall be considered in every building design.

- a. Traditional features and details such as columns, pilasters, porticos, awnings or arches associated with Milford's architectural heritage are strongly encouraged.
- b. Long expanses of repetitive architectural elements and flat unarticulated wall surfaces shall be avoided.
- c. Traditional materials or materials that have the same visual effect shall be used, including but not limited to, wood, brick, tile, or stone.

4. **Pedestrian Scale**

Building design should take into consideration pedestrians at the ground level.

- a. Avoid blank walls at ground-floor levels through the use of windows, trellises, material changes, arcades, or other features to increase visual interest.
- b. Pedestrian scale lighting shall be used wherever possible and be consistent with the existing building and location.
- c. Floodlights and tall light posts are not encouraged.

## 5. **Parking Areas**

- a. Parking lots should be located to the rear or side of a building whenever possible.
- b. Side yard parking shall be well buffered from the street.
- c. Shared parking provisions for any combination of uses on site and adjacent sites are encouraged.
- d. Offsite parking shall be protected with a shared parking easement agreement which shall be approved by the Zoning Administrator and recorded with the approved plans.

## 6. **Existing Structures**

Existing buildings and structures of historic value should be preserved and if renovated or expanded done so in a manner that is respectful of the character, features and details of the existing structure.

## 7. **Roof Form and Materials**

Rooflines shall be characteristically sloped and articulated with architectural features such as dormers, chimneys, gables, cupolas, etc.

- a. Rooflines shall not run in continuous planes, and shall be broken into appropriately scaled masses.
- b. Flat roofs are generally discouraged.
- c. Where appropriate roofs shall provide adequate overhangs for pedestrian activity.
- d. Roof materials shall be composed of high quality, durable and architecturally consistent materials, including but not limited to concrete tile, asphalt shingles and standing seam metal.

## 8. **Windows**

Modestly scaled vertically proportioned windows are the most appropriate to the local building vernacular.

- a. Building facades should have an abundance of windows that use clear non-reflective glass.
- b. Windows on higher floors should align vertically with windows below, if possible.
- c. Walls facing streets and pedestrian approaches shall have display windows, recessed windows, detailed entry areas, awnings or prominent sills and a pedestrian scaled lighting element. Storefronts should use windows to reveal indoor amenities, activities and displays.

## 9. **Building Entrances**

All building entrances shall be clearly defined and highly visible using a variety of the following details (*Please refer to the West Milford Gateway District Design Guidelines for examples*):

- a. Porticos
- b. Canopies
- c. Overhangs

- d. Arcades
- e. Recesses or projections
- f. Raised cornice parapets over doors
- g. Arches with detail (tile work or moldings) integrated with the building
- h. Outdoor patios
- i. Display windows
- j. Integral planters
- k. Wing walls with planters or seating

#### 10. **Signage**

Signs shall comply with the Town of Milford Sign Ordinance and should complement the building site and surroundings.

- a. Wall signs shall be appropriately scaled to the building or surface on which it is placed and should not obscure important architectural features.
- b. Signs shall be readable for both pedestrians and drivers approaching a site.
- c. Consideration should be given to form, color, lighting and materials that are compatible with the building and its surroundings.

#### 11. **Screening**

All rooftop air conditioning, heating and large mechanical equipment, building accessories, and refuse shall have noise reduction screening and be screened from public view and have noise reduction screening.

### F. **Mixed Use and Commercial – Traffic Standards**

#### 1. **Access Management**

- a. All projects shall construct wherever feasible interconnecting driveways to adjacent properties or provide secure future connections through easements to adjacent property boundaries. This includes bicycle-pedestrian access to adjacent residential developments, where practical.
- b. New access points onto Elm Street shall only be created when it is not feasible to combine or share existing access points.
- c. Interior parking lots shall provide for shared use and interconnected drives.
- d. Interconnecting driveways shall promote vehicular and pedestrian access between adjacent lots without accessing the roadway.

#### 2. **Driveway Throat Length**

Interior driveways should provide adequate throat length for vehicle stacking (queuing) and unobstructed views for exiting safely.

#### 3. **Bicycle Facilities**

Separate bicycle facilities may be required by the Planning Board where recommended by the studies listed in section 6.07.6 A.3. or where otherwise appropriate.

- a. Bicycle routes may be provided in the form of a separate off-street path or on-street marked bicycle lanes.
- b. Bicycle racks and other amenities may be required for all developments and shall be located in a convenient and secure location.

#### 4. **Pedestrian Facilities**

Sidewalks shall be constructed as recommended by the studies listed in section 6.07.6 A.3 or where otherwise appropriate.

- a. Sidewalk corridors shall be easily accessible to all users, and comply with the Americans with Disabilities Act (ADA) standards.
- b. The sidewalk shall provide for a landscaped buffer (esplanade) between the roadway pavement and the sidewalk where adequate right of way exists.
- c. The walking route along a sidewalk corridor shall connect destinations and shall not require pedestrians to travel out of their way unnecessarily.
- d. Buildings should be sited so as to create pedestrian-scale plazas and gathering places.
- e. Sidewalk construction shall be in accordance with Department of Public Works specifications.

#### 5. **Transit Facilities**

The development of future transit facilities shall be incorporated within all major site plan developments that could generate high volumes of transit use.

- a. Potential transit routes, access points, bus pull-outs, bus stops, signage and shelter locations may be designated along major roadways and within the perimeter of such projects, and easements reserved for such facilities.
- b. Transit facilities shall be provided in a manner to encourage transit as an alternative mode of travel.

G. **Industrial Development:** All industrial sites should be visually appealing and well integrated with adjacent sites, the natural landscape and viewsheds.

##### 1. **Building Orientation and Siting**

- a. Buildings should orient their main entrances toward the street when practical.
- b. Buildings with main entrances not oriented toward the street shall be oriented toward internal roadways and sidewalks within the site.
- c. Main entrances shall have human scale features, architectural details, landscaping and adequate signage.

##### 2. **Building Massing, Form, and Height**

- a. New industrial buildings should have massing, form and height that is compatible with adjacent properties.
- b. Buildings should be designed so as to minimize the appearance in mass and scale.

- c. Architectural features, windows, entrances and building materials may be utilized to reduce the appearance of building size.

### **3. Architectural Features and Materials**

- a. Buildings and adjacent walkways shall use a variety of architectural materials, colors and features to create attractive and visually appealing structures.
- b. Corrugated metal buildings and large flat wall surfaces should not be located within view of both internal and external street networks, or shall be screened, or given architectural treatments to break up large surface areas, and situated in less visible areas of the site.

### **4. Access Management**

- a. Industrial sites should be limited to two main entrances.
- b. If the site is large enough a tree lined roadway through the campus will provide access to smaller connector roads and parking areas.
- c. Where feasible interconnecting driveways should be constructed to provide access to adjacent properties or easements should be provided for interconnecting driveways for future development.

### **5. Parking**

- a. Parking should be located to the rear and side of buildings when practical to avoid large parking lots in front of buildings adjacent to the public right-of-way.
- b. Landscaping and small street trees shall be densely planted on medians.
- c. Special crosswalk and sidewalk treatments shall be used to create safe internal pedestrian access between parking lots and buildings.

### **6. Bicycle and Pedestrian Design**

- a. Connections to adjacent trails and networks shall be made where applicable.
- b. Separate bicycle facilities may be required by the Planning Board where recommended by the studies listed in section 6.07.6 A.3. or where otherwise appropriate.
  - i. Bicycle routes may be provided in the form of a separate off-street path or on-street marked bicycle lanes.
  - ii. Bicycle racks and other amenities may be required for all developments and shall be located in a convenient and secure location.

### **7. Transit**

- a. All sites over 2 acres will be evaluated to determine if the site is a feasible location for future public transit service. An easement to accommodate future bus turnouts and shelters may be required.
- b. Internal sidewalks should be planned to provide access to this easement area.

## H. Campus Style Development

Campus style development refers to business and industrial parks that are interconnected by internal roadway and sidewalk networks and accommodate multiple buildings, parking areas and uses. All campus developments should be visually appealing and well integrated with other internal buildings, the natural landscape and viewsheds.

### 1. Building Orientation and Siting

- a. Buildings should be oriented toward internal streets and sidewalks.
- b. Front entrances shall have human scale features, architectural details, landscaping, and adequate signage indicating the main entrance.
- c. All entrances shall have direct access to sidewalks.

### 2. Building Massing, Form and Height

- a. Campus buildings on the same site should have similar massing, form and height.
- b. Buildings should be designed to minimize the appearance of mass and must conform to the height requirements of the zoning ordinance. Architectural features, windows, entrances, and building materials should be consistent among buildings and should also help to reduce the appearance of building size.

### 3. Architectural Features and Materials

- a. Buildings and adjacent walkways shall use a variety of architectural standards, colors and features to create attractive and visually appealing structures.
- b. Similar materials should be incorporated on buildings and walkways throughout the campus to create a cohesive look.
- c. Interesting features such as brick, patterns, detailed entrances and varied setbacks should be incorporated.

### 4. Lighting

- a. Attractive downcast lighting shall be incorporated in a uniform manner throughout the campus.

### 5. Green Space

- a. Campus style developments must set aside a green space that can accommodate bicycle and pedestrian use.
- b. This space should include landscaping, benches, tables, fountains or public artwork.
- c. This space shall connect to the internal sidewalk network.
- d. This space can be counted towards total open space requirements.

### 6. Directional Signs

- a. Uniform directional signs shall be located at main entrances and throughout the campus. Directional signs should provide clear directional information for deliveries and visitors.

### 7. Access Management

- a. Access to campus styles developments should be limited to two main driveways.
- b. In the case of large sites, a main tree-lined access drive through the campus should provide access to smaller connector drives and parking areas.

#### **8. Parking**

- a. Parking should be located to the rear and side of buildings to avoid large parking lots in front of buildings.
- b. Landscaping and small street trees shall be densely planted on medians.
- c. Special crosswalk and sidewalk treatments shall be used to create safe internal pedestrian access between parking lots and buildings.

#### **9. Bicycle and Pedestrian Design**

- a. Connections to adjacent trails and networks shall be made where applicable.
- b. Separate bicycle facilities may be required by the Planning Board where recommended by the studies listed in section 6.07.6 A.3. or where otherwise appropriate.
  - i. Bicycle routes may be provided in the form of a separate off-street path or on-street marked bicycle lanes.
  - ii. Bicycle racks and other amenities may be required for all developments and shall be located in a convenient and secure location.

#### **10. Transit**

- a. All sites over 2 acres will be evaluated to determine if the site is a feasible location for future public transit service. An easement to accommodate future bus turnouts and shelters may be required.
- b. Internal sidewalks should be planned to provide access to this easement area.

**6.07.7 WAIVER PROVISION**

There may be unusual or exceptional circumstances that exist where the application of one or more of the Performance Standards of Section 6.07.6 would entail practical difficulty or unreasonable hardship when balanced against the public purposes sought to be achieved by this Ordinance. In such circumstances, the Planning Board may waive the applicability of some or all of the Performance Standards in accordance with the Development Regulations waiver process (Section 5.020).

**6.07.8 APPEALS**

A decision of the Planning Board made pursuant to the West Elm Street Gateway District shall not be appealed to the Zoning Board of Adjustment, but rather shall be appealed to the Superior Court as provided by NH RSA 677:15 and NH RSA 676:5, III.

**6.07.9 SAVING CLAUSE**

Where any provision of this Ordinance is found to be invalid, such determination shall not affect the validity of the remainder of this Ordinance.

**6.07.10 EFFECTIVE DATE**

The West Elm Street Gateway District Ordinance was adopted by the Town of Milford on Tuesday, March 13, 2012 and is effective the same date.

## **ARTICLE VII: SUPPLEMENTARY STANDARDS**

### **7.01.0 GRAVEL AND EARTH REMOVAL (2014)**

Loam, sand, gravel and similar earth materials may be removed from a lot or land area in Zoning Districts which allow such use only after a permit for earth removal has been issued by the Planning Board. All applications for gravel or earth products removal shall be in conformance with the conditions set forth in NH RSA Chapter 155-E, as amended and the Town of Milford's Gravel and Earth Removal Regulation, that may be amended from time to time.

## **7.02.0 ON-SITE SEWAGE DISPOSAL SYSTEMS**

**7.02.1** No septic tank, leach field, or other on-site sewage disposal system shall be constructed or enlarged within twenty five hundred (2,500) feet of any well of the Milford Town Water System subject to the following exceptions:

- A. On-site sewage disposal systems for one and two family residences shall be permitted.
- B. On-site sewage disposal systems for the treatment of organic wastes with flow not in excess of one thousand (1,000) gallons per twenty-four (24) hour period shall be permitted, however only one disposal system shall be permitted on each parcel of land held in single ownership.
- C. The Board of Adjustment, after proper public notice and public hearing, may grant a Special Exception for the installation or modification of an on-site sewage disposal system within twenty-five hundred (2,500) feet of a town well, when it is satisfied that no pollution of any town well shall result from the action. The application for a Special Exception shall include a written report(s) prepared by a licensed professional engineer, ground water geologist and/or hydrologist, who has been approved in advance by the Board. This report shall be based on on-site inspections, testings, and/or scientific analysis of the ground water transmigration. The report(s) shall include an analysis of the type of pollutants to be introduced into the disposal system, the maximum daily flows that are anticipated, soil types, and other relevant engineering and soils factors. All costs for the preparation of the required reports and any on-site testing shall be borne by the applicant for the Special Exception.
- D. On-site sewage disposal systems shall be permitted when the disposal system is located on one side of a river, stream or other body of water which has a year round flow and the town well is located on the other side.

**7.02.2** However, in no case shall any on-site sewage disposal system be constructed or enlarged within four hundred (400) feet of a town well.

## **7.03.0 CLUSTER OPEN SPACE DEVELOPMENT *Deleted (2000)***

## **7.04.0 PRIVATE WAYS *Deleted (2001)***

## **7.05.0 EXISTING MANUFACTURED MOBILE HOME PARKS**

### **7.05.1 ALLOWABLE USES (1992)**

Additions to manufactured housing in existing manufactured home parks shall be allowed when it can be shown that adequate water and sewer facilities exist.

### **7.05.2 ALLOWABLE USES IN THE INDUSTRIAL DISTRICT BY SPECIAL EXCEPTION**

Any manufactured housing park in existence at the time of the passage of this Ordinance that has a minimum of thirty (30) units may expand subject to the limitations contained herein and provided the Board of Adjustment has approved a Special Exception for such expansion pursuant hereto.

The Board of Adjustment in determining whether such a park is entitled to a Special Exception to expand shall apply the following criteria:

- A. The proposed shall only apply to a park with municipal water and sewer service or one which has received permission from the Selectmen to construct such water and sewer services at the park owner's expense;
- B. The proposed shall include a commitment to improve all existing and contemplated roads within the park to such standards as required by the Selectmen for current road improvements;
- C. The Board of Adjustment shall determine that there exists or will be provided, parks, playgrounds, open green space or other amenities sufficient to provide for existing and proposed occupants of the park;
- D. The Board of Adjustment shall determine the extent to which the park shall be allowed to expand provided that they shall not approve any expansion that will result in a total park density greater than the existing multi-family housing density in the Town;
- E. The Board of Adjustment shall consider the proposed expansion and may impose any reasonable conditions on the grant of the Special Exception which are, in the judgment of the Board of Adjustment, necessary to insure that the proposed expansion meets the above criteria, the general criteria for a special exception (set forth in Article X, Para. 10.02.0 of the Ordinance) and also provide for the safety of existing and further occupants in terms of fire safety, flooding, traffic and any other appropriate considerations.

It is understood that once a Special Exception is granted hereunder the applicant will thereafter present a Site Plan to the Planning Board in accordance with existing Development Regulations. All required improvements will be bonded as normally required.

A joint meeting of the Planning Board and Board of Adjustment is permissible if said boards concur. (1989)

## **7.06.0 SIGN ORDINANCE (2019)**

### **7.06.1 PURPOSE AND INTENT**

- A. The purposes of these sign regulations are to:
1. Encourage the effective use of signs as a means of communication in the Town of Milford;
  2. Retain the Town's ability to attract and encourage economic development and growth;
  3. Improve pedestrian and vehicle traffic safety;
  4. Respect the environment;
  5. Address new technologies;
  6. Minimize potential adverse effects of signs on nearby public and other private property;
  7. Complement the character of the zoning districts' existing land uses, including, without limitation, the Oval Sub-District's central role in the social, political and economic life of the Town; and,
  8. Enable fair and consistent enforcement of the sign regulations.
  9. To ensure that the constitutionally guaranteed right of free speech is protected.
- B. It is further intended that this Article will help the Town in its efforts to protect the safety and welfare of the public, implement the Town's Master Plan and reduce potential visual clutter by encouraging the effective use of signs.
- C. This Article is structured on a graduated basis that allows a progressively greater variety and size of signs as the zoning districts increase in scale and minimum lot area required for development. Conversely, as the zoning districts increase in density, this Article allows progressively smaller numbers of types and sizes to reflect the corresponding intensity of mixed land uses and the density of development.
- D. The "Applicability" subsection of each sign structure described in this Article provides a definition of the type of sign subject to this Article. To the extent that a provision of this Article and another section of the Zoning Ordinance conflict, the provisions of this Article shall control.
- E. This Article shall be liberally construed to effectuate its purposes; provided, however, that no sign shall be subject to any limitation based on the content of the message contained in such sign.
- F. If any section, clause, provision, portion or phrase of this Ordinance shall be held to be invalid or unconstitutional by any court of competent jurisdiction, such holding shall not affect, impair or invalidate any other section, clause, provision, portion or phrase of this Ordinance.

### **7.06.2 SHORT TITLE**

This article shall be known as the Town of Milford Sign Ordinance or the Sign Ordinance. The Sign Ordinance is enacted as part of the Town's Zoning Ordinance.

### 7.06.3 DEFINITIONS

The following words and phrases in this Article shall have the meaning described herein for all purposes associated with the construction and interpretation of the Sign Ordinance.

**Abandoned sign:** The cessation of the use of a sign as indicated by the visible or otherwise apparent intention of an owner to discontinue the use of a sign and/or structural framework; or the removal of the characteristic equipment or furnishing of the sign, without its replacement by similar equipment or furnishings; or the replacement of a nonconforming sign with a conforming sign.

**Animated Sign:** Any sign employing actual motion, the illusion of motion, or light and/or color changes achieved through mechanical, electrical, or electronic means. Animated signs, which are differentiated from manually activated changeable signs as defined and regulated by this Code, include the following types: Mechanically Activated signs, Electrically Activated Changeable Signs as define herein.

1. Flashing: Animated signs or animated portions of signs whose illumination is characterized by a repetitive cycle in which the period of illumination is either the same as or less than the period of non-illumination. For the purposes of this ordinance, flashing will not be defined as occurring if the cyclical period between on-off phases of illumination exceeds five (5) seconds.
2. Patterned Illusionary Movement: Animated signs or animated portions of signs whose illumination is characterized by simulated movement through alternate or sequential activation of various illuminated elements for the purpose of producing repetitive light patterns designed to appear in some form of constant motion.

**Area:** The space, on the largest single face of a sign, within and including a perimeter which forms the outside shape of a sign. Where signs are established back to back, the larger face shall be calculated for purposes of determining allowable area. The space of a sign having no such perimeter or border shall be computed by enclosing the entire copy area within the outline of a parallelogram, triangle, circle or any other easily recognized geometric shape and then computing the area. Where a sign is of a three-dimensional, round or irregular shape, the largest cross section shall be used in a flat projection for the purpose of computing sign area.

**Awning:** A removable shelter of canvas, metal or similar material extending over a doorway or window to provide shelter from natural elements.

**Awning sign:** A sign painted on or attached flat or flush against the surface of the awning, but not extending above, below or beyond the awning or attached to the underside. The copy area on awnings is computed as all or a portion of the allowed wall sign area. A minimum clearance of eight (8) feet above sidewalk level must be maintained for pedestrian clearance.

**Background area:** The total area of a sign face on which copy could be placed, often referenced to in connection with wall signs.

**Banner sign:**—A sign made of fabric or other similar non-rigid material supported or anchored at four corners or along top with weighted bottom. A larger banner will require additional support and anchor points.

**Billboard:** A large board on which advertisements are shown, esp. at the side of a road; a Billboard may or may not be an off-premise sign.

**Building face or wall:** All window and wall or façade areas of a building in one (1) plane or elevation.

**Building fascia:** The exterior linear length of a building that has frontage along a right-of-way or the exterior linear length of a building utilized for public access.

**Building frontage:** The linear length of a building parallel to or closely facing the right-of-way at street level.

**Building marker sign:** A sign lettered to give the name of a building and/or date of construction of the building. Such signs shall include signs recessed into the surface, cut into any masonry surface, or constructed of metallic or other noncombustible material. For purposes of this Article, “building name signs” are deemed to be directional signs.

**Canopy (or marquee):** A permanent roof-like shelter extending from part or all of a building face over a public right-of-way and constructed of a durable material such as metal, glass or plastic.

**Canopy or marquee sign:** Any sign attached to or part of a canopy or marquee. The copy area on such signs is computed as all or a portion of the allowed wall sign area.

**Changeable Sign** - A sign with the capability of content change by means of manual or remote input, includes the following types:

1. Manually Activated - Changeable sign whose message copy or content can be changed manually on a display surface. A manually activated changeable sign may be part of any sign type.
2. Electrically Activated - Changeable sign whose message copy or content can be changed by means of remote electrically energized on-off switching combinations of alphabetic or pictographic components arranged on a display surface. Illumination may be integral to the components, such as characterized by lamps or other light-emitting devices; or it may be from an external light source designed to reflect off the changeable copy area. See also: Electronic Message Center.

**Code Administrator:** The term “Code Administrator” shall also include the designees of the Code Administrator.

**Copy:** The wording or message on a sign surface in either permanent or temporary (removable/changeable) letter or organic form.

**Copy area:** The area in square feet of the smallest geometric figure which describes the area enclosed by the actual copy of a sign. When referring to a wall sign or fascia sign, the copy area refers to the actual message or total area within a border or area highlighted within a contrasting background, not to the illuminated background. Also see “area”.

**Directional sign:** Signage which is necessary for on-site public safety and convenience.

**Directory sign:** Permanent signs which are necessary to identify and locate occupants of a building when there is more than one occupant in a building or on a site.

**Display Time** – The amount of time a message and/or graphic is displayed on an Electronic Message Center or Sign (EMC).

**Dissolve** – A mode of message transition on an Electronic Message Sign accomplished by varying the light intensity or pattern, in which the first message gradually appears to dissipate and lose legibility with the gradual appearance and legibility of the second message.

**Dynamic Frame Effect** – An Electronic Message Sign frame effect in which the illusion of motion and/or animation is used.

**Electronic awning sign:** A fireproof space frame structure with translucent covering designed in awning form, but whose purpose and use is signage. Such signs are internally illuminated by fluorescent or other light sources in fixtures approved under national and local electrical codes. The copy area is computed as all or a portion of the allowed wall sign area.

**Electronic Message Center or Sign (EMC)** - An electrically activated changeable sign (also referred to as digital signs or computer-controlled electronic signs) whose variable message and/or graphic presentation capability can be electronically programmed by computer from a remote location. Also known as an EMC. EMCs typically use light emitting diodes (LEDs) as a lighting source. (See also following terms principally associated with Electronic Message Centers: Display Time, Dissolve, Dynamic Frame Effect, Fade, Frame, Frame Effect, Scroll, Transition, Travel)

**Establish:** This term shall mean to attach, alter, build, construct, reconstruct, enlarge, move, hang, place, suspend, affix, erect, manufacture, and includes the painting of wall signs, but does not include copy changes on any permitted sign.

**Façade sign:** See “wall sign.”

**Face of sign:** The entire area of the sign on which copy could be placed. Also see “copy area” and “area.”

**Fade** – A mode of message transition on an Electronic Message Sign accomplished by varying the light intensity, where the first message gradually reduces intensity to the point of not being legible and the subsequent message gradually increases intensity to the point of legibility.

**Fascia sign:** See “wall sign.”

**Flag:** A sign made of fabric or other similar non-rigid material supported or anchored along one edge or two corners. If any side is more than three times as long as any other side the flag becomes a banner.

**Flashing sign:** Animated signs or animated portions of signs whose illumination is characterized by a repetitive cycle in which the period of illumination is either the same as or less than the period of non-illumination. For the purposes of this ordinance, flashing will not be defined as occurring if the cyclical period between on-off phases of illumination exceeds five (5) seconds.

**EMC Frame** – A complete, static display screen on an Electronic Message Sign.

**Frame Effect** – A visual effect on an Electronic Message Sign applied to a single frame. See also Dynamic Frame Effect.

**Freestanding sign:** See “Monument sign.”

**Frontage, minimum:** That continuous portion of a lot bordering on a road(s) from which access can be taken, that meets the minimum requirements of the underlying zoning district.

**Height of sign:** The vertical distance measured from the adjacent undisturbed grade of the sign to the highest point of the sign.

**Historic marker sign:** A marker that identifies an historic place, person event or date and is erected by a historical organization or by a government agency.

**Illuminance** – The amount of light falling upon a real or imaginary surface, commonly called “light level” or “illumination” measured in foot candles (lumens/square foot).

**Illuminated sign:** Any sign which emanates light either by means of exposed tubing, electrical bulbs, fluorescent lights, neon tubes or lamps on its surface, or by means of illumination transmitted through the sign faces. Any decorative lighting that is used expressly for the purpose of advertisement shall be constructed as a sign.

**Individual letter sign:** Any sign made of self-contained letters that are mounted individually. See “copy area.”

**Landmark sign:** An older sign of artistic or historic merit, uniqueness, or extraordinary significance, as identified by the local historic commission or society. The character of landmark signs warrants their preservation in original condition, or their restoration.

**Location:** Any lot, premises, building, structure, wall, or any place upon which a sign is located.

**Long-term temporary (LTT) sign:** Any sign established for a temporary period of not more than six (6) months, but not less than 14 days. (see Short-term Temporary Sign definition.)

**Luminance** – The light that is emitted by or reflected from a surface. Measured in units of luminous intensity (candelas) per unit area and units as foot lamberts and equivalent. This can be measured by means of a luminance meter.

**Maintain:** To permit a sign, sign structure or any part of each to continue; or to repair or refurbish a sign, sign structure or any part of each. A sign shall be maintained in good repair for reasons of public safety and aesthetics.

**Marquee:** See “canopy.”

**Marquee sign:** See “canopy sign.”

**Mechanically Activated sign (animated):** Animated signs characterized by repetitive motion and/or rotation activated by a mechanical system powered by electric motors or other mechanically induced means.

**Message:** The wording or copy on a sign. See “copy.”

**Monument sign:** A sign established on a freestanding structure, frame, mast or pole and not attached to any building. Where such signs are established back to back, the larger face shall be calculated for the purposes of determining allowable area. Also known as detached sign, freestanding sign, pole sign, ground sign and pylon sign.

**Nonconforming sign:** Any sign which was lawfully established prior to the date this Article was adopted, and which fails to conform to the specifications of this Article.

**Off-premises sign:** A sign unrelated to a business or a profession conducted, or to a commodity or service sold or offered, upon the premises where such a sign is located. It is recognized that, unlike on-premises signs which are actually a part of a business, off-premise signs are a separate and distinct use of the public thoroughfare.

**On-premises sign:** Any sign visible from a public right-of-way located on the premises where the sign is installed and maintained.

**Parking signs:** Signs that identify available spaces or areas for parking of vehicles. Parking signs are deemed “Directional signs” for the purposes of this Article.

**Permanent sign:** A permanent sign is any sign established for a period of greater than six (6) months.

**Pole sign:** See “Monument sign.”

**Political sign:** Signs erected on residential property by or with the consent of the property owner, where such signs coincide with the timing of a political campaign or other matter on which voters may vote. Political signs are considered temporary signs for the purpose of this ordinance.

**Portable sign:** Movable sign that is not attached to a structure or the ground, includes: A-boards, portable reader-boards and similar signs.

**Premises:** A lot or number of lots on which are situated a building or group of buildings designed as an unit or on which a building or a group of buildings are to be constructed. The premises and the sign to which it relates must have a physical connection.

**Projecting Sign:** A sign which is affixed to any building wall or structure and extends beyond the building wall, structure, building line or property line more than twelve (12) inches.

**Public right-of-way:** A public right of way includes the portion of a public street, road or highway dedicated to and accepted by the Town and/or the State as measured from property line to property line. When property lines on opposite sides of the public street are not parallel, the public right-of-way width shall be determined by the Code Administrator.

**Real estate rider board:** A typically small sign that either hangs from the base of or is established on top of a real estate sign. The area of these signs shall be included in the total allowable sign area for real estate signs.

**Register:** The register of signs shall consist of an official record maintained by the Code Administrator as to the purpose of signage and containing the date of establishment and removal.

**Roof line:** The top edge of the roof or the top of the parapet, where the junction of the roof and the perimeter wall of the structure forms the top line of the building silhouette.

**Roof sign:** A sign established upon, against, or directly above a roof, or on the top of or above the parapet of a building.

**Rotating sign:** Any sign or portion of a sign which moves in a revolving or similar manner, but not including multi-prism indexing signs. See also Mechanically Animated sign.

**Scroll:** A mode of message transition on an Electronic Message Sign in which the message appears to move vertically across the display surface.

