  - c. In the event that an applicant fails to give such notice, the system shall be considered abandoned or discontinued if the system is out-of-service for a continuous twelve (12) month period. After the twelve (12) months of inoperability, the Building Inspector may issue a Notice of Abandonment to the owner of the small wind energy system. The owner shall have the right to respond to the Notice of Abandonment within thirty (30) days from Notice receipt date. After review of the information provided by the owner, the Building Inspector shall determine if the small wind energy system has been abandoned. If it is determined that the small wind energy system has not been abandoned, the Building Inspector shall withdraw the Notice of Abandonment and notify the owner of the withdrawal.
  - d. If the owner fails to respond to the Notice of Abandonment or if, after review by the Building Inspector, it is determined that the small wind energy system has been abandoned or discontinued, the owner of the small wind energy system shall remove the wind generator and tower at the owner's sole expense within three (3) months of receipt of the Notice of Abandonment. If the owner fails to physically remove the small wind energy system after the Notice of Abandonment procedure, the Building Inspector may

pursue legal action to have the small wind energy system removed at the owner's expense.

18. Violation. It is unlawful for any person to construct, install, or operate a small wind energy system that is not in compliance with this ordinance. Small wind energy systems installed prior to the adoption of this ordinance are exempt from this ordinance except when modifications are proposed to the small wind energy system.

19. Penalties. Any person who fails to comply with any provision of this ordinance or a building permit issued pursuant to this ordinance shall be subject to enforcement and penalties as allowed by NH Revised Statutes Annotated Chapter 676:17.

### **Section 3.15 Home Occupations. (3-14-95, 3-11-08)**

A. PURPOSE AND AUTHORITY. The Purpose of this ordinance is to provide for home-based businesses while protecting the character of the residential neighborhoods in which they operate. The activities associated with home occupations are not to detract from the rural character of the Town nor shall they create traffic, environmental or aesthetic impacts substantially different than the impacts created by other permitted uses in the neighborhood.

B. DEFINITION. An occupation or business activity which is conducted by a resident within his/her own dwelling or in a garage or barn-type outbuilding and which is clearly subordinate to the principal residential use.

C. REQUIREMENTS FOR ALL HOME OCCUPATIONS.

1. The home occupation shall occupy no more than twenty percent (20%) of the existing, gross heated floor area of the primary residence or, if the home occupation is conducted in an outbuilding, shall not occupy an area greater than fifty percent (50%) of the existing, gross heated floor area of the primary residence. Up to a maximum of one thousand (1,000) square feet of covered area may be dedicated to the home occupation.

2. No emissions of dust, fumes, smoke, noise (greater than sixty-five [65] decibels), vibration, light, or water attributable to the home occupation shall be allowed across the property line.

3. No outdoor display advertising or storage of any products or materials associated with the home occupation shall be allowed except as provided below.

4. No more than two (2) trips per day by commercial delivery vehicles (on average) shall be allowed.

D. CLASSES OF HOME OCCUPATION.

1. Class A Home Occupation. A Class A Home Occupation has no impact on the neighborhood.

a. The business is not visible to the surrounding properties or the street.

- b. Activity is carried out entirely within the residence or accessory buildings, there is no sign other than a rural delivery mailbox.
  - c. No vehicle other than the residents' personal vehicles, which are not lettered or painted to advertise the business.
  - d. The business has no employees other than the residents of the dwelling.
  - e. No clients or customers come to the house to transact business, and any deliveries are made by standard delivery truck (no large freight vehicles are involved in the day-to-day operation).
  - f. Operators of Class A Home Occupations may choose to register with the Town, using the Home Occupation Registration form. A copy of the registration form, signed by the Planning Director, will be provided to the operator if requested.
2. Class B Home Occupation. A Class B Home Occupation has minimal impact on the surrounding neighborhood.
- a. No structural change or addition to the existing buildings indicates the business use of the property.
  - b. The business has no employees other than the residents of the dwelling.
  - c. One non-illuminated sign not to exceed six square feet per side may be displayed.
  - d. One vehicle displaying text or decoration promoting the business may be allowed.
  - e. Up to three clients or customers per day (on average) may be received.
  - f. Hours of outside operation may be 8:00 a.m. to 6:00 p.m., Monday thru Saturday.
  - g. Operators of Class B Home Occupations must register with the Town, using the Home Occupation Registration form. A copy of the registration form, signed by the Planning Director, will be kept on the premises in a readily accessible location.
3. Class C Home Occupation. A Class C Home Occupation has minor impact on the surrounding neighborhood.
- a. No structural change or addition to the existing buildings indicates the business use of the property.
  - b. The business has no more than two employees other than the residents of the dwelling.
  - c. One non-illuminated sign not to exceed six (6) square feet per side, may be displayed.
  - d. One vehicle displaying text or decoration promoting the business may be allowed.
  - e. Up to ten clients or customers per day (on average) may be received.
  - f. Hours of outside operation are 8:00 a.m. to 6:00 p.m., Monday thru Friday, 9:00 am to 8:00 pm Saturday.
  - g. Deliveries other than those by standard delivery truck must be received between 10:00 am and 2:00 pm.
  - h. The site must accommodate parcel pick-up and delivery with facilities for drop-off storage.
  - i. Operators of Class C Home Occupations must register with the Town, using the Home Occupation Registration form.
  - j. In addition the operator must provide documentation of the adequacy of the septic system for the proposed use, and a sketch of the property demonstrating adequate areas designated for parking of employees and clients/customers, access and turning of delivery vehicles, and safe pedestrian access for clients/customers to the business where applicable. A copy

of the registration form, signed by the Planning Director, will be kept on the premises in a readily accessible location.

E. SPECIAL PROVISIONS.

1. Any Bed & Breakfast operated under this section of the ordinance shall be limited to a maximum of five (5) bedrooms for guest use.
2. Scale of operation of any Class B or C Home Occupation may be limited by the capacity of the existing septic system.
3. Adequate off-street parking must be provided for any Class B or C Home Occupation.

F. RENEWAL OR EXPIRATION OF REGISTRATION.

1. Class B and C Home Occupation registrations and the uses provided for therein, shall automatically terminate five years after the date of issuance but shall be renewed by the Town provided that the dwelling owner shall certify that the use is in compliance with this ordinance.
2. Class B Home Occupations that grow to exceed the requirements under Section 3.15.D. 2 shall comply with the requirements of Section 3.15.D.3 within six (6) months.
3. Class C Home Occupations shall not exceed the requirements of Section 3.15.D.3 and may be directed by the Planning Director or designated officer to reduce the impact of the operation or move to a non-residential site within sixty (60) days.
4. Home Occupation permits are not transferable.

G. PROHIBITED USES.

Home Occupation uses shall not include the following:

1. Any use that generates, stores or uses regulated hazardous substances, receives or ships hazardous materials regulated under Chapter 49 - Code of Federal Regulations, or that generates or disposes of hazardous waste as regulated under Chapter 40 - Code of Federal Regulations. This prohibition includes dry cleaning facilities, metal extraction and salvage operations, most landscaping businesses, machine shops, photo-developing operations, and laboratories.
2. Sales or repairs of automobiles, snowmobiles, jet skis or other motorized vehicles.
3. Hair or nail salons, barber, or beauty shops.
4. Medical or dental group practice clinics or veterinary clinics.
5. Clothing cleaners or dyers.

6. Banks.
7. Coffee or sandwich shops or other restaurant facilities.
8. Daycare facilities larger than a maximum of six (6) children. (3-9-10)

#### H. PERMITTED USES NOT REGULATED AS HOME OCCUPATIONS.

Certain activities conducted in residential zones are regulated by other parts of the Amherst Zoning Ordinance:

1. Farming and Agricultural Uses, including Farming. (Section 3-12)
2. Personal Wireless Service Facilities. (Section 3-16)
3. Equestrian Facilities and Events. (Section 3-17)
4. Non-commercial sports and recreational uses.
5. By Special Exception in certain zones:
  - a. Kennels
  - b. Sawmills
  - c. Religious Uses
  - d. Funeral Homes
  - e. Nursing Homes

### **Section 3.16 Personal Wireless Service Facilities. (3-12-13)**

#### A. PURPOSE AND INTENT.

It is the express purpose of this Article to permit carriers to locate personal wireless service facilities within particular areas of the Town of Amherst consistent with appropriate land use regulations that will ensure compatibility with the visual and environmental features of the Town. Compatibility with the visual features of Amherst is measured based on the change in community scale and character in relation to the height, mass, materials, contrasts, or proportion within the surroundings of a proposed Personal Wireless Service Facility. This Article enables the review of the locating and siting of Personal Wireless Service Facilities by the Town of Amherst so as to eliminate or mitigate the visual and environmental impacts of Personal Wireless Service Facilities.

The intent of this ordinance is to implement the following goals and objectives throughout the Town of Amherst, while conforming to federal and local laws and regulations:

1. Facilitate the provisions of Personal Wireless Services to the residents and businesses of Amherst;

2. Provide for the appropriate location and development of Personal Wireless Service Facilities;
3. Minimize adverse visual and environmental effects of towers and antennas through careful design and siting standards;
4. Encourage cooperation and co-location whenever possible; and,
5. Minimize economic impacts on adjacent property values.

B. APPLICABILITY.

The terms of this Article and the Site Plan Review Regulations shall apply to Personal Wireless Services Facilities proposed to be located on property owned by the Town of Amherst, on privately-owned property, and on property that is owned by any other governmental entity that acts in its proprietary capacity to lease such property to a carrier.

C. DEFINITIONS. For the purpose of this Article, the following terms shall have the meaning given herein:

Antenna. The surface from which wireless radio signals are sent and/or received by a Personal Wireless Service Facility.

Antenna Array. A collection of antennas attached to a mount to send and receive radio signals.

Average Tree Canopy Height. An average height found by inventorying the height at above ground level (AGL) of all trees over twenty (20) feet in height for a defined area. The AGL shall be calculated on the trees within a radius of fifty (50) feet from the proposed Tower, (trees to be removed at tower site cannot be used in calculations.) (3/13/01)

Camouflaged. A Personal Wireless Service Facility that is disguised, hidden, part of an existing or proposed structure, or placed within an existing or proposed structure. All paint shall be flat to avoid any reflection. (3/13/01)

Carrier. A Company that provides personal wireless services also sometimes referred to as a provider.

Co-location. The use of a single mount on the ground by more than one (1) carrier (vertical co-location) or the same carrier with multiple licenses, and/or the use of several mounts on an existing building or structure by more than one (1) carrier or the same carrier with multiple licenses.

Environmental Assessment (EA). An EA is a document required by the Federal Communications Commission (FCC) and the National Environmental Policy Act (NEPA) when a Personal Wireless Service Facility is placed in certain designated areas.

Equipment Shelter. An enclosed structure, cabinet, shed, vault, or box near the base of the mount within which is housed equipment for Personal Wireless Service Facilities such as batteries and electrical equipment. Equipment shelters are sometimes referred to as base transceiver stations.

Existing Personal Wireless Service Facility. A Personal Wireless Service Facility that has received Planning Board and Building Permit approvals, and a final Certificate of Operation. To be considered an Existing Facility a current security shall be on file with the Town in accordance with Section 3.16.H.3.

Facility. See Personal Wireless Service Facility.

Fall Zone. The area on the ground from the base of a ground mounted Personal Wireless Service Facility that forms a circle with a diameter equal to the height of the facility, including any antennas or other appurtenances, as set forth in Figure 1. The fall zone is the area within which there is a potential hazard from falling debris (such as ice) or collapsing material. Fall zones may overlap.

Guyed Tower. A monopole or lattice tower that is secured to the ground or other surface by diagonal cables for lateral support.

Height. The height above ground level (AGL) from the natural grade of a site to the highest point of a structure.

Lattice Tower. A type of mount with multiple legs and structural cross bracing between the legs that is self-supporting and free-standing.

Mast. A thin pole that resembles a street light standard or a telephone pole. A dual-polarized antenna is typically deployed on a mast.

Monopole. A thicker type of mount than a mast that is self-supporting with a single shaft of wood, steel or concrete, or other material that is designed for the placement of antennas and arrays

along the shaft.

Mount. The structure or surface upon which antennas are mounted, including the following four (4) types of mounts:

Roof-mounted. Mounted on the roof of a building.

Side-mounted. Mounted on the side of a building.

Ground-mounted. Mounted on the ground.

Structure-mounted. Mounted on a structure other than a building.

Personal Wireless Service Facility. Facility for the provision of personal wireless services, as defined by the Telecommunications Act of 1983 and 1996, as amended. Personal Wireless Service Facilities include a mount, antenna, equipment shelter, and other related equipment. Personal Wireless Service Facilities do not include private or non-commercial wireless communication facilities such as amateur ham radio and citizens band radio.

Personal Wireless Services. The three types of services regulated by this ordinance: commercial mobile radio services, unlicensed wireless services, and common carrier wireless exchange access services as described in the Telecommunications Act of 1996, as amended.

Radio Frequency (RF) Engineer. An engineer specializing in electrical or microwave engineering, especially the study of radio frequencies.

Radio Frequency Radiation (RFR). The emissions from personal wireless service facilities.

Security Barrier. A wall, fence, or berm that restricts an area from unauthorized entry or trespass.

Separation. The distance between one carrier's array of antennas and another carrier's array.

#### D. DISTRICT AND FEDERAL REGULATIONS.

1. Location – Personal Wireless Service Facilities shall be permitted in all Zoning Districts in accordance with this ordinance. Applicants seeking approval for Personal Wireless Service Facilities shall first evaluate existing structures for the siting of Personal Wireless Service Facilities. Only after finding that there are no suitable existing structures pursuant to Section 3.16.E herein, shall a provider propose a new ground mounted facility.
2. Existing Structures: Policy – When available, Personal Wireless Service Facilities shall be located on existing structures, including but not limited to buildings, water towers, existing Personal Wireless Service Facilities, utility poles or towers, and related facilities, provided that such installation preserves the character and integrity of those structures.

3. Existing Structures: Burden of Proof – The applicant shall have the burden of proving that there are no existing structures which are suitable to locate its Personal Wireless Service Facility and/or transmit or receive radio signals. To meet that burden, the applicant shall take all the following actions to the extent applicable:
  - a. The applicant shall submit to the Planning Board a list of all contacts made with owners of potential sites regarding the availability of potential space for a Personal Wireless Service Facility. If the Planning Board informs the applicant that additional existing structures may be satisfactory, the applicant shall contact the property owner(s) of those structures.
  - b. The applicant shall provide copies of all letters of inquiry made to owners of existing structures and letters of rejection. If letters of rejections are not provided, at a minimum, unanswered “Return Receipt Requested” forms from the U.S. Post Office shall be provided for each owner of existing structures that was contacted.
  - c. If the applicant claims that a structure is not capable of physically supporting a Personal Wireless Service Facility, this claim must be certified by a licensed professional civil engineer. The certification shall, at a minimum, explain the structural issues and demonstrate that the structure cannot be modified to support the Personal Wireless Service Facility without unreasonable costs. The estimated cost shall be provided to the Planning Board.
  - d. Ground Mounted Facilities: Policy – New ground-mounted facilities are permitted but only when the use of existing structures and buildings are found to be not feasible. If the applicant demonstrates that it is not feasible to locate on an existing structure, ground mounted personal wireless service facilities shall be designed so as to be camouflaged to the greatest extent possible, including but not limited to: use of compatible building materials and colors, screening, landscaping, and placement within trees.
  - e. Federal Requirements: All facilities must meet or exceed current standards and regulations of the Federal Aviation Administration (FAA), Federal Communications Commission (FCC), and any other agency of the federal government with the authority to regulate such facilities.

E. USE REGULATIONS. A Personal Wireless Service Facility shall require a building permit in all cases and is permitted as follows:

1. Existing Tower Structures: Subject to the issuance of a building permit, carriers may locate a Personal Wireless Service Facility on any guyed tower, lattice tower, mast, or monopole in existence prior to the adoption of this Article, or on any Personal Wireless Service Facility previously approved under the provisions of this Article so long as the co-location complies with the approved site plan. All the Performance Standards from this Article shall be met.
2. Reconstruction of Existing Tower Structures: An existing guyed tower, lattice tower, monopole, or mast in existence prior to the adoption of this Article may be reconstructed with a maximum twenty (20) foot increase in height so as to maximize co-location so long as the standards of this Article are met and so long as this twenty (20) foot increase in height does not cause a facility previously existing at less than two hundred (200) feet to exceed two

hundred (200) feet in height. The mount shall be replaced with a similar mount that does not significantly increase the visual impact on the community.

3. Existing Structures: Subject to the provisions of this Section, a carrier may locate a Personal Wireless Service Facility on an existing structure, building, utility tower or pole, or water tower.
4. Ground Mounted Facility: A new Personal Wireless Service Facility involving construction of a ground mount shall require site plan review and be subject to the provisions of this Section.

F. DIMENSIONAL REQUIREMENTS. Personal Wireless Service Facilities erected, constructed, located, replaced, altered, or extended within the Town shall comply with the following dimensional requirements:

1. Height, Maximum: In no case shall a Personal Wireless Service Facility exceed two hundred (200) feet in height, unless the mount for the facility was greater than two hundred (200) feet in height prior to the adoption of this Section.
2. Height, Existing Structures and Utility Poles: Carriers that locate new Personal Wireless Service Facilities on water towers, electric transmission and distribution towers, utility poles and similar existing utility structures, guyed towers, lattice towers, masts, and monopoles may be permitted to increase the height of those structures no more than twenty (20) feet, or forty (40) feet at the discretion of the Planning Board, if the additional height will not materially impair the visual impacts of the site. This increase in height shall only be permitted once for each structure.
3. Height, Other Existing Structures: The height of a Personal Wireless Service Facility shall not increase the height of a structure by more than fifteen (15) feet, unless the facility is completely camouflaged; for example a facility completely within a flagpole, steeple, or chimney. The increase in the height of the structure shall be in scale and proportion to the structure as originally configured. A carrier may locate a Personal Wireless Service Facility on a building that is legally non-conforming with respect to height, provided that the provisions of this Section are met.
4. Height, Ground-Mounted Facilities: New ground-mounted Personal Wireless Service Facilities shall not project higher than twenty (20) feet above the average tree canopy height within a one hundred and fifty (150) foot radius of the mount, security barrier, or designated clear area for access to equipment, whichever is greatest.
5. Setbacks: In addition to compliance with the minimum zoning district setback requirements, ground-mounted facilities must be set back, at a minimum, the distance equal to the fall zone, as defined in Section 3.16.C Definitions and 3.16.F Dimensional Requirements. All personal wireless service facilities and their equipment shelters shall comply with the building setback provisions of the zoning district in which the facility is located and if the fence is six (6) feet or more in height, in accordance with the appropriate Zoning Ordinances and building codes.

6. Fall Zone for Ground Mounts: In order to ensure public safety, the minimum distance from the base of any ground-mount of a Personal Wireless Service Facility to any property line, public road, habitable dwelling, business or institutional use, or public recreational area shall be, at a minimum, the distance equal to the fall zone, as defined in this Article. The fall zone may cross property lines, so long as the applicant secures a fall zone easement from the affected property owner(s). The area of the easement shall be shown on all applicable plans submitted to the Town, and the terms of the easement shall be provided as part of the site plan review. (Multiple fall zones may overlap.) (3-13-01)
7. Fall Zone for Non-Ground Mounts: In the event that an existing structure is proposed as a mount for a Personal Wireless Service Facility, a fall zone shall not be required, but the setback provisions of the zoning district shall apply. In the case of pre-existing non-conforming structures, Personal Wireless Service Facilities and their equipment shelters shall not increase any non-conformities.
8. Planning Board Flexibility: Heights – In reviewing a site plan application for a Personal Wireless Service Facility, the Planning Board may permit an increase in the height of a ground mounted facility up to forty (40) feet above the average tree canopy height, if no material increase in visual or environmental impacts will result from the increased height. The visual and environmental criteria of this Section and the Site Plan Review Regulations shall be the guidelines in making this determination.

#### G. PERFORMANCE AND DESIGN STANDARDS.

1. Visibility.
  - a. Visual impacts are measured on the basis of:
    - i. Change in community scale, as exhibited in relative height, mass, or proportion of the Personal Wireless Service Facility within their proposed surroundings.
    - ii. New visible elements proposed on a contrasting background.
    - iii. Different colors and textures proposed against a contrasting background.
    - iv. Use of materials that are foreign to the existing built environment.
  - b. Enhancements are measured on the basis of:
    - i. Conservation of opportunities to maintain community scale, e.g. buffering areas and low-lying buildings should not be compromised so as to start a trend away from the existing community scale.
    - ii. Amount and type of landscaping and/or natural vegetation.
    - iii. Preservation of designated historic structures and districts, view corridors, vistas, and view sheds.
    - iv. Continuation of existing colors, textures, and materials.
  - c. Visibility focuses on:
    - i. Eliminating or mitigating visual impact.

- ii. Protecting, continuing, and enhancing the existing environment.
  - d. Camouflage for Facilities on Existing Buildings or Structures – Roof Mounts: When a Personal Wireless Service Facility extends above the roof height of a building on which it is mounted, every effort shall be made to conceal or camouflage the facility within or behind existing or new architectural features to limit its visibility from public ways. Facilities mounted on a roof shall be stepped back from the front façade in order to limit their impact on the building’s silhouette.
  - e. Camouflage for Facilities on Existing Buildings or Structures – Side Mounts: Personal Wireless Service Facilities which are side mounted shall blend with the existing building’s architecture and, if individual antenna panels are over five (5) square feet, the panels shall be painted or shielded with material consistent with the design and materials of the building.
  - f. Camouflage for Ground Mounted Facilities: All ground-mounted Personal Wireless Service Facilities shall be surrounded by a buffer of dense tree growth that extends continuously for a minimum distance of one hundred and fifty (150) feet from the mount, and screens views of the facility in all directions, as set forth in Figure 2. These trees must be existing on the subject property, planted on site, or be within a landscape easement on an adjoining site. The Planning Board shall have the authority to decrease, relocate, or alter the required buffer based on-site conditions. The one hundred and fifty (150) foot vegetative buffer area shall be protected by a landscape easement or be within the area of the carrier’s lease. The easement or lease shall specify that the trees within the buffer shall not be removed or topped, unless the trees are dead or dying and present a hazard to persons or property.

2. Color: To the extent that any Personal Wireless Service Facilities extend above the height of the vegetation immediately surrounding them, they shall be of a color which blends with the background or surroundings.
3. Equipment Shelters – Equipment shelters for Personal Wireless Service Facilities shall be designed consistent with one of the following design standards:
  - a. Equipment shelters shall be located in underground vaults; or
  - b. Equipment shelters shall be designed so that the shelters are architecturally consistent, with respect to materials and appearance, to the buildings in the area of the Personal Wireless Service Facility; or
  - c. Equipment shelters shall be camouflaged behind an effective year-round landscape buffer, equal to the height of the proposed building, and/or wooden fence. The Planning Board shall determine the style of fencing and/or landscape buffer that is compatible with the neighborhood; or
  - d. If mounted on a roof top, the equipment shelter shall be concealed or camouflaged so that the shelter either is not visible at grade or appears to be part of the original structure.

4. Lighting, Signage, and Security.

- a. Lighting: Towers shall not be artificially lighted, unless required by the FAA or other applicable authority. If lighting is required, the regulatory authority may review the available lighting alternatives and approve the design that would cause the least disturbance to the abutters and travelers on Town roads. Lighting of equipment structures and any other facilities on-site shall be shielded from abutting properties. Foot-candle measurements at the property line shall be 0.0 initial foot candles.
- b. Signage: Signs shall be limited to those needed to identify the property and the owners and warn of any danger. All signs shall comply with the requirements of Article III, Section 3.4 of the Amherst Zoning Ordinance.
- c. Security Barrier: The Planning Board shall have final authority on whether a ground mounted Personal Wireless Service Facility should be surrounded by a security barrier.

5. Historic Buildings and Districts.

- a. Any Personal Wireless Service Facility located on or within an historic structure shall not alter the character-defining features, distinctive construction methods, or original historic materials of the building.
- b. Any alteration made to an historic structure to accommodate a Personal Wireless Service Facility shall be fully reversible.
- c. Personal Wireless Service Facilities authorized by this subsection shall be concealed within or behind existing architectural features, or shall be located so that they are not visible from public roads and viewing areas.
- d. Personal Wireless Service Facilities located in the Amherst Village Historic District are subject to review by the Historic District Commission and shall comply with the regulations of the Historic District.

6. Scenic Landscapes and Vistas – Ground-mounted facilities shall not be located within open areas that are clearly visible from public roads, recreational areas, or abutting properties. All ground-mounted Personal Wireless Service Facilities shall be surrounded by a buffer of dense tree growth as per Section 3.16.G.1.f.

7. Driveways – If available, existing entrances and driveways to serve a Personal Wireless Service Facility shall be utilized, unless the applicant can demonstrate that a new entrance and driveway will result in less visual, traffic, and environmental impact. New driveways to serve a Personal Wireless Service Facility shall not exceed eighteen (18) feet in width. A gravel or crushed stone surface is encouraged.

8. Antenna Types – Any antenna array placed upon an existing or proposed ground mount, utility pole or transmission line mount shall have a diameter of no more than four (4) feet, exclusive of the diameter of the mount. A larger diameter antenna array may be permitted after a finding by the Planning Board that the visual impacts of a larger antenna array are negligible.

9. Ground and Roof Mounts – All ground mounts shall be of a mast type mount. Lattice towers, guyed towers, and roof mounted monopoles are expressly prohibited, unless constructed as

part of a reconstruction project permitted under Section 3.16.E.2.

10. Hazardous Waste and Materials – No hazardous waste shall be discharged on the site of any Personal Wireless Service Facility. If any hazardous materials are to be used on-site, there shall be provisions for full containment of such materials. An enclosed containment area shall be provided with a sealed floor, designed to contain at least one hundred ten percent (110%) of the volume of the hazardous materials stored or used on the site.
11. Noise – Personal Wireless Service Facilities shall not generate noise in excess of that permitted under the Amherst Noise Ordinance.
12. Radio Frequency Radiation (RFR) Standards – All equipment proposed for Personal Wireless Service Facilities shall be fully compliant with the FCC Guidelines for Evaluating and Environmental Effects of Radio frequency Radiation (FCC Guidelines), under Report and Order, FCC 96-326, published on August 1, 1996, and all subsequent amendments.
13. Back-up Power Generation - All Personal Wireless Service Facilities shall have a back-up power generation source in case of power outages. The Planning Board shall approve the type of power source to be utilized which is most appropriate for each site location.

#### H. MONITORING AND MAINTENANCE.

1. Maintenance – The owner of the facility shall maintain the Personal Wireless Service Facility in good condition. Such maintenance shall include, but shall not be limited to, painting, structural integrity of the mount and security barrier, and maintenance of the buffer areas and landscaping. The Zoning Administrator has the authority to inspect approved Personal Wireless Service Facilities for compliance with the approved site plan as necessary.
2. Monitoring – As part of the issuance of the site plan approval or building permit, the property owner shall agree that the Town of Amherst may enter the subject property to obtain RFR measurements and noise measurements at the expense of the carrier. The Town shall provide reasonable written notice to the carrier and landowner and provide them the opportunity to accompany the Town representatives when the measurements are conducted.
3. Security for Removal – Recognizing the hazardous situation presented by abandoned and unmonitored Personal Wireless Service Facilities, all owners of Personal Wireless Service Facilities shall obtain and maintain a bond or other approved form of security, in an amount set forth by the Planning Board. The Planning Board shall set the form and amount of security that represents the cost for removal and disposal of abandoned Personal Wireless Service Facilities in the event that a facility is abandoned and the facility owner is unwilling or unable to remove the facility in accordance with Section 3.16.J.
  - a. The amount of the security shall be based upon the removal cost plus fifteen percent (15%), provided by the applicant and certified by a professional structural engineer licensed in New Hampshire. The owner of the facility shall provide the Planning Board with a revised removal cost estimate and structural evaluation prepared by a professional

structural engineer licensed in New Hampshire every five (5) years from the date of the Planning Board's approval of the site plan or at the time of Bond renewal. If the cost has increased more than fifteen percent (15%) then the owner of the facility shall provide additional security in the amount of the increase.

- b. The security shall contain the following language:
  - i. Now therefore, if the Principle (owner) well and truly complies with the requirement to remove and dispose of said tower in a timely manner in accordance with the following:
    - a) Section 3.16.J Abandonment or Discontinuation of Use, of the Personal Wireless Service Facilities,
    - b) any applicable town, state, or federal regulations; as well as,
    - c) any other conditions of approval relating to the maintenance of adequate security to insure to cover all costs related to such removal and disposal.
  - ii. The failure to provide a replacement bond no later than one hundred twenty (120) days prior to the expiration date of the within bond shall constitute a breach of the conditions of approval sufficient to permit the Planning Board to revoke the approval of the Personal Wireless Service Facility Non-residential Site Plan. In the event of such revocation, the obligation to remove shall immediately commence and the obligee shall be entitled to proceed to recover the costs of such removal from the security.

## I. PROCEDURAL REQUIREMENTS.

- 1. Application Process - All personal wireless service equipment installations and personal wireless service developments, except as provided elsewhere, are subject to review and site plan approval by the Planning Board. The Planning Board shall act upon the application in accordance with procedural requirements of the Non-Residential Site Plan Regulations and RSA 676:4, as amended.
- 2. Applicant must supply the Planning Board with the following information as part of the application:
  - a. An inventory of existing towers that are within the jurisdiction of the Town and those within two (2) miles of the border thereof, including specific information about the location, height, design of each tower, as well as economic and technological feasibility for the co-location on the inventoried towers. The Planning Board may share such information with other applicants applying for approvals under this section or other organizations seeking to locate antennas within the jurisdiction of the Town, provided, however, that the Planning Board is not, by sharing such information, in any way representing or warranting that such sites are available or suitable.
  - b. If the applicant is proposing to build a new tower, the applicant shall submit written evidence demonstrating that no existing structure can accommodate the applicant's proposed antenna. This evidence may consist of:
    - i. Substantial evidence that no existing towers or structures are located within the

- geographic area required to meet the applicant's engineering requirements, including a description of the geographic area required.
  - ii. Substantial evidence that existing towers are not of sufficient height to meet the applicant's engineering requirements and why.
  - iii. Substantial evidence that the existing towers or structures do not have sufficient structural strength to support applicant's proposed antenna and related equipment.
  - iv. Substantial evidence that the applicant's proposed antenna would cause electromagnetic interference with antennae on existing towers or structures, or antennae on existing towers or structures would cause interference with the applicant's proposed antenna.
  
- 3. Plan Requirements: Each applicant requesting site plan approval under this ordinance shall submit a scaled plan showing or accompanied by the following information as part of any application package:
  - a. Title block that shows the name of the development or project.
  - b. North arrow, date of plat, scale, name, address, and seal of all persons preparing the plat.
  - c. Signature block for Planning Board endorsement.
  - d. Vicinity sketch and zoning district(s).
  - e. Total area of parcel in acres and square feet.
  - f. Lot frontage.
  - g. Boundary lines and approximate dimensions and bearings.
  - h. Tax map and lot numbers.
  - i. Locations and descriptions of any existing or proposed easements, deed restrictions, or covenants.
  - j. Physical features on the site and within two hundred (200) feet of the site.
  - k. Soil information.
  - l. All natural features, such as streams, ponds, wetland, etc.
  - m. Existing and proposed grades and contours and base flood elevations.
  - n. Shape, size, height, location, and width of existing and proposed structures on-site.
  - o. Existing buildings, structures, and historic resources as defined in the Historic Resource Survey, 2010, as amended, within five hundred (500) feet of the site.
  - p. Access to the site, with location and width of existing and proposed driveways.
  - q. Locations, names, right-of-way, and travel widths of any existing and proposed roads on the property and within two hundred (200) feet of the site.
  - r. Final road profiles and cross sections for any new roads.
  - s. Locations and sizes of all utilities (i.e. electric, telephone, and water lines on the site).
  - t. Existing and proposed methods of handling stormwater runoff, and the direction of flow indicated by arrows.
  - u. Sizes and locations of all stormwater drainage lines, catch basins, drywells, drainage ditches, retentions basins, and culverts.
  - v. Location, types, and sizes of all existing and proposed landscaping and screening.
  - w. Location of any proposed lighting.
  
- 4. Review Process: Planning Board Approval and Building Permit Required - Non-residential and non-amateur Personal Wireless Service Facilities may be located within the Town of Amherst, subject to Planning Board approval and issuance of a building permit. Modifications

to an existing installation which significantly alter the approved site plan shall also be subject to Planning Board approval. Construction or modification of an approved facility may not begin or continue without a valid building permit issued.

5. Once an application to the Planning Board is presented, the Town will refer the application to an independent professional consultant to determine the fee for review. The filing date of the application shall be defined as the date the application is presented and a cash deposit in the amount deemed necessary to defray the costs of the independent professional consultant review is submitted to the Town. All applications shall be assessed for a basic completeness review within thirty (30) days of the application's filing date by an outside professional consultant of the Board's choosing. All review costs are the responsibility of the applicant. Notice shall be sent if additional materials are needed by certified mail within thirty (30) days from the filing date of receipt of the application. Once notice of needed additional materials is sent, the ninety (90) or one hundred fifty (150) day clock is suspended until such materials are delivered. Incomplete applications will not be reviewed by the Planning Board. The Board must approve, approve with conditions, or deny the application in writing, within ninety (90) or (150) days of the filing date in accordance with FCC standards (Sec. 6409).
  - a. Co-location applications are subject to the ninety (90) day clock.
  - b. New siting applications are subject to the one hundred fifty (150) day clock.
6. Certificate of Operation: Operation of a facility may not begin until the applicant has completed all conditions of the Planning Board approval, submitted the Security for Removal (Section 3.16.H.3), and met all building permit requirements. All Personal Wireless Service Facilities are required to submit As-built drawings and color photographs (of sufficient size and scale to document the facility) of the facility to the Town prior to the issuance of a Certificate of Operation.

#### J. ABANDONMENT OR DISCONTINUATION OF USE.

1. Notification – At such time that a carrier plans to abandon or discontinue operation of a Personal Wireless Service Facility, such carrier will notify the Town by certified U.S. mail of the proposed date of abandonment or discontinuation of operations. Such notice shall be given no less than one hundred twenty (120) days prior to abandonment or discontinuation of operations. In the event that a carrier fails to give such notice, the Personal Wireless Service Facility shall be considered abandoned upon such discontinuation of operations.
2. Removal – Any Personal Wireless Service Facility tower that is declared abandoned shall be considered hazardous to the public health and safety. Upon abandonment or discontinuation of use, the owner shall remove the abandoned structure and restore the site to its natural appearance within ninety (90) days from the date of abandonment or discontinuation of use. “Physically remove” shall include, but not be limited to:
  - a. Removal of antennas, mount, equipment shelters, and security barriers from the subject property.
  - b. Proper disposal of the waste materials from the site in accordance with local and state solid waste disposal regulations.

- c. Restoring the location of the Personal Wireless Service Facility to its natural condition, except that any landscaping and grading shall remain in the after-condition.
3. Failure to Remove – If the owner of the facility does not remove the facility upon the Zoning Administrator’s order, then the Board of Selectmen shall, after holding a public hearing with notice to the owner and abutters, issue a declaration of abandonment. The owner of the facility shall dismantle and remove the facility within ninety (90) days of receipt of the declaration of abandonment by the Board of Selectmen. If the abandoned facility is not removed within ninety (90) days, the Town may execute the security to pay for this action.

**Section 3.17 Equestrian Facilities and Events.** (3-10-98)

INTENT OF THE ORDINANCE.

The Town of Amherst recognizes that equestrian activities and facilities are an integral part of the history and rural character of the town and, as such, can contribute to achieving the goals of the Master Plan. Through the preservation of open space and agricultural practices, the commercial elements of such ventures are of value to the entire community by providing recreational, competitive and other opportunities for public benefit.

The intent of this ordinance is to allow the development of private equestrian facilities and events in the residential zones of the Town of Amherst, while seeking to preserve the rural character of the Town. The provisions of this ordinance are further intended to limit the impact of these commercial ventures on public health, safety and welfare by the establishment of minimum standards and by requiring a review of the design, operating procedures and control of impacts. The ordinance seeks to promote the health, safety and welfare of rider and animal, as well as the public.

A. DEFINITIONS.

Equestrian Facility. A private facility with limited and/or occasional availability to the public; primarily for the boarding, training, breeding, sale, riding, and maintenance of horses, ponies, and other equids, with or without instruction for the rider.

Equestrian Events. Any event of more than thirty (30) participants per day involving horses and/or other animals which are on display or engaged in competition and organized and managed in accordance with the provision of a sanctioning state or national organization.

Riding Lessons. Any lesson or activity with limited availability to the public involving the riding, training or care of horses, whether saddled or otherwise, and including the training or instruction of riders or drivers.

B. GENERAL PROVISIONS.

1. Applicability: The provisions of this ordinance apply to all lessons or events involving horses that are open or available to the general public, regardless of whether there is a fee charged. Activities covered under this ordinance are allowed in all zones in the Town of Amherst.

These provisions do not apply to the private ownership of horses or other farm animals not available for public use.

The ordinance shall be construed to cover and define uses permitted to equidae as a whole and not to limit permitted uses and activities to a size animal or a species or sub-species. Allowable uses and activities involve the interaction between horses and humans and can be instructional, competitive, recreational, therapeutic, training, exercise, conditioning, or as otherwise approved by the Planning Board.

2. Prohibited Uses: Activities, operations, or events for the purpose of livestock auctions, commercial horse sales, the sale of transport equipment and vehicles, the manufacture or sale of feed, and animal hospitals are not allowable uses permitted under this ordinance. Outdoor lighting for night-time use of arenas, tracks, and like-training or competition areas is prohibited.
3. Equestrian Event Management. Equestrian events consist of horse shows, trials, or competitions open to the general public. All events shall be conducted under the rules or other provision of an applicable sanctioning state or national organization. Prior to conducting such events, the owner of the property shall apply for and obtain approval under the Non-Residential Site Plan Review Regulations of the Town. At a minimum the application shall include:
  - a. Name of land owner(s).
  - b. Map and Lot numbers of the parcel(s) to be used for equestrian events.
  - c. A plan showing the parcel, abutters, existing development, and planned improvements or alterations, parking areas, and traffic access and circulation.
  - d. A detailed description of the proposed equestrian events including activities, hours of operation, number of participants, bathroom facilities, water supply, etc.
  - e. A detailed description of the measures to be implemented to ensure that the proposed activities are compatible with the neighborhood, including but not limited to traffic management, dust, and noise control, disposal of manure.
  - f. The annual schedule of equestrian events.
  - g. Provisions for access to special populations if events are open to the general public.
  - h. A copy of the sanctioning organization's requirements for event management.
  - i. A traffic and parking plan shall designate areas for parking horse trailers and other oversize vehicles and for individual vehicles for those attending the equestrian events. All event parking shall be restricted to the designated areas and limited to the available spaces. No on-street parking shall be allowed. Traffic circulation shall ensure access for emergency vehicles at all times.
4. Riding Lessons. Riding lessons are all activities involving instruction, training, or participation in horse-back riding provided to the general public using horses not wholly owned by the individual receiving the instruction or training. Riding lessons to more than ten (10) individuals per day may be offered only by facilities approved under this ordinance. Prior to offering riding lessons to the public, the owner of the property shall apply for and obtain approval under the provision of the Non-Residential Site Plan Review Regulations of the

Town. At a minimum the application shall include:

- a. Name of the land owner(s).
- b. Map and Lot numbers of the parcel(s) to be used for riding lessons.
- c. A plan showing the parcel, abutters, existing development, and planned improvements or alterations, parking areas, and traffic access and circulation.
- d. A detailed description of the proposed riding lesson operations including activities, hours of operation, maximum number of hourly and daily participants, bathroom facilities, waiting/classroom areas, water supply, etc.
- e. A detailed description of the measures to be implemented to ensure that the activities are compatible with the neighborhood, including but not limited to traffic management, dust, and noise control, disposal of manure.
- f. The schedule of operation of the riding center.
- g. Provisions for access to special populations if lessons are open to the general public.
- h. A copy of an emergency response plan to manage accidents and injuries.
- i. A traffic management plan must be prepared for any riding center offering lessons to more than 3 (three) riders per hour.

#### C. OTHER PROVISIONS.

1. Barns or other structures used to stable horses under this ordinance shall be limited to one (1) animal per stall and one (1) stall per one (1.0) acres of pasture. Animals covered under this ordinance smaller than standard horses (fifty-eight inches [58 inches]) must be provided adequate pasture area.
2. Barns used to stable 5 (five) or more horses may contain up to eight hundred (800) sq. ft. of living space for a stable manager provided such space meets all applicable BOCA requirements and is issued an occupancy permit by the Town.
3. The restrictions on riding lessons contained in Section B.4 of this ordinance shall not apply to the owners of horses stabled or boarded at a facility not otherwise subject to this ordinance.
4. Nothing in this ordinance shall be construed to prohibit the private sale or maintenance of horses or farm livestock or to prohibit, or otherwise restrict, agricultural operations.
5. Agricultural operations and Equestrian operations shall be conducted in accordance with the "Manual of Best Management Practices (BMP) for Agriculture in New Hampshire" published by the New Hampshire Department of Agriculture, Markets, and Food. (3-8-05)

### **Section 3.18 Conditional Use Permits**

#### A. GENERAL.

Conditional Use Permits as herein provided for shall be deemed to be permitted uses in their respective zones, subject to the satisfaction of the requirements and standards set forth herein, in addition to all other requirements and standards of this ordinance. All such cases are hereby

declared to possess characteristics of such unique and special form that each specific use shall be considered as an individual case. The applicant shall bear the burden of persuasion, through the introduction of sufficient evidence through testimony or otherwise, that the development, if completed as proposed, will comply with this Article and will satisfy the specific requirements for the use contained in the ordinance.

## B. PLANNING BOARD TO ADMINISTER.

Wherever a conditional use is authorized by this ordinance, the authority to administer or grant Conditional Use Permits shall be vested in the Planning Board.

## C. STANDARDS APPLICABLE TO ALL CONDITIONAL USE PERMITS.

### 1. Conditions for Conditional Use Permits.

Before the Planning Board considers the approval of an application for a Conditional Use Permit, the applicant shall prove to the satisfaction of the Planning Board that all the following conditions have been met:

- a. That the property in question is in conformance with the dimensional requirements of the zone, or meets Planning Board standards for the reduction in dimensional requirements, and that the proposed use is consistent with the Amherst Master Plan. (3-10-15)
- b. That the proposal meets the purposes of the ordinance under which the application is proposed.
- c. That there will be no significant adverse impacts resulting from the proposed use upon the public health, safety, and general welfare of the neighborhood and the Town of Amherst.
- d. That the proposed use will not be more objectionable to nearby properties by reason of noise, fumes, vibration, or inappropriate lighting than any use of the property permitted under the existing zoning district ordinances.
- e. That the proposed use will not adversely affect the ground water resources of Amherst, in particular the Aquifer Conservation District as defined in Section 4.13 of the Amherst Zoning Ordinance.
- f. The applicant shall file a Non-Residential Site Plan Review application in accordance with the "Non-Residential Site Plan Review Regulations" with the Amherst Planning Board.

### 2. Conditions of Approval.

- a. The Planning Board may attach such conditions to its approval as are reasonable, necessary, and appropriate.
- b. All Conditional Use Permit uses are hereby declared to have special characteristics that shall be considered on a case-by-case basis.

### 3. Limits on a Conditional Use Permit.

- a. Substantial construction must commence within one (1) year of the Planning Board approval of the Conditional Use Permit and Site Plan Approval.

- b. If construction is not commenced within this period, the Conditional Use Permit approval may be extended for up to one (1) additional year upon Approval of the Amherst Planning Board. If construction is not commenced within this extended period the Conditional Use Permit is declared null and void.

#### D. PERMITS FOR CONDITIONAL USE PERMITS.

A building permit for a Conditional Use Permit use shall not be issued by the Board of Selectmen or their duly appointed representative, the Administrative Official, until so directed by the Planning Board who shall first be satisfied that all the standards and conditions of this article and the ordinance have been met.

### **Section 3.19 Phasing (3-13-07)**

- A. PURPOSE. To ensure that the rate of growth of the Town does not unreasonably interfere with the Town's capacity for planned, orderly, and tangible expansion of its services to accommodate such growth, the Planning Board, at its discretion, may require phasing of subdivisions, as provided in RSA 674:21. Prior to requiring phasing, the Planning Board shall inquire into the impact which the proposed subdivision will have on Town services and shall exercise its discretion to require phasing so as to lessen or mitigate such impact.
- B. PHASING.
  1. In the event that the Board decides, in its discretion, that phasing is required, then each subdivision of land for a residential use producing four (4) lots or dwelling units and not more than six (6) lots or dwelling units shall be phased over a minimum of two (2) years, with not more than fifty percent (50 %) of the dwelling units receiving building permits in a one (1) year period. Every subdivision of seven (7) lots of dwelling units but not more than nine (9) lots or dwelling units shall be phased over a minimum of three (3) years, with not more than thirty-three percent (33 %) of the dwelling units receiving building permits in a one (1) year period. Every subdivision of ten (10) lots or dwelling units but not more than twenty (20) lots or dwelling units shall be phased over a minimum of four (4) years, with not more than twenty-five (25 %) of the dwelling units receiving building permits in a one (1) year period. Other larger subdivisions shall have phasing as determined by the Board at its discretion.
  2. The requirement shall apply to all forms of residential subdivision of land, as defined in RSA 672:14 (I), and RSA 674:21.
  3. The Planning Board may require any subdivision to adhere to a longer phasing plan if such phasing is deemed necessary to protect the health, safety, welfare and environment of the Town.

## ARTICLE IV -- ZONING REGULATIONS

### **Section 4.1 Application of Regulations.**

Subsequent to passage of this ordinance, buildings, or land shall hereafter be used, constructed, altered, or enlarged only in conformity with regulations specified herein for the zoning district in which it is located. (3-12-63)

### **Section 4.2 Lots of Record.**

Any lot of record (See Art. IX, Sec. 9.1, Definitions, Lot of Record) in the Town of Amherst prior to the effective date of this section may be occupied by any use permitted in its zoning district, regardless of its size, provided it meets all applicable zoning setback, building, and water pollution control regulations for the Town of Amherst. Such lots shall provide for access on a publicly or privately maintained road. (3-12-63, 3-9-92, 3-13-82, 3-13-90, 3-11-03)

### **Section 4.3 Residential/Rural Zone (RR). (3-12-63, 3-11-93, 3-10-15)**

#### A. PERMITTED USES.

1. One-family dwelling and accessory buildings or structures. (3-11-08)
2. Planned Residential Development. (See Art. IV, Sec. 4.17)
3. Farm, Agricultural or Nursery Use.
4. Roadside stand for the sale of farm produce or nursery products. (3-11-93)
5. Home Occupation. (3-11-93)
6. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)
7. Workforce Housing (See Section 4.14)
8. Non-commercial sports and recreation uses, subject to obtaining Planning Board site approval, which shall provide at minimum for applicable:
  - a. Setbacks,
  - b. Buffers,
  - c. Sanitary facilities,
  - d. Parking,
  - e. Mitigation of traffic impact, and
  - f. Adequate provision of emergency services, and subject to determination by the Planning Board of the following:
    - i. Such use shall not be the primary use of the lot;

- ii. Such use shall be non-commercial in nature;
- iii. Deleted (3-6-04);
- iv. Deleted (3-6-04);
- v. Such use shall be compatible with existing neighborhood uses;
- vi. Such use complies with the spirit and letter of Section 3.1, Nuisance Provision; and
- vii. No permanent buildings shall be permitted as part of such use, except for sheds to the extent necessary for storage of equipment for such use.

g. Noise and lighting. Uses involving motor-driven objects producing sixty (60) or more decibels of sound at a range of ten feet as part of the sport or recreation are prohibited. Night lighting primarily for uses permitted under this section may be allowed by the Planning Board when more than five hundred (500) feet from any abutting lot line, but not between 9:00 p.m. and 7:30 a.m. (3-14-95)

9. Elderly Housing (See Article IV, Section 4.20) (3-10-15)

10. Accessory Apartment (3-8-16)

B. USES PERMITTED BY SPECIAL EXCEPTION RESIDENTIAL/RURAL. (3-11-93)

1. Religious purposes. (3-1-05)

2. Nursing Homes. (3-12-63)

3. (Deleted 3-10-2015)

4. (Deleted 3-8-2016)

C. AREA AND FRONTAGE REQUIREMENTS.

1. The minimum lot area shall be two (2) acres. The minimum area shall contain no wetland as defined in Art. IV, Sec. 4.11, no flood plain as defined in Art. IV, Sec. 4.10, and no slopes greater than twenty percent (20 %). (3-5-74, 3-14-89, 3-6-04)

2. Each new lot shall have a minimum frontage of two hundred (200) feet on a publicly maintained road, unless frontage has been approved and recorded as reduced frontage lot/s; in which event, thirty-five (35) feet shall be sufficient. (3-4-75, 3-10-87)

D. YARD REQUIREMENTS.

1. Each dwelling, building, or structure shall be set back at least fifty (50) feet from the front lot line, or at such distance that will be no closer than an existing structure. An addition may not be extended laterally more than a maximum of a fifty percent (50%) increase of the lineal frontage of the existing structure and must conform to any other setback requirements on the lot. (3-12-63, 3-9-82, 3-12-02, 3-11-08)

2. Except in the Historic District, each dwelling, building, or structure shall be set back at least twenty-five (25) feet from the side and rear property lines. In the case of corner property, this distance shall be increased to fifty (50) feet on that side bordering a street, lane, or public way. (3-12-63, 3-8-05, 3-11-08)
3. Any accessory buildings or structures shall be set back at least twenty (20) feet from side and rear lot lines and at least fifty (50) feet from the front lot line and not exceed twenty-two (22) feet in height. The height requirement may be waived for farm structures. (3-12-63, 3-10-87, 3-8-05, 3-11-08) In the Historic District, a new dwelling, building, or structure shall be at least twenty (20) feet from the side and rear property lines or no closer than twenty-five (25) feet from the principal dwelling, building, or structure on any abutting lot, whichever is greater. (3-8-05, 3-11-08)
4. No new principal dwelling, building, or structure shall be constructed to a height greater than forty (40) feet. No structure shall be constructed with more than four (4) floors/levels including basement and attic levels. No new dwelling, building, or structure, or addition to an existing dwelling, building, or structure that increases the total area of the structure, shall have a floor area ratio greater than fifteen percent (15%). The aggregate floor area ratio shall be no greater than fifteen percent (15%). (3-6-04, 3-13-07, 3-11-08, 3-11-14)

E. PROHIBITED USES.

1. Aircraft landing fields. (3-10-98)

**Section 4.4 Northern Transitional Zone (NTZ). (3-8-88)**

A. GENERAL. The purpose of establishing the Northern Transitional Zone is as follows:

1. To recognize, establish, and affirm an area of the Town in which lower density development is of itself, desirable.
2. To recognize the unique scenic and natural character of a portion of Town which forms a natural entry to the Northern Rural Zone.
3. To ensure that future development in this area of Town be of a type that is compatible with the area's scenic and natural character.
4. That the Northern Transitional Zone shall be bounded by Horace Greeley Road on the North, NH Route 101 on the South, and the Amherst Town line on the East. The Westerly boundary is the intersection of Horace Greeley Road and NH Route 101.

B. PERMITTED USES.

1. One-family dwelling and accessory buildings or structures. (3-8-88, 3-11-08, 3-10-15)
2. Farm, agricultural, or nursery use. (3-3-88)

3. Roadside stand for the sale of farm products or nursery products.
4. Home occupation. (3-8-88)
5. Planned Residential Development (PRD) – (See Art. IV, Sec. 4.17) In order to achieve the purpose of this section, Planned Residential Development shall be encouraged as the principal method of future development of this zone. (3-8-88)
6. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)
7. Amateur, non-profit sports and recreation uses subject to obtaining Planning Board site approval which may provide at minimum for setbacks, buffers, sanitary facilities, parking, and traffic impact. Uses involving motorized recreation vehicles are prohibited. Night lighting may be allowed by the Planning Board when more than five hundred (500) feet from any residential use but not after 9:00 p.m. (3-12-91)
8. (Deleted 3-9-10)
9. Other Development. All development in this zone other than Planned Residential Development shall adhere to the following:
10. Accessory Apartment (3-8-16)

#### C. AREA AND FRONTAGE REQUIREMENTS.

1. The minimum lot area for any permitted use shall be three and one-half (3 ½) acres. The minimum area shall contain no wetland as defined in Art. IV, Sec. 4.11, no flood plain as defined in Art. IV, Sec. 4.10), and no slopes greater than twenty percent (20%). (3-6-04)
2. Each lot shall have a minimum frontage of three hundred (300) feet on the principal route of access to the lot.
3. If frontage is provided by a Class A or Class B reduced frontage, thirty-five (35) feet of frontage on a publicly maintained road shall be sufficient for the lot or lots.

#### D. YARD REQUIREMENTS.

1. Each dwelling, building, or structure shall be set back at least fifty (50) feet from the front lot line, or at such distance that will be no closer than an existing structure. An addition may not be extended laterally more than a maximum of a fifty percent (50%) increase of the lineal frontage of the existing structure and must conform to any other setback requirements on the lot. (3-11-08)
2. Each dwelling, building, or structure shall be set back at least forty (40) feet from the side and rear lot lines. In the case of corner property, this distance shall be increased to fifty (50) feet on

that side bordering a street, lane, or public way. (3-8-05, 3-11-08)

3. Any accessory building or structure shall be set back at least thirty (30) feet from the side and rear lot lines and at least fifty (50) feet from the front lot line and shall not exceed twenty-two feet in height. This requirement may be waived for farm structures or buildings. (3-8-88, 3-11-08)
4. No new principal dwelling, building, or structure shall be constructed to a height greater than forty (40) feet. No structure shall be constructed with more than four (4) floors/levels including basement and attic levels. No new dwelling, building, or structure, or addition to an existing dwelling, building, or structure that increases the total area of the dwelling, building, or structure shall have a floor area ratio greater than fifteen percent (15%). The aggregate floor area ratio shall be no greater than fifteen percent (15%). (3-6-04, 3-11-08, 3-11-14)

E. USES PERMITTED BY SPECIAL EXCEPTION NORTHERN TRANSITIONAL ZONE.

1. Religious purposes. (3-14-89)
2. Private schools. (3-14-89)
3. Hospitals, clinics, nursing homes, and other similar uses. (3-14-89)
4. Professional offices. (3-14-89)
5. Funeral homes. (3-14-89)
6. Sawmills. (3-14-89)
7. (Deleted 3-8-2016)
8. Kennels. (3-14-89)

F. PROHIBITED USES.

1. Aircraft landing fields. (3-10-98)

**Section 4.5 Northern Rural Zone (NR). (3-2-76, 3-10-15)**

A. GENERAL. The purpose of establishing the Northern Rural Zone is the following:

1. To recognize, establish, and affirm an area of the Town in which lower density development is of itself, desirable. (3-11-86)
2. To recognize the unique rural, scenic, and natural character of a portion of Town which has remained essentially undeveloped and unchanged during the time that the remainder of the Town has experienced considerable physical development and change. (3-2-76)

3. To identify a portion of Town that contains extensive areas of poor soils, steep slopes, and limited accessibility which limits the type of development which is compatible with these limitations as well as the areas in which development can suitably take place. (3-2-76)
4. To ensure that future development in this area of Town be of a type that is compatible with the area's extensive physical limitations as well as its unique rural, scenic, and natural character. (3-2-76)

B. PERMITTED USES.

1. One (1) family dwelling and accessory buildings or structures. (3-2-76, 3-11-08)
2. Farm, agricultural, or nursery use. (3-2-76)
3. Roadside Stand for the sale of farm produce or nursery products. (3-2-76)
4. Home Occupation. (11-2-82)
5. Planned Residential Development (PRD). In order to achieve the purpose of this section, Planned Residential Development shall be encouraged as the principal method of future development of this zone. (See Art. IV, Sec. 4.17) (11-2-82)
6. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)
7. Workforce Housing (see Section 4.14)
8. Amateur, non-profit sports and recreation uses subject to obtaining Planning Board site approval which may provide at minimum for setbacks, buffers, sanitary facilities, parking, and traffic impact. Uses involving motorized recreation vehicles are prohibited. Night lighting may be allowed by the Planning Board when more than five hundred (500) feet from any residential use but not after 9:00 p.m. (3-12-91)
9. Accessory apartment (3-8-16)

C. USES PERMITTED BY SPECIAL EXCEPTION NORTHERN RURAL ZONE.

1. Religious purposes. (3-2-76)
2. Private schools. (3-2-76)
3. Hospitals, clinics, nursing homes, and other similar uses. (3-2-76)
4. Professional offices. (3-2-76)
5. Funeral homes. (3-2-76)

6. Sawmills. (3-2-76, 3-9-82)

7. (Deleted 3-8-16)

8. Kennels. (11-2-82)

#### D. AREA AND FRONTAGE REQUIREMENTS.

1. The lot area shall be five (5) acres. The minimum area shall contain no wetland as defined in Art. IV, Sec. 4.11, no flood plain as defined in Art. IV, Sec. 4.10, and no slopes greater than twenty percent (20%). (3-14-89, 3-6-04)
2. Each new lot shall have minimum frontage of three hundred (300) feet on a publicly maintained road, unless frontage has been approved and recorded as reduced frontage lot/s, in which event thirty-five (35) feet shall be sufficient. (3-9-82, 3-10-87)

#### E. YARD REQUIREMENTS.

1. Each dwelling, building, or structure shall be set back at least fifty (50) feet from the front lot line, or at such distance that will be no closer than an existing structure. An addition may not be extended laterally more than a maximum of a fifty percent (50%) increase of the lineal frontage of the existing structure and must conform to any other setback requirements on the lot. (3-11-80, 3-9-82, 3-11-08)
2. Each dwelling, building, or structure shall be set back at least forty (40) feet from the side and rear lot lines. In the case of corner property, this distance shall be increased to fifty (50) feet on that side bordering a street, lane, or public way. (3-8-05, 3-11-08)
3. Any accessory building or structure shall be set back at least thirty (30) feet from side and rear lot lines and at least fifty (50) feet from the front lot line and shall not exceed twenty-two (22) feet in height. This height requirement may be waived for farm structures or buildings. (3-11-80, 3-9-82, 3-12-85, 3-10-87, 3-11-08)
4. No new principal dwelling, building, or structure shall be constructed to a height greater than forty (40) feet. No structure shall be constructed with more than four (4) floors/levels including basement and attic levels. No new dwelling, building, or structure, or addition to an existing dwelling, building, or structure that increases the total area of the dwelling, building, or structure, shall have a floor area ratio greater than fifteen percent (15%). The aggregate floor area ratio shall be no greater than fifteen percent (15%). (3-6-04, 3-11-08, 3-11-14)

#### F. PROHIBITED USES.

1. Aircraft landing fields. (3-10-98)

**Section 4.6 General Office Zone (GO). (3-12-85, 3-10-15)**

**A. PERMITTED USES.**

1. Professional offices. (3-12-85)
2. General offices of individuals or groups for the handling of administrative functions such as but not specifically limited to: executive offices, business offices handling sales or services off the premises, including salesmen, agents or representatives of manufacturing, distributing, insurance, and wholesale companies. Specifically excluded is the retail sale of any product from the premises. (3-12-85)
3. Mixed-use development, limited to office and residential uses. (See Article IX Definitions) (3-14-89, 3-13-90)
4. Amateur, non-profit sports and recreation uses subject to obtaining Planning Board site approval which may provide at minimum for setbacks, buffers, sanitary facilities, parking, and traffic impact. Uses involving motorized recreation vehicles are prohibited. Night lighting may be allowed by the Planning Board when more than five hundred (500) feet from any residential use but not after 9:00 p.m. (3-12-91)
5. Outside storage of materials and/or equipment, other than vehicles, shall be prohibited.
6. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)

**B. AREA AND FRONTAGE REQUIREMENTS.**

1. The minimum lot area shall be one (1) acre except for a residential use which shall be two (2) acres. (3-12-85)
2. Each lot shall have a minimum frontage of two hundred (200) feet on the principal route of access to the lot. (3-12-85)

**C. YARD AND BUILDING REQUIREMENTS. (3-12-91)**

1. Each new structure shall be set back either fifty (50) or one hundred (100) feet from the edge of the public road right-of-way.
  - a. The fifty (50) foot option requires that a natural vegetation or landscaped area only shall exist between the structure and the highway, excepting driveways and permitted signs.
  - b. The hundred (100) foot option allows parking areas to the front of the structure, which parking areas shall be set back a minimum of fifty (50) feet from the edge of the highway right-of-way.
  - c. Any permitted enlargement of pre-existing structures shall be beyond the fifty (50) foot setback line.
  - d. On corner lots, parking areas shall be screened from the highway with fences, landscaping,

and natural vegetation.

2. Each new structure or addition to a structure shall be set back thirty (30) feet from side and rear lot lines.
3. Any lot bordering a residential zone or an existing residential use shall have a landscape buffer between any buildings and such residential zone or use.
4. No structure shall be constructed to a height greater than forty (40) feet. (3-11-14)
5. The floor area ratio shall be a maximum of twenty percent (20%).
6. A minimum of thirty percent (30%) of the area of any lot shall remain landscaped open space and not be utilized for construction (including parking).
7. There shall be no more than one (1) access to any lot wherever desirable for traffic safety and consideration shall be given to combining access points where two (2) or more lots are being concurrently developed.
8. All storage and/or equipment parking areas shall be fenced, screened, or otherwise protected from view. (3-12-91)

#### D. ARCHITECTURAL DESIGN.

As a condition of final approval, the applicant must obtain the Planning Board's approval of the exterior architectural design to ensure that it is in harmony with the neighborhood and the surrounding environment. (3-12-85)

#### E. PROHIBITED USES.

1. Aircraft landing fields. (3-10-98)

### **Section 4.7 Commercial Zone (C). (3-10-15)**

GENERAL PURPOSE. To provide commercial areas to serve major commercial and business needs of the general public. (3-14-78)

#### A. PERMITTED USES. Uses which include, but are not limited to the following: (3-13-90)

1. Retail establishments. (3-12-63)
2. Hotel and motels. (3-12-63, 3-14-78)
3. Public utility building, structure or facility. (3-14-78)
4. Home occupation. (11-2-82)

5. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)
6. Mixed-use development. (3-14-89) (See Art. IX Definitions)
7. Amateur, non-profit sports and recreation uses subject to obtaining Planning Board site approval which may provide at minimum for setbacks, buffers, sanitary facilities, parking, and traffic impact. Uses involving motorized recreation vehicles are prohibited. Night lighting may be allowed by the Planning Board when more than five hundred (500) feet from any residential use but not after 9:00 p.m. (3-12-91)
8. All family day care home facilities are subject to compliance with all current licensing procedures and all applicable health/safety ordinances for the State of New Hampshire and the Town of Amherst. Family day care facilities are regulated by RSA 170-E:1, 170-E:2, 204-C:72, 161-G:4, and all other applicable State Laws. (3-12-91, 3-10-92)
9. Accessory apartment (3-8-16)

B. USES PERMITTED BY SPECIAL EXCEPTION COMMERCIAL ZONE.

1. Outside recreation establishments exclusive of outdoor theaters. (3-2-76)
2. Outside storage of equipment and materials, but not including junk yards. (3-2-76)
3. Religious uses. (3-2-76)
4. Private schools. (3-2-76)
5. Hospitals, nursing homes and other similar uses. (3-2-76)
6. (Deleted 3-8-16)
7. Kennels. (11-2-82)

C. AREA AND FRONTAGE REQUIREMENTS.

1. The minimum lot area shall be one (1) acre. (3-14-89, 3-11-97)
2. Each new lot shall have a minimum frontage of two hundred (200) feet on a publicly maintained road, unless frontage has been approved and recorded as reduced frontage lot/s, in which event thirty-five (35) feet shall be sufficient. (3-14-78, 3-9-82)

D. YARD AND BUILDING REQUIREMENTS.

1. Each new structure shall be set back either fifty (50) or one-hundred (100) feet from the public road right-of-way of New Hampshire Route 101A. (3-14-89, 3-10-92)

- a. The fifty (50) foot option requires that a natural vegetation of landscaped area only shall exist between the structure and the highway, excepting driveways and permitted signs. (3-14-89, 3-10-92)
  - b. The one-hundred (100) foot option allows parking areas to the front of the structure, which parking areas shall be set back a minimum of fifty (50) feet from the edge of the highway right-of-way. (3-14-89)
  - c. Any permitted enlargement of pre-existing structures shall be beyond the fifty (50) foot setback line. (3-14-89)
2. Each new structure shall be set back fifty (50) feet from the edge of the public road right-of-way on all roads within the Commercial Zone. (3-10-92)
  3. Each new structure or addition to a structure shall be set back thirty (30) feet from side and rear lot lines. (3-14-89)
  4. Any lot bordering a residential zone or an existing residential use shall have a landscaped buffer between any buildings and such residential zone or use. (3-4-75)
  5. No structure shall be constructed to a height greater than forty (40) feet. (3-11-86, 3-11-14)
  6. The floor area ratio shall be a maximum of twenty-five (25%) percent. (3-12-85, 3-10-87)
  7. A minimum of thirty (30%) percent of the area of any lot shall remain landscaped open space and not be utilized for construction (including parking). (3-4-75)
  8. There shall be no more than one (1) access to any lot wherever desirable for traffic safety, and consideration shall be given to combining access points where two (2) or more lots are being concurrently developed. (3-4-75)
  9. All storage and/or equipment parking areas shall be fenced, screened, landscaped, or otherwise protected from view. (3-14-78)

E. PROHIBITED USES.

1. Aircraft landing fields. (3-10-98)

**Section 4.8 Limited Commercial Zone (LC). (3-2-76, 3-10-15)**

GENERAL PURPOSE. To provide commercial area to serve limited commercial and business needs of the general public.

A. PERMITTED USES.

1. Retail, personal service, and business establishment of a type consistent with the purpose of this zone to serve limited commercial needs of various neighborhoods in Town. The foregoing shall include, but not necessarily be limited to:
  - a. Retail grocery, meat, produce, drugs, stationery, hardware, baked goods (3-2-76)
  - b. Barber and beauty shops (3-2-76)
  - c. Shops for the collection and distribution of clothing materials for dyeing and cleaning establishments (3-2-76)
  - d. Banks (3-2-76)
  - e. Coffee or sandwich shop (except for drive-in or fast service types) (3-2-76)
2. Business and/or professional offices for individual or group practice, including doctors and dentists (including medical or dental clinics), lawyers, counseling services, engineers, architects, planners, insurance and accountants. (3-2-76)
3. Veterinary clinic. (3-2-76)
4. Gasoline service station which may have a garage for repair to automobiles only but not to include body or fender repair, paint spraying, or used car sales lots. (3-2-76, 3-12-91)
5. Interior storage. (3-2-76, 3-8-05)
6. Interior recreational establishments. (3-2-76)
7. Home occupation. (11-2-82)
8. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)
9. Mixed-use development (See Art. IX Definitions). (3-14-89)
10. Amateur, non-profit sports and recreation uses subject to obtaining Planning Board site approval which may provide at minimum for setbacks, buffers, sanitary facilities, parking and traffic impact. Uses involving motorized recreation vehicles are prohibited. Night lighting may be allowed by the Planning Board when more than five hundred (500) feet from any residential use but not after 9:00 p.m. (3-12-91)
11. All family day care home facilities are subject to compliance with all current licensing procedures and all applicable health/safety ordinances for the State of New Hampshire and the Town of Amherst. Family day care facilities are regulated by RSA: 170-E:1, 170-E:2, 204-C:72, 161-G:4 and all other applicable State Laws. (3-12-91). (3-10-92)
12. Accessory apartment (3-8-16)

B. USES PERMITTED BY SPECIAL EXCEPTION LIMITED COMMERCIAL ZONE.

1. (Deleted 3-8-16)
2. Religious purposes. (3-8-8)
3. Kennels. (3-13-01)

C. AREA AND FRONTAGE REQUIREMENTS.

1. The minimum lot area shall be one (1) acre. (3-2-76, 3-14-89, 3-11-97)
2. Each new lot shall have a minimum frontage of two hundred (200) feet on a publicly maintained road, unless frontage has been approved and recorded as reduced frontage lot/s, in which event thirty-five (35) feet shall be sufficient. (3-14-78, 3-9-82, 3-10-87)

D. YARD AND BUILDING REQUIREMENTS.

1. Each new structure shall be set back either fifty (50) or one-hundred (100) feet from the edge of the public road right-of way.
  - a. The fifty (50) foot option requires that a natural vegetation or landscaped area only shall exist between the structure and the highway, excepting driveways and permitted signs.
  - b. The one-hundred (100) foot option allows parking areas to the front of the structure, which parking areas shall be set back a minimum of fifty (50) feet from the edge of the highway right-of-way.
  - c. Any permitted enlargement of pre-existing structures shall be beyond the fifty (50) foot setback line.
  - d. On corner lots, parking areas shall be screened from the highway with fences, landscaping, and natural vegetation. (3-14-89)
2. Each new structure or addition to a structure shall be set back thirty (30) feet from side and rear lot lines. (3-14-89)
3. Any lot bordering a residential zone or an existing residential use shall have a landscape buffer between any buildings and residential zone or use. (3-2-76)
4. No structure shall be constructed to a height greater than forty (40) feet. (3-2-76, 3-12-85, 3-11-86, 3-11-14)
6. The floor area ratio shall be a maximum of twenty percent (20%). (3-2-76, 3-12-85, 3-10-87)
7. A minimum of thirty percent (30%) of the area of any lot shall remain landscaped open space and not be utilized for construction (including parking). (3-4-75, 3-13-07)
8. There shall be no more than one (1) access to any lot wherever desirable for traffic safety and

consideration shall be given to combining access points where two (2) or more lots are being concurrently developed. (3-2-76)

9. All storage and/or equipment parking areas shall be fenced, screened, or otherwise protected from view.

E. PROHIBITED USES.

1. Aircraft landing fields. (3-10-98)

**Section 4.9 Industrial Zone.**

A. PERMITTED USES.

1. Light manufacturing. (3-12-63)
2. Assembly of previously prepared materials. (3-12-63)
3. Metal working. (3-12-63)
4. Equipment sales and service. (3-12-63)
5. Creamery, bakery, and soft drink bottling plants. (3-12-63)
6. Distribution plants, service industries and parcel delivery. (3-12-63)
7. Laboratories. (3-12-63)
8. Corporate and business offices compatible with other permitted uses in the zone and/or professional offices for individual or group practice, including doctors and dentists (including medical and dental clinics), counseling services, engineers, architects, planners, insurance, and accountants. (3-14-78, 3-10-87)
9. Wholesale business and storage. (3-14-78)
10. Storage yards (but not junk yards). (3-14-78)
11. Banks. (3-10-87)
12. Coffee or sandwich shops (except for fast service types). (3-10-87)
13. Veterinary clinic. (3-10-87)
14. Interior recreational establishments. (3-10-87)

15. Home occupation. (11-1-82)
16. Public utility buildings, structures, or facility. (3-14-78, 3-10-87)
17. Amateur, non-profit sports and recreation uses subject to obtaining Planning Board site approval which may provide at minimum for setbacks, buffers, sanitary facilities, parking and traffic impact. Uses involving motorized recreation vehicles are prohibited. Night lighting may be allowed by the Planning Board when more than five hundred (500) feet from any residential use but not after 9:00 p.m. (3-12-91)
18. Retail Establishments. Change of use permit from the Planning Board required for existing buildings. (3-11-97)
19. Integrated Innovative Housing (See Article IV, Section 4.16) (3-10-15)

**B. NO LAND, BUILDING, OR STRUCTURE SHALL BE USED FOR ANY OF THE PURPOSES ENUMERATED BELOW.**

1. Manufacture or storage of explosives in bulk quantities greater than twenty-five (25) pounds. (3-12-63)
2. Fertilizer manufacture. (3-12-63)
3. Glue manufacture. (3-12-63)
4. Petroleum refining. (3-12-63)
5. Smelting of metallic ores. (3-12-63)
6. Preparation of cement, gypsum, lime or plaster of paris. (3-12-63)
7. Manufacture of acids. (3-12-63)
8. Fat rendering in preparation of grease or tallow. (3-12-63)
9. Animal reduction or garbage dumping except sewage disposal or incineration done by the Town of Amherst. (3-12-63)

**C. USES PERMITTED BY SPECIAL EXCEPTION INDUSTRIAL ZONE.**

1. Kennels. (11-2-82)
2. Sexual oriented businesses. (3-14-00)

**D. AREA AND FRONTAGE REQUIREMENTS.**

1. The minimum lot area shall be one (1) acre. (3-14-78, 3-13-84, 3-14-89)

2. Each lot shall have a minimum frontage of two hundred (200) feet on the principal route of access. (3-14-78, 3-13-84)

E. YARD AND BUILDING REQUIREMENTS.

1. Each new structure shall be set back either fifty (50) or one-hundred (100) feet from the edge of the public road right-of-way. (3-14-89)
    - a. The fifty (50) foot option requires that a natural vegetation or landscaped area only shall exist between the structure and the highway, excepting driveways and permitted signs. (3-14-89)
    - b. The one-hundred (100) foot option allows parking areas to the front of the structure, which parking areas shall be set back a minimum of fifty (50) feet from the edge of the highway right-of-way. (3-14-89)
    - c. Any permitted enlargement of pre-existing structures shall be beyond the fifty (50) foot setback line. (3-14-89)
    - d. On corner lots, parking areas shall be screened from the highway with fences, landscaping and natural vegetation. (3-14-89)
  2. Each new structure or addition to a structure shall be set back thirty (30) feet from side and rear lot lines. (3-14-89)
  3. Any lot bordering a residential zone or an existing residential use shall have a landscaped buffer between any building and such residential zone or use. (3-4-75)
  4. No structure shall be constructed to a height greater than forty (40) feet, excepting industrial structures south of the Boston & Maine Railroad which shall not exceed fifty (50) feet for inhabited and eighty (80) feet for uninhabited structures. (3-4-75, 3-11-86, 3-12-91, 3-11-14)
  5. The floor area ratio shall be a maximum of forty percent (40%). (3-4-75, 3-10-87)
  6. A minimum of thirty percent (30%) of the area of any lot shall remain open space and not be utilized for construction including parking. (3-4-75, 3-13-01)
  7. There shall be no outside storage of materials or equipment between the front of any buildings and the street. All storage and/or equipment parking areas shall be fenced, screened, landscaped or otherwise protected from view. (3-4-75)
- F. ACCESS. Access to any lot with frontage on Route 101A shall be by such other streets as are available and not by Route 101A unless no other access is available. (3-14-78)

**Section 4.10 Flood Plain Conservation District. (3-10-70, 3-11-97)**

- A. GENERAL. In the interest of public health, convenience, safety, and welfare, the regulations of this district are intended to guide the use of areas of flood plain subject to flood water and to encourage the retention of open land so as to constitute a harmonious and appropriate physical development of the Town, as developed from the Master Plan. The specific intent of this district is:
1. To prevent the development of buildings and uses in areas that are unsatisfactory and hazardous due to the threat of flooding.
  2. Protection of natural flow and drainage.
- B. PURPOSE. Certain areas of the Town of Amherst, New Hampshire, are subject to periodic flooding, causing serious damages to properties within these areas. Relief is available in the form of flood insurance as authorized by the National Flood Insurance Act of 1968. Therefore, the Town of Amherst, New Hampshire, has chosen to become a participating community in the National Flood Insurance Program, and agrees to comply with the requirements of the National Flood Insurance Act of 1968 (P.L. 90-488, as amended) as detailed in this Floodplain Management Ordinance. (3-13-07)
- C. DEFINITION. This ordinance, adopted pursuant to the authority of RSA 674:16, shall be known as the Town of Amherst, New Hampshire, Flood Plain Conservation District. The regulations in this ordinance shall overlay and supplement the regulations in the Town of Amherst, New Hampshire, Zoning Ordinance, and shall be considered part of the Zoning Ordinance for purposes of administration and appeals under state law. If any provision of this ordinance differs or appears to conflict with any provision of the Zoning Ordinance or other ordinance or regulation, the provision imposing the greater restriction or more stringent standard shall be controlling.

The following regulations in this ordinance shall apply to all lands designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its "Flood Insurance Study for the County of Hillsborough, N. H." dated Sept. 25, 2009, or as amended, together with the associated Flood Insurance Rate Maps dated Sept. 25, 2009, or as amended, which are declared to be a part of this ordinance and are hereby incorporated by reference. (3-13-07, 7-16-09)

The following definitions shall apply only to this Floodplain development ordinance, and shall not be affected by the provisions of any other ordinance of the Town of Amherst, NH.

Area of Special Flood Hazard is the land in the floodplain within the Town of Amherst subject to a one (1) percent or greater chance of flooding in any given year. The area is designated as Zones A and AE on the Flood Insurance Rate Map. (3-13-07)

Base Flood means the flood having a one-percent possibility of being equaled or exceeded in any given year.

Basement means any area of a building having its floor subgrade on all sides.

Building. (See structure)

Development means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation, or drilling operations or storage of equipment or materials. (3-13-07)

FEMA means the Federal Emergency Management Agency.

Flood or Flooding means a general and temporary condition of partial or complete inundation of normally dry land areas from:

1. The overflow of inland or tidal waters, and
2. The unusual and rapid accumulation or runoff of surface waters from any source.

Flood Insurance Rate Map (FIRM) means an official map incorporated with this ordinance, on which FEMA has delineated both the special flood hazard areas and the risk premium zones applicable to the Town of Amherst.

Flood Insurance Study means an examination, evaluation, and determination of flood hazards and, if appropriate, corresponding water surface elevations, or an examination and determination of mudslide (i.e. mudflow) and/or flood-related erosion hazards. (3-13-07)

Floodplain or Flood-prone area means any land area susceptible to being inundated by water from any source (see definition of "Flooding").

Flood proofing means any combination of structural and non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitation facilities, structures, and their contents.

Floodway. (See Regulatory Floodway)

Functionally dependent use means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking and port facilities that are necessary for the loading/unloading of cargo or passengers, and ship building/repair facilities but does not include long-term storage or related manufacturing facilities.

Highest adjacent grade means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.

Historic Structure means any structure that is:

1. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
2. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
3. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
4. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
  - a. By an approved state program as determined by the Secretary of the Interior, or:
  - b. Directly by the Secretary of the Interior in states without approved programs.

Lowest Floor means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such an enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this ordinance.

Manufactured Home means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. For floodplain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on-site for greater than one hundred eighty (180) consecutive days. This includes manufactured homes located in a manufactured home park or subdivision. (3-13-07)

Manufactured home park or subdivision means a parcel (or contiguous parcels) of land divided into two (2) or more manufactured home lots for rent or sale. (3-13-07)

Mean Sea Level means the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

New Construction means, for the purposes of determining insurance rates, structures for which the "start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, new construction means structures for which the start of construction commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures. (3-13-07)

One Hundred (100) Year Flood. (See Base-Flood)

Recreational Vehicle is defined as:

1. Built on a single chassis;
2. Four hundred (400) square feet or less when measured at the largest horizontal projection;
3. Designed to be self-propelled or permanently towable by a light duty truck; and
4. Designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

Regulatory Floodway means the channel of a river or other water course and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height. (3-13-07)

Special Flood Hazard Areas. (See Area of Special Flood Hazard) (3-13-07)

Structure means for floodplain management purposes, a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

Start of Construction includes substantial improvements, and means the date the building permit was issued provided the actual start of construction, repair, reconstruction, placement, or other improvement was within one hundred eighty (180) days of the permit date. The actual start means either the first placement of permanent construction of a structure on-site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading, and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations, or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or part of the main structure.

Substantial Damage means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed fifty percent (50%) of the market value of the structure before the damage occurred.

Substantial Improvement means any combination of repairs, reconstruction, alteration, or improvements to a structure in which the cumulative cost equals or exceeds fifty percent (50%) of the market value of the structure. The market value of the structure should equal:

1. The appraised value prior to the start of the initial repair or improvement, or
2. In the case of damage, the value of the structure prior to the damage occurring. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. This term

includes structures which have incurred substantial damage, regardless of actual repair work performed. The term does not, however, include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or any alteration of a “historic structure,” provided that the alteration will not preclude the structure’s continued designation as a “historic structure.”

Violation means the failure of a structure or other development to be fully compliant with community’s flood plain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44 CFR Sec. 60.3(b)(5), (c)(4), (c)(10), (d)(3), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided. (3-13-07)

Water Surface Elevation means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, (or other datum, where specified) of floods of various magnitudes and frequencies in floodplains.

#### C. PERMITTED USES.

Any of the following uses, which may require a permit, that do not result in the erection of any structures or require the addition of fill, and that are otherwise permitted by the Zoning Ordinance.

1. Minor fences, docks, wharfs, boat houses.
2. Agriculture.
3. Forestry.
4. Recreational purposes such as accessory tennis courts, swimming pools, playing fields.
5. Golf courses.
6. Parking lots, driveways, roads.
7. Non-commercial sports and recreation uses, subject to obtaining Planning Board site approval, which shall provide at minimum for applicable:
  - a. Setbacks,
  - b. Buffers,
  - c. Sanitary facilities,
  - d. Parking,
  - e. Mitigation of traffic impact, and
  - f. Adequate provision of emergency services, and subject to determination by the Planning Board of the following:
    - i. Such use shall not be the primary use of the lot;
    - ii. Such use shall be non-commercial in nature;

- iii. Deleted (3-6-04);
  - iv. Deleted (3-6-04);
  - v. Such use shall be compatible with existing neighborhood uses;
  - vi. Such use complies with the spirit and letter of Section 3-1, Nuisance Provision.
  - vii. No permanent buildings shall be permitted as part of such use, except for sheds to the extent necessary for storage of equipment for such use; and
  - g. noise and lighting. Uses involving motor-driven objects producing sixty (60) or more decibels of sound at a range of ten feet as part of the sport or recreation are prohibited. Night lighting primarily for uses permitted under this section may be allowed by the Planning Board when more than five hundred (500) feet from any abutting lot line, but not between 9:00 p.m. and 7:30 a.m.
  - h. The Conservation Commission has determined, and the Planning Board agrees, that such use shall not:
    - i. Contribute to pollution of surface or groundwater;
    - ii. Damage or destroy habitats or reproductive areas for plants, fish, and wildlife of importance;
    - iii. Eliminate, depreciate, or obstruct the commerce, recreation or aesthetic enjoyment of the public;
    - iv. Be detrimental to adequate ground water levels;
    - v. Adversely affect stream channels and their ability to handle runoff of water; or
    - vi. Disturb or reduce the natural ability of wetlands to absorb floodwaters and salt. Uses involving motor-driven objects producing sixty (60) or more decibels of sound at a range of ten (10) feet as part of the sport or recreation are prohibited. Night lighting primarily for uses permitted under this section may be allowed by the Planning Board when more than five hundred (500) feet from any abutting lot line, but not between 9:00 p.m. and 7:30 a.m.
8. Recreational vehicles placed on sites within Zones A or AE shall be either;
- a. Be on-site for fewer than one hundred eighty (180) consecutive days;
  - b. Be fully licensed and ready for highway use; or
  - c. Meet all standards of Section 60.3 (b) (1) of the National Flood Insurance Program Regulations and the elevation and anchoring requirements for manufactured homes in Paragraph c(6) of Section 60.3. (3-13-07)

#### D. BUILDING PERMIT.

The Zoning Department shall review all building permit applications for new structures or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is located in a special flood hazard area, all new construction or substantial improvements shall: (3-13-07)

- 1. Be designated (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;
- 2. Be constructed with materials resistant to flood damage;

3. Be constructed by methods and practices that minimize flood damages; and
  4. Be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment, and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.
- E. Where new or replacement water and sewer systems (including on-site systems) are proposed in a special flood hazard area the applicant shall provide the Zoning Department with assurance that these systems will be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems will be located to avoid impairment to them or contamination from them during periods of flooding. (3-13-07)
- F. For all new or substantially improved structures located in Zones A or AE, the applicant shall furnish the following information to the Zoning Department:
1. The as-built elevation (in relation to NGVD) of the lowest floor (including basement) and include whether or not such structures contain a basement.
  2. If the structure has been flood proofed, the as-built elevation (in relation to NGVD) to which the structure was flood proofed.
  3. Any certification of flood proofing.
- G. THE ZONING DEPARTMENT shall maintain for public inspection, and shall furnish such information upon request. (3-13-07)
- H. THE ZONING DEPARTMENT shall not grant a building permit until the applicant certifies that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334. (3-13-07)
1. In riverine situations, prior to the alteration or relocation of a watercourse the applicant for such authorization shall notify the Wetlands Bureau of the New Hampshire Department of Environmental Services and submit copies of such notification to the Zoning Department, in addition to the copies required by RSA 482-A:3. Further, the applicant shall be required to submit copies of said notification to those adjacent communities as determined by the Zoning Department, including notice of all scheduled hearings before the Wetlands Bureau. (3-13-07)
  2. The applicant shall submit to the Zoning Department, certification provided by a registered professional engineer, assuring that the flood carrying capacity of an altered or relocated watercourse can and will be maintained. (3-13-07)
  3. Along water courses with a designated Regulatory Floodway no encroachments, including fill, new construction, substantial improvements, and other development are allowed within the

floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practices that the proposed encroachment would not result in any increase in flood levels within the community during the base flood discharge. (3-13-07)

4. Until a Regulatory Floodway is designated along watercourses, no new construction, substantial improvements, or other development (including fill) shall be permitted within Zone AE on the FIRM, unless it is demonstrated by the applicant that the cumulative effect of the proposed development, when combined with all existing and anticipated development, will not increase the water surface elevation of the base flood more than one (1) foot at any point within the community. (3-13-07)
  5. The Zoning Department shall obtain, review, and reasonably utilize any floodway data available from Federal, State, or other sources as criteria for requiring that all development located in Zone A meet the following floodway requirement: “No encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway that would result in any increase in flood levels within the community during the base flood discharge.” (3-13-07)
- I. IN SPECIAL FLOOD HAZARD AREAS, the Zoning Department shall determine the one hundred (100) year flood elevation in the following order of precedence according to the data available.
1. In Zone AE, refer to the elevation data provided in the community’s Flood Insurance Study and accompanying FIRM or FHBM. (3-13-07)
  2. In A Zones the Zoning Department shall obtain, review, and reasonably utilize any one hundred (100) year flood elevation data available from any federal, state, or other source including data submitted for development proposals submitted to the community (i.e. subdivisions, site approvals). (3-13-07)
- J. The Zoning Department’s one hundred (100) year flood elevation determination will be used as criteria for requiring in Zones A and AE that: (3-13-07)
1. All new construction or substantial improvement of residential structures have the lowest floor (including basement) elevated to or above the one hundred (100) year flood elevation;
  2. That all new construction or substantial improvements of non-residential structures have the lowest floor (including basement) elevated to or above the one hundred (100) year flood level; or together with attendant utility and sanitary facilities, shall:
    - a. Be flood-proofed so that below the one hundred (100) year flood elevation the structure is watertight with walls substantially impermeable to the passage of water; (3-13-07)
    - b. Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and
    - c. Be certified by a registered professional engineer or architect that the design and methods

of construction are in accordance with accepted standards of practice for meeting the provisions of this section.

- K. ALL MANUFACTURED HOMES to be placed or substantially improved within special flood hazard areas shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the base flood level; and be securely anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind force.
- L. ALL RECREATIONAL VEHICLES placed on sites within Zones A and E shall either: (3-13-07)
1. Be on the site for fewer than one hundred eighty (180) consecutive days;
  2. Be fully licensed and ready for highway use; or
  3. Meet all standards of section 60.3(b)(1) of the National Flood Insurance Program Regulations and the elevation and anchoring requirements for “manufactured homes” in Paragraph (c) (6) of section 60.3.
- M. FOR ALL NEW CONSTRUCTION AND SUBSTANTIAL IMPROVEMENTS, fully enclosed areas below the lowest floor that are subject to flooding are permitted provided they meet the following requirements:
1. The enclosed area is unfinished or flood resistant, usable solely for the parking of vehicles, building access or storage;
  2. The area is not a basement;
  3. Shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria:
    - a. A minimum of two (2) openings having a total net area of not less than one (1) square inch for every square foot of enclosed area subject to flooding shall be provided.
    - b. The bottom of all openings shall be no higher than one (1) foot above grade.
    - c. Openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwater.
- N. VARIANCES AND APPEALS.
1. Any order, requirement, decision or determination of the Building Inspector made under this ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.
  2. If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I(b), the

applicant shall have the burden of showing in addition to the usual variance standards under state law:

- a. That the variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expense.
  - b. That if the requested variance is for activity within a designated regulatory floodway, no increase in flood levels during the base flood discharge will result.
  - c. That the variance is the minimum necessary, considering the flood hazard, to afford relief.
3. THE ZONING BOARD OF ADJUSTMENT shall notify the applicant in writing that:
- a. The issuance of a variance to construct below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of Insurance coverage; and
  - b. Such construction below the base flood level increases risks to life and property. Such notification shall be maintained with a record of all variance actions.

**Section 4.11 Wetland and Watershed Conservation District.** (3-11-14)

- A. TITLE. The title of this District shall be the Wetland and Watershed Conservation District, and this section shall be identified as the Wetland and Watershed Conservation District Ordinance of the Town of Amherst, New Hampshire.
- B. AUTHORITY. This ordinance is adopted under authority granted pursuant to RSA 674:16 entitled Grant of Power and RSA 674:21 entitled Innovative Land Use Controls. In administering this Innovative Land Use Control Ordinance, the Planning Board shall enjoy the authority to grant Conditional Use Permits and Special Use Permits when an applicant is able to demonstrate to the satisfaction of the Planning Board that granting such permits will not compromise achievement of the stated purpose of this ordinance. Any appeal of a decision made by the Planning Board in administering this Innovative Land Use Control Ordinance must be made to Superior Court pursuant to the provisions of RSA 676:5, III and RSA 677:15.
- C. PURPOSE. The purpose of the Wetland and Watershed Conservation District is to protect the health, safety, and general welfare of the public by promoting both the most appropriate use of land and by protecting wetland and surface water ecosystems and water quality in accordance with the goals and objectives of Amherst's adopted Master Plan. Wetlands, surface waters, and associated buffers situated in the Town of Amherst are recognized as a valuable natural resource requiring careful management in order to preserve their benefits to public health, safety, and welfare. Correspondingly, the Town of Amherst hereby acknowledges wetlands, surface water, and associated buffers:
1. Prevent the destruction of or significant changes to wetland and surface waters and adjoining land which provides flood protection;
  2. Protect persons and property against the hazards of flood inundation by ensuring the continuation of the natural flow patterns of streams and other watercourses;

3. Provide for nutrient attenuation and augmentation of stream flow during dry periods;
4. Preserve and protect important wildlife habitat, flora, and fauna areas, including those critical to threatened and endangered species, and to maintain ecological balance;
5. Prevent the expenditure of municipal funds for the purposes of providing and/or maintaining essential services and utilities which might be required as a result of abuse or inharmonious use of land situated within the District;
6. Protect wetlands, surface waters, and groundwater supply and recharge areas within the Town of Amherst from degradation;
7. Mitigate the effects of structures and associated land uses which have the potential to compromise surface and groundwater supplies through the introduction of sewage, nutrients, hazardous substances, and siltation; and
8. Preserve and enhance those aesthetic values associated with the Wetland and Watershed Conservation District.

D. **APPLICABILITY.** Unless exempted by specific provision, all proposed development, removal of vegetation in excess of Comprehensive Shoreland Protection Act (as amended) limits, and alteration of terrain within the Wetland and Watershed Conservation District shall be subject to the provisions of this section.

E. **DEFINITIONS OF WORDS AND TERMS.** Reference shall be made to Article IX of this ordinance for the definition of words and terms used throughout this Wetland and Watershed Conservation District Ordinance.

F. **DISTRICT BOUNDARIES.**

The Wetland and Watershed Conservation District shall be comprised of all wetlands and surface waters, together with associated buffers, having the following dimensions:

1. Wetlands:

- |                               |   |
|-------------------------------|---|
| a. Water protection wetlands: | 100 feet                                |
| b. Significant wetlands:      | 50 feet                                 |
| c. Other wetlands:            | 25 feet                                 |
| d. Vernal pools (*):          | Tier One: 100 feet<br>Tier Two: 50 feet |

\*For those lots created prior to March 11, 2014, the noted buffer widths for vernal pools shall not apply.

2. Surface Waters:

- |                          |          |
|--------------------------|----------|
| a. Lakes and ponds:      | 100 feet |
| b. Ephemeral streams:    | 25 feet  |
| c. Intermittent streams: | 50 feet  |
| d. Perennial streams:    | 100 feet |

3. For the purposes of this ordinance, the reference line of all wetlands and surface waters shall be established by an on-ground delineation performed by a Certified Wetland Scientist (see buffer definition). All wetlands, surface waters, and vernal pools shall be field delineated and defined by a Certified Wetland Scientist.
4. The Wetland and Watershed Conservation District shall not include those wetlands which have developed as a result of the construction of storm water treatment and/or detention facilities, agricultural use, waste treatment, or other water dependent structures or uses, and manmade facilities. In the case of beaver activity, the reference line shall be determined by those areas that meet the jurisdiction of the NH Department of Environmental Services.
5. Wetlands located within New Hampshire Public Water Supply Wellhead Protection Areas, as delineated by the New Hampshire Department of Environmental Services, and wetlands within the Pennichuck Brook Watershed as shown on a plan entitled Watershed and Wetland Water Resource Map, 2013, shall be designated Public Water Protection Wetlands.
6. In order to permanently define boundaries of the Wetland and Watershed Conservation District, a durable disk or placard of a design acceptable to the Amherst Conservation Commission shall be installed and maintained along such boundaries at horizontal intervals of not more than fifty (50) feet.
7. Boundary Disputes. When any boundary of the Wetlands and Water Conservation District is disputed by either the Town of Amherst or by an applicant, the Planning Board, at the applicant's expense, may engage an independent Certified Wetland Scientist to determine the location of the Wetland and Watershed Conservation District. The independent Certified Wetland Scientist shall transmit his/her findings to the project engineer/surveyor who shall add said findings to the project plan. This revised plan, showing both wetland delineation boundaries, shall be presented to the Planning Board who shall make the final determination regarding District boundaries. The Town's Certified Wetland Scientist Agent shall convey said findings to the land owner and applicant.

G. PERMITTED USES. Each of the following uses shall be permitted by right in the Wetland and Watershed Conservation District:

1. Forestry Uses, subject to the provisions of RSA 227-J:6, as amended, and in accordance with applicable Best Management Practices.
2. Agricultural Uses, as defined by RSA 21:34-a, as amended, and in accordance with applicable Best Management Practices. The Planning Board reserves the right to reasonably regulate

agricultural uses as provided for in RSA 674:32-b, as amended.

3. The installation and maintenance of water wells and surface water intake facilities and associated supply lines and appurtenances.
4. Public and private open space, conservation land, trails, wildlife refuges, parks, and passive recreational uses and other low impact uses of land consistent with the stated purpose of this ordinance.
5. Construction and maintenance of fences, footbridges, catwalks, wharves/docks, and other water dependent structures provided said structures are constructed on posts, pilings, or other means of support which do not substantially alter the existing ground surface. New construction activities may require a permit from the NHDES. For maintenance of a legally constructed structure(s) refer to RSA 482-A: 3 IV. (a), (b), (c), as amended. Maintenance of existing public and private roads, driveways, bridges, and culverts; utilities; fire protection and irrigation supply works; and stormwater management facilities.
6. Replacement or repair of any existing septic system confirmed to be in failure provided:
  - a. The system requiring replacement or repair was in place prior to the date of adoption of this ordinance;
  - b. Prior to commencement of such replacement or repair the property owner has obtained any and all required State and local construction approvals and permits; and
  - c. The planned replacement or repair will not expand the intensity of use of the structure(s) it is intended to serve.

#### H. USES PERMITTED BY CONDITIONAL USE PERMIT.

Conditional Uses. Any use not identified as a permitted use under Paragraph G of this Section is recognized as having potential to adversely affect lands situated within the Wetland and Watershed Conservation District and, therefore, prove contrary to the stated purpose of this ordinance. However, the following uses of land in the Wetland and Watershed Conservation District may be permitted upon issuance of a Conditional Use Permit by the Planning Board, provided the Board finds, based upon competent evidence, that such use or uses will not be expected to significantly impair the function and values of resources situated within the District and meets the other criteria set forth herein:

1. Accessory structures associated with a legally existing primary structure, provided the applicant demonstrates that no practicable alternative exists elsewhere on the lot and outside of the Wetland and Watershed Conservation District.
2. Construction of streets, roads, and other access ways, including driveways, footpaths, bridges, and utilities if essential to the productive use of land beyond the Wetland and Watershed Conservation District. These uses shall be located and constructed in such a way as to minimize the potential for detrimental impact to the District and be planned, designed, and constructed in a manner consistent with applicable State and local standards. Such construction

may be permitted within the District only when no viable alternative is available.

3. Water impoundments for the purposes of creating a water body for wildlife, fire protection, stormwater management, or recreational use. Construction of impoundments for on-site detention and/or treatment of stormwater runoff in the Wetland and Watershed Conservation District, provided the Planning Board finds that it is not practical or possible to locate them outside of the District.
4. Non-conforming Uses and Structures: Expansion of a non-conforming use or structure situated within the Wetland and Watershed Conservation District may be permitted provided the Planning Board finds, in addition to the provisions outlined in Section I.2 a-g, that the proposed expansion conforms to the following additional standards:
  - a. The encroachment upon the surface water, wetland, or vernal pool is not increased;
  - b. The expansion is located as far from the surface water, wetland, or vernal pool as possible and located so as to minimize disturbance of existing vegetation within the District; and
  - c. The Planning Board finds that any potential decrease in wetland function and values resulting from the activity or use will be properly mitigated on the site. Mitigation strategies may include, but are not limited to, planting of indigenous vegetation in the District; improving existing or implementing new storm water management and treatment; removal and management on invasive species on the property; and the removal of excess impervious surfaces.
5. Other uses which the applicant is able to demonstrate to the satisfaction of the Planning Board that will not significantly interfere with wetland functions and values, water quality, or wildlife habitat pursuant to the statement of purpose of this ordinance; or in the alternative, uses that will impact wetlands functions and values; but, in the opinion of the Planning Board, are not contrary to the public interest and will result in significant public benefit provided:
  - a. Compensatory mitigation is provided such that those Wetland and Watershed Conservation District functions and values to be impacted will be off-set in whole. Such mitigation may be located on- or off-site. As a guide to the type and extent of compensatory mitigation considered, reference shall be made to the New England District Compensatory Mitigation Guidance, US Army Corps of Engineers, New England District, Regulatory Division, 7-2-2010 as amended.
  - b. The applicant has demonstrated avoidance and minimization to the fullest extent practical.

#### I. CONDITIONAL USE PERMIT REVIEW CRITERIA.

1. The Planning Board shall, in addition to referencing the findings referenced in the preceding section, consider all relevant facts and information prior to making a decision on any application for a Conditional Use Permit; find that the proposed project is consistent with the stated Purpose of this ordinance; and find, that to the extent possible, the project avoids and minimizes impacts to land situated within the District, including but not limited to the following:

- a. The proposed activity minimizes degradation of land situated within the District and offsets potential adverse impacts to functions and values of wetlands, surface waters, and vernal pools including but not limited to their capacity to:
  - i. Support fish and wildlife;
  - ii. Attenuate flooding;
  - iii. Supply and protect surface and ground water resources;
  - iv. Remove sediments;
  - v. Remove pollutants;
  - vi. Support wetland vegetation;
  - vii. Promote public health and safety; and
  - viii. Moderate fluctuations in surface water levels.
  
- b. The proposed activity will have no significant negative environmental impact to abutting or downstream properties and/or hydrologically connected water and/or wetland resources, including:
  - i. Increased potential for erosion, siltation, and turbidity of surface waters;
  - ii. Loss of fish and wildlife habitat;
  - iii. Loss of unique habitat having demonstrable natural, scientific, or educational value;
  - iv. Loss or decrease of beneficial aquatic organisms and wetland plants and their habitat;
  - v. Increased danger of flooding and/or transport of pollutants; and
  - vi. Destruction of the economic, aesthetic, recreational, and other public and private uses and values of the wetland to the community.
  
- c. The proposed activity or use cannot practicably be located otherwise on the site to eliminate or reduce impact to the Wetland and Watershed Conservation District.
- d. The proposed activity incorporates the use of those Best Management Practices recommended by the New Hampshire Department of Environmental Services and/or other State agencies having jurisdiction.
- e. All applicable Federal and/or State permit(s) have been received for the proposed activity in accordance with New Hampshire Code of Administrative Rules – Part Env-Wt 100-800 and Section 404 of the Federal Clean Water Act, as amended.
- f. Where applicable, proof of application to all required State and/or Federal permits.
- g. Prior to making a decision in regard to the possible approval of any Conditional Use Permit application, the Planning Board shall afford the Conservation Commission an opportunity to provide written comment. In the case of applications involving land situated within the watershed of the Pennichuck Brook, the Planning Board shall also afford Pennichuck Water Works (PWW) an opportunity to review and comment on the application. Both the Conservation Commission and PWW, after consideration and review of an application for a Conditional Use Permit, may recommend the Planning Board impose conditions of approval, if deemed necessary, to mitigate the potential for adverse effects caused by the proposed activity or use.

## J. CONDITIONAL USE APPLICATION REQUIREMENTS.

Application for a Conditional Use Permit shall be made on forms supplied by the Planning Board and shall include a narrative and/or site plan containing the following information on one or more pages at a scale suitable to illustrate relevant details of the project, as well as a report demonstrating compliance with the requirements of Section I. At a minimum, each application shall depict or identify:

1. North arrow and date of site plan preparation;
2. Property lines;
3. The location of Wetlands and other significant hydrological features, including provisions for the protection of ecologically sensitive areas and features of the site;
4. Names and addresses of owners and holders of conservation restrictions and easements on abutting properties;
5. Limits of surface waters, wetlands, vernal pools, and Wetland and Watershed Conservation District boundaries;
6. Soil types;
7. Vegetation types;
8. A report detailing how the function and values of the mapped on-site wetlands were determined and evaluated;
9. Topographic contours at no greater than two (2) foot intervals;
10. Surface drainage patterns;
11. Existing and proposed development, removal of vegetation, and alteration of the land surface conditions;
12. Computation of the extent of proposed impact to land situated within the Wetland and Watershed Conservation District. The extent of aerial impacts to the District shall be measured in square feet. The extent of volumetric impacts to the District shall be measured in cubic yards;
13. Stormwater management accommodations, both existing and proposed. The applicant shall demonstrate:
  - a. Post development peak stormwater discharge volumes exiting the site are less than or equal to pre-development discharge volumes for the ten (10) year return frequency design storm;
  - b. The volume of site generated stormwater to be infiltrated on-site by post-development conditions is greater than or equal to the volume infiltrated in the pre-development

- condition based on evaluation of the two (2) year return frequency design storm; and
  - c. Stormwater management facilities shall provide for sedimentation removal accommodations;
14. Erosion and sedimentation control measures proposed during construction;
  15. Identification of potential risks to the District anticipated as a result of proposed site development together with proposals for mitigation;
  16. A letter report issued by the New Hampshire Natural Heritage Inventory identifying any rare or endangered species known to exist within the project vicinity. In the event it is confirmed that rare or endangered species in fact exist on or immediately adjacent to the subject parcel, the applicant shall submit a proposal for mitigation of risk;
  17. Identification of hazardous materials to be stored or used on-site together with a plan for proper management of same;
  18. A statement acknowledging the applicant's intent to prohibit the use of lawn chemicals and deicing compounds, unless otherwise approved by the Planning Board; and
  19. If required by the Planning Board, provisions for monitoring ground and surface water quality;
  20. Provisions for future maintenance of the engineering design, operating, and monitoring controls to be implemented;
  21. A plan showing the estimated edge of wetlands within five hundred feet (500) of the nearest impact area; these wetland areas may be mapped based upon field observations, USGS maps, or other related map information that may be available.

**Section 4.12 Watershed Protection District - Deleted.** (3-11-14)

**Section 4.13 Aquifer Conservation and Wellhead Protection District.** (3-11-14)

- A. AUTHORITY. The Town of Amherst hereby adopts this Aquifer Conservation and Wellhead Protection District Ordinance pursuant to the authority granted under RSA 674:16 and RSA 674:21.
- B. PURPOSE. The Aquifer Conservation and Wellhead Protection District Ordinance (ACWPD) is established for the purpose of protecting quality and quantity of groundwater resources available to be used as current and/or future drinking water supplies. This ordinance is intended to:
  1. Maintain public health and welfare by protecting existing and potential sources of groundwater and associated recharge areas.
  2. Prevent land use practices and development that could reduce the volume of recharge available to aquifers identified as current or potential sources of drinking water.

3. Prevent land use practices and development that could contaminate or adversely impair the quality of groundwater within aquifers identified as current or potential sources of drinking water.
  4. Provide for future growth, in accordance with the Town's Master Plan, by protecting the long-term availability of clean, safe, potable water.
  5. Identify land uses that can safely be sited in aquifer recharge areas and in the proximity of water supply wells.
- C. **APPLICABILITY.** This ordinance shall apply to all uses of land situated within the Aquifer Conservation and Wellhead Protection District, with the exception of those uses which enjoy an exemption under Section G of this ordinance.
- D. **DISTRICT BOUNDARIES.**
1. Aquifer Conservation and Wellhead Protection District boundaries are as identified on a map on file with the Community Development Office entitled "Environmental Features" produced by the Nashua Regional Planning Commission. The ACWPD is an overlay district which is superimposed over all underlying districts. Data resources used to produce the map include:
    - a. Aquifer areas that have been delineated on mapping prepared by the U.S. Geological Survey entitled, *Hydrogeology of Stratified-Drift Aquifers and Water Quality in the Nashua Regional Planning Commission Area, South-Central New Hampshire*, prepared Toppin, K.W., 1987: *U.S. Geological Survey Water-Resources Investigations Report 86-4358*, and as may be amended or superseded by the U.S.G.S.
    - b. Wellhead Protection Areas associated with public water supply wells shown on the ACWPD map and as inventoried by the New Hampshire Department of Environmental Services.
  2. **Incorrectly Designated Zones.** In instances where the actual boundary of the Aquifer Conservation and Wellhead Protection District are disputed, the Planning Board, at the applicant's expense and authorization, may engage a qualified professional geologist or hydrogeologist to determine the precise location of the ACWPD boundaries. A report of the professional's findings shall be submitted to the Planning Board, which shall include but not be limited to the following:
    - a. A revised soils map of the area in question along with a written report of on-site field inspection and test boring data.
    - b. If the information provided to the Planning Board is accepted by the Board, the boundary of the district shall be adjusted based on the evidence provided. The Planning Board may reserve the right to withhold action on any application pending the results of an on-site inspection by the Board or its appointed agent.
- E. **PERMITTED USES.** All uses permitted in the underlying district are permitted in the Aquifer Conservation and Wellhead Protection District unless identified as a prohibited use or a

conditional use under this ordinance. All uses within the ACWPD shall comply with performance standards specified in Section 4.13.J unless specifically exempt under Section 4.13.G of this ordinance.

#### F. PROHIBITED USES.

1. The following uses are prohibited in the Aquifer Conservation and Wellhead Protection District:

- a. Development or operation of a hazardous waste disposal facility, as defined under RSA 147-A, as amended;
- b. Development or operation of a solid waste landfill, as defined under RSA 149-M, as amended;
- c. Outdoor storage of road salt or other deicing compounds;
- d. Development or operation of a junkyard;
- e. Development or operation of a snow dump;
- f. Development or operation of a wastewater or septage lagoon;
- g. Storage of bulk petroleum products, including operation of gasoline stations;
- h. Development or operation of a commercial animal feedlot; and
- i. Development or operation of a dry cleaning facility, using or storing dry cleaning chemicals on-site.

2. EXEMPTIONS. The following uses shall be exempt from the provisions of this ordinance provided they remain in compliance with all applicable local, state, and federal requirements:

- a. Any single or two family dwelling or Integrated Innovative Housing Development by Conditional Use Permit (3-10-15);
- b. Any business or facility where regulated substances are stored in containers having a capacity of not more than five (5) gallons;
- c. Storage of heating fuels for on-site use or fuels for emergency electric power generation, provided that storage tanks are indoors on a concrete floor or have corrosion control, leak detection, and secondary containment accommodations;
- d. Storage of motor fuel in tanks attached to vehicles fitted with permanent fuel lines to enable the fuel to be used by that vehicle;
- e. Storage and use of office supplies;
- f. Temporary storage of construction materials on a site where they are intended to be used;
- g. The sale, transportation, and storage of pesticides, as defined in RSA 430:29 XXVI, as amended;
- h. Household hazardous waste collection projects regulated under NH Code of Administrative Rules Env-Wm 401.03(b)(1) and 501.01(b);
- i. Agricultural uses as defined under RSA 21:34-a, as amended.

#### G. CONDITIONAL USES.

1. Any use not prohibited under Section F, but which will require one (1) or more of the following conditions, shall only be permitted by a Conditional Use Permit issued by the Planning Board in accordance with the following sections. A Conditional Use Permit under

this section shall be required for any of the following:

- a. Storage, handling, and use of regulated substances in quantities exceeding one hundred (100) gallons or eight hundred (800) pounds dry weight at any one (1) time, provided an adequate Spill Prevention Control and Countermeasure (SPCC) Plan, is prepared in accordance with Section 4.13.J of this ordinance, and is approved by the Fire Department;
  - b. Any activities that involve blasting of bedrock;
  - c. Truck and automotive repair facilities; or
  - d. Expansion of existing non-conforming uses or structures shall be allowed when demonstrated that the expansion will result in a more conforming site or use with greater protection for groundwater resources.
2. In granting such approval the Planning Board shall find such use or uses will remain in compliance with the performance standards in Section 4.13.J of this ordinance as well as all applicable local, State, and Federal requirements. The Planning Board may, at its discretion, require a performance guarantee or bond in an amount and form acceptable to the Board, be posted to ensure compliance with terms and conditions of the Conditional Use Permit.

#### H. CONDITIONAL USE PERMIT APPLICATION PROCEDURES.

1. Application for a Conditional Use Permit shall be made on forms supplied by the Planning Board and shall include a narrative and/or site plan containing the following information on one (1) or more pages at a scale suitable to illustrate relevant details of the project, as well as a report demonstrating compliance with applicable requirements of Section 4.13.I of this ordinance. As a minimum, each application shall depict or identify:
  - a. North arrow and date of site plan preparation;
  - b. Property boundaries and total parcel area;
  - c. Location of ACWPD boundaries;
  - d. Names and addresses of applicant, owners, abutters, and holders of conservation restrictions and easements on abutting properties;
  - e. Limits of wetlands, vernal pools and Wetland and Watershed Conservation District boundaries;
  - f. Soil mapping units;
  - g. Topographic contours at intervals not more than two (2) feet;
  - h. Existing and proposed development, including removal of vegetation and alteration of terrain;
  - i. Stormwater management accommodations, both existing and proposed. The applicant shall demonstrate:
    - i. post development peak stormwater discharge volumes exiting the site are less than or equal to predevelopment discharge volumes for the 10-year return frequency design storm;
    - ii. volume of site generated stormwater to be infiltrated on-site under post-development

- conditions is greater than or equal to the volume infiltrated under the predevelopment condition based on evaluation of the 2 year return frequency design storm; and
- iii. stormwater management facilities shall provide for the removal of sediment;
  - j. Identification of potential risks to the district anticipated as a result of proposed site development together with proposals for mitigation;
  - k. Identification of hazardous materials to be stored or used on-site together with a plan for proper management of the same; and,
  - l. If required by the Planning Board, provisions for monitoring of groundwater and/or surface water quality.
2. Proposals for conditional uses, which involve regulated substances, shall also be required to submit a Spill Prevention Control and Countermeasure (SPCC) Plan to the Fire Department for review and approval. An SPCC Plan shall include:
    - a. A description of the physical layout and a facility diagram, including all surrounding surface waters and wellhead protection areas;
    - b. A contact list with telephone numbers (including cell phone) and email addresses of the facility response coordinator, cleanup contractors, and all appropriate Federal, State, and local agencies who must be contacted upon release to the environment;
    - c. A list of all regulated substances to be stored on the premise;
    - d. A description of containment and/or diversionary structures or equipment to prevent regulated substances from infiltrating into the ground.
  3. The Planning Board shall consider all relevant facts and information prior to making a decision on any application for a Conditional Use Permit; find the proposal is consistent with the stated purpose of this ordinance; and find that to the extent possible, the project avoids and minimizes impacts to land situated within the district, including but not limited to the following:
    - a. The proposed activity minimizes degradation of land situated within the district.
    - b. The proposed activity will have no significant negative environmental impact to abutting or downstream properties and/or hydrologically connected water resources.
    - c. The proposed activity incorporates the use of those best management practices recommended by the New Hampshire Department of Environmental Services and/or other State agencies having jurisdiction.
    - d. All applicable Federal and/or State Permit(s) have been received for the proposed activity in accordance with New Hampshire Code of Administrative Rules – Part Env-Wt 100-800 and Section 404 of the Federal Clean Water Act, as amended.
    - e. Prior to making a decision in regard to the possible approval of any Conditional Use Permit application, the Planning Board shall afford the Conservation Commission, as well as Pennichuck Water Works (PWW), an opportunity to review and comment on the application. Both the Conservation Commission and PWW, after consideration and review of an application for a Conditional Use Permit may recommend the Planning Board impose conditions of approval, if deemed necessary, to mitigate the potential for adverse

effects caused by the proposed activity or use.

- I. PERFORMANCE STANDARDS. The following performance standards shall apply to all uses of land in the Aquifer Conservation and Wellhead Protection District unless such use or uses enjoy an exemption under Article 4.13.G of this ordinance.
1. For any use that will render more than fifteen (15) percent of the total parcel area impervious, a stormwater management plan consistent with New Hampshire Stormwater Manual Volumes 1-3, December 2008, as amended; published by NH Department of Environmental Services, shall be prepared and submitted to the Planning Board.
  2. Conditional uses, as defined under Article 4.13 H shall develop stormwater management and pollution prevention plans and include information consistent with *Developing Your Stormwater Pollution Prevention Plan: A Guide for Industrial Operators* (US EPA, Feb 2009, as amended). The plan shall:
    - a. Meet minimum stormwater discharge setbacks between water supply wells and constructed stormwater practices as found within the *Innovative Land Use Planning Techniques: A Handbook for Sustainable Development*, Section 2.1 Permanent (Post-Construction) Stormwater Management, (NHDES 2008, as amended);
    - b. Minimize, through a source control plan that identifies pollution prevention measures, the release of regulated substances into stormwater;
    - c. Stipulate that expansion or redevelopment activities shall require an amended stormwater plan and may not infiltrate stormwater through areas containing contaminated soils without completing a Phase I Environmental Site Assessment in conformance with ASTM E 1527-05; and,
    - d. Maintain a vertical separation between the bottom of a stormwater management facility which infiltrates or filters, of not less than four feet above seasonal high water table elevation as determined by a licensed hydrogeologist, soil scientist, engineer or other qualified professional as determined by the Planning Board.
  3. Animal manures, fertilizers, and compost must be stored in accordance with Manual of Best Management Practices for Agriculture in New Hampshire, NH Department of Agriculture, Markets, and Food, July 2008, as amended;
  4. All regulated substances stored in containers with a capacity of more than five (5) gallons must be stored in product-tight containers on an impervious surface designed and maintained to prevent flow to exposed soils, floor drains, and the out-of-doors;
  5. Facilities where regulated substances are stored must be secured against unauthorized entry by means of a door and/or gate that is locked when authorized personnel are not present and must be inspected weekly by the facility owner;
  6. Outdoor storage areas for regulated substances, associated material, or waste must be protected from exposure to precipitation and must be located at least fifty (50) feet from surface water or storm drains; and outside of protective radii of wells;

7. Secondary containment must be provided for outdoor storage of regulated substances in regulated containers and the containment structure must include a cover to minimize accumulation of water in the containment area and contact between precipitation and storage container(s);
8. Containers in which regulated substances are stored must be clearly and visibly labeled and must be kept closed and sealed when material is not being transferred from one (1) container to another;
9. Prior to any land clearing or alteration of terrain, any inactive wells on the property shall be identified and must be decommissioned in accordance with Part We 604 Abandonment of Wells of the New Hampshire Water Well Board Rules, as amended. Proposed site activity shall not impact the integrity of any well located on the property.
10. Blasting activities shall be planned and conducted in a manner consistent with best management practices published by the NHDES to minimize groundwater contamination.
11. All transfers of petroleum products from delivery trucks and storage containers over five (5) gallons in capacity shall be conducted over an impervious surface having a positive limiting barrier at its perimeter.
12. At the option of the Planning Board, monitoring wells may be established for all industrial and commercial uses utilizing or storing hazardous or toxic materials. The number and location of monitoring wells shall be determined by the Planning Board. The required frequency and protocol for sampling and testing of groundwater shall be specified by the Planning Board.
13. Storage of pesticides, herbicides, fertilizers, manure, and other potentially dangerous leachables shall be set back from water supply wells in accordance with State regulations including Chapter PES 500, managed in accordance with NH Best Management Practices for Agriculture, and controlled in a manner determined by the Planning Board. Appropriate and applicable best management practices shall be implemented as recommended by the New Hampshire Department of Environmental Services.
14. When an industrial or commercial use within the ACWPD changes to one which involves the use, storage, or disposal of hazardous or toxic materials (regulated substances), Non-Residential Site Plan Review shall be required.
15. Not more than seventy percent (70%) of the total area of any lot or parcel shall be rendered impervious.
16. Sodium chloride salt stored and used for deicing activities shall be properly managed and applied in accordance with accepted best management practices as published by NHDES to minimize impacts to groundwater and reduce the amount necessary for public safety. Alternatives such as calcium magnesium acetate (CMA) and/or potassium acetate (KA) are encouraged.

17. Floor drains are prohibited unless drain is directed to a dry well used to temporarily store fluids until such time they are legally removed.
18. An impermeable barrier membrane (minimum of 20 mil) shall be installed beneath slab floors to prevent the infiltration of any spilled liquids within the building from percolating into the ground. The Planning Board has the discretion to impose any other requirements as necessary to achieve the stated purpose.

J. **EXISTING NON-CONFORMING USES.** Existing non-conforming uses may continue to operate without complying with the terms of this ordinance provided that any expansion of said use shall require that a Conditional Use Permit be obtained as provided for herein. Existing non-conforming uses must be in compliance with all applicable State and Federal requirements, including Env-Wq 401, Best Management Practices Rules.

K. **ADMINISTRATION AND ENFORCEMENT**

1. For uses requiring Planning Board approval under this ordinance, a narrative description of maintenance requirements for structures required to comply with performance standards shall be recorded at the Hillsborough County Registry of Deeds.
2. Periodic inspections by the Community Development Office may be required to verify compliance with performance standards. Inspections may be completed by the Community Development staff or their agents, at reasonable times with prior notice to the landowner.
3. All land in the ACWPD known to the Planning Board or designated agent as using or storing regulated substances in containers having a capacity of more than five (5) gallons shall be subject to inspections under this section unless such property enjoys an exemption pursuant to the provisions of Section 4.13.G of this ordinance.
4. The Planning Board may require a fee for compliance inspections. The fee shall be paid by the property owner. A fee schedule shall be established by the Planning Board as provided for under RSA 41-9:a.
5. Any substance spills that require notification under NHDES rules and procedures shall be reported to the Fire Department and the Planning Board.

**Section 4.14 Workforce Housing.** (3-10-15)

- A. **WORKFORCE HOUSING DEVELOPMENTS** are permissible upon demonstration of the conditions set forth below.
- B. **PURPOSE.** Provide suitable opportunities for housing that is affordable (as that term is defined in RSA 674:58) for households of limited means, without sacrificing public health, safety, and welfare.

Encourage creative approaches to providing affordable housing suitable for a variety of households, including (but not limited to) families, singles and seniors.

Comply with the provisions of RSA 674:58, et. seq.

- C. PRELIMINARY CONCEPTUAL CONSULTATION. The Applicant may make application for conceptual consultation to the Planning Board to construct Workforce Housing which shall include preliminary, conceptual plans, site drawings and building information sufficient for a non-binding discussion of the proposed project in accordance with RSA 676:4-II(a).
- D. DESIGN REVIEW. The Applicant may make application for design review to the Planning Board to construct Workforce Housing which shall include preliminary plans, site drawings and building information sufficient for review of the project in accordance with RSA 676:4-II(b).
- E. FINAL REVIEW. The applicant shall make application to the Planning Board to construct Workforce Housing, which shall include sufficient useful information for the Planning Board to review and determine the same as a suitable Workforce Housing application and project that meets the following criteria:
  - 1. General Criteria.
    - a. The complete Workforce Housing project shall be harmonious with its natural surroundings and compatible with neighboring developments and homes in terms of outside design, relative size, and finish.
    - b. The project shall not detract from either the ecological or the visual qualities of the environment.
    - c. The housing proposal shall be affordable in compliance with Section G.
    - d. The proposal meets the purposes of the ordinance under which the application is proposed.
    - e. There will be no significant adverse impacts resulting from the proposed use upon the public health, safety, and general welfare of the neighborhood and the Town of Amherst.
    - f. The proposed residential uses will not adversely affect nearby properties due to noise, fumes, vibration, or light. The project location shall not expose its residents to objectionable noise, fumes, vibration, or inappropriate light. (3-11-14)
    - g. The proposed use will not adversely affect the water resources of Amherst, as defined in the Aquifer Conservation and Wellhead Protection District as defined in Section 4.13 of the Amherst Zoning Ordinance.
    - h. The project shall comply with all applicable site plan and/or subdivision regulations, other than those waived hereunder.
    - i. An Applicant's request for a site density level that exceeds that provided for in the applicable district regulations is predicated on a showing that the same is required to achieve a reasonable expectation of Economic Viability (as defined herein). Accordingly, any project which is requesting such a density level shall, in addition to the demonstration of Economic Viability, also demonstrate to the satisfaction of the Planning Board the manner in which this project is promoting the purposes of this ordinance (as set forth above) and the spirit and intent of the Amherst Zoning Ordinance and the Amherst Master Plan.

2. Specific Criteria
  - a. Where there is an existing dwelling, the Net Tract Area shall be at least sufficient to provide a conforming conventional sized lot for the existing dwelling.
  - b. The Planning Board may designate accessory apartments incorporated within an existing or proposed single-family home as Workforce Housing. Such designation will allow an accessory workforce dwelling unit within an existing freestanding structure if the structure can be legally adapted to such residential use and any such adaptation remains economically viable as defined herein. The total area of any workforce housing accessory apartment shall not be less than six hundred (600) square feet or exceed forty five percent (45%) of the total heated living area contained within the existing residential structure.
  - c. The Planning Board reserves the right to modify density allowances if during its comprehensive site plan review it determines that physical land characteristics or other considerations do not support preliminary density allowances.

3. Preliminary Density

Density allowances and/or total unit count that result from "Design Review" determinations are preliminary. The Planning Board may vary both density allowances and total unit count based upon Section G and Section H if the completed project analysis reveals calculations or conditions are other than those upon which the Planning Board made its determinations under Design Review (See below).

- F. ZONING DISTRICT. Once the Planning Board designates a proposed project as suitable for Workforce Housing and determines that the same is satisfactory and compliant with the above standards, that project may be located on any suitable property irrespective of the zoning district classification.
- G. MODIFIED LOT SIZE, DENSITY, SETBACKS, and OPEN SPACE: The Planning Board may modify minimum lot area, density, setbacks, and open space requirements for each project as the Planning Board determines to be necessary in the best interest of the Town. The Planning Board may grant departures from general and specific standards based on economic criteria presented by the applicant in evidence of need for such departures so as to make the construction of Workforce Housing Economically Viable as defined herein.

When deliberating modifications to zoning requirements for Workforce Housing applications, the Planning Board shall consider the following:

- a. Open space shall be sufficient to accommodate the needs of the proposed occupants of the project. At least 25% of the total parcel area shall be open space.
- b. Setbacks shall be sufficient to buffer and protect adjacent properties. A perimeter setback of 50 feet of landscaped or natural vegetation shall provide a buffer to less dense neighborhood development.
- c. The Planning Board may waive dimensional standards of lot size, density, setbacks and open space, but only when it has been demonstrated that construction of a "workforce housing project" (as that term is defined below), cannot for economic

reasons be feasibly constructed because of those standards. In making such a determination, however, the Planning Board shall ensure that the project complies with the general criteria. Further, the Planning Board, in making such waiver, shall grant only the minimum waiver(s) demonstrated to be necessary to render the project economically feasible.

- i. An applicant seeking to request a waiver under this section shall apply for the same to the Planning Board according to the procedure set forth in the Site Plan Regulations. When making that application, the applicant shall provide sufficient information to the Planning Board to demonstrate the following:
  - ii. The proposed project is incapable of being feasibly constructed within the existing area requirements specified for the applicable zoning district for economic reasons and that the limitations do not permit any other sufficient, realistic or reasonable opportunities to provide workforce housing; and, (NOTE: See Non-Residential Site Review Regulations for Project Suitability Procedure Regulations; “Affordable Housing”.)
  - iii. The granting of waivers will result in the project being Economically Viable and will allow for the construction of “workforce housing” units, which RSA 674:58, as amended defines as target income group(s) or lower income group(s) that the applicant defines; and,
  - iv. The applicant seeking a waiver will identify the general and specific standards for which a waiver is necessary and will provide appropriate documentation supporting the economic reasons by which the strict application of such general or specific standards causes the project to be economically infeasible to construct and,
  - v. The project design is such that it complies with all applicable standards related to environmental protection, water supply, sanitary disposal, traffic safety, and fire, and life safety protection; and,
  - vi. The applicant has provided a suitable mechanism to ensure that the proposed housing stock as constructed will be available to persons of the target income group for a period not less than twenty-five (25) years.
- d. The Planning Board may withdraw any regulatory allowances including lot size, density, setback, and other zoning or regulatory allowances for Workforce Housing before final Site Plan approval upon its determination that revocation of its voluntary measures is reasonable due to the following:
- i. A material reduction in project cost that renders unwarranted the basis for density or other allowances granted to promote Economic Viability;
  - ii. Fraud, misrepresentation of facts, or other deliberate actions that abuse or violate the intent of this ordinance;
- e. Projects that are to be constructed in a phased manner shall include construction of a proportional mix of units and amenities upon which allowances were based.
- f. Expiration of provision shall occur subject to the following:
- i. Any failure to implement development of a Workforce Housing project following site plan approval within a time frame set and approved by the Planning Board;
  - ii. Any failure to complete a Workforce Housing project within a timeframe set and approved by the Planning Board.

H. RULES AND REGULATIONS. The Planning Board may adopt appropriate rules and

regulations to implement the review process contemplated hereunder. Such rules shall provide for the developer and subsequent owners to restrict the sale or lease of the units through appropriate recorded covenants to those who qualify, pursuant to the definition of affordable housing contained in this Ordinance.

Existing housing units previously designated as “Affordable Housing” units that do not have appropriate recorded covenants may elect to present to the Zoning Administrator appropriate covenants, to be approved by Planning Board, in exchange for a written waiver that allows such existing residential units to legally exceed the previously mandated 1,300 SF size limitation.

I. DEFINITIONS. “Workforce Housing,” as used in this ordinance, shall constitute qualifying housing, which is for sale or lease, and is affordable.

1. “Affordable” in this context shall mean:

1. Housing intended for sale with combined mortgage loan debt service, property taxes, and required insurance that shall not exceed thirty percent (30%) of household gross annual income;
  - i. Such annual gross income for homebuyers shall be no more than one hundred percent (100%) of the median income for a four (4) person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development or as otherwise modified by state or federal law. (3-11-14).
2. Housing intended for lease with combined rental and utility costs that do not exceed thirty percent (30%) of household gross annual income;
  - i. Such annual gross income for rental housing shall be no more than sixty percent (60%) of the median income for a three (3) person household for the metropolitan area or county in which the housing is located as published annually by the United States Department of Housing and Urban Development or as otherwise modified by state or federal law. (3-11-14).

2. Except for elderly housing as defined in this ordinance, “Workforce Housing” may include “Affordable” housing as defined above, but shall not include housing developments that exclude minor children from more than twenty percent (20%) of the units, or in which more than fifty percent (50%) of the dwelling units have fewer than two (2) bedrooms. “Workforce Housing” may also include “multi-family housing,” as that term is defined in RSA 674:58, (II), (as amended) which means a building or structure containing five (5) or more dwelling units, each designed for occupancy by an individual household. (3-14-17)

“Economic Viability” is the cost-benefit relationship of an economic endeavor expressed as an Annualized Return on Investment (ROI). An Annualized ROI shall be the sole measure of Economic Viability.

1. Application approvals *without* “Phasing Term” shall employ the Simplified Annual ROI expressed formulaically as follows:

$$\text{Simple Annual ROI} = \left\{ \frac{\text{"Market Value" of "Completed Project"}}{\text{Total Cost of "Completed Project"}} \right\} - 1$$

2. Application approvals *with* a “Phasing Term” shall employ the Compound Annual ROI expressed formulaically as follows:

$$\text{Compounded Annual ROI} = \frac{\text{ROI}}{\text{Phasing Factor}}$$

Where:

$$\text{ROI} = \left\{ \frac{\text{"Market Value" of "Completed Project"}}{\text{Total Cost of "Completed Project"}} \right\}$$

$$\text{Phasing Factor} = \left\{ \left\{ \frac{\text{"Market Value" of "Completed Project"}}{\text{"Completed Project" Total Cost}} \right\}^{\left( \frac{1}{\text{Phasing Term}} \right)^*} \right\} - 1$$

\*  $\left( \frac{1}{\text{Phasing Term}} \right)$  is an exponent

The applicant shall validate to the Planning Board at the time of application that the project ROI is consistent with and proportional to the median Annualized ROI of competing and comparable properties regionally. Market analysis shall include appropriate economic adjustments for land characteristics, location, time, market conditions and other relevant project factors. The applicant shall document and present actual or projected cost of production to include, but not be limited to the true cost of land, labor, material, capital, coordination, entrepreneurial risk, and restrictiveness of covenants necessary under this ordinance.

Economic Viability shall be further subject to the following limitations by project type:

3. One-to-four family Workforce Housing units per structure, or multifamily Workforce Housing consisting of five (5) or more units per building within projects having 24 units or less that are available for rental or sale:
  - i. The analysis shall use the formula in I.2.a, irrespective of the number of structures that are for sale and/or rental, and treat rental units as condominium units available for sale within one year of project completion.
  - ii. The applicant shall derive and support the requisite Annualized ROI and may, as an alternative to a “real estate appraisal report”, demonstrate and support an opinion of “Market Value” through “Market Analysis” together with a “Feasibility Analysis”, “Cash Flow Analysis”, and/or “Investment Analysis”;
  - iii. The applicant shall provide and present quality market-derived project information of sufficient quantity, which is relevant, reliable, timely, and verifiable, in a format that is suitable and useful for Planning Board determinations.

4. Multifamily Workforce Housing consisting of five (5) or more units per building within projects having 25 units or more, having both residential rental units or residential units for sale with or without commercial suites for rent or sale, shall support the requisite Annualized ROI with a “real estate appraisal report” as defined in RSA 310-B: 2, II, as amended.
    - i. The applicant shall derive and support the project’s requisite “Market Value” by at least one or by several of the following valuation models:
      1. Direct Sale Comparison method;
      2. Cost-of-Development method, or;
      3. Direct Capitalization of Net Operating Income method;
    - ii. The applicant may select at least one model based on the quality and quantity of market-derived information that is available, reliable, timely, and verifiable;
    - iii. The applicant shall support model conclusions with a Discounted Cash Flow (DCF) analysis, “Cash Flow Analysis”, or other such analysis determined by the Planning Board as acceptable evidence of model reliability;
    - iv. The applicant shall certify compliance with industry standard practices for the use of such models.
  5. The applicant shall provide a current land value appraisal, executed purchase contract, or purchase option contract to validate land valuation or cost, wherein appraisals shall measure current land value as though vacant and available for its highest and best use, which is economically feasible, socially acceptable, legally permissible, and physically possible at the time of application.
3. “Cash Flow Analysis” means a study of the anticipated movement of funds into or out of an investment. (NH CHAPTER Rab 100.01: (i); as amended)
  4. “Commercial” means a type of real property which is used or intended to be used for any purpose other than one to four family residential use. (NH CHAPTER Rab 100.01: (m) as amended)
  5. “Completed Project” means the project development is sufficiently complete to have all occupancy permits.
  6. “Feasibility Analysis” means a study of the cost-benefit relationship of an endeavor. (NH CHAPTER Rab 100.01: (r); as amended)
  7. “Investment Analysis” means a study that reflects the relationship between acquisition price and anticipated future benefits of a real estate investment. (NH CHAPTER Rab 100.01: (t); as amended)
  8. “Market Analysis” means a study of real estate market conditions for a specific type of property. (NH CHAPTER Rab 100.01: (w); as amended)
  9. “Market Value” as defined by “The Appraisal of Real Estate, 13th Ed.”, The Appraisal Institute; as amended: “The most probable price, as of a specified date, in cash, or in terms equivalent to cash, or in other precisely revealed terms, for which the specified property rights should sell after reasonable exposure in a competitive market under all conditions requisite to a fair sale, with the buyer and seller each acting prudently, knowledgeably, and for self- interest, and assuming that neither is under undue duress.”

J. FINAL DETERMINATION. The Planning Board may determine after testimony, examination, independent review, and deliberation of market evidence and/or independent

findings that the Planning Board deems useful and reliable may make one of the following findings:

1. Allow the unit density proposed by the applicant;
2. Determine that increasing the unit density is necessary to accommodate a successful implementation of Workforce Housing, or;
3. Determine that a lower unit density will not diminish the economic viability of the Workforce Housing application.

**Section 4.15 Historic District (HD). (3-11-86, 3-13-01)**

A. HISTORIC PRESERVATION PURPOSE. The purpose of this ordinance is to promote the educational, cultural, economic, and general welfare of the public for the protection, enhancement, perpetuation, and preservation of the Historic District. It is hereby declared that it is a public purpose that the heritage of Amherst will be safeguarded by:

1. Preserving districts in Amherst which reflect elements of the cultural, social, economic, political, and architectural history;
2. Conserving property values in such districts;
3. Fostering civic beauty;
4. Strengthening the local economy;
5. Promoting the use of an historic district for the education, pleasure, and welfare of the citizens of Amherst.

B. DEFINITIONS. (3-13-01) Unless specifically defined below, words or phrases in this ordinance shall be interpreted to give them the same meaning as they have in common usage and so as to give this ordinance its most reasonable application.

Abutter. Any person whose property is located in the Amherst Village Historic District and adjoins or is directly across the street or stream from the land under consideration by the Commission. For purposes of receiving testimony only and not for purposes of notification, the term abutter shall include any person who is able to demonstrate that his property will be directly affected by the proposal under consideration.

Alteration. Any act or process that changes one or more of the exterior architectural features of a structure, including, but not limited to, the erection, construction, reconstruction, or removal of any structure.

Alternate Member. A member of the Commission who, at the direction of the chairperson, serves in the absence or disqualification of a regular member of the Commission.

Appearance. The architectural character and general composition of the exterior of a structure, including, but not limited to, the kind, color, and texture of the building materials and the type,

design, and character of all windows, doors, light fixtures, signs, and appurtenant elements.

Appurtenance. Property that is situated on, but subordinate to, the structure or place, such as a hot tub, swimming pool, antennae, satellite dish, etc.

Building. Any structure that has a roof and is intended to shelter people, animals or chattel.

Building Permit (or Permit). A certificate issued by the Zoning Administrator permitting the building, alteration, installation, repair, or change of buildings, fences (within the Historic District), land, or uses as regulated by the Zoning Ordinance. (3-11-03)

Certificate of Approval (or Certificate). A certificate issued by the Historic District Commission indicating its approval of an application to alter, repair, construct, add onto, move, demolish, or change the use of a structure or a site within an Historic District.

Change of Use. A change in how a structure or place is utilized or developed, whether for industrial, commercial, residential or agricultural purposes.

Character. The aggregate of visible historic and architectural features and traits that together form the individual nature of an historic district.

Commission. Commission shall mean the Historic District Commission of the Town of Amherst, New Hampshire.

Construction. The act of adding an addition to an existing structure or the erection of a new principal accessory or structure on a lot or property.

Demolition. Any act or process that destroys in part or in whole a landmark or structure.

Designation. Act of identifying historic structures and districts subject to regulation in historic preservation ordinances or other preservation laws.

Design Guidelines (or Guidelines). Standards of appropriate design and activity developed by the Commission which offer property owners guidance in preserving the historic and architectural character of a structure, setting, or place, and which standards shall include the *Secretary of the Interior's Standards for Rehabilitation*. (See *Regulations*.)

Ex Officio Member. Any member of the Commission who holds office by virtue of an official position and who shall exercise all the powers of a regular member of the Commission.

Elevation. The orthographic projection of an object or structure on a vertical picture plane parallel to one of its sides, and usually drawn to scale.

Historic District. An area designated by ordinance of the Town of Amherst and which contains within definable geographic boundaries a significant concentration, linkage, or continuity of sites,

buildings, structures, or objects united by past events or aesthetically by plan or physical development.

Historic Property (or Historic Resource). Any prehistoric or historic site, place, building, structure, or object that is deemed by the Commission to have historic, cultural, social, economic, political, or architectural significance.

Maintenance. Ordinary maintenance and repair of any architectural feature that does not involve removal or a change in design, dimensions, materials or outer appearance of such feature.

Moving. Any relocation or removal of a structure on its site or to another site.

National Register of Historic Places (or National Register). Official inventory of "districts, sites, buildings, structures, and objects significant in American history, architecture, archaeology, engineering and culture."

Orthographic Projection. A method of projection in which a three-dimensional object is represented by projecting lines perpendicular to a picture plane.

Place. An open space of land within the historic district.

Preservation. The act or process of applying measures necessary to sustain the existing form, integrity, and materials of an historic structure, place, or feature.

Reconstruction. The act or process of reproducing by new construction, the form, features, and detailing of a non-surviving site, landscape, building, structure, or object for the purposes of replicating its appearance at a specific period of time and in its historic location.

Regular Member. A member of the Commission who has full voting power.

Regulations. Local design guidelines and standards of review promulgated by the Commission that interpret and implement statutory requirements and are in conformance with the Historic District Zoning Overlay.

Rehabilitation. The process of returning property to a state of utility, through repair or alteration, which makes possible an efficient contemporary use while preserving those portions and features of the property which are significant to its historic, architectural, and cultural values.

Repair. Any change that is not construction, addition, demolition, moving, or alteration.

Restoration. The act or process of accurately recovering the form, features, and character of a property and its setting as it appeared at a particular period of time by means of removal of features from other periods in its history and reconstruction of missing features from the restoration period.

Rules of Procedure. A set of rules adopted by the Commission pursuant to RSA 676 concerning

the method of conducting the Commission's business.

Scale. A certain proportionate size, extent, or degree, usually judged in relation to some standard or point of reference.

Street. Relates to and includes street, avenue, boulevard, road, lane, alley, viaduct, highway, freeway and other ways.

Structure-: Anything constructed or erected, the use of which requires permanent or temporary location on or in the ground, including, but not limited to: buildings, fences, stone walls, gazebos, signs, backstops for tennis courts and ballparks, antennae, above ground pools and hot tubs, air conditioning units, propane tanks, playground equipment, etc.

Texture. The visual and tactile quality of a surface, apart from its color or form.

Zoning Ordinance. The laws of the Town of Amherst regulating the building, alteration, installation, repair, or change of buildings, land, or uses within the borders of the entire Town.

#### C. AMHERST VILLAGE HISTORIC DISTRICT.

Pursuant to RSA Chapter 674:46, there is hereby established an historic district known as the Amherst Village Historic District, the boundaries of which are delineated on the Zoning Map on file with the Zoning Administrator.

1. **Historic Significance.** The Amherst Village Historic District is hereby recognized as an area of unique character, and architectural nature which can contribute significantly to the attractiveness and vitality of Amherst. It is further recognized that the character and nature of the area depends on the unity of design of the complex in which each building contributes creating a value greater than the sum of the individual contributions. The character and value of the area as the county seat and center of government of Hillsborough County from 1771 to 1879, the continuity of rich architectural expression, quality and integrity in closely related styles, materials, scale and detail in individual buildings and throughout the area and the opportunities that the area offers to maintain its historical heritage. The opportunities that the area offers are recognized as including retention of the architectural and historic values of the area. This ordinance is intended to provide for regulations of activities that would alter the exterior appearance of existing and proposed structures and for activities that would alter the use and appearance of the exterior spaces adjoining these buildings.
2. **Criteria for designation of local historic districts.** Criteria for the designation of local historic districts shall be the same as the National Register criteria as set forth in 36 CFR 60 ["Code of Federal Regulations," Chapter 36, Part 60 published in the *Federal Register*]. (3-13-01)
3. **Procedures for designation of local historic districts.** An historic district shall be considered to be superimposed over the existing zoning districts and the rules and regulations applicable to an historic district shall be in addition to those applicable to the zoning

districts which have been established for the area and as they may from time to time be amended. Procedures for the designation of local historic districts shall be in conformance with RSA 674:46 and other applicable statutory requirements.

#### D. HISTORIC DISTRICT COMMISSION.

In order to carry out the purpose of this ordinance, a Historic District Commission known as the Amherst Historic District Commission is hereby established pursuant to RSA Chapter 673 which Historic District Commission is the successor to, and a continuation of the Historic District Commission established at the Annual Meeting in March 1970.

##### 1. Membership.

- a. The Commission shall consist of not fewer than five (5) nor more than seven (7) regular members, one (1) of whom shall be an *ex officio* member of the Board of Selectmen and one (1) of whom may be an *ex officio* member of the Planning Board. Not more than five (5) alternate members may be appointed. *Ex officio* members from the Planning Board and the Board of Selectmen shall be appointed by their respective boards. All other regular and alternate members shall be appointed by the Board of Selectmen. (3-13-01)
- b. The qualifications and terms of Commission members, the organization, election, and terms of its officers, and the scheduling of meetings shall be in accordance with the provisions of RSA Chapter 673 and any rules of procedure of the Commission not inconsistent with the State enabling statutes. At a minimum, in determining each member's qualifications, the Board of Selectmen shall take into consideration the appointee's demonstrated interest and ability to understand, appreciate and promote the purposes of the Commission. (3-13-01)

##### 2. Powers and Duties.

- a. The Commission shall have all the powers and duties vested in the Historic District Commissions under RSA Chapter 674 and 675.
- b. The Commission shall adopt rules of procedure (to prescribe the method of conducting its business) and regulations (to provide design guidelines and standards of review) consistent with this ordinance and RSA Chapters 673, 674 and 676.
- c. The Commission shall seek advice from such professional, educational, cultural, and other groups of persons that may be deemed necessary in the determination of a reasonable decision. The Commission shall have the power to engage such technical assistance and consultants as may be deemed necessary to carry out the purposes of this ordinance.
- d. The Commission shall have the power to accept and use gifts, grants, and contributions in the exercise of its function.
- e. The Commission may conduct surveys of the buildings for the purposes of determining those of historic and/or architectural significance and pertinent facts about them, formulate recommendations concerning the preparation of maps, brochures and historic markers for selected historic and/or architectural sites and buildings, cooperate with and advise the governing body, the Planning Board and other municipal agencies involving

historic and/or architectural sites and buildings; advise owners of the buildings of the problems of preservation and restoration.

#### E. CERTIFICATE OF APPROVAL REQUIRED.

1. Except as provided herein, it shall be unlawful for any owner or person (including without limitation any municipal or governmental entity) to alter, construct, repair, move, demolish, or change the use of any structure or place located within the Historic District without applying for and receiving from the Commission a Certificate of Approval for such activity. Activities which require Certificates of Approval are intended to include, but not limited to, such activities as changing the architectural detail of exterior walls, replacement or modification of windows, doors or siding, installation or removal of porches or fire escapes, roofing or chimney modification and installation of antennae or other appurtenances on or near the building exterior or similar activities for which a building or zoning permit are also intended to include, but not be limited to, such activities with regard to the balance of the site as re-grading, paving, repaving, removal of mature trees, installation or removal of fences, retaining walls, signage, on-site lighting, commercial style trash receptacles, telecommunication towers, and similar activities but are not intended to include or prevent ordinary maintenance, repair, or grounds-keeping activities.
2. Certificate of Approval Application Procedure.

For purposes of Administration, the Certificate of Approval application procedure involving a structure or place in an Historic District may be combined with building permits which may be required under the Zoning Ordinance and/or Building Code. Materials required as part of a Certificate of Approval application include materials necessary for such building permits as may be required under the Zoning Ordinance and/or Building Code, plus such renderings, elevations, photographs or other materials as the Historic District Commission may specify to the Zoning Administrator as being necessary for their review and consideration.

#### F. REVIEW BY HISTORIC DISTRICT COMMISSION.

Prior to the issuance of a building permit for any exterior work or changes of use with respect to any property situated in an Historic District, the owner shall submit a Certificate of Approval application to the Historic District Commission for consideration. The Zoning Administrator may issue the building permit only following approval of that application by the Historic District Commission or as provided in RSA Chapter 676:8 and 676:9. In any case in which the Zoning Administrator is unclear as to the applicability of this ordinance to a particular case, he or she may consult with the Commission for an interpretation of the requirements of the Commission.

Although the provisions of this section are not intended to impede the Zoning Administrator in ordering the correction of unsafe conditions of an emergency nature, he or she shall make every effort to coordinate his or her actions with the interests of the Commission by advising

it of any such orders or actions and by involving the Commission in the review of building permits for corrective measures to the extent feasible and practical.

#### G. PERSONAL WIRELESS SERVICE FACILITIES.

Applications to erect personal wireless service facilities in an Historic District shall be reviewed by the Commission pursuant to its own design guidelines and standards of review as well as to Article III, Section 3-16, Paragraph G.8 of the Zoning Ordinance ("Personal Wireless Service Facilities: Historic Buildings and Districts"). (3-13-01)

#### H. INTERPRETATION.

Nothing in this ordinance shall be construed to prevent ordinary maintenance or repair of any structure or place within any Historic District nor to prevent the construction, alteration, repair, moving, or demolition of any structure under a building permit issued by the Zoning Administrator, or any duly delegated authority, prior to the establishment of such district.

#### I. MATTERS TO BE CONSIDERED in passing upon appropriateness of erection, reconstruction, or restoration of structures.

1. The Historic District Commission or Board of Adjustment, on appeal, shall only consider exterior arrangement or features. The Historic District Commission or Board of Adjustment, on appeal, shall consider the following criteria in passing upon an application for a Certificate of Approval. For purposes of this section, *The Secretary of the Interior's Standards for Rehabilitation* are incorporated herein. (3-13-01)
  - a. The special character of the area.
  - b. The historical and/or architectural value of the building/s, structure/s, and its setting, and also as it relates to its setting and to the welfare of the community.
  - c. The compatibility of exterior design, arrangement, texture, and materials proposed to be used in relationship to the existing building or structure and its setting or, if new construction, to the surrounding area.
  - d. The general size and scale of new construction in relation to the existing surroundings including consideration of such factors as the building's overall height, width, street front, number of stories, type of roofs, facade, openings (windows and doors), and architectural details.
  - e. The economic activity of the building and the needs of that activity as it relates to the welfare of the community.
2. Exceptions. The Zoning Administrator is not required to forward the following applications to the Historic District Commission for their review, provided the proposed project complies with the stipulations specified:
  - a. Ordinary maintenance and repair of any exterior architectural feature which does not involve a change in design, material, or outer appearance thereof; including but not limited to maintenance and repair of firewalls, roofs, chimneys, and temporary removal

- of shutters.
- b. Storm doors and storm windows providing that the original architectural features are not removed or destroyed.
- c. Painting or repainting of a building/s or structure/s in any color.

J. ENFORCEMENT.

This ordinance shall be enforced in accordance with the provisions of Article VI of the Zoning Ordinance, and violators shall be subject to the penalty provisions contained therein.

K. REMEDIES.

In the case of any violation of this ordinance or regulations adopted hereunder, the Commission, in addition to other remedies, may institute any appropriate action or proceedings to prevent, restrain, correct, or abate such violation.

L. APPEAL.

Any person aggrieved by a decision of the Historic District Commission shall have the right to appeal concerning such decision to the Zoning Board of Adjustment. Upon appeal, the Zoning Board of Adjustment shall review the decision of the Historic District Commission to determine whether the decision conforms to the provisions under this ordinance and the rules of procedure and regulations adopted hereunder. (3-13-01)

M. VALIDITY.

If any section, subsection, phrase, sentence, or portion of this ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

N. EFFECTIVE DATE.

This ordinance shall take effect upon adoption. (3-11-86)

**Section 4.16 Integrated Innovative Housing Ordinance (IIHO) Deleted (3-10-20)**

**Section 4.17 Planned Residential Development (PRD).** (11-2-82)

ALLOWED BY CONDITIONAL USE PERMIT. (3-6-04, 3-14-17)

- A. PURPOSE. Planned Residential Development allows an alternative pattern of land development to the pattern permitted in the Residential/Rural, Northern Rural, Northern Transitional, and Commercial Zones. It is intended to encourage the preservation of open space and, at the same time, provide for a greater variety of housing types and affordability in the Town of Amherst at somewhat greater densities than permitted elsewhere in the Zoning Ordinance, without causing a

significant increase in the town-wide population density. It is envisioned that in a PRD, dwelling units will be constructed in clusters which are harmonious with neighborhood developments and housing, and with natural surroundings. These clusters shall detract neither from the ecological and visual qualities of the environment, nor from the value of the neighborhood, environment, or the Town. The PRD should contain a variety of housing types to accommodate the Master Plan purposes of encouraging a diversity of people, a variety of age groups of different interests, backgrounds, and economic levels. The overall site design and amenities should enhance the quality of living for the residents of the development and, in general, the neighborhood and the Town. The Board shall determine whether the proposed PRD, namely the site plan or layout, and number, type, and design of the proposed housing is suitable to the neighborhood within which it is to be located and is consistent with the Master Plan and its reasonable growth objectives. (3-14-89)

B. CONDITIONS. An applicant for approval of a proposed PRD shall make application to the Planning Board in the same fashion as specified in the Subdivision Regulations and Section 4.16 - IIHO. In the course of review of the proposal by the Planning Board, the Board shall hear evidence presented by the applicant and determine whether, in its judgment, the proposal meets the objectives and purpose set forth above, in which event the Board may grant approval to the proposal subject to such reasonable conditions and limitations as it shall deem appropriate. (3-14-17)

C. (Deleted 3-10-15)

D. (Deleted 3-10-15).

E. PERMITTED USES.

1. There may permitted in any PRD, single family detached and single family attached, and multi-unit structures of any type without regard to dwelling unit configuration or form of ownership. It is envisioned that the housing types, while having different internal configurations, will have an external appearance that complements and is in general harmony with the natural surroundings of the PRD. Up to ten percent (10%) of the dwelling units may be mobile homes. The maximum height of any dwelling structure shall be thirty-five (35) feet, exclusive of chimneys or cupolas, measured from the lowest adjacent exterior elevation. For the purposes of this ordinance, the following definitions shall apply:
  - a. Single Family Detached Dwelling Unit - any building designed for and occupied by not more than one (1) family and which is not attached to any other dwelling unit by any means.
  - b. Single Family Attached Dwelling Unit - a single family dwelling attached to one other single family dwelling by a common vertical wall.
  - c. Multi-unit Structure - a building which contains from three (3) to six (6) dwelling units.
2. The Board shall determine the mix of housing types, number of dwelling units and structures, and the number of bedrooms for each dwelling unit. These shall be determined at the Final Review and be noted on the Final Plat.

F. OPEN SPACE.

All land in the PRD which is not covered by buildings, septic systems, wells, paved areas, service areas, or which is not set aside as private yards, patios, or gardens for the residents shall be treated as open space. The area of the open space shall be at least forty percent (40%) of the total area of the PRD tract. Such land shall have a shape dimension, character, and location suitable to assure its use for park, recreation, conservation, or agricultural purposes by at least all the residents of the PRD.

Provisions shall be made for the open space to be held in common, equally, by all the owners of the PRD. Such provision shall further hold that all the open space shall be readily accessible to all the residents of the PRD and that such open space shall be retained in perpetuity for one (1) or more of the following uses: conservation, agriculture, recreation, or park. No building or construction whether it be structures or septic systems shall take place in the open space. Harvesting of trees in the open space is permitted if it is done according to good forestry practice and with the expressed permission of the Planning Board. (3-13-84)

G. (Deleted 3-10-15)

H. ARCHITECTURAL DESIGN.

As a condition of final approval, the applicant must obtain the Board's approval of the external architectural design of the PRD to ensure that it complies with the goals of harmonious existence with the neighborhood and the environment as stated in the paragraph on PURPOSE at the beginning of this ordinance. The approval of the architectural design shall be a part of the Final Review approval.

I. LIMITATION OF SUBDIVISION.

No lot shown on a plan for which a permit is granted under this ordinance may be further subdivided and a note to this effect shall be placed on the Final Plan.

J. (Deleted 3-10-15)

**Section 4.18 Sexually Oriented Business.**

A. PURPOSE AND INTENT.

It is the purpose of this article to establish reasonable and uniform regulations to prevent the concentration of sexually oriented businesses within the Town of Amherst and, it is the intent to promote the health, safety, and general welfare of the Citizens of the Town of Amherst and, it is the intent of this article that the regulations be utilized to prevent problems of blight and deterioration which accompany and are brought about by the concentration of sexually oriented businesses; and, the provisions of this Article have neither the purpose nor the effect of imposing limitation or restriction on the content of any communicative materials, including sexually oriented

materials; and, it is not the intent nor effect of this Article to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market; and, neither is it the intent nor effect of this Article to condone or legitimize the distribution of obscene material. The nature of the proposed use shall not be sufficient grounds to support a finding that the use does not meet the criteria set forth in Section 5.2.