**Short-term temporary (STT) sign:** Any sign which is established for no more than fourteen (14) calendar days.

**Sign:** A permanent or temporary device, structure, light, letter, word, two- or three-dimensional, object or copy, model, banner, streamer, pennant, display, insignia, emblem, trade flag, presentation by figures, designs, pictures, logos or colors visible to the public from outside a building, from a traveled way or otherwise. The purpose of a sign is to convey a message to the public, to advertise, direct, invite, announce, or draw attention to, directly or indirectly, a use conducted, goods, products, services or facilities available, either on the lot or on any other premises, includes any permanently installed or prominently situated merchandise. For the purpose of removal, signs shall also include all sign structures and appurtenances.

**Sign structure:** Any framework, either freestanding or an integral part of the building, which supports or is capable of supporting any sign, including decorative cover.

**Storefront:** The side of the store or business facing the public right-of-way or from which provides primary customer or business access measured at street level.

**Snipe Sign:** any sign that is attached to any public utility pole or structure, streetlight, tree, fence, fire hydrant, bridge, curb, sidewalk, park bench or the location on public property.

**Street:** A public highway, road or thoroughfare which affords the principal means of access to adjacent lots, and measured from property line to property line. Also see “public right-of-way.”

**Suspended Sign:** Any sign that hangs from below a roof, porch or eave and hangs in a horizontal orientation to the ground.

**Temporary sign:** Any sign established for any period of less than six (6) months. Please see definitions for portable, short term temporary, and long term temporary signs.

**Temporary message:** a message that may be changed manually or digitally as part of a permanent sign structure.

**Transition** – A visual effect used on an Electronic Message Sign to change from one message to another.

**Travel** – A mode of message transition on an Electronic Message Sign in which the message appears to move horizontally across the display surface.

**Use:** The purpose for which a building, lot, sign or other structure is arranged, intended, designed, occupied or maintained.

**Utility sign:** These signs are noncommercial in nature and identify the location of gas lines, water lines or phone cables, often warning of the potential hazard of digging or excavation in the immediate area.

**Wall sign:** Any sign attached parallel to the building wall or other surface to which it is mounted that does not extend more than twelve (12) inches from said surface and has only one (1) sign face that is intended to be read parallel to the wall or other surface to which it is mounted. Window signage shall not be included in the total allowable wall sign area. Wall sign also includes any sign established on any other part of a building provided that the sign is on a plane parallel to the wall of the building. Wall signs may not project above the top of a parapet, wall or the roof line at the wall, whichever is highest. A wall sign is also that sign established on a false wall or false roof that does not vary more than thirty (30) degrees from the plane of the building’s parallel wall. See also, fascia signs or façade signs.

**Window sign:** A sign affixed to the surface of a window or within twelve (12) inches of the window plane with its message intended to be visible to the exterior environment. Such sign shall not be construed to include merchandise located in a window.

#### **7.06.4 PROHIBITED SIGNS**

Any sign not specifically authorized by this Article is prohibited unless required by law. The following signs and conditions are prohibited:

- A. Any sign located within, on, or projecting over a property line which borders a public or private street, highway, alley, lane, parkway, avenue, road, sidewalk, or other right-of-way, except as

provided in this Article. The Code Administrator may cause to be removed any temporary or portable sign erected or displayed upon, or projecting into public property; and,

- B. Any sign attached to any public utility pole or structure, street light, tree, fence, fire hydrant, bridge, curb, sidewalk, park bench, or other location on public property, also known as “snipe signs,” except as provided herein; and,
- C. Any sign placed, which by reason of its location, will obstruct the view of any authorized traffic sign, signal or other traffic control device or which by reason of shape, color, or position interferes with or could be confused with any authorized traffic signal or device; and,
- D. Any sign which is placed so as to prevent or inhibit free ingress to or egress from any door, window, or any exit way required by the Building Code or the Fire Code; and,
- E. Any flashing sign, strobe containing sign or other sign or lighting device, on the exterior of the building, except as provided for herein.
- F. Any sign with unshielded incandescent, metal halide, or fluorescent light bulbs; and,
- G. Any sign which emits audible sound, odor, smoke, steam, laser or hologram lights, or other visible matter, including any sign that employs any stereopticon or motion picture projection; and,
- H. Any sign mechanically animated by attachment affected by the movement of the air; and,
- I. Any rotating sign; and,
- J. Signs placed on or painted on a motor vehicle or trailer parked with the primary purpose of providing signage not otherwise allowed by the Code; Prohibited is any sign displayed on a parked trailer or truck or other vehicle where the primary purpose of the vehicle is to advertise a product, service business, or other activity. This regulation shall permit the use of business logos, identification or advertising on vehicles primarily and actively used for business purposes and/or personal transportation.
- K. Any roof signs; and,
- L. Any billboards.

#### **7.06.5 GENERAL ADMINISTRATION**

- A. **PERMITS:** No sign may be established without a sign permit issued by the Code Administrator, except as provided for in (C) below.
- B. **MAINTENANCE:** All signs must be maintained in good repair for reasons of public safety. Ordinary maintenance and minor repair shall not include replacement of the structural framing and supports, enlargements of the area of a sign face or relocation of the sign-
- C. **PERMIT NOT REQUIRED:** The following signs are exempt from the permit requirements of this Article, but are otherwise subject to the standards contained herein. Any failure to comply with

these standards and any other provisions of this Article shall be considered a violation of the Zoning Ordinance.

1. Nameplate signs giving property identification names or numbers, or names of occupants; and,
2. Signs on mailboxes or newspaper tubes; and,
3. **Security and Warning Signs** - On-premise signs regulating the use of the premises, such as “private parking”, “no hunting” and “no soliciting” signs that do not exceed one (1) sign two (2) square feet in area in residential areas and one (1) sign five (5) square feet in area in commercial and industrial zones. These limitations shall not apply to the posting of conventional “no trespassing” signs in accordance with RSA 635:4 as amended.
4. **Public Signs** erected by government agencies or utilities, including traffic, utility, safety, railroad crossing and identification signs for public facilities and any signs erected by the Town of Milford;
5. Historic marker signs, erected by any historical organization or governmental agency, provided that said signs are no more than two (2) square feet:
6. Flags of any governmental organization when not displayed in connection with a commercial promotion or as an advertising device. No flag shall be flown from a pole that is more than fifty (50’) feet in height;
7. One temporary sign per lot placed on property which is actively marketed for sale. Such signs shall not be illuminated. In residential districts, such signs shall not exceed sixteen (16) square feet in area and the maximum sign height shall be six (6) feet above grade to the top of the sign and its supporting structure. In non-residential districts, such signs shall not exceed thirty-two (32) square feet in area and the maximum sign height shall be ten (10) feet above grade to the top of the sign and its supporting structure. In all districts, such signs shall be removed immediately after sale, lease, or rental;
8. A temporary sign placed within a parcel of property upon which construction activities of any type are being actively performed. Such signs shall not be illuminated, and may identify the project, the owner or developer, architect, engineer, contractor and subcontractors, funding sources, and may contain information related to sale or leasing of the premises. In residential districts, such signs shall not exceed sixteen (16) square feet in area and the maximum sign height shall be six (6) feet above grade to the top of the sign and its supporting structure. In non-residential districts, such signs shall not exceed thirty-two (32) square feet in area and the maximum sign height shall be ten (10) feet above grade to the top of the sign and its supporting structure. In all districts. Such signs shall not be erected prior to the issuance of a building permit and shall be removed within fourteen (14) days after the issuance of the Final Certificate of Occupancy;
9. Signs erected on residential property by or with the consent of the property owner, where such signs coincide with the timing of a political campaign or other matter on which voters may vote pursuant to NH RSA 664:14-No such sign may exceed the sign area permitted for other signs within the zoning district in which it is located; provided, however, that political signs must be removed within seventy-two (72) hours of the election to which they refer, unless the sign seeks to notify the public of the winner of the said election, in which case, the sign must be removed

within ten (10) days of the election to which it refers;

10. Building marker signs that do not exceed four (4) square feet in area;
11. Signs that are located on, or are an integral part of, a property that has been placed on or determined eligible for the National and State Register of Historic Places, provided that such signs are recognized as contributing to the National Register status of the property;
12. Signs which are not visible from a public roadway; however, these signs must comply with any building and construction provisions enacted by the IBC;
13. Signs inside a building beyond twelve (12) inches of the window plane;
14. Signs carved into a building or raised in integral relief on a building;
15. Painted and/or applied wall accents and decorations;
16. Public Art, including Permitted Original Art Murals;
17. Decals - Decals and/or logos affixed to windows or door glass panels, such as those indicating membership in a business group or identifying credit cards accepted at the establishment.
18. The Oval, as distinct from the Oval Subdistrict, is owned by the Town of Milford. Signs on the Oval are regulated pursuant to Chapter 7.16 of the Milford Municipal Code.

#### **D. APPLICATION PROCEDURE**

An application for a sign permit may be obtained from the Community Development Department of the Town of Milford. The Code Administrator shall complete the review of an application for a sign permit within thirty (30) days of the receipt of said application by the Town. A permit shall be approved if a proposed sign conforms to all Town Ordinances and any currently adopted Building Codes that may be applicable.

1. An applicant for a sign permit shall submit to the Code Administrator the following:
  - a. A completed sign permit application form;
  - b. A non-refundable application review fee in an amount to be set by the Board of Selectmen, which may be changed by the Board of Selectmen in their discretion. The Code Administrator shall display notice of the applicable fee in the offices of the Code Administrator in a form and manner designed to give reasonable notice to the public of the amount of the application review fee.
  - c. An illustration of the proposed sign(s) shall be submitted, drawn to scale, that includes the following information:
    - i. The total area of the proposed sign(s) in square feet;
    - ii. The total copy area of the proposed sign(s);
    - iii. The support structure for the proposed sign(s);
    - iv. The overall height, width and depth of the proposed sign(s);
    - v. Any structural, electrical, animation, illumination and other essential characteristics for the proposed sign(s);

- vi. The location(s) of the proposed sign(s) on the property and/or building(s);
  - vii. A photograph of existing signage, if any, including dimensions drawn onto the photograph; for multi-unit properties, condominiums and the like, the applicant need only submit a photograph detailing existing signage for the Applicant's particular unit;
  - viii. The material from which the proposed sign(s) is to be constructed;
  - ix. Any sign may be required to provide engineer licensed stamped plans, at the discretion of the Code Administrator, upon review.
2. Completeness Review: The Code Administrator shall determine whether the sign permit application is complete within ten (10) calendar days after the application is filed.
3. Decisions:
  - a. The Code Administrator shall either approve or deny the sign permit application within the time periods specified below after the Code Administrator determines that the application is complete. Applications found to be incomplete shall not be acted upon but returned to the applicant identifying the items needed for completion.
  - b. Upon a finding by the Code Administrator that the sign permit application complies with the provisions of this Article, the Code Administrator shall cause to be issued a sign permit for installation by the applicant. The sign permit shall be issued within ten (10) calendar days of the date on which the application was deemed complete.
  - c. If the sign permit application is denied, the applicant shall be notified within ten (10) calendar days of the date on which the application was deemed complete. The notice of denial shall specifically explain any deficiencies in writing in the application and how the applicant may proceed under this Section and Article 10 of the Zoning Ordinance.
  - d. No sign permit may be issued until all fees have been paid and other requirements of the Sign Ordinance have been satisfied.
4. Approval Criteria: The Code Administrator shall issue the requested sign permit if the sign permit application complies with this Article. Otherwise, the Code Administrator shall deny the sign permit application.
5. Revised Applications: When a sign permit application is denied by the Code Administrator, an applicant may resubmit a revised sign permit application that conforms to the requirements of Section 7.06.5 and specifies what changes were adopted by the applicant to remedy the cause(s) for denial. The Code Administrator may suggest alternative locations or design modifications.
6. Appeal: An applicant may appeal the decision of the Code Administrator pursuant to Article VIII of the Zoning Ordinance within thirty (30) calendar days of the date of Code Administrator's decision.
7. Amendments: No new sign or modification of the size, materials or design characteristics of any existing sign shall occur unless a new sign permit is issued in accordance with the procedures established by this Article.
8. Signs approved as a part of a Site Plan or Subdivision Approval shall meet the requirements set

forth within the Milford Development Regulations for a Signage Plan and Approval.

- E. **VARIANCE; APPEALS OF THE ZONING BOARD OF ADJUSTMENT:** The Zoning Board of Adjustment may grant relief by authorizing a variance of this Article. Variances from this Article shall be governed by Article X of the Zoning Ordinance, NH RSA Chapter 677, and applicable case law.
- F. **ENFORCEMENT VIOLATIONS:** The Code Administrator is authorized, empowered and directed to enforce the provisions of this Article. Any person, including, without limitation, an owner of real property, who violates, suffers a violation to occur or refuses to comply with any provision of this Article may be subject to the penalty provisions as described in Article VIII of the Zoning Ordinance.
- G. **NOTICE OF NON-COMPLIANCE:** If the Code Administrator determines that any sign is unsafe, insecure, dilapidated, or deteriorated, the Code Administrator shall give written notice to remove or replace said sign to the person or persons responsible, in accordance with this Ordinance.

#### H. **ORDER OF REMOVAL**

1. If the permit holder, owner of the sign, or owner of the property on which the sign is located fails to remove or repair the sign within ten (10) days after said notice or fails to file an allegation of error in accordance with this Ordinance, the Code Administrator is hereby authorized to cause the removal of such sign.
2. Any expense incident to the removal of said sign shall be paid by the permit holder, owner of the sign, or owner of the property on which the sign is located.
3. Nothing contained herein shall prohibit the immediate removal, without notice, of any sign or portion of a sign, which is determined by the Code Administrator to be an immediate threat or danger to the health, safety, and general welfare of the public.
4. The removal of the sign or portion of the sign shall be limited to the extent necessary to eliminate the threat to the health, safety, and general welfare of the public.
5. The Town is authorized to file a lien against any property, which is not otherwise exempt, to recover expenses incurred by the Town for the removal of a sign or portion of a sign from a property.

#### **7.06.6 NO DISCRIMINATION AGAINST NON-COMMERCIAL SIGNS OR SPEECH:**

The owner of any sign which is otherwise allowed under this Article may substitute non-commercial copy in lieu of any other commercial or non-commercial copy. This substitution of copy may be made without any additional approval or permitting. The purpose of this provision is to prevent any inadvertent favoring of commercial speech over non-commercial speech, or favoring of any particular non-commercial message over any other non-commercial message. This provision prevails over any more specific provision to the contrary. This provision does not create a right to increase the total amount of signage on a parcel.

#### **7.06.7 NONCONFORMING SIGNS**

- A. **CONTINUANCE:** A nonconforming sign lawfully existing at the time of adoption or subsequent

amendment of this Article may continue, although such sign does not conform to the provisions of this Article. Portable not eligible under this section for continuance and shall, therefore, require sign permits and compliance with the provisions of this Article.

- B. **MAINTENANCE:** A nonconforming sign must be maintained in good repair for reasons of public safety. Ordinary maintenance and minor repairs shall not include replacement of the structural framing and supports, enlargement of the area of a sign face, removable sign panel changes, illumination increase or changes, or relocation of the sign.
- C. **ALTERATION, RELOCATION AND REPLACEMENT:** Alterations, relocation, and/or replacement of a legal nonconforming sign structure is permitted when damage or deterioration does not exceed fifty percent (50%) of the area of the sign and structure. A non-conforming sign that is damaged by any casualty or *force majeure* may be replaced by an identical sign in the same location that is identical to the damaged sign-within three hundred and sixty-five (365) days of such casualty. The replacement sign retains its status as a permitted, non-conforming use.
- D. **REMOVAL:** A nonconforming sign shall be removed within three hundred and sixty-five (365) days if any one of the following conditions exist:
  - 1. If the damage or deterioration of the sign structure exceeds fifty percent (50%) of the area; or,
  - 2. If the building to which the sign structure is accessory is damaged or demolished to an extent exceeding fifty percent (50%) of the building's appraised value and no plans have been submitted for the building's reconstruction or restoration pursuant to applicable codes and Ordinances; or,
  - 3. If the sign has been abandoned for at least three hundred sixty-five (365) days.
- E. Any sign that has been removed due to any of the conditions listed in 7.06.6:D above shall not be replaced and any succeeding sign shall conform to the provisions of this Article. If any portion of the sign structure is removed, then all parts and components of the sign shall also be removed.

#### **7.06.8 GENERAL PROVISIONS FOR SIGN TYPES**

A. The following section contains general standards for different types of signs. These standards regulate the dimensions, location and design of signs based upon their structural characteristics and location. The following section lists sign requirements within specific Zoning Districts.

#### **B. ELECTRICALLY ACTIVATED CHANGING SIGNS**

- 1. **Applicability:** This subsection applies to any sign that is either electronically or electrically controlled to illustrate different copy changes of the same sign. This sign's message may be changed by electronic switching or automatic switching of lamps or alteration in the level of illumination or other illumination source to form words, letters, designs, figures, numerals and pictures often through the apparent vertical or horizontal movement of light. Such signs shall not include a flashing light source. In the case of an Electrically Activated Changeable Sign, flashing shall be defined as an interval of illumination less than five (5) seconds in duration. These signs are commonly used to display time, temperature, date and message centers or

reader boards, indexing signs, and those known as Electronic Message Centers.

2. **Electronic Message Center (EMC):** Where EMC's are permitted, they shall be subject to all of the following restrictions:
  - a. The EMC may not exceed fifty (50) percent of the total of the sign area or twenty-four (24) square feet, whichever is smaller. The remaining 50% shall not include blank area that would be seen as a border, frame or otherwise non-sign area;
  - b. All illumination elements on the face of an EMC shall remain at a fixed level of illumination for a period of not less than ten (10) seconds; provided, however, that time and temperature text shall remain at a fixed level of illumination for a period of not less than five (5) seconds;
  - c. Changes from one message to another shall be accomplished by the change of all illumination elements on the face of a EMC simultaneously, with the provision that the sign may fade to complete darkness and then re-illuminate with or fade to the new message;
  - d. An EMC shall be equipped with down-cast lighting and the ability to adjust the brightness of the sign. No sign can be a danger to public health and safety and cannot exceed seven hundred fifty (750) cd/m<sup>2</sup> or Nits at least one-half hour before Apparent Sunset, All illuminated signs must comply with this maximum luminance level throughout the night, if the sign is energized, until Apparent Sunrise, at which time the sign may resume luminance levels appropriate for daylight conditions, when required or appropriate;
  - e. All EMC signs shall have automatic dimming controls, either by photocell (hardwired) or via software settings, in order to bring the EMC lighting level at night into compliance with requirements stated herein;
  - f. All EMC and other electronically or electrically changing signs must submit a Certificate of Compliance for said sign prior to a Building Permit being issued for said sign.

### C. **AWNING SIGNS/CANOPY SIGNS/MARQUEE SIGNS/PROJECTING AND SUSPENDED SIGNS**

1. There must be a minimum clearance of eight (8) feet above sidewalk level must be maintained for pedestrian clearance.
2. The copy area of Awning/Canopy/Marquee signs is computed as all or a portion of the allowed wall sign area.
3. Copy Area: The copy area on any awning sign, canopy sign, electronic awning sign, or marquee sign is computed as all or a portion of the allowed wall sign area. Copy located on the canopy or awning sign shall not exceed one-half (1/2) of the area bounded by the edges of the canopy or awning visible from the public right-of-way. If copy is only found in fringe drip-flap portion of the canopy, the entire portion of said area may be utilized for signage.
4. Right-of-Way: An awning or canopy sign which projects into the right-of-way in the Oval Sub-District may be approved and permitted by the Code Administrator as long as the sign does not interfere with the health and safety of the public use of the right-of-way. If an awning or canopy sign projects into the right-of-way in any allowed district other than the Oval Sub-district, a special exception is required from the Zoning Board of Adjustment.
5. Electric Awning Signs: Electric awning signs shall be located on multistory buildings between

the first and second story windows, or on single-story buildings above the first story windows. Electric awning signs located on multiple storefronts shall be allowed copy space no more than eighty (80) percent of the individual storefront width, in order to maintain adequate separation between tenant spaces.

6. Height/Clearance: Awning, canopy, marquee, projecting and suspended signs shall not exceed five (5) feet in height and shall maintain a minimum of eight (8) feet clearance.

**D. WALL SIGNS (FASCIA SIGN OR FAÇADE SIGN)**

Permitted wall signs shall be calculated using the formula in Chart 7.06.2-A, for the maximum square footage of any particular sign. See “storefront” both single and multi-story building to determine other values.

**Chart 7.06.2-A**

Distance of Storefront from Property Line with main point of access of abutting street	Storefront Multiplied By	Maximum sign area in square feet
50-99	1.0	100
100-249	1.5	110
250 and over	2.0	120

1. The total area for all wall signage shall not exceed the allowable maximum sign area per storefront.
2. The copy area of Awning/Canopy/Marquee signs shall be included in the total area of the allowed wall signage for any individual storefront.
3. One (1) directory wall sign may be located per building entrance or driveway access with frontage on a street or parking area. Maximum area shall be one (1) square foot per tenant with a combined area not to exceed thirty-two (32) square feet. Directory signs shall not require permits if located so as not to be viewed from a public right of way or adjoining premises. If a directory sign can be viewed from a public right of way or adjoining property, the directory sign shall be included in the maximum area allowed for the premises.
4. For the purpose of this section, in the case of multi-tenant buildings, the location of the storefront and its linear measure shall be used to determine distance from abutting street.

**E. DIRECTIONAL SIGNS**

1. The text must be at least sixty-five percent (65%) of the area of the sign.
2. Supplemental Standards for Directional Signs:
  - a. Directional Signs are allowed in addition to other permitted signage on-site.
  - b. A sign permit is required for directional signs that are setback less than fifteen (15) feet from

a property line, or located so as to be visible from a public right-of-way.

- c. Directional signs may be located adjacent to a driveway provided it does not impede lines of sight or visibility.
- d. Directional signs shall conform to the Manual of Uniform Traffic-Control Devices where applicable.

**F. MONUMENT SIGN - ALSO KNOWN AS: GROUND, IDENTIFICATION, DETACHED, FREESTANDING, POLE OR PYLON SIGN**

- 1. Address number(s) must be displayed on each face of the sign so as to be visible from the public way with Arabic numerals or Alphabet letters a minimum of four (4") inches in height. The required address identifier is not considered as part of the total allowable sign area calculation.
- 2. Monument signs shall be located on the property where the businesses exist and no portion of the sign shall be allowed in the public right of way.
- 3. Monument signs shall be located at least the same distance from a sidewalk or roadway as the height of the sign. This shall be known as the "fall zone".
- 4. All monument signs will require stamped engineered plans for signs greater than six (6') in height.
- 5. The Community Development Office may require building, electrical and other permits to insure code compliance for any monument sign.
- 6. Permanent subdivision signs are considered monument signs.

**G. PERMANENT OFF-PREMISE SIGNS**

- 1. Permanent off-premise signs are directional in nature.
- 2. For each off-premise sign, written permission of the land owner must be filed with the applicant's sign permit application.
- 3. No off-premise sign, may be established in any public right-of- way. The purpose of this restriction is to ensure that any type of off-premise sign does not impede pedestrian or vehicle traffic or otherwise create a public safety hazard in any area that is regularly traveled by the public on foot or by vehicle.

**H. PORTABLE, SHORT-TERM TEMPORARY (STT) AND LONG-TERM TEMPORARY (LTT) ON-PREMISE SIGNS**

- 1. An applicant may apply no more than six (6) times in any twelve months for a permit for a STT sign. A permit for a STT sign is valid for thirty (30) days and expires without further action by the Code Administrator. The fee for temporary sign permits is waived.
- 2. An applicant may apply no more than two (2) times in any twelve months for a permit for an LTT sign. A permit for a LTT sign is valid for seven (7) months and expires without further action by the Code Administrator. The fee for LTT sign permits is waived.
- 3. An applicant in a non-residential district may apply to the Zoning Board of Adjustment for a

special exception to be allowed a LTT sign.

4. No STT or LTT signs may be established in any public right-of-way. The purpose of this restriction is to ensure that temporary signs do not impede pedestrian or vehicle traffic or otherwise create a public safety hazard in any area that is regularly traveled by the public on foot or by vehicle.

#### **7.06.9 SIGN REQUIREMENTS BY ZONING DISTRICT**

- A. There are eight (8) zoning districts in the Town of Milford: Residence “A” District, Residence “B” District, Residence “R” District, the Commercial District (“C”), the Industrial District (“I”), the Limited Commercial-Business District (“LCB”), the Integrated Commercial Industrial District (“ICI”) and Integrated Commercial Industrial 2 District (ICI-2) and one Oval Sub-District (“OSD”). The maximum cumulative number and maximum cumulative area of all sign structures permitted for any lot, parcel or business within a zoning district is set forth in following sections.
- B. Any property requiring a site plan approval or subdivision approval shall create a comprehensive sign master plan for the property adhering to the requirements for the various sign types specified in this ordinance.
- C. Please see Section 7.06.9 General Provisions for Sign Types for additional requirements.

#### **D. RESIDENCE “A”, RESIDENCE “B”, and RESIDENCE “R” DISTRICTS**

1. Permitted Sign Types.
  - a. Home Based Business signs not to exceed the allowed signage in Section 7.12.
  - b. Subdivision and Site Plan approved signs.
  - c. Long-Term Temporary (LTT) Off-Premise Signs.
    - i. A permit is required for this sign.
    - ii. Two signs are allowed per site.
    - iii. The area per sign cannot exceed 16 square feet.
  - d. Permanent Off-Premise Signs.
    - i. A permit is required for this sign. The applicant must apply for and receive a special exception from the Zoning Board of Adjustment. The Milford Zoning Board of Adjustment may impose additional conditions or restrictions, as the Board deems appropriate to the public interest.
    - ii. One sign is allowed per site.
    - iii. The area per sign cannot exceed 16 square feet.
    - iv. The maximum height is 8 feet.
  - e. Portable On-Premise Signs.
    - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.

- ii. Two signs are allowed per site
  - iii. The area per sign cannot exceed 6 square feet.
- f. Long-Term On-Premise Signs.
- i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
  - ii. Two signs are allowed per site.
  - iii. The sign area depends on the total acreage of the property where the sign is to be established. For properties consisting of less than five (5) acres of land, the maximum area permitted is six (6) square feet. For properties five (5) acres or larger, the maximum area permitted is six (6) square feet without a permit and sixteen (16) square feet with a permit.

2. Prohibited Sign Types.

- a. Awning Signs, Canopy Signs, Marquee Signs, Projecting and Suspended Signs, Electronic Message Centers, Electronically Activated Changing Signs.

**E. COMMERCIAL, INTEGRATED COMMERCIAL INDUSTRIAL, INTEGRATED COMMERCIAL INDUSTRIAL 2, and INDUSTRIAL DISTRICTS**

1. Permitted Sign Types.

- a. Changeable Signs.
- b. Awning Signs, Canopy Signs, Marquee Signs, Projecting and Suspended Signs.
  - i. A permit is required for this sign.
  - ii. 3 signs are allowed per site.
  - iii. Fifty percent (50%) of the storefront's linear measure or maximum of one hundred (100) square feet, whichever is less.
- c. Walls Signs (Fascia or Façade Signs).
  - i. A permit is required for this sign.
  - ii. Changeable signs are permitted.
  - iii. For storefronts located within fifty (50) feet from the property line of an abutting street a maximum of fifty (50 %) percent of the storefront's linear measure or one hundred (100) square feet, whichever is less shall be allowed.
  - iv. For storefronts located greater than fifty (50) feet from the property line of an abutting street, please see the requirements under 7.06.8.E.
- d. Directional Signs.
  - i. No permit required in permitted district if part of site plan package; otherwise, permit required.
  - ii. The maximum area per sign is four (4) square feet.

- e. Monument Sign, Also Known as Ground, Identification, Detached, Freestanding, Pole or Pylon Sign
    - i. A permit is required for this sign.
    - ii. Only one ground sign per site is allowed.
    - iii. The maximum area permitted is seventy-five (75) square feet.
    - iv. The maximum height is fifteen (15) feet.
  - f. Short-Term Temporary (STT) Off-Premise Signs.
    - i. A permit is required for this sign. The applicant must apply for and receive a special exception from the Zoning Board of Adjustment. The Milford Zoning Board of Adjustment may impose additional conditions or restrictions, as the Board deems appropriate to the public interest.
    - ii. Two signs are allowed per site.
    - iii. The area per sign cannot exceed fifty (50) square feet.
  - g. Permanent Off-Premise Signs.
    - i. A permit is required for this sign.
    - ii. Two signs are allowed per site.
    - iii. The area per sign cannot exceed 16 square feet.
    - iv. The maximum height is 8 feet.
  - h. Portable On-Premise Signs.
    - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
    - ii. Two signs are allowed per site.
    - iii. The area per sign cannot exceed 6 square feet.
  - i. Short-Term On-Premise Signs.
    - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
    - ii. Two signs are allowed per site.
    - iii. The maximum area per sign is fifty (50) square feet.
2. Prohibited Sign Types.
- a. Long-Term Temporary (STT) Off-Premise Signs.
  - b. Long-Term Temporary (STT) On-Premise Signs.

**F. LIMITED COMMERCIAL-BUSINESS DISTRICT**

- 1. Permitted Sign Types.

- a. Awning Signs, Canopy Signs, Marquee Signs, Projecting and Suspended Signs.
  - i. A permit is required for this sign.
  - ii. 2 signs are allowed per site.
  - iii. The maximum area per sign is seventy-five percent (75%) of the storefront's linear measure or maximum of fifty (50) square feet, whichever is less.
- b. Walls Signs (Fascia or Façade Signs).
  - i. A permit is required for this sign.
  - ii. Manually Activated Changeable signs are permitted.
  - iii. The area per storefront for storefronts located within fifty (50) feet from the property line of an abutting street is a maximum of fifty (50 %) percent of the storefront's linear measure or one hundred (100) square feet, whichever is less shall be allowed
  - iv. For storefronts located greater than fifty (50) feet from the property line of an abutting street, please see the requirements under 7.06.8.E.
- c. Directional Signs.
  - i. No permit required in permitted district if part of site plan package; otherwise, permit required.
  - ii. The maximum area per sign is four (4) square feet.
- d. Monument Sign, Also Known as Ground, Identification, Detached, Freestanding, Pole or Pylon Sign.
  - i. A permit is required for this sign.
  - ii. Only one ground sign per site is allowed.
  - iii. The maximum area permitted is thirty-two (32) square feet.
  - iv. The maximum height is ten (10) feet.
  - v. Manually Activated Changeable signs are permitted.
- e. Short-Term Temporary (STT) Off-Premise Signs.
  - i. A permit is required for this sign.
  - ii. Two signs are allowed per site.
  - iii. The area per sign cannot exceed thirty-two (32) square feet.
- f. Permanent Off-Premise Signs.
  - i. A permit is required for this sign. The applicant must apply for and receive a special exception from the Zoning Board of Adjustment. The Milford Zoning Board of Adjustment may impose additional conditions or restrictions, as the Board deems appropriate to the public interest.
  - ii. Two signs are allowed per site.
  - iii. The area per sign cannot exceed 16 square feet.

- iv. The maximum height is 8 feet.
- g. Portable On-Premise Signs.
  - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
  - ii. Two signs are allowed per site
  - iii. The area per sign cannot exceed 6 square feet.
- h. Short-Term On-Premise Signs.
  - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
  - ii. Two signs are allowed per site.
  - iii. The maximum area per sign is thirty-two (32) square feet.
- 2. Prohibited Sign Types.
  - a. Long-Term Temporary (LTT) Off-Premise Signs.
  - b. Long-Term Temporary (LTT) On-Premise Signs.
  - c. Electronic Message Centers.

## **G. OVAL SUBDISTRICT**

- 1. Permitted Sign Types.
  - a. Awning Signs, Canopy Signs, Marquee Signs, Projecting and Suspended Signs.
    - i. A permit is required for this sign.
    - ii. 2 signs are allowed per site.
    - iii. The maximum area per sign is seventy-five percent (75%) of the storefront's linear measure or maximum of fifty (50) square feet, whichever is less.
  - b. Walls Signs (Fascia or Façade Signs).
    - i. A permit is required for this sign.
    - ii. Manually Activated Changeable signs are permitted.
    - iii. The area per storefront for storefronts located within fifty (50) feet from the property line of an abutting street is a maximum of fifty (50%) percent of the storefront's linear measure or one hundred (100) square feet, whichever is less shall be allowed
    - iv. For storefronts located greater than fifty (50) feet from the property line of an abutting street, please see the requirements under 7.06.8.E.
  - c. Directional Signs.
    - i. No permit required in permitted district if part of site plan package; otherwise, permit required.

- ii. The maximum area per sign is four (4) square feet.
  - d. Monument Sign, Also Known as Ground, Identification, Detached, Freestanding, Pole or Pylon Sign.
    - i. A permit is required for this sign.
    - ii. Only one ground sign per site is allowed.
    - iii. The maximum area permitted is thirty-two (32) square feet.
    - iv. The maximum height is ten (10) feet.
    - vi. Manually Activated Changeable signs are permitted.
  - e. Short-Term Temporary (STT) Off-Premise Signs.
    - i. A permit is required for this sign.
    - ii. Two signs are allowed per site.
    - iii. The area per sign cannot exceed sixteen (16) square feet.
  - f. Portable On-Premise Signs.
    - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
    - ii. One sign is allowed per site.
    - iii. The area per sign cannot exceed 6 square feet.
  - g. Short-Term Temporary On-Premise Signs.
    - i. A sign with an area that is equal to or less than six (6) square feet does not require a permit. A sign with an area that is greater than six (6) square feet must have a permit.
    - ii. Two signs are allowed per site.
    - iii. The maximum area per sign is sixteen (16) square feet.
- 2. Prohibited Sign Types
  - a. Long-Term Temporary (LTT) Off-Premise Signs.
  - b. Long-Term Temporary (LTT) On-Premise Signs.
  - c. Permanent Off-PreAmise Signs.
  - d. Electronic Message Centers.

**7.07.0 SENIOR HOUSING DEVELOPMENT (DELETED 2014)**

## **7.08.0 STANDARDS FOR ADULT ENTERTAINMENT BUSINESSES (2000)**

### **A. Purpose**

It is the purpose of this to establish reasonable and uniform regulations to prevent the concentration of adult entertainment businesses within the Town of Milford.

### **B. Intent**

1. It is the intent to promote the health, safety, and general welfare of the citizens of the Town of Milford; and, it is the intent of this that the regulations be utilized to prevent problems of blight and deterioration which accompany and are brought about by the concentration of adult entertainment businesses; and, the provisions of this have neither the purpose nor effect of imposing limitation or restriction on the content of any communicative materials, including sexually oriented materials;
2. It is not the intent nor the effect of this to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market; and, neither is it the intent nor effect of this to condone or legitimize the distribution of obscene materials.

### **C. Allowed locations and Location Restrictions of Adult Entertainment Businesses**

#### **1. Allowed Locations**

Adult entertainment businesses, defined in 7.08.1 are permitted only in the ICI (Integrated Commercial-Industrial District) provided that all other regulations, requirements, and restrictions for the zone in which the adult entertainment business is to be located are met; and no entertainment business shall be permitted within one thousand (1,000) feet of another existing adult entertainment business or one for which a building permit has been applied for; and

#### **2. Location Restrictions**

- a. No adult entertainment business shall be permitted within one thousand (1,000) feet of all other zoning boundaries, except for the Industrial (I) Zone.
- b. No adult entertainment business shall be permitted within one thousand (1,000) feet of any church, place of worship, parish house, convent, public, parochial, or private school, kindergarten, State approved Day Care Center, or Commercial or Not-for Profit Recreational Facilities and no adult entertainment business shall be permitted within one thousand (1,000) feet of the Town boundaries;
- c. No adult entertainment business shall be permitted within five hundred (500) feet of an existing residence; and
- d. No adult entertainment business shall be permitted within one thousand (1,000) feet of another existing adult entertainment business on the date of the passage of this and, no adult entertainment business shall be permitted within a building, premise, structure or other facility that contains a sexually oriented business as defined herein.

#### **3. Measure of Distance**

The distance between any adult entertainment business and a church, school, residence, etc. or another adult entertainment business shall be measured in a straight line, from property boundary to property boundary, without regard to intervening structures.

#### 4. Additional Reasonable Regulations

The Planning Board is empowered hereunder to review and approve permit applications for adult entertainment businesses and impose reasonable restrictions for buffering, outdoor lighting, parking, adequate ingress and egress from the site off of and onto public roads, pedestrian movement, hours of operation, and to provide for appropriate landscaping and building aesthetics as required in the Town of Milford Development Regulations.

### 7.08.1 DEFINITIONS

Except where specifically defined or otherwise referenced within this Ordinance, words and terms used are intended to imply their customary definition and meaning. The following words and terms are specifically defined as follows:

**Adult bookstore or adult video store** - A commercial establishment that devotes more than fifteen (15) percent of the total display, shelf, rack, wall, table, stand or floor area, utilized for the display and sale of the following items listed in a) and b) below. The establishment, as one of the principal business purposes, offers for sale or rental for any form of consideration, any one or more of the following:

- A. Books, magazines, periodicals, or other printed matter, or photographs, films, motion pictures, video cassettes, video productions, slides, tapes, records, CD-ROMs or other forms of visual or audio representations which depict or describe “specified sexual activities” or “specified anatomical areas” or meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1; or,
- B. Instruments, devices or paraphernalia which are designed for use in connections with “sexual conduct” as defined in NH RSA 571-B:1, other than birth control devices. A commercial establishment may have other principal business purposes that do not involve the offering for sale or rental of material depicting or describing “specified sexual conduct or activities” and still be categorized as “Adult Video/Book Store”. Such other business purposes will not serve to exempt such commercial establishments from being categorized as an “Adult Video/Book Store” so long as one of its principal business purposes is offering for sale or rental for consideration to specified material which depict or describe specified sexual conduct or activities or specified anatomical areas.
  - 1. Specified sexual conduct or activities means that the male genitals in a state of sexual arousal and/or the vulva or more intimate parts of the female genitals.
  - 2. Specified anatomical areas means and includes any of the following:
    - a. The fondling or other erotic touching of the human genitals, pubic region, buttocks, anus, or female breasts;

- b. Sex acts, normal or perverted, actual or simulated, including intercourse, or copulation, or sodomy;
- c. Masturbation, actual or simulated; or
- d. Excretory function as part of or in connection with any of the activities set forth in a) through c) above.

An adult bookstore or adult video store does not include an establishment that sells books or periodicals as an incidental or accessory part of its principal stock and trade and does not devote more than fifteen (15) percent of the total display area of the establishment to the sale of books and periodicals.

**Adult cabaret:** A nightclub, bar, restaurant or similar establishment which during a substantial portion of the total presentation time features live performances which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1, and/or feature films, motion pictures, video cassettes, slides or other photographic reproductions, a substantial portion of the total presentation time of which is devoted to showing of material which meets the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1.

**Adult drive-in theater:** An open lot or part thereof, with appurtenant facilities, devoted primarily to the presentation of motion pictures, films, theatrical productions and other forms of visual productions, for any form of consideration to persons in motor vehicles or on outdoor seats, in which a substantial portion of the total presentation time being presented for observation by patrons is devoted to the showing of material which meets the definition of “harmful to minors” and/or “sexual conduct as set forth in NH RSA 571-B:1.

**Adult entertainment business:** means an Adult Bookstore or Adult Video Store, Adult Cabaret, Adult Drive-In Theater, Adult Motel, Adult Motion Picture Arcade, Adult Motion Picture Theater, Adult Theater, Nude Model Studio or Sexual Encounter Center.

**Adult motel:** A motel or similar establishment offering public accommodations of any form of consideration which provides patrons with closed circuit television transmissions, films, motion pictures, video cassettes, slides or photographic reproductions, a substantial portion of the total presentation time of which are distinguished or characterized by an emphasis upon the depiction or description of materials which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1.

**Adult motion picture arcade:** Any place to which the public is permitted or invited wherein coin or slug-operated or electronically, electrically or mechanically controlled still or motion picture machines, projectors, or other image-producing devices are maintained to show images to five (5) or fewer persons per machine at any one time, in which a substantial portion of the total presentation of the images so displayed is devoted to the showing of material which meets the definition of “harmful to minors” and/or “sexual conduct” , as set forth in NH RSA 571-B:1.

**Adult motion picture theater:** An establishment with a capacity of five (5) or more persons, where for any form of consideration, films, motion pictures, video cassettes, slides or similar photographic reproductions are shown, and in which a substantial portion of the total presentation time is devoted to the showing of material which meets the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1.

**Adult theater:** A theater, concert hall, auditorium or similar establishment either indoor or outdoor in nature, which for any form of consideration, regularly features live performances, a substantial portion of the total presentation time of which are distinguished or characterized by an emphasis on activities which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1.

**Nude model studio:** A place where a person who appears in the state of nudity or displays male genitals in a state of arousal and/or the vulva or more intimate parts of the female genitals and is observed, sketched, drawn, painted, sculptured, photographed, or similarly depicted by other persons who pay money or any form of consideration or such display is characterized by an emphasis on activities which meets the definition of “harmful to minors” and/or “sexual conduct” as set forth in NH RSA 571-B:1.

**Nudity or a state of nudity:** The appearance of a human bare buttock, anus, male genitals, female genitals, or full female breast.

**Semi-nude:** A state of dress in which clothing covers no more than genitals, pubic region and areola of the female breast, as well as portions of the body supporting straps or devices.

**Sexual encounter center:** A business or commercial enterprise that as one of its primary business purposes offers for any form of consideration:

- a. Physical contact in the form of wrestling or tumbling between persons of the opposite sex; or
- b. Activities between male and female persons and/or persons of the same sex when one or more persons are in the state of nudity; or
- c. Where the activities in a. or b. is characterized by an emphasis on activities which meets the definition of “harmful to minors” and/or “sexual conduct”, as set forth in NH RSA 571-B:1

## 7.09.0 TELECOMMUNICATION FACILITIES (2013)

### A. Purpose and Intent

The regulation of telecommunications facilities is important to minimize visual and environmental impacts and assure all new facilities are consistent with the goals and identity of the Town of Milford. It is the express purpose of this Section to preserve the scenic, historical and cultural values of the Town, balance economic growth and enhance the ability of providers of telecommunications services to offer such services to the community effectively and efficiently. Carriers shall be allowed to locate telecommunications facilities within the Town provided they are consistent with the appropriate land use regulations that will ensure compatibility with the natural and built features and character of the Town. Compatibility with these features are measured based on the change in community scale and character in relation to the height, mass, materials, contrasts, or proportion within the surroundings of a proposed telecommunications facility.

The intent of this ordinance is to implement the following goals and objectives throughout the Town of Milford, while conforming to federal, state and local laws and regulations:

- Facilitate the provision of wireless telecommunication services to the residents and businesses of Milford;
- Provide for the appropriate location and development of telecommunications facilities;
- Minimize adverse visual and environmental effects of towers and antennas through careful design and siting standards;
- Encourage co-location whenever possible; and
- Minimize economic impacts on adjacent property values.

### B. Applicability

The terms of this Section and the Development Regulations shall apply to telecommunications facilities (hereinafter "facility(ies)") on property owned by the Town of Milford, on privately owned property, and on property that is owned by any governmental entity that acts in its proprietary capacity to lease such property to a carrier.

## 7.09.1 DEFINITIONS

For the purpose of this Article, the following terms shall have the meaning given herein:

**Antenna:** The surface from which wireless radio signals are sent and/or received by a telecommunications facility.

**Antenna array:** A collection of antennas attached to a mount to send and receive radio signals.

**Average tree canopy height:** An average height found by inventorying the height at above-ground level (AGL) of all trees over twenty (20) feet in height for a defined area.

**Camouflaged:** A telecommunications facility that is disguised, hidden, part of an existing or proposed structure, or placed within an existing or proposed structure.

**Carrier:** A Company that provides telecommunications services. Also sometimes referred to as a provider.

**Co-location:** The use of a single mount on the ground by more than one carrier (vertical co-location) or the same carrier with multiple licenses, and/or the use of several mounts on an existing building or structure by more than one carrier or the same carrier with multiple licenses.

**Environmental assessment (EA):** An EA is a document required by the Federal Communications Commission (FCC) and the National Environmental Policy Act (NEPA) when a telecommunications facility is placed in certain designated areas.

**Equipment shelter:** An enclosed structure, cabinet, shed, vault, or box near the base of the mount within which are housed equipment for telecommunications facilities such as batteries and electrical equipment. Equipment shelters are sometimes referred to as base transceiver stations.

**Facility:** See Telecommunications Facility

**Fall zone:** The area on the ground from the base of a ground mounted telecommunications facility that forms a circle with a diameter equal to the height of the facility, including any antennas or other appurtenances. The fall zone is the area within the area defined by the circle, which there is a potential hazard from falling debris (such as ice) or collapsing material.

**Guyed tower:** A monopole or lattice tower that is secured to the ground or other surface by diagonal cables for lateral support.

**Height:** The height above ground level (AGL) from the natural grade of a site to the highest point of a structure.

**Lattice tower:** A type of mount with multiple legs and structural cross bracing between the legs, that is self-supporting and freestanding.

**Mast:** A thin pole that resembles a streetlight standard or a telephone pole. A dual-polarized antenna is typically deployed on a mast.

**Monopole:** A thicker type of mount than a mast that is self-supporting with a single shaft of wood, steel or concrete, or other material that is designed for the placement of antennas and arrays along the shaft.

**Mount:** The structure or surface upon which antennas are mounted, including the following four types of mounts:

1. Roof-mounted (mounted on the roof of a building)
2. Side-mounted (mounted on the side of a building)
3. Ground-mounted (mounted on the ground)
4. Structure-mounted (mounted on a structure other than a building)

**Radio frequency (rf) engineer:** An engineer specializing in electrical or microwave engineering, especially the study of radio frequencies.

**Radio frequency radiation (rfd):** The emissions from telecommunications facilities.

**Shot Clock:** Federal Communications Commission (FCC) ruling for a “reasonable period of time” to process wireless applications.

- 90 days for co-location request
- 150 days for new siting applications

**Security barrier:** A wall, fence, or berm that restricts an area from unauthorized entry or trespass.

**Separation:** The distance between one carrier's array of antennas and another carrier's array.

**Telecommunications facility:** A facility for the provision of personal wireless services as defined by the Telecommunications Act of 1996, as amended. Telecommunications facilities include a mount, antenna, equipment shelter, and other related equipment. Telecommunications facilities do not include private or non-commercial wireless communication facilities such as amateur ham radio and citizen band radio.

**Telecommunications services:** The three types of services regulated by this Section are: Commercial mobile radio services, unlicensed wireless services and common carrier wireless exchange access services as described in the Telecommunications Act of 1996, as amended.

### **7.09.2 DISTRICT & FEDERAL REGULATIONS**

- A. Federal Requirements - All facilities shall meet or exceed current standards and regulations of the Federal Aviation Administration (FAA), Federal Communications Commission (FCC) (as per Telecommunications Act of 1996), and any other agency of the federal government with the authority to regulate such facilities.
- B. Location - Telecommunications facilities shall be permitted in all zoning districts in accordance with this ordinance. Applicants seeking approval for these facilities shall first evaluate existing structures for their siting. Only after finding that there are no suitable existing structures pursuant to Section 7.09.2:C herein, shall a provider propose a new ground-mounted facility.
- C. Existing Structures: Policy - When available, telecommunications facilities shall be located on existing structures, including but not limited to buildings, water towers, existing telecommunications facilities, utility poles or towers, and related facilities, provided that such installation preserves the character and integrity of those structures.
- D. Existing Structures: Burden of Proof - The applicant shall have the burden of proving that there are no existing structures which are suitable to locate its telecommunications facility and/or transmit or receive radio signals. To meet that burden, the applicant shall take all the following actions to the extent possible:
  - 1. The applicant shall submit to the Planning Board a list of all contacts made with owners of potential sites regarding the availability of potential space for a telecommunications facility. If the Planning Board informs the applicant that additional existing structures may be satisfactory, the applicant shall contact the property owner(s) of those structures.
  - 2. The applicant shall provide copies of all letters of inquiry made to owners of existing structures, letters of rejection if received, and proof of certified mailing. If letters of rejection are not provided, at a minimum, unanswered "Return Receipt Requested" forms from the U.S. Post Office shall be provided for each owner of existing structures that was contacted.
  - 3. If the applicant claims that a structure is not capable of physically supporting a telecommunications facility, this claim shall be certified by a licensed professional engineer. The certification shall, at a minimum, explain the structural issues and demonstrate that the structure cannot be modified to support the telecommunications facility without unreasonable costs. The estimated cost shall be provided to the Planning Board.
- E. Ground-mounted Facilities: Policy - New ground-mounted facilities are permitted but only when the use of existing structures and buildings are found to not be feasible. If the applicant demonstrates that it is not feasible to locate on an existing structure, ground-mounted telecommunications

facilities shall be designed so as to be camouflaged to the greatest extent possible, including but not limited to: use of compatible building materials and colors, screening, landscaping and placement within trees.

### **7.09.3 USE REGULATIONS**

A telecommunications facility may require site plan review as noted below, and a building permit in all cases, and may be permitted as follows:

- A. Existing Tower Structures - Subject to the issuance of a building permit that includes site plan approval by the Planning Board, which review shall include, but not be limited to issues relating to access, bonding, and security for removal, structural integrity and appropriate camouflage of such siting. Carriers may locate a telecommunications facility on any guyed tower, lattice tower, mast, or monopole in existence prior to the adoption of this Section, or on any facility previously approved under the provisions of this Section so long as the co-location complies with the approved site plan. All the Performance Standards from this Section shall be met. This provision shall apply only so long as the height of the mount is not increased, a security barrier already exists, and the area of the security barrier is not increased. Otherwise, site plan review is required.
- B. Reconstruction of Existing Tower Structures - An existing guyed tower, lattice tower, monopole, or mast in existence prior to the adoption of this Section may be reconstructed with a maximum twenty (20) foot increase in height so as to maximize co-location so long as the standards of this Section are met and so long as this twenty (20) foot increase in height does not cause a facility previously existing at less than two-hundred (200) feet to exceed two-hundred (200) feet in height. The mount shall be replaced with a similar mount that does not significantly increase the visual impact on the community. Site plan review is required.
- C. Existing Structures - Subject to the provisions of this Section and site plan review under NH RSA 674:43:III and except as otherwise permitted under Section 7.09.3:A, a carrier may locate a telecommunications facility on an existing structure, building, utility tower or pole, or water tower. For the purpose of this section, new structures that are conforming to all other district zoning requirements shall be considered as existing structures.
- D. Ground-mounted Facility - A telecommunications facility involving construction of a ground-mount shall require site plan review and be subject to the provisions of this Section.

### **7.09.4 DIMENSIONAL REQUIREMENTS**

- A. All telecommunications facilities erected, constructed, located, replaced, altered, or extended within the Town shall comply with the following dimensional requirements:
  - 1. Height Maximum - In no case shall a telecommunications facility exceed two-hundred (200) feet in height, unless the mount for the facility was greater than two-hundred (200) feet in height prior to the adoption of this Article.
  - 2. Height, Existing Structures and Utility Poles - Carriers that locate new telecommunications facilities on water towers, electric transmission and distribution towers, utility poles and similar existing utility structures, guyed towers, lattice towers, masts, and monopoles may be permitted to increase the height of those structures no more than twenty (20) feet, or forty (40) feet at the discretion of the Planning Board, if the additional height will not materially impair the visual impacts of the site. This increase in height shall only be permitted once for each structure.
  - 3. Height, Ground-Mounted Facilities – New ground-mounted telecommunications facilities shall not project higher than twenty (20) feet above the average tree canopy height within a one-

hundred fifty (150) foot radius of the mount, security barrier, or designated clear area for access to equipment, whichever is greatest.

4. Setbacks - In addition to compliance with the minimum zoning district setback requirements, ground-mounted telecommunications facilities shall be set back, at a minimum, the distance equal to the fall zone, as defined in Section 7.09.1 and 7.09.4:A.5. Fences necessary for the facility shall comply with the setback provisions of the zoning district in which the facility is located if the fence is six (6) feet or more in height.
  5. Fall Zone for Ground-Mounts - In order to ensure public safety, the minimum distance from the base of any ground-mount of a telecommunications facility to any property line, public road, habitable dwelling, business or institutional use, or public recreational area shall be, at a minimum, the distance equal to the fall zone, as defined in this Section. The fall zone may cross property lines, so long as the applicant secures a fall zone easement from the affected property owner(s). The area of the easement shall be shown on all applicable plans submitted to the Town, and the terms of the easement shall be provided as part of the Site Plan review. Easements shall be recorded at the Hillsborough County Registry of Deeds.
  6. Fall Zone for Non-Ground Mounts - In the event that an existing structure is proposed as a mount for a telecommunications facility, a fall zone shall not be required, but the setback provisions of the zoning district shall apply. In the case of pre-existing non-conforming structures, telecommunications facilities and their equipment shelters shall not increase any non-conformities.
- B. Planning Board Flexibility: Heights - In reviewing a site plan application for a telecommunications facility, the height limit imposed may be increased by the Planning Board by approval of a conditional use permit as defined in section 7.11.0. The Planning Board may permit an increase in the height of a ground-mounted facility up to forty (40) feet above the average tree canopy height, if no material increase in visual or environmental impacts will result from the increased height. The visual and environmental criteria of this Section and the Development Regulations shall be the guidelines in making this determination.

#### **7.09.5 PERFORMANCE AND DESIGN STANDARDS**

##### **A. Visibility:**

1. Visual impacts are measured on the basis of:
  - a. Change in community scale, as exhibited in relative height, mass or proportion of the telecommunications facility within their proposed surroundings
  - b. New visible elements proposed on a contrasting background
  - c. Different colors and textures proposed against a contrasting background
  - d. Use of materials that are foreign to the existing built environment
2. Enhancements are measured on the basis of:
  - a. Conservation of opportunities to maintain community scale, e.g. buffering areas and low-lying buildings should not be compromised to as to start a trend away from the existing community scale
  - b. Amount and type of landscaping and/or natural vegetation
  - c. Preservation of view corridors, vistas, and view sheds

- d. Continuation of existing colors, textures and materials
3. Visibility focuses on:
  - a. Eliminating or mitigating visual impact
  - b. Protecting, continuing, and enhancing the existing environment
4. Camouflage for Facilities on Existing Buildings or Structures - Roof Mounts when a telecommunications facility extends above the roof height of a building on which it is mounted, every effort shall be made to conceal or camouflage the facility within or behind existing or new architectural features to limit its visibility from public ways. Facilities mounted on a roof shall be stepped back from the front facade in order to limit their impact on the building's silhouette.
5. Camouflage for Facilities on Existing Buildings or Structures - Side Mounts - Telecommunications facilities, which are side-mounted, shall blend with the existing building's architecture and, if individual antenna panels are over five (5) square feet, the panels shall be painted or shielded with material consistent with the design features and materials of the building.
6. Camouflage for Ground-Mounted Facilities - All ground-mounted telecommunications facilities shall be surrounded by a buffer of dense tree growth, primarily of coniferous or evergreen trees, that extends continuously for a minimum distance of one hundred-fifty (150) feet from the mount, security barrier, or designated clear area for access to equipment, whichever is greatest, and screens views of the facility in all directions. These trees shall be existing on the subject property, planted on site, or be within a landscape easement on an adjoining site. The Planning Board shall have the authority to decrease, relocate, or alter the required buffer based on site conditions. The one-hundred and fifty (150) foot vegetative buffer area shall be protected by a landscape easement or be within the area of the carrier's lease. The easement or lease shall specify that the trees are dead or dying and present a hazard to persons or property.
7. Color - To the extent that any telecommunications facilities extend above the height of the vegetation immediately surrounding it, they shall be of a color, which blends with the background or surroundings.
8. Equipment Shelters - Equipment shelters for telecommunications facilities shall be designed consistent with one of the following design standards:
  - a. Equipment shelters shall be located in underground vaults; or
  - b. Equipment shelters shall be designed so that the shelters are architecturally consistent, with respect to materials and appearance, to the buildings in the area of the telecommunications facilities; or
  - c. Equipment shelters shall be camouflaged behind an effective year-round landscape buffer, equal to the height of the proposed building, and/or wooden fence. The Planning Board shall determine the style of fencing and/or landscape buffer that is compatible with the neighborhood; or
  - d. If mounted on a rooftop, the equipment shelter shall be concealed or camouflaged so that the shelter either is not visible at grade or appears to be a part of the original structure.
9. Lighting, Signage and Security

- a. Lighting:
  - a. Facility Lighting- The mounts of telecommunications facilities shall be lighted only if required by the Federal Aviation Administration (FAA).
  - b. Site Lighting- If required, all on site lighting shall be shielded from abutting properties. Foot-candle measurements at the property line shall be 0.0 initial foot candles.
- b. Signage - Signs shall be limited to those needed to identify the property and the owner and warn of any danger. All signs shall comply with the requirements of the Milford Zoning Ordinance.
- c. Security Barrier - The Planning Board shall have final authority on whether a ground mounted telecommunications facility should be surrounded by a security barrier.

#### 10. Historic Buildings

- a. Any telecommunications facility located on or within a historic structure shall not alter the character-defining features, distinctive construction methods, or original historic materials of the building.
- b. Any alteration made to a historic structure to accommodate a telecommunications facility shall be fully reversible.
- c. Telecommunications facilities authorized by this subsection shall be concealed within or behind existing architectural features, or shall be located so that they are not visible from public roads and viewing areas.

11. Scenic Landscapes and Vistas - Ground-mounted facilities shall not be located within open areas that are clearly visible from public roads, recreational areas, or abutting properties. All ground-mounted telecommunications facilities shall be surrounded by a buffer of dense tree growth as per Section 7.09.5:A.6.

12. Driveways - If available, existing entrances and driveways to serve a telecommunications facility shall be utilized, unless the applicant can demonstrate that a new entrance and driveway will result in less visual, traffic and environmental impact. New driveways to serve a telecommunications facility shall not exceed twelve (12) feet in width. A gravel or crushed stone surface is encouraged.

13. Antenna Types - Any antenna array placed upon an existing or proposed ground mount, utility pole, or transmission line mount shall have a diameter of no more than four (4) feet, exclusive of the diameter of the mount. A larger diameter antenna array may be permitted after a finding by the Planning Board that the visual impacts of a larger antenna array are negligible.

14. Ground and Roof Mounts - All ground mounts shall be of a mast type mount. Lattice towers, guyed towers, and roof mounted monopoles are expressly prohibited, unless constructed as part of a reconstruction project permitted under Section 7.09.3:B.

15. Hazardous Waste - No hazardous waste shall be discharged on the site of any telecommunications facility. If any hazardous materials are to be used on site, there shall be provisions for full containment of such materials. An enclosed containment area shall be provided with a sealed floor, designed to contain at least one hundred and ten (110) percent of the volume of the hazardous materials stored or used on the site.