## B. DEFINITIONS OF SEXUALLY ORIENTED BUSINESSES.

A sexually oriented business is any place of business at which any of the following activities is conducted:

Adult Bookstore or Adult Video Store. A commercial establishment that devotes more than fifteen percent (15%) of the total display, shelf, rack, wall, table, stand, or floor area, utilized for the display and sale of the following; the establishment, as one of its principal business purposes, offers for sale or rental any form of consideration, any one or more of the following:

1. Books, magazines, periodicals, or other printed matter, or photographs, films, motion pictures, video cassettes, video reproductions, slides, tapes, records, CD-ROMs or other forms of visual or audio representations which depict or describe “specified sexual activities” or “specified anatomical areas” or meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 571-B:1; or, Instruments, devices or paraphernalia which are designed for use in connection with “sexual conduct” as defined in RSA 571-6:1, other than birth control devices. A commercial establishment may have other principal business purposes that do not involve the offerings for sale or rental of material depicting or describing “specified sexual conduct or activities” and still be categorized as “Adult Video/Book Store.” Such other business purposes will not serve to exempt such commercial establishments from being categorized as an “Adult Video/Book Store” so long as one of its principal business purposes is offering for sale or rental for consideration to specified material which depict or describe “specified sexual conduct or activities” or “specified anatomical areas”. An adult bookstore or adult video store is not an establishment that sells books or periodicals as an incidental (less than fifteen percent [15%] of total display area) or accessory part of its principal stock and trade.

Specified sexual conduct or activities. Meaning the male genitals in a state of sexual arousal and/or vulva or more intimate parts of the female genitals.

Specified anatomical areas. Meaning and including any of the following: The fondling or other erotic touching of the human genitals, pubic region, buttocks, anus, or female breasts; sex acts, normal or perverted, actual or simulated, including intercourse, or copulation, or sodomy; masturbation, actual or simulated; or excretory function as part of or in connection with any of the activities set forth herein.

Adult Motion Picture Theatre. An establishment with a capacity of five (5) or more persons, where for any form of consideration, films, motion pictures, video cassettes, slides, or similar photographic reproductions are shown, and in which a substantial portion of the total presentation time is devoted to the showing of material which meets the definition of “harmful to minors”

and/or “sexual conduct” as set forth in RSA 571-B:1, for observation by patrons. For subsections C, D, E, and F a “substantial portion of the total presentation time” shall mean the presentation of films or shows described above for viewing on more than seven (7) days within any fifty-six (56) consecutive day period.

Adult Motion Picture Arcade. Any place to which the Public is permitted or invited wherein coin or slug-operated or electronically, electrically, or mechanically controlled still or motion picture machines, projectors, or other image-producing devices are maintained to show images to five (5) or fewer persons per machine at any one time, in which a substantial portion of the total presentation time of the images so displayed is devoted to the showing of material which meets the definition of “harmful to minors” and/or “sexual conduct”, as set forth in RSA 571-6:1.

Adult Drive-In Theatre. An open lot or part thereof, with appurtenant facilities, devoted primarily to the presentation of motion pictures, films, theatrical productions, and other forms of visual productions, for any form of consideration to persons in motor vehicles or on outdoor seats, in which a substantial portion of the total presentation time being presented for observation by patrons is devoted to the showing of material which meets the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 571-B:1.

Adult Cabaret. A nightclub, bar, restaurant, or similar establishment which during a substantial portion of the total presentation time features live performances which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 571-B: 1, and /or feature films, motion pictures, video cassettes, slides or other photographic reproductions, a substantial portion of the total presentation time of which is devoted to showing of material which meets the definition of “harmful to minors” and/or” sexual conduct” as set forth in RSA 571-B:1.

Adult Motel. A motel or similar establishment offering public accommodations of any form of consideration which provides patrons with closed circuit television transmissions, films, motion pictures, video cassettes, slides, or other photographic reproductions, a substantial portion of the total presentation time of which are distinguished or characterized by an emphasis upon the depiction or description of materials which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 571-B:1.

Adult Theatre. A theatre, concert hall, auditorium, or similar establishment either indoor or outdoor in nature, which for any form of consideration, regularly features live performances, a substantial portion of the total presentation time of which are distinguished or characterized by an emphasis on activities which meet the definition of “harmful to minors” and/or “sexual conduct” as set forth in RSA 571-B:1.

Nude Model Studio. A place where a person who appears in a state of nudity or displays male genitals in a state of sexual arousal and/or the vulva or more intimate parts of the female genitals and is observed, sketched, drawn, painted, sculpted, photographed, or similarly depicted by other persons who pay money or any form of consideration or such display is characterized by an emphasis on activities which meets the definition of “harmful to minors” and/or “sexual conduct”, as set forth in RSA 571-B:1.

Sexual Encounter Center. A business or commercial enterprise that as one of its primary business purposes, offers for any form of consideration:

1. Physical contact in the form of wrestling or tumbling between persons of the opposite sex; or
2. Activities between male and female persons and/or persons of the same sex when one or more persons is in the state of nudity; or
3. Where the activities are characterized by an emphasis on activities which meets the definition of "harmful to minors" and/or "sexual conduct", as set forth in RSA 571-B:1.

C. ALLOWED LOCATIONS AND LOCATION RESTRICTIONS OF SEXUALLY ORIENTED BUSINESSES.

1. Sexually oriented businesses, as defined above, shall be permitted only in the Industrial Zone, by Special Exception, provided that all other regulations, requirements, and restrictions for the zone in which the sexually oriented business is to be located are met; and no sexually oriented business shall be permitted within one thousand (1,000) feet of another existing sexually oriented business or one which a building permit has been applied for; and,
2. No sexually oriented business shall be permitted within seven hundred fifty (750) feet of any other zoning boundary.
3. No sexually oriented business shall be permitted within seven hundred fifty (750) feet of any church, place of worship, parish house, convent, public, parochial, or private school, kindergarten, State approved day care center, or public sports/recreation parks; and no sexually oriented business shall be permitted within seven hundred fifty (750) feet of the Town boundaries; and,
4. No sexually oriented business shall be permitted within one thousand (1,000) feet of another existing sexually oriented business on the date of the passage of this article and, no sexually oriented business shall be permitted within a building, premise, structure, or other facility that contains a sexually oriented business as defined in Section 4.18.B above.
5. The Zoning Board of Adjustment shall grant the Special Exception provided the applicant demonstrates facts sufficient to support a finding that the conditions for the granting of a Special Exception within the underlying zoning district and Article 5 Special Exceptions have been met.

D. MEASURE OF DISTANCE.

The distance between any two sexually oriented businesses shall be measured in a straight line, without regard to intervening structures, from the closest exterior structural wall or temporary or permanent physical divider between each of the businesses.

E. ADDITIONAL REASONABLE REGULATIONS.

The Planning Board is empowered hereunder to review and approve permit applications for sexually oriented businesses and impose reasonable restrictions for buffering, outdoor parking lighting, adequate ingress and egress from the site off of and onto public roads, pedestrian movement, and to provide for appropriate landscaping and building aesthetics in the “Non-Residential Site Plan Review Regulations of the Town of Amherst, New Hampshire”, and to avoid site development layout which may result in negative environmental impacts.

F. SEVERABILITY.

The invalidity of any section or provision of this Article shall not invalidate any other section or provision thereof.

**Section 4.19 Impact Fee Ordinance.**

A. PURPOSE. This ordinance is enacted pursuant to RSA 674:16, (II), 674:17, and 674:21, and in order to:

1. Promote the public health, safety, and welfare, and prosperity (3-10-09);
2. Provide for adequate and appropriate facilities are available to individuals who may come to be located in the Town of Amherst;
3. Help meet the needs occasioned by development for the construction or improvement of capital facilities owned or operated by the municipality, including and limited to water treatment and distribution facilities; wastewater treatment and disposal facilities; sanitary sewers; storm water, drainage, and flood control facilities; public road systems and rights-of-way; municipal office facilities; public school facilities; the municipality's proportional share of capital facilities of a cooperative or regional school district of which the municipality is a member; public safety facilities; solid waste collection, transfer, recycling, processing, and disposal facilities; public library facilities; and public recreational facilities not including public open space;

B. SCOPE.

The regulatory scope of this ordinance is intended to implement and be consistent with the Town of Amherst’s Master Plan and Capital Improvements Program as well as to allocate a fair and equitable share of the cost of public capital facilities (including school construction) to new development, and require that new development contribute its proportionate share of funds necessary to accommodate its impact on those public facilities. It is intended to apply to all forms of development identified in RSA 674:21 (V).

C. DEFINITIONS.

New Development. Any activity that results in:

- a. The creation of a new dwelling unit or dwelling units;
- b. The conversion of a non-residential use to a dwelling unit or dwelling units;
- c. Construction of new non-residential facilities and/or accessory structures;
- d. The conversion of a residential use to non-residential use.
- e. New Development does not include:
  - i. The reconstruction of a residential or non-residential structure that has been destroyed by fire or natural disaster, provided there is no change in the number of dwelling units or size of the structure;
  - ii. The replacement of a manufactured home with another manufactured home provided there is no change in the number of dwelling units or size of the structure.

Public Capital Facilities. Facilities and equipment which are owned and operated by the Town of Amherst, the Amherst School System, or cooperatively with other municipalities and which have a useful life of no less than five (5) years. Public capital facilities do not include the costs associated with the operation, maintenance, or repair of such facilities, or with facility replacements that do not increase the capacity or level of service, but do include reasonable costs for planning, engineering, design, land acquisition, and other reasonable costs associated with such facilities.

Impact Fee. A fee or assessment imposed upon new development, including subdivision, building construction, or other land-use change, in order to help meet the needs occasioned by the development for the construction or improvement of capital facilities owned or operated by the municipality, including and limited to: water treatment and distribution facilities; wastewater treatment and disposal facilities; sanitary sewers; storm water, drainage and flood control facilities; public road systems and rights-of-way; municipal office facilities; public school facilities; the municipality's proportional share of capital facilities of a cooperative or regional school district of which the municipality is a member; public safety facilities; solid waste collection, transfer, recycling, processing and disposal facilities; public libraries; and public recreation facilities, not including permanently unimproved open space. This definition is intended to be the same as that set forth in RSA 674:21, (V), and, in the event of an amendment of that section, such amendment shall be incorporated into the within definition so that the within definition and the statutory definition are identical.

#### D. AUTHORITY TO ASSESS IMPACT FEES.

The Planning Board is hereby authorized to assess impact fees, as herein defined, and in accordance with the standards herein set forth. Except for regulations establishing Impact Fee Formulae, the Planning Board shall have the authority to adopt regulations to implement the provisions of this ordinance so long as the same are consistent with the regulations contained herein.

#### E. AUTHORITY TO ESTABLISH IMPACT FEE FORMULAE.

Impact fee formulas shall be adopted by the Board of Selectmen, in the manner and subject to the criteria set forth herein.

## F. IMPACT FEE SCHEDULES.

### 1. Impact Fee Formula Methodology.

#### a. General Considerations.

- i. The amount of any impact fee formula shall be a proportional share of municipal capital improvement costs which are reasonably related to the capital needs created by new development, and to the benefits accruing to the new development from the capital improvements financed by the fee.
- ii. Upgrading of existing facilities and infrastructures, the need for which is not created by new development, shall not be paid for by impact fees.
- iii. In the case of development created by a change of use, redevelopment, expansion, or modification of an existing use, the capital facilities fee shall be based upon the net positive increase in the impact created by the new use as compared to that which was or would have been assessed for the previous use.

### 2. Computation of Impact Fees.

#### a. Amount of impact fees and type of facilities: The amount of the impact fees shall be determined using the values contained in the Impact Fee Schedules for the following types of facilities:

- i. Stormwater, drainage, and flood control facilities.
- ii. Public road systems and rights-of-way.
- iii. Municipal office facilities.
- iv. Public school facilities.
- v. The municipality's proportional share of capital facilities of a cooperative or regional school district of which the municipality may be a member or any other cooperative joint governmental venture.
- vi. Public safety facilities.
- vii. Solid waste collection, transfer, recycling, processing, and disposal facilities.
- viii. Public library facilities.
- ix. Public recreational facilities not including public open space.
- x. Sewer and water facilities, if any.

### 3. Impact fee schedules shall be established and reviewed as set forth in this Section and Sections 4.19.G below. In the case of change of use, redevelopment, or expansion or modification of an existing use which constitutes new development, the impact fees shall be based upon the net positive increase in the impact fee for the new use as compared to the previous use. (3-10-09)

## G. IMPACT FEE ESTABLISHMENT PROCEDURE. The Selectmen shall prepare a report describing a methodology or basis for calculating impact fee assessments and an Impact Fee Schedule, in accordance with RSA 674:21, and this ordinance. The Selectmen shall conduct a public hearing on the proposed schedule, and shall consider all comments received prior to

finalizing the Schedule. The Selectmen, upon such finalization, shall then submit the schedule to the Planning Board for their review and recommendation. The Board of Selectmen at a regular meeting shall accept or modify the proposed schedule which may include modifications consistent with the recommendations of the Planning Board. The Impact Fee Schedule shall be in effect when a majority of the Board of Selectmen approves the schedule. (3-10-09, 3-10-20)

1. (Deleted 3-10-20)

H. Review of Impact Fees. The Selectmen may review and revise an Impact Fee Schedule whenever circumstances warrant and shall review an established Impact Fee Schedule, at a minimum, on an annual basis and shall modify the Impact Fee Schedule if it finds that new data is available that will refine the schedule. This may include the replacement of figures used in the Impact Fee Schedule with more accurate or recent projections, data and figures, as well as modifications in the Capital Improvements Program. The Selectmen shall submit the Impact Fee Schedule to the Planning Board for their review and recommendation before the adoption of any revised schedule.

I. Termination of Impact Fees.

1. Impact fees shall terminate when the Board finds that the appropriate conditions for assessment are no longer present. (3-10-09)

2. The Board of Selectmen may also by majority vote terminate an Impact Fee Schedule in effect, whenever there is occasion to do so. This may be done only after soliciting recommendations from the Planning Board, and after conducting a public hearing.

J. Administration of Impact Fees.

1. Accounting for Impact Fees. Each impact fee shall be accounted for separately, shall be segregated from the Town's general fund, may be spent upon order of the Selectmen and shall be used solely for the capital improvements for which it was collected, or to recoup the cost of capital improvements made in anticipation of the needs for which fees are collected to meet. In the event that bonds or other debt instruments have been issued for public capital facilities which were constructed in anticipation of new development, or are issued for advanced provision of capital facilities identified in this ordinance, impact fees may be used to pay debt service on such bonds or similar debt instruments. Each fee collected under a specific Impact Fee Schedule shall not be commingled with any other impact fee accounts or any other funds. (3-10-09)

2. Assessment of Impact Fees. All impact fees shall be assessed at the time of Planning Board approval of a subdivision plat or site plan. When no Planning Board approval is required, or has been made prior to the adoption or amendment of the impact fee ordinance, impact fees shall be assessed prior to, or as a condition for, the issuance of a building permit or other appropriate permission to proceed with new development. Impact fees shall be intended to reflect the effect of development upon municipal facilities at the time of the issuance of the building permit.

3. Collection of Impact Fees. Impact fees shall be collected at the time a Certificate of Occupancy is issued. If no Certificate of Occupancy is required, impact fees shall be collected when the development is ready for its intended use. The Selectmen and the assessed party may establish an alternate, mutually acceptable schedule of payment of impact fees in effect at the time of subdivision plat or site plan approval by the planning board. If an alternate schedule of payment is established, the Selectmen may require developers to post bonds, issue letters of credit, accept liens, or otherwise provide suitable measures of security so as to guarantee future payment of the assessed impact fees.
4. Refund of Unused Impact Fees. If, within six (6) years of the collection of an impact fee pursuant to this ordinance, any portion of such impact fee which has not become encumbered or otherwise legally bound to be spent for the purpose for which it was collected shall be refunded, with any accrued interest, to the owner of record of the property. Whenever the calculation of an impact fee has been predicated upon some portion of capital improvement costs being borne by the municipality, a refund shall be made upon the failure of the legislative body to appropriate the municipality's share of the capital improvement costs within said six (6) year period. (3-10-09)
5. Maintaining Records of Impact Fees and Related Projects - The Town Treasurer shall have custody of all accounts and shall pay out the same only upon written orders of the Board of Selectmen. At the end of each fiscal year, the Town Treasurer shall prepare a report, showing a full account of all impact fee transactions during the year and deliver same to the Board of Selectmen, the Planning Board, and the same shall be available to the public. (3-10-09)

#### K. Waiver and Appeal of Fees.

1. Any person may request from the Planning Board, a full or partial waiver of impact fee payments required by this ordinance where it can be shown that, due to unique and/or mitigating circumstances, the impact of the particular new development is demonstrated to be nonexistent or less than anticipated.
2. On-site and off-site improvements which are required by the Planning Board as a result of subdivision or site plan review, including but not limited to, extension of water and sewer mains or the construction of roads or other infrastructure, which would have to be completed by the developer regardless of the capital facilities fee provisions, shall not be considered eligible for waiver under this ordinance.

#### L. Credits.

1. Land or Improvement Construction in Kind in Lieu of Payment: Land for capital facilities and/or public capital facility improvements may be offered by the fee-payer as total or partial payment of the required fee. The offer must be determined to represent an identifiable dollar value computed in a manner acceptable to the Planning Board.

#### M. Applicability.

1. This ordinance shall not be deemed to affect the existing authority of the Planning Board over subdivisions and site plans, including, but not limited to the authority to declare a development to be premature or scattered in accordance with the regulations of the Board and in accordance with RSA 674:36, II(a).

#### N. Off-site Improvements.

1. Definition of Off-site Improvement. A specific “off-site” capital facility or infrastructure improvement that is required by the Planning Board for either a site plan or subdivision that is necessary, in the judgment of the Planning Board, for the project to operate properly on the day that it opens shall be considered to be an Off-Site Improvement.
2. Imposition of Off-site Improvements Requirements. Off-site improvements for site specific applications shall be assessed on a case by case basis and shall be in addition to other impact fees imposed pursuant to this ordinance. In a case in which it is determined that such an improvement is necessary for the proper operation of the project, the Planning Board shall so notify the applicant.
3. Determination of Proportionate Share of Off-Site Improvement Cost(s). In circumstances where it can be demonstrated that such improvement will benefit the community at large, as well as the future occupants of the proposed new development, the Planning Board may require the applicant to present to the Board a study that identifies the proportionate share of the cost of the required improvement that pertains to the new development. In such a case, the Planning Board may, at the expense of the applicant, refer such study to a consultant of its own choosing to determine the reliability of the findings that shall be considered by the Board to arrive at an amount to be contributed by the applicant for the off-site improvement.
4. Reimbursement for Contributions in Excess of Proportionate Share. The applicant shall be assessed his/her proportionate share of the cost of the project. In cases where it is determined that an improvement is necessary for the proper functioning of a new development but the applicant, for whatever reason, is determined to contribute more than his/her proportionate share to the improvement under this section, and, therefore, that the improvement will also accommodate other future development, the Selectmen, at the request and expense of the applicant, may establish a separate, project related impact fee that assesses other new development for their proportionate share of the improvement to reimburse the applicant for such disproportionate contribution. Such future impact fees shall provide for the payment to the original applicant, with any interest.

#### O. Applicability of Impact Fees.

1. Any person or agent, who after the effective date of this ordinance, seeks to undertake new development within the Town of Amherst, New Hampshire, by applying for site plan approval, subdivision approval or a building permit and which is not covered under an exemption pursuant to RSA 674:39, is hereby required to pay the appropriate impact fees

in the manner set forth in this ordinance, in accordance with any Impact Fee Schedule adopted by the Board of Selectmen. (3-10-20)

2. No new building permit for an activity requiring payment of one or more impact fee(s) pursuant to this ordinance shall be issued unless and until the impact fee(s) hereby required have been assessed and/or otherwise agreed upon, and no Certificate of Occupancy or other permission for the use of said new development project shall be issued until the same have been paid or otherwise discharged.

P. Other Assessments Unaffected.

Payment of an impact fee does not restrict the Town or the Planning Board from requiring other payments from the applicant, including without limitation such payments relating to the cost of the extensions of water and sewer mains or the construction or improvement of roads or streets or other infrastructure and facilities specifically benefitting the development which are required by the subdivision or site plan review regulations or as otherwise permitted by law.

Q. Premature and Scattered Development.

Nothing in this ordinance shall be construed so as to limit the existing authority of the Amherst Planning Board to provide against development which is scattered or premature, which requires an excessive expenditure of public funds, or otherwise violates the Town of Amherst's Site Plan Review Regulations, Subdivision Regulations, or Zoning Ordinance.

R. Severability.

If any section, phrase, sentence or portion of this ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

S. Effective Date.

This ordinance shall become effective on the date of its passage, subject to the limitations imposed by RSA 676:12.

- T. Any aggrieved party may appeal any decision under this ordinance in accordance with NH RSA 674:21, (V)(f).

**Section 4.20 Elderly Housing**

- A. Single or multi- unit residential developments which comply with the Federal Definition of Elderly Housing are allowed by Conditional Use Permit (Section 3.18) and shall be required to meet any standards set forth in that section, subject to the following:
  1. Each structure may be a single dwelling unit or a cluster of units containing from two (2)

- to twelve (12) dwelling units.
2. (Deleted 3-8-16)
  3. Project density shall be determined using the base density and bonus densities as described in Section 4.16 - Integrated Innovative Housing Ordinance (IIHO) (3-14-17)
  4. Ancillary facilities such as community meeting rooms, site management offices, and rooms for limited healthcare services are allowed.
  5. No structure shall be constructed to a height greater than thirty-five (35) feet, exclusive of chimneys or cupolas, measured from the lowest adjacent exterior elevation.
  6. Setbacks shall comply with the underlying zoning district. (3-10-15)

## **ARTICLE V -- SPECIAL EXCEPTIONS**

### **Section 5.1 General.**

Special exceptions as herein provided for shall be deemed to be permitted uses in their respective zones, subject to the satisfaction of the requirements and standards set forth herein, in addition to all other requirements and standards of this ordinance. All such cases are hereby declared to possess characteristics of such unique and special form that each specific use shall be considered as an individual case. (3-12-63)

### **Section 5.2 Standards Applicable to All Special Exceptions.**

#### **A. CONDITIONS FOR SPECIAL EXCEPTIONS.**

1. Before the Board of Adjustment considers the approval of an application for a special exception, the applicant shall prove to the satisfaction of the Board of Adjustment that all the following conditions have been met:
  1. That the property in question is in conformance with the dimensional requirements of the zone; and that the minimum lot area shall contain no wetland as defined in Art. IV, Sec. 4.11; no flood plain as defined in Art. IV, Sec. 4.10; and no slopes greater than twenty percent (20%); and that the use is compatible with the Amherst Master Plan. (3-13-07)
  2. That there is safe vehicular and pedestrian access to and from the site.
  3. That there will be no significant adverse impacts resulting from the proposed use upon the public health, safety, and general welfare of the neighborhood and of the Town of Amherst.
  4. That the proposed use will not be more objectionable to nearby properties by reason of noise, fumes, vibration, or inappropriate lighting than the existing use of the property.
  5. That the applicant describe in writing and on a scaled drawing, the location and size of the use, the nature and intensity of operations involved, the tract size, parking areas, and other physical land features of the site in question.
  6. That the proposed use will not adversely affect the ground water resources of Amherst, in particular the Aquifer Conservation District as defined in Section 4-13 of the Amherst Zoning Ordinance.
2. Response to each of the above conditions shall be provided in writing on forms available in the

Amherst Zoning/Planning Office.

3. The Board of Adjustment may seek additional recommendations of the Amherst Planning Board. The applicant shall file a Non-Residential Site Plan Review application in accordance with Section C of the Amherst Zoning Ordinance with the Amherst Planning Board. (3-10-92)

**B. CONDITIONS OF APPROVAL.**

The Board of Adjustment may attach such conditions to its approval as are reasonable, necessary and appropriate. All special exceptions uses are hereby declared to have special characteristics that shall be considered on a case-by-case basis. To ensure compliance with the spirit of the Zoning Ordinance, such conditions shall not conflict with the review and approval of the Planning Board. (3-10-92)

**C. LIMITS ON A SPECIAL EXCEPTION.**

Substantial construction, or occupancy if no construction is involved, must commence within one (1) year of the Board of Adjustment approval of the special exception. If construction or occupancy is not commenced within this period, the special exception approval is declared null and void. (3-10-92)

**D. PERMITS FOR SPECIAL EXCEPTIONS.**

A permit for a special exception use shall not be issued by the Board of Selectmen or their duly appointed representative, the Administrative Official, until so directed by the Board of Adjustment who shall first be satisfied that all of the standards and conditions of this article and the ordinance have been met. (3-12-63)

## **ARTICLE VI--ADMINISTRATION**

### **Section 6.1 Enforcement.**

This ordinance shall be enforced by the Board of Selectmen and the Board of Selectmen is hereby given power and authority to enforce the provisions of this ordinance. The Board of Selectmen is further empowered to confer upon an administrative official appointed by the Board of Selectmen, such official to also constitute Inspector of Buildings within the definition of 673:1, ii (as amended), the duty of administering the provisions of this ordinance in accordance with RSA 673:1, ii and 676:17, v (as amended) or as otherwise authorized by RSA. (3-12-63, 3-11-14)

### **Section 6.2 Building Permits, Certificates of Occupancy, Earth Removal Permits.**

**A. BUILDING PERMITS.**

1. No building or structure shall hereafter be erected or structurally altered, including the placement of a mobile home, until a building permit has been issued by the Selectmen or their authorized agents, the Building Inspector or Zoning Administrator stating that the building or

structure, and use of land shall comply with the ordinances and regulations of the Town. (See the *Ordinances, Laws, and Regulations of the Town of Amherst*. Section H: Building Code for additional information.) (3-14-78, 3-9-10, 3-11-14)

2. No permits shall be issued to any lot upon which there is outstanding a recorded violation of the rules, regulations or ordinances of the Town of Amherst, excepting any permit required to correct such violation.
3. Deleted. (3-9-99, 3-8-05, 3-11-14)

#### B. CERTIFICATE OF OCCUPANCY.

1. No building or structure hereafter erected or structurally altered shall be occupied or used until a Certificate of Occupancy has been issued by the Selectmen, or their authorized agents, the Building Inspector or Zoning Administrator. The certificate shall be issued only after the Building Inspector or Zoning Administrator makes a finding that the building or structure has been constructed, arranged, structurally altered, or is to be used in conformance with the provisions of this ordinance and all other health, safety and building laws, and that construction be in accordance with all representations made as part of the application for and granting of the building permit. (3-14-78, 3-11-14)
2. As-Built plans shall be submitted prior to the issuance of a Certificate of Occupancy for all new commercial and industrial construction, and may be required for other types of construction, as determined by the Building Inspector or Zoning Administrator. (3-11-14)
3. Uses and Certificate of Occupancy. No change shall be made in the use of a building or part thereof now or hereafter erected or structurally altered, or in the use of land now or hereafter occupied, nor shall any use of a building or land be undertaken, without a Certificate of Occupancy having first been issued by the Selectmen, or their authorized agents, the Building Inspector or Zoning Administrator. No such certificate shall be issued to make such change or undertake such use unless it is in conformity with the provisions of this ordinance or amendments thereto hereafter duly enacted. (3-14-78)

#### C. EARTH MATERIAL REMOVAL.

No earth material as defined in Section 3.8 hereof shall be removed unless a permit has been applied for and obtained in a fashion consistent with the provisions of Section 3.8 hereof. (3-14-78)

1. The Board of Selectmen, or the Administrative Official, may require of any applicant for a permit such sketches, drawings, plot plans, or other materials as are deemed necessary to make a decision as to compliance with the provisions of this ordinance. They may require plans, details, specifications for new structures to have been prepared, or sealed, by a licensed architect or engineer. (3-12-63, 3-13-84)
2. If an applicant requests a permit to undertake an activity on a lot non-conforming in size and

frontage as otherwise required by this ordinance and is making application under Article IV, Section 4.2 of this ordinance, such applicant shall file as part of his application, the date of the recording and the Registry of Deeds reference number of the recording of the non-conforming lot. (3-12-63)

3. (Deleted 3-8-2016)
4. All permits issued under the provision of this ordinance shall expire and become invalid two years from the date of issuance of the permit. (3-14-78)

#### C. ADMINISTRATION

1. The Administrative Official shall be a salaried employee of the Town and shall be paid a salary as determined by the Selectmen and approved by the Town as part of the annual budget.
2. Effective this date, all non-residential site plans approved by the Planning Board shall expire four (4) years from the date of Planning Board approval. This expiration date shall not apply to plats that are exempt or vested because of the operation of RSA 674:39. (3-14-89, 3-9-10)
3. Upon receipt of the application for a permit with sufficient information to clearly establish the nature and extent of the proposed activity, the Administrative Official shall determine whether the proposed activity or use constitutes a permitted use within the provisions of this ordinance or whether a special exception or a variance is required. (3-14-78)
  - a. If the proposed use requires a special exception or a variance, the Administrative Official shall refer the application for permit to the Board of Adjustment for action. (3-14-78)
  - b. If the proposed use or activity is within the provisions of this ordinance, the Administrative Official shall post a notice in two public places in the Town of Amherst, one of which shall be at the Town Hall; and no permit shall be issued until said notice has been posted for a period of seven (7) days. If during that period the Administrative Official received objection to the issuance of the requested permit, he may issue the permit, refer the application to the Board of Adjustment for action, or deny the permit. (3-14-78).
  - c. Consistent with State Statues, public utility structures proposed for the Town of Amherst shall obtain building permits and meet zoning requirements. (3-13-84)

### **Section 6.3 Board of Adjustment.**

A. ESTABLISHMENT. In accordance with the provisions of the New Hampshire Revised Statutes Annotated 1955, Chapter 673 as amended and as hereinafter provided, a Board of Adjustment is established. (3-12-63)

#### B. ORGANIZATION.

1. The Board of Adjustment shall consist of five (5) members. (3-12-63, 3-8-16)
2. The members of the Board of Adjustment shall be elected at the annual Town Meeting. (3-5-74, 3-12-96)

3. Vacancies in the Board, occurring other than through the expiration of a term, shall be filled in accordance with RSA 673:12.
  4. Members of the Board of Adjustment shall serve without compensation. (3-12-63)
  5. The Board shall have five (5) alternate members to be appointed by the Board of Adjustment in accordance with RSA 673:6 II-a. (3-8-16)
- C. POWERS. The Board of Adjustment shall perform all the duties and have all the powers provided by the New Hampshire Revised Statutes Annotated 1955 as Amended and as hereinafter provided. (3-12-63)
- D. MEETINGS. Meetings of the Board shall be held at the call of the Chairman and at such other times as the Board of Adjustment may determine. All meetings shall be open to the public. (3-12-63) The Board shall keep a record of proceedings showing the vote upon every question. (3-12-63) Every rule or regulation, and every order, requirement, decision, or determination of the Board of Adjustment shall immediately be filed in the office of the Board of Adjustment and shall become a public record. (3-12-63)

The concurring vote of three (3) members of the Board of Adjustment shall be necessary to reverse any order, requirement, decision, or determination of the administrative office, or to decide in favor of the appellant, or to decide any matter upon which it is required to pass, or to effect any variance from the strict application of provisions of this ordinance. (3-12-63)

All applications shall be acted upon within ninety (90) days after the date of filing the application or within ninety (90) days of the date of filing of any additional information requested by the Board but no later than six (6) months after the date of filing; provided, however, when additional information is not furnished within a reasonable time, the Board may, on notice to the applicant, deny the application without prejudice to the right to re-file. When an application is denied on the merits, the application may not be re-filed for a period of one (1) year after the date of denial. (3-6-73)

- E. PROCEDURE ON PERMITS for special exceptions, variances, and appeals of administrative decisions.
1. The Board of Adjustment shall not authorize the issuance of a permit until after a hearing on the application is held.
  2. Upon receipt from the Administrative Official of an application for a special exception, variance, or appeal of an administrative decision, the Board of Adjustment shall hold a public hearing. (3-12-91) Notice thereof shall be given as follows:
    - a. The applicant and all of the abutters shall be notified of the hearing by certified mail, return receipt requested, stating the time and place of the hearing, and such notice shall be mailed not less than five (5) days before the date fixed for the hearing of the appeal.
    - b. A public notice of the hearing shall be published in a newspaper of the general circulation in the area, not less than five (5) days before the date fixed for the hearing of the appeal.
    - c. The public hearing shall be held within thirty (30) days of the receipt of the notice of the

appeal.

- d. Any party may appear in person or by his agent or attorney at the hearing of an appeal.
- e. The cost of advertising and costs of mailing the notices of hearing shall be payable by the person making the appeal prior to the hearing. (3-9-82)

F. Conditions for the Granting of a Variance. (3-10-64)

1. The Board of Adjustment may grant a variance from the terms of the Zoning Ordinance in accordance with RSA 674:33.

G. Time Limits of Special Exceptions and Variances.

If, after a permit has been authorized by the Board of Adjustment as a result of a request for a special exception or variance, such permit has not been obtained within two (2) years from the date of such authorization, then such authorization shall become null and void; and no permit shall be issued thereunder. (3-4-75, 3-9-82, 3-10-15)

Scheduled Termination of Special Exceptions and Variances (3-10-20)

Pursuant to RSA 674:33 I-a. (b), and RSA 674:33 IV. (c), all variances and special exceptions that were authorized by the Amherst Zoning Board of Adjustment pursuant to the Amherst Zoning Ordinance and RSA 674:33 before August 19, 2013, and that have not been exercised, shall terminate according to the following procedure:

1. Upon adoption of this amendment, the Planning Board shall post notice of the termination in Town Hall. The notice shall be posted for one year and shall prominently state the expiration date of the notice.
2. The notice shall state that special exceptions and variances authorized before August 19, 2013, are scheduled to terminate, but shall be valid if exercised within two years of the expiration date of the notice or as further extended by the Zoning Board of Adjustment for good cause.

H. APPEAL FROM ORDER OF THE BOARD OF ADJUSTMENT.

Within thirty (30) days after any order or decision handed down by the Board of Adjustment, any party to the action or proceedings of the Board of Adjustment, or any person directly affected thereby, may move for a re-hearing and thereafter, if necessary, appeal by petition to the Superior Court in accordance with the provisions of the laws of the State of New Hampshire and may pursue such remedies as are therein provided for said party. (3-12-63, 3-8-05)

I. RULES OF PROCEDURE.

The Board of Adjustment shall adopt and promulgate rules of procedure for the guidance of all persons having business before the Board of Adjustment. Said rules shall not be inconsistent with the provisions of the Statutes of the State of New Hampshire nor with the provisions of this ordinance. (3-12-63)

## J. COSTS.

Any person appearing before the Zoning Board of Adjustment may be represented by counsel, but the costs of retaining such counsel shall be borne by the party retaining them, and not by the Town of Amherst. (3-12-63)

### **Section 6.4 Existing Ordinances.**

All existing ordinances or parts thereof inconsistent with the provisions of this ordinance are repealed upon passage of this ordinance. (3-12-63)

### **Section 6.5 Severability Clause.**

If any section, subsection, sentence, clause, phrase, or other part of this ordinance is for any reason held by a court of competent jurisdiction to be invalid, such decision shall not affect the validity of the remaining portions of this ordinance. (3-12-63)

### **Section 6.6 Governmental Services.**

No provision of this ordinance shall be interpreted as to prevent the Town of Amherst from providing for or performing any existing or necessary governmental, education, or protective services. (3-12-63)

### **Section 6.7 Penalty.**

In accordance with RSA 676:17, as amended, any person, firm, or corporation violating the provisions of this ordinance is punishable by a civil fine of up to two hundred seventy-five dollars (\$275) per day, for every day after the conviction date that the violation continues, or after the date on which the violator received written notice from the municipality that is in violation, whichever date is earlier. (3-11-86)

## **ARTICLE VII -- AMENDMENTS TO THE ZONING ORDINANCE**

### **Section 7.1 General.**

This ordinance may be amended in conformance with the New Hampshire State Statutes. (3-12-63) This ordinance is intended to be consistent with NHRSA enabling legislation and to the extent that any portion hereof is or shall become inconsistent with said enabling legislation this ordinance shall be invalid to that extent. (3-5-74)

### **Section 7.2 Referral of Amendments to Planning Board.**

Upon the petition of twenty-five (25) voters for an amendment to the Zoning Ordinance, the Planning Board shall proceed and submit the amendment or amendments to the voters of the Town as prescribed in RSA 675:4. The Planning Board may not reject the amendment or amendments proposed by petition but shall submit the proposed amendment or amendments to the voters as offered by the petition. The petitioners shall submit the proposed amendment or amendments to the Zoning Ordinance in correct form

as determined by the Selectmen. The following question shall be submitted to the voters: "Are you in favor of the adoption of the amendment to the Zoning Ordinance as proposed by petition of the voters of this Town?". The approval or disapproval of the Planning Board shall also be noted on the ballot immediately following the question. In the event that there shall be more than a single proposed amendment to be submitted to the voters at any given meeting, the issue as to the several amendments shall be put in the following manner: "Are you in favor of the adoption of Amendment No..... as proposed by petition of the voters for this Town?". (Here insert topical description of substance of amendment.) The approval or disapproval of the Planning Board shall also be noted on the ballot immediately following the question. An amendment proposed by petition shall be submitted to the voters at an annual Town or Village District meeting. (11-2-82)

## **ARTICLE VIII -- MISCELLANEOUS PROVISIONS**

### **Section 8.1 Interpretation.**

In their interpretation and application, the provisions of this ordinance shall be held as the minimum requirements adopted for the promotion of the public health, morals, safety, or the general welfare. Whenever the requirements of this ordinance are at variance with the requirements of any other lawfully adopted rules, regulations, or ordinances, the most restrictive, or that imposing the higher standards, shall govern.

### **Section 8.2 Short Title.**

This ordinance shall be known and may be cited as "The Town of Amherst Zoning Ordinance of 1963."

### **Section 8.3 Effective Date.**

This ordinance shall take effect immediately upon adoption.

## **ARTICLE IX -- DEFINITIONS**

### **Section 9.1 Meaning of Certain Words.**

The following terms, unless specifically indicated to the contrary in the ordinance, shall mean the following:

Abutter. Any person or persons holding legal title to land which adjoins or is directly across the street or stream from land under consideration. (3-12-63, 3-9-82)

Accessory Apartment. A second dwelling unit incorporated within an existing or proposed single family home which is structurally integrated with the existing principal dwelling. (3-8-16, 3-14-17, 3-12-19)

Accessory Building. A detached building or structure on the same lot with the primary building, the use of which is clearly incidental to that of the primary building or use of the land. (3-12-63, 3-11-08)

Administrative Official. The person delegated by the Board of Selectmen to administer the provisions of

this ordinance. (3-12-63)

Amenities. (Within the Integrated Innovative Housing Ordinance) (3-10-15)

Community Space Public: Indoor (clubhouse, meeting room) or outdoor (garden, park, trail-network) space which is available to the public, subject to acceptance by the Planning Board and Board of Selectmen.

Community Space Restricted: Same as above but restricted to use by residents of the development.

Improved Access to Public Places: Footpaths or sidewalks connected to local sidewalk networks/community spaces, access to transportation services, or a fair share contribution determined by rational nexus evaluation to improve access to public places.

Open Space – Improved & Accessible to Public: Park, ball field, court, playground, or similar facility open to public use, subject to acceptance by the Planning Board and Board of Selectmen.

Open Space – Improved Non-Public: Same as above but restricted to use by residents of the development.

Open Space under Restrictive Covenant: Conservation/agricultural Land, “unimproved” open space. May be under easement/deed restriction to third party or Town.

Open to the Public: Where applicable to the Integrated Innovative Housing Ordinance, refers to amenities available for public use at no cost except for fees as may be assessed or collected by the Town.

Public Infrastructure Betterment: Improvements to including off-site access improvements, bicycle lanes, extension of public utility infrastructure or other improvements beyond those required to meet minimum NRSP criteria, or an in lieu contribution determined by rational nexus evaluation to improve public infrastructure.

Redevelopment: Conversion of an existing structure into housing units or mixed use (where permitted).

Walkability Internal (sidewalks, footpaths): Infrastructure designed to enable and encourage residents to walk from place to place within the development.

Apartment. A room or set of rooms arranged for occupancy as a dwelling and containing a kitchen or cooking range. (3-14-89)

Aquifer. A geologic formation composed of rock, sand, or gravel that contains significant amounts of potentially recoverable water. (3-13-84, 3-11-14)

Best Management Practices. A method or technique that has consistently shown results superior to those achieved with other means and that is used as a benchmark. In addition, a "best" practice can evolve to become better as improvements are discovered. BMP’s derived from public agencies or other sources

shall be utilized as guidelines, the Planning Board may approve an alternative method if it is found to achieve a similar result.

The most recent editions of the following publications are considered Best Management Practices:

- A. Best Management Practices for Erosion Control on Timber Harvesting Operations in New Hampshire prepared by the New Hampshire Department of Resources and Economic Development;
- B. Manual of Best Management Practices for Agriculture in New Hampshire as prepared by the Agricultural Best Management Practices Task Force and the USDA Natural Resources Conservation Service for the New Hampshire Department of Agriculture;
- C. Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire prepared by the New Hampshire Department of Environmental Services in conjunction with the Rockingham County Conservation District; and
- D. Manual of Best Management Practices to Control Nonpoint Source Pollution: A Guide for Citizens and Town Officials prepared by the New Hampshire Department of Environmental Services. (3-11-14)

Building. Any structure or dwelling greater than 32 square feet that has a roof and is intended to shelter people, animals, equipment or other chattel. (3-12-63, 3-11-08, 3-10-15)

Buffer. An upland area adjacent to a wetland or surface water of a specific dimension measured outward on a horizontal plane from the reference line or the delineated edge of wetland as applicable. (3-11-14)

Bulk Petroleum Plant or Terminal. Means that portion of a property where petroleum products are received by tank vessel, pipeline, tank car, or tank vehicle and are stored or blended in bulk for the purpose of distributing such liquids by tank vessel, pipeline, tank car, tank vehicle, portable tank, or container. (3-11-14)

Cabin. A building used or rented for the purpose of overnight sleeping accommodations, generally on a transient basis. (3-12-63)

Certified Soil Scientist. A person qualified in soil classification and mapping who is certified by the State of New Hampshire Board of Natural Scientists pursuant to RSA 310-A:84, I & II. (3-11-14)

Certified Wetland Scientist. A person qualified to delineate wetland boundaries and prepare wetland maps who is certified by the State of New Hampshire Board of Natural Scientists pursuant to RSA 310-A:84, II-a & II-b. (3-11-14)

Commercial Animal Feedlot. Are agricultural operations where animals are kept and raised in confined situations; generally congregate animals, feed, manure, dead animals, and production operations on a small land area. Feed is brought to the animals rather than the animals grazing or otherwise seeking feed in pastures. This operation is a lot or facility (other than an aquatic animal production facility) where the following conditions are met:

- A. Animals have been, are, or will be stabled or confined and fed or maintained for a total of forty-

five (45) days or more in any twelve (12) month period, and

- B. Crops, vegetation, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility. (3-11-14)

Community Water System. A public water system having at least fifteen (15) service connections used by year-round residents or that regularly serves at least twenty-five (25) year-round residents. (3-11-14)

Development. Any man-made change to improved or unimproved land, including but not limited to buildings, structures, utilities and similar improvements, or alteration of the land surface that results in the removal of vegetation in excess of what is permitted under the Comprehensive Shoreland Protection Act – RSA 483-B, as amended. (3-11-14)

Driveway. A private lane from the public road traversing private property, ordinarily leading to a single residence. (3-10-87)

Dwelling. A structure or building that is designed or used as a place of residence for one family. (3-12-63, 3-11-08)

Dwelling Unit. A structure or building or part of a structure or building used as a place of residence for one family. (3-12-63, 3-11-08)

Family. One (1) or more persons who live as a single housekeeping unit in a dwelling unit. (3-12-63)

Flashing Sign. Any illuminated sign on which the artificial light is not maintained stationary or constant in intensity or color at all times when in use including any revolving illuminated sign. (3-6-73)

Floodway. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. (9-22-79)

Floor Area Ratio. The ratio of gross floor area to the total lot area. (3-4-75)

Frontage. The continuous distance of any property line of a lot which abuts a legally accessible public street as classified by RSA 229:5, or a private road approved by the Planning Board. (3-6-04)

Garage Type Sales. Limited to a maximum of ten (10) days a year. The sum of the horizontal area of the several floors of a building and its accessory buildings on the same lot, measured from the exterior faces of the walls, and not including cellars, attics, porches, etc. not used as part of the principal use. (3-4-73)

Gasoline Station. Means that portion of a property where petroleum products are received by tank vessel, pipeline, tank car, or tank vehicle and distributed for the purposes of retail sale. (3-11-14)

Groundwater. Subsurface water that occurs beneath the water table in soils and geologic formations. (3-11-14)

Hazardous or Toxic Material or Liquids. Materials or liquids that pose a threat, present or future, to the environment, whether in use, storage or transit, including without exception hazardous waste identified and listed in accordance with section 3001 of the Resource Conservation and Recovery Act of 1976, and as may be amended from time-to-time. (3-13-84)

Home Occupation. A home occupation is an accessory non-retail business or professional use incidental and subordinate to the dwelling use, occupying no more than 20% of the existing gross, heated floor area of the dwelling. (3-2-80, 11-2-82, 3-10-92, 3-11-93, 3-8-94, 3-14-95)

Hotel/Motel. Structure/s which provide transients with temporary sleeping accommodations and do not include individual units which provide housekeeping accommodations in more than ten percent (10%) of the units.

House Trailer. A unit similar to a mobile home which is equipped with some or all of the following: running water, sanitary facilities, bath facilities, and toilet. (3-12-68)

Impervious. Not readily permitting the infiltration of water, including packed gravel surfaces such as parking areas, driveways or traveled ways. (3-11-14)

Impervious Surface. A surface through which regulated substances cannot pass when spilled. Impervious surfaces include concrete unless unsealed cracks or holes are present; earthen, wooden, or gravel surfaces; or other surfaces which could react with or dissolve when in contact with substances stored on them are not considered impervious surfaces. (3-11-14)

Inn. A structure intended or designed to be used or which is used for sleeping purposes or paying guests and where a general kitchen and/or dining room may or may not be provided. (3-12-63)

Junkyard. An establishment or place of business which is maintained, operated, or used for storing, keeping, buying, or selling junk, or for the maintenance or operation of an automotive recycling yard, as defined in RSA 236:112, as amended. The word does not include any motor vehicle dealers registered with the Director of Motor Vehicles under RSA 261:104 and controlled under RSA 236:126. (3-11-14)

Kennel. Any lot or premises on which four (4) or more dogs, other than personal pets, at least four (4) months of age, are kept, boarded, or trained whether in special structures or runways or not. The foregoing definition shall specifically exclude veterinary clinics which are defined as a structure in which small animals or pets are given medical or surgical treatment and are cared for during the time of such treatment only. (11-2-82)

Lot. A tract of land occupied or capable of being occupied by a building or use and by accessory uses, including the open space provided for in this ordinance. (3-12-63)

Lot of Record. A distinct tract of land recorded in a legal deed and plan filed in the records of Hillsborough County, New Hampshire. (3-12-63)

Minimal Impact Crossing. Minimal impact means the least environmentally damaging practicable alternative.

Mixed Use Development. Any proposed or existing commercial development may have incorporated, a mixed use factor, consisting of residential units up to a maximum of twenty-five (25%) percent of the approved gross square footage of the commercial development. The residential units may be either attached or detached from the commercial structure/s and may have a maximum of one bedroom per five hundred (500) square feet of gross residential floor area. Such proposals are subject to Planning Board site review and all applicable health and safety requirements. (3-14-89)

Mobile Home. A dwelling accommodation designed to permit movement as a vehicle with or without wheels or skids in place and which is equipped with running water, sanitary facilities, bath facilities and toilet.

Multi-Family Housing. A structure or parcel of land containing more than one dwelling unit. (3-13-90)

Net Tract Area. The total area of a parcel of land less wetlands, floodplain and steep slopes over twenty (20) percent. (3-10-15)

Non-Conforming Use. A structure or land area that is lawfully occupied by a use that does not conform to the specifications of this ordinance. (3-12-63)

Open Space. As stated in Article IV, the Commercial, Limited Commercial and Industrial Zone shall not be utilized for construction, storage or parking/drives. (3-13-01)

Open Space Development. (Eliminated 11-2-82, 3-14-89)

Open Space Plan. Moved to Article IV, Section 4.16

Outdoor Storage. Storage of materials not protected from the elements by a roof, walls, and a floor with an Impervious Surface. (3-11-14)

Parking Space. An off-street space available for the parking of one motor vehicle and having an area of not less than 9' x 18' not including the driveways and passageways appurtenant thereto and giving access thereto and having direct access to a public way. (3-12-63, 3-12-85)

Planned Residential Development (PRD) (11-2-82) Moved to Art. IV, Sec. 4.17

Positive Limiting Barrier. A depression (e.g., groove) in the surface of an otherwise level impervious area designed to impede the flow of and contain spilled substances within the perimeter of the impervious area. These are typically constructed and maintained to contain small spills or releases (five [5] to fifteen [15] gallons). (3-11-14)

Primary Recharge Area. The area immediately overlying the stratified drift aquifer and adjacent areas of stratified drift which may not have sufficient thickness to be part of the Aquifer. The boundary of the primary recharge area is the contact between stratified drift and adjacent till or bedrock. (3-13-84)

Principal Route of Access. A principal route of access within the meaning of this ordinance shall be deemed to consist of any road, street, highway which is maintained. (3-3-75)

Private Road. A road constructed to the Town of Amherst Subdivision Standards but that may have a reduced width right-of-way and roadway surface. The Planning Board shall require adequate covenants, restrictions, and agreements including a Home Owners Association to ensure that the Town will have no liability or responsibility to maintain said road.

Private Road. A road or road system layout, on private property, from the public road to the development. Such private property and private road shall be permanently encumbered with deed restrictions, satisfactory to Town Counsel, which shall insure that the private road does not become a Town road. (3-10-87)

Professional Office. A professional office shall be one, or a combination of the following type: doctors, dentist, lawyers, engineers, surgeons, veterinary clinic, accountants, architects.

Public Water Protection Wetlands. Wetlands identified in Section 4.11 for their critical role in protecting water supplies.

Recreation. (3-11-14) All recreational uses other than passive.

Recreation, passive. (3-11-14) Those recreational pursuits which can be carried out with little alteration or disruption to the area in which they are performed. Such uses include but are not limited to hiking, picnicking, jogging, bicycling, and horseback riding. Motorized vehicles uses are not included.

Reduced Frontage. A minimum of thirty-five (35) feet of frontage on a publicly maintained road. There are two (2) classes of reduced frontage:

- A. Class A frontage provides access to one building lot.
- B. Class B frontage provides access to two building lots. (3-10-87)
- C. (See Section 5-2, Subdivision Regulations re: Reduced Frontage Lots)

Reference Line (for ponds, lakes and streams). The term *ordinary high water mark* means that line on the shore established by the fluctuations of water and indicated by physical characteristics such as a clear natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas. The following physical characteristics should be considered when making an *ordinary high water mark* determination, to the extent that they can be identified and are deemed reasonably reliable: Natural line impressed on the bank, sediment sorting, shelving, leaf litter disturbed or washed away, changes in the character of soil, scour, destruction of terrestrial vegetation, deposition, presence of litter and debris, multiple observed flow events, wracking, bed and banks, vegetation matted down-bent or absent, water staining, or change in plant community. (3-11-14)

Regulated Substance. Any of the following, with the exclusion of ammonia; sodium hypochlorite; sodium hydroxide; acetic acid; sulfuric acid; potassium hydroxide; potassium permanganate; propane or other liquefied fuels which exist as gases at normal atmospheric temperature and pressure; oil as defined

in RSA 146-A:2, III; any substance that contains a regulated contaminant for which an ambient groundwater quality standard has been established pursuant to RSA 485-C:6; and any substance listed in 40 CFR 302, 7-1-05 edition, as amended. (3-11-14)

Sanitary Protective Radius. The area around a public water supply well which must be maintained in its natural state as required by Env-Dw 301 or 302 (for community water systems); Env-Dw 373.12 and Env-Dw 372.14 (for other Community Water Systems), as amended. (3-11-14)

Seasonal. Any non-residential use which is intended to operate only during specific periods of the year. Such use may include temporary structures. Seasonal uses shall be subject to site plan review. Planning Board may also require removal of any temporary buildings or other structures during the off-season. (3-11-93)

Seasonal High Water Table. The depth from the mineral soil surface to the upper-most soil horizon that contains two percent (2%) or more distinct or prominent redoximorphic features that increase in percentage with increasing depth as determined by a licensed hydrogeologist, soil scientist, wetlands scientist, engineer, or other qualified professional approved by the Planning Board. (3-11-14)

Secondary Containment. A structure such as a berm or dike with an impervious surface which is adequate to hold at least one hundred ten percent (110%) of the volume of the largest regulated substance container stored within. (3-11-14)

Secondary Recharge Area. The land adjacent to primary recharge area from which ground water moves down a gradient into the aquifer. (3-11-84)

Shopping Center. A group of businesses centrally arranged and identified by a common ground sign. (3-13-90)

Sign. (3-12-63) See Section 3-4 (3-12-91)

Sign Advertising. (3-12-63) See Section 3-4, Off premise Signs (3-12-91)

Snow Dump. For the purposes of this ordinance, a location where snow, which is cleared from roadways and/or motor vehicle parking areas situated beyond the ACWPD, is placed for disposal. (3-11-14)

Special Exception Use. A use which because of its unique characteristics requires individual consideration in each case before it can become permitted in the Zone enumerated. (3-12-63)

Story. That portion of a building included between the upper surface of a floor and the upper surface of the floor or roof next above. (Crawl spaces, unfinished and unoccupied attic spaces, cellars when not to be occupied shall not be considered a story.) (3-11-86)

Stratified-Drift Aquifer. A geologic formation of predominantly well-sorted sediment deposited by or in bodies of glacial meltwater, including gravel, sand, silt, or clay which contains sufficient saturated permeable material to yield significant quantities of water to wells. (3-11-14)

Stream Classification. For the purposes of this ordinance, streams shall be classified as follows:

- A. Ephemeral stream. A watercourse that is located above the water table year round and is not fed by groundwater with runoff from rainfall and snowmelt being the primary source of stream flow such that the stream has flowing water only during, and for a short duration after, precipitation or spring thaw events.
- B. Intermittent stream. A watercourse that is fed by groundwater for limited periods of the year, with runoff from rainfall and snowmelt being supplemental sources of flow, such that it typically does not contain flowing water during drier portions of the year.
- C. Perennial stream. A watercourse that is in the groundwater table for the majority of the year such that groundwater is the primary source of flow with runoff from rainfall and snowmelt as supplemental sources of flow such that it contains flowing water throughout a typical year. (3-11-14)

Structure. Anything constructed, erected, or assembled for occupancy or use, such as, but not limited to, a building, dwelling, stadium, platform, shelter, swimming pools, sports courts, or the like. The term structure shall not include: a/ fences or retaining walls; b/ radio towers or antennae which are for the exclusive use of amateur radio service and they shall be limited to a total height of 150 feet; or c/ structures smaller than 32 square feet. (3-12-63, 3-9-82, 3-12-85, 3-11-08, 3-10-15)

Structure, Height of. The vertical distance from the average finished grade adjoining the walls of the structure to the peak of the roof, exclusive of chimneys or cupolas. Height shall be measured from the average finished grade within five (5) feet of the front of the building, to the peak of the roof, exclusive of chimneys or cupolas. (3-11-14)

Surface Waters. Those portions of waters of the state, as defined by RSA 482-A:4 and Part Env-Wt 101.97, as amended, of the New Hampshire Code of Administrative Rules which have standing or flowing water at or on the surface of the ground. This includes but is not limited to streams, lakes, ponds, and wetlands, including marshes, water-courses and other bodies of water, natural or artificial. (3-11-14)

Temporary Structure. Any structure greater than 32 square feet designed to be movable or disassembled, which does not permanently alter the land or buildings on the lot. Temporary structures shall not have utilities or plumbing. Such structures shall be subject to ordinary requirements of the zone (setbacks, floor area ratio, green space, height, etc.) and may require non-residential site review. (3-11-93, 3-10-15)

Turnaround. The end area of a cul-de-sac used to reverse direction. (3-14-89)

Utility. Any public service subscribed to by an owner and/or tenant of a site which does not require surface transportation. (11-2-85)

Vernal Pool. Defined under Part Env-Wt 101.106, as amended, of the New Hampshire Code of Administrative Rules as a surface water or wetland, including an area intentionally created for purposes of compensatory mitigation, which provides breeding habitat for amphibians and invertebrates that have adapted to the unique environments provided by such pools and which:

- A. Is not the result of on-going anthropogenic activities that are not intended to provide compensatory mitigation, including but not limited to:
1. Gravel pit operations in a pit that has been mined at least every other year; and
  2. Logging and agricultural operations conducted in accordance with all applicable New Hampshire statutes and rules; and
- B. Typically exhibits the following characteristics:
1. Cycles annually from flooded to dry conditions although the hydro-period, area and shape of may vary from year to year;
  2. Forms in a shallow depression or basin;
  3. Has no permanently flowing outlet;
  4. Holds water for at least 2 continuous months following spring ice-out;
  5. Lacks a viable fish population; and
  6. Supports one or more Primary Vernal Pool Indicators, or three or more Secondary Vernal Pool Indicators. (3-11-14)

Vernal Pool -- Primary Vernal Pool Indicators. The presence or physical evidence of breeding by marbled salamander, wood frog, spotted salamander, Jefferson-blue spotted salamander complex, or fairy shrimp. (3-11-14)

Vernal Pool -- Secondary Vernal Pool Indicators. Physical evidence used by wildlife biologists or Certified Wetland Scientists who are familiar with vernal pool habitats as evidence of the presence of a Vernal Pool, if Primary Vernal Pool Indicators are absent and other Vernal Pool characteristics suggest Vernal Pool habitat. Secondary Vernal Pool Indicators include, but are not limited to, caddisfly larvae and cases (Limnephilidae, Phryganeidae, or Polycentropodidae), clam shrimp and their shells (Laevicaudata, Spinicaudata), fingernail clams and their shells (Sphaeriidae), aquatic beetle larvae (Dytiscidae, Gyrinidae, Haliplidae, and Hydrophilidae), dragonfly larvae and exuviae (Aeshnidae, Libellulidae), spire-shaped snails and their shells (Physidae, Lymnaeidae), flat-spire snails and their shells (Planorbidae), damselfly larvae and exuviae (Coenagrionidae, Lestidae), and true fly larvae and pupae (Culicidae, Chaoboridae, and Chironomidae). (3-11-14)

Vernal Pool Tiers. Tier one vernal pools are those which are found to exhibit one (1) or more of the following: Fairy shrimp – presence in any life stage; or blue spotted salamanders – presence of ten (10) or more egg masses; spotted salamanders – presence of twenty (20) or more egg masses; wood frogs – presence of forty (40) or more egg masses. Tier two vernal pools are those which do not contain one (1) or more of the above species at sufficient abundance to warrant classification as a tier one vernal pool. (3-11-14)

Watercourse. Any Surface Water that, pursuant to Part Env-Wt 101.107, as amended, of the New Hampshire Code of Administrative Rules:

- A. Develops and maintains a defined scoured channel, with evidence of sediment transport, that:
  - 1. Is greater than seventy-five (75) feet in length; or
  - 2. Is of any length and connected to another jurisdictional area at either end; and
- B. Is not a drainage swale. (3-11-14)

Water Dependent Structures. A structure such as a dock, wharf, pier, breakwater, manmade beach, boathouse, retaining wall, boat launch ramp, bridge, culvert, or other structure, or any part thereof, built on, or in the surface waters of the State. (3-11-14)

Water Resource Management Plan. A written plan containing maps, base line data, and provisions for the protection of surface water, ground water and important wildlife resources associated with a development project.

Wellhead Protection Area. The surface and subsurface area surrounding a water well or wellfield supplying a community water system, through which contaminants are likely to move toward and reach such water well or wellfield. (3-11-14)

Wetland(s). Defined under RSA 482-A:2, X, as amended, as an area that is inundated or saturated by surface water or ground water at a frequency and duration sufficient to support, and that under normal conditions does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands include swamps, marshes, bogs, and similar areas. The reference line of all wetlands shall be delineated in accordance with the methodology prescribed in the following reference document: U.S. Army Corps of Engineers, 2011: *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Northcentral and Northeast Regions (Version 2.0)*, ed. J. S. Wakeley, R. W. Lichvar, C. V. Noble, and J. F. Berkowitz. ERDC/EL TR-12-1. Vicksburg, MS: U.S. Army Engineer Research and Development Center (as amended). Wetland scores are determined using Method for Inventorying and Evaluating Freshwater Wetlands in New Hampshire (NH Method), University of New Hampshire Cooperative Extension, July, 2013, or latest revision.

For the purposes of this ordinance wetlands shall be classified as follows:

- A. Water Protection Wetlands. Wetlands having an area greater than or equal to one (1) acre, which also have an Ecological Integrity Score greater than or equal to 6.0; a Wetland-Dependent Wildlife Habitat Score greater than or equal to 4.0; and a Groundwater Score greater than or equal to 5.0.
- B. Significant Wetlands. Wetlands having an area greater than or equal to one (1) acre, which also have an Ecological Integrity Score greater than or equal to 5.0; and a Wetland-Dependent Wildlife Habitat Score greater than or equal 3.0.

C. Other Wetlands. All other wetlands.

When classifying wetlands for the purposes of this ordinance, separate evaluation units shall be considered and drawn at each location where the wetland narrows to less than fifty (50) feet. (Ammann, A.P., and A. Lindley Stone, 1991 Method for the Comparative Evaluation of Nontidal Wetlands in New Hampshire, published by the New Hampshire Department of Environmental Services; NHDES-WRD-1991-3, as amended.) **CHAPTER I**  
**ZONING ORDINANCE**  
**FOR THE TOWN OF MONT VERNON, NEW HAMPSHIRE**  
**March, 1980**

**ARTICLE 1 - PREAMBLE**

**I-101** In pursuance of authority conferred by Title LXIV of the NH Revised Statutes Annotated, Chapters 672-677 inclusive and as such may from time to time be amended, and for the purpose of promoting the health, safety, morals, prosperity, convenience or general welfare, as well as to provide efficiency and economy in the process of development of the incorporated Town of Mont Vernon, New Hampshire, by securing safety from fire, panic, and other dangers, providing adequate areas between buildings and various rights of way, by preserving the rural charm now attached to our Town, and to insure the wise and efficient expenditure of public funds and the adequate provision of public utilities and other public requirements, the following Ordinance is enacted by the voters of the Town of Mont Vernon in Town Meeting convened.

**ARTICLE 2 - DISTRICTS**

**I-201** For the purpose of this Ordinance, the Town of Mont Vernon is divided into the following districts as shown on the master plan map filed with the Town Clerk, which map is made part of this Ordinance.

- I-201.1 Residential (R)
- I-201.2 Rural Residential (RR)
- I-201.3 Limited Commercial District (LC)
- I-201.4 Managed Commercial and Conservation Zone (MCCZ)

**I-202** The Residential District perimeter shall include the following streets and roads and all land and buildings within 500 feet of the central point of such streets and roads and their terminating boundaries:

- I-202.1** Main Street from the south boundaries of Lots 10-26 and 10-53-3 on Route 13, northward to the junction at Beech Hill Road and Blood Road; and New Boston Road to the junction of Blood Road.
- I-202.2** The following streets and roads shall be included in their entirety: Blood Road; Harwood Road; Grand Hill Road; Boutwell Road; Smith Road; Hillcrest Avenue.
- I-202.3** Old Wilton Road from the intersection at Main Street to the intersection at Harwood and Upton Roads.
- I-202.4** All land and buildings included within the perimeter boundaries established by this Article and shown on the master plan map shall be considered in the Town Residential District.

**I-203** The Rural-Residential District shall include all lands and buildings not contained within the boundaries of the Residential (R) and Limited Commercial (LC) Districts. (3-9-82)

**1-204** The Limited Commercial District shall include all lands and buildings bounded as follows: Beginning at the point on Route 13 which is 2800 feet north of the Milford/Mont Vernon town boundary, continuing westerly along a line parallel to the Milford/Mont Vernon town boundary to a point of intersection with Hartshorn Brook, thence southerly along the course of said brook to the point of intersection with the Milford/Mont Vernon town boundary, thence easterly along said boundary crossing Route 13, to the southeast corner of Mont Vernon, thence north following the Mont Vernon/Amherst town boundary to the southeast corner of lot 2-68, thence northeastward following the boundary of lot 2-68 to where it rejoins with the Mont Vernon/Amherst town boundary (thus excluding lot 2-68). The bound continues northward until it reaches lot 2-65, thence follows the boundary of 2-65 westward to the place of beginning on Route 13. (3-11-08)

**I-205** Although specific areas are not set aside for two-family and multi-family dwellings, the establishment of such uses that can be shown to be an asset to the Town is encouraged. Application for the initiation of such uses shall be made to the Board of Adjustment which shall act on such application in accordance with the procedure set forth in **Article 5, Section I-502.1** (Special Exceptions) hereof. (3-9-82)

## **ARTICLE 3 - GENERAL PROVISIONS**

### **I-301 EXISTING USES**

**I-301.1** Nothing in this Ordinance shall be construed to prevent continuance of any existing use of land or buildings or the replacement thereof.

### **I-302 SANITARY PROTECTION**

**I-302.1** No- privy, cesspool, septic tank, or sewage disposal area shall be constructed or maintained less than seventy-five (75) feet from the edge of a public water body or from a well, or from a dwelling other than that to which it is appurtenant.

**I-302.2** No waste waters or sewage shall be permitted to run free into a public water body or be discharged in any way that may be offensive or detrimental to the health of others. All such waste shall be conveyed away underground through use of an accepted sanitary system, or in such a way that it will not be offensive or detrimental to health.

### **I-303 MANUFACTURED HOUSING**

**I-303.1** Manufactured housing shall be in accordance with RSA 674:32.

**I-303.2** In the Rural-Residential District, the Board of Adjustment after public hearing, may permit the establishment and operation of a manufactured home park, after

written application has been made to the Board of Adjustment accompanied by a text and map to describe the proposed location of the manufactured home park; a lot layout; plans for water supply, sewage disposal, garbage and trash disposal and drainage; and street layout and construction. The Board of Adjustment may grant such a permit only where it finds that the following standards in addition to the regulations of this ordinance, are met or exceeded:

- I-303.2(a)** A manufactured home park shall contain not less than five (5) acres.
  - I-303.2(b)** Each manufactured home site shall comply with the dwelling lot requirements of **I-304** of this Article.
  - I-303.2(c)** Sanitary protection requirements listed under **I-302** of this Article will be met.
  - I-303.2(d)** No buildings other than manufactured homes shall be located in a manufactured home park.
  - I-303.2(e)** The specific site is an appropriate location for such use.
  - I-303.2(f)** Such use will not adversely affect the neighborhood in which the manufactured home park is located.
  - I-303.2(g)** There will be no nuisance or serious hazard to vehicles or pedestrians.
  - I-303.2(h)** The use would not be seriously detrimental or offensive to owners of adjoining property or to the Town, nor would it tend to radically reduce property values of adjoining property or other property in the immediate vicinity.
- I-303.3** Permits issued pursuant to Article III, shall contain the provision that work must be commenced within six (6) months and completed within one (1) year of the date of issuance of said permit. If work is not commenced in accordance with this six-(6) month term, said permit shall expire without further action by the Board.

#### **I-304 LOT AND YARD REGULATIONS**

- I-304.1** The symbols shown in **Table I-304.1** shall be used to determine the District Classification of any and all tracts of land which are proposed for subdivision.
- I-304.2** The regulations pertaining to minimum lot sizes, minimum frontages, minimum depths, minimum front yard setbacks, and minimum side yard setbacks and minimum rear yard setbacks shall be as set forth in the Table of Lot and Yard Regulations (Table I-304.2) subject to further provisions of this Ordinance.

---

---

**TABLE I-304.1 KEY TO SOIL TYPES**

---

**SYMBOL D – SLOPE CATEGORY**

- B - 0 to 8%**
- C - >8 to 15%**
- D - >15 to 25%**
- E - >25%**

---

---

	Minimum setbacks from property line to building line			
	FRONTAGE	FRONT	SIDE	REAR
	FEET	SETBACK	SETBACK	SETBACK
<b>DISTRICT 1 -- 2 ACRE ZONING</b>	200	50	30	50

Map Color Code -- yellow

Soil & Slope Reference:

- Symbol A - 1. Excessively drained  
2. Well drained
- Symbol B - 1. Glaciofluvial deposits (out wash/terraces)  
2. Glacial till material  
Marine or Glaciolacustrine deposits  
3. Very fine and silt deposits  
4. Loamy/sandy over silt/clay deposits  
5. Silt and clay deposits  
6. Excavated, regraded or filled
- Symbol C - 1. None  
2. Bouldery, with more than 15% of the surface covered with boulders (larger than 12 inches in diameter)  
3. Mineral restrictive layer(s) are present in the soil profile less than 40 inches below the soil surface—such as hard pan, platy structure, clayey texture. For examples of soil characteristics that qualify for restrictive layer, see Soil Manual for Site Evaluations in New Hampshire page 2-22, Figure 2-8.
- Symbol D - B - 0 to 8%  
C - >8 to 15%

Symbol E - Identifying the map as meeting the standards of a high intensity soil map.

**District 1 Classification** (2 Acres) permits very well drained soils with slopes not exceeding 15%.

*[Table I-304.2 continued]*

DISTRICT 2 -- 5 ACRE ZONING	Minimum setbacks from property line to building line			
	FRONTAGE	FRONT	SIDE	REAR
	FEET	SETBACK	SETBACK	SETBACK
	300	50	30	50

Map Color Code -- Red

Soil & Slope Reference:

- Symbol A -
  1. Excessively drained
  2. Well drained
  3. Moderately well drained
  4. Somewhat poorly drained
  
- Symbol B -
  1. Glaciofluvial deposits (out wash/terraces)
  2. Glacial till material  
Marine or Glaciolacustrine deposits
  3. Very fine sand and silt deposits
  4. Loamy/sandy over silt/clay deposits
  5. Silt and Clay deposits
  6. Excavated, regraded or filled
  
- Symbol C -
  1. None
  2. Bouldery, with more than 15% of the surface covered with boulders (larger than 12 inches in diameter)
  3. Mineral restrictive layer(s) are present in the soil profile less than 40 Inches below the soil surface--such as hard pan, platy structure, clayey texture. For example of soil characteristics that qualify for restrictive layer, see Soil Manual for Site Evaluations in New Hampshire, page 2-22, Figure 2-8.
  - X. Areas where depth to bedrock is so variable that a single soil type cannot be applied will be mapped as a complex of soil types and will have a Symbol C or X.

Symbol D - B through E

(When symbol A is 4, then Symbol D may not exceed 15%; if Symbol C is an X, then Symbol D may not exceed 15%)

- B - 0 to 8%
- C - >8 to 15%
- D - >15% to 25%

**District 2 Classification** (5 Acres) Permits moderately drained or deep soils with slopes not to exceed 25% or somewhat poorly drained soils with slopes not to exceed 15%.

*[Table I-304.2 continued]*

	Minimum setbacks from property line to building line			
	FRONTAGE FEET	FRONT SETBACK	SIDE SETBACK	REAR SETBACK
<b>DISTRICT 3 -- 5 ACRE ZONING WATERSHED AREA</b>	300	50	30	50

Map Reference - US Geological Survey

**District 3 Classification** (5 Acres) applies to all land within the watershed area, except non-buildable District 4 land, regardless of its capabilities.

**DISTRICT 4 -- NON BUILDABLE**

Map Color Code -- Brown, Green

Soil and Slope Reference:

The presence of any of the following symbols identifies a soil as District 4, regardless of the other symbols.

- Symbol A -
  - 5. Poorly drained
  - 6. Very Poorly drained
  - 7. Not determinable (to be used only with Symbol B)
- Symbol B -
  - 7. Alluvial deposits
  - 8. Organic materials--fresh water
  - 9. Organic materials--tidal marsh
- Symbol C -
  - 4. Bedrock present in the soil profile 0 to 40 inches below the soil surface (bedrock is either a lithic or paralithic contact—see Soil Taxonomy p. 48-49)
  - 5. Subject to flooding
  - 6. Does not meet fill standards (see addendum--Standards for Fill Material) (only to be used with Symbol B-6)
- Symbol D -
  - E. >25% ±

The presence of the following combination of symbols also indicates a District 4 soil.

- Symbol A is 4 and Symbol D is 15% or higher.
- Symbol C is X and Symbol D is 15% or higher.

**District 4 Classification** (non-buildable) prevents the development of a parcel or parcels of land which have poorly drained soils, standing water, shallow bedrock or severe slope.

Minimum setback from property line to building line

<b>DISTRICT 5 - LAND BORDERING N.H. RT. 13</b>	<b>FRONTAGE FEET</b>	<b>FRONT SETBACK</b>	<b>SIDE SETBACK</b>	<b>REAR SETBACK</b>
	500	90	30	50

**District 5 Classification** is an overlay classification that dictates frontage and setback requirements for all land bordering N.H. Route 13 to a depth of 200 feet.

*[Table 1-304.2 continued]*

**EXAMPLES:**

A parcel or parcels of land determined to consist mostly of a 232DH determination would be classified as district 2 or five-acre zoning as a result of severe slope 15%-25%, with well-drained soils.

Another example is a parcel or parcels of land determined to consist mostly of a 521BH determination which would classify the land as District 4 or non-buildable. Symbol A, or the number 5 signified poorly drained soils even though Symbols B through E indicate no other restrictive features.

The most decisive criteria in determining the proper district classification will usually be drainage class and slope class while also considering any other restrictive features present. In determining a district classification, the most restrictive feature will be considered the determining factor.

*[End of Table 1-304.2]*

### **I-304.3 BOUNDARIES**

For the purposes of this ordinance, soils boundaries shall be determined by the scale distance from the nearest visible prominent town road as shown on the aerial photomaps, to the nearest 1/32 inch (31 ft.).

### **I-304.4 LOCATION OF ON-SITE DISPOSAL FIELDS**

To avoid high concentration of effluent discharges in a localized area, no disposal fields shall be located between the sidelines setbacks and the property line. All on-site disposal systems in District 1, 2, & 3 shall be placed in the soil most suitable for septic tank absorption field.

### **I-304.5 MULTIPLE SOILS DISTRICTS WITHIN LOTS**

**I-304.5(a)** When multiple soil district soils exist within a lot proposed for subdivision, the number and type of lots allowed shall be calculated as follows:

**The number of 5-acre lots =  $\frac{\text{Total District 2 soils} + \text{Total District 3 soils}}{5}$**

**The number of 2-acre lots =  $\frac{\text{Total District 1 soils}}{2}$**  (Amended March 12, 2002)

**I-304.5(b)** 5-acre lots must contain not less than 5 acres.  
(Amended March 12, 2002 and again March 9, 2004)

**I-304.5(c)** 2-acre lots must contain not less than 2 acres.  
(Amended March 12, 2002 and again March 9, 2004)

## **I-304.6 PROCEDURE FOR PLANNING BOARD REVIEW**

**I-304.6(a)** Whenever a plat or other evidence is submitted showing a soil district boundary that is designated by soil and slope classification and such boundary differs from the boundary designated on the soils limitation district map, the Planning Board shall adjust such boundary upon submission of the following:

(i) A detailed topographic layout of the subdivision and the proposed lots prepared by a registered land surveyor.

(ii) A revised soils map of the Town of Mont Vernon and/or evidence submitted by a soils scientist qualified in soils classification, including a written report of his on-site field inspection.

(iii) The soil boundary as shown on the soils limitation district map shall be overlaid on the plat and the newly proposed boundary location shall be indicated on the same plat by a broken line.

**I-304.6(b)** The Planning Board shall reserve the right to withhold action on such plat pending the results of an on-site and/or other investigation by the Board of its appointed agent.

**I-304.6(c)** The final boundary location shall be confirmed and/or determined by the Planning Board.

## **I-304.7 LOT OR YARD SIZE REDUCTION**

No conforming lot or open space on the lot (yard setback) shall be reduced in size or separated in ownership if by such action it shall become non-conforming.

## **I-304.8 LOT OF RECORD**

Where a lot in separate ownership at the time of passage of this ordinance does not conform to the area and frontage requirements of this ordinance, such lot shall be considered as meeting the minimum requirements of this ordinance.

## **I-304.9 SEPARABILITY CLAUSE**

The invalidity of any provision of this Amendment shall not affect the validity of any other provisions.

## **I-305 OPEN SPACE DEVELOPMENT REGULATIONS**

*(Single Family Dwellings)*

**I-305.1 GENERAL:** The Planning Board may approve Open Space Development in accordance with the following regulations, and such other regulations as may apply.

**I-305.2 PURPOSE:** The purpose of Open Space Development to which any such development must adhere, are:

**I-305.2(a)** To promote the conservation of the natural and scenic environment and the development of community uses in harmony with the natural features of the land.

**I-305.2(b)** To establish living areas within the Town that provides a balance of community needs, such as a diversity of housing opportunities, adequate recreation and open space areas, easy accessibility to these and other community facilities, and pedestrian and vehicular safety.

**I-305.2(c)** To provide for efficient use of land, streets and utility systems.

**I-305.2(d)** To stimulate imaginative and economical approaches to land use and community development.

**I-305.2(e)** To decrease town expenses traditionally associated with new developments.

### **I-305.3 GENERAL REGULATIONS**

**I-305.3(a)** Open Space Development shall be permitted in all districts in which residential uses are permitted. An owner or owners, or a duly authorized agent thereof, of a tract of land may submit to the Planning Board a subdivision plan for an Open Space Development according to the procedures and provisions of the Subdivision Regulations of the Town of Mont Vernon.

**I-305.3(b)** The maximum number of dwelling units, permitted in any Open Space Development shall be determined by dividing the Net Tract Area by the minimum lot size for the Zoning District in which the development is located. The Net Tract Area of a parcel of land shall be defined as the total area of the parcel, minus all land recorded as designated Wetland and all area with a slope of greater than 25%.

**I-305.3(c)** Minimum frontage requirements which would be required in a conventional grid pattern subdivision may be waived in open space development as long as the requirements set forth in Sections: I-305.2 (Purpose), I-305.2(a), (b), (c), (d) and (e) of the Mont Vernon Zoning Regulations are met; however, in either case Open Space developments will be required to have a setback of a minimum of one hundred (100) feet from the existing roads and abutters. The Planning Board shall determine the number of curb cuts to be made on existing

roads, with a maximum of three (3) for any open space subdivision. The criteria for determination shall be I-305.2 (Purpose), I-305.2 (a), (b), (c), (d) and (e) of the Mont Vernon Zoning Regulations; the health, safety and welfare of the town; and the current (at the time of subdivision) condition of the existing town roads servicing the subdivision. For the purposes of this regulation, each curb cut of co-located and/or common driveways shall be considered a single opening. A landscaped buffer sufficient to provide division of transition between uses shall be provided within the required setbacks to conserve the natural and scenic environment. In no case shall the width of the buffer be less than the setbacks otherwise required in that district. *(Amended March 13, 2001)*

**I-305.3(d)** Open Space Development shall not have to provide the minimum frontage and acreage around each dwelling as required elsewhere in the Zoning Ordinance. All buildings shall be at least 25 feet from all boundaries. Such development shall be designed and constructed as to achieve the purposes of Open Space Development as set forth in Section 2 of the Regulations. *(Amended March 13, 2007)*

**I-305.3(e)** Open Space Development shall have at least forty per cent (40%) of the Net Tract Area set aside as common open space for the use and enjoyment of the residents of the development and/or the general public and shall be permanently restricted for open space. The designated open space may include water bodies, wetlands, and/or steep slopes, but these shall not count toward the acreage calculation of the open space parcel(s). Recreation facilities and equipment as determined through consultation with the Planning Board may be constructed or installed by the developer. The location, variety, accessibility and orientation to other uses of this common open space shall be suitable to the type and character of the proposed development and to the location of development within the Town. *(Amended March 11, 2003)*

**I-305.3(f)** Open Space within the Development shall be either deeded to the Town of Mont Vernon, or shall be protected by recreation and/or conservation easements; or shall be leased or conveyed to be permanently protected in other suitable ways approved by the Planning Board with a Public Meeting held prior to making final approval so as to guarantee the following:

- (i) The continued use of such land for the intended purposes.
- (ii) Continuity of proper maintenance for those portions of the open space land requiring maintenance.
- (iii) When appropriate, the availability of funds required for such maintenance.
- (iv) Recovery for loss sustained as a result of casualty, condemnation or otherwise, and in the case of a homeowner's association or similar form of ownership, that the membership and obligation of the residents of the

Open Space Development be automatic upon conveyance of title or lease to individual dwelling units.

**I-305.3(g)** The Open Space Development Plan shall show the layout of all roads. All roads shall be built to the Town requirements for public acceptance; except that right-of-way and pavement widths for residential streets may be reduced according to the standards adopted by the Planning Board in consultation with the Fire Department and the Board of Selectmen and may, with the approval of the Planning Board, remain in private ownership. Road(s) must be completed or bonded to the satisfaction of the Selectmen prior to issuance of building permits. *(Amended March 13, 2007)*

**I-305.3(h)** All Open Space Developments, located along Route 13 within the Town of Mont Vernon, New Hampshire, will be allowed a single access per development and only if access is not available through other acceptable means.

#### **I-305.4 REVIEW STANDARDS**

**I-305.4(a)** The review of an Open Space Development conducted by the Planning Board with consultation with the Selectmen, Road Agent and Fire Department under these regulations shall ascertain that adequate and appropriate provisions have been made by the owner or his authorized agent for the following:

- (i) Traffic circulation and access, including adequacy of adjacent streets, entrances and exits, traffic flow, sight distance, curb cuts, turning lanes, and existing or recommended traffic signalization.
- (ii) Pedestrian safety and access.
- (iii) Emergency vehicle access.
- (iv) Storm water drainage based upon a ten-year storm frequency, utilizing on-site absorption wherever practical.
- (v) Recreation facilities and resources.
- (vi) Water supply and wastewater disposal shall meet all State and Town requirements.
- (vii) Environmental factors such as protection against pollution, noise, odor, and the protection of natural land features.
- (viii) Preservation of areas of significant historic conservation, and scenic values.
- (ix) Utilization of topography, slope, and sun orientation in overall layout of the Development.

iii

- (x) Compatibility in the design and location of different types of dwelling units.

**I-305.4(b)** In addition, the Planning Board shall review the plan to assure compliance with the provisions of the standards set forth in **I-305.3** and other town regulations and ordinance. The Planning Board shall also ascertain that the plan minimizes the encroachments of the Open Space Development upon neighboring land uses.

### **I-305.5 SEPARABILITY CLAUSES**

**I-305.5(a)** The invalidity of any provision of this Amendment shall not affect the validity of any other provision.

## **I-306 TELECOMMUNICATIONS FACILITIES**

*(Telecommunications Facilities ordinance adopted March 8, 2005)*

### **Section I-306.1.1 Title**

These regulations shall officially be known, cited, and referred to as the Wireless Communications Service Facility Regulations of the Town of Mont Vernon, hereinafter within this ordinance referred to as "these regulations."

### **Section I-306.1.2 Purpose and Goals**

1. This ordinance is designed and intended to balance the interests of the residents of the Town of Mont Vernon, Wireless Communications Service facility providers and Wireless Communications Service customers in the siting of Wireless Communications Service facilities within the Town of Mont Vernon, so as to preserve the health, welfare and safety of the Town and its residents and to ensure the coordinated development of communications infrastructure. This ordinance establishes general guidelines for the siting of Wireless Communications Service facilities to enhance and fulfill the following goals:
2. To preserve the authority of the Town of Mont Vernon Planning Board to provide for reasonable opportunity for the siting of Wireless Communications Service facilities and to allow for the provision of such facilities to take place effectively and efficiently.
3. To ensure that Wireless Communications Service facilities are provided compatibly with the visual and environmental features by preserving the Town of Mont Vernon's unique viewsheds and scenic values, in particular, but not limited to, those associated with the views from Route 13 and the Town-owned Lamson Farm.

4. To reduce adverse impacts such facilities may create, including, but not limited to, impacts on aesthetics, environmentally sensitive areas, historically significant locations, aircraft flight corridors, migratory bird flight corridors, health and safety by injurious accidents to person and property, and prosperity through protection of property values.
5. To provide for co-location and minimal impact siting options through an assessment of technology, innovative technology which reduces proliferation of Wireless Communications Service facilities, current locational options, future available locations, innovative siting techniques, and siting possibilities beyond the political jurisdiction of the Town.
6. To permit the construction of new Wireless Communications Service facilities only where all other reasonable opportunities have been exhausted, and to encourage the owners of Wireless Communications Service facilities to configure them in a way that minimizes the adverse visual impact of Wireless Communications Service Facilities.
7. To require cooperation and co-location, to the greatest extent possible, between competitors in order to reduce cumulative negative impacts on the Town.
8. To ensure that ongoing maintenance and safety inspections for all Wireless Communications Service facilities are carried out.
9. To avoid potential damage to adjacent properties from tower failure through structural standards and setback requirements.
10. To provide for the removal of abandoned facilities that are no longer inspected for safety concerns and Building Code compliance; and to provide a mechanism for the Town to remove those abandoned facilities to protect the citizens from imminent harm and danger.
11. To provide for the removal or upgrade of facilities that are technologically outdated.

### **Section I-306.1.3 Authority**

This ordinance is adopted by the Town of Mont Vernon in accordance with the authority as granted in New Hampshire Revised Statutes Annotated 674:16 & 674:21 and procedurally under the guidance of 675:2, II as well as Section 704 of the Federal Telecommunications Act of 1996.

### **Section I-306.1.4 Jurisdiction**

1. These regulations apply to all Wireless Communications Service Facilities as defined in Section I-306.2.2 (Words and Terms Defined) located within the boundaries of the Town of Mont Vernon, New Hampshire, or outside, as provided by law.

2. No Wireless Communications Service Facility may be constructed without an approved and signed site plan from the Planning Board.

## **Article 2**

### **Section I-306.2.1 Definitions**

For the purposes of these regulations, certain abbreviations, terms, and words shall be used, interpreted, and defined as set forth in this Article.

Unless the context clearly indicates to the contrary, words used in the present tense include the future tense and words used in the plural indicate the singular.

### **Section I-306.2.2            Words and Terms Defined**

*Act* - the Communications Act of 1934, as it has been amended from time to time, including the Telecommunications Act of 1996 and its amendments, and shall include future amendments to the Communications Act of 1934.

*Affiliate* - When used in relation to an operator, another person who directly or indirectly owns or controls, is owned or controlled by, or is under common ownership or common control with the operator, or an operator's principal partners, shareholders, or owners of some other ownership interest; and when used in relation to the municipality, any agency, board, authority or political subdivision affiliated with the municipality or other person in which the municipality has legal or financial interest.

*Alternative tower structure* - Innovative siting techniques shall mean man-made trees, clock towers, bell steeples, light poles, and similar alternative-design mounting structures that camouflage or conceal the presence of antennas or towers.

*Antenna* - Any exterior apparatus designed for telephonic, radio, television, personal communications service, pager network, or any other communications through the sending and/receiving of electromagnetic signals of any frequency and bandwidth.

*Antenna Array* - A collection of antennas attached to a mount to send and receive electromagnetic signals.

*Antenna Height* - The vertical distance measured from the base of the antenna support structure at grade to the highest point of the structure. If the support structure is on a sloped

grade, then the average between the highest and lowest grades shall be used in calculating the antenna height.

*Antenna Support Structure* - Any pole, telescoping mast, tower tripod, or any other structure which supports a device used in the transmitting and/or receiving of electromagnetic signals.

*Applicant* - A person who applies for a Wireless Communications Service Facility siting. An applicant can be the owner of the property or someone who is authorized to represent the owner, such as a builder, developer, optional purchaser, consultant, or architect.

*Average Tree Canopy Height* - An average height found by inventorying the height, above ground level (AGL), of all trees over twenty (20) feet in height within the area that extends for a distance of one-hundred and fifty (150) feet from the base of the mount, security barrier, or designated clear area for access to equipment, whichever is greatest. Trees that will be removed for construction shall NOT be used in this calculation.

*Broadcast* - To transmit information over the airwaves to two or more receiving devices simultaneously. Information can be transmitted over local television or radio stations, satellite systems or wireless data communications networks.

*Camouflaged* - A Wireless Communications Service Facility that is disguised, hidden, part of an existing or proposed structure, or placed within an existing or proposed structure.

*Carrier* - A company that provides Wireless Communications Services. Also sometimes referred to as a provider.

*Cell Site* - A tract or parcel of land that contains a cellular communication antenna, its support structure, accessory building(s), and parking, and may include other uses associated with an ancillary to cellular communications transmission.

*Cellular Service* - A telecommunications service that permits customers to use wireless mobile telephones to connect, via low-power radio transmission sites called cell sites, either to the public switched network or to other mobile cellular phones.

*Cellular Telecommunications* - A commercial Low Power Mobile Radio Service licensed by the Federal Communications Commission (FCC) to providers in a specific geographical area in which the radio frequency spectrum is divided into discrete channels which are assigned in groups to geographic cells within a service area and which are capable of being reused in different cells within the service area.

*Cellular Telecommunications Facility* - A cellular telecommunications facility consists of the equipment and structures involved in receiving telecommunication or radio signals from mobile radio communications sources and transmitting those signals to a central switching computer which connects the mobile unit with the land-based telephone lines.

*Co-location* - The use of a single mount on the ground by more than one carrier (vertical co-location), or the use of more than one mount on the same site by more than one carrier

(horizontal co-location), or the use of several mounts on an existing building or structure by more than one carrier.

*Common Carrier* - An entity licensed by the FCC or a state agency to supply local and/or long distance telecommunications services to the general public at established and stated prices.

*Communication Tower* - a guyed, monopole, or self-supporting tower, constructed as a free standing structure or in association with a building, other permanent structure or equipment, containing one or more antennas intended for transmitting and/or receiving television, AM/FM radio, digital, microwave, cellular, telephone, or similar forms of electronic communication.

*Communications Transmission System or Communications System* - A wired communication transmission system, open video system, or wireless communications transmission system regulated by these regulations.

*C.O.W.'s* - "Cells on Wheels", see Temporary Wireless Communication Facility.

*Digital Technology* - technology that converts voice and data messages into digits that represent sound intensities at specific points of time and data content.

*Directional Antenna* - An antenna or array of antennas designed to concentrate a radio or an electromagnetic signal in a particular area.

*Dish Antenna* - A dish-like antenna used to link communications sites together by wireless transmission of voice or data. Also called microwave antenna or microwave dish antenna.

*Environmental Assessment (EA)* - An EA is a document required by the Federal Communications Commission (FCC) and the National Environmental Policy Act (NEPA) when a Wireless Communications Service Facility is placed in certain designated areas.

*Equipment Shelter* - An enclosed structure, cabinet, shed, vault, or box near the base of the mount within which are housed equipment for electrical equipment. Equipment shelters are sometimes referred to as base transceiver stations.

*ESMR* - Enhanced Specialized Mobile Radio.

*FAA* - The Federal Aviation Administration.

*FCC* - the Federal Communications Commission.

*Fall Zone* - The area on the ground from the base of a ground mounted Wireless Communications Service Facility that forms a circle with a diameter equal to twice the height of the facility, including any antennas or other appurtenances. The fall zone is the area within which there is a potential hazard from falling debris (such as ice) or collapsing material.

*Frequency* - The number of cycles per second - hertz (Hz)

*Grade* - The lowest point of elevation of the finished surface of the ground, paving, or sidewalk within the area between the structure and the property line or, when the property

line is more than 5 feet from the structure, between the structure and a line 5 feet from the structure.

*Guyed Tower* - A communication tower that is supported, in whole or in part, by guy wires and ground anchors.

*Height* - The height above ground level (AGL) from the natural grade of a site to the highest point of a tower or other structure, even if said highest point is an antenna.

*Lattice Tower* - A type of mount with multiple legs and structural cross-bracing between the legs that is self-supporting and freestanding.

*License* - The rights and obligations extended by the municipality to an operator to own, construct, maintain, and operate its system within the boundaries of the municipality for the sole purpose of providing services to persons or areas outside the municipality.

*Mast* - A thin pole that resembles a street light standard or a telephone pole. A dual-polarized antenna is typically deployed on a mast.

*MHZ* - Megahertz, or 1,000,000 Hz.

*Micro-cell* - A low power mobile radio service telecommunications facility used to provide increased capacity in high call-demand areas or to improve coverage in areas of weak coverage.

*Microwave* - Electromagnetic radiation with frequencies higher than 1,000 MHZ; highly directional signal used to transmit radio frequencies from point to point at a relatively low power level.

*Microwave Antenna* - A dish-like antenna manufactured in many sizes and shapes used to link communication sites together by wireless transmission of voice or data.

*Monopole* - A thicker type of mount than a mast that is self-supporting with a single shaft of wood, steel or concrete, or other material, that is designed for the placement of antennas and arrays along the shaft, constructed without guy wires and ground anchors.

*Mount* - The structure or surface upon which antennas are mounted, including the following four types of mounts:

- (1) Roof-mounted - Mounted on the roof of a building.
- (2) Side-mounted - Mounted on the side of a building.
- (3) Ground-mounted - Mounted on the ground.
- (4) Structure-mounted - Mounted on a structure other than a building.

*Omni-directional Antenna* - An antenna that is equally effective in all directions and whose size varies with the frequency and gain for which it was designed.

*Owner* - The owner of the title to real property or the contract purchaser of real property of record, as shown on the latest assessment records in the Office of the Selectmen. Owner also includes a deed holder or contract purchaser whose name does not appear in the latest

assessment records, but who presents to the town a copy of a deed or contract of sale showing date, book, and page of recording.

*Personal Communications Services or PCS* - Digital wireless telephone technology such as portable phones, pagers, faxes, and computers. Such mobile technology promises to allow each consumer the same telephone number wherever he or she goes. Also known as Personal Communications Network (PCN).

*Planning Board or Board* - Shall mean the Town of Mont Vernon Planning Board.

*Preexisting Towers and Antennas* - Any tower or antenna for which a non-residential site plan has been approved and signed and recorded at the Hillsborough County Registry of Deeds prior to the effective date of these regulations and is exempt from the requirements of these regulations so long as the tower or antennas are not modified or changed.

*Public Property* - Any real property, easement, air-space, or other interest in real estate, including a street, owned by or controlled by this town or any other governmental unit.

*Radio Frequency (RF) Engineer* - A licensed engineer specializing in electrical or microwave engineering, especially the study of radio frequencies.

*Radio Frequency Radiation (RFR)* - The emissions from Wireless Communications Service facilities.

*Roof and/or Building Mount Facility* - A low power mobile radio service telecommunications facility in which antennas are mounted to an existing structure on the roof (including rooftop appurtenances) or building face.

*Scenic View* - A scenic view is a view that may be framed, wide angle, or panoramic and may include natural and/or manmade structures and activities. A scenic view may be from a stationary viewpoint or be seen as one travels along a roadway, waterway, or path. A view may be to a far away object, such as a mountain, or of a nearby object.

*Secondary Use* - A use of land or of a building or portion thereof which is unrelated to the principal use of the land or building.

*Security Barrier* - A decay-resistant wall, fence, or berm that restricts an area from unauthorized entry or trespass.

*Self-supported Tower* - A communication tower that is constructed without guy wires and ground anchors.

*Separation* - The distance between one carrier's array of antennas and another carrier's array.

*Spectrum* - Relating to any transmissions or reception of electromagnetic waves.

*Stealth Facility* - Any communications facility which is designed to blend into the surrounding environment. Examples of stealth facilities may include architecturally screened roof-

mounted antennas, building-mounted antennas painted to match the existing structure, antennas integrated into architectural elements, and antenna structures designed to look like light poles. (See also Alternative Tower Structure)

*System* - The communications transmission system operated by a service provider in the Town.

*Telecommunications* - The transmission, between or among points specified by the user, of information of the user's choosing, without change in the form or content of the information as sent and received.

*Temporary Wireless Communication Facility* - Any tower, pole, antenna, etc., designed for use while a permanent wireless facility is under construction, or for a special event or conference where a majority of people attending are wireless users.

*Tower* - Shall mean any structure that is designed and constructed primarily for the purpose of supporting one or more antennas, including self-supporting lattice towers, guyed towers, or monopole towers. The term includes radio and television transmission towers, microwave towers, common-carrier towers, cellular telephone towers, universal antenna towers, alternative tower structures, and the like.

*Whip Antenna* - An antenna that transmits signals in 360 degrees. Whip antennas are typically cylindrical in shape and are less than 6 inches in diameter and measure up to 18 inches in height. Also called omni-directional, stick or pipe antennas.

*Wireless Communication Facility* - An all-encompassing definition; any towers, poles antennas or other structures intended for use in connection with transmission and/or receipt of electromagnetic signals.

*Wireless Communications Service Facility* - Facility for the provision of Wireless Communications Services, as defined by the Telecommunications Act of 1996, as amended. Wireless Communications Service facilities include a mount, antenna, equipment shelter, and other related equipment.

*View Corridor* - A view corridor is a three-dimensional area extending out from a view point. The width of the view corridor depends on the focus of the view. The focus of the view may be a single object, such as a mountain, which would result in a narrow corridor, or a group of objects, such as a downtown skyline, which would result in a wide corridor. Panoramic views have very wide corridors and may include a 360-degree perspective. Although the view corridor extends from the view point to the focus of the view, the mapped portion of the corridor extends from the view point and is based on the area where base zone heights must be limited in order to protect the view.

## Article 3

### Section I-306.3

### General Provisions

**Section I-306.3.1 Applicability**

1. Wireless Communications Service Facilities

The terms of this Article and the Site Plan Review Regulations shall apply to Wireless Communications Service facilities proposed to be located on property owned by the Town, on privately owned property, and on property owned by any other governmental entity that acts in its proprietary capacity to lease such property to a carrier.

2. Amateur Radio; Receive-Only Antennas

This ordinance shall not govern any tower, or the installation of any antenna that is under 70 feet in height and is owned and operated by a federally-licensed amateur radio station operator or is used exclusively for receive only antennas. This application adopts the provisions and limitations as referenced in RSA 674:16, IV.

3. Essential Services and Public Utilities

Wireless Communications Service facilities shall not be considered infrastructure, essential services, or public utilities, as defined or used elsewhere in the Town's ordinances or regulations. Siting for Wireless Communications Service facilities are a use of land and are subject to the Town's Zoning Ordinance and all other applicable ordinances and regulations.

**Section I-306.3.2 Location**

**Section I-306.3.2.A Districts Permitted** (moved from I-306.4.02 in 1998 ordinance)

New Wireless Communications Service Facility construction and co-location of Wireless Communications Service provider facilities shall be permitted in the following districts subject to all applicable local, state and federal regulations and Site Plan Review and approval by the Planning Board.

<u>Table I-306.3.2 A</u>	<u>New Tower Construction</u>	<u>Co-location on Existing Tower</u>	<u>Co-location on Existing Structure</u>
<u>Limited Commercial Residential Rural Residential Historic District Overlay</u>	<u>(Permitted)</u>	<u>(Permitted)</u>	<u>(Permitted)</u>
	<u>(Permitted)</u>	<u>(Permitted)</u>	<u>(Permitted)</u>
	<u>(Permitted)</u>	<u>(Permitted)</u>	<u>(Permitted)</u>
	<u>(see "Non Residential Site Plan Review")</u>	<u>(see "Non Residential Site Plan Review")</u>	<u>(see "Non Residential Site Plan Review")</u>

**Section I-306.3.2.B Siting Standards**

1. Antennas and towers may be considered either principal or secondary uses. A different existing use or an existing structure on the same lot shall not preclude the installation of an antenna or tower on such lot.
2. For purposes of determining whether the installation of a tower or antenna complies with district development standards, the dimensions of the entire lot shall control, even though the antennas and towers may be located on leased parcels within such lots.
3. Towers that are constructed, and antennas that are installed, in accordance with the provisions of this ordinance on a non-conforming lot or in conjunction with a non-conforming use, shall not be deemed to constitute the expansion of a non-conforming use or structure.

### **Section I-306.3.2.C Siting**

The siting of new or co-located Wireless Communications Service facilities shall be permitted in all Zoning Districts. Applicants seeking approval for Wireless Communications Service facilities shall first evaluate existing structures for the siting of Wireless Communications Service facilities. Only after finding that there are no suitable existing structures pursuant to Section I-306.3.2,C.2 herein, shall a provider propose a new ground-mounted facility.

#### *Existing Structures - Policy*

Wireless Communications Service facilities shall be located on existing structures, including, but not limited to, buildings, water towers, existing telecommunications facilities, utility poles or towers, and related facilities, provided that such installation preserves the character and integrity of those structures by being camouflaged to the greatest extent possible.

#### *Existing Structures - Burden of Proof*

The applicant shall have the burden of proving that there are no existing suitable structures on which to locate its Wireless Communications Service Facility and/or transmit or receive radio signals. To meet that burden, the applicant shall take all the following actions to the extent applicable:

- a.) The applicant shall submit to the Planning Board a list of all contacts made with owners of potential sites regarding the availability of potential space for a Wireless Communications Service Facility. If the Planning Board informs the applicant that additional existing structures may be satisfactory, the applicant shall contact the property owner(s) of those structures.
- b.) The applicant shall provide copies of all letters of inquiry made to owners of existing structures and letters of rejection. If letters of rejection are not provided, at a minimum, unanswered "Return Receipt Requested" forms from the U.S. Post office shall be provided for each owner of existing structures that was contacted.

If the applicant claims that a structure is not capable of physically supporting a Wireless Communications Service Facility, this claim must be certified by an independent, licensed engineer, whose fees shall be paid by the applicant. The certification shall, at a minimum, explain the structural issues and demonstrate that the structure cannot be modified to support the Wireless Communications Service Facility without unreasonable costs. The estimated cost shall be provided to the Planning Board and the Board of Selectmen.

#### *Ground Mounted Facilities - Policy*

If the applicant demonstrates that it is not feasible to locate on an existing structure, ground

mounted Wireless Communications Service Facilities shall be designed so as to be camouflaged to the greatest extent possible, including, but not limited to:

- use of compatible building materials and colors;
- screening, landscaping, and placement within trees;
- use of lower antenna mounts that do not protrude as far above the surrounding tree canopies;
- disguised Wireless Communications Service facilities such as flagpoles, artificial tree poles, light poles, and traffic lights, that blend in with their surroundings;
- custom designed Wireless Communications Service facilities that minimize the visual impact of a Wireless Communications Service Facility on its surroundings;
- other available technology.

### **Section I-306.3.3 Bonding Security and Insurance**

Recognizing the hazardous situation presented by abandoned and towers unmonitored Wireless Communications Service facilities, the Board of Selectmen shall set the form and amount of security that represents the cost for removal and disposal of abandoned Wireless Communications Service facilities in the event that a facility is abandoned and the facility owner is unwilling or unable to remove the facility in accordance with Section I-306.3.4,C. The amount of the security shall be based upon the removal cost, plus fifteen percent (15%), provided by the applicant and certified by an independent engineer licensed in New Hampshire. The owner of the facility shall provide the Planning Board and the Board of Selectmen with a revised removal cost estimate and structural evaluation prepared by an independent engineer licensed in New Hampshire every five (5) years from the date of the Planning Board's approval of the site plan. If the cost has increased more than fifteen percent (15%) then the owner of the facility shall provide additional security in the amount of the increase. Furthermore, the Planning Board shall require the submission of proof of adequate insurance covering accident or damage. Should the facility owner discontinue or abandon the facility in accordance with Section I-306.3.4 and the facility is physically removed in accordance with Section I-306.3.4, the security being held by the Town shall be released within thirty (30) days of confirmation of satisfactory removal by the Planning Board or its designated agent.

### **Section I-306.3.4 Abandonment or Discontinuation of Use**

Beginning 12 months after Planning Board approval, and continuing on an annual basis thereafter, the owner of a Wireless Communications Service Facility shall provide the Planning Board with written, signed certification that the Wireless Communications Service Facility is being used to provide telecommunications services as defined. Failure to comply with this requirement shall constitute an admission that the Wireless Communications Service Facility is not in use and has been abandoned.

#### **Section I-306.3.4.A. *Abandonment***

Any Wireless Communications Service Facility that is not operated for a continuous period of twelve (12) months shall be considered abandoned and hazardous to the public health and safety, unless the owner of said Wireless Communications Service Facility provides proof of quarterly inspections. The owner shall physically remove the abandoned Wireless

Communications Service Facility within ninety (90) days of receipt of a declaration of abandonment from the Town notifying the owner of such abandonment. A declaration of abandonment shall only be issued following a public hearing, noticed according to RSA 676:4, with notice to abutters and the last known owner/operator of the Wireless Communications Service Facility. If the abandoned Wireless Communications Service Facility is not removed within 90 days, the Town may execute the security and have the Wireless Communications Service Facility removed. If there are two or more users of a single Wireless Communications Service Facility, this provision shall not become effective until all users cease using the Wireless Communications Service Facility.

#### **Section I-306.3.4.B.            *Discontinuance***

At such time that a carrier plans to abandon or discontinue operation of a Wireless Communications Service Facility, such carrier shall notify the Town by certified U.S. mail of the proposed date of abandonment or discontinuation of operations. Such notice shall be given no less than thirty (30) days prior to abandonment or discontinuance of operations. In the event that a carrier fails to give such notice, the Wireless Communications Service Facility shall be considered abandoned upon such discontinuance of operation. Unused portions of towers above a manufactured connection shall be removed within 90 days of the time of antenna relocation. The replacement of portions of a tower previously removed requires the issuance of a new Wireless Communications Facility permit.

#### **Section I-306.3.4C. *Removal***

Upon abandonment or discontinuance of use, the owner of the Wireless Communications Service Facility shall physically remove the Wireless Communications Service Facility within ninety (90) days from the date of abandonment or discontinuance of use. "Physically remove" shall include, but not be limited to:

- i) Removal of antennas, mounts, equipment shelters and security barriers from the subject property.
- ii) Proper disposal of the waste materials from the site in accordance with local and state solid waste disposal regulations.
- iii) Restoring the location of the Wireless Communications Service Facility to its natural condition, except that any landscaping and grading shall remain in the after-condition.

#### **Section I-306.3.4D.            *Failure to Remove***

If the owner of the Wireless Communications Service Facility does not remove the Wireless Communications Service Facility upon notice from the Town, then the Board of Selectmen shall, after holding a public hearing with notice to the owner and abutters, issue a declaration of abandonment. The owner of the facility shall dismantle and remove the facility within ninety (90) days of receipt of the declaration of abandonment by the Board of Selectmen. If the abandoned Wireless Communications Service Facility is not removed within ninety (90) days, the Town may execute the security to pay for this action.

#### **Section I-306.3.4E. *Failure to Maintain***

If the owner of the Wireless Communications Service Facility fails to maintain the Wireless Communications Service Facility in accordance with the directions of the Planning Board pursuant to Section I-306.3.5.A, then the Board of Selectmen shall, after holding a public hearing with notice to the owner and abutters, issue a declaration of abandonment. The owner of the facility shall dismantle and remove the Wireless Communications Service Facility within ninety (90) days of receipt of the declaration of abandonment from the Board of Selectmen. If the abandoned facility is not removed within ninety (90) days, the Town may execute the security to pay for this action.

### **Section I-306.3.5 Monitoring and Maintenance**

#### **Section I-306.3.5.A. Maintenance**

The owner of the Wireless Communications Service Facility shall maintain the Wireless Communications Service Facility in good condition. Such maintenance shall include, but shall not be limited to, painting, structural integrity of the mount and security barrier, and maintenance of the buffer areas, landscaping and camouflage materials. The Planning Board may direct the owner to perform maintenance that it determines is required.

#### **Section I-306.3.5.B. Monitoring**

As part of the issuance of the site plan approval or building permit, the property owner and the owner of the Wireless Communications Service Facility shall agree in writing that the Town of Mont Vernon and/or its appointed representative(s) may enter the subject property to obtain RFR measurements and noise measurements and to perform maintenance inspections at the expense of the carrier. In the case of taking RFR and/or noise measurements, the Town, or its appointed representative(s), may enter without any advance notice to either the property owner or the Wireless Communications Service Facility owner. In all other cases, the Town shall provide reasonable written notice to the carrier and landowner and provide them with the opportunity to accompany the Town representative(s) when the inspections are conducted.

### **Section Section I-306.3.6 Timing of Operation**

**Section Section I-306.3.6.A.** Operation of a Wireless Communications Service Facility shall commence no later than nine (9) months from the date the proposal was approved. If the Wireless Communications Service Facility is not operating and providing the citizens of the Town with Wireless Communications Services, as defined, within this time period, the Planning Board, at its discretion, may revoke its approval.

**Section Section I-306.3.6.B.** If Planning Board approval is revoked and construction has begun, the Wireless Communications Service Facility shall be considered to be abandoned.

### **Section I-306.3.7 Historic District Restrictions**

Wireless Communications Service Facilities within the Historic Districts shall be camouflaged.

**Section I-306.3.8            Enactment**

In order that Wireless Communication Service Facilities may be constructed in accordance to these purposes and policies, these regulations are hereby adopted and made effective as of initial posting of hearing. All applications for Wireless Communication Service Facility sitings pending on the effective date of these regulations shall be reviewed under these regulations.

**Section I-306.3.9**

Section I-306.3.9.A. Interpretation. In their interpretation and application, the provisions of these regulations shall be held to be the minimum requirements for the protection of public health, safety, and general welfare. These regulations shall be construed broadly to promote the purposes for which they are adopted.

Section I-306.3.9.B. Conflict. These regulations are not intended to interfere with, abrogate, or annul any other ordinance, rule or regulations, statute, or other provision of law except as provided in these regulations. Where any provision of these regulations imposes restrictions different from any other ordinance, rule or regulation, statute or other provision of law, the provision which is more restrictive or imposes higher standards shall control.

Section I-306.3.9.C. Separability. If any part or provision of these regulations or the application of these regulations to any service provider or circumstances is adjudged invalid by any court of competent jurisdiction, the judgment shall be confined in its operation to the part, provision, or application directly involved in the controversy in which the judgment shall be rendered and it shall not affect or impair the validity of the remainder of these regulations or the application of them to other service providers or circumstances. The Planning Board hereby declares that it would have enacted the remainder of these regulations even without any such part, provision, or application which is judged to be invalid.

**Section I-306.3.8    Amendments**

For the purpose of protecting the public health safety, and general welfare, the Planning Board may from time to time propose amendments to these regulations which shall be approved or disapproved by the Planning Board at a public meeting following public notice. Realizing that communication technologies are evolving and changing quickly, future innovations may reduce the impacts of individual facilities and render portions of these regulations obsolete. Therefore, periodic review and revision of these regulations will be necessary.

**Section I-306.3.9    Enforcement**

The enforcement of these regulations shall be the responsibility of the Board of Selectmen or their designee.

### **I-307 IMPACT FEES FOR NEW RESIDENTIAL DEVELOPMENT**

**I-307.1 Authority.** This ordinance is established pursuant to New Hampshire RSA 674:21 (V).

**I-307.2 Intent and Purpose.** This ordinance is intended to:

- a. Implement and be consistent with the Town of Mont Vernon's Master Plan.
- b. Allocate a fair and equitable share of the cost of public facilities (including school construction) to new development; and
- c. Require new development to contribute its proportionate share of funds necessary to accommodate its impact on public facilities, which is reasonably related to the capital needs created by residential development and to the benefits accruing to the development.

**I-307.3 Findings.**

- a. The Town of Mont Vernon is responsible for and committed to the provision of public facilities and services at levels necessary to support residential and non-residential growth and development.
- b. Such facilities and services have been and will be provided by the Town utilizing funds allocated via the Capital Improvements Program which is regularly updated pursuant to New Hampshire RSA 674:5.
- c. The rate of growth experienced by the Town in recent years, as well as projected growth rates, would necessitate an excessive expenditure of public funds in order to maintain adequate facility standards.
- d. Residential development enabled through this zoning ordinance will create a need for the construction, equipping or expanding of public capital facilities.
- e. The imposition of impact fees is one of the preferred methods of ensuring that public expenditures are not excessive, and that residential development bears a proportionate share of the cost of public capital facilities necessary to accommodate such development. This must be done in order to promote the public health, safety and welfare.

- f. The fees established by the Impact Fee Schedules for the categories identified in Section I-308.a are derived from, based upon, and do not exceed the costs of:
1. Providing additional public capital facilities necessitated by the new residential development for which the fees are levied; or
  2. Compensating the Town of Mont Vernon for expenditures made for existing public facilities that were constructed in anticipation of new residential growth and development.

**I-307.4**        **Definitions.** The following definitions shall apply to the Impact Fees for Residential Development section, and shall not be affected by the provisions of any other ordinance of the Town of Mont Vernon.

**I-307.4.1**     **Applicant.** A person applying for the issuance of a building permit, permit for manufactured home installation, subdivision, site plan or other local land use decision, permit or approval.

**I-307.4.2**     **Dwelling Unit.** A single unit providing complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking and sanitation.

**I-307.4.3**     **Gross Living Area.** The effective area of a residential unit as indicated in the assessment files. It includes finished space that is heated, but excludes heated garages and outbuildings which do not include living quarters.

**I-307.4.4**     **New Development.** Any building activity which results in:

- a. The creation of a new dwelling unit or dwelling units;
- b. The conversion of a non-residential use to a dwelling unit or dwelling units.

New Development does not include:

- a. the reconstruction of a structure that has been destroyed by fire or natural disaster, provided that there is no change in the size and density of the structure;
- b. the replacement of a manufactured home;
- c. the construction of any accessory structure which would not increase the demand for facilities by the principal structure.

**I-307.4.5**     **Public Capital Facilities.** Assets, facilities, and equipment which are owned and operated by the Town of Mont Vernon, the Mont Vernon School System, or cooperatively with other municipalities and which have a useful life of no less than five years. Public capital facilities do not include the costs associated with the operation, maintenance, repair of such facilities, or with facility replacements which do not increase the capacity or level of service, but does include reasonable costs for

planning, engineering, design, land acquisition, and other reasonable costs associated with such facilities.

**I-307.4.6** **Off Site Improvements/Exaction.** An improvement that is required of the Planning Board for either a site plan or subdivision that is necessary for the project to operate properly on the day that it opens shall be considered to be an Off-Site Improvement or Exaction. Off-site improvements for site-specific applications shall be assessed on a case-by-case basis. The applicant shall be assessed their proportionate share for the need for the project. In cases where it is determined that an improvement is necessary for the proper functioning of a site plan or subdivision, but that the improvement will accommodate future development, the Town, at the request of the applicant, may establish an impact fee that assesses future site plans or subdivisions for their proportionate share of the improvement. Such impact fees shall be provided to the original applicant with any interest, upon application by the original applicant to the Planning Board, during such period as the original applicant continues to own the property benefited by the improvement, based upon the proportion of the property still owned by the original applicant.

**I-307.5** **Imposition of Impact Fees for Residential Development.**

- a. Any person, who after (October 22, 2002), seeks to undertake new residential development within the Town of Mont Vernon, New Hampshire, by applying for a building permit or permit for manufactured home installation and who is not vested under RSA 674:39, is hereby required to pay an impact fee in the manner set forth in section I-309.2 of this Ordinance, in accordance with any Impact Fee Schedule adopted by the Board of Selectmen.
- b. No new building permit or new permit for manufactured home installation or activity requiring payment of an impact fee pursuant to Section I-309.2 of this Ordinance shall be issued unless and until the impact fees hereby required have been determined.

**I-307.6** **Computation of Impact Fees for Residential Development.**

- a. The amounts of the impact fees shall be determined using the values contained in the Impact Fee Schedules for the following types of facilities:
  - 1) School Facilities
  - 2) Municipal Facilities
  - 3) Public Libraries

Impact Fees Schedules shall be established and reviewed as set forth in Section I-314.1 Establishment of Fees.

- b. In the case of change of use, redevelopment, or expansion or modification of an existing use which constitutes new development, the impact fees shall

be based upon the net positive increase in the impact fee for the new use as compared to the previous use.

**I-307.7 Payment of Fees.**

Impact fees shall, in accordance with RSA 674:21, (V)(d), be assessed at the time a building permit is issued but the applicant shall pay the impact fees required of the Ordinance to the Town of Mont Vernon at the Town Hall when a certificate of occupancy is issued, unless as provided in the foregoing statute, the planning board has advanced the time of such payment or the planning board and the applicant have come to some other arrangement as provided in said statute RSA 674:21, (V)(d).

**I-307.8 Appeals.**

- a. If an applicant elects to dispute the amount of the impact fee, the applicant may prepare and submit to the Selectmen an independent fee calculation study for the new development activity which is proposed. The Planning Board shall review such study and render a decision. All cost incurred by the Town for the review of such study shall be paid by the applicant.
- b. The decision of the Planning Board may be appealed to the Superior Court as provided by RSA 677:15.

**I-307.9 Administration and Custody of Funds Collected.**

- a. All funds collected shall be properly identified by and promptly transferred for deposit in the appropriate Impact Fee accounts, and used solely for the purposes for which it was collected. Impact fee accounts shall be special revenue fund accounts and under no circumstances will impact fee revenues accrue to the General Fund. Each fee collected under a specific Impact Fee Schedule shall not be commingled with other impact fee accounts or any other funds.
- b. The Town Treasurer shall have custody of all accounts, and shall pay out the same only upon written orders of the Board of Selectmen.
- c. At the end of each fiscal year, the Town Treasurer shall make a report, giving a particular account of all impact fee transactions during the year.

**I-307.10 Refund of Fees Paid.**

- a. The current owner of property on which impact fees have been paid may apply for a full or partial refund of such fees, together with any accrued interest.

The refund shall be owed when the Town has failed, within the period of six (6) years from either the payment of such fee or the last installment payment, to expend or encumber such fees on public capital facilities intended to benefit the development which paid the fees. In event that a

refund is due, the Board of Selectmen shall notify the owner of record by certified mail return receipt requested.

- b. In the event that the owner elects to apply for a refund, such application shall be submitted in writing to the Board of Selectmen within one (1) year from the date of receiving notice from the Board of Selectmen.

**I-307.11 Credits in Exchange for Public Capital Facilities.**

- a. Public capital facility improvements may be offered by the applicant as total or partial payment of a required impact fee. The offer must be determined to represent an identifiable dollar value computed in a manner acceptable to the Planning Board. The Planning Board may authorize the applicant an impact fee credit in the amount of the value of the contribution.
- b. Any claim for credit must be made prior to the Planning Board vote on subdivision/site plan approval. The applicant shall indicate that such credit will be requested at the survey phase subdivision application stage of the development review process, and which impact fees will be affected by the credit.
- c. Credits shall not be transferable, and run only with a specific subdivision or site plan approval.
- d. Credits shall not be transferable from one type of impact fee to any other impact fee.
- e. Determination by the Planning Board pursuant to the credit provision of this section may be appealed to the Superior Court in accordance with RSA 677:15.
- f. Under no circumstances shall this section imply that the Planning Board has an obligation to accept any credit offer that is proposed.

**I-307.12 Additional Assessments.**

Payment of an impact fee does not restrict the Town or the Planning Board from requiring other payments from the applicant, including such payments relating to the cost of the extensions of water and sewer mains or the construction or improvement of roads or streets or other infrastructure and facilities specifically benefiting the development which are required by the subdivision or site plan review regulations or as otherwise permitted by law.

**I-307.13 Premature and Scattered Development.**

Nothing in this Ordinance shall be construed so as to limit the existing authority of the Mont Vernon Planning Board to provide against development which is scattered or premature, requires an excessive expenditure of public funds, or otherwise violates the Town of Mont Vernon's Site Plan Review Regulations, Subdivision Regulations, or Zoning Ordinance.

**I-307.14 Establishment and Review of Fees.**

**I-307.14.1 Establishment.** In order to establish an impact fee, the Board of Selectmen may prepare an Impact Fee Schedule, in accordance with RSA 674:21, and Section I-314.2 of this Ordinance. The Board of Selectmen shall conduct a public hearing on the proposed schedule, and shall consider all comments received prior to finalizing the Schedule. The Impact Fee Schedule shall be in effect when a majority of the Board of Selectmen approves the schedule. Should the Board of Selectmen fail to approve the schedule, it shall state its reason for doing so in writing.

**I-307.14.2 Impact Fee Schedule.** The Impact Fee Schedule shall be prepared in accordance with RSA 674:21, and shall be calculated using the following factors, based upon the most recent data available or a conservative estimate:

- a. A determination of the size of the capital facility.
- b. An estimate of the proportion of users from future Mont Vernon households subject to the impact fee that will use the facility when it has reached its capacity.
- c. Projections of future users based upon residential building permit projections.
- d. Estimates of the cost of the facility to the Town of Mont Vernon, including financing and excluding non-municipal funding sources;
- e. Credits subtracted from a base fee accounting for property taxes paid by the proportion of the project to be financed by impact fees.
- f. A fee assessed per housing unit based upon the gross livable area of the dwelling unit.
- g. A determination of the number of building permits that will need to be issued in order to finance the impact fee.
- h. An accounting of the number of permits issued, with a maximum number of permits to be assessed an impact fee prior to the fee's termination.
- i. Exemptions, if any.

In developing the impact fee schedule, the Board of Selectmen shall use the most recent data available in order to calculate the fee.

**I-307.14.3 Review of Impact Fees.**

The Board of Selectmen shall review an established Impact Fee Schedule on an annual basis. The Selectmen shall modify the Impact Fee Schedule if it finds that new data is available that will refine the schedule. This may include the replacement of figures used in the Impact Fee Schedule with more accurate or recent projections, data and figures. The Board of Selectmen shall hold a public hearing on the proposed modifications and vote whether to affirm the modifications within sixty (60) days. If the Board of Selectmen fail to affirm the modifications, the impact fee schedule in effect shall remain in place.

**I-307.14.4 Termination of Impact Fees.**

a. Impact fees shall terminate in accordance with the Impact Fee Schedule, which shall set forth the number of building permits to be issued prior to its obsolescence.

- b. The Board of Selectmen may also by majority vote terminate an impact fee schedule in effect. This may be done only after soliciting recommendations from the Planning Board, and after conducting a public hearing. The Planning Board shall be given sixty (60) days to produce written recommendations to the Board of Selectmen.

**I-307.15 Severability.**

If any section, phrase, sentence or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision, and such holding shall not affect the validity of the remaining portions thereof.

**I-307.16 Effective Date.**

This Ordinance shall become effective on October 22, 2002.

**I-308 Accessory Dwelling Unit**

**I-308.1 Purpose**

Pursuant to NH RSA 674:17 ***the Town of Mont Vernon*** adopts the following ordinance since: Enabling extended families to live together benefits families and the community, ***Accessory Dwelling Unit*** housing provides ***options for families and extends*** a principal residence to accommodate relatives ***or in home care which*** is a rural New England tradition. The Town of Mont Vernon shall allow ***Accessory Dwellings Units*** to be permitted by the Building Inspector in any district ***where residential dwelling uses are permitted***, subject to the following regulations.

**I-308.2 Definition**

***“Accessory Dwelling Unit”*** is an independent living area that is part of a larger single family dwelling unit. It is not ***intended as*** a general rental unit. An ***Accessory Dwelling Unit shall*** have a kitchen, a bathroom, and ***up to two*** bedrooms in addition to the living area. Access to the ***Accessory Dwelling Unit shall be*** through ***an interior door off*** a living area, ~~or~~ open foyer ***or hallway that is*** contained within the larger dwelling unit.

**I-308.3 Requirements and Limitations**

- a. An ***Accessory Dwelling Unit*** is intended to be secondary and accessory to a principal single-family dwelling unit. The ***Accessory Dwelling Unit*** must be developed in a manner which does not alter the character or appearance of the principal dwelling unit as a single-family residence. Only one shall be allowed per principal dwelling unit and/or lot. The ***Accessory Dwelling Unit*** shall not have a separate house number from the principal dwelling. The ***Accessory Dwelling Unit*** shall not have a separate power meter or separate electrical service entrance.

- b. Up to one external entrance shall be allowed provided that it is not the primary entrance to the **Accessory Dwelling Unit**
- c. An **Accessory Dwelling Unit** shall not be considered to be an additional dwelling unit for the purposes of determining minimum lot size.
- d. An **Accessory Dwelling Unit** shall have an area of no greater than 800 square feet.
- e. An **Accessory Dwelling Unit** shall be designed to allow for re-incorporation into the principal dwelling unit.
- f. The existing or proposed septic system must be certified by a licensed septic designer or engineer as adequate to handle and treat the increased waste volumes generated by the **Accessory Dwelling Unit** in accordance with the building code of the Town of Mont Vernon. If the existing septic system is not capable of adequately handling and treating the waste of the principal dwelling unit and the **Accessory Dwelling Unit** in accordance with the building code of the Town of Mont Vernon, a new or upgraded septic system conforming to the most recent state and local septic standards and regulations shall be required.
- g. Occupancy of one of the dwelling units, primary or accessory, must remain as property owner occupied.**
- h. Detached Accessory Dwelling Units are not permitted.**

#### **I-308.4     Existing In-Law Apartments**

Owners of in-law apartments constructed prior to March 2005 that do not have a building permit and/or certificate of occupancy may be grandfathered by applying to the Building Inspector on or before September 1, 2005 for a determination of compliance with the life safety codes. Applications received after September 1, 2005 shall be subject to all requirements of this section. The Building Inspector shall issue one of the following:

- a. A determination of compliance and a certificate of occupancy.
- b. A conditional determination of compliance and a description of the corrective changes needed to bring the in-law apartment into compliance. The required changes shall be completed within 120 days of the date of the determination of conditional compliance. Upon successful completion of the required changes, the Building Inspector shall issue a certificate of occupancy.
- c. A determination of non-compliance, listing requirements and conditions for which compliance cannot be achieved through corrective changes.

#### **I-308.5     Existing legally permitted In-Law Apartments**

***Owners of legally permitted in-law apartments constructed after March 2005 but prior to the amendments to Article I-308 (2017) and that obtain a building permit and certificate of occupancy are grandfathered.***

**I-308.6      Failure to Comply**

If an owner fails to comply with the requirements of this section, the use of the in-law apartment or other ***Accessory Dwelling Unit*** shall be terminated within 6 months of the date of notice from the Building Inspector. The owner shall be subject to penalty under RSA 676:17 for each day the ***Accessory Dwelling Unit*** fails to comply with the requirements of this section.

Amended: March 2017

**I-309      PHASING**

**I-309.1      Purpose**

It is a demonstrated fact that rapid and uncontrolled proliferation of the subdivision process places a burden on the municipality to provide and pay for municipal services that are required when a subdivision is approved. The Planning Board is authorized in circumstances where the record demonstrates that such services will be impacted by a particular proposal, in lieu of denial, to require that the subdivision be phased so that the impact will be phased over a certain period of time. The Planning Board is directed to promulgate such regulations as are necessary to effectuate the purpose of this section as part of their subdivision regulations.

**I-310      Housing for Older Persons**

**I-310.1 DEFINITION.** Housing for Older Persons is that intended for, and solely occupied by, persons 62 years of age or older.

**I-310.2 PURPOSE.** It is in the public interest and the general welfare of the Town of Mont Vernon to encourage the development of Housing for Older Persons, as that term is defined in RSA 354-A:15.II. The purpose of this section is to establish the special conditions that such a case must satisfy. Where these regulations differ from other sections of the town zoning law, the provisions of this section shall take precedence. However, any housing must meet all other provisions of the Zoning Ordinance, Building Code and Subdivision Regulations.

- (a) Housing for Older Persons shall be permitted in any zone.
- (b) Housing for Older Persons shall be exempted from I-205 of this Zoning Ordinance, which requires a Special Exception for two-family and multi-family dwellings.
- (c) Density shall be as follows: 4 bedrooms shall be permitted for every 2 acres of District 1 soils. 4 bedrooms shall be permitted for every five acres of District 2 and 3 soils.  
Example 1: A lot containing 20 acres of District 1 soils may support 40 one-bedroom units, or 20 two-bedroom units, or a combination, provided that the total number of bedrooms on the lot does not exceed 40.  
Example 2: A lot containing 20 acres of District 3 soils may support a total of 16 bedrooms.
- (d) Each dwelling unit shall include one, but not more than two, bedrooms. The maximum square footage of living space in each dwelling unit shall be 1500 square feet.
- (e) Each dwelling unit shall include at least one covered parking spot and one additional spot for resident parking. There shall be a minimum of one visitor parking spot per unit.
- (f) At least 40% of the net tract area shall be open space, which shall include 100 feet of undisturbed continuous buffer zone around the perimeter of the parent lot. This buffer may include landscaped entrances.
- (g) Where there are multiple structures, there shall be 50 feet between structures that are not appurtenant.
- (h) The planning board may disallow Housing for Older Persons if, in the Board's opinion, there is inadequate accessibility to main roads and/or town services.
- (i) Supporting on-site facilities such as community rooms and shared dining rooms shall be permitted at the discretion of the Planning Board.
- (j) Building height shall be limited to 35 feet. No bedroom window shall be more than 26 feet from the ground.
- (k) Roads shall be public and built to town standards.
- (l) Lots of less than 10 total acres shall not be considered for Housing for Older Persons developments, but there is no minimum lot size for the subdivided lots.
- (m) Housing for Older Persons developments shall be exempt from the III-421 Phasing ordinance.
- (n) Proposed plan information must include exterior lighting plan and any proposed signs to be located on the site. Exterior lights shall be downward-facing.
- (o) Housing for Older Persons developments shall be assessed any impact fees in place at the time of building permit application, but shall be exempt from school impact fees. Assessment of impact fees for multiple housing units shall be based on total square

footage. Certificates of occupancy shall be issued for each unit when the monies due for that unit, based on its square footage, are paid. *(Added March 13, 2007)*

### **I-311 Restaurants**

**I-311.1** The historic character of Mont Vernon is unique and is important to its people and their collective identity as a community. Mont Vernon, more than most communities, that have experienced the same level of growth, has managed to preserve its rural character and its small town feel. In many ways Mont Vernon has achieved this in a manner that is unique to the region.

**I-311.2** Any restaurant approved under this ordinance must not significantly detract from Mont Vernon's historic rural character. Fast food and Formula restaurants are specifically prohibited in the Town of Mont Vernon.

**I-311.3** Restaurants are specifically allowed on any lot within the Limited Commercial District. Restaurants in the Residential and Rural/Residential Districts may be approved by special exception by the Zoning Board of Adjustment after public hearing. Such approval shall be subject to any conditions laid down by the Zoning Board of Adjustment and shall also be subject to a Non-Residential Site Plan review by the Planning Board.

**I-311.4** All signs and/or exterior advertising for a restaurant shall comply with the requirements and standards set forth in the Non-Residential Site Plan Review Regulations of the Town of Mont Vernon.

**I-311.5** Noise – Restaurant noise shall not exceed 55db from 7AM – 9PM and 45db from 9PM – 7AM at the lot boundary.

**I-311.6** Buffer – If required by the Zoning Board of Adjustments restaurants shall provide a buffer of undisturbed continuous perimeter, except for entrance and exit driveways.

**I-311.7** Height – Building height shall be limited to the height of all Mont Vernon buildings, that is 35 feet. No window ledge shall be more than 26 feet from the ground.

**I-311.8** Parking – Restaurants shall provide adequate off-street parking.

**I-311.9** Restaurants approved by Special Exception may be subject to setbacks, lighting restrictions, and other conditions as required by the Zoning Board of Adjustments or Planning Board. *(Added 3-11-08)*

## **ARTICLE 4 - DISTRICT REGULATIONS**

**I-401** Except as herein provided, no building or land shall hereafter be used, constructed, or altered unless in conformity with the regulations herein specified for the zoning district

in which it is located. Any non-residential use in any of these districts shall comply with Mont Vernon's non-residential site plan review process. *(Amended March 11, 2003)*

#### **I-402 RESIDENTIAL DISTRICT**

**I-402.1** The Residential District shall be a district designated for single family residences and related uses only. Except that a building solely used as a U.S. Post Office will be a permitted use. *(Second sentence added 10-24-89)*

#### **I-403 RURAL-RESIDENTIAL DISTRICT**

**I-403.1** All uses permitted in the Residential District shall be permitted in the Rural-Residential District.

**I-403.2** General purpose farming and forestry activities shall be permitted and farm and home produce may be exposed for sale and sold in the Rural-Residential District. The display of historical, farming or forestry collections of tools, equipment, machinery and other related items in conjunction with farming or forestry activities shall be a permitted use in the Rural-Residential District. *(Second Sentence added in 1989)*

#### **I-404 HISTORIC DISTRICT**

##### **I-404.1 LEGISLATIVE INTENT**

**I-404.1(a)** The purpose of this ordinance is to promote the educational, cultural, economic and general welfare of the public for the protection, enhancement, perpetuation, and the preservation of the historic district. It is hereby declared that it is a public purpose that the heritage of Mont Vernon will be safeguarded by:

- (i) Preserving districts in Mont Vernon which reflect elements of a cultural, social, economic, political and architectural history.
- (ii) Conserving property value in such districts.
- (iii) Fostering civic beauty.
- (iv) Strengthening the local economy.
- (v) Promoting the use of an historic district for the education, pleasure and welfare of the citizens of Mont Vernon. (NH 674:45 and 674:50)

##### **I-404.2 QUALIFICATIONS**

**I-404.2(a)** The historic district established hereunder and from time to time, amended as prescribed by NH state law shall have one or more of the following qualifications, without limitations as to cultural or chronological period.

(i) Structures or sites which are identified with the cultural, political, economic, military or social history of Mont Vernon.

**I-404.3** The entire Historic District Regulations and the official map of the Historic District are available at the Town Office.

## **I-405 LIMITED COMMERCIAL DISTRICT**

### **I-405.1 PURPOSE AND INTENT**

#### **I-405.1(a) Goal**

To encourage small scale, clean non-residential development which needs neither a public water nor sanitary sewer service, and which will increase employment opportunities and broaden the Town's tax base and provide needed services for the Town's residents.

#### **I-405.1(b) Objective and Characteristics**

- (i)** This district provides a location for the establishment of limited commercial facilities to improve and expand employment opportunities and broaden the tax base in the Town of Mont Vernon. The district offers good access to the Town's major highway (NH Route 13) and is easily accessible to other area towns. Limited commercial uses in the district will not conflict with uses in other adjacent areas. Soil types in the district are optimum for building. Additionally, the basic character of this area has already been established by the existing sawmill located southeast of the district.
- (ii)** A major variety of types of retail, service, office and manufacturing facilities are permitted in the district provided they are in keeping with the goals set forth in the Master Plan for the harmonious development of the Town, provided the performance standards are met, and further provided that a site plan for any proposed use shall be approved by the Planning Board conforming to the non-residential site plan review regulations of the Town of Mont Vernon.
- (iii)** Residential uses shall not be permitted within this district. The district shall provide the area for shopping facilities, offices, banking facilities and other limited commercial operations. Uses located in the district shall provide access, parking, adequate lighting and protection, quality design and construction, and similar related items for the convenience and safety of the general public and users of the area.
- (iv)** All such uses are declared to possess characteristics of such unique and distinct forms that each specific proposed use must be considered as an individual case. Notwithstanding any other provisions of I-405, permitted uses shall not be required to conform to the minimum frontage, setback and lot sizes required elsewhere in the Zoning Ordinance for the Town of Mont Vernon, but shall be so designed as to achieve the general purpose, requirements and standards of I-405. Any limited commercial use approved for location within the district pursuant to this ordinance shall comply with any and all conditions set forth by the Planning Board as necessary to protect the public health, safety, welfare and convenience of Mont Vernon's citizens.

## **I-405.2 PERMITTED USES**

The following uses are permitted in the Limited Commercial District:

- I-405.2(a)** Retail, personal service, and business establishment of a type consistent with the purpose of this district to serve limited commercial needs of various nearby neighborhoods. The foregoing uses shall include, but shall not necessarily be limited to:
- (i) Establishments for the retail sales of grocery, meat, produce, baked goods, drugs, stationery or hardware products;
  - (ii) Barber and beauty shops;
  - (iii) Shops for the collection and distribution of clothing for dyeing and cleaning;
  - (iv) Banks;
  - (v) Restaurants, coffee and sandwich shops (excluding drive-ins, or fast food service types).
- I-405.2(b)** Business and/or professional offices for individual or group practice, including doctors and dentists, (including medical and/or dental clinics), lawyers, counseling services, engineers, architects, planners, insurance offices and accountants.
- I-405.2(c)** Veterinary clinics which may include facilities for overnight boarding or caring of animals provided that any such facility shall be designed, constructed and operated in such a manner so as not to be a nuisance to adjacent uses by way of noise or odor.
- I-405.2(d)** Automotive service station for the retail sales of automotive fuel products and which may include a garage area for repairs to automobiles only. Such uses shall be permitted only when the following conditions are complied with:
- (i) All fuel pumps and pump islands and all tanks for the storage of motor vehicle fuel shall be set back at least fifty (50) feet from all property lines.
  - (ii) All repair and service work, including car washing, but excluding emergency service and the sale of fuels, shall be conducted entirely within an enclosed building. Such repair services shall not include body or fender repair or paint spraying.
  - (iii) The outside storage or sale of wrecked vehicles shall not be permitted except where such vehicles are impounded on the premises at the direction of a duly authorized law enforcement agency. All such wrecked vehicles shall be removed from the premises without undue delay and may be stored only in an outside area which is screened with fencing and/or evergreen landscaping of such type and height as will shield the vehicles from view from the public highway or adjacent properties.

(iv) Any automotive service station shall be located at a minimum distance of two hundred (200) feet from any residential use, and further shall be located a minimum of one thousand five hundred (1500) feet from the nearest property line of any other automotive service station.

**I-405.2(e)** Wholesale and storage warehouses provided that all equipment, materials and products shall be stored within fully enclosed buildings.

**I-405.2(f)** Establishments offering indoor recreational activities and facilities (excluding video game arcades).

**I-405.2(g)** Laboratory, office and research facilities.

**I-405.2(h)** Component assembly or other handling of pre-manufactured products provided all such activities including the storage of materials and products is conducted within fully enclosed buildings.

**I-405.2(i)** General service or repair shops such as for jewelry, clocks, radios, televisions, small appliances, and bicycles.

### **I-405.3 GENERAL REQUIREMENTS**

Any use permitted in the Limited Commercial District by this ordinance may be proposed for location in the district by an applicant provided said proposed use shall comply with the following minimum requirements:

#### **I-405.3(a) Lot and Yard Requirements:**

- (i) The minimum lot size which may be proposed for development under this ordinance shall be two (2) acres.
- (ii) Any lot proposed for development having principal access to the main highway (NH Route 13) shall have a minimum frontage of five hundred (500) feet along said highway.
- (iii) Any lot proposed for development having principal access to an access or frontage road connecting to the main highway, which road meets or exceeds the requirements for roadway construction contained in the Subdivision Regulations for the Town of Mont Vernon, shall have a minimum frontage of two hundred (200) feet along said access or frontage road.
- (iv) Principal and accessory buildings and structures located on any lot shall conform to the minimum yard requirement, shown on Table-405.3(a)(iv). Distances shall be measured along a line perpendicular to the lot line from that part of the building or structure nearest the lot line.

---

**TABLE I-405.3(a)(iv) LIMITED COMMERCIAL DISTRICT**

---

**Minimum Yard Regulations**

- A. Sixty (60) feet from the nearest edge of the right-of-way along NH Route 13:
- B. Thirty (30) feet from the nearest edge of the right-of-way along any access road or frontage road meeting the requirements specified in Table I-405.3(a)(iii) above.
- C. One hundred (100) feet from the nearest lot line of any property currently used for or zoned for residential use.
- D. Fifteen (15) feet from the nearest side lot line or rear lot line of the subject property.

---

*[End of Table I-405.3(a)(iv)]*

---

**I-405.3(b) Building and Site Covering**

- (i) The portion of the total area of the lot which may be covered by all buildings and structures located thereon, shall not exceed fifty per cent (50%).
- (ii) No building shall be constructed to a height greater than two and one-half (2-1/2) stories or thirty-five (35) feet, whichever is lesser, excepting that chimneys, ventilators, sky-lights and necessary mechanical apparatus usually located above roof level, may project not more than ten (10) feet above the roof upon which they are situated provided such apparatus is located so as to minimize visibility of same from the lot lines.
- (iii) The portion of the total area of the lot which may be covered by buildings and structures, parking areas, and driveways and access ways located thereon shall not exceed seventy per cent (70%).
- (iv) All portions of the lot which are not proposed as locations for buildings, structures, parking areas or access ways, or similar improvements shall be suitably landscaped and permanently maintained in such a manner as to minimize storm water runoff and to harmoniously blend such non-residential uses with their surrounding area and with the residential character of the Town as a whole.

**I-405.3(c) Exterior Storage and Display**

- (i) All exterior storage areas and/or equipment parking areas shall be fenced, screened, landscaped, or otherwise protected from view.

**I-405.3(d) Access and Parking**

- (i) There shall be no more than one access to any lot within the district, excepting that wherever desirable for traffic safety and beneficial to vehicular circulation, consideration shall be given to combining access points where two or more lots are being concurrently developed.
- (ii) Pursuant to (i) above, there shall be only one access road to the main highway (NH Route 13) per one thousand (1000) feet.
- (iii) Adequate parking and loading facilities shall be provided for a proposed use within the district. Said parking and loading facilities shall comply with the minimum setbacks shown in Table I-405.3(d)(iii) as well as conforming to the requirements and standards of Non-Residential Site Plan Review regulations of the Town of Mont Vernon.

---

**TABLE I-405.3(d)(iii) LIMITED COMMERCIAL DISTRICT**  
**Minimum Setbacks for Parking & Loading Facilities**

- A. Forty (40) feet from the nearest edge of the right-of-way along NH Route 13.
- B. Twenty (20) feet from the nearest edge of the right-of-way along any access or frontage road other than the main highway.
- C. Fifty (50) feet from the nearest lot line of any property currently used for or zoned for residential use.
- D. Fifteen (15) feet from any lot line not otherwise specified in (A) through (C) above.

- 
- I-405.3(e)** All signs and/or exterior advertising shall comply with the requirements and standards set forth in the Non-Residential Site Plan Review Regulations of the Town of Mont Vernon.

**I-405.3(f) Other Requirements**

- (i) Any permitted limited commercial use of land within the district shall not generate nor create objectionable, noxious or offensive conditions on or around the lot on which it is situated-by way of odor, fumes, dust, smoke, noise, light, traffic congestion. In order to minimize the potentially objectionable external aspects of business and commercial uses, and to eliminate potentially hazardous and unsafe conditions, the Planning Board shall adopt

such standards and regulations as it may deem necessary to make proper evaluation of any proposed use according to the above criteria.

- (ii) Any person or firm proposing to locate a use or construct a building or structure within the Limited Commercial District shall first submit a site plan of the proposed use and improvements to the Planning Board for consideration pursuant to the Non-Residential Site Plan Review Regulations of the Town of Mont Vernon. No building permit shall be issued to any applicant unless and until such time as a site plan for the proposed building and use has been approved by the Planning Board pursuant to the provisions of this ordinance and the Non-Residential Site Plan Review Regulations of the Town. The Planning Board, after holding a public hearing upon an application for site plan review, shall approve, approve with modifications, or disapprove said site plan. The Planning Board may attach such reasonable conditions to said approval which may be necessary to ensure continued compliance with this ordinance and other applicable regulations. A record of the Planning Board's decision on said application, along with any conditions, modifications or reasons for disapproval, shall be entered in the minutes at which such action was taken.

## **I-406            NON-RESIDENTIAL ZONING**

**I-406.1** Site plan review authority provides the basis for controlling non-residential development in the interest of the public health, safety and welfare. The capacity to authorize and enable the planning board to exercise site plan regulatory authority is authorized by the State of New Hampshire (NH) Revised Statutes Annotated (RSA) 674:43(I) and this ordinance was promulgated to constitute such authority as well as to identify the scope of the site plan review authority available to the board, the latter being authorized by RSA 674:43 (IV).

**I-406.2 Purpose.** The purpose of this ordinance is to provide, pursuant to NH RSA 674:43 (IV), the Planning Board the standards and thresholds for determining the eligibility of a non-residential site use for a non-residential site plan review.

A non-residential use may be for the development, redevelopment, change or expansion of uses on tracts of land for all uses other than single family residences. This ordinance applies whether or not such development includes a subdivision or re-subdivision of land. The regulations set forth herein are intended to protect the public health and safety, promote the general welfare of the community and conserve the environment by assuring that non-residential use is employed in a manner which assures that adequate provisions are made:

- for traffic safety and access
- pedestrian and bicycle safety and access
- emergency access

- water supply
- sewage disposal
- site aesthetics
- management of stormwater, erosion, and sedimentation
- protection of groundwater; protection of wildlife habitat, fisheries and unique natural areas
- protection of historic and archaeological resources
- reduction of adverse impacts on adjacent properties
- harmonious placement into the fabric of the community

**I-406.3 Authority.** This ordinance is adopted pursuant to the authority given municipalities in NH RSA 674:43 as well as in NH RSA 674:21.

#### **I-406.4      Applicability**

**I-406.4.1 Uses Requiring Site Plan Review.** All non-residential uses of land and multifamily structures (except the exempt uses listed in Section I-406.4.2 below) shall require a site plan review by the Mont Vernon Planning Board according to the Mont Vernon Non-Residential Site Plan Review regulations (which regulations shall be adopted by the planning board in accordance with NH RSA 674:44), whether or not such development includes a subdivision or re-subdivision of land, and whether or not structures are proposed. Where structures are proposed, no building permit shall be issued until the site plan is approved by the planning board. Specific developments that require site plan review shall include, but are not limited to, the following:

- a. The construction or placement of any new non-residential structure, including accessory structures, of a total floor area of one thousand (1,000) square feet or more.
- b. The expansion of an existing non-residential structure, including accessory structures that increase the total floor area.
- c. The conversion of an existing building, in whole or in part, from a residential use to a non-residential use or a mixed use.
- d. The establishment of a new non-residential use even if no structures are proposed, including uses such as gravel pits, cemeteries, golf courses and other nonstructural non-residential uses.
- e. The conversion of an existing non-residential use, in whole or in part, to another non-residential use if the new use changes the basic nature of the use such that it increases the intensity of on- or offsite impacts.
- f. The construction of a multifamily structure or the conversion of an existing residential structure to a multifamily structure. Planning board approval does not remove the requirement for a special exception from the Zoning Board of Adjustment for multifamily structures.
- g. The construction or expansion of paved areas or other impervious surfaces, including walkways, access drives and parking lots, involving more than 10% of the lot area. If such construction is planned as part of a subdivision then the subdivision review process will constitute site plan review provided that the board is made aware that planned impervious surfaces will cover more than 10% of the lot area.

**I-406.4.2 Exempted Uses.** The following activities shall not require site plan approval. Certain of these activities will, however, require the owner to obtain a building permit, plumbing permit or other state or local approvals:

- a. Agricultural activities, including agricultural structures. Large commercial "farm-stands" in which 35% or more of the items for sale are not produced within the municipality shall, however, require site plan review if they otherwise meet the criteria for site plan review.
- b. Timber harvesting and forest management activities.
- c. Activities involving non-residential buildings or activities that are specifically excluded from review by the provisions of this Section.
- d. Home businesses as defined in this ordinance, unless in the process of granting a special exception the ZBA determines that site plan approval by the planning board is required.

### **I-406.4.3 HOME BUSINESS**

**I-406.4.3.1 DEFINITION.** A home business is a business operated by an individual within that individual's existing principal or existing accessory structure.

**I-406.4.3.2 PURPOSE.** The intent of this Ordinance is to establish guidelines for the operation of home businesses.

- (a) The home business shall be carried on by members of the family. Any combination of numbers of employees who are not part of the family, may be employed if their combined work hours do not exceed forty (40) hours per week.
- (b) There shall be no exterior display, no exterior storage of materials, and no other exterior indications of the home occupation, other than permitted signs, or variation from the residential character of the principal or accessory building.
- (c) Business hours for each individual business may be limited.
- (d) The home business shall be compatible with character of the neighborhood.
- (e) Objectionable circumstances such as noise, vibration, smoke, dust, electrical disturbances, odors, heat, or glare shall not be produced.
- (f) No traffic shall be generated by such activity in substantially greater volume than would normally be expected in the neighborhood.
- (g) Parking shall be provided off-street and shall not be located in the front yard or within the required setback from side and rear lot lines. Existing driveways may be used for parking of clients, but where additional parking is desired, a maximum of three (3) additional spaces is permitted in side or rear yards.
- (h) The permit to engage in a home business shall be issued to the petitioner only. The permit shall not be transferable upon the sale of said structure or the transfer of deed of said structure.

### **I-406.4.3.3 PERMITTED HOME BUSINESSES**

- (a) No building shall be expanded or remodeled to accommodate a home business without site plan review by the Planning Board and Certificate of Occupancy.
- (b) Home Business may only be permitted where a Special Exception is granted by the Zoning Board of Adjustment. The ZBA shall conduct a public hearing on any such request for a special exception and, in addition to any other criteria for the granting of such exception that may be provided for in this Ordinance they shall insure that the proposed home business complies with the specific terms identified in this section. The ZBA is empowered to impose

such conditions and limitations on the operation of the home business as may be necessary to insure that the purpose and intent of this regulation is met, including but not limited to conditions calculated to see to it that the home business remains a use which is 'accessory' to the underlying residential use of the premises. If the ZBA determines that site plan approval by the planning board is required, the planning board, in the exercise of site plan review may also impose conditions, but shall not do so in a manner that conflicts with those imposed by the ZBA.

#### **I-406.4.3.4 SIGNS**

(a) Each home business may erect one (1) exterior sign up to six (6) square feet in size. If the sign is mounted or hung from a pole, projects from the house, or is otherwise constructed so that it may be viewed from two (2) sides, it may use up to six (6) square feet of display on each side.

(b) If the home business is carried out in an accessory structure (i.e. garage, barn) which is set back more than one hundred (100) feet from the road (nearest adjacent right-of-way) one (1) additional sign of four (4) square feet may be attached to the accessory structure.

(c) No internally lit signs shall be permitted. The written message shall be limited to the name and function of service of the home occupation.

**I-406.4.4 Uncertain Applicability**. In cases where there is uncertainty as to whether a development proposal is subject to site plan review, the Planning Board shall hold a pre-application discussion and make a determination, by majority vote to be recorded in the public record, as to whether site plan review is required, and what level of review is necessary.

### **I-407 NON-CONFORMING USE**

**I-407.1** A non-conforming structure or use may be continued as it exists at the time of the passage of this Ordinance, subject to the following provisions:

#### **I-407.1(a) Changes**

- (i) No non-conforming use shall be changed to another non-conforming use.
- (ii) Once changed to a conforming use, no building or land shall revert to a non-conforming use.

#### **I-407.1(b) Discontinuance**

- (i) Whenever a non-conforming use has been discontinued for a period of one (1) year such use shall not thereafter be reestablished, and any future use shall conform with provisions of this Ordinance.

## **ARTICLE 5 - ADMINISTRATION AND ENFORCEMENT**

### **I-501 ENFORCEMENT**

**I-501.1** It shall be the duty of the Board of Selectmen and the Board is hereby given powers and authority to enforce the provisions of this Ordinance.

**I-501.2** Upon any well-founded information that this Ordinance is being violated, the Selectmen shall, on their own initiative, take immediate steps to enforce the provisions of this Ordinance by seeking an injunction or other legal action. Any other person or persons aggrieved may take this action on their own initiative after failure of the Selectmen to act for thirty (30) days after having been notified.

**I-501.3** Any persons violating any of the provisions of this Ordinance shall be subject to a fine of not more than fifty (\$50.00) dollars for each day such violation exists.

### **I-502 BOARD OF ADJUSTMENT**

Within thirty (30) days after the adoption of this ordinance and thereafter as terms expire or vacancies occur, the Board of Selectmen shall appoint a Board of Adjustment of five (5) members, conforming in duties and terms to the provisions of RSA 673:3.

## **I-502.1 SPECIAL EXCEPTIONS**

The Board of Adjustment may, after public hearing with notice to abutters by mail, in appropriate cases and subject to appropriate conditions and safeguards, grant a permit for a special exception. The Board, acting on an application for a special exception, shall take into consideration the following conditions:

**I-502.1(a)** The specific site as an appropriate location for such use.

**I-502.1(b)** The use as developed will not adversely affect the neighborhood.

**I-502.1(c)** There will be no nuisance or serious hazard to vehicles or pedestrians.

**I-502.1(d)** Adequate and appropriate facilities will be provided for the proper operation of the proposed use.

**I-502.1(e)** The use would not be seriously detrimental or offensive to owners of adjoining property or to the Town, nor would it tend to radically reduce property values of adjoining or other property in the immediate vicinity.

## **I-502.2 VARIANCE**

The Board of Adjustment may, after public hearing with notice to abutters by mail, authorize a variance from the terms of the Ordinance only where the Board finds that all the following conditions apply:

**I-502.2(a)** There are special circumstances or conditions applying to the land or building for which the variance is sought (such as, but not limited to, the exceptional narrowness, shallowness, or the shape of property in question, or exceptional topographical conditions), which are peculiar to such land or building; and the application of the requirements of the Ordinance will deprive any owner of such property of a reasonable use of it and will impose upon such owner a hardship not shared by the owners of other property in the same district.

**I-502.2(b)** The specific variance as granted is the minimum variance that will grant reasonable relief to the owner and is necessary for a reasonable use of the land or building.

**I-502.2(c)** The granting of the variance will be in harmony with the general purposes and intent of this Ordinance, and with the convenience, welfare, and character of the district within which it is proposed, and will not be injurious or otherwise detrimental to the public welfare.

**I-502.3** All special exceptions issued pursuant to Article 5, and all variances issued pursuant to Article 5, shall contain either of the following provisions:

**I-502.3(a)** That if construction is necessary, said construction must be commenced within six (6) months of the date of issuance of the exception or variance, and completed within one (1) year of said issuance, or the exception or variance shall expire of its own accord without further action by the Board.