16. Noise - Telecommunications facilities shall not generate noise in excess of that permitted by Town Ordinance.
17. Radio frequency Radiation (RFR) Standards - All equipment proposed for a telecommunications facility shall be fully compliant with the FCC Guidelines for Evaluating the Environmental Effects of Radio frequency (FCC Guidelines), under *Report and Order*, FCC 96-326, published on August 1, 1996, and all subsequent amendments.

#### **7.09.6 MONITORING AND MAINTENANCE**

- A. Maintenance - The owner of the facility shall maintain the telecommunications facility in good condition. Such maintenance shall include, but shall not be limited to, painting, structural integrity of the mount and security barrier, and maintenance of the buffer areas and landscaping.
- B. Monitoring - As part of the issuance of the site plan approval or building permit, the property owner shall agree that the Town of Milford may enter the subject property to obtain RFR measurements and noise measurements at the expense of the carrier. The Town shall provide reasonable written notice to the carrier and landowner and provide them the opportunity to accompany the Town representatives when the measurements are conducted.
- C. Security for Removal - Recognizing the hazardous situation presented by abandoned and unmonitored telecommunications facilities, all owners of telecommunications facilities shall obtain and maintain a bond or other approved form of security, in an amount set forth by the Planning Board, that represents the cost for removal and disposal of abandoned telecommunications facilities in the event that a facility is abandoned and the facility owner is unwilling or unable to remove the facility in accordance with Section 7.09.8.

The amount of security shall be based upon the removal cost, plus fifteen percent (15%), be provided by the property owner, and the amounts certified by a professional structural engineer licensed in New Hampshire. The owner of the facility shall provide the Planning Board with a revised removal cost estimate and structural evaluation prepared by a professional structural engineer licensed in New Hampshire every five (5) years from the date of the Planning Board approval of the site plan. If the cost has increased more than fifteen percent (15%), then the property owner shall provide additional security in the amount of the increase.

#### **7.09.7 PROCEDURAL REQUIREMENTS**

- A. Application Process - All wireless telecommunications equipment installations and wireless telecommunications site developments, except as provided elsewhere, are subject to review and Site Plan Approval by the Planning Board. The Planning Board shall act upon the application in accordance with 5.03 and 5.04 Submittal Requirements of the Milford Development Regulations and RSA 676:4 as amended. In addition to the following items:
  1. An inventory of existing towers that are within the jurisdiction of the Town and those within two miles of the border thereof, including specific information about the location, height, design of each tower, as well as economic and technological feasibility for the co-location on the inventoried towers. The Planning Board may share such information with other applicants applying for approvals or conditional use permits under this section or other organizations

seeking to locate antennas within the jurisdiction of the Town, provided, however, that the Planning Board is not, by sharing such information, in any way representing or warranting that such sites are available or suitable.

2. If the applicant is proposing to build a new tower, the applicant shall submit written evidence demonstrating that no existing structure can accommodate the applicant's proposed antenna in accordance with Section 7.09.2:D.
- B. Review Process - Planning Board Approval and Town Building Permit Required: Non-residential and non-amateur telecommunications facilities may be located within the Town of Milford, subject to Planning Board approval and issuance of a building permit. Modifications to an existing installation shall also be subject to Planning Board approval. Construction or modification of an approved facility shall not begin or continue without a valid building permit issued.
- C. All applications shall be assessed for a basic completeness review within 30 days of receipt of the application. Incomplete applications will not be reviewed by the Planning Board. If an application passes this basic completeness review, it should be date stamped to establish the date when it was filled. If the Board or staff determines additional information is needed to evaluate the application, any request for additional information must be submitted within thirty (30) days of the filing date. The Board shall approve, approve with conditions, or deny the application within 90 days (co-location applications) or 150 days (siting applications) of the filing date in accordance with FCC standards.

#### **7.09.8 ABANDONMENT OR DISCONTINUATION OF USE**

- A. Notification - At such time that a carrier plans to abandon or discontinue operation of a telecommunications facility, the owner of the facility shall notify the Town by certified U.S. mail of the proposed date of abandonment or discontinuation of operations. Such notice shall be given no less than sixty (60) days prior to abandonment or discontinuation of operations. In the event that a carrier fails to give such notice, the telecommunications facility shall be considered abandoned upon such discontinuation of operations.
- B. Removal - Any telecommunications facility that is declared abandoned shall be considered hazardous to the public health and safety. Upon abandonment or discontinuation of use, the owner shall physically remove the abandoned structure and restore the site to its natural appearance within ninety (90) days from the date of abandonment or discontinuation of use. "Physically remove" shall include, but not be limited to:
1. Removal of antennas, mount, equipment shelters and security barriers from the subject property.
  2. Proper disposal of the waste materials from the site in accordance with local and state solid waste disposal regulations.
  3. Restoring the location of the telecommunications facility to its natural condition, except that any landscaping and grading shall remain in the after-condition.
- C. Failure to Remove - If the owner of the facility does not remove the facility upon the Order of the Zoning Administrator, then the Board of Selectmen shall, after holding a public hearing with notice to the owner of the facility, the property owner, and abutters, issue a Declaration of Abandonment.

The owner of the facility shall dismantle and remove the facility within ninety (90) days of receipt of the Declaration of Abandonment by the Board of Selectmen. If the abandoned facility is not removed within ninety (90) days, the Town may execute the security bond to pay for this action.

## 7.10.0 SMALL WIND ENERGY SYSTEMS

### 7.10.1 AUTHORITY

This Ordinance is established pursuant to The State of New Hampshire RSA 674:62-66, as amended and the purposes outlined in NH RSA 672:I-IIIa. All references in this Ordinance will refer to State of New Hampshire RSAs.

### 7.10.2 PURPOSE AND INTENT

It is the purpose of this Section to protect the public's health, safety and welfare and promote the safe, effective and efficient use of small wind energy systems to reduce the on-site consumption of utility supplied electricity. This Ordinance intends to permit the location of these systems within the Town of Milford consistent with the master plan, and the Ordinances and regulations of the Town.

### 7.10.3 APPLICABILITY

The terms of this Section shall apply to small wind energy systems (hereinafter "system(s)") on property owned by the Town of Milford, on privately owned property, and on property that is owned by any governmental entity that acts in its proprietary capacity to lease such property.

### 7.10.4 DEFINITIONS

For the purpose of this Article, the following terms shall have the meaning given herein:

**Meteorological tower (met tower):** Includes the tower, base plate, anchors, guy wires and hardware, anemometers (wind speed indicators), wind direction vanes, booms to hold equipment for anemometers and vanes, data loggers, instrument wiring and any telemetry devices that are used to monitor or transmit wind speed and wind flow characteristics over a period of time for either instantaneous wind information or to characterize the wind resource at a given location. For the purpose of this Ordinance, met towers shall refer only to those whose purpose are to analyze the environmental factors needed to assess the potential to install, construct or erect a small wind energy system.

**Modification:** Any change to the small wind energy system that materially alters the size, type, output or location of the small wind energy system. Like-kind replacements shall not be construed to be a modification.

**Net metering:** The difference between the electricity supplied to a customer over the electric distribution system and the electricity generated by the customer's small wind energy system that is fed back into the electric distribution system over a billing period.

**Power grid:** The transmission system, managed by ISO New England, created to balance the supply and demand of electricity for consumers in New England.

**Shadow flicker:** The visible flicker effect when rotating blades of the wind generator cast shadows on the ground and nearby structures causing a repeating pattern of light and shadow.

**Small wind energy system:** A wind energy conversion system consisting of a wind turbine, a generator, a tower and associated control or conversion electronics, which has a rated capacity of 100 kilowatts or less and will be used primarily for onsite consumption.

**System height:** The vertical distance from ground level to the tip of the wind generator blade when it is at its highest point.

**Tower:** The monopole, guyed monopole or lattice structure that supports a wind generator.

**Tower height:** The height above grade of the fixed portion of the tower, excluding the wind generator. 

**Wind generator:** Blades and associated mechanical and electrical conversion components mounted on top of the tower whose purpose is to convert kinetic energy of the wind into rotational energy used to generate electricity.

### 7.10.5 DISTRICT REGULATIONS

Small wind energy systems are permitted by the granting of a conditional use permit and a building permit in all zoning districts.

### 7.10.6 PROCEDURE FOR REVIEW

A. Conditional Use Permit – Small wind energy systems and met towers require Planning Board approval of a conditional use permit (see section 7.11.0).

1. Application – Applications submitted to the Planning Department shall conform to the minor site plan regulations and shall contain the following information:
  - a. Property lines and physical dimensions of the applicant's property.
  - b. Location, dimensions and types of existing major structures on the property.
  - c. Location of the proposed small wind energy system, foundations, guy anchors and associated equipment.
  - d. Setback requirements as outlined in this Ordinance.
  - e. The right-of-way of any public road that is contiguous with the property.
  - f. Any overhead utility lines.
  - g. Small wind energy system specifications including rotor diameter, tower height, tower type and nameplate generation capacity.
  - h. Sound level analysis prepared by the wind generator manufacturer or qualified engineer.
  - i. List of abutters to the applicant's property.

B. Abutter and Regional Notification – In accordance with the site plan regulations all small wind energy system conditional use permit applications shall be heard at an abutter notified public hearing where the Planning Board will make a determination on potential Regional Impact in accordance with NH RSA 36:54-58.

C. Building Permit – Once a conditional use permit has been approved the applicant shall submit and be granted approval for a building permit prior to a small wind energy system being erected, constructed or installed. A building permit shall be required for any physical modifications to an existing small wind energy system. Met towers that receive a building permit shall be permitted on a temporary basis not to exceed three (3) years from the date the building permit was issued.

1. Application – Applications submitted to the Building Department shall contain the following information:
  - a. Planning Board approved conditional use permit minor site plan
  - b. Tower foundation blueprints or drawings with New Hampshire engineering approval.
  - c. Tower blueprints or drawings with New Hampshire engineering approval.
  - d. Small wind energy systems specifications including manufacturer, model, rotor diameter, tower height, tower type, nameplate generation capacity.
  - e. Small wind energy systems that will be connected to the power grid shall include a copy of the application for interconnection with their electric utility provider.
  - f. Sound level analysis prepared by the wind generator manufacturer or qualified engineer.
  - g. Electrical components in sufficient detail to allow for a determination that a manner of installation conforms to most current adopted Electrical Code.
  - h. Evidence of compliance or non-applicability with Federal Aviation Administration requirements.
2. All Planning Department information will be available to the Building Department to aid the permitting process.

**7.10.7 STANDARDS**

- A. The Planning Board shall evaluate the application for compliance with the following standards:
1. Setbacks – The setback shall be calculated by multiplying the minimum setback requirement number by the system height and measured from the center of the tower base to property line, public roads or nearest point on the foundations of an occupied building.
    - a. Small wind energy systems must meet all setbacks for principal structures for the zoning district in which the system is located.
    - b. Guy wires used to support the tower are exempt from the small wind energy system setback requirements.

Minimum Setback Requirements			
Occupied Buildings on Participating Landowner Property	Occupied Buildings on Abutting Property	Property Lines of Abutting Property and Utility Lines	Public Roads
0	1.5	1.1	1.5

**Table 7.10- 1**

2. Tower – The maximum tower height shall be restricted to thirty-five (35') feet above the tree canopy within three hundred (300') feet of the small wind energy system. In no situation shall the tower exceed 150 feet.
3. Sound level – The small wind energy system shall not exceed 60 decibels using the A scale (dBA), as measured at the site property line, except during short-term events such as severe wind storms and utility outages.
4. Shadow flicker – Small wind energy systems shall be sited in a manner that does not result in significant shadow flicker impacts. Significant shadow flicker is defined as more than thirty (30) hours per year on abutting occupied buildings. The applicant has the burden of proving that the shadow flicker will not have significant impact on neighboring or adjacent uses. Potential shadow flicker will be addressed either through siting or mitigation measures.
5. Signs – All signs, including flags, streamers and decorative items, both temporary and permanent, are prohibited on small wind energy systems, except for manufacturer identification or appropriate warning signs.
6. Visual Impacts – It is inherent that small wind energy systems may pose some visual impacts due to the tower height needed to access wind resources. The purpose of this section is to reduce the visual impacts without restricting the owner's access to the optimal wind resources on the property.
  - a. The applicant shall demonstrate through project site planning and proposed mitigation that the small wind energy system's visual impacts will be minimized for surrounding neighbors and the community. This may include, but not be limited to information regarding site selection, wind generator design or appearance, buffering, and screening of ground mounted electrical and control equipment. All electrical conduits shall be underground, except when the financial costs are prohibitive, to be determined by the Planning Board.
  - b. The color of the small wind energy system shall either be stock color from the manufacturer or painted with a non-reflective, unobtrusive color that blends in with the surrounding environment. Approved colors include, but are not limited to, white, off-white or gray.
  - c. A small wind energy system shall not be artificially lit unless such lighting is required by the Federal Aviation Administration (FAA). If lighting is required, the applicant shall provide a copy of the FAA determination to establish the required markings and/or lights for the small wind energy system.
7. Approved wind generators – The manufacturer and model of the wind generator to be used in the proposed small wind energy system must have been approved by the California Energy Commission or the New York State Energy Research and Development Authority, or a similar list approved by the State of New Hampshire, if available.
8. Utility Connection – If the proposed small wind energy system is to be connected to the power grid through net metering, it shall adhere to NH RSA 362-A: 9.

9. Access – The tower shall be designed and installed so as not to provide step bolts or a ladder readily accessible to the public for a minimum height of eight (8') feet above the ground. All ground-mounted electrical and control equipment shall be labeled and secured to prevent unauthorized access.
  10. Clearing – Clearing of natural vegetation shall be limited to that which is necessary for the construction, operation and maintenance of the small wind energy system and as otherwise prescribed by applicable laws, regulations and Ordinances.
- B. In addition to the above listed items the Building Inspector will also evaluate a Building Permit application for the following items:
1. Code Compliance – The small wind energy system shall comply with all applicable sections of the New Hampshire State Building Code and any other applicable State and Federal regulations.
  2. Aviation – The small wind energy system shall be built to comply with all applicable Federal Aviation Administration regulations including, but not limited to, 14 C.F.R. part 77, subpart B regarding installations close to airports and the New Hampshire Aviation regulations including, but not limited to, NH RSA 422-b and NH RSA 424.

#### **7.10.8 MAINTENANCE AND MONITORING**

- A. Maintenance - The owner of the system shall maintain the small wind energy system in good condition.
- B. Monitoring - As part of the issuance of the building permit, the property owner shall agree that the Town of Milford may enter the subject property to obtain noise measurements, if required, at the expense of the owner. The Town shall provide reasonable written notice to the owner and provide them the opportunity to accompany the Town representatives when the measurements are conducted.

#### **7.10.9 ABANDONMENT OR DISCONTINUATION OF USE**

- A. At such time that a small wind energy system is scheduled to be abandoned or discontinued, the applicant will notify the building inspector by certified U.S. mail of the proposed date of abandonment or discontinuation of operations.
- B. Upon abandonment or discontinuation of use, the owner shall physically remove the small wind energy system within ninety (90) days of receipt of the notice of abandonment or discontinuation of use. This period may be extended at the request of the owner and at the discretion of the building inspector. "Physically remove" shall include, but not be limited to:
1. Removal of the wind generator and tower and related above-grade structures.
  2. Proper disposal of the waste materials from the site in accordance with local and state solid waste disposal regulations.

3. Restoration of the location of the small wind energy system to its natural condition, except that any landscaping, grading or below grade foundation may remain in its same condition at initiation of abandonment.
- C. In the event that an applicant fails to give such notice, the small wind energy system shall be considered abandoned or discontinued if the system is out of service for a continuous twelve (12) month period. After the twelve (12) months of inoperability, the building inspector may issue a Notice of Abandonment to the owner of the small wind energy system. The owner shall have the right to respond to the Notice of Abandonment within thirty (30) days from the Notice receipt date. After review of the information provided by the owner, the building inspector shall determine if the small wind energy system has been abandoned. If it is determined that the small wind energy system has not been abandoned the building inspector shall withdraw the Notice of Abandonment and notify the owner of the withdrawal.
- D. If the owner fails to respond to the Notice of Abandonment or if, after the review by the building inspector, it is determined that the small wind energy system has been abandoned or discontinued, the owner of the small wind energy system shall remove the wind generator and tower at the owner's sole expense within ninety (90) days of receipt of the Notice of Abandonment. If the owner fails to physically remove the small wind energy system after the Notice of Abandonment procedure, the building inspector may pursue legal action to have the small wind energy system removed at the owner's expense.

#### **7.10.10 VIOLATION**

It is unlawful for any person to construct, install or operate a small wind energy system that is not in compliance with this Ordinance. Small wind energy systems installed prior to adoption of this Ordinance are exempt from this Ordinance except or until such time as modifications are proposed to the small wind energy system.

#### **7.10.11 PENALTIES**

Any person who fails to comply with any provision of this Ordinance or a building permit issued pursuant to this Ordinance shall be subject to enforcement and penalties as allowed by NH Revised Statutes Annotated Chapter 676:17.

#### **7.10.12 SEVERABILITY**

If any section, phrase, sentence or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

## 7.11.0 SOLAR COLLECTION SYSTEMS

### 7.11.1 Authority

This solar collection system ordinance is enacted in accordance with RSA 674:17(l)(j) and the purposes outlined in RSA 672:1-III-a as amended.

### 7.11.2 Purpose and Intent

The purpose of this ordinance is to accommodate solar energy collection systems and distributed generation resources in appropriate locations, while protecting the public's health, safety and welfare, and the environment. The Town intends to facilitate the State and National goals of developing clean, safe, renewable energy resources in accordance with the enumerated polices of NH RSA 374-G and 362-F that include national security and economic and environmental sustainability.

### 7.11.3 Definitions

**Agriculture Solar - Accessory:** Any ground-mounted or roof-mounted solar collection system designed to primarily reduce on-site consumption of utility power and without a limit to the rated nameplate capacity or solar land coverage provided the existing agricultural use is preserved at the time of installation.

**Agriculture Solar - Primary:** Any ground-mounted solar collection system that is partially used to reduce on-site consumption of utility power and with a rated nameplate capacity up to 1 MW AC in size or has a solar land coverage in excess of 5 acres provided the existing agricultural use is preserved at the time of installation.

**Carport Mount:** Any solar collection system of any size that is installed on the roof structure of a carport over a parking area.

**Commercial Solar:** A use of land that consists of one or more free-standing, ground-mounted solar collection systems with a rated nameplate capacity of up to 1 MW AC and that is less than 5 acres in solar land coverage.

**Community Solar:** A use of land that consists of one or more free-standing, ground-mounted solar collection systems regardless of nameplate capacity that is up to 100 kW AC and that is less than 1 acre of solar land coverage.

**Ground Mount:** A solar collection system and associated mounting hardware that is affixed to or placed upon (such as ballasted systems) the ground including but not limited to fixed, passive or active tracking racking systems.

**Industrial Solar:** A use of land that consists of one or more free-standing, ground-mounted solar collection systems regardless of nameplate capacity that is between 25 acres and 50 acres in solar land coverage.

**Large Commercial Solar:** A use of land that consists of one or more free-standing, ground-mounted solar collection systems with a rated nameplate capacity of between 1 MW and 5 MW that is between 5 and 25 acres in solar land coverage.

**Rated Nameplate Capacity:** Maximum rated alternating current ("AC") output of solar collection

system based on the design output of the solar system.

**Residential Solar:** Any ground-mounted or roof-mounted solar collection system primarily for on-site residential use, and consisting of one or more free-standing, ground or roof-mounted, solar arrays or modules, or solar related equipment, intended to primarily reduce on-site consumption of utility power and with a rated nameplate capacity of 10 kW AC or less and that is less than 500 square feet solar land coverage.

**Roof Mount:** A solar collection system that is structurally mounted to the roof of a building or other permitted structure, including limited accessory equipment associated with a system which may be ground-mounted. For purposes of calculating array sizes or solar land coverage under the solar definitions in this section, roof-mounted portions shall not be included if the system is made up of both roof and ground-mounted systems, the roof-mounted portions shall also be excluded.

**Solar Array:** A grouping of multiple solar modules with purpose of harvesting solar energy.

**Solar Cell:** The smallest basic solar electric device which generates electricity when exposed to light.

**Solar Collection System:** Includes all equipment required to harvest solar energy to generate electricity. The Solar Collection System includes storage devices, power conditioning equipment, transfer equipment, and parts related to the functioning of those items. Solar Collection Systems include only equipment up to (but not including) the stage that connection is made to the utility grid or site service point.

**Solar Glare:** The potential for solar panels to reflect sunlight, with an intensity sufficient to cause annoyance, discomfort, or loss in visual performance and visibility.

**Solar Land Coverage:** Defined exclusively for the purposes of calculating the footprint of the land area occupied by the components of a solar array. The Solar Land Coverage is the land area that encompasses all components of the solar collection system including, but not limited to mounting equipment, panels and ancillary components of the system. This definition does not include access roads or fencing and is not to be interpreted as a measurement of impervious surface as it may be defined in this ordinance.

**Solar Module:** A grouping of solar cells with the purpose of harvesting solar energy.

**Solar Power Generation Station:** Any solar collection system that is over 30 MW in nameplate capacity. In no case shall a Solar Power Generation Station exceed 150 acres.

**Utility Solar:** A use of land that consists of one or more free-standing, ground-mounted solar collection systems regardless of nameplate capacity that is over 50 acres in solar land coverage and less than 30 MW in rated nameplate capacity.

### 7.11.4 District Regulations

#### A. Table of Uses:

	<b>Zoning District</b>				
	<b>Residential R</b>	<b>Residential A, B</b>	<b>Commercial / Limited Commercial</b>	<b>ICI</b>	<b>ICI2 / Industrial</b>
<b>Residential Solar</b>	P	P	P	P	P
<b>Community Solar</b>	P	X	P	P	P
<b>Accessory Agricultural Solar</b>	P	X	P	P	P
<b>Primary Agricultural Solar</b>	CUP	X	P	P	P
<b>Commercial Solar</b>	CUP	X	X	CUP	CUP
<b>Large Commercial Solar</b>	CUP	X	X	CUP	CUP
<b>Industrial Solar</b>	X	X	X	CUP	CUP
<b>Utility Solar</b>	X	X	X	X	CUP
<b>Solar Power Generation Station</b>	X	X	X	X	CUP

- P = Use permitted by right with building and electrical permit.
- CUP = Use permitted by Conditional Use Permit.
- X = Use prohibited.

#### B. Specific Solar System Requirements and Exemptions:

1. A ground-mounted Accessory Residential Solar system over 15 feet in height at any point shall be located in rear yard between the primary structure and rear lot line. All other ground-mounted systems located in the front yard shall be reasonably screened from abutting residential properties.
2. Non-residential Carport Mounted solar collection systems over parking areas are permitted in all zones without a Conditional Use Permit. A site plan review shall be required in accordance with

the Town Development Regulations.

3. Roof-mounted solar collection systems of any size are permitted in all zones without a Conditional Use Permit except within the Oval District Overlay.
4. Municipal Systems: All solar collection systems for municipal use are exempt from land use regulations pursuant to NH RSA 674:54.

C. Additional Provisions Regarding Solar Collection Systems:

1. Building Height: Roof-mounted solar collection systems shall be exempt from building height limitations.
2. Solar Land Coverage: Ground-mounted solar collection systems shall not exceed 70% of the total lot area. The ground-mounted solar collection system shall not be considered impervious surface. Impervious surface limitations as related to stormwater management for solar collection systems shall be addressed in accordance with this Ordinance and the Milford Stormwater Management And Erosion Control Regulations.

### **7.11.5 Solar Collection Systems Conditional Use Permits**

A. Permit Required: No solar collection system, except as authorized by Section 7.11.4 shall be erected, constructed, installed or modified without first receiving a Conditional Use Permit (CUP) from the Planning Board pursuant to Section 7.14.0. The CUP shall clearly set forth all conditions of approval and shall list all plans, drawings and other submittals that are part of the approved use.

B. Application and Review Procedure:

1. An Application for a Conditional Use shall be initiated by filing with the Planning Board for an application for a Conditional Use Permit.
2. The applicant shall follow the requirements for specific uses as laid out in this Ordinance. The applicant shall submit an application in accordance with the Minor Site Plan development regulations and shall include the following:

a. System Layout.

- i. A detailed sketch or plan showing the installation area of the site.
- ii. A detailed sketch of any land clearing or grading required for the installation and operation of the system.
- iii. The location of all equipment to be installed on site including utility connection point(s) and equipment. To the maximum extent practical all wiring associated with the utility connection shall be underground.
- iv. All equipment locations, except for utility connections, shall comply with required setbacks.

b. Equipment Specification.

- i. All proposed equipment or specifications must be included with the application.
- ii. Such information can be supplied via manufacturer's specifications or through detailed

description.

3. Applicable Site Plan Review Regulations. The specific requirements for a Conditional Use Permit shall pre-empt any similar requirement in the Development Regulations.

C. Standards of Review:

Following a fully noticed public hearing on the proposed use, the Planning Board may issue a Conditional Use Permit, if it finds, based on the information and testimony submitted with respect to the application, that:

1. The use is specifically authorized by Section 7.11.4 as a conditional use.
2. The development in its proposed location will comply with Section 7.14.0 and with all applicable requirements of the Development Regulations not otherwise covered in this section.
3. The use will not materially endanger the public health or safety;
4. Required screening and visual mitigation shall be maintained during the operative lifetime of the Solar Collection System Conditional Use Permit.
5. In granting a conditional use permit pursuant to this section, the Planning Board may impose any reasonable conditions or restrictions deemed necessary to carry out the intended purpose of this ordinance.

### 7.11.6 Standards

A. The Planning Board shall evaluate the application for compliance with the following standards:

1. Setbacks.

Solar collection systems shall be considered structures and shall comply with dimensional setback requirements from lot lines for the entire system – including the panels. Tracking systems shall have the setback measured from the point and time where the array is closest to the lot line. No portion of a system may cross into the setback.

2. Natural Resource Impacts and Buffers.

- a. Solar collection systems shall be visually screened through the preservation of existing vegetation or through a landscaped buffer in accordance with the following:

- i. Plan: The buffering plan shall indicate the location, height and spacing of existing vegetation to be preserved and areas where new planting will be required.
- ii. All solar collection systems shall have a reasonable visual buffer as required in the Development Regulations from public ways and neighboring commercial/residential uses based on the viewsheds, contours of the land, and abutting land uses.
- iii. Areas that are within the view shed of significant value as identified in the Master Plan shall include additional reasonable mechanisms to mitigate a continuous and uninterrupted view of the system.

- b. Fencing shall be installed, if required, by the electric code or the utility. Additional security or fencing may be required if the location of the system presents a safety concern for abutting

land uses.

- c. Primary Agriculture Solar should minimize impacts to farmland activities and Prime Farmland Soils (as defined and delineated by soil survey and definition of NH NRCS). Dual use arrangements (solar and farming activities are encouraged where practical).
- d. Land Clearing.
  - i. Land clearing shall be limited to what is necessary for the installation and operation of the system and to insure sufficient all-season access to the solar resource given the topography of the land.
  - ii. Following construction, cleared land areas must be restored with native species that are consistent with the use of the site as a solar collection system (such as slow growth or low ground cover).
  - iii. Erosion control measures during construction shall be detailed as required by the Milford Development Regulations and the Town's Stormwater Management and Erosion Control Ordinance.
- e. Additional Requirements for Industrial, Utility, and Solar Power Generation Station (I/U/SPGS) Solar:
  - i. A detailed pre-construction and post-construction plan identifying existing vegetation and areas to be cleared with specific identification of locations of buffer areas adjacent to neighboring uses and public ways.
  - ii. The Planning Board, with input from the Conservation Commission, may require the applicant to submit an 'Environmental Study' in accordance with the Milford Development Regulations, Section 5.011 Environmental Study. Efforts and practices that can provide for a dual use of the site should be explored if feasible and encouraged where appropriate.
  - iii. The applicant shall demonstrate effective stormwater infiltration along with erosion control measures and soil stabilization.

### 3. Buffer Plan.

As deemed appropriate, all applications shall submit a detailed buffering plan demonstrating how the proposed ground-mounted solar installation will be incorporated into the local landscape so that effective screening is provided along public ways and from abutting views. The use of existing or created topography is encouraged to reduce visual impacts.

### 4. Stormwater.

- a. Stormwater and Erosion Control Permits
  - i. Ground-mounted systems that are required to obtain a New Hampshire Department of Environmental Services (NH DES) Alteration of Terrain (AoT) Permit in accordance with NH RSA 485:17 shall secure such permit accordingly.
  - ii. A Municipal Stormwater Permit and Stormwater Management and Erosion Control Plan (SWMP) shall be provided when required by and in conformance with the requirements of the Town of Milford's Stormwater Management and Erosion Control Regulation.

- iii. The final Permits issued by NH DES and Town shall be incorporated by reference into the final Town approval and shall be enforceable by the Town in accordance with this zoning ordinance.
  - b. The stormwater management plan shall include the following.
    - i. The stormwater study shall take into account the nature of the solar panel installation and how the spacing, slope and row separate can enhance infiltration of stormwater. Percolation tests or site specific soil information may be provided to demonstrate recharge can be achieved without engineered solutions.
    - ii. Additional information, if required, shall calculate potential for concentrated flows of runoff due to the panels, slope, soil type and the impacts of other regulated impervious areas (such as equipment pads and roadways).
  - c. Required for all systems:
    - i. All ground-mounted systems shall be constructed in accordance with Best Management Practices for erosion and sedimentation control during the pre-construction, construction and post- construction restoration period.
    - ii. Post construction: For purposes of enhancing natural stormwater management, site conditions and plantings post-construction shall insure that areas of soil compaction have been restored to natural conditions. Plantings shall be native species and are recommended to beneficial habitat to song birds, pollinators and/or foraging species in order to maintain a healthy surface and subsurface habitat that can attenuate stormwater on the site.
- 5. Emergency Response.
  - a. Access to the site for emergency response shall be provided and detailed on the plan.
  - b. A narrative or manual for municipal Fire Department detailing response guidance and disconnection locations necessary for fire response.
  - c. Additional industry guidance documents that provide information about safety procedures for specific equipment on site shall be provided as needed to insure adequate public safety.
  - d. Contact information for the solar collection system owner/operator shall be posted on site at the access way and provided and updated to the municipality.
- 6. Glare.
  - a. A statement detailing potential significant glare onto abutting structures and roadways estimating the interaction of sun to panel angle, time of year and visibility locations.
  - b. Based on the above information, the Planning Board may require reasonable mitigation. Mitigation may include angle of panels, details on the anti-reflective nature of the panel coating or any additional specific screening to minimize resulting impacts.
  - c. Mitigation through anti-reflective coatings shall have an index of refraction equal to or less than 1.30.
- 7. Noise.

- a. Estimates of any equipment noise on the site based on equipment specification materials (such as inverters).
- b. Noise levels at the property line shall be in accordance with the Town noise ordinance or at reasonable levels given the location of the facility with due consideration to the surrounding land uses and zone.

8. Lighting.

- a. On site lighting shall be minimal and limited to access and safety requirements only.
- b. All lighting shall be downcast and shielded from abutting properties.

B. General Requirements.

1. All Solar Collection Systems shall conform to applicable state and federal laws and regulations and local ordinances, including the State Building Code, the State Electrical Code and the State Fire Code.
2. All systems not connected to the grid shall be approved by the electrical inspector or Building Inspector, as required.
3. Transmission Lines Underground: All power transmission lines from a Ground-mounted Solar Energy System to any building or other structure shall be located underground and/or in accordance with the State Building Code or Electrical Code, as appropriate.
4. Grid-tied systems shall file a copy of a final approved interconnection with the municipality prior to operation of the system.
5. All roof-mounted and ground-mounted Solar Collection System require permits.
  - a. Electrical permits are required.
  - b. Plumbing permits may be required.
  - c. Building permits may be required.
  - d. Engineer stamped letter certifying that the roof can accommodate the load may be required.

**7.11.7 Abatement and Decommissioning/Removal**

Solar Collection Systems shall be deemed to be abandoned if operations have discontinued for more than 6 months without written consent of the Town (such as for reasons beyond the control of the owner/operator). An abandoned system shall be removed and the site restored within 6 months of abandonment.

**7.11.8 Violation**

It is unlawful for any person to construct, install or operate a Solar Collection System that is not in compliance with this Ordinance. Solar Collection Systems installed prior to adoption of this Ordinance are exempt from this Ordinance except or until such time as modifications are proposed to the Solar Collection System. If the owner fails to remove the abandoned Solar Collection System within the 6 months, the Town may pursue a legal action to have the system removed at the owner's expense.

### **7.11.9 Penalties**

Any person who fails to comply with any provision of this Ordinance or a building permit issued pursuant to this Ordinance shall be subject to enforcement and penalties as allowed by NH Revised Statutes Annotated Chapter 676:17.

### **7.11.10 Severability**

If any section, phrase, sentence or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

## **7.12.0 HOME BASED BUSINESS (2019)**

### **7.12.1 General Provisions**

There are four (4) categories of Home Based Businesses: Home Offices, Home Occupations, Home Businesses, and Home Industries. All categories are subject to the requirements listed below, in addition to the specific criteria contained herein for each individual category of use.

### **7.12.2 Administration of Permits**

- A. Each level of Home Based Business is permitted based on the criteria of the process stipulated in each section.
- B. Any approvals issued hereunder shall automatically terminate when the applicant moves the business, closes the business or no longer resides in the dwelling unit.
- C. Prior to commencement of a Home Based Business, the resident shall make application for a permit to the Community Development Office. The following criteria shall apply:
  - 1. A Certificate of Compliance shall be issued based on the level of approval required for the Home Based Business (administrative approval, Special Exception, Conditional Use Permit);
  - 2. Prior to the issuance of the Certificate of Compliance, the Code Officer will inspect the site to insure that any conditions required for operation of the Home Based Business have been met;
  - 3. The resident business owner shall submit to a Code Compliance Inspection once every three years. In the event that a Home Based Business is found to no longer be in compliance with the original approval, the resident business owner shall either seek additional approvals for the level of Home Based Business in operation relocate the business/operations to a suitable location in the appropriate district for that use.

### **7.12.3 Standard Applicable To All Home Based Businesses**

- A. The Home Based Business must be clearly incidental and secondary to the primary use of the premises as a residence.
- B. The Home Based Business must not change the character of the premises or surrounding neighborhood. There shall be no window displays or other features not normally associated with residential use.
- C. Parking that is necessary for all employed residents, employees, and customers must be accommodated off-street, and new parking areas must be screened from the view of abutters and from public ways (streets or pedestrian ways) utilizing plantings, fencing, and/or topography. When possible, parking areas shall be located at the side or rear of the residence or accessory buildings.
- D. Proof of compliance with all applicable federal, state, and/or local environmental controls is required, as well as any other applicable local zoning regulations.
- E. When the business use will necessitate the construction of new buildings, building additions, or

parking areas, the applicant shall seek a Conditional Use Permit from the Planning Board in conformance with Article 7.11.0 of the Milford Zoning Ordinance.

#### **7.12.4 Home Office**

A business that is operated solely by the resident(s) business owner(s) with no additional employees. All business operations shall be conducted by mail or electronic communication and involve no traffic to or from the property by customers, clients or deliveries, and no signage. Home offices are permitted in all districts and no permit or registration is required.

#### **7.12.5 Home Occupation**

An accessory business type use located and conducted so that the average neighbor, under normal circumstances, would not be aware of its existence. Types of occupations that would qualify for a Home Occupation Permit might include but are not limited to – tradespeople, artists, tutors, tailors, accountants, lawyers, engineers, realtors, healing practitioners, architects, IT professionals, not-for-profit organizations, bakers, and candy makers. Agriculture and Farming related activities, as defined in NH RSA 21:34-a as amended, are not considered a Home Occupation. Home Occupations are permitted in Residential A, B, R, ICI and IND districts.

##### **A. Administrative Review and Approval.**

The following criteria must be met for a Home Occupation Permit to be issued by the Community Development Office. A Home Occupation permit must be renewed every 3 years:

1. Location - The Home Occupation shall be conducted entirely within the dwelling or accessory structure.
2. Signs - A sign of not more than four (4) square feet is allowed and shall not advertise in such a way that would encourage customers or salespersons to come to the property without an appointment.
3. Employees - Only residents as employees, personnel or volunteers may be affiliated with the Home Occupation.
4. Area - There shall be not more than five hundred (500) square feet dedicated to the Home Occupation on any property.
5. Vehicles - Only one (1) branded vehicle to be used by the owner of the Home Occupation shall be kept onsite.
6. Traffic - There shall be not more than five (5) clients or deliveries per day.

#### **7.12.6 Home Business**

A Home Based Business involving the creation, provision, or sale of services and/or goods to and from the property. Businesses that qualify for a HOME BUSINESS include but are not limited to – tradespeople, artists, tutors, tailors, accountants, lawyers, engineers, realtors, healing practitioners, architects, IT professionals, not-for-profit organizations, bakers, and candy makers, single chair beauty/barber shops, small repair shops, groomers, family day care homes as defined herein. Home

Businesses are permitted in Residential A, B and R districts under the following criteria:

- A. **Special Exception Approval:** The following criteria must be met for a Special Exception for a Home Business to be issued by the Zoning Board of Adjustment.
1. Location - The Home Business shall be conducted entirely within the dwelling or accessory structure.
  2. Signs - a sign of not more than six (6) square feet is allowed and shall not advertise in such a way that would encourage customers or salespersons to come to the property without an appointment.
  3. Employees - There shall be no more than two (2) non-resident employees of the Home Business.
  4. Area - The Home Business shall not be more than 25% of the combined floor area of all structures on the property.
  5. Sales - Retail sales of goods incidental to Home Business are allowed.
  6. Traffic - There shall be not more than sixteen (16) clients or deliveries per day.
  7. Vehicles - There shall be no parking of or deliveries by vehicles with more than two (2) axles. Only one (1) commercial vehicle may be parked on the property in conjunction with the Home Business.
  8. Hours of Operation- A Home Business shall not be conducted in a way that is perceptible in external effects (such as but not limited to noise, odors, traffic) from beyond the lot line between the hours of 9:00 p.m. and 7:30 a.m. This time limit shall also apply to any loading or unloading of vehicles on the property or on a street that causes noise to adjoining residents.
  9. Hazardous Substances - The use shall not involve the storage or use of hazardous, flammable or explosive substances, other than types and amounts commonly found in a dwelling. The use shall not involve the use or storage of toxic substances.

#### **7.12.7 Home Industry**

A Home Based Business that has a manufacturing component and/or may involve the storage of equipment and materials outside. Businesses that qualify for a Home Industry include but are not limited to – brewers, landscapers, contractors where storage or manufacturing is included and other building trade professionals. Home Industries are permitted in Residential-R districts once a Conditional Use Permit has been issued by the Planning Board under the following criteria:

- A. **Conditional Use Permit:** In addition to the standards and conditions stated in Section 7.14.0 of the Milford Zoning Ordinance, the following criteria must be met for a Conditional Use Permit to be issued by the Planning Board.
1. No more than six (6) people, including the resident(s), may be employed on the premises.

2. The Home Industry may be conducted in part outdoors, but all such activities, equipment, and storage shall be permanently screened from the view of abutters and from public ways by buffers such as year round vegetation, fences, and/or topography.
3. No more than one quarter (25%) of the lot area, exclusive of areas covered by buildings, shall be used for the Home Industry, including outdoor storage or parking.
4. The Planning Board must determine that access to the premises by all vehicles that are anticipated to commonly serve the use will do so without adversely affecting safety in the vicinity, whether those vehicles are based on the premises or elsewhere.
5. Commercial vehicles may be permitted provided that the vehicles do not adversely affect the character of the neighborhood, as determined by the Planning Board.
6. Hours of Operation- A Home Industry shall be conducted in a way to minimize the external effects (such as but not limited to noise, odors, traffic) on abutting properties. The hours of operation shall be determined through the site plan review process.
7. Hazardous Substances - The use shall not involve the storage or use of hazardous, flammable or explosive substances, other than types and amounts commonly found in a dwelling. The use shall not involve the use or storage of toxic substances.

#### 7.12.8 Home Based Business Table of Uses

HOME BASED BUSINESS Type	Zones	Permit	Employees	Signs	Area	Sales	Traffic	Vehicles	Hours
Home Office	All	No	No	No	N/A	No	No	No	N/A
Home Occupation	Res A, B, R, ICI, IND	Admin Review	Resident	4 sq. ft.	500 sq ft inside only	Incidental only	5 clients/ deliveries per day	1 branded	N/A
Home Business	Res A, B, R	Special Exception	2 non-resident	6 sq ft	25% GFA, inside only	Incidental only	16 clients/ deliveries	1 commercial	7:30am to 9PM
Home Industry	Res R	Conditional Use	6 total employed on premise or per approval	Inside and out	25% of lot minus buildings	no	Per approval	Per approval	Per approval

## **7.13.0 SELF-STORAGE FACILITIES (2019)**

### **7.13.1 PURPOSE**

Self-Storage Facilities have characteristics in common with both commercial uses and industrial uses. This subsection provides regulations to appropriately site Self-Storage Facilities in Milford while maintaining the desired character of the community compatible with higher quality commercial development and existing neighborhoods.

### **7.13.2 District Regulations**

Self-Service Storage Facilities are permitted in the Integrated Commercial-Industrial, Integrated Commercial-Industrial 2 and Industrial Zoning Districts by the granting of a conditional use permit by the Planning Board.

### **7.13.3 CONDITIONAL USE PERMIT**

In addition to the standards and conditions stated in Section 7.14.0 of the Milford Zoning Ordinance, the following criteria must be met for a Conditional Use Permit to be issued by the Planning Board.

- A. Granting of the application would meet some public need or convenience.
- B. The property in question is reasonably suited for the use requested.
- C. There must be appropriate provision for access facilities adequate for the estimated traffic from public streets and sidewalks, so as to assure public safety and to avoid traffic congestion.
- D. The building design and layout is compatible with the surrounding properties.
- E. Landscaping and screening shall provide adequate visual mitigation to abutting properties.

### **7.13.4 STANDARDS**

- A. The Planning Board shall evaluate the application for compliance with the following standards:
  - 1. The use of the premises shall be limited to storage only, and shall not be used to manufacture, fabricate, or process goods; service or repair vehicles or boats, trailers, small engines or electrical equipment, or to conduct similar repair activities
  - 2. No auctions, garage sales or retail sales of any kind, with the exception of the property owner liquidating abandoned contents of a storage unit, shall be allowed on site.
  - 3. No commercial or industrial activity other than that which pertains to the operation and maintenance of the facility shall be allowed on the site.
  - 4. An individual self-service storage unit or private postal boxes within a self-service storage facility shall not be considered premises for the purpose of assigning a legal or business address.
  - 5. Electrical service to storage units shall be for lighting and climate control only. No electrical outlets are permitted inside individual storage units. Lighting fixtures and switches shall be of a secure design that will not allow tapping the fixtures for other purposes;

6. Exterior light fixtures shall comply with Section 6.06 of the Milford Development Regulations.
7. If the facility abuts residentially zoned property, the facility loading bays, docks or doors shall have appropriate permanent visual mitigation to as to not be visible from the residential property or from public rights-of-way;
8. In order to promote visual compatibility with commercial development allowed in commercial and industrial zones, Self-Storage Facility buildings shall incorporate appropriate landscaping/screening and architectural design features, such as: massing; proportion; facade modulation; exterior building materials and detailing; varied roofline; pedestrian scale; etc.
9. All outdoor storage of merchandise or commodities (including motor vehicles) shall be screened from any lot which is in a residence district by a strip at least four (4) feet wide, densely planted with shrubs or trees which are of a type that may be expected to form a year-round dense screen at least six (6) feet high within three (3) years, or by an opaque wall, barrier or uniform fence at least six (6) feet high above finished grade. Such screening shall be maintained in good condition at all times. Such screening or barrier may be interrupted by normal entrances or exits, and shall have no signs hung or attached thereto other than those permitted in the district. As a part of the Site Plan approval, the Planning Board may require additional screening beyond that set forth in Section 6.08 of the Milford Development Regulations if it determines that additional Screening is necessary or appropriate.
10. Self-storage facilities shall utilize building materials and architectural features which fit into the context of the surrounding properties.
11. Except as provided herein, all property stored on the premises shall be entirely within an enclosed building. Open storage of recreation vehicles, boats and storage pods is permitted, subject to the following:
  - a. Storage shall occur only in a designated area which is clearly delineated for open storage.
  - b. Such areas shall not exceed 10 percent of the lot or parcel area.
  - c. Such areas shall be screened from view from property zoned for detached single family residential use and public property, including the public right-of-way.
  - d. Storage shall not occur in required parking spaces, drives, parking lanes nor within required building setback areas.
  - e. No vehicle maintenance, washing or repair shall be permitted.
12. Vehicle and trailer rental may be permitted on the premises as an accessory use by the Self-Storage Facility owner, subject to review and approval as part of Site Plan Approval. Rental vehicles shall not be parked in required parking spaces, drives or parking lanes.

## **7.14.0 CONDITIONAL USE PERMITS**

### **7.14.1 GENERAL**

Conditional Use Permits as herein provided for shall be deemed to be permitted uses in their respective zones, subject to the satisfaction of the requirements and standards set forth herein, in addition to all other requirements and standards of this Ordinance. All such cases are hereby declared to possess characteristics of such unique and special form that each specific use shall be considered as an individual case. The applicant shall bear the burden of persuasion, through the introduction of sufficient evidence through testimony or otherwise, that the development, if completed as proposed, will comply with this Article and will satisfy the specific requirements for the use contained in the Ordinance.

### **7.14.2 PLANNING BOARD TO ADMINISTER**

Wherever a conditional use permit is authorized by this Ordinance, the authority to administer or grant conditional use permits shall be vested in the Planning Board.

### **7.14.3 STANDARDS APPLICABLE TO ALL CONDITIONAL USE PERMITS**

#### **A. Conditions for Conditional Use Permits**

Before the Planning Board considers the approval of an application for a Conditional Use Permit, the applicant shall prove to the satisfaction of the Planning Board that all the following conditions have been met:

1. That the property in question is in conformance with the dimensional requirements of the zone or is determined to be legally non-conforming and that the proposed use is consistent with the Milford Master Plan.
2. That the proposal meets the purposes of the Ordinance under which the application is proposed.
3. That there will be no significant adverse impacts resulting from the proposed use upon the public health, safety and general welfare of the neighborhood and the Town of Milford.
4. That the proposed use will not be more objectionable to nearby properties by reason of noise, fumes, vibration, or inappropriate lighting than any use of the property permitted under the existing Zoning District Ordinances.
5. That the proposed use will not adversely affect the ground water resource of Milford, in particular the Groundwater Protection District areas as defined in Section 6.01.0 of this Ordinance.

#### **B. The applicant shall follow the requirements for specific uses as laid out in this Ordinance and submit an application in accordance with the Minor Site Plan regulations.**

#### **C. Conditions of Approval**

1. The Planning Board may attach such conditions to its approval as are reasonable, necessary and appropriate.
2. All Conditional Use Permit uses are hereby declared to have special characteristics that shall be considered on a case-by-case basis.

D. Limits on a Conditional Use Permit

1. Substantial construction must commence within one (1) year of the Planning Board approval of the Conditional Use Permit.
2. If construction is not commenced within this period, prior to expiration, the applicant may apply at a regular Planning Board meeting for one, six-month extension to allow time to commence construction. The approval of this extension shall be at the Board's discretion.

**7.14.4 BUILDING PERMITS FOR CONDITIONAL USE PERMITS**

A building permit for a Conditional Use Permit shall not be issued by the Board of Selectmen or their duly appointed representative, the Administrative official, until so directed by the Planning Board who shall first be satisfied that all the standards and conditions of this section and the Ordinance have been met.

**7.14.5 WAIVERS**

The Planning Board may grant a waiver from a specific section of the Conditional Use Permit in a special case when:

- A. The strict application would result in peculiar and exceptional practical difficulties or exceptional and undue hardship upon the owner of the affected property; or
- B. An alternative design approach which meets the purpose of the Ordinance equally well or better than compliance with the existing standards and conditions.

In either of the forgoing circumstances, the waiver may be granted so that justice may be done and the public interest secured, provided that such waiver will not have the effect of nullifying the intent and purposes of this section, the Zoning Ordinance, Development Regulations or the Master Plan.

The Planning Board shall approve or disapprove waivers based upon the evidence presented to it in each specific case.

## **ARTICLE VIII: ADMINISTRATION**

### **8.01.0 ENFORCEMENT (2012)**

This Ordinance shall be enforced by the Board of Selectmen, and the Board of Selectmen is hereby given power and authority to enforce the provisions of this Ordinance. The Board of Selectmen is further empowered to confer upon an administrative official appointed by the Board of Selectmen the duty of administering the provisions of this Ordinance in accordance with RSA 676:17 (as amended) or as otherwise authorized by RSA. A copy of RSA 676:17 is included in appendix.

### **8.02.0 BUILDING PERMITS**

**8.02.1** No building or dwelling shall be constructed nor shall any structural alteration or enlargement of any existing building or dwelling or the placement of a mobile home for use as a dwelling be commenced until a permit shall have been obtained from the Board of Selectmen or their duly authorized representative.

**8.02.2** The Board of Selectmen or their authorized representative may require of any applicant for a permit such sketches, drawings, plot plans, or other material as may be deemed necessary by the Board in connection with the issuance of the permit.

**8.02.3** If an applicant for a permit requests a permit to undertake an activity on a lot not conforming in size and frontage as otherwise required by this Ordinance, such applicant shall file as part of his application the date of the recording and register of deeds volume and page number of the lot involved.

**8.02.4** The State of New Hampshire Building Code pursuant to NH RSA 155-A more appropriately titled *The International Codes*, including adopted Appendix Chapters and amendments, shall govern and regulate the construction, alteration, movement, enlargement, replacement, repair, equipment, location, removal and demolition of all detached one and two family dwellings, multiple single-family dwellings (townhouses), multiple family dwellings and all other commercial and industrial buildings in the Town of Milford, said Codes also provides for the issuance of permits and collection of fees. (2009)

**8.02.5** A building permit is not required for the construction of an accessory structure that is two hundred (200) sq. ft. or less and does not have electricity or plumbing. A building permit is required for the construction of an accessory structure greater than two hundred (200) sq. ft. or an accessory structure of any size that has electricity or plumbing. A building permit is also required for the addition of electricity or plumbing to any existing accessory structure. (2017)

### **8.03.0 CERTIFICATE OF OCCUPANCY**

Any subdivision approved subsequent to March 11, 1986 which requires road system layout and construction, shall have provided in accordance with the Town Road Standards the base coat of surface pavement, which shall be subject to approval by the Department of Public Works and the Planning Board, prior to the issuance of any Certificate of Occupancy for any structure whose lot frontage would include any part of such proposed road system. Private ways shall be considered exempt from this requirement.

#### **8.04.0 DRIVEWAY ENTRANCE PERMIT (2008)**

A driveway entrance permit is required from the Milford Department of Public Works for any construction of any new or alteration of any existing driveway, entrance, exit or approach within the limits of the right of way of any town road. This permit shall be required for new impervious surfaces over 2,500 SF applied to any existing unpaved driveway in the Level 1 or Level 2 Groundwater Protection District (See section 6.01.2).

#### **8.05.0 2009 INTERNATIONAL PROPERTY MAINTENANCE CODE (2010)**

An Ordinance establishing the minimum regulations governing the conditions and maintenance of all property, buildings and structures; by providing the standards for supplied utilities and facilities and other physical things and conditions essential to insure that structures are safe, sanitary and fit for occupation and use; and the condemnation of buildings and structures unfit for human occupancy and use and the demolition of such structures; known as the property maintenance code.

#### **8.05.1 SECTION 1: ADOPTION OF PROPERTY MAINTENANCE CODE (2010)**

That a certain document, three (3) copies of which are on file in the office of the town clerk of the Town of Milford, being marked and designated as "the International Property Maintenance Code, 2009," as published by the International Code Council, be and is hereby adopted as the Property Maintenance Code of the Town of Milford, in the State of NH for regulating and governing the conditions and maintenance of all property, buildings, and structures; by providing the standards for supplied utilities and facilities and other physical things and conditions essential to ensure that structures are safe, sanitary and fit for occupation and use; and the condemnation of buildings and structures unfit for human occupancy and use, and the demolition of such existing structures as herein provided; providing for the issuance of permits and collection of fees therefore; and each and all of the regulations, provisions, penalties, conditions and terms of said Property Maintenance Code on file in the office of the Town of Milford are hereby referred to, adopted, and made a part hereof, as if fully set out in this Ordinance, with the additions, insertions, deletions and changes, if any, prescribed in Section 2 of this Ordinance.

#### **8.05.2 SECTION 2: ADDITIONS, INSERTIONS AND CHANGES (2010)**

That the 2009 International Property Maintenance Code is amended and revised in the following respects:

Section -101.1

*Insert: Town of Milford*

Section 103.5

*Delete section*

Section 302.4

*Delete section*

Section 302.7

*Delete the word "fence"*

Section 304.14

*Insert: May 1 to October 1*

Section 602.3

*Insert: October 1 to May 31*

Section 602.4

*Insert: October 1 to May 31*

### **8.05.3 SECTION 3: INCONSISTENT ORDINANCES REPEALED**

That Ordinance No. 8.05.0 of The Town of Milford entitled 1993 BOCA NATIONAL PROPERTY MAINTENANCE CODE and all other Ordinances or parts of Ordinances in conflict herewith are hereby repealed.

### **8.05.4 SECTION 4: SAVING CLAUSE**

That if any section, subsection, sentence, clause or phrase of this Ordinance is, for any reason, held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this Ordinance. The Town of Milford hereby declares that it would have passed this Ordinance, and each section, subsection, clause or phrase thereof, irrespective of the fact that any one or more sections, subsections, sentences, clauses and phrases be declared unconstitutional.

### **8.05.5 SECTION 5: SAVING CLAUSE**

That nothing in this Ordinance or in the Property Maintenance Code hereby adopted shall be construed to affect any suit or proceeding impending in any court, or any rights acquired, or liability incurred, or any cause or causes of action acquired or existing, under any act or Ordinance hereby repealed as cited in Section {2} of this Ordinance; nor shall any just or legal right or remedy of any character be lost, impaired or affected by this Ordinance.

### **8.05.6 SECTION 6: DATE OF EFFECT**

That the Town Clerk shall certify to the adoption of this Ordinance, and cause the same to be published as required by law; and this Ordinance shall take effect and be in force from and after its approval as required by law.

## Appendix I

**TITLE LXIV  
PLANNING AND ZONING  
CHAPTER 676  
ADMINISTRATIVE AND ENFORCEMENT PROCEDURES  
Penalties and Remedies - Section 676:17**

**676:17 Fines and Penalties; Second Offense. –**

I. Any person who violates any of the provisions of this title, or any local ordinance, code, or regulation adopted under this title, or any provision or specification of any application, plat, or plan approved by, or any requirement or condition of a permit or decision issued by, any local administrator or land use board acting under the authority of this title shall be guilty of a misdemeanor if a natural person, or guilty of a felony if any other person; and shall be subject to a civil penalty of \$275 for the first offense, and \$550 for subsequent offenses, for each day that such violation is found to continue after the conviction date or after the date on which the violator receives written notice from the municipality that the violator is in violation, whichever is earlier. Each day that a violation continues shall be a separate offense.

II. In any legal action brought by a municipality to enforce, by way of injunctive relief as provided by RSA 676:15 or otherwise, any local ordinance, code or regulation adopted under this title, or to enforce any planning board, zoning board of adjustment or building code board of appeals decision made pursuant to this title, or to seek the payment of any fine levied under paragraph I, the municipality shall recover its costs and reasonable attorney's fees actually expended in pursuing the legal action if it is found to be a prevailing party in the action. For the purposes of this paragraph, recoverable costs shall include all out-of-pocket expenses actually incurred, including but not limited to, inspection fees, expert fees and investigatory expenses.

III. If any violation of a local ordinance, code or regulation, or any violation of a planning board, zoning board of adjustment or building code board of appeals decision, results in the expenditure of public funds by a municipality which are not reimbursed under paragraph II, the court in its discretion may order, as an additional civil penalty, that a violator make restitution to the municipality for such funds so expended.

IV. The superior court may, upon a petition filed by a municipality and after notice and a preliminary hearing as in the case of prejudgment attachments under RSA 511-A, require an alleged violator to post a bond with the court to secure payment of any penalty or remedy or the performance of any injunctive relief which may be ordered or both. At the hearing, the burden shall be on the municipality to show that there is a strong likelihood that it will prevail on the merits, that the penalties or remedies sought are reasonably likely to be awarded by the court in an amount consistent with the bond sought, and that the bond represents the amount of the projected expense of compliance with the injunctive relief sought.

V. The building inspector or other local official with the authority to enforce the provisions of this title or any local ordinance, code, or regulation adopted under this title may commence an action under paragraph I either in the district court pursuant to RSA 502-A:11-a, or in the superior court. The prosecuting official in the official's discretion may, prior to or at the time of arraignment, charge the offense as a violation, and in such cases the penalties to be imposed by the court shall be limited to those provided for a violation under RSA 651:2 and the civil penalty provided in subparagraph I(b) of this section. The provisions of this section shall supersede any inconsistent local penalty provision.

## **ARTICLE IX: BOARD OF ADJUSTMENT (1986)**

### **9.01.0 AUTHORIZATION**

In accordance with the provisions of the New Hampshire Revised Statutes Annotated (NH RSA), 1955, Chapter 31 (updated 1985, Chapter 674.33) as amended and as hereinafter a Board of Adjustment is established.

### **9.02.0 MEMBERS**

The Board of Adjustment shall consist of five members appointed by the Board of Selectmen in the Town of Milford. Appointments to the Board shall be for a term of three (3) years. Members of the Board shall serve without compensation. The Board shall elect one of its members to serve as chairman. The Board shall have five (5) alternate members to be appointed by the Board of Selectmen for a term of three (3) years each. (1997)

### **9.03.0 DUTIES & POWERS**

The Board of Adjustment shall perform all the duties and have all the powers provided by the New Hampshire revised statutes annotated, 1955, as amended and as hereinafter provided.

### **9.04.0 MEETINGS**

Meeting of the Board shall be held at the call of the chairman and at such other times as the Board of Adjustment may determine. All meetings shall be open to the public. The Board shall keep a record of all proceedings showing the vote upon every question. Every rule or regulation, every amendment or repeal thereof and every order, requirement or decision of the Board of Adjustment shall immediately be filed in the Office of the Zoning Administrator and shall become a public record. The concurring vote of three members of the Board of Adjustment shall be necessary to reverse any order, requirement, or determination of the administrative office or to decide any matter upon which it is required to pass or effect any variance from the strict application of the provisions of this Ordinance.