**I-502.3(b)** That if a change in the land use is permitted by said variance or special exception, said change must be implemented within six (6) months of the date of issuance, or the exception or variance shall expire of its own accord without further action by the Board. *(As amended March 7, 1972)*

**I-502.4** A five-dollar (\$5.00) filing fee payable to the Town of Mont Vernon shall accompany each application for a variance or a special exception.  
*(As amended March 7, 1971.)*

### **I-503 DEFINITIONS**

**I-503.1** The Glossary included with these regulations as **Appendix A**, incorporated here by reference.

### **I-504 SECTION NUMBERING OF ORDINANCE**

**I-504.1** The planning board shall have the authority to assign such section numbers to the Zoning Ordinance as it may deem appropriate provided that no substantive change to the ordinance shall occur as a result of any such renumbering.

### **I-505 AMENDMENTS**

**I-505.1** This Ordinance and the boundaries of the districts shown on the Zoning Map may be amended at any Town Meeting in accordance with the provisions of New Hampshire Revised Statutes Annotated, Sections 675:3 and 675:4, as amended in the laws of 1983.

### **I-506 SEPARABILITY CLAUSE**

**I-506.1** The invalidity of any provisions of the Ordinance shall not affect the validity of any other provision.

### **I-507 REPEALER**

**I-507.1** All ordinances or parts of Ordinances in conflict with this Ordinance are hereby repealed.

### **I-508 WHEN EFFECTIVE**

**I-508.1** The effective date of this Ordinance or any amendments thereof shall be the date of adoption by vote of Town Meeting of such Ordinance or amendment.

**ARTICLE VI -  
MANAGED COMMERCIAL AND CONSERVATION ZONE**

**I-601.1 PURPOSE AND INTENT**

The purpose of the Managed Commercial and Conservation Zone (MCCZ) is to enable compatible development within the portion of the New Boston Air Station (NBAS) located within the municipal boundaries of the Town of Mont Vernon. It is hereby declared that the MCCZ will have the public purposes of enabling development that will contribute to the non-residential tax base of the community while preserving the biodiversity of the overall site.

I-601.1(a) The NBAS site is a diverse natural environment consisting of an unfragmented wildlife habitat that hosts a number of rare, threatened and endangered species;

I-601.1(b) It is in the best interest of the Town and the natural environment to provide for development that will minimize disturbance of the overall site to the greatest practicable extent;

I-601.1(c) These goals are best achieved through zoning that will enable a reasonable use of the property within a smaller contiguous portion of the site, while retaining the overall portion of the site within the Town of Mont Vernon as a singular lot.

**I-601.2 PERMITTED USES**

There are no permitted uses within the NBAS.

**I-601.3 SPECIAL EXCEPTION USES**

The following uses are permitted by special exception in the NBAS:

**I-601.3(a)** Office parks oriented in a campus like design, intended for corporate offices.

**I-601.3(b)** Business and/or professional offices for individual or group practice, including doctors and dentists (including medical and/or dental clinics), lawyers, counseling services, engineers, architects, planners, insurance officers, and accountants.

**I-601.3(c)** Veterinary clinics which may include facilities for overnight boarding or caring of animals provided that such facility shall be designed, constructed and operated in such a manner so as not to be a nuisance to adjacent uses by way of noise or odor.

**I-601.3(d)** Laboratories, office and research facilities.

**I-601.3(e)** Retreat facilities for corporations or other business institutions that provide temporary lodging for visitors who intend to take advantage of the recreational opportunities available on the site.

## **I-601.4**

### **GENERAL REQUIREMENTS**

#### **I-601.4(a) LOT AND YARD REQUIREMENTS**

- (i) All development within the MCCZ shall occur only within the development envelope, defined as an area designated on the Official Zoning Map of the Town of Mont Vernon within the MCCZ where the construction of buildings, structures, parking areas of accessways, or similar improvements is permitted.
- (ii) New buildings, associated structures, and parking areas may be constructed only within the development envelope.
- (iii) The portions of the MCCZ located within the Town of Mont Vernon shall not be further subdivided into additional lots.
- (iv) Structures or units within the development envelope may be leased or sold to other parties provided that legally binding agreements are established that ensure the ongoing maintenance of all infrastructure, natural resources, and to ensure the ongoing compliance of any conditions of approval imposed upon the development. The leasing or sale of any structures or units within the development envelope shall require the approval of the Planning Board to ensure ongoing maintenance obligations.
- (v) The portion of the development envelope that may be covered by buildings, structures, parking areas, and driveways and accessways located thereon shall not exceed seventy percent (70%).
- (vi) All portions of the development envelope which are not proposed as locations for buildings, structures, parking areas or accessways, or similar improvements, shall be suitably landscaped and permanently maintained in such a manner as to minimize storm water runoff.
- (vii) There shall be no minimum road frontage, setback or height requirements for structures located within the development envelope. The Planning Board may limit the size and configuration of building, associated structures and parking areas if it finds that the proposal shall not enable safe access to the site, shall be in contradiction with the management plan for the parcel, or will in any way jeopardize the integrity of natural resources found within the site. In making this finding, the Planning Board may hire consultants at the applicant's expense to review materials submitted in the application.

#### **I-601.4(b) ROADS**

- (i) Access to the development envelope shall be through the existing roadway identified on the zoning map. The roadway constructed to the minimum standards necessary to provide safe access and emergency services to the site for the use(s) proposed.

- (ii) The applicant shall provide a management plan for the maintenance of the roadway during the after construction phases.
- (iii) Any other access to the site shall be for emergency purposes only. The proposed emergency access shall not be accessible to the general public and shall include mechanisms designed to prevent through traffic from the development envelope.

**I-601.4(c) OTHER REQUIREMENTS**

- (i) Any development within the MCCZ shall be subject to site plan review by the Planning Board in accordance with the requirement of this zoning ordinance.
- (ii) The applicant shall provide a management plan that will address the ongoing maintenance of portions of the site that are located within the MCCZ. The Planning Board, based upon a recommendation of the Conservation Commission, in approving the management plan, shall make an affirmative finding that the management plan shall provide for the ongoing maintenance and environmental integrity of the zone. The management plan shall be sufficient in detail as to define activities that can occur outside of the development envelope, and how such activities shall be carried out in a manner consistent with the conservation of the portions of the zone found outside of the development envelope.
- (iii) Any development to occur within the MCCZ shall be conducted in such a manner so as not to adversely affect the biodiversity of the portions of the site located outside of the development envelope. A study shall be conducted by a natural scientist, biologist, or other professional deemed acceptable by the Planning Board that details the affects to wildlife, rare, threatened and endangered species shall be submitted, with proposed mitigation.
- (iv) All development on the site, including the development of the roadway, shall provide the Planning Board with a stormwater management plan that minimizes erosion and sedimentation and maximizes on-site infiltration of stormwater runoff. All stormwater management and erosion control measures shall be designed in accordance with the *Stormwater Management and Erosion and Sediment Control Handbook for Urban and Developing Areas in New Hampshire*., Rockingham County Conservation District, 1992, as amended.
- (v) Any development that occurs within the NBAS shall be treated as a project of regional impact in accordance with RSA 36:54-58.

*[Adopted March 14, 2000]*

## **ARTICLE 7**

### **Floodplain Management**

#### **I-701 - PURPOSE**

Certain areas of the Town of Mont Vernon, New Hampshire are subject to periodic flooding, causing serious damages to properties within these areas. Relief is available in the form of flood insurance as authorized by the National Flood Insurance Act of 1968. Therefore, the Town of Mont Vernon, New Hampshire has chosen to become a participating community in the National Flood Insurance Program, and agrees to comply with the requirements of the National Flood Insurance Act of 1968 (P.L. 90-488, as amended) as detailed in this Floodplain Management Ordinance.

This Ordinance establishes a permit system and review procedure for development activities in the designated flood hazard areas of the Town of Mont Vernon, New Hampshire.

#### **I-702 - ESTABLISHMENT**

This ordinance, adopted pursuant to the authority of RSA 674:16, shall be known as the Town of Mont Vernon Floodplain Management Ordinance. The regulations in this ordinance shall overlay and supplement the regulations in the Town of Mont Vernon Zoning Ordinance, and shall be considered part of the Zoning Ordinance for purposes of administration and appeals under state law. If any provision of this ordinance differs or appears to conflict with any provision of the Zoning Ordinance or other ordinance or regulation, the provision imposing the greater restriction or more stringent standard shall be controlling.

The following regulations in this ordinance shall apply to all lands designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its "Flood Insurance Study for the County of Hillsborough, N.H." dated September 25, 2009, or as amended, together with the associated Flood Insurance Rate Maps dated September 25, 2009 or as amended, which are declared to be a part of this ordinance and are hereby incorporated by reference. (*Amended 8/24/10*)

#### **I-703 - PERMITS**

All proposed development in any special flood hazard area shall require a permit. This ordinance shall be administered by the building inspector.

#### **I-704 - CONSTRUCTION REQUIREMENTS**

The Building Inspector shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is located in a special flood hazard area, all new construction or substantial improvements shall:

- a. be designed (or modified) and adequately anchored to prevent floatation, collapse, or

lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy,

- b. be constructed with materials resistant to flood damage,
- c. be constructed by methods and practices that minimize flood damages,
- d. be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment, and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

#### **I-705 - WATER AND SEWER SYSTEMS**

Where new or replacement water and sewer systems (including on-site systems) are proposed in a special flood hazard area the applicant shall provide the Building Inspector with assurance that these systems will be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and on-site waste disposal systems will be located to avoid impairment to them or contamination from them during periods of flooding.

#### **I-706 - CERTIFICATION**

For all new or substantially improved structures located in special flood hazard areas, the applicant shall furnish the following information to the Building Inspector:

- a. the as-built elevation (in relation to National Geodetic Vertical Datum) of the lowest floor (including basement) and include whether or not such structures contain a basement.
- b. if the structure has been flood proofed, the as-built elevation (in relation to NGVD) to which the structure was flood proofed.
- c. any certification of flood proofing.

The Building Inspector shall maintain the aforementioned information for public inspection, and shall furnish such information upon request.

#### **I-707 - OTHER PERMITS**

The Building Inspector shall not grant a building permit until the applicant certifies that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U. S. C. 1334.

#### **I-708 – WATERCOURSES (or WETLANDS)**

1. In riverine situations, prior to the alteration or relocation of a watercourse the applicant for such authorization shall notify the Wetlands Bureau of the New Hampshire Department of Environmental Services and submit copies of such notification to the Building Inspector, in addition to the copies required by the RSA 482-A: 3. Further, the applicant shall be required to

submit copies of said notification to those adjacent communities as determined by the Building Inspector, including notice of all scheduled hearings before the Wetlands Bureau and the Mont Vernon Planning Board.

2. The applicant shall submit to the Building Inspector certification provided by a registered professional engineer assuring that the flood carrying capacity of an altered or relocated watercourse can and will be maintained.
3. The Building Inspector shall obtain, review, and reasonably utilize any floodway data available from Federal, State, or other sources as criteria for requiring that all development located in Zone A meet the following floodway requirement:

"No encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway that would result in any increase in flood levels within the community during the base flood discharge."

### **I-709 - SPECIAL FLOOD HAZARD AREAS**

1. In Zone A the Building Inspector shall obtain, review, and reasonably utilize any 100-year flood elevation data available from any federal, state or other source including data submitted for development proposals submitted to the community (i.e. subdivisions, site plan approvals).
2. The Building Inspector's 100-year flood elevation determination will be used as criteria for requiring in Zone A that:
  - a. All new construction or substantial improvement of residential structures have the lowest floor (including basement) elevated to or above the 100-year flood elevation.
  - b. That all new construction or substantial improvements of non-residential structures have the lowest floor (including basement) elevated to or above the 100-year flood level; or together with attendant utility and sanitary facilities, shall:
    - (i) be flood proofed so that below the 100-year flood elevation the structure is watertight with walls substantially impermeable to the passage of water;
    - (ii) have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and
    - (iii) be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section.
  - c. All manufactured homes to be placed or substantially improved within special flood hazard areas shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the 100-year flood elevation; and be securely anchored to resist floatation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.
    - (iv) All recreational vehicles placed on sites within Zone A shall either:

- (i) be on the site for fewer than 180 consecutive days;
- (ii) be fully licensed and ready for highway use; or,
- (iii) meet all standards of Article I-703 of this ordinance and the elevation and anchoring requirements for "manufactured homes" in Article I-709 (2) (c) of this ordinance.

A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions.

- e. For all new construction and substantial improvements, fully enclosed areas below the lowest floor that are subject to flooding are permitted provided they meet the following requirements:
  - (i) the enclosed area is unfinished or flood resistant, usable solely for the parking of vehicles, building access or storage;
  - (ii) the area is not a basement; and
  - (iii) shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwater. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or must meet or exceed the following minimum criteria: A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwater.

**I-710 - VARIANCES AND APPEALS**

1. Any order, requirement, decision or determination of the Building Inspector made under this ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.
  2. If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I (b), the applicant shall have the burden of showing in addition to the usual variance standards under state law that:
    - a. the variance will not result in increased flood heights, additional threats to public safety, or extraordinary public expense;
    - b. if the requested variance is for activity within a designated regulatory floodway, no increase in flood levels during the base flood discharge will result; and
    - c. the variance is the minimum necessary, considering the flood hazard, to afford relief.
- The Zoning Board of Adjustment shall notify the applicant in writing that:
    - (vi) the issuance of a variance to construct below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage;

and

b. such construction below the base flood level increases risks to life and property.

Such notification shall be maintained with a record of all variance actions.

4. The community shall:

1 maintain a record of all variance actions, including their justification for their issuance; and

b. report such variances issued in its annual or biennial report submitted to FEMA's Federal Insurance Administrator.

#### **I-711 - SEVERABILITY**

The invalidity of any section or provision of this Ordinance shall not invalidate any other section or provision thereof.

#### **I-712 - ENFORCEMENT**

It shall be the duty of the Board of Selectmen (or their designee) to enforce and administer the provisions of this Ordinance in accordance with RSA 676.

#### **I-713 - DEFINITIONS**

The following definitions shall apply only to this Floodplain Management Ordinance, and shall not be affected by the provisions of any other ordinance of the Town of Mont Vernon.

- (viii) "Area of Special Flood Hazard" is the land in the floodplain within the Town of Mont Vernon subject to a one-percent or greater possibility of flooding in any given year. The area is designated as Zone A on the FHBM or as Zone A on the FIRM.
- (ix) "Base Flood" means the flood having a one-percent possibility of being equaled or exceeded in any given year.
- (x) "Basement" means any area of a building having its floor subgrade on all sides.
- (xi) "Building" - see "structure".
- (xii) "Development" means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavating or drilling operation or storage of equipment or materials.
- (xiii) "FEMA " means the Federal Emergency Management Agency.

- (xiv) "Flood" or "Flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:
  1. the overflow of inland or tidal waters, or
  2. the unusual and rapid accumulation or runoff of surface waters from any source.
- (xv) "Flood Hazard Boundary Map" (FHBM) means an official map of a community, issued by the Administrator, where the boundaries of the flood, mudslide (i.e., mudflow) related erosion areas having special flood hazards have been designated as Zone A.
- (xvi) "Flood Insurance Rate Map" (FIRM) means an official map of a community, on which the Administrator has delineated both the special hazard areas and the risk premium zones applicable to the community.
- (xvii) "Flood Insurance Study" (FIS) means an examination, evaluation and determination of flood hazards and, if appropriate, corresponding water surface elevations, or an examination, evaluation and determination of mudslide (i.e. mudflow) and/or flood-related erosion hazards.
- (xviii) "Floodplain" or "Flood-prone area" means any land area susceptible to being inundated by water from any source (see definition of "Flooding").
- (xix) "Flood proofing" means any combination of structural and non-structural additions, changes, or adjustments to structures that reduce or eliminate flood damage to real estate or improved real property, water and sanitation facilities, structures and their contents.
- (xx) "Floodway" - see "Regulatory Floodway".
- (xxi) "Functionally dependent use" means a use that cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking and port facilities that are necessary for the loading/unloading of cargo or passengers, and ship building/repair facilities but does not include long-term storage or related manufacturing facilities.
- (xxii) "Highest adjacent grade" means the highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.
- (xxiii) "Historic Structure" means any structure that is:
  1. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
  2. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
  3. Individually listed on a state inventory of historic places in states with historic preservation

programs which have been approved by the Secretary of the Interior; or

4. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:

1. by an approved state program as determined by the Secretary of the Interior, or
2. directly by the Secretary of the Interior in states without approved programs.

(xxiv) "Lowest Floor" means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such an enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this ordinance.

(xxv) "Manufactured Home" means a structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on site for greater than 180 consecutive days. This includes manufactured homes located in a manufactured home park or subdivision.

(xxvi) "Manufactured Home Park or Subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

(xxvii) "Mean sea level" means the National Geodetic Vertical Datum (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, or other datum to which base flood elevations shown on a community's Flood Insurance Rate Maps are referenced.

(xxviii) "New construction" means, for the purposes of determining insurance rates, structures for which the start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, new construction means structures for which the start of construction commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.

(xxix) "100-year flood" - see "base flood"

(xxx) "Recreational Vehicle" is defined as:

1. built on a single chassis;
2. 400 square feet or less when measured at the largest horizontal projection;
3. designed to be self-propelled or permanently towable by a light duty truck; and
4. designed primarily not for use as a permanent dwelling but as temporary living quarters for

recreational, camping, travel or seasonal use.

(xxxix) "Regulatory floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height.

(xxxvii) "Special flood hazard area" - see "Area of Special Flood Hazard"

(xxxviii) "Structure" means for floodplain management purposes, a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

(xxxix) "Start of Construction" includes substantial improvements, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or part of the main structure.

(xxxv) "Substantial damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

(xxxvi) "Substantial Improvement" means any combination of repairs, reconstruction, alteration, or improvements to a structure in which the cumulative cost equals or exceeds fifty percent of the market value of the structure. The market value of the structure should equal:

1. the appraised value prior to the start of the initial repair or improvement, or
2. in the case of damage, the value of the structure prior to the damage occurring.

For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. This term includes structures that have incurred substantial damage, regardless of actual repair work performed. The term does not, however, include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

(xxxviii) "Violation" means the failure of a structure or other development to be

fully compliant with the community's flood plain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required under I-706 or I-709(2)(b) of this ordinance is presumed to be in violation until such time as that documentation is provided.

(xxxviii) "Water surface elevation" means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, or other datum, where specified, of floods of various magnitudes and frequencies in the floodplains. *(Added 3/10/09)*

**CHAPTER II**  
**WETLAND ZONING REGULATIONS**  
**FOR THE TOWN OF MONT VERNON**

**ARTICLE I - GENERAL**

**II-101** The Wetland Conservation District is hereby determined to be those areas identified and delineated as poorly drained or very poorly drained soils and as bodies of water as defined by the current high Intensity Soil Maps for New Hampshire: Standards and Origins and the current U.S. Fish and Wildlife Wetland Plant List which are on file at the Town offices and with the Planning Board. The Wetland Conservation District as herein defined is shown on a map or maps designated as the Town of Mont Vernon Wetland Conservation District Map and is a part of the "zoning Map" of the Town of Mont Vernon, New Hampshire.

**II-102** The Wetland Conservation District shall be considered as overlaying any other Districts established by this Ordinance. Any use permitted in the portions of the Districts so overlaid shall only be permitted subject to all provisions of this Section.

**II-103** In the event an area is incorrectly designated as being poorly drained or very poorly drained soils on the Town of Mont Vernon Wetland Conservation District Map and evidence to that effect is satisfactorily presented to the Town Planning Board, the restrictions contained in this Section shall not apply. Such evidence may be obtained by adequate on-site soil investigation and analysis conducted by a soils scientist qualified in field analysis.

**II-104** The Wetland Conservation District shall additionally include any wetland areas which are identified and delineated as poorly and very poorly drained soils whether or not the same are shown on the aforementioned Town of Mont Vernon Wetland Conservation Map. The Planning Board may, at the developer's sole expense, require the presentation of evidence from a soils scientist chosen by the Planning Board in the event the Planning Board feels the Town of Mont Vernon Wetland Conservation Map is inaccurate.

In all cases where the Wetland Conservation District is superimposed over another zoning district in the Town of Mont Vernon, that district whose regulations are the more restrictive shall apply.

**ARTICLE 2 - PURPOSE**

**II-201** In the interest of public health, convenience, safety and welfare, the regulations of this District are intended to guide the use of areas of land with extended period of high water tables:

**II-201.1** To control building and land uses on naturally occurring wetlands which would contribute to pollution of surface and ground water by sewage.

**II-201.2** To prevent the destruction of natural wetlands which provide flood protection, recharge of ground water supply, and augmentation of stream flow during dry periods.

**II-201.3** To prevent unnecessary or excessive expenses to the Town to provide and maintain essential services and utilities which arise because of inharmonious use of wetlands.

**II-201.4** To encourage those uses that can be appropriately and safely located in wetland areas.

### **ARTICLE 3 - USE REGULATIONS**

#### **II-301 PERMITTED USES**

Any of the following uses that do not result in the erection of any structure or alter the surface configuration by the addition of fill and that are otherwise permitted by the zoning ordinance:

**II-301.1** Forestry - tree farming;

**II-301.2** Agriculture, including grazing, farming, truck gardening and harvesting of crops; but not including stock piling of manure;

**II-301.3** Water impoundments and well supplies, public and private;

**II-301.4** Drainage ways - streams, creeks, or other paths of normal runoff water;

**II-301.5** Wildlife refuge;

**II-301.6** Parks and such recreation uses as are consistent with the purpose and intentions of **II-201** of this section;

**II-301.7** Conservation areas and nature trails;

**II-301.8** Open space as permitted by subdivision regulations and other sections of this ordinance.

#### **II-302 SPECIAL PROVISIONS**

**II-302.1** No septic tank or leach field may be constructed or enlarged closer than seventy-five (75) feet to any wetland.

**II-302.2** Each lot must contain a contiguous non-wetland area sufficient in size and configuration to support all existing and proposed structures and utilities such as wells and septic systems, including a primary and secondary leach field location.

## **ARTICLE 4 - APPLICATION FOR USES WITHIN THE WETLAND CONSERVATION DISTRICT**

**II-401 GRANT OF POWER.** The Planning Board, after proper public notice and public hearing, may grant approval in writing for the following uses within the Wetland Conservation District, the application for such uses being either part of an application otherwise before the Planning Board, or having been referred by the Building Inspector, the Road Agent, the Conservation Commission, or the Health Officer.

### **II-402 USES NOT ALLOWED WITHOUT PLANNING BOARD APPROVAL IN WETLAND CONSERVATION DISTRICT**

**II-402.1** Streets, roads, and other access ways and utility rights-of-way easements including power lines and pipe lines, in existing or proposed lots.

**II-402.2** A use not otherwise permitted in the Wetland Conservation District, which may include the erection of a structure, dredging, filling, draining, or otherwise altering the surface configuration of the land (in compliance with the NH State Dredge and fill Law, RSA 149:84).

### **II-403 CRITERIA FOR CONSIDERATION**

The applicant shall provide the following requirements for Planning Board consideration of approval:

**II-403.1** Evidence that the proposed use will not conflict with the purpose and intentions of Chapter II, Article 2.

**II-403.2** Evidence that the proposed use is otherwise permitted by the Zoning Ordinance.

**II-403.3** Wetlands impact study.

**II-403.4** Compensatory mitigation plan. In keeping with the objective of a “no overall net loss” policy, the applicant shall provide, at a minimum, one to one functional replacement of wetlands, meaning that for each project involving the filling or dredging of wetlands, other wetlands functions must be created or restored so that there is no net loss of values and functions. To the extent available and practicable, compensatory mitigation sites must be in the same watershed as the impacted wetlands.

**II-403.4.(a)** If, in the opinion of the Board, strict compliance with II-403.4 would cause more environmental impact than non-compliance, the Board may, waive the provisions of II-403.4.(a) to the extent it deems necessary to comply with the purpose of this ordinance.

**II-403.5** NH Dept. of Environmental Services approval.

**CHAPTER III**  
**SUBDIVISION REGULATIONS**  
**FOR THE TOWN OF MONT VERNON, NEW HAMPSHIRE**

**March, 1980**

**ARTICLE 1 - AUTHORITY**

**III-101** Pursuant to the authority vested in the Mont Vernon Planning Board by the voters of the Town of Mont Vernon by vote of the Town Meeting, March 9, 1965, and in accordance with the provisions of Chapter 674:35-42 (formerly Chapter 36, Sections 19-29, New Hampshire RSA, 1955), the Mont Vernon Planning Board adopts the following regulations governing the subdivision of land in the Town of Mont Vernon, New Hampshire.

**ARTICLE 2 - DEFINITIONS**

**III-201** The Glossary included with these regulations as **Appendix A**, is incorporated here by reference.

**ARTICLE 3 – PROCEDURE**

**III-301 APPLICATION PROCEDURE**

**III-301.1 Preapplication Preliminary Conceptual Consultation (optional).** As allowed by RSA 676:4-II(a), prior to application, a prospective applicant may opt to schedule a Preliminary Conceptual Consultation (preapplication discussion) with the Board. The purpose of the Preliminary Conceptual Consultation is intended to provide an open forum for discussion of the proposal in conceptual form only and in general terms such as desirability of types of development and proposals under the master plan. Such consultation shall not bind either the applicant or the board and statements made by planning board members shall not be the basis for disqualifying said members or invalidating any action taken. Such discussion may occur without formal public notice, but must occur only at a posted meeting of the Board.

**III-301.2 Preapplication Design Review (required).** As allowed by RSA 676:4-II(b), during Preapplication Review, the Board or its designee shall engage in nonbinding discussions with the applicant beyond conceptual and general discussions which involve more specific design and engineering details; provided, however, that the design review phase may proceed only after identification of and notice to abutters, holders of conservation, preservation, or agricultural preservation restrictions, and the general public as required by RSA 676:4-I(d). The cost of such notice shall be borne by the applicant. Statements made by planning board members shall not be the basis for disqualifying said members or invalidating any action taken.

**III-301.3** Preapplication review shall be separate and apart from formal consideration under RSA 676:4-I, and the time limits for acting under RSA 676:4-I(c) shall not apply until formal application is submitted under RSA 676:4-I(b).

**III-301.4 Application.** The applicant shall be required to present the formal application for a proposed subdivision in two phases: Review for Acceptance and Review for Approval. Prior to scheduling a public hearing, the applicant shall submit a complete Application Form, Administrative Requirements Checklist, Land Access Authorization Form, and Review for Acceptance Checklist to the Planning Board Administrative Assistant. Materials for consideration by the Board shall be submitted twenty (20) days prior to the scheduled hearing at which they will be discussed. Prior to commencement of Review for Approval, the applicant shall submit a Review for Approval Checklist. In cases where revised plans are submitted to the board, a list of revisions will accompany every revised plan.

**Review for Acceptance** is intended to address the suitability of the land being subdivided for septic systems and water supply and overall conceptual approach with respect to the Zoning Ordinances and the Master Plan. During Review for Acceptance, the Board shall determine whether the application is complete. Upon completion of the Review for Acceptance the Board shall vote on whether to accept the application. Acceptance of a proposed subdivision carries no assurance that approval will follow in the Review for Approval phase.

**Review for Approval** is intended to assure that all technical requirements, State approvals, and legal data are submitted as required. Upon completion of the Review for Approval the Board shall vote on whether to approve the application.

### **III-302 REVIEW FOR ACCEPTANCE**

**III-302.1** The Board shall, in the exercise of the authority granted pursuant to NH RSA 674:36, review all proposed subdivisions with a view toward determining the impact that the proposed subdivision will have on various Town services, and to that end, said Board shall also review all such subdivisions with a view toward determining whether such proposed subdivision, if permitted, would create one of the following conditions:

- (a) constitute a scattered or premature subdivision of land as would involve danger or injury to health, safety, or prosperity by reason of the lack of water supply, drainage, transportation, schools, fire department, or other public services;
- (b) necessitate an excessive expenditure of public funds for the supply of such services.

**III-302.2** If after such review, the Board determines that the proposed subdivision would cause either of the aforementioned conditions, then the Board shall so inform the applicant and indicate that the applicant may modify the proposal to avoid the aforementioned conditions and in so doing, the said Board may, considering all the circumstances, specify the extent to which the particular proposed subdivision

may be developed in any given year, as well as establish the minimum duration of time for the total development of such particular subdivision in order to assure harmonious development of the Town. The Board shall state in its records any modifications which it will require in the Review for Acceptance phase, or any reasons for disapproval. A copy of this record shall be sent to the applicant.

**III-302.3** During the Review for Acceptance, the Board shall determine whether the plan has potential regional impact according to NH RSA 36:55, and if so, proceed according to NH RSA 36:57.

**III-302.4** During the Review for Acceptance, the Board shall determine whether and when to schedule a site walk.

**III-302.5** The applicant shall submit a Review for Acceptance Checklist for the Board's review.

### **III-303 REVIEW FOR APPROVAL**

**III-303.1** The Board shall review the plat(s) submitted in the Review for Approval from the point of view of a total project. The applicant shall submit a Review for Approval checklist for the Board's review. Approval by the Board of the submission shall constitute an agreement between the Town and the applicant that subdivision and development of the land in question shall be done as detailed on the final plat(s). Deviation from the approved final plat requires the consent of the Board and submission of 6 paper copies of the plat "as built".

### **III-304 ACTION OF THE BOARD**

**III-304.1** After due notice as required by NH RSA 676:4 I(d), the Board shall hold a public hearing within thirty (30) days of the receipt of the application by the Administrative Assistant of the Board to determine if a submitted application is complete according to the board's regulation and shall vote upon its acceptance. Upon determination by the board that a submitted application is incomplete according to the board's regulations, the board shall notify the applicant of the determination in accordance with RSA 676:3, which shall describe the information, procedure, or other requirement necessary or the application to be complete. The applicant and abutters shall be notified of said hearing in a fashion consistent with NH RSA 676:4 I(d). This hearing shall commence Review for Acceptance of the subdivision plan, not formal approval.

**III-304.2** Upon determination by the board that a submitted application is complete according to the board's regulations, the board shall begin Review for Approval. The Board must act to approve, modify and approve, conditionally approve as provided in RSA 676:4-I(i) and III-304.3 below or disapprove the plat within 65 days of the receipt of the complete submission unless the time for action has been extended an additional ninety (90) days by the Selectmen or unless the applicant has waived the requirement for action within the time periods specified herein and consents to such extension as agreeable to both parties. If the Board fails to act

and has obtained no extension from the Selectmen or waiver from the applicant, then said applicant may obtain from the Selectmen, an order directing the Board to act within 30 days. Failure of the Board to act upon such order of the Selectmen, shall constitute grounds for the Superior Court, upon petition of the applicant, to issue an order approving the application, if the court determines that the proposal complies with existing subdivision regulations and zoning and other ordinances.

**III-304.3** The approved final plat shall be recorded with the Registrar of Deeds by the Planning Board or its agent, Hillsborough County prior to any sale or transfer of land within the subdivision. The recording of such approved plats shall, without further action, modify the official map of the Town of Mont Vernon. Such recording shall not constitute acceptance by the Town of any street, easement, or open space shown thereon. The Board may grant conditional approval of an application, but the plat will not be signed or recorded until all of the conditions have been met. If the applicant has not complied with the conditions of approval within one (1) year, the approval is considered null and void and the applicant must submit a new subdivision application.

**III-304.4** No street or open space will be accepted by the Town until such time as all improvements have been carried out as shown on the final plat, in accord with the requirements of these regulations, subject to any conditions established by the Planning Board at the time of final plat approval and compliance with all state and local regulations applicable thereto. Acceptance shall then take place only upon the acceptance by the Selectmen of the Town of a Warranty Deed to the premises so dedicated.

### **III-305 FOUR-YEAR EXEMPTION**

**III-305.1** Every plat approved by the Planning Board and properly recorded in the Registry of Deeds shall be exempt from all subsequent changes in subdivision regulations and zoning ordinance adopted by any city or town, except those regulations and ordinances which expressly protect public health standards such as water quality and sewage treatment requirements, for a period of 4 years after the date of recording; provided, however, that once substantial completion of the improvements as shown on the plat have occurred in compliance with the approved plat, or the terms of said approval, the rights of the owner or his successor in interest shall vest and no subsequent changes in subdivision regulations or zoning ordinances shall operate to affect such improvements; and further, provided, that:

**III-305.1(a)** Active and substantial development or building has begun on the site by the owner or his successor in interest, in accordance with the approved plat within 12 months after the date of approval, or in accordance with terms of said approval, and, if a bond or other security to cover the costs of roads, drains or sewer is required in connection with such approval, such bond or

other security is posted with the Town at the time of commencement of such development;

**III-305.1(b)** Development remains in full compliance with the public health regulations and ordinances specified in this section; and

**III-305.1(c)** At the time of approval and recording, the plat conforms to the subdivision regulations and zoning ordinances then in effect at the site of such plat. (RSA 674:39)

### **III-306 CERTIFICATE OF FAILURE TO TAKE ACTION**

**III-306.1** The Town Clerk is hereby specified as the Municipal Officer who will issue on behalf of the Board a certificate of failure on the part of the Board to take action on approval or disapproval of the Plat submitted to it, as provided by RSA 676:4 (Supp.).

## **ARTICLE 4 - GENERAL REQUIREMENTS FOR THE SUBDIVISION OF LAND**

The subdivider shall observe the following general requirements and principles of land subdivision.

**III-401** The plan shall conform with Zoning Regulations, the Comprehensive Town Plan, the Official Map, and Historic District Regulations, if and when such are adopted, and any other pertinent state or local laws or regulations.

**III-402** In examining and passing upon a proposed subdivision, the Board may make recommendations to the subdivider relating to earth movement and retention of natural cover in order to preserve the natural beauty of Mont Vernon and its environment.

**III-403** Land of such character that it cannot be safely used for building purposes because of exceptional danger to health, peril from fire, flood or other menace, shall not be platted for residential occupancy, nor for such other uses as may increase danger to health, life or property, or aggravate the flood hazard until appropriate measures have been taken by the subdivider to eliminate such hazards. No natural drainage way shall be obstructed unless adequate means is taken to provide for the runoff.

### **III-404 STREETS** *(Repealed 9/23/08)*

~~**III-404.1** Streets shall be logically related to the topography so as to produce usable lots, reasonable grades and safe intersections in appropriate relation to the proposed use of the land to be served by such streets; where practicable, lots shall be graded toward the ditch line of the streets, where not practicable, adequate provisions shall be made to control the drainage of each lot by an adequate storm water system, subject to the approval of the Selectmen. *(Repealed 9/23/08)*~~

- ~~III-404.2~~ The arrangement of streets in the subdivision shall provide for the continuation of the principal streets in adjoining subdivisions, or for their proper projection when adjoining property is not subdivided and shall be of a width at least as great as that of such existing connecting streets, but in no case less than that required under ~~III-404.3~~ below. *(Repealed 9/23/08)*
- ~~III-404.3~~ No street or highway right-of-way shall be less than fifty (50) feet in width and may be required to be more or less if a greater or lesser street width is warranted in the opinion of the Board. Existing streets may be widened as if they were new streets, with one half of the additional widening to be required on each side. *(Repealed 9/23/08)*
- ~~III-404.4~~ Except where near future connections may be possible, dead-end streets shall not, in general, exceed six hundred (600) feet in length and shall be provided with a turn-around roadway at the closed end with a minimum radius of seventy five (75) feet from the center to the inside edge of the right-of-way. *(Repealed 9/23/08)*
- ~~III-404.5~~ No horizontal curves shall have a center line radius of less than one hundred and fifty (150) feet, except turn-arounds on a dead-end street. For changes in grade exceeding one percent (1%) a vertical curve shall be provided insuring a minimum sight distance of one hundred and fifty (150) feet. *(Repealed 9/23/08)*
- ~~III-404.6~~ Grades of all streets shall conform in general to the terrain and shall, so far as practicable, not exceed ten percent (10%). *(Repealed 9/23/08)*
- ~~III-404.7~~ Intersecting property lines at street intersections shall be joined by a curve of at least twenty five (25) foot radius. *(Repealed 9/23/08)*
- ~~III-404.8~~ Streets should be laid out to intersect as nearly as possible at right angles. No street shall intersect another with an angle of less than sixty (60) degrees. Streets entering opposite sides of another street shall be laid out either directly opposite one another, or with a minimum offset of one hundred twenty five (125) feet between their centerlines. *(Repealed 9/23/08)*
- III-405** Reserve strips of land which, in the opinion of the Board, show intent on the part of the Subdivider to control access to land dedicated or to be dedicated to public use shall not be permitted.
- III-406** The preliminary plan shall show the boundaries of proposed permanent easements for utilities over or on the property wherever topography permits, and the total width of such easements shall not be less than twenty (20) feet centered on the rear lot line with ten (10) feet provided from each lot. Such easements shall have satisfactory access to existing or proposed public ways. Water courses proposed for public control shall have a permanent easement of not less than twenty (20) feet.
- III-407** Areas set aside for parks and playgrounds to be dedicated or to be reserved for the common use of all property owners shall be a covenant in the deed, whether or not as required by the Board, shall be of reasonable size and character for neighborhood

playgrounds or other recreational use and shall be not less in minimum size that one (1) acre for each ten (10) dwelling lots indicated. Indication will be made of the size, location, and landscaping and planting of such areas.

~~III-408~~ Streets which join or are in alignment with streets abutting on neighboring properties shall bear the same name. Names of new streets shall not duplicate nor bear phonetic resemblance to the names of existing streets within the Town of Mont Vernon and shall be subject to the final approval of the Board of Selectmen. *(Repealed 9/23/08)*

~~III-409~~ Lots shall be laid out and graded to eliminate flood or stagnant water pools. No water shall be permitted to run across the street on the surface, but shall be directed into catch basins, if available, or otherwise into ditches, and shall be piped underground in a pipe of not less than eighteen (18) inches in diameter, or such size as may be deemed necessary by the Selectmen and in compliance with State highway specifications. *(Repealed 9/23/08)*

**III-410** It shall be the responsibility of the Subdivider to provide the Board with adequate information to prove that the area of each lot is adequate to permit the installation and operation of individual sewerage disposal system (septic tank and leach field or dry well, but not a cesspool), except where public sewer systems are available, and to prove that the area of each lot is adequate to permit the installation and operation of individual on-lot water systems, except where public or common water systems are available. Compliance will be made in all cases with the New Hampshire Department of Health Regulations titled "The Septic Tank System of Sewerage Disposal", copies of which are on file with the Secretary of the Board.

**III-410.1** Developers of Major and Minor Subdivisions, regardless of lot size, shall provide the Planning Board with copies of any and all information submitted to the NH WS&PCC for subdivision approval.

**III-410.2** High intensity soil surveys for plat layout (including septic system siting and wetland identification) are required. This regulation applies to subdivisions on which an on-site septic tank and leachfield system are to be used for sewerage disposal, and/or where wetland identification is required.

**III-410.3** In addition to any other town and state sewage disposal requirements for local subdivision and site plan reviews, or wetland zoning compliance, the following regulations shall apply:

**III-410.3(a)** Definitions:

(i) The Glossary included with these regulations as **Appendix A**, is incorporated here by reference.

**III-410.3(b)** Ground control shall be marked, by the applicant, both on the site and on the plat map(s). The ground control shall consist of numbered flags, stakes, wall, trees or other easily identifiable points on the property. These points will be well distributed throughout the site at a density of not less than

four (4) points per acre. The numbered points must be identified, by number, on the plat plan. The purpose of this requirement is to provide easy identification for all parties required or interested in examining the site.

**III-410.3(c)** The location of all existing and proposed buildings, accessory buildings driveways, sewer lines, water lines, and public and private roads and driveways on the site, and the general location of such features within 100 feet of its boundaries, shall be indicated on the plat plan.

**III-410.3(d)** High intensity soils (HIS) maps are to be provided for all site plans and for subdivisions, except those defined as "minor subdivisions" per RSA 676:4, III. Additionally, applicants may request the Planning Board to waive this requirement upon recommendation of the Hillsborough County Conservation District (HCCD) (Applicants request waiver of Planning Board, Planning Board requests recommendation of HCCD, Planning Board acts upon HCCD recommendation.)

(i) The HIS maps shall be prepared by a qualified soils scientist.

(ii) A paper copy of the HIS survey shall be provided to the Planning Board. In addition to the soils information provided by the survey, the map shall have on it

- (a) the signature of the qualified soils scientist;
- (b) any qualifying notes made by a soils scientist.

(iii) If a soils classification provided on the HIS map is in dispute, the Planning Board may request an evaluation of the soils designations by the Hillsborough County Conservation District.

**III-410.3(e)** A 4,000 square foot leachfield area or an area two (2) times the required leachfield area (which ever is greater) shall be designated, reserved, and mapped on each lot.

(i) The designated leachfield area must be left open and is not to be used for the siting of any incompatible purpose, including but not limited to a driveway, or structures of any type. Parking areas may be located over the designated leachfield area when chambered systems are to be used.

(ii) The designated leachfield area shall be set back as required in **III-410.3(e)(iv)** from:

- (1) poorly and very poorly drained soils;
- (2) naturally deposited soils which have a seasonal high water table less than six (6) inches from the surface;
- (3) naturally deposited soils which have an impermeable layer closer than two (2) feet to the surface;
- (4) naturally deposited soils which have bedrock less than three (3) feet below the surface;

(5) drainageways, natural or manmade, perennial or intermittent; (6) open drainage structures intended to convey water, intermittently or perennially, including but not limited to roadside ditches, culvert openings, diversions and swales.

(iii) The designated leachfield area is required to be set back from all of the areas specified in **III-410.3(e)(ii)** as follows:

(1) seventy-five (75) feet if the designated leachfield area is entirely located in well drained soils, without a restrictive layer, or well-drained soil with a restrictive layer and slopes of less than eight percent (8%).

(2) one hundred (100) feet if the designated leachfield area is entirely or partially located in somewhat poorly drained soils, moderately well-drained soil, excessively drained soils, or soils with a restrictive layer and slope of eight (>8%) per cent or greater.

(iv) In addition, the designated leachfield area shall be setback one hundred (100) feet from open water bodies and perennial streams.

(v) In areas where the HIS survey indicates bedrock at less than three feet from the surface, sufficient test pits shall be made to ensure that the setback requirements established in **III-410.3(e)(ii)** and **-(iii)** can be met.

(vi) The designated leachfield area may not be placed on areas with finished slopes of over twenty-five percent (25%).

(vii) All septic systems within the Town of Mont Vernon must be designed by a registered professional engineer or a septic designer licensed by the NH WS&PCC.

~~**III-411** Street Construction, including pavement and drainage facilities, curbs and sidewalks, when required, shall be installed and constructed in accordance with the standard specifications of the Town of Mont Vernon and in all cases must be constructed under the supervision of the Selectmen and in compliance with State highway specifications. (Repealed 9/23/08)~~

~~**III-411.1**~~

~~Utility lines within all major subdivisions (Three or more lots) shall be by underground service and the cost of such installation shall be bonded in the same manner as roads. (Adopted 9-24-96) (Repealed 9/23/08)~~

**III-412** Before such approval of a subdivision by the Board, the necessary improvements such as streets, storm drainage, and the extension of public water and sewer lines, etc., shall be guaranteed by the Subdivider by:

**III-412.1** Posting a bond of an amount sufficient to cover the cost of necessary construction.

**III-412.1(a)** If a bond is provided it shall be approved as to form and sureties by the legal counsel of the Town.

**III-412.2** Completing construction of all the agreed upon improvements prior to final approval of the plat by the Planning Board. No lot shall be sold prior to this final approval.

**III-412.3** Constructing all the agreed-upon improvements up to final grade by the Subdivider, and posting of a personal bank book of sufficient amount to cover the cost of completing the improvements.

**III-413** Building on any **Class VI road** shall conform to NH RSA 674:41.  
*(Added March, 1984)*

**III-414** Where strict conformity to the subdivision regulations would cause undue hardship or injustice to the owner of the land, a subdivision plan substantially in conformity with regulations may be approved by the Board, provided the spirit of the regulations, public convenience and welfare may not adversely be affected.

**III-420 STREETS (Public and Private)** Approval of the general development street plan is required before construction of any phase of the plan. The street plan will be designed by a professional engineer in plan, profile, and cross section views every fifty feet (50'). Except as described below, the street plan shall conform to the most current AASHTO's (American Association of State Highway and Transportation Officials) Guidelines for "A Policy on Geometric Design of Highways and Streets", AASHTO's "Guidelines for Geometric Design of Very Low-Volume Local Roads (ADT<400)", and NHDOT's "Standard Plans for Road and Bridge Construction". Any other variation shall be justified by engineering judgment and approved by the Board. *(Adopted 9/23/08)*

**III-420.1** General Considerations: All subdivisions shall have adequate provision for a safe and suitable access to a Class V or better road, or shall make the provisions for the construction and dedication of a Class V or better road, to obtain safe and suitable access to the subdivision. All streets in a subdivision shall conform to the Master Plan, and any and all other Town regulations, and shall compose a safe and convenient system in relation to other existing and planned streets, to the topographic conditions, and to the proposed uses of landed to be served by the street. Existing stonewalls shall be retained where possible or relocated and restored as required by the Board. *(Adopted 9/23/08)*

**III-420.2** Layout: Streets in the subdivision shall provide for the continuation of the principal streets in adjoining subdivisions, or for their proper projection when adjoining property is not subdivided and shall be of a width at least as great as that of such existing connecting streets, but in no case less than that required under **III-420.4** below. Streets should be laid out to intersect as nearly as possible at right angles. No street shall intersect another with an angle of less than

seventy-five degrees (75°). Streets entering opposite sides of another street shall be laid out either directly opposite one another, or with a minimum offset of one hundred twenty-five feet (125') between their centerlines. Where extension of existing roadways is proposed, the existing turnaround shall be removed in its entirety. *(Adopted 9/23/08)*

**III-420.3** Dead-End Streets: Except where near future connections may be possible, streets designed to be dead-end streets shall not exceed one thousand feet (1,000') in length and shall be provided with a turn-around roadway at the closed end with a minimum radius of one hundred feet (100') to the centerline of the road. This shall not preclude the use of hammerheads or other means of providing an adequate turn-around roadway. *(Adopted 9/23/08)*

**III-420.4** Right-of-Way: The minimum width of street right-of-way shall be fifty feet (50') in width and may be required to be more if a greater street width is warranted in the opinion of the Board. Existing street right-of-way may be widened as if they were new streets, with one-half of the additional widening to be required on each side. Intersecting right-of-way lines at street intersections shall be joined by a curve of at least twenty-five foot (25') radius. *(Adopted 9/23/08)*

**III-420.5** Right-of-Way Bounds: Granite bounds shall be installed at each point of curvature (PC), point of tangent (PT) and changes in property at all intersections of street, at all points of change in direction and at any other points the Board deem necessary to designate. External boundaries, right-of-way lines, block corners etc., of a subdivision shall set in the field by bounds. These bounds shall be placed not more than one thousand four hundred feet (1,400') apart in any straight line and at all corners, at each end of all curves, at the point a curve changes its radius, and at all angle points in any line. The bounds shall be of granite, not less than thirty-six inches (36") in length, not less than four inches (4") square, and marked on top with a cross, brass plug, iron rod, or other durable material securely imbedded. Bounds shall be set flush with finished grade. No permanent bounds shall be set until all construction which would disturb or destroy the monuments is completed. There shall be two (2) bounds set at opposite ends of the subdivisions whose tops are at an even foot in reference to the U.S.G.S. Datum Plan where practical, or to an assumed Datum where the preceding is not feasible. All monuments must reference the State Plane coordinate system. *(Adopted 9/23/08)*

**III-420.6** Horizontal Alignment: No horizontal curves shall have a centerline radius of less than one two hundred feet (200'), except turn-arounds on a dead-end street. A minimum tangent of fifty feet (50') is required between reverse curves. AASHTO design guidelines are to be used for determining tangent lengths for superelevated curves. *(Adopted 9/23/08)*

**III-420.7** Vertical Alignment: Grades of all streets shall conform in general to the terrain and shall, so far as practicable, not be less than one percent (1.00%) or to exceed ten percent (10.00%). For changes in grade exceeding one percent (1.00%) a vertical curve shall be provided insuring a minimum sight distance of one hundred

and fifty feet (150'). The maximum grade within one hundred feet (100') on an intersection is not to exceed two percent (2.00%). (*Adopted 9/23/08*)

**III-420.8** Streets Names: All streets shall be named to comply with the provisions of the "Enhanced 911 System" (RSA 106-H:2 and RSA 106-H:10). Streets which join or are in alignment with streets abutting on neighboring properties shall bear the same name. Names of new streets shall not duplicate nor bear phonetic resemblance to the names of existing streets within the Town of Mont Vernon and shall be subject to the final approval of the Board of Selectmen. (*Adopted 9/23/08*)

**III-420.9** Street Signs, Markers, and Markings: The location, type of sign/marker, and street markings shall be in accordance with the Manual on Uniform Traffic Control Devices (MUTCD). All private roads, including driveways serving more than one house lot, shall be signed as 'Private Way – Not Maintained by Town', or alternate verbage as designated by the Planning Board or Board of Selectmen. Required signage shall be in place and clearly visible before any building permits are issued for lots served by the road or driveway. (*Amended 4/13/10*)

**III-420.10** Street Light: Street lights shall be provided if required by the Board. (*Adopted 9/23/08*)

**III-420.11** Guardrail: Guardrail shall be used in locations where the New Hampshire Department of Transportation's typical warrant for guardrail is met and/or as required by the Board. Guardrail shall be metal beam on wood posts, meeting State Specification 606 and, as applicable, State Plans GR-1 through GR-8. All guardrail installation must end safely using a Modified Eccentric Loader Terminal "MELT"-type unit. Flared Energy Absorbing Terminal "FLEAT" or Eccentric Loader Terminal "ELT"-type units may be permitted by the Road Department. (*Adopted 9/23/08*)

**III-420.12** Application for Technical Review: At a regularly scheduled meeting the Planning Board will review the application for completeness and determine its acceptability for further processing. The Board will determine the need for review and special investigative studies, and advise the applicant of the time and the need for financial support from the applicant. The Applicant shall pay those fees and charges, plus the costs of any required publications, costs of posting notices, and the cost of mailing notices of hearings. Failure to pay these costs, as specified, will be valid grounds for termination of consideration of the application. (*Adopted 9/23/08*)

### **III-421 PHASING**

All subdivisions accepted by the Mont Vernon Planning Board after (August 9, 2005) shall be limited as to the availability of building permits, in accordance with the schedule in III-421.1. A first phase will constitute one (1) year from the date of final approval and each subsequent year will constitute a subsequent phase. Applicants may request a waiver of the phasing schedule in writing. The Subdivision Phasing Schedule shall appear on the first page of the Mylar plan, to be recorded at the Registry of Deeds. The building inspector will retain a copy of the Subdivision Phasing Schedule, and grant building permits accordingly.

**III-421.1 SCHEDULE**

'If, in the judgment of the Board, the proposal is likely to have a significant impact on some aspect of the town's ability to provide municipal services, so as to require an excessive expenditure of funds to provide the same, now or in the future, the Board may require the applicant to provide fiscal, environmental or other studies of such impact as may be necessary to enlighten the board as to the consequences of the development. Such studies may be conducted by experts of the board's choosing and the costs for such studies shall be charged against the applicant as an additional fee. If, following the receipt, consideration and review of the required studies, the board concludes that the proposal is going to have an impact on the town's ability to provide municipal services to such a degree as to require excessive expenditure of public funds to provide the same, then the board may either deny such applicant, if they deem the impact too great for the town to endure at this time, or they may impose such reasonable conditions on the approval as are necessary to mitigate or lessen the annual impact of the development on the proposal. To that end, and by the way of example and not by the way of limitation, the planning board may impose a 'phasing' requirement on the application in accordance with the schedule set forth herein, or such other schedule as the facts of the particular application may warrant.'

# Lots in Subdivision	Cumulative Permits				
	Year 1	Year 2	Year 3	Year 4	Year 5

26+ =20% of total, i.e.20%.....40% ..... 60%.....80% ..... 100%

**III-421.2 ACCRUAL**

If a developer chooses to postpone development for any number of years, permits will accrue, provided that in any year no more than two years of accrued phased development occurs. In cases where development has been postponed more than two years, the building inspector shall grant building permits for no more than two accrued phases in one year. For example, a 25-lot subdivision with no permits requested in the first three years shall be limited to 10 per year in years 4 and 5, and 5 in year six. In accordance with NH RSA 674:39, if the first phase of development is not complete after four years from the date of approval, the building inspector will ensure the lots conform to current town regulations.

**III-421.3 CIRCUMVENTION**

In order to insure the intent of this ordinance, no individual, partnership, corporation, or other entity or its related or affiliated entities or in the case of individuals their relatives or persons associated in business, shall circumvent the purposes of phasing by dividing a parcel of land into separate subdivisions or separate forms or names of ownership.

**ARTICLE 5 - PROVISIONS FOR ADEQUATE CONTROL OF SOIL EROSION AND SEDIMENTATION IN THE DEVELOPMENT OF LAND**

**III-501 DEFINITIONS**

**III-501.I** The Glossary included with these regulations as Appendix A is incorporated here by reference.

**III-502 ACTIVITIES REQUIRING A CERTIFIED EROSION AND SEDIMENT CONTROL PLAN**

**III-502.I** A soil erosion and sediment control plan shall be provided for all site plans and for subdivisions, except those defined as "minor subdivisions" per RSA 676:4, III. Additionally, applicants may request the Planning Board to waive this requirement upon recommendation of the HCCD. (Applicants request waiver of Planning Board, Planning Board requests recommendation of HCCD, Planning Board acts upon HCCD recommendation.)

**III-503 EXEMPTIONS**

**III-503.I** A single family dwelling that is not a part of a subdivision of land shall be exempt from these soil erosion and sediment control regulations.

**III-504 EROSION AND SEDIMENT CONTROL PLAN**

**III-504.I** To be eligible for certification, a soil erosion and sediment control plan shall contain proper provisions to adequately control accelerated erosion and sedimentation and reduce the likelihood of excessive storm water runoff from the proposed site, based on the best available technology. Such principles, methods and practices necessary for certification are found in the Erosion and Sediment

Control Design Handbook for Developing Areas of New Hampshire (1981) as amended. Alternative principles, methods and practices may be used with prior approval of the Planning Board.

**III-504.2** Said plan shall contain, but not be limited to:

**III-504.2(a)** A narrative describing:

- (i) the development;
- (ii) the schedule for grading and construction activities including:
  - (1) start and completion date;
  - (2) sequence of grading and construction activities;
  - (3) sequence for installation and/or application of soil erosion and sediment control measures;
  - (4) sequence for final stabilization of the project site.
- (iii) the design criteria for proposed soil erosion and sediment control measures and storm water management facilities.
- (iv) the construction details for proposed soil erosion and sediment control measures and storm water management facilities.
- (v) the installation and/or application procedures for proposed soil erosion and sediment control measures and storm water management facilities.
- (vi) the operations and maintenance program for proposed soil erosion and sediment control measures and storm water management facilities.

**III-504.2(b)** A site plan map at a sufficient scale to clearly show:

- (i) the location of the proposed development and adjacent properties;
- (ii) the existing and proposed final topography including soil types, wetlands, watercourses and water bodies;
- (iii) the existing structures on the project site, if any;
- (iv) the proposed area alterations including cleared, excavated, filled or graded areas and proposed utilities, roads and, if applicable, new property lines, and the general location of proposed structures and driveways.
- (v) the location of and design details for all proposed soil erosion and sediment control measures and storm water management facilities;
- (vi) the sequence of grading and construction activities;
- (vii) the sequence for installation and/or application of soil erosion and sediment control measures;
- (viii) the sequence for final stabilization of the development site.

**III-504.2(c)** Any other information deemed necessary and appropriate by the applicant or requested by the Planning Board or its designated agent.

### **III-505 MINIMUM ACCEPTABLE STANDARDS**

**III-505.1** Plans for soil erosion and sediment control shall be developed in accordance with these regulations using the planning considerations specified on pages 3-1 to 3-3 of the Erosion and Sediment Control Design Handbook for Developing Areas of New Hampshire (1981), as amended. Soil erosion and sediment control plans shall result in a development that: minimizes erosion and sedimentation during construction; is stabilized and protected from erosion when completed; and does not cause off-site erosion and/or sedimentation.

**III-505.2** The minimum standards for individual measures are those in the Erosion and Sediment Control Design Handbook for Developing Areas of New Hampshire (1981), as amended. The Planning Board may grant exceptions when requested by the applicant if technically sound reasons are presented.

**III-505.3** The Soil Conservation Service method as outlined from Appendix 1 of the Erosion and Sediment Control Design Handbook for Developing Areas of New Hampshire (1981), as amended, shall be used in determining peak flow rates and volumes of runoff unless an alternative method is approved by the Planning Board.

### **III-506 ISSUANCE OF DENIAL OF CERTIFICATION**

**III-506.1** The Planning Board shall either certify that the soil erosion and sediment control plan, as filed, complies with the requirements and objectives of this regulation or deny certification when the development proposal does not comply with these regulations.

**III-506.2** Prior to certification, any plan submitted to the municipality may be reviewed by Hillsborough County Conservation District which may make recommendations concerning such plan, provided such review shall be completed within thirty days of the receipt of such plan.

**III-506.3** The Planning Board may forward a copy of the development proposal to the Conservation Commission, other review agency or consultant for review and comment.

### **III-507 CONDITIONS RELATING TO SOIL EROSION AND SEDIMENT CONTROL**

**III-507.1** The estimated costs of measures required to control soil erosion and sedimentation, as specified in the certified plan, may be covered in a performance bond or other assurance acceptable to the Planning Board.

**III-507.2** Site development shall not begin unless the soil erosion and sediment control plan is certified and those control measures and facilities in the plan scheduled for installation prior to site development are installed and functional.

**III-507.3** Planned soil erosion and sediment control measures and facilities shall be installed as scheduled according to the certified plan.

**III-507.4** All control measures and facilities shall be maintained in effective condition to ensure the compliance of the certified plan.

### **III-508 INSPECTION**

**III-508.1** Inspections shall be made by the Planning Board or its designated agent during development to ensure compliance with the certified plan and that control measures and facilities are properly performed or installed and maintained. The Planning Board may require the permittee to verify through progress reports that soil erosion and sediment control measures and facilities have been performed or installed according to the certified plan and are being operated and maintained.

## **ARTICLE 6 - PLAT REQUIREMENTS**

### **III-601 COMPLIANCE WITH REGULATIONS**

**III-601.1** No subdivision of land shall be made, and no land in any subdivision shall be sold or offered for sale or lease, and no street or utility construction shall be started until a final plat, prepared in accordance with the requirements of the regulations, has been approved by the Board, and other required permits have been issued.

**III-601.2** The applicant shall familiarize himself with all State and Town regulations relative to the health, buildings, roads and other pertinent data, so that he is aware of the obligations and standards expected.

### **III-602 CHARACTER OF LAND FOR SUBDIVISION**

**III-602.1** All land to be subdivided shall be, in the judgment of the Board, of such character that it can be used for building purposes without danger to public health or safety, or to the environment. Land subject to periodic flooding, poor drainage, or other hazardous conditions, shall not ordinarily be subdivided. Land with inadequate capacity for sanitary sewage disposal shall not be subdivided. Plats for the subdivision of land shall conform to all regulations of the Board, the Zoning Ordinance and the Water Pollution Control Regulations and other applicable bylaws, ordinances and regulations at both State and Local levels.

### **III-603 LOT LAYOUT**

**III-603.1** The layout of lots shall conform to the requirements of the Zoning Ordinance when in force and shall be appropriate for the intended construction.

### **III-604 PRESERVATION OF EXISTING FEATURES**

**III-604.1** Due regard shall be given to the preservation and protection of existing features, trees, scenic points, brooks, streams, rock outcroppings, water bodies, other natural resources, historic landmarks, stone walls and other significant features.

### **III-605 SUBMISSION DOCUMENT REQUIREMENTS**

**III-605.1** In all cases, any application submitted shall include the names and addresses of the applicant, all abutters as indicated in the Town records not more than twenty (20) days before the filing, and all holders of conservation, preservation, or agricultural preservation restrictions as defined in RSA 47:45, and shall include the name and business address of every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the board.

#### **III-605.1(a) Survey Phase**

- (i) Survey Phase plats may be drawn in pencil. Data may be tentative, but shall be sufficiently clear to show all site conditions. Maps should be at a scale appropriate to the amount of detail required, but not more than one hundred (100) feet to the inch. Five (5) paper print copies shall be submitted with the application.
- (ii) Survey Phase plat(s) and documents shall include at least the following information:
  - (1) Site survey map showing boundary of subdivision area, topography, streams, existing features and foliage lines, existing roads, structures, adjacent development, and soil type by U.S.S.C.S.;
  - (2) Site location map (at scale of municipal base map or official map) showing proposed subdivision in relation to major streets, community facilities, and utilities of the Town;
  - (3) Soils data showing results and locations of percolation tests and test pits undertaken in accordance with the procedures set forth in the following paragraph, unless public sewers are to be used.

The Board may require further detailing of information and additional meetings before advising the applicant to proceed with Preliminary Phase design. All material submitted in the Survey Phase will be included with subsequent Preliminary and Final Phases.

- (iii) Where private individual sewage disposal systems are proposed, the applicant shall perform soils tests with the results to be submitted as part of the Survey Phase and also to be included with subsequent submissions of the Preliminary and Final Phases. The applicant shall arrange to perform such tests under the supervision of the New Hampshire Water Supply and Pollution Control Commission and at locations recommended by its agent, providing percolation tests for each proposed lot. Such tests shall meet all requirements established by both State and local authorities. Additional soils tests, after Final Phase approval when lot boundaries are clearly established, may be required.

### **III-605.1(b) Preliminary Phase**

- (i) The Preliminary plat may be drawn in pencil, and shall be submitted in five (5) paper print copies. Dimensions may be approximate, the data may be tentative, but shall be sufficiently clear to illustrate all conditions and clarify the design requirements for the subdivision plat. Maps shall be at a scale of not more than 100 feet to the inch. The Preliminary plat(s) shall contain at least the following information:
- 2 Name of municipality and subdivision, name and address of the subdivision, name and address of the applicant and designer;
  - 3 Names and addresses of abutting property owners, buildings within 100 feet of the parcel to be subdivided, and intersecting streets and driveways within 200 feet of the subdivision, frontage on existing streets;
  - 4 Location of all existing and proposed buildings;
  - 5 Existing and proposed street right-of-way lines, widths of streets, proposed names of new streets, existing and proposed lots lines;
  - 6 Location of existing and proposed easements, deed restrictions, building setback lines, parks, recreation facilities, conservation trails, and other open space, water courses, large trees, foliage lines and significant natural and man-made features, water mains, sanitary sewers, storm water drainage lines, drainage structures and drainage ways;
  - 7 Existing and proposed plans for telephone, electricity, and gas utilities;
  - 8 Boundaries of Zoning Districts lying within the subdivision, municipal boundary if any, land use designation per zoning, and soil type certification by Hillsborough County Soil Conservation District;
  - 9 A general site location map at the scale of the Official Map or municipal base map, locating exactly the subdivision boundary and proposed streets in relation to at least two existing intersecting streets or other features shown on the Official Map;
  - 10 A statement of conditions of land as to suitability for residential developments;
  - 11 A statement of the work required on existing streets to meet the minimum standards;
  - 12 A statement and contours in sufficient detail to indicate clearly the method of storm water drainage on and off the subdivision;
  - 13 Methods of sanitary sewage disposal and water supply;
  - 14 Soils data shall be required and certified by Hillsborough County Soil Conservation District;
  - 15 Watershed areas and drainage computations;
  - 16 Preliminary street profiles, including cross sections;
  - 17 Approval, as prescribed by law, from any other municipal, State, or Federal agency which may have jurisdiction;
  - 18 Location of fire ponds, if any;
  - 19 Access for fire fighting apparatus.

### **III-605.1(c) Final Phase**

(i) The Final plat shall be in permanent black ink, on a permanent reproducible linen or polyester film (mylar). It shall be filed together with five (5) blue (black) line prints on paper. Sheet sizes shall be in accordance with requirements of the Registrar of Deeds, Hillsborough County. Space shall be reserved on the plat for endorsement by all appropriate agencies. The subdivision plat shall be consistent with the approved Preliminary Phase.

(ii) The plat shall contain the following statement:

"The Subdivision Regulations of the Town of Mont Vernon are a part of this plat, and approval of this plat is contingent on completion of all the requirements of said Subdivision Regulations, excepting only any variances or modifications made in writing by the Board and attached hereto," in addition to at least the following information:

- 1 All data required for Preliminary Phase submission;
- 2 Name and seal of the engineer or land surveyor registered with the State of New Hampshire;
- 3 Final disposition of land into lots, streets, open spaces, drainage courses and any easements running with the land;
- 4 The subdivision plat shall be based on a boundary survey with a maximum error of closure of 1 in 10,000 certified by an engineer or surveyor registered with the State of New Hampshire, distances shall be to the nearest 100th of a foot and bearings to the nearest 10 seconds;
- 5 Stations, radii, curve data and paving widths for proposed streets;
- 6 Lot dimensions, areas in square feet and acres, consecutive numbering of lots;
- 7 Accurate locations of all easements, either on or off the site;
- 8 A written acknowledgment of the applicant's responsibility for maintenance, and the assumption by him of liability for injuries and damages that may occur on any land to be dedicated for public use, until such land has been legally accepted by the Town;
- 9 Names of proposed streets as approved by the Selectmen;
- 10 Accurate locations of all monuments to be set at street intersections, points of curvature and tangency of curved streets and at angles of lots;
- 11 Existing and proposed contours at five (5) foot intervals;
- 12 Existing and proposed plans for telephone, electricity, and gas utilities;
- 13 Proposed methods of sanitary sewerage and computations therefor;
- 14 Proposed storm drainage accompanied by a drainage analysis map and computations for the entire watershed area;
- 15 Methods of supplying water;
- 16 Final street profiles.

(iii) If the subdivision abuts a State highway, or if a proposed street intersects a State highway, a written statement from the New Hampshire Department of Transportation and approving any proposed driveway or street access with such State highway. If a subdivision is to be served by public water supply or by public sewers, a statement from the municipal department or company involved, attesting to the availability of such service.

(iv) The Final plat shall contain a volume and page reference sufficient to indicate the subdivider's derivation of title in the event only one parent tract is involved, and if the subdivision constitutes an assemblage of several tracts, the plat shall contain a title reference of each and indicate where each of the lots is situated with reference to the assembled tracts. All lots shall be numbered so as to coincide with the Town of Mont Vernon Tax Map numbers by parent tract numbers.

(v) No approved lot shall be conveyed nor shall a building permit be issued until all angles of the boundaries of such lots are marked by boundary markers of granite. Offset markers may be used where natural or historical obstructions require.

(vi) The markers must be certified as set as specified on the Final plat by registered land surveyor.

(vii) The Final plat shall be submitted to the Planning Board in a **.dxf** and **.DWG** format. *(Adopted 5-12-1998)*

(viii) All subdivisions that have four or more lots shall be recorded and tied into **NAD 83** State Plane Coordinates, using two valid points on the property lines. *(Adopted 5-12-1998)*

### **III-605.2 Legal Data Required**

**III-605.2(a)** When applicable to a specific subdivision, the following are required, in form and substance as approved by the Town Counsel prior to approval of a subdivision plat:

- (v) Agreement to convey to the Town land to be used for streets and other public purposes, with transfer of title to such interests to be effective on such date as the Town accepts such land;
- (vi) Covenants which shall include a definitive statement of the method of ownership of the common land be equitably apportioned to individual owners for his/her lot/unit and common land;
- (vii) Covenants permanently restricting the common land or open space from any future subdivision;
- (viii) Easements and rights-of-way over property to remain in private ownership;
- (ix) Rights to drain onto or across other property, whether public or private, including a street.

**III-605.2(b)** Deeds covering any land to be used for public purposes, easements, rights-of-way over property to remain in private ownership, right to drain onto or across private property shall be submitted to, and approved by the Board of Selectmen with the approval of Town Counsel, the Road Commission, and/or any other appropriate agency.

**III-605.2(c)** All documents required hereunder shall be submitted in final, executable, recordable form satisfactory to Town Counsel as part of the Final Phase.

## ARTICLE 7 -IMPROVEMENT CONSTRUCTION REQUIREMENTS

**III-701** The following improvements shall be installed and constructed by the Applicant to the satisfaction of the Selectmen and under their supervision, before submission of the final plat, or the Subdivider shall file a bond to make other suitable arrangements as contained in III-605, prior to approval of the final plat.

**III-702** Temporary stakes along the centerlines of streets shall be driven in the ground to facilitate inspection.

~~**III-703** Monuments of concrete or stone at least four (4) inches on the top and at least thirty-six (36) inches long shall be set at all block corners and at all lot corners. Top of monument must be at least six (6) inches above ground level, but not more than twelve (12) inches above ground level. Monuments of the same description shall be placed on all street right-of-way corners, and at least every five hundred (500) feet along the right-of-way on both sides of the right of way. Two (2) opposite ends of the subdivisions whose tops are at an even foot in reference to the U.S.G.S. Datum Plan where practical, or to an assumed Datum where the preceding is not feasible. (Repealed 9/23/08)~~

~~**III-704** The street shall be constructed in accordance with the following specifications. Right of way and pavement widths requirements may be reduced or enlarged by the Planning Board. (Repealed 9/23/08)~~

~~**III-704.1 (a)** Streets over 600 feet shall be paved to a width of at least 22 feet wide with a four (4) foot shoulder on each side of the paved section before tapering off at a 4:1 slope to width line. (Repealed 9/23/08)~~

~~**III-704.1 (b)** Streets 600 feet and under shall be paved to a width of at least 20 feet wide with a four (4) foot shoulder on each side of the paved section before tapering off at a 4:1 slope to width line. (Repealed 9/23/08)~~

~~**III-704.1 (c)** All connector roads regardless of their length shall be paved to a width of at least 24 feet wide with a four (4) foot shoulder on each side of the paved section before tapering off at a 4:1 slope to width line. (Repealed 9/23/08)~~

~~**III-704.2** The street shall be constructed in accordance with the "Typical Cross Section", on file at the Selectmen's Office, and the following specifications: (Repealed 9/23/08)~~

~~**III-704.2(a)** Removal of all loam, mulch, stumps and other improper street foundation material within the limits of the right of way. In embankment areas suitable foundation material shall be placed on one (1) foot layers and compacted to form a stable subgrade. (Repealed 9/23/08)~~

~~**III-704.2(b)** Ledge and boulders shall be removed to at least eight (8) inches below subgrade and replaced with sand or bankrun gravel. (Repealed 9/23/08)~~

~~III-704.2(c) Proper drainage shall be installed subject to the approval of the Selectmen and the Road Agent. Natural watercourses shall be cleaned and increased in size where necessary to take care of storm run-off. Drainage ditches at least eighteen (18) inches in depth at its midpoint below center line grade shall be constructed at the street right of way on both sides of the roadway and so designed as to provide for the proper flow of storm run-off. Culvert pipes consisting of either reinforced concrete or metal, having a minimum size of eighteen (18) inches in diameter, shall be placed with a minimum of eighteen (18) inches of cover to final grade. Culverts in embankments over fifteen (15) feet high shall be of reinforced concrete pipe of the proper class. (Repealed 9/23/08)~~

~~III-704.2(d) Base course gravel shall consist of a minimum of twelve (12) inches of compacted bankrun gravel, free from loam or organic matter. Twenty five per cent (25%) to seventy per cent (70%) shall pass a No. 4 sieve and not more than twelve per cent (12%) of the material passing the No. 4 sieve shall pass the No.200 sieve. No stones or rock fragments will be permitted which cannot be incorporated in a six-(6) inch layer. The base course shall be compacted and graded to proper shape before crushed gravel is placed. (Repealed 9/23/08)~~

~~III-704.2(e) Finish course gravel shall consist of four (4) inches of crushed gravel complying with **Table III-704.2(e)**. (Repealed 9/23/08)~~

**TABLE III-704.2(e)-CRUSHED GRAVEL GRADING REQUIREMENTS**

<b>SIEVE SIZE</b>	<b>% BY WEIGHT PASSING</b>
3"	100
2"	95-100
1"	55-85
No. 4	27-52
No. 200	0-12% passing No. 4

~~III-704.2(f) Pavements shall consist of three (3) inches of hot bituminous pavement, applied in two (2) courses, a two (2) inch base course and a one (1) inch wearing course. The pavement shall be applied by an approved paving contractor in accordance with the State of New Hampshire Standard Specifications for Road and Bridge Construction most recent edition. (Repealed 9/23/08)~~

~~III-704.3 The street shall be graded to the final grade in accordance with the profile and cross section submitted. (Repealed 9/23/08)~~

~~III-704.4 Before final inspection, the developer shall remove all trash from the right-of-way and the center of the turn around and shall repair any damage done to the street, shoulders, etc. Inspections, samples and core test may be taken by the Town of Mont Vernon before final acceptance. (Repealed 9/23/08)~~

**III-705 STREET CONSTRUCTION (Public and Private)** Applicants shall ensure that the roadway, drainage facilities, and all other elements of the roadway are constructed under

the supervision and the approval of the Board of Selectmen, or designated representatives and in compliance with the NHDOT *Standard Specifications for Road and Bridge Construction*. Before final inspection, the developer shall remove all trash from the right-of-way and shall repair any damage done to the street, shoulders, etc. Inspections, samples and core test may be taken by the Town before final acceptance. (Adopted 9/23/08)

**III-705.1 Street Width:** Street shall be paved to a minimum width of at least 20' and will have 4' gravel shoulders on both sides. (Adopted 9/23/08)

**III-705.2 Clearing and Grubbing:** The entire area of each roadway shall be cleared and grubbed of all stumps, brush, roots, boulders, like materials and all trees not intended for preservation, and shall not be used for fill or buried on site. Clearing and grubbing shall conform to Section 201 of the State Specifications. (Adopted 9/23/08)

**III-705.3 Subgrade Preparation:** All loam, humas, soft clay, and other yielding material shall be removed from within the limits of the roadway area to a depth of no less than twenty-four inches (24") below the subgrade grade and/or to a depth that may be required by the Town Engineer. Ledge occurring anywhere in the full cross-section of the roadway must be cleared to a minimum depth of twenty-four inches (24") below the finished surface. Ledge occurring in pipe trenches must be cleared so as to have a gravel cushion at least twelve inches (12") below and on both sides of the pipe. (Adopted 9/23/08)

**III-705.4 Base Course:** The road base course shall be of materials, and at least the widths and thickness, indicated in Figure 1. Crushed gravel shall conform to Pay Item 302.3 in State Specification Section 304. Gravel shall conform to Pay Item 304.2 in State Specification Section 304, except that the maximum size stone shall be three inches (3"). All other provisions of State Specification Section 204 are part of these standards. (Adopted 9/23/08)

**III-705.5 Storm Drainage:** The proposed development shall provide for proper surface drainage so that removal of surface waters will not adversely affect any neighboring properties or the public storm water system and will help reduce flooding, erosion, and sedimentation. The drainage system shall be designed so that the post-development runoff rate does not exceed the pre-development runoff rate. No surface water runoff shall be permitted to run across the roadway but shall be controlled and directed in a system of catch basins, pipes, swales, drainage ways, culverts, or channels to a natural watercourse or existing drainage structures. Where a subdivision is traversed by a watercourse, drainage way, channel, or stream, there shall be provided an easement conforming to the lines of such watercourse. When a proposed drainage system will result in water encroaching on land outside a subdivision, appropriate drainage rights must be secured and indicated on the plan. Where the Board of Selectman determines that the existing downstream, offsite drainage system is substandard, the Planning Board may require the Applicant to improve the drainage system. Construction shall be in accordance with State Specification 603, 604, and 605, and State Plans Standard DR-1, DR-2, DR-3, DR-4, and DR-5. (Adopted 9/23/08)

**III-705.5(a) Drainage Swale:** Drainage swales shall be a minimum of eighteen inches (18”) in depth at its midpoint below center line grade shall be constructed in the street right-of-way on both sides of the roadway and so designed as to provide for the proper flow of storm run-off. *(Adopted 9/23/08)*

**III-705.5(b) Bridge:** Bridges as defined by the State Law (RSA 234:2), are structures of ten feet (10’) or greater in clear span, and shall be designed to MS-18 (HS-20) loading (AASHTO Specifications). The minimum roadway width shall be twenty-four feet (24’). Bridges shall be designed by a professional engineer, and constructed in accordance with that design. *(Adopted 9/23/08)*

**III-705.5(c) Roadway Culverts:** Roadway culverts will be a minimum of eighteen inches (18”) in diameter and so designed as to provide for the proper flow of storm run-off. Material may be new smooth bore corrugated polyethylene pipe (preferred) or new reinforced concrete pipe meeting NHDOT specifications. The minimum depth of cover for a culver shall be thirty-six inches (36”) of cover from top of pipe to finished grade. Bedding shall be three-quarter inch (3/4”) crushed stone. Bedding shall be a minimum six inches (6”) depth in earth and twelve inches (12”) in bedrock. Culverts shall be installed with a compatible flared end section firmly attached to the pipe barrel, constructed in accordance with NHDOT specifications. *(Adopted 9/23/08)*

**III-705.5(d) Driveway Culverts:** The location, length, size, bedding, and backfill of all driveway culverts shall be approved by the Road Department prior to construction. Driveway culverts shall be located a minimum of eight feet (8’) off the edge of the roadway pavement. In general, driveway culverts placed in the right-of-ways drainage swale shall be a minimum of eighteen inches (18”) in diameter and so designed as to provide for the proper flow of storm run-off. Material may be new smooth bore corrugated polyethylene pipe (preferred) or new reinforced concrete pipe meeting NHDOT specifications. Culverts shall be installed with a compatible flared end section firmly attached to the pipe barrel, constructed in accordance with NHDOT specifications. *(Adopted 9/23/08)*

**III-705.6 Utilities:** Utility lines within all major subdivisions (three or more lots) shall be underground service and the cost of such installations shall be bonded in the same manner as roads. Utility poles, lines, and appurtenances shall be kept close to the right-of-way line and in no case closer than the road drainage swales. *(Adopted 9/23/08)*

**III-705.7 Asphalt Surface:** Where designated in Figure 1, “Asphalt Surface Treated” surfaces shall be a two-layer Bituminous Surface Treatment in accordance with State Specification Section 410. “Hot Mix” surfaces shall be Hot Bituminous Pavement in accordance with State Specifications Section 403. Widths and thicknesses shall be at least as indicated in Figure 1. *(Adopted 9/23/08)*

**III-705.7 Gravel Shoulders:** Gravel shoulders, and their base course, shall be at least the depths, widths, and thickness indicated in Figure 1. Gravel shall conform to State Specification Section 304.33. All other provisions of State Specification Section 304 are part of these standards. (*Adopted 9/23/08*)

Table 1

<b>Street Geometric Design Standards</b>	
Right-of-Way Width	50 feet
Minimum Grade	1 %
Maximum Grade	10 %
Maximum Grade within 100 feet of an Intersection	2 %
Minimum Angle of Intersection	75°
Minimum Centerline Radii	200 feet
Minimum Angle of Intersection	75°
Rate of Super Elevation (AASHTO Chart)	0.04 feet
Rate of Super Elevation through an Intersection	0.04 feet
Pavement Width	20 feet
Cross Slope of Pavement (Minimum)	2 %
Shoulder Width	4 feet
Cross Slope of Shoulder (Minimum)	5 %
Centerline of Roadway to Drainage Swale	18 feet
Wearing Surface Type (see note 2)	Hot Mix Asphalt
Wearing Surface Thickness	1-1/2"
Wearing Surface Specification	Type C
Pavement Base Thickness	3"
Pavement Base Specification	Type F
Crushed Gravel Thickness	8"
Crushed Gravel Specification (see note 4)	NHDOT 304.3
Gravel Thickness	12"
Gravel Specification (see note 4)	NHDOT 304.3

- Notes:
1. For average daily traffic over 1,000 vehicles/day, paved shoulders should be considered.
  2. Gravel surfaces should be paved where steep grades occur.
  3. "Type" is defined in Section 401 of NHDOT *Standard Specifications for Road and Bridge Construction*.
  4. "NHDOT 304.3" is defined in Section 304 of NHDOT *Standard Specifications for Road and Bridge Construction*.
  5. Gravel base course thickness should be increased in areas of poor soil.

 Typical Street Cross Section

## **ARTICLE 8 -ADMINISTRATION AND ENFORCEMENT**

**III-801** Where the approval of the Planning Board is a necessary pre-requisite for recording of any plat, not covered under these regulations, the Planning Board Chairman and Secretary jointly are hereby empowered to certify that the plat complies with the requirements of these regulations.

### **III-802 VARIANCES**

**III-802.1** Where strict conformity to the Subdivision Regulations would cause undue hardship or injustice to the owner of the land, a subdivision substantially in conformity with the Subdivision Regulations may be approved by the Board, provided that the spirit of the Subdivision Regulations and public convenience and welfare will not be adversely affected.

### **III-803 AMENDMENTS**

**III-803.1** These regulations may be amended or rescinded by the Board, but only following a public hearing on the proposed change. The Chairman or Secretary of the Board shall transmit a record of any changes so authorized to the Registry of Deeds of Hillsborough County.

### **III-804 PENALTY**

**III-804.1** Whoever, being the owner, or agent of the owner of any land located within a subdivision, transfer or sells any land by reference to, or exhibition of, or by other use of, a plat of a subdivision, before such plat has been approved by the Planning Board and recorded or filed in the office of the appropriate Register of Deeds shall forfeit and pay a penalty of one hundred dollars (\$100.00) for each lot or parcel which is transferred or sold; and the description by metes and bounds in the instrument of transfer or other document used in the process of selling or transferring Town, through its solicitor or other official designated by its Selectmen, may enjoin such transfer or sale or agreement and may recover the said penalty by civil action.

### **III-805 SEPARABILITY**

**III-805.1** If any section, provision, portion, clause or phrase of these regulations shall be held to be invalid or unconstitutional by any court or competent authority, such holding shall not affect, impair or invalidate any other section, clause, provision, portion, or phrase of this Ordinance.

## **ARTICLE 9 – SPECIAL FLOOD HAZARD AREAS**

**III-901** For subdivisions and site plans that involve land designated as "Special Flood Hazard Areas" (SFHA) by the National Flood Insurance Program (NFIP):

**III-901.1.** The Planning Board shall review the proposed development to assure that all necessary permits have been received from those governmental agencies from which approval is required by Federal or State law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334.

**III-901.2.** The Planning Board shall require that all proposals for development greater than 50 lots or 5 acres, whichever is the lesser, include Base Flood Elevation (BFE) data within such proposals (i.e. floodplain boundary and 100-year flood elevation).

**III-901.3** The Planning Board shall require the applicant to submit sufficient evidence (construction drawings, grading and land treatment plans) so as to allow a determination that:  
all such proposals are consistent with the need to minimize flood damage;  
all public utilities and facilities, such as sewer, gas, electrical, and water systems are located and constructed to minimize or eliminate flood damage; and,  
adequate drainage is provided so as to reduce exposure to flood hazards.

**CHAPTER IV**  
**NON-RESIDENTIAL SITE PLAN REVIEW REGULATIONS**  
**TOWN OF MONT VERNON, NEW HAMPSHIRE**

**ARTICLE 1-AUTHORITY**

**IV-101** Pursuant to the authority vested in the Mont Vernon Planning Board by the voters of the Town of Mont Vernon in accordance with the provisions of 674:43, 44, I, II; and 675:8 New Hampshire Revised Statutes Annotated, as amended in the laws of 1983, the Mont Vernon Planning Board adopts the following rules governing the review of non-residential site plans in the Town of Mont Vernon, New Hampshire. These rules shall be entitled "Non-Residential Site Plan Review Regulations, Town of Mont Vernon, New Hampshire".

**ARTICLE 2-SUBMISSION ITEMS; SITE DEVELOPMENT PLAN AND SUPPORTING DATA**

**IV-201** Prior to the submission of the site development plan the applicant will submit a preliminary sketch showing any preliminary information he desires to the Planning Board for discussion purposes only. On formal submission of the site development plan, the applicant shall submit three (3) sets of site plan maps and supporting data to the Planning Board which shall include the following information:

**IV-201.1 Existing Data and Information**

**IV-201.1(a)** Location of site, names and addresses of owners of record and abutting land owners.

**IV-201.1(b)** Name and address of persons or firms preparing the map, the scale of the map (1"= 40' suggested), north arrow and date. Such map shall be prepared by a registered land surveyor or registered professional engineer. Name and address of persons or firms preparing other data and information, if different from the preparer of the map.

**IV-201.1(c)** The boundary lines of the area included in the site, including angles or bearings of the lines, dimensions and the lot area.

**IV-201.1(d)** The existing grades, drainage systems, structures and topographic contours at intervals not exceeding 2-feet with spot elevations where grade is less than 5%, otherwise not exceeding 5-foot contour intervals.

**IV-201.1(e)** The shape, size, height, and location of existing structures located on the site and within 200-feet of the site.

**IV-201.1(f)** Natural features such as streams, marshes, lakes or ponds. Manmade features such as, but not limited to, existing roads and structures. Such map shall indicate which of such features are to be retained and which are to be removed or altered.

**IV-201.1(g)** Use of abutting properties shall be identified with approximate location of the structures thereon including access roads.

**IV-201.1(h)** The size and location of all existing public and private utilities and all existing landscaping. This shall include the location and size of existing public utilities that are located off-site with which connection is planned or located within 100-feet of the site.

**IV-201.1(i)** A vicinity sketch (suggested scale 1"=500') showing the location of the site in relation to the surrounding public street system. The zoning districts and boundaries for the site and within 1,000-feet of the site shall be shown.

**IV-201.1(j)** The Final plat shall be submitted to the Planning Board in a **.dxf** and **.DWG** format. *[Adopted 5-12-98]*

**IV-201.1(k)** All non-residential site plans shall be recorded and tied into NAD 83 State Plane Coordinates, using two valid points on the property lines. *[Adopted 5-12-98]*

#### **IV-201.2 Proposed Plan and Information**

**IV-201.2(a)** The proposed grades, drainage systems, structures and topographic contours at intervals not exceeding 2-feet with spot elevations where grade is less than 5%, otherwise not exceeding a 5-foot contour interval. One hundred year flood elevation line(s), where applicable, shall be included.

**IV-201.2(b)** The shape, size, height, and location of the proposed structures including expansion of existing buildings.

**IV-201.2(c)** Proposed streets, driveways, parking spaces, sidewalks, with indication of direction of travel for one way streets and drives and inside radii of all curves. The width of streets, driveways and sidewalks and the total number of parking spaces shall be shown. In addition, loading spaces and facilities associated with the structures on the site shall be shown.

**IV-201.2(d)** The size and location of all proposed public and private utilities.

**IV-201.2(e)** the location, types and size of all proposed landscaping and screening.

**IV-201.2(f)** Exterior lighting plan and proposed signs to be located on the site.

**IV-201.2(g)** A storm drainage plan including plans for retention and slow release of storm water where necessary and plans for snow removal and storage.

**IV-201.2(h)** A circulation plan of the interior of the lot showing provisions for both auto and pedestrian circulation. An access plan showing means of access to the

site and proposed changes to existing public streets including any traffic control devices necessary in conjunction with the site development plan.

**IV-201.2(i)** Construction drawings including but not limited to pavements, walks, steps, curbing and drainage structures.

#### **IV-201.3 Additional Information**

**IV-201.3(a)** The Planning Board may require such additional other information as it deems necessary in order to apply the regulations contained herein.

### **ARTICLE 3-DESIGN AND CONSTRUCTION REQUIREMENTS**

**IV-301** All design and construction standards shall refer to the items shown and presented on the Proposed Plan and Information.

**IV-301.1** Traffic access to the site from the town streets shall ensure the safety of vehicles and pedestrians.

**IV-301.2** Improvement to existing streets shall include signal devices if necessary because of increased traffic generated by the development.

**IV-301.3** Circulation (vehicle and pedestrian) and parking including loading facilities shall be designed to ensure the safety of vehicles and pedestrians on the site.

**IV-301.4** Landscaping and screening shall be provided with regard to adjacent properties, the public highway and within the site including interior landscaping of large parking areas (over 3 double rows). Seventy-five (75%) percent of all stumpage in "buffer zones", excepting access roads, shall remain intact.

**IV-301.5** Storm drainage of the site shall be designed for a 25-year flood and if the existing drainage system to which the site drainage system will be connected, is inadequate, provisions shall be made for retention and gradual release of storm water in order to meet the 25-year flood demand.

**IV-301.6** Provision shall be made for snow storage during winter months.

**IV-301.7** Provision shall be made for the site to be serviced by necessary utilities which may include water for fire and domestic use, sanitary sewer, electrical and gas.

**IV-301.8** Provision shall be made for adequate and consistent in appearance outdoor lighting.

**IV-301.9** Provision shall be made for protection of natural features.

**IV-301.10** All developments shall meet the standards and requirements included in the town zoning ordinance and subdivision regulations including, but not limited to,

parking, off-street loading, landscaping, signs, location of driveways, erosion, screened service area and exterior lighting.

## **IV-302 SIGNS**

The purpose of this section is to provide for a reasonable uniformity in the site and treatment of signs used to call attention to the existence of a business. The Town does not want such signs to detract from the overall rural character which the Town, through its Master Plan, wants to maintain. This determination will be made by the Planning Board.

**IV-302.1** In the LC Zone a permit is required for signs. On any one lot there may be no more than one (1) common sign identifying a business, a shopping center, or similar group of businesses. Also permitted on the same lot is one (1) sign on the building for each business. The total square footage of sign for each business shall not exceed thirty (30) square feet. No single sign shall exceed thirty (30) square feet.

**IV-302.2** No sign in the LC Zone shall have a height exceeding fifteen (15) feet from ground level to the top of the sign.

**IV-302.3** Only "directory" signs shall be permitted on Route 13 and these must be located at the entrance of the access road. No other signs will be permitted on Route 13. The width of the directory sign shall not be greater than eight (8) feet. Lettering must be uniform in appearance on all directory signs - a single line of block letters, six (6) inches high.

**IV-302.4** Signs shall be constructed and/or maintained in such a way that they do not endanger traffic by obstructing the view of the highway, street, or intersections.

**IV-302.5** Each sign shall be constructed of durable material and shall be maintained in a high state of repair at all times.

**IV-302.6** Only signs advertising an establishment in the Town of Mont Vernon and the general nature of the business or services rendered, shall be permitted.

**IV-302.7** Only permanent signs to advertise a place of business are permitted. The use of movable signs is prohibited. No "Bulletin Board" signs shall be permitted.

**IV-302.8** No neon or tubular signs, flashing, internally lighted, or revolving signs shall be permitted in any district. Signs may be lighted externally. Such lighting shall be shielded so as not to present a hazard to automotive traffic. Individual business signs shall be lighted only during the hours when the establishment is open for business. Directory signs may be lighted 24-hours a day.

**IV-302.9** No sign shall project over any street or sidewalk line.

**IV-302.10** Signs offering property for sale or rent are permitted. No sign advertising property "sold" shall be permitted.

**IV-302.11** Signs shall only be placed on the lot on which the use or establishment being advertised by the sign is being conducted. No sign shall be placed on the highway right-of-way.

**IV-302.12** All signs to be installed in the Town of Mont Vernon shall be reviewed by the Board and approved before a sign permit may be issued. Review shall be done to ensure that the signs preserve and enhance the character of the Town and still serve the needs of the merchants to identify their businesses.

**IV-302.13** The applicant shall adhere to the Town's sign regulations as part of the contractual agreement with his/her tenants. The responsibility for policing the tenants then becomes the responsibility of the applicant.

**IV-302.14** The applicant shall agree in writing that no special attention-getting devices such as pennant strings of flags other than the U.S. or State flags, will appear on any land or building.

**IV-303** Construction requirements shall be in accordance with Standard Specifications for Road and Bridge Construction as published by the State of New Hampshire Department of Transportation provided that alternative provisions may be considered by the Planning Board if submitted by the developer.

**IV-304** Provision shall be made to assure that the proposal is consistent with the need to minimize flood damage, that all public utilities and facilities, such as sewer, gas, electrical, and water systems are constructed and that adequate drainage is provided so as to reduce exposure to flood hazards. Design provisions shall also be made to minimize or eliminate infiltration of floodwaters in to new or replacement water supply systems and/or sanitary sewage systems and discharges from these systems into flood waters. On site waste disposal systems shall be located so as to avoid impairment of them or contamination from them during flooding.

#### **ARTICLE 4-OCCUPANCY AND BONDING**

**IV-401** The Planning Board may require a performance bond before any work commences on a development for that portion of the development that, if not properly completed, will have an adverse effect on adjoining property or has a potential for erosion. The steps for issuing and releasing a performance bond shall be the same as required in the subdivision regulations including but not limited to, determining the amount, sufficiency, term and form of the bond. No development may be occupied or used unless a certificate of occupancy has been issued by the Building Inspector. The Building Inspector shall not issue such certificate of occupancy until these regulations have been complied with and the improvements made or a performance bond provided to the town for unfinished improvements.

#### **ARTICLE 5-DEFINITIONS**

**IV-501** The Glossary included with these regulations as **Appendix A**, is incorporated here by reference.

## **ARTICLE 6-PROCEDURE FOR PLANNING BOARD REVIEW**

### **IV-601 Preliminary Consultation and Review**

**IV-601.1** All prospective applicants for Non-Residential Site Review shall request a preliminary consultation and review with the Board for the purpose of discussing the basic concept of the proposal and to assist in the resolving of problems which may arise with the applicant's meeting the requirements for final consideration. Any such consultation and review shall be understood to be preliminary in nature and shall not bind either the applicant or the Board. It is to the advantage of the applicant and the Town to jointly consider the proposed use so as to achieve the objectives of the Town's Master Plan as well as to satisfy the requirements of these Regulations and the Zoning Ordinance of the Town of Mont Vernon.

**IV-601.2** Such consultation and review shall occur only at a duly noticed public meeting of the Board.

**IV-601.3** A written request for such consultation and review shall be submitted by the applicant no less than fifteen (15) days prior to the date of the meeting at which the proposal is to be discussed.

**IV-601.4** The applicant shall provide along with such written request, the following, so as to allow the Board to become familiar with the applicant's proposal:

**IV-601.4(a)** a written description of the proposed permitted use;

**IV-601.4(b)** a conceptual plan or sketch map of the proposed use. Said plan or map need not conform to any of the requirements for final plan, however, it should include sufficient detail so as to be useful for discussion purposes;

**IV-601.4(c)** such other information as the applicant deems necessary to convey the intent and purpose of said (proposed) permitted use.

**IV-601.5** The Board in conducting such preliminary consultation and review shall act in an advisory capacity and discussion shall be limited to the appropriateness of the use as proposed. The Board may request such additional information as may be necessary to allow further consideration of the proposal in the form of a completed final application.

**IV-601.6** The Board shall record in the minutes of the meeting of the preliminary consultation any modifications which it will require in the applicant's proposal, a listing of such additional information that it shall require for further consideration of the proposal, or any reason for disapproving the plan as proposed. A copy of this record will be available.

## **IV-602 Final Application**

**IV-602.1** A final written application for approval of a use requiring Non-residential Site Review shall be filed with the Planning Board by the owner of the property upon which the use is proposed, or his authorized agent.

**IV-602.2** Such application shall be filed not less than fifteen (15) days prior to the date of duly noticed public meeting of the Board at which the application is to be formally submitted.

**IV-602.3** The application shall be accompanied by all required submission materials as herein defined in these Regulations.

**IV-602.4** The application shall include those items specified in **IV-603.1** of these Regulations as being necessary to allow the Board to fulfill the notification requirements of these Regulations.

## **IV-603 Notification Requirements**

**IV-603.1** The applicant shall provide the following:

**IV-603.1(a)** a list of the names and addresses of all abutters as indicated in the Town records not more than five (5) days prior to the date of filing and all holders of conservation, preservation, or agricultural preservation restrictions as defined in RSA 47:45, including the name and business address of every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the board;

**IV-603.1(b)** fee in proper form, as payment in advance for the costs of notifying abutters, all holders of conservation, preservation, or agricultural preservation restrictions as defined in RSA 47:45, and every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the board, and the public pursuant to these Regulations.

**IV-603.2** The Board shall, upon receipt of a request for final approval, notify the applicant and all abutters, holders of conservation, preservation, or agricultural preservation restrictions as defined in RSA 47:45, every engineer, architect, land surveyor, or soil scientist whose professional seal appears on any plat submitted to the board by certified or registered mail, return receipt requested, as to the time, date, place and purpose of the meeting at which said request or application shall be submitted and discussed by the Board. Such notification shall be mailed no less than ten (10) days prior to the date of the public meeting, and shall identify the applicant as well as describe the location and general nature of the proposal.

## **IV-604 Public Hearing**

**IV-604.1** Within thirty (30) days of the date of the meeting at which a completed final application for approval of a use requiring Non-Residential Site Review is formally submitted to and accepted by the Board, the Board shall hold a public hearing on said application.

**IV-604.2** Notice of such public hearing shall be given in accordance with the provisions of Section IV-603.2 of these Regulations.

**IV-604.3** Notice of such public hearing shall also be published in a newspaper having generally circulation within the Town no less than five (5) days prior to the date of the hearing. Notice shall also be posted in at least two (2) public places within the Town.

**IV-604.4** If notice of the public hearing has been included in any prior notice, additional notice by mail shall not be required; however, notice shall be published as specified in **IV-604.3** and shall be posted in at least two (2) public places.

## **IV-605 Review Procedures**

**IV-605.1** Within ninety (90) days of the date of the public meeting at which the Board accepts the application, the Board shall make a decision approving or disapproving the application. The review period may be extended by mutual consent.

**IV-605.2** The Board may approve the application and grant the use provided that all of the requirements set forth in these Regulations and the Zoning Ordinance shall be satisfied. Any other information requested and deemed necessary by the Board shall also be reviewed.

**IV-605.3** In those cases where it is proposed to convert a building or structure originally built or designed for other purposes, the Board in conjunction with the Building Inspector shall determine whether such building is adaptable to the proposed use from the point of view of the public health and safety as well as conformance with the requirements of these Regulations and the Zoning Ordinance of the Town of Mont Vernon.

**IV-605.4(a)** The Board shall attach such conditions to the approval of an application as are, in its opinion, necessary to assure initial and continued compliance with all applicable standards and requirements of these Regulations and to ensure that the purpose and intent of these Regulations and the Zoning Ordinance are fulfilled.

## **IV-605.5 Notice of Decision**

**IV-605.5(a)** Notice of the Planning Board's decision shall be recorded in the minutes of the meeting at which such was taken, and shall be forwarded to the applicant and shall include:

- (i) a statement of the decision approving or disapproving the application, giving reasons for disapproval;
- (ii) a statement of any conditions or limitations which shall be attached to the approval of the application.

## **ARTICLE 7-CONCURRENT AND JOINT HEARINGS**

**IV-701** The Planning Board may hold a hearing on site plan review in conjunction with a subdivision hearing if both are required for a project. A hearing for site plan review by the Planning Board may be held at the same time and place that a hearing for a special exception is held for the project by the Board of Adjustment.

## **ARTICLE 8 WAIVER PROCEDURE**

**IV-801** When a proposed site plan is submitted for approval with regard to an expansion of an existing use, to a new use on a lot containing less than 40,000 square feet in area, the applicant may submit a proposed site plan and request the Planning Board to waive specific requirements for the plan and supporting data. The Planning Board may agree to such requests provided that the Board has determined that such waiver of any requirement will not affect the purpose and intent of these Regulations. This shall not apply to design and construction standards.

## **ARTICLE 9 ADMINISTRATION AND ENFORCEMENT**

**IV-901** The Building Inspector shall make periodic inspections of all permitted uses to determine if said uses are in conformance with these Regulations and the approved plan, including such standards and conditions as may apply. In the event of any non-conformance, the Building Inspector shall certify, in writing, to the Board of Selectmen and the permit holder, the specific non-conforming condition(s) that exist. Such notice shall be mailed to the permit holder by certified or registered mail, return receipt requested. If, within thirty (30) days of the receipt of such notice by the permit holder, said non-conforming condition(s) are not corrected to the terms of the approved plan, the Selectmen shall notify the landowner by mail, return receipt requested, that the approved application is revoked and the permitted use shall cease and desist until such time as the owner of record shall obtain valid approval for said use, pursuant to these Regulations.

**IV-902** The penalty of violations within the Limited Commercial District shall be One Hundred Dollars (\$100) per day, beginning upon receipt of notification of said violation and ending when the violation has been inspected and noted as corrected by the Building Inspector.

**ARTICLE 10 TELECOMMUNICATIONS FACILITY SITE REQUIREMENTS**  
*(Telecommunications Facility Site ordinance adopted March 10, 1998)*

**IV-1001 GENERAL**

**IV-1001.1** In reviewing and approving the site plan, the Planning Board may impose conditions to the extent the Board concludes such conditions are necessary to minimize any adverse impact of the proposed tower or antenna on adjoining properties, and preserve the intent of this ordinance. The following factors are to be considered when reviewing the application:

**IV-1001.1(a)** Height of proposed tower or other structure

**IV-1001.1(b)** Proximity of tower to residential development or zones and schools

**IV-1001.1(c)** Nature of uses on adjacent and nearby properties

**IV-1001.1(d)** Impact on identified historic resources

**IV-1001.1(e)** Surrounding topography

**IV-1001.1(f)** Surrounding tree cover and foliage

**IV-1001.1(g)** Design of the tower, with particular reference to design characteristics that have the effect of reducing or eliminating visual obtrusiveness

**IV-1001.1(h)** Proposed ingress and egress to the site

**IV-1001.1(i)** Availability of suitable existing towers and other structures as discussed in Section **I-306** of the Zoning Ordinance

**IV-1001.1(j)** Visual impacts on viewsheds, ridgelines, open fields and other impacts by means of tower location, tree and foliage clearing and placement of incidental structures

**IV-1001.1(k)** Availability of alternative tower structures and alternative siting locations

**IV-1001.1(l)** New towers shall reserve space for municipal emergency communications equipment as necessary.

**IV-1002 Submission Requirements for Telecommunication Facilities**

**IV-1002.1** Each applicant requesting Site Plan review and approval for a telecommunication facility shall submit a plan in accordance with the requirements of the Zoning Ordinance and the Non-Residential Site Plan Review Regulations, **Chapter IV, Article 6 and I-306**. In addition, the applicant shall submit the following prior to any approval by the Board:

**IV-1002.1(a)** Additional plat information: a scaled elevation view, topography, radio frequency coverage, tower height requirements, setbacks, access drives, parking, fencing, landscaping, and adjacent uses (up to 200 feet away)

- IV-1002.1(b)** Written proof that the proposed use/facility complies with Federal Communications Commission regulations on radio frequency (RF) exposure guidelines
- IV-1002.1(c)** Written proof that an evaluation has taken place, as well as the results of such evaluation, satisfying the requirements of the National Environmental Policy Act (NEPA) further referenced in applicable Federal Communications Commission (FCC) rules
- IV-1002.1(d)** An inventory of existing towers that are within the jurisdiction of the Town and those within two (2) miles of the border of the Town, including specific information about the location, height, design of each tower, as well as economic and technological feasibility for co-location on the inventoried towers. The Planning Board may share such information with other applicants applying for approvals or conditional use permits under this ordinance or other organizations seeking to locate antennas within the jurisdiction of the Town.
- IV-1002.1(e)** Written evidence demonstrating that no existing structure can accommodate the applicant's proposed antenna if the applicant is proposing to build a new tower. This evidence can consist of an analysis of the location, height, strength, potential interference, and co-location costs which would make co-location impractical.
- IV-1002.1(f)** A written agreement with the Town specifying that the applicant agrees to provide for maximum shared use of the facility with other telecommunication providers and with governmental agencies at industry standard lease rates. The applicant shall also provide notice to all commercial carriers in the region that a new facility is to be erected and that an opportunity for co-location exists
- IV-1002.1(g)** A viewshed analysis to include, at minimum, a test balloon moored at the site for the purpose of indicating the visibility of the proposed structure from all abutting streets and other key locations
- IV-1002.1(h)** Engineering information detailing the size and coverage required for the facility location. The Planning Board may have this information reviewed by a consultant for verification of any claims made by the applicant regarding technological limitations and feasibility for alternative locations. Cost for this review shall be paid by the applicant in accordance with RSA 676.4(g).
- IV-1002.1(i)** Any other information deemed necessary by the Planning Board to assess compliance with **Chapter IV Article 2 and I-306** of the Zoning Ordinance.

## IV-1003 Construction Performance Requirements

**IV-1003.1** The guidelines in this section shall govern the location of all towers, and the installation of all antennas. The Planning Board may waive these requirements in accordance with **IV-1005** only if it determines that the goals of this ordinance are served thereby. These requirements shall supersede any and all other applicable standards found elsewhere in Town ordinances or regulations that are less strict.

**Table IV-1003.2 Height Requirements**

Table IV – 1003.2(a)			
	New Tower Construction	Co-location on Existing Tower	Co-location on Existing Structure
Limited Commercial	150 feet	150 feet	Current structure height + ?? feet, not to exceed 150 feet
Residential	150 feet	150 feet	Current structure height + ?? feet, not to exceed 150 feet
Rural Residential	150 feet	150 feet	Current structure height + ?? feet, not to exceed 150 feet
Historic District Overlay	See Section IV-1004 & I-306.5(b) & I-404.3	See Section IV-1004 & I-306.5(b), & I-404.3	See Section IV-1004 & I-306.5(b), & I-404.3

**IV-1003.2(b)** These requirements and limitations shall preempt all other height limitations as determined by the Zoning Ordinance and shall apply only to telecommunications facilities.

### IV-1003.3 Setbacks and Separation

**IV-1003.3(a)** Free-standing towers must be set back a distance equal to 125% of the height of the tower from any off-site residential structure and property line.

**IV-1003.3(b)** Towers and accessory facilities must satisfy the minimum zoning district setback requirements.

**IV-1003.3(c)** Towers over ninety (90) feet in height shall not be located within one mile of any existing tower that is over ninety (90) feet in height.

**IV-1003.3(d)** Tower shall be set back at least 200% of the tower height from the nearest road.

### IV-1003.4 Aesthetics and Lighting

**IV-1003.4(a)** Towers shall maintain a neutral, non-reflective color so as to reduce visual obtrusiveness.

**IV-1003.4(b)** The design of the buildings and related structures at a tower site and antennas and supporting equipment on structures other than a tower shall use materials, colors, textures, screening, and landscaping that will blend the tower facilities with the natural setting and built environment.

**IV-1003.4(c)** Towers shall not be artificially lighted, unless required by the Federal Aviation Administration or other applicable authority. If lighting is required, the Planning Board may review the available lighting alternatives and approve the design that would cause the least disturbance to the surrounding views.

**IV-1003.4(d)** Towers shall not contain any permanent or temporary signs, writing, symbols, or any graphic representation of any kind.

#### **IV-1003.5 Security Fencing**

**IV-1003.5(a)** Towers shall be enclosed by decay-resistant security fencing not less than six (6) feet in height and shall also be equipped with an appropriate anti-climbing device or other similar device to prevent tower access.

#### **IV-1003.6 Landscaping**

**IV-1003.5(a)** Towers shall be landscaped with a buffer of plant materials that effectively screens the view of the tower compound from adjacent residential property. The standard buffer shall consist of a landscaped strip of at least ten (10) feet wide outside the perimeter of the compound.

**IV-1003.5(b)** Natural vegetation is preferred, and existing mature tree growth and natural land forms on the site shall be preserved to the maximum extent possible.

**IV-1003.5(c)** In locations where the visual impact of the tower would be minimal or where natural growth provides a sufficient buffer, the landscaping requirement may be reduced or waived entirely.

#### **IV-1003.7 Building Codes and Safety Standards**

**IV-1003.6(a)** To ensure the structural integrity of towers and antennas, the owner of a tower shall ensure that it is maintained in compliance with standards contained in the Mont Vernon Building Code and the applicable standards for towers that are published by the Electronic Industries Association, as amended from time to time. Failure to bring a tower into compliance within thirty (30) days of notice being provided to the owner by the Town shall constitute abandonment and grounds for the removal of the tower or antenna in accordance with **Chapter IV Article 9 and I-306.7**.

#### **IV-1003.8 Federal Requirements**

**IV-1003.8(a)** All towers must meet or exceed current standards and regulations of the Federal Aviation Administration, the Federal Communications Commission, and any other agency of the federal government with the authority to regulate towers and antennas. Failure to bring towers and antennas into compliance with revised standards and regulations within six (6) months of their effective date shall constitute grounds for the removal of the tower or antenna in accordance with **Chapter IV Article 9 and I-306.7.**

#### **IV-1004 Historic District Restrictions**

Telecommunications facilities within the Historic District shall be located within existing structures and shall have no visual impact.

#### **IV-1005 Waivers**

**IV-1005.1** The Planning Board may waive the requirements of this section where it finds that extraordinary hardships, practical difficulties, or unnecessary and unreasonable expense would result from strict compliance with the foregoing terms, or the purposes of these regulations may be served to a greater extent by an alternative proposal. The purpose of granting waivers under the provisions of this regulation shall be to ensure that an applicant is not unduly burdened, as opposed to merely inconvenienced, by the terms of the ordinance. The Board shall not approve any waiver(s) unless a majority of those present and voting shall find that all of the following apply:

**IV-1005.1(a)** The granting of the waiver will not be detrimental to the public safety, health, or welfare or be injurious to other property and will promote the public interest

**IV-1005.1(b)** The waiver will not, in any manner, vary the provisions of the Town's Zoning Ordinance or Master Plan

**IV-1005.1(c)** The waiver will substantially secure the objectives, standards, and requirements of this ordinance

**IV-1005.1(d)** A particular and identifiable hardship exists or as specific circumstance warrants the granting of a waiver. Factors to be considered in determining the existence of a hardship shall include, but not be limited to:

(i) Topography and other site features

(ii) Availability of alternative site locations

(iii) Geographic location of the property

**IV-1005.1(e)** Size/magnitude of the project being evaluated and availability of co-location

**IV-1101** For non-residential site plans that involve land designated as "Special Flood Hazard Areas" (SFHA) by the National Flood

Insurance Program (NFIP) developers must follow the Subdivision Regulations in III-801.

**CHAPTER V**  
**RSA 155-E**  
**EXCAVATION REGULATIONS**  
**FOR THE TOWN OF MONT VERNON**  
**NEW HAMPSHIRE**  
**ADOPTION VERIFICATION**

**ARTICLE 1 AUTHORITY**

**V-101** These regulations have been adopted by the Mont Vernon Planning Board (regulator) on March 25, 1980 after a duly noticed public hearing held on March 25, 1980.

Planning Board (regulator) certification:

Linda Foster, Chairman  
Jeff Shapira, Secretary  
Bruce Tower, Vice Chairman  
Mary Collins  
Keith Pomeroy  
Beverly Kittle  
Paul Schneiderhan

Filed with Board of Selectmen/City Council:

Filed with Municipal Clerk:

Filed with County Registry of Deeds:

**V-102** These regulations supplement the provisions of RSA 155-E and provide further clarification of the statutory requirements and their application in the municipality of Mont Vernon, New Hampshire. They are adopted as provided in RSA 155-E:11 and 674:36 RSA. Applicants should familiarize themselves with both RSA 155-E and these regulations to be fully informed as to permit requirements.

**ARTICLE 2 DEFINITIONS**

**Abutter.** Any person who owns land within 200 feet of the boundaries of the land under consideration. A way, as defined in RSA 259:1, XXXV, shall not be considered to be a barrier, but shall be included in the distance requirement for purposes of determining whether a person is an abutter. (RSA 672:3, 4, 9-14).

**Applicant.** Owner of the excavation site or the owner's designee.

**Application.** A complete submission of information and plans as required by the statute RSA 155-E, local regulations, and in the excavation permit application.

**Aquifer.** Those areas designated by blue shading or hatching which appear on statewide mapping prepared by the United States Geological Survey entitled: ? "Available of Ground Water . . .".

**Excavation Fee** (RSA 155-E:8). A fee of \$50.00 submitted by the applicant to the regulator, following the public hearing and prior to the issuance of an excavation permit, to defray the cost of processing the application.

**Excavation Permit** (RSA 155-E:8). A permit issued by the regulator allowing the excavation of material at a specific site, in a manner consistent with RSA 155-E and local regulations for the period designated on the permit itself.

**Excavation Permit Application.** A form and associated documents which contain excavation project information. The application must be submitted in duplicate to the regulator and the conservation commission.

**Owner.** An individual or corporation who claims ownership of the land, containing the excavation site, by virtue of a properly executed deed filed at the County Registry of Deeds.

**Permit Fee** (RSA 155-E:11). A fee submitted by the applicant to the regulator, as one of the prerequisites to issuance of an excavation permit, for the purpose of defraying costs associated with permit compliance inspections. The fee is established by the regulator based on the area (acreage) and duration of the excavation permit.

**Pit Agreement.** An agreement between the excavation site owner and the contractor describing the procedure for material excavation (see Section 106.02 of "Standard Specifications for Roads and Bridges" published by the New Hampshire Department of Public Works and Highways).

**Stationary Manufacturing and Processing Plants.** Structural improvements that are permanently placed and that are integral to the grading, crushing, and stockpiling of excavated material.

### **ARTICLE 3 EXCAVATION PERMIT APPLICATION**

**V-301** The applicant shall submit to the regulator and the Conservation Commission the information and documents specified in RSA 155-E:3 and in the Excavation Permit Application.

**V-302** The Application submission shall include:

**V-302.1** The **APPLICATION FORM** containing the owner's name, location of project, abutters' names and addresses, access routes, etc.,

**V-302.2** An **EXCAVATION PLAN** showing the excavation site and the scheme for removal of excavated material,

**V-302.3** A **RESTORATION PLAN** describing the process of site grading and revegetation following completion of the excavation project, and,

**V-302.4** Related permit approvals or **OTHER DOCUMENTS** pertinent to the excavation proposal.

#### **ARTICLE 4 SUBMISSION DOCUMENTS**

**V-401 Excavation Plan.** The Owner/Applicant shall submit a plan describing the specific location and extent of the proposed excavation project. The excavation plan shall include existing topographic and site boundary information compiled and prepared by a Registered Land Surveyor. Other information which must be contained in the plan is:

**V-401.1** proposed topography at the completion of excavation (prior to restoration);

**V-401.2** distances between disturbed areas and closest property lines;

**V-401.3** zoning district(s);

**V-401.4** existing visual barriers to be retained;

**V-401.5** aquifer limits/location as identified by the U.S. Geological Survey;

**V-401.6** lakes, streams, significant natural and man-made features;

**V-401.7** a description of project duration and phasing;

**V-401.8** the names of abutting land owners;

**V-401.9** a photograph(s) of the existing site;

**V-401.10** notations as to excavation site acreage and volumes of material to be removed;

**V-401.11** the location and design of site access roads leading to and from public highways;

**V-401.12** the elevation of the highest annual average groundwater table within or next to the proposed excavation;

**V-401.13** topsoil storage sites during the excavation phase;

**V-401.14** the plan shall be drawn at a scale and contour interval which allows a thorough understanding of project scope. Sectional drawings may be required by the regulator.

#### **V-402 Restoration Plan.**

**V-402.1** Excavation site restoration plans shall be prepared and submitted by all new and existing excavation site owners except as noted in RSA 155-E:2. As required by Chapter

481:3, New Hampshire laws of 1979, the owners of existing excavation operations must perform restoration in compliance with RSA 155-E:5. The regulator shall notify all existing excavation operations owners of their site restoration responsibility. Owners of existing excavation operations shall submit a restoration plan and appropriate bonding to the regulator within six (6) months of their notification. The Excavation Permit Application Form shall be used for this submission.

**V-402.2** The restoration plan shall meet, at a minimum, the requirements set forth in RSA 155-E:5. The character of the restored landscape shall blend with the surrounding natural features. The restored site shall be rendered in a condition that will not preclude its future use in a manner consistent with the zoning ordinance and map.

**V-402.3** The restoration plan shall contain the following information:

**V-402.3(a)** restored topography and drainage at the completion of the restoration phase;

**V-402.3(b)** the phasing of site restoration showing designated areas and completion dates;

**V-402.3(c)** soil conditioning specifications;

**V-402.3(d)** seeding and mulching specifications;

**V-402.3(e)** the plant materials to be used in restoration, their quantities and sizes and;

**V-402.3(f)** sections showing existing, excavated and restored topography configuration.

**V-403** The Planning Board shall ascertain that adequate provisions for public health, safety, and welfare shall be followed.

## **ARTICLE 5 PROJECT SITE REQUIREMENTS**

**V-501** The following site development standards should be incorporated into the site excavation plan and/or conditions for permit approval.

**V-501.I Excavation Site Access Roads.** Access roads leading to and from the excavation site shall intersect existing streets and roads at locations that have been duly approved by state or local officials and in a manner that will not endanger the safety of highway users and local residents. The provisions of RSA 249:17 and 18 ("Highway Access") shall be adhered to by applicant and shall be shown on the excavation plan.

**V-501.2 Traffic Circulation and Truck Routes** (RSA 155-E:3 III) Permit approval shall be conditioned on compliance by the Applicant with street and highway regulations promulgated by Federal, State and local units.

**V-501.3 Excavation Within Aquifer Areas (RSA 155-E:4 VI)**

**V-501.3(a)** No excavation project shall substantially damage any aquifer identified on mapping prepared by U.S. Geological Survey. The regulator shall determine whether or not substantial damage to the aquifer will be incurred by considering the following criteria:

(i) the excavation shall not detrimentally affect the quality of the groundwater contained in the aquifer by directly contributing to pollution or by increasing the long term susceptibility of the aquifer to potential pollutants;

(ii) the excavation shall not cause a significant reduction in the long-term volume of water contained in the aquifer or in the storage capacity of the aquifer.

**V-501.3(b)** The regulator may require that the Applicant provide data or reports prepared by a Professional Engineer or groundwater consultant which assess the potential aquifer damage caused by the proposed excavation project.

**V-501.4 Topsoil Cover:** Prior to the withdrawal of material at a new excavation site, topsoil material shall be stripped and stored for site restoration use when the excavation project is completed. This should be undertaken in a phased manner to minimize erosion potential. Topsoil shall be revegetated during the period of storage.

**V-501.5 Timber Removal:** The applicable New Hampshire statutes and regulations pertaining to forest practice and timber harvesting shall apply to the removal of vegetative cover at excavation site.

**V-501.6 Visual Barriers:** A vegetative or topographical buffer shall be maintained between surrounding streets, highways, commercial and residential land uses and the excavation site. The regulator shall direct the applicant as to specific requirements for the proposed excavation site. To the extent possible, existing barriers should be retained as the excavation project is conducted.

**ARTICLE 6 APPLICATION PROCEDURE**

**V-601 Preparation and Submission.** The applicant shall adhere to RSA 155-E:3 and these regulations during the process of application preparation and submittal. The completed application shall be submitted in duplicate form (one copy to each) to the regulator as well as to the Mont Vernon Conservation Commission. All costs of the Public Hearing shall be borne by the petitioner.

**V-602 Excavation Fee.** An excavation fee of \$50.00 shall be paid to the regulator by the applicant prior to issuance of an excavation permit.

**V-603 Bonding.** The regulator shall establish the amount of the performance bond prior to issuance of the excavation permit. The bond amount shall be adequate to restore the excavation site in accordance with RSA 155-E:5. The bond will be returned to the applicant when restoration work has been completed and a final satisfactory site inspection has been conducted by the regulator.

**V-604 Action on Permit.** Within 20 days of the hearing required in RSA 155-E:7, the regulator shall make a decision to grant or deny the requested permit. Excavation permit approval by the regulator shall be in the form of a memorandum citing all permit issuance conditions, accompanied by a weatherable permit sign depicting the location of the excavation site, the signature(s) of the regulator and the permit expiration date. The permit sign shall be posted in a secured manner at a prominent location near the excavation site. If the application is denied, the owner shall be notified, in writing, by the regulator stating the reasons for the denial.

**V-605 Pit Agreement.** A pit agreement between the owner, the contractor and the governmental unit shall be executed whenever the excavated material is to be used in the construction or modification of Class I, II, III, IV, V highways. A copy of the agreement shall be submitted for acceptance to the regulator. Excavation shall not proceed until the regulator has accepted the pit agreement and has been placed in an assured position that the excavation site will be restored in conformance with RSA 155-E:5. The pit agreement for Class IV and V highway construction projects shall be essentially the same as the pit agreement set forth in Section 106 of "Standard Specifications for Highways and Bridges" prepared by the New Hampshire Department of Transportation.

**V-606 Permit Validity:** The excavation permit shall be valid for a period of 1 year.

## **ARTICLE 7-RENEWAL AND AMENDMENT OF EXCAVATION PERMIT**

**V-701 Permit Renewal:** The applicant may renew the excavation permit and continue excavation operations by making application to the regulator in the manner set forth in Section II of these regulations. The excavation permit application need only describe those information items which have changed in content from the previous application submission. Fees and bonding will be established by the regulator for the renewal period. No application fee shall be charged for renewal of said permit providing the original plan is not altered.

**V-702 Permit Amendment:** If adherence to the permit conditions (including the excavation/restoration plans) cannot be maintained, the owner shall apply to the regulator for a permit amendment. An application shall be completed and submitted to the regulator in a manner similar to that provided in **Section IV** of these regulations.

## **ARTICLE 8-ADMINISTRATION AND ENFORCEMENT**

**V-801 Permit Fee Schedule:** A fee not to exceed \$25.00 for each site visit shall be levied by the regulator. Only these site visits made by the regulator (or its designee) to affirm compliance with the excavation permit conditions and restoration plan shall be counted for this purpose. Said fee shall be set at a Public Hearing and shall be for a period of one (1) year.

**V-802 Enforcement** (also refer to RSA 155-E:10) The penalty for violations shall be the maximum as set by state statutes per day for each violation.

## APPENDIX A

### GLOSSARY

**ABUTTER** "Abutter" means any person whose property adjoins or is directly across the street or stream from the land under consideration by the local land use board. For purposes of receiving testimony only, and not for purposes of notification, the term "abutter" shall include any person who is able to demonstrate that his land will be directly affected by the proposal under consideration. For purpose of receipt of notification by a municipality of the local land use board hearing, in the case of an abutting property being under a condominium or other collective form of ownership, the abutter means the officers of the collective or association, as defined in RSA 356-b:3, XXXIII.

**AGRICULTURAL, FARM AND FARMING** See Farm

**ALTERNATIVE TOWER STRUCTURE** Innovative siting techniques such as artificial trees, clock towers, bell towers, steeples, light poles, and similar alternative design mounting structures that camouflage or conceal the presence of antennas or towers.

**ANTENNA** Any exterior apparatus designed for telephonic, radio, television, personal communications service (PCS), pager network, or any other communications through the sending and/or receiving of electromagnetic waves of any bandwidth.

**APPLICANT/DEVELOPER** The owner of land to be subdivided or developed or his agent or representative as he may authorize by a NOTARIZED STATEMENT SIGNED by the owner of record.

**APPLICATION** Forms as specified by the Mont Vernon Planning Board to be used for application for subdivision and/or site review.

**BOARD** The Planning Board of the Town of Mont Vernon.

**BOUNDARIES** Outside perimeter of lot lines as shown on subdivision and/or existing lots of record.

**BUFFER ZONE** A strip of land along a property line or zone district boundary line which shall be free of any building or use other than natural woody growth, landscaping or screening.

**BUILDING LOT** A lot is a parcel of land occupied or to be occupied by only one main building and the accessory buildings or uses customarily incidental to it. A lot shall be of sufficient size to meet minimum zoning requirements of use, coverage and area, and to provide such yards and other open spaces as are herein required.

**BUILDING AREA** The percentage of lot area or square footage, as applicable, covered by a building exclusive of cornices, eaves, gutters, chimneys, porches without roofs and bay windows. In determining building area, principal and accessory buildings shall be included.

(BUILDING OR STRUCTURE HEIGHT removed by vote of Town Meeting 3-14-2000)

**BUILDING** A structure having a roof, fixed to the land and constructed for the shelter of persons, animals or property.

**BUILDINGS, ACCESSORY** A detached or attached building, the use of which is customarily incidental and subordinate to that of the principal building, such as a utility shed, porch, barn or garage, and which is located on the same lot as that occupied by the principal building. The term "accessory building", when used in connection with a farm, shall include all buildings customarily used for farm purposes.

**CELLAR** A portion of a building, partly or entirely below the finished grade of the ground adjoining the building. A cellar is not deemed a story unless its ceiling is six or more feet above the finished grade at the front of the building.

**CERTIFICATE OF OCCUPANCY** The certificate issued by the Building Inspector which permits the use of a building in accordance with the approved plans and specifications and which certifies compliance with the provisions of law for the use and occupancy of the building in its several parts together with any special stipulations and conditions of the building permit.

**CERTIFICATION** A signed, written approval by the Planning Board for the specific purpose it was requested.

**CLASS VI ROAD** All existing public ways, and shall include all highways discontinued as open highway and made subject to gates and bars, and all highways which have not been maintained and repaired by the town in suitable condition for travel thereon for five (5) successive years or more. (RSA 229:5, VII)

**CO-LOCATION** The use of an existing tower or an existing telecommunications facility, for multiple purposes or users.

**COMMON AREA** Area set aside to be dedicated or to be reserved for common use of all property owners. This may include parks, playgrounds and undeveloped land.

**CONCEPTUAL PLAN** Rough sketches and/or general overview of a proposed subdivision of a parcel of land. A conceptual plan may contain a base map, unscaled sketches and/or United States Geological Survey map of a proposed subdivision.

**CONFORMING USE** A use that is allowed by law or ordinance as subsequently amended which is in accordance with all Zoning Regulations of the Town of Mont Vernon. This shall include uses allowed by law or ordinance that were in existence and legal prior to any change in law or ordinance that would make such uses non-conforming.

**CONSERVATION AREA** An area of land or body of water that has been set aside for the planting of grass or trees, the protection of natural existing flora and fauna with the intent of protecting such from loss or destruction by unnatural forces.

**CONSTRUCTION DRAWINGS** Engineered drawings that have been signed, approved and stamped by a properly certified engineer for the purposes said plans are being used. Construction drawings will be construed as those drawings to be utilized in the final layout of a subdivision or site plan review.

**COUNTY CONSERVATION DISTRICT** Hillsborough County Conservation District ("HCCD")

**DEVELOPMENT** The addition of buildings, structures, or other improvements to land that will permanently alter the character and nature of the land.

**DISCUSSION PHASE** (Survey Phase) First stage, informal non-binding presentation and exchange of information concerning any possible subdivision of land. Abutters not notified.

**DISTURBED AREA** An area where the ground cover is moved, destroyed, altered or removed leaving the land subject to accelerated erosion.

**EARTH MOVEMENT** The movement of sand, gravel, rock, soil or construction aggregate produced by quarrying, crushing, or any other mining activity or such other naturally-occurring unconsolidated materials that normally mask the bedrock.

**ENGINEER** See Registered Professional Engineer

**EROSION** The detachment and movement of sand, gravel, rock, soil or construction aggregate produced by quarrying, crushing or any other mining activity or such other naturally-occurring unconsolidated materials that normally mask the bedrock by water, wind, ice or gravity.

**EXCAVATION REGULATIONS** Regulations as set forth in the Zoning Ordinances of the Town of Mont Vernon in accordance with RSA 155-E.

**EXCAVATION** The removal of sand, gravel, rock, soil or construction aggregate produced by quarrying, crushing and/or other mining activity or such other naturally-occurring unconsolidated materials that normally mask the bedrock and the land area which is used, or has been used, for such commercial taking of earth, including all slopes.

**FARM & HOME PRODUCE** Vegetable, fruits, dairy products and other products that are grown on the land occupied and located in the Town of Mont Vernon.

**FARM** Any land or buildings or structures on or in which agriculture and farming operations are carried on and shall include the residence or residences of owners, occupants, or employees located on such lands. (Also see farming)

**FARMING** All operations of a farm such as the cultivation, conserving and tillage of soil, dairying, greenhouse operations, the productions, cultivation, growing and harvesting, of any agricultural, floriculture, sod or horticultural commodities, the raising of livestock, bees, fur-bearing animals, fresh water fish or poultry, or any practices on the farm as and incident to or in conjunction with such farming operations including, but not necessarily restricted to the following: preparation for market, delivery to storage or to market, or to carriers for transportation to market, of any products or materials from the farm; the transportation to the

farm of supplies and materials, the transportation of farm workers; forestry or lumbering operations; the marketing or selling at wholesale or retail or in other manner any products from the farm and of other supplies that do not exceed in average yearly dollar volume the value of products from such farm.

**FAST FOOD RESTAURANT** A restaurant with drive-up window service, or that otherwise receives payment and/or dispenses products to patrons while in their vehicles (such as a drive-in restaurant).

**FINAL PLAT** A plat plan prepared and certified by a registered surveyor and so stamped that meets all the requirements of the Subdivision and Zoning Regulations of the Town and is in conformance with all standards set by the State of New Hampshire Registry of Deeds. This plan shall be signed by the Board and recorded at the Hillsborough County Registry of Deeds upon final approval of the Board.

**FINAL PHASE** (3rd phase) The point in the subdivision process where all requirements of the Subdivision and Zoning Regulations of the Town have been met and the subdivider is requesting final approval of a Subdivision. Formal application must be approved before this phase.

**FORESTRY** The science of growing trees for the purpose of selling such in the future.

**FORMULA RESTAURANT** Formula Restaurant shall mean a restaurant that stands alone or with other use(s), and which prepares food and beverage on site for sale to the public, and which is required by contractual or other arrangement to offer any of the following: standardized menu, interior and/or exterior color scheme(s), architectural design, signage or similar standardized features, or which adopts a name or food presentation format which causes it to be substantially identical to another restaurant regardless of ownership or location.

**FRONTAGE** The length of the lot bordering on and measured parallel to the centerline of a town or State maintained highway, or a subdivision road approved by the Planning Board.

**GENERAL PURPOSE FARMING** See Farming

**GRADING** The alteration of the lands surface by the movement and/or leveling or alteration of such surface which includes excavating, grubbing, filling or stockpiling of earth materials or any combination thereof.

**GROUND CONTROL** The marking of the land that delineates the character of the land so that the land features and characteristics can be readily identified during various inspection.

**GUY WIRES** A cable used to secure and steady a tower

**HEIGHT** The vertical distance measured from average elevation of the proposed finished ground level to the highest point on the building, tower or other structure, including antennas.  
(Amended 3-14-2000)

**HIGH INTENSITY SOILS MAP** A soils map of a parcel of land being considered for development on a perimeter survey, with a scale of one inch (1") not to exceed one hundred feet (100') where soils are identified and mapped in accordance with the High Intensity Soil Maps for the New Hampshire Standards.

**HIGH INTENSITY SOIL SURVEY** A survey of the soil conditions of a specific parcel of land done in accordance with standards adopted by the Hillsborough County Conservation District or the Rockingham County Conservation District.

**INSPECTION** The periodic review of a subdivision/site that is in process to ensure that it is in conformance with certified plans.

**LIMITED COMMERCIAL** See Zoning

**LOCAL LEGISLATIVE BODY** The Town Meeting form of Government.

**LOT OF RECORD** A lot which is part of a subdivision of record in the office of the County Register of Deeds, or a lot or parcel described by metes and bounds, the description of which has been so recorded.

**LOT** A parcel of land at least sufficient in size to meet the minimum requirements for use, coverage and area and to provide required yards and other open spaces. An undersize lot is permissible if it passes state standards for soil conditions and substantially meets the requirements here and if in existence on the date of adoption of this ordinance.

**MAJOR SUBDIVISION** A subdivision which creates four (4) or more lots for building development purposes.

**MANUFACTURED HOUSING** Any structure, transportable in one or more sections, which, in the traveling mode, is eight (8) body feet or more in width and forty (40) body feet or more in length, or when erected on site, is 320 square feet or more, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to required utilities, which include plumbing, heating, and electrical heating systems contained therein. Manufactured housing as defined in this section shall not include pre-site built housing as defined in RSA 674:31-a.

**MASTER PLAN** The Master Plan of the Town of Mont Vernon.

**MANUFACTURED HOUSING PARKS** Any parcel of land under single or common ownership or control which contains, or is designed, laid out or adapted to accommodate two (2) or more manufactured houses. Nothing herein shall be construed to apply to premises used solely for storage or display of manufactured housing.

**MINOR SUBDIVISION** A subdivision which creates not more than three (3) lots for building development purposes or for proposals which do not involve creation of lots for building development purposes.

**MONOPOLE** Any tower consisting of a single pole, constructed without guy wires or ground anchors.

**MULTI FAMILY** Any structure containing more than one (1) dwelling unit.

**NATURAL DRAINAGE** Seasonal or intermittent run off so diverted by existing natural physical features of the land.

**NATURAL COVER** All natural flora and fauna as it exists prior to any intervention of man.

**NON-RESIDENTIAL SITE/PLAN** See Site Plan

**NON-CONFORMING USE** The use of land, building or premise which is not a use permitted by the provisions of this ordinance for the district in which such land, building or premise is situated.

**OPEN SPACE** Land unencumbered by any parking space, service area, buildings or other substantial structures and designed as open space on a site plan.

**OPEN SPACE (CLUSTER) DEVELOPMENT** A development of single family dwellings that is designed to promote the conservation of the natural and scenic environment of the Town by leaving areas of land open and clustering housing so as to efficiently use the land and minimize the impact on the overall environment and natural setting of the area.

**OUTBUILDING** See Buildings, Accessory

**PERFORMANCE BOND** A bond issued by a Certified Bonding Company so as to ensure a specific phase of a subdivision is completed.

**PLAN** Rendering of a proposed development/improvement drawn to scale.

**PLANNING BOARD** Board as appointed by the BOARD OF SELECTMEN of the Town of Mont Vernon, New Hampshire, pursuant to RSA 673:2.

**PLAT** A map, plan, drawing or chart on which a subdivision of land is shown.

**PREEXISTING TOWERS AND ANTENNAS** Any tower or antenna lawfully constructed or permitted prior to the adoption of this ordinance (*March 10, 1998*). Also, any tower or antenna lawfully constructed in accordance with this ordinance that predates an application currently before the Town.

**PRELIMINARY PHASE** (Design review-2nd phase) Abutters notified, non-binding discussion. Application submitted.

**PRESITE BUILT HOUSING** Any structure designed primarily for residential occupancy which is wholly or in substantial part made, fabricated, formed or assembled in off-site manufacturing facilities in conformance with the United States Department of Housing and Urban Development minimum property standards and local building codes, for installation, or assembly and

installation, on the building site. Presite built housing shall not include manufactured housing, as defined in RSA 674:3I.

**PRIVATE ROAD** A road with the same plan and construction specifications as a public street but not maintained by the town and the ownership is retained by the people who live on the street. *(Added June 22, 2010)*

**QUALIFIED SOIL SCIENTIST** A person licensed by the State of New Hampshire to perform soil evaluations and mapping.

**REGISTERED LAND SURVEYOR** A person licensed by the State of New Hampshire to perform land surveys.

**REGISTERED PROFESSIONAL ENGINEER** A person licensed by the State of New Hampshire as a professional engineer.

**RELATED USE** A land use located on the same lot which is incidental and subordinate to the main building or use of the land.

**RESTAURANT** An establishment where meals and/or beverages are served to customers.

**ROADWAY** The travel portion of any street, whether paved or unpaved, not including unpaved shoulders but including paved breakdown lanes.

**SECONDARY USE** A use of land or of a building or portion thereof which is unrelated to the principal use of the land or building.

**SEDIMENT** Solid material, either mineral or organic, that is in suspension, is transported, or has been moved from its site of origin by erosion.

**SELECTMEN** The Board of Selectmen of the Town of Mont Vernon.

**SET BACK** The distance between the nearest portion of a building and a lot or right-of-way line whichever is closer.

**SINGLE FAMILY RESIDENCE** A residence which stands apart from other buildings, except accessory buildings, and which is used for a residence by a single housekeeping unit, with permanent provision for living, sleeping, eating, cooking and sanitation.

**SITE PLAN** A plan showing the location of all buildings, parking areas, abutters, traffic access and circulation drives, open spaces, landscaping and any other pertinent information that the Board deems necessary in exercising its review of nonresidential, open space (clustered) residential development and multi-unit dwelling site plans in accordance with Chapter 674 of NH Revised Statutes Annotated.

**SOIL EROSION AND SEDIMENT CONTROL** The prevention and control of the erosion of soil and the development of sediment.

**SOIL SCIENTIST** See Qualified Soil Scientist

**SOIL** Any unconsolidated mineral or organic material of any origin.

**STREET** Street, avenue, boulevard, road, highway, freeway and other public ways.

**STRUCTURE** That which is built or constructed for occupancy or use. Structures shall not include stone walls and fences less than six feet in height.

**SUBDIVISION** The division of a lot, tract, or parcel of land into two (2) or more lots, plats, sites, or other division of land for the purpose for immediate or future sale, rent, lease, condominium conveyance or building development. It includes resubdivision and, when appropriate to the context, relates to the process of subdividing or to the land or territory subdivided.

**SURVEY PHASE** See Discussion Phase

**TELECOMMUNICATIONS FACILITIES** Any structure, antenna, tower, or other device that provides commercial mobile wireless services, unlicensed wireless services, cellular phone services, specialized mobile radio communications (SMR), and personal communications services (PCS), and common carrier wireless exchange access services.

**TOWER** A structure that is designed and constructed primarily for the purpose of supporting one or more antennas, including self-supporting lattice towers, guy towers or monopole towers. The term includes radio and television transmission towers, microwave towers, common carrier towers, cellular telephone towers, alternative tower structures, and the like.

**VARIANCE** (674:33) Legal authorization to deviate from a term of the ordinance.

**WAIVER** Release

**ZONING BOARD OF ADJUSTMENT** Board as appointed by the Board of Selectmen pursuant to RSA 673:3.

**ZONING ADMINISTRATOR** Board of Selectmen of the Town of Mont Vernon.

**ZONING ORDINANCE** The Zoning Ordinances of the Town of Mont Vernon.

3  
4 **TOWN OF LYNDEBOROUGH**  
5 **ZONING ORDINANCE**  
6  
7

8 **100.00 PURPOSE AND AUTHORITY**  
9

10 This Ordinance is adopted pursuant to the authority granted by NH RSA 674:16  
11 through 674:21, inclusive.  
12

13 The purpose of this Ordinance is to promote the health, safety, and general welfare of  
14 the residents by preserving the value of buildings; by encouraging the appropriate use  
15 of land throughout the Town of Lyndeborough and by:  
16

- 17 a. securing safety from fire, panic and other danger;
- 18 b. providing adequate light and air;
- 19 c. providing adequate area between buildings and rights-of-way;
- 20 d. preserving the rural character of the community;
- 21 e. promoting good design and arrangement of buildings and land uses;
- 22 f. facilitating the adequate provision of transportation, solid waste facilities,  
23 septic facilities, water, schools, parks, child day care and housing  
24 opportunities for all of its citizens;
- 25 g. wise and efficient expenditures of public funds; and
- 26 j. assuring proper use of natural resources and other public requirements.  
27

28 **101.00 Adoption and Amendments**  
29

30 This Zoning Ordinance was originally adopted at a special Town Meeting on April  
31 14, 1959 and recodified by the voters of the Town of Lyndeborough, New  
32 Hampshire, by Official Town Meeting Ballot vote on March 10, 1998.  
33

34 This ordinance may be amended by an official ballot vote of any legally constituted  
35 Town Meeting provided public notice has been given, public hearings conducted and  
36 adoption is made in accordance with NH RSA 675:2-5, as amended.  
37

38 The Planning Board has the authority to assign such section numbers to the Zoning  
39 Ordinance and Building Code as it may deem appropriate provided that no  
40 substantive change to the Ordinance shall occur as a result of the renumbering.  
41  
42

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

- 43 **200.00**     ***DEFINITIONS***  
44  
45             For the purpose of this ordinance, certain words, terms or phrases shall have the  
46 meaning as stated in this section unless the context clearly indicates otherwise; and  
47  
48             a. words in the present tense include the future;  
49             b. the singular includes the plural and the plural includes the singular; and  
50             c. terms and words not defined in this ordinance shall have the meanings  
51 understood in common usage and as defined in standard American  
52 dictionaries.  
53
- 54 **200.01**     ***Abandonment.*** Where any non-conforming use of a building or structure is  
55 discontinued for more than one year, or where a non-conforming use of land is  
56 discontinued for a period of more than one year, or if the non-conforming use of the  
57 land or building or structure is replaced with a conforming use or building or  
58 structure, then the non-conforming use shall be deemed to be abandoned.  
59
- 60 **200.02**     ***Accessory Dwelling Unit.*** means a residential living unit that is within or attached to  
61 a single-family dwelling, and that provides independent living facilities for one or  
62 more persons, including provisions for sleeping, eating, cooking, and sanitation on  
63 the same parcel of land as the principal dwelling unit it accompanies. (3/13/18)  
64 (recodify 3/16/19)  
65
- 66 **200.03**     ***Accessory Building.*** A detached building located on the same lot as the principal  
67 building or use which is customarily used for purposes incidental and subordinate to  
68 those of the principal building.  
69
- 70 **200.04**     ***Accessory Use.*** Any use which is customary, incidental and subordinate to the  
71 principal use of the structure or lot.  
72
- 73 **200.05**     ***Automobile Graveyard.*** Any lot or portion of a lot which is maintained, used, or  
74 operated for storing, keeping, buying, or selling wrecked, scrapped, ruined,  
75 dismantled or abandoned motor vehicles or motor vehicle parts. (3/9/99), (3/16/19)  
76
- 77 **200.06**     ***Automobile Service Station.*** Any building, land area or other premises, or portion  
78 thereof used for the retail dispensing or sales of vehicular fuels; servicing and repair  
79 of automobiles; and including as an accessory use the sale and installation of  
80 lubricants, tires, batteries and similar vehicle accessories.  
81
- 82 **200.07**     ***Building.*** Any combination of materials, whether portable or fixed, having a roof or  
83 cover which forms a shelter for persons, animals or property.  
84
- 85 **200.08**     ***Dwelling Unit.*** A single unit providing complete independent living facilities for one  
86 or more persons with permanent provisions for living, sleeping, eating, cooking and  
87 sanitation with a minimum of 600 square feet on a permanent foundation with a state  
88 approved septic system and water supply.  
89
- 90 **200.09**     ***Single-Family Dwelling.*** A single building having one dwelling unit.  
91
- 92 **200.10**     ***Two-Family Dwelling.*** A single building containing two attached dwelling units.  
93
- 94 **200.11**     ***Frontage.*** The continuous length of a lot bordering on the public right-of-way.  
95
- 96 **200.12**     ***Home Businesses.*** A business that is incidental and subordinate to the use of the  
97 building or lot for residential purposes in compliance with the criteria established for  
98 home businesses in Section 1200.00. (3/13/18)  
99

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

- 100 **200.13** **Junk.** Pursuant to NH RSA 236:91, old scrap copper, brass, rope, rags, batteries,  
101 paper, trash, rubber debris, waste, or junked, dismantled, or wrecked automobiles, or  
102 parts thereof, iron, steel, and other old or scrap ferrous or nonferrous material.  
103 (3/9/99)  
104
- 105 **200.14** **Junk Yard.** Any lot or portion of a lot which is maintained, operated, or used for  
106 storing, keeping, buying or selling junk, for the maintenance or operation of an  
107 automobile recycling yard, and includes garbage dumps and sanitary fills. (3/9/99)  
108
- 109 **200.15** **Lot or Parcel.** A single area of land defined by metes and bounds or boundary lines  
110 as shown in a recorded deed or on a recorded plan.  
111
- 112 **200.16** **Lot of Record.** Land designated as a separate and distinct parcel in a legally recorded  
113 deed filed in the Hillsborough County Registry of Deeds.  
114
- 115 **200.17** **Manufactured Housing.** Any structure, transportable in one or more sections,  
116 which, in the traveling mode, is 8 body feet or more in width, and 40 body feet or  
117 more in length, or when erected on site, is 320 square feet or more, and which is built  
118 on a permanent chassis and designed to be used as a dwelling with a permanent  
119 foundation when connected to required utilities, which include plumbing, heating and  
120 electrical heating systems contained therein. Manufactured housing does not include  
121 pre-site built housing. (3/9/99)  
122
- 123 **200.18** **Nonconforming Building or Structure.** A building or structure which lawfully  
124 existed prior to the adoption, revision or amendment of this ordinance but which fails  
125 to conform to the current provisions of the ordinance. (3/9/99)  
126
- 127 **200.19** **Nonconforming Lot.** A lot which lawfully existed prior to the adoption, revision or  
128 amendment of this ordinance but which fails to conform to the current provisions of  
129 the ordinance. (3/9/99)  
130
- 131 **200.20** **Nonconforming Use.** A use which lawfully existed prior to the adoption, revision or  
132 amendment of this ordinance but which fails to conform to the current provisions of  
133 the ordinance.  
134
- 135 **200.21** **Retail Store.** An establishment involved in selling goods or merchandise to the  
136 general public for personal or household consumption and rendering services  
137 incidental to the sale of such goods.  
138
- 139 **200.22** **Pre-site Built Housing.** Any structure with a permanent foundation designed  
140 primarily for residential occupancy which is wholly or in substantial part made,  
141 fabricated, formed or assembled in off-site manufacturing facilities in conformance  
142 with the United States Department of Housing and Urban Development minimum  
143 standards and local building codes, for installation, or assembly and installation, on  
144 the building site. Pre-site built housing does not include manufactured housing.  
145 (3/9/99)  
146
- 147 **200.23** **Recreational Vehicle.** A vehicular-type portable structure without permanent  
148 foundation that can be towed, hauled, or driven for recreational use, including but not  
149 limited to travel trailers, truck campers, camping trailers and self-propelled motor  
150 homes. (3/9/99)  
151
- 152 **200.24** **Public Right-of-Way.** All town, state and federal highways and the land on either  
153 side as covered by statutes.  
154
- 155 **200.25** **Seasonal Dwelling.** A dwelling unit that lacks one or more of the basic amenities or  
156 utilities required for all-year or all-weather occupancy, such as hunting and fishing

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

157 camps but not including wheeled recreational vehicles. The dwelling unit may be  
158 less than 600 square feet. The dwelling unit shall not be considered a permanent  
159 residence.  
160

161 **200.26** **Setback.** The minimum distance between two points as prescribed by this ordinance.  
162

163 **200.27** **Sign.** A device or structure, freestanding or attached to a building or structure,  
164 visible to the public from the exterior of a building which contains any combination  
165 of lights, letters, words, objects, graphics, figures, designs, symbols, pictures, logos  
166 or colors which are intended to advertise, identify, direct or convey a message to the  
167 public or to attract attention to an object, person, institution, organization business or  
168 service.  
169

170 **200.28** **Structure.** A combination of materials assembled at a fixed location to give support  
171 or shelter, including buildings, accessory buildings and accessory uses. (3/9/99)  
172

173 **200.29** **Wetland.** Areas delineated as poorly or very poorly drained soils by the U.S.  
174 Department of Agriculture, Soil Conservation Service, in the Soil Survey of  
175 Hillsborough County New Hampshire, Western Part, dated October 1985, and the  
176 Corps of Engineers Wetlands Delineation Manual, Technical Report Y-87-1,  
177 Environmental Laboratory, Department of the Army, 1987 in conjunction with the  
178 Field Indicators for Identifying Hydric Soils in New England, New England  
179 Interstate Water Pollution Control Commission, May 1995.

**300.00 DISTRICTS**

The following districts are established for the purpose of promoting the health, safety and general welfare of the population; to implement the goals of the Lyndeborough Master Plan; to minimize the impact on the natural environment; to provide a variety of housing opportunities; to protect the value of residential property; to broaden the Town's tax base; to encourage the development of balanced and harmonious land uses of varying intensities; and to protect the character of the Town:

- a. Village District – V,
- b. Light Industrial District – LI,
- c. Rural Lands One – RL1,
- d. Rural Lands Two – RL2, and
- e. Rural Lands Three – RL3.

The boundaries and general locations of each district are depicted on the Lyndeborough Zoning Map on file in the Town Office.

230 **400.00 GENERAL PROVISIONS**

231

232 **401.00 Temporary Placement of Manufactured Home**

233

234 The Planning Board may grant a permit to temporarily locate a manufactured home  
235 on the same lot as a permanent dwelling or building for a period of up to twelve (12)  
236 months while a dwelling is being initially constructed or substantially reconstructed;  
237 or any building is being reconstructed after damage by fire or other natural cause. In  
238 cases of hardship, the Building Inspector may grant one six (6) month extension. At  
239 the end of the twelve (12) month period or the extension, the manufactured home  
240 must be removed from the lot. The intent of this section is to prohibit the creation of  
241 an additional dwelling unit. The temporary manufactured home shall be serviced by  
242 existing or new approved septic and water systems. Any violations of this section  
243 shall be subject to the enforcement proceedings and penalties contained in Section  
244 1500.00 Enforcement and Administration of this ordinance. (3/9/99)

245 **402.00 Alteration and Removal of Materials**

246

247 The commercial removal of loam, sand, gravel or other natural inorganic material  
248 from any lot in any district is permitted upon site plan review and approval, and  
249 receipt of an excavation permit from the Planning Board in accordance with the  
250 Lyndeborough Site Plan Review Regulations Regarding Excavations.

251

252 **403.00 Sanitary Protection**

253

254 All sanitary systems shall be constructed and maintained in accordance with the  
255 standards set and enforced by the New Hampshire Department of Environmental  
256 Services Water Supply and Pollution Control Division and other Town of  
257 Lyndeborough regulations.

258

259 **404.00 Exclusive Optional Method of Developing Large Tracts of Land (3/18/00) (3/16/19)**

260

261 As an exclusive optional method of development, not a required process of  
262 subdivision, any lot of record may be subdivided in accordance with the following  
263 criteria: (3/18/00) (3/16/19)

264

- 265 a. The average size of the subdivision lots shall not be less than 25 acres with a  
266 minimum size of 10 acres.;
- 267 b. The lots shall be accessed by a private road constructed to meet the minimum  
268 standards established in the *Town of Lyndeborough Street and Road*  
269 *Standards*.
- 270 c. No further subdivisions would be permitted using roads existing as of  
271 January 1, 1997 to meet zoning frontage requirements. Further subdivision  
272 will require adequate frontage on a Class V or better highway constructed  
273 after January 1, 1997, as required by the zoning ordinance in force at the time  
274 of any further resubdivision. (3/18/00) (3/16/19)

275

276 **404.10 Conservation Lands (Adopted March 8, 2005)**

277

278 Conservation Lands is an optional method of subdivision pursuant to RSA 674:21  
279 (“Innovative Land Use Controls”) and RSA 674:21-a. Conservation Lands is an  
280 overlay district which allows a one-time-only subdivision of any parcel which is 60  
281 acres or larger in any zoning district. Its primary purpose is to allow an expedited  
282 subdivision process, where lots created are at least 30 acres in size and the lots will  
283 remain in forestry and agricultural use in perpetuity with single-family residential use

284 the only allowed accessory use to forestry and agriculture. The following standards  
285 are the only requirements for subdivision approval:

- 286
- 287 a. The minimum lot size of any lot created shall be at least 30 acres.
- 288 b. Each lot shall have direct access to a public highway or a deeded easement to  
289 a public highway recorded in all future deeds. Wherever possible, lots shall  
290 have a common entrance onto a public highway. All highway entrances shall  
291 be shown on the plat and there shall be no more than one entrance for every  
292 1000 feet of public highway.
- 293 c. Pursuant to RSA 674:21-a, deed and plat restrictions shall indicate that there  
294 will be no further re-subdivision in perpetuity.
- 295 d. The Planning Board shall approve or disapprove any subdivision created  
296 under this option not later than the Board's next meeting following  
297 acceptance by the Board of a plat to the above standards and with statutory  
298 notice to abutters. The plat shall meet the standards of Subdivision Section  
299 510.00 (Plat Standards).
- 300 e. Because there are no frontage requirements connected with this section,  
301 Section 404.10 shall be exempt from section 408.0 requirements as is section  
302 404.00 ("Large Lot Subdivisions").
- 303

304 **405.00 Driveways**

305

306 All driveways entrances shall be constructed in conformance with the *Town of*  
307 *Lyndeborough Street and Road Standards* or the NH Department of Transportation  
308 regulations for any State maintained roads. Driveway entrances shall be consistent  
309 with the adjacent public road.

310

311 **406.00 Use of Manufactured Housing, Pre-Site Built Housing and Recreational Vehicles**

312

313 A dwelling unit may be constructed on-site, or may be manufactured housing or pre-  
314 site built housing. Under no circumstances shall a recreational vehicle be considered  
315 a dwelling unit. (3/9/99)

316

317 **407.00 Junkyards and Automobile Graveyards**

318

319 Junkyards and Automobile Graveyards are prohibited in all zoning districts in the  
320 Town of Lyndeborough. (3/9/99)

321

322 **408.00 Soil-Based Zoning Requirements (Overlay District) (3/18/00) (3/16/19)**

323

324 All lots in the Rural Lands One (RL1) or Light Industrial zoning districts with less  
325 than 5 acres shall require a minimum of 2 contiguous acres of "slight" and/or  
326 "moderate" limitations rated soils for septic tank absorption fields, as determined by  
327 the USDA Natural Resource Conservation Service criteria and published in Table 11  
328 of the "Soil Survey of Hillsborough County, New Hampshire", issued October 1985.  
329 A Site specific soil survey conducted by a NH Certified Professional Soil Scientist  
330 may be required by the Planning Board to ensure that the requirements of this section  
331 are met. Contiguous shall mean any area undivided by wetland, ponding (seasonal or  
332 perennial) or seasonal or perennial drainage ways. Lots of record shall not be affected  
333 by this soil-based zoning for residential usage.

334

335 All lots in the Rural Lands One (*RL1*) or Light Industrial zoning districts with less  
336 than 500 foot frontage shall require a minimum of 2 contiguous acres of "slight" and  
337 or "moderate" limitations rated soils for septic tank absorption fields, as determined

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

338 by the USDA Natural Resource Conservation Service criteria and published in Table  
339 11 of the “Soil Survey of Hillsborough county, New Hampshire”, issued October  
340 1985. A Site specific soil survey conducted by a NH Certified Professional Soil  
341 Scientist may be required by the Planning Board to ensure that the requirements of  
342 this section are met. Contiguous shall mean any area undivided by wetland, ponding  
343 (seasonal or perennial) or seasonal or perennial drainage ways. Lots of record shall  
344 not be affected by this soil-based zoning for residential usage. (3/18/00) (3/16/19)  
345

346 [Note of Clarification: This section 408.00 does not apply to the Village District,  
347 section 500.00; Rural Lands 2, section 800.00; Rural Lands 3, section 900.00; or the  
348 Large Tracts of Land, section 404.00.]  
349

350 **409.00 Optional Acceptance by the Town of New Roads Created During Subdivisions)**  
351 **(3/18/00)**  
352

353 A road created to town standards for the purpose of road frontage requirements  
354 during subdivision may or may not be accepted by the Town of Lyndeborough as a  
355 public road. Subdivision approval may not be revoked for the sole reason of the road  
356 created for road frontage not being accepted as a Class V road. If the town does not  
357 accept the new road as a public road, the road will remain a private road and the  
358 landowner(s) accept full responsibility for the road. (3/18/00)  
359

360 **410.00 Fences**  
361

362 Fences up to six (6) feet high do not require a building permit. Fences six (6) feet or  
363 higher require a building permit. No fence shall exceed ten (10) feet in height. All  
364 fences may be constructed within the setback up to one (1) foot of the property line.  
365 (3/12/02)  
366

367 **500.00 VILLAGE DISTRICT (V)**

368

369 The purpose of the Village District is to provide opportunities for mixed uses  
370 commonly associated with a town center.

371

372 **500.01 District Boundaries.**

373

374 The Village District includes the portion of Lyndeborough delineated as follows:

375

376 Beginning at the stone monument located on the easterly side of NH Route 31 at the  
377 point where it intersects the Lyndeborough-Wilton Town boundary, east along the  
378 Town boundary to the western edge of the railroad right-of-way, north along the  
379 railroad right-of-way to its point of intersection with Cross Road, east along Cider  
380 Mill Road to its point of intersection with Cemetery Road, northwest along Cemetery  
381 Road to its point of intersection with Putnam Hill Road, northwesterly along a  
382 straight line to a point on Center Road one thousand (1,000) feet north of its  
383 intersection with NH Route 31, south along the same line to its point of intersection  
384 with Stoney Brook, south along Stoney Brook to the point where it intersects the  
385 Lyndeborough-Wilton Town boundary, then east to the point of beginning.

386

387 **501.00 Permitted Uses. (AMENDED AND APPROVED 3/13/18)**

388

389 The following uses and their associated accessory uses are permitted in the Village  
390 District subject to all other applicable provisions of this Ordinance and, excepting  
391 single-family and agricultural uses, Site Plan Review and approval, as applicable, by  
392 the Lyndeborough Planning Board.

393

- 394 a. Single family dwellings;  
395 b. Retail stores;  
396 c. Professional offices;  
397 d. Personal Services;  
398 e. Banks;  
399 f. Municipal, government or postal offices and facilities;  
400 g. Agricultural operations;  
401 h. Home Businesses and Home Occupation in compliance with the  
402 requirements of Section 1200.00 of these regulations;  
403 i. Houses of worship;  
404 j. Utility structures less than 200 square feet in area; and  
405 k. Restaurants.

406

407 **502.00 Lot Requirements.**

408

409 **502.01 Area.** Minimum lot size 2 contiguous acres of dry land undivided by wetland, pond  
410 or drainage way.

411

412 **502.02 Frontage.** Minimum 150 feet of continuous frontage.

413

414 **502.03 Setbacks.** All structures must be set back a minimum of 35 feet from the front, side  
415 and rear lot lines. No buildings requiring a building permit or associated uses,  
416 including but not limited to swimming pools, antennas and satellite dishes, are  
417 permitted in the setback.

- a. Two family dwellings provided the following conditions can be met:
  - 1) minimum lot size 4 acres;
  - 2) minimum frontage 300 feet;
  - 3) a common road or street access serves both units;
  - 4) two off-street parking spaces shall be provided for each dwelling unit;
  - 5) Certification from the applicant and the Lyndeborough Health/Code Enforcement Officer that any existing septic system or new system is designed to support the increased load created by two families.
  
- b. Private schools including daycare centers.
  
- c. Automobile Service Stations
  
- d. Accessory Dwelling Units *(Deleted 3/13/18) (Recodify 3/16/19)*
  - 1) **An Accessory Dwelling Unit** shall be allowed as a matter of right by the Building Inspector pursuant to RSA 674:21 in all zoning districts that permit single family dwellings. One accessory dwelling unit shall be allowed without additional requirements for lot size, frontage, space limitations, or other controls beyond what would be required for a single family dwelling without an accessory dwelling unit. Not more than one accessory dwelling unit for any single family shall be allowed.(3/13/18) (Recodify 3/16/19)
  
  - 2) An interior door shall be provided between the principal dwelling unit and the accessory dwelling unit, but shall not be required to remain unlocked. (3/13/18) (Recodify 3/16/19)
  
  - 3) Regulations applicable to single family dwellings shall also apply to the combination of a principal dwelling unit and an accessory dwelling unit including, but not limited to lot coverage standards and standards for maximum occupancy per bedroom consistent with policy adopted by the United States Department of Housing and Urban Development. Adequate parking to accommodate an accessory dwelling unit shall be provided. (3/13/18) (Recodify 3/16/19)
  
  - 4) The applicant for a building permit to construct an accessory dwelling unit shall make adequate provisions for water supply and sewage disposal for the accessory dwelling unit in accordance with RSA 485A:38, but separate systems shall not be required for the principal and accessory dwelling units. (3/13/18) (Recodify 3/16/19)
  
  - 5) The owner must demonstrate that one of the units is his or her principal place of residence. (3/13/18) (Recodify 3/16/19)
  
  - 6) A familial relationship between the occupants of an accessory dwelling unit and the occupants of a principal dwelling unit shall not be required. (3/13/18) (Recodify 3/16/19)

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

- 474                                   7) An accessory dwelling unit may be deemed a unit of workforce housing  
475 for purposes of satisfying the town's obligation under RSA 674:59 if the unit  
476 meets the criteria in RSA 674:58, IV for rental units. (3/13/18) (Recodify  
477 3/16/19)  
478  
479                                   e. Personal service businesses including but not limited to service or repair of  
480 jewelry, appliances or other personal or household items, photography  
481 studios, beauty/barber shops and tailors.  
482  
483                                   f. Bed and Breakfasts providing the following conditions can be met:  
484                                   1) the B&B is operated by the resident owner;  
485                                   2) two (2) non-family employees are permitted on the premises;  
486                                   3) no additions or changes shall be made to the residence that would make  
487 it impractical to revert the building to purely residential;  
488                                   4) two (2) off-street parking spaces shall be provided for the residents of the  
489 B&B and one (1) off-street space shall be provided for each rental unit;  
490                                   5) certification from the applicant and the Lyndeborough Health/Code  
491 Enforcement Officer that any existing septic system or new system is  
492 designed to support the increased load; and  
493                                   6) the business shall be operated in accordance with all Town regulations,  
494 state laws and licensing requirements.

496

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

497 **600.00**     ***LIGHT INDUSTRIAL DISTRICT (LI)***  
498

499           The purpose of the Light Industrial District is to provide employment opportunities  
500           and broaden the tax base by establishing a location for light industrial development in  
501           an area that does not conflict with surrounding land uses and that provides good  
502           access to transportation facilities.  
503

504 **600.01**     ***District Boundaries.***  
505

506           That portion of Lyndeborough which is bounded as follows: Beginning at the point  
507           where Purgatory Brook joins the Lyndeborough Town boundary with Mont Vernon;  
508           thence easterly along said boundary to its point of intersection with the  
509           Lyndeborough Town Boundary with Milford; thence southerly along said boundary  
510           to its point of intersection with Purgatory Road; thence southerly along Purgatory  
511           Road to its point of intersection with the Lyndeborough Town boundary with  
512           Milford, thence westerly along said boundary to Purgatory Brook; thence northerly  
513           along Purgatory Brook to the place or point of beginning. The district shall also  
514           encompass that area now or formerly known as “The Sawmill” including the land  
515           designated as 228-015-000 of the official tax map of the Town of Lyndeborough and  
516           bounded by NH Route 31 on the west and Winn Road on the east.  
517

518 **601.00**     ***Permitted Uses. (3/16/19)***  
519

520           The following uses and their associated accessory uses are permitted in the Light  
521           Industrial District subject to all other applicable provisions of this Ordinance and Site  
522           Plan Review and approval by the Lyndeborough Planning Board.  
523

- 524           a. Light manufacturing;
- 525           b. Research and/or testing facilities;
- 526           c. Offices;
- 527           d. Newspaper and printing facilities;
- 528           e. Warehouses;
- 529           f. Retail stores;
- 530           g. Banks;
- 531           h. Personal service businesses including but not limited to service or repair of  
532           jewelry, appliances or other personal or household items, photography  
533           studios, beauty/barber shops and tailors.
- 534           i. Utility structures less than 200 square feet in area.  
535

536 **602.00**     ***Lot Requirements.***  
537

538 **602.01**     ***Area.*** Minimum lot size 2 contiguous acres of dry land undivided by wetland, pond  
539           or drainage way.  
540

541 **602.02**     ***Frontage.*** Minimum 250 feet of continuous frontage.  
542

543 **602.03**     ***Setbacks.*** All structures must be set back a minimum of 50 feet from the front, side  
544           and rear lot lines. Parking areas shall be set back as follows:

- 545           a. No buildings or parking areas are permitted in the front setback or in any  
546           setback which abuts a residential property.
- 547           b. Parking areas are permitted up to within ten (10) feet of the side or rear lot  
548           line of a light industrial zoned parcel where it abuts another light industrial  
549           zoned parcel.

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

550 c. Parking areas shared between two adjacent light industrial zoned parcels may  
551 be developed up to the common side or rear lot line if all other conditions of  
552 the district are met.

553

554 **603.00 Special Exceptions.**

555

556 The following uses may be permitted as special exceptions by the Zoning Board of  
557 Adjustment. A Site Plan Review and approval **will then be required** by the Planning  
558 Board. (3-12-02)

559

- 560 a. Vehicular sales and repair facilities;  
561 b. Automobile service stations;  
562 c. Contractor yards;  
563 d. Public assembly halls and places of worship.

564

565

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

- 566 **700.00** ***RURAL LANDS ONE DISTRICT (RL1)***  
567  
568 The purpose of the Rural Lands 1 District is to provide for residential development at  
569 higher densities than other areas while conserving the rural character of the Town,  
570 maintaining natural resources and protecting the health and safety of residents.  
571
- 572 **700.01** ***District Boundaries.***  
573  
574 The Rural Lands One district encompasses all land within the Town not included in  
575 any other district designated in this Ordinance.  
576
- 577 **701.00** **Permitted Uses. (Amended & Approved 3/18/17)**  
578  
579 The following uses and their associated accessory uses are permitted in the Rural  
580 Lands One District subject to all other applicable provisions of this Ordinance and  
581 Subdivision or Site Plan Review and approval by the Lyndeborough Planning Board  
582 as applicable.  
583
- 584 a. Single family dwellings;
  - 585 b. Seasonal dwellings such as hunting and fishing camps, but not including  
586 wheeled recreational vehicles, and not to be considered as a permanent  
587 residence;
  - 588 c. Agricultural operations;
  - 589 d. Forestry operations and management;
  - 590 e. Home Businesses and Home Occupation in compliance with the  
591 requirements of Section 1200.00 of these regulations;
  - 592 f. Manufactured housing greater than 400 square feet in size on a masonry  
593 foundation with skirting; and
  - 594 g. Outdoor recreation uses and facilities, including but not limited to golf  
595 courses, cross-country ski areas, riding stables, but excluding campgrounds.  
596 To include a provision that no use allowed under this section shall:  
597 1) Adversely affect abutting property values; or  
598 2) Result in increased noise beyond property lines over and above that  
599 normally associated with residential uses allowed in the district; or  
600 3) Be a health hazard; or  
601 4) Be a nuisance to abutting properties; or  
602 5) Uses allowed under this section will be subject to site plan review and  
603 approved by the Planning Board. (3-13-01)  
604
- 605 **702.00** **Lot Requirements.**  
606
- 607 **702.01** **Area.** Minimum lot size 2 contiguous acres of dry land undivided by wetland, pond  
608 or drainage way.  
609
- 610 **702.02** **Frontage.** Minimum 250 feet of continuous frontage.  
611
- 612 **702.03** **Setbacks.** For lots 5 acres or larger, all structures must be set back a minimum of 50  
613 feet from the front, side and rear lot lines. For lots smaller than 5 acres, all structures  
614 must be set back a minimum of 50 feet from the front lot line, and a minimum of 35  
615 feet from the side and rear lot lines. No buildings or associated uses, including but  
616 not limited to swimming pools, antennas and satellite dishes, are permitted in the  
617 setback. (3-12-02)  
618

619 **703.00 Special Exceptions.**

620  
621 The following uses may be permitted as special exceptions by the Zoning Board of  
622 Adjustment. A Site Plan Review and approval **will then be required** by the  
623 Planning Board. (3-13-18)

624  
625 a. Two-family dwellings provided the following conditions can be met:

- 626  
627 1) minimum lot size 4 acres;  
628 2) minimum frontage 500 feet;  
629 3) a common road or street access serves both units;  
630 4) two off-street parking spaces shall be provided for each dwelling unit;  
631 5) Certification from the applicant and the Lyndeborough Health/Code  
632 Enforcement Officer that any existing septic system or new system is  
633 designed to support the increased load created by two families.

634  
635 b. Accessory Dwelling Units *(Deleted 3/13/18) (recodify 3/16/19)*

636 1) **An Accessory Dwelling Unit** shall be allowed as a matter of right by the  
637 Building Inspector pursuant to RSA 674:21 in all zoning districts that permit  
638 single family dwellings. One accessory dwelling unit shall be allowed  
639 without additional requirements for lot size, frontage, space limitations, or  
640 other controls beyond what would be required for a single family dwelling  
641 without an accessory dwelling unit. Not more than one accessory dwelling  
642 unit for any single family shall be allowed.(3/13/18) (Recodify 3/16/19)

643  
644 2) An interior door shall be provided between the principal dwelling unit  
645 and the accessory dwelling unit, but shall not be required to remain unlocked.  
646 (3/13/18) (Recodify 3/16/19)

647  
648 3) Regulations applicable to single family dwellings shall also apply to the  
649 combination of a principal dwelling unit and an accessory dwelling unit  
650 including, but not limited to lot coverage standards and standards for  
651 maximum occupancy per bedroom consistent with policy adopted by the  
652 United States Department of Housing and Urban Development. Adequate  
653 parking to accommodate an accessory dwelling unit shall be provided.  
654 (3/13/18) (Recodify 3/16/19)

655  
656 4) The applicant for a building permit to construct an accessory dwelling  
657 unit shall make adequate provisions for water supply and sewage disposal for  
658 the accessory dwelling unit in accordance with RSA 485A:38, but separate  
659 systems shall not be required for the principal and accessory dwelling units.  
660 (3/13/18) (Recodify 3/16/19)

661  
662 6) The owner must demonstrate that one of the units is his or her principal  
663 place of residence. (3/13/18) (Recodify 3/16/19)

664 7)  
665 6) A familial relationship between the occupants of an accessory dwelling  
666 unit and the occupants of a principal dwelling unit shall not be required.  
667 (3/13/18) (Recodify 3/16/19)

668  
669 7) An accessory dwelling unit may be deemed a unit of workforce housing  
670 for purposes of satisfying the town's obligation under RSA 674:59 if the unit  
671 meets the criteria in RSA 674:58, IV for rental units. (3/13/18) (Recodify

  - 2) two (2) nonfamily employees are permitted on the premises;
  - 3) no additions or changes shall be made to the residence that would make it impractical to revert the building to purely residential;
  - 4) two (2) off-street parking spaces shall be provided for the residents of the B&B and one (1) off-street space shall be provided for each rental unit;
  - 5) certification from the applicant and the Lyndeborough Health/Code Enforcement Officer that any existing septic system or new system is designed to support the increased load; and
  - 6) the business shall be operated in accordance with all Town regulations, state laws and licensing requirements.

688 **800.00** ***RURAL LANDS TWO DISTRICT (RL2)***

689

690 The purpose of the Rural Lands Two district is to provide an area for low density,  
691 rural residential development given the distances from the Town center, steep slopes,  
692 poor road conditions, difficulty of travel during certain seasons and septic system  
693 restrictions.

694

695 **800.01** ***District Boundaries.***

696

697 The Rural Lands Two district encompasses all lands at or above 1,000 feet but less  
698 than 1,500 feet in elevation as defined by the most recent USGS Topographic Map of  
699 the area.

700

701 **801.00** ***Permitted Uses. (AMENDED AND APPROVED 3-18-17)***

702

703 The following uses and their associated accessory uses are permitted in the Rural  
704 Lands Two District subject to all other applicable provisions of this Ordinance and  
705 Subdivision and Site Plan Review and approval by the Planning Board as applicable.

706

- 707 a. Single family dwellings;
- 708 b. Seasonal dwellings such as hunting and fishing camps, but not including  
709 wheeled recreational vehicles, and not to be considered as a permanent  
710 residence;
- 711 c. Agricultural operations;
- 712 d. Forestry operations and management;
- 713 e. Outdoor recreation uses and facilities, including but not limited to golf  
714 courses, cross-country ski areas, riding stables, but excluding campgrounds.  
715 To include a provision that no use allowed under this section shall:
- 716 1) Adversely affect abutting property values; or
- 717 2) Result in increased noise beyond property lines over and above that  
718 normally associated with residential uses allowed in the district; or
- 719 3) Be a health hazard; or
- 720 4) Be a nuisance to abutting properties; or
- 721 5) Uses allowed under this section will be subject to site plan review and  
722 approved by the Planning Board. (3-13-01)
- 723 f. Home Businesses and Home Occupation in compliance with the  
724 requirements of Section 1200.00 of these regulations.

725

726 **802.00** ***Lot Requirements.***

727

728 **802.01** ***Area.*** Minimum lot size 5 acres, 2 contiguous acres of dry land undivided by  
729 wetland , pond or drainage way.

730

731 **802.02** ***Frontage.*** Minimum 500 feet of continuous frontage.

732

733 **802.03** ***Setbacks.*** All structures must be set back a minimum of 50 feet from the front, side  
734 and rear lot lines. No buildings or associated uses, including but not limited to  
735 swimming pools, antennas and satellite dishes, are permitted in the setback.

The following uses may be permitted as special exceptions by the Zoning Board of Adjustment. **A** Site Plan Review and approval **will then be required** by the Planning Board. (3-13-18)

- a. Two-family dwellings provided the following conditions can be met:
  - 1) minimum lot size 10 acres;
  - 2) minimum 1,000 feet of continuous frontage;
  - 3) a common road or street access serves both units;
  - 4) two off-street parking spaces shall be provided for each dwelling unit; and
  - 5) certification from the applicant and the Lyndeborough Health/Code Enforcement Officer that any existing septic system or new system is designed to support the increased load created by two families.

b. Accessory Dwelling Units *(Deleted 3/13/18) (Recodify 3/16/19)*

- 1) **An Accessory Dwelling Unit** shall be allowed as a matter of right by the Building Inspector pursuant to RSA 674:21 in all zoning districts that permit single family dwellings. One accessory dwelling unit shall be allowed without additional requirements for lot size, frontage, space limitations, or other controls beyond what would be required for a single family dwelling without an accessory dwelling unit. Not more than one accessory dwelling unit for any single family shall be allowed.(3/13/18) (Recodify 3/16/19)
- 2) An interior door shall be provided between the principal dwelling unit and the accessory dwelling unit, but shall not be required to remain unlocked. (3/13/18) (Recodify 3/16/19)
- 3) Regulations applicable to single family dwellings shall also apply to the combination of a principal dwelling unit and an accessory dwelling unit including, but not limited to lot coverage standards and standards for maximum occupancy per bedroom consistent with policy adopted by the United States Department of Housing and Urban Development. Adequate parking to accommodate an accessory dwelling unit shall be provided. (3/13/18) (Recodify 3/16/19)
- 4) The applicant for a building permit to construct an accessory dwelling unit shall make adequate provisions for water supply and sewage disposal for the accessory dwelling unit in accordance with RSA 485A:38, but separate systems shall not be required for the principal and accessory dwelling units. (3/13/18) (Recodify 3/16/19)
- 5) The owner must demonstrate that one of the units is his or her principal place of residence. (3/13/18) (Recodify 3/16/19)
- 6) A familial relationship between the occupants of an accessory dwelling unit and the occupants of a principal dwelling unit shall not be required. (3/13/18) (Recodify 3/16/19)
- 7) An accessory dwelling unit may be deemed a unit of workforce housing for purposes of satisfying the town's obligation under RSA 674:59 if the unit

TOWN OF LYNDEBOROUGH

794 meets the criteria in RSA 674:58, IV for rental units. (3/13/18) (Recodify  
795 3/16/19)  
796  
797 c. Bed and Breakfasts providing the following conditions can be met:  
798  
799 1) the B&B is operated by the resident owner;  
800 2) two (2) nonfamily employees are permitted on the premises;  
801 3) no additions or changes shall be made to the residence that would make  
802 it impractical to revert the building to purely residential;  
803 4) two (2) off-street parking spaces shall be provided for the residents of the  
804 B&B and one (1) off-street space shall be provided for each rental unit;  
805 5) certification from the applicant and the Lyndeborough Health/Code  
806 Enforcement Officer that any existing septic system or new system is  
807 designed to support the increased load; and  
808 6) the business shall be operated in accordance with all Town regulations,  
809 state laws and licensing requirements.  
810  
811  
812

813 **900.00** ***RURAL LANDS THREE DISTRICT (RL3)***

814

815 The purpose of the Rural Lands Three District is to protect the most sensitive and  
816 remote land from development. Poor road access, steep slopes, shallow depths to  
817 bedrock and generally severe limitations for septic systems characterize the  
818 undevelopable nature of land within this District.

819

820 **900.01** ***District Boundaries.***

821

822 The Rural Lands Three District encompasses all lands situated at or above 1,500 feet  
823 in elevation as defined by the most recent USGS Topographic Map of the area.

824

825 **901.00** **Permitted Uses. (AMENDED AND APPROVED 3/18/17)**

826

827 The following uses and their associated accessory uses are permitted in the Rural  
828 Lands Three District subject to all other applicable provisions of this Ordinance and  
829 Subdivision or Site Plan Review and approval by the Lyndeborough Planning Board  
830 as applicable:

831

- 832 a. Agricultural and farming operations;
- 833 b. Single family dwellings;
- 834 c. Seasonal dwellings such as hunting and fishing camps, but not including  
835 wheeled recreational vehicles, and not to be considered as a permanent  
836 residence;
- 837 d. Forestry operations and management;
- 838 e. Home Businesses and Home Occupation in compliance with the  
839 requirements of Section 1200.00 of these regulations.
- 840 f. Outdoor recreation uses and facilities, including but not limited to golf  
841 courses, cross-country ski areas, riding stables, but excluding campgrounds.  
842 To include a provision that no use allowed under this section shall:
- 843 1) Adversely affect abutting property values; or
- 844 2) Result in increased noise beyond property lines over and above that  
845 normally associated with residential uses allowed in the district; or
- 846 3) Be a health hazard; or
- 847 4) Be a nuisance to abutting properties; or
- 848 5) Uses allowed under this section will be subject to site plan review and  
849 approved by the Planning Board. (3/13/01)

850

851 **902.00** **Lot Requirements.**

852

853 **902.01** ***Area.*** Minimum lot size 10 acres with a minimum of 2 acres contiguous dry land  
854 undivided by wetland, pond or drainage way.

855

856 **902.02** ***Frontage.*** Minimum 500 feet of continuous frontage.

857

858 **902.03** ***Setbacks.*** All structures must be set back a minimum of 50 feet from the front, side  
859 and rear lot lines.

The purpose of the Wetlands District is to guide the use of areas of land with extended periods of high water tables to:

- a. prevent development of structures and land uses on naturally occurring wetlands which would contribute to the pollution of surface and ground water by sewage;
- b. prevent the destruction of natural wetlands which provide flood protection, recharge groundwater supplies and augment stream flows during dry periods;
- c. prevent unnecessary or excessive expenses to the Town to provide and maintain essential services and utilities which arise because of inharmonious use of wetlands.

**1000.01 District Boundaries.**

The Wetland District encompasses all areas identified and delineated as poorly and very poorly drained soils by the U.S. Department of Agriculture, Soil Conservation Service, in the Soil Survey of Hillsborough County New Hampshire, Western Part, dated October 1985, and any areas delineated as wetlands on a site specific basis using the Corps of Engineers Wetlands Delineation Manual, Technical Report Y-87-1, Environmental Laboratory, Department of the Army, 1987 in conjunction with the Field Indicators for Identifying Hydric Soils in New England, New England Interstate Water Pollution Control Commission, May 1995. The Wetland District is show on the Town of Lyndeborough Wetlands District Map on file with the Town Clerk and the Planning Board. In the event that an area is incorrectly designated as being poorly or very poorly drained soil on the Wetland District Map and evidence to that effect is satisfactorily presented to the Building Inspector, the restrictions in this section shall not apply. All on site wetland delineation shall be conducted by a certified soil scientist.

The Wetland District is an overlay district. In all cases where the Wetland District is superimposed over another district in the Town of Lyndeborough, the more restrictive regulations shall apply.

**1001.00 Permitted Uses. (3/16/19)**

Any of the following uses that require a permit by NH DES are also permitted by this Ordinance.

- a. Forestry operations and management in accordance with best management practices;
- b. Agriculture in accordance with agricultural best management practices;
- c. Water impoundments and wells;
- d. Drainage ways - streams, ditches or other paths of normal water runoff;
- e. Wildlife refuges;
- f. Parks and recreation uses consistent with the purpose and intent of this Ordinance;
- g. Conservation areas and nature trails; and
- h. Open space as permitted by the Subdivision Regulations and other sections of this Ordinance.

915 **1002.00 Special Exceptions.**

933  
934  
935  
936

The following uses may be permitted as special exceptions by the Zoning Board of Adjustment. Prior to the granting of a special exception, the Zoning Board shall refer the application to the Planning Board, the Health Officer and the Conservation Commission for review and comment prior to the public hearing. Lack of response from any of these parties within 30 days implies consent to the application. Construction of any uses permitted by special exception shall minimize the detrimental impact of the use on the wetland.

- a. Streets, roads and other access ways;
- b. Utility right-of-way easements including power lines and pipelines if essential to the productive use of land not in the Wetland District;
- c. A use not otherwise permitted in the Wetland District, including the erection of a structure, dredging, draining or otherwise altering the configuration of the land, if it can be shown that the proposed use is not in conflict with the purpose and intent of this section and if the proposed use is otherwise permitted by the by the Zoning Ordinance. Proper evidence of this shall be submitted in writing to the Zoning Board and is subject to review by the Hillsborough County Conservation District to determine the effect of the proposed use on the wetlands in question.

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

937 **1100.00** ***PLANNED RESIDENTIAL DEVELOPMENT (PRD)\****  
938 **ALLOWED BY CONDITIONAL USE PERMIT**  
939 **Adopted March 14, 2006 (3/16/19)**

941 **1101.00** **Purpose:**

942  
943 To provide an alternative pattern of land development for single-family homes in the  
944 Village District (V) and along a corridor 1,000 feet either side of State Route 31 in  
945 Rural Lands One District (RL1). (3/16/19)

946  
947 It is intended to encourage the preservation of open space and, at the same time,  
948 provide for a greater variety of housing types and affordability, with similar densities  
949 and more inclusive building permits than permitted elsewhere in the Zoning  
950 Ordinance, without causing an increase to Town maintained roads. (3/16/19)

951  
952 It is planned that in a PRD, the setbacks for dwelling units in a PRD in the Village  
953 District shall be the same as required in Section 502.03 of the Lyndeborough Zoning  
954 Ordinance. The setbacks for dwelling units in a PRD in Rural Lands One District  
955 (RL1) shall be the same as required in Section 702.03 of the Lyndeborough Zoning  
956 Ordinance except that no dwelling unit shall be less than 300 feet from Route 31 nor  
957 more than 1,000 feet from Route 31. (3/16/19)

958  
959 The dwelling units shall be constructed in clusters that are in harmony with  
960 neighborhood developments and housing and with the natural surroundings. These  
961 clusters shall not detract from the ecological and visual qualities of the environment,  
962 or from the value of the neighborhood or Town. Every PRD unit shall be occupied by  
963 an owner occupant who is at least 55 years of age or older and should add to the  
964 variety of housing types in Lyndeborough to accommodate the Master Plan purposes.  
965 The overall site design and amenities should enhance the quality of living for the  
966 residents of the development and, in general, the neighborhood and Town. The  
967 Planning Board shall determine whether the proposed PRD, namely the site plan or  
968 layout, number, type and design of the proposed housing is suitable to the  
969 neighborhood within which it is located and is consistent with the Master Plan and  
970 reasonable growth objectives. (3/16/19)

971  
972 **1102.00** **Conditions:**

973  
974 An applicant for approval of a proposed PRD\* shall make application to the Planning  
975 Board in the same fashion as specified in the Subdivision regulations. In the course of  
976 review of the proposal, the Board shall hear evidence presented by the applicant and  
977 all those requiring notice and determine whether, in its judgment, the proposal meets  
978 the objectives and purpose set forth above, in which event the Planning Board may  
979 grant approval to the proposal, subject to reasonable conditions and limitations as it  
980 shall deem appropriate. (3/16/19)

981  
982 **1102.01** **Minimum Net Tract Area.** Planned Residential Developments may be permitted on  
983 single or adjacent tracts of land, under one owner, or to be brought under one owner,  
984 which have a net tract area\* of no less than twenty (20) buildable acres. Irrespective  
985 of the net tract area size, the PRD shall not contain more than twenty (20) dwelling  
986 units. Net tract area shall mean the total area of the tract, or tracts, less the area of  
987 wetlands, identified flood plains and areas of slope equal to or greater than 20%. To  
988 maintain comparable densities, as calculated using existing Lyndeborough zoning  
989 regulations, (as determined by soil based zoning section 408.00 of the zoning  
990 ordinance) PRD septic systems are to be of the “shared- type”, located in the Open

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

991 Space on soils that are rated “slight to moderate” as spelled out in the Hillsborough  
992 County West published soils survey. (3/16/19)  
993

994 **1102.02** **Minimum Lot Size.** Individual lots created within the PRD shall be a minimum of  
995 one (1) acre in size. While each PRD shall be subject to the Subdivision Regulations,  
996 where there are differences between the PRD requirements and the Subdivision  
997 Regulations, the requirements of the PRD shall prevail. All other regulations and  
998 restrictions not specifically mentioned in this Ordinance shall be those governed by  
999 the Zoning regulations in which the PRD is located.  
1000

1001 **1102.03** **Permitted Uses.** There may be permitted in the PRD, single family detached  
1002 dwelling units\* of any type without regard to unit configuration. It is envisioned that  
1003 the housing types, while having different internal configurations, will have an  
1004 external appearance that complements and is in general harmony with the natural  
1005 surroundings of the PRD. The maximum height of any dwelling structure shall be 25  
1006 feet, exclusive of chimneys or cupolas, measured from the lowest adjacent exterior  
1007 elevation. The maximum area of living space\* is not to exceed 2000 square feet. At a  
1008 minimum there shall be a fifty (50) foot set back\* from the property line around the  
1009 perimeter of the property. The lot frontage\*, as measured at the edge of the road  
1010 right-of-way, to be a minimum of 100 feet. Lot frontage on Cul-de-sac\* turnarounds,  
1011 as measured at the edge of the right-of-way, to be a minimum of 75 feet. Off-road  
1012 parking space will be furnished to accommodate one (1) vehicle and have an area not  
1013 less than 9 ft. X 18 ft. not including driveways or passage ways and have direct  
1014 access to a private way. For the purpose of this Ordinance, the following definition  
1015 will apply:  
1016

1017 **“Single Family Detached Dwelling Unit—any building designed for and**  
1018 **occupied by not more than one family and which is not attached to any other**  
1019 **dwelling unit by any means.”**  
1020

1021 The Planning Board shall determine the mix of housing types and these shall be  
1022 determined at the Final Review and be noted on the Plat.  
1023

1024 **1103.00 Open Space:**  
1025

1026 All land in the PRD which is not covered by dwellings, paved areas, service areas, or  
1027 which is not set aside as private yards, patios or gardens for the residents shall be  
1028 treated as open space\*. The total of the open space shall be at least 50% of the total  
1029 net area of the PRD tract. Such land shall have shape, character and location suitable  
1030 to assure its use for park, recreation, conservation, or agricultural purposes  
1031 (excluding farm livestock) by at least all the residents of the PRD.  
1032

1033 Provisions shall be made for the open space to be held in common and equally, by all  
1034 the Home Owners Association\* members of the PRD. Such provisions shall further  
1035 hold that all the open space shall be readily accessible to all residents the PRD and  
1036 that such open space shall be retained in perpetuity for one or more of the following  
1037 uses: conservation, agriculture, recreation or park. No building or construction of  
1038 structures shall take place in the open space. Should the PRD plan call for shared  
1039 wells\* and or shared septic systems\*, they may be constructed to State specifications  
1040 in the open space, with permission of the Planning Board. Harvesting of trees in the  
1041 open space is permitted if it is done in accordance with good forestry practice and  
1042 with the permission of the Planning Board.  
1043

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

1044 **1103.01** **Density.** In a Planned Residential development bedroom density\* shall be  
1045 determined by the following method:

1046  
1047           “Multiply the number of allowed dwelling units by two (2)”  
1048 The result of this calculation shall be the number of bedrooms permitted in the entire  
1049 development. The number of bedrooms permitted in any PRD shall be determined by  
1050 the Planning Board to assure compliance with the PURPOSE of the PRD and shall  
1051 not exceed the limit determined above. The number of bedrooms in each dwelling  
1052 unit shall be noted on the final Plat and cannot be increased without permission from  
1053 the Planning Board.

1054  
1055 For the purpose of this ordinance, a bedroom may mean any room other than a  
1056 kitchen, bathroom, or small utility room and must be located in the normal living  
1057 space of the unit and not located in the basement, attic or garage. In review of the  
1058 floor plan or plans, the planning Board, may deem the floor space shown on said plan  
1059 or plans to constitute the number of bedrooms that can be built in that space. The  
1060 Planning Board may designate a room not to be a bedroom if it deems that its use as a  
1061 bedroom is unlikely in view of the layout of the unit, or in the overall character of the  
1062 PRD.

1063  
1064 **1103.02** **Architectural Design.** As a condition of final approval, the applicant must obtain the  
1065 Planning Board’s approval of the external architectural design of the PRD to ensure  
1066 that it complies with the goals of harmonious existence with the neighborhood and  
1067 the environment, as stated in the PURPOSE. A buffer zone must be provided around  
1068 the perimeter of the PRD, to a depth of 200 feet, by preserving the existing natural  
1069 foliage and planting local species of trees and plants that will act as a screen from the  
1070 surrounding neighborhoods.

1071  
1072 **1103.03** **Limitation of the Subdivision.** No lot shown on the PRD plan for which a permit is  
1073 granted under this Ordinance may be further subdivided, in perpetuity, and a note to  
1074 that effect shall be placed on the Final Plan. No structure\* within the subdivision can  
1075 be within 500 feet of any public road.

1076  
1077 **1103.04** **Roads.** Road(s) that service the PRD will be considered a private road(s) and the  
1078 Planning Board shall require adequate covenants, restrictions and agreements,  
1079 including a Home Owners Association guarantee that states the Town will have no  
1080 liability or responsibility to maintain said road. All private roads must be constructed  
1081 to meet or exceed Town standards. Furthermore, road(s) that connect with Town or  
1082 State public roads must adhere to the intersection regulations of both or either of  
1083 those bodies.

1084  
1085 **1104.00** **Provided Services to Dwellings:**  
1086  
1087 Power: All power must be run under ground  
1088 Phone: All communication lines must be run under ground.  
1089 Water: Clean drinking water is to be supplied either from a municipal source, private  
1090 source, community wells, or individual wells.  
1091 Waste: Waste material will be managed *either* by municipal sewer or shared septic  
1092 systems. All septic systems must meet Town and State regulations.

1093  
1094 **1105.00** **Home (Unit) Owner’s Association:**  
1095  
1096 The applicant for the PRD must establish a Home or Unit Owners Association\* as  
1097 part of the application that adheres to the provisions of New Hampshire RSA 356-B

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

1098 and creates with respect to the land a condominium with the condominium form of  
1099 ownership. All Home Owners Association agreements must be reviewed by the  
1100 Town of Lyndeborough's attorney and approved by the Planning Board prior to final  
1101 approval of the application. Any amendments to the original agreement must be  
1102 reviewed and approved by the Planning Board prior to implementation by the Home  
1103 Owner's Association.

1104

1105 **1106.00 Bond:**

1106

1107 As a condition of final approval, the applicant must post a bond or other surety with  
1108 the town treasurer in the amount \$20,000.00 per dwelling unit on each building  
1109 permit in order to guarantee compliance with the permit. The bond will be released  
1110 upon the completion of all dwelling units assigned to the permit.

1111

1112 **1107.00 Growth Ordinance:**

1113

1114 In the case of a PRD, the Growth Management Ordinance is modified to allow the  
1115 applicant to construct a minimum of five (5) and a maximum of ten (10) dwelling  
1116 units, under a single permit, in a given calendar year. The applicant will not be  
1117 considered for another permit until the number of dwelling units, already under  
1118 permit have been completed. Furthermore, the Planning Board will not approve more  
1119 than one (1) PRD in any given calendar year.

1120

1121 **1108.00 Definitions:**

1122

1123 **1108.01 Accessory Building.** A detached building on the same lot with the primary building,  
1124 the use of which is clearly incidental to that of the primary building or use of the  
1125 land.

1126

1127 **1108.02 Building.** Any structure that has a roof and is intended to shelter people, animals or  
1128 chattel.

1129

1130 **1108.03 Buffer.** An upland area immediately adjacent to a wetland or a body of water,  
1131 usually specified by a setback distance from the edge, that serves to filter surface  
1132 water flowing into the wet land or body of water.

1133

1134 **1108.04 Cul-de-Sac.** A road designed for the purpose of a vehicle turnaround.

1135

1136 **1108.05 Density.** The total number of bedrooms allowed per net track area .

1137

1138 **1108.06 Driveway.** A private from the private road traversing private property, ordinarily  
1139 leading to a single residence.

1140

1141 **1108.07 Dwelling.** A structure that is designed or used as a place of residence for one family.

1142

1143 **1108.08 Dwelling Unit.** A structure or part of a structure used as a place of residence for one  
1144 family.

1145

1146 **1108.09 Family.** One or more persons who live as a single housekeeping unit in a dwelling  
1147 unit.

1148

1149 **1108.10 Frontage.** The continuous distance of any property line of a lot that abuts a private  
1150 road approved by the Planning Board.

1151

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

- 1152 **1108.11** **Home Owners Association.** Dwelling unit owners, acting as a group in accordance  
1153 with the Condominium Act, the Declaration and stated Bylaws.  
1154
- 1155 **1108.12** **Living Space.** Those defined areas within the dwelling that conform to realty  
1156 standards for normal living. They do not include basements, attics, garages, or out  
1157 buildings.  
1158
- 1159 **1108.13** **Lot.** A tract of land occupied or capable of being occupied by a building or use and  
1160 by accessory uses, including the open space provided for in this Ordinance.  
1161
- 1162 **1108.14** **Net Track Area.** Is the total usable area of a particular track of land.  
1163
- 1164 **1108.15** **Open Space.** Is that area that is held in common by the members of the Home  
1165 Owner's Association.  
1166 **1108.16** **Private Road.** A road constructed to or exceeding the Town standards for Class V  
1167 roads.  
1168
- 1169 **1108.16** **PRD.** Is a Planned Residential Development of single-family dwelling units.  
1170
- 1171 **1108.17** **Setback.** The minimum distance between two points as prescribed by this ordinance.  
1172
- 1173 **1108.18** **Single Family detached Dwelling Unit.** Any building designed for and occupied by  
1174 not more than one family and which is not attached to any other dwelling unit by any  
1175 means.  
1176
- 1177 **1108.19** **Shared Septic.** Septic systems that are shared by two or more dwelling units.  
1178
- 1179 **1108.20** **Shared Wells.** Wells that are shared by two or more dwelling units.  
1180
- 1181 **1108.21** **Structure.** A combination of materials assembled at a fixed location to give or  
1182 shelter, including but not limited to, buildings, accessory buildings and accessory  
1183 support uses.  
1184  
1185

1186 **1200.00 HOME OCCUPATION AND HOME BUSINESS**  
1187 *(AMENDED AND ADOPTED ON 3/18/17. DELETE 1200.00 SUBSECTION O)*  
1188 *(AMENDED AND ADOPTED 3/13/18)*

1189 **A. General Requirements**

- 1190 1. Home Occupations and Home Businesses shall be conducted in accordance  
1191 with all town, state and federal laws, regulations and licensing requirements.  
1192 2. The business activity shall take place within a residence or an accessory  
1193 building and must be incidental and secondary to the residential use of the  
1194 dwelling unit.  
1195 3. The business activity shall not change the character of the surrounding  
1196 neighborhood, nor will it provide window displays or other characteristics  
1197 associated with retail or commercial use.  
1198 4. Signs may not exceed four square feet in surface area, may not be internally  
1199 lit, and may not be placed within the town or state highway right of way.  
1200 5. No noise, vibration, dust, smoke, electrical disturbances, odors, heat or glare,  
1201 shall be produced by a Home Occupation or a Home Business, nor shall there  
1202 be any discharge of hazardous material into the air, ground or surface water.  
1203 6. Motor vehicles and equipment used for the Home Occupation or Home  
1204 Business shall be parked or placed as inconspicuously as possible.  
1205 7. Sufficient off-street parking shall be provided for any non-resident  
1206 employees, customers and suppliers who may normally be expected to need  
1207 parking spaces at one time. Where additional parking is required, the spaces  
1208 shall not be located in the front yard or within the side or rear setbacks.  
1209 Parking spaces shall be a minimum of 9 by 18 feet. On-street parking is  
1210 prohibited.  
1211 8. Traffic generated by the home business shall not create safety hazards or be  
1212 substantially greater in volume than would normally be expected in the  
1213 neighborhood.  
1214 9. Whenever a Home Occupation or Home Business exceeds any requirement  
1215 of this Ordinance, it must relocate into an appropriate zoning district and will  
1216 be subject to Site Plan Review by the Planning Board.  
1217 10. A Home Occupation or Home Business legally operating under the  
1218 provisions of Section 1200 as amended in 2017 of the Zoning Ordinance on  
1219 the date of the enactment of this Ordinance may continue unless and until the  
1220 following:  
1221 a. The occupation or business expands in size, scope or purpose.  
1222 b. The ownership of the property is transferred.  
1223  
1224 o. *1200.00 Subsection o- Deleted. (3/18/17)*  
1225

1226 **B. Home Occupation** *(Adopted 3/13/18)*

- 1227 1. A Home Occupation shall be permitted in all districts of the town as a matter  
1228 of right. No Site Plan Review or Special Exception by the Zoning Board of  
1229 Adjustment is required for a Home Occupation.  
1230 2. The business activity shall occupy less than one-fourth of the floor area of  
1231 the residence or an equivalent area in an accessory building.  
1232 3. The business shall be carried on by the resident owner, the resident owner's  
1233 family, a resident tenant, or a member of a resident tenant's family.  
1234 4. The business may have no more than one non-resident employee.  
1235 5. Exterior storage of materials and equipment is prohibited.  
1236

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

- 1237 **C. Home Business** *(Adopted 3/13/18)*  
1238 1. A Home Business shall be permitted in all districts of the town and is subject  
1239 to Site Plan Review by the Planning Board. A formal application is required.  
1240 2. The business activity shall occupy less than one-third of the floor area of the  
1241 residence or an equivalent area in an accessory building  
1242 3. The business shall be carried on by the resident owner, the resident owner's  
1243 family, a resident tenant or a member of the resident tenant's family.  
1244 4. The business may have no more than two non-resident employees.  
1245 5. Exterior storage of materials and equipment must be screened from view  
1246 from any public road or abutting property.  
1247

- 1248 **D. Exclusion:**  
1249 Food articles produced within a residence or on the surrounding property such as  
1250 vegetables, fruit, maple syrup, etc. may be sold seasonally from roadside stands and  
1251 are excluded from the requirements of this Ordinance.  
1252

1253 ***1200.01 Rural Lands One, Two and Three Districts. (AMENDED AND APPROVED TO***  
1254 ***DELETE SECTIONS 1200-01 a-e, 3/17/17)***  
1255

- 1256 1201.00 *Exclusions.*  
1257  
1258 Food articles produced within a residence or on the surrounding property such as  
1259 vegetables, fruit, maple syrup, etc. may be sold seasonally from roadside stands and  
1260 are excluded from the requirements of this Ordinance.  
1261

1262 ***1250.00 TELECOMMUNICATION FACILITIES (ADOPTED 3/10/98)***  
1263

1264 In recognition of the requirements of the federal Telecommunications Act of 1996,  
1265 this ordinance is designed and intended to balance the interests of the residents of  
1266 Lyndeborough, telecommunications providers, and telecommunications customers in  
1267 the siting of telecommunications facilities within the town of Lyndeborough so as to  
1268 ensure coordinated development of communications infrastructure while preserving  
1269 the health, safety and welfare of the Town and its residents. This ordinance  
1270 establishes general guidelines for the siting of telecommunications towers and  
1271 antennas to enhance and fulfill the following goals:  
1272

- 1273 a. Preserve the authority of Lyndeborough to regulate and to provide for  
1274 reasonable opportunity for the siting of telecommunications facilities, by  
1275 enhancing the ability of providers of telecommunications services to provide  
1276 such services to the community quickly, effectively, and efficiently;  
1277  
1278 b. Reduce adverse impacts such facilities may create, including, but not limited  
1279 to, impacts on aesthetics, environmentally sensitive areas, historically  
1280 significant locations, flight corridors, health and safety by injurious accidents  
1281 to person and property, and prosperity through protection of property values;  
1282  
1283 c. Provide for co-location and minimal impact siting options through  
1284 assessment of technology, current location options, future available locations,  
1285 innovative siting techniques, and siting possibilities beyond the political  
1286 jurisdiction of the Town;  
1287  
1288 d. Permit the construction of new towers only where all other reasonable  
1289 opportunities have been exhausted, and to encourage the users of towers and

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

- 1290 antennas to configure them in a way that minimizes the adverse visual impact  
1291 of the towers and antennas;  
1292  
1293 e. Require cooperation and co-location, to the highest extent possible, between  
1294 competitors in order to reduce cumulative negative impacts upon the Town;  
1295  
1296 f. Provide constant maintenance and safety inspections for any and all  
1297 facilities;  
1298  
1299 g. Provide for the removal of abandoned facilities that are no longer inspected  
1300 for safety concerns and Building code compliance. Provide a mechanism for  
1301 the Town to remove these abandoned towers to protect the citizens from  
1302 imminent harm and danger; and  
1303  
1304 h. Provide for the removal or upgrade of facilities that are technologically  
1305 outdated.  
1306

1307 **1251.00 Definitions.**  
1308

1309 **1251.01 Alternative Tower Structure.** Innovative siting techniques such as artificial trees,  
1310 clock towers, bell towers, steeples, light poles, and similar alternative design  
1311 mounting structures that camouflage or conceal the presence of antennas or towers.  
1312

1313 **1251.02 Antenna.** Any exterior apparatus designed for telephonic, radio, television, personal  
1314 communications service (PCS), pager network, or any other communications through  
1315 the sending and/or receiving of electromagnetic waves of any bandwidth.  
1316

1317 **1251.03 Co-location.** The use of an existing tower or an existing telecommunications facility,  
1318 for multiple purposes or users.  
1319

1320 **1251.04 Guy Wires.** A cable used to secure and steady a tower.  
1321

1322 **1251.05 Height.** The distance measured from ground level to the highest point on the tower  
1323 or other structure, including antennas.  
1324

1325 **1251.06 Monopole.** Any tower consisting of a single pole, constructed without guy wires  
1326 with ground anchors.  
1327

1328 **1251.07 Pre-existing Towers and Antennas.** Any tower or antenna lawfully constructed or  
1329 permitted prior to the adoption of this ordinance. Also, any tower or antenna  
1330 lawfully constructed in accordance with this ordinance that predates an application  
1331 currently before the Town.  
1332

1333 **1251.08 Secondary Use.** A use of land or of a building or portion thereof which is unrelated  
1334 to the principal use of the land or building.  
1335

1336 **1251.09 Telecommunications Facilities.** Any structure, antenna, tower, or other device that  
1337 provides commercial mobile wireless services, unlicensed wireless services, cellular  
1338 phone services, specialized mobile radio communications (SMR), and personal  
1339 communications services (PCS), and common carrier wireless exchange access  
1340 services.  
1341

1342 **1251.10 Tower.** A structure that is designed and constructed primarily for the purpose of  
1343 supporting one or more antennas, including self-supporting lattice towers, guy towers

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

1344 or monopole towers. The term includes radio and television transmission towers,  
1345 microwave towers, common carrier towers, cellular telephone towers, alternative  
1346 tower structures, and the like.

1347  
1348 **1252.00 Applicability.**

1349  
1350 **1252.01 Public Property.**

1351  
1352 Antennas or towers located on property owned, leased, or otherwise controlled by the  
1353 Town may be exempt from the requirements of this section, except that uses are only  
1354 permitted in the zones and areas as delineated in Section 1253.02. This partial  
1355 exemption shall be available if a license or lease authorizing the antenna or tower has  
1356 been approved by the governing body and the governing body elects, subject to state  
1357 law and local ordinance, to seek the partial exemption from this ordinance.

1358  
1359 **1252.02 Essential Services and Public Utilities.**

1360  
1361 Telecommunications facilities shall not be considered infrastructure, essential  
1362 services, or public utilities, as defined or used elsewhere in the Town's ordinances  
1363 and regulations. Siting for telecommunications facilities is a use of land, and is  
1364 subject to the Town's zoning ordinance and all other applicable ordinances and  
1365 regulations.

1366  
1367 **1253.00 Siting Standards.**

1368  
1369 **1253.01 General Provisions.**

1370  
1371 The uses listed in this section are deemed to be permitted uses in the designated  
1372 district in accordance with all other applicable ordinances and regulations of the  
1373 Town including Site Plan Review and approval by the Lyndeborough Planning  
1374 Board. In addition, all telecommunication facility applications will be technically  
1375 verified by an independent Town Consultant at the applicant's expense.

1376  
1377 a. Antennas and towers may be considered either principal or secondary uses.  
1378 A different existing use or an existing structure on the same lot shall not  
1379 preclude the installation of an antenna or tower on such lot.

1380  
1381 b. For purposes of determining whether the installation of a tower or antenna  
1382 complies with district development standards, the dimensions of the entire lot  
1383 shall control, even though the antennas and towers may be located on leased  
1384 parcels within such lots.

1385  
1386 c. Towers that are constructed, and antennas that are installed, in accordance  
1387 with the provisions of this ordinance, shall not be deemed to constitute the  
1388 expansion of a nonconforming use or structure.

1389  
1390 **1253.02 Districts Permitted.**

1391  
1392 New tower construction and co-location of telecommunication facilities shall be  
1393 permitted in the Light Industrial, Rural Lands One, Rural Lands Two and Rural  
1394 Lands Three Districts subject to all applicable local, state and federal regulations and  
1395 Site Plan Review and approval by the Planning Board.

1396  
1397

1398 **1253.03** **Height Requirements.**

1399  
1400 Maximum tower heights for each district are defined in the Height Table in the Site  
1401 Plan Review Regulations, however, towers shall only be constructed to the minimum  
1402 height required to provide adequate service. In addition, towers requiring lighting  
1403 shall not be permitted in any district. These requirements and limitations shall  
1404 preempt all other height limitations as determined by the Zoning Ordinance and shall  
1405 apply only to telecommunications facilities.  
1406

1407 **1254.00** **Bonding, Security and Insurance.**

1408  
1409 Recognizing the extremely hazardous situation presented by abandoned and  
1410 unmonitored towers, the Planning Board shall set the form and amount of security  
1411 that represents the cost for removal and disposal of abandoned towers in the event  
1412 that the tower is abandoned and the tower owner is incapable and/or unwilling to  
1413 remove the tower in accordance with Section 1255.00. Bonding and surety shall be  
1414 consistent with the provisions in the Subdivision Regulations. Furthermore, the  
1415 Planning Board shall require submission of proof of adequate insurance covering  
1416 accident or damage.  
1417

1418 **1255.00** **Removal of Abandoned Antennas and Towers.**

1419  
1420 Any antenna or tower that is not operated for a continuous period of twelve (12)  
1421 months shall be considered abandoned and hazardous to the public health and safety,  
1422 unless the owner of the tower provides annual certification of structural integrity.  
1423 The owner shall remove the abandoned structure within ninety (90) days of receipt of  
1424 a declaration of abandonment from the Town.. A declaration of abandonment shall  
1425 only be issued following a public hearing, noticed according to RSA 676:4, with  
1426 notice to abutters and the last known owner/operator of the tower. If the abandoned  
1427 tower is not removed within ninety (90) days, the Town may execute the security and  
1428 have the tower removed. If there are two or more users of a single tower, this  
1429 provision shall not become effective until all users cease using the tower.  
1430

1431 **1260.00** **OFF-HIGHWAY RECREATIONAL VEHICLE (OHRV) FACILITIES**  
1432 **ORDINANCE (Adopted March 9, 2004)**

1433  
1434 These features are in keeping with the general welfare that the enabling statutes have  
1435 empowered the Town to protect through the passage of Ordinances, including, but  
1436 not limited to the following:  
1437

- 1438 1) Ensuring that land use regulations result in developments that reflect  
1439 Lyndeborough's existing rural character;  
1440  
1441 2) Protecting the health, safety, welfare and property of Town residents and  
1442 OHRV participants;  
1443  
1444 3) Ensuring that the rate, type, and location of OHRV Facilities development  
1445 does not place an unreasonable burden on the Town's financial ability to  
1446 expand its public services;  
1447  
1448 4) Identifying preferred future land use patterns that shall, among other things,  
1449 consider the capacity of the roadway system to accommodate additional  
1450 traffic resulting from large-scale OHRV Facilities development and the  
1451 physical and fiscal ability of the Town to provide public services, including

- 1452 emergency medical care and fire protection;  
1453  
1454 5) Protection against potential adverse environmental impacts such as soil  
1455 erosion, water/air quality, noise pollution and wildlife disturbances;  
1456  
1457 6) Consider and guard against any adverse impact on property values caused by  
1458 non-commercial OHRV Facilities development;  
1459

1460 **1261.00 Specific Objectives:**

1461  
1462 *The Town of Lyndeborough may regulate the operation of OHRV Facilities in the*  
1463 *Town of Lyndeborough for the following purposes:*

- 1464  
1465 1) To mitigate the impact of large-scale State-Sanctioned, non-commercial OHRV  
1466 facilities developed in accordance with RSA 215-A and which are exempt from  
1467 regulation by the Town of Lyndeborough's Site Plan Review Ordinances.  
1468  
1469 2) To mitigate the impact from increased traffic on local roads, excessive noise,  
1470 dust, pollution, reduction in neighboring property values or other effects that  
1471 might detract from the rural characteristics outlined in the Sections "E" through  
1472 "H" of the Lyndeborough Master Plan (Approved May 16, 2002), which address  
1473 the need to preserve the environment in ways that are conducive to the  
1474 preservation of plants, wildlife, views and other characteristics that define the  
1475 rural character of Lyndeborough,  
1476  
1477 3) To determine appropriate hours of operation that mitigate noise, reduction of  
1478 abutting property values and other disturbances that adversely affect the  
1479 enjoyment of those properties,  
1480  
1481 4) To ensure that parking for OHRV Facilities is adequate and in keeping with the  
1482 rural characteristics of the Town of Lyndeborough,  
1483  
1484 5) To ensure that picnic areas associated with OHRV Facilities are adequate and  
1485 appropriately sited,  
1486  
1487 6) To Ensure that sanitation facilities associated with OHRV Facilities are adequate  
1488 and appropriately sited, and  
1489  
1490 7) To ensure that designated access routes to OHRV Facilities are adequate and  
1491 assure the safety of local residents and OHRV Facility participants.  
1492

- 1506 **1263.00 Scope of Regulations:**  
1507 *IT IS INTENDED THAT THIS ORDINANCE WILL APPLY TO ALL LARGE-SCALE, STATE-*  
1508 *SANCTIONED, NON-COMMERCIAL (SEE DEFINITIONS) OHRV FACILITIES*  
1509 *DEVELOPED IN ANY REGION OR DISTRICT WITHIN THE TOWN OF*  
1510 *LYNDEBOROUGH.*  
1511
- 1512 **1264.00 Definitions:**  
1513
- 1514 **1264.01 Abutter.** Any person whose property adjoins or is directly across the street or stream  
1515 from the land under consideration by the Board; and affected municipalities and the  
1516 regional planning commission(s) in the event of developments having regional  
1517 impact. If an abutting property is under condominium or other collective form of  
1518 ownership, the officers of the collective or association as defined in RSA 356-B:3,  
1519 XXIII, shall receive the formal notification. For purposes of receiving testimony  
1520 only, and not for the purpose of notification, the term “abutter” shall include any  
1521 person who is able to demonstrate that his/her land will be directly affected by the  
1522 proposal under consideration.  
1523
- 1524 **1264.02 Designee.** Person or organization designated by another to represent the landowner  
1525 in an official capacity in an action, activity or before a regulatory board, Town or  
1526 State authority.  
1527
- 1528 **1264.03 Landowner.** Owner of land with tax payment responsibility for same.  
1529
- 1530 **1264.04 Large-scale OHRV Recreational Facility.** A closed or limited access, non-  
1531 commercial destination trail system open to the public for the express purpose of  
1532 casual riding, racing, or other activities associated with OHRV use.  
1533
- 1534 **1264.05 Noise.** Any sound that would travel beyond property lines and is over and above that  
1535 normally associated with residential uses allowed in the district.  
1536
- 1537 **1264.06 Operator.** Person or organization with primary responsibility for the operation,  
1538 maintenance and oversight of an OHRV Facility.  
1539
- 1540 **1264.07 Picnic Areas.** Areas located within an OHRV facility that is equipped with picnic  
1541 tables, sanitation facilities or other amenities intended for use by participants to stop,  
1542 rest, eat, or use sanitation facilities.  
1543
- 1544 **1264.08 Pollution.** Excessive noise, fumes, dust, smoke, fuel or oil spills resulting from  
1545 OHRV activities.  
1546
- 1547 **1264.09 Sanitation Facilities.** Permanent rest rooms, portable toilets, portable wash rooms,  
1548 out houses.  
1549
- 1550 **1264.10 State-Sanctioned OHRV Facility.** A non-commercial OHRV trail system on public  
1551 or private land which has been accepted into the State’s inventory of OHRV trails, is  
1552 published in written materials and/or on the Internet as a trail open for public OHRV  
1553 use, and for which no usage fee is charged.  
1554
- 1555 **1264.11 OHRV.** All off-highway recreational vehicles as defined by RSA 215-1. **Such**  
1556 **vehicles shall not include:**  
1557 1) Devices typically operated by the handicapped which were not originally  
1558 manufactured as trail bikes or ATVs;  
1559 2) Lawnmowers, maintenance vehicles, construction and/or logging equipment;

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

1560 3) Any emergency vehicles operated by or under the direction of the  
1561 Lyndeborough Police, Fire and/or Emergency Management departments,  
1562 along with similar vehicles of local, State or federal government agencies  
1563 conducting similar activities.  
1564

1565 **1265.00 Regulated Uses:**  
1566

1567 In order to mitigate the negative impacts from noise, dust, fumes, pollution caused by  
1568 fuel and oil emissions that result from the operation of a OHRV Facility, and to  
1569 ensure the enjoyment of open land by landowners and OHRV participants,  
1570 owners/operators of OHRV Facilities must adhere to the following minimum  
1571 standards of operation:  
1572

1573 **1265.01** Trails regulated by this ordinance will be used in accordance with the State of New  
1574 Hampshire's best management land use practices and will avoid all wetland areas.  
1575

1576 **1265.02** A maximum of seventy-five (75) OHRVs may be allowed to operate on any OHRV  
1577 non-commercial, State Sanctioned facility, located in the Town of Lyndeborough, at  
1578 one time.  
1579

1580 **1265.03** Hours of Operation for OHRV Facilities are from 9:00 am to one hour before sunset.  
1581 This shall apply all 12 months of the year, including periods of complete or partial  
1582 snow cover.  
1583

1584 **1265.04** Speed limits shall be observed to assure the safety of participants and others. OHRV  
1585 operators must post and enforce speed limits so that no person shall operate a OHRV  
1586 at a speed greater than is reasonable and prudent under the existing conditions and  
1587 without regard for actual and potential hazards. In all cases speed shall be controlled  
1588 so that the operator will be able to avoid colliding with any person, animal, vehicle,  
1589 or object.  
1590

1591 1) Speed limits for OHRV Facilities within the boundaries of Lyndeborough  
1592 shall be as follows:  
1593

- 1594 a. 10 miles per hour within 150 feet of any house or property boundary;
- 1595 b. 10 miles per hour within any established rights-of-way or adjacent to  
1596 town roads, highways, or other public ways;
- 1597 c. 10 miles per hours on any class IV, V, and VI highways or bridges  
1598 designated as open for OHRV operation by the Town;
- 1599 d. 10 miles per hour at trail junctions or parking lots;
- 1600 e. 25 miles per hour on all other areas within the OHRV Facility.  
1601

1602 **1265.05** Parking areas must be accessible from approved access roads, must have at least two  
1603 (2) means of entry and egress and must also be easily accessible by Fire and  
1604 Emergency Management personnel and their equipment. Ample area must be  
1605 allowed for turning and maneuvering of OHRV tow vehicles, fire and emergency  
1606 management vehicles at all times, including when the facility is at maximum site  
1607 capacity. High intensity outdoor lighting whenever needed to assure the safety and  
1608 welfare of OHRV participants is permitted only in parking areas. Parking area  
1609 lighting and lights from vehicular traffic associated with this non-residential use shall  
1610 be shielded or buffered to prevent off-site glare, sky-glow and light trespass.  
1611

1612 **1265.06** Designated Refueling Areas, where all refueling must take place, must be available  
1613 and identified for all OHRV Facility participants. Refueling areas must consist of a  
non-permeable fueling pad made of concrete or another non-permeable material.

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

1614 Refueling areas must be available in adequate numbers to accommodate the facility  
1615 at maximum site capacity and must be sited convenient to major trails, parking and  
1616 picnic areas, and other likely fueling locations.  
1617

1618 **1265.07** Picnic Areas must be located in areas that are accessible for fire and emergency  
1619 management purposes as determined by the Lyndeborough Fire and Emergency  
1620 Management Departments. The areas must not interfere with views or ridgelines and  
1621 must be sited at least 1000 feet from abutting property boundaries.  
1622

1623 **1265.08** Sanitation Facilities must be available at all picnic areas. Landscaping and plantings  
1624 shall be used to screen sanitary facilities in open or prominent areas so as not to  
1625 interfere with views, ridgelines or other vantage points and must be sited at least  
1626 1000 feet from abutting property boundaries. Landscaping and plantings shall be  
1627 compatible with native vegetation. Trees should be planted in random clusters, not in  
1628 rows, to complement the appearance of natural tree stands. The height of trees at  
1629 planting should be sufficient to completely obscure any sanitation facility on the site.  
1630

1631 **1265.09** All roadways proposed for access to and from an OHRV recreational facility must be  
1632 adequate to accommodate any increase in traffic resulting from the OHRV  
1633 development and allow for safe passage for both local and related OHRV traffic.  
1634 Costs for any road improvements required to bring an access road into compliance  
1635 would be borne by the OHRV Facility Operator.  
1636

1637 **1265.10** In accordance with state law RSA 215-A:6 (IX), OHRVs are prohibited from  
1638 traveling on all roads, including, but not limited to, Class V and Class VI roads,  
1639 unless otherwise approved by the Town of Lyndeborough.  
1640

1641 **1266.00** *Conflicting Provisions:*  
1642  
1643 Where these regulations are in conflict with other local, state or federal ordinances or  
1644 regulations, the provision that imposes the greater restriction or higher standard shall  
1645 apply.  
1646

1647 **1267.00** *ENFORCEMENT, FINES AND PENALTIES:*  
1648  
1649 *THE PROVISIONS OF THIS ORDINANCE SHALL BE ENFORCEABLE IN ACCORDANCE*  
1650 *WITH SECTIONS 1503.00 AND 1504.00 OF THE LYNDEBOROUGH ZONING*  
1651 *REGULATIONS.*  
1652

1653 **1300.00** *NON-CONFORMING USES*  
1654

1655 **1301.00** *Non-conforming Uses and Buildings:*  
1656  
1657 Any non-conforming uses of land or buildings may continue in their present use,  
1658 except that any non-conforming use of land or building may not be:  
1659

- 1660 1) changed to another non-conforming use;
- 1661 2) re-established after abandonment for one year;
- 1662 3) extended or enlarged;
- 1663 4) rebuilt after damage exceeding fifty (50) percent of its former market value.

1664  
1665  
1666

1667 **1302.00 Lots of Record:**

1668  
1669  
1670  
1671  
1672  
1673  
1674  
1675  
1676  
1677  
1678  
1679  
1680  
1681

Where a lot of record at the time of the effective date of this Ordinance has less area and/or frontage than herein required in the District in which it is located:

- 1) The lot may be used for a single family dwelling if permitted in that district subject to New Hampshire Water Supply and Pollution Control Division approval and subject to all district regulations applicable to lots within the District wherein the lot is located with the exception of lot size and/or frontage.
- 2) The lot may be used for any non-residential use permitted in the District in which it is located subject to New Hampshire Water Supply and Pollution Control Division approval and subject to all district regulations applicable to lots within the District wherein the lot is located with the exception of lot size and/or frontage.

1682

1683 **1303.00 Special Exceptions for Non-conforming Buildings. (3/10/98)**

1684  
1685  
1686  
1687  
1688

Additions to existing residences or accessory buildings that lie wholly or in part within the lot setbacks designated for the zoning district may be permitted by Special Exception when no alternative is deemed reasonable by the Zoning Board of Adjustment, in accordance with any or all of the following:

1689  
1690  
1691  
1692  
1693  
1694  
1695  
1696  
1697

- 1) the proposed addition will not be constructed in the setback area; or
- 2) the proposed addition will not be closer to the lot line than the most intrusive portion of the existing building; or
- 3) the proposed addition is necessary for the health or safety of the occupants of the building as determined by the Building Inspector at the time of permit application.

1698 **1400.00 BOARD OF ADJUSTMENT (3/13/07)**

1699

1700

1701

1702

1703

1704

1705

1706

1707

The Zoning Board of Adjustment shall consist of five (5) elected members, whose duties shall conform to the provisions of Chapters 672-677 NH RSA. Members shall be elected for three (3) year terms as terms expire or vacancies occur. Appointments to fill vacancies shall be only for the unexpired portion of the term.

The ZBA may act upon appeals from administrative decisions, special exceptions to the Zoning Ordinance and variances from the Zoning Ordinance.

TOWN OF LYNDEBOROUGH  
ZONING ORDINANCE

---

1708 **1500.00 ENFORCEMENT AND ADMINISTRATION**

1709

1710 **1501.00 Board of Selectmen:**

1711

1712 It shall be the duty of the Board of Selectmen to enforce the provisions of this  
1713 Zoning Ordinance.

1714

1715 **1502.00 Building Inspector:**

1716

1717 It shall be the duty of the Building Inspector to administer the provisions of this  
1718 Zoning Ordinance.

1719

1720 The Building Inspector shall issue any and all building permits requested when such  
1721 permits are in accordance with the provisions of this Ordinance.

1722

1723 **1503.00 Violations of the Ordinance:**

1724

1725 Upon any well founded information that this Ordinance is being violated, the Board  
1726 of Selectmen shall take immediate steps to enforce the provisions of this Ordinance  
1727 as provided in RSA 676:17 by taking the appropriate legal action and/or seeking an  
1728 injunction in the Hillsborough County Superior Court.

1729

1730 **1504.00 Fines and Penalties:**

1731

1732 Any person, firm or corporation violating any of the provisions of this Ordinance, or  
1733 Subdivision regulations adopted hereunder, or any provision or specification of any  
1734 application, plat or plan approved by, or any requirement or condition of a permit or  
1735 decision issued by the Board of Selectmen, Code Enforcement Officer or Land Use  
1736 Board acting under its authority:

1737

1738 1) shall be guilty of a misdemeanor if a natural person, or guilty of a felony if any  
1739 other person;

1740

1741 2) shall be subject to a civil penalty not to exceed \$100.00 for each day that such  
1742 violation is found to continue after the conviction date or after the date on  
1743 which the violator received written notice from the Town of Lyndeborough  
that he is in violation of any such Ordinance, whichever is earlier;

1744

1745 3) the Board of Selectmen or its designated agent, the Code Enforcement Officer,  
1746 shall be further authorized to take whatever action against violators as may be  
otherwise provided for in NH RSA 676:17, as may be amended.

1747

1748

1749 **1600.00 APPEALS**

1750  
1751  
1752  
1753  
1754  
1755  
1756  
1757  
1758  
1759  
1760  
1761

Any person aggrieved from the decision of the Code Enforcement Officer may appeal to the Zoning Board of Adjustment (ZBA) provided that such appeal must be made in writing within thirty (30) days from the date of the order or decision complained of and submitted to the clerk of the Zoning Board of Adjustment. That such appeals may also be taken by any officer, department or bureau of the Town of Lyndeborough affected by any decision of the Code Enforcement Officer. The Code Enforcement Officer shall transmit forthwith to the Zoning Board of Adjustment all of the papers constituting the record upon which the action appealed from was taken. The Zoning Board of Adjustment shall have the power to hear only those matters as set forth in RSA 674:33, as amended.

1762 **1700.00 CONFLICT AND SEVERABILITY**

1763  
1764  
1765  
1766  
1767  
1768  
1769  
1770  
1771  
1772  
1773  
1774  
1775  
1776  
1777  
1778  
1779

If any section of this Ordinance is found to be in conflict with any other section of the Ordinance or with any local, state, or federal regulation, the more stringent standard shall apply. The invalidity, unconstitutionality or illegality of any Section or provision of this Ordinance or of any zoning district boundary shown on the zoning map shall not have any affect upon the validity, constitutionality or legality of any other Section, provision or zoning district boundary. (March 1994)

**1.0 PREAMBLE**

In pursuance of authority conferred by Chapter 674:16, N.H. Revised Statutes Annotated, 1955, as amended, (N.H. RSA), the following Ordinance is hereby enacted by the voters of the Town of Wilton, New Hampshire, in Official Town Meeting this 13th day of March 1990.

The purpose of this ordinance is to promote and protect the health, safety, prosperity, convenience or general welfare of the inhabitants, as well as efficiency and economy in the process of development of the incorporated Town of Wilton, by the promotion of good civic design and arrangements including protection of farmlands and open space; by wise and efficient expenditures of public funds; by the adequate provision of public utilities and other public requirements; and by other means. The Articles of this Ordinance take precedence over the articles of the "Wilton Code of Building and Sanitation" and supersede all "Zoning Ordinances" previously adopted by the Town of Wilton, New Hampshire.

For the purpose of this Ordinance, wherever the effective date of the ordinance is referred to herein, this reference is defined as the date the particular section or subsection was first adopted by the Town of Wilton.

## 2.0

### ***DISTRICTS***

*(Adopted March 2003)*

For the purposes of this ordinance, the Town of Wilton is divided into the following primary Zoning Districts: RESIDENTIAL DISTRICT, GENERAL RESIDENCE AND AGRICULTURAL DISTRICT, COMMERCIAL DISTRICT, INDUSTRIAL DISTRICT and OFFICE PARK DISTRICT. All land in the Town of Wilton is located within one of the above-mentioned primary districts.

The ordinance also defines the following overlay Zoning Districts: RESEARCH AND OFFICE PARK DISTRICT, GRAVEL EXCAVATION DISTRICT, FLOODPLAIN CONSERVATION DISTRICT, WETLANDS CONSERVATION DISTRICT, AQUIFER PROTECTION DISTRICT, AGE-RESTRICTED HOUSING DISTRICT, WATERSHED DISTRICT and PERSONAL WIRELESS SERVICE FACILITIES DISTRICT. Land in the Town of Wilton may be located outside of any overlay district or within one or more overlay districts in addition to its underlying primary district. Each Zoning District is described by a section of this ordinance, which specifies the permitted uses and the restrictions on uses in that district. Land in an overlay district may have additional permitted uses or additional restrictions beyond those provided in its underlying primary district. *(Amended March 2020)*

The location of each district is specified in the section of the ordinance that describes the district; except that GENERAL RESIDENCE AND AGRICULTURAL DISTRICT encompasses all land not listed as belonging to any other primary zoning district. The Zoning Districts and their boundaries are also depicted by colors or lines on a Zoning Map that is filed with the Wilton Town Clerk.

In the event the zoning district or overlay zoning district locations cannot be determined from the zoning ordinance text, then the adopted zoning or zoning overlay map may be used to resolve ambiguities in the district locations along with Town Meeting and Planning Board minutes. *(Amended March 2007)*

### 3.0 **DEFINITIONS**

For the purpose of this Ordinance, certain terms are defined as provided in this section.

- 3.1.1 Accessory Building. A building subordinate to the permitted main building on a lot, which is used for purposes incidental to and customarily or habitually associated with the use of the main building. (*Amended March 2009*)
- 3.1.1-a Accessory Use. A use of a lot or building which is occasioned by and subordinate to the permitted primary use of that lot or building, and is customarily or habitually associated with it. (*Adopted March 2005; Amended March 2009*)
- 3.1.2 Aircraft. Airborne conveyance, mechanical or otherwise, intended to transport one or more persons. (*Amended March 2021*)
- 3.1.3 Aquifer. Land areas determined to overlay water saturated stratified drift deposits of sands and/or gravels capable of yielding private and public potable water supplies.
- 3.1.4 Buffer. An area within a lot or site, generally adjacent to and parallel with the property line, either consisting of natural existing vegetation or created by the use of trees, shrubs, fences and/or berms designed to limit continuously the view of and/or sound from the site to adjacent sites or properties. (*Amended March 1991*)
- 3.1.5 Building. A structure having a roof or cover and forming a shelter for persons, animals or property.
- 3.1.6 Dwelling. A building containing one or more dwelling units used for non-transient occupancy. The term "dwelling" includes but is not restricted to private homes, apartment buildings, condominiums and town houses. (See also "Hotel" and "Rooming House".)
- a. Single Family Dwelling. A building containing one dwelling unit.
- b. Duplex or Two-Family Dwelling. A building containing two (2) dwelling units attached, designed or arranged as separate housekeeping units within the dwelling.
- c. Multi-Family Dwelling. A building containing three (3) or more dwelling units attached, designed or arranged as separate housekeeping units within the dwelling.
- 3.1.7 Dwelling Unit. One or more living or sleeping rooms arranged for the use of one or more individuals living as a single-family housekeeping unit, with cooking, living, sanitary and sleeping facilities. (See also "Lodging Unit".)
- 3.1.8 Family. A group of individuals, whether or not related, living together in a dwelling unit in a structured relationship constituting an organized housekeeping unit. (*Amended March 2018*)
- 3.1.9 Floodplain. A land area adjacent to a river, stream, lake or other watercourse subject to flooding during periods of high water and runoff including but not limited to those areas generally identified on the Town of Wilton, NH, Flood Boundary and Floodway Maps and the Flood Insurance Rate Maps prepared by the U.S. Department of Housing and Urban Development, Federal Insurance Administration.

- 3.1.10 Frontage. The continuous length of a lot bordering on the public right-of-way providing the principal route of access to a lot, subdivision or other type of development.
- 3.1.11 Hazardous or Toxic Materials or Liquids. Materials or liquids that pose a threat to the environment, whether in use, storage or transit, including without exception hazardous waste identified and listed in accordance with Section 3001 of the Federal Resource Conservation and Recovery Act of 1976, and any amendments thereto.
- 3.1.12 Home Occupation. A business operated in a building that is incidental and subordinate to the use of the building or lot for residential purposes in compliance with the criteria established for home occupations in section 5.3.1 or 6.6.1 of this Ordinance. *(Adopted March 1998)*
- 3.1.13 Hospital. A building providing twenty-four (24) hour in-patient services for the diagnosis, treatment and care of human ailments.
- 3.1.14 Hotel. A building or buildings containing one or more dwelling units or lodging units intended or used primarily for transient occupancy, together with any common cooking, dining, living or sanitary facilities for the shared use of the occupants. The term "hotel" includes, but is not restricted to, inns, motels, motor inns, tourist homes and tourist courts. (See also "Dwelling" and "Rooming House".)
- 3.1.14-a Junk. Old or scrap copper, brass, rope, rags, batteries, paper, trash, rubber debris, waste, or junked, dismantled, or wrecked automobiles, or parts thereof, iron, steel, and other old or scrap ferrous or nonferrous material. *(Adopted March 2009)*
- 3.1.14-b Junkyard. or Automotive recycling (salvage) yard' - An establishment or place of business which is maintained, operated, or used for storing, keeping, buying or selling junk, or for the maintenance or operation of an automotive recycling (salvage) yard, and includes garbage dumps and sanitary fills. The word does not include any motor vehicle dealers registered with the director of motor vehicles under RSA 261:104 and controlled under RSA 236:126. *(Adopted March 2009)*
- 3.1.15 Lodging Unit. One or more living or sleeping rooms arranged for occupancy by a single family, but sharing common cooking, dining, living or sanitary facilities with other lodging units. (See also "Dwelling Unit".)
- 3.1.16 Lot or Parcel. A single area of land defined by metes and bounds or boundary lines as shown in a recorded deed or on a recorded plan. *(Amended March 1992)*
- 3.1.17 Lot, Building. A lot having the minimum area and frontage to meet the requirements of this ordinance.
- 3.1.18 Lot Line. A line dividing one lot from another.
- a. Front lot line. The lot line dividing the lot from a street right-of-way and providing the principal route of access to the lot or subdivision.
  - b. Rear lot line. The lot line opposite to the front lot line.
  - c. Side lot line. Any lot line not a front or rear lot line.

- 3.1.19 Lot of Record. Land designated as a separate and distinct parcel in a legally recorded deed filed in the record of Hillsborough County, New Hampshire. *(Amended March 1992)*
- 3.1.20 Manufactured Housing. Any structure, transportable in one or more sections, which, in the traveling mode, is 8 body feet or more in width and 40 body feet or more in length, or when erected on site, is 320 square feet or more, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to required utilities, NH RSA 674:31. Manufactured housing does not include pre-site built housing.
- 3.1.21 Manufactured Housing Park. A land area occupied or designed for occupancy by two or more manufactured homes in use for living purposes.
- 3.1.21-a Mean High Water Level. The line on the shore, running parallel to the water body, that defines the high level of the water body, established by the fluctuations of water and indicated by physical characteristics such as a clear, natural line impressed on the immediate bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter or debris, or other appropriate means that consider the characteristics of the surrounding areas. Where the mean high water level is not easily discernable, the mean high water level may be determined by the NH Department of Environmental Services. *(Adopted March 2020)*
- 3.1.22 Non-conforming Building or Structure, or Use. A building or structure, or a use of any building, structure, or land, which, in whole or in part, does not conform to the regulations of the district in which the building, structure, or use is located, but which did conform to the regulations, if any, in effect at the time the building, structure, or use came into existence, or was permitted by variance, and which has remained in existence since that time with no interruption of more than one (1) year. *(Amended March 2007)*
- 3.1.23 *(Deleted). (March 2007)*
- 3.1.23-a Off Premise Sign. A sign that directs attention to an activity which is not related to the premises where such sign is located or to which it is affixed.
- 3.1.24 Perennial Stream. Any stream with a minimum drainage area of one (1) square mile, 640 acres.
- 3.1.25 Pre-site Built Housing. Any structure designed primarily for residential occupancy which is wholly or in substantial part made, fabricated, formed or assembled in off-site manufacturing facilities in conformance with the United States Department of Housing and Urban Development minimum property standards and local building codes, for installation, or assembly and installation, on the building site, NH RSA 674:31-a. Pre-site built housing does not include manufactured housing.
- 3.1.26 Public Right-of-Way. Either a town, state and federal highways and the land on either side as covered by statutes, OR: a private road which is depicted on a subdivision plan approved by the Wilton Planning Board, is designed and constructed to town road standards, is offered to the Town of Wilton for acceptance as a town road (whether or not it is accepted), is guaranteed to remain open in perpetuity to public use for access to the property in the subdivision, and whose permanent maintenance is governed by covenants approved as part of the subdivision approval. *(Amended March 2009)*

- 3.1.27 Rooming House. A building containing one or more lodging units used primarily for rental to non-transient occupants, together with any common cooking, dining, living or sanitary facilities for the shared use of the occupants. The term "rooming house" includes, but is not restricted to, boarding houses, lodging houses and dormitories. See also "Hotel" and "Dwelling".
- 3.1.28 School. A learning center having an academic curriculum approved for attendance purposes by the State Department of Education.
- 3.1.29 Setback. The minimum distance between two (2) points prescribed by the Ordinance.
- 3.1.30 Sign. Any lettering, word, numeral, pictorial representation, emblem, trademark, device, banner, pennant or other figure of similar character located outdoors and being a structure or any part thereof, or attached to, painted on, or in any other manner represented on a building or other structure, and used to announce, direct, attract, advertise or promote.
- 3.1.31 Structure. Any construction, erection, assemblage or other combination of materials upon the land which is made in such a manner as to imply that it will remain in position indefinitely or which in fact remains on the land for a period of time in excess of thirty (30) days. Structures do not include driveways, fences, stonewalls, mailboxes, culverts, and drainage measures approved by the Planning Board as part of a subdivision or site plan. *(Amended March 2003)*
- 3.1.32 Town Zoning Maps. Maps of the Town of Wilton that shows the boundaries of the zoning districts or zoning overlay districts. Maps shall be adopted by the Planning Board after conducting a properly noticed public hearing, with official copies residing in the Town Clerk's office. Approved maps shall depict districts, overlay districts and their boundaries as approved in the zoning ordinance text by voters at Town Meeting. *(Amended March 2007)*
- 3.1.32-a Trip. A single vehicle movement to or from a specified location, or between two specified points. A "round trip" counts as two trips. *(Adopted March 2005)*
- 3.1.33 Yard, Front. That portion of the lot nearer to the front lot line than the principal building.
- 3.1.34 Wetlands. An area that is defined from time to time by RSA 482-A:2, X and which shall, unless RSA 482-A:2, X indicates otherwise, include land that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances does support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands shall be delineated as set forth time to time in the rules adopted under RSA 482-A. *(Adopted March 2002, Amended March 2020)*
- 3.1.34-a Water body. Any pond, lake, river, stream or similar area up to its Mean High Water Level. *(Adopted March 2020)*

#### **4.0 GENERAL PROVISIONS**

This Chapter establishes controls to prevent land and structures, and the use thereof, from creating any potentially dangerous, injurious, noxious or otherwise objectionable condition that could adversely affect the health or safety of the Wilton community, the quality of the environment, or the use, enjoyment or value of surrounding property. It also addresses certain general requirements with respect to the use of land located in Wilton, as well as for the grant of a special exception under, or a variance from the requirements of, this Ordinance. Except as expressly set forth below, all (1) structures, existing or proposed, in the Town of Wilton, (2) uses thereof or of any land in the Town of Wilton, and (3) operation of any equipment, including, in each case, structures and uses permitted by right, special exception or variance, must comply with this Chapter, as well as with all other applicable requirements of this Ordinance, Section E of the Wilton Land Use Laws (the Building Code Ordinance), and State and Federal law. If there is a conflict between any such requirements, the most restrictive shall prevail. To the extent an existing structure or use is extended, enlarged, changed, moved, reconstructed or altered, it shall comply with this Chapter and all such other applicable requirements. *(March 2021)*

#### **4.1 Alteration and Removal of Materials.**

Excavation of certain earth materials regulated under RSA 155-E is permitted only in the Gravel Excavation District under the restrictions of Chapter 9B of this Ordinance, except where exempted under RSA 155-E:2 and RSA 155-E:2-a. Otherwise, no excavation, mining, prospecting or drilling for oil, natural gas or similar substances shall be made on, and no materials shall be removed from, any site except as incidental to, and only as required by, the construction of permitted improvements thereon, and, upon completion, exposed areas shall be backfilled, and disturbed ground shall be graded, leveled, paved or landscaped in accordance with RSA:155-E. *(Amended March 2021)*

#### **4.2 Sanitary Waste Disposal.**

All sanitary waste shall be properly disposed of in such a manner as to prevent all health hazards. New construction in areas serviced by the Town sewer system shall be required to connect to the system. All other construction shall be served by septic systems constructed, maintained and replaced in accordance with the standards set and enforced by the New Hampshire State Department of Health and Welfare and by the New Hampshire Water Supply and Pollution Control Division (WSPCD), as well as the following requirements and those otherwise set out in this Ordinance or required by the Planning Board:

- a. no system shall be located in poorly or very poorly drained soils;
- b. systems shall be set back from wetlands, water bodies, open water bodies and perennial streams as follows:
  1. systems located entirely or partially in highly permeable soils (a permeability of six (6) inches per hour throughout as indicated in the *USDA Soil Survey of Hillsborough County, New Hampshire, Western Part*) - 125 feet;
  2. systems located entirely or partially in somewhat poorly drained soils, moderately well drained soils or soils with a restrictive layer and a slope of 8 percent or greater - 100 feet; and
  3. systems located in all other soils - 75 feet.
- c. Before covering, all systems shall be inspected by the State of New Hampshire at the sole cost of the owner. *(Amended March 2021)*

**4.3 Unregistered Motor Vehicles.**

No more than two unregistered motor vehicles that are no longer in condition for legal use on public highways are permitted on a lot, except in connection with the operation of an approved business there. *(Amended March 2021)*

**4.4 Temporary Placement of Manufactured Homes and Non-residential Facilities.**

4.4.1 Temporary Placement of Manufactured Homes. The Building Inspector may grant a permit to locate a [manufactured home](#) for use as a temporary dwelling unit for a period of up to twelve months on the [lot](#) where a permanent [dwelling](#) is being constructed or substantially remodeled or reconstructed, subject to required setbacks. For good cause shown, the Building Inspector may grant one or more extensions to the permit. At the end of the twelve-month period or the last extension thereto, the [manufactured home](#) must be removed from the [lot](#). The temporary [dwelling unit](#) shall be serviced by existing or new approved septic/sewer and water systems. *(Amended March 2021)*

4.4.2 Temporary Placement of Non-residential Facilities. The Building Inspector may grant a permit to erect or locate temporary office or other non-residential facilities, including, without limitation, on construction sites, for a period of up to six months on the lot where a permanent [structure](#) is being reconstructed after damage by fire or other natural cause. Such temporary facilities may not be used for manufacturing activities. Within 60 days following the issuance of a permit hereunder, an application for site plan review must be submitted to the Planning Board, showing the permanent location of all such facilities. For good cause shown, the Building Inspector may grant one or more extensions to the permit. At the end of the six-month period or the last extension thereto, the temporary facility must be removed from the [lot](#). Temporary facilities shall be serviced by existing or new approved septic/sewer and water systems. *(Amended March 2021)*

4.4.3 Compliance; Right to Remove. The placement and use of all temporary facilities permitted under Section 4.4.1 or 4.4.2 shall comply with the setback and other requirements of this Ordinance, as well as other applicable law. In the event any such temporary facility is not timely removed upon expiration of the applicable permit, the Town may, upon notice to the owner, remove it at the owner's expense. *(Amended March 2021)*

**4.5 Private Aircraft Landings and Takeoffs.**

Private aircraft shall not be permitted to land or take-off, nor shall any related equipment be operated, on any land located in the Town of Wilton, other than in connection with emergency situations. *(Amended March 2021)*

**4.6 Snow Storage or Removal.**

All plans for proposed development in zoning districts other than the Residential and Residential/Agricultural districts shall address snow storage and/or removal, in accordance with applicable stormwater and other requirements, which shall not conflict with landscaping, visibility, or drainage requirements for the site. *(Amended March 2021)*

**4.7 Maintenance of Landscaping.**

Landscaping required to be installed pursuant to an approved site plan or otherwise by this Ordinance shall be maintained as originally specified and approved. Failure to replace dead or diseased vegetation, shall be deemed a violation of this Ordinance and the Town may, upon notice to the owner, replace it at the owner's expense. *(Amended March 2021)*

**4.8 Wetlands Conservation District Setback.**

All structures must be set back 50 feet from delineated [wetlands](#) and [water bodies](#). (Amended March 2021)

**4.9 Wetlands Conservation District Buffer.**

No fertilizer shall be applied to the vegetation or soils located within 25 feet of delineated wetlands or water bodies. Between 25 and 50 feet from the delineated wetland or water body, slow or controlled release fertilizer, as defined by the NH Department of Environmental Services, may be used. No chemicals, including pesticides or herbicides of any kind, shall be applied to ground, turf or established vegetation within 50 feet of the delineated wetland or water body, except if applied by a licensed horticultural professional. (Amended March 2021)

**4.10 Performance Standards.**

The use or operation of any land, structure or equipment located in the Town of Wilton shall not produce conditions, including, without limitation, the following, that could (1) adversely affect the health or safety of the Wilton community, that of its neighbors, the quality or harmony of the environment, or the use, enjoyment or value of surrounding property, or (2) violate this Ordinance, the Building Code Ordinance or any other applicable local, State or Federal requirements. For purposes of these performance standards, the term "property line" means the boundary of the property on which a structure or equipment is located or on which a use takes place. *(Amended March 2021)*

4.10.1 Vibration and Ground Motion. Except in connection with permitted excavation activities or the demolition, construction or reconstruction of a structure, no activity shall generate any vibration or other aperiodic ground motion inherently and recurrently transmitted through the ground that is perceptible without the aid of instruments at any point beyond the property line. (Amended March 2021)

4.10.2 Noise. No activity, or failure to act, shall generate or result in the generation of noise that could interfere with the reasonable enjoyment of life and property or the conduct of business or that would exceed the limits established below or pursuant to any permit issued by the Town.

No activity, or failure to act, shall cause the continuous sound level generated on a lot to exceed the following limits at the property lines of contiguous lots (receptor lots) in the following Land Use Zones, as measured in decibels by an acceptable instrument at the applicable property line:

Land Use Zone of Receptor Lot	Daytime (7:00 am-7:00 pm, excluding Sundays/ Holidays)	Nighttime (7:01 pm – 6:59 am, and Sundays/Holidays)
Residential	55	45
Residential/Agricultural	55	45
Commercial	65	55
Industrial	75	75

For purposes of this section, the term “acceptable instrument” means one conforming to the specifications of the American National Standard (ANSI S1.4--1983) for Type 1 precision or Type 2 general purpose sound-level meters.

Notwithstanding an ambient sound level at the receptor lot line as high as the limits set out above, no activity, or failure to act, shall cause the continuous noise level at any given time to exceed such limits, or the level of the ambient sound level, if it is higher. For purposes of this section, the term “ambient sound level” means the noise level at a location from time to time produced by transportation vehicles, natural phenomena and distant activity not related to a local sound source.

No activity, or failure to act, shall cause an impulsive sound level that exceeds the following limits, as measured in decibels by an acceptable instrument at the property line in applicable locations:

Land Use Zone	Daytime (7:00 am-7:00 pm, excluding Sundays/Holidays)	Nighttime (7:01 pm – 6:59 am, and Sundays/Holidays)
Residential	60	45
Residential/Agricultural	60	45
Commercial	75	55
Industrial	85	75

For purposes of this section, the term “impulsive sound” means a repeated sound of short duration characterized by an abrupt onset and rapid decay and occurring at the rate of less than one per second.

The requirements of this section shall not apply to the operation or conduct of (1) temporary on-site generators providing emergency power during electrical outages; (2) customary equipment used during daytime construction of permitted structures, such as air compressors or generators; (3) power tools for intermittent residential use and maintenance, such as mowers, chainsaws, snow removal equipment, etc.; (4) permitted events conducted during the prescribed time period; (5) emergency vehicles or equipment or alarm systems; (6) customary agricultural activities during normal working hours; (7) school or church bells or chimes; and (8) blasting activity conducted in accordance with permit requirements. *(Amended March 2021)*

4.10.3 Odors. A non-agricultural activity shall not generate any odor that could reasonably be considered objectionable or offensive to persons of average sensibilities in concentrations perceptible at any point beyond the property line. *(Amended March 2021)*

4.10.4 Smoke and Airborne Particulates. Subject to Section 4.10.5 below, no activity shall result in the emission or discharge, from any source whatever, of any smoke or particulate matter, such as dust, dirt or ash, that may become airborne, with a density greater than that described as No. 1 on the Ringelmann chart, measured at the point of emission into the atmosphere or other point of discharge. Particulate matter shall not be visible to the human eye at any point beyond the property line. No person shall cause or permit any materials to be handled, transported, or stored in a manner that would allow any particulate matter to become airborne.

These requirements shall not apply to (1) the operation of residential heating equipment and systems in accordance with applicable requirements and manufacturers' specifications, (2) permitted outdoor fires, (3) customary agricultural activities, or (4) use of residential fireplaces. *(Amended March 2021)*

- 4.10.5 Discharge of Hazardous or Toxic Materials, Gases or Liquids. No (1) hazardous or toxic materials, liquids or gases, (2) hazardous radioactive materials or emission, or (3) other non-toxic substance that nevertheless could harm the public health, its safety or the environment in combination with other activities or substances, may be discharged or emitted into the air, soil or groundwater, the Town sewer system, any septic system or any stormwater system.

These requirements shall not apply to (1) agricultural activities conducted in accordance with local, State and Federal requirements, and best management practices promulgated from time to time by State agricultural agencies; (2) smoke emitted in compliance with, or from sources excepted from, Section 4.10.4 above, or (3) customary residential chemical applications by licensed providers or in compliance with manufacturers' specifications and other best practices. *(Amended March 2021)*

- 4.10.6 Lighting and Glare. Lighting or structural elements installed on a private site shall comply with the requirements of this Ordinance, and in particular, Chapter 16A, and shall not, in any event, cast or reflect glare or light beyond the property line.

These requirements shall not apply to emergency safety lighting. *(Amended March 2021)*

- 4.10.7 Signage. Signage installed on a private site shall comply with the requirements of this Ordinance, and in particular, Chapter 16, and shall not, in any event, detract from the visual environment of the Town of Wilton, endanger, confuse or mislead individuals, or obstruct vision necessary for traffic safety. *(Amended March 2021)*

- 4.10.8 Electromagnetic Radiation. Activity producing electromagnetic radiation that causes abnormal degradation, by reason of proximity, primary field, blanketing, spurious radiation, conducted energy in power or telephone systems or harmonic content, of other electromagnetic receptors of quality and proper design located beyond the property line is prohibited. "Abnormal degradation" and "of quality and proper design" shall be determined in accordance with standards established from time to time by the American Institute of Electrical Engineers or such other group that provides standards more specifically for the type of interference at issue. *(Amended March 2021)*

- 4.10.9 Materials Creating a Fire or Explosion Hazard. Storage or use of flammable liquids or gases, or other explosive materials, shall be permitted only in compliance with this Ordinance and other applicable local, State and Federal requirements, including, without limitation, those imposed from time to time by the Fire Chief of the Town of Wilton. *(Amended March 2021)*

- 4.10.10 Stormwater Management. All new construction, development, reconstruction and other activity that disturbs the soil shall be designed to minimize stormwater runoff from the site in excess of the natural preexisting conditions, including location and volume, and shall comply with the requirements of this Ordinance and in particular, Section H, Stormwater Management and Erosion Control Regulations. Where activity is within the Watershed Protection District, the Aquifer Protection District, or any other aquifer or wellhead protection area, all surface stormwater shall be kept on-site and handled in such a manner as

to allow the water to infiltrate into the ground before leaving the site. (*Amended March 2021*)

4.10.11 Structure Design. Proposed structures shall relate harmoniously to the terrain and to existing structures in the vicinity, in keeping with the characteristics of the neighborhood. To the extent practicable, structures shall be designed based on existing topography, vegetation and drainage characteristics and the site shall retain significant and/or unique features, such as historic resources, existing ponds or streams, and mature trees. (*Amended March 2021*)

4.10.12 Exception for Pre-existing Structures, Installations or Use. The requirements of this Section 4.10 shall not apply to structures, installations or uses in place prior to adoption of this Ordinance, except in situations where the public health or safety is threatened or as otherwise required by applicable local, State or Federal law. To the extent an existing structure or use is extended, enlarged, changed, moved, reconstructed or altered, it shall comply with this Chapter and all such other applicable requirements. (*Amended March 2021*)

#### **4.11 Applications and Approval.**

All applications for subdivision, site plan review, special exceptions or building permits shall demonstrate compliance with the requirements of this Chapter. The Planning Board, Zoning Board of Adjustment or Building Inspector, as appropriate, shall grant approvals only upon a determination that the resulting use, development or installation will comply with this Chapter, or will not increase any existing non-compliance. (*Amended March 2021*)

If the Planning Board, Zoning Board of Adjustment, or Building Inspector, as applicable, determines that reasonable grounds exist to believe that the use, development or installation may result in noncompliance, it may require the applicant, at the applicant's sole expense, to submit evidence sufficient to enable an objective determination to be made, including, without limitation: documentation of the performance of similar facilities or processes on other sites with sufficiently similar conditions;

- a. specifications for the equipment, mechanism or techniques proposed;
- b. certification of compliance by a State-licensed engineer or other professional reasonably acceptable to the Planning Board, Zoning Board of Adjustment or Building Inspector, as the case may be; and/or
- c. other studies evaluating the impact of the project, including, without limitation, on traffic, background noise, environmental conditions and/or property value.

In addition, the Town may, upon notice to the applicant, and at the applicant's expense, obtain itself such information, or commission such studies, as necessary in its discretion to allow it to make an objective determination. (*Amended March 2021*)

#### **4.12 Special Exceptions.**

Any Special Exceptions permitted by this Ordinance may be granted by the Zoning Board of Adjustment only upon a finding that the proposed use, structure or activity:

- a. is not permitted by the Ordinance in the absence of a Special Exception;

- b. is consistent with and will not substantially affect the character of the neighborhood in which it is proposed;
- c. will comply with Sections 4.10 - 4.10.11 inclusive of this Chapter and will not jeopardize the health or safety of anyone on or off the site;
- d. will not cause diminution of surrounding area property values;
- e. will not have an unacceptable effect on traffic in the neighborhood or in the Town;
- f. will have available adequate off-street parking, if required;
- g. will not be detrimental to the attractiveness of the Town;
- h. is consistent with the spirit of this Ordinance; and
- i. meets all other criteria enumerated in the Section that permits the particular Special Exception. *(Amended March 2021)*

**4.13**      **Variances.**

The Zoning Board of Adjustment may grant a variance from the requirements of this Ordinance, as permitted by, and in accordance with, State law, including, without limitation, RSA 674:33, from time to time in effect, upon appropriate findings and in a written decision complying with State requirements. *(Amended March 2021)*

**4.14**      **Notification of Abutters.**

Applications to the Zoning Board of Adjustment and Planning Board shall require notification of the property owner(s), applicant(s), all persons required under RSA 676:4 I.(d), and RSA 676:7 I (a), and all property owners separated by a railroad right-of-way. *(Amended March 2021)*

**4.15**      **Enforcement.**

In addition to action the Town may pursue as described above or by applicable law, the Building Inspector shall enforce the requirements of this Chapter as set forth in Chapter 19 of this Ordinance. *(Amended March 2021)*

## 5.0 **RESIDENTIAL DISTRICT**

The purpose of this district is to provide opportunities for mixed types of residential development at a high density where appropriate services exist or are available. The extent of this district is determined by the designated residential boundaries on the zoning map.

### 5.0.1 District Location. The Residential District encompasses the following areas within the Town of Wilton (*Amended March 1995; Amended March 2010*):

- a. The area in west Wilton south of NH Route 101 as delineated on the Town of Wilton Tax Map C encompassing lots 106 through 114 inclusive; 117, 118, 119 and part of 120 drawing a straight line from the northwest corner of 118 to the northeast corner of 119; 122 through 124 inclusive; and 137 through 141. (*Amended March 2010*)
- b. The area in Wilton Center as delineated on the Town of Wilton Tax Map C encompassing lots 62, 63, 64, part of 65 drawing a straight line from the southwestern corner of 66 to the northeast corner of lot 63, 66, and 67; 72, 73, parts of D-140-1 and C-74 east of a straight line drawn from the southeastern corner of 72 to the northwestern corner of 76, 75, 77 and 78; and 81, 82 and 84. (*Amended March 2010*)
- c. Tax Map F all land east of NH Route 101 between the north and south intersections of Intervale Road from the western edge of the 150 foot Commercial district to the eastern edge of the Souhegan River, lot 140 from NH Route 101 to the Souhegan River; Map D lot 99; Map L lots 29, and 48; and Map M lots 6 through 98 inclusive.
- d. Tax Map D lots 105, 106-1 through 113 inclusive, 66, 68, 69, 74, 75, 76 and 77; Map M lot 1; Map L lots 1 through 28 inclusive, 30 through 39 inclusive, 42 through 45 inclusive, and 67; and Map J 106 through 109 inclusive, 111, 112, 112-1, 114 through 132 inclusive, 136, 137, 138 east of a straight line drawn from the south western corner of lot 136 to the corner of the southern corner of the jog in the northern line of 138, portion of lot 133, 134, 135 and 139 east of a straight line drawn from the south western corner of lot 136 to the south western corner of lot 133. (*Amended March 2010*)
- e. Tax Map J part of lot 12 east of a line drawn from the western corner of lot 76 on Dale Street to the jog in lot 12; lots 13 through 42 inclusive, 62 through 78 inclusive, 80, and 92 through 98 inclusive; Map K lots 15 through 37 inclusive, 48 through 62 inclusive, 67 through 84 inclusive, 86 through 102 inclusive, 105 through 153 inclusive, 155 through 157 inclusive and 164. (*Amended March 2010*)

### 5.1 **Permitted Uses.**

A building may be erected, altered or used and a lot may be used or occupied for:

- a. Single family and duplex family dwellings and accessory uses.
- b. Multi-family dwellings containing three dwelling units with site plan approval by the Planning Board.
- c. A maximum of three (3) dwelling units per lot is allowed for any new construction on Town water and sewer and a maximum of two (2) dwelling units per lot in the remainder of this district.

- d. Only one dwelling per lot is allowed except as provided by the Cluster Development Ordinance. The number of dwelling units per building shall be determined by the density provisions of this section.

**5.2            *Lot Requirements.***

5.2.1        Area. Minimum lot size one-half (0.5) acre per dwelling unit when served by both public water and sewer and one (1) acre per dwelling unit for lots not served by both public water and sewer. Wetlands, water bodies and land contained in the 100 year floodplain must be excluded from the calculation of the minimum lot area. (*Amended March 1992, March 2020*)

5.2.2        Frontage. One hundred (100) feet on a public right-of-way, Class V or better.

5.2.3.        Setbacks. Thirty-five (35) feet front. Fifteen feet (15) for all other lot lines. For each corner lot, the side setback abutting the street shall be thirty-five (35) feet. No buildings or associated uses, including but not limited to swimming pools, antennas and satellite dishes, are permitted in the setback. (*Amended March 1991, March 1994*)

5.2.4.        (*Reserved*) (*Amended March 1991*)

5.2.5        Structure height. Not to exceed forty-five (45) feet or two stories.

**5.3            *Special Exceptions.***

The following uses will only be allowed as special exceptions by the Zoning Board of Adjustment and site plan review and approval by the Planning Board. (See also Section 4.4)

5.3.1        Home Occupations. Any home occupation shall be permitted as a special exception provided it complies with the requirements of this section. When considering an application for a home occupation, the Zoning Board of Adjustment shall consider the location of the proposed use, the area of the lot, the type and density of surrounding development, existing buffers and screens between the proposed use and surrounding development, and the compatibility of the proposed use with the surrounding neighborhood. (*Amended March 1992*)

- a. The home occupation shall be incidental and secondary to the use of the dwelling unit as a residence. (*Amended March 1992*)
- b. Home occupations shall be carried on by the resident owner, resident members of the owner's family, a resident tenant, or resident members of the tenant's family.
- c. Two (2) non-family employees are permitted on the premises.
- d. No additions or changes shall be made to the residence that will make it impractical to revert the building to purely residential use. (*Amended March 1992*)
- e. Exterior storage of materials or equipment is prohibited. (*Amended March 1992*)
- f. In addition to the parking area required for the primary residential use, sufficient off-street parking shall be provided for any non-resident employees, customers and suppliers who may normally be expected to need parking at one time. Driveways may be used for client

parking. Where additional space is desired, a maximum of two (2) parking spaces is permitted; however, those spaces shall not be located in the front yard. Parking spaces shall be a minimum of nine feet by eighteen feet (9' X 18') per space.

- g. Traffic generated by the home occupation shall not create safety hazards or be substantially greater in volume than would normally be expected in the neighborhood. (*Amended March 1992*)
- h. Home Occupations shall be conducted in accordance with all Town regulations, state laws and licensing requirements. (*Amended March 1992*)
- i. When a business outgrows the standards established for a home occupation, it must relocate into a commercial or industrial district.

5.3.1.1 Special Exception Not Required  
(*Adopted March 1998*)

A home occupation may be conducted without a special exception from the Zoning Board of Adjustment and without site plan review by the Planning Board provided that, in addition to the requirements of the preceding section (5.3.1), it also satisfies the following standards:

- a. The home occupation shall occupy no more than 20% of the existing, gross heated floor area of the primary residence or the structure in which the home occupation is operated.
- b. There shall be no customer or client visits to the premises and commercial traffic for the delivery or pick-up of materials associated with the home occupation shall be limited to five visits per week. (excluding regular US Postal Service residential service).
- c. The home occupation shall not employ any non-resident full time or part time employees on the premises.
- d. No signs are allowed to advertise a home occupation.
- e. There shall be no outside operation(s) related to the home occupation.

5.3.2 Bed and Breakfasts. Up to four lodging units may be created and rented in an existing dwelling, and meals may be provided to the persons renting the lodging units. The requirements for a bed and breakfast are the same as those for a home occupation, except that requirement 5.3.1 a., shall not apply.

5.3.3 Houses of Worship. Houses of worship including, but not limited to, churches, synagogues, parish houses, mosques, convents and other accessory uses subject to the following conditions (*Amended March 2018*):

- a. Minimum frontage of 200 feet on a Class V or better road;
- b. No off-street parking shall be located within the setbacks nor within the front yard;

5.3.4 Hospitals, emergency medical centers and clinics. Hospitals, emergency medical centers and clinics subject to the following conditions:

- a. Minimum frontage of 200 feet on a Class I, II or IV road;
- b. Primary ingress or egress shall be adequate for the use proposed without having a detrimental impact on the neighborhood.

5.3.5 Civic and municipal buildings.

5.3.6 Schools and day care centers.

- a. All public or non-public schools, kindergarten and grades 1 through 12, that come under the rules adopted by the state board of education and administered by the State Department of Education must receive a special exception from the Zoning Board of Adjustment under section 5.3. Home education as defined by RSA 193-A is not required to receive a special exception under section 5.3.1. *(Amended March 2000, March 2014)*
- b. Any in-home day care and pre-school defined as the regular care or education in a dwelling unit of children not residents of that dwelling unit, that requires state licensing under RSA 170-E, also requires a special exception as a home occupation under section 5.3.1. If state licensing is not required, then the in-home day care, pre-school, or kindergarten is not required to obtain a special exception. *(Amended March 12, 1996, March 2014)*
- c. Adult and youth educational and cultural activities are permitted as an accessory use of the existing facilities of schools which are permitted under paragraph (a) above. They must be strictly subordinate and customarily incidental to the permitted school use of the facilities. *(Adopted March 2004)*
- d. Accessory Adult Educational Facilities. New facilities, including new buildings, for teacher and instructor training, licensing, accreditation, and development, are permitted by special exception in conjunction with schools which are permitted under paragraph (a) above. Such uses and facilities must be strictly subordinate to and in support of the primary childhood education function of the school, and must be located on the same property or on a property contiguous to the school. New construction is limited to thirty (30) percent of the primary facility's heated gross square footage, but shall not exceed a maximum of ten-thousand (10,000) square feet of total floor area and a maximum of two (2) stories. Uses permitted under this paragraph will also require nonresidential site plan approval from the Planning Board. *(Adopted March 2004)*
- e. Daycare Facilities. Daycare and preschool programs are permitted by special exception in conjunction with schools which are permitted under paragraph (a) above. Such programs may be located in existing school buildings or in new buildings constructed for that purpose on the same lot. New construction is limited to thirty (30) percent of the primary facility's heated gross square footage, but shall not exceed a maximum of ten-thousand (10,000) square feet of total floor area and a maximum of two (2) stories. Uses permitted under this paragraph will also require nonresidential site plan approval from the Planning Board. *(Adopted March 2014)*

- 5.3.7 Multi-family. Multi-family uses of dwellings in existence as of March 14, 1989 upon the following terms and conditions:
- a. A maximum of two (2) dwelling units per lot less than one-half (0.5) acre in size where Town water and sewer are available and utilized;
  - b. A maximum of three (3) dwelling units per lot one-half (0.5) acre or greater in size where Town water and sewer are available and utilized;
  - c. Two (2) 9' x 18' parking spaces per dwelling unit provided on site; parking spaces for any new dwelling unit(s) shall not be located in the setback; (*Amended March 1991*)
  - d. And open space in an amount equal to two (2) times the total area occupied by driveways, parking areas and all buildings on site; (*Amended March 1991*)
  - e. Multi-family conversion will be allowed in the compact Village area defined as the Residential District north of NH Route 101 and east of Holt Road, and those in the Residential District with frontage on Intervale Road served by water and sewer.

5.4 ***Manufactured Housing.***

Manufactured housing is prohibited in the Residential District, except as provided for in Section 4.7. Any property owner or lessee may accommodate the recreational trailer of a non-paying guest for a period not exceeding thirty (30) days in any year. (*Amended March 1993*)

5.5 ***Accessory Dwelling Units.***

(*Adopted March 2017*)

This section implements the requirements of RSA 674:72, "Accessory Dwelling Units."

- 5.5.1 Existing Dwellings. A second dwelling unit may be added to any legally existing single family dwelling located in a zoning district where residential uses are permitted, subject to the requirements set forth below. The second dwelling unit may be created in existing space in the dwelling or in a newly constructed addition to the dwelling.
- 5.5.2 New Construction. A two-family dwelling may be constructed on any lot where a single family dwelling may legally be constructed, subject to the requirements set forth below.
- 5.5.3 Requirements. The following requirements apply only to development which would not be permitted other than by this section.
- a. The two dwelling units must have independent means of ingress and egress, or have ingress and egress through a common space such as a shared hallway to an exterior door.
  - b. The two dwelling units must share a common interior wall, and there must be an interior door between the two dwelling units.
  - c. At least one of the two dwelling units must be the principal residence of at least one owner of the dwelling. The two dwelling units must remain in common ownership. Transfer of

either dwelling unit to condominium ownership is not permitted. Violation of the requirements of this paragraph will result in the revocation of the Certificate of Occupancy for the two-family use of the dwelling.

- d. At least one of the two dwelling units must have no more than two bedrooms, and a living area of no more than 800 square feet.
- e. Requirements for water supply and sewage disposal are the same as for any two-family dwelling. Addition of a second dwelling unit to an existing single family dwelling under section 5.5.1 shall be subject to RSA 485-A:38, "Approval to Increase Load on a Sewage Disposal System."
- f. Off-street parking shall be provided for one car for each one-bedroom dwelling unit in the dwelling, and for two cars for each dwelling unit having two or more bedrooms, and shall satisfy any setback requirements pertaining to parking in that Zoning District.
- g. A newly constructed addition under section 5.5.1 shall satisfy the setback requirements of the zoning district.

#### 5.5.4. Special Exceptions

5.5.4.1 Living area. When creating a second dwelling unit under section 5.5.1, the maximum living area specified by paragraph 5.5.3(d) may be increased by no more than an additional 100 square feet in order to avoid unreasonable distortions to the floor plan of the dwelling.

5.5.4.2 Parking. When creating a second dwelling unit under section 5.5.1, the parking space requirements of paragraph 5.5.3(f) may be relaxed or waived if the dimensions of the lot and the placement of existing structures on the lot are such that there is no reasonable way to provide the required parking spaces.

## **6.0 GENERAL RESIDENCE AND AGRICULTURAL DISTRICT**

### **6.0.1 District Location.**

The General Residence and Agricultural District encompasses all areas in the Town of Wilton which are not encompassed in the Residential, Commercial, Industrial, or Office Park Districts, as enumerated in Chapters 5, 7, 8, and 9 of this Ordinance. *(March 2010)*

### **6.1 Permitted Uses.**

A building may be erected, altered or used, and a lot may be used or occupied for any of the following purposes, and in accordance with the following provisions:

- a. Any use permitted in the Residential District under the same provisions as apply to the use in that district, except that the lot areas shall be governed by section 6.2.
- b. All general farming and forestry activities.

### **6.2 Lot Requirements.**

6.2.1 Area. The minimum lot size is two (2) contiguous acres (87,120 square feet) of land per dwelling unit excluding wetlands, water bodies, and land contained within the one hundred (100) year floodplain. *(Amended March 2004, March 2020)*

6.2.2 Lot Configuration. The minimum width of a lot between any point on any side lot line and any point on any other side lot line measured through any point of the principal building shall be 175 feet. The rear lot line is that line which is furthest from and most nearly parallel to the front lot line. All other lot lines are side lot lines. Triangular and irregularly shaped lots may have no rear lot line.

6.2.3 Frontage. Two hundred (200) feet on a public right-of-way, Class V or better.

6.2.4 Setbacks. Thirty-five (35) feet from all lot lines. No building, or use that requires a building permit, is permitted in the setback. *(Amended March 2001)*

6.2.5 Location of on-site disposal fields. To avoid high concentration of effluent discharges in a localized area, no disposal field shall be located within the setbacks.

### **6.3 Alternative Lot Requirements.**

A lot which does not meet the frontage requirements of section 6.2 may be developed for single family or duplex family residential use if it meets the alternative lot requirements contained in this section. Within this section, such a lot will be referred to as a "reduced frontage lot", and a lot meeting the requirements of section 6.2 will be referred to as a "normal frontage lot".

Any subdivision of a parcel resulting in one or more reduced frontage lots is only permitted upon site plan review and approval by the Planning Board, and upon Planning Board determination that the proposed reduced frontage lot better serves the neighborhood than would a development under the otherwise applicable provisions of this ordinance.

6.3.1 Associated Lot Requirement.

A reduced frontage lot must have contiguous frontage with a normal frontage lot that is within the same subdivision. Adjoining normal frontage lots that are not part of the proposed subdivision cannot be used to satisfy the reduced frontage requirement. A maximum of two (2) reduced frontage lots may be developed with each normal frontage lot. The three (3) lots may not be served by more than two (2) driveways. The principal route of access must be along the lot frontage as defined in this ordinance. (*Amended March 1997*)

6.3.2 Area. Five (5) acres per dwelling unit including a minimum of two (2) acres excluding wetlands, water bodies, and land within the 100 year floodplain. (*Amended March 1992, March 2020*)

6.3.3 Frontage. Fifty (50) feet on a Class V or better public right-of-way. The Planning Board shall not approve a subdivision containing a reduced frontage lot if a hazardous concentration of egress points is likely to result.

6.3.4 Setbacks. Fifty (50) feet from all lot lines. No buildings or uses that require a building permit are permitted in the setback. (*Amended March 1991*)

6.3.5 Private Ways. Private ways used in association with subdivisions containing reduced frontage lots must comply with the following:

- a. A maximum of four (4) dwelling units, two (2) on reduced frontage lots and two (2) on normal frontage lots, may be accessed from one (1) private way.
- b. No private way shall enter onto a public road unless two hundred feet (200') of safe, each way, all-season sight distance is established.
- c. No private way shall enter onto NH Route 101.
- d. The private way must be capable of providing adequate year round access for emergency vehicles.
- e. The Planning Board shall be provided with a document establishing the conditions of use of the common private way that are satisfactory to Town counsel and include the following: mutual easements between the lots sharing the private way; provisions for maintenance of the private way; and suitable language to insure that the private way will not become a Town road unless brought up to Town road specifications.

**6.4 *Cluster Developments.***

Cluster development of dwelling units may be permitted under the following conditions.

6.4.1 Area. Minimum development site is fifteen (15) acres.

6.4.2 Frontage. A minimum of five hundred (500) feet of frontage on a Class V or better public right-of-way.

6.4.3 Density. Dwelling unit density shall be determined by the Planning Board in accordance with the provisions of the Cluster Development Regulations. The total number of dwelling units will

be determined by the total acreage being submitted for development excluding wetlands, water bodies, and land contained within the one hundred (100) year floodplain. (*Amended March 2020*)

6.4.4 Open Space. Fifty percent (50%) of the total acreage shall be set aside as open space. Within a one (1) mile radius of the Town Hall where Town water and sewer are available and proposed for use within the cluster development, the open space requirement shall be reduced to forty percent (40%).

**6.5** ***Manufactured Housing.***

An individual manufactured house may be located anywhere in this district provided it meets all of the minimum requirements of the district. In addition, open space under manufactured homes shall be enclosed with suitable "skirting". (*Amended March 1991*)

**6.6** ***Special Exceptions.***

The following uses will only be allowed as special exceptions by the Zoning Board of Adjustment (ZBA) and site plan review and approval by the Planning Board.

6.6.1 Home Occupations. The ZBA may, in appropriate cases subject to appropriate conditions, permit home occupations in compliance with the requirements of this section, Section 5.3.1 Home Occupations and Section 4.6 Performance Standards. The provisions of Section 5.3.1 shall govern home occupations in this district except as otherwise provided for below (*Adopted March 1993*). Home occupations which meet the requirements of Section 5.3.1.1 Special Exception Not Required, shall be permitted without a special exception from the Zoning Board of Adjustment and without site plan review by the Planning Board. (*Adopted March 1998*)

- a. The home occupation shall not be evident from the road or other public right-of-way.
  - b. Materials or equipment stored outside must be adequately screened from adjacent public rights-of-way and properties.
  - c. Only retail sales which are customary and incidental to the home occupation are permitted.
  - d. Separate structures may be constructed or placed to accommodate the home occupation if screened from surrounding development and suitable for reversion to a use ancillary and incidental to a residential or agricultural use.
- b. The home occupation use shall be clearly subordinate and secondary to the primary use of the property as a residence.

## 7.0 **COMMERCIAL DISTRICT**

A building or structure may be erected, altered or used, and a lot may be used or occupied for any of the following purposes in accordance with the following provisions. Any change in use or type of activity in an existing structure or any new construction in this district, other than a single-family dwelling or a two-family dwelling permitted by Section 5.5 of this ordinance, must have prior approval from the Planning Board under the Site Plan Review regulations. *(Amended March 2003, March 2017)*

7.0.1 Commercial District Location. The Commercial District encompasses the following areas within the Town of Wilton. *(Amended March 1992, March 2010, March 2014)*:

- a. The area on the south side of NH Route 101 between the north and south intersections of 101 and Intervale Road to a depth of 150 feet from the edge of the State right-of-way.
- b. The area on the south side of NH Route 101 in West Wilton as delineated on the Town of Wilton Tax Map C encompassing lots 102, 102-1, 103, 104 and 105. *(Amended March 2002)*
- c. The area north and south of Frye Mill Road as delineated on the Town of Wilton Tax Map A encompassing lots 23, 24, 28 and 63. *(Amended March 2010)*
- d. *(Deleted 2014)*
- e. *(Deleted 2014)*
- f. The area south of Main Street near the Milford Line as delineated on the Town of Wilton Tax Map K as lot 163.
- g. The area at the intersection of NH Routes 101 and 31 South as delineated on Town of Wilton Tax Map F lots 162, a portion of 163 north of a line drawn from the southeast corner of 164 to the southwest corner of 162 and 164. *(Amended March 2001, March 2010)*

7.0.2 *(Deleted 2019)*

### 7.1 **Permitted Uses.**

The following uses shall be permitted in the Commercial District:

- a. Any use permitted in the General Residence and Agricultural District under the same provisions as apply to the use in that district, including density, except that the lot dimensional requirements shall be as specified in this section; *(Amended March 2007)*
- b. Duplex and multi-family dwellings, inns, tourist courts, cabins and bed and breakfasts, including such retail businesses within these permitted buildings as are conducted for the convenience of the residents or guests;

- c. Retail Services: Establishments engaged in selling goods or merchandise to the general public for personal or household consumption and rendering services incidental to the sale of such goods, including retail stores, restaurants, taverns and banks. Also, establishments primarily engaged in providing services involving the care of a person or his or her apparel (such as barbershops and beauty salons, spas, tailors and dry cleaners); (*Amended March 2019*)
- d. Parking garages, parking lots, filling stations, and automotive service stations; (*Amended March 2019*)
- e. Business and professional offices;
- f. Community buildings, social halls, clubs, lodges, fraternal organizations, theaters, recreation facilities, and amusement centers; (*Amended March 2019*)
- g. Greenhouses and florist shops: An establishment where retail and wholesale garden products and produce are sold to the consumer. The establishment imports most of the items sold, but may include a nursery and/or greenhouse, and may include plants, nursery products and stock, potting soil, hardware, other garden and farm variety tools and outdoor furniture; (*Amended March 2019*)
- h. Funeral homes;
- i. Wholesale establishments in connection with permitted retail establishments, warehousing or merchandise for retail sale within the District.
- j. Houses of worship including, but not limited to, churches, synagogues, parish houses, mosques, convents, and other accessory uses; (*March 2010, March 2018*)
- k. Hospitals, emergency medical centers and clinics; (*March 2010*)
- l. Schools, kindergartens, preschools, and daycare centers, including in-home childcare. (*March 2010*)
- m. Medical offices, which provide health services to people on an outpatient basis including doctors, dentists, physical therapists, massage therapist and chiropractors; (*March 2019*)
- n. Veterinary clinics which may include facilities for overnight boarding or caring of animals provided that any such facility shall be designed, constructed and operated in such a manner so as not to be a nuisance to adjacent uses by way of noise or odor; (*March 2019*)
- o. Libraries, museums; (*March 2019*)
- p. Adult day care facilities: Any person, corporation, partnership, voluntary association, or other organization, either established for profit or otherwise, which provides for the daily care and supervision of an adult person away from the person's home and which requires licensing by the State of NH; (*March 2019*)
- q. Nanobreweries as defined in NH RSA 178:12-a, Brewpubs as defined in NH RSA 178:13, Wine retail outlets and tasting rooms pursuant to NH RSA 178:8, and Liquor manufacturers pursuant to NH RSA 178:6; (*March 2019*)

- r. Light Industry: Assembly, packaging, and/or finishing of products carried on completely within a structure, and involving no outside storage of equipment or materials. Light Industry shall not include any industry, the operation of which could (1) pose a danger of fire or explosion, (2) create significant objectionable vibration, noise, smoke, fumes, odor or dust, (3) produce chemicals, radioactive or other potentially dangerous waste, or (4) adversely affect other private or public properties; *(Amended March 2020)*
- s. Mixed Uses: The development of a tract of land or building or structure with two or more different permitted uses such as but not limited to residential, office, retail, public, or entertainment in a compact urban form. Individual uses within a mixed-use property must conform to any requirement within their particular class of use. *(March 2019)*

**7.2 Lot Requirements.**

**7.2.1 Frontage.** Frontage shall be as follows:

- a. Two hundred (200) feet on a public right-of-way, Class V or better;
- b. Deleted 2019.

**7.2.2 Setbacks.** Setbacks shall be as follows:

- a. Front setback - thirty-five (35) feet;
- b. Side setback - twenty-five (25) feet;
- c. Rear setback - twenty (20) feet;
- d. *(Deleted 2019)*
- e. No buildings or parking areas are permitted in the front setback or in any setback which abuts a residentially or residential/ agriculturally zoned parcel; *(Amended March 1991)*
- f. Parking areas are permitted up to within ten (10) feet of the side or rear lot line of a commercially zoned parcel where it abuts another commercially or industrially zoned parcel; and *(Amended March 1991)*
- g. Parking areas shared between two adjacent commercially or industrially zoned parcels may be developed up to the common side or rear lot-line if all other conditions of the district are met. *(Amended March 1991)*

**7.2.3 Percentage of Lot Coverage.** A maximum of seventy-five percent (75%) of the gross area of any lot shall be occupied by buildings, parking and roadways. Commercial buildings, structures and parking areas in existence as of March 13, 1990 that exceed the permitted lot coverage within the district may be maintained at or rebuilt to the existing level. Any increase in impervious area will not be permitted. *(Amended March 1992)*

7.2.4 Access. Access to lots within the commercial district shall be as follows:

- a. Any lot with frontage on NH Route 101 shall be accessed by any other street or side road that is available and only by NH Route 101 if no other alternative exists. If no other access is available, entrance and exit for the lot(s) is limited to one (1) curb cut on NH Route 101 for each lot-of-record existing as of March 11, 1986. If access to a lot is available to a street or side road other than NH Route 101, access to the lot shall be taken from the street or side road.
- b. As each lot within this district is developed, provisions shall be made during the site plan review process for the lay-out and construction of streets or side roads as the Planning Board shall determine necessary to permit travel between adjacent lots without accessing NH Route 101. To encourage shared lot access, where at all possible and practical, the location of all accessory street or roadway curb cuts shall be situated to allow adjacent lots to also take advantage of or share the same point of access along the street or roadway.
- c. Access to any Town road or State highway shall require Town or State permit approval.

**7A.0 DOWNTOWN COMMERCIAL DISTRICT**

The purpose of this district is to concentrate development, allow and encourage a vibrant mix of land uses, encourage infill development, preserve the historic character of the downtown, and provide a pedestrian-friendly environment. (*Adopted March 2019*)

**7A.1 Downtown Commercial District Location.**

The Downtown Commercial District encompasses the following areas within the Town of Wilton:

- a. The area in the western section of downtown Wilton located north and south of Forest Road as delineated on the Town of Wilton Tax Map J encompassing lots 79, 90, 90-1A, 90-1B, 91, 99, 100 and 101.
- b. The area in Downtown Wilton north and south of Main Street as delineated on the Town of Wilton Tax Map J encompassing lots 43, 44, 45, 46, 47, 48, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 60-1, 61, 62, 63, 64; and Tax Map K encompassing lots 63, 64, 64-1, 65, 85, 103, 104, 170, 171, 172, 173, portions of lot 66 south of a line drawn between the southeast corner of 67 and the northwest corner of 76, and portions of 166 west of a line drawn between due south from the southeast corner of 103 to the river.

7A.1.1 Main Street Overlay District Location. The Main Street Overlay District encompasses the following areas within the Town of Wilton, which are subject to all provisions in the Downtown Commercial District, except where noted otherwise:

- a. The area in Downtown Wilton north and south of Main Street from the intersection of Forest Road to the intersection of Park and Howard Streets as delineated on the Town of Wilton Tax Map J encompassing lots 43, 44, 45, 46, 47, 48, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 60-1, 61, 62, 63, 64; and Tax Map K encompassing lot 173.

**7A.2 General Provisions.**

A building or structure may be erected, altered or used, and a lot may be used or occupied for any of the following purposes in accordance with the following provisions.

**7A.3 Permitted Uses.**

The following uses shall be permitted in the Downtown Commercial District:

**7A.3.1 Residential Uses.**

- a. Any use permitted in the Residential District (except where prohibited under Sec. 7A.6.b), under the same provisions as apply to the use in that district, except that the lot dimensional requirements shall be as specified in this section.

**7A.3.2 Commercial Uses.**

- a. Bed and breakfasts, including such retail businesses within these permitted buildings as are conducted for the convenience of the residents or guests;
- b. Retail Services: Establishments engaged in selling goods or merchandise to the general public for personal or household consumption and rendering services incidental to the sale of such goods, including retail stores, restaurants, taverns and banks. Also, establishments primarily engaged in providing services involving the care of a person or his or her apparel (such as barbershops and beauty salons, spas, tailors and dry cleaners);
- c. Parking garages and parking lots;
- d. Business and professional offices;
- e. Community buildings, social halls, clubs, lodges, fraternal organizations, theaters, recreation facilities, and amusement centers;
- f. Greenhouses and florist shops: An establishment where retail and wholesale garden products and produce are sold to the consumer. The establishment imports most of the items sold, but may include a nursery and/or greenhouse, and may include plants, nursery products and stock, potting soil, hardware, other garden and farm variety tools and outdoor furniture;
- g. Houses of worship including, but not limited to, churches, synagogues, parish houses, mosques, convents, and other accessory uses;
- h. Preschools, and daycare centers, including in-home childcare;
- i. Medical offices, which provide health services to people on an outpatient basis including doctors, dentists, physical therapists, massage therapist and chiropractors

- j. Veterinary clinics which may include facilities for overnight boarding or caring of animals provided that any such facility shall be designed, constructed and operated in such a manner so as not to be a nuisance to adjacent uses by way of noise or odor;
- k. Libraries, museums;
- l. Adult day care facilities: Any person, corporation, partnership, voluntary association, or other organization, either established for profit or otherwise, which provides for the daily care and supervision of an adult person away from the person's home and which requires licensing by the State of NH; and
- m. Nanobreweries as defined in NH RSA 178:12-a, Brewpubs as defined in NH RSA 178:13, Wine retail outlets and tasting rooms pursuant to NH RSA 178:8, and Liquor manufacturers pursuant to NH RSA 178:6;

7A.3.3 Industrial Uses.

- a. Light Industry: Assembly, packaging, and/or finishing of products carried on completely within a structure, and involving no outside storage of equipment or materials. Light Industry shall not include any industry, the operations of which could (1) pose a danger of fire or explosion, (2) create significant objectionable vibration, noise, smoke, fumes, odor or dust, (3) produce chemicals, radioactive or other potentially dangerous waste, or (4) adversely affect other private or public properties. (*Amended March 2020*)

7A.3.4 Mixed Uses.

- a. Mixed Uses: The development of a tract of land or building or structure with two or more different permitted uses such as but not limited to residential, office, retail, public, or entertainment.

**7A.4 *Site Plan Review Required.***

Any change or expansion in use in an existing structure or any new construction in this district must have prior approval from the Planning Board under the Site Plan Review regulations, with the following exceptions:

7A.4.1 Residential Uses. Site Plan Review is not required for single family dwellings or for two-family dwellings permitted by Section 5.5 of this ordinance.

7A.4.2 Change to a Permitted Commercial Use. Site Plan Review is not required for a change from any use to a commercial use listed in section 7A.3.2, provided that there is an existing approved site plan for the property and the change does not result in any exterior changes on the property.

**7A.5 *Lot Requirements.***

7A.5.1 Frontage. Frontage shall be as follows:

- a. Twenty-five (25) feet.

7A.5.2 Setbacks. Setbacks shall be as follows:

- a. Front setback – twenty-five (25) feet;
- b. Side setback – fifteen (15) feet;
- c. Rear setback – fifteen (15) feet;
- d. Setbacks on lots located within the Main Street Overlay District - at a depth to conform with existing neighboring buildings;
- e. No buildings or parking areas are permitted in the front setback or in any setback which abuts a residentially or residential/ agriculturally zoned parcel;
- f. Parking areas are permitted up to within ten (10) feet of the side or rear lot line of a commercially zoned parcel where it abuts another commercially or industrially zoned parcel; and
- g. Parking areas shared between two adjacent commercially or industrially zoned parcels may be developed up to the common side or rear lot-line if all other conditions of the district are met.

7A.5.3 Percentage of Lot Coverage. There is no maximum building coverage (subject to any setback requirements), except that the site must be designed to dispose of all runoff and drainage without impacting other properties.

7A.5.4 Access. Access to lots within the downtown commercial district shall be as follows:

- a. Access to any Town road or State highway shall require Town or State permit approval.

7A.5.5 Parking. Parking requirements shall be as follows:

- a. All non-residential uses listed in sections 7A.3.2, 7A.3.3, and 7A.3.4 are exempt from the provision of off-street parking facilities standards established in the Site Plan Review Regulations; and
- b. Any residential use listed in section 7A.3.1 is required to have on-site or fee ownership parking with at least one parking space per bedroom.

**7A.6 *Prohibited Uses.***

- a. Filling Stations and Automotive Service Stations;
- b. Residential uses on the ground floor fronting Main Street for lots located within the Main Street Overlay District;
- c. Schools and kindergartens;
- d. Funeral homes;
- e. Wholesaling and warehousing on the ground floor fronting Main Street for lots located in the Main Street Overlay District; and
- f. Inns, tourist courts, and cabins.

## **8.0 INDUSTRIAL DISTRICT**

This district provides a location for the establishment of industrial facilities and operations to improve employment opportunities and broaden the tax base in the Town of Wilton.

All industrial establishments will meet the following provisions.

- a. All future industrial establishments in this district must receive prior approval to build based on the proposed layout as evidenced by satisfactory working plans submitted to the Planning Board under the Site Plan Review procedure adopted by the Planning Board.
- b. Any expansion of an existing industrial establishment must have prior approval based on the proposed layout as evidenced by satisfactory working plans submitted to the Planning Board under the Site Plan Review procedures adopted by the Planning Board.
- c. Any alterations of the nature of the industry carried on in an existing industrial establishment must have prior approval from the Planning Board under the Site Plan Review procedure adopted by the Planning Board.

### **8.0.1 District Location. The Industrial District encompasses the following areas within the Town of Wilton: (*Amended March 2010*)**

- a. The area in northern Wilton bordering the Town of Lyndeborough along Forest Road and the B&M Railroad right-of-way. As delineated on the Town of Wilton Tax Map, this includes Lots B-3 through B-6 (inclusive), B-8, B-10, B-11, B-97 through B-112 (inclusive). Also, lots B-117 through B-121 (inclusive) to a depth of 350 feet from the centerline of Forest Road. (*Amended March 1995, March 2003*)
- b. The area adjacent to NH Route 101 west of the Souhegan River Bridge and the area adjacent to NH Route 31 and Mansur Road. As delineated on the Town of Wilton Tax Map, this includes lots D-100, D-101, D-102, E-17, E-23 through E-28 inclusive, a portion of E-29 southeast of a line continuing from the southern-most point of lot 30 to a point on the southern line of lot 29 200 feet west of Greenville Road/Rt. 31. F-11. F-12-1 through F-12 inclusive, F-13 through F-21 inclusive, F-23, F-24, F-25, a portion of F-141, west of the Souhegan River, F-142 through F-146, inclusive F-158, F-159 and F-161, a portion of F-163 south of a line from the southeast corner of 164 to the southwest corner of 162, and F-165 through F-173 (inclusive). (*Amended March 2001, March 2010*)
- c. Lots D-92 and D-94. (*Amended March 2010*)
- d. Lots J-104-1, J-104-2 and J-105. (*Amended March 2010*)
- e. The area south of Main Street and north of the Souhegan River. As delineated on the Town of Wilton Tax Map this includes Lots J-49, K-158 through K-162 (inclusive), portions of K-165 and K-166 east of a line drawn due south from the southeast corner of lot 103 to the river, K-167 through K-169 (inclusive) and K-174.. (*Amended March 2001, March 2010*)
- f. The area south of the Souhegan River and north of NH Route 101. As delineated on the Town of Wilton Tax Map this includes Lots J-110, J-113 and L-64 through L-66 (inclusive) and lot L-68. (*Amended March 2001, March 2010*)

### **8.1 *Permitted Uses.***

A building or structure may be erected, altered or used, and a lot may be used or occupied for any of the following purposes, provided the use meets the performance standards of this ordinance:

- a. Light Manufacturing, as that term is defined in Section 9A.2.2 of this ordinance;
- b. research and/or testing laboratory;
- c. offices; and
- d. non-residential commercial uses subject to all the requirements of this Industrial District ordinance . *(Adopted March 2001, Amended March 2020)*

## **8.2            *Lot Requirements.***

All new construction or development within the industrial district shall meet the following requirements.

8.2.1        Area. Two (2) acres of land excluding wetlands, water bodies, and land contained within the one hundred (100) year floodplain. *(Amended March 1992, March 2004, March 2020)*

8.2.2        Frontage. Two hundred (200) feet on a Class V or better road.

8.2.3        Lot Coverage. A maximum of sixty percent (60%) of the gross area of any lot shall be occupied by buildings, parking and roadways. Total lot impervious coverage (buildings, parking area and roads) shall be forty (40) percent within the Aquifer Protection District. Industrial buildings, structures and parking areas in existence as of March 13, 1990 that exceed the permitted lot coverage within the district may be maintained at or rebuilt to the existing level. Any increase in impervious area will not be permitted. *(Amended March 1992)*

8.2.4        Setbacks. The setbacks within this district shall not be:  
*(Amended March 1991)*

- a. Less than one-hundred (100) feet from the edge of the public right-of-way for NH Route 101;
- b. Less than seventy-five (75) feet from the edge of the public right-of-way for all other public roads;
- c. Less than thirty-five (35) feet from side and rear lot lines.
- d. No buildings or parking areas are permitted within the front setback or in any setback which abuts a residentially or residential/agriculturally zoned parcel. *(Amended March 1991)*
- e. Parking areas are permitted up to within ten (10) feet of the side or rear lot line of an industrially zoned parcel where it abuts another commercially or industrially zoned parcel. *(Amended March 1991)*

- f. Parking areas shared between two adjacent industrially or commercially zoned parcels may be developed up to the common side or rear lot-line if all other conditions of the district are met. *(Amended March 1991)*

8.2.5 Buffer Zones. Buffer zones shall be provided between industrial establishments and surrounding uses as follows:

- a. Any lot bordering an area zoned for residential use or an area containing residential uses shall have a landscaped buffer between any building or parking area and the residential zone or use. *(Amended March 1991)*
- b. All setbacks from public roads shall be sufficiently landscaped with trees and shrubs, an earth berm and/or fencing as to maintain a visual buffer between the highway and any building or parking area. *(Amended March 1991)*

8.2.6 Structure Height. Maximum structure height is forty-five (45) feet or two (2) stories.

8.2.7 Parking. Off-street parking facilities shall be provided following the standards established in the Site Plan Review Regulations.

8.2.8 Access. Any lot with frontage on NH Route 101 shall be accessed by any other street or side road available and not by NH Route 101 unless no other alternative exists. If no other access is available, entrance and exit for such lot(s) shall be limited to one (1) curb cut on NH Route 101 for each lot-of-record existing as of March 8, 1988. If access to a lot is available by a street or side road other than NH Route 101, access to the lot shall be taken from the street or side road. As each lot is developed within this district, provision shall be made during the Site Plan Review process for the lay-out and construction of streets or side roads as the Planning Board shall determine necessary to permit travel between adjacent lots without accessing NH Route 101. To encourage shared lot access, where at all possible and practical, the location of all accessory street or roadway curb cuts shall be situated to allow adjacent lots to also take advantage of or share the same point of access along the street or roadway. Access to any Town road or State highway shall require Town or State permit approval.

### **8.3 *Conditions for Use of Area Water Supply.***

8.3.1 Public Water Supply. Industrial establishments intending to be served by the public water supply system shall be reviewed by the Planning Board to ensure that the proposed use would not require more than ten percent (10%) of the available capacity as determined by the system's current safe yield and average daily water usage at the time of the proposed development. In any circumstance, where the Town of Wilton may require professional assistance or additional information to make a determination of compliance, the developer shall be required to pay the costs associated with obtaining this assistance.

8.3.2 On-site Water Supply. In areas not served by the public water system, industries shall obtain their own water supply. In cases where industries will be utilizing a private well to supply adequate water for manufacturing and employee use, the following performance standards shall be applied in an effort to avoid depletion of water supplies for neighboring uses:

- a. In areas determined by the United States Geological Survey (U.S.G.S) as having a high potential to yield water, proposed uses may utilize a maximum of four thousand (4,000) gallons per day, (GPD) of groundwater from a drilled well.

- b. In areas determined by the U.S.G.S. as having a medium potential to yield water, proposed uses may utilize a maximum of two thousand (2,000) GPD of groundwater from a drilled well.
- c. In areas determined by the U.S.G.S. as having a low potential to yield water, proposed uses may utilize a maximum of one thousand (1,000) GPD of groundwater from a drilled well.
- d. In areas determined by the U.S.G.S. as generally yielding enough water for domestic supplies, proposed industrial uses shall be limited to a maximum of seven hundred-fifty (750) GPD of groundwater from a drilled well.

The developer may conduct additional hydrogeological studies of the site to determine the actual location and extent of the groundwater, the capacity for groundwater supplies and the impacts on surrounding groundwater users at his own cost. The Planning Board may modify the above limits based on the results of the hydrogeological testing and the determination that sustained use of the water supply will not unreasonably reduce the water supply to adjacent users.

**8.4            *Traffic Generation.***

Industrial uses shall be permitted to generate traffic in keeping with the character of the roadway from which the use has access and egress, according to the following schedule:

<u><i>Street Access</i></u>	<u><i>Allowed Trip Generation per Acre</i></u>
Class IV and Class V Roads	0 - 10 Average Daily trips
Class I and Class II Roads	0 - 150 Average Daily Trips

**8.5            *Prohibited Uses.***

Neither residential uses nor Heavy Manufacturing, as that term is defined in Section 9A.2.1 of this ordinance, is permitted in the Industrial District. (*Amended March 2020*)

**8.6            *Special Exceptions.***

(See also section 4.4)

- 8.6.1        *Lots of Record.* In the event that a lot-of-record existing as of March 8, 1988 cannot satisfy the minimum lot or buffer requirements set forth in section 8.2 because of its configuration, the Zoning Board may permit a reduction in these requirements (except for section 8.2.3, Lot Coverage) by special exception. The permitted reduction in the requirement the lot-of-record cannot meet in these circumstances is designed to permit a proposed use in accordance with the objectives and purpose of this district.

**9.0 OFFICE PARK DISTRICT**  
*(Amended March 1999)*

The purpose of this District is to attract corporate office, research activities in a college-campus like environment which will be achieved through zoning and land use regulations, limited types of uses, large open spaces, increased setback requirements and compatible architectural and landscape standards. All primary and accessory buildings must be sited to blend with the environment with a minimum amount of change to the existing vegetation and topography.

**9.1 District Location.**  
*(Amended March 1999)*

The Office Park District encompasses the following area within the Town of Wilton: *(Amended March 2010)*

- a. As delineated by the Town of Wilton Tax Map (C), this includes lots C-127, C-127-1.

**9.2 Permitted Uses.**

A building may be erected, altered or used and a lot may be used or occupied for any of the following purposes and in accordance with the following provisions:

- a. Corporate offices;
- b. Research facilities; and
- c. Farming uses.

**9.3 Lot Requirements.**  
*(Amended March 1999)*

9.3.1 Area. The minimum lot size is five (5) acres with a minimum of two (2) acres, excluding wetland and water bodies. *(Amended March 1992, March 2020)*

9.3.2 Frontage. Two hundred (200) feet on a Class V or better road. *(Amended March 1999)*

9.3.3 Setbacks. The setback shall be two-hundred (200) feet from all lot lines. Individual front lot setback of at least one-hundred (100) feet with side and rear setbacks of fifty (50) feet.

9.3.4 Structure Height. Two (2) stories with a maximum height above mean lot terrain of thirty-five (35) feet.

9.3.5 Building Size. Maximum of forty-thousand (40,000) square feet gross floor area on the ground floor, cumulative of all building and parking areas on the lot. *(Amended March 1999)*

9.3.6 Access. Ingress and egress shall only be from one (1) access road leading to a State Highway.

9.3.7 Off-Street Parking Requirements. One parking space for each one and two-tenths (1.2) employees based upon the highest expected employee occupancy.

9.3.8 Conservation Zone. All land within one hundred (100) feet of Blood Brook shall be retained in its natural state except for foot trails.

**9.4 Architectural Design.**

*(Recodified/Amended March 1999)*

As a condition of granting final site plan approval for a development upon a lot in this District, the lot owner shall obtain Planning Board approval of the exterior architectural design of such structures. In connection therewith, the Planning Board shall require the lot owner to provide it with graphic renderings, photographs or three-dimensional models to depict the proposed development. In undertaking its review and approval, the Planning Board shall consider the location, alignment, and spacing of new buildings in relation to existing and future development of adjoining lots. In addition, the Planning Board shall consider the positioning and configuration of the proposed buildings on a lot or lots, the use of required setbacks, open space and buffer mechanisms and the lot owner's campus type layout and buildings requirements.

**9.5 Open Space Design.**

*(Recodified/Amended March 1999)*

To encourage open space development in a manner that allows greater open spaces the following provisions may be applied. The intent of this section is to allow greater flexibility in this district while encouraging the retention of the area's rural character.

1. Side and rear setbacks (excluding lot lines tangent to Section 9.3.8 Conservation Zone and Section 6.0 General Residence and Agricultural District) may be reduced to 50 feet to promote clustered non-residential development(s).
2. Shared parking facilities will not be counted toward the percentage of lot coverage.
3. Parking areas shared between two adjacent lots within this district may be developed up to the common side or rear lot-line (excluding lot lines tangent to the 9.3.8 Conservation Zone and Section 6.0 General Residence and Agricultural District) if all other conditions of the district are met.

**9A.0 RESEARCH AND OFFICE PARK DISTRICT**

*(Adopted March 2002)*

**9A.1 Purpose.**

The Research and Office Park District is an overlay district that allows research and development and related uses in rural parts of the Town where they would not otherwise be permitted. The purpose of the district is to:

- a. Encourage activities in a campus-like setting which will be both an aesthetic and an economic asset to the Town;
- b. Attract research, office, and light manufacturing activities which do not need to be centrally located in an industrial district, and whose developers prefer a rural setting;
- c. Preclude possible adverse effects on the local neighborhood and rural environment through a combination of very large lot sizes, low densities, rigorous performance standards, restricted traffic and tractor-trailer volumes, and aesthetic standards; and
- d. Preserve the natural and rural environments through the reservation of the majority of the area of developed lots as agricultural or conservation land.

Regulations and standards have been established to protect the residential and/or agricultural character of the district and are reasonable in exchange for the privilege of a Research and Office Park that would otherwise not be permitted in this district.

9A.1.1 Overlay District Principles. The Research and Office Park District is an overlay district that shall be used along with underlying zoning districts, as established in this ordinance. This district establishes special development standards and guidelines beyond those of the underlying zoning designation for the development of Research and Office Parks. The standards established in this Section shall only apply to Research and Office Parks with an approved Research and Office Park Plan, as described herein. If a development is not a Research and Office Park and a Research and Office Park Plan has not been approved, the standards of the underlying zoning district shall apply. Lots that are included in the Research and Office Park District but are not part of a Research and Office Park may be developed or used in any manner consistent with their underlying zoning district.

**9A.2 Definitions.**

9A.2.1 Heavy Manufacturing. Any manufacture, processing, conversion or compounding (any of which, “manufacturing”) of extracted or raw materials, including chemicals (or products composed primarily from unprocessed raw materials or chemicals) to create products, or manufacturing that might reasonably be expected to have any adverse impact on surrounding land uses or property values or beyond Town borders. Heavy Manufacturing includes, without limitation, (a) manufacturing products using (1) chemical processes or (2) petroleum, petrochemicals, or products derived therefrom, or that otherwise involve processing, refining or storing petroleum or petrochemicals (other than reasonable amounts to be used solely as fuel); and (b) the production or storage of explosives or ammunition (except retail sales of ammunition incident to another permitted use). *(Amended March 2020)*

- 9A.2.2 Light Manufacturing. The manufacture, predominantly from previously prepared materials, of finished products or parts, including processing, fabrication, assembly, treatment and packaging of such products, and incidental storage, sales and distribution of such products, but excluding raw materials industrial processing and Heavy Manufacturing. These activities do not necessitate the storage of large volumes of hazardous, flammable, toxic matter or explosive materials needed for the manufacturing process. These activities do not include manufacturing processes using predominantly hazardous, flammable, toxic or explosive materials. *(Amended March 2020)*
- 9A.2.3 Lot Coverage. A measure of intensity of land use that represents the portion of a site that is impervious. This portion includes, but is not limited to, all areas covered by buildings, parking structures, driveways, roads, sidewalks and any area of concrete asphalt, but does not include buffered setback areas, lawns, recreational areas, or agricultural uses.
- 9A.2.4 Office. Administrative, executive, professional, research or similar organizations having only limited contact with the public, provided that no merchandise or merchandising services are sold on the premises, except such as are incidental or accessory to the principal permissible use.
- 9A.2.5 Principal Use. The primary use of any lot.
- 9A.2.6 Research Laboratory. Administrative, engineering, scientific research, design or experimentation organizations where product testing is an integral part of the operation and goods or products may be manufactured as necessary for testing, evaluation and test marketing.
- 9A.2.7 Research and Office Park. An area of minimum contiguous size, as specified by this ordinance, to be planned, developed, operated, and maintained according to a common Research and Office Park Plan as a single entity and containing one or more structures to accommodate principal uses or a combination of such uses, and appurtenant common areas and secondary uses.
- 9A.2.8 Research and Office Park Plan. A master land use plan that is intended to guide growth and development of a Research and Office Park over a number of years or in phases.
- 9A.2.9 Research and Development (R & D). A business that engages in research, or research and development, of innovative ideas in technology-intensive fields. Examples include, but is not limited to, laboratories, scientific, medical, chemical, applied physics, mechanical, electronic, biological, genetic or other similar experimental research, product development or testing facilities. Development and construction of prototypes may be associated with this use.
- 9A.2.10 Secondary Use. A structure or use that: (1) is subordinate in the area, extent, and purpose to the principal use; (2) contributes to the comfort, convenience or necessity of the principal use; and (3) is located on the same lot or Research and Office Park as the principal use.

**9A.3 District Location.**

The Research and Office Park District encompasses the following areas within the Town of Wilton: *(Amended March 2010)*

- a. The area in southwestern Wilton located west of NH Route 31. As delineated on the Town of Wilton Tax Map, this includes lots E-21, E-22, E-24 through E-26 (inclusive), E-29 through E-32 (inclusive), E-35, E-36, G-4, G-23, G-24, G-26, G-28, G-29, G-36 and G-37.
- b. The area in western Wilton bordering the Town of Temple south of NH Route 101. As delineated on the Town of Wilton Tax Map, this includes lots C-127, C-127-1, C-128-1 and C-128-3.

**9A.4 Permitted Uses.**

9A.4.1 Principal Uses. A building or structure may be erected, altered or used, and a lot may be used or occupied for any of the following principal uses, provided the use meets the requirements of this ordinance.

- a. Research and development uses.
- b. Research laboratories.
- c. Light manufacturing uses.
- d. Office uses.

9A.4.2 Secondary Uses. A building or structure may be erected, altered or used, and a lot may be used or occupied for any of the following secondary uses, provided the use meets the requirements of this ordinance and conforms to the definition of a secondary use.

- a. Support services, solely for employees of principal uses and guests of Research and Office Park occupants, which meet the following minimum requirements.
  1. Support services shall be limited to child or senior day care centers, printing services, copy services, mailing and shipping services, office supplies, banks, meeting/conference rooms, eating establishments with no drive-through facilities and secretarial/office services.
  2. Support services shall not be visible from, have direct access to, or have signage visible from public streets. The limitation on signage visibility shall not pertain to inclusion of the names of support services firms on a directory sign listing occupants of a development in this district.
  3. Space occupied by support service firms may be provided in either of the following fashions:
    - (a) Space may be part of a multi-purpose building or as a part of a building principally occupied by a principal use allowed in this zone.

- (b) Space may be in a building exclusively occupied by one or more support service firms. There shall be no more than one (1) two-acre lot devoted to this type of building for each seventy-five (75) acres within this zone.
- 4. No support services shall be allowed in a development in this zone until the total building floor space devoted to principal use exceeds fifty thousand (50,000) square feet.
- 5. At no time shall the total amount of gross floor area devoted to support services exceed ten percent (10%) of the gross floor area of all buildings in the development.
- 6. No building occupied in whole or in part by support services shall be less than six thousand (6,000) square feet in size.
- b. Residential uses, solely for employees of principal uses and their families, that meet the following minimum requirements:
  - 1. One (1) dwelling unit shall be permitted for every ten thousand (10,000) square feet of gross floor area of the principal use(s)
  - 2. No dwelling unit shall be less than four hundred (400) square feet per occupant.
  - 3. At no time shall the total amount of gross floor area devoted to residential uses exceed ten percent (10%) of the gross floor area of the principal use(s).
- c. Residential uses already in existence within lots of a development may continue, which shall be counted against the minimum requirements of 9A.4.2.b.
- d. Open space, agricultural, conservation and recreation uses, only as otherwise permitted in and subject to the conditions and restrictions applicable in the underlying zoning district.

9A.4.3 Prohibited Uses. All uses not explicitly permitted in this Section shall be prohibited in the Research and Office Park District. Such uses shall include:

- a. Terminals, including truck or bus terminals, and other distribution facilities.
- b. Bulk storage of hazardous, flammable, toxic or explosive materials for the manufacturing process.
- c. Heavy manufacturing.
- d. Warehousing.

**9A.5 *Research and Office Park Lot Requirements.***

All Research and Office Parks within the Research and Office Park District shall meet the following requirements.

- 9A.5.1 Area. A Research and Office Park shall be at least twenty-five (25) acres. No building within a Research and Office Park shall be constructed on any lot less than one (1) acre.
- 9A.5.2 Frontage. The Research and Office Park shall have four hundred (400) feet of combined contiguous frontage on the Class V or better road from which the development receives its primary access.
- 9A.5.3 Setbacks.
- a. The setback for all buildings, structures and parking areas associated with the Research and Office Park and roadways other than the Research and Office Park's primary access road shall not be less than two hundred (200) feet from all lots that are not part of the Research and Office Park and from all public rights-of-way. This setback may be reduced to fifty (50) feet from lots in the Commercial and Industrial Districts, from lots belonging to other Research and Office Parks, or from lots whose owners consent in writing to such reduced setbacks.
  - b. The setback for all buildings, structures and parking areas associated with the Research and Office Park shall not be less than twenty (20) feet from all boundaries of the lot on which it is located.
- 9A.5.4 Lot Coverage. Total lot coverage of a Research and Office Park shall not exceed twenty percent (20%). Total lot coverage may be increased to twenty-five percent (25%) if the total area of the Research and Office Park is from fifty (50) to one hundred (100) acres, and to thirty-five (35) percent if the total area of the Research and Office Park size is one hundred (100) acres or greater.
- 9A.5.5 Undeveloped Land. At least fifty percent (50%) of the total development area shall be maintained in agriculture, as conservation land, or in a natural vegetated condition.
- 9A.5.6 Access. There shall be one (1) primary access road leading to the development. The primary access road shall be located on NH Route 101 or NH Route 31. The primary access road may be located on a Class V or better road if: (1) the property owner(s) of the Research and Office Park is the sole owner of the entire length of frontage along that road from NH Route 101 or NH Route 31 to the access road; and (2) new traffic attributed to that Research and Office Park primarily utilizes this primary access road. One (1) additional access road located on a Class V or better road may be created for emergency purposes. Existing structures in the Research and Office Park with existing access roads may retain these roads in addition to the one (1) primary access road.
- 9A.5.7 Structure Height. Maximum structure height is forty-five (45) feet or three (3) stories subject to Planning Board review in accordance with the Research and Office Park Regulations and the impact of the structure height on abutters to the Research and Office Park and the natural and rural environments.