### **9.05.0 RULES**

The Board of Adjustment shall adopt and promulgate rules of procedure for the guidance of all persons having business before the Board.

**ARTICLE X: ADMINISTRATIVE RELIEF**

**10.01.0 VARIANCES (2012)**

**10.01.1**

Any request for a permit of any nature required under this Ordinance which will require a variance from the prescribed standards of this Ordinance shall be made only by the owner of the property in question, the owner's duly appointed agent and shall be transmitted to the Board of Adjustment or its duly appointed official to the Board. All variance requests made to the Zoning Board of Adjustment shall be made in accordance with RSA 676:5 (as amended), a copy of which is included in the Appendix.

**10.01.2**

Every variance granted by the Board of Adjustment shall be in accordance with the powers of the Board as stated in RSA 674:33 (as amended), a copy of which is included in the appendix.

**10.02.0 SPECIAL EXCEPTIONS**

**10.02.1**

The Board of Adjustment may in appropriate cases and subject to appropriate conditions and safeguards as determined by the Board, grant permits for such special exceptions as allowed in the various zoning districts as set forth in Article II. The Board may refer all applications for special exceptions to the Planning Board for its review and recommendations prior to holding public hearing on the application. The Board of Adjustment, in acting on an application for a special exception shall take into consideration the following conditions: (1992)

- A. The proposed use shall be similar to those permitted in the district.
- B. The specific site is an appropriate location for the proposed use.
- C. The use as developed will not adversely affect the adjacent area.
- D. There will be no nuisance or serious hazard to vehicles or pedestrians.
- E. Adequate appropriate facilities will be provided for the proper operation of the proposed use.

**10.02.2**

The Board of Adjustment shall act upon an application for a special exception in the same manner as prescribed in Section 10.01.1 of this article.

**10.02.3 HOME OCCUPATIONS**

- A. In all cases involving home occupations, the Board of Adjustment in addition to the criteria contained herein shall consider the following requirements:

1. The person conducting the home occupation shall reside in the dwelling unit, and there shall be no more than one (1) non-resident person employed in connection with such occupation.
  2. There shall be no evidence outside the dwelling, except permitted signs and required off-street parking, that the dwelling contains a home occupation.
  3. The home occupation shall not exceed 25% of the combined gross floor area of the existing home and any accessory structures, or 1,000 SF, whichever is less. (2016)
  4. Accessory finished goods may be provided for sale in conjunction with the home occupation, sold and stored in allowed home occupation space only. (2008)
  5. The home occupation and the conduct thereof shall not impair the residential character of the premises nor impair the reasonable use, enjoyment and value of other residential property in the neighborhood.
- B. Any special exceptions issued hereunder shall automatically terminate when the applicant no longer resides in the dwelling unit.
- C. Prior to commencement of a Home Occupation, the homeowner shall make application for a permit to the Community Development Office, submit to a Code Compliance Inspection specific to the location or area of the Home Occupation. (2012)

**10.02.4 SELF-SERVICE STORAGE FACILITIES (1997)**

Entire Section DELETED in 2019.

**10.02.5 MANUFACTURING IN THE “C”- COMMERCIAL DISTRICT (2011)**

Entire Section DELETED in 2011.

**10.02.6 ACCESSORY DWELLING UNITS (2017)**

- A. In all cases involving an Accessory Dwelling Unit (ADU):
1. An ADU shall meet the following minimum requirements:
    - a. Only one (1) ADU shall be allowed per property. (2013)
    - b. Either the principal dwelling unit or the ADU must be owner occupied. (2017)
    - c. The size of an ADU shall be no more than 750 SF gross floor area. (2017)
    - d. The ADU shall include no more than two (2) bedrooms. (2017)
    - e. No additional curb cuts shall be allowed.
    - f. An attached ADU shall have and maintain at least one common interior access between the principal dwelling unit and the ADU consisting of a connector that is a minimum of 36” in width or a doorway a minimum of 32” in width. (2017)

- g. The ADU shall be located in an existing or proposed single-family dwelling, its detached accessory structure(s), or as a stand-alone dwelling unit subordinate to the single-family dwelling. (2017)
  - h. Deleted (2013)
  - i. An existing, nonconforming, single-family residential structure or its detached accessory structure shall not be made more nonconforming. (2013)
  - j. An ADU shall meet all applicable local and State Building, Fire and Health Safety Codes. (2012)
  - k. Must have adequate provisions for a water supply and sewerage disposal method for the ADU, in accordance with NH RSA 485-a:38 Approval to Increase Load on a Sewage Disposal System (as amended). (2017)
2. The Board of Adjustment, prior to granting a Special Exception, shall conduct a hearing to determine if the proposed ADU complies with the following criteria:
- a. The ADU must be developed in a manner which does not alter the character or appearance of the principal use as a single-family dwelling. (2017)
  - b. The ADU is intended to be secondary and accessory to a principal single-family dwelling unit.
  - c. The ADU shall not impair the residential character of the premises nor impair the reasonable use, enjoyment and value of other property in the neighborhood.
  - d. Adequate off-street parking must be provided.
  - e. Any necessary additional entrances or exits shall be located to the side or rear of the building whenever possible.
- B. All ADUs must apply for a compliance inspection when a change of ownership occurs, to ensure compliance with Section 10.02.6:A.
- C. Existing Unpermitted Accessory Dwelling Units:
- Unpermitted Accessory Dwelling Units found to be in existence prior to the passage of this Section and are not legally non-conforming, must obtain Special Exception approval to continue to be occupied in accordance with the following criteria: (2010)
- 1. The ADU complies with all requirements in 10.02.6.A.
  - 2. Prior to the Special Exception application being heard by the Zoning Board of Adjustment, a compliance inspection shall be conducted by the Code Enforcement Department.
  - 3. Within forty-five (45) days of the approval of a Special Exception to allow the continuation of an existing unpermitted ADU, the applicant shall complete one of the following:
    - a. If the ADU has been found to meet all applicable codes, or will need alterations that do not require a building permit, obtain a certificate of compliance from Code Enforcement based on the code compliance inspection; or

- b. If the ADU has been found not to meet all applicable codes, and a building permit is required, the ADU shall pass all required inspections and obtain a certificate of occupancy.
- D. Failure to obtain a certificate of compliance or occupancy for an ADU shall be a violation of the Milford Zoning Ordinance and subject to enforcement action.

**10.02.7 OFFICE IN THE RESIDENCE A AND B DISTRICTS (2011)**

- A. In all cases involving offices in the Residence A and Residence B districts, the following shall be minimum performance standards for approval by the Zoning Board of Adjustment:
  - 1. The specific site of the proposed office use will be located in an existing building that is an appropriate location for the proposed use;
  - 2. The use as proposed will not adversely affect adjacent areas;
  - 3. There will be no nuisance, such as but not limited to: noise, odor, hours of operation, traffic, deliveries and lighting;
  - 4. There will be no outside storage; and
  - 5. The use shall require site plan approval by the Planning Board, subsequent to Zoning Board approval.

**10.03.0 APPEALS TO THE BOARD (2008)**

**10.03.1**

The Board of Adjustment shall hear and decide appeals in accordance with NH RSA 674:33 and NH RSA 676:5 through 676:7. The rules of the Board of Adjustment shall specify the time within which such an appeal shall be taken.

**10.03.2**

Appeals of Planning Board decisions exercising subdivision or site plan review shall be made to the Board of Adjustment in accordance with NH RSA 676:5,III. All other appeals of Planning Board decisions may be made in superior court in accordance with NH RSA 677:15.

**10.04.0 APPEAL FROM ORDER OF THE BOARD OF ADJUSTMENT (2008)**

Rehearings by the Board of Adjustment shall be conducted in accordance with NH RSA 677:2 and :3. Appeals from the Board of Adjustment's decision on a motion for rehearing shall be conducted in accordance with NH RSA 677:4 through 14.

**10.05.0 PLANNING BOARD REVIEW NECESSARY (2008)**

Whenever a variance or special exception is required for a use or structure which must also receive subdivision or site plan review by the Planning Board such required variance or special exception must be received from the Board of Adjustment prior to Planning Board final approval of the subdivision or site plan.

**10.06.0 EXPIRATION (2015)**

If within two (2) years after the granting of a variance or special exception by the Board of Adjustment, none of the work required by a building permit covered by a variance or special exception has been executed, then such variance or special exception shall become null and void except in any case where legal proceedings relative to the variance or special exception shall have caused an undue delay in the execution of the required building permit. Only one, six-month extension may be granted for any variance or special exception. The applicant may apply for the extension at a regularly scheduled Zoning Board meeting.

**10.07.0 EQUITABLE WAIVER (2012)**

All equitable waivers of dimensional requirements shall be governed by RSA 674:33-a (as amended), a copy of which is included in the Appendix.

**Appendix I, 676:5 Appeals to Board of Adjustment**

**TITLE LXIV  
PLANNING AND ZONING  
CHAPTER 676  
ADMINISTRATIVE AND ENFORCEMENT PROCEDURES  
Zoning Board of Adjustment  
Section 676:5**

**676:5 Appeals to Board of Adjustment. –**

I. Appeals to the board of adjustment concerning any matter within the board's powers as set forth in RSA 674:33 may be taken by any person aggrieved or by any officer, department, board, or bureau of the municipality affected by any decision of the administrative officer. Such appeal shall be taken within a reasonable time, as provided by the rules of the board, by filing with the officer from whom the appeal is taken and with the board a notice of appeal specifying the grounds thereof. The officer from whom the appeal is taken shall forthwith transmit to the board all the papers constituting the record upon which the action appealed from was taken.

II. For the purposes of this section:

(a) The "administrative officer" means any official or board who, in that municipality, has responsibility for issuing permits or certificates under the ordinance, or for enforcing the ordinance, and may include a building inspector, board of selectmen, or other official or board with such responsibility.

(b) A "decision of the administrative officer" includes any decision involving construction, interpretation or application of the terms of the ordinance. It does not include a discretionary decision to commence formal or informal enforcement proceedings, but does include any construction, interpretation or application of the terms of the ordinance which is implicated in such enforcement proceedings.

III. If, in the exercise of subdivision or site plan review, the planning board makes any decision or determination which is based upon the terms of the zoning ordinance, or upon any construction, interpretation, or application of the zoning ordinance, which would be appealable to the board of adjustment if it had been made by the administrative officer, then such decision may be appealed to the board of adjustment under this section; provided, however, that if the zoning ordinance contains an innovative land use control adopted pursuant to RSA 674:21 which delegates administration, including the granting of conditional or special use permits, to the planning board, then the planning board's decision made pursuant to that delegation cannot be appealed to the board of adjustment, but may be appealed to the superior court as provided by RSA 677:15.

IV. The board of adjustment may impose reasonable fees to cover its administrative expenses and costs of special investigative studies, review of documents, and other matters which may be required by particular appeals or applications.

V. (a) A board of adjustment reviewing a land use application may require the applicant to reimburse the board for expenses reasonably incurred by obtaining third party review and consultation during the review process, provided that the review and consultation does not substantially replicate a review and consultation obtained by the planning board.

(b) A board of adjustment retaining services under subparagraph (a) shall require detailed invoices with reasonable task descriptions for services rendered. Upon request of the applicant, the board of adjustment shall promptly provide a reasonably detailed accounting of expenses, or corresponding escrow deductions, with copies of supporting documentation.

**Source.** 1983, 447:1. 1987, 256:5. 1989, 69:1. 1991, 231:13. 1995, 243:1, eff. Jan. 1, 1996. 2010, 303:1, eff. Sept. 11, 2010.

**TITLE LXIV- PLANNING AND ZONING**

**CHAPTER 674**

**LOCAL LAND USE PLANNING AND REGULATORY POWERS**

**Section 674:33**

**Zoning Board of Adjustment and Building Code Board of Appeals**

**674:33 Powers of Zoning Board of Adjustment. –**

I. The zoning board of adjustment shall have the power to:

(a) Hear and decide appeals if it is alleged there is error in any order, requirement, decision, or determination made by an administrative official in the enforcement of any zoning ordinance adopted pursuant to RSA 674:16; and

(b) Authorize, upon appeal in specific cases, a variance from the terms of the zoning ordinance if:

(1) The variance will not be contrary to the public interest;

(2) The spirit of the ordinance is observed;

(3) Substantial justice is done;

(4) The values of surrounding properties are not diminished; and

(5) Literal enforcement of the provisions of the ordinance would result in an unnecessary hardship.

(A) For purposes of this subparagraph, "unnecessary hardship" means that, owing to special conditions of the property that distinguish it from other properties in the area:

(i) No fair and substantial relationship exists between the general public purposes of the ordinance provision and the specific application of that provision to the property; and

(ii) The proposed use is a reasonable one.

(B) If the criteria in subparagraph (A) are not established, an unnecessary hardship will be deemed to exist if, and only if, owing to special conditions of the property that distinguish it from other properties in the area, the property cannot be reasonably used in strict conformance with the ordinance, and a variance is therefore necessary to enable a reasonable use of it.

The definition of "unnecessary hardship" set forth in subparagraph (5) shall apply whether the provision of the ordinance from which a variance is sought is a restriction on use, a dimensional or other limitation on a permitted use, or any other requirement of the ordinance.

I-a. Variances authorized under paragraph I shall be valid if exercised within 2 years from the date of final approval, or as further extended by local ordinance or by the zoning board of adjustment for good cause, provided that no such variance shall expire within 6 months after the resolution of a planning application filed in reliance upon the variance.

II. In exercising its powers under paragraph I, the zoning board of adjustment may reverse or affirm, wholly or in part, or may modify the order, requirement, decision, or determination appealed from and may make such order or decision as ought to be made and, to that end, shall have all the powers of the administrative official from whom the appeal is taken.

III. The concurring vote of 3 members of the board shall be necessary to reverse any action of the administrative official or to decide in favor of the applicant on any matter on which it is required to pass.

IV. A local zoning ordinance may provide that the zoning board of adjustment, in appropriate cases and subject to appropriate conditions and safeguards, make special exceptions to the terms of the ordinance. All special exceptions shall be made in harmony with the general purpose and intent of the zoning ordinance and shall be in accordance with the general or specific rules contained in the ordinance. Special exceptions authorized under this paragraph shall be valid if exercised within 2 years from the date of final approval, or as further extended by local ordinance or by the zoning board of adjustment for good cause, provided that no such special exception shall expire within 6 months after the resolution of a planning application filed in reliance upon the special exception.

**TITLE LXIV- PLANNING AND ZONING**  
**CHAPTER 674**  
**LOCAL LAND USE PLANNING AND REGULATORY POWERS**  
**Section 674:33**  
**Zoning Board of Adjustment and Building Code Board of Appeals**

**674:33 Powers of Zoning Board of Adjustment. –**

**(Continued from prior page)**

V. Notwithstanding subparagraph I(b), any zoning board of adjustment may grant a variance from the terms of a zoning ordinance without finding a hardship arising from the condition of a premises subject to the ordinance, when reasonable accommodations are necessary to allow a person or persons with a recognized physical disability to reside in or regularly use the premises, provided that:

(a) Any variance granted under this paragraph shall be in harmony with the general purpose and intent of the zoning ordinance.

(b) In granting any variance pursuant to this paragraph, the zoning board of adjustment may provide, in a finding included in the variance, that the variance shall survive only so long as the particular person has a continuing need to use the premises.

VI. The zoning board of adjustment shall not require submission of an application for or receipt of a permit or permits from other state or federal governmental bodies prior to accepting a submission for its review or rendering its decision.

VII. Neither a special exception nor a variance shall be required for a collocation or a modification of a personal wireless service facility, as defined in RSA 12-K:2.

**Source.** 1983, 447:1. 1985, 103:20. 1987, 256:1. 1998, 218:1, eff. Aug. 17, 1998. 2009, 307:6, eff. Jan. 1, 2010.

**TITLE LXIV  
PLANNING AND ZONING  
CHAPTER 674  
LOCAL LAND USE PLANNING AND REGULATORY POWERS  
Zoning Board of Adjustment and Building Code Board of Appeals  
Section 674:33-a**

**674:33-a Equitable Waiver of Dimensional Requirement. –**

I. When a lot or other division of land, or structure thereupon, is discovered to be in violation of a physical layout or dimensional requirement imposed by a zoning ordinance enacted pursuant to RSA 674:16, the zoning board of adjustment shall, upon application by and with the burden of proof on the property owner, grant an equitable waiver from the requirement, if and only if the board makes all of the following findings:

(a) That the violation was not noticed or discovered by any owner, former owner, owner's agent or representative, or municipal official, until after a structure in violation had been substantially completed, or until after a lot or other division of land in violation had been subdivided by conveyance to a bona fide purchaser for value;

(b) That the violation was not an outcome of ignorance of the law or ordinance, failure to inquire, obfuscation, misrepresentation, or bad faith on the part of any owner, owner's agent or representative, but was instead caused by either a good faith error in measurement or calculation made by an owner or owner's agent, or by an error in ordinance interpretation or applicability made by a municipal official in the process of issuing a permit over which that official had authority;

(c) That the physical or dimensional violation does not constitute a public or private nuisance, nor diminish the value of other property in the area, nor interfere with or adversely affect any present or permissible future uses of any such property; and

(d) That due to the degree of past construction or investment made in ignorance of the facts constituting the violation, the cost of correction so far outweighs any public benefit to be gained, that it would be inequitable to require the violation to be corrected.

II. In lieu of the findings required by the board under subparagraphs I(a) and (b), the owner may demonstrate to the satisfaction of the board that the violation has existed for 10 years or more, and that no enforcement action, including written notice of violation, has been commenced against the violation during that time by the municipality or any person directly affected.

III. Application and hearing procedures for equitable waivers under this section shall be governed by RSA 676:5 through 7. Rehearings and appeals shall be governed by RSA 677:2 through 14.

IV. Waivers shall be granted under this section only from physical layout, mathematical or dimensional requirements, and not from use restrictions. An equitable waiver granted under this section shall not be construed as a nonconforming use, and shall not exempt future use, construction, reconstruction, or additions on the property from full compliance with the ordinance. This section shall not be construed to alter the principle that owners of land are bound by constructive knowledge of all applicable requirements. This section shall not be construed to impose upon municipal officials any duty to guarantee the correctness of plans reviewed by them or property inspected by them.

## **ARTICLE XI: IMPACT FEES (2003)**

### **11.01.0 GENERAL**

#### **11.01.1 AUTHORITY**

This Ordinance is established pursuant to The State of New Hampshire RSA 674:21 (V). All references in this Ordinance will refer to State of New Hampshire RSAs.

#### **11.01.2 INTENT**

This Ordinance is intended to:

Implement and be consistent with the Town of Milford's Master Plan; and

Allocate a fair and equitable share of the cost of public capital facilities (including school construction) to new development (exclusive of existing impact fee regulations that relate to sewer and water facilities enacted pursuant to NH RSA 38 and NH RSA 149-I, currently in place); and

Require that new development contribute its proportionate share of funds necessary to accommodate its impact on public facilities; and

Apply to all forms of development identified in NH RSA 674:21 (V), other than the sewer and water facilities identified above.

#### **11.01.3 FINDINGS**

The Town of Milford is responsible for and committed to the provision of public facilities and services at levels necessary to support residential and non-residential growth and development.

Such facilities and services have been and will be provided by the Town utilizing funds allocated via the Capital Improvements Program as regularly updated pursuant to NH RSA 674:5.

The rate of growth experienced by the Town in recent years and projected growth rates, have and will continue to necessitate an expenditure of public funds in order to provide adequate facility standards.

New development may create a need for the construction, equipping or expanding of public capital facilities.

The imposition of impact fees is one of the available methods of ensuring that public expenditures are not excessive, and that new development bears a proportionate share of the cost of public capital facilities necessary to accommodate such development. This must be done in order to promote and ensure the public health, safety and welfare.

The fees established by the Impact Fee Schedules for the categories identified in Section 11.031 are derived from, based upon, and shall not exceed the costs of:

Providing additional public capital facilities necessitated by the new development for which the fees are levied; or

Compensating the Town of Milford for expenditures made for existing public facilities that were constructed in anticipation of new growth and development.

#### **11.01.4 DEFINITIONS**

The following definitions shall apply to ARTICLE XI - Impact Fees.

**Accessory Structure - Non-Residential:** A structure on the same lot with, and of a nature incidental and subordinate to, the principal structure.

**Applicant:** A person or agent applying for the issuance of a building permit, permit for manufactured home installation, subdivision, site plan or other local land use decision, permit or approval.

**Dwelling Unit:** One room or rooms connected together, constituting a separate, independent housekeeping establishment physically separated from any other dwelling units in the same structure, and containing independent cooking and sleeping facilities.

**New Development:** Any activity that results in:

- The creation of a new dwelling unit or dwelling units;
- The conversion of a non-residential use to a dwelling unit or dwelling units;
- Construction of new non-residential facilities and/or accessory structures;
- The conversion of a residential use to non-residential use.

New Development does not include:

The reconstruction of a residential or non-residential structure that has been destroyed by fire or natural disaster, provided there is no change in the number of dwelling units or size of the structure;

The replacement of a manufactured home with another manufactured home provided there is no change in the number of dwelling units or size of the structure.

**Public Capital Facilities:** Facilities and equipment which are owned and operated by the Town of Milford, the Milford School System, or cooperatively with other municipalities and which have a useful life of no less than five years. Public capital facilities do not include the costs associated with the operation, maintenance or repair of such facilities, or with facility replacements that do not increase the capacity or level of service, but do include reasonable costs for planning, engineering, design, land acquisition, and other reasonable costs associated with such facilities.

**Total Non-Residential Area:** The total area of a non-residential structure shall equal the sum of the gross horizontal area of each floor and mezzanine. Any non-residential structure with an area of one hundred twenty (120) square feet or less is excluded.

**Total Residential Area:** The total residential area of a residential structure shall be equal to the sum of the gross horizontal area of each floor, including attached decks, porches, breezeways, sun rooms, balconies and attached garages. Total residential area excludes basements, cellars and detached outbuildings.

### **11.02.0 OFF-SITE IMPROVEMENT**

An improvement that is required by the Planning Board for either a site plan or subdivision that is necessary, in the judgment of the Planning Board, for the project to operate properly on the day that it opens shall be considered to be an Off-Site Improvement. Off-site improvements for site specific applications shall be assessed on a case by case basis and shall be in addition to other impact fees imposed pursuant to this Ordinance. In a case in which it is determined that such an improvement is necessary for the proper operation of the project, the Planning Board shall so notify the applicant. The applicant shall be required to present to the Board a study that identifies the proportionate share of the cost of the required improvement. The Planning Board may, at the expense of the applicant, refer such study to a consultant of its own choosing to determine the reliability of the findings that shall be considered by the Board to arrive at an amount to be paid by the applicant for the offsite improvement. The applicant shall be assessed his/her proportionate share of the cost of the project. In cases where it is determined that an improvement is necessary for the proper functioning of a site plan or subdivision, but the applicant, for whatever reason is determined to contribute more than his/her proportionate share to the improvement under this section, and, therefore, that the improvement will also accommodate other future development, the Planning Board, at the request and expense of the applicant, may establish a separate, project related impact fee that assesses other future site plans or subdivisions for their proportionate share of the improvement to reimburse the applicant for such disproportionate contribution. Such future impact fees shall provide for the payment to the original applicant, with any interest.

### **11.03.0 IMPOSITION OF IMPACT FEES FOR NEW DEVELOPMENT**

Any person or agent, who after the effective date of this Ordinance, seeks to undertake new development within the Town of Milford, New Hampshire, by applying for a building permit and who is not vested under NH RSA 674:39, is hereby required to pay the appropriate impact fee in the manner set forth in this Ordinance, in accordance with any Impact Fee Schedule adopted by the Board of Selectmen.

No new building permit for an activity requiring payment of one or more impact fee(s) pursuant to this Ordinance shall be issued unless and until the impact fee(s) hereby required have been assessed and agreed upon.

#### **11.03.1 COMPUTATION OF IMPACT FEES**

##### **A. Amount of Impact Fees and Type of Facilities:**

The amounts of the impact fees shall be determined using the values contained in the Impact Fee Schedules for the following types of facilities:

- \* Storm water, drainage and flood control facilities
- \* Public road systems and rights-of-way
- \* Municipal office facilities
- \* Public school facilities

- \* The municipality's proportional share of capital facilities of a cooperative or regional governmental venture
- \* Public safety facilities
- \* Public health facilities
- \* Solid waste collection, transfer, recycling, processing and disposal facilities
- \* Public library facilities
- \* Public recreational facilities not including public open space.

Sewer and water facilities are excluded from this list because the impacts on these facilities, as well as the fees relating to same, are addressed elsewhere in regulations arising out of NH RSA 38 and NH RSA 149-I.

B. Impact Fees Schedules shall be established and reviewed as set forth in Section 11.06.0 below.

In the case of change of use, redevelopment expansion or modification of an existing use that constitutes New Development, the impact fees shall be based upon the net increase of the total residential area or total nonresidential area of the redevelopment, expansion or modification.

C. Assessment and Payment of Fees. All impact fees imposed pursuant to this Ordinance shall be assessed prior to, or as a condition for, the issuance of a building permit or other appropriate permission to proceed with development. Impact fees shall be collected as a condition for the issuance of a certificate of occupancy.

D. Appeals. If an applicant elects to dispute the amount of the impact fee(s), the applicant may prepare and submit to the Planning Board an independent fee calculation study for the new development activity that is proposed. The Planning Board shall review such study and render a decision within sixty (60) days of the receipt of the independent fee calculation.

All cost(s) incurred by the Town for the review of such study shall be paid by the applicant.

The decision of the Planning Board regarding any disputed fee calculations may be appealed to the Superior Court as provided by NH RSA 677.15.

### **11.03.2 ADMINISTRATION AND CUSTODY OF FUNDS COLLECTED**

Any impact fee collected shall be properly identified and promptly deposited in the appropriate Impact Fee accounts and used solely for the purpose for which it was collected. Impact fee accounts shall be special revenue fund accounts and under no circumstances will impact fee revenues accrue to the General Fund. Each fee collected under a specific Impact Fee Schedule shall not be commingled with any other impact fee accounts or any other funds.

The Town Treasurer shall have custody of all accounts and shall pay out the same only upon written orders of the Board of Selectmen.

At the end of each fiscal year, the Town Treasurer shall prepare a report, showing a full account of all impact fee transactions during the year and deliver same to the Board of Selectmen, the Planning Board, and shall make the report available to the Public.

### **11.03.3 REFUND OF FEES PAID**

A refund shall be owed only when the Town has failed, within the period six (6) years from the payment of a fee, to expend or encumber a fee for public capital facilities intended to benefit the development that had paid the fees.

The Board of Selectmen shall notify the owner of record by certified mail, return receipt requested, that a refund is due.

The current owner of property on which impact fees have been paid may apply for a full or partial refund of such fees, together with any accrued interest.

In the event that the owner elects to apply for a refund, such application shall be submitted in writing to the Board of Selectmen within sixty (60) days from the date of receiving notice from the Board of Selectmen. Payment of a refund will be made within sixty (60) days after receiving the written request for a refund from the current owner of record.

### **11.03.4 CREDITS IN EXCHANGE FOR PUBLIC CAPITAL FACILITIES**

The Board of Selectmen may grant a credit to an impact fee in exchange for public capital improvements. Said public capital improvements may be offered by the applicant as total or partial payment of the required impact fee. Such credit shall be determined to represent an identifiable dollar value computed in a manner acceptable to the Planning Board. The Board of Selectmen shall act on a request for credit only after receipt of a recommendation on the request provided by the Planning Board.

Any claim by the applicant for credit must be made prior to the Planning Board vote on subdivision or site plan approval.

Credits shall not be transferable, and apply only to a specific subdivision or site plan approval.

Credits shall not be transferable from one impact fee to any other impact fee.

Any decision by the Board of Selectmen pursuant to the credit provision of this section may be appealed to the Superior Court in accordance with NH RSA 677:15.

Under no circumstances shall this section imply that the Board of Selectmen has an obligation to accept any credit offer that is proposed.

### **11.04.0 ADDITIONAL ASSESSMENTS**

Payment of an impact fee does not restrict the Town or the Planning Board from requiring other payments from the applicant, including without limitation such payments relating to the cost of the

extensions of water and sewer mains or the construction or improvement of roads or streets or other infrastructure and facilities specifically benefiting the development which are required by the development review regulations or as otherwise permitted by law.

**11.05.0        PREMATURE AND SCATTERED DEVELOPMENT**

Nothing in this Ordinance shall be construed so as to limit the existing authority of the Milford Planning Board to provide against development which is scattered or premature, which requires an excessive expenditure of public funds, or otherwise violates the Town of Milford's Development Regulations or Zoning Ordinance.

**11.06.0        ESTABLISHMENT, CALCULATION, REVIEW & TERMINATION OF IMPACT FEES**

**11.06.1        ESTABLISHMENT OF IMPACT FEES**

In order to establish an impact fee, the Capital Improvements Plan Citizens Advisory Committee as established by the Planning Board shall identify and recommend to the Planning Board projects eligible for impact fee funding. If such recommendations are accepted, the Planning Board will then prepare an Impact Fee Schedule in accordance with NH RSA 674:21 and this Ordinance.

The Planning Board shall conduct a public hearing on the proposed Schedule, and shall consider all comments received prior to finalizing the Schedule. The Planning Board, upon such finalization, shall then submit the Schedule to the Board of Selectmen for its consideration. The Board of Selectmen at a regular meeting shall either accept or reject the proposed Schedule. The Impact Fee Schedule shall become effective when a majority of the Board of Selectmen approves the schedule. Should the Board of Selectmen fail to approve the schedule, it shall state its reason(s) for doing so in writing and shall forward these comments to the Planning Board within 60 days of the receipt of the Impact Fee Schedule. The Planning Board may reconsider the adoption of such a Schedule.