9A.5.8 Traffic. Traffic shall not significantly increase on any road other than the primary access road as a result of a Research and Office Park. Each Research and Office Park shall be permitted to generate traffic in keeping with the character of the roadway from which the use has access and egress, according to the following schedule. For the purposes of this ordinance, each entering into or exiting from the Research and Office Park onto a public road shall be counted as a trip.

**Street Access**

**Maximum Allowed Trip Generation Per Square Feet of Gross Floor Area**

NH Route 101 and NH Route 31	24/1,000 SF
All Other Class V or Better Roads	12/1,000 SF

9A.5.9 Tractor-Trailer Volume. No more than two (2) tractor-trailer trips per up to 20,000 square feet of gross floor area shall be permitted per day within a Research and Office Park. An additional two (2) tractor trailer trips shall be permitted per day for each additional 20,000 square feet of gross floor area within the Research and Office Park. For the purposes of this ordinance, each entering into or exiting from the Research and Office Park onto a public road shall be counted as a trip. No tractor-trailer shall be parked in a Research and Office Park longer than three (3) days.

9A.5.10 Parking. Off-street parking shall be provided following the standards established in the Research and Office Park Regulations.

9A.5.11 Signs. Signs shall be provided according to the standards established in Section 16.0 of this ordinance and the Research and Office Park Regulations.

9A.5.12 Building Size. The footprint of any building in a Research and Office Park shall not be greater than 20,000 square feet.

**9A.6 *Conditions for Use of Area Water Supply.***

9A.6.1 Public Water Supply. Research and Office Parks intending to be served by the public water supply system shall be reviewed by the Planning Board to ensure that the proposed developments would not require more than ten percent (10%) of the available capacity as determined by the system's current safe yield and average daily water usage at the time of the proposed development. In any circumstance, where the Town of Wilton may require professional assistance or additional information to make a determination of compliance, the developer shall be required to pay the costs associated with obtaining this assistance.

9A.6.2 On-site Water Supply. In areas not served by the public water system, Research and Office Parks shall obtain their own water supply. In cases where Research and Office Parks will be utilizing private wells to supply adequate water for the uses within the development, the following performance standards shall be applied in an effort to avoid depletion of water supplies for neighboring uses:

- a. In areas determined by the United States Geological Survey (U.S.G.S) as having a high potential to yield water, proposed uses may utilize a maximum of four thousand (4,000) gallons per day (GPD) of groundwater from a drilled well.

- b. In areas determined by the U.S.G.S. as having a medium potential to yield water, proposed uses may utilize a maximum of two thousand (2,000) GPD of groundwater from a drilled well.
- c. In areas determined by the U.S.G.S. as having a low potential to yield water, proposed uses may utilize a maximum of one thousand (1,000) GPD of groundwater from a drilled well.
- e. In areas determined by the U.S.G.S. as generally yielding enough water for domestic supplies, proposed industrial uses shall be limited to a maximum of seven hundred-fifty (750) GPD of groundwater from a drilled well.

The developer may conduct additional hydrogeological studies of the site to determine the actual location and extent of the groundwater, the capacity for groundwater supplies and the impacts on surrounding groundwater users at his own cost. The Planning Board may modify the above limits based on the results of the hydrogeological testing and the determination that sustained use of the water supply will not unreasonably reduce the water supply to adjacent users.

**9A.7 *Performance Standards.***

- 9A.7.1 The performance standards in Section 4.6 of this ordinance shall apply to any Research and Office Park as a whole rather than to individual lots within the development.
- 9A.7.2 It shall be unlawful to create, permit, allow, or maintain a noise disturbance in the Research and Office Park District. Any and all excessively annoying, loud or unusual noises or vibrations such as offend the peace and quiet of persons of ordinary sensibilities and which interfere with the comfortable enjoyment of life or property and affect at the same time an entire neighborhood or any considerable number of persons shall be considered a noise disturbance.
- 9A.7.3 No outdoor storage of any material (usable or waste) shall be permitted in the Research and Office Park District, except in outdoor storage containers. Storage containers shall be screened from public view by appropriate means, such as fencing, natural buffers or as otherwise approved by the Planning Board.
- 9A.7.4 No lighting shall be permitted that would cause glare from a Research and Office Park onto any street, road, highway, deeded right-of-way or into any abutting property. All luminaries and lamps shall be of fully shielded design and shall not emit any direct light above a horizontal plane passing through the lowest part of the light emitting portion of the luminary or lamp.

**9A.8 *Procedures.***

This Section is an innovative land use control as authorized by RSA 674:16, II. In accordance with RSA 674:21, II, the Wilton Planning Board is designated as the administrator of uses under this section. Before approving any developments under this Section, the Planning Board shall develop Research and Office Park Regulations that shall incorporate the standards of this Section, and any additional requirements that the Planning Board finds necessary or desirable to achieve the purposes of this Section.

**9A.8.1 Approval Procedures.**

- a. Elements of Approval Process. The approval process for a Research and Office Park shall include the following two elements:
  1. Approval of a Research and Office Park Plan including all lots, buildings, and uses to be incorporated in the overall development. The Research and Office Park Plan shall serve as the master land use plan for the Research and Office Park. A Research and Office Park Plan shall be approved in accordance with the provisions of the Research and Office Park Regulations. Any changes or amendments to an approved Research and Office Park Plan shall require approval of the Planning Board.
  2. Approval of a site plan for the development of any nonresidential uses, multi-family dwellings containing three (3) or more dwelling units, changes or expansions of use and any additions or alterations that change the outward appearance of a nonresidential building within the Research and Office Park. A site plan shall be approved in accordance with the provisions of the Site Plan Review Regulations. If a Research and Office Park is to be developed in phases, site plans shall be required for each phase, and separate hearings shall be held to review each site plan.

An applicant may submit and the Planning Board may approve both of these elements concurrently.

- b. Architectural Design and Compatibility with the Neighborhood. Planning Board approval of a Research and Office Park Plan shall include the review of the exterior architectural design of all structures in the Research and Office Park in accordance with the Research and Office Park Regulations. Such review shall be considered as an element of the Research and Office Park Plan. Such review shall ensure that the Research and Office Park does not negatively affect the natural and rural environments and conforms to the purposes outlined in the Section 9A.1 of this ordinance. The Research and Office Park Plan shall include graphic renderings, photographs or three-dimensional models to depict the proposed development. In undertaking its review and approval, the Planning Board shall consider the location, alignment, and spacing of new buildings in relation to existing and proposed future buildings in the development. In addition, the Planning Board shall consider the positioning and configuration of the proposed buildings on a lot or lots, the use of required setbacks, open space and buffer mechanisms and the overall campus type layout of the development.
- c. Subsequent subdivision or consolidation of lots within a Research and Office Park shall be permissible according to the same rules applicable to subdivisions elsewhere in the Town, but no lot or portion thereof shall be removed from or added to the Research and Office Park without Planning Board approval of an amendment to the original Research and Office Park Plan.
- d. Buffers. Buffers shall ensure that the Research and Office Park has no significant visual impact on abutting uses and protects the natural and rural environments. The natural vegetative state shall be the preferred type of buffer for any Research and Office Park.

**9A.8.2**     *Suspension or Revocation of Research and Office Park Plan Approval*

The Planning Board shall have the authority to suspend or revoke any approval granted under this section for violation of any condition of the approval, including violations of Section 9A.7 of this ordinance, which shall be implicitly incorporated in the terms of all approvals under this Section. Any such suspension or revocation must be in accordance with the procedures of RSA 676:4-a.

**9B.0 GRAVEL EXCAVATION DISTRICT**  
*(Adopted March 2006)*

**9B.1 Purpose**

The purpose of this district is to provide reasonable and substantial opportunities for the extraction of earth materials while maintaining a safe, healthy, and harmonious atmosphere for all in the Town of Wilton. To this end, a large area of the town which is known to contain large deposits of easily extractable gravel, and where many of the lots have been used for gravel excavation in the past, is designated to allow the removal of earth materials.

The designated area permits excavation without significant impact to the public welfare because it is in a rural, sparsely populated part of the town, with convenient access to a state highway. The topography of the area, substantial buffer requirements, and the limitation on maximum open excavation areas minimize the detrimental effect of excavations on the visual character of the scenic Souhegan River / Greenville Road valley.

**9B.2 District Location**

The Gravel Excavation District encompasses the following areas within the Town of Wilton:  
*(Amended March 2010)*

- a. As delineated on the Town of Wilton Tax Map, the district includes Lots 21, 22, 24, 25, 26, 29, 30, 31, 32, and 36 on Tax Map E, and Lots 23 and 24 on Tax Map G. These lots fall in an area in southwestern Wilton located west of NH Route 31 (Greenville Road), east of Russell Hill Road and Kimball Hill Road, south of NH Route 101, and north of King Brook Road.

**9B.3 Permitted Uses**

The Gravel Excavation District is an overlay district. Uses permitted in this district are in addition to uses permitted in the underlying zoning districts.

Lots in the Gravel Excavation District may be used for the commercial taking of sod, loam, clay, sand, gravel, or such other naturally occurring unconsolidated materials that normally mask the bedrock, provided that the use meets the requirements of this ordinance and of the Excavation Site Plan Review Regulations established by the Wilton Planning Board. Washing, screening, and crushing of extracted materials utilizing small portable equipment is permitted, accessory to the extraction of those materials from the site.

**9B.4 Prohibited Uses**

Quarrying, excluding activities regulated under NH Revised Statutes Annotated (RSA), Chapter 12-E, Mining and Excavation, or crushing of bedrock, excavation of materials with explosives, or any other mining activity is prohibited. Stationary manufacturing plants are prohibited.

**9B.5 Nonconforming Uses**

Nothing in this chapter shall be deemed to prohibit any excavation which is exempted from local permit requirements by N.H. RSA 155-E.

Existing excavations operating under a permit previously granted by the Wilton Planning Board may continue to operate under the terms of that permit.

**9B.6 Requirements and Performance Standards**

The standards of this section are in addition to any standards established in the *Excavation Site Plan Review Regulations* established by the Wilton Planning Board. Section 12.4(i) of this Ordinance establishes additional standards for excavations in the Wellhead Protection Area. Where there is a conflict between the provisions of this section, Section 12.4(i), and the *Excavation Site Plan Review Regulations*, the stricter standard shall rule. (*Amended March 2007*)

9B.6.1 Setbacks and Buffers. All areas used for the excavation of earth materials shall be set back and separated by an undisturbed natural wooded buffer at least three-hundred (300) feet from all public roads except Webb Road and from all lot lines, except that:

- a. The setback may be reduced to twenty-five (25) feet from other lots in the Gravel Excavation District with the written permission of the lot owner.
- b. There is no setback requirement from lot lines between multiple lots containing land encompassed in a single excavation.
- c. Access roads may be constructed through the buffer area.

9B.6.2 Transportation. The transportation of earth materials removed from this district must be by a private access road to NH Route 31 (Greenville Road) or King Brook Road from NH Route 31 (Greenville Road) to Photon Way, subject to the Planning Board finding that such use does not compromise public safety, and not to any other public road. Where materials are proposed to be removed from a lot without frontage on NH Route 31 (Greenville Road) or King Brook Road, it is the responsibility of the excavator to obtain any necessary easements to construct an access road to NH Route 31 (Greenville Road).

9B.6.3 Maximum Open Area

- a. No actual excavation may exceed five (5) acres at one time.
- b. The Planning Board may incorporate specific conditions in the *Excavation Site Plan Review Regulations* establishing conditions under which it may permit the extension of the maximum open excavation area to ten (10) acres.

9B.6.4 Reclamation

- a. No slope in soil material shall be left steeper than 3 to 1 (three (3) horizontal feet for each one (1) foot of vertical drop). The Planning Board may approve a reclamation plan incorporating 2 to 1 slopes (two (2) horizontal feet for each one (1) foot of vertical drop) provided all of the following conditions are met:
  1. The steeper grade of 2 to 1 must be stable and must be able to support adequate forest growth;
  2. Reforestation of the 2 to 1 slope area with native tree species consistent with forestry best management practices (BMP) utilizing seedlings or young trees;
  3. Acceptable soil erosion and drainage control measures must be incorporated to stabilize the reclaimed area, according to best management practices (BMP), including but not limited to elevation platforms or benches at appropriate elevation intervals.

- b. All topsoil removed during the excavation shall be stockpiled on site, and shall be spread over the site during the reclamation of the excavated area or any portion thereof. Additional topsoil shall be brought from off-site, as required, to provide a minimum depth of four (4) inches. The excavator may apply to the Planning Board for permission to remove a portion of the stockpiled topsoil from the site, subject to a determination that the remaining material will be sufficient to cover the reclaimed area to a minimum depth of six (6) inches.

## **10.0 FLOODPLAIN CONSERVATION DISTRICT**

The regulations in the Town of Wilton Zoning Ordinance shall be considered part of the zoning Ordinance for purposes of administration and appeals under state law. If any provision of this ordinance differs or appears to conflict with any provision of the zoning Ordinance or other ordinance or regulation, the provision imposing the greater restriction or more stringent standard shall be controlling.

The following regulations shall apply to all lands designated as special flood hazard areas by the Federal Emergency Management Agency (FEMA) in its "Flood Insurance Study for the County of Hillsborough, N.H." dated September 25, 2009 or as amended, together with the associated Flood Insurance Rate Maps (FIRM) dated September 25, 2009 or as amended, which are declared to be a part of this ordinance and are hereby incorporated by reference. (*Amended May, 2009 by Selectmen's Resolution*)

### **10.1 Definitions.**

The following definitions shall apply only to this Floodplain Development Ordinance and shall not be affected by the provisions of any other ordinance of the Town of Wilton.

10.1.1 (*Deleted*)

10.1.2 Area of Special Flood Hazard. The land in the flood plain within the Town of Wilton subject to a 1 percent or greater chance of flooding in any given year. The area is designated as *Zones A or AE* on the Flood Insurance Rate Map. (*Amended March 2007*)

10.1.3 Base Flood. The flood level having a one-percent possibility of being equaled or exceeded in any given year.

10.1.4 Basement. Any area of a building having its floor subgrade on all sides.

10.1.5 Building. See "structure".

10.1.6 Breakaway Wall. A wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or supporting foundation.

10.1.7 Development. Any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials. (*Amended March 2007*)

10.1.8 FEMA. Federal Emergency Management Agency.

10.1.9 Flood or Flooding. A general and temporary condition of partial or complete inundation of normally dry land areas from:

- a. The overflow of inland or tidal waters; and/or
- b. The unusual and rapid accumulation or runoff of surface waters from any source.

- 10.1.10 *(Deleted March 2007)*
- 10.1.11 Flood Elevation Study. An examination, evaluation and determination of flood hazards and if appropriate, corresponding water surface elevations, or an examination and determination of mud slide or flood related erosion hazards
- 10.1.12 Flood Insurance Rate Map (FIRM). An official map incorporated with this ordinance on which FEMA has delineated both the special flood hazard areas and the risk premium zones applicable to the Town of Wilton. The FIRM will be used to make determinations of flood hazard zones and base flood elevations.
- 10.1.13 Flood Insurance Study. See "Flood elevation study".
- 10.1.14 Floodplain or Flood-prone area. Any land area susceptible to being inundated by water from any source (see "Flooding").
- 10.1.15 Flood proofing. Any combination of structural and non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitation facilities, structures and their contents.
- 10.1.16 Floodway. See "Regulatory Floodway".
- 10.1.17 Functionally dependent use. A use which cannot perform its intended purpose unless it is located or carried out in close proximity to water. The term includes only docking and port facilities that are necessary for the loading/unloading of cargo or passengers, and ship building repair facilities but does not include long-term storage or related manufacturing facilities.
- 10.1.18 Highest adjacent grade. The highest natural elevation of the ground surface prior to construction next to the proposed walls of a structure.
- 10.1.19 Historic Structure. Any structure that is:
- a. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
  - b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district;
  - c. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
  - d. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
    1. By an approved state program as determined by the Secretary of the Interior, or
    2. Directly by the Secretary of the Interior in states without approved programs.

- 10.1.20 Lowest Floor. The lowest floor of the lowest enclosed are (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such an enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this ordinance.
- 10.1.21 Manufactured Home. A structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when connected to the required utilities. For floodplain management purposes the term "manufactured home" includes park trailers, travel trailers, and other similar vehicles placed on site for greater than 180 consecutive days. This includes manufactured homes located in a manufactured home park or subdivision. *(Amended March 2007)*
- 10.1.21.1 Manufactured Home Park or Subdivision. A parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale. *(Adopted March 2007)*
- 10.1.22 Mean sea level. The National Geodetic Vertical Date (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's FIRM are referenced.
- 10.1.22.1 New construction. For the purposes of determining insurance rates, structures for which the "start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, *new construction* means structures for which the *start of construction* commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures. *(Adopted March 2007)*
- 10.1.23 100-Year flood. See "base flood".
- 10.1.24 Recreational Vehicle. A vehicle which is (i) built on a single chassis; (ii) 400 square feet or less when measured at the largest horizontal projection; (iii) designed to be self propelled or permanently towable by a light duty truck; and (iv) designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel or seasonal use. *(Amended March 1994)*
- 10.1.25 Regulatory Floodway. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height. *(Amended March 2007)*
- 10.1.26 Special flood hazard area. See "Area of Special Flood Hazard."
- 10.1.27 Structure. For floodplain management purposes, a walled and roofed building, including a gas or liquid storage tank, that is principally above ground, as well as a manufactured home.
- 10.1.28 Start of Construction. The date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on site, such as the pouring of a slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; the placement of a manufactured home on a foundation; or any substantial improvement. Permanent construction

does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; excavation for a basement, footings, piers, or foundations; the erection of temporary forms; or the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or part of the main structure.

- 10.1.29 Substantial damage. Damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the predamage market value of the structure.
- 10.1.30 Substantial Improvement. Any combination of repairs, reconstruction, alteration, or improvements to a structure in which the cumulative cost equals or exceeds fifty percent of the market value of the structure. The market value of the structure should equal: (1) the appraised value prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. This term includes structures which have incurred substantial damage, regardless of actual repair work performed. The term does not include any project for improvement of a structure required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or any alteration of a "historic structure; provided that the alteration will not preclude the structure's continued designation as a "historic structure".
- 10.1.30.1 Violation. The failure of a structure or other development to be fully compliant with the community's flood plain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44CFR § 60.3(b)(5), (c)(4), (c)(10), (d)(3), (e)(2), (e)(4), or (e)(5) is presumed to be in violation until such time as that documentation is provided. (*Adopted March 2007*)
- 10.1.31 Water surface elevation. The height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, (or other datum, where specified) of floods of various magnitudes and frequencies in the floodplains.

## **10.2 Permit Required.**

All proposed development in any special flood hazard area shall require a permit. The building inspector shall review all building permit applications for new construction or substantial improvements to determine whether proposed building sites will be reasonably safe from flooding.

The Building Inspector will not issue a building permit until the applicant certifies that all necessary permits have been received from those governmental agencies from which approval is required by federal or state law, including Section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334. It shall be the responsibility of the applicant to certify these assurances to the Building Inspector.

In addition, the applicant shall supply the Building Inspector with the following information for all new or substantially improved structures:

- a. The as-built elevation (in relation to NGVD) of the lowest floor (including the basement) and include whether or not the structure contains a basement;

- b. If the structure has been floodproofed, the as-built elevation (in relation to NGVD) to which the structure was floodproofed; and
- c. Any certification of floodproofing.

The Building Inspector shall maintain this information for public inspection and furnish it upon request.

**10.3**      ***Location of the 100-Year Flood Elevation.***

In special flood hazard areas the Building Inspector shall determine the 100-year flood elevation in the following order of precedence according to the data available:

- a. In Zone AE, refer to the elevation data provided in the communities Flood Insurance Study and accompanying FIRM; (*Amended March 2007*)
- b. In unnumbered A zones the Building Inspector shall obtain, review, and reasonably utilize any 100-year flood elevation data available from any federal, state, or other source including data submitted to the Town for development proposals (i.e. subdivisions, site approvals).

**10.4**      ***Construction Standards.***

- a. All new construction or substantial improvements within a flood prone area shall be:
  - 1. Designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;
  - 2. Constructed with materials resistant to flood damage;
  - 3. Constructed by methods and practices that minimize flood damages; and
  - 4. Constructed with electrical, heating, ventilation, plumbing, air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.
- b. Any new construction or substantial improvement within the A and AE Zones shall meet the following criteria that: (*Amended March 2007*)
  - 1. All new construction or substantial improvement of residential structures have the lowest floor (including the basement) elevated to or above the 100-year flood elevation;
  - 2. All new construction or substantial improvement of non-residential structures have the lowest floor (including the basement) elevated to or above the 100-year flood level; or together with attendant utility and sanitary facilities, shall:
    - a) Be floodproofed so that below the 100-year flood elevation the structure is watertight will walls substantially impermeable to the passage of water;

- b) Have structural components capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy; and
  - c) Be certified by a registered professional engineer or architect that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this section;
- c. All manufactured homes to be placed or substantially improved within special flood hazard areas shall be elevated on a permanent foundation such that the lowest floor of the manufactured home is at or above the base flood level and securely anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. This requirement is in addition to applicable state and local anchoring requirements for resisting wind forces;
- d. Recreational vehicles placed on sites within Zone AE shall either: (i) be on the site for fewer than 120 consecutive days; (ii) be fully licensed and ready for highway use; or (iii) meet all standards of Section 60.0 (b) (1) of the National Flood Insurance Program Regulations and the elevation and anchoring requirements for manufactured homes in Paragraph (c) (6) of Section 60.3. *(Amended March 2007)*
- e. For all new construction and substantial improvements, fully enclosed areas below the lowest floor that are subject to flooding are permitted provided they meet the following requirements:
- 1. The enclosed area is unfinished or flood resistant, usable solely for the parking of vehicles, building access of storage;
  - 2. The area is not a basement;
  - 3. The area shall be designed to automatically equalize hydrostatic flood forces or exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or meet or exceed the following minimum criteria:
    - a) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided;
    - b) The bottom of all openings shall be no higher than one foot above grade; and
    - c) Openings may be equipped with screens, louvers, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters; and
- f. Where new or replacement water and sewer systems (including on-site systems) are proposed in floodprone areas the applicant shall provide the Building Inspector with assurance that these systems will be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters, and that on-site waste disposal systems will be located to avoid impairment to them or contamination from them during periods of flooding.

## **10.5**      *Alteration of Water Courses.*

Any development involving the alteration of a watercourse shall meet the following requirements.

- a. Prior to the alteration or relocation of a watercourse the applicant for such authorization shall notify the Wetlands Bureau of the New Hampshire Department of Environmental Services and submit copies of such notification to the Building Inspector, in addition to the copies required by RSA 482-A:3. Further, the applicant shall be required to submit copies of said notification to those adjacent communities as determined by the Building Inspector. *(Amended March 2007)*
- b. The applicant shall submit to the Building Inspector, certification provided by a registered professional engineer, assuring that the flood carrying capacity of an altered or relocated watercourse can and will be maintained.
- c. Along watercourses with a designated Regulatory Floodway no encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practices that the proposed encroachment would not result in any increase in flood levels within the community during the base flood discharge. *(Amended March 2007)*
- d. Until a Regulatory Floodway is designated along watercourses, no new construction, substantial improvements or other development (including fill) shall be permitted within Zone AE on the FIRM, unless it is demonstrated by the applicant that the cumulative effect of the proposed development, when combined with all existing and anticipated development, will not increase the water surface elevation of the base flood more than one foot at any point within the community. *(Amended March 2007)*
- e. The Building Inspector shall obtain, review, and reasonably utilize any floodway data available from Federal, State, or other sources as criteria for requiring that all development located in Zone A meet the following floodway requirement:

"No encroachments, including fill, new construction, substantial improvements, and other development are allowed within the floodway that would result in any increase in flood levels within the community during the base flood discharge." *(Adopted March 2007)*

## **10.6**      *Variances and Appeals.*

Any order, requirement, decision or determination of the Building Inspector made under this ordinance may be appealed to the Zoning Board of Adjustment as set forth in RSA 676:5.

If the applicant, upon appeal, requests a variance as authorized by RSA 674:33, I (b), in addition to the usual variance standards under state law the applicant shall show that:

- a. The variance will not result in increased flood heights, additional threats to public safety or extraordinary public expense;
- b. If the requested variance is for activity within a designated regulatory floodway, it will not result in any increase in flood levels during the base discharge; and
- c. Considering flood hazard, the variance is necessary to afford relief.

The Zoning Board of Adjustment shall notify the applicant in writing that:

- a. The issuance of a variance to construct below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage; and
- b. Construction below the bases flood level increases risks to life and property.

The notification shall be maintained with a record of all variance actions.

The Town shall maintain a record of all variance actions, including the justification for their issuance, and report the issuance of any variance to the FEMA's Federal Insurance Administrator in its annual or biennial report.

**11.0 WETLANDS CONSERVATION DISTRICT**

**11.1 Purpose.**

In the interest of public health, convenience, safety and welfare, the regulations of this District are intended to guide the use of areas of land with extended periods of high water tables.

- a. To prevent the development of structures and land uses on naturally occurring wetlands which would contribute to pollution of surface and groundwater by sewage.
- b. To prevent the destruction of natural wetlands which provide flood protection.
- c. To prevent unnecessary or excessive expenses to the Town to provide and maintain essential services and utilities which arise because of inharmonious use of wetlands.
- d. To encourage those uses that can be appropriately and safely located in wetland areas.

**11.2 District Boundaries.**

The Wetlands Conservation District comprises all wetlands and water bodies, as defined by this ordinance, located wholly or partially within the Town of Wilton.

In all cases where the Wetland Conservation District is superimposed over another zoning district in the Town of Wilton, the more restrictive regulations shall apply.

*(Amended March 2002, March 2003, March 2020)*

**11.3 Permitted Uses.**

Any use that does not result in the erection of any structure or alter the surface configuration by the addition of fill or by dredging and that is otherwise permitted by the zoning ordinance.

- a. Forestry - tree farming;
- b. Agriculture;
- c. Wildlife refuge;
- d. Parks and such recreational uses as are consistent with the purpose and intentions of this section;
- e. Conservation areas and nature trails;
- f. Open spaces as permitted by subdivision regulations and other sections of this ordinance;
- g. Natural drainage-ways, i.e. streams, creeks or other paths of normal run-off water; and
- h. Water impoundments and wells for water supply.

#### **11.4 Special Exceptions.**

Special exceptions may be granted by the Zoning Board of Adjustment (ZBA) for the following uses within the Wetland Conservation District (see also Section 4.4):

- a. Streets, roads and other access ways and utility right-of-way easements including power lines and pipe lines if essential to the productive use of land not so zoned and if so located and constructed as to minimize any detrimental impact of such uses upon the wetlands or water bodies. *(Amended March 2020)*
- b. The undertaking of a use not otherwise permitted in the Wetland Conservation District, which may include the erection of a structure, dredging, filling, draining or otherwise altering the surface configuration of the land, if it can be shown that the proposed use will not conflict with the purpose and intent of this section and if the proposed use is otherwise permitted by the zoning ordinance. Proper evidence to this effect shall be submitted in writing to the Zoning Board of Appeals and shall be accompanied by the findings of a review by a soil scientist certified by the New Hampshire Board of Natural Scientists selected by the Planning Board and/or the Zoning Board of Adjustment. *(Amended March 1999)*
- c. *(Repealed March 2002)*
- d. *(Repealed March 2002)*
- e. Any exception granted by the ZBA must be preceded by a public hearing thirty (30) days before approval may be given. Abutters to affected property must be notified then (10) days in advance of the public hearing.

#### **11.5 Incorrectly Designated Zones.**

*(Adopted March 2002)*

When the actual boundary of the Wetlands Conservation District is in dispute by any owner or abutter actually affected by the boundary, the Planning Board, at the owner/abutters expense and request, may engage a certified soil scientist or a certified wetlands scientist to determine more accurately the precise boundary of the Wetlands Conservation District, who shall submit to the Planning Board his findings.

The Planning Board, based upon the findings presented by the applicant, may adjust the boundary or area designation of the Wetlands Conservation District to reduce or expand the designated area to more correctly define the location and extent of the wetlands on a site-specific, case-by-case basis.

The Planning Board shall reserve the right to withhold action on the plat pending the results of an on-site and/or other investigation by the Board or its appointed agent and shall act to approve or disapprove the final plat within 65 days of submission or such further time as deemed necessary and as provided for by New Hampshire State statute as amended. *(Amended March 2018)*

#### **11.6 ~~(Deleted March 2020)~~**

## **12.0      ***AQUIFER PROTECTION DISTRICT*****

### **12.1      ***Purpose.*****

Pursuant to NH RSA 674:16 and 674:21, the Aquifer Protection District is hereby established for the purposes of protecting, preserving and maintaining the existing and future municipal water supply sources of the Town of Wilton by regulating the uses of land over known aquifers and their recharge areas, so as to protect such supplies from contamination caused by adverse or incompatible land use practices or developments. The Aquifer Protection Ordinance is intended to limit the uses of land so designated to those which will not adversely affect water quality by contamination, or water quantity by preventing recharge of the aquifer.

### **12.2      ***District Location.*****

The boundaries of the Aquifer Protection District shall be the outermost edge of the surficial extent of all aquifer deposits presently designated as stratified drift as supported by information included in the USGS Aquifer Delineation study entitled Hydrogeology of Stratified Drift Aquifers and Water Quality in the Nashua Regional Planning Commission Area, South-Central, New Hampshire by K. W. Toppin, (1987), extended to include the boundaries of the Wellhead Protection District described in the following section. The Aquifer Protection District is a zoning overlay district which imposes additional requirements and restrictions to those of the underlying, base district zoning. In all cases, the more restrictive requirement(s) and permitted uses shall apply.

Wellhead Protection Area. The boundaries of the Wellhead Protection Area (WHPA) are as delineated in “WHPA Delineation – Abbott and Everett Production Wells Wilton, NH” by Emery and Garrett Groundwater, Inc (EGGI), 2008. See Figure 12.1 below. The map in Figure 12.1 was produced by Nashua Regional Planning Commission (NRPC) utilizing electronic “shape files” provided by EGGI, and depicts the revised WHPA. The EGGI study has increased the WHPA that was delineated in “The Wilton, N.H. Wellhead Protection Pilot Project” by Douglas L. Heath, October 1993; from 304 acres to 396 acres.

The limits of the combined WHPA in Figure 12.1 below are not surveyed, and therefore are approximate. For planning purposes, the Planning Board may use the EGGI revised WHPA boundary depicted below or as presented in the EGGI report cited above.  
*(Amended March 2007, March 2009)*

Figure 12-1

Abbott & Everett Wellhead Protection Area Delineation, Wilton, NH

 WHPA Boundary*	 Wilton Water Works Wells	 Contours
 400 Foot Sanitary Protection Zone	 Lot Line	 Water

Data Sources:

- Lot lines used from Nashua Regional Planning Commission Digital Wilton parcel data
- Contours, wells & water data used from Nashua Regional Planning Commission GIS database.
- Distribution source: NH GRANIT
- Wellhead Protection Area Delineation provided by Emery & Garrett Groundwater, Inc

Maps prepared by the Nashua Regional Planning Commission are for planning purposes only. NRPC uses data gathered from multiple sources at various scales of accuracy. No warranties, expressed or implied, are provided for the data herein, its use, or its interpretation.

### 12.3 *Permitted Uses.*

The following uses shall be permitted in this district:

- a. Industrial or commercial uses, in the appropriate District, which discharge no non-human wastes on site and human wastes only in an approved septic systems;
- b. Industrial uses that discharge only non-contact cooling water;
- c. Residential development under the following conditions:
  1. If serviced by Town water and sewer, at densities permitted in the underlying district;
  2. If serviced by on-site water and/or sewer, at fifty (50) percent of the density of the underlying District (i.e. double the acreage requirement of the underlying District); however, this does not increase the minimum dry area requirement of the underlying District;
  3. If developed under the Alternative Lot Requirements set forth in Section 6.3, the area of the reduced frontage lot does not have to be increased;
  4. Areas located in the Watershed District at the density of the underlying district;
- d. Activities designed for conservation of soil, water, plants, and wildlife;
- e. Outdoor recreation, nature study, boating, fishing, and hunting where otherwise legally permitted;
- f. Normal operation and maintenance of existing water bodies, wells, and dams, splash boards, weirs, and other water control, supply, and conservation devices;
- g. Foot, bicycle, and/or horse paths and bridges;
- h. Maintenance and repair of any existing structure; and
- i. Farming, gardening, nursery, forestry, harvesting and grazing provided that fertilizers, herbicides, pesticides, manure, and other leachables are used appropriately and not stored outdoors in accordance with the following:
  1. The cultivation and harvesting of crops shall be performed in accordance with the recognized soil conservation practices of the Hillsborough County Conservation District and agricultural practices as may be regulated by the New Hampshire Department of Agriculture, the Division of Public Health Services of the Department of Health and Human Services, and the New Hampshire Water Supply and Pollution Control Division or as recommended by the Hillsborough County Extension Service;
  2. Forestry or tree farming shall be performed in accordance with recognized management practices in order to protect the aquifer from contamination or damage as may be regulated by the Division of Forests and Lands of the New Hampshire Department of

Resources and Economic Development or recommended by the Hillsborough County Soil Conservation District and Extension Service.

- j. Subsurface storage of propane/liquefied natural gas. (*Adopted March 2004*)

**12.4 Prohibited Uses.**

The following uses shall not be permitted in the Aquifer Protection District:

- a. Disposal of solid waste other than brush or stumps;
- b. Subsurface storage of regulated substances, including gasoline, diesel fuel, oil and other refined petroleum products, and the subsurface transmission of regulated substances, including gasoline, diesel fuel, oil and other refined petroleum products through pipelines; (*Amended March 2004*)
- c. Disposal of liquid or leachable non-human wastes;
- d. Industrial or commercial uses which discharge contact type process waters on site; (*Amended March 2004*);
- e. Outside, unenclosed storage of road salt;
- f. Dumping of snow containing de-icing chemicals brought from outside the Aquifer Protection District;
- g. Commercial animal feed-lots where animals are kept at excessive densities;
- h. Mining of land except incidental to a permitted use;
- i. Excavation(s) of sand or gravel, except those conducted in accordance with an approved Excavation Permit issued pursuant to the Excavation Regulations of the Town. Within the Wellhead Protection Area (WHPA), excavations of sand and gravel are subject to the following additional restrictions: (*Amended March 2007*)
  - 1. Minimum depth to groundwater is ten (10) Feet.
  - 2. Crushing and or washing of materials is prohibited unless approval is granted by the Wilton Planning Board upon consultation with the Wilton Water Department and demonstration by the applicant that the proposed crushing or washing of materials will not adversely impact the water resource that is the subject of the Wellhead Protection Area.
  - 3. Storage of liquid petroleum products or other hazardous materials is prohibited.
  - 4. Storage of equipment or vehicles is prohibited, except in a manner designed to eliminate the danger of contamination due to leakage.
  - 5. Maintenance of vehicles is prohibited.
  - 6. All vehicles and equipment shall utilize biodegradable, non-hazardous hydraulic fluid and such other biodegradable and non-hazardous fluids as may be commercially

available. Exceptions for short-term activity are solely at the discretion of the Planning Board on a case-by-case basis based on the potential risk to the aquifer and water supply.

- j. All on site handling, disposal, storage, processing or recycling of hazardous or toxic materials;
- k. Automotive service and repair shops, and junk and salvage yards unless they are operated in accordance with New Hampshire State statutes, rules and regulations governing such uses; and
- l. Bulk storage of toxic material for resale or distribution.
- m. New large groundwater withdrawals within four-thousand (4,000) feet of the Wellhead Protection Area defined in this section, except as preempted by state statute. If permitted by state statute, the Town of Wilton, NH hereby requires any and all optional requirements, including, but not limited to "Pre-Testing Conference and Revised Withdrawal Testing Design. (*Adopted March 2007*)
- n. Any new or expansion of a use or activity, within the WHPA defined above, listed in the NH Groundwater Protection Act list of Potential Contamination Sources (PCSs), as defined in RSA 485-C. (*Adopted March 2007*)
- o. The siting or operation of a wastewater or septage lagoon within the WHPA or Aquifer district. (*Adopted March 2007*)

### **12.5 Performance Standards.**

All subdivision proposals and other proposed new developments within the Aquifer Protection District shall be reviewed by the Planning Board and shall conform to the provisions of this ordinance, the Subdivision Regulations of the Town of Wilton and the following:

- a. All such proposals are consistent with the need to protect the groundwater of the Town of Wilton and adjacent communities.
- b. All sanitary sewer systems are designed to minimize or eliminate leakage or discharges from the system into the groundwater.
- c. On site waste disposal systems are located so as to avoid or minimize groundwater contamination.
- d. All surface storm water generated by development is kept on-site and handled in such a manner as to allow the water to infiltrate into the ground before leaving the site.
- e. Streets, roads, and parking areas are constructed so that the need for direct application of road salt is minimized for winter safety, and so that run-off from such uses is channeled to avoid or minimize groundwater contamination.

- f. Written approval of the State of New Hampshire Department of Environmental Services, Water Supply and Pollution Control Division for subdivision and septic systems has been obtained.
- g. Under the NH Groundwater Protection Act, existing uses or activities, within the WHPA, listed in RSA 485-C as Potential Contamination Sources (PCSs) shall follow Best Management Practices (BMPs) for Groundwater Protection as adopted under the NH Code of Administrative Rules Part ENV-Ws 421, Best Management Practices. (*Adopted March, 2007*)

**12.6** *Incorrectly Designated Zones.*

When the actual boundary of the Aquifer Protection District is in dispute by any owner or abutter actually affected by the boundary, the Planning Board, at the owner/abutters expense and request, may engage a professional geologist or hydrologist to determine more accurately the precise boundary of the Aquifer Protection District, who shall submit to the Planning Board his findings, including:

- a. A detailed topographic layout of the subdivision and/or area to be developed, prepared by a registered land surveyor;
- b. A revised soils map of the subdivision and/or area prepared by a certified soil scientist qualified in hydrologic studies including a written report of his on-site field inspection and test boring data;
- c. The aquifer boundary as shown on the U.S. Geological Survey Map shall be overlaid on the plat and the newly proposed boundary location shall be indicated on the same plat by a broken line; and
- d. Any additional mapping, hydrogeologic reports or information which becomes available, as a result of recent or on-going scientific investigation of the location and extent of aquifers, performed by the U.S. Geological Survey, New Hampshire State agencies or boards, the Town of Wilton or the agents of any of the above.

The Planning Board, based upon the findings presented by the applicant, may adjust the boundary or area designation of the Aquifer Protection District to reduce or expand the designated area to more correctly define the location and extent of the aquifer on a site-specific, case-by-case basis.

The Planning Board shall reserve the right to withhold action on the plat pending the results of an on-site and/or other investigation by the Board or its appointed agent and shall act to approve or disapprove the final plat within 65 days of submission or such further time as deemed necessary and as provided for by New Hampshire State statute as amended. (*Amended March 2018*)

**12.7** *Non-Conforming Uses.*

Non-conforming uses may continue in this district in the form in which they exist at the time of the adoption of this ordinance unless they pose a direct hazard to the aquifer or are actually introducing some foreign substances (oils, salts, chemicals, etc.) into the aquifer. In the latter

case, the Selectmen shall issue an immediate cease and desist order to stop the offending activity or process from continuing activity in this district.

**13.0 AGE-RESTRICTED HOUSING DISTRICT**

**13.1 Purpose.**

The Age-Restricted Housing District is hereby established for the purpose of providing housing specifically designed to meet the needs of older persons while ensuring compliance with local planning standards and land use policies.

**13.2 District Location.**

Age-Restricted housing developments are permitted as a special exception by the Zoning Board of Adjustment and Site Plan review and approval by the Planning Board in the residential, general residential and agricultural, and commercial districts. (See also Section 4.4.)

In considering and granting a special exception, the Zoning Board shall determine that:

- a. The proposed age-restricted housing development will not adversely impact the existing and future land uses in the underlying district;
- b. The proposed location is appropriate for age-restricted housing and is consistent with the stated intent and standards of the Age-Restricted Housing District;
- c. The parcel area is sufficient, appropriate and adequate for the proposed use and the reasonable anticipated operation;
- d. The proposed age-restricted housing project will provide for the health, safety and welfare of the older occupants.

**13.3 General Standards.**

All housing for older persons shall conform to the following standards:

- a. Dwelling unit density shall not be greater than twenty-four (24) units/gross tract acre for one (1) bedroom units or twelve (12) dwelling units/gross tract acre for two (2) bedroom units when served by Town water and sewer. For lots not served by Town water and sewer, the dwelling unit density shall not be greater than the density provisions of the underlying district.
- b. Dwelling units shall have a maximum of two (2) bedrooms and shall be designed for and restricted to occupancy by older persons.
- c. Housing developments for older persons shall not be required to conform to the requirement that there be one dwelling per lot. Building types permitted are cluster, townhouse and apartment structures. Apartment is defined as a structure with separate living units located adjacent to, below or above other living units.
- d. Occupancy of all units within the development shall be limited to families where the head of household or spouse is at least sixty-two (62) years of age. (*Amended March 2020*)
- e. The minimum lot area shall be 1 acre and the lot shall have at least one hundred (100) feet of frontage on a public right-of-way, Class V or better if served by water and sewer,

otherwise the minimum lot area shall be at least two (2) acres and the lot shall have two hundred (200) of frontage on a public right-of-way Class V or better. Lot coverage shall not exceed seventy-five (75) percent of the total lot area.

- f. All buildings, driveway and parking areas shall be set back in conformance with the set back requirements of the underlying zoning district where the development is to be located. A vehicular drop-off area to the building may be located within the front yard set back.
- g. Maximum building height is forty-five (45) feet.
- h. Parking shall be provided in conformance with the parking standards established in the Site Plan Review Regulations. During Site Plan Review, the Planning Board may require additional parking for visitors and additional parking based upon distance of the development from the center of Town, income of the residents and access to alternate forms of transportation, shopping areas and other services.
- i. All buildings shall be provided with the following safety features:
  - 1. Ramps to the first floor of each building;
  - 2. Non skid floors;
  - 3. Doors of sufficient width to accommodate wheelchairs;
  - 4. Electric cooking stoves;
  - 5. Electric outlets at levels at least twenty-four (24) inches above the floor;
  - 6. Showers in place of tubs for more than fifty (50) percent of the dwelling units and handicapped showers for twenty-five (25) percent of the dwelling units;
  - 7. Grab bars around tubs (where provided) and toilets;
  - 8. Lever handle-type spigots and door knobs; and
  - 9. Emergency signals which ring in adjoining apartments or at a central location.
- j. Adequate ancillary facilities, usually associated with the group living needs for comfort, health, safety and welfare of older persons and not usually constructed for multi-family dwellings shall be provided to meet the need of the proposed population of the development. The floor area of such ancillary facilities shall not be less than five (5) percent of the total floor area of the building. These facilities may include dispensaries, medical facilities, common dining facilities, group recreation facilities, laundry facilities and other similar or related facilities.
- k. The development shall be landscaped so as to be integrated with the Town. The perimeter of the development shall be landscaped with a sufficient buffer strip to minimize its intrusion on neighboring land uses.
- l. The cumulative number of age-restricted dwelling units constructed in conformance with this Article shall not exceed 6% of the total number of dwelling units in the community.

**13.4**      ***Review of Site Plans.***

The Planning Board shall review and approve or disapprove the site plans for all proposed age-restricted housing. The review of any site proposed for age-restricted housing shall take into account its proximity to those support services (shopping, medical, transportation, etc.) necessary to meet the needs of older persons in addition to the standards contained in section 13.3. Where support services are absent or remote, provisions for such services shall be provided by the developer.

**13.5**      ***Change of Use.***

If any structure erected pursuant to a special exception and site plan review in accordance with this section ceases to be used exclusively for elderly housing, then the full zoning ordinance requirements for the new use must be met. Failure to comply with the zoning ordinance may result in a revocation of the certificate of occupancy for the structure.

**14.0 WATERSHED DISTRICT**

**14.1 Purpose.**

The purpose of the Watershed District is to preserve the quality of the water and to protect the health and welfare of the residents of the Town of Wilton by minimizing sources of pollution through regulation and restriction of population density and activity, and by keeping organic and inorganic wastes to a minimum.

**14.2 District Boundary.**

Watershed District shall mean the land and water areas which by seepage or flow introduce water into the old and new reservoirs of the Town. Generally, this includes, but is not restricted to, the watersheds of Mill Brook and Stockwell Brook above the reservoirs. The area shall be defined by the U.S. Soil Conservation Service of the Department of Agriculture and will be shown on the amended zoning map filed with the Town Clerk.

**14.3 Lot Requirements.**

14.3.1 Area. Minimum lot size six (6) acres per dwelling unit excluding wetlands, water bodies, land within the 100 year floodplain and land within the deeded flowage rights to the State of New Hampshire Flood Control System. *(Amended March 1992, March 2020)*

14.3.1.1 Alternative lot requirements. Alternative lots (See Section 6.3) shall have a minimum area of ten (10) acres per dwelling unit and meet the established six (6) acre requirement of this section. *(Amended March 1992)*

14.3.2 Frontage. A minimum of three hundred (300) feet on a Class V or better road. *(Amended March 1992)*

14.3.3 Setbacks. No residence, building, structure, feed lot, outflow from building drainage, septic system or its containment area shall be located less than two hundred (200) feet from open water and perennial streams nor less than one hundred-fifty (150) feet from intermittent streams, the 100 year floodplain, the deeded flowage rights to the State of New Hampshire Flood Control System, or any wetland or water body. *(Amended March 1992, March 2003, Amended March 2020)*

14.3.4 Erosion and Sediment Control. Any disturbance of slopes of fifteen (15) percent or more shall require an erosion and sediment control plan approved by the Planning Board.

14.3.5 Permitted changes within the setback area.  
*(Adopted March 2007)*

1. The setback area defined in section 14.3.3 shall be left in its natural state and where existing, a natural woodland buffer shall be maintained.
2. Where existing, a natural woodland buffer must be maintained. Tree cutting shall be limited to not more than fifty (50) percent of the basal area of trees, and not more than fifty (50) percent of the total number of saplings, in a twenty (20) year period. A healthy, well-distributed stand of trees, saplings, shrubs, and ground cover shall be maintained. Stumps and their root systems must remain intact in the ground. Dead, diseased, fallen or

dangerous trees, saplings, limbs, shrubs, and ground cover may be removed following applicable Best Management Practices (BMPS).

One (1) driveway access may be permitted within the setback area, provided the driveway construction plan and erosion control plan are approved by the Planning Board in accordance with applicable zoning and regulations. As approved, necessary alteration of terrain, removal of rocks, stumps and roots are permitted exclusively for driveway construction and associated stormwater management and erosion control. Any activity or construction within the setback is subject to inspection as a condition of approval; solely to insure compliance with any approval or permit.

#### **14.4 Prohibited Uses.**

The following uses are prohibited within the Watershed District. (*Amended March 1991*)

- a. The use of any hazardous or toxic materials or liquids within the above stated set back areas.
- b. No pasturing of livestock or fowl will be permitted within one hundred (100) feet of open flowing water. It will be the responsibility of the land owner to protect the water by installing adequate and proper fencing.
- c. No land shall be filled, excavated or graded and no land shall be used in such a way that would cause substantial or avoidable erosion or alter existing patterns of natural water flow in the Watershed District, except for those uses incidental to permitted residential and agricultural construction.
- d. All uses other than residential or agricultural.

#### **14.5 Cluster Development.**

Cluster developments shall be permitted within the Watershed District in accordance with the Cluster Development Regulation and provided such proposed Cluster Development shall conform to all setback requirements specified in this section.

#### **14.6 Previous Regulations.**

This District will incorporate the regulation to protect the purity of the water of Mill Brook Wilton, under the provision of Chapter 57, Laws of 1899, entitled "An act for the better protection of public water supplies" as adopted at special Town Meeting on December 4, 1904.

#### **14.7 Special Exceptions.**

(*Adopted March 2001*)

The following uses will only be allowed as special exceptions by the Zoning Board of Adjustment (ZBA) and by site plan review and approval by the Planning Board. (See also Section 4.4).

- 14.7.1 Commercial and Industrial Uses. The ZBA may, in appropriate cases subject to appropriate conditions, permit commercial or industrial uses in the District as a special exception, provided it is permitted in the underlying zoning district and complies with the requirements of Section 14.1 Purpose, Section 14.3 Lot Requirements and Section 4.6 Performance Standards.

**15.0 PERSONAL WIRELESS SERVICE FACILITIES**  
*(Adopted March 2001)*

15.0.1 Purpose and Intent.

It is the express purpose of this Article to permit carriers to locate personal wireless service facilities within particular areas of the Town of Wilton consistent with appropriate land use regulations that will ensure compatibility with the visual and environmental features of the Town. Compatibility with the visual features of Wilton is measured based on the change in community scale and character in relation to the height, mass, materials, contrasts, or proportion within the surroundings of a proposed personal wireless service facility. This Article enables the review of the locating and siting of personal wireless service facilities by the Town of Wilton so as to eliminate or mitigate the visual and environmental impacts of personal wireless service facilities. This Article is structured to encourage carriers to locate on existing buildings and structures whenever possible. New ground-mounted personal wireless facilities are permitted, but only when the use of existing structures and buildings is found to be infeasible. Co-location is encouraged for all personal wireless service facility applications and the review of a personal wireless facility shall be on the basis of the site being built using all positions on the mount.

15.0.2 Applicability.

The terms of this Article and the Site Plan Review Regulations shall apply to personal wireless service facilities proposed to be located on property owned by the Town of Wilton, on privately owned property, and on property that is owned by any other governmental entity that acts in its proprietary capacity to lease such property to a carrier.

15.0.3 Definitions.

For the purpose of this Article, the following terms shall have the meaning given herein:

- 15.0.3.1 Antenna. The surface from which wireless radio signals are sent and/or received by a personal wireless service facility.
- 15.0.3.2 Antenna Array. A collection of antennas attached to a mount to send and receive radio signals.
- 15.0.3.3 Average Tree Canopy Height. An average height found by inventorying the height at above-ground level (AGL) of all trees over twenty (20) feet in height for a defined area, such as the area delineated in Section 15.4.1.6.
- 15.0.3.4 Camouflaged. A personal wireless service facility that is disguised, hidden, part of an existing or proposed structure, or placed within an existing or proposed structure.
- 15.0.3.5 Carrier. A company that provides personal wireless services; also sometimes referred to as a provider.
- 15.0.3.6 Co-location. The use of a single mount on the ground by more than one carrier (vertical co-location) or the same carrier with multiple licenses, and/or the use of several mounts on an existing building or structure by more than one carrier or the same carrier with multiple licenses.

- 15.0.3.7 Environmental Assessment (EA). An EA is a document required by the Federal Communications Commission (FCC) and the National Environmental Policy Act (NEPA) when a personal wireless service facility is placed in certain designated areas.
- 15.0.3.8 Equipment Shelter. An enclosed structure, cabinet, shed, vault, or box near the base of the mount within which are housed equipment for personal wireless service facilities, such as batteries and electrical equipment. Equipment shelters are sometimes referred to as base transceiver stations.
- 15.0.3.9 Facility. See Personal Wireless Service Facility.
- 15.0.3.10 Fall Zone. The area on the ground from the base of a ground-mounted personal wireless service facility that forms a circle with a diameter equal to the height of the facility, including any antennas or other appurtenances, as set forth in Figure 1. The fall zone is the area within which there is a potential hazard from falling debris (such as ice) or collapsing material.

- 15.0.3.11 Guyed Tower. A monopole or lattice tower that is secured to the ground or other surface by diagonal cables for lateral support.
- 15.0.3.12 Height. The height above ground level (AGL) from the natural grade of a site to the highest point of a structure.
- 15.0.3.13 Lattice Tower. A type of mount with multiple legs and structural cross bracing between the legs that is self-supporting and free-standing.
- 15.0.3.14 Mast. A thin pole that resembles a street light standard or a telephone pole. A dual-polarized antenna is typically deployed on a mast.
- 15.0.3.15 Monopole. A thicker type of mount than a mast that is self-supporting with a single shaft of wood, steel or concrete, or other material, that is designed for the placement of antennas and arrays along the shaft.

- 15.0.3.16 Mount. The structure or surface upon which antennas are mounted, including the following four types of mounts:
1. Roof-mounted: mounted on the roof of a building.
  2. Side-mounted: mounted on the side of a building.
  3. Ground-mounted: mounted on the ground.
  4. Structure-mounted: mounted on a structure other than a building.
- 15.0.3.17 Personal Wireless Service Facility. Facility for the provision of personal wireless services, as defined by the Telecommunications Act of 1996, as amended. Personal Wireless Service facilities include a mount, antenna, equipment shelter, and other related equipment.
- 15.0.3.18 Personal Wireless Services. The three types of services regulated by this Ordinance:
1. Commercial mobile radio services;
  2. Unlicensed wireless services;
  3. Common carrier wireless exchange access services as described in the Telecommunications Act of 1996, as amended.
- 15.0.3.19 Radio Frequency (RF) Engineer. An engineer specializing in electrical or microwave engineering, especially the study of radio frequencies.
- 15.0.3.20 Radio Frequency Radiation (RFR). The emissions from personal wireless service facilities.
- 15.0.3.21 Security Barrier. A wall, fence, or berm that restricts an area from unauthorized entry or trespass.
- 15.0.3.22 Separation. The distance between one carrier's array of antennas and another carrier's array.

**15.1 *District Regulations.***

- 15.1.1 Location. Personal wireless service facilities shall be permitted in all Zoning Districts. Applicants seeking approval for personal wireless service facilities shall first evaluate existing structures for the siting of personal wireless service facilities. Only after finding that there are no suitable existing structures pursuant to Section 15.1.3 herein, shall a provider propose a new ground-mounted facility.
- 15.1.2 Existing Structures: Policy. Personal wireless service facilities shall be located on existing structures, including but not limited to buildings, water towers, existing telecommunications facilities, utility poles or towers, and related facilities, provided that such installation preserves the character and integrity of those structures.
- 15.1.3 Existing Structures: Burden of Proof. The applicant shall have the burden of proving that there are no existing structures which are suitable to locate its personal wireless service

facility and/or transmit or receive radio signals. To meet that burden, the applicant shall take all the following actions to the extent applicable:

- a. The applicant shall submit to the Planning Board a list of all contacts made with owners of potential sites regarding the availability of potential space for a personal wireless service facility. If the Planning Board informs the applicant that additional existing structures may be satisfactory, the applicant shall contact the property owner(s) of those structures.
- b. The applicant shall provide copies of all letters of inquiry made to owners of existing structures and letters of rejection. If letters of rejection are not provided, at a minimum, unanswered "Return Receipt Requested" forms from the U.S. Postal Service shall be provided for each owner of existing structures that was contacted.
- c. If the applicant claims that a structure is not capable of physically supporting a personal wireless service facility, this claim must be certified by a licensed professional civil engineer. The certification shall, at a minimum, explain the structural issues and demonstrate that the structure cannot be modified to support the personal wireless service facility without unreasonable costs. The estimated cost shall be provided to the Planning Board.

15.1.4 Ground-Mounted Facilities: Policy. If the applicant demonstrates that it is not feasible to locate on an existing structure, ground-mounted personal wireless service facilities shall be designed so as to be camouflaged to the greatest extent possible, including but not limited to use of compatible building materials and colors, screening, landscaping, and placement within trees.

## 15.2 *Use Regulations.*

A personal wireless service facility shall require a building permit in all cases and may be permitted as follows:

15.2.1 Existing Tower Structures. Subject to the issuance of a building permit that includes review by the Planning Board, which review shall be limited to issues relating to access, bonding, and security for removal, structural integrity and appropriate camouflage of such siting, carriers may locate a personal wireless service facility on any guyed tower, lattice tower, mast, or monopole in existence prior to the adoption of this Article, or on any personal wireless service facility previously approved under the provisions of this Article so long as the co-location complies with the approved site plan. All the Performance Standards from this Article shall be met. This provision shall apply only so long as the height of the mount is not increased, a security barrier already exists, and the area of the security barrier is not increased. Otherwise, site plan review is required.

15.2.2 Reconstruction of Existing Tower Structures. An existing guyed tower, lattice tower, monopole, or mast in existence prior to the adoption of this Article may be reconstructed with a maximum twenty (20) foot increase in height so as to maximize co-location so long as the standards of this Article are met and so long as this twenty (20) foot increase in height does not cause a facility previously existing at less than two hundred (200) feet to exceed two hundred (200) feet in height. The mount shall be replaced with a similar mount that does not significantly increase the visual impact on the community. Site plan review is required.

15.2.3 Existing Structures. Subject to the provisions of this Article, and minor site plan review under RSA 674:43:III, and except as otherwise permitted under Section 15.2.1, a carrier may locate a personal wireless service facility on an existing structure, building, utility tower or pole, or water tower. For the purpose of this section, new structures that are conforming to all other district zoning requirements shall be considered as existing structures.

15.2.4 Ground-Mounted Facility. A personal wireless service facility involving construction of a ground mount shall require site plan review and be subject to the provisions of this Article.

### 15.3 ***Dimensional Requirements.***

Personal wireless service facilities shall comply with the following requirements:

15.3.1 Height, Maximum. In no case shall a personal wireless service facility exceed two hundred (200) feet in height, unless the mount for the facility was greater than two hundred (200) feet in height prior to the adoption of this Article.

15.3.2 Height, Existing Structures and Utility Poles. Carriers that locate new personal wireless service facilities on water towers, electric transmission and distribution towers, utility poles and similar existing utility structures, guyed towers, lattice towers, masts, and monopoles may be permitted to increase the height of those structures no more than twenty (20) feet if the additional height will not materially impair the visual impacts of the site. This increase in height shall only be permitted once for each structure.

15.3.3 Height, Other Existing Structures. The height of a personal wireless service facility shall not increase the height of a structure by more than fifteen (15) feet, unless the facility is completely camouflaged; for example, a facility completely within a flagpole, steeple, or chimney. The increase in the height of the structure shall be in scale and proportion to the structure as originally configured. A carrier may locate a personal wireless service facility on a building that is legally nonconforming with respect to height, provided that the provisions of this Article are met.

15.3.4 Height, Ground-Mounted Facilities. Ground-mounted personal wireless service facilities shall not project higher than twenty (20) feet above the average tree canopy height within a one hundred and fifty (150) foot radius of the mount, security barrier, or designated clear area for access to equipment, whichever is greatest.

15.3.5 Setbacks. All personal wireless service facilities and their equipment shelters shall comply with the building setback provisions of the zoning district in which the facility is located. Fences shall comply with the setback provisions of the zoning district in which the facility is located if the fence is six (6) feet or more in height, in accordance with the appropriate Zoning Ordinances.

15.3.6 Fall Zone for Ground Mounts. In order to ensure public safety, the minimum distance from the base of any ground mount of a personal wireless service facility to any property line, public road, habitable dwelling, business or institutional use, or public recreational area shall be, at a minimum, the distance equal to the fall zone, as defined in this article. The fall zone may cross property lines, so long as the applicant secures a fall zone easement from the affected property owner(s). The area of the easement shall be shown on all applicable plans

submitted to the Town, and the terms of the easement shall be provided as part of the site plan review.

- 15.3.7 Fall Zone for Non-Ground Mounts — In the event that an existing structure is proposed as a mount for a personal wireless service facility, a fall zone shall not be required, but the setback provisions of the zoning district shall apply. In the case of pre-existing nonconforming structures, personal wireless service facilities and their equipment shelters shall not increase any nonconformities.

**15.4 *Performance and Design Standards.***

15.4.1 Visibility.

15.4.1.1 Visual impacts are measured on the basis of:

- a. Change in community scale, as exhibited in relative height, mass or proportion of the personal wireless service facility within their proposed surroundings.
- b. New visible elements proposed on a contrasting background.
- c. Different colors and textures proposed against a contrasting background.
- d. Use of materials that are foreign to the existing built environment.

15.4.1.2 Enhancements are measured on the basis of:

- a. Conservation of opportunities to maintain community scale; e.g., buffering areas and low-lying buildings should not be compromised so as to start a trend away from the existing community scale.
- b. Amount and type of landscaping and/or natural vegetation.
- c. Preservation of view corridors, vistas, and view sheds.
- d. Continuation of existing colors, textures, and materials.

15.4.1.3 Visibility focuses on:

- a. Eliminating or mitigating visual impact.
- b. Protecting, continuing, and enhancing the existing environment.

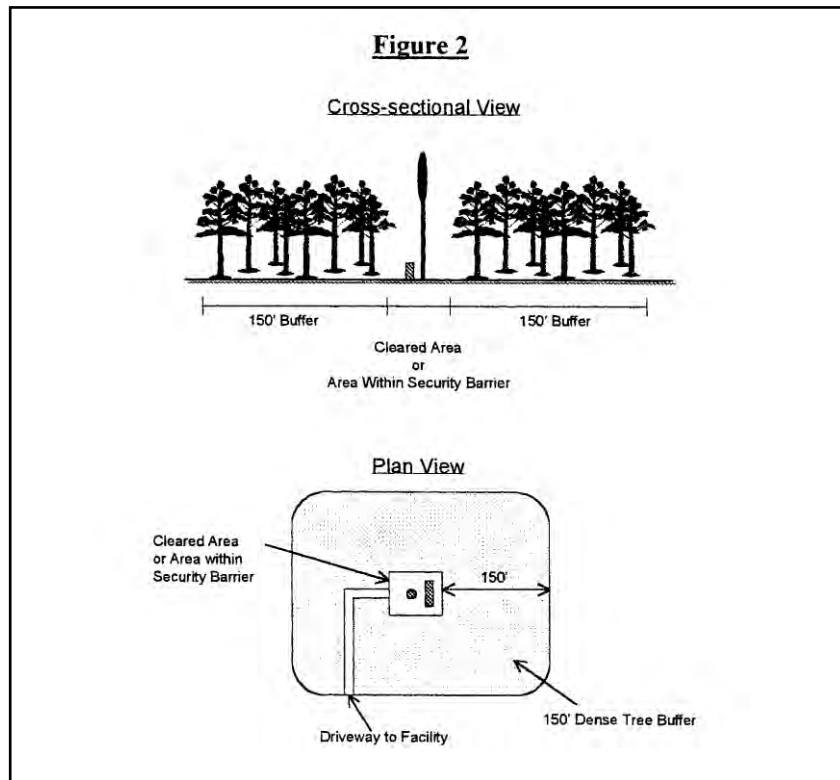

15.4.1.4 Camouflage for Facilities on Existing Buildings or Structures: Roof Mounts. When a personal wireless service facility extends above the roof height of a building on which it is mounted, every effort shall be made to conceal or camouflage the facility within or behind existing or new architectural features to limit its visibility from public ways. Facilities mounted on a roof shall be stepped back from the front façade in order to limit their impact on the building's silhouette.

15.4.1.5 Camouflage for Facilities on Existing Buildings or Structures: Side Mounts. Personal wireless service facilities which are side mounted shall blend with the existing building's

architecture and, if individual antenna panels are over five (5) square feet, the panels shall be painted or shielded with material consistent with the design features and materials of the building.

- 15.4.1.6 Camouflage for Ground-Mounted Facilities. All ground-mounted personal wireless service facilities shall be surrounded by a buffer of dense tree growth that extends continuously for a minimum distance of one hundred and fifty (150) feet from the mount, security barrier, or designated clear area for access to equipment, whichever is greatest, and screens views of the facility in all directions, as set forth in Figure 2. These trees must be existing on the subject property, planted on site, or be within a landscape easement on an adjoining site. The Planning Board shall have the authority to decrease, relocate, or alter the required buffer based on site conditions. The one hundred and fifty (150) foot vegetative buffer area shall be protected by a landscape easement or be within the area of the carrier's lease. The easement or lease shall specify that the trees within the buffer shall not be removed or topped, unless the trees are dead or dying and present a hazard to persons or property.

- 15.4.2 Color. To the extent that any personal wireless service facilities extend above the height of the vegetation immediately surrounding it, they shall be of a color which blends with the background or surroundings.
- 15.4.3 Equipment Shelters. Equipment shelters for personal wireless service facilities shall be designed consistently with one of the following design standards:
- 15.4.3.1 Equipment shelters shall be located in underground vaults; or
- 15.4.3.2 Equipment shelters shall be designed so that the shelters are architecturally consistent, with respect to materials and appearance, to the buildings in the area of the personal wireless service facility; or

- 15.4.3.3 Equipment shelters shall be camouflaged behind an effective year-round landscape buffer, equal to the height of the proposed building, and/or wooden fence. The Planning Board shall determine the style of fencing and/or landscape buffer that is compatible with the neighborhood; or
- 15.4.3.4 If mounted on a roof top, the equipment shelter shall be concealed or camouflaged so that the shelter either is not visible at grade or appears to be a part of the original structure.
- 15.4.4 Lighting, Signage, and Security.
- 15.4.4.1 Lighting. The mounts of personal wireless service facilities shall be lighted only if required by the Federal Aviation Administration (FAA). Lighting of equipment, structures and any other facilities on site shall be shielded from abutting properties. Any lighting shall not be visible off-site of the property. Foot-candle measurements at any height at the property line shall be 0.0 initial foot candles.
- 15.4.4.2 Signage. Signs shall be limited to those needed to identify the property and the owner and warn of any danger. All signs shall comply with the requirements of Section 16.0 SIGNS of the Wilton Zoning Ordinance.
- 15.4.4.3 Security Barrier. The Planning Board shall have final authority on whether a ground-mounted personal wireless service facility should be surrounded by a security barrier.
- 15.4.5 Historic Buildings and Districts.
- 15.4.5.1 Any personal wireless service facility located on or within an historic structure shall not alter the character-defining features, distinctive construction methods, or original historic materials of the building.
- 15.4.5.2 Any alteration made to an historic structure to accommodate a personal wireless service facility shall be fully reversible.
- 15.4.5.3 Personal wireless service facilities authorized by this subsection shall be concealed within or behind existing architectural features, or shall be located so that they are not visible from public roads and viewing areas.
- 15.4.5.4 Personal wireless service facilities located in the Wilton Historic District shall comply with the provisions of the Historic District Commission.
- 15.4.6 Scenic Landscapes and Vistas. Ground-mounted facilities shall not be located within open areas that are clearly visible from public roads, recreational areas, or abutting properties. All ground-mounted personal wireless service facilities shall be surrounded by a buffer of dense tree growth as per Section 15.4.1.6 of the Wilton Zoning Ordinance.
- 15.4.7 Driveways. If available, existing entrances and driveways to serve a personal wireless service facility shall be utilized, unless the applicant can demonstrate that a new entrance and driveway will result in less visual, traffic, and environmental impact. New driveways to serve a personal wireless service facility shall not exceed twelve (12) feet in width. A gravel or crushed stone surface is encouraged.

- 15.4.8 Antenna Types. Any antenna array placed upon an existing or proposed ground mount, utility pole, or transmission line mount shall have a diameter of no more than four (4) feet, exclusive of the diameter of the mount. A larger diameter antenna array may be permitted after a finding by the Planning Board that the visual impacts of a larger antenna array are negligible.
- 15.4.9 Ground and Roof Mounts. All ground mounts shall be of a mast type mount. Lattice towers, guyed towers, and roof-mounted monopoles are expressly prohibited, unless constructed as part of a reconstruction project permitted under Section 15.2.2 of the Wilton Zoning Ordinance.
- 15.4.10 Hazardous Waste. No hazardous waste shall be discharge on the site of any personal wireless service facility. If any hazardous materials are to be used on site, there shall be provisions for full containment of such materials. An enclosed containment area shall be provided with a sealed floor, designed to contain at least one hundred and ten percent (110%) of the volume of the hazardous materials stored or used on the site.
- 15.4.11 Noise. Personal wireless service facilities shall not generate noise in excess of that permitted under Section 4.6.2 Noise of the Wilton Zoning Ordinance.
- 15.4.12 Radio Frequency Radiation (RFR) Standards. All equipment proposed for a personal wireless service facility shall be fully compliant with the FCC Guidelines for Evaluating the Environmental Effects of Radio Frequency Radiation (FCC Guidelines, under *Report and Order*, FCC 96-326, published on August 1, 1996), and all subsequent amendments.

## **15.5 Monitoring and Maintenance.**

- 15.5.1 Maintenance. The owner of the facility shall maintain the personal wireless service facility in good condition. Such maintenance shall include, but shall not be limited to, painting structural integrity of the mount and security barrier, and maintenance of the buffer areas and landscaping.
- 15.5.2 Monitoring. As part of the issuance of the site plan approval or building permit, the property owner shall agree that the Town of Wilton may enter the subject property to obtain RFR measurements and noise measurements at the expense of the carrier. The Town shall provide reasonable written notice to the carrier and landowner and provide them the opportunity to accompany the Town representatives when the measurements are conducted.
- 15.5.3 Security for Removal. Recognizing the hazardous situation presented by abandoned and unmonitored telecommunications facilities, the Planning Board shall set the form and amount of security that represents the cost for removal and disposal of abandoned telecommunications facilities in the event that a facility is abandoned and the facility owner is unwilling or unable to remove the facility in accordance with Section 15.6.2. The amount of the security shall be based upon the removal cost plus fifteen percent (15%), provided by the applicant and certified by a professional structural engineer licensed in New Hampshire. The owner of the facility shall provide the Planning Board with a revised removal cost estimate and structural evaluation prepared by a professional structural engineer licensed in New Hampshire every five (5) years from the date of the Planning Board's approval of the

site plan. If the cost has increased more than fifteen percent (15%), then the owner of the facility shall provide additional security in the amount of the increase.

**15.6 *Abandonment or Discontinuation of Use.***

15.6.1 Notification. At such time that a carrier plans to abandon or discontinue operation of a personal wireless service facility, such carrier will notify the Town by certified U.S. mail of the proposed date of abandonment or discontinuation of operations. Such notice shall be given no less than thirty (30) days prior to abandonment or discontinuation of operations. In the event that a carrier fails to give such notice, the personal wireless service facility shall be considered abandoned upon such discontinuation of operations.

15.6.2 Removal. Upon abandonment or discontinuation of use, the owner of the facility shall physically remove the personal wireless service facility within ninety (90) days from the date of abandonment or discontinuation of use. "Physically remove" shall include, but not be limited to:

- a. Removal of antennas, mount, equipment shelters and security barriers from the subject property.
- b. Proper disposal of the waste materials from the site in accordance with local and state solid waste disposal regulations.
- c. Restoring the location of the personal wireless service facility to its natural condition, except that any landscaping and grading shall remain in the after-condition.

15.6.3 Failure to Remove. If the owner of the facility does not remove the facility upon the Zoning Administrator's order, then the Board of Selectmen shall, after holding a public hearing with notice to the owner and abutters, issue a declaration of abandonment. The owner of the facility shall dismantle and remove the facility within ninety (90) days of receipt of the declaration of abandonment by the Board of Selectmen. If the abandoned facility is not removed within ninety (90) days, the Town may execute the security to pay for this action.

**15A.0 SMALL WIND ENERGY SYSTEMS**

*(Adopted March 2010)*

**15A.1 Purpose.**

This small wind energy systems ordinance is enacted in accordance with RSA 674:62-66, and the purposes outlined in RSA 672:1-III-a. The purpose of this ordinance is to accommodate small wind energy systems in appropriate locations, while protecting the public's health, safety and welfare. In addition, this ordinance provides a permitting process for small wind energy systems to ensure compliance with the provisions of the requirements and standards established herein.

**15A.2 Definitions.**

- 15A.2.1 Meteorological tower (MET tower). Includes the tower, base plate, anchors, guy wires and hardware, anemometers (wind speed indicators), wind direction vanes, booms to hold equipment for anemometers and vanes, data loggers, instrument wiring, and any telemetry devices that are used to monitor or transmit wind speed and wind flow characteristics over a period of time for either instantaneous wind information or to characterize the wind resource at a given location. For the purpose of this ordinance, met towers shall refer only to those whose purpose are to analyze the environmental factors needed to assess the potential to install, construct or erect a small wind energy system.
- 15A.2.2 Modification. Any change to the small wind energy system that materially alters the size, type or location of the small wind energy system. Like-kind replacements shall not be construed to be a modification.
- 15A.2.3 Net metering. The difference between the electricity supplied to a customer over the electric distribution system and the electricity generated by the customer's small wind energy system that is fed back into the electric distribution system over a billing period.
- 15A.2.4 Power grid. The transmission system, managed by ISO New England, created to balance the supply and demand of electricity for consumers in New England.
- 15A.2.5 Shadow flicker. The visible flicker effect when rotating blades of the wind generator cast shadows on the ground and nearby structures causing a repeating pattern of light and shadow.
- 15A.2.6 Small wind energy system. A wind energy conversion system consisting of a wind generator, a tower, and associated control or conversion electronics, which has a rated capacity of 100 kilowatts or less and will be used primarily for onsite consumption.
- 15A.2.7 System height. Means the vertical distance from ground level to the tip of the wind generator blade when it is at its highest point.
- 15A.2.8 Tower. The monopole, guyed monopole or lattice structure that supports a wind generator.
- 15A.2.9 Tower height. The height above grade of the fixed portion of the tower, excluding the wind generator.

15A.2.10 Wind generator. The blades and associated mechanical and electrical conversion components mounted on top of the tower whose purpose is to convert kinetic energy of the wind into rotational energy used to generate electricity.

**15A.3 Location**

The installation and operation of small wind energy system facilities are permitted in the General Residence and Agricultural District. They are also permitted as special exceptions by the Zoning Board of Adjustment in the General Residence District, Commercial District and Industrial District. When reviewing an application for a special exception under this section, the Zoning Board shall consider the factors listed in section 15A.5.3, “Review Considerations.” (See also Section 4.4)

**15A.4 Standards.**

15A.4.1 Setbacks. The setback for small energy system towers shall be equal to one and one-half (1½) times the proposed system height. Small wind energy systems must meet all setbacks for principal structures for the zoning district in which the system is located.

15A.4.2 System Height. The maximum system height shall be restricted to 35 feet above the tree canopy within 300 feet of the small wind energy system. In no situation shall the system height exceed 150 feet.

15A.4.3 Sound Level. The combined sound level of all small wind energy systems on a site shall not exceed 55 decibels using the A scale (DBA), as measured at the site property line, except during short-term events such as severe wind storms and utility outages.

15A.4.4 Shadow Flicker. Small wind energy systems shall be sited in a manner that does not result in shadow flicker impacts offsite. The applicant has the burden of proving that the shadow flicker will not be visible to neighboring or adjacent uses. Potential shadow flicker will be addressed either through siting or mitigation measures.

15A.4.5 Signs. All signs including flags streamers and decorative items, both temporary and permanent, are prohibited on the small wind energy system, except for manufacturer identification or appropriate warning signs.

15A.4.6 Code Compliance. The small wind energy system shall comply with all applicable sections of the New Hampshire State Building Code.

15A.4.7 Aviation. The small wind energy system shall be built to comply with all applicable Federal Aviation Administration regulations including but not limited to 14 C.F.R. part 77, subpart B regarding installations close to airports, and the New Hampshire Aviation regulations, including but not limited to RSA 422-b and RSA 424.

15A.4.8 Visual Impacts. It is inherent that small wind energy systems may pose some visual impacts due to the tower height needed to access wind resources. The purpose of this section is to reduce the visual impacts, without restricting the owner’s access to the optimal wind resources on the property.

- a. The applicant shall demonstrate through project site planning and proposed mitigation that the small wind energy system’s visual impacts will be minimized for surrounding neighbors and the community. This may include, but not be limited to information

regarding site selection, wind generator design or appearance, buffering, and screening of ground mounted electrical and control equipment. All electrical conduits shall be underground.

- b. The color of the small wind energy system shall either be the stock color from the manufacturer or painted with a non-reflective, unobtrusive color that blends in with the surrounding environment. Approved colors include but are not limited to earth tones, off-white or gray.
  - c. A small wind energy system shall not be artificially lit unless such lighting is required by the Federal Aviation Administration (FAA). If lighting is required, the applicant shall provide a copy of the FAA determination to establish the required markings and/or lights for the small wind energy system.
- 15A.4.9 Capacity. The total combined output capacity of all small wind energy systems on a single lot must not exceed 100 kw.
- 15A.4.10 Approved Wind Generators. The manufacturer and model of the wind generator to be used in the proposed small wind energy system must have been approved by the California Energy Commission or the New York State Energy Research and Development Authority, or a similar list approved by the state of New Hampshire, if available.
- 15A.4.11 Utility Connection. If the proposed small wind energy system is to be connected to the power grid through net metering, it shall adhere to RSA 362-A:9.
- 15A.4.12 Access. The tower shall be designed and installed so as not to provide step bolts or a ladder readily accessible to the public for a minimum height of 8 feet above the ground. All ground-mounted electrical and control equipment shall be labeled and secured to prevent unauthorized access.
- 15A.4.13 Clearing. Clearing of natural vegetation shall be limited to that which is necessary for the construction, operation and maintenance of the small wind energy system and as otherwise prescribed by applicable laws, regulations, and ordinances.

**15A.5 *Site Plan Review.***

- 15A.5.1 Review Required. All small wind energy systems, their towers and associated equipment shall be subject to site plan review and approval by the Planning Board. Site plan review by the Planning Board shall be required for any physical modification to an existing small energy wind system. MET towers that receive site plan approval shall be permitted on a temporary basis not to exceed three (3) years from the date the building permit to construct the MET Tower was issued.
- 15A.5.2 Application. An application with designs for towers, additional support features and all associated facilities and accessories shall be submitted to the Planning Board. Applications shall contain a site plan with the following information:
- a. Property lines and physical dimensions of the applicant's property.
  - b. Location, dimensions, and types of existing major structures on the property.

- c. Location of the proposed small wind energy system, foundations, guy anchors and associated equipment.
- d. Tower foundation blueprints or drawings.
- e. Tower blueprints or drawings.
- f. Setback requirements as outlined in this ordinance.
- g. The right-of-way of any public road that is contiguous with the property.
- h. Any overhead utility lines.
- i. Small wind energy system specifications, including manufacturer, model, rotor diameter, tower height, tower type, nameplate generation capacity.
- j. Small wind energy systems that will be connected to the power grid shall include a copy of the application for interconnection with their electric utility provider.
- k. Sound level analysis prepared by the wind generator manufacturer or qualified engineer.
- l. Electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the NH State Building Code.
- m. Evidence of compliance or non-applicability with Federal Aviation Administration requirements.
- n. List of abutters to the applicant's property.

15A.5.3 Review Considerations. When considering applications for the construction and operation of small wind energy systems, the Planning Board and the Board of Adjustment will consider factors including, but not limited to:

- a. Proximity to residential buildings.
- b. Physical and visual impact of the system on surrounding properties.
- c. Effect on the value of surrounding properties.
- d. Effect on the character and natural features of the site and surrounding properties.
- e. Frequency of maintenance visits to the site.
- f. Potential nuisances such as interference with neighborhood television, telephone or radio reception.

g. Comments from abutters.

15A.5.4 Public Notice. Public notification will be in accordance with the Site Plan Review Process.

15A.5.5 Security for Removal. The applicant shall post a bond to cover the cost of removal of the small wind energy system and site restoration in the event of abandonment.

**15A.6 *Abandonment or Discontinuation of Use.***

15A.6.1 Notification. At such time that a small wind energy system is scheduled to be abandoned or discontinued, the applicant will notify the planning board and building inspector by certified U.S. mail of the proposed date of abandonment or discontinuation of operations.

15A.6.2 Removal. Upon abandonment or discontinuation of use, the owner shall physically remove the small wind energy system within 90 days from the date of abandonment or discontinuation of use. This period may be extended at the request of the owner and at the discretion of the building inspector. "Physically remove" shall include, but not be limited to:

- a. Removal of the wind generator and tower and related above-grade structures.
- b. Restoration of the location of the small wind energy system to its natural condition, except that any landscaping, grading or below-grade foundation may remain in its same condition at initiation of abandonment.

15A.6.3 Abandonment. In the event that an applicant fails to give such notice, the system shall be considered abandoned or discontinued if the system is out-of-service for a continuous 12-month period. After the 12 months of inoperability, the building inspector may issue a Notice of Abandonment to the owner of the small wind energy system. The owner shall have the right to respond to the Notice of Abandonment within 30 days from Notice receipt date. After review of the information provided by the owner, the building inspector, with consultation from the Planning Board, shall determine if the small wind energy system has been abandoned. If it is determined that the small wind energy system has not been abandoned, the building inspector shall withdraw the Notice of Abandonment and notify the owner of the withdrawal.

15A.6.4 Failure to Remove. If the owner fails to respond to the Notice of Abandonment or if, after review by the building inspector, it is determined that the small wind energy system has been abandoned or discontinued, the owner of the small wind energy system shall remove the wind generator and tower at the owner's sole expense within 3 months of receipt of the Notice of Abandonment. If the owner fails to physically remove the small wind energy system after the Notice of Abandonment procedure, the building inspector or Board of Selectmen may pursue legal action to have the small wind energy system removed at the owner's expense.

**15A.7 *Violation.***

It is unlawful for any person to construct, install, or operate a small wind energy system that is not in compliance with this ordinance. Small wind energy systems installed prior to the adoption of this ordinance are exempt from this ordinance except when modifications are proposed to the small wind energy system.

**15A.8 *Penalties.***

Any person who fails to comply with any provision of this ordinance or a building permit issued pursuant to this ordinance shall be subject to enforcement and penalties as allowed by NH Revised Statutes Annotated Chapter 676:17.

**15B.0 SOLAR COLLECTION SYSTEMS**

*(Adopted March 2020)*

**15B.1 Authority and Purpose**

This solar collection system ordinance is enacted in accordance with RSA 674:17(I)(j) and for the purposes outlined in RSA 672:1-III-a, as amended. This ordinance is intended to accommodate solar energy collection systems and distributed generation resources in appropriate locations, while protecting the public's health, safety and welfare, and to facilitate the State and National goals of developing clean, safe, renewable energy resources in accordance with the enumerated polices of NH RSA 374-G and 362-F.

**15B.2 Definitions**

- 15B.2.1 Agricultural System. Any SCS intended primarily to reduce on-site consumption of utility power for agricultural uses with (a) a Rated Capacity of one megawatt (MW) alternating current (AC) or less and (b) five acres or less Solar Land Coverage, provided any existing agricultural use is preserved at the time of installation.
- 15B.2.2 Ground Mounted. The portion of an SCS that is affixed to or placed upon the ground including, without limitation, fixed, passive or active tracking or racking systems, as well as mobile solar collection equipment with more than 64 square feet of collecting surface which remains anywhere on a site for more than 30 consecutive days.
- 15B.2.3 Industrial System. Any SCS intended to (1) reduce on-site consumption of utility power, (2) generate power for sale to customers, or (3) produce energy strictly for distribution to the power grid, with (a) a Rated Capacity of 30 MW AC or less and (b) 100 acres or less Solar Land Coverage.
- 15B.2.4 Large Commercial System. Any SCS intended primarily to reduce on-site consumption of utility power with (a) a Rated Capacity of five MW AC or less and (b) 20 acres or less Solar Land Coverage.
- 15B.2.5 Rated Capacity. Maximum rated AC output of an SCS based on its design output.
- 15B.2.6 Residential System. Any SCS intended primarily to reduce on-site residential consumption of utility power with (a) a Rated Capacity of 12 kilowatt (kW) AC or less and (b) 1000 square feet or less Solar Land Coverage.
- 15B.2.7 Roof Mounted. The portion of an SCS that is mounted on the roof of a permitted structure, including the roof of a garage or over a carport or parking area that is an Accessory Building. The Roof Mounted portion of an SCS shall not be included in the calculation of the SCS's Solar Land Coverage.
- 15B.2.8 Shared System. Any SCS intended primarily to reduce residential and/or commercial consumption of utility power by multiple consumers (e.g., households or businesses) who either (a) own, directly or indirectly, the SCS, or (b) are tenants of the property to be served by the SCS, with (1) a Rated Capacity of 100 kW AC or less and (2) one acre or less Solar Land Coverage. A Shared System could be appropriate for cluster developments, commercial or residential condominiums or cooperatives, or apartment buildings, among others.

- 15B.2.9 Small Commercial System. Any SCS intended primarily to reduce on-site commercial consumption of utility power with (a) a Rated Capacity of 12 kW AC or less and (b) 500 square feet or less Solar Land Coverage.
- 15B.2.10 Solar Collection System or SCS. All equipment required to harvest solar energy to generate electricity, including, without limitation, collection and storage devices, mounting hardware and ballast, power conditioning equipment, transfer equipment and parts related to the functioning of that equipment. Solar Collection Systems do not include the equipment used to connect an SCS to the utility grid or site service point or equipment used after that point.
- 15B.2.11 Solar Land Coverage. The land area of a lot on which all components of the SCS, other than Roof Mounted equipment or equipment installed inside a permitted building, are installed, including, without limitation, mounting equipment, panels and ancillary components, but not including access roads or fencing. Solar Land Coverage shall not equate to impervious surface as that term is used in this ordinance.

**15B.3 Table of Permitted Uses.**

Notwithstanding anything to the contrary contained elsewhere in the Town zoning ordinance, Solar Collections Systems complying with this ordinance shall be permitted in the following districts:

System	Zoning District					
	Residential	Residential/ Agricultural	Commercial	Downtown Commercial	Industrial	Office Park/ Research and Office Park
<b>Residential</b>	P	P	P	X	X	X
<b>Shared</b>	P	P	P	X	P	P
<b>Agricultural</b>	X	P	P	X	X	X
<b>Small Commercial</b>	X	X	P	P	P	P
<b>Large Commercial</b>	X	X	P	X	P	P
<b>Industrial</b>	X	X	X	X	P	X

P = Use permitted by right with building and electrical permits.  
 X = Use prohibited.

**15B.4 General Requirements and Exemptions.**

- 15B.4.1 The installation and operation of Solar Collection Systems shall comply at all times with applicable building, utility, electrical, fire and other safety codes; State and Federal laws and regulations; local noise and other ordinances, and the performance standards of this

ordinance. A copy of the approved interconnection application for all Solar Collection Systems that are tied into the utility grid shall be filed with the Town.

15B.4.2 Except as expressly set forth below, all proposed Solar Collection Systems shall require prior Site Plan review and approval by the Planning Board.

15B.4.3 Ground Mounted Solar Collection Systems:

- a. No Ground Mounted portion of an SCS shall exceed 30 feet in height, provided that it shall be no more than 20 feet in height at the permitted building perimeter on the lot.
- b. The Ground Mounted portions of Residential Systems shall be located in a side or rear yard between the primary structure and the relevant lot line and shall be reasonably screened from abutting residential properties.
- c. The Ground Mounted portions of Solar Collection Systems shall comply with the impervious surface limitations and related stormwater management requirements in this ordinance and, to the extent they do not conflict with such requirements, any stormwater management requirements imposed in the underlying zoning district(s) and/or overlays.
- d. The Solar Land Coverage of Ground Mounted Solar Collection Systems shall be included in the calculation of maximum lot coverage permitted in the underlying zoning district(s) and/or overlays.

15B.4.4 Roof Mounted Solar Collection Systems:

- a. The Roof Mounted portions of Solar Collection Systems may not exceed the height restrictions applicable to buildings in the underlying zoning district.
- b. Wholly Roof Mounted Residential Systems are exempt from Site Plan review requirements.

15B.4.5 Solar Collection Systems used primarily to benefit the Town of Wilton are municipal systems exempt from land use regulations pursuant to NH RSA 674:54. Solar Collection Systems operated by third parties on land leased from the Town are not exempt municipal systems.

15B.4.6 Solar Collection Systems, other than utility connection equipment, shall be deemed structures that must comply with the setback requirements of the underlying zoning district(s) and/or overlays. The setback for a tracking system in an SCS shall be measured from where the array is closest to the lot line and no portion of an SCS may cross into the setback area.

15B.4.7 The site of an SCS shall be altered only to the extent necessary for its installation and operation and for sufficient all-season access thereto. To the fullest extent practicable, following installation, the site shall be restored to its original state, and, where appropriate, with native species that are consistent with the use of the site (such as slow growth or low ground cover). Placement and installation of Solar Collection Systems shall minimize impact on agricultural activities.

**15B.5 *Site Plan Review.***

The application for a Site Plan review shall comply with the following, as well as any other Site Plan Review Regulations not otherwise covered in this Section 15B.5. To the extent that any of the requirements of this Section 15B.5 conflict with any of the requirements of the Site Plan Review Regulations, the requirements of this Section 15B.5 shall prevail. The Site Plan shall include:

- 15B.5.1 Site Conditions and System Layout. A scale drawing indicating, without limitation, (a) the topography and vegetation in the installation area, both pre- and post-installation, and (b) the location of all equipment to be installed on site, including utility connection point(s) and equipment. To the maximum extent practical, all wiring associated with the utility connection shall be underground.
- 15B.5.2 Equipment Specifications. Manufacturers' specifications for all proposed equipment and its output, as well as for noise generation, anti-reflective materials and other characteristics of the system from time to time identified by the Planning Board.
- 15B.5.3 Emergency Response. (a) Drawings indicating where access to the site for emergency response is located; (b) a narrative or manual detailing response guidance and disconnection locations; and (c) additional industry guidance addressing safety procedures for specific equipment on site.
- 15B.5.4 Natural Resource Buffers. A buffering plan demonstrating how the Ground Mounted portion of an SCS will be effectively screened from public ways and neighboring views, including, without limitation, (a) the location, height and spacing of existing vegetation to be preserved; (b) areas of new planting and the type thereof; and (c) how existing or manufactured topography will be used to reduce visual impact.
- 15B.5.5 Fencing. The location and composition of any fencing required by applicable code or the utility, provided that the Ground Mounted portion of an SCS with a Rated Capacity greater than 100kW AC shall be fenced. The Planning Board may, in addition, require additional security or fencing if the location of the SCS presents a safety concern for abutting land uses.
- 15B.5.6 Erosion Control. The means and location of erosion control measures during installation.
- 15B.5.7 Lighting and Glare. The location, type, strength and direction of all lighting for Ground Mounted equipment or otherwise added to an SCS site, in each case solely to identify access or address safety requirements. For Agricultural, Large Commercial and Industrial Systems, an assessment of potential glare onto abutting structures and roadways, based on different sun to panel angles, seasons, and visibility locations. The Planning Board may require reasonable mitigation of potentially significant glare, including, without limitation, adjustment of the angle of panels, anti-reflective panel coatings, or additional specific screening.
- 15B.5.8 Natural Resource Inventory. If the SCS will disturb ten or more acres of previously undisturbed land, a natural resource inventory detailing site conditions and habitats, as well as undertakings to mitigate any adverse impact on the affected habitats.

**15B.6 *Stormwater Requirements for Ground Mounted Solar Collection Systems.***

15B.6.1 Requirements for All Ground Mounted Solar Collection Systems. The Ground Mounted portions of Solar Collection Systems shall be installed in accordance with best management practices for erosion, sedimentation and runoff control during all site preparation, installation and post-installation restoration phases, in order to maintain healthy surface and subsurface conditions that can attenuate stormwater.

15B.6.2 SCS Requiring NH DES Alteration of Terrain (AoT) Permit (RSA 485-A:17):

- a. An applicant shall file the final AoT permit with the Town. The terms and conditions of the permit shall be incorporated by reference into any Planning Board approval of the SCS and shall be enforceable by the Town in accordance with this ordinance.
- b. The holder of an AoT permit shall not be required to comply with the requirements of Section 15B.6.3 of this ordinance, although the Planning Board may, but shall not be required to, perform further review of stormwater and erosion controls in place at the site of the SCS where an AoT permit has been issued. Issuance of the permit shall not affect the applicant's obligations to address all issues required by a Site Plan review.

15B.6.3 SCS Not Requiring an AoT Permit:

- a. If the Ground Mounted portion of an SCS (a) requires land clearing and grubbing of mature forested cover (1) to accommodate more than 30% of the proposed Solar Land Coverage and (2) over more than one acre, or (b) has Solar Land Coverage greater than one acre and is located on a slope greater than five percent, the applicant shall submit a plan to manage stormwater runoff that is directly related to the SCS.
- b. The stormwater management plan referred to in Section 15B.6.3(a) shall take into account the nature of the installation and how the spacing, slope and row separation of collection equipment will affect or enhance stormwater infiltration. Percolation tests or site-specific soil information may be provided to demonstrate that recharge can be achieved without engineered solutions. The Planning Board may require additional information about the potential for concentrated runoff due to the type of collection equipment, slope, soil type and the impact of other true impervious areas (such as equipment pads and roadways).

**15B.7 *Abandonment and Decommissioning.***

15B.7.1 The owner or operator of an SCS other than a Residential System shall give not less than [one] month's prior written notice to the Town of its intent to cease operation of the SCS for any reason. An SCS shall be deemed to be abandoned or decommissioned upon the earlier to occur of (a) the date on which its operation will cease as indicated in the notice to the Town or (b) six months after operation thereof has been discontinued for any reason, unless the Town has given its prior written consent to the discontinuance.

15B.7.2 The Ground Mounted portions of an abandoned or decommissioned SCS that are above grade shall be removed in accordance with applicable State, Federal and local rules, regulations and ordinances, including, without limitation, requirements for the disposal of hazardous materials, and the site shall be restored to its natural state, within six months following the date on which it is abandoned or decommissioned. The Building Inspector shall inspect the site and determine whether removal has complied with this ordinance.

15B.7.3 The application for a Large Commercial or Industrial System shall include a plan addressing the decommissioning of the SCS and the removal of the equipment as required by Section 15B.7.2. As a condition to the approval of a Large Commercial or Industrial System, the owner or operator shall post a bond or other surety in an amount and on terms and conditions determined by the Planning Board and issued by an institution acceptable to it, covering the full cost of removing the SCS if it is not properly and timely removed as required by Section 15B.7.2. The Planning Board may review the amount of the bond or surety from time to time and require it to be adjusted so that it is adequate for its purpose.

## **16.0 SIGNS**

The purpose of this ordinance is to preserve the visual character of Wilton while providing signs that direct and indicate the location of a business; identify businesses or individuals within a building; denote a service; or enhance traffic and pedestrian safety. Signs shall be permitted in each district as follows. *(Amended March 2016)*

### **16.1 General Provisions.**

*(Amended March 2001, March 2014, March 2016)*

- a. All signs shall be constructed of durable material and maintained in good condition at all times. Signs should complement the building on which they are located and add to the community image as a whole. Materials, color, lettering and shape should be compatible with surrounding building materials, colors and textures. Use of sandblasted, carved or painted signs of traditional materials, such as wood, granite or metal, is encouraged.
- b. Signs placed or erected by the Town or State for the purpose of showing street names, traffic directions or regulations, or other municipal or governmental purposes are exempt from the following regulations.
- c.1 Temporary signs are allowed to be placed for thirty days in a calendar year without approval or a sign permit. Signs advertising short-term events can be erected three weeks prior to the event and shall be removed within one week following the date of the event. Temporary signs shall comply with the requirements defined elsewhere in this section. Temporary signs shall not be lighted. Only one temporary sign will be permitted on a lot. Portable reader-board signs can only be used as temporary signs. *(Amended March 2014, March 2016)*
- c.2 Additional temporary signage without approval or sign permit may be located on the owner's property when that property is being offered for sale, rent or lease and for a period of 15 days following the date of the closing or rental/lease of the premises.
  - a. one (1) wall or ground sign per premises, two (2) on corner lots;
  - b. the size of signs must conform to those permitted in the underlying zoning district;
  - c. temporary signs can be placed on privately owned land only with the permission of the land owner. *(Adopted March 2016)*
- d. Before erecting a sign, the applicant must first submit an application for a sign permit to the Building Inspector. The Building Inspector will review and approve/disapprove the application and issue the sign permit on approval. The sign permit fee must be paid upon issuance of the sign permit. The Building Inspector may approve any signs which conform to the Zoning Ordinance and any applicable site plans. The application for the permit shall include: a detailed drawing and description of the sign, materials to be used, mounting hardware, type and intensity of lighting, dimensions of display area, and the location of the sign on the building or property. *(Amended March 2014, March 2016)*
- e. In addition to the penalty provisions of section 22.0, non-conforming signs and/or signs erected without a permit may be removed by the Town of Wilton at the expense of the sign's owner.
- f. *(Repealed March 2016)*

- g. Any sign proposed to replace a sign that existed as of March 13, 2001, shall comply with the provisions of this section and obtain a sign permit from the Building Inspector. *(Amended March 2014, March 2016)*
- h. Any of the following signs are prohibited in all zoning districts except as specifically permitted in this ordinance.
  - 1. Off-premises signs.
  - 2. Billboards.
  - 3. Animated, flashing or intermittently illuminated signs.
  - 4. Internally illuminated signs.
  - 5. Signs located on town property or within the public right-of-way. *(Amended March 2016)*

**16.2 Residential District and General Residence and Agricultural District.**

16.2.1 Permitted Signs.

16.2.1.1 Number. One (1) sign per parcel. *(Amended March 2016)*

16.2.1.2 Size. Maximum of four (4) square feet in area per face, two (2) faces may be used.

16.2.1.3 Location and Height. The top of any freestanding sign shall not be over six (6) feet above the existing ground level. A building sign must not extend above the roof eaves or the rake of the gable end. *(Amended March 2016)*

16.2.1.4 Lighting. No signs shall be illuminated in such a manner as to cause glare, obstruct or interfere with the vision of drivers on the road.

16.2.1.5 *(Repealed March 2001)*

16.2.2 *(Repealed March 2001)*

**16.3 Commercial and Industrial District.**

This section governs signs in the Commercial District and Industrial District. *(Amended March 2019)*

16.3.1 Permitted Signs.

16.3.1.1 Number. One (1) sign or structure per parcel relating only to the permitted use or uses conducted in the building or on the immediate premises thereof. *(Amended March 2016)*

- 16.3.1.2 Size. Maximum of one hundred (100) square feet in area per face and a maximum of two faces may be used.
- 16.3.1.3 Location and Height. The top of any sign shall not exceed sixteen (16) feet above existing ground level. No building sign shall extend above the roof eaves or the rake on the gable end. No sign (except building mounted) shall be placed within fifteen (15) feet of lot lines. All signs or structures must be placed in such a manner that does not obstruct free and clear vision of automobiles or pedestrian traffic. *(Amended March 2003, March 2016)*
- 16.3.1.4 Lighting. Signs may be illuminated but the lighting shall be confined to the area of the sign and arranged to avoid glare or reflection onto any portion of an adjacent highway, into the path of on-coming vehicles or onto any residential premises, and shall not significantly contribute to light pollution.
- 16.3.1.5 *(Repealed March 2001)*
- 16.3.1.6 Multi-tenant Buildings. A multi-tenant building may have one free-standing sign of up to one hundred (100) square feet. In addition, each individual tenant may have one (1) sign attached to the building with a maximum area of four (4) square feet for the purpose of identifying the type and location of the business or service.
- 16.3.1.7 Company Symbols and Trademarks. Company symbols and trademarks shall be considered as signs and must meet all of the above requirements.
- 16.3.1.8 Industrial Parks. As a part of the subdivision of land for an industrial park, the Planning Board may require one (1) directory sign identifying the names and locations of the individual businesses within the park to be located near the entrance of the park. The Directory sign should show the locations of the individual businesses within the park. The sign shall have a maximum area of thirty-two square feet. *(Amended March 2016)*
- 16.3.2 *(Repealed March 2001)*
- 16.4 Office Park District.**
- 16.4.1.1 Park Development Sign. One (1) park development sign, for informational purposes only, carrying the park name at the park entrance. The sign shall have a maximum area of one hundred (100) square feet with a maximum height of sixteen (16) feet above the entrance road.
- a. One (1) sign shall be located near the entrance of the park and have a maximum area of thirty-two (32) square feet. *(Amended March 2016)*
  - b. Two (2) additional signs with a Maximum size of two (2) square feet, may be located at driveway intersections. *(Amended March 2016)*
- 16.4.1.2 Directory Sign. One (1) directory sign identifying the names and locations of the individual businesses within the park shall be located near the entrance of the park. The Directory sign should show the locations of the individual businesses within the park. The sign shall have a maximum area of thirty-two (32) square feet.
- 16.4.1.3 Small directional signs. Maximum size of two (2) square feet, may be located at driveway intersections.

16.4.1.4 Lighting. Signs may be illuminated but the lighting shall be confined to the area of the sign and arranged to avoid glare or reflection onto any portion of an adjacent highway, into the path of on-coming vehicles or onto any residential premises, and shall not significantly contribute to light pollution.

16.4.2 Prohibited Signs.

- a. Neon signs.
- b. Mobile or temporary signs.

16.4.3 Company Symbols and Trademarks.

Company symbols and trademarks shall be considered as signs and must meet all of the above restrictions.

### **16.5 *Downtown Commercial District.***

The following regulations apply to signs located in the Downtown Wilton area as defined in Section 7A.1. (*Amended March 2019*)

16.5.1 Permitted Signs.

16.5.1.1 Number. One (1) more than the number of businesses located on a parcel or four (4), whichever is less, relating only to the permitted use or uses conducted in the building or on the immediate premises thereof. Only one (1) free standing sign is permitted per parcel.

16.5.1.2 Free Standing Signs. Any sign supported by structures or supports that are anchored into the ground and that are independent from any building or other structure.

16.5.1.2.1 Size. Maximum of forty (40) square feet in area per face and a maximum of two faces may be used.

16.5.1.2.2 Location and Height. The top of any sign shall not exceed fourteen (14) feet above existing ground level. No sign (except building mounted) shall be placed within ten (10) feet of the roadway right of way or lot lines. All signs or structures must be placed in such a manner that does not obstruct free and clear vision of automobiles or pedestrian traffic. (*Amended March 2016*)

16.5.1.2.3 Lighting. Signs may be illuminated but the lighting shall be confined to the area of the sign and arranged to avoid glare or reflection onto any portion of an adjacent highway, into the path of on-coming vehicles, or onto any residential premises, and shall not significantly contribute to light pollution.

16.5.1.3 Wall Signs. Any sign attached parallel to or painted on an exterior wall of a building, and which projects not more than six inches from such wall.

16.5.1.3.1 Size. The allowable size of the sign is calculated based on 1.5 square feet per lineal foot of building width with a maximum size of eighty square feet.

- 16.5.1.3.2 Location and Height. The top of any sign shall not exceed sixteen (16) feet above existing ground level. The bottom of any wall sign shall not be less than (3½) feet above existing ground level. *(Amended March 2009)*
- 16.5.1.4 Canopy Signs. Any sign that is a part of or attached to an awning, canopy, marquee or other protective cover over a door, entrance, window, or outdoor service area.
- 16.5.1.4.1 Size. The allowable size of the sign is calculated based on 1.5 square feet per lineal foot of building width with a maximum size of eighty square feet.
- 16.5.1.4.2 Location and Height. The top of any canopy shall not exceed fourteen (14) feet above existing ground level. The bottom of any projecting sign shall not be less than (8) feet above existing ground level.
- 16.5.1.4.3 Lighting. No internally lit canopy signs shall be permitted.
- 16.5.1.5 Projecting Signs. Any sign attached to a building in such a manner that its leading edge extends more than six inches from the surface of such building.
- 16.5.1.5.1 Size. Maximum of eighteen (18) square feet in area per face and a maximum of two faces may be used.
- 16.5.1.5.2 Location and Height. The top of any projecting sign shall not exceed sixteen (16) feet above existing ground level. The bottom of any projecting sign shall not be less than (8) feet above existing ground level. *(Amended March 2009)*
- 16.5.1.5.3 Projection. The maximum projection of any sign shall be no more than (6) feet from face of building.
- 16.5.1.5.4 Lighting. Signs may be illuminated but the lighting shall be confined to the area of the sign and arranged to avoid glare or reflection onto any portion of an adjacent highway, into the path of on-coming vehicles, or onto any residential premises and shall not significantly contribute to light pollution.
- 16.5.1.6 Multi-tenant Buildings. Each individual tenant may have one (1) additional sign attached to the building with a maximum area of four (4) square feet for the purpose of identifying the type and location of the business or service.
- 16.5.1.7 Directory Signs. One (1) free standing off-premises directory sign is permitted per parcel if the following criteria can be met:
- a. More than four (4) businesses are located on the parcel.
  - b. The parcel has no frontage on Main Street, NH Route 31, Island Street, or Forest Road.
- 16.5.2 Prohibited Signs.
- a. Roof signs.
  - b. Neon signs.

**16A.0**      ***EXTERNAL LIGHTING***  
*(Adopted March 2003)*

**16A.1**      ***Purpose and Intent.***

The purpose of this ordinance is to preserve the rural atmosphere and dark skies of the Town of Wilton. Natural dark skies are the nighttime aspect of rural character. Increasing light pollution and glare from inappropriate lighting degrades such rural character. This ordinance is intended to enhance public safety and welfare by providing for adequate and appropriate outdoor lighting, providing for lighting that will complement the character of the Town of Wilton, reduce glare, minimize light trespass, reduce the cost and waste of unnecessary energy consumption and prevent the degradation of the night sky.

**16A.2**      ***Applicability.***

- a. In addition to the General Standards found in Section 16A.3 below, detailed lighting requirements shall be set forth in the Town of Wilton Site Plan Review Regulations and shall apply to all outdoor lighting in nonresidential developments in the Town of Wilton requiring site plan approval from the Planning Board, as well as all new and replacement outdoor lighting in nonresidential properties. Home Occupations requiring Planning Board site plan review are required to comply with this Section.
- b. Though they are not subject to permitting through this ordinance, residential developers and homeowners are encouraged to use full cutoff energy efficient lighting fixtures and prevent light trespass onto neighboring properties.
- c. The Illuminating Engineering Society of North America (IESNA) standards shall apply to those non-residential uses not specifically addressed in this ordinance or by the Site Plan Review Regulations.

**16A.3**      ***General Standards.***

Non-residential lighting and lights from vehicular traffic associated with a non-residential use shall be shielded or buffered to prevent off-site glare, sky-glow and light trespass. Full cut-off or partial cut-off fixtures, when approved, are to be used, except that low-level lighting (Globe style, non-cut-off types) for walkways and landscape lighting may be approved when an acceptable design meeting the Purpose and Intent (Section 16A.1) of this ordinance is submitted.

Wherever outside lighting is proposed in a site plan review, it shall be accompanied by a formal lighting plan, prepared to scale. The lighting plan shall require Planning Board approval. Home Occupations are exempt from a formal plan but are subject to Site Plan Review Regulations. When any site plan proposes installed street, common or public area outdoor lighting, the final plan shall contain a statement certifying that the applicable provisions of this ordinance and associated regulations shall be adhered to. Lights not required for safety or security shall be turned off within a reasonable time of when a business or activity closes or ceases, as set forth in Site Plan Review Regulations.

This paragraph shall not apply to temporary decorative lighting, which may include colored lamps, such as holiday lighting. Commercial lighting shall meet minimum IESNA illumination levels while not exceeding IESNA uniformity ratios and average illumination recommendations.

**17.0 NON-CONFORMING USES AND BUILDINGS**

**17.1 Non-conforming Buildings, Structures, and Uses.**

*(Amended March 2007, March 2015)*

- a. Any non-conforming building, structure, or use of land or buildings may continue in existence.
- b. A non-conforming use of a building, structure, or land may not be changed to a different non-conforming use of the same building, structure, or land.
- c. A non-conforming use may not be re-established after discontinuance for more than one (1) year.
- d. A non-conforming building or structure may be rebuilt on the same footprint and with the same dimensions (including height), unless it has, for more than one (1) year, been unusable for its current purpose by reason of deterioration, destruction, demolition, neglect, accident, condemnation, or any other reason. *(Amended March 2016)*
- e. A non-conforming building or structure may not be extended or enlarged.

**17.2 Sub-standard Lots of Record.**

Where a lot of record at the time of the effective date of this Ordinance has less area and/or frontage than herein required in the District in which it is located:

- a. The lot may be used for a single family dwelling if permitted in that district subject to New Hampshire Water Supply and Pollution Control Division approval and subject to all district regulations applicable to lots within the district wherein the lot is located with the exception of lot size and/or frontage.
- b. The lot may be used for any non-residential use permitted in the district in which it is located in compliance with maximum density requirements, setbacks, and New Hampshire DES Water Supply and Pollution Control Division regulations.

**17.3 Special Exceptions.**

*(Amended March 2000)*

When the dimensions of a lot or the placement of existing structures on a lot are such that there is no reasonable placement of a proposed new structure on that lot which conforms with the lot setback requirements, the Zoning Board of Adjustment may grant a special exception to permit reduced setbacks, provided that:

- a. The lot dimensions or existing structures which result in the difficulty must have been in existence prior to the adoption of the setback requirements that are to be reduced.
- b. The setback to be reduced must be a lot line setback. Setbacks from wetland or water bodies may not be reduced by a special exception under this section, nor may tower setbacks as specified in the Wireless Communications Overlay District, Section 15.3.5. *(Adopted March 2009, Amended March 2020)*

- c. The proposed structure and its proposed placement must be in keeping with the existing development of the neighborhood.
- d. The special exception must specifically identify the permitted location of the proposed structure, as shown on a site plan, which is to become part of the record of the decision.
- e. The Zoning Board may restrict the dimensions of the proposed structure so as to balance the reasonable use of the property with the spirit of the zoning ordinance.

**17.4 *Status of Variances and Special Exceptions.***

*(Amended March 1992)*

A building or use permitted by a variance or special exception granted by the Zoning Board of Adjustment shall have the same status as a non-conforming building or use, and shall be subject to the restrictions of this section.

Furthermore, if construction has not begun or the use has not commenced within two (2) years of the granting of the variance or special exception, or March 10, 1992, whichever is later, then the variance or special exception shall expire. All rights conferred by a variance or special exception shall be void upon expiration. Upon application, extensions of time in which to exercise the rights accorded by the variance or special exception may be granted by the Zoning Board of Adjustment for good cause shown beyond the reasonable control or contemplation of the applicant and not prejudicial to the intent and spirit of the Zoning Ordinance. If the variance or special exception is not exercised within the time period provided, then the application shall be deemed withdrawn without prejudice upon the expiration of the time period.

**18.0 PHASING OF DEVELOPMENTS**

**18.1 Indicators of Growth Impact.**

The Town of Wilton hereby determines that the presence of any of the following conditions constitutes an indicator of Growth Impact. An Indicator of Growth Impact occurs when:

- a. The number of dwelling units for which building permits have been issued (whether for single family or multi-family structures) for either:
  1. The preceding six (6) month period (as measured on June 30 and December 31) equals or exceeds 1.6 percent of the total number of dwelling units existing in the previous calendar year; or
  2. The preceding twelve (12) month period (as measured on June 30 and December 31) equals or exceeds 3.2 percent of the total number of dwelling units existing at the end of the two (2) previous six (6) month periods.

The planning board will collect dwelling unit data twice a year. Data as of December 31 will be collected by March 1 of the succeeding year. Data as of June 30 will be collected by September 1 of the same year. Data collected will consist of the total number of dwelling units in the town's existing housing stock and the number of building permits issued over the previous 6-month period. *(Amended March 2009)*

- b. The Wilton and Wilton-Lyndeborough school districts shall notify the Planning Board within 1 month if the number of enrolled students in either the Wilton Elementary School or the Wilton-Lyndeborough Cooperative High School (or other public school erected hereafter) exceeds eighty percent (80%) of stated capacity as defined by the School Board. *(Amended March 2009)*
- c. The Planning Board shall determine if the number of dwelling units contained on a proposed subdivision plan or site plan submitted to the Planning Board equals or exceeds 1.3 percent of the then existing dwelling units as measured for the previous calendar year. *(Amended March 2009)*

**18.2 Monitoring Growth Indicators.**

It shall be the responsibility of the Planning Board to monitor the Indicators of Growth Impact and to make public reports of the presence of one or more of the Indicators.

**18.3 Phasing of Subdivision and Cluster Developments.**

If the Planning Board finds through its monitoring that either Indicator 18.1 a, b or c has occurred, then the Planning Board may require the phasing of pending and future subdivision and cluster development proposals as provided in New Hampshire RSA 674:21. The purpose of phasing developments is to minimize a strain on municipal resources caused by the sudden introduction of a substantial number of new dwelling units and to allow the Town to plan and absorb the growth over a longer period of time so as to avoid severe impact on Town services and resources.

- a. The Planning Board may require phasing of a subdivision or cluster development for a period of up to five (5) years for a project containing up to seventy-five (75) proposed dwelling units or individual lots. For a project exceeding seventy-five (75) dwelling units or individual lots, the Planning Board may negotiate a longer period of time over which phasing of the proposed development is to occur, based on the size of the project and the potential impact of the project on the Town.
- b. Once a phasing plan is approved by the Planning Board with dates of allowed construction for each phase, the approved plan shall be recorded with the Hillsborough County Registry of Deeds.
- c. The phasing of developments as provided for herein shall remain in effect until the issuance of the next public report as provided in section 18.1, at that time the Planning Board shall determine if the phasing of developments is required in accordance with the provisions of this section.

**18.4** *(Repealed March 2000)*

**19.0 ENFORCEMENT AND ADMINISTRATION**

In accordance with RSA Sections 676:15, 676:17 and 676:17-a, the Building Inspector for the Town of Wilton shall enforce the provisions of this Ordinance and any regulations promulgated pursuant hereto, as well as any provision or specification of an application, plat or plan approved by, or any requirement of a permit or decision issued by, the Building Inspector, any other official delegated authority to do so in accordance with RSA 674:51, or any Wilton land use body. In addition, the Building Inspector shall enforce the provisions of Section E of the Wilton Land Use Laws, the Building Code Ordinance. *(Amended March 2021)*

**20.0 BOARD OF ADJUSTMENT**

The Board of Selectmen shall appoint five (5) members to a Board of Adjustment, who shall act in compliance with the applicable provisions of RSA Chapters 672-677. Thereafter, as terms expire or vacancies occur, the appointing authority shall be responsible for filling vacancies and maintaining full membership on the Board of Adjustment. The Board of Adjustment shall also act as the Building Code Board of Appeals, in accordance with Article IX of Section E of the Wilton Land Use Laws, the Building Code Ordinance. *(Amended March 2021)*

**21.0 AMENDMENTS**

Amendments to this Ordinance may be adopted by a majority vote of any legally constituted Town Meeting when public notices have been given and hearings held in accordance with RSA Chapter 675. *(Amended March 2021)*

**22.0 *[Deleted March 2021]***

**23.0 SAVING CLAUSE**

If any section of this Ordinance is found to be in conflict with any other section of the Ordinance or with any local, state, or federal regulation, the more stringent standard shall apply. The invalidity, unconstitutionality or illegality of any section or provision of the Ordinance or any Zoning District shown on the zoning map shall not have any effect upon the validity, constitutionality or legality of any other section, provision or Zoning District boundary. *(Amended March 1996)*

**24.0 WHEN EFFECTIVE**

This Ordinance and amendments, as adopted in accordance with applicable law, shall take effect upon adoption. *(Amended March 2021)*

**25.0**      ***IMPACT FEES***  
*(Adopted March 2001)*

**25.1**      ***Purpose.***  
*(Amended March 2011)*

This ordinance is enacted pursuant to RSA 674:21, and in order to:

- a. Promote the public health, safety, welfare and prosperity;
- b. Assist in the implementation of the Master Plan and Capital Improvements Program;
- c. Enable the Town of Wilton to assess an equitable share of the cost of public capital facilities to new development in proportion to its demand on those facilities;
- d. Provide authority for the Planning Board to adopt proportionate impact fee assessments, and related regulations for administration thereof.

**25.2**      ***Definitions.***

25.2.1      Impact Fee. A fee or assessment imposed upon development, including subdivision, building construction or other land-use change, in order to help meet the needs occasioned by the development for the construction or improvement of capital facilities owned or operated by the Town of Wilton, including and limited to water treatment and distribution facilities; wastewater treatment and disposal facilities; sanitary sewers; storm water, drainage and flood control facilities; public road systems and rights-of-way; municipal office facilities; public school facilities; the municipality's proportional share of capital facilities of a cooperative or regional school district of which the municipality is a member; public safety facilities; solid waste collection, transfer, recycling, processing and disposal facilities; public libraries; and public recreation facilities, not including open space.

25.2.2      New Development. For the purpose of impact fee assessment, new development may include the following land use changes: *(March 2011)*

- a. The construction of any new dwelling unit; or
- b. Changes to an existing structure that would result in a net increase in residential living area or the number of dwelling units *(Amended March 2018)*; or
- c. Construction of a new commercial/industrial building or any net increase in the gross floor area of an existing commercial/industrial building; or
- d. The conversion of an existing use to another use that is determined by the Planning Board, to result in a measurable net increase in the demand on the public capital facilities that are the subject of impact fee assessment; however,
- e. New development shall not include the replacement of an existing manufactured housing unit or the reconstruction of a structure that has been destroyed by fire or natural disaster where there is no change in size, density, or type of use that would increase the demand

on capital facilities for which impact fees are assessed.

25.2.3 Off-Site Improvements. Improvements that are necessitated by a development but which are located outside the boundaries of the property that is subject to a subdivision or site plan approval by the Planning Board, and limited to necessary highway, drainage, and sewer and water upgrades pertinent to that development. *(March 2011)*

25.2.4 School District. The Wilton School District, the Wilton-Lyndeborough School District, or another regional or cooperative school district of which the Town of Wilton becomes a member municipality. *(March 2011)*

**25.3 *Authority to Assess Impact Fees.***

The Planning Board is hereby authorized to assess impact fees, as herein defined, and in accordance with the standards herein set forth. The Planning Board shall have the authority to adopt regulations to implement the provisions of this ordinance. The Impact Fee Schedule is separate from this ordinance and is reviewed and amended as set forth in the Review and Establishment of Fees section below. The Impact Fee Schedule shall be located in Appendix VIII. *(Amended March 2004)*

**25.4 *Assessment Methodology.***

The amount of any impact fee shall be a proportional share of municipal capital improvement costs which is reasonably related to the capital needs created by new development, and to the benefits accruing to new development from the capital improvements financed by the fee. Upgrading of existing facilities and infrastructures, the need for which is not created by new development, shall not be paid for by impact fees. *(Amended March 2011)*

**25.5 *Administration of Impact Fees.***

**25.5.0.1 Imposition of Impact Fees.**

1. Any person who, after the initial date of adoption of an Impact Fee Schedule, seeks to undertake new development within the Town of Wilton, New Hampshire, by applying for a building permit or permit for manufactured home installation and who is not vested under RSA 674:39, is hereby required to pay impact fees in the manner set forth in this Section.
2. No new building permit or new permit for manufactured home installation or any activity requiring payment of an impact fee pursuant to this Section of this Ordinance shall be issued unless and until the public capital facilities impact fees hereby required have been determined.
3. Impact Fees assessed to new development on lots created as part of a new subdivision of land shall be subject to the Impact Fees set forth in the Impact Fee Schedule in effect at the time and date of subdivision approval and recording at the Hillsborough County Registry of Deeds (HCRD). The fee schedule in effect at the time of the subdivision approval shall remain applicable to development on those lots for a period of time as determined by RSA 674:39, or five years in the event no time is specified in the statute. Subsequent construction on those lots will be subject to the fee schedule in effect at the time a building permit application is received. *(Amended March 2011, March 2018)*

- 25.5.1 Retention and Allocation. Each impact fee shall be accounted for separately, shall be segregated from the Town's general fund, may be spent upon order of the Board of Selectmen, and shall be used solely for the capital improvements for which it was collected, or to recoup the cost of capital improvements made in anticipation of the needs for which fees are collected to meet.
- 25.5.2 Timing of Assessment. Impact fees shall be assessed at the time of Planning Board approval of a subdivision or site plan. When no Planning Board approval is required, or has been made prior to the adoption or amendment of the impact fee ordinance or fee schedule, impact fees shall be assessed prior to, or as a condition for, the issuance of a building permit or other appropriate permission to proceed with development. *(Amended March 2011)*
- 25.5.3 Bonding. Between the date of assessment and collection, the Planning Board may require developers to post security, in the form of cash bond, letter of credit or performance bond so as to guarantee future payment of assessed impact fees.
- 25.5.4 Timing of Collection. Impact fees shall be collected as a condition for the issuance of a Certificate of Occupancy. *(Amended March 2011)*
- 25.5.5 Alternative Impact Fees. The Planning Board and the assessed party may establish an alternate, mutually acceptable schedule of payment of impact fees.

**25.6 *Return of Impact Fees.***

- 25.6.1 If the full impact fee assessed under this Ordinance is not encumbered or otherwise legally bound to be spent for the purpose for which it was collected within six (6) years, the fee shall be refunded to the owner of record of the assessed property, with any accrued interest. *(Amended March 2011)*
- 25.6.2 Whenever the calculation of the impact fee has been predicated upon some portion of capital improvement costs being borne by the Town or School District, a refund shall be made upon the failure of the Town or School District to appropriate its share of the capital improvement costs within six (6) years from the date of payment thereof. *(Amended March 2011)*

**25.7 *Other Authority Retained.***

- 25.7.1 This ordinance shall not be deemed to affect the existing authority of the Planning Board over subdivisions and site plans, including, but not limited: *(Amended March 2011)*
- a. The authority to declare a development to be premature or scattered in accordance with the regulations of the Board and in accordance with RSA 674:36, II(a); and
  - b. The authority to impose exactions for off-site improvements necessitated by a development during the subdivision or site plan review process, in accordance with RSA 674:21, V (j).

**25.8 *Review and Establishment of Fees.***

Pursuant to the authority to administer Innovative Land Use Controls under RSA 674:21, II, the Impact Fee Schedule shall be set in accordance with RSA 674:21, V, (a), and shall be reviewed every three years, starting in 2020, and amended by the Planning Board as required. The Planning Board shall schedule a public hearing, after providing proper public notice, for the review of the fee schedules. The Impact Fee Schedule approved shall become

effective upon certification by the Town Clerk. (*Adopted March 2004, March 2020*)

**25.9 *Waiver of Impact Fees***

(*Adopted March 2011, March 2020*)

The Planning Board may grant full or partial waivers of impact fees to an assessed property, subject to its finding that the proposed development meets one or more of the applicable conditions set forth below:

- a. Age-Restricted Housing. In the event that school impact fees are imposed, a full or partial waiver of the school impact fee may be granted for residential units that are lawfully restricted to exclusive occupancy by persons age 62 or older within a development that is maintained in compliance with the provisions of RSA 354-A: 15, Housing For Older Persons. The Planning Board may waive school impact fee assessments on such age-restricted units where it finds that those units will be bound by lawful deeded restrictions for a period of at least 20 years on occupancy by persons age 62 or older. (*Amended March 2020*)
- b. Other Contributions to Capital Facility Improvement. The Planning Board may agree to waive all or part of an impact fee assessment and accept in lieu of a cash payment, a proposed contribution of real property or facility improvements of equivalent value and utility to the public. Prior to acting on a request for a waiver of impact fees under this provision that involves a contribution of real property or the construction of capital facilities, the Planning Board shall submit a copy of the waiver request to the Board of Selectmen for its review and consent prior to its acceptance of the proposed contribution. The value of contributions or improvements shall be credited only toward facilities of like kind, and may not be credited to other categories of impact fee assessment. Full or partial waivers of impact fees may not be based on the value of exactions for off-site improvements.
- c. Alternative Calculation. An applicant may apply to the Planning Board for a waiver of a portion or the full amount of the impact fee where such waiver application is accompanied by an independent fee calculation that documents the proportionate capital facility cost attributable to the development. The Planning Board shall review such study and may approve a waiver if it finds that the alternative calculation more accurately accounts for the relevant capital facility costs attributable to the development. All costs incurred by the Town for the review of such a study shall be paid by the applicant.

**25.10 Appeal of Impact Fee Assessment**

(*Adopted March 2011*)

- a. A party aggrieved by a decision made by the Building Inspector or other Town official relating to an administrative decision in the assessment or collection of impact fees authorized by this Article may appeal such decision to the Zoning Board of Adjustment as provided by RSA 676:5, as amended.
- b. A party aggrieved by a decision of the Planning Board under this Article may appeal such decision to the Hillsborough County Superior Court as provided by RSA 677:15, as amended.

ARTICLE I  
**General Provisions**

**§ 334-1. Title.**

This chapter shall be cited as the "Code of the Town of Hudson, NH." It is hereinafter referred to as "this chapter."

**§ 334-2. Purpose.**

The purpose of this chapter is to promote the health, safety and general welfare of the inhabitants as well as efficiency and economy in the process of development, by encouraging the most appropriate use of land throughout the Town and to:

- A. Lessen congestion in streets.
- B. Secure safety from fires, panic and other dangers.
- C. Provide adequate light and air.
- D. Prevent the overcrowding of land.
- E. Avoid undue concentration of population.
- F. Conserve property values.
- G. Facilitate the adequate provision of transportation, solid waste facilities, water, sewerage, schools, parks, child day-care and housing opportunities for all family types and income levels.
- H. Assure the proper use of natural resources and other public requirements.
- I. Preserve and enhance the quality of life.
- J. Prevent the establishment of nuisances. **[Added 3-12-1996]**

**§ 334-3. Statutory authority.**

This chapter is adopted pursuant to authority granted by Title LXIV of the New Hampshire Revised Statutes Annotated and by New Hampshire RSA 674:16 through 674:21, inclusive.

**§ 334-4. Adoption and replacement of prior ordinance.**

This chapter was originally adopted March 10, 1942, by ballot at the Annual Town Meeting. This chapter replaces the Zoning Ordinance of record as of this date, in its entirety.

ARTICLE II  
Terminology

[Amended 3-12-1996; 3-10-1998; 3-9-1999; 3-13-2001 by Amdt. No. 7; 3-12-2002 by Amdt. No. 3; 3-13-2007 by Amdt. No. 1; 3-16-2017 by Art. No. 2]

**§ 334-5. Word usage and interpretation.**

For the purposes of this chapter, certain words, terms or phrases shall bear the meanings defined in § 334-6, unless the context clearly indicates otherwise. Such words, terms and phrases shall appear in CAPITAL LETTERS when used as herein defined.

- A. Words in the present tense include the future.
- B. The singular includes the plural, and the plural includes the singular.
- C. Hierarchy:
  - (1) Terms and words not defined in this article but defined in applicable New Hampshire state statutes or regulations shall have the meanings given therein.
  - (2) Terms and words not defined in this article but defined in the Building Code shall have the meanings given therein.
  - (3) Terms and words not defined in this article, the RSAs or in the Building Code shall have the meanings understood in common usage and as defined in standard American dictionaries.
- D. In interpreting any portion of this chapter, it shall be held as the minimum requirement adopted for promotion of the public health, safety and general welfare of the Town. Whenever any provision of this chapter is at variance with any other provision of the chapter, or with the requirements of any other lawfully adopted rule or regulation, the most restrictive, or that imposing the highest standard, shall govern.
- E. In case of any difference in meaning or implication between the text of these regulations and any caption, illustration, summary table or illustrative table, the text shall govern.
- F. The words "shall," "will," "shall not," "will not" or "may not" are always mandatory and not discretionary, the word "may" is permissive.
- G. The terms "building" or "structure" include any part thereof.
- H. The term "person" includes an individual, a corporation a partnership, an incorporated association, or any other similar entity.
- I. The terms "includes" and "including" shall not limit a term, definition or set of examples to the specified examples, but are intended to extend their meaning to all other instances or circumstances of the like kind of character.
- J. Unless the context clearly indicates the contrary, where a regulation involves two or more items, conditions, provisions or events connected by the conjunctions "and," "or," or "either... or," the conjunction shall be interpreted as follows:

- (1) "And" or "plus" indicates that all the connected items, conditions, provisions or events shall apply.
- (2) "Or" indicates that the connected items, conditions, provisions or events may apply singly or in any combination.
- (3) "Either ... or" indicates that the connected items, conditions, provisions or events shall apply singly but not in combination.

### § 334-6. Definitions.

The following words have the following meanings for the purposes of this chapter and do not affect or supersede definitions contained in any other TOWN ordinance or regulation.

A

**ABANDONMENT** — The visible or otherwise apparent intention of an owner to discontinue a use of a structure or LOT.

**ABUTTER** — Any person whose property is located in New Hampshire and adjoins or is directly across the street or stream from the land under consideration by the local land use board as defined in RSA 672:3. For purposes of receipt of notification by a municipality of a local land use board hearing, in the case of an abutting property being under a condominium or other collective form of ownership, the term "ABUTTER" means the officers of the collective or association, as defined in New Hampshire RSA 356-B:3, XXIII.

**ACCESS** — The right vested in the owner of land to enter and return from that land without obstruction to and from a public way.

**ACCESSORY DWELLING UNIT (ADU)** — A residential living unit that is within or attached to a single-family dwelling, and that provides independent living facilities for one or more persons, including provisions for sleeping, eating, cooking, and sanitation on the same parcel of land as the principal DWELLING UNIT it accompanies, as defined in RSA 674:71.<sup>1</sup>

**ADULT BOOKSTORE or ADULT VIDEO STORE** — A SEXUALLY ORIENTED BUSINESS that devotes display, shelf, rack, table, stand or floor area, utilized for the display and sale of the following:

- A. Books, magazines, periodicals or other printed matter, or photographs, films, motion pictures, videocassettes, slides, tapes, records, CD-ROM's or other forms of visual or audio representations which meet the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1; or
- B. Instruments, devices or paraphernalia which are designed for use in connection with "sexual conduct" as defined in NH RSA 571-B:1, other than birth control devices.

**ADULT CABARET** — A type of SEXUALLY ORIENTED BUSINESS that is a nightclub, bar, restaurant, or similar establishment which meets the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1, and/or

---

1. Editor's Note: The former definitions of "accessory building or shed" and "accessory structures," which immediately followed this definition, were repealed 3-9-2021.

feature films, motion pictures, videocassettes, DVDs, Blu-Ray discs, electronic media and storage devices, slides or other photographic or electronic reproductions, a SUBSTANTIAL PORTION of the total presentation time of which is devoted to showing of material which meets the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

**ADULT DRIVE-IN THEATER** — A type of SEXUALLY ORIENTED BUSINESS that is an open lot or part thereof, with appurtenant facilities, devoted primarily to the presentation of motion pictures, films, theatrical productions and other forms of visual productions, for any form of consideration to persons in motor vehicles or on outdoor seats, in which materials are shown which meet the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

**ADULT USE ESTABLISHMENT** — A type of SEXUALLY ORIENTED BUSINESS that is an establishment offering goods, services or accommodations distinguished or characterized by an emphasis upon the depiction of materials which meet the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

**ADULT MOTION-PICTURE ARCADE** — A type of SEXUALLY ORIENTED BUSINESS that is any place to which the public is permitted or invited wherein coin-, token- or slug-operated or electronically, electrically or mechanically controlled still or motion-picture machines, projectors, or other image-producing devices are maintained to show images to five or fewer persons per machine at any one time, in which the images so displayed are devoted to the showing of material which meets the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

**ADULT MOTION-PICTURE THEATER** — A type of SEXUALLY ORIENTED BUSINESS that has a capacity of five or more persons, where for any form of consideration, films, motion pictures, videocassettes, slides or similar photographic reproductions are shown, and in which a SUBSTANTIAL PORTION OF THE TOTAL PRESENTATION TIME is devoted to the showing of material which meets the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1, for observation by patrons.

**ADULT THEATER** — A type of SEXUALLY ORIENTED BUSINESS that is a theater, concert hall, auditorium or similar establishment, either indoor or outdoor in nature, which for any form of consideration regularly features live performances, which are distinguished or characterized by an emphasis on activities which meet the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

**ALTERNATIVE FACILITIES/TECHNOLOGIES (TELECOMMUNICATIONS)** — Innovative siting techniques for use with commercial wireless telecommunication facilities such as artificial trees, clock towers, bell towers, steeples, light poles and similar alternative design mounting structures which camouflage or conceal the presence of antennas, towers or facilities; as well as utility pole and cable-based technologies.

**ALTERNATIVE ENERGY SYSTEMS** — ALTERNATIVE ENERGY SYSTEMS include wind, solar, geothermal, fuel cell, hydroelectric and other similar energy production systems. See:

- A. METEOROLOGICAL TOWER (MET TOWER).
- B. SYSTEM MODIFICATION.

- C. NET METERING.
- D. POWER GRID.
- E. SHADOW FLICKER.
- F. SMALL WIND ENERGY SYSTEM.
- G. SMALL WIND ENERGY SYSTEM HEIGHT.
- H. SMALL WIND ENERGY SYSTEM TOWER.
- I. WIND GENERATOR.

ANTENNA — The radiating system used to perform or achieve (transmit and/or receive) a desired communication or telecommunication service.

APPLICANT — The person, persons, corporation or other legal entity, or their assigns, applying for a VARIANCE, SPECIAL EXCEPTION or APPEAL OF ADMINISTRATIVE DECISION.

AWNING — A cover or appurtenance that is permanent, retractable, temporary or portable in nature and is attached to and wholly supported by a building or other structure.

AWNING SIGN — A sign painted on or attached flat or flush against the surface of the awning, but not extending above, below or beyond the awning or attached to the underside.

## B

BANNER SIGN — A temporary sign of lightweight material (paper, plastic or fabric) hung either with or without frames. Flags and insignias containing only markings of any government, corporation or business are not considered "banners" and are defined separately as "flags."

BEST MANAGEMENT PRACTICE — The standard described in the current of Erosion and Sediment Control Design Handbook for Developing Areas of New Hampshire prepared by United States Department of Agriculture Soil Conservation Services. **[Amended 3-10-2020 ATM, Art. No. 2]**

BMP — See "BEST MANAGEMENT PRACTICE."

BOARD, ZBA or ZONING BOARD OF ADJUSTMENT — Unless otherwise specified, "BOARD" or "ZONING BOARD OF ADJUSTMENT" means the Town of Hudson, NH, ZONING BOARD OF ADJUSTMENT as appointed by the Town Selectmen.

BOG — A wetland distinguished by stunted evergreen trees and shrubs, the presence of peat deposits and/or highly acidic soil and/or water conditions as defined in the New Hampshire Code of Administrative Rules issued by the New Hampshire Wetlands Board. **[Amended 3-10-2020 ATM, Art. No. 2]**

BUFFER — The protected upland areas adjacent to wetlands and surface waters in the Wetlands Conservation Overlay District. **[Amended 3-10-2020 ATM, Art. No. 2]**

BUILDING — Any structure used or intended for supporting or sheltering any use of

occupancy.**[Added 3-9-2021]**

**BUILDING CERTIFICATE** — A certificate obtained from the Planning Board entitling the holder to obtain one building permit for one dwelling unit. Dwelling units, as defined in this article, include single-family homes and duplexes on individual lots, as well as individual condominium units and apartments in multifamily structures shown on approved site plans. A building certificate is valid for a period of two years from the date of issuance, by which time it must be redeemed for a building permit, or expire.<sup>2</sup>

**BUILDING, ACCESSORY** — A building in which a use that is customarily incidental and subordinate to that of the principal use is being conducted, including temporary or portable structures.**[Added 3-9-2021]**

**BUILDING, ATTACHED** — A building having any portion of one or more walls or roof in common with adjoining buildings.

**BUILDING, DETACHED** — A building not sharing any walls or portions of any walls or roof with adjoining buildings.

**BUILDING LINE** — The perimeter of that portion of a building nearest a property line, but excluding open steps, terraces, cornices and other ornamental features projecting from the building of structure.**[Added 3-9-2021]**

**BUILDING, PRINCIPAL** — A building in which a principal use is being conducted.**[Amended 3-9-2021]**

**BUILDING SETBACK** — The minimum required distance between the property line and the building line.**[Amended 3-9-2021]**

**BUILDING SIGN** — Any sign affixed, mounted, attached to or painted onto the exterior of a building, including awnings, canopies, roof-mounted and projecting signs.

## C

**CANOPY** — A temporary or permanent covered structure, the primary purpose of which is to shield the area beneath it from the elements, and which is supported by posts, poles, columns or other elements directly on or into the ground.

**CAR CANOPY** — A freestanding, lightweight structure used to house vehicles and constructed of tube framing and is partially covered by a canvas, polyethylene or other woven or nonwoven fabric or sheeting cover. This type of structure typically has no side walls and can be easily disassembled and moved. See also "CANOPY."

**CARE FACILITIES** — See NH RSAs.

- A. DAY-CARE NURSERY.
- B. CHILD DAY CARE.
- C. CHILD DAY-CARE AGENCY.
- D. FAMILY DAY-CARE HOME.
- E. FAMILY GROUP DAY-CARE HOME.

---

2. Editor's Note: The former definition of "building, structure (accessory), which immediately followed this definition, was repealed 3-9-2021. See now the definition of "building, accessory."

F. GROUP CHILD DAY-CARE CENTER.

G. NIGHT-CARE AGENCY.

H. PRESCHOOL PROGRAM.

I. RESIDENCE.

**CERTIFIED SOILS SCIENTIST** — A professional soils scientist currently certified by the state of New Hampshire pursuant to New Hampshire state statutes and licensed to practice in the state.**[Added 3-10-2020 ATM, Art. No. 2]**

**CERTIFIED WETLANDS SCIENTIST** — A person qualified to delineate wetland boundaries and prepare wetland maps who is currently certified by the State of New Hampshire Board of Natural Scientists, as defined by RSA 310-A:76, II-a.**[Added 3-10-2020 ATM, Art. No. 2]**

**CHILD DAY CARE** — The care and supervision of a child away from the child's home and apart from the child's parents.

**CHILD DAY-CARE AGENCY** — Any person, corporation, partnership, voluntary association or other organization, either established for profit or otherwise, which regularly receives for child day care one or more children, unrelated to the operator or staff of the agency. The total number of hours in which a child may remain in child day care shall not exceed 13 hours per day, except in emergencies. The types of child day-care agencies are defined as follows:

A. **PRESCHOOL PROGRAM** — A child day-care agency providing care and a structured program for children three years of age and older who are not attending a full-day school program. The total amount of hours a child may be enrolled in a preschool program shall not exceed five hours per day.

**CERTIFIED SOILS SCIENTIST** — A professional soils scientist certified by the State of New Hampshire pursuant to New Hampshire state statutes and licensed to practice in the state.

**CERTIFIED WETLANDS SCIENTIST** — A professional wetland scientist certified by the State of New Hampshire pursuant to New Hampshire state statutes and licensed to practice in the state.

**CO-LOCATION, CO-LOCATED (telecommunications — ANTENNA)** — The placement of more than one ANTENNA or INTEGRATED ANTENNA ARRAY on a supporting structure, and appurtenant equipment and devices on the supporting structure and/or ground, necessary to perform or achieve a desired telecommunication service or radio service which is discrete from any other telecommunication or radio service(s) located on the same supporting structure.

**COMMERCIAL VEHICLE, LIGHT** — A vehicle used in commerce, which does not exceed 13,000 pounds gross weight.

**COMMERCIAL VEHICLE, HEAVY** — A vehicle used in commerce, which exceeds 13,000 pounds gross weight.

**COMMERCIAL WIRELESS TELECOMMUNICATION FACILITY** — Any structure, ANTENNA, MAST, tower or other device used to provide a discrete commercial telecommunication service by a single provider or multiple CO-LOCATED providers to

a broad base of usually unrelated users; generally including, but not limited to, cellular telephone, personal communications services (PCS), specialized mobile radio (SMR), enhanced specialized mobile radio (ESMR) and paging.

**CONFORMING LOT** — A parcel of land capable of being occupied by one principal structure or use and its accessory structures or uses and as shown and identified as such on a plat as defined in the TOWN Code.

**CORNER LOT** — See lot, corner. **[2-2-2019 ATM, Art. 03, adopted 3-12-2019]**

## D

**DAY-CARE NURSERY** — A child day-care agency in which child day care is provided for any part of a day, for five or more children under the age of three years.

**DIRECTIONAL SIGN** — Signs identifying entrances, exits, parking areas or loading docks or providing other messages necessary to direct vehicles and pedestrians through or within a site.

**DIRECTORY SIGN** — Signs which identify or locate the occupants of buildings.

**DISTRICT** — An area of land within the TOWN designated as one of the five land use classifications in § 334-9 of this ordinance.

**DUPLEX** — A residential principal building with two DWELLING UNITS, separated either vertically or horizontally, by a fire wall, and with each unit having its own separate entrance. **[Amended 3-10-2020 ATM, Art. No. 3]**

**DWELLING UNIT** — One or more rooms arranged for living, sleeping and cooking purposes with sanitary facilities for the use of one or more individuals living as a single housekeeping unit.

**DWELLING UNIT, MULTIFAMILY** — Three or more DWELLING UNITS attached by any portion of one or more floors, walls or roofs.

## E

**ELECTRONIC CHANGING SIGN** — Electronic message center (EMC), electronic message sign (EMS) and changeable copy board (CCB) signs that display illuminated messages that can change frequently, can flash, display and/or convey messages in text, graphics, pictures, symbols, multiple colors, rhythms, animation and/or patterns. This sign's message may be changed by the electronic switching of lamps, illuminated tubes, bulbs and/or through the apparent movement of light. These signs are capable of storing and/or displaying single or multiple messages in various formats at varying intervals. Definitions related to ELECTRONIC CHANGING SIGNS are:

- A. **BRIGHTNESS** — Also known as "intensity"; the LED Industry measures display intensity in candelas per square meter, which is also referred to as "NITS."
- B. **DIMMING** — The ability to increase or decrease the overall display intensity brightness.
- C. **DIODE** — Also called "light-emitting diode" (LED) or "surface-mounted diode" (SMD).
- D. **LED (LIGHT-EMITTING DIODE/SMD)** — A solid-state component that uses a

semiconductor (a silicon chip or some type of semiconductor) that emits visible light when electric current passes through it.

- E. LUMINANCE — The amount of light that passes through or is emitted from a particular area. The SI unit for luminance is candela per square meter.
- F. NIT or NITS — A luminance-measuring unit equal to one candela (one candle) per square meter measured perpendicular to the rays from the source.
- G. SI UNIT — An abbreviation for the International System of Units.
- H. TEXT — Any form in which writing exists.

ENGINEER or SURVEYOR — The designated, legally recognized engineer or surveyor of the APPLICANT, licensed by the State of New Hampshire, as may be pertinent to the actual services to be performed in accordance with the provisions of RSA 310-A:1 et seq. and as amended.

ENVIRONMENTAL PROTECTION AGENCY or EPA — The federal agency responsible for implementing the Clean Water Act, including the National Pollutant Discharge Elimination System (NPDES) program.

EXTERIOR DISPLAY — The placement of goods for sale or for advertisement, outside of the building or structure, including but not limited to vehicles, garden supplies, gas, tires, motor oil, food and beverages, whether or not contained in vending machines, boats, farm equipment, motor homes and clothes.

EXTERIOR ILLUMINATED SIGN — A sign illuminated by an external electrical source similar, but not limited to, an upright spotlight or top-hung art light. The external electrical source may be turned on/off manually.

## F

FAIR-SHARE REGION AVERAGE GROWTH RATE (FSRAGR) — Average annual percentage increase in residential building permits issued in the six adjacent municipalities of Litchfield, Londonderry, Nashua, Pelham, Windham and Tyngsborough, MA, for the preceding five-year period.

FAMILY DAY-CARE HOME — An occupied residence in which child day care is provided for less than 24 hours per day, except in emergencies, for up to six children from one or more unrelated families. The six children shall include any foster children residing in the home and all children who are related to the caregiver except children who are 10 years of age or older. In addition to the six children, up to three children attending a full-day school program may also be cared for up to five hours per day on school days and all day during school holidays.

FAMILY GROUP DAY-CARE HOME — An occupied residence in which child day care is provided for less than 24 hours per day, except in emergencies, for seven to 12 children from one or more unrelated families. The 12 children shall include all children related to the caregiver and any foster children residing in the home, except children who are 10 years of age or older. In addition to the 12 children, up to five children attending a full-day school program may also be cared for up to five hours per day on school days and all day during school holidays.

FEEPAYER — The person, whether individual or corporate, who pays an impact fee in

conjunction with the issuance of a building permit or occupancy permit.

**FLASHING SIGN** — Any directly or indirectly illuminated sign that exhibits changing natural or artificial light or color effects by any means whatsoever; does not include electronic changing signs (message center).

**FREESTANDING SIGN** — Any sign not affixed or attached to a building which is established on a freestanding frame, mast or pole.

**FRONTAGE** — The distance measured along the FRONT LOT LINE between points of intersection with the SIDE LOT LINES. FRONTAGE along cul-de-sac roadways (HIGHWAYS) shall be measured at the appropriate yard building SETBACK depth from the FRONT LOT LINE between the points of intersection with the SIDE LOT LINES. "FRONTAGE" shall be contiguous and measured along the joining boundary of the FRONT LOT LINE and a Class V or better public RIGHT-OF-WAY. Lot lines bordering limited access roads cannot be considered "FRONTAGE." FRONTAGE shall be capable of providing ACCESS.

## G

**GENERAL RETAIL** — Retail stores and service establishments other than those listed in the Table of Permitted Principal Uses.<sup>3</sup>

**GROUP CHILD DAY-CARE CENTER** — A child day-care agency in which child day care is provided for preschool children and up to five school-age children, whether or not the service is known as day nursery, nursery school, kindergarten, cooperative, child development center, day-care center, center for the developmentally disabled, progressive school, Montessori school, or by any other name.

**GUY WIRE** — A cable-type appurtenant device which is used to secure and steady a tower or mast; and includes all hardware which attaches the cable to the tower or mast and to the ground.

## H

**HEIGHT (GENERAL USE)** — The distance measured from the ground adjacent to the structure, or some other alternatively specified point, up to the highest point of a BUILDING, ANTENNA, STRUCTURE or a supporting structure.

**HEIGHT, SMALL WIND ENERGY SYSTEM** — The vertical distance from ground level to the tip of the wind generator blade when it is at its highest point.

**HEIGHT, SMALL WIND ENERGY SYSTEM TOWER** — The height above grade of the fixed portion of the tower, excluding the wind generator.

**HIGHWAY** — Any travelway, dedicated to or accepted by the Town, whether improved or unimproved, within the TOWN OF HUDSON that is available as public use for travel, regardless of whether or not its popular or legal name contains the term "street," "highway," "road," "roadway," "route," "avenue," "boulevard" or other such nomenclature, which shall include any Class VI roads within HUDSON. In this code, the terms street, road, route, roadway or avenue may be used interchangeably with HIGHWAY.

**HOME OCCUPATION** — The accessory use of a residence for business purposes

---

3. Editor's Note: The Table of Permitted Uses is included as an attachment to this chapter.

which is clearly incidental to the principal residential use, provided that the use does not significantly change the residential character or function of the property.

**HOUSING FOR OLDER PERSONS** — Housing that qualifies as "Housing for Older Persons" as defined in § 334-70 and developed according to the provisions of § 334-71 of the Town of Hudson Zoning Ordinance.

**HUDSON** — The TOWN of HUDSON, New Hampshire.

## I

**INFLATABLE OR BALLOON SIGN** — A sign that inflates with air or helium to display advertisements or promotional activities typically known as, but not limited to, tubes, tubes in motion, inflatables, rotatable inflatables or rooftop balloons.

**INTEGRATED ANTENNA ARRAY** — An ANTENNA, MAST or MONOPOLE containing multiple coordinated radiating elements.

**INTERIOR ILLUMINATED SIGN** — A sign that has an internal light source (such as LED, neon or bulb) that may be turned on/off either manually or by remote control and used to display text that is manually affixed to and/or manually changeable in an external message area.

## J

**JUNK** — Any material, such as, but not limited to, discarded metal, glass, paper, building debris, demolition debris, salvage materials, rubber, textiles, rubbish or trash or junked, dismantled or wrecked motor vehicles or motor vehicle parts.

**JUNKYARD** — A commercial establishment or place of business which is used for storing, keeping, buying or selling junk but not including approved solid waste disposal facilities or registered motor vehicle dealers.

**JUNKYARD, MOTOR VEHICLE** — Any place of storage or deposit, whether in connection with another business or not, which has two or more unregistered motor vehicles which are no longer fit for legal use on public highways or any combination of motor vehicle parts or materials, the sum of which in build is equal to or greater than two or more motor vehicles.

## L

**LAND USE REGULATIONS** — The Town of Hudson, NH, Land Use Regulations, consisting of Chapters 193, 200, 275, 276 and 290 of the Hudson Town Code.

**LED SIGN** — A sign that uses light-emitting diodes to form numbers, as in digital clocks, transmit information to the sign from remote controls, form text images and/or illuminate from tiny bulbs that fit into an electrical circuit.

**LOT** — A single contiguous parcel of land. (See also CONFORMING and NONCONFORMING)

**LOT, CORNER** — A corner lot is defined as a lot located at the intersection of two HIGHWAYS that has frontage on each HIGHWAY. **[2-2-2019 ATM, Art. 03, adopted 3-12-2019]**

**LOT LINE, FRONT** — The property line dividing a lot from any street (HIGHWAY) or public RIGHT-OF-WAY without regard to the arrangement or orientation of buildings

or structures on the lot.

**LOT LINE, REAR** — The property line opposite the front lot line, except in the case of corner lots where the owner has the option of choosing which of the property lines not contiguous with streets (HIGHWAYS) or public RIGHTS-OF-WAY is to be considered the "rear lot line."

**LOT, NONCONFORMING** — A lot lawfully existing at the effective date of this chapter, or any subsequent amendment thereto, which is not in conformity with all provisions of this chapter. Notwithstanding the minimum lot area requirements set forth in § 334-27, in any DISTRICT in which structures are permitted, a structure may be erected on a lot which was a LEGAL LOT OF RECORD, even though such lot fails to meet the present requirements for frontage or area, or both, that are applicable for that use in the DISTRICT allowed; provided, however, that such lot is not contiguous with another lot or lots in the same ownership, provided that the property is either on Town sewer or the property owner obtains a state and/or municipal septic permit, and further provided that the zone's minimum front, side and back yard SETBACKS are satisfied.

**LOT OF RECORD** — Land designated as a separate and distinct parcel prior to the date of posting (November 3, 2000) of this article either in a legally recorded deed filed with the Hillsborough County Registry of Deeds or lots or units described as part of a subdivision or site plan recorded at the Hillsborough County Registry of Deeds prior to the date of posting. For the purpose of this article, a lot of record shall also be defined to include separately defined condominium units, as well as individual units in duplexes and multifamily structures, shown on site plans and/or subdivision plans accepted for review by the Hudson Planning Board prior to the date of posting.

**LOT, THROUGH** — An interior lot, the FRONT and REAR LOT LINES of which abut streets (HIGHWAYS), or a corner lot two opposite lines of which abut streets (HIGHWAYS); any lot that has street (HIGHWAY) frontage along two or more nonadjacent LOT LINES.

## M

**MANUFACTURED HOUSING** — A home built entirely in a factory under the federal building code administered by the Department of Housing and Urban Development (HUD), and constructed to meet the current Manufactured Home Construction and Safety Standards (HUD Code). A manufactured home is permanently attached to a steel frame, can be moved from one TOWN-approved location to another TOWN-approved location, and is considered personal property. MANUFACTURED HOUSING does not include MODULAR HOUSING, nor campers or recreational mobile homes.<sup>4</sup>

**MARSH** — A wetland where the vegetation is distinguished by the absence of trees and shrubs and dominated by soft-stemmed herbaceous plants and other emergent vegetation, such as grasses, reeds and sedges. The water table is at or above the surface throughout the year but can fluctuate seasonally. **[Amended 3-10-2020 ATM, Art. No. 2]**

**METEOROLOGICAL TOWER (MET TOWER)** — Includes the tower, base plate, anchors, guy wires and hardware, anemometers (wind speed indicators), wind direction vanes, booms to hold equipment for anemometers and vanes, data loggers, instrument

---

4. Editor's Note: The definition of "major commercial project," which immediately preceded this definition, was repealed 3-13-2018 ATM by Amdt. No. 5.

wiring, and any telemetry devices that are used to monitor or transmit wind speed and wind flow characteristics over a period of time for either instantaneous wind information or to characterize the wind resource at a given location. For the purpose of this article, "met towers" shall refer only to those whose purpose is to analyze the environmental factors needed to assess the potential to install, construct or erect a small wind energy system.

**MODULAR HOUSING** — A home built entirely in a factory under the current NH State building code, which is also a part of the current IRC (International Residential Code). A modular home is assembled on site, cannot be moved, is considered real property, and is allowed in all residential districts in the TOWN.

**MONOPOLE** — A freestanding tower consisting of a single pole, constructed without guy wires or lattice characteristics, which relies solely on self-support (direct attachment to the ground) to remain upright.

**MONUMENTATION** — The installation of permanent markers that define corners, boundaries, and rights-of-way when surveying land.

## N

**NEW DEVELOPMENT** — The subdivision, building construction or other land use change which results in: a net increase in the capital facilities service demands as identified in the Planning Board's impact fee schedules; and/or the conversion of a legally existing use to another use or activity which created an increase in capital facilities service demands.

**NET METERING** — The difference between the electricity supplied to a customer over the electric distribution system and the electricity generated by the customer's wind or solar energy system that is fed back into the electric distribution system over a billing period.

**NHDOT** — The New Hampshire Department of Transportation.

**NHDES** — The New Hampshire Department of Environmental Services.

**NIGHT-CARE AGENCY** — A center or family home in which child day care is provided during the evening and night hours. A child day-care agency may be licensed for day care, night care, or both.

**NONCONFORMING LOT** — A parcel of land not capable of being occupied by one principal structure or use and its accessory structures or uses and as shown and identified as such on a plat as defined in the Town Code.