**11.06.2        IMPACT FEE SCHEDULE CALCULATION**

The Impact Fee Schedule shall be prepared in accordance with NH RSA 674:21 and based upon the most recent data available. The Impact Fee Schedule shall be calculated using the following factors:

The size of the capital facility;

An estimate of the proportion of users from future Milford commercial, industrial or residential development subject to the impact fee that will use the facility when it has reached its capacity;

Projections of future users based upon new building permit projections;

Estimates of the cost to the Town of Milford for the proposed facility, including financing and excluding non-municipal funding sources;

Credits for property taxes to be paid by the proportion of the project to be financed by impact fees;

A fee assessed for new development based upon the total residential area or total non-residential area;

A determination of the number of building permits that will need to be issued in order to finance the impact fee;

An accounting of the number of permits issued, with a maximum number of permits to be assessed an impact fee prior to the fee's termination;

Exemptions, if any;

Impact fee schedules will be available in the Department of Planning and Community Development and the Building Department.

### **11.06.3 REVIEW OF IMPACT FEES**

The Planning Board shall review all established Impact Fee Schedules on an annual basis.

The Planning Board shall modify the Impact Fee Schedule if it finds that new data is available that may change the schedule. This may include the replacement of factors used in the Impact Fee Schedule with more accurate or recent projections, data and figures. The Planning Board shall submit the Impact Fee Schedule to the Board of Selectmen if modifications are recommended. The Board of Selectmen shall vote to affirm or deny the modifications within sixty (60) days of the receipt of recommendations from the Planning Board. If the Board of Selectmen fails to affirm the modifications, the impact fee schedule in effect shall remain in place.

### **11.06.4 TERMINATION OF IMPACT FEES**

Impact fees shall terminate in accordance with the Impact Fee Schedule, which shall set forth the number of building permits to be issued prior to its expiration.

The Board of Selectmen may terminate a specific impact fee schedule in effect by majority vote. This may be done only after soliciting recommendations from the Planning Board, and after conducting a public hearing. The Planning Board shall be given sixty (60) days notice prior to any such vote to provide written recommendations to the Board of Selectmen.

### **11.07.0 SEVERABILITY**

If any section, phrase, sentence or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

### **11.08.0 EFFECTIVE DATE**

This Ordinance shall become effective on the date of its passage, subject to the limitations imposed by NH RSA 676:12.

**ARTICLE XII: GROWTH MANAGEMENT AND INNOVATIVE LAND USE CONTROL**

Entire article deleted in 2010.

## Changes/amendments to zoning Ordinance by year

Year	Article	Section	Effect
2020	VI	6.03 Floodplain Management District	Remove and replace entire section

## SECTION A

### ZONING ORDINANCE

#### ARTICLE I -- PREAMBLE

##### Section 1.1 Purpose and Authority.

The regulations as set forth in this ordinance are for the purpose of promoting the public health, safety, and general welfare of the Town of Amherst as provided for by Chapter 672, New Hampshire Revised Statutes Annotated, as may be amended. (3-14-67, 3-14-89, 3-13-90, 3-9-99, 3-11-14, 3-14-17, 3-12-19)

The purpose of the Zoning Ordinance of the Town of Amherst is to implement the goals of the orderly development and growth of the Town as set forth in the Master Plan adopted in November 1980 and future revisions of the Master Plan as the needs of the Town dictate. (11-2-82)

#### ARTICLE II -- ESTABLISHMENT OF DISTRICTS

##### Section 2.1 Division of Town into Districts.

For the purpose of this ordinance, the Town of Amherst is divided into the following districts as shown on the official tax map overlays. (3-12-63)

AC	Aquifer Conservation District	(3-13-84)
C	Commercial Zone	(3-12-63)
FP	Flood Plain Conservation District	(3-10-70)
GO	General Office	(3-12-85)
HD	Historic District	(3-11-86)
I	Industrial Zone	(3-2-76)
LC	Limited Commercial Zone	(3-2-76)
NR	Northern Rural Zone	(3-2-76)
NTR	Northern Transitional Zone	(3-8-88)
RR	Residential / Rural Zone	(3-11-93)
W	Wetland Conservation District	(3-6-73)
WP	Watershed Protection District	(3-2-76)

##### Section 2.2 Zoning Map.

The several districts provided for in Section 2.1 above shall be bounded as shown on tax map overlays of the Town of Amherst, New Hampshire, and by the Flood Plain Conservation District overlay and the Wetlands Conservation District overlay, the Aquifer Conservation District, together with the Historic District overlay, and all amendments and explanatory matter thereon, which is hereby declared to be a part of the Zoning Ordinance. As amended (3-11-80, 3-13-84, 3-14-89)

**Section 2.3 Interpretation of Zoning District Boundary Lines.**

The zoning district boundary lines, as shown on tax map overlays are the center lines of streets and other public ways, the middle of the channel of waterways, or the center line of main tracts of railroad lines, unless otherwise indicated. Where the zoning district boundaries are so indicated that they parallel the center lines of streets and other public rights-of-way, such boundaries shall be interpreted as parallel thereto. Where an uncertainty exists as to the location of a boundary, the Board of Adjustment shall determine the exact line. (3-12-63)

**ARTICLE III -- GENERAL ZONING PROVISIONS**

**Section 3.1 Nuisance Provision.**

Any use or other establishment that may be injurious or obnoxious because of the production or emission of smoke, fumes, dust, odor, refuse material, noise, vibration, radiation, or like condition; or that endangers the health, safety, peace, or enjoyment of the community; or tending to its disturbance or annoyance is prohibited. (3-11-63)

**Section 3.2 Non-conforming Uses and Non complying Setbacks.**

- A. A PRE-EXISTING NON-CONFORMING use of land or structures may be continued although such use does not conform to the provisions of this ordinance. Structures containing preexisting non-conforming uses may be enlarged or extended subject to the following:
  - 1. If the conduct of the property owner is such that it will not substantially change the nature and the purpose of the original use and,
  - 2. The proposed change would involve no substantially different impact on the neighborhood. (3-6-73, 3-9-82, 3-14-89, 3-11-93)
- B. A NON-CONFORMING USE may be changed only to a use permitted in the district in which it is located. A permit is required for any change of use. (See Use Groups, Section 3.10) (3-6-73, 3-14-89)
- C. IF A STRUCTURE contains a non-conforming use or does not comply with Zoning setbacks and it is damaged by fire, flood, wind, or act of God, such structure may be reconstructed and used as before, provided such reconstruction is commenced within eighteen (18) months. (3-6-73, 3-14-89, 3-9-10)
- D. A STRUCTURE WHICH DOES NOT comply with zoning setbacks may be repaired or structurally altered provided the repairs or alterations do not increase the degree of non-compliance. (3-6-73, 3-14-89)
- E. STRUCTURES WHICH DO NOT COMPLY with zoning setbacks, when demolished for new construction, may be reconstructed where located before, providing there is no increase in non-compliance. (3-14-89)

- F. EXISTING CONFORMING LOTS shall not be made non-conforming and existing non-conforming lots shall not be made more non-conforming by altering lot lines. (3-14-89)
- G. A NON-CONFORMING USE which has been abandoned, vacated or discontinued for a period of eighteen (18) consecutive months, said non-conforming use shall be discontinued.

**Section 3.3 Water Pollution Control Regulations.**

Water pollution control requirements shall be those required by laws and regulations of the State of New Hampshire as well as local ordinances. (3-6-73, 3-14-89)

NOTE: See Section G for Water Pollution Control Regulations

**Section 3.4 Signs. (3-12-91)**

A. DEFINITIONS.

Awning. Any visual message incorporated into an awning attached to a building.

Banner. Any sign, painted, printed, or otherwise displayed on cloth, plastic film, or similar material. (3-8-94)

Business Sign District. Shall include the Industrial, Commercial, and Limited Commercial Zones in the Town of Amherst and shall include those lots in the General Office Zone with frontage on NH Route 101A. (3-10-92, 3-13-07)

Copy-Change Sign. A sign on which the visual message be periodically changed.

Directional Sign. A sign limited to providing directional or guide information, on the most direct or simple route, on the location of an activity, business, or event.

Event-Specific Sign. A temporary sign used to announce an event such as a festival, parade, dance, meeting, church, or club-sponsored event or tournament, or appearance by a political candidate or other speaker. (3-9-10)

Free-Standing. Any sign not attached or part of any building but separate and affixed in or upon the ground. Included are pole signs, pylon signs, and masonry wall-type signs.

General Sign District. Shall include the General Office (except for those lots included in the Business Sign District), Residential/Rural, Northern Transitional, and Northern Rural zones in the Town of Amherst. (3-10-92)

Illuminated Sign. Any sign illuminated by electricity, gas, or other artificial light either from the interior or exterior of the sign and which includes reflective and phosphorescent light.

Information Sign. A sign, without advertising, designed and intended to convey information about a permitted use to the general public, to convey regulations or restrictions, or to otherwise provide needed guidance.

Lineal Building Frontage. The length of a ground-level straight line or lines parallel to and equaling the length of the building front that fronts on the principal public roadway. In the case of a multi-unit development, the frontage of each separate building is additive for the purpose of determining permissible sign area. (3-13-07)

Off -Premises Sign. A sign unrelated to a business or a profession conducted, or to a commodity or service sold or offered, upon the premises where such sign is located.

Portable Sign. A sign, whether on its own trailer, wheels, motor vehicle, or otherwise, designed to be movable and not attached to the ground, a building, a structure, or another sign. (3-13-07)

Prohibited Signs. No banners, pennants, ribbons, streamers, spinners of similar moving, fluttering or revolving devices shall be permissible for display as signs, except as exempted above as New Hampshire or United States flags.

Projecting Sign. That which is attached to the building, wall, or structure and which extends horizontally more than fifteen (15) inches from the plane of such wall; or a sign which is perpendicular to the face of such wall or structure.

Representational Sign. A three-dimensional sign built so as to physically represent the object advertised.

Sign. Any material, structure, or device, or part thereof, composed of lettered or pictorial matter that is located out-of-doors, or on the exterior of any building, or indoors as a window sign, displaying an advertisement, announcement, notice, or name, and shall include any declaration, demonstration, display, representation, illustration, or insignia used to advertise or promote the interests of any person, or business, or cause when such is placed in view of the general public. Signs shall include: Any sign defined in this section or otherwise regulated under this ordinance; flags, banners, pennants, streamers, balloons, spinners or similar devices; and any other fixed or portable device or vehicle placed on a parcel of land and used as a sign to convey information to the public. (3-10-98)

Sign Directory. A listing of two (2) or more business enterprises, consisting of a matrix and sign components.

Sign Structure. The supports, uprights, bracing, and framework for the sign.

Sign Surface Area. The entire area within a single, continuous perimeter enclosing all elements which form an integral part of the sign. The structure supporting a sign and pole covers or architectural embellishments shall be excluded unless the structure is designed in a way to form an integral background for the display. Only one face of a double-faced, free-standing sign shall be included as surface or area of such a sign. In the case of a sign consisting of two (2) or more sides where the angle formed between any two (2) or more sides or the projections thereof exceeds thirty (30) degrees, each side shall be considered a separate sign area. (3-10-92)

Temporary Sign. A sign having a continuous display duration of no more than thirty (30) days. (3-13-07)

Wall Sign. A sign that is painted on or attached to the outside wall of a building with the face of the sign in the plane parallel to such wall, and not extending more than fifteen (15) inches from the face of such wall.

Window Sign. A sign visible from a sidewalk, street, or other public place, painted or affixed, on glass or other window material, or located inside within two (2) feet of the window, but not including graphics in connection with customary window display of products.

Zoning Official. The Planning Director, Building Inspector, or Code Enforcement Officer, whichever is responsible for the administration of these provisions. (3-13-07)

- B. **PURPOSE OF THE SIGN ORDINANCE.** The purpose of this section of the Town of Amherst Zoning Ordinance is to provide for reasonable uniformity in the size, treatment and presentation of signs used to call attention to the existence of a business , activity, product or service. This section recognizes the need to protect public health and safety and welfare by reducing conflicting, ambiguous and unnecessary information presented through sign messages and structures, while understanding the need for adequate business identification and advertising. The Town does not want signs in any district to detract from the rural character which the Town, through its adopted Master plan, has expressed a strong desire to maintain.
- C. **GENERAL REGULATION.** Except as otherwise provided, no person shall erect, alter, or relocate any sign without first obtaining a permit from the Zoning Office. Subsequent to this initial application, no permit shall be required for a sign to be repainted or repaired provided that the sign is returned to its original design, condition, placement or presentation. (3-13-07)
1. **Application Procedure.** Applications shall be made in writing to the Zoning Office on forms prescribed and provided by the Town and shall contain the applicable information requested on that form and accompanying sign specification sheet. (3-13-07)
  2. **Permit.**
    - a. Upon the filing of a completed application for a sign permit and the payment of the required fee, the Zoning Official shall examine the plans, specifications, and other data submitted, and the premises on which the sign is to be erected. If it shall appear that the sign will be in compliance with all the requirements of this local ordinance, he shall then, within thirty (30) days, issue a permit for the erection of the proposed sign. The issuance of a permit shall not excuse the applicant from conforming to the other laws and ordinances of the Town or sign master planning provisions. (3-13-07)
    - b. If the erection of the sign authorized under any such permit has not been completed within two (2) years from the date of issuance, the permit shall become null and void, but may be renewed upon filing of a subsequent completed application and compliance with current requirements.

3. Exempt Signs (require no permit). The following types of signs may be erected and maintained without permits or fees, providing such signs comply with the general requirements of this local ordinance and other conditions specifically imposed by all other regulations. No two (2) permitted signs may be combined to create a larger sign.
- a. Historical markers, tablets and statues, memorial signs and plaques; names of buildings and dates of erection when cut into any masonry surface or when constructed of bronze, stainless steel or similar material; and emblems installed by governmental agencies, religious, or non-profit organizations; not exceeding six (6) square feet. Such signs may fall under the regulation of the Historic District Commission, and these provisions shall not supersede such requirements.
  - b. Flags and insignia of any government, except when displayed in connection with commercial promotion.
  - c. On-premise directional signs for the convenience of the general public, identifying public parking areas, fire zones, entrances, and exits, and similar signs, not exceeding six (6) square feet per face and three (3) feet in height. Not to include any names or logos. (3-14-00)
  - d. Non-illuminated warning, private drive, posted or no trespassing signs, not exceeding two (2) square feet per face.
  - e. Number and name plates identifying residents, mounted on house, apartment or mailbox, not exceeding two (2) square feet in area.
  - f. Lawn signs identifying residents, with no more than two (2) faces and not exceeding two (2) square feet per face. Such signs are to be non-illuminated except by a light which is an integral part of a lamp post if used as a support, with no advertising message thereon.
  - g. Private owner merchandise sale signs for garage sales and auctions, not exceeding two (2) square feet per face for a period not exceeding fourteen (14) continuous days during any calendar year. (Amended 3-8-94, 3-13-07)
  - h. One (1) off-premises directional sign for the purpose of directing the public to an "OPEN HOUSE." Such sign may not exceed four (4) square feet of sign surface area. Messages must include the words "Open House" and shall be otherwise limited to name/address or identification, arrow or direction, and distance. Off-premises directional signs may be erected no earlier than one (1) day prior to the "OPEN HOUSE" and must be removed by the end of the day the "OPEN HOUSE" ends.
  - i. Up to two (2) temporary signs for a roadside stand selling agricultural produce in season, providing that such signs do not exceed a total of thirty-two (32) square feet and set back beyond the public right-of-way at least fifteen (15) feet from the edge of the roadway. (Amended 3-8-94)
  - j. Temporary (for thirty [30] continuous days only), non-illuminated window signs, and posters not exceeding twenty-five (25) percent, up to a maximum of four (4) square feet, of a single window surface of a single wall opening on which the sign(s) is displayed. (Amended 3-8-94, 3-13-07)
  - k. Holiday decorations, including lighting, are exempt from the provisions of this local and may be displayed in any district without a permit.
  - l. Integral graphics or attached price signs on gasoline pumps at gasoline stations.
  - m. Decals used to reference authorized services (e.g. credit or bank cards) when not exceeding one hundred forty-four (144) square inches in total display area per business.

- n. Political posters, banners, promotional devices, and similar signs, not exceeding four (4) square feet in the General Sign District or sixteen (16) square feet in the Business Sign District, providing:
    - i. Placement shall not exceed thirty (30) days, and all signs must be retrieved within three (3) days following the election for which they were used.
    - ii. The names and addresses of the sponsor and the person responsible for removal are identified on the sign.
    - iii. No signs are attached to any trees, shrubs, bushes, traffic control devices, historical markers or placed on private property without the consent of the property owner.
  - o. One “OPEN” sign may be displayed for each separate business unit. Open signs may be displayed during business hours only. Open signs, if illuminated, must be displayed in or in the building, except as provided for in an approved sign master plan. Open signs shall be no more than thirteen (13) inches in height and thirty-two (32) inches in width. No name, logo, or lettering other than the word “OPEN” may be displayed on such signs. (3-14-00)
  - p. In the Business Sign District, one (1) non-illuminated “OPEN” flag may be displayed for each separate business unit. No name, logo, or lettering other than the word “OPEN” may be displayed on such flags. Open flags may be displayed at the building during business hours and must be displayed at the building entrance. Open flags shall be no more than three (3) feet in height and six (6) feet in length. Flag colors are limited to standard, non-fluorescent red, white, and blue. (3-9-10)
4. Prohibitions. These prohibitions shall apply to all signs erected in the Town of Amherst, whether exempted or regulated under this section:
- a. No off-premises signs shall be allowed other than as permitted under the provision of an approved sign master plan.
  - b. No sign shall be illuminated by or contain flashing, intermittent, rotating moving lights or lettering and graphics except to show time and temperature. (3-13-07)
  - c. No sign shall impair or cause confusion of vehicular pedestrian traffic in its design, color, placement or display characteristics. No sign shall impair visibility for the motorist at a street corner or intersection by placement and location within twenty-five (25) feet of the intersection of the street or highway lines.
  - d. No sign shall consist of banners, pennants, ribbons, streamers, spinners or similar moving, fluttering or revolving devices. (3-10-92, 3-14-95, 3-14-00)
  - e. No advertising message shall be extended over more than one (1) sign placed along a street or highway unless included as an integral part of a sign master plan. No sign shall be placed within the road, street, or intersection right-of-way of the Town or State, except as provided for under off-premise directional signs as part of an approved master plan.
  - f. No sign consisting of the message “Sold,” “Under Contract,” or a similar message denoting a closed or completed transaction, shall be permitted.
  - g. No signs shall be attached to fences, trees, utility poles, rocks, or other parts of a natural landscape, nor in a position that will obstruct or impair traffic or in any manner create a hazard or disturbance to the health, safety, and welfare of the general public.

h. No portable signs shall be allowed in any district. (3-10-92)

#### D. SIGN STANDARDS.

1. Temporary Signs for Activities or Events. Temporary signs for special events must receive a temporary sign permit from the Community Development Office. No more than four special event sign permits shall be issued to any business, non-profit organization or individual in any calendar year, except within its first year of operation where no more than six shall be issued. Special event signs shall not exceed sixteen (16) square feet in the Business Sign District nor eight (8) square feet in the General Sign District. No more than two (2) signs may be permitted for any special event. Such signs may be displayed for a maximum of twenty-one (21) days and must be removed at the end of the event. Temporary signs for special events shall not be attached to trees, rocks, other parts of a natural landscape, utility poles or fences, nor be placed in a position that will obstruct or impair traffic or in any manner create a hazard or disturbance to the health, safety and welfare of the general public. In addition, up to ten (10) off premises directional signs, not to exceed two (2) square feet may be permitted. (3-8-16)
2. (Deleted 3-8-16)
3. Permanent Signs. Within any zoning district, unless otherwise specified, the following permanent signs may be erected; provided, however, that this subsection shall not serve to expand the number or area of signs otherwise allowed, and pursuant to the following:
  - a. Special cases.
    - i. A non-illuminated, single-sided real estate development sign, including industrial and commercial development, residential subdivision or construction sign denoting the architect, engineer and/or contractor, not exceeding thirty-two (32) square feet in Business Sign District nor sixteen (16) square feet in General Sign District, may be erected on property being sold, leased or developed. Such sign shall be erected parallel to the fronting highway, set back a minimum of fifteen (15) feet from the property line or attached to the building face. Such sign shall be removed upon completion of the project and shall be in place for a period not exceeding two (2) years, renewable for an additional two years, upon filing of a subsequent completed application and payment of the appropriate fee. (3-13-07)
    - ii. Signs or bulletin boards customarily incidental to places of worship, libraries, museums, social clubs or societies, may be erected on the premises of such institutions. One (1) such sign or bulletin board not exceeding twenty-four (24) square feet may be erected.
    - iii. For multiple commercial or industrial units, or residential dwellings or apartment developments one (1) sign identifying the name of the development, located at the entrance of the development, not exceeding thirty-two (32) square feet. (3-13-07)
  - b. Business Sign District (I, C, LC, GO on Rt. 101A). Unless otherwise specified, the following permanent sign provisions shall apply:

- i. The area of the freestanding sign permitted on any lot shall be two (2) square feet of sign area per lineal foot of building front, but in no case shall exceed sixty-four (64) square feet, whichever is less, excepting sign master planned developments. A minimum sign area of thirty-two (32) square feet shall be permitted on any lot regardless of building frontage. (3-11-03, 3-13-07)
  - ii. The total number of permitted signs on a single business or industrial lot shall not exceed two (2), of which only one (1) may be free-standing, excepting master planned developments.
  - iii. A lot with approved entrances on two (2) public roads shall be permitted a secondary sign, not on the same public road as the principal sign, provided that such sign does not exceed forty (40) square feet, notwithstanding Para. “i” and “ii” above.
  - iv. In addition to the above, one (1) wall sign shall be permitted each separated business unit, not to exceed twenty-five (25) square feet per unit.
  - v. Temporary, non-illuminated “For Sale” or “For Rent” real estate signs and signs of similar nature concerning the premises upon which the sign is located: in the General Sign District, one (1) sign per lot not exceeding four (4) square feet per side; in the Business Sign District, one (1) sign per lot not exceeding thirty-two (32) square feet per side set back at least fifteen (15) feet from all property and highway R.O.W. lines. All such signs shall be removed within three (3) days after the sale, lease, or rental of the premises. (See Prohibitions, Item g) (Amended 3-8-94, 3-13-07, 3-9-10)
- c. GENERAL SIGN DISTRICT (RR, NR, NTR,GO). Unless otherwise specified, the following permanent sign provisions shall apply to non-residential uses:
- i. The total number of permitted signs on a single lot shall not exceed two (2) of which only one (1) may be free-standing, excepting master planned developments.
  - ii. The total cumulative area of all signs permitted on such lot shall not exceed twenty-four (24) square feet, excepting wall signs for multiple tenants/units. The free-standing sign shall not exceed fourteen (14) square feet. (3-13-07)
  - iii. One wall or projecting sign, not to exceed ten (10) square feet per sign, shall be permitted for each separated business unit in the development.
  - iv. One (1) on-premise sign, either free-standing or attached, in connection with any residential building in any zoning district for permitted professional offices or home occupations, not exceeding six (6) square feet and set back at least fifteen (15) feet from the highway right-of-way. Such sign shall state name, street address, and vocation only. Illumination shall not produce a direct glare beyond the limits of the property line and shall be mounted on the sign and directed downward. (3-11-03)
  - v. Temporary, non-illuminated “For Sale” or “For Rent” real estate signs and signs of similar nature concerning the premises upon which the sign is located: in the General Sign District, one (1) sign per lot not exceeding four (4) square feet per side; in the Business Sign District, one (1) sign per lot not exceeding thirty-two (32) square feet per side set back at least fifteen (15) feet from all property and highway R.O.W. lines. All such signs shall be removed within three (3) days after the sale, lease or rental of the premises. (See Prohibitions, Item “g.”) (Amended 3-8-94, 3-13-07, 3-9-10)

4. New Business Signs. A new business, or a business in a new location, awaiting installation of a permanent sign, may utilize a temporary sign for a period of not more than thirty (30) days until installation of a permanent sign. Such sign must meet all appropriate construction standards of the Town. A separate temporary sign permit for such a new business sign shall be required. (3-13-07)

#### E. WALL SIGNS.

1. Wall signs shall not extend beyond the ends or over the top of the walls to which attached, and shall not extend above the floor level of the second floor of the building, with a maximum height of fifteen (15) feet measured from the adjacent ground level. (3-13-07)
2. Wall signs shall not extend more than fifteen (15) inches from the face of the buildings to which attached.
3. Any part of a sign extending over pedestrian traffic areas shall have a minimum clearance of seven (7) feet, six (6) inches.
4. Wall signs may be mounted on roofs or eaves as long as they are mounted no more than five (5) feet up from the eaves, provided that the sign height shall not exceed fifteen (15) feet when measured from the highest part of the sign to the ground directly below. (3-10-92)

#### F. FREE-STANDING SIGNS.

1. No free-standing sign shall be located less than fifteen (15) feet from the curb, edge of pavement, or inside of sidewalk, provided the sign is not within the governmental right-of-way and is located on the applicant's property. No free-standing sign may be located less than one hundred (100) feet from any other free-standing sign. (3-14-00)
2. If for any reason the property line is changed at some future date, any free-standing sign made non-conforming thereby must be relocated within ninety (90) days to conform with the minimum setback requirements to the extent possible.
3. No free-standing sign shall be more than sixty-four (64) square feet, except as provided for in an approved sign master plan.
4. The top of the free-standing sign shall not be more than twelve (12) feet in height above road level. (3-11-03, 3-13-07)
5. No free-standing sign shall extend over or into the public right-of-way, pedestrian walkway, or driveway; nor shall it overhang the property lines.

#### G. AWNING SIGNS.

1. No sign shall project from an awning.
2. Awning graphics may be painted or affixed flat to the surface of the front or sides, shall

indicate only the name and/or address of the enterprise or premises.

3. Awning graphics shall be a single line of lettering not exceeding six (6) inches in height, but if over three (3) inches in height, shall be debited against the permitted wall sign surface area.
4. No awning sign shall be internally illuminated.
5. There shall be no more than one (1) awning sign at each separate business location. (3-13-07)

#### H. EXISTING SIGNS.

Non-Conforming Signs. In the event a sign lawfully erected prior to the effective date of this ordinance does not conform to the provisions herein, such shall meet the following specifications:

1. A non-conforming sign shall not be enlarged or replaced by another more non-conforming sign. (3-12-91, 3-10-92)
2. No non-conforming sign shall be permitted within a development under a sign master plan.

#### I. REMOVAL OF SIGNS.

1. Any sign existing on or after the effective date of this ordinance, whether in conformance with this ordinance or not, which no longer advertises an existing business conducted or product sold on the premises upon which such sign is located, shall be removed within fifteen (15) days.
2. If the Zoning Official shall find that any sign regulated in the local ordinance is not used, coded in advertising, is abandoned, unsafe or insecure, or is a menace to the public, the administrator shall give written notice to the named owner of the land upon which it is located, who shall remove or repair the sign within fifteen (15) days from the date of the said time period. The Selectmen shall revoke the permit issued for such sign and may invoke court action. Failure to remove or repair such sign would be considered a violation of this provision. (3-13-07)

#### J. CONSTRUCTION STANDARDS.

This section provides guidance and standards for construction of signs requiring permits and shall serve as guidance for the construction of exempt signs. It identifies the specifications needed so that signs are constructed to ensure the community's safety.

#### K. GENERAL.

1. All signs installed after the effective date of this local ordinance shall have attached to the sign a name plate giving the sign permit number and the name and address of the owner, person, or corporation responsible for general requirements and maintenance as outlined in this ordinance.