**NUDE MODEL STUDIO** — A place where a person who appears in a state of nudity or displays male genitals in a state of sexual arousal and/or the vulva or more intimate parts of the female genitals, and is observed, sketched, drawn, painted, sculptured, photographed, or similarly depicted by other persons who pay money or any form of consideration or such display is characterized by an emphasis on activities which meet the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

## O

**OCEAN CONTAINER** — A shipping container of the type typically used for freight movement. Constructed of steel and typically sealed from the weather and lockable. Also

known as "cargo container," "CONEX container" and "land/sea container."

**OPEN SPACE DEVELOPMENT (OSD)** — A form of land subdivision where lot size and other dimensional requirements and minimum road widths may be reduced in exchange for the permanent preservation or provision of proportional areas of open space, farmland, recreational land and other lands.

**OUTSIDE STORAGE** — The placement of goods outside of a building or structure.

## P

**PARKING SPACE** — An off-street space, whether inside or outside a structure, for exclusive use as a parking stall for one motor vehicle.

**PERSONAL SERVICE ESTABLISHMENT** — A facility predominantly providing uses including, but not limited to, hair salons, barber shops, manicures, health spas, tailors, dry cleaners, tattooing, body piercing, fortune telling and other psychic services, cobblers and massage therapy.

**PLAT** — The map, drawing or chart on which the final PLAN of SUBDIVISION is presented to the PLANNING BOARD, and which, if approved, shall be filed or recorded with the Hillsborough County Register of Deeds.

**POORLY DRAINED SOILS** — Soils where the water is removed so slowly that the soil is saturated periodically during the growing season or remains wet for long periods of time as defined in the United States Soil Conservation Service Soils Survey of Hillsborough County, Eastern Half (latest edition).[**Amended 3-10-2020 ATM, Art. No. 2**]

**PORTABLE CARPORT** — See "CAR CANOPY."

**PORTABLE GARAGE** — A freestanding, lightweight structure used to house vehicles and constructed of tube framing and fully enclosed by a canvas, polyethylene cover or other woven or nonwoven fabric or sheeting. This structure type typically has no permanent footing or floor and can be easily disassembled and moved.

**PORTABLE SIGN** — A sign that is movable, typically set up on a daily basis outside the business establishment, such as, but not limited to, sandwich boards, swinger sidewalk signs, portable billboards, Portasigns, Portasigns in motion or roadside readerboards.

**POWER GRID** — The transmission system, managed by ISO New England, created to balance the supply and demand of electricity for consumers in New England.

**PREEXISTING TOWERS, MASTS AND ANTENNAS** — Any TOWER, MAST, MONOPOLE or ANTENNA lawfully constructed or permitted prior to the adoption of this article. Also, any TOWER, MAST, MONOPOLE or ANTENNA lawfully constructed in accordance with this article which predates an application currently before the Town.

**PUBLIC NUISANCE** — Any use that may endanger the health, safety, peace or enjoyment of the community or a neighborhood due to the emission of smoke, fumes, particulates, noise, vibration, radiation, visual blight or any other like condition.

## R

**RADIO SERVICE FACILITY** — Any structure, ANTENNA, MAST, MONOPOLE or other radio installation device used to achieve desired communication(s) by a user

with a narrow base of related or unrelated users; generally including, but not limited to, amateur radio service, general mobile radio service, citizens band radio service, low-power radio service, aeronautical and marine communications and any other similar radio communications or service which is not specifically named within this definition.

RECEIVE-ONLY FACILITY — Any ANTENNA, MAST, MONOPOLE or other device designed and constructed with the intent to receive broadcast signals typically for household use; including, but not limited to, personal satellite and off-the-air television signals and AM, FM, shortwave and other similar radio signals.

RECREATIONAL VEHICLE — A vehicle, motorized or not, which is designed and used primarily for the purpose of recreation, including but not limited to the following: vehicles defined in RSA Chapter 215, boats, motorhomes and recreational trailers.

RESERVE STRIP — Includes areas for which future public use is intended for street (HIGHWAY) connections, for street (HIGHWAY) improvements and for street or pedestrian ways giving ACCESS to land dedicated for public use.

RIGHT-OF-WAY — The area of land owned, used by or available to the Town for street (HIGHWAY) purposes, including any ancillary purposes thereto.

RSA — The NH Revised Statutes, Annotated.

## S

SECONDARY USE — A use of land or of a building or of a portion thereof which is unrelated to the principal use of the land or building.

SEDIMENT — Solid material, either mineral or organic, that is in suspension, is transported, or has been moved from its site of origin by erosion.

SEXUAL ENCOUNTER CENTER — A business or commercial enterprise that as one of its primary business purposes offers for any form of consideration:

- A. Physical contact in the form of wrestling or tumbling between persons of the opposite sex; or
- B. Activities between male and female persons and/or persons of the same sex when one or more persons is in the state of nudity; and
- C. When the activities in Subsection A or B above are characterized by an emphasis on activities which meet the definition of "harmful to minors" and/or "sexual conduct" as set forth in NH RSA 571-B:1.

SEXUALLY ORIENTED BUSINESSES — Businesses generally falling into categories regulated or defined in NH RSA 571 et seq. See:

- A. ADULT BOOKSTORE/ADULT VIDEO STORE.
- B. ADULT CABARET.
- C. ADULT DRIVE-IN THEATER.
- D. ADULT USE ESTABLISHMENT.
- E. ADULT MOTION-PICTURE ARCADE.

- F. ADULT MOTION-PICTURE THEATER.
- G. "THE TOTAL PRESENTATION TIME."
- H. "SUBSTANTIAL PORTION OF THE TOTAL PRESENTATION TIME."
- I. SEXUAL ENCOUNTER CENTER.
- J. SEXUALLY ORIENTED BUSINESS.
- K. NUDE MODEL STUDIO.

SHADOW FLICKER — The visible flicker effect when rotating blades of the wind generator cast shadows on the ground and nearby structures, causing a repeating pattern of light and shadow.

SHED — See "ACCESSORY BUILDING."

SIGN — An object, display device or structure visible to the public from the exterior of a building which contains any combination of lights, letters, words, objects, graphics, figures, designs, symbols, pictures, logos or colors which are intended to advertise, identify, direct, convey a message to the public or attract attention to an object, person, institution, organization, business or service. See:

- A. AWNING SIGN.
- B. BANNER SIGN.
- C. BUILDING SIGN.
- D. DIRECTIONAL SIGN.
- E. DIRECTORY SIGN.
- F. ELECTRONIC CHANGING SIGN.
- G. EXTERIOR ILLUMINATED SIGN.
- H. FLASHING SIGN.
- I. FREESTANDING SIGN.
- J. INTERIOR ILLUMINATED SIGN
- K. INFLATABLE OR BALLOON SIGN.
- L. LED SIGN.
- M. PORTABLE SIGN.

SMALL WIND ENERGY SYSTEM — A wind energy conversion system consisting of a wind generator, a tower, and associated control or conversion electronics, which has a rated capacity of 100 kilowatts or less and will be used primarily for on-site consumption.

SOIL — "Overburden," as described in Basic Soils Engineering, by B.K. Hough, Second Edition, 1969, a copy of which is on file in the office of the Town Engineer.

**STAFF** — The person holding the title of TOWN PLANNER for the Town of Hudson, NH, and, under his or her supervision, any Town administrative, clerical and legal personnel who are engaged by or are employees of the Town.

**STORMWATER MANAGEMENT AND EROSION CONTROL PLAN (SWMP)** — A plan which outlines project features, proposed temporary and permanent erosion control features, maintenance schedules and practices, and the design basis used to establish temporary and permanent stormwater design features.

**STORMWATER POLLUTION PREVENTION PLAN (SWPPP)** — A plan required by the EPA that clearly describes appropriate pollution control measures that include a description of all pollution control measures (i.e., BMPs) that will be implemented as part of the construction activity to control pollutants in stormwater discharges and describes the interim and permanent stabilization practices for the site.

**STORMWATER RUNOFF** — The water from precipitation that is not absorbed, evaporated, or otherwise stored within the contributing drainage area.

**STRUCTURE** — A combination of materials assembled at a fixed location to give support or shelter, such as, but not limited to, a building, bridge, trestle, tower, framework, retaining wall, tank, tunnel, tent, stadium, reviewing stand, platform, bin, fence, sign, flagpole or portable or temporary canopy or garage.

**SUBDIVIDER** — The registered OWNER or authorized agent of the registered OWNER of a SUBDIVISION.

**SUBDIVISION** — The division of a tract or parcel of land into two or more LOTs for the purpose, whether immediate or future, of sale, rent, lease or building development, or requiring the extension of municipal utilities, or the creation of one or more new streets, or the extension of existing streets; provided, however, that DEVELOPMENT for agricultural purposes is expressly excluded. When appropriate to the context of this chapter, the term "SUBDIVISION" shall relate either to the process of subdividing or to the land or area subdivided.

**SUBSTANTIAL PORTION OF THE TOTAL PRESENTATION TIME** — For the purposes of this chapter, "substantial portion of the total presentation time" shall mean the presentation of films or shows described above for viewing on more than seven days within any fifty-six-consecutive-day period.

**SURFACE WATER** — Those portions of waters of the state, as defined by RSA 485-A:2.XIV, which have standing or flowing water at or on the surface of the ground. This includes, but is not limited to, perennial and seasonal streams, lakes, ponds, and tidal waters. **[Amended 3-10-2020 ATM, Art. No. 2]**

**SUSTAINABLE RATE OF DEVELOPMENT** — A target number of building permits to be issued in Hudson in the current year equaling the fair-share region average growth rate for the preceding five years times the total number of dwelling units existing in Hudson in the preceding year. Round any fraction calculated herein to the next whole number.

**SWAMP** — A wetland that is dominated by trees and/or shrubs. **[Amended 3-10-2020 ATM, Art. No. 2]**

**SWPPP** — Stormwater pollution prevention plan (see § 290-5).

**SYSTEM MODIFICATION** — When applied to ALTERNATIVE ENERGY

SYSTEMS, any change to the small wind, solar or other ALTERNATIVE ENERGY SYSTEM that materially alters the size, type or location of the system. Like-kind (same size and general conformation) replacements shall not be construed to be a modification.

## T

TOTAL DWELLING UNITS (DU) — The total number of dwelling units in Hudson on December 31. This number includes single-family homes, as well as dwelling units in duplexes, apartments, condominium developments and other multifamily structures. Note: For 1999, the DU number is 7,965 based on an estimated accounting of the number of dwelling units.

TOWN ENGINEER — The professional engineer who holds the position of Town Engineer for the Town of Hudson, or his or her designated representative, either in a permanent or temporary capacity.

TOWN OF HUDSON, HUDSON or TOWN — The Town of Hudson, NH.

TOWN PLANNER — The person occupying the position of the Town of Hudson, NH, Town Planner.

TOWER — A structure which is designed and constructed to support one or more antennas used by commercial wireless telecommunication facilities and includes all appurtenant devices attached to it. A tower can be freestanding (solely self-supported by attachment to the ground) or supported (attached directly to the ground and with guy wires) of either lattice or monopole construction.

## U

USE, ACCESSORY — Any use which is customary, incidental and subordinate to the principal use of a structure or lot.

USE, CHANGE OF — A "change of use" occurs when the use of any land or building is changed from one land use classification to another or from one category to another category within a land use classification. See Article III, § 334-9B, Use classification, and Article V, § 334-21, Table of Permitted Principal Uses.

USE, PRINCIPAL — The main or primary purpose for which a structure or lot is used.

## V

VARIANCE — A variance is a request to deviate from current zoning requirements. If granted, it permits the owner to use the land in a manner not otherwise permitted by the zoning ordinance. It is not a change in the zoning law. Instead, it is a specific waiver of requirements of the zoning ordinance.

VERY POORLY DRAINED SOILS — Soils where the water is removed so slowly that free water remains at or on the surface during most of the growing season as defined in the United States Soil Conservation Service Soils Survey of Hillsborough County, Eastern Half (latest edition).[**Amended 3-10-2020 ATM, Art. No. 2**]

## W

WETLAND — Pursuant to RSA 482-A:2.X, an area that is inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal conditions does support, a prevalence of vegetation typically adapted for life in

saturated soil conditions. <sup>5</sup> [**Amended 3-10-2020 ATM, Art. No. 2**]

**WIND GENERATOR** — The blades and associated mechanical and electrical conversion components mounted on top of the tower whose purpose is to convert the kinetic energy of the wind into rotational energy used to generate electricity.

Y

See Bylaws Chapter 143 TOWN Code.

---

5. Editor's Note: The former definitions of "wetland buffer" and "Wetland Conservation District," which immediately followed this definition, were repealed 3-10-2020 ATM, Art. No. 2.

ARTICLE III  
**General Regulations**

**§ 334-7. Conformity required.**

No building or land shall hereafter be used or occupied and no building or structure or part thereof shall be erected, moved or altered unless in conformity with the regulations specified in this chapter for the district in which it is located.

**§ 334-8. Certificate of occupancy.**

A certificate of occupancy will not be issued until all chapter requirements and site plan/development regulations have been met.

**§ 334-9. Land use classifications.**

- A. For the purposes of this chapter, all uses or activities are considered to fall into one of five land use classifications. The Table of Permitted Principal Uses in Article V, § 334-21, further divides each land use class into various related categories.
- B. Use classifications shall be as follows:
- (1) Residential.
  - (2) Community facilities.
  - (3) Agricultural.
  - (4) Retail and service.
  - (5) Industrial.

**§ 334-10. Mixed or dual use on a lot. [Amended 3-13-2018 ATM by Amdt. No. 1]**

- A. Multiple Principal Uses on a lot in the Industrial or Business Zones are permitted provided that the lot meets the area and frontage requirements for the principal use for the district in which it is located and each use is in conformity with all other requirements set forth in this chapter and the Hudson Land Use Regulations pertaining to that use. **[2-2-2019 ATM, Art. 06, adopted 3-12-2019]**
- (1) The Business or Industrial lot has sufficient frontage to satisfy the minimum frontage requirement for the principal use requiring the most frontage.
  - (2) The Business or Industrial lot is of sufficient size to satisfy the minimum lot size requirement for the principal use requiring the most lot area.
- B. For the purposes of this chapter, multiple commercial or industrial uses/activities developed as part of a single site are considered a single principal use.
- C. For the purposes of this article, the addition of accessory uses to a principal use does not result in a dual or mixed use of property.
- D. Multiple or mixed uses on a single lot, which includes a residential use, shall only be allowed by Special Exception in accordance with the general requirements listed

in Article VI, § 334-23. In addition to the general requirements for special exception listed in Article VI, § 334-23, the mixed or dual uses shall be compatible. **[2-2-2019 ATM, Art. 06, adopted 3-12-2019]**

**§ 334-11. Classification of Town roads.**

Town roads shall be classified as follows:

A. Arterials.

- (1) NH 3A (Elm Street, Lowell Road, Webster Street and River Road).
- (2) NH 102 (Derry Street).
- (3) NH 111 (Central Street).
- (4) Dracut Road.

B. Collectors.

- (1) Barretts Hill Road.
- (2) Belknap Road.
- (3) Burns Hill Road.
- (4) Bush Hill Road.
- (5) Greeley Street.
- (6) Highland Street.
- (7) Kimball Hill Road.
- (8) Lawrence Road.
- (9) Musquash Road.
- (10) Old Derry Road.
- (11) Pelham Road.
- (12) Pine Road.
- (13) Robinson Road.
- (14) Wason Road.
- (15) West Road.
- (16) Windham Road.

**§ 334-12. Fences and similar enclosures. [Amended 3-14-1995 by Amdt. No. 3; 3-9-2010 by Amdt. No. 6]**

All fences, walls and similar enclosures, except trees, shrubs and natural vegetation, are subject to the following restrictions:

- A. No permit shall be required for any fence not exceeding eight feet in height in any residential district.
- B. A permit shall be required for any fence, including sports/ tennis enclosures, exceeding eight feet in height in any residential district.
- C. Any fence exceeding eight feet in height must be installed adjacent to or behind the front corner of the home.
- D. Any fence exceeding eight feet in height must have metal or metal reinforced support posts.
- E. Any fence, sports/tennis enclosure, other than for agricultural uses, exceeding 10 feet in height is subject to Planning Board review.
- F. A fence is not subject to setback requirements.
- G. A fence shall be erected so that the side facing adjacent property owners and/or public rights-of-way presents a reasonable appearance.
- H. No fence, hedge, planting or enclosure wall shall obstruct or interfere with roadway and/or driveway sight distances as determined by the office of the Town Engineer.
- I. Outdoor in-ground swimming pools shall be enclosed by a permanent fence which, by itself or together with other permanent appurtenant structures, surrounds the entire perimeter of the intended pool apron area. Except for intended access gates, no openings in the fence shall exist which would allow a sphere greater than four inches in diameter to pass through.
  - (1) For one-family and two-family residences, fences shall not be less than four feet in height, and access gates shall have latching and locking mechanisms installed on interior surfaces or yoke-type latches with padlock holes.
  - (2) For all other residential and nonresidential uses, fences shall be not less than six feet in height, and access gates shall have mechanisms which automatically latch and lock during off-season and closed hours and when lifeguards are off duty.

**§ 334-13. Junkyards prohibited; outdoor storage.**

- A. The operation of a junkyard is not permitted in any district.
- B. The outdoor storage of any of the following are not permitted in any district:
  - (1) More than one unregistered vehicle.
  - (2) Any quantity of waste, refuse, junk or ashes.
  - (3) Bulk storage of oil or gasoline, other than in standard or approved containers or containment facilities.

**§ 334-14. Building height. [Amended 3-8-2016 by Amdt. No. 4; 3-16-2017 by Art. No. 3; 2-2-2019 ATM, Art. 04, adopted 3-12-2019]**

No occupiable structure may exceed 38 feet in height in any district, except as provided in Subsection A below. Height is measured from the average elevation of the finished grade within five feet of the structure to the highest point of the roof, excluding accessory, unoccupied protuberances such as antennas, flagpoles and the like. Nonoccupiable structures such as church spires, steeples, smokestacks, flagpoles, lightpoles and other similar structures may not exceed 100 feet in height in any district, except as provided for in Article VI, Special Exceptions. In all cases, a nonoccupiable structure shall not be capable of falling or collapsing beyond the bounds of the property on which it is situated. The maximum heights and special exception conditions for communications towers, masts and antennas are separately addressed within Article XVIII, Commercial Wireless Telecommunication, Radio Service and Receive-Only Facilities.

- A. In the following described zoning districts/parcels, the maximum allowed occupiable building height shall be 50 feet, and said maximum height shall be restricted to those areas of buildings used exclusively for manufacturing, warehouse, distribution and office space ancillary to said principal uses: Sagamore Industrial Park (IP), located in an Industrial (I) Zoning District, bordered by Sagamore Bridge Road to the south, the Merrimack River to the west, the existing General (G) District to the north and the existing Business (B) District, abutting Lowell Road. (Rte. 3A) to the east, and including all parcels located within this I Zoning District. The General (G) Zoning District abutting to the north of the above-described Sagamore IP, and known locally as the "Friar Property," having frontage off Friars Drive. The portion of the General-One (G-1) Zoning District located to the south of Sagamore Bridge Road and exclusive to the following parcels: Green Meadow Golf Club, 43 Steele Road (Map 239/Lot 001), 11 Steele Road (Map 234/Lot 005), 2 Friel Golf Road (Map 234/Lot 001), 267 Lowell Road (Map 234/Lot 035) and 273 Lowell Road (Map 234/Lot 034). The Industrial (I) Zoning District located along the south border of Central Street (NH Rte. 111), starting at the westernmost border of this I District (i.e., just west of Hudson Park Drive), running along said south border of Central Street to the west border of Sullivan Road and including all parcels located within this I Zone. The Industrial (I) Zoning District located along the north side of Derry Street (NH Rte. 102), at the intersection of West Street, and including all parcels located within this I Zone. The Industrial (I) Zoning District located at 65 River Road (Map 251-001). **[Amended 3-10-2020 ATM, Art. No. 4]**

**§ 334-15. Parking.**

- A. All land uses shall provide for and maintain off-street parking spaces. **[Amended 3-10-1998]**
- (1) Required off-street parking facilities shall be provided on the same lot as the principal use they are designed to serve. All parking spaces shall be paved.
  - (2) Multifamily and all nonresidential uses shall provide and maintain off-street parking in accordance with the site plan or subdivision regulations.

- (3) Parking spaces (except for driveways) in residential zones shall not be located within front, side or rear setback areas.
- B. Parking prohibited. Parking or storing of vehicles in excess of the amounts specified in this section is prohibited.
  - (1) Outdoor parking or storage of more than one unregistered motor vehicle per residential unit.
  - (2) Outside parking or storage of vehicles or trailers used in commerce at residential sites with gross vehicle weight greater than 13,000 pounds. **[Amended 3-14-1995 by Amdt. No. 5; 3-10-1998; 3-13-2007 by Amdt. No. 2]**
  - (3) Outdoor parking or storing of more than one recreational vehicle per residence. Parking or storage shall not take place within setback areas, other than on a driveway. **[Amended 3-10-1998]**
  - (4) Sale of automobiles, trucks or recreational vehicles on a consignment basis is expressly prohibited at any residential or nonresidential site without site plan approval by the Planning Board as a sales location.<sup>6</sup> **[Added 3-14-1995 by Amdt. No. 6]**

**§ 334-16. Building permits. [Amended 3-14-1995 by Amdt. Nos. 7 and 8; 3-10-1998; 3-4-2000; 3-9-2004; 3-13-2012 by Amdt. Nos. 1 and 2]**

Any person, firm or corporation shall obtain a building permit before commencing work on the erection, alteration or movement of any building or structure, except as exempted under Subsection A. For one- and two-family dwellings, the Town of Hudson has adopted by reference and follows the 2009 International Residential Code for One- and Two-Family Dwellings. The Town of Hudson also adopts by reference the Americans with Disabilities Act (ADA) as outlined in 28 CFR Part 36. For structures other than one- and two-family dwellings, the Town of Hudson shall enforce the current provisions of the State Building Code as promulgated pursuant to RSA 155-A:1, as may be amended from time to time. Whenever a provision of this ordinance differs from the authority of the 2009 International Residential Code for one- and two-family dwellings, the provision which imposes the greater restriction or higher standard shall be controlling.

- A. Exemptions. Building permits shall not be required for the following: accessory structures, such as mailboxes, doghouses, birdbaths, ornamental landscaping features, swing sets, children's playhouses, clotheslines, fences eight feet or less in height and other similar types of structures which by custom and reason, in the opinion of the Building Inspector, do not require building permits.
- B. Unoccupied public utility structures. Unoccupied structures up to 200 square feet erected by public utilities which are necessary for the furnishing of adequate service for the public health, safety or general welfare are permitted in all zones and are not subject to the building setback, lot size or frontage requirements of this chapter.

---

6. Editor's Note: Former §334-15.1, Retail gasoline sales, added 3-12-2002 by Amdt. No. 1, requiring that lots with stores selling gasoline at retail be located at least 800 feet from another lot with a store selling gasoline at retail, was repealed 3-13-2018 ATM by Amdt. No. 2.

Prior to the issuance of a building permit, such structures and their sites shall be approved by the Planning Board in order to ensure they present a reasonable appearance and do not create a hazard to the public or interfere with the surrounding area.

C. Conditions of issuance.

- (1) No permit, however, shall be issued unless the structure will present a reasonable appearance and will be in keeping with the neighborhood and unless the building is to be finished on the exterior in a permanent manner and is to be suitably painted on the outside whenever the same is of wood or a material customarily painted. This is intended to eliminate the erection of structures obviously out of place for the neighborhood as judged by the property values and neighborhood character.
- (2) No permit shall be issued for the construction of a dwelling unless plans therefor provide for the following:
  - (a) Single residential buildings shall have a minimum of 850 square feet of living area.
  - (b) Duplex residential buildings shall have a minimum of 1,500 square feet of living area.
  - (c) Three-unit and four-unit residential buildings shall have a minimum of 2,250 square feet and 3,000 square feet, respectively.
  - (d) Multifamily residential buildings shall have a minimum per-unit size of 750 square feet.
  - (e) No more than one single-family home or duplex shall be constructed on one lot without Planning Board site plan approval.
- (3) A certificate of occupancy shall be issued by the Building Inspector only after the Zoning Administrator shall have fully inspected the completed premises and found such premises, in all zoned districts, including subdivisions, to be in full compliance with the zoning and subdivision regulations pertaining to the premises to be occupied. No premises shall be occupied without a certificate of occupancy issued by the Building Inspector.
- (4) No permit shall be issued for nonresidential or multifamily units in excess of duplex-residential prior to Planning Board site plan approval. The Planning Board shall have jurisdiction, prior to the issuance of a building permit, over the site location, parking facilities and recreational facilities of all multifamily dwellings and nonresidential structures in all zones. If it is in the public interest, a public hearing shall be held, the cost of which will be borne by the individual or firm requesting the building permit.

D. Validity. If no substantial construction takes place within one year of issuance, the building permit becomes null and void.

**§ 334-16.1. Site plan approval. [Added 3-4-2000]**

No person, persons, partnership, proprietorship, company, trust or corporation shall commence a new use, change a use or commence any site development activity (other than one- or two-family residential activity) without first securing site plan approval from the Hudson Planning Board pursuant to this chapter. These regulations shall apply to the development or change or expansion of use of tracts for nonresidential uses or for "multifamily dwelling units," which are defined as any structures containing more than two dwelling units, whether or not such development includes a subdivision or resubdivision of the site. For the purpose of this chapter, change of use occurs when the use of any land or building is changed from one land use classification to another or from one category to another category within a land use classification as specified in this chapter. E.g., grocery store changes to a food service establishment. No building permits shall be issued until site plan approval has been obtained from the Town of Hudson Planning Board and is recorded with the Hillsborough County registry of Deeds.

ARTICLE IV  
**Establishment of Districts**

**§ 334-17. Districts enumerated; Zoning Map. [Amended 3-13-2001 by Amdt. No. 3]**

For the purposes of this chapter, the Town of Hudson is divided into the following districts as shown and defined on the Official Zoning Map. The Official Zoning Map is made a part of this chapter, by reference, for the purpose of designating the boundaries of districts. The Zoning Map is available in the offices of the Town Planner and Zoning Administrator.

<b>Full Name</b>	<b>Short Name</b>
Residential – One	R-1 (formerly A-1SF)
Residential – Two	R-2 (formerly A-1 and A-2)
Town Residence	TR
Business	B (formerly B-1 and B-2)
Industrial District	I
General	G (formerly D, Rural)
General-One	G-1

**§ 334-18. Districts described.**

- A. Residential - One (R-1). The R-1 Residential District is established to provide for the development of single-family detached homes and customary accessory uses and structures at low densities. The district is intended to be strictly residential in character with a minimum of disturbances due to traffic or overcrowding.
- B. Residential - Two (R-2). The R-2 Residential District is established to provide for the development of single-family and/or two-family (duplex) residences and customary accessory uses and structures and complementary nonresidential uses. The district is intended to provide a diversity of housing types, community facilities, recreational uses and other uses which benefit and are enhanced by the predominantly residential character of the district.
- C. Town Residence (TR). The TR District encompasses established residential neighborhoods which have been developed on smaller lots than the lot size established in other residential districts. The setbacks and use densities reflect traditional New England town or village lot development patterns. The district is intended to permit the continued use, maintenance and vitality of these unique residential areas, protecting their residential character, while simultaneously limiting the expansion of these neighborhoods into adjacent, undeveloped lands.
- D. Business (B). The B District is established to provide for the development of general wholesale and retail commercial uses, services, offices uses, multifamily dwellings and customary accessory uses and structures. **[2-2-2019 ATM, Art. 02, adopted 3-12-2019]**
- E. Industrial (I). The I District is established to provide for industrial development,

warehousing, limited business and commercial uses and customary accessory uses and structures. The district is intended to be strictly nonresidential in character.

- F. General (G). The G District includes all areas not specifically designated as being within an R-1, R-2, TR, B or I District. The district is designed to permit a wide diversity of land uses. Most uses permitted in the other five districts are permitted in the G District. The G District is intended to allow natural constraints, such as infrastructure development and market forces to determine the most appropriate use of land. It is also intended that the G District will eventually be absorbed by the expansion of other existing districts or replaced by newly created districts. The Planning Board will be responsible for maintaining sound planning concepts in this district and shall ensure that conflicting land uses do not abut each other without appropriate buffers. **[Amended 3-8-2016 by Amdt. No. 3]**
- G. General-One (G-1). The G-1 District includes all areas not specifically zoned as being within an R-1, R-2, TR, B, or I District located outside the right-of-way of the Circumferential Highway as depicted on the Town Zoning Map. The District is designed to permit a wide diversity of land uses at a density appropriate to the rural nature of the area, the natural constraints of the land and the lack of infrastructure. Uses permitted in this District are the same as those permitted in the G District. **[Added 3-13-2001 by Amdt. No. 3; amended 3-8-2016 by Amdt. No. 3]**

#### **§ 334-19. Interpretation of Zoning Map and Zoning District Boundaries.**

Where appropriate and unless otherwise indicated, zoning district boundaries shown on the Zoning Map are the center lines of streets, power line rights-of-way, the middle of the channel of waterways or other bodies of water or the Town boundary line. Where a boundary is so indicated that it parallels the center line of a street, such boundary shall be considered to be parallel thereto at the distance therefrom shown on the Zoning Map. Any boundary within 10 feet of a property line shall be considered to coincide with such property line. Where no distance is stated on the Zoning Map, the distance shall be determined by the use of the scale on the map. In any instance where there is doubt as to the location of a zoning district boundary, the Zoning Administrator shall determine the location of such boundary, consistent with the intent of this chapter and the Zoning Map. Boundaries defined by the overlay Wetland District are excluded from this section.

ARTICLE V  
**Permitted Uses**

**§ 334-20. Allowed uses provided in tables. [Amended 3-12-2002 by Amdt. No. 2]**

Any uses not specifically listed in the Table of Permitted Principal or Accessory Uses are hereby expressly prohibited.<sup>7</sup>

**§ 334-21. Table of Permitted Principal Uses.**

The Table of Permitted Principal Uses shall be as follows:<sup>8</sup>

- A. In all zoning districts all motor vehicle(s) displayed for sale shall be set back a minimum of 15 feet from the edge of roadway pavement. **[Added 3-9-2004]**

**§ 334-22. Table of Permitted Accessory Uses.**

The Table of Permitted Accessory Uses<sup>9</sup> lists the accessory uses which may accompany those principle uses set forth in the Table of Permitted Principal Uses in § 334-21. The addition of such accessory uses does not result in the mixed or dual use of a parcel and does not require additional lot area, frontage or setbacks. The accessory uses listed in the Table of Permitted Accessory Uses are not intended to be the only accessory uses allowed. Accessory uses, not provided for in the Table of Permitted Accessory Uses, that are appropriate to a district can be permitted as a special exception from the Zoning Board of Adjustment in accordance with the general requirements of Article VI.

---

7. Editor's Note: The Tables of Permitted and Accessory Uses are included at the end of this chapter.

8. Editor's Note: The Table of Permitted Principal Uses is included at the end of this chapter.

9. Editor's Note: The Table of Permitted Accessory Uses is included at the end of this chapter.

ARTICLE VI  
**Special Exceptions**

**§ 334-23. General requirements.**

Unless otherwise specified, the Zoning Board of Adjustment shall permit a use by special exception, subject to the following conditions:

- A. The use requested is listed as permitted by special exception in the Table of Permitted Principal or Accessory Uses<sup>10</sup> for the district in which the use is requested or is so similar to other uses permitted by special exception in the relevant district that prohibition of the proposed use could not have been intended.
- B. The proposed use meets all the applicable requirements established in this chapter.
- C. The proposed use is consistent with the purpose and intent of the district in which it is proposed to be located.
- D. The proposed use is compatible with the character of the surrounding neighborhood.
- E. Nonresidential principal uses proposed to be located in residential districts must take primary access from arterial or collector roads.

**§ 334-24. Home occupations. [Amended 3-13-2007 by Amdt. No. 3; 3-10-2009 by Amdt. No. 3]**

Home occupations are defined by the Zoning Ordinance as "any activity carried out for gain by a resident in their dwelling unit, and such activity is a secondary use to the residence." The intent of providing a home occupation special exception is to allow for growth and development of a small in-home business while maintaining the character of residential areas. The applicant acknowledges that if the business grows and no longer meets the listed requirements, the business shall be moved to an appropriately zoned location such as Business, General or Industrial. Home occupations which include sales or service operations for wholesale goods produced or services provided on-site shall be permitted only as a special exception. The Zoning Board of Adjustment must find any such home occupation application to be in full compliance with the following requirements prior to approval of such special exception:

- A. The home occupation shall be secondary to the principal use of the home as the business owner's residence.
- B. The home occupation shall be conducted only by the residents of the dwelling who reside on the premises. If the applicant is the owner, the owner must sign an affidavit, stating he/she is the owner, and the residents of the dwelling are the only individuals conducting the activities associated with the home occupation. Said affidavit shall also state that the owner is responsible for any violations of this chapter. If the applicant is a renter, the owner of the dwelling must sign an affidavit, stating he/she is the owner, and shall acknowledge that the home occupation for the premises shall only be conducted by the current renter(s), who shall be identified

---

10. Editor's Note: See § 334-21, Table of Permitted Principal Uses, or § 334-22, Table of Permitted Accessory Uses.

on the application. The owner shall also acknowledge that he/she, as the owner of the dwelling, is responsible for any violations of this chapter conducted at said dwelling. Approval of the home occupation special exception expires with the change of ownership of the property or the rental agreement in effect at the time the home occupation special exception was granted. The home occupation special exception is conditional on the residents of the dwelling and not on the property.

- C. There shall be no employees or "for hire" staff conducting the home occupation activities, unless the employee(s) also resides on the premises.
- D. The home occupation business shall be carried out within the residence and/or within a structure accessory to the residence, such as a garage.
- E. The requested special exception shall be for an occupation which is consistent for what is routinely and/or typically done in a home environment such as a day care, direct office billing, or other activities that are generally service-oriented or produce goods for wholesale purposes.
- F. On-site retail sales are an expressly prohibited home occupation special exception use.
- G. No more than 50% of the finished living space of the dwelling unit shall be used in connection with the home occupation.
- H. Other than the sign(s) permitted under Article XII, there shall be no exterior display nor other exterior indication of the home occupation, nor shall there be any variation from the primarily residential character of the principal or accessory building.
- I. Exterior storage may be permitted only by special exception, granted by the Zoning Board of Adjustment, and must be screened from neighboring views by a solid fence or by evergreens of adequate height and bulk at the time of planting to effectively screen the area. In situations where a combination of existing foliage and/or long distances to neighboring views provide screening, the fencing requirements may be waived at the discretion of the Board.
- J. Objectionable circumstances, such as, but not limited to, noise, vibrations, dust, smoke, electrical disturbances, odors, heat or glare, shall not be produced.
- K. No traffic shall be generated by the home occupation activity that will be substantially greater in volume than would normally be expected in the neighborhood.
- L. Parking.
  - (1) Parking for the home occupation shall be provided off-street and shall not be located in the front yard or within the required setbacks from the side and rear lot lines. Only the existing driveway may be used for the parking of customers. Customer parking shall be limited to a maximum of two vehicles at any one time.
  - (2) Parking of vehicles used in commerce:

- (a) One registered vehicle used in commerce may be parked at the principal or accessory structure, and further provided that personal vehicles used in commerce are excluded from this provision.
  - (b) In the B, I and G Zones (pertaining only to the home occupation activity), one registered vehicle used in commerce may be parked at the principal or accessory structure, provided that there are no heavy commercial vehicles which exceed a weight of 13,000 pounds (gross vehicle weight) and the screening requirements of § 334-24I are met, and further provided that personal vehicles used for purposes of commerce are excluded from this restriction.
- M. Approval of the home occupation special exception expires with the change of ownership of the property or the rental agreement in effect at the time the home occupation special exception was granted. The home occupation special exception is conditional on the residents of the dwelling and not on the property.
- N. The Community Development Director/Zoning Administrator reserves the right to revoke the home occupation special exception if all conditions of the special exception are not maintained.

**§ 334-25. Height of structure.**

Special exceptions may be granted to the building height limits defined in Article III, § 334-14, when required to reduce emissions or improve air quality in accordance with applicable state and/or federal environmental standards, regulations or guidelines.

**§ 334-26. (Reserved)<sup>11</sup>**

---

11. Editor's Note: Former § 334-26, Reduction of requirements for mixed and dual uses; compatibility of uses, was repealed 2-2-2019 ATM, Art. 06, adopted 3-12-2019.

ARTICLE VII  
**Dimensional Requirements**

**§ 334-27. Table of Minimum Dimensional Requirements. [Amended 3-14-1995 by Amdt. No. 2; 3-13-2001 by Amdt. No. 3; 3-11-2008 by Amdt. No. 1; 3-10-2009 by Amdt. No. 1]**

The Table of Minimum Dimensional Requirements is included at the end of this chapter.

**§ 334-27.1. General requirements. [Added 3-14-1995 by Amdt. No. 2]**

- A. A lot with one or the other (water or sewage) will be treated as having neither.
- B. The minimum buildable lot area shall not contain wetlands, as defined by the Hudson Zoning Ordinance, shall be contiguous dry land and shall contain no slopes in excess of 25%. **[Added 3-9-1999; amended 3-4-2000]**
- C. Accessory storage structures (sheds) shall be placed to the rear of the main building. **[Amended 3-10-1998]**
- D. Frontage shall be measured in a continuous line along the sideline of a Class V or better street between the points of intersection of the side lot lines with the street. If a lot has frontage on more than one street, the frontage on one street only may be used to satisfy the minimum lot frontage. **[Amended 3-13-2001 by Amdt. No. 1]**

**§ 334-27.2. Lot requirements for subdivision of land. [Added 3-12-2002 by Amdt. No. 5]**

All lots shall meet the minimum lot area, minimum lot frontage, and building setback requirements provided in § 334-27, Table of Minimum Dimensional Requirements. The minimum lot area shall be contiguous land and shall not be separated by a wetland, a waterway, or a right-of-way. The minimum lot area shall not contain wetland, as defined by the Hudson Zoning Ordinance, and shall contain no slopes in excess of 25%.

ARTICLE VIII  
**Nonconforming Uses, Structures and Lots**

**§ 334-28. General requirements.**

Any lawful use of land or buildings rendered nonconforming by the initial adoption of this chapter (in 1942) or by any subsequent amendments to the chapter may be continued, and any use of land or buildings permitted under a variance granted by the Zoning Board of Adjustment may be continued in conformity with any conditions or requirements imposed by the Zoning

Board of Adjustment although such use does not otherwise conform to the requirements of this chapter.

**§ 334-29. Extension or enlargement of nonconforming uses.**

A nonconforming use shall not be extended or enlarged, except by variance.

**§ 334-30. Changes to or discontinuance of nonconforming uses.**

A nonconforming use may not be changed to another nonconforming use. If an existing nonconforming use is discontinued, lapses or is abandoned for a continuous period of 12 months, any subsequent use of such land or building(s) shall conform to the terms of this chapter.

**§ 334-31. Alteration and expansion of nonconforming structures.**

- A. A nonconforming structure may not be altered or expanded, except by variance. A nonconforming structure may be altered, reconstructed, externally or structurally modified, provided that such alterations, reconstruction, extension or structural modification does not make any portion or portions of the existing structure more nonconforming. A nonconforming structure cannot be reconstructed after demolition, except when the structure was demolished by an act of God, fire or flood. A nonconforming building or a building occupied by a nonconforming use may be strengthened and made safe. **[Amended 3-9-2004]**
- B. General - One (G-1) District. Any structure located in the G-1 District that was lawfully occupied upon the posting of the adoption of the regulations for the G-1 District (October 27, 2000) shall be deemed a conforming structure for the purpose of this chapter. **[Added 3-13-2001 by Amdt. No. 4]**

**§ 334-32. Nonconforming lots. [Amended 3-4-2000; 3-13-2018 ATM by Amdt. No. 3]**

A nonconforming lot is a lot lawfully existing at the effective date of this chapter, or any subsequent amendment thereto, which is not in conformity with all provisions of this chapter. Notwithstanding the minimum lot area requirements set forth in Article VII, § 334-27, Table of Minimum Dimensional Requirements, in any district in which structures are permitted, a structure may be erected on a lot which is a lot of record, even though such lot fails to meet the present requirements for frontage or area, or both, that are applicable for that use in the district allowed; provided that the property is either on

Town sewer or the property owner obtains a state and/or municipal septic permit, and further provided that the zone's minimum front, side and back yard setbacks are satisfied. Where a question exists to the applicability of this section the Zoning Administrator shall make any administrative determination with reference to RSA 674:39-a and 674:39-aa.

## ARTICLE IX

**Wetland Conservation District**

[Amended 3-14-1995 by Amdt. No. 1; 3-12-1996; 3-10-1998; 3-9-1999; 3-4-2000;  
3-12-2002 by Amdt. No. 6; 3-10-2020 ATM, Art. No. 2]

**§ 334-33. Authority and purpose.**

- A. The title of this district shall be the Wetlands Conservation Overlay District. This article is adopted under authority granted pursuant to RSA 674:16, Grant of Power, and 674:21, Innovative Land Use Controls. All proposed development, removal of vegetation, and alteration of the land surface within the Wetlands Conservation District is subject to this article.
- B. The purpose of the Wetland Conservation District is to protect the health, safety and general welfare of the public by promoting both the most appropriate use of land and by protecting wetland and surface water ecosystems and water quality in accordance with the goals and objectives of Hudson's Master Plan.
- C. All proposed development, removal of vegetation, and alteration of the land surface within the Wetlands Conservation Overlay District is subject to this article.
- D. The wetlands and buffers in the Town of Hudson are a valuable natural resource requiring careful management to maintain their usefulness to public health, safety and welfare. The Town of Hudson finds that wetlands and buffers:
- (1) Prevent the destruction of, or significant changes to, those wetland areas, related water bodies and adjoining land which provide flood protection.
  - (2) Protect persons and property against the hazards of flood inundation by ensuring the continuation of the natural flow patterns of streams and other watercourses.
  - (3) Provide for nutrient attenuation and augmentation of stream flow during dry periods.
  - (4) Preserve and protect important wildlife habitat and maintain ecological balance.
  - (5) Prevent the expenditure of municipal funds for the purposes of providing and/or maintaining essential services and utilities which might be required as a result of abuse or inharmonious use of wetlands.
  - (6) Protect the wetlands, watercourses, surface and groundwater supplies and waterbodies of the Town from degradation.
  - (7) Preserve and enhance those aesthetic values associated with the Wetlands Conservation Overlay District.

**§ 334-34. Definitions.**

Reference shall be made to §334-6, Definitions, of this chapter for the definition of words and terms used throughout this Wetland Conservation Overlay District Article.

**§ 334-35. Boundaries.**

- A. The Wetlands Conservation Overlay District includes all of the following:
- (1) Surface waters.
  - (2) Wetlands of any size.
  - (3) A fifty-foot-wide buffer around wetlands and surface waters.
- B. For the purposes of this article, the reference line of all wetlands and surface waters shall be established by an on-ground delineation performed by a Certified Wetland Scientist. All wetlands, surface waters, and vernal pools shall be field delineated and defined by a Certified Wetland Scientist.
- C. The Wetland Conservation Overlay District shall not include those wetlands which have developed as a result of the construction of stormwater treatment and/or detention facilities, agricultural use, waste treatment, or other water-dependent structures or uses, and manmade facilities. In the case of beaver activity, the reference line shall be determined by those areas that meet the jurisdiction of the New Hampshire Department of Environmental Services.
- D. When a boundary of the Wetlands Conservation Overlay District is disputed by either the Town of Hudson or an applicant, the Conservation Commission, at the applicant's expense, may engage an independent certified wetlands scientist to determine the location of the Wetland Conservation District limit. The delineation shall be consistent with DES Wetlands Bureau Rules, as amended. The independent Certified Wetland Scientist shall transmit their findings to the applicant who shall add said findings to the project plan. This revised plan, showing both wetland delineation boundaries, shall be presented to the Planning Board who shall make the final determination regarding District boundaries.
- E. The entire length of the upland limit of the wetland buffer shall be marked with highly visible construction tape prior to, and maintained for the full duration of, any construction-related activities. The applicant may also be required to place a permanent monument (e.g., iron pin, granite bound) at all points of the lot lines which intersect with the upland limit of the Wetlands Conservation Overlay District prior to such activities. These monuments shall be shown on the site plan submitted with the application. The applicant may also be required to affix tags to trees or other durable objects (e.g., four-inch-by-four-inch wood posts) at fifty-foot intervals along the upland boundary of the Wetlands Conservation Overlay District, and maintain said tags as needed to provide evidence of the upland side buffer boundary. Tags shall be obtained from the municipality at the applicant's cost.

**§ 334-36. Uses within Wetland Conservation District.**

- A. Permitted uses: The following uses shall be permitted in the Wetland Conservation District, subject to review by the Conservation Commission and the Planning Board. This review is intended to assure that best management practices are used to prevent degradation of the Wetland Conservation District by slope erosion, sedimentation and chemical and thermal pollution. These uses will not: require the erection or construction of any structure; alter the natural surface configuration by

re-contouring or grading of the land, involve filling, dredging, or draining of the wetland; change the flow of water; result in the pollution of the wetlands, surface water, or groundwater; or involve substantial clearing of vegetation, except for the purposes of agriculture or forest management as described below.

- (1) Forest management in the wetland buffer, consistent with best management practices published by the New Hampshire Department of Resources and Economic Development and UNH Cooperative Extension, or their successors.
  - (2) Agriculture, including grazing, cultivation and harvesting of crops, consistent with Best Management Wetland Practices published by the New Hampshire Department of Agriculture, Markets and Food or its successor.
  - (3) Passive recreation such as hiking, fishing, hunting on foot, non-motorized boating. Trails shall have minimal impact on drainage, flora and fauna.
  - (4) Wildlife or fisheries management.
  - (5) Water supply wells, public and private.
  - (6) Rehabilitation, repair or replacement of stormwater management facilities or other structures that lawfully existed prior to March 11, 2020.
- B. Prohibited uses: Any use that is not expressly permitted in §334-36A or by conditional use in §334-36C is prohibited. Prohibited uses that may not be established or expanded within the Wetlands Conservation Overlay District include, but are not limited to, the following:
- (1) Structures, except as provided in §334-36C.
  - (2) Salt storage.
  - (3) Automobile junkyards.
  - (4) Solid or hazardous waste facilities.
  - (5) Use of fertilizer on lawns, except lime or wood ash.
  - (6) Bulk storage or handling of chemicals, petroleum products or hazardous materials.
  - (7) Sand and gravel excavations.
  - (8) Processing of excavated materials.
  - (9) Impervious surfaces, except as provided in §334-36C.
  - (10) Activities which result in soil compaction such as parking vehicles or heavy equipment, except as provided in §334-36C.
  - (11) Underground tanks.
- C. Conditional Uses: Any use not identified as a permitted use listed in §334-36A is presumed to impair the wetland functions and values unless proven otherwise by an applicant as provided below. The following uses may be granted a Conditional Use

Permit by the Planning Board in accordance with §334-37:

- (1) Accessory structures associated with a legally existing primary structure, provided the applicant demonstrates that no practicable alternative exists elsewhere on the lot and outside of the Wetland Conservation Overlay District.
  - (2) Construction of streets, roads, and other access ways, including driveways, footpaths, bridges, and utilities if essential to the productive use of land beyond the Wetland Conservation Overlay District. These uses shall be located and constructed in such a way as to minimize the potential for detrimental impact to the District and be planned, designed, and constructed in a manner consistent with applicable state and local standards. Such construction may be permitted within the District only when no viable alternative is available.
  - (3) Water impoundments for the purposes of creating a water body for wildlife, fire protection, stormwater management, or recreational use. Construction of impoundments for on-site detention and/or treatment of stormwater runoff in the Wetland Conservation Overlay District, provided the Planning Board finds that it is not practical or possible to locate them outside of the District.
  - (4) Other uses which the applicant is able to demonstrate to the satisfaction of the Planning Board that will not significantly interfere with wetland functions and values, water quality, or wildlife habitat pursuant to the statement of purpose of this article; or in the alternative, uses that will impact wetlands functions and values; but, in the opinion of the Planning Board, are not contrary to the public interest and will result in significant public benefit provided:
    - (a) Compensatory mitigation is provided such that those Wetland Conservation Overlay District functions and values to be impacted will be off-set in whole. Such mitigation may be located on- or off-site. As a guide to the type and extent of compensatory mitigation considered, reference shall be made to the New England District Compensatory Mitigation Guidance, US Army Corps of Engineers, New England District, Regulatory Division, 7-22010 as amended.
    - (b) The applicant has demonstrated avoidance and minimization to the fullest extent practical.
- D. Nonconforming Uses: In addition to Article VIII of the Zoning Ordinance, existing, nonconforming uses are subject to the following in the Wetland Conservation Overlay District:
- (1) Expansion of a nonconforming use or structure may be allowed by the Zoning Board of Adjustment in the wetland buffer provided that the encroachment upon the wetland is not increased, and review by the Conservation Commission finds that any potential increased impact upon the wetland functions will be mitigated.
  - (2) Where an existing, nonconforming use or structure within the Wetland Conservation Overlay District is destroyed or in need of extensive repair, it may be replaced or rebuilt, provided that the provisions of Article VIII of this

chapter are met.

- (3) The replaced or rebuilt use shall not have a greater impact on the Wetland Conservation District than the impact of the original use.

**§ 334-37. Conditional Use Permit criteria.**

A. The Planning Board shall, in addition to referencing the findings referenced in the preceding section, consider all relevant facts and information prior to making a decision on any application for a Conditional Use Permit; find that the proposed project is consistent with the stated Purpose of this article; and find, that to the extent possible, the project avoids and minimizes impacts to land situated within the District, including but not limited to the following:

- (1) The proposed activity minimizes degradation of land situated within the District and offsets potential adverse impacts to functions and values of wetlands, surface waters, and vernal pools including but not limited to their capacity to:
  - (a) Support fish and wildlife;
  - (b) Attenuate flooding;
  - (c) Supply and protect surface and groundwater resources;
  - (d) Remove sediments;
  - (e) Remove pollutants;
  - (f) Support wetland vegetation;
  - (g) Promote public health and safety; and
  - (h) Moderate fluctuations in surface water levels.
- (2) The proposed activity will have no significant negative environmental impact to abutting or downstream properties and/or hydrologically connected water and/or wetland resources, including:
  - (a) Increased potential for erosion, siltation, and turbidity of surface waters;
  - (b) Loss of fish and wildlife habitat;
  - (c) Loss of unique habitat having demonstrable natural, scientific, or educational value;
  - (d) Loss or decrease of beneficial aquatic organisms and wetland plants and their habitat;
  - (e) Increased danger of flooding and/or transport of pollutants; and
  - (f) Destruction of the economic, aesthetic, recreational, and other public and private uses and values of the wetland to the community.
- (3) The proposed activity or use cannot practicably be located otherwise on the

site to eliminate or reduce impact to the Wetland Conservation Overlay District.

- (4) The proposed activity incorporates the use of those Best Management Practices recommended by the New Hampshire Department of Environmental Services and/or other state agencies having jurisdiction.
  - (5) All applicable federal and/or state permit(s) have been received for the proposed activity in accordance with New Hampshire Code of Administrative Rules, Part Env-Wt 100-800 and Section 404 of the Federal Clean Water Act, as amended.
  - (6) Where applicable, proof of application to all required state and/or federal permits.
  - (7) Prior to making a decision on any Conditional Use Permit pursuant to the Wetland Conservation Overlay District, the Planning Board shall receive a written comment from the Conservation Commission. The Conservation Commission may recommend the Planning Board impose conditions of approval is deemed necessary to mitigate the potential for adverse effects of the proposed activity or use.
- B. Application requirements for this Conditional Use Permit are set forth in Chapter 276, Administrative Requirements and Definitions.

**§ 334-38. through § 334-41. (Reserved)**

ARTICLE X  
**Manufactured Housing**

**§ 334-42. Requirements for manufactured home subdivisions.**

Manufactured home subdivisions must meet the following requirements:

- A. Manufactured home subdivisions are only permitted in the General District; see the Table of Permitted Principal Uses in § 334-21 of Article V.
- B. The minimum size of the tract of land to be subdivided must be 10 acres.
- C. Only single-family manufactured homes are permitted, and only one manufactured home may be placed on each residential lot within a subdivision.
- D. Each manufactured home shall be affixed to a permanent foundation.
- E. The subdivision shall be screened along its perimeter by a permanent buffer area, not less than 50 feet wide, composed of trees, shrubs or other suitable buffer approved by the Planning Board. The buffer area may be placed on individual lots within the subdivision.
- F. Each manufactured home lot within the subdivision shall meet the dimensional requirement for single-family use in the Table of Minimum Dimensional Requirements in § 334-27 of Article VII.

**§ 334-43. Manufactured home parks.**

- A. Manufactured home parks shall be permitted in the General District; see the Table of Permitted Principal Uses in § 334-21 of Article V.
- B. There are two types of parks: manufactured home park - rental, and manufactured home park - condominium.
  - (1) A rental park is for the rental of land or space within the park for the siting of manufactured homes and may also be for the rental of utilities and other services.
  - (2) A condominium park is a park established as a condominium in accordance with the Condominium Act, RSA 356-B, or established with cooperative ownership otherwise permitted by state law.
- C. Each park must contain a minimum of 10 acres.
- D. Each park must have a principal access to either an arterial or a major collector street. All-season safe sight distance in both directions must be attained at the street entrance.
- E. In all parks, homes must either be skirted with suitable code-conforming materials approved by the Planning Board and anchored or placed on a permanent foundation. Only single-family manufactured homes are permitted on both types of parks.
- F. The maximum density of homes allowed in a manufactured home park is determined by total lot area divided by the minimum building lot area as defined in

Article VII, § 334-27.1B, e.g., if the parcel is 100 acres and 65 acres are dry area and less than 25% slopes, 65 units are permitted. **[Amended 3-9-1999]**

- G. In all parks, each home must be placed on a parcel of land within a park, known as a "space," with a minimum area of 15,000 square feet and with a minimum contiguous frontage of 100 feet along a private road within the park. Only one home may be placed on each space. Each space shall be permanently delineated on the approved site plan. The Planning Board may make reasonable requirements for the location of the placement of homes on a space, including reasonable setback requirements.
- H. The difference between the total of the area of the manufactured home park and the total area of all home lots shall be set aside as common open space to be used for recreation and/or common land purposes.
- I. All on-site facilities (such as roadways, driveways, sewers and drainage systems) shall not be dedicated to the Town unless the Planning Board expressly determines that such a dedication is in the best interests of the Town. On-site facilities shall be constructed to meet Town standards.
- J. All subsurface sewage disposal and water supply requirements for individual or community systems shall be compiled with, or Town water and sewer shall be provided. Community wells and septic disposal systems shall not be located on the required minimum space for the mobile home. Septic disposal areas do not count towards the minimum required open space.
- K. Manufactured housing park developments shall be adequately screened/buffered from abutting residential uses. A permanent buffer area, not less than 50 feet wide, shall be required and approved by the Planning Board for adequacy. The Planning Board shall also make reasonable requirements to ensure that the screen/buffer area will be permanently maintained and preserved.
- L. Two off-street parking spaces must be provided for each space.
- M. All manufactured homes must comply with BOCA and current FHA manufactured home standards.

**§ 334-44. Permit required for manufactured homes.**

No manufactured home may be moved into the Town of Hudson or be placed on a lot unless it has been issued a permit from the Building Inspector.

**§ 334-45. Permit for temporary use of manufactured homes.**

- A. A property owner who is building or rebuilding a home may obtain a permit from the Zoning Administrator to place a manufactured home on the lot where the home is being built or rebuilt for the property owner and his household to occupy as a temporary residence during construction.
- B. The permit shall be issued for a period not greater than one year, to expire 30 days after issuance of a certificate of occupancy for the home. The Zoning Administrator may, for good and sufficient cause, grant the property owner a six-month extension

of the permit. The manufactured home must be removed from the property within 60 days of occupancy of the principal structure (house).

- C. Before receiving the permit, the property owner shall obtain a building permit for the home and shall provide the Zoning Administrator with reasonable assurances that construction will be completed within one year.
- D. A person, partnership or corporation engaged in construction or development may obtain a permit from the Zoning Administrator to place one or more manufactured homes or trailers for nonresidential uses on the construction site for use as office space, storage or sanitary or rest facilities for employees. Such permit shall be issued for an initial period not to exceed one year and may be extended for six-month periods until completion of construction or development.

**§ 334-46. Storage of manufactured homes.**

- A. Manufactured homes may not be stored on land within the Town, except as approved by the Planning Board in accordance with site plan requirements. This provision shall not apply to review homes placed on land in accordance with this article.
- B. No manufactured home may be moved into the Town of Hudson or be placed on a lot unless it has been issued a permit from the Building Inspector.

ARTICLE XI  
**Open Space Development**

**§ 334-47. Purpose.**

The purpose of open space developments is to preserve the rural and scenic character of Hudson by encouraging more efficient patterns of land development which conserve open and green spaces, farmland, wildlife habitats, water resources, scenic areas and other natural resources. It is also designed to provide for increased recreational opportunities and to promote greater neighborhood cohesion, without altering overall land use densities or land use patterns.

**§ 334-48. Definitions.**

As used in this article, the following terms shall have the meanings indicated:

OPEN SPACE DEVELOPMENT (OSD) — A form of land subdivision where lot size and other dimensional requirements and minimum road widths may be reduced in exchange for the permanent preservation or provision of proportional areas of open space, farmland, recreational land and other lands. An "OSD" shall adhere to the permitted uses and density requirements otherwise applicable to the district in which the "OSD" is located.

**§ 334-49. Applicability.**

OSDs may be located in any zoning district and may include any use or combination of uses permitted in the district in which the OSD is located.

**§ 334-50. Density. [Amended 3-12-2002 by Amdt. No. 7**

Minimum density requirements for all uses in an OSD correspond with the minimum lot size requirements established in Article VII, Dimensional Requirements. Total open space provided as a part of an OSD application must be of sufficient land area, when added together with the total land area devoted to individual lots, to provide an overall density no greater than that which would be provided in a non-OSD development. To aid in evaluating the number of allowable lots, all OSD applications submitted to the Planning Board for review shall include both a preliminary, conventional subdivision plan and an OSD plan. The preliminary conventional plan shall, at a minimum, include the zoning district, proposed streets, driveways, lot lines, wetland delineation, wetland setbacks, and a table with calculations for each lot.

**§ 334-51. Lot sizes.**

The area of individual lots within an OSD may be reduced by up to 50% of the minimum lot size requirements established in Article VII, as provided herein.

- A. An area of land, equal to or greater than the difference between the size of each open space lot and the minimum lot size, shall be dedicated to permanent open space, conservation land or recreation land.
- B. No reduced area residential lots shall be arranged to front or abut preexisting streets, roads or highways.

- C. All subsurface sewage disposal and water supply requirements for individual or community systems shall be compiled with, or Town water and sewer shall be provided.

**§ 334-52. Dimensional requirements. [Amended 3-13-2001 by Amdt. No. 2]**

Frontage and setback requirements for individual lots within an OSD may be reduced up to 50% of the minimum frontage and setback requirements established in Article VII, as provided herein, if approved by the Planning Board.

- A. No reduced frontage lots shall be allowed to front on preexisting streets, roads or highways.
- B. Setback reductions shall not be permitted along property lines that abut non-OSD residentially developed properties.

**§ 334-53. Open space requirements.**

The minimum open space requirement of § 334-50 may be provided through common land or individually owned land placed in permanent conservation or recreational easements or by other land use restrictions. The OSD shall comply with the following conditions:

- A. Only undeveloped land, landscaped green space or recreational areas may be included in the calculation of minimum open space requirement. Setback areas along the perimeter of the subdivision may not be included in the open space calculations.
- B. Roadways, driveways, rights-of-way, utility easements, parking areas and other developed areas, except for recreational paths, trails or facilities, may not be included as part of minimum open space requirements.
- C. Wetland(s), road rights-of-way, and slopes in excess of 25%, shall not be considered in the calculation of total lot area. The one-hundred-year floodplain areas shall not exceed 25% of the total land area of the OSD. **[Amended 3-9-1999; 3-12-2002 by Amdt. No. 8]**
- D. Whenever possible, lots or dwelling units should be arranged to abut or have direct access to common open space or recreational land.
- E. Lots and open space should be arranged to preserve and protect prominent natural features, historic or archaeological resources, scenic vistas, surface water bodies and streams and other important natural and man-made landscape features.
- F. The deed for each building lot shall contain an undivided proportional share of all common open space, except as provided for in § 334-54.

**§ 334-54. Compensatory open space.**

- A. Off-site compensatory open space may be permitted at the discretion of the Planning Board where the land meets the following conditions:
  - (1) The land is either comprised of prime farmland soils or it has been used for

active agricultural purposes within the five years prior to the date of application;

- (2) It encompasses important wildlife habitats as recognized or approved by the Conservation Commission;
  - (3) It consists of land with strong potential for providing needed recreational areas for future residents of the proposed development as well as for the Town as a whole;
  - (4) It would serve to provide access to important surface or to protect groundwater resources; or
  - (5) It encompasses other areas of exceptional scenic or historic value.
- B. Where compensatory open space is provided in lieu of on-site open space, the Planning Board may require the developed portion of the OSD to be adequately screened from adjacent properties.
- C. Screening provided under Subsection B shall not be included within minimum open space or lot size calculations.

**§ 334-55. Road standards. [Amended 3-13-2001 by Amdt. No. 2]**

Minimum road and right-of-way widths may be reduced at the discretion of the Planning Board, where such reductions would result in development patterns more harmonious to the natural or man-made features of the site without sacrificing public convenience or safety. All roads within the open space plat shall be public roads.

**§ 334-56. Procedures. [Amended 3-12-2002 by Amdt. No. 9]**

Except as otherwise provided for in this chapter, all single- or two-family OSD subdivisions must comply with the submission, review and approval requirements of Hudson's Land Subdivision Regulations.<sup>12</sup> Nonresidential or multifamily residential OSD shall comply with the submission, review and approval requirements of Hudson's Site Plan Regulations.<sup>13</sup> The Planning Board may adopt additional OSD subdivision or site plan review regulations to govern the review of common lands, private covenants, homeowners' association agreements and other pertinent issues.

---

13. Editor's Note: See Ch. 275, Site Plan Review.

## ARTICLE XII

**Signs****§ 334-57. Purpose. [Amended 3-10-2009 by Amdt. No. 2]**

The purpose of this article is to encourage the effective use of signage to direct movement, advertise and inform the public while protecting public safety, preserving neighborhood character, aesthetics and minimizing visual clutter.

**§ 334-58. Permit required; exemptions.**

- A. No sign shall be erected or affixed to any building exterior or placed freestanding on any premises, public or private roadways or rights-of-way or altered or moved without a permit issued by the Building Inspector and approved by Zoning Administrator, except as otherwise exempted in this chapter. **[Amended 3-10-2009 by Amdt. No. 2]**
- B. The following signs may be erected without a permit and are not included in the maximum sign area allowed unless otherwise indicated, but must comply with all other requirements of this chapter as stated herein:
- (1) Historic plaques or markers no greater than two square feet in area.
  - (2) Contractor job signs no greater than 12 square feet.
  - (3) Directional or directory signs, no greater than three square feet, which are located outside of setback areas and which are not visible from public rights-of-way or abutting properties; other directional or directory signs are governed by § 334-68 below.
  - (4) National or state flags (not to exceed 40 square feet in area). **[Amended 3-10-2009 by Amdt. No. 2]**
  - (5) Building name signs or signs indicating the date of construction of a building which are no greater than 12 square feet in area and are permanently affixed to a building facade.
  - (6) Temporary signs advertising special events for charitable, religious or other nonprofit organizations in accordance with § 334-61B. These signs must be registered with the Zoning Administrator.
  - (7) Political campaign signs must comply with NH RSA 664:17 as may be amended from time to time. **[Amended 3-13-2007 by Amdt. No. 4]**
  - (8) On-site, temporary signs advertising employment opportunities. These signs are limited to 12 square feet in size. These signs can be in place for no more than 30 days.
  - (9) Signs affixed to or placed within 12 inches of the interior side of a window so as to be visible from the exterior, which advertise products or services available within the building, prices, payment methods or sales, provided that the combined area of the sign(s) does not exceed 25% of the total area of the window. **[Amended 3-4-2000]**

- (10) Utility signs which identify the location of utility lines, cables or pipes.
- (11) Lettering, logos or graphics affixed to products or packaging displayed for on-site sales.
- (12) Lettering, logos or graphics identifying or describing products or their manufacturers, vendors or distributors, which are affixed to the exterior of devices such as vending machines, gasoline pumps and other similar devices.
- (13) Lettering, logos or graphics identifying vehicles or equipment or their manufacturers, vendors or distributors, which are permanently affixed to the exterior of the vehicles or equipment.
- (14) Temporary signs, which advertise garage or yard sales or lost pets. These signs can be in place for no more than three days.
- (15) Signs identifying street addresses or the occupants of residences.
- (16) On-site temporary signs advertising the opening of a new business in accordance with § 334-61.
- (17) Signs installed by governmental bodies.
- (18) Customary signs which give warnings, no larger than two square feet in area, such as "Beware of Dog" or "No Trespassing" signs.
- (19) Residential real estate signs. One unlit sign, no greater than 12 square feet in area, is permitted per residence or residentially zoned parcel of less than 10 acres in area, except in the case of corner or through lots, where one sign is permitted for each side of the lot which fronts on a public right-of-way.
- (20) Nonresidential and large lot real estate signs. One unlit sign, no greater than 32 square feet in area, is permitted per nonresidential site or for any parcel of greater than 10 acres in area, except in the case of corner or through lots, where one sign is permitted for each side of the lot which fronts on a public right-of-way.
- (21) Temporary construction signs. Construction signs for public safety and/or information, including: electronic changing signs (ECS), electronic message centers (EMC) and/or LED signs being used to inform the public at or near construction and traffic-related sites. **[Amended 3-10-2009 by Amdt. No. 2]**
- (22) A sign less than 12 square feet for a hawker and peddler when a hawker and peddler permit is issued by the Town of Hudson. **[Added 3-14-1995 by Amdt. No. 9]**
- (23) Signs used exclusively for the posting or display of an official notice by a public agency or official, or by a person giving legal notice. These signs are limited to three square feet in size. **[Added 3-8-2011 by Art. No. 2]**

### **§ 334-59. Definitions.**

For the purposes of this article, the following definitions apply; other definitions are included in Article II:

**AWNING SIGN** — A sign painted on or attached flat or flush against the surface of the awning, but not extending above, below or beyond the awning or attached to the underside.

**BANNER SIGN** — A temporary sign of lightweight material (paper, plastic or fabric) hung either with or without frames. Flags and insignias containing only markings of any government, corporation or business are not considered "banners" and are defined separately as "flags."

**BUILDING SIGN** — Any sign affixed, mounted, attached to or painted on to the exterior of a building, including awnings, canopies, roof-mounted and projecting signs.**[Amended 3-10-2009 by Amdt. No. 2]**

**DIRECTIONAL SIGN** — Signs identifying entrances, exits, parking areas or loading docks or providing other messages necessary to direct vehicles and pedestrians through or within a site.

**DIRECTORY SIGN** — Signs which identify or locate the occupants of buildings.

**ELECTRONIC CHANGING SIGN** — Electronic message center (EMC), electronic message sign (EMS) and changeable copy board (CCB), signs that display illuminated messages that can change frequently, can flash, display and/or convey messages in text, graphics, pictures, symbols, multiple colors, rhythms, animation and/or patterns. This sign's message may be changed by the electronic switching of lamps, illuminated tubes, bulbs and/or through the apparent movement of light. These signs are capable of storing and/or displaying single or multiple messages in various formats at varying intervals.**[Amended 3-10-2009 by Amdt. No. 2]**

**EXTERIOR ILLUMINATED SIGN** — A sign illuminated by an external electrical source similar, but not limited to, an uplight spotlight or top-hung art light. The external electrical source may be turned on/off manually.**[Added 3-10-2009 by Amdt. No. 2]**

**FLASHING SIGN** — Any directly or indirectly illuminated sign that exhibits changing natural or artificial light or color effects by any means whatsoever; does not include electronic changing signs (message center).

**FREESTANDING SIGN** — Any sign not affixed or attached to a building which is established on a freestanding frame, mast or pole.

**INTERIOR ILLUMINATED SIGN** — A sign that has an internal light source (such as LED, neon or bulb) that may be turned on/off either manually or by remote control and used to display text that is manually affixed to and/or manually changeable in an external message area.**[Added 3-10-2009 by Amdt. No. 2]**

**INFLATABLE OR BALLOON SIGN** — A sign that inflates with air or helium to display advertisements or promotional activities typically known as, but not limited to, tubes, tubes in motion, inflatables, rotatable inflatables or rooftop balloons.**[Added 3-10-2009 by Amdt. No. 2]**

**LED SIGN** — A sign that uses light-emitting diodes to form numbers, as in digital clocks, transmit information to the sign from remote controls, form text images and/or illuminate from tiny bulbs that fit into an electrical circuit.**[Added 3-10-2009 by Amdt. No. 2]**

**PORTABLE SIGN** — A sign that is movable, typically set up on a daily basis outside the business establishment, such as, but not limited to, sandwich boards, swinger sidewalk

signs, portable billboards, Portasigns, Portasigns in motion or roadside readerboards. **[Added 3-10-2009 by Amdt. No. 2]**

### **§ 334-60. General requirements.**

The following requirements apply to all signs:

- A. No sign may be erected within a public right-of-way.
- B. Except as noted in § 334-65, no off-premises advertising signs are permitted in any district.
- C. All signs shall be set back from any public right-of-way a distance not less than 50% of the front setback requirement for other structures within the district in which the sign is located.
- D. No sign may be erected in side or rear setback areas.
- E. All signs shall be set back a distance not less than 25 feet from the point of intersecting rights-of-way.
- F. No sign shall be erected in a residential district, except as allowed in § 334-67, Home occupation signs, § 334-62, Subdivision identification signs, and § 334-58, Residential real estate signs. **[Amended 4-8-1997 by Amdt. No. 2; 3-10-2009 by Amdt. No. 2]**
- G. No flashing signs are permitted in any district.
- H. Electronic changing signs are permitted in the Business (B) and Industrial (I) Zoning Districts subject to the requirements of § 336-64C below. Electronic changing signs shall be prohibited in the Town Residence (TR), Residential (R-1, R-2) and General (G and G-1) Zoning Districts. **[Amended 3-4-2000; 3-10-2009 by Amdt. No. 2; 3-9-2010 by Amdt. No. 2]**
- I. Nonconforming signs and signs associated with nonconforming uses are governed by Article VIII, Nonconforming Uses, Structures and Lots. **[Amended 3-10-2009 by Amdt. No. 2]**
- J. In zoning districts that allow freestanding signs, the maximum height of such signs shall be 30 feet. In addition to the language specific to advertising, all freestanding signs shall have the street number clearly identified. Numbers are to be four inches in height and black or white, whichever will contrast with the proposed sign colors. **[Added 3-4-2000; amended 3-8-2011 by Amdt. No. 2]**
- K. No inflatable, balloon or portable signs are allowed in any DISTRICT unless specifically authorized in a permit issued by the TOWN Board of Selectmen for a fair, festival, limited-duration performance or other event of a temporary nature. **[Added 3-10-2009 by Amdt. No. 2; amended 3-16-2017 by Art. No. 4]**
- L. No sign in any zoning district shall include nudity, images of or reference to specific sexual conduct or activities, images of or references to specific anatomical areas, images of or references to instruments, devices or paraphernalia which are designed for use in connection with specific sexual conduct or activities in any

district. **[Added 3-10-2009 by Amdt. No. 2]**

- M. No sign in any zoning district shall emit audible sound, odor, smoke, steam, mist, laser, hologram or other visible matter, including any sign that employs any stereopticon or motion picture projection. **[Added 3-10-2009 by Amdt. No. 2]**

**§ 334-61. Temporary signs.**

Temporary signs for the purposes indicated below are subject to the following requirements:

- A. Grand opening signs: one unlit sign no greater than 32 square feet in the business, industrial and general districts and 12 square feet in all other districts, advertising the opening, reopening or new location of a business, is permitted per business location for a period not to exceed 30 consecutive days.
- B. Special event signs: one unlit on-site sign, no greater than 32 square feet in the business, industrial and general districts and 12 square feet in all other districts, advertising special events or functions for charitable, religious or other nonprofit organizations or for transitory sporting, cultural or recreational events, provided that the sign is erected no sooner than 30 days prior to the event and is removed within seven days after the event. Special event signs also include banner signs.
- C. Commercial/industrial signs: commercial and industrial sites may display one unlit sign per site for a time period of not more than 10 days in a thirty-day period; the sign shall not exceed 12 square feet. **[Added 3-14-1995 by Amdt. No. 10]**

**§ 334-62. Subdivision identification signs.**

Signs identifying residential subdivisions are subject to the following requirements:

- A. One double-faced or two single-faced unlit signs are permitted at the primary entrance to a subdivision. Dimensions and appearance are to be determined by the Planning Board. **[Amended 3-14-1995 by Amdt. No. 11]**
- B. Only the name of the subdivision, address, any associated symbols or graphics may appear on the sign.

**§ 334-63. Business and industrial building signs.**

Except as otherwise permitted in this article, each individual business may have either one wall, roof-mounted or projecting sign attached to the building within which the business is located subject to the following requirements. The building sign may be implemented in the form of an awning sign.

- A. Maximum size, single-tenant buildings. The maximum sign area, measured in square feet, is 20% of the total area of the building facade upon which the sign is attached or an area equivalent to two times the building frontage, whichever is less.
- B. Maximum size, multitenant buildings. The maximum sign area, measured in square feet, for multitenant buildings is equivalent to two times the building frontage of the individual business.

- C. All signs attached to multitenant buildings shall be of uniform type and height.
- D. No sign may be erected so that its height exceeds the peak of the roof of the building to which it is attached.
- E. Each individual business may have one additional wall or projecting sign to identify side or rear entrances which provide access directly to the business, provided that the size of the additional sign does not exceed 50% of the size of the business principal sign. **[Amended 3-10-2009 by Amdt. No. 2]**

#### **§ 334-64. Freestanding business and industrial signs.**

Except as otherwise permitted in this article, each individual site may have no more than one freestanding pole or ground sign, not attached to any building, subject to the following requirements:

- A. Maximum size: one square foot for each linear foot of road frontage up to a maximum of 100 square feet.
- B. Corner lots or parcels which otherwise abut two public rights-of-way may have one additional freestanding pole or ground sign identifying a side or rear entrance to the site, provided that the size of the additional sign does not exceed 50% of the size of the site's principal sign.
- C. Electronic changing signs are allowed only as a component of a freestanding sign and shall conform to the following minimum requirements along with all other requirements for freestanding signs within the sign ordinance: **[Added 3-9-2010 by Amdt. No. 2]**

- (1) Definitions relevant to electronic changing signs:

**BRIGHTNESS** — Also known as "intensity"; the LED Industry measures display intensity in candelas per square meter, which is also referred to as "NITS."

**DIMMING** — The ability to increase or decrease the overall display intensity brightness.

**DIODE** — Also called "light-emitting diode" (LED) or "surface-mounted diode" (SMD).

**LED (LIGHT-EMITTING DIODE/SMD)** — A solid-state component that uses a semiconductor (a silicon chip or some type of semiconductor) that emits visible light when electric current passes through it.

**LUMINANCE** — The amount of light that passes through or is emitted from a particular area. The SI unit for luminance is candela per square meter.

**NIT or NITS** — A luminance-measuring unit equal to one candela (one candle) per square meter measured perpendicular to the rays from the source.

**SI UNIT** — An abbreviation for the International System of Units.

**TEXT** — Any form in which writing exists.

- (2) No more than one electronic changing sign shall be allowed per lot.

- (3) Electronic changing signs shall not exceed 50% of the area of a freestanding sign or 50 square feet, whichever is smaller. Electronic changing signs shall be restricted to a maximum of four lines of text or message display, and text shall be restricted to a maximum of 10 inches in height.
- (4) Electronic changing signs shall be required to have a minimum of 150 feet between other electronic changing signs located on the same side of a street or roadway.
- (5) Electronic changing signs shall be allowed only on lots with a minimum street frontage in accordance with the Table of Minimum Dimensional Requirements.<sup>14</sup>
- (6) Electronic changing signs shall be located a minimum of 200 feet from any residential dwelling unit.
- (7) The portion of a freestanding sign that contains an electronic changing sign component shall only be operated during the hours the business associated with the electronic changing sign is open.
- (8) All illumination elements on the face of electronic changing signs shall remain at a fixed level of illumination for a period of not less than 15 minutes.
- (9) All text and message displays of an electronic changing sign shall fade onto and off of the electronic message display area, statically and uniformly, at a rate of change of no more than two seconds.
- (10) Electronic changing signs shall be equipped with automatic dimming controls, so the brightness level will be highest during the day and lowest at night. Manufacturer specifications shall be submitted at the time of sign permit specifying maximum sign brightness. The maximum brightness shall not exceed 8,000 NITS with a maximum nighttime reading not to exceed 20% of the sign's maximum brightness.
- (11) Under the provisions of this subsection, the applicant for a sign permit for an electronic changing sign shall provide with the application an affidavit, sworn or attested by the landowner, applicant and sign installer, attesting to the fact that:
  - (a) The sign to be installed meets all of the criteria set forth in the subsection; and
  - (b) That the sign shall operate in a manner consistent with the criteria set forth in this subsection; and
  - (c) The landowner and applicant agree to be held liable, separately or collectively, if these provisions are not met, for any fines or cost incurred by the Town of Hudson to enforce these provisions arising from such violations. This provision shall not be construed to supersede any other responsibility or remedy for such violations set forth in this chapter.

---

14. Editor's Note: The Table of Minimum Dimensional Requirements is included at the end of this chapter.

**§ 334-65. Industrial park signs/business park. [Amended 3-8-1994 by Amdt. No. 4]**

An industrial park sign will be permitted along a public right-of-way, in addition to other signage, for the purpose of project identification at the entrances to large-scale developments. The industrial park sign is permitted in addition to other signage.

- A. Maximum sign area shall be 225 square feet for one sign. If one sign cannot be used to identify the project, because of sign location, two signs may be used. In this case each sign may not exceed 100 square feet for each of the two signs.
- B. Minimum setback shall be 25 feet. The sign setback may be reduced by special exception where it can be demonstrated that conditions of the site (e.g., slope, topography, site layout, proximity to limited access arterial roadways, unusual soils or vegetation, etc.) necessitate an exception to the requirements. Issues relative to sight distance and safety shall not be adversely impacted. Proposed signage shall be incorporated into any previously approved landscape or site plan.

**§ 334-66. Institutional signs.**

Except as otherwise permitted in this article, signs associated with noncommercial institutions such as churches, schools, membership clubs and other similar institutions are subject to the following requirements:

- A. Institutions in residential districts may have one freestanding sign, a maximum of 12 square feet in area.
- B. Signs associated with institutions located in all other districts shall comply with the requirements of §§ 334-63 and 334-64 for business and industrial signs.

**§ 334-67. Home occupation signs.**

Except as otherwise permitted in this chapter, each home occupation may have no more than one exterior sign subject to the following requirements:

- A. Maximum size. The maximum sign area is three square feet.
- B. Maximum height. Freestanding pole or ground signs may not exceed eight feet in height.
- C. If the home occupation is carried out in an accessory structure which is set back more than 100 feet from the nearest public right-of-way, an additional sign of two square feet or less may be attached to the accessory structure.
- D. Signs which are not attached to a building must be set back from the right-of-way a minimum of 15 feet.

**§ 334-68. Directional and directory signs.**

Directional or directory signs, other than those excluded under § 334-58B(3), are permitted with a permit but are not considered to be freestanding or building signs for the purposes of this article, provided that they are no greater than three square feet in area and do not contain any additional advertising or messages other than incidental corporate

or institutional symbols or logos.

**§ 334-69. Area and dimensional calculations.**

- A. Area. The area of a sign is considered to be the entire face of a sign or largest single side of a freestanding or projecting sign, including the perimeter or framing which forms the outside shape of the sign. In the absence of a clear perimeter or border, the area of the sign is calculated by enclosing the entire area within which letters, symbols or graphics are contained within an easily recognized geometric shape. Round, three-dimensional or irregularly shaped signs are calculated based on a flat cross section of the broadest portion of the sign. All appendages or riders are calculated within the area of the sign to which they are appended.
- B. Height. The height of a sign is the vertical distance measured from the adjacent undisturbed grade of the sign to the highest point of the sign.

## ARTICLE XIII

**Housing for Older Persons**

**[Amended 3-14-1995 by Amdt. No. 12; 3-13-2001 by Amdt. No. 6; 3-9-2004 ATM, Art. 5; 9-12-2006 by Amdt. No. 1]**

**§ 334-70. Applicability; purpose.**

- A. Housing planned specifically for older persons, in the form of multiple attached units or detached units, as defined as "Housing for Older Persons," in NHRSA 354-A:15 (I), (II), and (III), as the same may be, from time to time, amended, may be developed only in the R-2, TR and G Districts, in accordance with the provisions of this article.
- B. Purpose: to provide affordable alternative housing for the older persons population.

**§ 334-71. Lot size.**

- A. For housing which conforms to the definition of "housing for older persons," in NHRSA 354-A:15(II), as same may be from time to time amended, the minimum buildable land area shall be 7,500 square feet per bedroom and shall have Town water and Town sewer. For housing which conforms to the definition of "housing for older person," in NHRSA 354-A:15(III), as same may be from time to time amended, the minimum buildable land area shall be 10,000 square feet per bedroom and shall have Town water and Town sewer. Further, the maximum building ground coverage of each older persons housing development shall not exceed 20% of the tract and 3,000 square feet, per unit. In addition, all such housing shall conform to the following additional standards:
  - (1) Each dwelling unit shall have no more than two bedrooms, and shall be specifically designed for occupancy by older persons.
  - (2) The occupancy of units within the development shall be limited to family units in which the head of household or spouse is at least 55 years old.
  - (3) The minimum tract area shall be 10 acres and the tract shall have at least 200 feet of frontage on a public road.
  - (4) The development shall, where possible, make provision for on- or off-site pedestrian access to the various community facilities.
  - (5) Emergency vehicle access shall be provided to all structures.
- B. For the purposes of this section, single-room or efficiency units are considered to be one bedroom.
- C. Units are to be no less than 600 square feet.
- D. Parking spaces shall be calculated as 1.4 spaces per unit.

**§ 334-72. Buffers and screening.**

The Planning Board may require sufficient landscaped or naturally vegetated buffers for adjacent uses. Buffers shall be maintained to provide continued screening.

**§ 334-73. Planning Board approval of site plan required.**

Planning Board approval of the site plan is required. The Planning Board may adopt specific regulations for reviewing older persons housing development site plans.

ARTICLE XIII  
ACCESSORY DWELLING UNITS

[Added 3-14-1995 by Amdt. No. 16; amended 3-14-2006 by Amdt. No. 3; 3-16-2017  
by Art. No. 5]

**§ 334-73.1. (Reserved)**

**§ 334-73.2. Purpose.**

The purpose of this article is to increase the supply of affordable housing in the Town without the need for more infrastructure or further land development, while maintaining aesthetics and residence use compatible with homes in the neighborhood.

**§ 334-73.3. Provisions.**

An ADU shall be permitted in zoning DISTRICTS that permit single-family dwellings, and only in accordance with the following provisions:

- A. An ADU is allowed only in single-family dwellings. An ADU is not allowed in two- or multifamily dwellings or in any nonresidential uses.
- B. An ADU is not allowed as a freestanding detached STRUCTURE or as part of any STRUCTURE which is detached from the principal dwelling. MANUFACTURED HOUSING, RECREATIONAL VEHICLES or trailers may not be erected or added to the principal dwelling as an ADU.
- C. Either the principal DWELLING UNIT or the ADU must be occupied by the owner of record of the principal dwelling. Upon request of the Zoning Administrator or other official with the authority to enforce this ordinance, the owner of record shall demonstrate that one of the units is his or her principal place of residence.
- D. The front face of the principal dwelling STRUCTURE is to appear as a single-family dwelling after any alterations to the STRUCTURE are made to accommodate an ADU. Any additional separate entrances must be located on the side or rear of the STRUCTURE.
- E. At least one common interior access between the principal DWELLING UNIT and an ADU must exist. Two external means of egress (common or separate) from both a principal DWELLING UNIT and an ADU must exist.
- F. Separate utility service connections and/or meters for the principal DWELLING UNIT and an ADU shall not exist. (This does not preclude using a type of heating system for an ADU different from the type for the principal DWELLING UNIT.) Separate service connections for common areas shall be as required by building and electrical codes.
- G. A minimum of four off-street paved parking spaces shall be provided to serve the combined needs of the principal DWELLING UNIT and an ADU. There shall not be a separate driveway for the ADU.
- H. The size of an ADU shall not be less than 350 square feet nor greater than 750 square feet. The size of the principal dwelling shall not be reduced to less than 850

square feet in order to accommodate the creation of an ADU. Measurement of size shall be consistent with Town Assessor's practices. **[2-2-2019 ATM, Art. 05, adopted 3-12-2019]**

- I. An ADU shall not have more than two bedrooms.
- J. A building permit for an ADU must be approved and issued prior to the construction of an ADU or conversion of existing space into an ADU.
- K. The house number for the ADU shall be the same as that of the primary DWELLING UNIT, and there shall not be a separate mailbox for the ADU.
- L. Multiple ADUs are not permitted on any LOT in any DISTRICT.
- M. The maximum number of unrelated persons occupying an ADU shall not exceed two.
- N. An ADU shall have an interconnected fire alarm system with the principal DWELLING UNIT.
- O. An ADU shall make provision for adequate water supply and sewage disposal in compliance with RSA 485-A: 38 and regulations adopted by the New Hampshire Department of Environmental Services, but separate systems shall not be required for the principal STRUCTURE and ADU. Verification of compliance with RSA 485-A:38 shall be filed with the Town prior to issuance of a building permit. **[2-2-2019 ATM, Art. 05, adopted 3-12-2019]**

**§ 334-73.4. (Reserved)**

**§ 334-73.5. Procedural requirements.**

An ADU application submitted under the auspices of this article shall include: an accurate copy of the plan, which shall denote, describe and/or identify the intended ADU area. The application shall be submitted to the TOWN Zoning Administrator for determination as to its compliance with this article.

**§ 334-73.6. Minimum lot dimension requirements.**

An ADU shall not be considered an additional DWELLING UNIT for the purposes of determining minimum dimensional requirements of a principal dwelling LOT. An ADU shall be allowed to exist in a principal dwelling on a legal nonconforming lot so long as all provisions of this article can be satisfied. An ADU shall comply with all setback requirements.

**§ 334-73.7. Enforcement authority.**

The Zoning Administrator shall be the final authority on compliance and enforcement issues of this article.

ARTICLE XIV  
**Impact Fees**  
**[Amended 3-12-1996]**

**§ 334-74. (Reserved)<sup>15</sup>**

**§ 334-74.1. Applicability of article.**

- A. This article, as well as regulations and studies adopted by the Planning Board consistent with and in furtherance of this article, shall govern the assessment of fees imposed upon development, including subdivision, building construction or other land use change, in order to meet the needs occasioned by that development for the construction or improvement of capital facilities owned or operated by the municipality, including and limited to water treatment and distribution facilities; waste water treatment and disposal facilities; sanitary sewer; stormwater, drainage and flood control facilities; public road systems and rights-of-way; municipal office facilities; public school facilities; the municipality's proportional share of capital facilities of a cooperative or regional school district of which the municipality is a member; public safety facilities; solid waste collection, transfer, recycling, processing and disposal facilities; public library facilities; and public recreational facilities not including public open space. This article is authorized by New Hampshire RSA 674:21, as an innovative land use control.
- B. The Town of Hudson's Master Plan and Capital Improvements Program have incorporated Town-wide transportation, library, school and recreation expansion plans which identify corresponding capital improvement needs. New development shall be assessed a proportional share of the municipal capital improvement costs which are reasonably related to the capital needs created by the development referenced above and to the benefits accruing to the development from the capital improvements financed by the fee. New development shall be assessed a proportional share of new improvement costs, insofar as new growth places an increased burden on the municipality's capital facilities, including library, school, recreation and transportation facilities. In the future, the Hudson Planning Board may adopt studies and regulations which provide for the assessment of an impact fee upon development with respect to any of the other enumerated capital facilities owned or operated by the municipality for which an impact fee is not presently assessed, but upon which a fee may be lawfully assessed.

**§ 334-74.2. Definitions.**

As used in this article, the following terms shall have the meanings indicated:

**FEEPAYER** — The person, whether individual or corporate, who pays an impact fee in conjunction with the issuance of a building permit or occupancy permit.

**NEW DEVELOPMENT** — The subdivision, building construction or other land use change which results in:

- A. A net increase in the capital facilities service demands as identified in the Planning

---

15. Editor's Note: Former § 334-74, Statutory authority, was superseded by §§ 334-74.1 through 334-74.12, adopted 3-12-1996.

Board's impact fee schedules; or

- B. The conversion of a legally existing use to another use or activity which created an increase in capital facilities service demands.

**§ 334-74.3. Imposition of roadway improvement impact fee.**

- A. Any person who seeks to commence new development in the Town of Hudson shall pay an impact fee in the manner and amount set forth in § 334-74.4.
- B. A person may request a full or partial waiver of impact fee payments from the Planning Board if the Board agrees to accept as equivalent value, proposed contributions of land, easements or other improvements. The value of on-site or off-site improvements which are required by the Planning Board as a result of subdivision or site plan review, and which would have to be completed by the developer regardless of the impact fee regulations, shall not be considered eligible for waiver under this article.
- C. Impact fees shall be computed on a fair-share basis, public share and private share.

**§ 334-74.4. Computation of impact fee.**

- A. The amount of the impact fee shall be determined by an Impact Fee Schedule prepared in accordance with the methodology adopted by the Planning Board.
- B. In the case of new development created by the conversion or modification of an existing use, the impact fee shall be based upon the net increase in capital facilities service demands arising from the new use as compared to that which was or would have been assessed upon the previous use.

**§ 334-74.5. Assessment and payment of impact fee. [Amended 3-8-2005 by Amdt. No. 1]**

Impact fees shall be assessed by the Planning Board at the time of subdivision or site plan approval, and shall be stated in the Board's Notice of Decision. When no Planning Board approval is required, impact fees shall be assessed prior to, or as a condition for the issuance of, a building permit or other appropriate permission to proceed with development. Impact fees shall be collected at the time a certificate of occupancy is issued. If no certificate of occupancy is required, impact fees shall be collected when the development is ready for its intended use. The Planning Board and the developer or feepayer may agree on an alternate, mutually acceptable schedule of impact fees payments. If an alternate schedule of payment is established, the Town may require the posting of a bond or issuance of a letter of credit to guarantee future payment of the assessed impact fees.

**§ 334-74.6. Appeals.**

- A. If a feepayer elects to dispute the amount of the impact fee, the feepayer may prepare and submit to the Planning Board an independent fee calculation study for the new development activity which is proposed. The Planning Board shall review such study and render a decision. All costs incurred by the Town for the review of such study shall be paid by the feepayer.

- B. The decision of the Planning Board may be appealed to the Superior Court as provided by RSA 677.15.

**§ 334-74.7. Administration of funds collected.**

- A. All funds collected shall be properly identified and promptly transferred for deposit in individual impact fee accounts for each of the projects for which fees are assessed and shall be used solely for the purpose specified. Impact fee accounts shall be special revenue funds accounts and under no circumstances shall such revenues accrue to the general fund.
- B. The Town Finance Department shall have custody of all fee accounts and shall pay out the same only upon written approval of the Board of Selectmen.
- C. The Town Finance Department shall record all fees paid, by date of payment and the name of the person making payment, and shall maintain an updated record of the current ownership, Tax Map and lot reference number of properties for which fees have been paid under this article for a period of at least six years.

**§ 334-74.8. Refund of fees paid.**

For plans which received application acceptance after July 1, 1993, and in conjunction therewith had an impact fee imposed as a condition of Planning Board approval, the person who paid the impact fee shall be entitled to a refund of that fee, plus accrued interest where:

- A. The impact fee has not been encumbered or legally bound to be spent for the purpose for which it was collected within a period of six years from the date of the complete payment of the fee; or
- B. The calculation of an impact fee has been predicated upon some portion of capital improvement costs being borne by the municipality, and the legislative body has failed to appropriate the municipality's share of the capital improvement costs within six years from the complete payment of the impact fee.

**§ 334-74.9. Credits.**

- A. Land and/or public capital facility improvements may be offered by the feepayer as total or partial payment of the required impact fee. The offer must be determined to represent an identifiable dollar value computed in a manner acceptable to the Planning Board. The Planning Board may authorize the feepayer an impact fee credit in the amount of the value of the contribution.
- B. Any claim for credit must be made prior to the Planning Board vote on subdivision/site plan approval or disapproval.
- C. Credits shall not be transferable, and run only with a specific subdivision or site plan approval.
- D. Credits shall not be transferable from one type of the public capital facilities impact fee to any other impact fee type.
- E. Determinations made by the Planning Board pursuant to the credit provisions of

this section may be appealed to the Superior Court in accordance with RSA 677:15.

**§ 334-74.10. Additional assessments.**

Payment of an impact fee does not restrict the Town or the Planning Board from requiring other payments from the feepayer, including such payments relating to the cost of the extensions of water and sewer mains or the construction of roads or streets or other infrastructure and facilities specifically benefiting the development which are required by the subdivision or site plan review regulations or as otherwise permitted by law.

**§ 334-74.11. Premature and scattered development.**

Nothing in this article shall be construed to limit the existing authority of the Hudson Planning Board to deny new proposed development which is scattered or premature, to require an unbudgeted expenditure of public funds or to otherwise violate the Town of Hudson Zoning Ordinance or the Hudson Planning Board Site Plan Review Regulations or Subdivision Regulations.<sup>16</sup>

**§ 334-74.12. Review of schedule.**

The Impact Fee Assessment Schedule shall be reviewed annually by the Planning Board, using the methodology established. Such review may result in recommended adjustments in one or more of the fees based on the most recent available data regarding current construction cost information.

---

16. Editor's Note: See Ch. 275, Site Plan Review, and Ch. 289, Subdivision of Land, respectively.

ARTICLE XV  
**Enforcement and Miscellaneous Provisions**

**§ 334-75. Severability.**

The invalidity, unconstitutionality or illegality of any article, section or provision of this chapter or of any zoning district or boundary shown on the Zoning Map shall not have any affect upon the validity, constitutionality or legality of any other article, section, provision, zoning district or zoning district boundary.

**§ 334-76. Authorization to administer and enforce chapter.**

It is the authority of the Board of Selectmen to administer and enforce this chapter.

**§ 334-77. Zoning Administrator.**

The Board of Selectmen may appoint a Zoning Administrator to administer and enforce this chapter under its general supervisory authority.

**§ 334-78. Building Inspector.**

The Board of Selectmen may appoint a Building Inspector, who shall be the administrative officer charged with the duty of administering and enforcing all codes adopted by the Town that relate to building/structure construction and reconstruction, subject to the general supervisory authority of the Board of Selectmen. Nothing in this provision shall affect any provision contained in the New Hampshire Revised Statutes Annotated that pertains to Building Inspectors.

**§ 334-79. Violations and penalties. [Amended 3-14-2006 by Amdt. No. 2]**

The Town is empowered to pursue violations to this chapter by means of any of the equitable or legal remedies available in state statute, including but not limited to the injunctive relief provision set forth in RSA 676:15; the fines and penalties provision set forth in RSA 676:15; the fines, penalties and award of attorney's fees as set forth in RSA 676:17; the provisions for cease and desist orders as set forth in RSA 676:17-a; the provisions for local land use citations and pleas by mail as set forth in RSA 676:17-b; and such other enforcement or penalty provisions which may be enacted by the New Hampshire Legislature.

**§ 334-80. Board of Adjustment.**

The Zoning Board of Adjustment (ZBA) is established under this chapter in accordance with RSA 673:3.

**§ 334-81. Appeals.**

Any person aggrieved by a decision of the Zoning Administrator or other officer of the Town charged with administering this chapter may appeal to the ZBA. Such an appeal must be made within 30 days from the date of the order or decision complained of, in writing addressed to the Clerk of the ZBA.

**§ 334-82. Time limit. [Added 3-14-1995 by Amdt. No. 13]**

- A. A grant of a variance or special exception by the Hudson Zoning Board of Adjustment shall be valid if exercised within a period of two years following the vote of approval by the Zoning Board of Adjustment. **[Amended 3-13-2018 ATM by Amdt. No. 4]**
- B. If subsequent Planning Board action is needed before work or activity may be commenced pursuant to the variance or special exception, the applicant or his/her successor in interest must gain application acceptance by the Hudson Planning Board within six months of the ZBA vote of approval regarding the granting of the special exception or variance in order to stay the two-year limitation period set forth in Subsection A above. The term "application acceptance" is defined pursuant to Planning Board regulation and the New Hampshire Revised Statutes Annotated. **[Amended 3-13-2018 ATM by Amdt. No. 4]**
- C. For variances or special exceptions which require subsequent Planning Board review and which have gained application acceptance within six months of the original variance or special exception vote of approval, the variance or special exception shall be valid for a period of two years from the Planning Board vote to give conditional or final approval to the applicant's plan, unless active and substantial development or building has begun on the site in accordance with the terms of the approved plan. If conditional approval precedes final approval, the two-year time period shall run from the vote of conditional approval. **[Amended 3-13-2018 ATM by Amdt. No. 4]**
- D. For variances or special exceptions which do not require subsequent Planning Board review, all variances and special exceptions shall expire within two years of the vote of approval as specified in Subsection A above, unless active and substantial development or building has begun on the site in accordance with the special exception, variance or building permit or the variance or exception granted from the terms of this chapter has been otherwise exercised by the applicant or successor in interest. **[Amended 3-13-2018 ATM by Amdt. No. 4]**
- E. If an applicant who has been granted a variance or special exception fails to gain Planning Board application acceptance within six months of the vote of approval for the special exception or variance, the applicant shall not gain any exemption for the running of the two-year time period which governs the grant of a variance or special exception. **[Amended 3-13-2018 ATM by Amdt. No. 4]**
- F. Any request for an extension or renewal of a variance or special exception shall follow the same procedure required for the original appeal: the applicant must fill out a new application, pay a new set of fees in accordance with the fee policy in effect at the time and then bring the matter before the ZBA for a full hearing and review in accordance with the New Hampshire Revised Statutes Annotated, this chapter and the bylaws of the Hudson Zoning Board of Adjustment. Extensions and renewals shall be subject to the statutes, this chapter, regulations and ZBA bylaws in effect at the time of the renewal/extension application. Extensions and renewals are disfavored. A renewal/extension application shall be made no sooner than 90 days prior to the date of expiration and no later than 30 days prior to the variance or special exception expiration.

- G. The Zoning Board of Adjustment may impose reasonable fees upon applicants for the expense of consulting services, investigative studies, review of documents and any other matters that may be required for a particular application. Any such fee shall be subject to the provisions of RSA 673:16. [**Amended 3-8-2005 by Amdt. No. 2**]

ARTICLE XVI  
**Flood Hazard Areas**  
**[Added 3-14-1995 by Amdt. No. 14]**

**§ 334-83. Incorporation of provisions by reference.**

Flood hazard area regulation as described in Chapter 218 of the Code of the Town of Hudson is incorporated by reference as part of this chapter.

ARTICLE XVII  
**Sexually Oriented Businesses**  
[Added 3-9-1999; readopted 3-13-2001 by Amdt. No. 7]

**§ 334-84. Purpose and intent.**

It is the purpose of this article to establish reasonable and uniform regulations to prevent the concentration of sexually oriented businesses within the Town of Hudson; and, it is the intent to promote the health, safety and general welfare of the citizens of the Town of Hudson; and, it is the intent of this article that the regulations be utilized to prevent problems of blight and deterioration which accompany and are brought about by the concentration of sexually oriented businesses; and, the provisions of this amendment have neither the purpose nor the effect of imposing limitation or restriction on the content of any communicative materials, including sexually oriented materials; and, it is not the intent nor effect of this article to restrict or deny access by adults to sexually oriented materials protected by the First Amendment of the United States Constitution, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market; and, neither is it the intent nor effect of this article to condone or legitimize the distribution of obscene material.

**§ 334-85. Permitted locations.**

The establishment of sexually oriented businesses shall only be permitted in the Industrial Zone, provided all regulations, requirements and restrictions pertaining to that zone are met, and the establishment of sexually oriented businesses shall not be permitted within 500 feet of a church or place of worship, parish house or convent; a public, parochial or private school; a state-approved day-care center; another sexually oriented business; a sexually oriented business for which a building permit has been applied for; a residence; any business in which minors constitute more than 50% of the patrons; a public park, recreation or sports facility; Town boundaries; or buildings owned by the Town of Hudson and operated for government use. The word "establishment," as used in this section, shall mean and include either the opening or commencement of any sexually oriented business as a new business or the conversion of an existing business, whether or not a sexually oriented business, to any use included within the definition of a sexually oriented business.

**§ 334-86. Setback distance.**

The setback distance between any sexually oriented business and any protected use shall be 500 feet, measured from the property line of the protected use to any existing (or proposed) parking lot or structure of the sexually oriented business.

**§ 334-87. Site plan approval.**

Site plan approval by the Hudson Planning Board shall be a prerequisite for the establishment of a sexually oriented business. The Planning Board may impose reasonable restrictions relative to buffers, outdoor lighting, signs, parking, egress and ingress, pedestrian movement, landscaping, building aesthetics and measures to ensure that displays of merchandise conform with NH RSA 571-B.

**§ 334-88. Public nuisance per se.**

Violation of the use provisions of this article is declared to be a public nuisance per se, which shall be abated by the Town by way of civil abatement procedures.

**§ 334-89. Limiting clause.**

Nothing in this article is intended to authorize, legalize or permit the establishment, operation or maintenance of any business, building or use which violates any Town of Hudson ordinance or statute of the State of New Hampshire regarding public nuisances, sexual conduct, lewdness or obscene or harmful matter or the exhibition or public display thereof.

**§ 334-90. Severability.**

If any section, subsection, sentence, clause, phrase or any portion of this article is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this article. The legislative body of the Town of Hudson hereby declares that it would have adopted this article and each section, subsection, sentence, clause, phrase or portion thereof irrespective of the fact that any one or more sections, subsections, sentences, clauses, phrases or portions be declared invalid or unconstitutional.

ARTICLE XVIII  
**Commercial Wireless Telecommunication, Radio Service and Receive-Only  
Facilities**  
**[Added 3-9-1999]**

**§ 334-91. Scope.**

The scope of this article is to promulgate regulations which address the different operating environments of commercial wireless telecommunication facilities, receive-only facilities and radio service facilities identified pursuant to the applicable federal law and Code of Federal Regulations, adopted pursuant thereto.

**§ 334-92. Purpose: commercial wireless telecommunication facilities.**

In recognition of the federal Telecommunications Act of 1996, this article is designed and intended to balance the interests of the residents of Hudson, telecommunication providers and telecommunication customers in the siting of wireless telecommunication facilities within the Town of Hudson; so as to ensure coordinated development of telecommunication infrastructure while preserving the legitimate need to protect the health, safety and welfare of the Town, its residents and visitors. This article establishes general guidelines for the siting of commercial wireless telecommunication facilities, towers and antennas to enhance and fulfill the following goals:

- A. Preserve the authority of Hudson to regulate and to provide for reasonable opportunity for the siting of commercial wireless telecommunication facilities by enhancing the ability of providers of telecommunication services to provide such services to the community quickly, effectively and efficiently;
- B. Reduce adverse impacts such facilities may create, including, but not limited to, impacts on aesthetics, environmentally sensitive areas, historically significant locations, flight corridors, health and safety by injurious accidents to person and property, and prosperity through protection of property values;
- C. Provide for co-location and minimal impact siting options through assessment of technology, current location options, future available locations and innovative siting techniques;
- D. Permit the construction of new towers only where all other reasonable opportunities have been exhausted; and to encourage the users of towers and antennas to configure them in a way that minimizes the adverse visual impact of the towers and antennas;
- E. Require cooperation and co-location, to the highest extent possible, between competitors in order to reduce cumulative negative visual and property value impacts upon the Town;
- F. Provide maintenance and safety inspections for any and all facilities;
- G. Provide for the removal of abandoned facilities that are no longer inspected for safety concerns and Building Code compliance; provide a mechanism for the Town to remove these abandoned facilities to protect the citizens from imminent harm and danger;

- H. Provide for the removal or upgrade of facilities which are technologically outdated; and
- I. Provide for the protection of the environment and open space; and preserve community character, scenic vistas and historic heritage.

**§ 334-93. Definitions.**<sup>17</sup>

As used in this article, the following terms shall have the meanings indicated:

**ALTERNATIVE FACILITIES/TECHNOLOGIES** — Innovative siting techniques for use with commercial wireless telecommunication facilities such as artificial trees, clock towers, bell towers, steeples, light poles and similar alternative design mounting structures which camouflage or conceal the presence of antennas, towers or facilities; as well as utility pole and cable-based technologies. **[Added 3-9-1999]**

**ANTENNA** — The radiating system used to perform or achieve (transmit and/or receive) the desired communication or telecommunication service. An "integrated antenna array" means multiple coordinated radiating elements. **[Added 3-9-1999]**

**CO-LOCATION** — The placement of more than one antenna or integrated antenna array on a supporting structure, and appurtenant equipment and devices on the supporting structure and/or ground, necessary to perform or achieve a desired telecommunication service or radio service which is discrete from any other telecommunication or radio service(s) located on the same supporting structure. **[Added 3-9-1999]**

**COMMERCIAL WIRELESS TELECOMMUNICATION FACILITY** — Any structure, antenna, tower or other device used to provide a discrete commercial telecommunication service by a single provider to a broad base of usually unrelated users; generally including, but not limited to, cellular telephone, personal communications services (PCS), specialized mobile radio (SMR), enhanced specialized mobile radio (ESMR) and paging. **[Added 3-9-1999]**

**GUY WIRE** — A cable-type appurtenant device which is used to secure and steady a tower or mast; and includes all hardware which attaches the cable to the tower or mast and to the ground. **[Added 3-9-1999]**

**HEIGHT** — The distance measured from the ground, or some other alternatively specified point, up to the highest point of an antenna or a supporting structure. **[Added 3-9-1999]**

**MAST** — A structure which is designed and constructed to support one or more antennas used by radio service and/or receive-only facilities and includes all appurtenant devices attached to it. A mast can be of "lattice" construction having a diameter of no more than one foot which is freestanding (solely self-supported by direct attachment to the ground), supported (attached to the ground directly and with guy wires), anchored (attached to the ground directly and to some other substantial structure such as a building) and anchored/supported (attached directly to the ground and some other substantial structure and with guy wires to the ground and/or some other substantial structure); or it can be of "pipe" construction having a diameter of no more than four inches which is supported solely by direct attachment to a substantial structure such as a building. **[Added 3-9-1999]**

---

17. Editor's Note: See also § 334-6, Definitions, for general definitions pertaining to this chapter.

**MONOPOLE** — A freestanding tower consisting of a single pole, constructed without guy wires or lattice characteristics, which relies solely on self-support (direct attachment to the ground) to remain upright.**[Added 3-9-1999]**

**PREEXISTING TOWERS, MASTS AND ANTENNAS** — Any tower, mast or antenna lawfully constructed or permitted prior to the adoption of this article. Also, any tower, mast or antenna lawfully constructed in accordance with this article which predates an application currently before the Town.**[Added 3-9-1999]**

**RADIO SERVICE FACILITY** — Any structure, antenna, mast or other radio installation device used to achieve desired communication(s) by a user with a narrow base of related or unrelated users; generally including, but not limited to, amateur radio service, general mobile radio service, citizens band radio service, low-power radio service, aeronautical and marine communications and any other similar radio communications or service which is not specifically named within this definition.**[Added 3-9-1999]**

**RECEIVE-ONLY FACILITY** — Any antenna, mast or other device designed and constructed with the intent to receive broadcast signals typically for household use; including, but not limited to, personal satellite and off-the-air television signals and AM, FM, shortwave and other similar radio signals.**[Added 3-9-1999]**

**SECONDARY USE** — A use of land or of a building or of a portion thereof which is unrelated to the principal use of the land or building.**[Added 3-9-1999]**

**TOWER** — A structure which is designed and constructed to support one or more antennas used by commercial wireless telecommunication facilities and includes all appurtenant devices attached to it. A tower can be freestanding (solely self-supported by attachment to the ground) or supported (attached directly to the ground and with guy wires) of either lattice or monopole construction.**[Added 3-9-1999]**

#### **§ 334-94. Applicability.**

- A. Public property. Antennas, towers or facilities situated on property owned, leased or otherwise controlled by the Town may be exempt from the requirements of this article; except that uses are only permitted in the districts and areas delineated within § 334-96. This partial exemption shall be available if a license or lease authorizing the antenna, tower or facility has been approved by the governing body and the governing body elects, subject to state law and local ordinance, to seek the partial exemption from this article.
- B. Essential services and public utilities. Commercial wireless telecommunication facilities shall not be considered essential services, infrastructure or public utilities as defined or used elsewhere in the Town's ordinances and regulations. Siting for commercial wireless telecommunication facilities is a use of land and is subject to the Town's Zoning Ordinance and all other applicable ordinances and regulations.

#### **§ 334-95. Siting standards.**

General provisions: The uses listed within this section are deemed to be permitted uses in the designated district in accordance with all other applicable ordinances and regulations of the Town, including site plan review and approval by the Hudson Planning Board.

- A. Commercial wireless telecommunication facilities may be considered either principal or secondary uses. A different existing use or an existing structure on the same lot shall not preclude the installation of a commercial wireless telecommunication facility on such a lot.
- B. For purposes of determining whether the installation of a commercial wireless telecommunication facility complies with district development standards, the dimensions of the entire lot shall control, even though the facility may be located on leased parcels within such lots.
- C. A commercial wireless telecommunication facility which is constructed in accordance with the provisions of this article on a nonconforming lot, or in conjunction with a nonconforming use, shall not be deemed to constitute the expansion of a nonconforming use or structure.
- D. Towers shall not exceed 180 feet in height above the ground. In all cases, a tower's maximum height shall be the minimum height above the ground necessary to perform or achieve the desired communication(s) or telecommunication service(s). Co-location is considered to be within the definition of a desired communication or telecommunication service.
- E. An RF Engineering/Facilities Master Plan shall be submitted for review to include present and future network infrastructure in both Hudson and abutting communities. The lay person shall be able to easily understand the Master Plan and supporting documentation. It shall explain sufficiently why the tower must be in this location. With the exceptions of alternative facilities/technologies, which do not have visible outdoor equipment, and telecommunication facilities placed on existing utility poles, site plan approval is required for all commercial wireless telecommunication facilities, including any such facilities situated on residential sites. **[Amended 3-4-2000]**
- F. The FCC regulates radio frequency (RF) emissions, and local jurisdictions are preempted from prohibiting the construction of commercial wireless telecommunication facilities on the basis of exposure to RF emissions. Owners/operators of commercial wireless telecommunications facilities shall construct such facilities in accordance with FCC regulations pertaining to RF emissions.

**§ 334-96. (Reserved).<sup>18</sup>**

**§ 334-96.1. Districts where conditionally permitted. [Added 3-13-2007 by Amdt. No. 6]**

The goals of this section of this article are to minimize visual blight to nearby property abutters and users of the Town's principal corridors, minimize adverse value impacts to abutters, protect the environment and open space and preserve historic heritage, community character and scenic beauty, while reasonably accommodating desired communication(s) or commercial wireless telecommunication service(s) and encouraging co-location of facilities. The maximum tower height of a commercial

---

18. Editor's Note: Former § 334-96, Districts permitted, was repealed 3-13-2007 by Amdt. No. 6. See now §§ 334-96.1 and 334-96.2.

wireless telecommunication facility shall be 180 feet above the ground. In all cases, a tower's maximum height shall be the minimum height above the ground necessary to perform or achieve the desired commercial wireless telecommunication service(s).

- = not conditionally permitted (variance required)						

**§ 334-96.2. Conditional use permit required. [Added 3-13-2007 by Amdt. No. 6]**

Pursuant to NH RSA 674:21(II), the Hudson Planning Board is hereby authorized to issue a conditional use permit for commercial wireless telecommunication facilities according to the Table of Conditionally Permitted Facilities as set forth in § 334-96.1. Application for a conditional use permit shall be made concurrently with application for subdivision and/or site plan approval. In addition to the application submission requirements for subdivision and/or site plan approval, the Planning Board may require the applicant for a conditional use permit to submit an RF Engineering/Facilities Master Plan as provided in § 334-95E. In acting upon any such conditional use permit application the Planning Board shall determine whether the applicant has satisfied the general guidelines set forth in § 334-92 and the siting standards set forth in § 334-95, and the Board may impose such conditions of approval on the conditional use permit as are consistent with this Article XVIII and other provisions of the Hudson Zoning Ordinance. The Planning Board shall hold at least one public hearing on any such conditional use application and, following the public hearing, the Planning Board shall act to approve the application, deny it, or approve it with conditions. Any person aggrieved by a Planning Board decision concerning a conditional use permit may appeal that decision to the Superior Court in the manner provided by RSA 677:15, Court Review. As provided in NH RSA 676:5, III, a Planning Board decision concerning a conditional use permit cannot be appealed to the Hudson Zoning Board of Adjustment.

**§ 334-97. Bonding security and insurance. [Amended 3-4-2000]**

Recognizing the extremely hazardous situation presented by abandoned and unmonitored towers, the Planning Board shall set the form and amount of security that represents the cost for removal and disposal of abandoned towers in the event that the tower is abandoned and the tower owner is incapable and/or unwilling to remove the tower in accordance with § 334-98. Bonding and surety shall be consistent with the provisions in the Subdivision Regulations. Furthermore, the Planning Board shall require submission of proof of adequate insurance covering accident or damage. Bonding shall not be required for alternative facilities/technologies which are an integrated part of an existing structure. Bonding shall be nonlapsing of not less than five-year intervals.

**§ 334-98. Removal of abandoned antennas and towers.**

Any commercial wireless telecommunication facility which is not operated for a continuous period of 12 months shall be considered abandoned and hazardous to the public health and safety, unless the owner of said commercial wireless telecommunication facility provides proof of quarterly inspection. The owner shall

remove the abandoned structure within 90 days of receipt of a declaration of abandonment from the Town. A declaration of abandonment shall only be issued following a public hearing, noticed according to RSA 676:4, with notice to abutters and the last known owner/operator of the tower. If the abandoned commercial wireless telecommunication facility is not removed within 90 days, the Town may execute the bonding security and have the commercial wireless telecommunication facility removed.

**§ 334-99. Purpose: radio service facilities.**

The purpose of this section is to balance a legitimate need to protect the health, safety and welfare of the Town, its residents and its visitors with requirements to reasonably accommodate the operation of radio service facilities under the standards as may be promulgated by any applicable state and/or federal laws and regulations. Particular attention is given to RSA 674:16, IV, which refers to 101 FCC 2d. 952 (1985) entitled "Amateur Radio Preemption" by the FCC.

**§ 334-100. Applicable federal regulation references.**

Applicable federal regulations for the various radio services characterized herein as radio service facilities are all contained within Title 47 Code of Federal Regulations as follows:

- A. Amateur radio service: 47 CFR 97.
- B. General mobile radio service: 47 CFR 95.
- C. Citizens band radio service: 47 CFR 95.
- D. Radio control radio service: 47 CFR 95.
- E. Low-power radio service: 47 CFR 95.
- F. Aeronautical radio service: 47 CFR 87.
- G. Marine radio service: 47 CFR 80.

**§ 334-101. Antenna and mast height.**

- A. Antennas mounted on "pipe-type" masts directly attached to a building, and which are 20 feet or less in height above the roofline peak of the building, and which are assembled and erected using sound practices so they will fall or collapse completely within a property's bounds, are exempt from regulation by this article.
- B. Subject to the added requirements of § 334-102 Fall zone calculation, the maximum height of any antenna and/or mast for a radio service facility shall be the lesser of:
  - (1) Eighty feet above the ground; or
  - (2) The maximum height specified in the CFR applicable to a particular radio service if same is less than 80 feet above the ground.
- C. If the CFR applicable to a particular radio service allows a maximum height greater than 80 feet above the ground, then the maximum height of any antenna and/or mast

for that particular radio service may, by granting of a special exception, exceed 80 feet above the ground, subject to the following conditions:

- (1) The added requirements of § 334-102, Fall zone calculation, are satisfied; and
  - (2) The maximum height specified in the applicable CFR is not exceeded; and
  - (3) For amateur radio service operations, the maximum height shall be the minimum height required to accomplish the desired communication(s) using the minimum required transmitting power; or
  - (4) For all other types of radio service operations, the maximum height shall be the minimum height required to accomplish the desired communication(s) using the transmitting power levels authorized by the FCC for the particular radio service;
  - (5) That adequate technical data, presented in sufficiently layman terms, shall be provided with any special exception application to demonstrate the basis of need for the application.
- D. Construction or extension of an antenna and/or mast at a height approved by a special exception shall be delayed to no sooner than 60 days before the date that the desired communication(s) being the basis for the special exception need will actually commence.

**§ 334-102. Fall zone calculation.**

- A. No antenna and/or mast shall be capable of falling or collapsing beyond the bounds of the property on which it is situated. A fall zone calculation, utilizing graph paper and a drawing compass to plot it, shall be performed for any antenna and/or mast at the time a building permit or special exception application is made to demonstrate compliance with this requirement. (A sample fall zone calculation appears as an exhibit at the end of this chapter). All antennas and/or masts shall be assembled and erected to a manufacturer's standards using sound practices.
- B. The low point of height at which the fall zone calculation shall be based is as follows:
- (1) For freestanding masts: the ground attachment point of the mast.
  - (2) For supported masts: the point of the lowest support attachment above the ground.
  - (3) For anchored masts: the highest point of anchoring on a substantial structure.
  - (4) For anchored/supported masts: the point of the lowest support attachment above the highest point of anchoring on a substantial structure.

**§ 334-103. Number of masts for antennas.**

- A. Antennas mounted on "pipe-type" masts directly attached to a building, and which are 20 feet or less in height above the roofline peak of the building, and which are assembled and erected using sound practices so they will fall or collapse completely

within a property's bounds, are exempt from regulation by this article.

- B. For "lattice-type" masts, the total area of the site on which it/they will be placed shall determine the number allowed according to the following schedule:
- (1) For sites 2.0 acres in area or less: one mast.
  - (2) For sites greater than 2.0 acres in area: two masts.
  - (3) For sites greater than 3.0 acres in area: three masts.
- C. For mast quantities that differ from the requirements of § 334-103B, a special exception shall be required. The special exception application shall demonstrate a correlation between the number of masts requested, the transmitting power level(s) proposed and the desired communication(s) to be achieved. Adequate technical data, presented in sufficiently layman terms, shall be provided with any special exception application to demonstrate the basis of need for the request

**§ 334-104. Co-location.**

- A. Commercial wireless telecommunication facilities are not permitted to co-locate on radio service or receive-only facilities.
- B. Radio service or receive-only facilities may co-locate on commercial wireless telecommunication facilities.

**§ 334-105. Yard and green space setback requirements.**

No antenna, mast or supporting appurtenant devices are permitted to exist within any yard setback area and, for nonresidential properties, within any green space areas.

**§ 334-106. Hazardous RF emission certifications and environmental evaluations.**

At the time of building permit or special exception application, an amateur radio service station licensee shall provide a written certification that either:

- A. During operations, transmitter power levels will not exceed the maximum allowed for wavelength bands as noted in the table at 47 CFR 97.13(c)(1), therefore precluding the need for any routine RF environmental evaluation to be performed; or
- B. During operations, transmitter power levels may exceed the maximum allowed for wavelength bands as noted in the table at 47 CFR 97.13(c)(1), therefore a routine RF environmental evaluation will be performed; and
- C. That the licensee will promptly take action to prevent human exposure to any excessive RF emissions levels which the routine RF environmental evaluation indicates could exist, in compliance with the requirements of 47 CFR 97.13.

**§ 334-107. Receive-only facilities.**

- A. Antennas mounted on "pipe-type" masts directly attached to a building, and which are 20 feet or less in height above the roofline peak of the building, and which are

assembled and erected using sound practices so they will fall or collapse completely within a property's bounds, are exempt from regulation by this article.

- B. The maximum height of any antenna and/or mast shall not exceed 60 feet above the ground, subject only to the additional requirements of § 334-94, Fall zone calculation, of this article.
- C. The maximum height of any antenna and/or mast for a receive-only facility may, by granting of a special exception, exceed 60 feet above the ground, subject to the following conditions:
  - (1) The additional requirements of § 334-102, Fall zone calculation, are satisfied; and
  - (2) That adequate information (such as a video or audio recording of preapplication reception conditions and photographs of the subject and abutting property areas) is provided with any special exception application which demonstrates the need basis for the request; and
  - (3) That the maximum height approved by a special exception shall be the minimum height necessary to obtain a reasonable improvement in overall signal(s) reception.

ARTICLE XIX  
**Growth Management**  
[Added 3-13-2001 by Amdt. No. 5]

**§ 334-108. Purpose.**

Based on the Master Plan and Capital Improvements Program, which assess and balance community development needs with those of the wider region, the following growth management article is deemed necessary to control the rate of residential development in Hudson for the following reasons:

- A. Promote the development of an economically sound and environmentally stable community, which considers and balances local and regional development needs.
- B. Ensure that Hudson accommodates its fair share of regional growth while protecting it from the adverse fiscal, traffic, and environmental impacts that can result from uncontrolled growth.
- C. Guide efforts by the Town to monitor, evaluate, and establish a rate of residential growth that is consistent with its capacity for planned and orderly expansion of public services to accommodate growth.
- D. Provide a mechanism for situations when municipal services are strained due to rapid residential growth to reduce the rate of such growth in order to provide the Town the time and opportunity to correct any service deficiencies.
- E. Protect the health, safety, and general welfare of the residents of the Town of Hudson.
- F. Address the community development goals and objectives of the Town of Hudson Master Plan and Capital Improvements Program.

**§ 334-109. Authority.**

This article is adopted as a growth management ordinance under the authority of RSA 674:22.

**§ 334-110. Findings.**

- A. Hudson's developable land area, as estimated by the Nashua Regional Planning Commission (NRPC), is sufficient to support extensive new growth and development. According to a 1997 study by NRPC, there are approximately 3,650 buildable, residentially zoned acres out of a total of 17,371 acres in Hudson.
- B. Hudson's population increased 39.3% from 1980 to 1990, and 18.5% from 1990 to 1999, for an overall increase of 65%, or 3.4% annually over the nearly twenty-year period. By contrast, the total population of the communities making up the Nashua Regional Planning Commission (NRPC region) increased by 24% from 1980 to 1990, and 13% from 1990 to 1999, for an overall increase of 44%, or 2.3% annually over the nearly twenty-year period. As evidenced by these statistics, Hudson has grown at a faster rate than the region.

- C. The number of housing units in Hudson increased by 58% between 1980 and 1990, and by 17.5% between 1990 and 1999, for an overall increase of 85.5%, or 4.5% annually over the nearly twenty-year period. By contrast, the number of housing units in the NRPC region increased by 38.5% between 1980 and 1990, and by 10.2% between 1990 and 1999, for an overall increase of 52.7%, or 2.9% annually over the nearly twenty-year period.
- D. The average annual rate of new housing unit construction in Hudson is greater than the average for a Hudson first-tier fair-share region that consists of the six adjacent communities of Litchfield, Londonderry, Nashua, Pelham, Windham, and Tyngsborough, MA. In Hudson, the average annual increase in housing units for the period 1995 to 1999 was 1.7%, compared to a first-tier fair-share region average annual growth rate of 1.1%.
- E. Population projections for Hudson issued by the New Hampshire Office of State Planning (NHOSP) in 2000 project a 3,111 person, or 13.4% increase in population from 2000 to 2010.
- F. High levels of demand for housing in Hudson are expected to continue according to the 1999 Regional Housing Needs Assessment by NRPC. With the region divided into four parts, the eastern Towns of Hudson, Litchfield, and Pelham had the largest increase in the number of home sales for the period 1991 to 1998, at 116%.
- G. As of 1999, there were approximately 7,965 dwelling units in Hudson, according to estimates by the NHOSP. According to a build-out study performed by NRPC for the 1996 Hudson Master Plan, there is the potential to add approximately 4,700 units in Hudson's residential zoning districts, an increase of 58% over the 1999 figure.
- H. Hudson's total population at build-out, according to the Master Plan, could approach 33,300 persons, an increase of 10,200, or 44%, over the estimated 1999 population of 23,100.
- I. The Town of Hudson, in its Master Plan, supports controlled growth as one method of ensuring that the Town grows in a sustainable manner. Land-Use Goal B.3 states that Hudson should "[c]onsider the adoption of growth controls or development phasing to limit population increases and housing development to manageable levels." Population Goal A states that Hudson should "[p]rovide an acceptable rate of growth in relation to the regional rate of growth and in keeping with the ability of the Town to provide essential facilities and services."
- J. Community facilities.
- (1) Many community facilities in Hudson are being adversely impacted by rapid population and housing growth in the community. The Community Facilities section of the 1996 Hudson Master Plan states that: "The significant and rapid growth that occurred in Town over the past years has caused the current Town facilities to become inadequate. The growth of the Town facilities has not kept pace with the rest of the Town." Some of the municipal facilities adversely impacted by rapid growth include:
- (a) Fire Department: In its FY 2002 submittal to the Hudson Capital

Improvements Plan Committee, the Fire Department noted that "the present fire stations are not conducive to providing timely responses for emergency services. The growth of the Town has passed the available level of service that the Fire Department can provide to the community from its present location." As a result of this deficiency, the Town will be assessing possible locations for additional fire stations.

- (b) Hills Memorial Library: The 1996 Hudson Master Plan notes that "[w]ith just 3,645 square feet in the original building, the inadequacies of the facility and crowding have been major concerns for many years." The Library has documented the need for a new 25,000 square-foot facility to meet present and future demands for library services.
  - (c) Schools: The Town's rapid growth has placed severe strain on the school system. In an attempt to address the impacts of growth, the Town is building a new elementary school and renovating the middle school. Despite these improvements, the School Department reports that overcrowding will remain an issue as long as rapid growth continues.
  - (d) Town Sewer: Hudson has an agreement with the City of Nashua in which the Nashua Wastewater Treatment Plant (WWTP) receives sewage flow from Hudson. Due to capacity limitations and the provisions of the inter-municipal agreement, the Nashua WWTP can only treat two million gallons per day (mgpd) of Hudson wastewater. The Town of Hudson is currently generating approximately 1.6 mgpd, which is approaching the limits of the Nashua WWTP. Constraints on the ability of the sewer system to expand results in a very limited allocation for commercial development, which is needed to sustain the tax rate.
  - (e) Hudson Recreation Department: In its FY 2002 capital improvements submittal, the Town's Recreation Department noted that "[t]his rapid growth has caused an outcry for more (recreational / sports) fields." Additional sports fields are needed to meet present and future demand brought on by recent and anticipated growth. Many sports programs are at capacity at the present time. A new indoor recreation center is also needed, as the demand for many programs is now nearly double the capacity of the existing facility.
- (2) The above examples are intended to illustrate how rapid and unchecked growth impacts many of the Town's services and facilities.

### § 334-111. Definitions.

The following definitions shall apply only to the growth management section and shall not be affected by the provisions of any other Town ordinance.

**BUILDING CERTIFICATE** — A certificate obtained from the Planning Board entitling the holder to obtain one building permit for one dwelling unit. Dwelling units as defined in this article include single-family homes and duplexes on individual lots, as well as individual condominium units and apartments in multifamily structures shown on approved site plans. A building certificate is valid for a period of two years from the date of issuance, by which time it must be redeemed for a building permit, or expire.

**FAIR-SHARE REGION AVERAGE GROWTH RATE (FSRAGR)** — Average annual percentage increase in residential building permits issued in the six adjacent municipalities of Litchfield, Londonderry, Nashua, Pelham, Windham and Tyngsborough, MA, for the preceding five-year period.

**HOUSING FOR OLDER PERSONS** — Housing that qualifies as "Housing for Older Persons" as defined in § 334-70 and developed according to the provisions of § 334-71 of the Town of Hudson Zoning Ordinance.

**LOT OF RECORD** — Land designated as a separate and distinct parcel prior to the date of posting (November 3, 2000) of this article either in a legally recorded deed filed with the Hillsborough County Registry of Deeds or lots or units described as part of a subdivision or site plan recorded at the Hillsborough County Registry of Deeds prior to the date of posting. For the purpose of this article, a lot of record shall also be defined to include separately defined condominium units, as well as individual units in duplexes and multifamily structures, shown on site plans and/or subdivision plans accepted for review by the Hudson Planning Board prior to the date of posting.

**SUSTAINABLE RATE OF DEVELOPMENT** — A target number of building permits to be issued in Hudson in the current year equaling the fair-share region average growth rate for the preceding five years times the total number of dwelling units existing in Hudson in the preceding year. Round any fraction calculated herein to the next whole number.

**TOTAL DWELLING UNITS (DU)** — The total number of dwelling units in Hudson on December 31. This number includes single-family homes, as well as dwelling units in duplexes, apartments, condominium developments and other multifamily structures. Note: For 1999, the DU number is 7,965 based on an estimated accounting of the number of dwelling units.

**§ 334-112. Applicability and effect.**

- A. This article applies to all lots of record as defined in §§ 334-6 and 334-111, as well as to all future residential development. The application of this article to lots of record is for tracking purposes only. To receive a building permit, an applicant is required to possess a building certificate (also referred to herein as a "certificate") from the Planning Board or its designee for each approved dwelling unit. In order to be eligible for the issuance of a building certificate, an applicant must supply a properly completed application form to the Planning Department Clerk.
- B. This article does not apply to nonresidential buildings or to the expansion, alteration, renovation, or replacement of existing dwelling units. Beginning on the effective date of this article, no building permit for a new dwelling unit shall be issued without possession of a building certificate issued in accordance with the provisions of this article.

**§ 334-113. Periodic review.**

It shall be the responsibility of the Planning Board to monitor growth in the Town and region and notify the Town of the findings.

- A. The Planning Board or its agent(s) shall assemble by the third Tuesday in February such information necessary for assessing whether unsustainable rates of

development continue to exist, and, if so, to determine the sustainable rate of development. Information should include statistics on building permits issued and building certificates issued and redeemed. Reliable information that may be used includes: statistics provided by the local Building Inspector and "Permit Authorized Construction in Permit-Issuing Places by State and County" as reported by the Building Permits Branch of the U.S. Census.

- B. The Building Inspector shall provide to the Planning Board information describing the status of requests and issuance of residential building permits on a semi-annual basis to aid in monitoring the issuance of certificates and permits. The information provided shall include the number of permits issued in each of the last four semi-annual periods. For reporting purposes, periods conform to the calendar year January 1 - June 30, and July 1 - December 31. Information for each period shall be submitted within 31 days of the end of December and June.

**§ 334-114. Calculation of annual certificate pool and annual discretionary certificate allocation.**

Data shall be collected for the previous five years on the number of new dwelling units for the six adjacent regional towns. For the purposes of this section, the yearly statistics to be utilized are based upon a calendar year of January 1 to December 31. To calculate the certificate allocation for the current year, Steps A, B and C must be completed as described below:

- A. Calculate the fair-share region average growth rate. (See definitions.)
- (1) Do not include statistics for Hudson in the calculation; otherwise, local growth may influence regional growth statistics.
- B. Calculate the sustainable rate of development. (See definitions.)
- C. Calculate the current year certificates available for disbursement in semi-annual allocations.
- (1) Calculate the net available current year certificates (discretionary allocation) by subtracting from B the number of building permits issued to new dwelling units in the prior year.
- (a) If the calculated net available current year certificates is less than or equal to 10, then the number of discretionary certificates for the current year shall be 10.
- (b) If the calculated net available current year certificates are greater than 10, then the number of discretionary certificates for the current year shall be the calculated number.

**§ 334-115. Procedures for distributing certificates.**

Certificates shall be distributed according to the following allocation rules:

- A. No residential building permit may be issued except with the possession of a certificate.

- B. From January 1 through December 31, the Planning Department Clerk, on a form prepared by the Planning Board, shall receive applications for certificates for the current year. These applications shall be time and date stamped when received. The basis for determining the priority standing among all applications for the annual allotment of discretionary certificates shall be the order of submission of the applications as indicated by the Planning Department office stamp. Except for lots of record, no application for certificates may be made prior to recording an approved subdivision or site plan with the HCRD. Note: All applications for certificates for a subdivision or site plan shall be placed onto a single form provided by the Planning Board and must list all lots or units.
- C. Guaranteed allocation. So that all developments are assured an allocation of certificates appropriate to the size of their subdivision or site plan and investment, all subdivisions and site plans for multifamily and condominium developments approved by the Planning Board and recorded at the Hillsborough County Registry of Deeds shall receive certificates according to the following schedule: subdivisions and site plans of one to five lots or units shall be entitled to certificates equal to the number of lots or units in the subdivision or site plan; subdivisions and site plans with six to 10 lots or units shall receive at least five certificates per year; subdivisions and site plans with 11 to 20 lots or units shall receive at least six certificates per year; subdivisions and site plans with 21 to 30 lots or units shall receive at least seven certificates per year; subdivisions and site plans with 31 to 40 lots or units shall receive at least eight certificates per year; subdivisions and site plans with 41 to 54 lots or units shall receive at least nine certificates per year; subdivisions and site plans with 55 to 80 lots or units shall receive at least 10 certificates per year; and subdivisions and site plans greater than 80 lots shall receive certificates equal to 12.5% of their total number of lots or units per year.
- (1) Building lots that are planned for construction must obtain one building certificate for each dwelling unit.
  - (2) Each subdivision or site plan may receive their minimum guaranteed certificate allocation pursuant to § 334-115C at any time during the year after subdivision or site plan recording at the HCRD, and is not required to wait until annual certificate allocations. In the year(s) following subdivision or site plan recording, the full allotment of certificates specified in § 334-115C shall be available, based on the total number of lots or units in the approved and recorded subdivision or site plan.
  - (3) The number of guaranteed certificates available during the year of recording shall be calculated on a pro-rata basis based on the number of months remaining in the year from the date of subdivision or site plan recording. For subdivisions or site plans recorded in January, the full yearly allotment of guaranteed certificates specified in § 334-115C shall be available, for February 11/12 of the yearly allotment shall be available, for March 10/12 of the yearly allotment shall be available, and so on until December, in which 1/12 of the allotment shall be available. The number obtained by multiplying the allotment specified in § 334-115C by the proportion of the year remaining in terms of months shall be rounded up or down to the nearest whole number to determine the number of certificates available.

- (a) For example, a thirty-five-lot subdivision is eligible for eight certificates according to § 334-115C. If the subdivision plan is recorded in July, the subdivision is eligible for 6/12 (or 1/2 or 0.5) of the certificates that first year. One-half of eight equals four certificates available to that subdivision in the year of recording.
  - (b) If the same thirty-five-lot subdivision is recorded in September, it is eligible for 4/12 (or 0.33) of the yearly allotment of guaranteed certificates. Eight multiplied by 0.33 equals 2.6, which is then rounded up to three, which equals the amount of guaranteed certificates available.
- D. Discretionary allocation. The remaining certificates shall be allocated annually by the following system:
- (1) At the second Planning Board meeting in March, the Planning Board shall conduct its annual discretionary certificate allocation.
  - (2) If a surplus of certificates is left over from distribution in the prior year, the remaining certificates may, at the discretion of the Planning Board, be added to the number of permits available in the current year.
  - (3) When the number of certificate applications exceeds the number of certificates available, the annual allocation is distributed among applications using a priority based upon the order in which the Planning Department Clerk received the applications.
  - (4) The procedure for allocating discretionary certificates on an annual basis is as follows: Discretionary certificates shall be issued to applicants one at a time based upon the order in which applications have been received by the Planning Department Clerk. When there are certificates remaining after each applicant has received their first certificate, the process shall be repeated until all available certificates are exhausted. Each application shall be specific to a subdivision or development irrespective of the individual filing the application. Only one application may be filed for a subdivision or development in each calendar year. **[Amended 3-14-2006 by Amdt. No. 1]**
  - (5) At the next annual allocation, the allocation commences with the next applicant scheduled to receive a certificate that did not receive any certificates in the prior allocation.
  - (6) The owners of lots allocated certificates may formally apply to the Building Inspector for the issuance of a building permit.
  - (7) A certificate may be used for any dwelling unit within the subdivision or site plan for which it was awarded. Certificates may not be transferred to other subdivisions or site plans.
  - (8) A building certificate is valid and must be redeemed for a building permit within two years of the date of issuance.
- E. Disclaimer. Certificate issuance in no way ensures or guarantees building permit issuance.

**§ 334-116. Exemptions.**

- A. The following new dwelling unit types shall apply for and will be granted building certificates, but are exempt from the certificate allocation requirements outlined in §§ 334-114 and 334-115 of this article. The requirement that a use exempt from allocation requires the issuance of a certificate is a mechanism that will enable the Planning Board to track and monitor all new residential development in Hudson. Provisions for guaranteed minimum certificate allocations are found in § 334-115. Nonresidential buildings, including commercial, industrial, and municipal buildings, are exempt from the provisions of this growth management article and do not require the issuance of a building certificate.
- B. Lots of record as defined by § 334-111 are also exempt from the provisions of this growth management article.

**§ 334-117. Sunset.**

If the number of building certificates requested for three consecutive years is less than 75% of the prior year's sustainable rate of development, then the Planning Board may consider the suspension of this growth management article. At such time, if the Planning Board decides to keep the ordinance in place, it shall provide findings as to why continued implementation of the ordinance is necessary to address public service and facility deficiencies and other impacts of rapid growth.

**§ 334-118. Implementing regulations.**

To the extent deemed appropriate, the Planning Board may adopt administrative regulations to guide Planning Department staff and agents of the Board in administration of this article, pursuant to RSA 674:36; 674:44, 674:4I(a) and (b), and 674:4, II to III.

**§ 334-119. Severability.**

Should any part of this article be held invalid or unconstitutional by a court, such a holding shall not affect, impair, or invalidate any other part of this article, and, to such end, all articles, sections and provisions are declared to be severable.

ARTICLE XX  
**Small Wind Energy Systems**  
**[Added 3-9-2010 by Amdt. No. 3]**

**§ 334-120. Purpose.**

This small wind energy systems ordinance is enacted in accordance with RSA 674:62 through 674:66, and the purposes outlined in RSA 672:1, III-a. The purpose of this article is to accommodate small wind energy systems in appropriate locations, while protecting the public's health, safety and welfare. In addition, this article provides a permitting process for small wind energy systems to ensure compliance with the provisions of the requirements and standards established herein.

**§ 334-121. Definitions.**

As used in this article, the following terms shall have the meanings indicated:

**METEOROLOGICAL TOWER (MET TOWER)** — Includes the tower, base plate, anchors, guy wires and hardware, anemometers (wind speed indicators), wind direction vanes, booms to hold equipment for anemometers and vanes, data loggers, instrument wiring, and any telemetry devices that are used to monitor or transmit wind speed and wind flow characteristics over a period of time for either instantaneous wind information or to characterize the wind resource at a given location. For the purpose of this article, "met towers" shall refer only to those whose purpose is to analyze the environmental factors needed to assess the potential to install, construct or erect a small wind energy system.

**MODIFICATION** — Any change to the small wind energy system that materially alters the size, type or location of the small wind energy system. Like-kind replacements shall not be construed to be a modification.

**NET METERING** — The difference between the electricity supplied to a customer over the electric distribution system and the electricity generated by the customer's small wind energy system that is fed back into the electric distribution system over a billing period.

**POWER GRID** — The transmission system, managed by ISO New England, created to balance the supply and demand of electricity for consumers in New England.

**SHADOW FLICKER** — The visible flicker effect when rotating blades of the wind generator cast shadows on the ground and nearby structures causing a repeating pattern of light and shadow.

**SMALL WIND ENERGY SYSTEM** — A wind energy conversion system consisting of a wind generator, a tower, and associated control or conversion electronics, which has a rated capacity of 100 kilowatts or less and will be used primarily for on-site consumption.

**SYSTEM HEIGHT** — The vertical distance from ground level to the tip of the wind generator blade when it is at its highest point.

**TOWER** — The monopole, guyed monopole or lattice structure that supports a wind generator.

**TOWER HEIGHT** — The height above grade of the fixed portion of the tower, excluding the wind generator.

**WIND GENERATOR** — The blades and associated mechanical and electrical conversion components mounted on top of the tower whose purpose is to convert the kinetic energy of the wind into rotational energy used to generate electricity.

**§ 334-122. Procedure for review.**

- A. Building permit. Small wind energy systems and met towers are an accessory use permitted in all zoning districts where structures of any sort are allowed. No small wind energy system shall be erected, constructed, or installed without first receiving a building permit from the Building Inspector. A building permit shall be required for any physical modification to an existing small wind energy system. Met towers that receive a building permit shall be permitted on a temporary basis not to exceed three years from the date the building permit was issued. If an applicant plans to renew the met tower building permit, he/she must apply for same at least four months prior to the aforementioned three-year permit expiration.
- B. Application. Applications submitted to the Building Inspector shall include a certified plot plan, signed and stamped by a New Hampshire licensed land surveyor, and said plan shall contain the following information:
- (1) Property lines and physical dimensions of the applicant's property.
  - (2) Location, dimensions, and types of existing major structures on the property.
  - (3) Location of the proposed small wind energy system, foundations, guy anchors and associated equipment.
  - (4) Tower foundation blueprints or drawings.
  - (5) Tower blueprints or drawings.
  - (6) Setback requirements as outlined in this article.

- (7) The right-of-way of any public road that is contiguous with the property.
  - (8) Any overhead utility lines.
  - (9) Small wind energy system specifications, including manufacturer, model, rotor diameter, tower height, tower type, nameplate generation capacity.
  - (10) Small wind energy systems that will be connected to the power grid shall include a copy of the application for interconnection with their electric utility provider.
  - (11) Sound level analysis prepared by the wind generator manufacturer or qualified engineer.
  - (12) Electrical components in sufficient detail to allow for a determination that the manner of installation conforms to the NH State Building Code.
  - (13) Evidence of compliance or nonapplicability with Federal Aviation Administration requirements.
  - (14) List of abutters to the applicant's property.
- C. Abutter and regional notification. In accordance with RSA 674:66, the Building Inspector shall notify all abutters and the local governing body by certified mail upon application for a building permit to construct a small wind energy system. The public will be afforded 30 days to submit comments to the Building Inspector prior to the issuance of the building permit. The Building Inspector shall review the application for regional impacts per RSA 36:55. If the proposal is determined to have potential regional impacts, the Building Inspector shall follow the procedures set forth in RSA 36:57, IV. Note: Advertising and abutter mailing fees shall be paid by the applicant at the time of application submission.

**§ 334-123. Standards.**

The Building Inspector shall evaluate the application for compliance with the following standards:

- A. Setbacks. The setback shall be calculated by multiplying the minimum setback requirement number by the system height as measured from the center of the tower base to property line, public roads, or nearest point on the foundation of an occupied building.

**Minimum Setback Requirements**

<b>Occupied Buildings on Participating Landowner Property</b>	<b>Occupied Buildings on Abutting Property</b>	<b>Property Lines of Abutting Property and Utility Lines</b>	<b>Public Roads</b>
0	1.5	1.1	1.5

- (1) Small wind energy systems must meet all setbacks for principal structures for the zoning district in which the system is located.

- (2) Guy wires used to support the tower are exempt from the small wind energy system setback requirements.
- B. Tower. The maximum tower height shall not exceed 150 feet.
  - C. Sound level. The small wind energy system shall not exceed 60 decibels using the A scale (dBA), as measured at the site property line, except during short-term events such as severe wind storms and utility outages.
  - D. Shadow flicker. Small wind energy systems shall be sited in a manner that does not result in significant shadow flicker impacts. Significant shadow flicker is defined as more than 30 hours per year on abutting occupied buildings. The applicant has the burden of proving that the shadow flicker will not have significant adverse impact on neighboring or adjacent uses. Potential shadow flicker will be addressed either through siting or mitigation measures.
  - E. Signs. All signs, including flags, streamers and decorative items, both temporary and permanent, are prohibited on the small wind energy system, except for manufacturer identification or appropriate warning signs.
  - F. Code compliance. The small wind energy system shall comply with all applicable sections of the New Hampshire State Building Code.
  - G. Aviation. The small wind energy system shall be built to comply with all applicable Federal Aviation Administration regulations, including but not limited to 14 CFR Part 77, Subpart B, regarding installations close to airports, and the New Hampshire aviation regulations, including but not limited to RSA 422-B and RSA 424.
  - H. Visual impacts. It is inherent that small wind energy systems may pose some visual impacts due to the tower height needed to access wind resources. The purpose of this subsection is to reduce the visual impacts, without restricting the owner's access to the optimal wind resources on the property.
    - (1) The applicant shall demonstrate through project site planning and proposed mitigation that the small wind energy system's visual impacts will be minimized for surrounding neighbors and the community. This may include, but not be limited to, information regarding site selection, wind generator design or appearance, buffering, and screening of ground-mounted electrical and control equipment. All electrical conduits shall be underground, except when the financial costs are prohibitive.
    - (2) The color of the small wind energy system shall either be the stock color from the manufacturer or painted with a nonreflective, unobtrusive color that blends in with the surrounding environment. Approved colors include but are not limited to white, off-white or gray.
    - (3) A small wind energy system shall not be artificially lit unless such lighting is required by the Federal Aviation Administration (FAA). If lighting is required, the applicant shall provide a copy of the FAA determination to establish the required markings and/or lights for the small wind energy system.
  - I. Approved wind generators. The manufacturer and model of the wind generator to be used in the proposed small wind energy system must have been approved by the

California Energy Commission or the New York State Energy Research and Development Authority, or a similar list approved by the State of New Hampshire, if available.

- J. Utility connection. If the proposed small wind energy system is to be connected to the power grid through net metering, it shall adhere to RSA 362-A:9.
- K. Access. The tower shall be designed and installed so as not to provide step bolts or a ladder readily accessible to the public for a minimum height of eight feet above the ground. All ground-mounted electrical and control equipment shall be labeled and secured to prevent unauthorized access.
- L. Clearing. Clearing of natural vegetation shall be limited to that which is necessary for the construction, operation and maintenance of the small wind energy system and as otherwise prescribed by applicable laws, regulations, and ordinances.

**§ 334-124. Abandonment.**

- A. At such time that a small wind energy system is scheduled to be abandoned or discontinued, the applicant will notify the Building Inspector by certified U.S. mail of the proposed date of abandonment or discontinuation of operations.
- B. Upon abandonment or discontinuation of use, the owner shall physically remove the small wind energy system within 90 days from the date of abandonment or discontinuation of use. This period may be extended at the request of the owner and at the discretion of the Building Inspector. "Physically remove" shall include, but not be limited to:
  - (1) Removal of the wind generator and tower and related above-grade structures.
  - (2) Restoration of the location of the small wind energy system to its natural condition, except that any landscaping, grading or below-grade foundation may remain in its same condition at initiation of abandonment.
- C. In the event that an applicant fails to give such notice, the system shall be considered abandoned or discontinued if the system is out-of-service for a continuous twelve-month period. After the 12 months of inoperability, the Building Inspector may issue a notice of abandonment to the owner of the small wind energy system. The owner shall have the right to respond to the notice of abandonment within 30 days from notice receipt date. After review of the information provided by the owner, the Building Inspector shall determine if the small wind energy system has been abandoned. If it is determined that the small wind energy system has not been abandoned, the Building Inspector shall withdraw the notice of abandonment and notify the owner of the withdrawal.
- D. If the owner fails to respond to the notice of abandonment or if, after review by the Building Inspector, it is determined that the small wind energy system has been abandoned or discontinued, the owner of the small wind energy system shall remove the wind generator and tower at the owner's sole expense within three months of receipt of the notice of abandonment. If the owner fails to physically remove the small wind energy system after the notice of abandonment procedure, the Building Inspector may pursue legal action to have the small wind energy

system removed at the owner's expense.

**§ 334-125. Violations; preexisting systems.**

It is unlawful for any person to construct, install, or operate a small wind energy system that is not in compliance with this article. Small wind energy systems installed prior to the adoption of this article are exempt from this article except when modifications are proposed to the small wind energy system.

**§ 334-126. Violations and penalties.**

Any person who fails to comply with any provision of this article or a building permit issued pursuant to this article shall be subject to enforcement and penalties as allowed by RSA 676:17.

**PLANNING BOARD MEETING  
Minutes  
January 20<sup>th</sup>, 2011**

**Present:** Mike Papadimatos, Co-Chair, Voting  
Alan Rosenberg, Co-Chair, Voting  
Ron Pelletier, Member, Voting  
Kevin Gorgoglione, Selectmen Representative, Voting  
Paul Anderson, Alternate, Voting for Richard Randlett  
Valérie Maurer, Town Planner

**Absent:** Richard Randlett, Member and Dana MacAllister, Alternate

**7:10pm – Mike** opened the meeting and asked Paul to vote for Richard.

**Minutes**

**Alan moved to approve the December 16, 2010 minutes as written. Ron seconded. Vote yes 3-0.**

**CIP**

Missing information in the Ambulance section (as discussed on December 16) was added. The CIP was finalized.

**Motion**

**Alan moved to adopt the 2011-2016 Capital Improvement Plan and submit it to the Board of Selectmen and Finance Committee for their consideration during the Budget Public Hearings. Seconded by Ron. Voted Yes 5-0.**

**Master Plan**

There were a couple of modifications in the meeting schedule. The MP Committee and the NRPC will meet on Tuesday January 25<sup>th</sup> (instead of tonight) and February 24<sup>th</sup> (instead of Feb. 17<sup>th</sup>). Jill Longval, NRPC emailed the drafts for the first 4 chapters she is working on. Valerie asked the Board Members to get back to Jill with their input/comments/suggestions as soon as possible so Jill can make the necessary updates.

**Paul moved to adjourn at 7:35 pm. Kevin Seconded. Voted Yes 5-0.**

**PLANNING BOARD MEETING**

**Minutes**

**February 17, 2011**

**Present: Alan Rosenberg, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Kevin Gorgoglione, Selectmen's Representative, Voting  
Dana MacAllister, Alternate, Voting for Mike Papadimatos  
Valérie Maurer, Town Planner**

**Absent: Mike Papadimatos, Co-Chair and Paul Anderson, Alternate**

**7:00pm Meeting start**

**Minutes**

**Kevin moved to approve the minutes of the January 20, 2011 Planning Board meeting as amended. Ron seconded. Vote yes 3-0.**

**Alan** asked Dana if he would vote for Mike. **Dana** agreed.

**Master Plan Warrant Article**

**Alan** said the funding for the second payment for the Master Plan Update was in the Budget and was removed and now will be a warrant article; it will allow the town people to make the decision. **Kevin** said the Finance Committee wanted to reduce the town budget so they pulled the second payment for the Master Plan Update out of the budget and it will now be a warrant article for the town people to decide and vote on. **Valérie** said almost every department had something removed from their budget and a warrant article was created. About 4 warrant articles were created. **Richard** said it gives the town people a line to veto from the budget. **Ron** asked if the warrant article does not pass what happens. **Alan** said they will have what can be finished up with the first payment at that point and that will be it. There are a few chapters that can be done due to the information gathered for other chapters. NRPC has also received grants for the Town for the Energy Chapter. The most important chapters will be done the Vision and Land Use chapters. They were completed with the first year's payment.

**Mixed Use Zoning**

**Ron** said he asked Valérie to add mixed use zoning to the agenda tonight. The Planning Board really needs to spend some time looking into mixed use zoning. It would really be beneficial to the Town. We may get more businesses into town. **Ron** said it takes so long to do something that he just wanted to remind people that they had discussed it before and doesn't want it to be forgotten. **Ron** said while we don't have that many cases we could be getting some ground work done. **Valérie** suggested they wait until the master plan is updated as much as possible. **Alan** agreed they could discuss this after more of the master Plan is completed maybe some of the ground work will be done already. **Kevin** said while they have time they should look into it before next year. **Valérie** said she will schedule the first meeting in May to discuss. **Ron** said they could get other small business owners involved with the discussion also.

**Dana moved to adjourn at 8:00 pm. Richard Seconded. Vote yes 5-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Richard Randlett, Member,** \_\_\_\_\_

**Ron Pelletier, Member,** \_\_\_\_\_

**Kevin Gorgoglione, Selectmen's Representative,** \_\_\_\_\_

**Dana MacAllister, Alternate,** \_\_\_\_\_

**The next Regular Planning Board meeting will be 3/3/2011.  
Minutes submitted by Kristen Austin.**

**Absent:** Mike Papadimos, Co-Chair

**7:10pm Meeting start**

**Minutes**

**Richard moved to approve the Planning Board minutes of February 17, 2011 as written. Kevin seconded. Vote yes 4-0.**

**Conceptual Kelcy Stentrom Hair Salon at Big Bear 106 Route 13**

In attendance for this conceptual: Marcia Farwell, Farwell Realty and Kelcy Stendtrom, Applicant.

**Marcia** said Paul Andres (Owner of Big Bear, 106 Route 13) asked her to find a tenant for the empty space at Big Bear. She said Kelcy was interested in opening up a full service salon. She has already asked the state and they said the chemicals will not hurt the existing septic system. **Kelcy** said this will be a full service salon they will have three stations.

**Marcia** said she know this is just a conceptual discussion but would like to have Kelcy be able to leave here tonight with your blessing so that she can start the process. **Kelcy** said she will have 3 stations. Services offered will be hair cut and color, nails, and waxing.

**Kevin** said if she receives her state permits and CO then good luck to her. **Alan** said this drawing of the site and the sign sketch should be enough to put in the files. When she receives the State permits she can give a copy to the Town for the files. She will need an inspection from the Fire Department and a Certificate of Occupancy from the Building Inspector to start. He sees no reason for a formal hearing.

**Alan** said he would like her to come in again before she opens just to check in with the Planning Board and make sure we have all the paperwork.

**Case #2011-1: F-18, Gavin Rev. Trust 4-lot Subdivision, Off Rocky Pond Road**

In attendance for this hearing Randy Haight (Meridian land Services) and Francis Gavin (Applicant). **Randy** said this is a 4 lot subdivision off Rocky Pond Road. These lots will be 5 acres each. They do not need State Subdivision approval. **Randy** said there is an old French culvert that is still working but will need to be replaced.

**Valérie** said the Fire Department will be meeting with Francis Gavin in regards to the fire pond on Monday. We will have to wait for any comments from them. The Conservation Commission will be hearing this case on Tuesday then we should receive comments. We have not received any additional comment from Dennis LaBombard (LaBombard Engineering LLC, Town Engineer) because he just received the updated plan this afternoon. **Valérie** said that she has received letters from 6 abutters stating they are away for school vacation and would not be able to attend. They would like the Board to postpone the public hearing to the next meeting so they can attend. They are asking for this discussion to be continued. They have issues with the wetlands and water runoff on Rocky Pond Road, going onto their property; vernal pools and salamanders were mentioned as concerns of one of the abutters. **Valérie** said that she received the common driveway easement and it should also go to Town Counsel for review. The Board agreed. **Alan** explained that an application is a two step process: the Planning Board will accept the application if all the paperwork is in order and after will discuss the process of approval. Discussion with abutters and the general public takes place once the application has been accepted **Alan** asked if all the paperwork was in order for acceptance tonight. **Valérie** said yes it is. **Richard made a motion to accept application # 2011-01: F-18, Gavin Rev. Trust 4 lot subdivision. Kevin Seconded. Vote yes 5-0.**

**Valérie** said she would recommend holding off on the discussion until the abutters can attend the hearing so the Board does not have to review things twice. **Alan** said the Board should find out if there are any vernal pools. **Valérie** said that she has forwarded a letter from one abutter to Dennis so he can take a look at the vernal pool and water runoff. **Alan** asked **Valérie** for forward the abutter's comments to Randy so he can review them before the next meeting. **Valérie** said she will pass them along.

**Ron moved to continue Case #2011-1: F-18, Gavin Rev. Trust 4-lot Subdivision to March 17, 2011. Paul Seconded. Voted yes 5-0.**

**Case #2004-25: D-8 KKM Investment, Keith Adamyk, Rumore Way (Discussion continued from November 18, 2010)**

In attendance for this hearing Keith Adamyk (Applicant) and Dennis LaBombard (LaBombard Engineering LLC (Town Engineer)).

**Valérie** said because Keith wasn't in attendance for this meeting in November of last year, he asked to be placed on the agenda tonight. **Keith** said he was never informed of the meeting in November. He has finished Rumore Way and is out of that common driveway development. He said it is now up to the homeowners if there is any maintenance needed on Rumore Way. He said he was asked to renew the bond for the common driveway but he is done with the project and had received his last Certificate of Occupancy last March from the Building Inspector and sold that last house. He had a list of things from the Building Inspector that had to be finished before he could receive the last CO and he finished everything on that final list. **Keith** said the granite sign was broken when he called to order a new one. The vendor said it would be fine if it was a clean break to epoxy it back together and add brackets on the side. He said he also added rebar to the back of the sign to reinforce it. That sign will not break unless someone hits it with their car. It meets the requirements of Emergency Management it shows where they need to go if there is an issue. The last thing he did was have the entire road graded on his way out. He said he was not sure why the Board of Selectmen had Dennis LaBombard go out to inspect the common

driveway after he was done with the project. He doesn't feel he needs to renew a bond for a project he has completed and is done with this project. His Common Driveway declaration states that it is now the responsibility of the new owners. **Dennis** said the things that are listed in his letter should have been done before the last CO was issued. **Paul** asked what triggered the Selectmen to have this inspected. **Valérie** said the bond had expired and Dennis hadn't signed off on this common driveway yet. **Dennis** said that the items listed in his November 2010 report are the same that needed finishing in 2007. In all of the letters Dennis states there are erosion issues, the sign needs to be fixed, the North West bound is missing, problems with culverts being crushed and silt fence needs removal. **Alan** said there are rubble head walls that were not approved. The plan calls for precast concrete headwalls. That needs to be changed to what the plan calls for or if the rubble headwalls are fixed and working the Planning Board will need an as built plan. **Kevin** said the Town is just looking for these things to be done like you said you would. You have had this information since back in 2007. Why do you feel you shouldn't have to finish what is on Dennis's list? **Keith** asked if the rubble headwalls were acceptable. **Alan** said they were not approved, the plan calls for precast concrete. **Dennis** said the Department Of Transportation has standards and rubble headwalls don't meet them. **Keith** said he doesn't feel he should have to replace the granite sign. **Alan** said he didn't realize there were two pieces of rebar for reinforcement holding it together. The Sign meets the regulations it doesn't state in the regulations that they can do anything about ascetics. It may not look its best but it meets the regulations. **Paul** asked if Keith felt as though he graded the road ok before he left this subdivision. **Keith** said yes. **Alan** said you and Dennis can work together to come up with a satisfactory conclusion in regards to the headwalls; either they are changed or the plan need to be corrected. **Keith** said he will get a letter from the surveyor about the bound if it is not there it will need to be put in. he will look into the erosion controls and remove the silt fence. **Kevin** said they should ask that this be done by a certain date and if it is not then a bond will need to be put in place. Let's give him to May 19<sup>th</sup>, 2011 that will be the second meeting in May. **Ron moved to have Dennis LaBombard and Keith Adamyk come up with a satisfactory decision in regards to the headwalls and for Keith to fix the erosion control issues, remove the silt fence that is still there, and find or install the missing bound and continue this discussion on May 19, 2011. Richard Seconded. Voted yes 5-0.**

#### Annual Review of Planning Board By-Laws

**Valérie** said that the Board needs to accept the By-Laws for the year even if there are no changes needed to the document. **Ron made a motion to accept the Planning Board By-Laws dated March 18, 2010 as written. Paul Seconded. Voted yes 5-0.**

#### Appointment / Re-appointment of Members & Alternates

**Valérie** said they have to discuss the members / alternate whose terms are up March of 2011. Terms expiring this year are Richard Randlett, Member and Dana MacAllister, Alternate. **Alan** said Kevin is not running for the Board of Selectmen again this year; we will be appointed another representative. **Kevin** said he would like to stay on the Planning Board as an Alternate.

**Ron made a motion to recommend to the Board of Selectmen that Kevin Gorgoglione be appointed to the Planning Board as an Alternate, term expiring March 2014. Richard seconded. Voted yes 4-0. Kevin abstained.**

**Richard** said that after thinking lengthly about it, he has decided he would like to remain a member of the Planning Board for another term.

**Ron made a motion to recommend to the Board of Selectmen that Richard Randlett be re-appointed to the Planning Board as a Full Member, term expiring March 2014. Paul seconded. Voted yes 4-0. Richard abstained.**

**Dana** said he would like to continue to be on the Board as an Alternate.

**Ron made a motion to recommend to the Board of Selectmen that Dana MacAllister be re-appointed to the Planning Board as an Alternate, term expiring March 2014. Paul seconded. Voted yes 5-0.**

**Richard moved to adjourn at 9:15 pm. Paul Seconded. Vote yes 5-0.**

**PLANNING BOARD MEETING**

**Minutes**

**March 17, 2011**

**Present: Alan Rosenberg, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate, Voting for Mike Papadimatos  
Valérie Maurer, Town Planner**

**Absent: Mike Papadimatos, Co-Chair, Darrell Philpot, Selectmen's Representative, and Paul Anderson, Alternate.**

**6:30pm to 8:00pm** Master Plan Update. Discussion with NRPC and Master Plan Committee for final draft review of the following chapters: Vision, Land Use, Energy and Natural Resources.

**8:00 pm** – Alan open the Planning Board business meeting.

**Minutes**

**Ron moved to approve the Planning Board minutes of March 3, 2011 as written. Richard Seconded. Vote yes 3-0.**

**Alan** asked Dana to vote for Mike Papadimatos **Dana** agreed.

**Case #2011-1: F-18, Gavin Rev. Trust 4-lot Subdivision, Off Rocky Pond Road**

In attendance for this hearing Randy Haight (Meridian land Services), Dennis LaBombard (LaBombard Engineering LLC (Town Engineer)), Francis and Robin Gavin (Applicants), James and Denise Townsend (abutters at 46 Rocky Pond Road lot F-18-2), Steven and Carolyn McLaughlin (abutters at 52 Rocky Pond Road Lot F-18-3), David Shed (not an abutter but speaking on behalf of Steven and Carolyn McLaughlin), Christopher Pestana ( abutter at 49 Rocky Pond Road lot F-60-2), and Denise Morrissette (11 Scabbard Mill Brook Road).

**Valérie** said Randy has corrected all the concerns she had forwarded to him after the last plan submitted. She just received the updated plans shortly before this meeting and has not had a chance to review it.

**Randy** said he has also made corrections to the plan from the list of concerns that Dennis had sent him also. **Dennis** said if the updates were completed as requested he doesn't think he would have an issue with this plan but said that he will review the updated plan and provide a report. **Alan** said the letter from the Road Agent (Jerry Farwell) states off site improvement will be \$1,500 for lots F-18-8, F-18-9, and F-18-10. This will be for improvements to Rocky Pond Road.

**Valérie** said note 18 was added to the plan which states “The driveway to the dwelling on lot F-18-8 is proposed to be less than 700ft long in order to comply with the maximum fire protection drafting distance of 2500’, if the driveway exceeds 700’ then a sprinkler system will be required for the proposed dwelling.” That was the only concern the Fire Department had and this note covers that. **Valérie** said Town Counsel has the common driveway easement and had not commented on that yet. **Valérie** said she will follow up on that. **Valérie** said there is also an email from Jim Belanger from Hollis, who is an abutter but is unable to attend this meeting. Mr. Belanger states that his property is land locked and during the previous subdivision he had gone to the Planning Board meeting and asked that notes were added to that plan that states the Gavin’s were to offer him access to his landlocked property in the event of a future subdivision. **Randy** said Mr. Belanger has not contacted the Gavin’s about a right of way through the common driveway. **Randy** said he found a deed that gives Mr. Belanger access to his lot off Rocky Pond Road in Hollis (deed reference book 7855 page 0803 and plan 35026). He also has a walking access through a lot in Hollis. **Randy** said he could always purchase a lot from the Gavin’s to access his property. The Board agreed there is access to Mr. Belanger’s property and he has not contacted the Gavin’s about a right of way.

**Valérie** said at the last meeting there was a concern with the vernal pools. There was a permit submitted to the state about wetlands that reads “During the wetland delineation of this property the area surrounding the stream crossing was evaluated for the presence of vernal pools. No depressions or wetlands were found that could function as a vernal pool and support obligate vernal pool species on this property.”

**Valérie** said there is no date or signature on this letter. **Randy** said we can have it stamped, signed, and dated if you wish. **Denise Townsend** asked if this letter was looked into and written recently or if it is an older letter. **Randy** said it was just done a week and a half ago. Tim Ferwerda from Meridian Land Services went out to review this property for the dredge and fill permit for the state and has written this letter in response to not finding any vernal pools in the possible construction areas.

**Valérie** said she was also concerned with the snow removal. The area depicted on the plan doesn’t look like enough room to store snow. **Randy** said there was plenty of room for snow storage. **Dennis** said he thinks the plans are in pretty good shape but would like more information on the bridge. He also asked to add check dams for erosion control and they have been added.

**Steve McLaughlin** asked why the driveway was changed from the left side of the creek as depicted in the last plan instead of squeezing it between the property line and the wetlands. **Randy** said that during the subdivision done in 1996 we had been asked by the Board to add a future road for informational purpose only. That is what was recorded but it was not the intention of the applicants to put the road there. It was at the request of the Planning Board at the time for information only. **Steve** said it seems like it would be a better plan to put the road in where the future ROW was depicted on the 1996 plan.

**David Shed** (relative of the McLaughlin’s) said the proposed driveway is in a very wooded area until you get to this section (along the McLaughlin’s property). The plan shows that the common driveway will be graded right to the property lines. They should be able to build without taking out the wooded area. He also asked if the bridge will be big enough for the rain and snow melt that will occur. The area is slanted down to the McLaughlin property and the drainage for this is swales when this freezes; there will be a stream and a lot of erosion. The guard rail for the bridge is also a concern; will it be a metal guard rail or a wooden rail? There is also a propane tank owned by the McLaughlin’s that is very close to the property line and will be close to the proposed driveway. They could add a timber guard so that no one slides off the road and hits it. **Randy** said he understands but he doesn’t think it will work. This plan has been reviewed by the Town Engineer. As far as drainage is concerned, we have done everything that has been asked. This will work. There will be a culvert properly installed for when the swales are frozen. **Jim Townsend** asked if a common driveway needs a stop sign and a name. **Randy** said per the Town common driveway regulations it needs to be named and it needs a stop sign. This will not be a paved road. **David Shed** asked if this isn’t paved, with the steep slope of this common driveway, won’t there be erosion issues? **Randy** said the Town Engineer has reviewed this plan and he

doesn't think there will be a problem with erosion. **Steve McLaughlin** asked if he could request that this be paved to keep the dust down. **Randy** said this will have more shade than the other road there is more shade and less dust. **Denise Townsend** asked who will maintain this driveway. **Randy** said that is covered in the common driveway documents. The lot owners will have to maintain the driveway. **David Shed** said there will be pooling at the intersection with Rocky Pond Road in the wintertime. **Randy** said if it is built to specifications and maintained by the owners, the water will not pool at the intersection. **Denise** asked why the creek was diverted years ago. **Randy** said the culvert wasn't installed properly but that will be corrected. **Alan** asked if the water flow will return to its original pattern. **Randy** said yes. **Alan** said there still seems to be a concern with the vernal pool status. **Randy** said a vernal pool is not connected to moving water because predators are there. It also has to maintain 1 1/2 feet of water in the growing season for the eggs to grow. **David Shed** asked if they can get a second opinion on the vernal pool situation. **Randy** agreed they could have someone else go out to do a survey if the Board wishes. Valérie recommended that the Board schedules a site walk. **Robin Gavin** asked Randy if he knew where the McLaughlin's property line is and if not can they find it during the site walk. **Randy** said yes. **Chris Pestana** said he lives across the street and is trying to picture what this will look like. **Randy** said the closest house to the road will be 600 feet, you might see lights in the winter time from your house.

**Denise Morrissette** asked when the plan is verified for engineering purposes, does that include where the snow will go. It doesn't look like there is enough room. **Randy** said yes there is plenty of room; in some areas, there is more than 10 feet on the side of the driveway. **Denise Townsend** asked if there was a minimum set back for the propane tank to the property line. **Randy** said he thinks there is only a 15 foot setback from the house only. **Dana** said he did not think that there are regulations for propane tanks being too close to the property lines.

The Board decided to schedule a site walk of the property to see if there are any vernal pools, look at the McLaughlin's property line, on Saturday, March 26, 2011 at 9:00am. This will be noticed and open to the public, the abutters are welcome to attend. The Board will also request that the Conservation Commission attends as well. **Randy** suggested parking the cars in the Gavin's driveway. **Francis** said that was fine.

**Dana moved to continue Case #2011-1: F-18, Gavin Rev. Trust 4-lot Subdivision to April 7, 2011. Ron Seconded. Vote yes 4-0.**

**CIP – Creation of the 2012-2017 Committee to be approved at the April 7<sup>th</sup> PB Meeting**

**Alan** said the Board was extremely impressed with the work that was done last year and would like to ask Paul Anderson if he would like to volunteer again this year for the next meeting.

**Richard moved to adjourn at 9:55 pm. Dana Seconded. Vote yes 4-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Minutes**

Richard moved to approve the Planning Board minutes of March 17, 2011 as written. Ron Seconded. Vote yes 3-0.

**Nomination of Co-Chairs for the Planning Board**

Richard moved to nominate Alan Rosenberg as the Co-Chair of the Planning Board. Mike Seconded. Vote yes 3-0.

Ron Moved to nominate Mike Papadimos as the Co-Chair of the Planning Board. Richard Seconded. Vote yes 3-0

**7:15 pm - Public Hearing- Tree cutting on a Scenic Road, North Mason Road.**

Clarence Farwell in attendance speaking for the Road Agent.

Alan read the public hearing notice:

*Pursuant to R.S.A. 231:158, the Brookline Planning Board will hold a public hearing at 7:15 PM on Thursday, April 7<sup>th</sup>, 2011 in the Town Hall Meeting Room to consider a request for trimming trees along 1,500 feet on North Mason Road (a scenic road). The purpose is to upgrade a portion of North Mason Road and to provide better visual sight distance for traffic safety.*

**Clarence** said this is the 4<sup>th</sup> or 5<sup>th</sup> road upgrade. In 1976, from the Transfer Station to the Mason town line, North Mason Road was designated a Scenic Road. Per the RSA's the road needs to be 20 feet wide so some trees will need to be cut. They have been marked for a week or so. **Valérie** said the budget for this was approved at Town Meeting. **Richard** asked how far this will be paved. **Clarence** said it will be paved to Ben Farnsworth Road. **Bill Lee** (116 North Mason Road) said there are trees already marked but is there something that regulates how far back you can cut trees. **Clarence** said they will just cut enough to widen the road and for drainage purposes. **Ron made a motion to allow the Road Agent to do the tree cutting on North Mason Road. Richard Seconded. Vote Yes 4-0.**

**7:25 pm - NRSP ##2011-A:C-10-3 Home Business, David Lindof, North Mason Road, Firearms Restoration**

**David Lindof** (Applicant) said he would like to repair and restore fire arms as a home business part time for extra income. This will be a low key business with no signs at the house and no traffic. This will be word of mouth and through advertising. He said he will not store any ammunition at his home. He has met with Scott Knowles from the Fire Department and has a letter from the Fire Department. He still needs to apply for a Federal Firearms permit with the State but he was waiting for the outcome of this meeting. Members did not have other question on the application.

**Richard moved to accept the application. Seconded by Mike. Voted Yes 4-0.**

**Alan** said when he does receive the permit the Board will need a copy for the files. **Valérie** said if they approve the application, the Board will need to schedule a compliance hearing in about one year after this hearing. **David** said that was fine. **Alan** read the conditions of approval written in the Staff Report:

- All fees for case review, meeting time and inspections shall be paid before the applicant starts operating the Home Business.
- Any modification and/or change to the home business as approved at the shall be submitted to the Board for review
- Report of final inspection from the Fire Department before the applicant starts operating the Home Business.
- Copies of necessary State and/or Federal permits shall be provided to the Board.
- A compliance hearing shall be held a year after day of approval.

**Ron moved to approve case # NRSP#2011-A: C-10-3 Home Business, David Lindof, and North Mason Road with the previously read conditions of approval. Richard Seconded. Vote Yes 4-0.**

**7:35 pm - Case #2011-1: F-18, Gavin Rev. Trust 4-lot Subdivision, Off Rocky Pond Road**

In attendance for this hearing Randy Haight (Meridian land Services), Dennis LaBombard (LaBombard Engineering LLC (Town Engineer)), Francis and Robin Gavin (Applicants), Ann Gavin (abutter at 25 Birch Hill Road), Maria Gavin (Sister to Francis and Ann Gavin), Denise Townsend (abutter at 46 Rocky Pond Road lot F-18-2), Steven and Carolyn McLaughlin (abutters at 52 Rocky Pond Road Lot F-18-3), David Shed (not an abutter but speaking on behalf of Carolyn and Steven McLaughlin, his sister and brother in-law).

**Randy** said they had a site walk on March 26<sup>th</sup>. He has addressed all of Dennis's engineering concerns and added the excavation area and the propane tank location on the plan. They are not proposing to do any work in that excavated area where the water has gathered. **Randy** said there is also another letter from in regard to the excavated area. **Alan** read the letter:

**PLANNING BOARD MEETING**

**April 7, 2011**

**Page 3 of 5**

During the wetland delineation of the above referenced property an excavated area northwest of the wetland crossing location was noticed. This area is a recently excavated site in an upland portion of the property. Although there is water in the base of the excavation there were no other wetland characteristics observed and this area was not delineated as a wetland. At this time this area is not believed to be a vernal pool as no vernal pool identifiers have been observed. This area does not have a historical record of a vernal pool as it is a recent excavation that created this area. It is also unknown if there will be water present in the excavation for a duration of sufficient time to support successful breeding of obligate vernal pool species.

**Alan** said this letter is written by Timothy Ferwerda a NH Certified Wetland Scientist #039.

**Valérie** said she is still waiting for Town Counsel to review the driveway easement. We also need to discuss the relocation of the propane tank on the abutter's property. At the site walk you could see the propane tank was put in beyond the property line. After the tank is relocated there should be something on file to show where the tank is located. **Randy** said the tank is clearly over the property line. The Gavin's are more than happy to relocate at no expense to the current owners when they start construction. **Valérie** said that at the site walk they were also questioning the site distance looking toward Hollis from the end of the proposed driveway. **Randy** said he added a note on the first plan revision showing there is enough site distance.

**Valérie** said all other questions were answered at the last meeting and we are just waiting for Town Counsel to review the common driveway documents.

**Denise Townsend** asked how long it would take to move the propane tank. **Randy** said it may take a day. **Denise** asked if there was a State law that requires a propane tank to be so far away from a property line. **Dana** said there isn't a State law; towns usually regulate that. **Randy** said most towns its 15 feet from the property line. It also has to be 70 feet from where the delivery truck will park to fill it, per the fuel company. **Denise** said, for the record, the Gavins will move the propane tank at no cost to the homeowners and it will be completed with a minimal effect to the homeowners.

**David Shed** asked if they could get a second opinion on the vernal pool. In a couple of weeks when the weather is warmer he would like to make sure there is either or not a vernal pool. The Board agreed to contact UNH Coop Extension and see if someone could go out and look into it. **Alan** asked how far away from the proposed driveway is the area they are questioning whether it is a vernal pool or not.

**Randy** said it's about 30ft from the area that will be graded and 40 ft from the driveway. **Ann Gavin** said they already have a letter from a professional stating that there is no vernal pool; he has done his due diligence why would we have another company come out to do the same thing. **Randy** said this area was an excavation area recently done. There is no mud and it's in the upland soils. We were going to fill it back in if it wasn't declared a vernal pool. **Alan** said filing it back in may be cause for concern; we will call UNH Coop Extension and see if they can make it to the site.

**David Shed** also asked about having the Gavins put something up to block the dust and lights coming off the new common driveway. **Darrell** asked the homeowner and the Gavins if they can come up with a compromise. They agreed they would discuss it. **Alan** said maybe by the next meeting they will have a decision. **Darrell** said he thinks they will negotiate in good faith and come up with something by the next meeting.

**Valérie** read the conditions of approval:

- All fees associated with the case review (Engineer, Town Planner, Legal shall be paid prior to the issuance of a permit by the Building Inspector.
- A new wetland crossing permit shall be obtained by the NH DES and number added to the final plan.
- New lots F-18-8, F-18-9 and F-18-10 are subject to an impact fee per the Brookline Zoning Section 2100, in three separate amounts. The impact fees of \$222.14 (for ambulance facility), \$1,304.24

**PLANNING BOARD MEETING**

April 7, 2011

Page 4 of 5

- (for Brookline school system) and \$1,843.17 (for Hollis/Brookline Coop Middle School) are payable to the Town of Brookline at the time the Certificate of Occupancy is issued for each lots.
- The applicant needs to meet with the Board of Selectmen to sign the Off-Site Improvement agreement.
  - Off-Site Improvement agreement between the Board of Selectmen and the applicant shall be recorded before or at the time the final plan is recorded. Off-Site Improvement fee is to be paid at the time the building permit is issued.
  - A letter from the Licensed Surveyor shall be received stating that all bounds are in place before a Certificate of Occupancy is issued.
  - The applicant shall submit 8 paper copies of the final plan and a permanent, reproducible Mylar.
  - The C.O. for the last dwelling being built will be issued only after the Town Engineer provides the Building Inspector and the Planning Board with a final, satisfactory report.
  - All conditions of approval shall be printed on the final plan prior to its recording.
  - Propane tank for lot F-18-3 to be moved at the Gavin's expense.

**Alan** requested that, before the propane tank is moved, to please let the homeowners know what kind of a time frame and where it will go. **David Shed** asked if this will be a part of the final record. **Alan** said they would like it added to the plan before it is recorded.

**Alan** said in regards to the vernal pool area in question they will need a letter in the file stating that they will stay away from that area and will put up a silt fence to protect it.

**Darrell moved to approve plan number 2011-1: F-18, Gavin Rev. Trust 4-lot Subdivision with the conditions just read. Richard Seconded. Vote yes 5-0.**

**9:20 pm - CIP – Creation of the 2012-2017 Committee to be approved at the April 21<sup>st</sup> PB Meeting**

**Alan** said he has not talked to Paul Anderson about being the Chairman again this year. **Richard** said he did a great job last year. **Alan** said he will speak to him before the next meeting and find out if he wishes to Chair again. **Alan** said the Committee will need a member from the Planning Board, Board of Selectmen, Finance Committee, Facilities Committee, and one member at large. **Alan** said he would volunteer to be the Member at large this year if no one else is interested. **Valérie** said she will contact all the Boards and see if anyone wants to volunteer.

**Workshop**

**Valérie** said they will need to start working on the corrections or alterations for the Subdivision and Non Residential Site Plan Regulations. She only has a few proposed amendments. The Planning Board should ask for an electronic copy of plans and also 8 copies of the plan after every revision is too many, at least for the majority of the cases. The Board should discuss how many copies on top of and electronic copy they should request. **Valérie** suggests 4 copies of each revised plan. **Dana** said in Milford they receive PDF copies of plans.

**Valérie** said it should be requested that the CO is not issued until Dennis LaBombard (Town Engineer, LaBombard Engineering) write a letter signing off on a given site. **Kevin** said they should also look into some language regarding broken signs. They should be in good condition before they are released to the new owners.

**Master Plan Meeting on April 21, 2011**

**Alan** said the next Planning Board meeting is also a Master Plan meeting and he wanted to know if everyone was okay with meeting at 6:30 pm again. The Board agreed. **Valérie** said she will call Jill Longval at NRPC and let her know the start time.

**Richard moved to adjourn at 9:40 pm. Darrell Seconded. Vote yes 5-0.**

Dana MacAllister, Alternate  
Kevin Gorgoglione, Alternate

**8:25 pm** – Mike opened the meeting and asked **Paul** to vote for Richard.

(Note: prior to the regular meeting, the Board met with the NRPC at 6:30 pm to review the Master Plan updated chapters)

**Minutes**

**Alan moved to approve the Planning Board minutes of April 7<sup>th</sup>, 2011 as written. Ron Seconded. Vote yes 3-0.**

**Gavin's Subdivision, Case 2011:1:F-18.**

The case was approved at the April 7<sup>th</sup>, 2011 meeting but the Board discussed again the issue of possible existence of vernal pools on the property. After the Board contacted UNH Cooperative Extension asking for assistance, an email was received suggesting that a private consultant could be hired to look at vernal pools.

The Board discussed this option. It was mentioned that there might or might not be some evidence right now, just looking at the water (temperature has to be around 40 degrees at night). For now, the Board did not decide to contact a private consultant. Once the work for the subdivision starts, Dennis LaBombard who does the inspections could take a look at it.

The Board will follow up on the issue.

**2012 – 2017 Capital Improvement Plan (C.I.P.)**

The following volunteers agreed to serve on the Capital Improvement Committee this year:

<b>Paul Anderson</b>	Planning Board
<b>Mary Bendix</b>	Finance Committee
<b>Darrell Philpot</b>	Board of Selectmen
<b>Alan Rosenberg</b>	Member at Large
<b>Ann Somers</b>	Facilities Committee

**Alan and Paul** discussed the schedule (sending documents, meetings with Departments, etc.) and decided to keep it as it is now.

**Paul** will contact the Committee's member to schedule a first meeting (nomination of the Chair and Secretary, schedule upcoming meetings, etc.)

**Paul moved to adjourn at 9:05 pm. Ron Seconded. Vote yes 4-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Mike Papadimatos, Co-Chair** \_\_\_\_\_

Kevin Gorgoglione, Alternate, and Paul Anderson, Alternate.**

**Minutes**

Not enough people in attendance to approve the minutes from April 21, 2011.

**Master Plan Chapters**

**Alan** said the first three chapters are completed. **Richard moved to approved the Land Use, Natural Resource, and Vision chapters for the Master Plan Update and allow them to be public. Darrell Seconded. Vote yes 3-0.**

**Alan** asked Valérie to inform NRPC to remove the draft watermark that they have been accepted and announced to the viewing audience that these chapters can be reviewed online at [www.brookline.nh.us](http://www.brookline.nh.us) and click on master plan update.

**Mixed Use Zoning**

**Alan** said a lot of people are interested in mixed use zoning. They would like to bring in more commercial business to offset the taxes, shop locally. We have been talking about this for a couple of years now. **Valérie** said she would like to put a document together and then invite the residents and businesses on Route 130 to attend and ask for their input. We should also ask Avitar Associates of New England what the impact on assessed values would be if that area became a mixed use zoning area. This might be a question asked by the homeowners in attendance at that meeting. **Alan** said they should ask Dana if there is any in Milford and he could probably give us a lot of input on the subject. South Street in Milford looks like there is a project going on that looks like they are converting older homes into office spaces. **Valérie** said she will ask Hollis also about mixed use zoning in the Ash Street area. They have been doing that for a long time. Also the meetings for the visioning forum we completed in 2008 has a lot of feedback from residents as well. **Darrell** asked if this is something they should spend time on or not. **Alan** said they should have something down on prepared before a contractor shows up at the

Planning Board meeting ready to do a project and they have to tell him he needs to come back after town meeting. The Board agreed to hold a meeting on June 16, 2011 at 8:00pm in the Town Hall meeting room and they will invite the people this will effect the most on Route 130 from town line to shortly past Austin Road. **Alan** read the letter Valérie said she was going to send out to invite residents to the meeting. **Ann Somers** suggested that it asks for input and not for volunteering.

**Richard moved to adjourn at 8:15 pm. Darrell Seconded. Vote yes 3-0.**

Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Valérie Maurer, Town Planner

**Absent:** Darrell Philpot, Selectmen's Representative  
Dana MacAllister, Alternate  
Kevin Gorgoglione, Alternate  
Paul Anderson, Alternate

**8:00 pm – Alan** opened the meeting

(Note: prior to the regular meeting, the Board met with the NRPC at 6:30 pm to review the Master Plan updated chapters)

**Minutes**

**Ron moved to approve the Planning Board minutes of April 21<sup>st</sup>, 2011 as written. Mike Seconded. Vote yes 3-0.**

The Board did not have enough members present to approve the minutes of the May 5, 2011 meeting.

**Gavin's Subdivision, Case 2011:1:F-18.**

**Valérie** said that Randy Haight, Meridian, contacted her and asked if he could go ahead with the final plan since all the NH State permits were approved. The only item that is pending is the discussion about the possible existence of a vernal pool on the property. **Valérie** contacted Dennis LaBombard who said that he would definitely be looking at the potential vernal pool a part of any onsite inspections that he does. He would not make any "special trips" to look only at this area unless requested to do so by the Board. Since the construction will not impact this area he does not think there should be a problem. Dennis does not see any reason not to allow the Board to proceed with the final approval. The Board did not have any additional issue and felt comfortable with Dennis' input. The Board allowed Valerie to get back to Randy and tell him to go ahead and finalize the plans.

**2012 – 2017 Capital Improvement Plan (C.I.P.)**

**Paul** could not attend the meeting. The item will be added to the June 2, 2011 agenda. **Alan** said that he would contact Paul and see what the status is. **Alan** asked Valérie to email him contact information for the Committee's members.

**Other items**

***Mixed Use Zoning – Common wells / septic systems***

**Valérie** said that letters were sent to property owners on Route 130 inviting them to a brain storming session on June 16, 2011. The meeting was to be held at the Town Hall but considering the possibility that many interested residents would attend, it was suggested to move the meeting at the Fire Station. **Valérie** will check is the F.D. meeting room is available and book it. There is a screen at the Fire Station what we will be able to use if we need to.

**Ron** offered to take some pictures of buildings in the area that have living and business areas (mixed use) and show them to people who will attend the meeting.

**Alan** asked Valérie if she would have something prepared for the June 16 meeting. **Valérie** said that she would gather information that will be provided to participants.

**Ron** discussed signs and talked about his experience with the sign application process he had to go through in order to replace the existing/old sign with a more attractive one. He was denied an internally lit sign because this is not allowed in the Residential district, even if he has been running his business for many years. He was authorized by the Zoning Board to illuminate the new sign with 2 attached spot lights. The sign ordinance, as previously discussed by the Board, will need to be looked at.

**Valérie** said that she contacted Hollis and Townsend to get information on common well and septic are used in development such as the Market Place in Hollis. There are two large septic fields and a private well serving the entire complex. In addition to the stores, day care center, there is a 24-unit elderly housing facility on the property. Hollis also has the "school well" which serves the Hollis schools, the Ever Ready fire house, the "Block" (an apartment building on Main Street), the Wheeler House, Town Hall, the Lawrence Barn and one private residence. In Townsend, all septic systems are individual but about 5,000 residents receive town water via 5 wells that send the water to 2 storage facilities. The other 1,500 residents have private wells. **Valérie** asked members if they wanted her to continue to do more research that could benefit Brookline in the future (could be used for large commercial development on Rte 13, mixed use buildings, etc...) **Alan** said that this would be valuable information to have. The Board agreed.

**Richard** announced that he would not be able to attend the June 2, 2011 meeting.

**Richard moved to adjourn at 8:25 pm. Ron Seconded. Vote yes 3-0.**

**8:00 pm – Alan** opened the meeting

(Note: prior to the regular meeting, the Board met with the NRPC at 6:30 pm to review the Master Plan updated chapters)

**Minutes**

**Ron moved to approve the Planning Board minutes of June 02, 2011 as written. Mike Seconded. Vote yes 3-0.**

Not have enough members present to approve the minutes of the May 5 & June 02, 2011 meetings.

**Mixed Use Zoning, Route 130 Corridor – Brainstorming Session**

In addition to the Planning Board members, attendees were: Robin Katz, Gina Bent, Louise Price, Kathy Pelletier and Joe Raneri.

**Alan** welcomed the residents who attended the meeting and provided feedback on previous discussions and forums related to Mixed Use that generated tonight's brainstorming session. **Alan** explained that the Planning Board was looking for input and comments from the public. All present were given a hard copy of a PowerPoint presentation. Pictures of example of Mixed Use in other towns were also displayed. **Valérie** thanked all who attended tonight's meeting and went over the presentation she put together, copy of which is attached to these minutes. Valérie thanked Ron Pelletier for all the pictures he took to show at tonight's meeting. Attendees were then invited to ask questions, offer comments and all were highly in favor of allowing small businesses in the center of town.

Some of the ideas were:

- Make the center of town a destination for people

- Walking and biking between destination
- Have family oriented businesses
- Businesses such as a coffee shop, antique shop, would be desirable
- Keep the historical character of the Town
- Quick stop for people to shop and get personal and medical care
- Place for people to gather

Mixed Use for other areas in town was also mentioned but the Board explained that, for now, the concentration was on the Rte 130 corridor. Other areas such as Route 13 will probably be considered but would require different rules and would allow for other / additional type of businesses.

Next steps were then discussed, the first one being to create a Town Center / Mixed Use Committee. If the goal is to have a warrant article submitted for March 2012 Town Meeting, there will a lot of work to do in a short period of time such as reviewing the Zoning Ordinance and make sure that existing sections would be revised as well in order to comply with a new Mixed Use section (e.g. Sign Ordinance, Parking, etc.). Non-Residential Site Plan regulations probably will need to be looked at. Development guidelines, specific to the mixed use zoning, would need to be put in place. Other duties will be to look at what other communities have in place for Mixed Use ordinances, and in collaboration with the NRPC, develop a Mixed Use Zoning Overlay District Ordinance for Brookline. Then the Planning Board will have to hold Public Hearings in November and present the proposed new Zoning section.

Once a Committee is formed, members can discuss how to “split” the work and have sub-committees working on specific tasks.

Procedure on how to advertize the creation of the Committee was discussed. The Board of Selectmen will be asked to look into it and put an announcement on the website and the Yahoo group asking volunteers to submit their name by June 27. **Darrell** said that he would get in touch with the Board of Selectmen and will discuss this at their next meeting. Postings for the creation of the Committee will also be put on Channel 13, Town Hall, and Post Office. The Planning Board will continue the discussion on July 7<sup>th</sup>, once a Committee has been formed.

Residents **Robin Katz, Gina Bent, Kathy Pelletier** and **Joe Raneri** said that they were very interested in joining the Committee.

**Ron Pelletier** and **Mike Papadimatos** volunteered to represent the Planning Board on the Committee.

**Alan** concluded the meeting by thanking everyone for coming and their willingness to volunteer their time on this project.

**Meeting adjourned at 9:05 pm**

**The next Regular Planning Board meeting will be held on July 7<sup>th</sup>, 2011, starting at 7:00 pm**

**Darrell move to approve the minutes of the May 5<sup>th</sup> 2011 Planning Board meeting as presented.  
Richard Seconded. Vote yes 3-0.**

**Darrell moved to approve the June 16<sup>th</sup> 2011 Planning Board minutes as written. Ron Seconded.  
Vote yes 3-0.**

**Code of Ethics**

**Alan** said the Board of Selectmen has asked that we review this and adopt this code of ethics.  
**Alan** read the document. (Attached to the minutes)

**Darrell made a motion for the Planning Board to adopt the Code of Ethics that was recommended  
at the 2005 Town Meeting. Ron Seconded. Vote yes 4-0.**

**Mixed Use / Town Center - 2011-2012 Committee Organizational Meeting**

In attendance for this meeting: Rich Bobich -19 Pepperell Road, Judy Cook – 10 Main Street, Randy Haight – 21 Milford Street, Sarah Marchant – 19 Milford Street, Brian Rater – 31 Mason Road. Mark Fenske – 9 Main Street & 15 Milford Street.

**Alan** said there has been discussion and interest in a mixed use overlay district for Route 130 by the residents. This could apply anywhere in town. We are here to start figuring out what the town would like to do. **Valérie** said tonight is just for the committee to introduce themselves and come up with a meeting

PLANNING BOARD MEETING

July 7, 2011

Page 2 of 5

schedule. The committee will need a chairperson and a secretary. The Board of Selectmen provided a charter for this committee and it states what is to be accomplished. You will need to look at reviewing the Zoning Ordinance and coming up with guidelines for a mixed use overlay district. For example being able to preserve the look of the center of Town and if needed the Town would be allowed to ask for a property to be maintained as far as esthetics and making sure the sign is in proper condition. You will also need to come up with an outreach program to make sure the information and meeting dates gets out to the public. This is not to create a commercial district but an overlay. Small scale offices or shops along the town center: Doctors office, lawyer's office, small shops, Boutiques, etc. To allow the Town center other use options. There is a lot of work that needs to be done. **Ron** said in all the discussions the Planning Board has had we were discussing the whole Route 130 corridor. **Valérie** said yes that is correct but they were originally concerned with people being able to walk to these areas but with the sidewalk project extending to the Post Office that will be able to happen.

**Judy** said they discussed this about 15 years ago and they had come up with the Home Business Zoning Ordinance. She is not sure what this will accomplish. **Valérie** said the home business regulations are restrictive. They only allow a certain percentage of the home for a business and with mixed use they could use the first floor as a business and live on the second floor as an example of use. **Darrell** said instead of shoe horning it into the regulations it is a better idea come up with mixed use options. **Judy** said the town center lots are greatly under sized and they barely fit the existing well and septic. They will not get town water and sewers in the town center; we can't even finish the Safety Complex Project. No one wants to come up with that kind of money. We have allowed plenty of business in the Center HVAC, dog grooming, and there are apartments at 17 Main Street. There is little to no parking for customers. **Valérie** said this is not to create more traffic; it is to allow the homeowners more options. **Sarah** said she thinks this was born from a lot of interest. This will be a tool to allow homeowners more uses for their home and to supplement the tax base. **Judy** said they can't even fill the commercial spots on Route 13. There is a lot on Route 13 (lot G-52-1) that was cleared and there was a plan for a grocery store and that never happened the land still sits vacant. **Judy** said at the end of the visioning meeting the consensus was people wanted to keep it small rural community. **Robin** said Hollis has added a lot in the town center and it was done nicely. With limitations this could be a good idea. **Brian** said this committee will be coming up with the best recommendations to present to the townspeople and allow them a vote in a future Town Meeting. **Alan** said yes the end result the Town can choose to accept or not. People have expressed an interest expanding the tax base. A few people have come before the Board and with the restrictions in the Ordinance the applicants have said "Brookline doesn't seem very business friendly". The charge of this new Committee will be to figure out what will work best for the Town and come up with a section for the Zoning Ordinance if the Town votes it in. We need to give people more options. **Mark** said the Town center is in the 100 year flood zone which is more like 20 year, 10 year or even annual year flood zone. Amherst and Hollis started with a stringent historic district, which we do not have. This will have a huge impact on wells and septic and all the radius encroach on each others property due to the lot sizes. You would need easements to further encroach to expand or replace something. You will have to meet ADA and State mandates when renovating the buildings. This would be a huge project to make these houses viable for access. **Mark** suggested making Post office Drive connect to Old Milford Road and make a commercial district there that would keep the traffic down. **Mark** said the Board is barking up the wrong tree trying to make a commercial district in the center of town. **Darrell** said it is the purpose of this committee to present the Townspeople the best option or ideas. **Valérie** said the initiative of this was based on the master plan survey and the meeting 68% of the responses were in favor of offering mixed use zoning in Town.

**Valérie** said tonight is just to set up a meeting schedule and they will need to pick a Chairperson and a Secretary. The new committee members introduced themselves. They agreed to set up a meeting on

Wednesday July 13, 2011 at 7:00pm. **Ron** offered the use of his building (Brookline Event Center (Brookline Auction Gallery), 34 Proctor Hill Road). **Rich** suggested they get to know each other during the first meeting then pick a Chairperson and a Secretary. The Board and the Committee agreed. **Alan** asked they keep the Planning Board informed and the Planning Board would like to check in with the Committee regularly. **Alan** thanked everyone for volunteering.

**Master Plan Update Contract with Nashua Regional Planning Commission**

**Alan** said the new contract is in the mail from NRPC. To allow them continue the Master Plan Update. It states exactly what the warrant article did in the last Town Meeting. This contract is not to exceed \$31,000. The contract will be given to the Board of Selectmen to sign. **Darrell** asked if it could be sent to all Board members via email. **Valérie** said yes.

**Richard moved to adjourn at 8:55 pm. Darrell Seconded. Vote yes 4-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Richard Randlett, Member** \_\_\_\_\_

**Ron Pelletier, Member,** \_\_\_\_\_

**Darrell Philpot, Selectmen's Representative,** \_\_\_\_\_

**The next Regular Planning Board meeting will be 7/21/2011.  
Minutes submitted by Kristen Austin.**

## **CODE OF ETHICS**

Non Binding Resolution passed March 2005 Town Meeting

### **1. Purpose**

The proper operation of democratic government requires that public servants be independent, impartial, and responsible to the people; that government decisions and policy be made through the proper channels of governmental structure; that public office not be used for personal gain; and that the public have confidence in the integrity of its government members to perform their duties without conflicts between their private interests and those of the citizens they serve.

The purpose of this code is to establish guidelines for the ethical standards of conduct for public servants. As such, the Town of Brookline

- Expects our public servants to act in the best interest of the town.
- Expects public servants to disclose, whenever possible, any personal, financial or other interests in matters affecting the town that come before them for action.
- Expects public servants to remove themselves from decision making if they have a conflict of interest.
- Expects public servants to be independent, impartial, and responsible to their fellow townspeople in their actions.
- Expects that the public servant's decisions and policies be made through the proper channels of government. ))

### **2. Definitions**

Conflict of Interest – A situation or circumstance where a public servant's personal, pecuniary or financial interests have the potential to interfere with the proper exercise of a public duty.

Pecuniary Interest – Any advantage in the form of money, property, commercial interest or anything else, the primary significance of which is economic gain; it does not include economic advantage applicable to the public at large, such as tax reduction or increased prosperity of the town.

Personal Interest – Interest in a matter, aside from official interest as a function of a public servant's position, which is more direct than that of the public at large and would influence the action of the public official.

Public Servant – All officers and employees of the Town, whether elected, appointed, paid, volunteer, or anyone acting in a position other than as a member of the general public. A person is considered a public servant upon their election, appointment, or designation as such, although they may not yet officially occupy that position.

Recuse – To remove or excuse oneself from participating in a specific action or discussion due to a conflict of interest. Recusal means to remove oneself completely from all further participation as a public servant in the matter in question. Public servants who have been recused shall immediately leave the room or shall seat themselves with the other members of the public at large who are present. When recused, public servants shall not participate in further discussions unless they clearly state for the record that they are doing so only as a general member of the public. A recused public official is effectively a member of the general public and shall not deliberate nor vote on the matter in question.

### **3. Code of Ethics**

Public servants shall avoid conflicts of interest.

Public servants shall recuse themselves and shall not take part in the decision-making process of any matter before the town in which they have a personal or pecuniary interest. Members of the Planning Board and Zoning Board of Adjustment are further bound by the provisions of RSA 673:14.

Public servants shall not directly or indirectly solicit gifts or accept or receive any gift (whether in money, services, loans, travel, entertainment, hospitality, premises or in some other form), under circumstances in which it could be reasonably inferred that the gift was intended to influence them in the performance of their duties or was intended as a reward for any recommendation or decision on their part.

Public servants must not disclose or improperly use confidential information obtained in the course of their duties.

No public servant shall use town letterhead or stationary for any purpose other than official town business. Members of boards, committees, and commissions may only use town letterhead for purposes approved by their respective board, committee or commission.

No member of a board, committee, or commission shall speak on behalf of their respective board, committee or commission unless authorized to do so by their respective board, committee, or commission. This is not to suggest that individual members cannot speak publicly, but rather to emphasize that they should clearly state they are speaking only on their individual behalf and not represent himself or herself as speaking for the board, committee, or commission.

PLANNING BOARD MEETING

Minutes

July 21, 2011

**Present:** Alan Rosenberg, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Darrell Philpot, Selectmen's Representative, Voting  
Valérie Maurer, Town Planner

**Absent:** Mike Papadimatos, Co-Chair, Ron Pelletier, Member, Dana MacAllister, Alternate, Paul Anderson, Alternate, and Kevin Gorgoglione, Alternate.

Minutes

**Richard** move to approve the minutes of the July 7<sup>h</sup> 2011 Planning Board meeting as written.  
**Darrell** Seconded. Vote yes 3-0.

Not enough members present to approve the June 02, 2011 minutes.

Mail

**Alan** said there is an email from Judy Cook that states she would like to become an Alternate on the Planning Board with a term expiring in March of 2013. **Alan** read the email "I would like to be appointed to the Brookline Planning Board as an alternate to fill the 2013 vacancy. Having been on the Planning Board in Brookline from 1991 to 2002 I feel that I have plenty of experience with the RSA's . I have attended 90% of the Law Lecture series put on by the Municipal Association now the LGC over a period of 11 years have a very good knowledge of how planning works in New Hampshire. I feel that I could be an asset to the Brookline Planning Board. Judy Cook"  
**Alan** said he has worked with Judy on the Planning Board before and so has Richard. **Judy** said she was a part of the Planning Board when there was extreme growth in Brookline

**Richard** made a motion to recommend to the Board of Selectmen to appoint Judy Cook as an Alternate for the Planning Board with a term to expire in March of 2013. **Darrell** Seconded. Vote yes 3-0.

Master Plan, Approval for Transportation, Economical Development, and Cultural/Historic Resources.

**Judy** said she found an error in a sentence that should be corrected but would let Valérie know where tomorrow. She will have to find it again but a few words were transposed in a sentence.

**Richard** asked if the Growth Ordinance information was updated in the new Master Plan Chapters. **Valérie** said yes it was taken out. **Judy** asked if that Ordinance will be brought back. **Richard** said yes when it is Justified. **Judy** said she didn't want it to be overlooked in the future. **Alan** said all surrounding Towns have also dropped the Growth Ordinance. **Judy** said it will be needed again she just wants everyone to keep it in the back of there minds. **Darrell** said we have at least 3 or 4 years before this is needed.

**Darrell** asked where the Master Plan update is posted online. **Valérie** said it is on [www.brookline.nh.us](http://www.brookline.nh.us) and [www.nashuarpc.org](http://www.nashuarpc.org).

**Darrell** asked about the chart in the Economic Development Chapter section 3.3. He asked if this was a trade study it only seems to mention 3 businesses Donovan Engineering, Bingham Lumber, and Superior Steel. They should have all the commercial businesses listed on that chart and a count of home businesses. If we have the information we should provide it. They are missing the gas stations, Bingham Lumber, convinces stores if we have it then it should be listed. If we have the information we should provide it. **Alan** agreed he can see listing all the Commercial Businesses on the chart. **Judy** said you would have to get a home business count by checking applications. **Alan** said ask if they can add the inventory of existing business to the chart and them we will get them a count of home business.

**Darrell** asked what committees were spawned from this in the past. **Alan** said after the 1997 Master Plan was completed there were a few short lived committees but the Cable and Web Committee came from that project. There was also an Economic Development group that has been on and off over the years.

**Richard** asked where the C.I.P. (Capitol Improvement Plan) came from. **Alan** said that came from the RSA's; in order to collect impact fees you must have a C.I.P. in place.

**Darrell made a motion to accept the Transportation chapter as presented. Richard Seconded. Vote yes 3-0.**

**Darrell made a motion to accept the Economic Development as submitted pending a change to the chart on section 3.3 page 4 to add all known commercial businesses to the chart and a number of home businesses in town. Richard Seconded. Vote yes 2-1. Alan voted no.**

**Richard made a motion to approve the Cultural / Historic Resources Chapter as submitted. Darrell Seconded. Vote yes 3-0.**

**Darrell moved to adjourn at 7:45 pm. Richard Seconded. Vote yes 3-0.**

**Non-Public 6:30pm**

**Mike moved to go into non-public session under RSA 91-A: 3. Ron Seconded. Mike Voted yes. Alan voted yes and Ron voted yes.**

**Ron moved to come out of non-public session under RSA 91-A: 3. Mike Seconded. Ron voted yes, Alan voted yes, and Mike voted yes.**

**Ron moved to seal the minutes. Mike Seconded. Voted yes 3-0.**

**7:00 pm Master Plan discussion.**

The Board discussed the Demographic, Community Design, and the Community Facilities Chapters of the Master Plan with Jill Longval and Julie Chizmas from Nashua Regional Planning Commission, the Master Plan Committee and Peter and Judy Cook.

**Minutes**

There were not enough people to sign the minutes from June 2<sup>nd</sup>, 2011 or July 21<sup>st</sup>, 2011.

**NRSP- # 2011-B: H-52-Inna Raneri, Home Business: Northeast Gold Recycling / Gift Shop.**

In attendance for this hearing: applicant Inna Raneri and Joe Raneri (applicants), Peter Cook and Judy Cook (abutters at 10 Main Street).

**Inna Raneri** said she would like to continue her business. They were originally located at 65 Route 13 with Weatherwise. **Inna** said Joe had moved his business Weatherwise Heating and Air Conditioning

back to the house where it was originally. She would like to take up a small space in the office for her business. **Inna** said she buys and sells gold. She brings the gold to be melted down and resold. The address she will use for is 1 Steam Mill Hill Road this was approved by Wes Whittier head of the Emergency Management Department. The only issue Valérie had was parking and they have 100sf of parking and it is 40 ft deep. The tenants that live in the apartment only take up 25ft of the parking lot. They have never had an issue with parking in the past and they have always run Weatherwise from this location. **Inna** said she will be using the same space as Weatherwise office for her business. The gold business will only take up a few draws of space in the office. She said they have over 3,000sf of living space and the home businesses only take up 300sf which is less than the 25% of the total living space. She doesn't think traffic will be an issue. She works by appointment for gold buying and selling but the gift shop would be open from 8:00 am to 7:00pm Monday thru Sunday. Northeast will be working seven days a week and by appointment only. **Richard** asked how many cars could be there at a given time. **Inna** said it varies it could be 1 to 2 cars a week up to 5 to 10 cars a week. **Inna** said the number of employees would be the same. She will have one sign for both businesses and she will get a permit from the Building Inspector.

**Alan** said in the future if something changes that is not on the application you will need to come back to the Planning Board. **Inna** agreed.

**Richard moved to accept the application # NRSP- # 2011-B: H-52-Inna Raneri, Home Business: Northeast Gold Recycling / Gift Shop. Ron Seconded. Vote yes 4-0.**

**Mike** said he had concerns about there being two home businesses at the same location but it is still under the allotted square footage that the Ordinance allows. **Judy Cook** said you have a committee working to come up with mixed use zoning ideas to allow businesses in the center of town. She has also spoken to some of the neighbors and hasn't heard any complaints. **Alan** said it is the responsibility of the Planning Board to "cross the T's and dot the I's". **Alan** asked if the parking was being shared with the tenants. **Inna** said yes there are four apartments and they are all rented this only takes up 25ft of the front parking area. **Inna** said they have three or four spots, if not a few more, for customers alone. **Alan** said that was his only concern and it seems like that has been taken care of and there is plenty of parking. **Alan** said the fire department didn't have any comments yet but the Emergency Management Director was fine with the address being listed as 1 Steam Mill Hill Road. **Alan** read the conditions of approval:

- 1. All fees for case review, meeting time and inspections shall be paid before the applicant starts operating the Home Business.**
- 2. A satisfactory report of final inspection from the Fire Department shall be provided to the Planning Board before the applicant starts the Home Business.**
- 3. A sign permit shall be approved by the Building Inspector.**
- 4. Any notification and/or change to the home business as approved at the August 4<sup>th</sup>, 2011 Planning Board meeting shall be submitted to the Board for review.**
- 5. A compliance hearing shall be held a year after day of approval.**

**Inna** asked when the compliance hearing will be scheduled for. **Alan** said it is just so the Board can see how things are going in a year from now. It should be held the first meeting in August of 2012. **Inna** asked if she will be informed when this meeting is scheduled. **Alan** said yes they will send her a notice.

**Richard moved to approve the application # 2011-B:H-52. Mike Seconded. Vote yes 4-0.**

### CIP

**Alan** said there is no update for the Capital Improvement Plan.

**Richard moved to adjourn at 8:45 pm. Richard Seconded. Vote yes 4-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Mike Papadimatos, Co-Chair** \_\_\_\_\_

**Richard Randlett, Member,** \_\_\_\_\_

**Ron Pelletier, Member,** \_\_\_\_\_

**PLANNING BOARD MEETING**

**Minutes**

**September 1, 2011**

**Present: Alan Rosenberg, Co-Chair, Voting  
Mike Papadimitos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Darrell Philpot, Selectmen's Representative, Voting  
Dana MacAllister, Alternate (Voting for Ron Pelletier)  
Valérie Maurer, Town Planner**

**Absent: Ron Pelletier, Member, Paul Anderson, Alternate, Judy Cook, Alternate, and Kevin Gorgoglione, Alternate.**

**6:30 pm Master Plan Update**

**Alan** said NRPC will not be attending tonight. They feel that they are far enough along in the Master Plan update that they will be able to just ask questions by email. The Three members from the Master Plan Committee Linda Chomiak, Tom Larochele, and Brendan Denehy that were in attendance agreed email was easier. **Alan** asked if the first Planning Board meeting of the month would still work for everyone to get together and discuss any questions that NRPC may have emailed over. They all agreed.

**7:00 pm Minutes**

**July 21, 2011 Public Minutes**

The Members that were in attendance for the July 21<sup>st</sup> meeting and were in attendance were Darrell, Alan, and Richard.

**Darrell moved to accept the Planning Board minutes from July 21, 11 as submitted. Richard Seconded. Vote yes 3-0**

**August 4, 2011 Non-Public Minutes**

Members in attendance at the August 4<sup>th</sup> non-public meeting that were in attendance to vote on the minutes are Alan, Mike and Clarence Farwell. Clarence is in attendance tonight for a discussion about 65 Route 13 but will vote on the Non-public minutes.

**Mike moved to approve the minutes of the Planning Board Non-Public Session on August 4, 2011 as written. Clarence Seconded. Vote yes 3-0.**

### **August 4, 2011 Public Minutes**

Members in attendance at the August 4<sup>th</sup> Public meeting that were in attendance to vote on the minutes were Alan, Mike and Richard.

**Richard moved to approve the Planning Board Minutes from August 4, 2011 public session as amended. Mike Seconded. Vote yes 3-0.**

**Alan** said the August 18, 2011 Planning Board meeting was canceled.

**Alan** asked Dana to vote for Ron tonight. **Dana** agreed.

### **Mail**

#### **Road Bond, Dupaw Gould Road – Jerry Farwell**

**Alan** Read Letter from Dennis LaBombard (Town Engineer) dated August 14, 2011:

“He has inspected the completion of the upgrade to Dupaw Gould Road in accordance with the subdivision case as noted (2003-10:C-27) The grass is now established and he has received a positive email from Scott Knowles with regard to this project.

He believes that this upgrade has been completed in accordance with the approved drawings. The only outstanding item should be his invoice for this inspection, which he will try to forward shortly. Once that is paid then any remaining funds should be able to be returned to the developer.”

**Alan** read the letter that will go to the Selectmen from the Planning Board on Friday September 2, 2011 if the Board motions to release the bond for case #2003-10:C-27:

“During the September 01, 2011 meeting, the Planning Board reviewed the August 19, 2011 letter from the Town Engineer, Dennis LaBombard regarding the upgrade and turnaround construction on Dupaw Gould Road.

All the work has been done and the Planning Board recommends the Cash Bonds for the amount of \$1,644.00 and \$5,581.25, totaling \$7,225.25 be released.”

**Darrell made a motion to recommend to the Board of Selectmen that the cash bonds be released to Jerry Farwell in the amount of \$7,225.25. Richard Seconded. Vote yes 5-0.**

#### **Case Review – Mark Guay, Mark Allen Cabinetry – Stoney Ledge Unit H & David and Michele Guay Local Pro Direct – Stoney Ledge Unit G**

In Attendance for this review were Mark Guay and David Guay.

**Mark Guay** said they have rented units G&H at Stoney Ledge located at 185 Route 13. They will be building a wall to separate the space and unit H will be a kitchen and bath show room using all local contractors. He has spoken with a few but will also be speaking with the builders in town to see if they can work with them as well. They really want to promote that everything is made locally. **David Guay** said he is an established screen printer here in town and would like to use the space as kind of a meeting place for the teams to come in a get measured for uniforms. They will have a few retail items related to the sports. **David** said for his day job he is a sign maker and his business is located in Dunstable MA. He

will be making signs for the new units that will be placed on the roof, one per business. He would also be putting something on the windows. The Board said that the lettering on the windows would not count as far as the square foot for total signage allowed as per the Ordinance. **Alan** said you will need to go to the Building Inspector for the sign permits one per unit.

**Valérie** said she asked them to stop by to let the Planning Board know what they were going to do. There are no issues with this plan.

**Alan** asked **Valérie** if there was a floor plan on file. She said yes and will update it by writing in the names of the new businesses. **Darrell** asked when they will open. **Mark** said they would like to be open by mid September.

**Darrell moved to find that no site plan be required for unit G & H. Dana Seconded. Vote yes 5-0.**

**Alan** read the recommendations for approval:

- A final and satisfactory report from the Fire Department shall be submitted to the Planning Board,
- Any work done to modify the existing unit shall be done after the applicants ask for a building permit,
- The Building Inspector shall issue a Certificate of Occupancy prior to the beginning of any commercial activity,
- The applicants shall obtain sign permits, one permit for each unit.
- Any modification, extension, addition, etc. to the businesses as approved on September 01, 2011 shall be presented and reviewed by the Board before they happen.

**Darrell moved to approve the two new businesses pending the items that will need to be completed on the list of recommendations previously read by Alan. Richard Seconded. Vote yes 5-0.**

### **Site Plan Discussion - Jerry Farwell, Use of Parcel H-104, 65 Route 13**

**Clarence Farwell** was in attendance to speak for Jerry Farwell who is unable to attend the meeting.

**Clarence** said he was here asking to be allowed to put up a 40x60 (2400 sf) Quonset hut to store winter sand. He went to the Building Inspector for a permit and was told he needed to come here. This hut is currently located at Bingham Lumber. **Alan** asked if this is all that will be on the lot. **Clarence** said no there is some equipment there now. **Alan** said at previous meetings there was some concern about oil dripping out of vehicles because this lot is in the Aquifer. Just so you're aware this may come up in the future. **Clarence** said this was recently purchased by Jerry this has happened so fast they are not exactly sure what they will be doing with the lot. For now he knows he would like to move the hut to this location for winter sand storage. When Jerry decides what he is going to do after that he will come to the Board. **Alan** said they will just need a finding from the Board. **Valérie** said there was some concern with the gate that is located at the entrance off South Main Street. **Clarence** said Jerry will speak with Scott Knowles (Fire Department) tomorrow.

**Darrell moved to find that Jerry Farwell be allowed to erect the 20x40 ft Quonset hut on lot H-104, 65 Route 13. Richard Seconded. Vote yes 5-0.**

### **Business Meeting – CIP Update**

**Alan** said the CIP had their first meeting last Tuesday and they have three members. Paul Anderson is the Chairman, Alan Rosenberg is the Secretary, and Ann Somers has joined them as a member. They will be getting letters out to the Board and asking that their submission be handed in by September 23, 2011. The CIP will be hold public hearings on September 27, 2011 and October 4, 2011. They want

it to be wrapped up by the end of October. **Alan** said any purchase over \$5,000 should be added to the CIP plan for all departments.

**Non-Public Session under RSA 91-A:3, II (c) matters which, if discussed in public, would likely affect adversely the reputation of any person.**

**Valérie** said they were waiting for a response from Attorney Drescher seeing as a letter was not received this non-public will be canceled.

**Richard moved to adjourn at 7:45 pm. Darrell Seconded. Vote yes 5-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Mike Papadimatos, Co-Chair** \_\_\_\_\_

**Richard Randlett, Member** \_\_\_\_\_

**Darrell Philpot, Selectmen's Representative** \_\_\_\_\_

**Dana MacAllister, Alternate voting for Ron Pelletier** \_\_\_\_\_

**The next Regular Planning Board meeting will be 9/15/2011.  
Minutes submitted by Kristen Austin.**

**PLANNING BOARD MEETING**

**Minutes**

**September 15, 2011**

**Present: Alan Rosenberg, Co-Chair, Voting  
Mike Papadimitos, Co-Chair  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate**

**Absent: Darrell Philpot, Selectmen's Representative, Paul Anderson, Alternate, Judy Cook, Alternate, and Kevin Gorgoglione, Alternate.  
Valérie Maurer, Town Planner**

**Minutes**

**Richard moved to approve the Planning Board Minutes of September 1, 2011 as modified. Alan Seconded. Vote yes 4-0.**

**CIP update**

**Alan** said they have received responses from the Conservation Commission and the Cemetery Trustees. Neither have plans for 2012. There will be two public hearings they will be held at the Fire Station on September 27 and October 4 both at 7:00pm.

The CIP Committee would like to have this wrapped up by the end of October so this can be used as a tool for the budget season.

**Budget Review for 2012**

The Board reviewed the budget. The Board is scheduled to review their budget with the Board of Selectmen on 10/24/2011.

The Board decided to keep in line with last year's budget.

Line Items:

Consulting Service (NRPC)	Proposed \$500
Town Planner	Proposed \$46,460
Legal Expenses	Proposed \$2,500

Outside Consulting Services Proposed \$4,500  
Training and Education Proposed \$500  
Recording Fees Proposed \$200  
Office Supplies Left at \$ 1  
Notices Proposed \$200  
CIP & Master Plan Update Left at \$1

**Alan** said there is a letter in the mail stating the Planning Board will be going over the legal budget this year. It doesn't state how much. They also would like to know what they paid out of the Outside Consulting Service line item last year. They will ask Valérie at the next meeting but Alan said he thought it was for the Town Engineer (Dennis LaBombard).

### **Master Plan Discussion**

**Ron** asked if people would be able to purchase a copy of the Master Plan when it is completed. **Alan** said there will be an electronic copy available online that they can have printed if they would like. He is not sure how much that would cost.

**Richard** stated we are paying \$65,000 to have the master plan updated we have to remember that this should not just sit on the shelf and every Planning Board member should have a copy to take home and make notes after they review it. **Alan** said we should find out how much it will be to get extra copies made. **Ron** agreed all Planning Board members should have a copy of their own.

### **First Discussion Re: Zoning Ordinance and Regulation Amendments**

**Alan** said Valérie had some suggested amendments to the Ordinance and Regulations that need to be looked into.

Zoning Ordinance Section 500, 600, and 700. Where they talk about lot size it has been suggested they state "contiguous" excluding wetlands.

Subdivision regulations Section 4.9 for bonding this should be reworded it doesn't line up with bank procedures there is some wording confusion.

Alan said the sign Ordinance will need to be reviewed. Valérie has some wording from other towns to review (Milford, Hollis, and Wilton).

Subdivision regulations section: 7.5.07 should add language stating the last Certificate of Occupancy will not be issued until after a final satisfactory inspection report is issued by the Town Engineer.

Also Zoning Ordinance Section 1505.03 and 2203.02.b.3 wording should match and read more like the Housing for Older Persons Section.

**Alan** read Section 1505.03:

"1505.03 Setbacks. 15 foot setback from the front, rear, and side per lot, measured from the property lines. The subdivision perimeter will contain a 50-foot setback where no structure shall be built."

**Alan** read Section 2203.02.b.3:

"2203.02.b.3 Site Perimeter Buffer: Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require

additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall count towards the required minimum protected open space.”

Housing for Older Persons states:

Alan read Section 2203.02.b.4:

“Setbacks and unit separation: All structures shall be set back at least 25 feet from the 50-foot site perimeter buffer. In addition, developments located on public roads must meet the standard building setbacks as specified for the applicable district in the Brookline Zoning Ordinance. All housing units / buildings must be separated by at least thirty-five (35) feet.”

The Board also agreed they will need to work on the Workforce housing common driveways, if the 3<sup>rd</sup> party company lease or goes out of business who will be responsible to hire a new company, and should there be some sort of homeowner association that will need to be created to cover how the common drive way will be maintained and paid for.

**Alan** said George Foley as a resident of town not speaking for the Zoning Board has suggested putting “and” in place of the “or” in the section for Accessory dwelling units Section 2002.11:

“The gross living area of an accessory dwelling unit shall not be less than 350 square feet *or* not greater than 1,000 square feet.”

**Alan** said the only problem is the applicant will have to meet both requirements and not 350 square feet or no greater than 1,000.

**Alan** said Valérie would also like to require an electronic copy of the plans submitted for Planning Board review.

**Non-Public Session under RSA 91-A: 3, II (c) matters which, if discussed in public, would likely affect adversely the reputation of any person.**

**Alan moved to go into non-public session under RSA 91-A: 3 II (c) matters which, if discussed in public, would likely affect adversely the reputation of any person and immediately adjourn the meeting. Ron Seconded. Roll call vote Alan, Richard, Ron, and Mike all voted yes.**

**Alan moved to come out of non-public session under RSA 91-A: 3 II (c) matters which, if discussed in public, would likely affect adversely the reputation of any person. Ron Seconded. Roll call vote Alan, Richard, Ron, and Mike all voted yes.**

**Alan made a motion to seal the non-public minutes of September 15, 2011. Ron Seconded. Vote yes 4-0.**

**Richard moved to adjourn at 9:05 pm. Ron Seconded. Vote yes 4-0.**

**Mike Papadimatos, Co-Chair** \_\_\_\_\_

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Richard Randlett, Member** \_\_\_\_\_

**Ron Pelletier, Member,** \_\_\_\_\_

**The next Regular Planning Board meeting will be 10/6/2011.  
Minutes submitted by Kristen Austin.**

PLANNING BOARD MEETING  
Minutes  
November 3, 2011

**Present:** Alan Rosenberg, Co-Chair (voting)  
Mike Papadimitos, Co-Chair (voting)  
Richard Randlett, Member (voting)  
Ron Pelletier, Member (voting)  
Karl Dowling, Selectmen's Representative (voting) (left at 8:30pm)  
Paul Anderson, Alternate  
Judy Cook, Alternate  
Valérie Maurer, Town Planner

**Absent:** Dana MacAllister, Alternate, and Kevin Gorgoglione, Alternate.

**6:30 PM- Meeting start**

**Minutes**

Paul moved to approve the minutes of the June 2, 2011 Planning Board meeting as written. Mike Seconded. Vote yes 3-0.

Ron moved to approve the Planning Board minutes of October 20, 2011 as amended. Richard seconded. Vote yes 4-0.

**Planning Board Membership – PB recommendation to the Board of Selectmen for a new full time member.**

Alan said we have two emails one from Judy Cook (PB Alternate) and one from Dana MacAllister (PB Alternate).

Alan read Judy's letter email to the Board:

*"I am advising you of my interest in becoming the full member on the Brookline Planning Board filling the vacancy open on November 6, 2011 which runs through town meeting 2013.*

*As you know I have had 10+ years on the Brookline Planning Board from 1992 through the early 2002. I am familiar with the town regulations and many of the cases."*

**Alan** read Dana's letter that was emailed to the Planning Board:

*"I am writing to you to apply for the upcoming vacancy on the Planning Board. I have been an alternate member of the Board since April 2008 and have served on the following committees:*

*Non residential site plan committee  
Economic Development Group  
Workforce Housing Steering Committee  
Master Plan Committee*

*I also have been employed as Residential Building Inspector/Code Enforcement Officer for the Town of Milford since 2008 where I have assisted with zoning ordinance development, preparing cases for ZBA hearings, and zoning violation resolution. If you have any questions about my qualifications please feel free to call or email me. Thank you for your consideration."*

**Judy** said she was on the Planning Board previously for the creation of open space zoning and a few others and she is very familiar with the zoning ordinances. She said that she would like to help the Planning Board move along in a positive direction. She was also on the Board of Selectmen for nine years.

**Mike** said that since Dana has been an Alternate since 2008 he should be nominated.

**Paul** and **Alan** both said it was nice to have two very qualified people to pick from.

**Judy** said she has lived in town a very long time and has watched it grow from 1,600 to about 5,000 people.

**Mike made a motion to recommend to the Board of Selectmen that Dana MacAllister be appointed as a full member of the Planning Board. Richard seconded. Voted yes 4-1. Karl voted no.**

**Conceptual Discussion: Margaret Monachelli, Veterinary Practice, 49 South Main Street – Lot K-26. Proposed changes to approved home business.**

**Alan** said this is about the Veterinarian Home Business at 49 South Main Street. Margaret would like to make changes to the plan that was approved 3 years ago. **Margaret** said she originally wanted to renovate the barn for her Veterinarian Business. Due to financing she will need to scale down the practice. She would like to remove the existing 9x29 porch and build a 40x16 addition. Two rooms in the house will also be used for the home business this will total about 1,200 square feet. **Valérie** said that this is less than the Zoning Board approved at the last meeting. **Margaret** said the front door of the house will be used as the business entrance. Parking will be the same as previously approved. She would only use the barn as storage for pet food, freezer space, and various other supplies. **Valérie** said Margaret will have to go to the Zoning Board for a Special Exception because the addition will be built in the front setback. The house already sits in the front setback. She has also been approved for up to 9 employees by the Zoning Board. **Judy** suggested letting the Fire Department know if anything stored in the barn requires MSDS sheets. **Valérie** said the fire department will have to do a final inspection before this can open for business. **Valérie** asked the Board if they wanted a full application filled out or if they will feel comfortable just making a finding. The Zoning Board's decision is still valid and she will just need a special exception to allow the addition to be built. This new plan is less non-conforming than the original plan. **Alan** said as long as the file is updated with the new information and the Zoning Board's decision on the special exception, he doesn't think Margaret needs to go through another full application review process. We should also have a compliance hearing 6 months after the Certificate of Occupancy is issued. **Margaret** said she would like to be open by June of 2012.

Ron made a motion that the Planning Board finds that a full application is not necessary because Mrs. Monachelli has already talked to the Building Inspector and presented him with a plan showing the proposed upgrades to the house. She will need a Special Exception from the Zoning Board to build the addition (replacing the existing porch).

Mrs. Monachelli will need to contact the Fire Department for an inspection and recommendation for fire protection, emergency exists, etc, for the house.

Taking into account that Mrs. Monachelli was approved to operate a home business largely exceeding the zoning requirements and considering that what she is proposing today is reducing the approved variances for square footage and number of employees, the Board accepts Mrs. Monachelli's modifications without requesting her to prepare a full application for site plan review. The Planning Board file will also need a copy of the Special Exception from the Zoning Board and she will need to schedule a compliance hearing 6 months after the C.O. is issued.

The barn may be used as storage. If in the future the homeowner would like to expand the business to include the barn and the proposed addition to the home she would then need to come back to the Planning Board with a new plan. Richard seconded. Vote yes 5-0.

Margaret asked about signage. Valérie said she would need to go to the Building Inspector to get a sign permit but because she has a corner lot she can put a sign on South Main Street and on Route 13. Just do not put the sign in the State right of way or they will cut it down.

### CIP Update

Paul said they will hold the last meeting on Thursday November 10, 2011 at the Town Hall in the meeting room. They will update the final draft and present it to the Planning Board on November 17, 2011.

### Zoning Ordinance proposed amendments

The Board discussed zoning changes.

#### **Proposed Zoning Amendments for March 2012**

#### **After November 03, 2011 Planning Board Meeting**

503.03 Land Area. Each building lot shall be at least one (1) *contiguous* acre excluding wetlands *with the buildable area accessed from a highway, street, or right-of-way of class five or better*.

603.03 Land Area. Each building lot shall have at least 80,000 *contiguous* square feet, excluding wetlands *with the buildable area accessed from a highway, street, or right-of-way of class five or better*.

603.04 Number of Dwelling Units. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A duplex shall require ~~two times the minimum land area~~ *at least 160,000 contiguous square feet, excluding wetlands with the buildable area accessed from a highway, street, or right-of-way of class five or better*.

603.06 Back Lots.

a. Requires a minimum lot area of *at least* five (5) ~~contiguous~~ acres *with a buildable area of at least 80,000 contiguous square feet of dry land accessed from a highway, street, or right-of-way of class five or better.*

d. A duplex requires *a minimum lot area of* ten (10) ~~contiguous~~ acres ~~minimum lot size~~ *with a buildable area of at least 160,000 square feet of contiguous dry land with the buildable area accessed from a highway, street, or right-of-way of class five or better.*

626.00, 3. The minimum lot size for a single family market value *unit* or a single *family* workforce housing unit shall be one (1) *contiguous* acre excluding wetlands. The minimum lot size for a duplex shall be one and one half (1.5) *contiguous* acres excluding wetlands. The minimum lot size for a five unit multi-family building shall be three (3) *contiguous* acres excluding wetlands.

1505.03 (Open Space Developments) Setbacks. 15 foot setback from the front, rear, and side per lot, measured from the property lines. ~~The subdivision perimeter will contain a 50 foot setback where no structure shall be built.~~

**Site Perimeter Buffer:** (NEW Sub-Section, to match section 2203.02, b. 3 – See below)  
Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall NOT count towards the required minimum protected open space. *(The Board requested adding NOT to the last sentence)*

(Subsequent sections will need to be renumbered)

**1505.04 Lot Size.** *Each building lot shall have a minimum of one (1) contiguous acre excluding wetlands. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A two-family ~~structure~~ dwelling unit shall require ~~two-times the minimum land area~~ a minimum of two (2) acres contiguous, excluding wetlands. The buildable area shall have access from a highway, street, or right-of-way of class five or better. .*

2002.11 The gross living area of an accessory dwelling unit shall not be less than 350 square feet *and* ~~or~~ not greater than 1,000 square feet. (To clarify that both conditions are required)

**2203.02. b. 3 (Housing for Older Persons Developments) Site Perimeter Buffer:**

*Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except*

*for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall NOT count towards the required minimum protected open space. (The Board requested adding NOT to the last sentence)*

**Richard made a motion to adjourn at 9:00. Mike Seconded. Vote yes 4-0.**

PLANNING BOARD MEETING  
Minutes  
November 17, 2011

**Present:** Alan Rosenberg, Co-Chair (voting)  
Dana MacAllister, Co-Chair (voting)  
Richard Randlett, Member (voting)  
Ron Pelletier, Member (voting)  
Darrell Philpot, Selectmen's Representative (voting)  
Paul Anderson, Alternate  
Judy Cook, Alternate  
Valérie Maurer, Town Planner

**Absent:** Kevin Gorgoglione, Alternate.

**7:00 PM- Meeting start**

**Nominate a New Planning Board Co-Chair**

**Alan** said now that Mike has stepped down and Dana has been nominated as a full member of the Planning Board we need to nominate a Co-Chair.

**Richard** moved to nominate Dana MacAllister as the new Co-Chair for the Planning Board. **Ron** seconded. Vote yes 5-0.

**Minutes**

**Richard** moved to approve the planning Board minutes of November 3, 2011 as written. **Ron** seconded. Vote yes 3-0.

**Road Bonds**

**Alan** said there are letters in the mail from the Town Engineer, Dennis LaBombard regarding Hutchinson Hill Road Construction Bond that needs to be renewed. Ames Road Phase One Maintenance Bond needs to be renewed. Phase Two Construction Bond for Ames Road needs to be reduced.

**Dana** made a motion to recommend to the Selectmen that the Construction Bond for Hutchinson Hill Road be renewed in the amount of \$51,000. **Darrell** seconded. Vote yes 5-0.

Made a motion to recommend to the Board of Selectmen that the Maintenance Bond for Phase One of Hutchinson Hill Road be renewed in the amount of \$45,900. Darrell seconded. Vote yes 5-0.

Dana made a motion the recommend to the Board of Selectmen that the Construction Bond for Phase two of Ames Road be renewed and reduced from \$31,000 to \$22,450. Darrell seconded. Vote yes 5-0.

**Zoning Ordinance proposed amendments**

The Board discussed zoning changes.

**Proposed Zoning Amendments for March 2012  
After November 17, 2011 Planning Board Final Workshop**

200.00 Definitions: **Add** definition of:

- ***Buildable Area***: *An area capable to accommodate a house site (or commercial structure if so planned) and all required utilities such as water supply and wastewater disposal. The buildable area is the area of a lot excluding wetlands, land with slopes over twenty-five (25) percent, water bodies, regulatory floodways and land restricted from development by easements, covenant or other legal restriction The buildable area is intended to insure that the lot is capable of meeting all Town of Brookline zoning requirements.*
- ***Duplex***: *A structure used for residential purposes and consisting of two (2) living units with a common wall.*

503.03 Land Area. Each building lot shall be at least one (1) ***contiguous*** acre excluding wetlands

603.03 Land Area. Each building lot shall have at least 80,000 ***contiguous*** square feet, excluding wetlands.

603.04 Number of Dwelling Units. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A ~~two-family house~~ ***duplex*** shall require ~~two times the minimum land area~~ ***at least 160,000 contiguous square feet, excluding wetlands.***

603.06 Back Lots.

a. Requires a minimum lot area of ***at least*** five (5) acres ***with a buildable area of at least 80,000 contiguous square feet*** excluding wetlands.

d. ~~Duplexes~~ ***A duplex*** requires ***a minimum lot area of*** ten (10) acres ~~minimum lot size~~ ***with a buildable area of at least 160,000 contiguous square feet*** excluding wetlands.

626.00, 3. The minimum lot size for a single family market value ***unit*** or a single ***family*** workforce housing unit shall be one (1) ***contiguous*** acre excluding wetlands. The minimum lot size for a duplex shall be one and one half (1.5) ***contiguous*** acres excluding wetlands. The minimum lot size for a five unit multi-family building shall be three (3) ***contiguous*** acres excluding wetlands.

- 1505.03 (Open Space Developments) Setbacks. 15 foot setback from the front, rear, and side per lot, measured from the property lines. ~~The subdivision perimeter will contain a 50-foot setback where no structure shall be built.~~

**Site Perimeter Buffer:** (NEW Sub-Section, to match section 2203.02, b. 3 – See below)

Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall NOT count towards the required minimum protected open space. (The Board requested adding NOT to the last sentence)

(Subsequent sections will need to be renumbered)

- 1505.04 **Lot Size.** *Each building lot shall have a minimum of one (1) contiguous acre excluding wetlands. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A two-family ~~structure~~ dwelling unit shall require ~~two times the minimum land area~~ a minimum of two (2) contiguous acres, excluding wetlands.*

- 2002.11 The gross living area of an accessory dwelling unit shall not be less than 350 square feet **and** ~~or~~ not greater than 1,000 square feet. (To clarify that both conditions are required)

**2203.02. b. 3 (Housing for Older Persons Developments) Site Perimeter Buffer:**

*Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall NOT count towards the required minimum protected open space. (The Board requested adding NOT to the last sentence)*

**CIP Update**

**Paul** handed out a copy of the final draft of the 2012-1017 CIP. He also handed out another page with some last minute addition that will be added to the packet. **Paul** asked if everyone could review this copy and he will make the last few changes and at the next Planning Board meeting move to adopt the document. **Judy** suggests there be information on building permit data added for the 1990's. **Paul** said he will work on getting that information. **Judy** said there should also be information listed as to how many

dwellings there are in Town. **Richard** said that information should be in the Master Plan. **Alan** said yes it should be in the Demographics Chapter but it hasn't been finish yet; we will have it for next year. **Richard** said the Committee always does a nice job putting this together. **Alan** asked the Board to review over the next few weeks and they will have the final CIP on December 1, 2011 at the Planning Board Meeting for adoption.

**Status update on Suspension / Revocation of Lot H-130 and H-138-2**

**Darrell** said that a couple of weeks ago they had made a motion to revoke the two subdivisions. Per Town Counsel we need to make a motion to permanently suspend these subdivisions. **Alan** asked if this wording was kosher with the RSA. **Darrell** said Town Counsel said yes.

Alan read the notice from Town Counsel

“This Notice is given pursuant to *RSA 676:4-a, II and RSA 676:4, I(d)* to advise you that the Town of Brookline Planning Board, at its regular meeting on *October 20, 2011*, adopted a resolution, pursuant to its authority under *RSA 676:4-a, I*, which is applicable, only, to two undeveloped residential house lots, namely *Lot H-130* in the *Cider Mill Pond Estates* subdivision and *Lot H-138-2* in the *Maplewood Estates*. The Board determined that the owner of those lots, which was the original applicant/developer of each of the two subdivisions, was in default of its obligations under the conditions of approval and suspended the previously granted approval(s) only as such approval related to the two above referenced lots and directed the Board of Selectmen, Building Inspector and other town officials responsible for the issuance of building permits to be advised that no building permits shall issue with respect to either of the two lots identified above unless, by a date thirty (30) days from the date of said resolution, the owner of said lots, *Adamyk Homes, Inc.*, shall either:

- a. Complete all improvements in the subdivision to required town specifications and accepted by the Town; or
- b. The applicant Adamyk Homes, Inc., or its successor has posted adequate security with the town to insure the completion of the improvements.

If compliance with the foregoing conditions is not forthcoming in said thirty (30) day period, this suspension shall become a revocation. The reasons for this revocation was the failure of the owner/applicant/developer to either complete said improvements or to provide and maintain adequate security to provide for the construction of said improvements in the event of the developer's default.

You are advised that, pursuant to *RSA 676:4-a, II*, any party receiving this notice has the right to request that the Planning Board convene a hearing with notice to all parties with respect to the above action, if any party receiving this notice requests the same. Such hearing request must be made within thirty (30) days of receipt of the within notice.”

**Alan** said that we need to change the revocation wording to permanently suspend.

**Darrell made a motion that the Planning Board suspends the subdivisions for lots H-130 and H-138-2 indefinitely. Dana seconded. Vote yes 5-0.**

**Darrell made a motion to adjourn at 9:10. Richard Seconded. Vote yes 5-0.**

PLANNING BOARD MEETING  
Minutes  
December 1, 2011

**Present:** Alan Rosenberg, Co-Chair (voting)  
Dana MacAllister, Co-Chair (voting)  
Paul Anderson, Alternate (voting for Ron Pelletier)  
Valérie Maurer, Town Planner

**Absent:** Richard Randlett, Member, Ron Pelletier, Member, Darrell Philpot, Selectmen's Representative, Judy Cook, Alternate, and Kevin Gorgoglione, Alternate.

**7:00 PM- Meeting start**

**Minutes**

Not enough people to approve the minutes for the November 17, 2011 meeting.

**Case # 2011-2:B-81,D-4- Lot Line Adjustment: Ganos/ Town of Brookline**

**Valérie** said this is a lot line adjustment between lot B-81 and D-4. B-81 is owned by John Ganos and D-4 by The Town of Brookline. The purpose of this lot adjustment is for the Town (BCC) to purchase 19 +/- acres from B-81 and add to lot D-4.

**Valérie** said this is a lot line adjustment only not a subdivision. She had Randy include the Aquifer Protection Overlay District and a few minor corrections to the plan. **Ben Nowak** (abutter, lot D-3-5, 244 Route 13) attended the meeting to review the plan. **Valérie** said if the conservation Commission is planning on having a parking area on Route 13 they will need to get a driveway permit from the State. **Jay Chrystal** (Member of the Conservation Commission) agreed they would need permission for a curb cut. **Valérie** said the abutters have been notified and the fees paid.

**Dana moved to accept Plan # 2011-2: B-81, D-4- Lot Line Adjustment. Paul seconded. Vote yes 3-0.** **Alan** opened the meeting to the public.

**Paul** asked if the town was going to purchase this land. **Jay** said yes they have a public hearing scheduled for December 13, 2011 at 7:30pm in the Town Hall meeting room. This abuts the Palmer property so it will provide access to that area for log removal for example. At the moment they do not have access to that part of the railroad bed. **Ben** asked if they would still allow snowmobiling in that area. **Jay** said that wouldn't change.

There were no other comments from the Board or the public.

**Paul moved to approve plan # 2011-2: B-81, D-4- Lot Line Adjustment with the one condition that the Conservation Commission is responsible for the recording fee for this plan. Dana seconded. Vote yes 3-0.**

**Easement Language for Conservation Commission and Boundary Signs**

**Jay** said he would like to get on the agenda to discuss future plan approvals and possibly making the hanging of conservation boundary signs part of the condition of approval and have it done at the same time they set the granite boundaries. The Conservation Commission will purchase the signs and the company setting the boundary markers could also put up the Conservation Boundary sign markers for town owned land around the subdivision.

**Jay** said he would also like to discuss conservation easements. The wording needs to be more consistent. This too could be a condition of approval that the easement is put in place before the subdivision could be officially approved. **Alan** said they should discuss this further. **Valérie** said she will pull together a few Conservation easements that are in place now. **Alan** suggested they schedule a workshop for the Conservation Commission and the Planning Board to discuss the wording. **Jay** agreed and thanked the Board.

**CIP Adoption**

**Alan** said he would like to hold of until the next meeting when hopefully there will be more members in attendance. **Dana and Paul** agreed to wait until the next meeting.

**Paul made a motion to adjourn at 7:50 pm. Dana Seconded. Vote yes 3-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Dana MacAllister, Co-Chair** \_\_\_\_\_

**Dana made a motion to approve the Planning Board minutes of November 17, 2011. Darrell Seconded. Vote yes 5-0.**

**Dana made a motion to approve the Planning Board minutes of December 1, 2011. Paul Seconded, Vote yes 3-0.**

**CIP Adoption**

**Paul** said the final draft of the CIP is ready for adoption if no one has any comments. He will email the finished copy to Valérie tomorrow.

**Dana made a motion to adopt the Capital Improvement Plan for the 2012-2017. Richard seconded. Vote yes 5-0.**

**Final Zoning Amendments Review Prior to Publication on December 23, 2011 in the Hollis Brookline Journal for Public Hearing on January 05, 2012.**

~~Removed Text~~  
New Text

200.00 Definitions: **Add** definition of:

- ***Buildable Area: An area capable to accommodate a house site (or commercial structure if so planned) and all required utilities such as water supply and wastewater disposal. The buildable area is the area of a lot excluding wetlands, land with slopes over twenty-five (25) percent, water bodies, regulatory floodways, setback requirements and land restricted from development by easements, covenants or other legal restrictions. The buildable area is intended to ensure that the lot is capable of meeting all Town of Brookline zoning requirements.***

503.03 Land Area. Each building lot shall be at least one (1) ***contiguous*** acre excluding wetlands

603.03 Land Area. Each building lot shall have at least 80,000 ***contiguous*** square feet, excluding wetlands.

603.04 Number of Dwelling Units. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A ~~two-family house~~ ***two-family dwelling units*** shall require ~~two times the minimum land area~~ ***at least 160,000 contiguous square feet of land excluding wetlands.***

603.06 Back Lots.

a. Requires a minimum lot area of ***at least five (5) acres with a buildable area of at least 80,000 contiguous square feet of land*** excluding wetlands.

d. ~~Duplexes~~ ***A two-family dwelling unit requires a minimum lot area of ten (10) acres minimum lot size with a buildable area of at least 160,000 contiguous square feet of land*** excluding wetlands.

626.00, 3. The minimum lot size for a single family market value ***unit*** or a single ***family*** workforce housing unit shall be one (1) ***contiguous*** acre excluding wetlands. The minimum lot size for a ~~duplex~~ ***two-family dwelling unit*** shall be one and one half (1.5) ***contiguous*** acres excluding wetlands. The minimum lot size for a ***three (3), four (4) or five (5) unit multi-family building*** shall be three (3) ***contiguous*** acres excluding wetlands.

1505.03 (Open Space Developments) Setbacks. 15 foot setback from the front, rear, and side per lot, measured from the property lines. ~~The subdivision perimeter will contain a 50-foot setback where no structure shall be built.~~

**Site Perimeter Buffer:** (NEW Sub-Section, to match section 2203.02, b. 3 – See below)

Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall NOT count towards the required minimum protected open space. *(The Board requested adding NOT to the last sentence)*

(Subsequent sections will need to be renumbered)

**1505.04** ***Lot Size.** Each building lot shall have a minimum of one (1) contiguous acre excluding wetlands. Only one dwelling unit shall be permitted per individual building lot, except as provided in Section 2000.00, Accessory Dwelling Units. A two-family ~~structure~~ dwelling unit shall require ~~two times the minimum land area~~ a minimum of two (2) contiguous acres, excluding wetlands.*

2002.11 The gross living area of an accessory dwelling unit shall not be less than 350 square feet *and* ~~or~~ not greater than 1,000 square feet. (To clarify that both conditions are required)

**2203.02. b. 3 (Housing for Older Persons Developments) Site Perimeter Buffer:**

*Each development must be situated within a permanently protected undeveloped site perimeter buffer, identified on the site plan, not less than 50 feet wide or a value as deemed necessary by the Planning Board on back and all boundaries of the original parcel except for access to connecting roads, which, unless it is already wooded and satisfactory to the Planning Board, must be planted and landscaped so as to provide a visual barrier between the development and adjacent properties. The Planning Board may require additional buffer width where unique circumstances of an abutting use or property warrant. The site perimeter buffer shall NOT count towards the required minimum protected open space. (The Board requested adding NOT to the last sentence)*

### **Survey for Transparency Committee**

**Alan** said he received an email from Lynn Abt with the Transparency Committee about a survey that they have created and would like it filled out by all departments. **Valérie** said everyone has received it in the office and the Board of Selectmen will be discussing this on Monday night. The office staff should have more information on Tuesday.

### **Resignation**

**Paul** said this will be his last meeting. He will be moving out of New Hampshire for the New Year. He will send a resignation letter to the Board. The Board thanked Paul for all his hard work.

**Richard made a motion to adjourn at 8:25 pm. Darrell Seconded. Vote yes 5-0.**

PLANNING BOARD MEETING  
Minutes  
January 07, 2010

**Present:** Alan Rosenberg, Co-Chair, Voting  
Michele Hakala, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Kevin Gorgoglione, Selectmen's Representative Alternate  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate  
Valérie Maurer, Town Planner

**Absent:** Paul Anderson, Alternate, Mike Papadimatos, Alternate,

Minutes

Richard moved to approve the minutes of December 17, 2009 as corrected. Seconded by Michele. Vote yes 5-0.

General Business

Kevin asked if they could find out what we paid for the 1997 Master Plan update. Valérie said she will find out for Monday night when the Board meets with the Selectmen.

Kevin asked if the Planning Board will have another Warrant Article for this year other than the master plan. Valérie said no.

Kevin asked what was happening with the Housing for Older People Plan. Alan said the case went to court and the plaintiffs won. The plan that was approved by the Planning Board was disapproved by the court. The Builder can come back with another plan. Ron said there was a letter from residents of Sawtelle Road asking if the builder can go forward with the original plan (Clover Hill Subdivision) that was approved by the Planning Board prior to the HOP. Valérie said she has asked for something in writing from Attorney Drescher but he has stated that the builder can go forward and get a building permit for the 2004 plan that was submitted.

Non-Public Session (Master Plan Update)

Michele moved to go into non public session under RSA 91-A: 3II (c) for the purpose of discussing contractual issues and fees concerning the Update of the Mater Plan. Michele read RSA Section 91-A:3II(c) "Matters which, if discussed in public, would likely affect adversely the

reputation of any person, other than a member of the public body itself, unless such person requests an open meeting.”

Seconded by Kevin. Vote yes 5-0.

Michele moved to come out of Non-public Session. Seconded by Kevin. By roll call vote Michele voted yes, Kevin voted yes, Richard voted yes, Ron voted yes, and Alan voted yes.

Michele moved to seal the non-public Planning Board minutes of 1/7/2010. Seconded by Richard. Vote yes 5-0.

Kevin moved to adjourn at 8:35 pm. Seconded by Michele. Vote yes 5 -0.

**Minutes**

**Richard moved to approve the Public Planning Board minutes of January 7, 2010 as Amended.  
Seconded by Kevin. Vote yes 3-0.**

**Kevin moved to approve the Non-Public Planning Board minutes of January 7, 2010 as written.  
Seconded by Richard. Vote yes 3-0.**

**Membership**

**Alan** read Michele's letter of resignation from the Planning Board. Michele's term expires in March of 2010. **Alan** said this means she will not be volunteering for another three year term. The first meeting in April there will be an open full member position on the Planning Board if anyone is interested. **Valérie** said she will put membership on the agenda for March 18, 2010 to discuss.

**Master Plan Update**

**Alan** said they have decided on TF Moran to do the Master Plan update. The Board of Selectmen had no issues with the choice we made or why we picked them. We also asked TFM if they would revisit the proposal that was submitted in the amount of \$75,000. They came back with new pricing of \$61,150. **Paul** asked what was cut to bring the price down. **Alan** said they cut back on meetings. **Valérie** said we still need to have these meetings but the Planning Board will have to hold them. **Dana** asked if we ever received a proposal from NRPC. **Alan** said they did not submit one. **Valérie** said NRPC will still be involved in this process by provided data to the consultant. **Valérie** said that, since TF Moran will not be involved in all the meetings previously scheduled, the Planning Board will need

**PLANNING BOARD MEETING**

January 21, 2010

Page 2 of 3

to put money in the budget for mailing, brochures, meetings, copies, etc. She thought \$3,000 might be enough for the two years. The Board probably will spend more the first year than the second and suggested budgeting at least \$2,000 for 2010. The Board agreed that the Town should also have a bulk mailing permit. **Valérie** said it would cost .27 cents to mail out flyers rather than .44 cents that it would cost without the permit. **Valérie** said she will look into it tomorrow when she goes to the post office. **Valérie** said the first flyer explaining what the Master Plan is and why it needs to be updated should go out before Town Meeting. The Board also agreed on holding an informative meeting before the town meeting. We should schedule an informational meeting on March 4<sup>th</sup> 2010 for the residents and the Planning Board to discuss the update. **Alan** said we will need to have Jerry Coogan from TFM come in to discuss his proposal with the Planning Board. **Valérie** said she will call him and see if he can attend the February 4<sup>th</sup>, 2010 Planning Board meeting.

**Valérie** read the warrant article that has been put together and reviewed by Town Counsel and that will be voted on at Town Meeting:

*“To see if the Town will vote to authorize the Board of Selectmen to enter into a two (2) year contract for the planning board to update the Brookline Master Plan at a cost of \$62,000 and to raise and appropriate the sum of \$31,000 for the first year’s payment for that purpose, or take any action relative thereto. Said contract contains a fiscal funding clause which permits the termination of the lease on an annual basis should the funds necessary to make the required payments not be appropriated by town meeting. This will be a non-lapsing appropriation per RSA 32:7, VI and will not lapse until December 31, 2011.”*

**Dana** asked what would happen if this doesn’t get funded. **Alan** said the RSA’s suggests that the Master Plan be updated every five to ten years; it has been 13 years since the last update was done. If this does not get funded the Planning Board would have to try to complete the update ourselves. **Paul** asked why the Planning Board hasn’t already tried to do the update. **Valérie** said that for the past five years we haven’t had the volunteers to work on updating the chapters and the town does not have the ability to create the maps or the software to update some of the information in the Master Plan. **Alan** said that once the Master Plan update is done, we would have an editable version that will be used for future revisions. **Richard** said a legal challenge because we have not updated the Master Plan could cost more than the actual update itself.

**Valérie** said the last update in 1996-1997 cost the Town \$29,445. This was a budget item and not a warrant article.

**Alan** said now that we have decided to go with TFM we are going to we need a contract and to meet with him.

**Richard move to approach TFM about a contract in review of the proposal and the updated cost package. Seconded by Kevin. Vote yes 5-0.**

**Valérie** said she will contact Jerry Coogan from TFM in the morning and try to reserve Brusck Hall for the informational meeting on 3/4/2010. She will also start working on a flyer that will go to every resident of Brookline so they are aware of what the Master Plan is and why it needs to be updated.

**NRPC Work Force Housing Seminar**

**Dana** said he will be attending the seminar that NRPC is holding in Milford on 1/28/2010 for Work Force Housing. If anyone else is interested in going that would be great. **Dana** said he will bring back as much information as he can.

**Richard moved to adjourn at 7:55 pm. Seconded by Kevin. Vote yes 5 -0.**

**PLANNING BOARD MEETING**

**Minutes**

**February 4<sup>th</sup>, 2010**

**Present:** Michele Hakala, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ronald Pelletier, Member, Voting  
Kevin Gorgoglione, Selectmen's Representative  
Paul Anderson, Alternate, Voting for Alan Rosenberg  
Dana MacAllister, Alternate  
Valérie Maurer, Town Planner

**Absent:** Alan Rosenberg, Co-Chair and Mike Papadimitos, Alternate

**Also Present:** Randy Haight, Meridian Land Services, Christopher Hegarty, 2-lot subdivision applicant

**Michele** opened the meeting and asked Paul to vote for Alan.

**Minutes**

**Richard moved to approve the minutes of January 21, 2010 as written. Seconded by Kevin. Voted Yes 3-0.**

**Kevin moved to release the Non-Public Planning Board minutes of January 7, 2010. Seconded by Ron. Vote Yes 3-0.**

**Case Review**

**Case # 2010:1-D-52-43 – Christopher & Joyce Hegarty, 2-lot subdivision, Capt. Seaver Road** Board's Members were provided with the Staff Report Valérie put together after reviewing the application.

**Randy Haight** said that all the corrections requested by Valérie have been made on the revised plan provided tonight. The only item missing is the State Subdivision Approval number, which, once received, will be added to the final plat. **Michele** asked if the application was ready for acceptance. **Valérie** answered yes. All fees have been paid; abutters notified and notices of public hearing posted.

**Motion**

**Kevin moved to accepted the application, case # 2010-1:D-52-43. Seconded by Richard. Voted Yes 5/0.**

**Michele** read the Public Hearing opening Statement.

**Valérie** said that it was a simple 2-lot subdivision. Although she is somehow concerned about the beaver pond in the back of the property that could potentially get larger (in 1987, there was only a small stream running), she did not find any issue with the application. **Randy Haight** said that the beavers could disappear if there was no more food in the future. **Valérie** said that she asked the Conservation Commission for comment on this particular issue; the BCC in a letter dated January 13, stated: “(...) *the water level was increased by 6 feet in 20 years, creating a pond, but it is impossible to know if the beavers will continue to increase the water level in the future*”. **Michele** asked if there was any comment from the Board. There was none.

**Valérie** said that the Road Agent recommends \$1,500 for Off-Site Improvement. **Michele** asked Valérie if there was any other issue to discuss regarding the application. **Valérie** answered no. Christopher Hegarty provided a \$25.00 check payable to Hillsborough County Treasurer requested in order to record the final plan. Mr. Hegarty and Michele signed the Off-Site Improvement Agreement. Mr. Hegarty took the agreement in order to have his wife Joyce sign the document. He will bring it back to the Town Hall.

**Michele** asked for a motion to approve the case.

**Motion:**

**Richard moved to approve the application, case # 2010-1:D-52-43 with the following conditions:**

- All fees for application review and meeting attendance shall be paid prior to the recording of the final plan.
- The applicant shall submit 8 paper copies of the final plan and one permanent, reproducible Mylar.
- NH DES subdivision approval number shall be added to the final plan.
- The proposed lot is subject to an impact fee per the Brookline Zoning Section 2100, in three separate amounts. The impact fees of \$222.14 (for ambulance facility), \$1,304.24 (for Brookline school system) and \$1,843.17 (for Hollis/Brookline Coop Middle School) are payable to the Town of Brookline at the time the Certificate of Occupancy is issued for the lot.
- Off-Site improvement agreement shall be recorded. The amount is payable to the Town of Brookline at the time a building permit is issued.
- A letter from Meridian Land Services stating that all bounds have been set shall be provided prior to the issuance of a building permit.

**Motion seconded by Kevin. Voted Yes 5-0.**

**Master Plan Update**

As discussed during the previous meeting, an “Informational Meeting” for the future update of the Master Plan will be held on Thursday March 4, 2010. Proposed location has changed and it will be in the meeting room or in the upper room if a lot of people attend. **Kevin** said that the Brush Hall, previously suggested meeting location, is not bigger than the Town Hall meeting room. **Michele** suggested asking Alan to install the video equipment to broadcast the meeting.

**Valérie** drafted a flyer that will be mailed to all Brookline Residents. **Valérie** asked the Board to review it in order to finalize it at the February 18 meeting. **Ron** suggested asking people to “answer by (date)” via email or by calling Valérie in order to have an idea on how many people will attend.

**Michele** said that Alan, Valérie and she are meeting tomorrow at 2:00 pm with Jerry Coogan, TFM, to review the proposed contact and discuss the timeline.

**Capital Improvement Plan**

All members were provided with a copy of the final draft of the CIP that Alan put together. Alan was not present but asked all members to review the CIP for adoption at the February 18, 2010 Planning Board meeting.

**NRPC Work Force Housing Seminar**

**Dana** said that he attended the seminar that the NRPC held in Milford on January 18 regarding Workforce Housing. **Dana** will email the Board with information he gathered that night.

**Richard moved to adjourn at 8:05 pm. Seconded by Kevin. Vote yes 5 -0.**

**Michele Hakala, Co-Chair, Voting** \_\_\_\_\_

**Richard Randlett, Member, Voting** \_\_\_\_\_

**Ronald Pelletier, Member, Voting** \_\_\_\_\_

**Kevin Gorgoglione, BOS's Representative, Voting** \_\_\_\_\_

**Paul Anderson, Alternate (Voting for Alan Rosenberg)** \_\_\_\_\_

The next Planning Board meeting will be held on February 18, 2010.

Respectfully submitted,

**Valérie Maurer**

PLANNING BOARD MEETING

Minutes

February 18, 2010

**Present:** Alan Rosenberg, Co-Chair, Voting  
Michele Hakala, Co-Chair (arrived at 7:20 pm) voting  
Richard Randlett, Member, Voting  
Paul Anderson, Alternate (Voting for Michele Hakala until her arrival at 7:20 pm)  
Mike Papadimatos, Alternate (Voting for Ron Pelletier)  
Valérie Maurer, Town Planner

**Absent:** Kevin Gorgoglione, Selectmen's Representative Alternate,  
Ron Pelletier, Member, and Dana MacAllister, Alternate.

Minutes

Not enough members to vote on minutes.

Capital Improvement Plan (2010-2015), Review for P.B. Adoption

**Richard** said he has reviewed the CIP and it is expensive but they did a great job putting it together. **Alan** thanked Richard and said most of the credit should go to Janice Tremblay, Tad Putney, Ben Cargill, and Ann Somers. **Alan** said he was unable to participate for a while and they had really stepped in and done most of the work. **Richard** said compliments to the Town Departments for the work they put into this. The report is excellent. **Alan** said absolutely, every year the process gets easier and easier. **Paul** asked if this is a Planning Board document. **Alan** said yes. **Richard** moved to adopt the Capital Improvement Plan (2010-2015) as presented with thanks and praise to the Committee and to all Departments. Seconded by Paul. Vote yes 4-0.

Master Plan Update flyer and informational meeting (March 3<sup>rd</sup>, 2010)

**Alan** said the informational meeting will be held on Wednesday, March 3<sup>rd</sup> here in the Town Hall meeting room and will be televised. If too many people are in attendance we will move the meeting upstairs and record it to rebroadcast later. The Board reviewed the Master Plan Update flyer and made a few grammatical corrections. **Valérie** said Ron Pelletier had received a \$493 quote from the Copy Shop to copy, staple, and fold these flyers. They will need to be in the mail by Monday 2/22/2010. **Michele** told Valérie she did a great job making the flyer. The Board agreed. **Valérie** said she will make the corrections in the morning and get it to Ron as soon as possible.

**Lisa Simpson, 12 Laurelcrest Drive Day Care**

**Valérie** said that Lisa is planning on having more children attending the childcare business she is currently running. Lisa asked if she would need to fill out a new application or if she could just amend her original one to add 5 more children to the daycare. She will be building an addition to her home in the near future which will be used for the business. **Alan** said as long as we can amend and notify abutters. The Board agreed that a new application should be submitted and the abutters notified.

**P.B. Terms Expiring**

**Alan** said that at the meeting on the 18<sup>th</sup> of March the Board will need to make recommendations to the Board of Selectmen to fill the Co-Chair seat of Michele Hakala who is retiring this year from he position on the Board. If anyone is interested please let the Planning Board know at the Meeting. **Alan** said the board will need to recommend to the Selectmen to fill the expiring positions. Of which, we have 4 terms up Michele, Paul, Ron, and Mike. The Board of Selectmen will review the recommendations and discuss them. The following week they will announce their decision. The members will have to be sworn in by the Town Clerk before the April 1<sup>st</sup> meeting. During the first meeting in April the Planning Board will appoint the co-chairs.

**Growth Ordinance**

**Richard** said we should review the growth ordinance document. **Valérie** said the Board will have to next year. It is only valid until 2012. **Alan** said they will add it to the list.

**Richard moved to adjourn at 8:15 pm. Seconded by Michele. Vote yes 4 -0.**

**PLANNING BOARD MEETING**

**Minutes**

**March 18, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Michele Hakala, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate  
Paul Anderson, Alternate  
Mike Papadimatos, Alternate  
Valérie Maurer, Town Planner**

**Absent: Kevin Gorgoglione, Selectmen's Representative Alternate.**

**Mail**

**Alan** said the Annual Spring Planning and Zoning conference is scheduled for May 8<sup>th</sup> 2010 in Nashua NH, if anyone is interested in attending.

**Minutes**

**Michele** moved to approve the Public Planning Board minutes of February 4, 2010 as written.

**Seconded by Ron. Vote yes 4-0.**

**Michele** moved to approve the Planning Board minutes of February 18, 2010 as amended.

**Seconded by Richard. Vote yes 5-0.**

**Annual Review Planning Board By-Laws**

The Board discussed the Planning Board By-Laws made a few corrections.

**Michele** moved to approve the Planning Board By-Laws as amended. **Seconded by Richard. Vote yes 4-0.**

The final approved Planning Board By-Laws document is attached to the minutes. Amendments are shown.

**Appointment / Re-appointment of Planning Board Members and Alternates, recommendation to the Board of Selectmen**

**Alan** said the Planning Board will need to make recommends to the Selectmen. The Board of Selectmen will review the recommendations and discuss them. The following week they will announce their decision. The members will have to be sworn in by the Town Clerk before the April 1<sup>st</sup> meeting.

**Alan** said they have two full member positions and two alternate positions up this year.

PLANNING BOARD MEETING

March 18, 2010

Page 2 of 8

**Michele moved to recommend Ron Pelletier to be reappointed to the full member position with a term expiring in March of 2013. Seconded by Richard. Vote yes 3-0.**

All three Alternates were interested in the full member position. **Michele** said in all fairness they should go with seniority. **Michele** asked Mike if he was interested in becoming a full member. **Mike** said yes.

**Michele moved to recommend that Mike Papadimitos fill a full member position on the Planning Board with a term expiring in March 2013. Seconded by Ron. Vote yes 4-0.**

**Richard moved to recommend that Paul Anderson to be reappointed to the alternate position with a term expiring in March 2013. Seconded by Michele. Vote yes 4-0.**

**Alan** announced there are 3 alternate positions that are open on the Planning Board if anyone is interested. **Paul** said the Planning Board should advertise that these positions are available.

**Master Plan update**

**Alan** said the warrant article passed by 9 votes at town meeting. We now need to decide how we want to proceed. **Michele** said we need to figure out what we would like the scope of this project to be. Do we want to go ahead and try to accomplish the full blown update or do we want to do the two chapters that have to be completed. We have a schedule from TF Moran but we are not tied to this schedule. We have not signed the contract so if we think we can save the Town a little money then now is the time to do it. **Paul** said he didn't think they should do anything differently. Michele said that if we can find a cheaper approach, I think that it is the Planning Board's due diligence to look for a less expensive route. **Alan** said he spoke to Kerrie Diers from NRPC and there was a misunderstanding between both parties that is why NRPC didn't send in a proposal. After a lengthy discussion the Board decided to ask for proposals from TF Moran and NRPC for the new scope of work. The new scope will include the two main chapters that they must have completed first, Visioning and Land Use. They could also add anything they think they could complete in a certain time frame. We would also like them to include working with the UNH Coop Extension. The Coop can do the Community Profile. **Alan** said that he will be in Monday to call Jerry Coogan from TF Moran and let him know there will be a letter going out for another proposal and they will also send one out to Kerri at NRPC. The Board agreed. **Alan** will ask that both companies get the new proposal back to the Planning Board by April 9<sup>th</sup> 2010. We can discuss at the April 15<sup>th</sup>, 2010 Planning Board meeting. **Alan** asked Board's members to stop by the office and review the proposal before the Planning Board meeting on April 15.

**2010 Zoning Ordinance and Land Use**

**Valérie** asked the Board to sign the certification document so she can send the updated Zoning Ordinance to the State. This also needs to be signed by the Town Clerk. She will have that by tomorrow and mail the update to the State.

**Richard moved to adjourn at 9:25 pm. Seconded by Michele. Vote yes 4 -0.**

**Alan Rosenberg, Co-Chair, Voting** \_\_\_\_\_

**Michele Hakala, Co-Chair, Voting** \_\_\_\_\_

**Richard Randlett, Member, Voting** \_\_\_\_\_

**The next Regular Planning Board meeting will be 4/1/2010.**

**Minutes submitted by Kristen Austin**

**BROOKLINE PLANNING BOARD BY-LAWS**

(March 18, 2010)

**SECTION I PURPOSE AND AUTHORIZATION**

The Brookline Planning Board (hereinafter, the Board), duly established by the Brookline Special Meeting on January 8, 1951 in accordance with RSA 673:1, hereby establishes the following rules of procedure for the conduct of its business, pursuant to RSA 676:1.

**SECTION II MEMBERSHIP AND TERMS OF OFFICE**

**Appointment of Members**

The Board shall consist of five (5) members, appointed by the Board of Selectmen, and shall include one Selectman to act as an ex-officio member with power to vote. The Board of Selectmen shall determine alternate ex-officio members. The term of the ex-officio member must coincide with his/her term as a Selectman.. Membership of the Board shall conform to the limitations on multiple memberships set forth in RSA 673:7.

**Alternates**

The Board shall encourage the Board of Selectmen to appoint, in addition to regular members, not more than five (5) alternate members who may serve, upon designation by the Chairman, in place of a regular member, in the event of absence or disqualification. The terms and multiple membership requirements for alternates shall be the same as for regular members. Alternates not voting during a meeting are still encouraged to participate in discussions.

**Training**

Within six (6) months of assuming office for the first time, any non-ex-officio member of the Planning Board is encouraged to attend training in accordance with RSA 673:3(a). Subsequent training is available at the discretion of the Board

**SECTION III OFFICERS AND THEIR DUTIES**

**Election of Officers**

The Board shall elect, by a majority vote at its annual meeting, the following officers from among its membership. The term of each officer shall be limited to one (1) year; however, any officer shall be eligible for re-election. Hereafter the term of Chairman shall refer to Chairman, Vic-Chairman or Co-Chairman.

Chairman

The Chairman shall preside at all meetings and hearings of the Board and shall have the duties normally conferred on such officers. The Chairman shall appoint such committees as directed by the Board, including one member of the Board who shall act as Chairman of such Committees. As directed by the Board, the Chairman may affix his/her signature in the name of the Board. An ex-officio member of the board cannot serve as Chairman.

Vice Chairman

The Vice Chairman shall act for the Chairman in his absence and have authority to perform the duties prescribed for that office during the Chairman's absence.

## PLANNING BOARD MEETING

March 18, 2010

Page 4 of 8

### Co-Chairmen

Each year, upon agreement by all voting Members, the Board shall elect to have a Chairman and a Vice Chairman or two Co-Chairmen. In the case of the election of Co-Chairmen, each Co-Chair will have the authority to fill in the chairman position. At a start of a meeting, one Co-Chair will declare him/herself as running the meeting

### Non-Elected Officers

A Secretary may be hired by the Board of Selectmen. The Secretary will be responsible for the maintenance of the minutes and records of the Planning Board

A Town Planner/Administrative Assistant (Staff) may be hired by the Board of Selectmen. Staff shall assist the Planning Board prior to and during meetings and assist applicants and Brookline residents with any planning issue. A complete description of the duties of Staff is available at the Selectmen's Office.

## SECTION IV MEETINGS

### **Regular Meetings**

Regular meetings of the Board shall be held twice a month, on the first and third Thursday and shall be open to the public. The time and place of the meetings shall be selected by a majority vote of the Board taking place at the annual meeting. Regular meetings shall not be held on Sundays or legal Holidays. The following general rules of procedure shall govern the conduct of such meetings:

#### Quorum Required

A majority of the membership of the Board shall constitute the quorum necessary in order to transact business at any meeting. In the event of the absence of a regular member, the Chairman shall designate, upon opening the meeting, an alternate to act in the absent member's place. Only the alternate designated by the Selectmen for the ex-officio member shall serve in place of that member. Should a situation arise when there is no Chairman present but a quorum exists the longest serving member shall chair the meeting.

#### Notice of Meetings

Notice of time, date and place of any public meeting of the Board shall be posted in two (2) public places or printed in any paper of general circulation at least twenty-four (24) hours, excluding Sundays and legal holidays, prior to the meeting.

#### Records Required

Draft minutes of the events of the meetings shall be taken and shall include the names of members in attendance, persons appearing before the board, a brief description of the topics discussed, and a record of any actions taken (see Record of Decisions, below). Such minutes shall be available for public viewing within 5 business days after the meeting (RSA 91-A:2(II)). Minutes of Executive Session shall conform to the requirements of RSA 91-A:3.

#### Order of Business

The general order of business may be as outlined below:

- Call to Order
- Roll Call
- Reading and Acceptance of minutes of Previous Meeting
- Communications
- Committee Reports
- Unfinished Business
- Public Hearings
- Other Business
- Adjournment

#### Voting

A motion, duly seconded, shall be passed by a majority of members present, once a quorum has been established, voting in the affirmative.

Record of Decision

Pursuant to RSA 676:3, whenever the Board issues a **decision**, record of the decision shall be placed on file in the Board's Office or with the Town Clerk and be made available for public inspection no more than 5 business days after the decision is made.

**Special Meetings**

Special Meetings may be called by any Chairman and a notice to members shall be at least forty-eight (48) hours in advance of the meeting. Notice to the public shall be in the same manner as for a regular meeting. No business shall be acted upon at a special meeting unless a quorum of the membership is present. The notice of the meeting shall specify the purpose of the meeting and no other business may be considered except by unanimous consent of the Board members present once a quorum has been established.

**Annual Meeting**

An annual organizational meeting shall be held at the first regular meeting following the close of Town Meeting, but in no event later than thirty (30) days following the close of town Meeting. The purpose of the annual meeting will be to elect officers and to review the by-laws, which shall be made part of the minutes of the meeting. All members must be present before the election of officers can take place.

**SECTION V PUBLIC HEARINGS**

**A. Public Hearings Required**

Public Hearings shall be held, as required by the New Hampshire Revised Statutes Annotated for:

1. Master Plan or amendments proposed under RSA 674:1
2. Subdivision regulations proposed under RSA 674:35-37
3. Site Plan review regulations proposed under RSA 674:43-44
4. Zoning ordinances proposed under RSA 674:16
5. Board review of subdivision or site plan proposals under RSA 674:35-37 and 674:43-44

**B. Notice of Hearing**

Notice of any hearing shall be given at least ten (10) calendar days prior to the date of hearing by publication in any paper of general circulation or by posting in at least two (2) public places. The ten (10) calendar days shall not include the day of posting or the day of the meeting. For hearings involving an application for subdivision or site plan review, notice to the applicant and abutters shall be given by certified mail at least ten (10) days prior to the meeting. A notice for the first Public Hearing shall also be published in a newspaper of general circulation in the area at least ten (10) days prior to the meeting. The full text of any notice need not be included in the notice provided an adequate summary is included in the notice and a location is specified where the proposal may be viewed by the public.

**C. Conduct of the Hearing**

The presiding Chairman shall run the public hearing, and shall:

1. Convene the meeting and read the legal advertisement announcing the date, time and purpose of the meeting into the records;
2. Briefly state the manner in which the hearing shall be conducted;
3. Call upon the applicant, or sponsor of any proposal, to present the proposal;
4. Read any written testimony received concerning the proposal into the record;
5. Call upon those appearing in favor of, or in opposition to, the proposal to direct questions or comments to the Chair;
6. Call the hearing to a close, as appropriate, outlining the board's anticipated procedure concerning the proposal.

**PLANNING BOARD MEETING**

**March 18, 2010**

**Page 6 of 8**

**D. Record of Meeting**

A public record of the proceedings shall be taken in writing and incorporated into the Board's minutes. The hearing may also be recorded by a sound recording device and such recordings shall be kept on file as part of the public record.

***SECTION VI JOINT MEETINGS AND HEARINGS***

**Request for joint Meetings**

The Board, any applicant or any other land use board, may request a joint meeting or hearing of the boards on any topic common to their respective jurisdictions. Each Board shall have the discretion as to whether or not to hold a joint meeting with another board.

**Planning Board Shall Chair**

The Planning Board Chairman shall chair ANY JOINT MEETING OR HEARING in which the Board is involved (RSA 676:2). The Chairman shall follow the general rules of conduct outlined in these By-Laws.

**Notices and Decisions**

Each Board participating in the joint meeting or hearing shall be responsible for providing notice, filing minutes and decisions, and for rendering and issuing decisions, as appropriate, for the subject matter within its jurisdictions, as prescribed for that Board by statute, local ordinance, or other rules of procedure.

**SECTION VII STAFF AND FINANCES**

Within the limits of funding made available for its use by the Town Meeting, the Board may employ such staff personnel and/or consultants as it sees fit to aid the Board in its work. Appointments shall be made by a majority vote of the members present at any regular or special meeting at which a quorum has been established.

**SECTION VIII PUBLIC RELATIONS & COMMUNICATIONS**

The Chairman or a duly appointed Board member or staff personnel shall be authorized by the Board to act as the principal public relations contact for the Board. Duties shall be as prescribed by the Board.

Communications with Town Counsel shall be through the Chairman and/or his/her designee and shall be confidential to the Board unless otherwise noted.

**SECTION IX COMMITTEES**

The Chairman may appoint special committees for the purposes and terms approved by the Board. This may include assignments to subdivision and site plan review projects.

**PLANNING BOARD MEETING**

**March 18, 2010**

**Page 7 of 8**

**SECTION X APPLICATIONS AND FORMS**

**A. Applications**

Applications for subdivision or non residential site plan review shall be made on forms provided by the Board.

**B. Submission of Applications**

No application shall be placed upon any agenda for acceptance at a regular meeting of the Board unless the completed application is received by Staff no less than thirty (30) days prior to the meeting date at which it is to be accepted and/or discussed. No application will be received by Staff except in proper form, as prescribed in the subdivision or site plan review regulations and per RSA 676:4,I(b)

**SECTION XI AMENDMENTS**

**A. Amendments**

These By-Laws may be amended by a two third (2/3) vote of the entire voting membership of the Board only after the proposed change has been read and discussed at a previous regular meeting, and excepting that the by-Laws may be changed at any regular meeting by the unanimous vote of the entire voting membership of the Board.

**B. Filing with Town Clerk**

These By-Laws and any amendments thereto shall be placed on file with the Town Clerk for public inspection. A complete set of By-Laws, as amended, shall also be attached to the minutes of the Board's annual organizational meeting and kept on file.

**C. Effective Date**

These By-Laws, and any subsequent amendments, shall become effective immediately upon passage by the Board as recorded in the minutes of the meeting at which such action occurs.

**PLANNING BOARD MEETING**

**PLANNING BOARD MEETING**

**Minutes**

**April 01, 2010**

**Present: Alan Rosenberg, Member, Voting  
Mike Papadimatos, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate (Voting for Richard)  
Paul Anderson, Alternate  
Valérie Maurer, Town Planner**

**Absent: Richard Randlett, Member, Kevin Gorgoglione, Selectmen's Representative Alternate.**

**Minutes**

Not enough people from the previous meeting to approve the minutes.

**Appointment of Chair Persons for the Planning Board.**

**Alan** said the Board first needs to decide if they would like to stick with two Co-Chairs or go back to Chair and Vice-Chair. Alan said he thought having two Co-Chairs was working really well. The Board agreed to continue with Co-Chairs.

**Ron moved to nominate Alan for the Co-Chair position of the Planning Board. Seconded by Mike. Vote yes 3-0.**

**Alan** asked Dana to vote for Richard for this meeting. **Dana** agreed

**Alan moved to nominate Mike as for Co-Chair of the Planning Board. Seconded by Ron. Vote yes 4-0.**

**Conceptual, Roger Skillings & Charlie Corey, Site Plan amendment (Lot C-42)**

In attendance for this meeting Roger Skillings, & Charlie Corey.

**Charlie** handed a copy of the site map to the Board and explained he will be renting a few acres of the Skillings' property for the sale and storage of loam, sand, and a compost pile. He will also be using a few of the sheds: one for vehicle maintenance and one for the storage of pellets. The hours will be Monday thru Friday 6:00 am to 6:00 pm., Saturday 7:00am to 5:00pm., and a few Sundays out of the year.

**Charlie** said he is coming to the Planning Board because we don't want to enter into an agreement to rent and then a few years later be told that it can't be done in that location. **Charlie** said he wasn't sure

what the procedure was exactly but he wanted to come in to discuss it. **Valérie** asked if the operation that exists now will be moved to the other side of the property where the buildings are. **Charlie** said yes. **Roger** said he just would like to know if this could be done before he proceeds. **Valérie** said he would need a new plan and a letter from Roger, being the property's owner, stating that he gives permission for this. **Valérie** said another concern would be the vehicle maintenance on site and where all fluids would go. **Roger** said that is already being done by his company and was included on the site plan. **Alan** said they could use the existing plan and draw where all the piles will be located. **Valérie** said this should be a public hearing notifying the abutters. **Dana** asked if there was going to be any onsite excavation or if the material was going to be brought in. **Charlie** said it's all brought in to be sold. **Valérie** said you will need to fill out a sign permit as well. **Dana** asked if the Conservation Commission will look at this new plan. **Valérie** said yes. The Board will wait for a new plan submission and then will schedule a public hearing.

### **Conceptual, Al Patenaude, Workforce Housing (Lots J-41-1, J-41-3, and J-41-4)**

Attending this meeting Randy Haight (Meridian Land Services) and Al Patenaude.

**Randy** presented a second conceptual site plan development and said they have changed the plan since the last time they were in taking under consideration the zoning amendments in March. The plan now has 11 workforce housing (ranch style) single family units and 11 market rate lots. We are still accessing the lots from Laurelcrest Drive and not off Route 13. There are 3 common driveways, each serving 4 houses. **Randy** said they do need clarification on the 50 foot vegetative buffer around the entire site.

**Randy** said that there are 7 lots total that will need to be consolidated into one subdivision and the entire site consists of 30 plus acres and you only need a 10 acres parcel for workforce housing. **Valérie** said the Board will need clarification to see if the 7 lots located on both sides of Laurelcrest Drive can be combined into one subdivision or will it need to be two subdivisions, one subdivision on each side of the road. **Valérie** said if they can not be combined into one subdivision they will need to go to the Zoning Board since the parcel south of Laurelcrest Drive contains less than 10 acres. **Randy** said the 2 common driveways off Baldwin Drive will be side by side but will have a grade separation for snow and drainage. **Valérie** asked who will take care of the common driveways. **Randy** said owners of homes that are accessed from the common driveways will. **Valérie** said one of the new rules is that all utilities need to be put underground. **Al** said that will be the power company's job but if required that's what will be done. **Randy** said there will need to be at least one pole to bring existing power across the street and then bury the lines. **Valérie** said she will check with Town Counsel regarding the consolidation of all existing lots and will get back to the Board and Randy with the results. **Al** asked if this plan with the ranch style homes fits better with what the Town is looking for more than the last plan. **Dana** said he thought it was a great plan. **Alan** said he likes the concept very much. The Board agreed.

### **Master Plan Update**

**Alan** said they have an update from TF Moran. TF Moran has worked with UNH Cooperative Extension before. The Board is waiting for Kerrie Diers with NRPC to submit a proposal. **Valérie** said Kerrie has met with UNH CE. Valerie also contacted the UNH CE and they are interested in working with the town. An application still needs to be submitted. **Valérie** said the UNH CE facilitates master Plan Visioning Forums. **Ron** asked if there was a deadline to get on the list for the Coop to work in Brookline. **Valérie** said the deadline has already passed but that is why Kerrie spoke with them as well and we should be all set.

Both submissions from TF Moran and the NRPC will be reviewed and discussed at the April 15, 2010 meeting.

**Mike moved to adjourn at 8:35 pm. Seconded by Ron. Vote yes 4 -0.**

**PLANNING BOARD MEETING**

**Minutes**

**May 06, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Mike Papadimitos, Co-Chair, Voting  
Kevin Gorgoglione, Selectmen's Representative, Member, Voting  
Richard Randlett, Member, (Left at 7:45pm)  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate (voting for Richard Randlett at 7:45 pm)  
Paul Anderson, Alternate**

**Absent: Valérie Maurer, Town Planner**

**6:30 pm Non-public session 1**

**Kevin moved to go into non-public session under RSA 91-A: 3,II(c). Seconded by Alan. Alan, Kevin, Mike, Richard and Ron all voted yes.**

**Ron moved to come out of Non-public session at 7:45pm. Seconded by Kevin. Kevin, Alan, Mike, Richard and, Ron all voted yes.**

**Ron moved to seal the minutes of the non-public session. Seconded by Kevin. Vote yes 5-0.**

**Regular Planning Board Meeting**

**Richard left at 7:45pm. Alan asked Dana to vote for Richard. Dana agreed.**

**2011-2016 Capital Improvement Plan and Committee**

**Alan** said the Capital Improvements Committee (CIC) falls under the jurisdiction of the Planning Board. The Capital Improvement Plan (CIP) is the basis for charging impact fees based on population growth, school expansions, etc. This group (CIC) gathers information from all the Departments and Schools. **Alan** said he has done it for the last few years and would like to know if anyone else would like the challenge. **Alan** said with the update of the Master Plan he would not have the time to work on the CIP. **Alan** said this group is chaired by the Planning Board representative and consists of one Finance Committee Member, one Selectmen's Representative, one Facility Committee Member and one At Large Member. **Mike** asked how often they meet. **Alan** said when they need to in order to review the input from all departments. But they do have three public hearings where the Departments come in and discuss their submission.

**Alan** said the packets should be going out to the Department Heads anytime now. The spreadsheets and forms are all set up and all you have to do is fill them in. **Alan** said he will be around to help but he will not have time to run it. **Paul** volunteered to run the CIC. **Alan** thanked him. **Paul** asked if he could contact the people that were involved in this last year. **Alan** said yes. **Kevin** suggested he asks Christopher Adams from the Finance Committee for the CIP project; he may want to be involved with that.

**Al Patenaude**

**Al** said he was under the impression he could get the answers to the questions the Planning Board had about this plan at this meeting **Alan** said the Board would need more time to gather information. **Al** said he was just waiting for the answers about Laurelcrest Drive running through the subdivision before he continued on to submit a formal plan to the Board. **Alan** said he will have Valérie gather the information and get back to him Friday when she is back in the office. **Alan** said there is a letter here from the fire Department and their concerns with the conceptual you had at the last meeting were they would like to see more detailed plans for the common driveways and how they are going to accommodate the turning around of Fire Apparatus. Lot #2 workforce housing lot: the Fire Department will need to know how to access that lot. Additionally, they would like to know if it would make sense to connect the two common driveways off of Baldwin Drive and Averill Road and make Baldwin Drive go all the way through to Averill Road. **Al** thanked the Board for the information.

**Mail Letter from Attorney Drescher re: Clover Hill Reality Trust**

**Alan** said there is a letter from Attorney Drescher that gives the status of the Clover Hill Estates lot H-75. This open space subdivision was approved prior to the Housing for Elderly Persons was proposed. The attorney has rendered his opinion and Valérie said we will have to decide to make this letter public or not. **Ron** said the letter will clarify some confusion. **Ron made a motion to make letter written from Town Counsel William Drescher dated April 16<sup>th</sup> 2010 to be made public. Seconded by Mike. Vote yes 5-0**

**8:30pm Non- public session 2**

**Move to go into non-public session at 8:30pm under RSA 91-A:3 II(c) for the purpose of discussing a contract. Ron Seconded. Roll call vote Alan, Kevin, Mike, Dana, and Ron all voted yes.**

**Kevin moved to come out of non-public session at 8:55pm. Ron Seconded. Vote by roll call Alan, Kevin, Mike, Ron, and, Dana all voted yes.**

**Kevin moved to seal the minutes of the non-public session. Mike Seconded. Vote yes 5-0.**

**Kevin moved to adjourn at 9:00 pm. Mike Seconded. Vote yes 5 -0.**

**Kevin made a motion to accept the public minutes for the May 6<sup>th</sup> 2010 Planning Board meeting as written. Richard Seconded. Vote yes 5-0.**

**Kevin made a motion to accept the 1<sup>st</sup> Session of Non-Public minutes for the Planning Board meeting on May 6<sup>th</sup> 2010 as amended. Richard Seconded. Vote yes 5-0.**

**Kevin made a motion to accept the 2<sup>nd</sup> Session of Non-Public minutes for the Planning Board meeting on May 6<sup>th</sup> 2010 as amended. Richard Seconded. Vote yes 5-0.**

**Road Bonds - Sawtelle Road & Bennett Road**

Dennis LaBombard (LaBombard Engineering) in attendance for this discussion.

**Richard made a motion to send a letter of recommendation to the Board of Selectmen a construction bond being established for Sawtelle Road for \$46,425 and a construction bond for Bennett Road in the amount of \$23,940. Mike Seconded. Vote yes 5-0.**

**Road Bonds - Cider Mill Road and Smith Road**

**Richard made a motion to write a letter to recommend to the Board of Selectmen that a revised construction bond for Cider Mill Road be established for \$28,050 and also a revised construction bond for Smith Road in the amount of \$22,500. Ron Seconded. Vote yes 5-0.**

**Michele Gagne, Training and Planning Coordinator, UNH Cooperative Extension RE: Master Plan Visioning Assistance.**

**Michele** said she was contacted by Nashua Regional Planning Commission and from TF Moran about this project. She said she wasn't sure what company the Planning Board went with. **Alan** said they have gone with NRPC for the update of the Master Plan. **Michele** said first the Board wants to get a steering committee together. In the fall you could have your first visioning session. **Alan** said he thought the early fall would be good. **Michele** asked if the Board did a survey the first time they updated the Master Plan. **Valérie** said she didn't find anything that suggested they did. **Michele** told the Board that a large study committee should be formed and split it into two groups: one to work on the survey and one to work on the fall forum. **Kevin** suggested a copy of NRPC's schedule for the town Master Plan update project be given to Michele. **Michele** said the Board needs to get a representative from all departments. We could hold an information session before school gets out. **Michele** said she would like at least two people from the Planning Board. **Alan, Dana and Ron** all volunteered. **Kevin** said he will be the Board of Selectmen's Representative. **Michele** said we should also have an email list so even if they are not attending meetings people will be updated on the progress and if they wish to give suggestions they can still do that. **Michele** said we could ask people that were on the first committee. **Valérie** said she will send out an email to all Boards and Departments in town and ask who would be interested. **Michele** suggested that the Board schedules a meeting date tonight so they have time to put it in the paper and get the word out. **Valérie** said she will see if the Fire Department meeting room is available. **Michele** said there is no limit as to how many people can attend. An RSVP will be nice but not required just to see what kind of turn out we may have. The Board decided on Tuesday, June 15<sup>th</sup> at 7:00pm at the Fire Station. For the first steering committee meeting **Michele** said that she will be looking for volunteers and would like a commitment by the end of the meeting.

**Kevin** asked what to tell people when they ask what they may be getting involved in. **Michele** said there will be two groups one working on the survey and one working on the fall forum; they will meet separately and then meet as a whole on occasion to discuss what each group has been doing. **Michele** said UNH will set up a WIKI which is a working website that people in the groups, using a password, can update anytime but allows the public to view the progress. **Kevin** asked how many at large people each group should have. **Michele** said one or two is good. **Alan** said the Board will reach out to the people who worked on the 1997 update of the Master Plan. **Michele** said the meeting on June 15 will be about an hour long. **Valérie** said she would prepare a flyer, send notices to the newspapers and send out a mass email using the list she put together during the iTRaC project. **Alan** said he will write an article to send to the papers and post it on the Yahoo group. The Board thanked Michele for meeting with them.

**Richard moved to adjourn at 9:00 pm. Mike Seconded. Vote yes 5 -0.**

**PLANNING BOARD MEETING**

**Minutes**

**June 3, 2010**

**Present: Mike Papadimatos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Valérie Maurer, Town Planner**

**Absent: Alan Rosenberg, Co-Chair, Kevin Gorgoglione, Selectmen's Representative,  
Dana MacAllister, Alternate, and Paul Anderson, Alternate.**

**7:00pm Mike Opened the Meeting**

**Minutes**

**Ron made a motion to accept the public minutes for the May 20<sup>th</sup> 2010 Planning Board meeting as written. Richard Seconded. Vote yes 3-0.**

**Case Review – NRSP # 2010-C: C-42, Charles Corey, Storage and sell of earth products.**

In attendance for this hearing: Charlie and Sheryl Corey, John Liska (197 Route 13),

**Mike** said this applicant is asking for permission to (continue to) store and sell items such as loam, sand, concrete compost, wood pellets. Also requested: screening operation and parking/repairing equipment and trucks in the garage. **Valérie** said Charlie had dropped off a plan to lease 3 acres of Lot C-42 (24 Quimby Road, Skillings Property) to continue running the operation of storing and selling gravel, sand, etc. He is moving the operation to the side of the lot that the garage is located on. After a review of the plan Valérie had given Charlie a list of things that were missing from the plan. Charlie came back with an updated plan and a letter from Roger Skillings stating that he has permission to run his operation on this property. Charlie will also need a permit for the sign. **Charlie** said he has come in to get a sign permit and was told he needs the Planning Board approval first.

**Valérie** said the only suggestion she has is for the Board to recommend that the leased land be staked off or flagged for future reference.

**Valérie** said there was a plan that Roger Skillings submitted and was approved by the Planning Board but never recorded. The plan in front of us tonight, if approved, will supersede the original plan.

**Valérie** said abutters have been notified, fees paid, and the notices posted for public review.

**Richard** asked if the lease land line will have cement walls behind the piles. **Charlie** said no but they will be staking off the lease land line.

**Ron moved to accept NRSP #2010-C: C-42. Richard Seconded. Vote yes 3-0.**

**Mike** asked Charlie if they crush stone at this site. **Charlie** said yes they do but only about once a year. Even if business was better they would only crush stone twice a year once in the spring and once in the fall. **Richard** said that must be the loudest process you perform. **Charlie** said they are not there that long. **Richard** asked if they have crushed asphalt as well. **Charlie** said yes they do they crush it there. They are crushing all the used asphalt. **Mike** asked what other equipment is there that would make a lot of noise. **Charlie** said they have a screener which is much quieter than the crusher and they try to do most of the screening at the job site. The trucks have back up alarms. They will be pulling into the site and only backing up a short distance to each pile. **Ron** asked how long he has run his business at this location. **Charlie** said about 3 years. **John Liska** said the only thing he asks is that the crusher stops at about 5:00 – 5:30 pm. It is very loud. Also when you grind up the asphalt it produces oil if you could keep it in a confined area. There is a lot of water in that area. **Charlie** said it doesn't produce a lot of oil there's a little but not enough to leak all over the place. The State has a pile and it is not leaking oil everywhere. **John** said he just wanted to make sure there is no oil mixing with the water. **Valérie** said the pile is located away from the 100 feet wetland buffer. **Mike** said it looks like it is about 400 feet from the prime wetlands. **Valérie** asked if they could put in a concrete pad to store the recycled asphalt. **Charlie** said he could but he didn't think it was necessary; people put this in their driveway and Brox in Milford stores a pile on the ground and the State stores the piles without a concrete pad. This sell very quickly we don't store it for very long. **Mike** agreed he has never seen it stored on a pad. **Valérie** said they have stated the hours of operation will be Monday thru Friday 6:30am to 8:00 pm, Saturday 7:00am thru 8:00pm, and Sunday 8:00am thru 4:00pm. **Charlie** said he starts around 7 in the morning and works until about 5-5:30 pm on regular days but if we have three days of rain and need to get a job done they may need to stay later. He also said he hasn't worked a Sunday all year but if something comes up or I need to load someone's truck with pellets he would like to be able to do it on a Sunday if asked.

**Richard moved to approve application NRSP #2010-C: C-42 with the following conditions:**

- All fees for application review and meeting time shall be paid
- Any change in hours of operation, use of the property, additional and/or new business shall be presented to the Planning Board for review
- The applicant needs a sign permit to advertise any business conducted on the property. The Building Inspector does not have any permit in file. See section 1600.00, Sign Ordinance.

**Ron Seconded. Vote yes 3-0.**

**Richard moved to adjourn at 7:45 pm. Ron Seconded. Vote yes 3-0.**

**PLANNING BOARD MEETING**

**Minutes**

**June 17, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Mike Papadimatos, Co-Chair, Voting  
Kevin Gorgoglione, Selectmen's Representative, Voting  
Richard Randlett, Member, Voting  
Dana MacAllister, Alternate  
Valérie Maurer, Town Planner**

**Absent: Ron Pelletier, Member and Paul Anderson, Alternate.**

**7:00pm Meeting start**

**Minutes**

**Not enough people to approve the minutes.**

**Master Plan Update**

**Mike** asked how the meeting went on June 15<sup>th</sup> for the Master Plan Update. **Alan** said he thought it went very well. There were about 25 people there. There will be a follow up meeting at the Brookline Event Center aka Brookline Auction Gallery on June 29<sup>th</sup> 2010 at 7:00 pm. **Valérie** handed out a copy of the notice she would like to put in the newspapers about the upcoming meeting. The Board reviewed.

**Valérie** said they will still need volunteers for the two committees, one to develop a public survey and the second to work on the Visioning Forum (location, invitations, daycare, food, marketing, etc.) that will be held in October. Public participation is very important to this project. She will be placing an ad in the papers and in public places in town so people will be aware of the meeting and what will be covered. **Valérie** announced if anyone had any question to please call or email her at the Town Hall.

**Laureen MacLean, 2-lot consolidation, G-45-8 and G-45-9, Winterberry Road**

**Alan** said this is a lot consolidation

**Valérie** said Laurie would like to consolidate two lots into one. The lot numbers are G-45-8 and G-45-9 located on Winterberry Road. The requirements are that they need to be contiguous and owned by the same owner. You do not need a public hearing or a new plan to do this. Laurie has changed the names so they are the same and the lots are contiguous. This will need to be signed, notarized and then recorded

before it can be changed in the assessing system. This is all set to sign. **Alan** signed as the Planning Board CO-Chair, **Valérie** notarized, and **Kristen** witnessed.

### **Workshop: Proposed Amendments to Zoning and Regulations (first Discussion)**

#### **Planning Board Workshop – June 17, 2010 / Proposed Amendments to Zoning and Regulations**

### **ZONING**

#### **Industrial-Commercial District – Section 500.00**

Building Height, section 603-05: Add a new sub-section “accessory building”: such as sheds 90 sq/ft require a building permit.

**Valérie** said the Building Inspector has asked that this be put into the zoning. The State regulation only requires a permit for 200sf and up. The Building inspector would like to go out and make sure the shed being built is not in the setback. **Dana** said towns usually ask for a permit for anything 120 sq/ft and up. **Valérie** said she will discuss with the Building Inspector.

#### **Residential-Agricultural District – Section 600.00**

**Building Height, section 603.05** - Rename section as “Building Requirements” keeping current wording and adding: “any new dwelling unit shall contain at least 576 sq/ft of first floor living area and manufactured housing to have 320 sq/ft”

Also, add a new sub-section “accessory building”: such as sheds 90 sq/ft require a building permit. These requirements were in the building code that was repealed at the March 2010 town meeting. (Letter from Building Inspector, dated June 2, 2010)

**Valérie** said the Building Inspector has asked that this also be added into the Zoning Ordinance now that we have gotten rid of the Building Code. She also thought they could make this a town ordinance with the approval of the Selectmen. She will discuss this with the Building Inspector.

#### **Workforce Housing, section 620.00**

Please, see suggestions received from Dana in an email dated April 2, 2010:

*After last night’s meeting I had a couple of thoughts for the 2011 Zoning Ordinance:*

- 1.) *We should probably think about adding to the language regarding the 50 foot vegetated buffer on workforce housing developments. There doesn’t seem to be a need to have 50 foot buffer between workforce housing lots and roads, commercial/industrial properties, or other workforce housing developments. Maybe we should add ....50 foot undisturbed vegetated buffer....where bordering existing market rate lots.....*
- 2.) *Change the wording on minimum workforce development parcel size to...contiguous 10 acre site, which may be made up of smaller parcels....or a wording similar to that.*
- 3.) *We may also want to address common driveways, private ways, etc. and how they affect access to workforce housing developments, as the ordinance states that that town will not be responsible for the roads in those developments.*

Please, see comments received from the Fire Department in a letter dated April 15, 2010:

*The Fire Department received this proposed subdivision plan on Wednesday April 14, 2010 and was asked to comment on it. At the present time the Fire Department would like to see a detailed plan for the common drives and how they are going to accommodate the turning around of our Fire Apparatus. Lot 2 work force housing how does one get to that lot? After reviewing the plan wouldn't it make more sense to connect the common drives off of Baldwin and Averill and make Baldwin Drive go all the way to Averill road? A plan that is to scale and has the dimensions on it is also required by the Fire Department as well. If there are any questions please do not hesitate to contact me.*

626.00, 2. – Change to read as follow: “The minimum parcel size for a workforce housing development shall be at least ten (10) *contiguous acres of dry land*”

626.00, 5. – Add the following language: *When bordering existing market rate properties, there shall be a 50-foot undisturbed vegetated buffer.*

628.00, 3. – Add new sub-section addressing the need of connecting such development to existing roads, minimizing common driveways for safety purposes (plowing, access and turnaround for emergency vehicles, etc)

**Valérie** said she will ask Dennis LaBombard (Town Engineer) if he can attend the next meeting and ask for his opinion regarding the common driveways, connecting roads, etc. so the Board can discuss this at the next workshop.

### **Growth Management Ordinance – Section 1400.00**

As briefly discussed during a previous P.B. meeting, the Board will need to discuss this ordinance. Data collection during the month of November 2010 will be necessary.

**Valérie** said Richard had mentioned possibly eliminate the growth management Ordinance since the economy has dipped. She would like to check with other surrounding Towns to see what they have done if anything. **Alan** said he didn't see any harm in leaving it in the Zoning Ordinance.

### **Sign Ordinance – Section 1600.00**

Recommendation to review the ordinance and address at least the following items:

Commercial District: Sections 1605.01(a) and 1607.03(a) – Requirements

General: discuss “small” signs put along the roads and on utility poles advertising businesses, services (with the exception of real estate and trade signs)

**Alan** asked Valérie to find any minutes or decisions made by the Sign Ordinance Committee. **Dana** said he will get a copy of Milord's sign ordinance and bring it to the next meeting. You can also find it online.

### **SUBDIVISION REGULATIONS**

Procedure – Section 3

3.1.17, Conditional approval – add the following wording: “Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat” RSA 676:3,III

- 4.8.05, Roads – Add the following language: “*Except for roads designated as private roads, all roads shall be property deeded by the applicant to the Town of Brookline by a Warranty Deed*”
- Open Space Development – Section 4.12
- 4.12.02, replace the reference to section 3.1.25 by 3.1.32
- 4.12.03, add the following: “The 50-foot perimeter setback, *or a value as deemed necessary by the Planning Board*, is a buffer between (...)”

**NON-RESIDENTIAL SITE PLAN REGULATIONS**

Procedure – Section 3

3.2.09, Conditional approval - add the following wording: “Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat” RSA 676:3,III

**Valérie** said there is a new RSA that states every condition of approval needs to be recorded either on the plan or on a separate document that will be associated to the plan. That will need to be changed in our regulations.

**Road Bonds**

**Valérie** said that there have been issues with some Road Bonds and roads in new development that take for ever to be completed. She would like to know if they could add something to the regulations that would set some kind of cut-off date to have the road completed. **Valérie** said she will ask Dennis LaBombard (Town Engineer) for an opinion. **Richard** said he would like to hear from the Road Agent as well. **Valérie** will ask Dennis LaBombard and Jerry Farwell is they both can attend the next meeting.

**Kevin moved to adjourn at 9:00 pm. Richard Seconded. Vote yes 4-0.**

Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate  
Paul Anderson, Alternate  
Valérie Maurer, Town Planner**

**Absent: Kevin Gorgoglione, Selectmen's Representative.**

**7:00pm Meeting started**

**Minutes**

**Richard made a motion to approve the minutes of the June 3, 2010 Planning Board meeting as written. Ron Seconded. Vote yes 3-0.**

**Richard made a motion to approve the public minutes of the June 17, 2010 Planning Board meeting as written. Mike Seconded. Vote yes 3-0.**

**Master Plan Update**

**Alan** said that the Steering Committee held the second Master Plan update meeting last Tuesday at the Brookline Event Center. **Alan** said he and Laurie Stevens are Co-Chairs for the Forum Steering Committee. He has invited Laurie here to introduce herself to the Planning Board. **Laurie** said she lives on Russell Hill and is a Civil Engineer; she has wanted to start participating in the community so she joined in the Master Plan Update and the Forum Steering Committee. **Alan** said they formed two Subcommittees: one to create a survey and one to put together a forum that will be held late October. **Valérie** said the Survey Steering Committee has been split into three groups they will each work on five chapters and come up with about three questions for each chapter for the survey. The next Survey Committee meetings will be held on July 6<sup>th</sup> and July 13<sup>th</sup>. **Alan** said the Forum Committee is meeting again on July 13<sup>th</sup> at the ambulance bay. **Valérie** said that she would like to remind that the Planning Board does not have a budget for food or drinks for the forum in October. For the visioning meeting we asked for donations and that worked really well. **Alan** said the first thing we need to do is figure out

where the forum will be held and if there will be any restrictions as far as food goes. Last year CSDA was a nut free facility so we had to watch what was brought into the building. **Alan** said he wanted to catch up with Michele Gagne from the UNH- Coop but was unable to get in touch with her, he will try again next week.

### **Workshop: Proposed Amendments to Zoning and Regulations (Second Discussion)**

#### **Roads – Regulations**

In attendance for this discussion was Dennis LaBombard (LaBombard Engineering LLC, Town Engineer)

**Alan** said when a subdivision is built and the road is constructed there is a bond for construction and maintenance that need to be put in place. This bond is renewed every year. Before the Town accepts a road it has to have the final top coat and it needs to survive two winters and once the Road Agent, Town Engineer, and Planning Board are satisfied then it goes to town meeting for acceptance by the voters. The challenge we are faced with is there is no language that states when or how long you have to finish the road. **Dennis** said due to construction cost you have to increase the bond amount every year. Some bonds are cash bonds and sit in an account and collect interest. Some bonds are in a form of a letter of credit and the bond holder can choose not to renew a bond. **Dennis** said the life of a paving job is 15 years and he thought 5 years was a reasonable amount of time. You may want to add wording to the regulation that the Planning Board can waive the five year limit if needed. **Paul** asked if there is a logical time as to when to put the top coat over the base coat. **Dennis** said the regulation state they have to wait at least a year after the base coat is down to put on the top coat. **Alan** read Subdivision Regulation Appendix A. A.5.G “The wearing surface shall consist of 3 inches of plant mixed bituminous concrete. It shall be applied in two (2) courses, 2" base course and 1" top course. The top course shall not be applied until at least one calendar year has passed from the date of the completion of the base course. (8/21/97). **Alan** said they could add “not more than 5 calendar years to have road completed” to this section. The Board agreed.

**Paul** asked who keeps track of all the roads. **Dennis** said he doesn't keep a spreadsheet but he has all that information in his files. **Paul** asked if they have any roads that are 5 years old and only have a base coat. **Dennis** said yes there are quite a few and the oldest is about 10 years old with only a base coat. **Alan** said that what we would change in the ordinance today would not apply to those roads; they would be grandfathered. The Board agreed there should be a limit as to when a road needs to be completed by. The Board though they should get Jerry Farwell's (Road Agent) opinion on the matter. **Dennis** said he will ask other towns and get the Road Agent's opinion and get back to the Board with his findings. **Paul** asked what happens when the five years is up and the road isn't finished. **Dennis** said the bond can be recalled and the Town would finish the road.

#### **Common Driveways**

**Alan** asked Dennis if he had any thought or comments about common driveways. For example, what is your opinion on how many common driveways in one subdivision or at the end of a road. **Dennis** said he is a fan of through roads. He said he doesn't like to see common driveways clustered together. You have to have somewhere to drop snow in the winter. He would recommend at least 30 to 40 feet spacing between common driveways.

#### **Growth Management Ordinance**

**Valérie** said she asked other towns what they were doing about the Growth Management Ordinance and all surrounding towns she has been in contact with do not have one anymore. There is no growth right

now you have to justify it in order to have the growth management ordinance in place. The sunset clause states the growth management ordinance will expire at sunset on the day of town meeting in March of 2011. If we let this expire and think that at some point we may need to reinstate it, we could do it at another Town Meeting. Right now, we only need to add a page to the ordinance that states the growth ordinance has expired on 3/9/2011. **Richard** said he would like to see the Town keep the ordinance in place. **Valérie** said the revised RSA is clear and requires that we conduct a study to justify the ordinance and we can not right now. **Richard** said he didn't think the keeping the growth ordinance was hurting anything.

**Alan** said if all the surrounding Towns had let the growth management ordinance expire we can't justify keeping it.

**Valérie** said the goal of having such ordinance is to keep the growth in town at about 3%. Right now we aren't even close to that.

**Sign Ordinance**

**Valérie** said she would like to get more information to present to the Board before they discuss possible changes to the sign ordinance. She will add to the next agenda. **Dana** said he brought in a copy of Milford's sign ordinance. **Valérie** said she will make copies for the next discussion.

**Valérie** said they should also wait for comments from Dennis LaBombard (Town Engineer). The Board agreed.

**Ron** said it should state somewhere in the workforce housing ordinance that minimum lot size needs to be 1 acre of dry land. The Board agreed to hold discussion and put this on another agenda.

**Richard moved to adjourn at 8:25 pm. Ron Seconded. Vote yes 4-0.**

**PLANNING BOARD MEETING**

**Minutes**

**July 15, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Valérie Maurer, Town Planner**

**Absent: Mike Papadimatos, Co-Chair, Kevin Gorgoglione, Selectmen's Representative, Dana MacAllister, Alternate, and Paul Anderson, Alternate.**

**7:00pm Meeting start**

**Minutes**

**Ron moved to approve the minutes of the July 1, 2010 Planning Board meeting. Richard Seconded. Voted yes 3-0.**

**Workshop: Proposed Amendments to Zoning and Regulations (Continued from July 1<sup>st</sup>, 2010)**

**Valérie** handed everyone a copy of parts of the Milford N.H. Sign Ordinance. The problem with our sign ordinance is that there is not enough square footage allowed for signs for buildings that have more than one business in them or multiple buildings on a same site (compared to the square footage allowed for a single business) and we no longer have temporary signs in the ordinances.

**Alan** said the Milford Sign Ordinance is a good guide as to how we would like ours to look like.

**Valérie** asked the Board if they would like her to go ahead and start working on amendments to the Brookline Sign Ordinance and a table or would you like more time to review the Milford Sign Ordinance for suggestions. **Alan** said Milford appears to have listed most sign types. We also call out trade and real estate signs and Milford doesn't. **Alan** said what about subdivision signs if they are damaged who is responsible for fixing them or removing them. **Valerie** said she thought that when the last lot is sold the subdivision sign comes down. **Richard** said the neighborhood seems to take care of some of the signs; the Bear Hill sign is in good shape. **Alan** said by subdivision signs he was talking about the sign with the map of the subdivision, the person selling lots and who is financing the project. He was not sure who should take care of the signs that announce a neighborhood if the neighborhood

itself doesn't. There is nothing in our ordinances. **Ron** said maybe the town should be authorized to take a sign down when the time comes if no one maintains it.

**Valérie** will email the link to the Milford Sign Ordinance to all members for them to review. Then, we can start updating Brookline's.

**Roads (continued from July 1, 2010)**

**Valérie** said she spoke with Dennis LaBombard (LaBombard Engineering) and he said that the Road Agent also agreed that 5 years to finish a road is a good time frame. She will update the Regulations and email them out to the Board for review. **Ron** asked if there could be wording about how this would be enforced. We will have to threaten with more than not issuing building permits.