2. All free-standing signs shall be designed and constructed to withstand a wind pressure of not less than thirty (30) pounds per square foot of surface area.
3. All signs, including wall-mounted and projecting signs, shall be securely anchored and shall not spin or move in any manner. (3-10-92, 3-8-94)
4. All signs, sign finishes, supports, and electrical work shall be kept clean, neatly painted, and free and from all hazards, such as, but not limited to, faulty wiring and loose supports, braces, guys, and anchors.
5. All projecting, free-standing or wall signs shall employ acceptable safety materials and shall not constitute a hazard to pedestrian travel or the general public.
6. All signs shall be painted/fabricated in accordance with generally accepted standards.
7. All signs shall be in accordance with the BOCA Code and shall not conflict with the Manual on Uniform Traffic Control Devices for Streets and Highways (USDOT/FHWA) or the Life Safety Code (NFPA101). All electrical wiring of signs shall conform to the National Electrical Code. (NFPA-70)
8. Underground wiring shall conform to the National Electrical Code. (NFPA-70)

#### L. DESIGN GUIDELINES FOR SIGN MASTER PLANS.

1. Where groups of three (3) or more contiguous commercial or industrial units are to be located together in a development or where a lesser number of businesses total not less than twenty thousand (20,000) square feet of gross leasable area, the development may adopt a Sign Master Plan to govern advertising. The intent of this section is to promote a uniform and aesthetic message presentation that is designed to provide information to the general public through its design and coordination of elements. (3-13-07)
2. The development of a sign master plan shall be governed by the specifications of this section and generally reflect the requirements of the applicable sign district. Application of the sign master planning provisions should not detract from the rural character which the Town, through its adopted Master Plan, has expressed a strong desire to maintain. (3-10-92)
3. General Requirements. Total sign area permitted for the entire development or center shall be calculated at the rate of two (2) square feet of sign per foot of lineal building front with a maximum area of five hundred (500) square feet. The Planning Board may waive the maximum area at its discretion. Each sign master planned development may have one (1) common free-standing sign denoting the name of the facility not exceeding eighty (80) square feet per side and with the bottom panel not less than five (5) feet above road level and a maximum height of fifteen (15) feet. All other signs shall be attached to buildings, a wall, projecting or soffit type, and coordinated in material, shape, lettering, color, and/or decorative elements. Information and directional signage, with the exception of uniform traffic control

devices, shall be consistent with the general sign design of the development and is exempt from the sign area calculation provided that it does not contain advertising. (3-13-07)

- a. Signs shall be designed to be compatible with the surroundings and appropriate to the architectural character of the building on which they are placed. Sign panels and graphics should relate with and not cover architectural features, and should be in proportion to them.
- b. Signs should be appropriate to the types of activities they represent.
- c. Layout should be orderly and graphics should be of simple shape, such as rectangle, circle, or oval.
- d. The number of colors used should be the minimum consistent with the design and must provide a reference or relationship to the enterprise or activity being advertised.
- e. Illumination should be appropriate to the character of the sign and surroundings and shall bear a relationship to the operating hours of the enterprise or activity being advertised. Illumination of signs permitted only from one (1) hour before opening until one (1) hour after closing.
- f. Groups of related signs shall express uniformity, create a harmonious appearance, and provide visual and aesthetic coordination of the information presented to the public. (3-13-07)
- g. Height and physical placement shall be consistent throughout the master planned area.
- h. The sign master plan, including a site plan, shall be approved by the Planning Board, at a public hearing, and detail placement, design, color coordination, visibility, information messages and compatibility with the general design of the development.
- i. Off-premises directional signs for the convenience of the general public and for the purpose of directing persons to a business, activity, service, or community facility operating within the Town of Amherst may be erected as part of the sign master plan, providing such signs do not exceed four (4) square feet per sign nor total more than two (2) such signs per development. Messages shall be limited to name or identification, arrow or direction, and distance. Advertising messages shall be prohibited.
- j. Off-premise directional signs shall be classified as free-standing signs and shall not be placed within one hundred (100) feet of another free-standing sign. Illumination is prohibited. Such signs shall be limited to Major Arterial and Minor Arterial roads as defined in the 1988 Functional Classification System for Amherst Street Network published in the Town-Wide Transportation Master plan. Such signs may be permitted on Collector streets, as defined in the same classification system, within the Business Sign District.
- k. Sign panels may be made of any conventional weather resistant and rigid sign material acceptable to the Town of Amherst Planning Board. They shall be fully reflectorized and shall be similar to "Engineering Grade," reflective sheeting with respect to color (day and night), brightness, reflectivity, and durability as specified in the latest edition of the Manual on Traffic Control Devices for Streets and Highways. The panel shall have white legend on a blue background with a half (1/2) inch white border. The legend shall be white and four (4) inch minimum "Highway Type" letters, except that nationally, regionally, or locally-known commercial symbols or trademarks, in their customary colors, may be used when applicable. Sign colors may be coordinated with the development master plan color scheme provided that such a display does not conflict with standardized traffic control

devices and is specifically approved by the Planning Board. Nationally recognized approved symbols for services may be incorporated as alternates to word messages. All off-premise sign legends are subject to approval by the Town of Amherst Planning Board. (3-13-07)

#### M. ADMINISTRATION.

##### 1. Review and Appeals.

Any person aggrieved by a decision of the Zoning Administrator relative to the provisions of this local ordinance may appeal such decision, in writing, to the Board of Appeals as provided in the Zoning Regulations and shall comply with all procedural requirements prescribed by such board. In granting any variance from the provisions of this ordinance, the Board of Appeals must find that the variance is necessary for the reasonable use of the land or buildings, that granting the variance is in harmony with the general purposes and intent of this ordinance, that such will not be injurious to the neighborhood character or otherwise detrimental to the public welfare, and that denial of the variance would result in unnecessary hardship to the applicant.

##### 2. Violations and Penalties.

- a. Any person, firm or corporation, whether as owner, lessee, agent or employee, who proceeds to erect, re-erect, construct or structurally alter any sign without first applying for and obtaining the necessary permit, or who, in any other way, violates any provision of this local ordinance shall be guilty of an offense and receive punishment as established in the RSA's. Each day's continuous violation shall constitute a separate additional violation.
- b. In case of a violation of this local ordinance, the Town and its officers may, in addition to any other remedies specifically conferred by ordinance, institute any appropriate proceedings to prevent unlawful erection, construction, reconstruction, alteration or use of any sign not in compliance with this ordinance. (3-12-91)
- c. Any sign, permitted or not, placed within any public or private right-of-way or placed so as to impede public access, shall be considered to be a threat to public safety and may be removed at the direction of the public safety officers or Zoning Officials.

#### N. INTERNALLY ILLUMINATED SIGNS.

##### 1. Purpose.

The purpose of this ordinance is to permit the installation and operation of internally illuminated signs within the Town of Amherst, recognizing their value in providing information to the general public and an aid in the advertising of businesses.

## 2. General Provisions.

- a. Internally illuminated signs shall be permitted in the Business Sign District within the Town of Amherst only when incorporated as an integral part of an approved sign master plan.
- b. The total area of internally illuminated signage shall not exceed twenty-five (25%) percent of the permitted sign area for the master planned development.
- c. Internally illuminated signs shall conform to all other applicable provisions of the Town of Amherst sign regulations with respect to design, placement, presentation, and other regulated features.
- d. Only one (1) internally illuminated sign shall be permitted per physically separated business unit and shall replace another otherwise permitted sign.
- e. One (1) free-standing internally illuminated sign shall be permitted per development and shall be equal in all other regulated aspects to the free-standing sign it shall replace excepting for the illuminated area limitation of twenty-five (25%) percent as in provision (2) above.
- f. The area of the internally illuminated sign shall not exceed the area of the sign it shall replace for the business or development.
- g. No internally illuminated sign may be erected within three hundred (300) feet of any residential zone within the Town. (3-12-91)
- h. No internally illuminated sign erected as part of a sign master plan may be illuminated until the full master plan is implemented, unless a phasing plan is approved by the Planning Board.

### **Section 3.5 Accessory Apartments**

- A. PURPOSE AND AUTHORITY. The Purpose of this ordinance provision is to provide for accessory apartments while protecting the character of the residential neighborhoods in which they are located. Accessory Apartments shall not detract from the character of the neighborhood, nor shall they create traffic, environmental or aesthetic impacts substantially different than the impacts created by other permitted uses in the neighborhood. (3-12-19)
- B. DEFINITION. An accessory apartment is a second dwelling unit incorporated within an existing or proposed single family home which is structurally integrated with the existing principal dwelling.
- C. REQUIREMENTS FOR ALL ACCESSORY APARTMENTS.
  1. The accessory apartment shall occupy no more than seventy percent (70%) of the existing, gross heated floor area of the primary residence, up to a maximum of one thousand one hundred (1,100) square feet of gross floor area. Accessory apartments shall have no more than two (2) bedrooms.
  2. One (1) accessory apartment may be permitted on a single lot.
  3. Accessory apartments are prohibited when associated with attached housing (i.e.

townhouse or duplex buildings), condominiums or manufactured housing as defined in NH RSA 674:31.

4. Subsequent conveyance of an accessory apartment separate from that of the principal dwelling unit is prohibited.
5. Any changes to the total number of bedrooms per lot will require a new state-approved septic plan to be placed on file with the Community Development Office prior to the issuance of a building permit.
6. Accessory apartments located in an accessory building, detached from the principal dwelling, may be permitted as a Conditional Use in accordance with the provisions of Section 3.18.

### **Section 3.6 Mobile Homes and Trailers.**

- A. The use as a permanent residence of a house trailer or a mobile home is permitted in all zones of the Town which permit residential uses, and within and subject to the criteria of a Planned Residential Development, and subject to SECTION G, Town of Amherst Septic System Ordinance. (3-10-64, 3-10-87, 3-8-88, 3-11-03, 3-8-16)
- B. Registered recreational vehicles, as defined in RSA 259:84-a, may be stored unoccupied in all zones of the Town. (3-12-64, 3-8-16)
- C. The temporary use of a registered recreational vehicle by a person for whom a residence is being built on the property may be permitted by the Zoning Administrator. The Zoning Administrator shall grant permission for a period not to exceed three months, excepting that he may renew at his discretion such permission at the expiration of the three-month period (3-8-16).
- D. A property owner or lessee may accommodate one trailer of a nonpaying guest on their property for a period not exceeding 30 days in any one year (3-8-16).

### **Section 3.7 Building Regulations.**

- A. No building or structure shall be erected, unless in compliance with the following: (3-14-67)
  1. See New Hampshire Building Code. (3-10-98, 3-9-10)
  2. On all new buildings, construction must be at least seventy-five percent (75%) complete before occupied as a dwelling, as determined by the Administrative Official. (3-11-80, 3-14-89)
  3. No building permit for a new dwelling shall be issued unless it meets State mandated minimum size requirements. (3-11-80, 3-11-86, 3-12-91)

### **Section 3.8 Earth Material Removal.**

#### A. AUTHORITY.

Clay, loam, sand, gravel, minerals, and similar earth materials may be removed for either private use, or for sale from any lot parcel of land in any zoning district, except the Historic District and Wetlands Conservation District, only after a special permit for such operation has been issued by the Zoning Administrator, in accordance with the provisions of this section. (3-4-75, 11-2-82)

#### B. APPLICATION.

No Earth Material Removal Permit shall be issued unless application is made in writing on the forms provided for this purpose by the Town and accompanied by the payment of a fee in such amount as the Board of Selectmen may determine from time to time. The application form shall be accompanied by a plan which describes the proposed Earth Material Removal operation. (3-4-75)

#### C. PROCEDURE.

1. Prior to the approval or denial of an Earth Material Removal Permit application, the Selectmen or their agent, shall hold a public hearing. The applicant and all abutters within five hundred (500) feet of the parcel or parcels proposed to have earth material removed, shall be notified of the time and place of such hearing, not less than five (5) days prior to the date affixed for said hearing. (3-4-75)
2. In order to ensure the applicant's performance in adherence with these regulations, the applicant shall post a bond with the Town of Amherst in such amount as the Board of Selectmen may determine from time to time. Such bond shall not be less than five hundred dollars (\$500) per acre and shall be posted prior to the issuance of said permit. (3-4-75)
3. During the period of the permit, the Zoning Administrator shall conduct on-site inspections of the earth material removal operation plan. Not less than sixty (60) days prior to the expiration of the permit, the Zoning Administrator shall conduct a compliance review. This review shall indicate what action is necessary by the operator to: (3-4-75)
  - a. Close out the operation within the permit period in conformance with the plan, or (3-4-75)
  - b. Be eligible to apply for a renewal of the Earth Material Removal Permit. (3-4-75)
    - i. If the operator requests a renewal of his permit, the new application together with an amended operation plan shall be submitted at least forty-five (45) days prior to the expiration of the current permit. (3-4-75)
    - ii. If, at the expiration of the permit, the operator has failed to carry out the reclamation of the site as required by this ordinance in conformance with the operation plan and permit, the bond posted by the operator shall be forfeited and the proceeds used to carry out the reclamation of the site. If the reclamation is performed in accordance with

the operation plan, the bond shall be returned to the operator upon establishment of the cover crop for two (2) full growing seasons or earlier upon certification of the Hillsborough County Conservation District. (3-4-75)

#### D. STANDARDS.

All work executed under an Earth Material Removal Permit shall conform to the following standards:

1. No excavation shall occur within fifty (50) feet of any property line, road right-of-way or zoning district boundary in which district earth material removal is not permitted and the natural vegetation shall be retained in this buffer area. (3-4-75)
2. All finished grades shall in no case be steeper than 2:1 horizontal/vertical slope. (3-4-75)
3. No land shall be excavated below the seasonal high water table except as part of a plan to develop water conservation or recreational uses. This plan must be submitted at the time of application together with a written review of the plan conducted by the Hillsborough County Conservation District. (3-4-75)
4. The excavation shall proceed in a manner which will not allow it to hold standing surface water in excess of two (2) inches in depth except as approved as part of a surface water absorption system designed to minimize surface water runoff. (3-4-75)
5. Upon completion of all excavation, the entire site shall be re-spread with loam to a depth of four (4) inches or the average depth of loam prior to the commencement of excavation, whichever is less. Loam sufficient to meet this requirement shall be stockpiled on the excavation site. (3-4-75)
6. Unless a special waiver is granted at the time the permit is issued, the land area disturbed by the operation and in an un-restored condition shall not exceed a total of five (5) acres at any one time. (3-4-75)
7. When the removal of material is completed, the finished grades, as specified in the approved plan shall have a permanent cover crop established, except when ledge rock is exposed, to assure adequate drainage and prevent erosion. (3-4-75)
8. All excavating, handling, processing, and storage facilities shall be removed, the land cleared of all stumps, logs, brush, and rocks, the final grades indicated on the plan established and the site reclaimed prior to the expiration of the Earth Material Removal Permit unless application has been made and approval granted for the renewal of the permit. (3-4-75)
9. All earth material removal operations shall be maintained in a safe condition at all times. No overhanging banking, potential earth slides, or any other unsafe condition shall be permitted at any time. (3-4-75)

E. EXCEPTIONS.

The removal of loam, sand, gravel, clay, and other similar materials from a site shall require an Earth Material Removal Permit. The following activities conducted on a lot or site shall not require an Earth Material Removal Permit:

1. The removal of less than two hundred (200) cubic yards of material. (3-4-75, 11-2-82, 3-11-03)

**Section 3.9 Reduced Frontage Lots.**

No building permit shall be issued for any structure on any lot within any subdivision approved subsequent to March 4, 1975, which includes any streets, driveways, or highways associated with reduced frontage lots unless such private driveways shall have been constructed in a fashion consistent with the requirements of the Town of Amherst subdivision regulations as adopted from time to time by the Town of Amherst Planning Board dealing with construction requirements and specifications for private driveways. (3-10-87)

**NOTE:** See Town of Amherst Subdivision Regulations, Section 5-2. (3-4-75, 5-1-82)

**Section 3.10 Use Group Classifications.**

A classification system is necessary in order that appropriate fire, health, building regulations can be recognized and applied to proposed new structures or those to be altered.

- A. SCOPE. The provisions of this section shall control the classification of all buildings and structures as to use groups.
- B. The provisions of this section shall not be deemed to nullify any provisions of the Zoning Ordinance.
- C. GENERAL. All buildings and structures shall be classified with respect to use in one of the use groups listed below and such existing or proposed use shall be specified on the application for permit.
  1. Use Group A. Assembly
  2. Use Group B. Business
  3. Use Group E. Educational
  4. Use Group F. Factory and Industrial
  5. Use Group H. High Hazard
  6. Use Group I. Institutional
  7. Use Group M. Mercantile
  8. Use Group R. Residential
  9. Use Group S. Storage
  10. Use Group U. Utility and miscellaneous
- D. DOUBTFUL USE CLASSIFICATION. When a building or structure is proposed for a use not

specifically provided for, the use classification shall be in the use group which it most nearly resembles; and the building or structure shall meet the health and safety requirements of that group.

- E. MIXED USES AND OCCUPANCY. When a building is proposed to be occupied for two (2) or more uses, the provision of associated codes securing the greater public health and safety shall be applied.
- F. INCIDENTAL USES. Where the use is supplemental to the main use of the building and the area devoted to such use does not occupy more than ten percent (10%) of the floor area, the building shall be classified according to the main use. (3-8-88)

### **Section 3.11 Scenic Setbacks.**

- A. PURPOSE. The purpose of this section is to preserve and enhance the rural, open character of the Town as viewed from the main roads leading through the Town and scenic roads within the Town and to prevent unsightly development along these routes.
- B. REGULATIONS. To accomplish the purpose of this section, a setback requirement for all structures of one hundred (100) feet from the highway right-of-way is established on the following roads, and said setbacks shall apply notwithstanding any other setback requirements which may be applicable as a result of other zone regulations: (3-2-76)
  - 1. Rte 122 from Hollis Town line north to Old Rte 101, Horace Greeley Highway. (3-14-00)
  - 2. Boston Post Rd from Stearns Rd north to Route 122
  - 3. Boston Post Rd from Beaver Brook north to Mt. Vernon Rd.
  - 4. Mt. Vernon Rd from Boston Post Rd north to Mt. Vernon Town line
  - 5. Amherst Street (3-9-99, 3-14-00)
  - 6. Horace Greeley Highway from Milford Town line north to Bedford Town line. (3-9-99)
  - 7. New Boston Rd from Boston Post Rd north to Mt. Vernon Town Line
  - 8. Christian Hill Rd from Davis Lane to Route 13
  - 9. Corduroy Rd from Merrimack Rd north to Boston Post Rd.
  - 10. Merrimack Rd from Boston Post Rd north to Corduroy Rd.
  - 11. Mack Hill Rd from Manchester Rd north to Austin Rd.
  - 12. All scenic Roads (see Section E) 3-2-76
- C. EXCEPTIONS TO SCENIC SETBACK REQUIREMENTS.
  - 1. Any person aggrieved by the operation of this section may apply to the Board of Adjustment for a variance herefrom in like manner as in other situations where the existence of a hardship is alleged. (3-2-76)
  - 2. In the event that a lot of record at time of passage of this section is of such size and dimension that the application of the foregoing setback in combination with all other setbacks as may be required for such lot precludes the use of more than sixty percent (60%) of the area of such lot, then the foregoing one hundred (100) foot setback shall not apply to such lot; however, if a lot

qualifies for this exception and is also subject to Non-Residential Site Plan Review by the Planning Board, the Planning Board shall determine that appropriate provision has been provided so as to reasonably achieve the purpose of this section as set forth in Paragraph 1 above. (3-2-76)

The regulations set forth herein, are intended to apply only to the construction of new structures which take place on and after the effective date of this section. Any dwelling or other structure which was in existence at the time of passage of this section, may be enlarged, modified, or otherwise altered without the necessity of complying with the requirements of this section, provided that such alterations do not reduce the setback from the front lot line to an amount less than the setback which exists on the building to be altered. Provided further, however, that such construction or alterations must comply with any other setback requirements applicable in the respective zones other than the scenic setback. (3-2-76, 3-9-82)

### **Section 3.12 Farming.**

#### A. INTENT.

1. In keeping with the goals of the Master Plan, a Right to Farm Ordinance is hereby written to encourage and protect farms and farming in the Town of Amherst. In order to protect the existing farms in the Town of Amherst and to encourage others who might want to farm, it is recognized that “the right to farm” is a natural right and is allowed to exist as a permitted use in the Town of Amherst and State Health and Sanitary Codes for intensive fowl and livestock farms.
2. The right to farm as used in this ordinance includes use of necessary equipment, farm machines, farm laborers, application of fertilizers, etc., for the purpose of producing agricultural products such as vegetables, grains, hay, fruit, trees, plants, etc. The right to farm shall also include the right to use land for grazing by animals and raising of livestock and fowl, when conducted in accordance with generally accepted agricultural practices and may take place on holidays, Sundays, weekends, night and day. (3-13-84)
3. Agricultural operations and Equestrian operations shall be conducted in accordance with the “Manual of Best Management Practices (BMP) for Agriculture in New Hampshire” published by the New Hampshire Department of Agriculture, Markets, and Food. (3-8-05)
4. Two (2) signs totaling twelve (12) square feet are permitted for farm stands.

### **Section 3.13 Dish Antennae.**

PURPOSE. To provide for the safe and aesthetically pleasing installation of dish antennae in the Town of Amherst.

#### A. STANDARDS.

1. These standards shall apply to antennae of four (4) feet in diameter or greater.

2. Only one (1) antenna shall be allowed for each lot.
3. Antennae shall be placed at least one hundred (100) feet back from front property line and shall meet the setback requirements for the particular zone in which it is located.
4. All antennae shall be securely mounted to the ground and shall not be placed on any vehicle or other movable structure.
5. The antennae shall be visually screened from the roadway and adjoining property by the use of vegetation to the maximum extent possible without impairing efficiency so that said screening is effective year-round.
6. No portion of the antenna may exceed fifteen (15) feet in height from the natural ground level.
7. Must be painted matte black or earth tones to blend with surrounding vegetation. (3-11-86)

**Section 3.14 Renewable Energy Systems. (3-11-08, 3-10-09)**

PURPOSE. The purpose of this ordinance is to promote the safe, effective, and efficient use of small renewable energy systems designed to reduce reliance on fossil fuels. In accordance with NH RSA 674:17(j), small renewable energy systems such as, but not limited to, solar, wind, and biomass facilities may be permitted in any Zone (except the Historic District overlay for Small Wind Energy Systems). Systems proposed within the Historic District are also subject to approval of the Historic District Commission. For purposes of this ordinance small energy systems shall be those capable of generating not more than 60 KW. Systems rated for production of more than 60 KW shall be considered commercial uses. (3-9-10)

A. SMALL WIND ENERGY SYSTEMS.

1. Purpose:

This small wind energy systems ordinance is enacted in accordance with RSA 674:62-66, and the purposes outlined in RSA 672:1-III-a. The purpose of this ordinance is to accommodate small wind energy systems in appropriate locations, while protecting the public's health, safety, and welfare. In addition, this ordinance provides a permitting process for small wind energy systems to ensure compliance with the provisions of the requirements and standards established herein.

2. Definitions.

Meteorological tower (met tower). Includes the tower, base plate, anchors, guy wires and hardware, anemometers (wind speed indicators), wind direction vanes, booms to hold equipment for anemometers and vanes, data loggers, instrument wiring, and any telemetry devices that are used to monitor or transmit wind speed and wind flow characteristics over a period of time for either instantaneous wind information or to characterize the wind resource at a given location. For the purpose of this ordinance, met towers shall refer only to those whose purpose is to analyze the environmental factors needed to assess the potential to install,

construct or erect a small wind energy system.

Modification. Any change to the small wind energy system that materially alters the size, type or location of the small wind energy system. Like-kind replacements shall not be construed to be a modification.

Net metering. The difference between the electricity supplied to a customer over the electric distribution system and the electricity generated by the customer's small wind energy system that is fed back into the electric distribution system over a billing period.

Power grid. The transmission system, managed by ISO New England, created to balance the supply and demand of electricity for consumers in New England.

Shadow flicker. The visible flicker effect when rotating blades of the wind generator cast shadows on the ground and nearby structures causing a repeating pattern of light and shadow.

Small wind energy system. A wind energy conversion system consisting of a wind generator, a tower, and associated control or conversion electronics, which has a rated capacity of sixty (60) kilowatts or less and will be used primarily for on-site consumption.

System height. The vertical distance from ground level to the tip of the wind generator blade when it is at its highest point.

Tower. The monopole, guyed monopole, or lattice structure that supports a wind generator.

Tower height. The height above grade of the fixed portion of the tower, excluding the wind generator.

Wind generator. The blades and associated mechanical and electrical conversion components mounted on top of the tower whose purpose is to convert kinetic energy of the wind into rotational energy used to generate electricity.

### 3. Procedure for Review.

- a. **Building Permit.** Small wind energy systems and met towers are an accessory use permitted in all zoning districts where structures of any sort are allowed. No small wind energy system shall be erected, constructed, or installed without first receiving a building permit from the Building Inspector. A building permit shall be required for any physical modification to an existing small wind energy system. Met towers that receive a building permit shall be permitted on a temporary basis not to exceed three (3) years from the date the building permit was issued.
- b. **Application.** Applications submitted to the Building Inspector shall contain a site plan with the following information:
- c. **Property lines and physical dimensions of the applicant's property.**
- d. **Location, dimensions, and types of existing major structures on the property.**

- e. Location of the proposed small wind energy system, foundations, guy anchors, and associated equipment.
  - f. Tower foundation blueprints or drawings.
  - g. Tower blueprints or drawings.
  - h. Setback requirements as outlined in this ordinance.
  - i. The right-of-way of any public road that is contiguous with the property.
  - j. Any overhead utility lines.
  - k. Small wind energy system specifications, including manufacturer, model, rotor diameter, tower height, tower type, nameplate generation capacity.
  - l. Small wind energy systems that will be connected to the power grid shall include a copy of the application for interconnection with their electric utility provider.
  - m. Sound level analysis prepared by the wind generator manufacturer or qualified engineer.
  - n. Electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the NH State Building Code.
  - o. Evidence of compliance or non-applicability with Federal Aviation Administration requirements.
  - p. List of abutters to the applicant's property. Three sets of typed gummed labels (1" x 2.5").
4. Abutter and Regional Notification. In accordance with RSA 674:66, the Building Inspector shall notify all abutters and the local governing body by certified mail upon application for a building permit to construct a small wind energy system. The public will be afforded thirty (30) days to submit comments to the Building Inspector prior to the issuance of the building permit. The Building Inspector shall review the application for regional impacts per RSA 36:55. If the proposal is determined to have potential regional impacts, the Building Inspector shall follow the procedures set forth in RSA 36:57, IV.
5. Standards. The Building Inspector shall evaluate the application for compliance with the following standards:
- a. Setbacks. The setback shall be calculated by multiplying the minimum setback requirement number by the system height and measured from the center of the tower base to property line, public roads, or nearest point on the foundation of an occupied building.

Minimum Setback Requirements			
Occupied Buildings on Participating Landowner Property	Occupied Buildings on Abutting Property	Property Lines of Abutting Property and Utility Lines	Public Roads
0	1.5	1.1	1.5

- b. Small wind energy systems must meet all setbacks for principal structures for the zoning district in which the system is located.
  - c. Guy wires used to support the tower are exempt from the small wind energy system setback requirements.
6. Tower. The maximum tower height shall be restricted to thirty-five (35) feet above the tree

canopy within three hundred (300) feet of the small wind energy system. In no situation shall the tower height exceed one hundred fifty (150) feet.

7. Sound Level. The small wind energy system shall not exceed fifty-five (55) decibels using the A scale (dBA), as measured at the site property line, except during short-term events such as severe wind storms and utility outages.
8. Shadow Flicker. Small wind energy systems shall be sited in a manner that does not result in significant shadow flicker impacts. Significant shadow flicker is defined as more than thirty (30) hours per year on abutting occupied buildings. The applicant has the burden of proving that the shadow flicker will not have significant adverse impact on neighboring or adjacent uses. Potential shadow flicker will be addressed either through siting or mitigation measures.
9. Signs. All signs including flags, streamers and decorative items, both temporary and permanent, are prohibited on the small wind energy system, except for manufacturer identification or appropriate warning signs.
10. Code Compliance. The small wind energy system shall comply with all applicable sections of the New Hampshire State Building Code.
11. Aviation. The small wind energy system shall be built to comply with all applicable Federal Aviation Administration regulations including but not limited to 14 C.F.R. part 77, subpart B regarding installations close to airports, and the New Hampshire Aviation regulations, including but not limited to RSA 422-b and RSA 424.
12. Visual Impacts. It is inherent that small wind energy systems may pose some visual impacts due to the tower height needed to access wind resources. The purpose of this section is to reduce the visual impacts, without restricting the owner's access to the optimal wind resources on the property.
  - a. The applicant shall demonstrate through project site planning and proposed mitigation that the small wind energy system's visual impacts will be minimized for surrounding neighbors and the community. This may include, but not be limited to information regarding site selection, wind generator design or appearance, buffering, and screening of ground mounted electrical and control equipment. All electrical conduits shall be underground, except when the financial costs are prohibitive.
  - b. The color of the small wind energy system shall either be the stock color from the manufacturer or painted with a non-reflective, unobtrusive color that blends in with the surrounding environment. Approved colors include but are not limited to white, off-white or gray.
  - c. A small wind energy system shall not be artificially lit unless such lighting is required by the Federal Aviation Administration (FAA). If lighting is required, the applicant shall provide a copy of the FAA determination to establish the required markings and/or lights for the small wind energy system.
13. Approved Wind Generators. The manufacturer and model of the wind generator to be used in

the proposed small wind energy system must have been approved by the California Energy Commission or the New York State Energy Research and Development Authority, or a similar list approved by the state of New Hampshire, if available.

14. Utility Connection. If the proposed small wind energy system is to be connected to the power grid through net metering, it shall adhere to RSA 362-A:9.
15. Access. The tower shall be designed and installed so as not to provide step bolts or a ladder readily accessible to the public for a minimum height of eight (8) feet above the ground. All ground-mounted electrical and control equipment shall be labeled and secured to prevent unauthorized access.
16. Clearing. Clearing of natural vegetation shall be limited to that which is necessary for the construction, operation and maintenance of the small wind energy system and as otherwise prescribed by applicable laws, regulations, and ordinances.
17. Abandonment.
  - a. At such time that a small wind energy system is scheduled to be abandoned or discontinued, the applicant will notify the Building Inspector by certified U.S. mail of the proposed date of abandonment or discontinuation of operations.
  - b. Upon abandonment or discontinuation of use, the owner shall physically remove the small wind energy system within ninety (90) days from the date of abandonment or discontinuation of use. This period may be extended at the request of the owner and at the discretion of the Building Inspector. "Physically remove" shall include, but not be limited to:
    - i. Removal of the wind generator and tower and related above-grade structures.
    - ii. Restoration of the location of the small wind energy system to its natural condition, except that any landscaping, grading or below-grade foundation may remain in its same condition at initiation of abandonment.