**Valérie** would like to schedule the public hearing for the Subdivision and Non-residential Regulations updates on September 16, 2010. The Board agreed.

**Richard moved to adjourn at 8:05 pm. Ron Seconded. Vote yes 3-0.**

and Valérie Maurer, Town Planner**

**7:00pm Meeting starts**

**Minutes**

**Richard made a motion to approve the minutes of the July 15, 2010 Planning Board meeting as Modified. Ron seconded. Vote yes 3-0.**

**Mater Plan Update (Alan)**

**Alan** said the survey sub committee has put together question for the survey. The forum committee was going to hold the meeting at CSDA but he was told that RMMS maybe a better choice. The forum committee will discuss further on Tuesday 8/10/2010 there next meeting. The next steering committee meeting will be held on Tuesday August 17, 2010. There is no budget for food so they have asked the loins club about a spaghetti dinner and they were going to discuss with the fire department about doing a barbeque. The only problem with CSDA is that we have to be out of the building by 10:30 pm. The other challenge is that CSDA is also enforcing the nut free policy. **Ron** asked what time they wanted to start the forum meeting. Alan said at about 6 if they are going to serve a meal to about 6:30 and have the groups start working at about 6:45.

**Workshop: Final Review of Proposed Amendments to Zoning and Regulations**

**Alan** reviewed the changes discussed at previous meetings:

**SUBDIVISION REGULATIONS**

3.1.17, Procedure, Conditional approval – Add the following wording: “*Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat*” RSA 676:3,III

4.8.05, Roads – Add the following language: “*Except for roads designated as private roads, all roads shall be property deeded by the applicant to the Town of Brookline by a Warranty Deed.*”

Open Space Development – Section 4.12

4.12.02, replace the reference to section 3.1.25 by 3.1.32

4.12.03, add the following: “*The 50-foot perimeter setback, or a value as deemed necessary by the Planning Board, is a buffer between (...)*”

Appendix A, A.5 (g), Road Construction, Replace last sentence: (...). *There shall be a minimum of one (1) year and a maximum of five (5) years between placing the base pavement and the completion of the finish paving course. The top course shall not be applied until at least one calendar year has passed from the date of the completion of the base course.*

### **NON-RESIDENTIAL SITE PLAN REGULATIONS**

3.2.09, Procedure, Conditional approval - add the following wording: “*Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat*” RSA 676:3,III

**Ron moved to accept the final changes and schedule a public hearing on September 16<sup>th</sup>, 2010.  
Mike Seconded. Vote yes 4-0.**

#### **Case Review – Compliance hearing, Joe Raneri, Flea Market, 65 Route 13.**

Joe Raneri was not in attendance for this meeting. **Alan** said this can be rescheduled for the next meeting.

#### **2011-2016 Capital Improvement Plan (Paul)**

Paul was not in attendance for this meeting. Will be on the agenda for next meeting

**Richard moved to adjourn at 8:05 pm. Ron Seconded. Vote yes 3-0.**

PLANNING BOARD MEETING

Minutes

August 19, 2010

**Present:** Mike Papadimatos, Co-Chair, Voting  
Kevin Gorgoglione, Selectmen's Representative, Voting  
Ron Pelletier, Member, Voting  
Paul Anderson, Alternate, (Voting for Alan Rosenberg)  
Dana MacAllister, Alternate  
Valérie Maurer, Town Planner

**Absent:** Alan Rosenberg, Co-Chair, Richard Randlett, Member

**7:00pm Meeting start**

**Mike** asked Paul to vote for Alan Rosenberg. **Paul** Agreed.

Minutes

Not enough people to approve the minutes from the previous meeting. Hold for next meeting.

Road Bond, Construction Bond for Winterberry Road.

**Mike** said Dennis LaBombard (Town Engineer) has written a letter recommending that the Construction Bond for Winterberry Road be increased to \$32,800 from \$30,600. **Kevin made a motion to recommend to the Board of Selectmen that the Construction Road Bond for Winterberry Road be increased to \$32,800 from \$30,600 as recommended by Dennis LaBombard (Town Engineer). Ron Seconded. Vote yes 4-0.**

Compliance Hearing, Joe Raneri, Flea Market, 65 Route 13

**Ron** asked Joe how business was going. **Joe** said it was starting to pick up the last few Saturdays. He said it was tough because the vendors won't come if the people aren't there and the people won't come if the vendors aren't there. **Valérie** said this compliance hearing was for an update on the indoor flea market. **Joe** said he has hired a structural engineer and a life safety company to come up with a plan but has not yet pulled any building permits to start work. **Valérie** said there are no comments from the Police Department with traffic concerns. **Paul** asked if the building will be ready by the end of the year. **Joe** said he would like to have it open by the end of this year. No one in the area has an indoor flea market. The Board thanked Joe for coming in.

**2011-2016 Capital Improvement Plan (Paul)**

**Paul** said he has spoken to Tad Putney and Chris Adams. They have both agreed to be on the committee. **Valérie** said they will need to meet and select a chairman and a secretary. Then they can send out the letters. **Valérie** said she has the letters ready and just needs the meeting dates to include in those letters to inform the departments. **Paul** said he will need to get in touch with Alan for more information on possible members of the CIP. **Valérie** said this was a five person committee last year and seven members the years before. Last year there was someone from the school board and 2 residents at large. The meetings are public and an agenda needs to be posted.

**Work Force Housing**

The Board reviewed the plan for Workforce Housing in preparation for the next Planning Board meeting on 9/2/2010.

**Kevin moved to adjourn at 7:45 pm. Ron Seconded. Vote yes 4-0.**

**PLANNING BOARD MEETING**

**Minutes**

**September 2, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Mike Papadimatos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting, Ron left at 8:45  
Dana MacAllister, Alternate, Voting for Ron  
Valérie Maurer, Town Planner**

**Absent: Kevin Gorgoglione, Selectmen's Representative and Paul Anderson, Alternate.**

**7:00pm Meeting start**

**Minutes**

**Richard moved to approve the minutes of the August 5, 2010 Planning Board meeting as amended. Ron seconded. Vote yes 4-0.**

**Case 2010-2: J-41-1, J-41-3-Patenaude - 4-lot Subdivision**

In Attendance for this hearing Randy Haight (Meridian Land Services), Al Patenaude (Patenaude Construction) and Daryl Pelletier (Abutter at 2 Route 13, lot J-42).

**Ron** recused himself from this case. **Alan** asked Dana to vote for Ron. **Dana** agreed.

**Randy said** he added the two stump dumps and labeled the fire protection area as requested by Valérie. **Valérie** said the applicant is proposing a lot line revision between Lot J-41-1 and J-41-3 and the creation of 3 new lots from the existing lot J-41-1. The only issues are the street number is marked on the plan but needs to be confirmed by the Emergency Management Director. The current residents at 2 Laurelcrest Drive will have to change their mailing address to #6. The well head and a shed for abutting lot J-42 but are located on proposed lot J-41-14. **Valérie** said this was also mentioned in the report of the Emergency Management Director Wes Whittier. **Randy** said the well already exists and there is really nothing we can do about it. It would be up to the owner of J-42 to ask for an easement on to J-41-14 to access the well. This is an issue between both owners. **Valérie** said they will also need a driveway permit from the NHDOT for the proposed access to lot J-14-14 which will be off Route 13. There were

no comments from the Building Inspector, the Road Agent and the Conservation Commission has not seen the plan, they do not meet until 9/14/2010.

**Randy** said this was originally “Pierce Pond Estates” Subdivision a single family conventional subdivision with 11 lots. The zoning was commercial / Industrial and the zoning was changed and these lots became residential / Agricultural.

**Mike made a motion to accept plan # 2010-2: J-41-1, J -41-3. Richard seconded. Vote yes 4-0.**

**Daryl Pelletier** asked if they were able to put the driveway for lot J-41-14 into the setback. **Randy** said it is a building set back not a non disturbance buffer so they are able to put the driveway in. **Daryl** said there are also wetlands surrounding Lot J-42. **Randy** said the water runs from behind Lot J-42 toward Laurelcrest Drive and Route 13. **Valérie** asked if there will be a culvert installed under the driveway for lot J-41-14. **Randy** said yes. **Alan** asked Valérie if there were any conditions of approval. **Valérie** said the fees have been paid and the abutters notified. The Conservation Commission has not yet had a chance to review this plan. **Alan** said they are meeting on September 14<sup>th</sup>; we could have comments by September 16<sup>th</sup> Planning Board Meeting. The Board agreed. Due to the amount of wetlands the Board should wait for comments from the Conservation Commission. **Ron** said the Town Engineer may be able to attend on September 16<sup>th</sup> as well. **Valérie** said the Town Engineer did review this plan and he had no comments. **Mike moved to continue case number 2010-2: J-41-1, J-41-3-Patenaude-4 Lot Subdivision to the September 16<sup>th</sup> 2010 Planning Board meeting. Dana Seconded. Vote yes 4-0.**

**Case 2010-3: J-41, J-41-10, 11, 12-Patenaude- Workforce Housing Subdivision.**

In Attendance for this hearing Randy Haight (Meridian Land Services), Al Patenaude (Patenaude Construction) Roger Goscombe (Realtor for Patenaude Construction), Vivian Ciaramitaro (Abutter at 5 Averill Road), Jim Caulfield (Abutter at 5 Muscatanipus Road), and Clarence Farwell (Town resident).

**Randy** said they have 4 existing lots J-41, J-41-10, J-41-11, and J-41-12 which exists of 21.466 acres. We are proposing turning the 4 lots into 14 lots. This will consist of 7 market value homes and 7 Workforce Housing single family houses. This site has a nice plateau and is very dense with a young stock of trees. There are three common driveways that will access 4 homes off each; this is all the zoning will allow us. We will ask the Brookline Historical Society for name suggestions for those common Driveways at a later date. **Randy** said they have done all drainage calculations and Dennis LaBombard (Town Engineer, LaBombard Engineer, Inc.) has reviewed the plan. We have made all changes that he has requested. Also, Valérie had made a couple of suggestions that we have corrected as well. **Randy** said if there was a provision in the Zoning for 6 houses off a common driveway they would have done that. **Valérie** said the Fire Department and Emergency Management said they would like to see a road go through, connecting Baldwin Drive and Averill Road instead of the proposed 3 common driveways.

**Randy** said per the Zoning Ordinance we could not put the road through. That would make the cost of the subdivision prohibitive for workforce housing; there is a cost cap. **Valérie** said there is only 100ft between the common driveways end to end. She didn't think the purpose of the zoning was to have two parallel common driveways. **Randy** said there is 30 feet of space between those two common driveways. There is plenty of room for snow in the winter. Safety wise we could extend the common driveways at the end so people can plow right through and extend the easement. **Valérie** said the major concern is safety for emergency vehicles and for the residents. **Al** said when they first discussed workforced housing the Planning Board said the Zoning didn't allow for the plan we originally brought in. You asked for a plan that meets zoning and this plan does. **Valérie** said the plan can meet zoning and still have a safety concern. **Al** asked what is unsafe about this plan. **Valérie** said this could be confusing

for the emergency vehicles the possibility of going down the wrong driveway. **Al** said a town road will take away at least three lots from this subdivision. **Randy** said the issue is a town road will take up to much land and will drive up the cost. **Dana** asked if this could be a private way. **Randy** said that is not allowed. **Valérie** asked about snow storage on Baldwin Drive. Right now, the snow is stored at the proposed location of the 2 common driveways. **Al** said the snow will go where it goes now this is a town road. **Randy** said they will also be installing rain gardens on these lots for drainage. They are a foot deep and filled with bark mulch instead of soil so the water drains through. This area is all sand; you can't put water into it fast enough. The retention basin that has been there since the original subdivision has never had water in it. Rain gardens will take care of themselves. **Randy** said he thinks the application is complete and is ready for acceptance. **Alan** asked if they had everything to accept the plan. **Valérie** said that the fees have been paid and the abutters notified but we have no legal documents yet (proposed easements, deeds, covenants, etc...). **Al** said they have the easements' wording. **Alan** asked if they could submit the documents. **Al** said that he would email/fax the documents tomorrow to Valérie. **Valérie** also discussed the lot size and how they were calculated including the wetlands; in all regulations and ordinances, Brookline excludes wetlands from the calculations. **Randy** said it doesn't say "dry land only" in Workforce Housing. It calls it out in **Valérie** said whether is it for Housing for Elderly Persons, Open Space or conventional subdivisions, lots' requirement is based on dry land only.

**Valérie** read page 2 of 5 of the Staff report: "*– Zoning Ordinance Section 631, Conflict states: "If any provision of this Section is in conflict with the provisions of any other provisions of this ordinance, the more restrictive provision shall apply, except for any provision relating to reductions in standards for lot size, setbacks, or density, in which case the provisions of this Section shall apply." "Staff believes that "standards for lot size" do not imply "characteristics of land" which is defined by physical attributes such as terrain, soil type, slopes (Webster's Dictionary)."*

**Randy** said they are waiting on State approval for the subdivision. We only need 80 feet of frontage and at least an acre of land and we have that.

**Richard** asked if any of the driveways would be accessed off Averill Road. **Randy** said when the original subdivision was approved they had voluntarily put a non disturbance buffer to leave that slope as. Due to that non-disturbance buffer there can be no access from Averill Road for lots J-41-10 and J-41-22.

**Richard moved to accept plan number 2010-3: J-41, J-41-10, 11, 12-Patunaude – Workforce Housing Subdivision. Dana Seconded. Vote yes 4-0.**

**Alan** read a letter sent by an abutter:

*"Since we are unable to be present at the meeting for the mention case, here are our concerns and requests.*

- 1. We are concerned about the negative impact of cutting down the trees would have on the environment, water retention (going down Route 13 and adjacent properties) and the noise coming from Route 13.*
- 2. There does not seem to be any plan to replant any trees, like it happened to our property. Only one tree was replanted in our backyard and all crooked and damaged despite promises to get more trees in the surrounding area and between property lines. We request that there is written proposal on how they would replace/replant those trees.*
- 3. We are also concerned that the arrival of Workforce Housing will affect our property value.*
- 4. Impact of common driveways with the snow removal instead of having a street. We would favor having street/road instead of common driveways.*

*Best Regards,*

*Andre Basque and Maryse Laflamme*

*9 Baldwin Drive Brookline NH 03033"*

**Clarence Farwell** asked who was going to oversee the rules and regulations for workforce housing.

**Randy** said it will be a third party the Town would appoint but it is not spelled out in your zoning.

**Alan** read Zoning Ordinance Section 629:2 “Assurance of continued affordability, *Workforce ownership housing units must retain the development criteria and affordability standards herein for a minimum period of thirty (30) years with a renewable clause through a suitable deed restriction, easement and/or mortgage deed instrument deemed acceptable to the Brookline Planning Board and as monitored through reports provided to the Brookline Planning Board by the designated third-party agent prior to the time of unit sale or resale.*”

**Alan** said there should be language in the deeds an a third party will manage that. The Town is not responsible for monitoring and the Planning Board will be notified when lots change hands. **Clarence** asked if it was up to the developer to come up with the wording. **Alan** said yes. **Clarence** said he was just worried about the 30 to 50 years from now. **Randy** said that’s why it is recorded and there will be special wording to go with the sale of the property. It will be more than just wording on a deed.

**Vivian Ciaramitaro** asked if there has been a study done to ensure there will be no negative affect to the environment. **Randy** said they have added storm water management guidelines to the plan and the Town engineer has reviewed and commented and we have made the changes suggested by him. **Alan** said most of these trees will be taken out. **Al** said he will come up with a cutting plan for the Board to review. For the most part what we cut will be replaced with septic and wells. **Jim Caulfield** said Averill Road has a steep slope with trees are those trees going to stay? **Randy** said yes they will stay there was a non-disturbance buffer added when the first subdivision was approved. **Jim** said this area is all beach sand. **Ron** said there seems to be a discrepancy with how the ordinance is read as far as wetlands being included in the total lot amount. Should we go to Town Counsel? **Alan** said because there is an interpretation issue we should ask Town Counsel. **Jim** asked if there is a size limitation on Workforce Housing buildings. **Randy** said yes there is. The home can’t be any bigger than 1,500 square feet and no more than 2 bedrooms. **Vivian** asked what the basic cost would be and how it would affect the market value of homes in the surrounding area. **Alan** said the workforced housing is based on a percentage of the median gross income in a certain radius. **Randy** said that information is determined by the census. **Roger Goscombe** said the workforce housing home will be in the \$220,000 to \$230,000 range. **Randy** said it’s a moving target. **Vivian** said assuming that each family has 2 children how would that affect the school system. **Randy** said there is no way to determine the impact on the schools. These would be starter homes for young couples and no children. When they need more room they would move on to purchase a bigger home. **Alan** said he read an article on the “gray” of New Hampshire, because the younger generation cannot afford to purchase homes in New Hampshire, they move to other states and the average age of people in towns has been increasing. **Al** said New Hampshire is second to Florida as far as age. **Alan** said he thinks they should schedule a site walk. The Board agreed. **Valérie** said she will invite the Conservation Commission as well. The Board agreed to a site walk on September 13, 2010 at 7:00am. **Valérie** said this will be posted. **Alan** said for next meeting we will need Conservation Commission comments, wording for legal documents, and an answer from Attorney Drescher (Town Counsel) re: lot requirements. **Dana** asked if they can revisit the plan connecting the two roads. **Richard** said that he also would like to see the road going through and asked if they could come up with specs for a private road instead of a town road. It would take up less square footage. **Randy** said they could connect the two common driveways and put a gate with a Knox box in between.

**Randy** said he thinks the point of workforce housing is to do something different and that why he believes the lot sizes are ok.

**Dana moved to continue case number 2010-3: J-41, J-41-10, 11, 12-Patenaude-Workforce Housing Subdivision to the September 16<sup>th</sup> 2010 Planning Board meeting. Richard Seconded. Vote yes 4-0.**

**Richard moved to adjourn at 9:10 pm. Mike Seconded. Vote yes 4-0.**

**PLANNING BOARD MEETING**

**Minutes**

**September 16, 2010**

**Present:** Alan Rosenberg, Co-Chair, Voting  
Mike Papadimatos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Kevin Gorgoglione, Selectmen's Representative, Voting  
Dana MacAllister, Alternate, (Voting for Ron for case 2010-2:J-41-1,J-41-3)  
Valérie Maurer, Town Planner

**Absent:** Paul Anderson, Alternate.

**7:00pm Meeting started**

**Minutes**

**Ron moved to approve the minutes of the August 19, 2010 Planning Board meeting as written. Mike seconded. Voted yes 3-0.**

**Richard moved to approve the minutes of the September 02, 2010 Planning Board meeting as written. Mike seconded. Ron abstained for the first case hearing that night. Voted yes 4-0.**

**Log Cabin at Corner of Bond Street and Route 13**

**Valérie** said Dennis LeBaron would like to open 2 businesses at the Log cabin location. One will be an electronics service and repair business and one a retail sales of various homemade gifts and clothing business. This building has been used for retail for a long time so she recommended that Dennis be allowed to start and then come back to the Planning Board in 6 months for an update. **Valérie** said that she did not believe that a formal site plan review was necessary and her only request was that the street line be painted on the corner of Bond Street so the people traveling from route 13 onto Bond Street don't drive onto the parking lot in front of the building. **Dennis** said he has asked and that line was going to be painted within the next couple of days. **Valérie** said these was another person who has expressed interest in setting up a hot dog cart in that parking lot but said if this building is occupied he has permission from the owner of the restaurant at 99 Route 13 to use the parking lot while the restaurant is closed.

**Dennis** said the electronic business was established 4 years ago called LeBaron Brothers Audio, LLC. He is the owner and only employee. He would like to be open Wednesday to Saturday 10:00am to 8:00 pm. The second business would be a retail business called Grandmothers House, LLC. His wife would

like to sell various homemade gifts & clothing. This will also be open Wednesday to Saturday 10:00 am to 8:00 pm. On Mondays that are holidays they would like to be open. From 10:00 am to 5:00pm. **Alan** suggested that they change the hours to Sunday – Saturday 10:00am to 8:00pm. This way if they do want to open for more hours during the week they will not have to come back to the Planning Board. **Dennis** said the only change to the outside will be a sign and he will work with the Building Inspector. If there are any changes to the interior of the building he will work with the Building Inspector as well. **Kevin** asked if the Fire Department should inspect the building. **Scott Knowles** (Fire Department) said he hasn't been in awhile and would be happy to set up an inspection. Previous tenants have always kept a fire extinguisher in the log cabin.

**Mike made a motion to add this letter to the file allowing a new electronic business and a retail store at this located on lot #H-25 in the log cabin and schedule a 6 month follow up with the Planning Board. Richard Seconded. Vote yes 5-0.**

**Case 2010-2: J-41-1, J-41-3-Patenaude - 4-lot Subdivision**

In Attendance for this hearing Randy Haight (Meridian Land Services), Al Patenaude (Patenaude Construction, Daryl Pelletier (Abutter at 2 Route 13, lot J-42), and Dennis LaBombard (LaBombard Engineering, INC. / Town Engineer)

**Ron** recused himself from this case. **Alan** asked Dana to vote for Ron for this case. **Dana** agreed. **Randy** said this is a continuation of the September 2, 2010 meeting and they have changed the driveway access from Route 13 to Laurelcrest Drive on Lot J-41-14. **Valérie** said she attended the Conservation Commission meeting on September 14 and they were concerned with the proposed driveways on future lot J-41-1 and water runoff. **Randy** said there was mention of a culvert being placed under this proposed driveway at the last meeting. He will add a note to the plan. **Alan** opened the meeting to the public. **Daryl** said there is still a water issue behind lot J-42. If you look at the plan it doesn't show water but there is water in that area and he doesn't want it to run into his driveway. **Randy** said they will do what ever they need to do to reroute the water so it doesn't affect any driveways and make a note on the plan. **Wes** said his concern was the well for lot J-42 is on proposed lot J-41-14; there will need to be an easement so they can get to it. The shed for lot J-42 is on lot J-41-14 as well. **Ron** said that shed has been moved and is no longer on lot J-41-14. **Al** said he will discuss an easement with the owner of J-42 for the well. **Jerry** said the water behind lot J-42 runs for months. **Randy** said it is not a wetland; there are no wetland soils or species (vegetation). A culvert will take care of the water drainage. **Dennis** said the rain garden for lot J-41-13 in not shown on this plan. **Randy** said he will put an easement on the plan and add the rain garden. There are no water problems on these lots. **Valérie** said there will be grading on this plan. **Randy** said yes he will add that to the plan also. **Alan** said what ever happens across the street with the workforce housing subdivision, there will be rain gardens on this one and they will be recorded with the plan. **Jerry** asked who will enforce this if someone buys the lot and takes the rain garden out to plant grass. **Randy** said he can add a note to the plan and add an easement. There is no water problem here. There is a retention basin that never has water in it. **Alan Sheppard** asked what will be cut and forested on lot J-41-1 and J-41-13. **Al** said just enough to open for house, septic and well. We will not do clear cutting.

**Mike moved to approve case number 2010-2: J-41-1, J-41-3-Patenaude-4 Lot Subdivision with the following conditions:**

- 1. All fees associated with the case review shall be paid prior to issuance of a permit by the building Inspector.**

2. **The applicant shall submit 8 paper copies of the final plan and a permanent, reproducible Mylar.**
  3. **The proposed lot is subject to an impact fee per the Brookline Zoning Section 2100, in three separate amounts. The impact fees of \$222.14 (for ambulance facility), \$1304.24 (for Brookline School System), and \$1843.17 (for Hollis/ Brookline Coop Middle School) are payable to the Town of Brookline at the time of Certificate of Occupancy is issued for each new lot (3 total).**
  4. **Driveway easement to be reviewed by Town Council.**
  5. **Culvert, rain garden, easements notes added to the plan.**
- Richard Seconded. Vote yes 5-0.**

**Case 2010-3: J-41, J-41-10, 11, 12-Patenaude- Workforce Housing Subdivision.**

In Attendance for this hearing Randy Haight (Meridian Land Services), Al Patenaude (Patenaude Construction/Owner), Roger Goscombe (Realtor for Patenaude Construction), Scott Knowles (Brookline Fire Department), Wes Whittier (Brookline Ambulance/Emergency Management Director), Jerry Farwell (Road Agent), Dennis LaBombard (LaBombard Engineering, INC. / Town Engineer), André Basque (abutter 9 Baldwin Drive Lot #J-41-9), Allen Sheppard (abutter at 2 Laurelcrest Drive lot #J-41-2)

**Randy** said that a site walk was held on Monday September 13<sup>th</sup>. **Randy** said they have revised the common driveways; the three common driveways are now a through way. We will need to go to the Zoning Board for a variance because the current ordinance only allows 4 houses off a common driveway. **Alan** said road standards are in the regulations and is not an ordinance. The discussion last meeting was a through road would knock out to many lots. If this was an ordinance you would need a variance but when it is part of the regulations, the Planning Board can waive it. **Randy** said a private road isn't allowed there and there is no other option than to go to the ZBA. **Al** asked if they would like to see a private road built to town standards. **Alan** said he would like to turn this discussion over to the Fire Department, Emergency Management /Ambulance Director, Road Agent, and Town Engineer. **Wes** said he would like to see the road go through and have it become a Town Road. Private Roads and Common Driveways are not necessarily maintained adequately after a snow storm for access by emergency vehicles. If it is a through road there will be two points of access. If the road is blocked emergency crews could work from both ends to get through in case of another ice storm or a tornado. **Alan** said a big concern would be the maintenance if this is not a town road. **Scott** asked what the width of the road would be. **Randy** said it has to be 20 feet of plowed space. **Scott** said similar to what Wes said, the Fire Department finds it easier to have a through road. Maintenance would be a concern if it was a private road. **Jerry** asked Al if this will be paved. **Al** said yes, that was the goal. **Al** said that the bond and inspections for a road would raise the cost of this project. **André Basque** said he is not interested in helping people all winter when they are not maintaining the road. **Valérie** said at the moment there is no time limit for a developer to finish a road but this will be voted on later during this meeting when the Board held a public hearing for subdivision and non-residential site plan regulations. If amendments are voted on tonight, they would apply to any application submitted. This doesn't apply to common driveways. **Scotty** said who's to say someone builds in the middle and then the road doesn't go through. It is a gamble with this economy. **Jerry** suggested phasing this project and after 2 or 3 lots you would have to finish the road. **Al** said finishing the road is what cost the most. **Andre Basque** asked what the workforce housing buildings will look like. **Al** said they are 1,500 square foot small capes with garage about 600sf. Max. Value of the lots is set by the metropolitan Nashua area get by the Census. **Randy** asked the Planning Board if they would support the common driveway going through. If so we would apply for a variance with the Zoning Board asking for relief from section 1806. I would think the ZBA would like to hear from the Departments if they are all in support of this. **AL** asked if someone

from the Planning Board could attend the ZBA meeting. If any questions arise someone that has been involved with the process can answer there questions. **Valérie** said she would attend the ZBA meeting for the Planning Board. **Al** said they are trying to get support from all the department heads. **Randy** said there are legal documents being reviewed by Town Counsel that states who will maintain what on the through common driveway. The Planning Board, Fire Department, Emergency/ Ambulance Director, and Town Engineer all agreed that the through road is the best idea. The Road Agent said he would rather not add another road and cost the tax payers more money. **Valérie** said if this is common driveway there will need to be a granite post at the beginning of the driveway per the zoning ordinance. **Alan** said there will be street signs at both ends of the through common drive. Maybe you could add the granite post omission to the ZBA variance application. **Scott** said they can enforce the rules of a road but what happens if someone blocks the road. **Randy** said it will all be in the legal documentation that they are not allowed to.

**Mike moved to type up a letter of support to the Brookline Zoning Board of Adjustment in support of granting a waiver from section 1806 of the Brookline Zoning Ordinance to allow more than 4 homes having access from a common driveway and not require a granite market for this common driveway. Richard Seconded. Vote yes 5-0.**

**Alan** said they are still waiting for Town Counsel to rule on weather the wetlands can be included in the building lot. **Valérie** said she met with the Conservation Commission and their concerns were:

1. Wetlands not being excluded from lot calculations.
2. They would like to see some kind of a plan that would show the tree cutting plans.
3. They are concerned about to much tree cutting and erosion that may occur.

**Randy** said they will provide a plan that shows what will be cut and drainage. **Dennis** said he will need a plan of the through common driveway. **Alan** said they will also need the common driveway documents and easement wording before the next meeting. **Jerry** asked about utilities. **Al** said they will be underground. **Valérie** asked all departments supporting a common driveway connecting Baldwin Drive and Averill Road to write a letter of support to the Zoning Board for the October 13 meeting.

**Ron moved to continue case number 2010-3: J-41, J-41-10, 11, 12-Patenaude-Workforce Housing Subdivision to the October 21, 2010 Planning Board meeting. Kevin Seconded. Vote yes 5-0.**

### Public Hearing

#### Proposed Amendment to Subdivision and Non-Residential Site Plan Regulations

**Alan** said most of these corrections are housekeeping changes. **Alan** read the proposed changes:

### **Amendments to Subdivision and Non-Residential Site Plan Regulations**

#### SUBDIVISION REGULATIONS

3.1.17, Procedure, Conditional approval – Add the following wording: “*Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat*” RSA 676:3,III

4.8.05, Roads – Add the following language: “*Except for roads designated as private roads, all roads shall be property deeded by the applicant to the Town of Brookline by a Warranty Deed.*”

Open Space Development – Section 4.12

4.12.02, replace the reference to section 3.1.25 by 3.1.32

4.12.03, add the following: “The 50-foot perimeter setback, *or a value as deemed necessary by the Planning Board*, is a buffer between (...)”

Appendix A, A.5(g), Road Construction, Replace last sentence: (...). *There shall be a minimum of one (1) year and a maximum of five (5) years between placing the base pavement and the completion of the finish paving course. The top course shall not be applied until at least one calendar year has passed from the date of the completion of the base course.*

**Richard moved to approve the changes as noticed for the September 16, 2010 public hearing for the Subdivision Regulations. Ron Seconded. Vote yes 5-0.**

**Alan** read the proposed changes for the Non-Residential Site Plan regulations:

### **NON-RESIDENTIAL SITE PLAN REGULATIONS**

3.2.09, Procedure, Conditional approval - add the following wording: “*Whenever a plat is recorded to memorialize an approval issued by the Board, the final written decision, including all conditions of approval, shall be recorded with or on the plat*” RSA 676:3,III

**Richard moved to approve the amendments as published and noticed for the September 16, 2010 public hearing for the Non-Residential Site Plan Regulations. Kevin Seconded. Vote yes 5-0.**

### **Road**

**Alan** said there is a mechanism in place that could allow for a private road.

**Alan** read Subdivision Regulations Section:

**Section 4.8 Roads** - Any subdivision which requires road system layout and construction shall have such improvements installed in accordance with the following:

**Section 4.8.4** - Upon satisfactory completion of the road system as judged by the Road Inspector, Road Agent, and Planning Board, said road system will be presented by the Board of Selectmen, for acceptance by the Town, in the approved manner. (8/21/97)

**Alan** said what if they put in a road on the Workforce Housing plan where the three common driveways are going to go through and that road is never turned over to be accepted by the Town. Then it will be a private road.

**Alan** said because this is a regulation it can be waived by the Planning Board.

**Alan** said we would need to come up with wording for a private road. Different specifications. **Valérie** said it is in the Zoning Ordinance that there needs to be a \$1,000 driveway bond.

### **Master Plan Update - Survey Committee**

**Valérie** said she email everyone a copy of the survey for comments. The Board made a few suggestions.

**Richard** said it took him about 12 minutes to take this survey. **Alan** said it took him about 10 so about 10-12 minutes to complete a survey isn't bad. **Valérie** said the Master Plan Steering Committee meets

again on the 9/21/2010 at the Brookline Event Center. The Committee is waiting for the Planning Board blessing on the contents of the survey.

**Richard moved, with the thanks of the Planning Board, to allow this survey created by the master plan survey committee to be made available to the public. Ron Seconded. Vote yes 5-0.**

**Master Plan Update – Forum Committee**

**Alan** said the Forum Committee has set a date for the public Forum. October 22, 2010 about 6:00 - 6:30 pm at RMMS. We have permission from the school. The custodians will be there to help set up and pick up. The Woman’s Club has volunteered to help provide soup, sandwiches, and desserts. RMMS does not have a peanut policy.

**Capital Improvements Committee Update**

**Alan** said Paul is not in attendance tonight so he will give the Board an update as best as he can. He has volunteered to help with the CIP this year. They will need to schedule a meeting pretty soon. Paul has found 5 people for the committee. **Alan** thought it would be a lot easier this year if they could keep everything electronic because there is too much paper and it is easier. They should also get there responses back faster.

**Richard moved to adjourn at 9:40 pm. Kevin Seconded. Vote yes 5-0.**

**Alan Rosenberg, Co-Chair** \_\_\_\_\_

**Mike Papadimatos, Co-Chair,** \_\_\_\_\_

**Kevin Gorgoglione, Selectmen’s Representative,** \_\_\_\_\_

**PLANNING BOARD MEETING  
Minutes  
October 7, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Mike Papadimitos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate  
Paul Anderson, Alternate  
Valérie Maurer, Town Planner**

**Absent: Kevin Gorgoglione, Selectmen’s Representative, Member.**

**7:00pm Meeting start**

**Minutes**

**Richard moved to approve the minutes of the September 16, 2010 Planning Board meeting as amended. Alan seconded. Vote yes 4-0.**

**Case Review NRSP # 2010-D: D-18-15, Darcey Klein, Office Trailer for Dog Breeding Home Business**

In attendance for this hearing Darcey & Michael Klein (applicants), Mark Gath & Lynn Giblin (abutters, 17 Mountain Road), Melissa Vela (abutter, 15 Mountain Road), and Paul Moverman (abutter, 16 Mountain Road).

**Valérie** said Darcey Klein has submitted an application to move a 10x48 ft office trailer into her yard to breed dogs, specifically Chihuahuas. Currently there is a trailer at this location and no building permit was pulled. This is also an office trailer. The Board will need to discuss:

1. If the proposed home business will “preserve the character of the residential neighborhood and provide residents freedom from nuisance and potential negative impacts resulting from commercial activity in the residential area”.
2. The Board needs to discuss if the “The home business must be secondary to the use of the property as a residence”.

There were no comments from the Health Officer. He was unavailable for comments but he performs yearly inspections of all facilities in town as requested by the State.

**Valérie** said Section 1702.02 of the Brookline Zoning Ordinance states “The home business can occupy up to 25% of the combined gross floor area of the existing home and/or any accessory structures, or 1,500 sf.” The gross floor area of the existing home is 2,546 sq/ft (assessing property card). The applicant calculated that the proposed area to be used the home business is 704 sq/ft (224 sq/ft, part of the house and 480 sq/ft proposed 10x48 trailer)

The Building Inspector pointed out Section 701 of the Brookline Zoning Ordinance that states “No trailer or manufactured house shall be occupied or maintained as a living unit except in an approved Manufacturing Housing District.

The Building Inspector went out to inspect this property and there is currently a trailer on the property there. There are no permits on file for this trailer. **Darcey** said she didn’t realize they had needed approval. The Building Inspector sent a letter to the owner.

**Valérie** said all fees have been paid and abutters notified. The application for a home business is all set.

**Mike** asked what size the trailer is that is located on the property now. **Darcey** said its 8x16 and can be moved with a truck. **Paul** asked if the trailer that is there can be used as part of the 25% calculation for the home business. **Valérie** said because the trailer is there illegally that can not be included in the 25% for the home business per Section 1702.02. If the proposed trailer was in place that could be used to calculation the home business sf.

**Valérie** said Darcey would like to breed Chihuahuas and they will not be going outside. **Darcey** said the ticks around this area carry deadly diseases and she will not allow them out. **Alan** asked if the plan is to move out the small illegal trailer and replace with the larger 10x48 trailer. **Darcey** said yes.

**Alan moved to accept application NRSP #2010-D:D-18-15, Darcey Klein, office trailer for Dog Breeding Home Business. Ron Seconded. Vote yes 4-0.**

**Richard** pointed out Section 1705.04.” Home businesses shall not involve the on-site use or storage of heavy equipment such as back-hoes, graders, dump trucks, tractor trailers, semi-trucks and other large vehicles or stationary equipment of an industrial nature. When a controversy arises as to whether a certain piece of equipment or vehicle falls into the class of prohibited heavy equipment, the Planning Board shall make a finding as to whether or not such equipment or vehicle is prohibited as part of the home business operation prior to taking final action on the application.”

**Richard** said he would say it is a building of industrial nature and we should state that on record. **Dana** looked at the picture of the office trailer and said he though it was borderline. **Darcey** said this area will be landscaped and our house is set back from the road so you won’t be able to see it from the road. She would like it to blend in with the property not stick out.

**Lynn Giblin** asked if this property is sold will this home business go with the property if it is sold. **Valérie** said this will go with the homeowner. It will be recorded that way. **Lynn** said they can see the smaller trailer that is there now and is worried the new larger trailer will be very visible. Especially in the Fall/Winter when all the leave are gone. **Melissa Vela** said she is across the street and can see the trailer that is there now. **Michael Klein** said they have done some landscaping and dug out the side of the hill to fit the trailer in and would be willing to do more to satisfy the abutters. **Alan** asked if the dogs are an issue right now. **Lynn** said they could hear them barking but that is it. **Alan** asked if there is a lot of traffic to the home. **Darcey** said they only have one car at a time come in and it is not very often. She likes to meet them so she can see where the dogs are going. **Melissa** asked if this is a good area to breed these dogs if you can’t allow them to go outside. **Darcey** said they are lap dogs they are indoor pets. **Darcey** said she has called the state about licensing and they have continuously told her that she is all set until she has more than 40 dogs or 10 litters in a year. The area where the dogs stay is cleaned multiple times a day. The

abutters reviewed a site plan and photos of the trailer. **Melissa** asked if this will be attached to the house. **Darcey** said yes with a mud room that faces the road. The trailer is lower than the house. **Paul Moverman** asked what the trailer was used for previously. **Darcey** said it was an office trailer her girlfriend owns. She used to run a payroll business out of that trailer. **Lynn** said she would feel better if there was a note on the card that the next owner wouldn't be able run a dog breeding business that could be expanded. **Valérie** said there would also be a compliance hearing in a year for the home business and if there are any issues you can come back in to discuss them. **Alan** said before then if you have any issues you can let us know. **Mike** said the Board should make a finding on Section 1705.04. **Melissa** asked if there will be a lot of people going to the house. **Darcey** said no. **Richard** asked if they have checked their deed for any covenant restrictions because that area has a lot of covenant restrictions. **Darcey** said they haven't checked yet. **Richard** said he does not like the idea of a commercial building in a residential neighborhood. **Alan** asked abutters how the existing trailer is working out. **Lynn** said she noticed it but it is also half the size of the proposed trailer. **Melissa** said that she is trying to sell her property across the street and can see the existing trailer from her living room. **Mark** said just as long as it's not a deterrent to selling the property. **Alan** asked if they were to build a 10x48 foot shed to raise the dogs in what would be the difference. **Ron** said that the difference is that it would not be a commercial building. **Alan** read through Section 1702.02 of the Zoning Ordinance again. **Valérie** said it states "and/or" but you can only calculate what percentage can be used for the home business by what is on the property right now. **Richard** said combined means home and trailer. The trailer currently on the property is not legal and should not count toward the calculation of the square footage allowed for the home business. **Alan** read section 1705.04 again and said he thinks that refers to heavy equipment for example rock pulverizing equipment. **Mike** said they should make a finding on whether or not the trailer is considered commercial equipment.

**Alan made a motion that the Planning Board makes a finding that the 10x48 foot office trailer would not fall into the class of heavy equipment as stated in Section 1705.04 of the Brookline Zoning Ordinance.**

No one seconded the motion. The motion dies.

**Alan made a motion that the Planning Board makes a finding that the 10x48 foot office trailer does fall into the class of heavy equipment as stated in Section 1705.04 of the Brookline Zoning Ordinance. Richard Seconded. Vote yes 4-0.**

**Mike** said with that finding the 10x48 trailer can not be used for this home business.

**Darcey** said they can use the trailer that is there already.

**Alan** said the proposed hours are 9-5 and that complies with the ordinance. The neighbors don't seem to have a problem with parking. Right now there doesn't seem to be a nuisance issue. It comes down to gross floor area. **Mike** asked if they use the trailer that is already there would they need to fill out a new application. **Paul** asked if this application can be modified in the middle of the hearing. **Valérie** said the Board could continue the hearing to a certain date because the type of activity for the home business does not change but she recommended sending another letter to all abutters to inform them of the modification in the application (proposed use of the existing trailer). **Alan** said the applicants will have to go to the Building Inspector and make sure the smaller trailer is there legally, get all the necessary permits. **Valérie** asked if they could provide pictures of the smaller trailer prior to the next meeting.

**Alan** moved to continue application **NRSP # 2010-D: D-18-15 to the regularly scheduled Planning Board meeting on November 4, 2010. Ron Seconded. Vote yes 4-0.**

### **2011 Proposed Budget**

**Valérie** said she already has submitted a proposed budget to the Board of Selectmen; submission was due October 4th. She also provided a draft warrant article in order to finalize the Master Plan update. The

Planning Board is scheduled to meet with the Board of Selectmen and Finance Committee on October 25, 2010 to discuss.

**Master Plan Update**

**Valérie** said the survey is completed and will be on the website Friday. This will take about 10 to 12 minutes to complete and there will be hard copies available to fill out also.

**Alan** said the Forum Committee has scheduled October 22, 2010 to hold the public forum at RMMS on Milford Street from about 6:00pm. The Women’s Club will provide soup and sandwiches. We also have people soliciting the local businesses for donations. **Alan** said he has asked Ron Pelletier to post a notice on the Brookline Media Center (Brookline Auction Gallery) sign and he will email Kevin Gorgoglione to see if Absolute Mechanical can post something on their sign also.

**Capital Improvement Plan**

**Paul** said they have had the first CIP meeting a couple of weeks ago. **Valérie** has sent out notices to all the Departments. They will meet with the departments at the fire station on October 26, 2010 and November 9, 2010 at 7:00pm with the Department heads. **Paul** also said Linda Saari will be representing the Selectmen.

**Richard moved to adjourn at 9:15 pm. Alan Seconded. Vote yes 4-0.**

PLANNING BOARD MEETING  
Minutes  
October 21, 2010

**Present:** Alan Rosenberg, Co-Chair, Voting  
Mike Papadimitos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate  
Valérie Maurer, Town Planner

**Absent:** Kevin Gorgoglione, Selectmen's Representative and Paul Anderson, Alternate.

7:00pm Meeting start

Minutes

Mike moved to approve the minutes of the October 7, 2010 Planning Board meeting as written. Ron seconded. Vote yes 4-0.

2010-3: J-41, J-41-10,11,12 – Patenaude – Workforce Housing Subdivision - Continued

Valérie said Randy Haight (Meridian Land Services) will not be here tonight to present this case. We also didn't receive the new plans until about 2:15pm today. Alan asked if any of the legal documents the Planning Board had requested had been dropped off. Valérie said not yet. Valérie said she did not know if Al Patenaude was going to be here to present the plan. Dennis LaBombard (LaBombard Engineering, Town Engineer) was in attendance Alan asked if he had any comments. Dennis said he had just received the plans the night before at 5:00pm by email. He had made a few comments and some things have been changed on this plan. Dennis said some requests that he made have not been changed, for example, the rain garden on Laurelcrest Drive that is still missing details. Dennis said he will need to review the newest plan and will forward any comments to the Board and to Randy Haight. Alan said they do not have the legal documents and Dennis still has to review this plan and drainage calculations we should continue the case to a certain date. Mike moved to continue case 2010-3: J-41, J-41-10, 11, 12 – Patenaude – Workforce Housing Subdivision until the November 18, 2010 Planning Board Meeting. Ron Seconded. Vote yes 4-0.

**Richard** asked Valérie if she knew how much land you would need for a septic, leach field, well radius, and a house. **Valérie** said she would ask the Building Inspector if there is an amount they can go by. **Dana** said you could have a very small house and septic. It depends on soil and size of home. **Valérie** said she will ask and email the answer to everyone.

### Master Plan Update

#### **Survey Committee**

**Valérie** said the survey is on the Brookline website and ask the public to please take a few minutes and fill that out. There are hard copies of the survey and drop off boxes located at the library, the Town Hall, and the Post Office. **Richard** asked how many have come back filled out. **Valérie** said there are about 40 filled out on the website.

#### **Forum Committee**

**Alan** said the Master Plan meeting will be held this Friday, October, 22 2010 at RMMS at 6:00pm. Food and child care will be provided. All Brookline Residents are welcome to attend.

### Capital Improvement Plan

**Alan** said the first public meeting for the CIP will be held at the Fire Station on Tuesday, October 26, 2010 at 7:00pm. This is a public meeting.

### Upcoming Events

**Valérie** said on November 18, 2010 she has scheduled the Planning Boards first workshop. She will compile a list of possible changes/amendments to the Zoning Ordinance for the Board to review. She has also created a list of definitions, combining all definitions from the Brookline Zoning Ordinance, Subdivision Regulations, and the Non-residential Subdivision Regulations. If all the definitions are located in one place it may make it easier to have one list for all three documents. **Alan** said they will just have to figure out where this list will reside. If you put it with the Brookline Zoning Ordinance and you want to make changes, corrections, or additions, they have to be approved at Town Meeting and if you make it a separate document it can be changed at a public hearing. **Valérie** said the definitions don't change that often and would rather they be attached to the Zoning Ordinance. **Alan** said something for everyone to think about for the workshop.

### 2010-3: J-41, J-41-10,11,12 – Patenaude – Workforce Housing Subdivision - Continued

Al Patenaude arrived at 7:30 pm, during the previous discussion.

**Alan** explained they had made a motion to continue the case to a November 18, 2010. They had just received the plans after 2:00pm this afternoon and Dennis will still need to review them. **Al** asked if there was anything that should be modified so they can have the correct information prior to the next meeting. **Alan** asked if they had any legal documents to submit. **Al** handed the Declaration of Workforce Housing Restrictions for Pierce Ponds Estates II. He said his printer wasn't working and couldn't print out the easements but will email them to Valérie. **Alan** asked if he had picked a management company yet. **Al** said he is looking into MCO Housing Services. **Alan** asked if they could have a detailed plan that shows where the septic, house, slope, and where the drainage will be. **Valérie** said just so the Board will have a better idea of what it all looks like on the same plan instead of flipping pages. **Alan** said if they could get an 11x17 sheet with a lot on each sheet with all the details for them to review. This would only be needed for lot J-41-16, J-41-17, and J-41-18. **Al** said he can't add in the house box until the Board decides what the house design will be for each lot. **Alan** said they could skip the house box but because this is the first Workforce Housing plan they would like as much information as they can get. **Alan** said this could just be

a draft copy and doesn't have to be part of the plan. **Valérie** said she still has a question as to where the snow will go. **Al** showed on the plan the two areas that the snow will be pushed. **Valérie** said lot J-41-15 has access off Laurelcrest and off of the Common Driveway. Which one will it take access from. **Al** said per the Town fire regulations because the lot abuts both the road and the common driveway he needed to show access from both, but the driveway will be off the common driveway, not from Laurelcrest Drive. **Richard** asked what lots will be market and what lots will be WFH. **Al** said they haven't figured that out yet he would like to try to keep the current neighbors happy and put market houses around them. **Alan** said the designation between workforce housing and market has to be made before approval. **Al** said it doesn't state that in the regulations. The Board agreed that what will be recorded will have to be what will be built, lots showing market value houses will have a market value building, same for workforce housing. **Al** also brought in an example of the post that will number (using reflective numbers) all the driveways if the post office decides they will not drive down the road.

**Richard moved to adjourn at 8:50 pm. Mike Seconded. Vote yes 4-0.**

PLANNING BOARD MEETING  
Minutes  
November 4, 2010

**Present:** Mike Papadimatos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Jack Flanagan, Selectmen's Representative Alternate, Voting  
Dana MacAllister, Alternate (voting for Alan Rosenberg)  
Valérie Maurer, Town Planner

**Absent:** Alan Rosenberg, Co-Chair, Kevin Gorgoglione, Selectmen's Representative and Paul Anderson, Alternate.

**7:00pm Meeting start**

**Mike** asked Dana to vote for Alan tonight. **Dana** agreed.

Minutes

**Richard** moved to approve the minutes of the October 21, 2010 Planning Board meeting as corrected. **Ron** seconded. Vote yes 3-0.

NRSP #2010-DD-18-15, Darcey Klein, Office Trailer for Dog Breeding Home Business, Case Continued from October, 7, 2010

In attendance for this hearing Darcey & Michael Klein (applicants), Lynn Giblin (abutter, 17 Mountain Road).

**Mike** asked everyone if they have seen the photos of the current trailer that Darcey had emailed to the Board. The Board said yes. **Valérie** said the square foot calculation for the home business is no longer an issue, the hours of operation are not a problem, and no one has complained about the trailer that has been on the property for almost one year. This application was accepted at the last hearing. **Valérie** said she has nothing to add just some conditions of approval. **Mike** asked if the health officer will visit the property every year. **Valérie** said she think he will. **Dana** asked if the building permit had been issued for the trailer that is currently on the property. **Valérie** said the Building Inspector will not issue one until the Planning Board approves the home business. **Lynn** said the only thing that concerns her is the possibility of this property being sold and the new owner being able to use that trailer as added square footage to make the home business bigger. **Valérie** said that won't happen because the home business goes with the

person not the property and she has made this a condition of approval. The trailer would need to be removed as well.

**Richard moved to approve NRSP #2010-DD-18-15, Darcey Klein, Office Trailer for Dog Breeding Home Business with the following conditions:**

- The applicant shall fill out all necessary permits with the Building Inspector and pay all fees (which might include late fees)
- Satisfactory inspection report from the Building Inspector shall be provided to the Planning Board before the applicant starts operating the Home Business.
- A compliance hearing will be held a year after day of approval
- All fees for case review, meeting time and inspections shall be paid before the applicant starts operating the Home Business.
- The 10 x 20 trailer shall not, at any time, be used as a living unit.
- The home business special permit shall become void if the property is sold.
- Any modification and/or change to the home business as approved at the (date) Planning Board meeting shall be submitted to the Board for review.

**Ron Seconded. Vote yes 5-0.**

**Workshop – Zoning**

The Board discussed proposed amendments to the Zoning Ordinance for this upcoming Town Meeting. They made a few corrections to the wording on the worksheet Valérie provided. The amendments suggested tonight and agreed upon by the Board will be made and discussed further at the next scheduled workshop on November 18, 2010. (See attached proposed amendments with tonight’s corrections)

**Jack moved to adjourn at 9:00 pm. Richard Seconded. Vote yes 5-0.**

**PLANNING BOARD MEETING**

**Minutes**

**November 18, 2010**

**Present:** Alan Rosenberg, Co-Chair, Voting  
Mike Papadimatos, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate  
Paul Anderson, Alternate  
Valérie Maurer, Town Planner

**Absent:** Kevin Gorgoglione, Selectmen's Representative.

**7:00pm Meeting started**

**Minutes**

**Richard moved to approve the minutes of the November 4, 2010 Planning Board meeting as written. Ron seconded. Vote yes 4-0.**

**Road Bond - Glendale Homes - Ames Road**

In attendance: Dennis LaBombard, LaBombard Engineering (Town Engineer) and Jerry Farwell, Brookline Road Agent.

**Dennis** said this road is been done in two phases. Phase 1- The developer would like it to be accepted by the town so it can be maintained by the Town this winter. Phase 2 needs a bond amount. **Dennis** said there are a few things missing from phase 1: granite bounds, a stop sign, rip rap in some places, outlet structure 4, and leaching basins 2 through 6 with their associated grading and infiltration trenches. Some of these items may be dismissed at the Board's discretion. **Jerry** said the stop sign is in place. **Dennis** said there are 3 missing bounds around Withee Drive. One may be an iron pin but should be granite bound unless there is a boulder under it. **Alan** said the Board tries to be very conscientious about having the bounds in place. **Randy** said three bounds are for Withee Road and that hasn't been built yet so they don't have to be put in place. He is not sure about the pin but will find out if there is a boulder under it. Withee Road will have a separate bond so the rest of the bounds will be placed when it is built. **Dennis** said he recommends waiving the rip rap. **Jerry** said they had 16 inches of rain in March and there wasn't any erosion.

**Alan** said that the outlet structure 4 wasn't installed. **Dennis** said it may have been part of the alteration of terrain permit issued by the State. Unless paperwork is provided stating that it is not needed it should be built before the road is put in. **Alan** asked what would happen if the structure isn't installed. **Dennis** said it will allow the water to go faster and installing the structure would slow down the run off. **Jerry** said it has been 3 years and there has been no erosion. The Board agreed it should be installed following what is printed on the approved plan. **Jerry** asked **Dennis** if the leaching basins are based on the road or the houses. **Dennis** said a little of both.

**Alan** said there are several leaching basins that have not been installed. **Valérie** said that the Building Inspector will have to keep track of that and make sure it gets done before issuing a Certificate of occupancy. **Alan** asked if installation of the leaching basins will be triggered when the building permit is pulled. **Dennis** said the Certificate of Occupancy would more likely to be the trigger to make sure it has been done. You could not release the final bond until they are all installed per plan. **Alan** asked if they can be installed now before the building permits are pulled. **Jerry** said what if the lots are never built on. **Jerry** suggested the Board go out to see what they look like when they are installed. **Valérie** said that Board could hold a small bond amount. **Dennis** said the bond will not be released until all the work is done. **Ron**: if he doesn't own two of those lots can we tie up the developer for something he doesn't own? **Richard** said if they are on the plan they should be done. **Valérie** agreed they should stick to the plan. **Alan** said they are sticking to outlet structure 4. To avoid confusion years down the road the leaching basins should be done as well. **Dennis** said he could reduce the bond for phase 1.

**Richard moved to recommend to the Selectmen that the Construction bond for Ames Road phase 1 be reduced from \$72,000 to \$46,480. Mike Seconded. Vote yes 4-0.**

**Dennis** said the erosion control blankets on both phases have not been installed but with the growth of vegetation it is no longer needed. We ask that it be waived.

## Phase 2

**Dennis** said the cistern is in place. Most bounds are set. There is a temporary turnaround for now. There are 9 lots on this phase. When the road is complete it will swing around and meet Hutchinson Hill Road. **Dennis** said he asked Scott Knowles (Fire Department) and he had no comments about the cistern. **Valérie** said she would like a list of the building lots to go to the Building Inspector. **Dennis** said the lots are D-1-14, D-1-15, D-1-16, D-1-17, D-1-13, D-1-12, D-1-11, D-1-10, and D-1-9. **Valérie** said she will email the Building Inspector the list of lots. **Dennis** said there are two head walls that are rubble instead of precast headwalls. **Valérie** said until the temporary turnaround is recorded building permits cannot be issued. **Ron moved to agreed to a 2<sup>nd</sup> phase road bond in the amount of \$44,000. Building Permits for lot D-1-14, D-1-15, D-1-16, D-1-17, D-1-13, D-1-12, D-1-11, D-1-10, and D-1-9 not be issued until temporary turnaround around is recorded. Richard Seconded. Vote yes 4-0.**

## Driveway Bond – Adamyk Homes – Rumore Way

**Dennis** said the granite marker was broken on delivery. They have tried to fix the marker, put two metal brackets on each side. It looks sturdy but it's for the Board to decide if it should be replaced. **Jerry** asked what the specifications are for the granite markers. **Valérie** said granite markers for common driveways should be 5 foot from finished grade, 7 inches in depth, 2 feet wide, and the engraving has to be 30 feet from the finished grade. **Dennis** said it wouldn't be a problem to go out and measure to make sure that granite marker is the correct measurements. **Valérie** said it is fixed but wondered how long will it last. **Alan** said he thinks the granite marker should be replaced. **Richard** said if they leave it the way it is in five years if it does break whose responsibility is it to have that replaced.

**Valérie** said that would be up to the homeowners on that common driveway to replace it. **Ron** said he agreed with Alan it should be replaced; the homeowners should get a good product to start off with. The Board agreed the broken Granite marker should be replaced.

**Dennis** said there is one granite bound on the north side of route 13 that he hasn't found yet. Have been looking for a few years and don't know if it was just buried or not installed. **Randy** said they will figure that out.

**Dennis** said there are also two headwalls that are rubble instead of precast concrete walls. One culvert pipe is crushed at the end and will need to be fixed. Some silt fencing that needs to be removed. There is a puddle at the intersection of Route 13 that will need to be graded.

**Alan** said the granite post should be replaced and the intersection of Route 13 will need to be graded.

**Alan** said if the rubble is working we will not require precast concrete headwalls.

**Richard made a motion to recommend to the Selectmen that they establish a driveway bond for Rumore Way in the amount of \$3,500. Ron seconded. Vote yes 4-0.**

**Case 2010-3: J-41, J-41-10, 11, 12-Patenaude- Workforce Housing Subdivision, Continued**

In Attendance for this hearing: Randy Haight (Meridian Land Services), Al Patenaude (Patenaude Construction) Roger Goscombe (Realtor for Patenaude Construction)

**Randy** said the plan in front of them has all the information that was requested at the last meeting. The house is shown as 38x28, the garage is shown as 24x24, septic, well, and drainage. This is just a footprint so you can see how this will all fit on a lot. **Al** said they just picked a typical size house. **Randy** said the Zoning Board has granted a variance for the extended common driveway. It has been thirty days and it has not been challenged. **Alan** said the well, septic, and house could still be moved a bit on this plan. **Randy** said that is correct this is just to show the Board that this can all fit on these lots with room to move. **Alan** thanked Randy and Al for the detailed plans it is a big help to see all the information on one page. **Dennis** said everything he has asked in the last letter has been done. **Randy** said he also added the rain garden across the street that was missing from this plan. The first driveway will be named if it comes off Laurelcrest Drive. 911 didn't want us to make it zero Laurelcrest and we didn't want to have to renumber the entire street. **Dennis** said he has no issues with this plan. The driveway will have to be built before any building permits can be issued per regulations for common driveways. **Valérie** said she doesn't have anything to add tonight except that Town Counsel still has the documents and has not responded back to the Planning Board. **Randy** said the third party designated is MCO who will provide land management Al's attorney Ray Lyons was going to email Valerie this information. **Valérie** said she hadn't received anything yet. **Al** said he will make sure he emails it to her tonight. **Richard** said they had discussed marking the plan before it is recorded with the lots labeled market rate or workforce housing. **Al** said that labeling the lots upfront restricts what I can do with them. It doesn't state in the bylaws that the lots should be labeled. **Randy** said he made a note on the plan that states 7 will be market rate homes and 7 will be workforce housing. **Paul** asked if there is a certain amount of workforce housing to market value homes required. **Randy** said 50% the Planning Board can designate 10% either way. **Al** said he will split the road into 2 phases. **Dennis** said if you split into phases you will need to put a temporary turnaround on the plan. **Valérie** said they will need a new plan with the turn around and a temporary easement will need to be reviewed by Town Counsel and recorded. **Alan** asked when the building permit is pulled, will it depict whether the house will be a market rate or workforce? **Roger** said in most towns that will be included on the certificate of occupancy (CO). **Randy** said he can add a note to the plan that states this will need to be labeled on the CO. The bank will probably insist that it is added to the CO before closing. **Al** said if they label the building permit he is stuck as to what it can be

sold as. **Valérie** said someone will need to track it. **Randy** said the third party company MCO will send reports when a workforce housing unit is sold. **Valérie** said they will need a new plan with the temporary turn around and Dennis will need to review the new drainage calculations. We are also waiting on Attorney Drescher review of the “declaration of workforce housing restrictions”. **Alan** said for the next meeting the Planning Board will need temporary turn around on plan with notes, phasing wording, and a note stating phase 1 and rain garden will be built.

**Richard moved to continue case number 2010-3: J-41, J-41-10, 11, 12-Patenaude-Workforce Housing Subdivision to Thursday, December 2<sup>nd</sup> 2010 Planning Board meeting. Mike Seconded. Vote yes 4-0.**

**Proposed Amendments to Zoning Ordinance, final workshop**

The Board reviewed the amendments to the Zoning Ordinance and agreed upon the attached. The Public Hearing is scheduled for December 16, 2010.

**Richard moved to adjourn at 10:15 pm. Mike Seconded. Vote yes 4-0.**

**PLANNING BOARD MEETING**

**Minutes**

**December 2, 2010**

**Present: Alan Rosenberg, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Dana MacAllister, Alternate, Voting for Mike  
Valérie Maurer, Town Planner**

**Absent: Mike Papadimitos, Co-Chair, Paul Anderson, Alternate, and Kevin Gorgoglione,  
Selectmen's Representative.**

**7:00pm Meeting start**

**Minutes**

**Ron moved to approve the minutes of the November 18, 2010 Planning Board meeting as amended. Richard seconded. Vote yes 3-0.**

**Case 2010-3: J-41, J-41-10, 11, 12-Patenaude- Workforce Housing Subdivision, Continued**

In Attendance for this hearing Randy Haight (Meridian Land Services), Al Patenaude (Patenaude Construction) and Roger Goscombe (Realtor for Patenaude Construction)

**Randy** said he changed the plan cover sheet as requested by Valérie and added the proposed conditions of approval. All engineering requests have been met and Town Engineer has no issues.

**Valérie** said she requested and has received a signed contract between the third party financial company MCO Housing Services and Al Patenaude. **Randy** said he is waiting for name approval from Wes Whittier (Emergency Management Director) for the common driveways. **Valérie** said she thought Wes said that he was ok with Laurence Way for the single common driveway on the 4-lot conventional subdivision off Laurelcrest Drive and Riley Drive for the Workforce Housing development. **Randy** said he will check with Wes in the morning to make sure and label the plans before they are recorded.

**Valérie** said that she is recommending that MCO sends statements every six months.

**Alan** said at the last meeting they talked about phases but the temporary turn around isn't on this plan.

**Randy** said we did discuss it but it will be market driven; if we finish the common driveway right away then we will not need phases. If Al Patenaude only builds half the road, we will add the temporary turn around. There is a condition of approval note on the cover sheet. **Valérie** said the Board could discuss

this at the compliance hearing in a year or could schedule it 6 months after the first house is build. **Valérie** said she would like the building facade or style samples for the file. **Al** said they submitted sample plans during the conceptual discussion. He will resend plans for the house style to Valérie. **Alan** reviewed the letter from Town Counsel regarding the Declaration of Workforce Housing Restrictions. He said there was nothing in the documents that refers to enforcement for workforce housing units. **Al** said that will be the task of MCO Housing Services and it will be stated in the deeds. **Alan** said they would like that reference in the financial documents. **Dana** said years from now how would people looking to purchase this home know if it is a workforce housing unit. **Randy** said these documents will be recorded and deeds will refer to the restrictions. Realtors and financial institutions will be aware of this.

**Alan** asked what would happen if the town made changes to the workforce housing ordinance. **Valérie** said it would be grandfathered by what is in the ordinance at the time of approval.

**Valérie** said she hasn't received input from the Road Agent yet for offsite improvements. Randy could add a note and change or remove pending the Road Agent's recommendations.

**Randy** said that he added a Note #17 referencing to the Variance that was granted by the Zoning Board, allowing for a through common driveway serving 11 lots.

**Alan** read the conditions of approval from the plan cover sheet:

1. The applicant shall submit eight (8) hard copies of the final plan(s) and a permanent, reproducible Mylar(s).
2. No building permits shall be issued until the temporary turnaround and associated deed are reviewed, approved and recorded. Only needed if Riley Drive is built in segments and isn't completed.
3. A compliance hearing will be held if a temporary turnaround is built on Riley Drive, prior to its construction.
4. Off-Site Improvement agreement shall be recorded and the "per lot" amount shall be paid prior to the issuance of any building permit.
5. All invoices sent to the applicant by the Town for Town Counsel, Town Planner and Town Engineer reviews and meetings attendance shall be paid prior to the issuance of any building permit.
6. All legal documents (i.e. deeds, restrictive covenants) shall be recorded and copy provided to the Planning Department prior to the issuance of any building permit.
7. A letter from a Land Surveyor shall be provided to the Building Inspector and the Planning Board stating that all bounds have been set prior to the issuance of any Certificate of Occupancy.
8. The proposed lots are subject to an impact fee per the Brookline Zoning Section 2100, in three separate amounts. The impact fees of \$222.14 (for ambulance facility), \$1,304.24 (for Brookline school system) and \$1,843.17 (for Hollis/Brookline Coop Middle School) are payable to the Town of Brookline at the time the Certificate of Occupancy is issued for each lot.
9. No building permits shall be issued until the Notice of Intent (NOI) and Stormwater Pollution Prevention Plan (SWPPP) have been filed and a copy submitted to the Town (site will disturb more than one acre).
10. NH DES subdivision approval number shall be added to the final plans
11. Original professional stamps and signatures shall be on the final set of approved plans.
12. Income verification and ongoing affordability compliance reports shall be provided to the Town of Brookline with copy to the Building Inspector by April 1<sup>st</sup> and October 1<sup>st</sup> of each year.

13. A letter from a professional engineer to the town stating that the “rain garden” had been built in compliance with the detail on sheet D-1 will be required before a certificate of occupancy is issued for each of lots J-41-15 through J-41-20.

Suggestion was made to change the numbering of the conditions of approval to C-1, C-2, etc. in order to differentiate them from the regular notes on the plan cover sheet.

**Ron moved to approve application number 2010-3: J-41, J-41-10, 11, 12-Patenaude-Workforce Housing Subdivision with the conditions of approval read previously and noted on the plan. Richard Seconded. Vote yes 4-0.**

**Planning Board Business Meeting**

**Valérie** said there is a public hearing for the Zoning Ordinance amendments on December 16, 2010.

There will be a Master Plan Steering Committee meeting on Tuesday 12/14/2010 at 7:00 pm in the Workroom at the Town Hall. This will start the work on updating the first chapters. Upcoming meeting will be held on Thursday, some of them will be shared with the Planning Board.

**CIP**

**Alan** said they should have a CIP draft for the next planning Board meeting on December 16, 2010 for the Planning Board to review and adoption by the Planning Board should be on the first meeting in January.

**Richard moved to adjourn at 8:10 pm. Dana Seconded. Vote yes 4-0.**

**December 16, 2010**

**Present: Mike Papadimatos, Co-Chair, Voting  
Alan Rosenberg, Co-Chair, Voting  
Richard Randlett, Member, Voting  
Ron Pelletier, Member, Voting  
Paul Anderson, Alternate  
Valérie Maurer, Town Planner**

**Absent: Kevin Gorgoglione, Selectmen's Representative and Dana MacAllister, Alternate.**

**7:00pm Meeting start**

**Minutes**

**Alan moved to approve the minutes of the December 2, 2010 Planning Board meeting as amended.  
Ron seconded. Vote yes 3-0.**

**Road Bond - Glendale Homes – Hutchinson Hill Road**

**Dennis LaBombard** (LaBombard Engineering – Town Engineer) said there are two sections of road. First Section - Gerry Tanguay (Glendale Homes) would like the town to accept phase one which is the first half of the road. Phase one will need a maintenance bond in the amount of \$45,900. Phase two will need a construction bond in the amount of \$31,000. **Valérie** asked if there is a turn around for phase two. **Dennis** said yes there is a temp turn around that will in the future be a driveway and you should have received paperwork for the temporary turnaround from Meridian Land Services. **Valérie** said she hasn't received any paperwork for the temporary turnaround. **Dennis** said for phase two you may want to add a condition that the town will need the paperwork for the temporary turn.

**Dennis** said phase one is ready to be accepted at Town Meeting and then will be deeded to the town.

**Alan moved to recommend to the Board of Selectmen that a maintenance bond in the amount of \$45,900 be put in place for phase one of Hutchinson Hill Road until the summer for 2012 and then to be brought to Town Meeting for acceptance. Also a construction bond in the amount of \$31,000 should be put in place for phase two of Hutchinson Hill Road with a condition that the Town receives paperwork for the temporary turn around. Richard Seconded. Vote yes 4-0.**

**Public Hearing-Amendments to the Zoning and Land Use Ordinance**

**Mike** read the public hearing opening statement at 7:30pm.

**Valérie** said the Board discussed and agreed on these corrections/amendments at the last meeting; tonight is the public hearing and will need a motion to send to Town Meeting for a vote. **Mike** read through the all the amended sections. (See attached)

**Alan made a motion to submit the proposed amendments to the Zoning Ordinance to be voted on by ballot at Town Meeting in 2011 also forward a copy to the Town Clerk and Selectmen's secretary to be printed in the 2010 Town report. Ron Seconded. Vote yes 4-0.**

**CIP**

**Paul** handed out copies of the CIP booklet for the board to review. **Richard** said that in the Ambulance section the service date and replacement date columns are a little confusing. **Paul** said he will work on that. **Alan** said the Planning Board would usually take this home to review and then at the next meeting could adopt it.

**Opening Statement**

**Alan** suggested the phrase "Please attempt to limit your comments" be removed from the Planning Board opening statement. The Board agreed.

**Richard moved to adjourn at 8:05 pm. Dana Seconded. Vote yes 4-0.**

## Proposed Amendments to Zoning Ordinance

To be put on the March 2011 Ballot and  
Printed in the 2010 Town Report

*Addition / new text*  
~~Elimination~~

### Preamble – Section 100.00

~~In pursuance of authority conferred by Chapter 31, Sections 60-89, NH Revised Statutes Annotated, 1955, and for the purpose of promoting the health, safety, morals, property, convenience of general welfare, as well as efficiency and economy in the process of development, of the inhabitants of the incorporated Town of Brookline, New Hampshire, by securing safety from fire, panic, and other dangers, providing adequate area between buildings and various rights of way, by preserving the rural charm now attached to our town, the promotion of good civic design and arrangement, wise and efficient expenditure of public funds, and the adequate provision of public utilities and other public requirements, and by other means, now therefore the following Ordinance is hereby enacted by the voters of the Town of Brookline, New Hampshire in official annual meeting convened.~~

*In pursuance of authority conferred by New Hampshire Revised Statutes Annotated Chapter 674:16 through Chapter 674:34 inclusive as amended and for the purpose of promoting the health, safety, morals, and general welfare of the inhabitants of the incorporated Town of Brookline, New Hampshire, by securing safety from fire, panic, and other dangers, providing adequate areas between buildings and various rights-of-way, by preserving the rural charm of the town, preventing the overcrowding of land, avoiding undue concentration of population, facilitating the adequate provisions for transportation, water, sewage, schools, parks, and other public requirements, and by other means in accordance with a comprehensive plan, the following ordinance is hereby adopted by the voters of the Town of Brookline, New Hampshire, in official Town meeting convened.*

Note: RSA's 31:60-89, Zoning Regulations, were repealed in 1983 and replaced by Chapter 674, Local Land use Planning and Regulations Powers.

### General Provisions – Section 300.00

Add a new section to read as follow:

#### *307.00 – Building Permits*

*The State of New Hampshire Building Code pursuant to RSA 155-A including adopted Appendix Chapters and amendments, shall govern and regulate the construction, alteration, movement, enlargement, replacement, repair, equipment, location, removal and demolition of all dwelling units and all commercial and industrial buildings in the Town of Brookline, said Codes also provides for the issuance of permits and collection of fees.*

***Accessory Buildings of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements.***

Note: The requirement for a building permit was in the building code that was repealed at the March 2010 town meeting. See letter from Building Inspector, dated June 2, 2010.

### **Industrial-Commercial District – Section 500.00**

**503.03, Land Area:** Each building lot shall be at least one (1) acre *excluding wetlands*.

**503.05, Building Height** - Rename section as “***Building Requirements***” keeping current wording and adding the following:

1. Height: Except for structures not intended for human occupation (such as chimney, water towers, and church spires), maximum building height is 35 feet, ***calculated from the average finished ground level adjoining the building at all exterior walls.***
2. Accessory Buildings: ***Accessory Buildings of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements and Section 300.00, General Provisions.***

Notes: There is no requirement for minimum square footage in the State Code.

The requirement for a building permit was in the building code that was repealed at the March 2010 town meeting.

### **Residential-Agricultural District – Section 600.00**

**603.05, Building Height** - Rename section as “***Building Requirements***” keeping current wording and adding the following:

1. Height: Except for structures not intended for human occupation (such as chimney, water towers, and church spires), maximum building height is 35 feet, calculated from the average finished ground level adjoining the building at all exterior walls.
2. Square Footage: ***Any new dwelling unit shall contain at least 576 square feet of first floor living area and manufactured housing to have 320 square feet.***
3. Accessory Buildings: ***Accessory Buildings of 100 square feet or less shall not require a building permit but shall be required to meet all setback requirements and Section 300.00, General Provisions.***

Note: These requirements were in the building code that was repealed at the March 2010 town meeting.

### **Workforce Housing, section 620.00**

**626.00, General Requirements** – Change the following sections to read:

2. The minimum parcel size for a workforce housing development shall be at least ten (10) ***contiguous*** acres ***excluding wetlands***.
3. The minimum lot size for a single family market value ***and a single workforce housing unit*** shall be one (1) acre ***excluding wetlands***. The minimum lot size for a duplex shall be one and one half (1.5)

acres *excluding wetlands*. The minimum lot size for a five unit multi-family building shall be three (3) acres *excluding wetlands*.

5. The development shall have a vegetated buffer of fifty (50) feet or a value as deemed necessary by the Planning Board on all boundaries of the original parcel except for access to connecting roads.

10. (...) for compliance with Section **629.00** (instead of 628.00) of this ordinance.

### **628.00 – Roads, Ways, Access to Development**

*Add a new sub-section 628.00, 3.*

*Unless deemed unnecessary by the Planning Board, access to a development shall be via a through roadway connecting existing roads and neighborhoods in order to provide a safe and rapid access to the development / dwelling units for all emergency vehicles.*

Note: New sub-section addressing the need of connecting such development to existing roads, minimizing common driveways for safety purposes (plowing, access and turnaround for emergency vehicles, etc)

### **Manufactured Housing – Section 700.00**

#### **701.01, Requirements**

a. Each proposed manufactured Housing District must be a minimum of twenty (20) contiguous acres in size *excluding wetlands*.

b. Each proposed Manufactured Housing District must contain a vegetated buffer of *fifty (50)* feet wide, *or a value as deemed necessary by the Planning Board, on all boundaries of the original parcel except for access to connecting roads* ~~to provide a visual barrier between the manufactured Housing District and all other adjacent properties.~~

*Add sub-section d.:*

*d. Any dwelling unit shall contain at least 320 square feet.*

### **Growth Management Ordinance – Section 1400.00**

Section 1400.00, Growth management / Residential Phasing Ordinance

*Deleted (March 2011)*

Reference: HB 1260 and NHRSA 674:22 and 23 – Effective July 8, 2008.

(603) 673-8855

TOWN OF  
BROOKLINE, NEW HAMPSHIRE

P.O. Box 360  
Brookline, NH 03033

PLANNING BOARD MEETING

January 4, 1994

PRESENT: Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate  
Brian Kirschner, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

- 7:30 PM Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the December 21, 1993 meeting were reviewed. Peter made a motion seconded by Rich to approve the minutes as written. Affirmative vote of 5-0 was taken to approve the minutes.
- 7:35 PM Public hearing, Adoption of Chapter IX, Recent Growth Trends to the 1990 Master Plan. Peter turned the meeting over to Jeremy who explained to those present that this chapter was being added to the 1990 edition of the Master Plan. Peter opened the meeting to discussion of the chapter. Resident Phil Chandler questioned the source of projected school enrollment figures. He said he felt this report does not support the action being taken in proposing a growth ordinance which limits the number of building permits. Jeremy said he used figures given to him by the SAU office. Tom Moran said the number of lots left in Birch Hill I should be 40 (Page 11). He questioned the building permit (Page 23) and fiscal impact (Page 24) data used. He asked what has happened to the tax rate with the new growth, and what is the projected rise in the tax rate? Tom advocated the PB look for ways to broaden the tax base by providing more commercial/industrial sites; and focusing on rising school costs (student to teacher ratio). PB members voted to amend the following: Page 11- Birch Hill, I, 40 remaining lots-Total remaining lots-159. Page 27-Recommendations, 1, Change to read:"Actions need to be taken in order to accommodate the growth while minimizing the impact on tax rate. One of these actions should include an updated CIP which programs the costs of capital projects as evenly as possible" 1501

Recommendations, 2, 2nd sentence, Change to Read: ".....the Planning Board can help moderate the growth in school enrollments."

8:05 PM  
MOTION

Rich made a motion to adopt Chapter IX, Recent Growth Trends as amended. Chris seconded the motion. Planning Board voted 5-0 yes to adopt Chapter IX, Recent Growth Trends, as an addition to the 1990 Brookline Master Plan.

8:10 PM

**Public Hearing-Proposed Changes to Brookline Zoning and Land Use Ordinance.** Mike Lynch of the Brookline Finance Committee was present with some handout information sheets. He explained that he was looking at trends in the Town budget, tax rates, number of building permits, and guessing at anticipated revenue. He had talked to the other 2 members of the finance committee, and they all felt that the Town has been helped by the additional revenue from new homes. They feel that a reduction in the number of new homes in the short term will adversely impact the tax rate. He said the Town currently has 3 bond articles-Town Hall/Library renovation, Co/Op High School renovation, and the Brookline Elementary School addition. There is a proposal for a new addition to the elementary school this year, and the possibility of a bond for the Co/Op School District. Phil Chandler spoke to the doubling of the cost per student figure at the elementary school in the last 7 or 8 years. The ratio of students per teacher is down from 18 to 13. Ben Chandler said the cost to educate our students is not in line with rising costs in other areas.

*\* Amended 1/18/94  
Add: "However, he supported the P.Bd's growth ordinance and felt it would be beneficial to the Town in the long run."*

8:30 PM

PB members reviewed Jeremy's January 4, 1994 memo on the status of the proposed zoning changes (see attached).

MOTION

1.) **Floodplain Ordinance**-Peter made a motion to revise the wording as per the 1/4/94 memo. Rich seconded the motion. Vote 5-0 yes to approve the change.

MOTION

2.) **Back Lots**- Peter made a motion to approve Jeremy's 1/4/94 revision for clarification of meaning. Chris seconded the motion. Yes vote 5-0 to approve revision.

MOTION

4.) **Definition of Forestry**-Peter made a motion to accept the proposed definition as written in the 12/17/93 draft. Rich seconded the motion. Vote was 5-0 yes.

MOTION

5.) **Definition of Home Business**- Peter made a motion to accept the proposed definition as written in the 12/17/93 draft. Joe seconded the motion. Yes vote 5-0 cast.

MOTION

6.) **Adoption of revised BOCA and CABO Building Codes**-Peter made a motion to accept Item #6 to streamline the procedure by which the Town adopts the updates of the BOCA and CABO building codes after public hearing. Rich seconded the motion. Vote cast 4-Yes, 1-No (Rich).

8:40 PM

3.) **Growth Management Ordinance**-Jeremy explained the changes from the last meeting on Pages 2 and 4.

8:45 PM

Rich made a motion to have the PB accept a proposed change to the Growth Management Ordinance to modify the number of lots developed per year to a 20% growth rate for all subdivisions approved prior to 1/1/94.

**Discussion of Rich's Proposal**- Peter Bennett said that while he supported the growth control ordinance, he felt there was a significant issue in the 4-year exemption statute (RSA 674:39) which should be considered.

Brookline School Board member Marcia Farwell stated that the cost of education, using the State's figures, show that the elementary school is 20% lower than the State average; while the junior and senior high schools are 26% and 19% higher respectively. She believes Brookline is being asked to build a new senior high building because of a crowding problem in Hollis Elementary. She urged those present tonight to attend all school budget and school district meetings and make their views known.

Betty Hall asked for figures supporting the fact that additional houses would reduce the tax rate rather than raise it.

Peter Webb said the ordinance as drafted favors the existing lots while being very limiting to new subdivisions. By restricting some percentage of the existing lots from obtaining building permits, as Rich is proposing, it would seem fairer to both existing and future subdivisions.

Margaret said she favored Rich's proposal. She felt it was fairer to both new and existing subdivisions.

Bob Bramley expressed his opinion that the growth ordinance as now proposed is fair to existing developers as well as future developers because they will know the rules coming into the subdivision process.

Peter Bennett felt the proposed growth ordinance as drafted protects both approved as well as new subdivisions. If it is too limiting, it has a provision which provides for an annual review by the Planning Board to allow an adjustment of the number of building permits to be issued yearly. The PB has the right to modify or do away with the ordinance if figures do not support the need to have it.

Michael Lynch expressed his opinion that local developers have the town's interest in mind as well as making their living from the development and sale of lots.

Marcia asked if the elementary school adds a 6 room addition for 150 more students, does this mean this ordinance will not have a valid basis for continuation?

Betty said it was her belief that people will vote for growth control independent of the tax rate. She felt this was established with the first Master Plan. People in the community are interested in more than pocket book issues.

Sid Hall asked that voters be given a chance to vote on a strong ordinance rather than a watered down one.

Phil Chandler asked that financial data not be used to scare people into a growth control ordinance. The wish to limit Brookline's growth is a separate issue. He does not support the PBd's contention that the growth has as yet impacted the schools to the degree that this ordinance is necessary.

Tom Moran said the figures on Page 9 and Page 25 of the new Master Plan chapter show that the years with a high number of building permits for new homes show a reduction in the tax rate.

9:40 PM Peter polled the PB members to see if they supported Rich's proposal (see attached) to change the application section of the growth management ordinance as currently drafted. Margaret-in favor; Judy-opposed; Brian- in favor, but adjust Rich's percentage number; Joe-in favor, but with a higher % than 20. He also stated he does not believe the approved subdivisions are exempted from a having a limit on the number of building permits issued to them under RSA 674:39; Chris-opposed. Out of the six subdivisions having more than 4 lots, there is a total of 90 lots which would be affected. Using the percentage figure of 50 which can be built on the first year, you're talking about regulating the remaining 45 lots. He feels the PB can adjust the number of building permits in their annual review to better control growth. Tom Moran mentioned that under this proposal, he would be allowed to obtain 37 building permits in Mountain Road and Birch Hill Estates, II in the first year. Peter called for a vote on Rich's concept. Vote taken, 5-Yes (Peter, Rich, Brian, Joe, and Margaret). 2-No (Judy and Chris). Tom Moran said he had told the PB they will build this project out over the next 3 years. Jeremy said two months ago the PB was working with the developers on a phasing plan to give the PB estimate figures of what they reasonably expected to build over the next few years. Rich said the PB needed concrete proposals from the developers, and there was no time now to develop this. Judy said she felt the PB needed to give developers a large percentage for the first year (50% on a declining balance) because they had already entered into contracts with banks and road contractors. Brian said a clause to limit a "run-away" situation is needed. He feels if the percentage number is high enough, it will not overly restrict the developers, but yet give some control. He favors 50% of the total number each year. Members discussed how to implement Rich's proposal into the draft. Page 3-Requirements, #4 to read:"The number of building permits to be issued annually on lots approved after 11/24/93 shall be computed as follows (use existing wording in 12/17/93 draft). Add a #5 to read:" The number of building permits to be issued annually on existing lots prior to 11/24/93 shall be computed as follows: Lots shall be limited to a maximum number of building permits determined by multiplying the number of remaining in their respective subdivisions by .50. and rounding up. Existing subdivisions with 4 or less lots left are exempt from this requirement." Add to the "Sunset Clause" the wording:" The remaining number of lots shall be determined as of January 1 of said year by the Planning Board."

Jeremy gave his opinion that this proposal would create an incentive to draw building permits, and as a result, more permits would be drawn for 1994 than the 3 developers would have drawn under their plans for the next 3 years; or the 35 building permits the PB had determined would represent a 3% growth rate for the Town.

Bob Bourassa said he was willing to phase his development over the next 3 years by building 1/3 of his remaining lots in Talbot-Taylor Estates each year. Tom said he personally would be willing to commit to a 3-year phased building plan. Alan Lorden was not present tonight, but had submitted a 3 year growth plan to the PB at the first public hearing.

**11:00 PM** Rich said he was willing to withdraw his amendment to the growth management ordinance if the PB could get commitments in writing from Millrock Realty (Tom Moran and Bob Bramley), Talbot-Taylor Estates Partnership (Bob Bourassa); and Alan Lorden (Lorden Realty, Inc.) on a phased plan of building. Joe said for the minutes of the meeting, it is understood that Millrock Realty will have a phasing plan tentatively building on 22, 22, and 23 lots over the next 3 years. Tom said he would have to discuss these numbers with Eric Rodgers and Bob Bramley; and some minor adjustments to these numbers may be made. Lorden Realty will develop 4, 6, and 6 lots as Alan Lorden had agreed to. Talbot-Taylor Estates Partnership is willing to develop 1/3 of the remaining lots each year over the next 3 years. Written agreements to the Planning Board will follow.

**11:10 PM** Joe made a motion to adjourn the meeting. Rich seconded the **MOTION** adjournment motion. Affirmative 5-0 vote was cast.

Next Planning Board meeting will be held on Tuesday, January 18, 1994.

Next public hearing on proposed zoning changes will be held on Tuesday, January 25, 1994.

Submitted by: Sandra L. Fessenden

Brookline Planning Board

Made Part of the Tax. #, 1994 P. Bd. meeting  
SJC

PB Members,

This is the proposed modification to the Growth Ordinance that gently limits that rate of development of existing projects.

"All subdivisions approved prior to Jan 1, 1994 will be limited to a maximum number of building permits determined by multiplying the number of remaining lots by .20 and rounding up. Existing subdivisions with 4 or less lots left are exempt from this requirement."

This proposal will guarantee developers a fixed number of lots per year and will allow the town to have some idea of how many houses will be built.

The basic point here is that we MUST impact the existing subdivisions, if we hope to have any affect on the growth rate in the town in the next 5-7 years. Also, a limit of 20% per year is a very high percentage and is NOT a hardship on developers at ALL.

Developers WILL oppose this limit, but in the end if we stick to our positions I think they will see the wisdom in the limit and they will cooperate in the end.

Thanks,  
Richard Napolitano

(603) 673-8855

**PLANNING BOARD MEETING**

January 18, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate  
Dennis LaBombard, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the January 4, 1994 meeting were reviewed. It was decided to amend Page 2, (8:10 PM Public Hearing), Lines #10 and 11, to read: "impact the tax rate. However, he supported the Planning Board's growth ordinance and felt it would be beneficial to the Town in the long run." Peter made a motion seconded by Rich to approve the minutes as amended. Affirmative vote of 5-0 was taken.

**MOTION**

**7:35 PM** P. & C. Realty, Inc., Subdivision Case #1993-5:F-60.  
(Peter Webb excused himself from consideration of this case because of a conflict of interest. Rich chaired the meeting for this case hearing). Frank Gavin and Randy Haight of Meridian Land Services were present to discuss the Rocky Pond Road subdivision of lot F-60 into 5 lots. Randy said he had reviewed the Rocky Pond Road traffic study prepared by the Nashua Regional Planning Commission. He said there is a potential for 200 new houses on Rocky Pond Road, and the cost of upgrading the road is estimated to be \$165,000. This averages out to \$829.00 per lot for road improvements. He said P & C is willing to contribute, as their share for this 5 lot subdivision, \$1,000.00 per lot to the Town of Brookline- \$850.00 to be designated for road improvements and \$150.00 per lot to be designated for fire safety. Judy asked Fire Chief Ray Kegy if there was any suitable place on Rocky Pond Road for a fire pond. Ray answered no, and said the fire engineers had visited the site and found that there is no source of water at that end of the road. Ray said he felt the cost of a cistern as an alternative measure was unreasonably high. He also said he didn't know what the maintenance cost and upkeep of a cistern might be. He said tanker relays now service this area with mutual aid provided by Brookline and Hollis.

Judy inquired if there was any possibility of locating a fire pond on P & C's Lot F-18 on the other side of Rocky Pond Road. Mr. Gavin answered there was an area which might be suitable, but he does not have access across Perkins Road (a private road) back onto Rocky Pond Road.

Rich asked about the safe sight distance for the driveway of lot F-60. Randy said he would measure it to make sure it met the regulation of 200 feet. Rich said the discussion of actual road improvements should be with the selectmen and road agent. He reiterated the PBd.'s concerns remained the same as they were at the last hearing. The road surface of Rocky Pond Road is poor. There is no fire protection for homes in this location. The PB would need a plan sanctioned by the selectmen, road agent, and fire engineers before further considering this subdivision plan.

Judy said the PB is looking long term; and even though this is only a 5 lot subdivision, the potential across the road is for a 200 lot subdivision. She said she can't separate the two issues. She pointed out that Old Milford Road will again be impacted by more traffic if Rocky Pond Road is not improved.

Chris said there are really only two issues- fire safety and Rocky Pond Road's unsafe road conditions. If the developer can find a resolution to these issues, the PB can review this case with this in mind.

Case continued till February 15, 1994.

8:07 PM

**Holly Hills Construction, Subdivision Case #1993-7:J-37, J-38, J-39, J-60, & J-33-34-Conceptual consultation.**

Randy Haight of Meridian Land Services represented the applicant. (Being a direct abutter, Joe Kagenski abstained from consideration on this case hearing due to conflict of interest; and Dennis voted in his place). Randy showed the changes made to the conceptual plan, noting he had moved some of the lot lines back from the pond's wetland area. He pointed out the area on the plan where some excavating of gravel would take place to make level the lots and the road. Rich noted that the purpose of this subdivision should not be to excavate gravel. He asked if a corridor could be left between lots 39-36 and 39-37 for wildlife to access Fresh Pond. Randy said it might be possible, but the road would still have to be crossed to get to Fresh Pond from the land in the Townsend State Forest.

Conservation Co-chairman Libby Wehrle-Anderson said that she knew of a wild-life biologist at UNH who might be able to give some guidance in this matter. PB members suggested she send a copy of this plan to him for his input.

Judy said she would like to see the open space area of Fresh Pond deeded to the Town and under the control of the Conservation Commission. PB members then discussed the possibility of having an area set aside for recreation.

Peter asked how many supported more than a passive open space; and how many homes in the area would benefit from

having an active recreational area (such as a ballfield or playground) in this part of town?

**Margaret** said she was for a recreation area but was opposed to changing the natural contours of the land in order to make a flat area for a recreational use.

**Jeremy** had spoken with Jim Edwards today. Jim wanted the PB's opinion on the number of lots fronting on Averill Road. He has designed the plan with lots 39-43 and 39-44 accessing Averill Road. PB members agreed they would prefer having these two lots as shown rather than any more. The remainder of new lots will access onto the new subdivision road, which links Wallace Brook Road with Route 13. It was agreed to notify the Townsend State Forest of this subdivision plan.

9:00 PM

**Planning Board General Business**

- 1) **Road Bond-Thomas Enright, Wallace Brook, II-** PB members discussed the letter of credit coming due February 8, 1994, and the still outstanding items on this subdivision plan. It was decided to recommend to the selectmen that the bond be called to complete the road construction of Hillside Drive Extension.
- 2) **Jeremy** said the final draft of the proposed zoning changes has been made. Any changes made at the January 25th public hearing can only be minor clarification ones. He has inserted Chapter IX, Recent Growth Trends, into copies of the 1990 Master Plan. PB members then certified this chapter for inclusion in the Brookline Master Plan.
- 3) **Judy** brought to the attention of the PB a problem with the sign ordinance as it pertains to business at the Barnside building. The selectmen had sent Cathy Whitcomb a letter regarding her temporary sign for "Cathy's Country Gifts". Cathy met with the selectmen, and pointed out that the existing sign for the building does not serve the businesses located there because there is no way to get from 1 level to the other from the interior of the building; and the parking lots do not enjoin. Judy read the minutes of the January 10, 1994 Selectmen's meeting (see attached) and said the selectmen had reached a decision because there was no recourse in the sign ordinance for such issues. While PB members noted that the applicant might have been required to go to the ZBA for relief from the ordinance; they, upon a motion by Rich, voted that the PB should in 1994 address this issue and write into the sign ordinance a special exception mechanism to require the applicant be sent to the Planning Board for a decision in such cases.
- 4) **Resident Dan McNally** was present at this meeting and inquired some information about the proposed zoning changes and how it would affect the small landowner's ability to obtain building permits with a 2 or 3 lot subdivision. PB members explained the proposed building permit limitation which would apply to all new subdivisions.

9:14 PM  
MOTION

PLANNING BOARD MEETING  
January 18, 1994 Page 4

9:25 PM Peter made a motion to adjourn the meeting. Joe seconded  
MOTION the motion. Meeting was adjourned by a 5-0 affirmative  
vote.

Next Planning Board meeting will be a public hearing on  
proposed zoning changes. It will be held on Tuesday,  
January 25, 1994.

Brookline, NH 03033

(603) 673-8855

MINUTES  
BOARD OF SELECTMEN  
JANUARY 10, 1994

Selectmen Russ Heinselman, Judy Cook and Ben Chandler were present.

NHMA

Jon Steiner of the New Hampshire Municipal Association was present to explain how the Property/Liability Insurance Trust works and explain some of the other services they provide.

ZONING - G-53-1 - CATHI WHITCOMB

Cathi Whitcomb was present at the selectmen's request to discuss the sign for her business at Musket Mountain. She would like to have her temporary sign become permanent. The existing permanent sign addresses only the business on the main level of the building but there's no way to get to her business on the lower level. There are two separate state approved driveways and parking areas, one for each level of the building.

Russ moved, seconded by Ben that it is appropriate for the Musket Mountain building to have one free standing sign for each approved parking area; the sign to be near the entrance to the parking area; only the business used by that parking area to be displayed on the sign. The sign must be in accordance with the sign ordinance. Should the building revert to a single use, only one sign will be allowed. Voted yes 3-0.

TOWN REPORT BIDS

After reviewing the three bids received for printing the 1993 town report, Russ moved, seconded by Judy to award the contract to Wallace Press, to include typesetting. Voted yes 3-0.

GEN. BUSINESS

Approved warrants for payment.  
The meeting adjourned at 8:45 p.m.  
Submitted by Rena Duncklee.

Re: Fire pond P&C Reality on Rocky Pond Rd

Dear Sandy,

It is the feeling that the proposed development by P&C Reality on Rocky Pond Rd and also two lots by Mr Valliere should have the consideration of a fire pond in these areas. As you well know by looking at the town fire protection maps, this area is one of the least protected areas in Brookline as far as water supplies are concerned. It would be a tremendous asset to the fire dept and town to have some type of protection here.

Ray Keczy Fire Chief  
for the Board of Fire Engineers

- 7:30 PM** Planning Board Business Meeting  
**MOTION** Chairman Peter Webb opened the meeting. Minutes of the January 18, 1994 meeting were reviewed. Rich made a motion to accept the minutes as written. Chris seconded the motion. Minutes were accepted by a yes vote of 5-0.
- 7:35 PM** Peter announced that the Public Hearing was scheduled for 8:00PM. Rich said Terry and Margie Sherlock were present to suggest some grammatical clarification changes to the proposed Growth Management Ordinance; and to get some ideas for their next article they are writing for the PB.
- 8:45 PM** After much discussion with PB members, the Sherlocks, and other members of the audience, Chris made a motion, seconded by Rich to amend the wording in proposed ARTICLE XVI, the Growth Management Ordinance as follows:  
**MOTION** #1) Page 2, Purpose, Reword Paragraph 1 to read: "Based on the Master Plan, which assesses and balances community development needs and considers regional development needs, the following ordinance is deemed necessary to flatten the rate of growth in the Town for the following reasons:" (followed by the same four reasons).
- #2). Page 3, Requirements, Section 1. Reword the first sentence to read: " The number of building permits that may be issued.....". and in Section 1. b) Reword the third sentence to read: "Any permits that expire shall be given to the people.....".

Section 4. Reword to read: "4a. The maximum number of building permits that may be issued per year will reflect a 3% annual growth rate in dwellings."

Section 4b. "Although lots existing prior to November 24, 1993 are exempt from limitations on building permits, the building permits issued on those lots will be included in the building permit calculation."

Section 4c. "A minimum of 10 building permits may be issued annually." and add

Section 5. "For calculation purposes, the Planning Board has determined that the number of dwellings as of January 1, 1994 is 1,232."

8:50 PM

Public hearing-Proposed changes to Brookline Zoning and Land Use Ordinance. Peter formally opened the public hearing noting that the wording changes that had been discussed were being made to clarify wording in Item #3, the proposed Growth Management Article.

PB members voted 5-0 yes to reword Item #3-Growth Management Ordinance, Requirements as written above.

8:55 PM

Peter made a motion to change Item #3-Growth Management Ordinance, Purpose the beginning paragraph as written above. Rich seconded the motion. Vote was in the affirmative 5-0.

9:00 PM

Planning Board voted on the six items of proposed change to the Zoning and Land Use Ordinance.

**Item #1-Floodplain Ordinance Amendment.** Peter made a motion that the Planning Board approve this amendment change. Rich seconded the motion. Yes vote 5-0.

**Item #2-Back Lot clarification-** Peter made a motion that the Planning Board approve this amendment change. Rich seconded the motion. Yes vote 5-0.

**Item #3-Growth Management Ordinance adoption-** Rich made a motion that the Planning Board approve the adoption of this ordinance, Article XVI. Peter seconded the motion. Yes vote 5-0.

**Item #4-Add definition of Forestry to Article VIII (Definitions)** Peter made a motion that the Planning Board approve this definition addition. Rich seconded the motion. Vote was 5-0 yes.

Item #5- Amend the definition of Home Business in Article VIII (Definitions). Rich made a motion that the Planning Board approve the amendment to this definition. Peter seconded the motion. Vote taken was 5-0 yes.

Item #6- Building Code Amendments to allow a procedure to adopt the most recent updates of the BOCA and CABO building codes. Peter made a motion that the Planning Board approve to adopt the new procedure for updating the building codes. Chris seconded the motion. Vote was 4-yes, 1-no (Rich).

9:10 PM

**Planning Board General Business.**

1) It was decided that the Planning Board would not meet next Tuesday, February 1, 1994. The next meeting will be on the regular public hearing night, the third Tuesday, February 15, 1994.

2) It was decided that at the next hearing, the PB would review the issue of written agreements reached between Lorden Realty, Talbot-Taylor Estates Partnership, and Millrock Realty regarding their subdivision phasing programs.

9:15 PM  
MOTION

Rich made a motion to adjourn the meeting. Chris seconded the motion. Meeting was adjourned by a 5-0 affirmative vote.

Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the  
MOTION January 25, 1994 meeting were reviewed. Peter made a motion  
seconded by Rich to approve the minutes as written. Vote to  
approve the minutes, affirmative 5-0.

7:35 PM P. & C. Realty, Inc., Subdivision Case #1993-5:F-60.  
(Peter Webb excused himself from consideration of this case  
due to a conflict of interest. Rich chaired the meeting for  
this case; Dennis voted for Peter). Frank and Ann Gavin and  
Randy Haight of Meridian Land Services were present to  
discuss the Rocky Pond Road subdivision of lot F-60 into 5  
lots. Randy said they had met last night with the Brookline  
Selectmen to discuss off-site improvements. He presented PB  
members with a plan showing a proposed fire pond on P. & C.'s  
Lot 22-53 in Hollis. He showed this proposal last night to  
the Selectmen. He later met with the Fire Engineers and the  
plan met with their approval. Randy said the Hollis Fire  
Chief had suggested their using a manhole and an 18" pipe  
instead of a dry hydrant arrangement. The pond is fed by 2  
seasonal run-offs and will have a capacity of approximately  
100,000 gallons of water. They have applied to the State  
for an amended dredge and fill for the fire pond and two  
driveways. Randy said they were asking for conditional  
approval pending State dredge and fill permits.  
Rich said the Planning Board has two issues—fire safety and  
road improvements. He said they have no specific agreement  
with the selectmen for road improvements; and the fire pond  
has not been approved 1516 the Hollis PB at this time.

A. Pivero S  
F-56  
Pivero

Judy said Mr. Gavin, the Selectmen, and Road Agent Clarence Farwell at last night's meeting had discussed improvements to Rocky Pond Road that Clarence would like to have done (see attached minutes). The widening of the road in front of Mr. Valliere's property (lot F-56) will require Mr. Valliere giving the town an easement to do the work. Judy felt that the selectmen were following the plan that Nashua Regional Planning Commission had outlined in their corridor study for Rocky Pond Road. A turn-around at the town line for large vehicles and some gravel work were discussed. Joe questioned whether what is being proposed is adequate enough to allow the PB to grant subdivision approval. Rich said the PB can determine whether a subdivision can be considered scattered and premature based on issues involving health, safety and general welfare to the public. He expressed his concern that a definite plan of road improvements has not been formulated with the selectmen at this time. He was disinclined to grant conditional approval based on the fact that both fire and road issues were not totally specific at this time. He sought the opinion of the other PB members on granting a conditional approval. Dennis said the fire pond as proposed with a turn around at the town line for large vehicles such as snow plows looked satisfactory to him; but he was hesitant to grant approval with the final off-site agreement for the road improvements undetermined as yet. He felt the best way to proceed was a 90 day extension of the PB review period due to lack of specifics on the road improvements. Chris said exact details haven't been worked out with both Brookline and Hollis as regards both the fire pond and the road. He was not in favor of granting conditional approval; but said the applicant was half-way to solving the problem with the proposed fire pond location and design. Joe said he had a problem considering conditional approval with these types of major issues still unresolved. Margaret agreed with Joe that conditional approval should not be given tonight.

8:00 PM

Road Agent Clarence Farwell joined the meeting, and Judy asked him for his opinion. Clarence said he would like to have the vertical curve at the town line corrected to provide safe site distance at this location. He would also like to widen the road and re-align the horizontal curve in front of the driveway to lot F-56. The town, however, would need an easement from the property owner, George Valliere. Rich said he would like the PB members to re-visit the site to look at the area proposed for the turn around and fire pond as well as re-evaluate the road conditions. Site walk scheduled for **Saturday, February 19th at 11:00 AM.** Applicants agreed to give a written request to the PB for a 90 day extension of the subdivision review period.  
Case Continued till March 22, 1994.

8:20PM Ed Delage, "Ed's Service", Non-conforming sign at the Texaco Station, 75 Route 13 South, Lot H-103. Mr. Delage said he had met with the selectmen regarding his sign and they had referred him to the PB. He first had added a 56 1/2 square foot sign to the 10 foot pole on which D.C. Tire has their sign. When told this was not allowable, he began using a portable lighted sign. The selectmen notified him this was also non-conforming to the sign ordinance. Mr. Delage said Texaco would not allow him to place a sign on the building; and he was asking the PB what other options he now had. **Jeremy** said the sign ordinance allowed two-sided signs; and he suggested using the opposite side of the D C Tire sign to advertise for Ed's Service. Mr. Delage said he was not comfortable asking D C Tire for permission to do this. **Peter** said the ordinance doesn't have a relief mechanism written into it that addresses a solution to this problem. By law, the planning board cannot grant waivers to ordinances, and he suggested that Mr. Delage talk again to the selectmen who are the enforcing agents for the Town.

8:35 PM **Thomas J. Mahoney, "Tire Transfer"-206 Route 13 North, N.R.S.P. Case #1994-A:C-36.** Mr. Mahoney was present with his site plan for lot C-36 (a vacant lot). He recycles tires which he picks up from retail stores in southern New Hampshire. He then stores these used tires in a registered tractor trailer parked on the lot. When full, J.P. Routhier & Sons from Ayer, Mass. exchange an empty trailer for the full one; and bring the tires to a recycling center. The rims are sold for metal. There is approximately a 5 day turn around per trailer load. He conducts his business during the week in daylight hours. **Jeremy** said he had reviewed the site plan with Mr. Mahoney. The only remaining issue is a N.H. driveway permit. He spoke to Libby and the Conservation Commission has no concerns. Only registered vehicles are parked on site.

**MOTION** Rich made a motion to accept the plan as presented. Chris seconded the motion. Vote to accept the plan was 5-0 yes. Abutters concerns: There were no abutters present. Mr. Mahoney said he has been in contact with the State about the curb cut permit. He believes there is an existing permit, and the State is checking on this for him.

**MOTION** Chris made a motion to approve the site plan subject to the State driveway permit being forthcoming. Rich seconded the motion. Yes vote to approve plan 5-0 yes.

8:53 PM **Planning Board General Business**

**1) Review of written agreements-Phased Growth**

- a) **Lorden Realty-** Alan Lorden was present with a written agreement for a 3 year phasing plan for the remaining lots in the "Elevations" subdivision. He has agreed to build 6 houses in 1994; 6 in 1995; and the remaining 6 in 1996.

**MOTION** Rich made a motion to accept Lorden Realty's phasing agreement. Peter seconded the motion. Vote 5-0 yes.

- b) **Talbot-Taylor Estates**- PB members reviewed Robert Bourassa's agreement. PB members want the last paragraph reworded to reflect the wording in the final draft of the growth management ordinance.
  - c) **Millrock Realty, Birch Hill and Mountain Road Estates, II**- Secretary to contact Tom Moran regarding his agreement.
2. **Assign PB members to Superior Steel Fabricators case.**  
Judy volunteered to visit site to ascertain that all outside debris has been removed per the PB's conditional site plan review approval.

9:15 PM Rich made a motion to adjourn the meeting. Joe seconded the motion to adjourn. Vote case was 5-0 yes to adjourn.

Next Planning Board meeting will be Tuesday, March 1, 1994.

TOWN OF

(SUF)

## BROOKLINE, NEW HAMPSHIRE

P.O. Box 360  
Brookline, NH 03033

(603) 673-8855

MINUTES  
BOARD OF SELECTMEN  
FEBRUARY 7, 1994

Selectmen Russ Heinselman, Judy Cook and Ben Chandler were present.

### SIGN - LOT H-103

Ed Delage was present at the selectmen's request regarding his "Ed's Service" sign at the Texaco station on Route 13. He said originally he had a lit sign but unplugged it when told it did not conform to the sign ordinance. He said Texaco doesn't allow signs on the building. He asked what to do in order to have a permanent sign for his business. The selectmen suggested he check the size if he attached his sign to D.C. Tire's; if over the limit of 42 sf he should meet with the planning board as the ordinance doesn't address options if a sign can't conform.

### K 28

Rich Napolitano discussed the feasibility of starting up a software business in a presently zoned residential district starting with about three people but with a potential of 50+ in 5-7 years. It was noted there was already a mobile home on the lot and even if there weren't, there was still the zoning issue.

### P & C REALTY - ROCKY POND RD.

Property owner Paul Gavin, Randy Haight of Meredian Land Services, Fire Engineers Ray Kacy, Ron Denehy, Charlie Corey and Road Agent Clarence Farwell were present.

Mr. Gavin was present to discuss off-site improvements and fire protection for a 5 lot proposed subdivision on Rocky Pond Road at the Brookline/Hollis town line; there are 4 lots proposed in Hollis.

Russ asked where the nearest house was located. It was noted the nearest house is 1/2 mile away and Ray said it's 2 miles from the nearest fire pond which is on Birch Hill Road. He said the fire department would use a tanker relay. As there appears to be no place for a fire pond in that area, Mr. Gavin asked whether a fire pond about 250' back from the road in Hollis at the town line would be acceptable. The fire engineers said that would be acceptable; it doesn't have to be along the road. Clarence said the grade may be 10% in some areas. He said there would need to be a turnaround and that would be accomplished if put at the town line. Allan Fessenden said the fire department now has the capability to pump 4,000 gals. Clarence said some of the new fire holes, such as Birch Hill Road have grass in it. Randy asked how close to the town line was acceptable for the turnaround if the fire pond doesn't work out at the town line in Hollis; Clarence said he would prefer it at the town line.

MINUTES  
BOARD OF SELECTMEN  
FEBRUARY 7, 1994, Pg. 2

Clarence had several suggestions for off-site improvements: 1. site distance needs to be improved by Valliere's (lot F-56); 2. widen the roadway along the subdivision to 20' with 3' shoulders on either side; 3. place 2"-4" of crushed gravel along Rocky Pond Road. Judy expressed concern that the improvements made don't have to be torn up when further development occurs. Clarence said if there is more development in five (5) years we shouldn't do the gravel.

CONSERVATION COMMISSION

Libby Werhle-Anderson reported the Conservation Commission is continuing to work on options to purchase the land across from the grove.

AMBULANCE ATTENDANT

Ambulance Director Wes Whittier was present to discuss the job description for the new ambulance attendant we hire when Lisa leaves at the end of the month. It was agreed we would advertise for at least an EMT and that the person's time would be distributed generally to 10 hrs a week for the town clerk's office, 10 hrs. for the fire department, 4 hrs. for ambulance and 16 hrs. in other clerical work. The job description will be clarified that the second ambulance attendant is under the direction of the ambulance director. Wes suggested moving the desk from the work area to the selectmen/planning board area. Allan Fessenden continued to say it would be best for the town to hire an EMT/fire fighter and doesn't believe the fire department would be against it. Wes said the state would require that the person be a career fire fighter. Judy said this set up works in Hollis because the ambulance is part of the fire department which is not the case in Brookline. The selectmen agreed to amend the distribution of time as discussed above. Wes said he feels we need a performance review. Russ agreed but didn't feel it has to be compared to other departments as this is a one person department. It was agreed the salary range would be \$8.50 - \$9.25 and will be advertised in the Milford Cabinet, Telegraph, Union Leader and Brookliner. It was agreed the office personnel would meet to discuss the time distribution of this new person.

BOND - WALLACE BROOK ESTATES II

Road Agent Clarence Farwell, Planning Board Chairman Peter Webb and developer Tom Enright were present to discuss the selectmen calling the bond for the Wallace Brook Estates II subdivision as the work has not been completed and repeated calls to Tom have not been returned. Tom said he was willing to continue the bond. It was noted there is a hole in the road and signs are missing. Rena pointed out that residents continue to call wanting to put mail boxes in front of their houses but the post office won't allow it until the road has been accepted by the town.

**PLANNING BOARD MEETING**

March 22, 1994

**PRESENT:** Peter Webb, Chairman (joined meeting at 8:15 PM)  
Richard Napolitano, Vice-chairman, Chaired meeting, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate, Voting for Chris  
Dennis LaBombard, Alternate, Voting for Peter  
Bob Chisholm, Alternate, Voting on Holly Hills case  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Vice-chairman Rich Napolitano opened the meeting. Minutes of the February 15, 1994 were tabled till a later time.

**7:32 PM** P. & C. Realty, Inc., Subdivision Case #1993-5:F-60.  
(Dennis voted for Peter on this case). Randy Haight of Meridian Land Services represented the applicants. He said the scenic road hearing being held in Hollis tonight was to discuss the tree cutting and road improvements proposed in Hollis. Randy showed PB members a copy of the Hollis plan to remove trees, re-align a road curve (requiring a 15 foot cutback); realign the ditch line; and install drainage. The Hollis Conservation Comm. and Beaver Brook Association have asked to have a driveway built to access their land. This will require some additional disturbance of wetland areas. Jeremy asked about the construction schedule for the fire pond to provide a water source for fire protection for existing area homes as well as new house construction. Randy anticipates the pond will be built as soon as the State dredge and fill permits are received. Rich said the only other issue mentioned in Jeremy's memo of 12/4/93 regarded scattered and premature subdivision. Rich felt the fire protection issue has been addressed with Hollis's approval of the fire pond. He asked about the adequacy of road conditions on Rocky Pond Road. He read from Peter Loughlin's Land Use Planning and Zoning book, Section 29.08 referencing RSA 674:36.II.a. Rich said by State statute the PB has the right to determine if a subdivision

is scattered and premature. He asked other PB members for their opinion on this.

Judy quoted from section 29.09 of the Loughlin book as regards proportionality of off site improvements. She noted the applicant had signed an agreement with the selectmen for off-site improvements to Rocky Pond Road which addressed fire and road safety issues. In Brookline they have agreed to lower the vertical curve for better site distance and widen the road for drainage improvements. She said there are houses in near proximity to this development which currently are provided with mail delivery, school bus pickup, and emergency services. This subdivision will give them a water source for better fire protection and limited improvements to the road. She said Rocky Pond Road is currently maintained summer and winter by both the Town of Brookline and the Town of Hollis.

Margaret said her concern with this subdivision has been whether to allow more houses to be built in locations which had difficulties in the past with emergency vehicles being unable to get to this area of Rocky Pond Road.

Jeremy spoke to Ambulance Director Wes Whittier about this concern. Wes said the next ambulance will have 4-wheel drive and will be able to get to difficult areas easier.

Dennis said he felt the applicant has attempted to improve road conditions and site distance with the off-site improvements agreed to with the board of selectmen (see attached); and noted this was a only a 5 lot subdivision. Dennis made a motion to approve the subdivision subject to the following conditions:

7:55 PM  
MOTION

- 1.) Agreement reached with the Brookline Board of Selectmen for off-site improvements.
- 2.) State of N.H. Dredge and Fill Permits received.
- 3.) Hollis improvement plan shown to PB members tonight is approved, and work is completed or bonded for.
- 4.) All fees are paid and a mylar is presented for recording.

Margaret seconded the motion for conditional approval. Vote taken was in the affirmative. 4-yes, 1-no (Rich).

8:00 PM

Holly Hills Construction-Case #1993-7:J-37,-38,-39,-60, and J-33-34. (Joe Kagenski, a direct abutter, excused himself from deliberation of this case. Bob Chisholm voted for Joe.) Randy Haight of Meridian Land Services represented the applicant in the Design Review Phase of a proposed 44 lot subdivision of lots J-37,J-38,J-39,J-60, and J-33-34 off Averill Road. He said the area is comprised of 188 acres, and is designed as an open space development. He noted that Conservation Commission members, along with Ellen Snyder, a wildlife specialist from UNH Extension, had walked the site with Jim Edwards of Meridian Land Svcs. At Ms. Snyder's suggestion a 185 foot wide corridor to the Townsend State land in designed in the low area at Lot J-39-46. There are two open spaces dedicated, one 79 acres in size, and the other 19 acres. There are 2 lots fronting on Averill Road.

Frontage for the remainder of lots will be on the new subdivision road which will intersect Route 13 between lot J-42 (Streeter's) and lot J-44 (Leppanan's).

Abutter Joe Kagenski asked if Randy was aware of buried stumps on lot #J-33-34.

Randy said he is aware of them. If need be they will be removed. The road will not be constructed over them.

Rich asked if all the septic setbacks would be shown.

Randy answered yes, on the final application plans more details will be included.

Abutter Greg Marszewski asked if the 2 large ridges in back of Fresh Pond seen from Averill Road will be removed?

Randy said that ridges contain gravel, and some will be used for road construction in the subdivision. Ellen Snyder had

asked that the ridge closest to the wetlands be preserved.

Randy said the State site specific permits will show the extent of ground disturbance (not including house and septic sites); and sedimentation and erosion control are a part of the site specific approval.

Abutter Nancy Brodeur asked if the topography will be changed significantly with the construction of a 7,000 foot road. Randy said only in the low area where they will need to keep the road grade to 8% or less.

Nancy said she hopes the PB would ask that trucks use the new road instead of Averill Road during the construction period. She said she didn't feel the two lots being created from lot J-33-34 [J-39-22 and J-39-23] fit the intent of the ordinance; and would the PB permit them as they are shown on this plan? She questioned how much this subdivision will impact this entire area of town. She asked that the PB be mindful of the spirit and intent of the gravel pit issue (Blue Chips) previously proposed in this same location.

Rich answered that the PB is sensitive to the gravel issue.

This subdivision is not a gravel removal operation. He

noted that in the past the PB has asked developers to make another access onto Route 13; and he feels this will be

beneficial for any traffic impact on Averill Road. He queried Randy about lots J-39-22 and 23 as to whether they

meet the lot configuration and septic design requirements. Randy said they both met all regulation requirements.

Rich asked if the developer would be phasing the plan?

Randy said no- but felt the project would be economy driven.

Abutters John and Barbara Edfors said they have a deeded right-of-way to their lot (J-40); and asked if they could be assured of access to their property during the subdivision road construction period.

Jay Heavisides, PE from Meridian said they should have no problem road because at this location there is less than a 1% grade. The access area is very flat.

Selectman Russ Heinselman said the Edfor's new access as shown on the subdivision plan is a deeded paper access which is a de facto layout of road. He said that the paper access is granted for a 20 year period, and they can ask either the

town or the owner to layout a road during this time which they could then build to town specifications. Randy said the access would not be paved to their property line. He will check with the Edfor's attorney regarding the wording of an access easement if needed.

Russ also mentioned that Averill Road is a scenic road and asked to what extent the trees could be preserved on the 2 new lots [J-39-44 and J-39-43], 1 of which has old growth pine. He would not like either of them to be clear cut. Rich said a note could be added onto the plan regarding tree cutting on these lots as part of the approval. The PB has done in the past with tree cutting and stone walls.

Judy said that she would prefer that the ownership of the open space that is the pond remain under the control of the town and the Conservation Commission rather than the homeowner's control.

Resident George Foley asked what provisions were being considered to prevent this long stretch of straight roadway from becoming a speedway.

Rich answered that he is sensitive to the width of clear-cutting along the edges of the road. He feels a wide cut encourages traffic to exceed the speed limit on town roads. He suggested a narrower paved area.

Dennis said he would be opposed to a 20 foot paved roadway.

Randy said that the subdivision application would be forthcoming. All direct abutters were told they would be notified by certified mail of the subdivision application public hearing.

**9:00 PM Planning Board Membership**

PB members discussed the re-appointment of the three members whose terms are expiring on March 31, 1994.

**MOTION**

Margaret made a motion to recommend to the selectmen that Dennis LaBombard be re-appointed as a PB alternate. Joe made a motion to recommend to the selectmen that Peter Webb be re-appointed as a PB member. (Joe will check with Brian as to whether he wishes to be re-appointed as an alternate.) Rich seconded the motion. Vote in the affirmative

**Planning Board General Business**

1) Margaret asked that one of the PB projects for 1994 be a review of the sign ordinance.

**2) Review of written agreements-Phased Growth**

PB members reviewed the letters of agreement on phased growth from Millrock Realty, Lorden Realty and Talbot-Taylor Estates Partnership. A letter of acknowledgment will be drafted by the PB to each of the 3 developers.

3) Maintenance Bond Release

- 1) **Rock Ramond Road**- PB members assigned to the case were Peter and Judy and they had visited the site. Peter had some concerns with the ditch line area. After discussion with other members, it was suggested that the road inspector Bill Duncklee be asked to visit the site and give the PB a report of what he found.
- 2) **Scabbard Mill Brook Road**- PB member Joe Kagenski assigned to this case and road agent Clarence Farwell had visited the site and said there were no outstanding maintenance items needing correction. A letter will be sent to the selectmen recommending that the bond be released.

9:25 PM MOTION Margaret made a motion to adjourn the meeting. Dennis seconded the motion. Vote 5-0 yes.

Next Planning Board meeting will be Tuesday, April 19, 1994.

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

*Robertson*

**TOWN OF  
BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

**PLANNING BOARD MEETING**

April 5, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate, Voting for Rich  
Dennis LaBombard, Alternate  
Bob Sykes, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

- 7:30 PM** **Planning Board Business Meeting**  
Chairman Peter Webb opened the meeting. Minutes of the February 15, 1994 meeting were reviewed. Margaret made a motion seconded by Chris to approve the minutes as written. Affirmative vote of 5-0 was taken to approve the minutes. Minutes of the March 22, 1994 meeting were reviewed. Joe made a motion to approve the minutes as written. Chris seconded the motion. Vote was 5-yes to approve the minutes.
- MOTION**
- 7:45 PM** **Planning Board Election of Officers**  
Dennis nominated Peter Webb to serve as Planning Board chairman for the coming year. Joe seconded the nomination. Vote was 4-yes, 1-no (Judy). Joe nominated Rich Napolitano to serve as Planning Board vice-chairman for the coming year. Chris seconded the nomination. 5-yes vote was cast.
- 8:00 PM** **Discussion of Capital Improvement Plan process-** Jeremy outlined the C.I.P. handbook the Office of State Planning had just sent out and PB members had received a copy of. PB members discussed how best to implement this year's CIP. Judy said this year it should include the two school districts [Brookline and Hollis-Brookline Co/Op] and the Highway Dept. She mentioned that the Brookline School District had a 10-year planning committee who may have some of the needed information for the CIP. Judy also said that the CIP should be completed prior to the town's budgetary process in the fall. She made a motion to set September 1, 1994 as the completion deadline for the CIP. Every effort to get the highway and both school districts included will be made. Margaret seconded the motion. Yes vote 5-0.
- MOTION**

**Maintenance Bond Release-Rock Ramond Road-** PB members reviewed the March 25, 1994 letter from Road Inspector Bill Duncklee recommending a re-inspection the beginning of May when the snow was all gone from the edges of the road to ascertain no damage had occurred over the winter.

**Review of Upcoming Cases**

1) **Holly Hills Construction-** Jeremy said he met with Jay Heavisides of Meridian Land Services and made some suggestions to him. The date of the public hearing for the subdivision application is April 19, 1994.

**Planning Board 1994 Projects**

Joe said he would like to see a compliance review procedure established for all site plans and subdivisions, to be added into the subdivision and non-residential site plan review regulations. He said the PB should look into establishing deadlines for re-checks to make sure the plan approved by the PB is being followed and completed. Another item Joe felt might be helpful would be a letter which could be sent to the owner of a commercial rental property asking them to notify the town when there was a change of tenants.

Margaret would like to review the sign ordinance for some improvement and clarification changes.

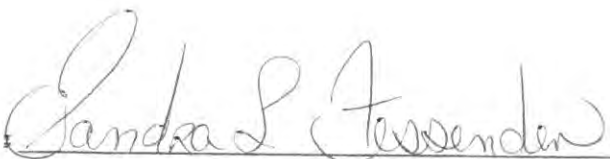

Judy would like to look at establishing business licenses, and set up a fee structure for business permits. A prime objective would be the capability to provide information to the emergency services on the type of business, materials stored on site; and how the business may impact town services and the neighborhood. Jeremy was going to check into other towns to see if they had business licenses or permits and how they were set up.

PB members discussed how a local population census might be taken and how to make it as accurate as possible. Also discussed was improving the current driveway regulations- implementing some changes or creating a driveway ordinance. The fire chief is concerned about long narrow driveways and the ability to get fire-fighting equipment to and from the house or business in case of fire emergencies. Additional specifications for driveways may be needed.

8:47 PM  
MOTION

Margaret made a motion to adjourn the meeting. Peter seconded the adjournment motion. Yes 5-0 vote was cast.

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

April 19, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Rich Napolitano, Voting  
Joe Kaganski, Voting on PB minutes, not on Holly Hills  
Margaret Olson, Alternate, Voting for Joe on Holly Hills  
Bob Chisholm, Alternate, Voting for Chris  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting

**MOTION**

Chairman Peter Webb opened the meeting. Minutes of the April 5, 1994 meeting were reviewed. Rich made a motion seconded by Joe to approve the minutes as written. Affirmative vote of 3-0-1-Abstention (Bob not at the 4/5/94 meeting) was taken to approve the minutes. (Margaret joined this meeting a 7:40 PM)

**7:35 PM** Ann Webb, Hollis-Brookline Co/Op High School Site Committee--  
Ann reported that a citizen's review committee had been formed to review and evaluate alternate sites to the one originally proposed for a new high school. A 95 acre site on Pepperell Road owned by Fred Lorden having 30 acres in Brookline and the remainder in Hollis is being considered. There are 60 to 75 acres of dry, buildable acres on this site as opposed to 25 to 30 acres on the Muzzey Road site in Hollis. Road frontage for access to the site is in Hollis. The intersection of Route 130 and Pepperell Road will need to be improved at an estimated cost of \$200,000. She asked PB members for their input, and inquired if a site plan review for a school would be required by the Planning Board? Rich said his concerns would be access to the site, quality of the land and its future expansion potential. He said the PB would be willing to do a site walk of the area if asked. Jeremy said he will check to see if the school district is exempt from site plan review. He said the Co/Op School District may wish to meet, as a courtesy, with the Brookline and Hollis Planning Boards.

**7:45 PM** Holly Hills Construction Co. Case #1993-7:J-37, J-38, J-39, J-60, J-33-34. Owner James Monahan, and Randy Haight and Jim Edwards of Meridian Land Services were present for the public hearing on subdivision of 180 acres off Averill Road into 44 lots. Jim noted that none of the lots encroach

on any wetland areas. Two stump dump areas have been shown on lot J-39 behind J-39-16 and J-39-15 on the back side of the knoll where gravel is to be taken for road construction. The new grade is to remain close to the existing grade. Land dedicated to open space are lots J-39, J-39-45, and J-39-46. By using the open space development concept, the design eliminates longer deeper lots and keeps construction closer to the road. The fire pond is shown on lot J-39 above lot J-39-46 (designated wildlife corridor). Ownership of the open space will either be conveyed to the owners of the lots in common ownership, or to the Town of Brookline. Peter said the PB had discussed having the pond come under the control of the Town of Brookline with some restrictions to be put in place for the type of use of the area.

**Abutters Comments:** Michael Beck asked if by owning the pond the town would increase everyone else's property tax? Rich answered there should be no impact tax-wise on anyone else because buildable lots have a certain value according to information given the PB by the board of assessors. Rick Van Deusen asked if there would be a buffer area along the pond and the area of gravel removal. He also wanted to know if a fence around the fire pond in the vicinity of the wildlife corridor would inhibit wildlife from using the crossing. Jim answered there would be a 100 foot setback limit- or no disturbance area around the pond. He said it would be very difficult to ascertain whether wildlife will continue crossing into the Townsend State Forest along the designated corridor, or would use other areas. Russ Heinselman said the applicants should discuss with the fire engineers what they would recommend for fire protection for this subdivision. He noted there is already a fire pond in the Wallace Brook subdivision. Rich asked if they could calculate the amount of gravel to be removed and make it a part of the plan. Jim said they will, and they will flag a line as a barrier limit. He said they were willing to include a no disturbance easement on the recording plan. Michael Beck asked if this subdivision would be restricted as to how many lots could be developed per year. Could they be required to use Route 13 instead of Averill Road during the road construction period? Randy said this subdivision comes under the new Growth Management Ordinance. Using Route 13 had been suggested by the PB, but they weren't restricted from using Averill Road. Peter asked who owned the land at the Route 13 entrance. Jim said John & Lawrence Bagley own lot J-41 and have agreed to permit a portion to be used for the road. Peter said a written legal agreement would be needed giving rights to create the road as shown on the subdivision plan. He asked about the access to the Edfors' lot (J-40).

**Jim** said the applicant would retain ownership of lot J-39-47, the strip between the road and lot J-40. The Edfors would have access to their land anywhere along this strip. **Rich** said it has been PB policy to require access for lots such as the Edfors' so they don't become landlocked. **Jim** said they will have access to the lot, but there is an issue of grading to their property line to be considered. **Peter** said it appears that J-40 was becoming landlocked by this plan. He wants to be assured that some means of access is provided to lot J-40. He inquired about the Route 13 and new subdivision road intersection. Has state approval been granted? What is the speed limit on Route 13 at this intersection (55 mph)? Would a turning lane be beneficial? **Randy** said the N.H. Dept. of Transportation will make the determination regarding a turning lane. Permits have been applied for the intersection at Route 13 and for a wetlands crossing. The grade of the road at the intersection is low. **Conservation Commission Chairman Ken Turkington** asked if there would be an advantage to placing a box culvert under the road to provide a crossing for smaller animals in the wildlife corridor (lot J-39-46). **Peter** said this question should be posed to wildlife specialist Ellen Synder who has visited the site. He felt some guidance from her is needed to establish whether the PB should require this added cost for the applicant. **Abutter Kathy Axel** asked if the configuration of lots J-39-22 and J-39-23 provide enough buildable area on them. **Jim** answered that lot #22 was 2.2 Acres. The brook crossed over the back side it. The middle was large enough for the house, well, and septic. Lot #23 has 1.7 Acres, and the location of the house was shown toward the rear of the lot, but there was flexibility of location on this lot. **Rich** said the issue of well and septic locations become more stringent with open space development design. His concern was sighting the wells too close to the septic systems. Several abutters asked about the open space toward Hillside Drive (lot J-39-45). What would be done with it? Would the new road be a scenic road? Would there be underground utilities? **Jim** said overhead utilities are planned. **Peter** said the regulations require use of the open space to be of low impact. He said the town would have to vote at town meeting on the scenic road issue. **Jim** said the land's topography would not lend itself to much development because of its steepness. **Peter** said he would prefer not to have the road clear-cut back from the edge in a wide swath. **Jim** said that the cut would have to be at least 50 feet wide. The soils lend themselves to erosion, and they will have to clear back in the areas of drainage. **Randy** said the road profile the plan shows the limit of the cut. They can have it flagged on the ground as well.

Conservation Commission Chairman Ken Turkington asked if gravel is being removed from the esker. Will this be visible from the top of the peak toward the pond?

Jim said the excavation area is on the backside of the pond.

Russ Heinselman asked for an interpretation of the open space development regulations, Section D, #3. The ordinance requires that 35% of the total acreage be set aside for open space. No more than 45% of that can be wetlands, open water or slopes greater than 25 percent. If the dedicated open space is more than the required amount, is the 45% of the minimum amount required, or the actual amount dedicated?

Jeremy said it was his impression that the interpretation was meant to be 45% of the minimum open space required.

Margaret agreed that it was the PB's intention that it would be 45% of the minimum required.

Peter asked PB members whether they felt this project should be reviewed by an independent engineering firm because of its size and complexity. He said it was a large scale project, and it may be judicial to have an independent firm's expertise evaluate it. He also felt that the PB should have input from the road inspector. Rich said it had been the PB's practice to have an outside consultant review a plan for conformity to the subdivision regulations as well as a review of the engineering of the road system. Peter said road agent Clarence Farwell should look at this plan. Russ asked if the PBd would take a position as to the interpretation of section D., #3 on the criteria of open water, wetlands and steep slopes.

MOTION

Margaret made a motion that the PB interpret Article 17, Part D, #3 for this specific project so that not more than 45% of the minimum required open space shall consist of open water, wetlands, and slopes greater than 25% .

Rich seconded Margaret's motion. Yes vote 4-0.

Abutter Joe Kagenski asked the estimate of traffic flow. He mentioned the drainage was poor heading west on Wallace Brook Road, and the road tends to be icy in the winter. Jim said that they were installing a ditchline and culverts in the area of the intersection of the new road and Wallace Brook Road and this should help the problem. He also said they would put together a log sheet of all the new lots, showing the areas of the septic and well locations.

Jeremy said the plan meets the PB's criteria for acceptance. The only question he had was the 50 foot perimeter setback required by the open space subdivision regulation.

MOTION

Margaret made a motion to accept the plan as presented. Rich seconded the motion. Vote cast was 4-yes; 0-no.

Abutter Nancy Brodeur questioned the shape of lots J-39-22 and J-39-23, and the area left between the road and the Edfor's lot J-40 and whether the PB approves of the lots as they have been designed?

PLANNING BOARD MEETING  
April 19, 1994 Page 5

Jim said that all the lots meet the subdivision regulations for lot configuration, as well as dry versus wet soils; and are capable of having a septic system and maintaining a 75 foot well radius. He said soil scientists Terry Ramborger and Tim Ferwerda have mapped the area. Vegetation found is used in determining wetlands as well as the soil types. Jim will provide calculations showing the dry versus wet areas, and slopes 25% or greater. He said that all lots meet the criteria of the open space ordinance.

Peter asked that Libby Wehrle-Anderson be at the next meeting on May 17th, and if possible have Ellen Synder, wildlife specialist from UNH there also.

PB site walk will be conducted on Sunday, May 15, 1994 at 3:00 PM.

Case continued till May 17, 1994.

9:27 PM  
MOTION

Margaret made a motion to adjourn the meeting. Peter seconded the adjournment motion. Yes 5-0 vote was cast.

Margaret Olson, Alternate, Voting for Rich  
Dennis LaBombard, Alternate, Voting for Peter  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**

Acting Chairman Joe Kagenski opened the meeting. Minutes of the April 19, 1994 PB were tabled till a later time.

**Denise Dukelow, 95 Mason Road-** Mrs. Dukelow was present to request that a form from the State of N.H. for her day care license be signed by PB Chairman Peter Webb. She has been licensed by the State to operate a children's day care for 3 years, and this was the first time she had been sent this form. She was also unaware of the Town's requirement for a non-residential site plan review. She was present also to discuss this with PB members.

**Jeremy** explained the public hearing process and offered to help her with the application requirements. PB members were willing to sign the State form provided she follow through with application for the site plan review. Mrs. Dukelow was agreeable to filing with the town for a site plan review.

**7:40 PM**

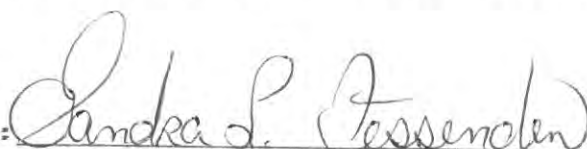

Terry and Margie Sherlock were present to accept an award from the Office of State Planning for their volunteer contribution to the Brookline Planning Board. They have written articles and had them published in "Our Place", the Brookliner, and other regional newspapers relative to proposed changes to the zoning ordinance. Jeremy said Nashua Regional Planning Commission had submitted their names to the OSP; and they subsequently have won an award for their innovative media articles. He mentioned they have volunteered their time and efforts to the PB for the past 5 years. Their articles are credited with helping to explain to Brookline residents what the proposed zoning changes would mean if voted in. Partly due to the Sherlocks' unique and special efforts over the last 5 years, several very controversial changes such as excavation zoning regulations, open space zoning, and most recently the growth management ordinance have been adopted.

Planning Board members expressed their appreciation to Margie and Terry for all their effort and hard work done on the Planning Board's behalf.

7:50 PM **Housing Needs Assessment Update**— Jeremy said the N.R.P.C. is updating their Regional Housing Needs Assessment, and is looking for input from each town's planning board chairman on how far the N.R.P.C. should go in determining local housing needs. Did the towns wish to set the parameters? Should N.R.P.C. provide data and let the PBds implement the quotas? He stressed the importance of the information contained in this report because the chapter on housing in the Brookline Master Plan is based on this document. Joe asked for some feedback on how Brookline matches up to other small communities in addressing housing needs. Do we share some of the same problems? How would Brookline implement zoning changes to offer more diversified housing? Jeremy will check some other small towns for information.

8:15 **Nashua River Watershed Assn.—25 Year Future Planning**— N.H. State Representative Betty Hall and Liz Fletcher of the Nashua River Watershed Assn. were present with some data on the NRWA's progress over the last 25 years. In 1971 the NRWA adopted a plan to clean up the Nashua River, and much has been accomplished in the 25 years in terms of the water quality and recreational use of the Nashua River. The Nashua River watershed connects 31 towns in New Hampshire and Massachusetts; and the NRWA is looking to concentrate on the watershed area itself in the next 25 year plan. Brookline plays an important part since headwater of the Nissitissit River is located in Brookline. It then flows into the Nashua River and then into the Merrimack. Liz is looking for input from all 31 of the watershed communities; and she had a questionnaire she asked PB members to participate in. The N.R.W.A. will compile information from all the towns and will produce a draft copy by September 19, 1994. PB members said Brookline has adopted local regulations such as the aquifer protection ordinance and the wetlands conservation district for water protection; and 2 years ago the Town adopt 9 areas of prime wetlands. Other suggestions were to combine forces with the N.R.W.A. and the Nissitissit River Land Trust to identify areas of prime concern and seek to protect these areas with either conservation easements or land purchases.

9:45 PM **MOTION** Margaret made a motion to adjourn the meeting. Chris seconded the adjournment motion. Yes 4-0 vote was cast.

Sandra Fessenden, PB Secretary

- 7:30 PM** Planning Board Business Meeting  
**MOTION** Chairman Peter Webb opened the meeting. Minutes of the May 10, 1994 PB were reviewed. Peter made a motion to accept the minutes as written. Chris seconded the motion. Vote was 5-0 yes to accept.
- 7:40 PM** Rock Ramond Estates- Road Maintenance Bond Release  
**MOTION** Tom Moran was present. Based on a letter from road inspector Bill Duncklee on the outstanding issues which have been corrected, Peter made a motion seconded by Margaret to recommend the selectmen release the maintenance bond. Vote was 5-0 yes.
- 7:45 PM** Holly Hills Construction Corp., Subdivision Case #1993-7: J-37, J-38, J-39, J-60, & J-33-34. (Being a direct abutter, Joe Kagenski withdrew from consideration of this plan). Owner James Monahan along with Randy Haight and Jim Edwards of Meridian Land Services were present with plans for a 44 lot open space development. Jim Edwards had made a work sheet showing how much of the open space is non-wetland. He said the calculations showed 39.7 Acres are dry. To meet the open space regulations 35 A. are required. He added a non-disturbance easement to the plan located to the left of the wildlife corridor (Lot J-39-46). Conservation Commission Chairman Ken Turkington asked for a definition of non-disturbance and if there should be a non-disturbance area for the steep slopes to the right of the corridor. Would tree cutting be allowed in that area? After discussing this, PB members asked to have the building setback line moved on Lots #J-39-4,-5,-6,-7,-8,-9,-10, and J-39-11 to prevent any buildings being located along the ridge. They also wanted to have an easement to prevent clear cutting on lots J-39-5,-6, and J-39-7. Randy felt a non-disturbance easement would take care of this area,

with wording as to what specific limitations are enforced within these easement areas.

Abutter Joe Kagenski mentioned that the location where the new road will access onto Wallace Brook Road is icy in the winter. From the corner of Lesniak's driveway (Lot J-33-32) water sheets over Wallace Brook Road. PB will ask road agent Clarence Farwell how the problem can be remedied. Randy said the N.H. Dept. of Transportation doesn't feel the amount of traffic will require a turning lane on Route 13. Jim Monahan said he met with Fire Chief Charlie Corey who agreed to the location of the fire pond as shown. No fencing is required if sides of pond are sloped at a 3-1 or 4-1 grade. They will be using a draft basin system.

Conservation Commission member Libby Wehrle-Anderson asked where public access will be provided to the open space area. **Judy** suggested that off Averill Road next to the Chandlers' land (lot J-56) would be the best place for the public to park and access the pond area.

Discussion focused on whether a box culvert would be an advantage to wildlife using the corridor (J-39-46) to enter or exit the Townsend State Forest. Based on a letter from wildlife specialist Ellen Snyder (see attached), larger animals would avoid using the culvert, and there was no data available to support whether smaller animals would use it. Jim Monahan said he had spoken with someone who had attended a seminar on the subject. It was found that by sloping the edges of the road culverts to create a better area, small animals used them as crossing locations. Larger animals won't enter a closed culvert, and will tend to cross over the road. Jim Edwards said an elliptical culvert can be used with sloped edges. Jim Monahan said they could add a longer pipe in addition to sloping the sides. The north side needs it for the fire pond; and the sides could be sloped 4-1 with no guard rail in the area of the crossing. **Judy** asked about access to the Edfor's lot J-40. She inquired if a name for the new road had been chosen, and how wide the paved area would be.

Jim Monahan answered a 50 foot right-of-way has been shown on the plan to access to lot J-40 from lot J-39-47, which is a non-building lot. He said the plans call for a 24 foot paved area. They haven't decided on a name as yet. He said they won't remove any more trees than absolutely necessary other than in the 50 foot right-of-way where there is a steeply sloped area. Sidewalks were mentioned (much too expensive); and white striping along the edges of the road. Selectman Russ Heinselman said striping presents a large maintenance problem for the town.

PB members discussed narrowing the paved area to 22 feet because this was not a collector road. New subdivisions such as Mountain Road, II and Birch Hill, II were built with a 22 foot paved area in keeping with the rural atmosphere of Brookline. Although Chris felt the 24' width to be preferable to handle the amount of traffic accessing from

Route 13, PB members decided on the 22 foot pavement. **Judy** asked if the portion of road where it intersects the Bagley property (Lot J-41) will be deeded to the Town. **Jim Monahan** answered yes, the roadway will belong to the town. PB ok'd overhead utility service rather than underground in this subdivision. Access to the open space lot J-39-45 was asked about. **Jim Edwards** said it was too steep an area to require providing a public access to it. He said excavation details will be added onto the plan. The non-disturbance area will be delineated on-site by a fence running from lot J-39-12 to the 2 stump dump areas located behind lot J-39-16. Because the pond is the Town's aquifer, **Judy** said she feels the open space land should come under the Town's ownership to give the Conservation Commission better control. In reading the zoning ordinance, it was noted that such a conveyance must be voted on at a town meeting. PB members felt it was important that the legal documents conveying the open space to the Town should include a contingency to add protective conservation easements on this land in case of a negative town meeting vote. The developer will format a deed so that all open space land shall include conservation easements for the protection of this very sensitive area; and subject to a favorable town vote, shall be conveyed over to the Town. **Libby** asked if sedimentation and erosion control information could be added to the plan. **Jim Edwards** said it will be included when state site specific permits have been granted. **Peter** asked about the drainage system. **Jim** said they are using flared pre-cast drainage culverts. **Judy** asked about driveway culverts. Driveway culverts are shown on the plan where they will be placed in conjunction with the road's drainage (ex: lot J-39-25). **Peter** asked if PB members felt this project should go to an independent engineering firm for a review of the road construction and drainage plans. **Margaret** said she felt that an independent review hasn't prevented problems, citing **Lorden's** project on south Route 13 as an example. **Judy** said this road is not that complex; and **Meridian Land Services** haven't submitted any plans that have caused problems for the town. It was mentioned that PB Alternate **Dennis LaBombard** has the engineering expertise to review the plans. **Bill Duncklee** has been assigned as road inspector and will have input into the project before final approval is granted. PB will ask both of these people for their opinions on the road design specifications. **Joe** questioned the time frame for road construction. **Jim Monahan** said he plans to build the entire road beginning at the Route 13 intersection as soon as he has PB approval. His plans are to put the base coat down, and bond for the finish coat. The road is left for 4 or 5 years and then the finish coat of pavement is placed. He finds this prevents a lot of damage being done to the final road surface by all the construction vehicles used in building the houses.

Peter explained our subdivision road bonding mechanism. Chris said maybe we should look into our regulations to incorporate this type of system. He pointed out the problems in the Bear Hill subdivision project with damage done to the road's finish surface by construction equipment during the building of new houses and driveways. PB members agreed to discuss this at the next work session. They felt subdivision regulations could be waived by the PB to allow town road acceptance with a base coat in place and a bond to cover the cost of the top coat if the PB determines this is a better way to ensure less damage to the final pavement. Judy wanted a note added to the plan with a provision that road construction will originate from Route 13 rather than from Averill Rd.; and no gravel will be excavated from town. Jim Monahan stated that no gravel will be removed from the site. Any excavated gravel will be used for on-site road construction.

Jeremy said the only issue he had was with the 50 foot perimeter setback for the project as the open space development regulations require. Would it apply to the area bordering the Townsend State forest? PB members felt the regulations only require a buffer next to a residential development. Jim Edwards said he could add it to the plan along the Mass. line with no problem.

Judy asked what kind of a subdivision sign would be used. Jim Monahan said he intends to place a sign at Route 13, probably made of granite, and similar to the ones in other subdivisions he has developed. These require little or no maintenance to look good over a long period of time. Peter advised Mr. Monahan to meet with the selectmen regarding off-site improvements. **Case Continued till June 21, 1994.**

**9:40 PM Planning Board General Business**

Libby asked if the PB could give some consideration to requiring that the wetlands flagging markers placed during subdivision reviews be left on-site so that during home construction the wetlands would be flagged and the problems arising from maintaining the 25 foot construction buffer might be minimized. PB agreed to discuss this, but felt that a considerable amount of time may pass between the time of subdivision review and the actual home construction. The flags might not be left in place by the property owner once the initial home is built. Many problems with maintaining the buffer arise with supplementary building permits for additions, garages, barns, or changes to the original home.

**10:00 PM MOTION** Margaret made a motion to adjourn the meeting. Chris seconded the adjournment motion. Yes 4-0 vote was cast.

Ms. Libby Wehrle-Anderson  
Brookline Conservation Commission  
Brookline, NH 03033

- Coop #  
1993-7

Dear Ms. Wehrle-Anderson:

In response to our telephone conversation last week, I'm sending you some comments.

You requested information on the use of a box culvert or something similar to provide a travel lane for wildlife in hopes of minimizing road kills. I have not come across much in the literature that recommends this approach. In Amherst, Massachusetts small tunnels were constructed beneath a road that was in the way of a traditional migration route for salamanders. In northern New Hampshire, a third bridge span was erected on dry land to provide a travel route for deer. I believe this was a very large bridge.

The proposed road in Brookline probably doesn't fit the situations mentioned above. There is no guarantee that wildlife would use a larger culvert. They may still travel over land, crossing the road instead of crawling through a culvert. Alternatives to a box culvert include altering the driving pattern in the area of the "wildlife corridor." Slower speed limits, speed bumps, and signs indicating a wildlife crossing would help. In Minnesota, a major state highway along the Mississippi River has signs indicating a blanding's turtle crossing.

The developer's plan to leave at least 100' of the esker around the wetland will provide some buffer and many species of wildlife will likely use the associated habitat. I was not clear on how much excavation was to occur on the back side of the esker. You mentioned the developer was planning to back-fill with stumps. From a wildlife perspective this should cause no problem. Eventually the stumps will decay. If the integrity of the esker has been impacted by excavation some slumping may occur in the future, after the stumps begin to decay.

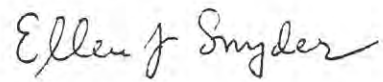

I'm not familiar with the construction of fire ponds. Construction of the pond in wetland areas will likely require permits which is handled by the Wetlands Board and Wetlands Bureau.

Page 2

I will not be able to attend the Planning Commission meeting on May 17th. Please feel free to contact me at 862-3594 if you have any additional questions.

Sincerely,

**PLANNING BOARD MEETING**

**June 7, 1994**

**PRESENT:** Peter Webb, Chairman, Voting  
Rich Napolitano, Vice chairman, Voting  
Margaret Olson, Alternate, Voting for Joe  
Dennis LaBombard, Alternate, Voting for Chris  
Judy Cook, Selectmen's Representative, Voting  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the May 17, 1994 PB meeting were reviewed. Peter made a motion to accept the minutes as written. Judy seconded the motion. Vote was 3-yes, 0-no, 2-Abstentions (Rich & Dennis were not at that meeting) to accept the minutes as written.

**MOTION**

Minutes of the April 19, 1994 PB meeting were reviewed. Peter made a motion to accept the minutes as written. Margaret seconded the motion. Vote was 3-yes, 0-no, 2-Abstentions (Dennis and Judy were not at that meeting) to accept the minutes as written.

**7:45 PM** Attorney Henry Spaloss and a representative from Cuoco & Cormier Engineering Co. were present to informally discuss a subdivision of Lot B-45 belonging to Sharon Robbins and Marjorie Rocca. Lot B-45-A would not have the required 200 feet of road frontage (proposed 85 feet); and Mr. Spaloss was unsure whether it was necessary to go to the Zoning Board of Adjustment for a variance before coming to the Planning Board. He had made application to the ZBA for a frontage variance for lot B-45-A, but had been told that the application for variance as presented couldn't be considered since there was no Lot B-45-A. The owner of lot B-41, William McKelvie, discovered that the previous owners of lot B-45, Frank and Ruth Dow, had sold off portions of his property (Lots B-46, B-47, and B-48). The case was brought to litigation when the error was discovered. Mr. McKelvie proposes to have lot B-45 subdivided into 2 lots; and Mr. Spaloss is asking the PB how to best go about doing this. Rich said that in addition to not meeting the frontage requirement of the zoning ordinance, lot B-45-A does not meet the subdivision regulation for lot configuration. In

addition, Rich mentioned, there were concerns about the condition of Hood Road that would have to be considered by the PB also. It was noted that lot B-46 uses a private access road across B-45 to reach the house. Mr. Spaloss said there was a deeded right across B-45 for lot B-46. Judy said she was in favor of having the PB make a motion to send this to the ZBA for a variance prior to the PB holding a hearing on subdivision. It was suggested to Mr. Spaloss that he might wish to revise his original application to the ZBA; and he asked if it would be possible for the PB and the ZBA to hold a joint meeting on this case.

Peter noted that even if the ZBA granted a variance for the zoning issues, it was possible the PB would disallow the subdivision for not meeting the subdivision regulation requirements.

At this point, Mr. Spaloss said he would re-think his position and get back to either the PB or the ZBA.

**8:07 PM Public Hearing-** Jeremy told PB members that he had discussed with Building Inspector Wes Whittier the date of June 21, 1994 to adopt the 1993 edition of the BOCA National Building Code into the Brookline Building Code at a public hearing.

**8:10 PM Driveway Permit Regulation Changes-** Jeremy said he had met with Wes Whittier and Road Agent Clarence Farwell regarding changes to the driveway permits for all new houses. Their suggestions will be incorporated into an ordinance proposed at March 1995 Town Meeting to ensure that driveways for all new houses will have a 15 foot paved apron to join the driveway with the road; and they will have drainage systems that are built to conform with the town's road drainage system to minimize problems on the town roads.

**8:20 PM C.I.P. Forms-** Jeremy reported that some, but not all departments have completed and returned their 1994 C.I.P. forms. He said that if all forms have not been returned in another 2 weeks, the PB should let the selectmen know so that they can schedule a meeting with the department heads who have not yet responded to ensure that all are included in this year's C.I.P. report.

**8:30 PM Wetlands Flagging-** CC Chairman Ken Turkington was present to discuss this with PB members. Rich asked how long the flags will be required to be left in place? Ken said that at least until all the initial construction of the house has been completed so that the wetlands construction buffer that is required for the building permit can be maintained. Peter said that we can incorporate this into our subdivision regulations the next time they are updated. Ken also said that the color used for the flagging should be specified. It will be easier for the Conservation Commission to identify the wetland areas if the same color flags are used consistently throughout the town by all engineering firms.

- 8:35 PM **Planning Board By-Laws-** Jeremy had passed out copies of an update of the Brookline PB bylaws. He asked the members to look them over and come back at the next work session with any suggestions or changes they would like to have made.
- 8:40 PM **Planning Board General Business-** Margaret remarked that at the PB meeting with the Nashua River Watershed Assn. member, she saw information on Groton, Mass.'s plans to maintain their town center. She suggested the PB think about the "town center" approach for Brookline. Can it be helped by having the Non-residential site plan regulations require sidewalks to be in the front and parking in the rear of all commercial areas? PB members discussed getting site plan regulations from other towns and making copies of them to research this and other ideas.

Peter said he had been contacted by George Farwell regarding the replacement of the underground gas tanks at the Auto Depot (formerly Potanipo Garage); the moving of the gas pumps; and the addition of a canopy over the pumps. Mr. Farwell wanted to know what the PB had required from the other gas stations who had done the same thing in the last few years. It was decided to ask him to come to the next PB meeting to apprise PB members of what he is planning to do.

**Randy Haight** of Meridian Land Services showed PB members the proposed design of the septic and drainage systems for the new addition to the Brookline Elementary School. He said the expanded kitchen facilities meant some additional septic requirements would have to be added to the plan. Because the state has changed the requirement of the size of the septic tank used, they are going to design a 2 tank system which he feels is a much better system. He wished to show the PB what was being proposed since the school is not required to come to the PB for a site plan review for the addition.

- 9:00 PM **MOTION** Margaret made a motion to adjourn the meeting. Rich seconded the adjournment motion. Yes 5-0 vote was cast.

Next Planning Board Meeting, Tuesday, June 21, 1994.

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

PLANNING BOARD MEETING

June 21, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Rich Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting (Abstained from voting on Holly Hills)  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate, Voting for Chris  
Dennis LaBombard, Alternate, Voting for Joe on Holly Hills  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Public Hearing on amending Brookline Building Code- Chairman Peter Webb opened the meeting. Building Inspector Wes Whittier was present to summarize the major changes in the 1993 edition of the BOCA Code from the 1990 edition. He said that apart from minor language and clarification changes, there were two significant changes in the 1993 BOCA code. They are as follows:

1) Any outside attachment such as a deck or porch which is 30 inches or more above ground; or a stairway with 3 or more risers must have a railing 42 inches high instead of 36 inches. Also, the distance between the railing balusters cannot be more than 4 inches apart.

2) The smoke detector law in a residence requires 1 smoke detector in every common hallway (1st, 2nd, and cellar). In addition, there must be a hard-wired detector with a battery back-up in every sleeping quarter. If you add a sleeping room onto the house, the existing areas must be brought up to the new code.

**Comments:** Clarence Farwell asked how much extra cost was incurred by the home owner in meeting the new smoke detector code. Wes said it added approximately \$500.00 to the cost of a new house. Depending on the original construction of the house, the cost may be more when remodeling an older home. Wes added most communities now follow the BOCA Code requirement for fire detection equipment.

**7:55 PM** Judy made a motion, seconded by Peter to the amend the  
**MOTION** Brookline Building Code by adopting the 1993 edition of the  
BOCA Code. Vote to amend the building code was 5-0 yes.

8:00 PM George Farwell, "The Auto Depot" garage, Lot G-55-A- George and Clarence Farwell were present. George said the garage's underground gasoline tanks have to be replaced by 1995. He hopes to change the tanks this year, and will replace the 4 old ones with 2 new ones. There will be 2 gas pumps, and a service island. A canopy over the pumps will be added. The tanks will meet all new federal and state regulations. PB members discussed whether this would require a non-residential site plan review. Margaret said this does not sound like it is a change or increase in the business. Rich said his only concern was traffic crossing over from the gas station to Gazebo Square. He said when Clarence did the site plan for Gazebo Square there was some question as to whether the gas station would be closing. When discussing traffic patterns, it was suggested that maybe an island between the gas station and Gazebo Square would more clearly define the entrance to both businesses. Clarence said there has been no problem so far with traffic cross-overs. He felt that an island would not be of any benefit to either business. Judy said she didn't think a site plan was required, but suggested that when the project is finished, the town should have a copy of the site showing the location and size of the tanks, the island and pump location, and the canopy size.

MOTION

Peter moved that the PB make a finding that a non-residential site plan review was not required because there was no increase in the number of pumps or gasoline tanks, and no outside change to the station was being made. Margaret seconded the motion. Vote was 4-Yes, 1-No ( Joe. For the record, Joe's objection was not to this specific plan, but to the issue that the Planning Board could require a site plan if they wanted to).

8:15 PM Holly Hills Construction Corp- (Being an abutter, Joe excused himself from this case. Dennis voted in his place) Applicant James Monahan, and Jim Edwards and Randy Haight of Meridian Land Services were present. Jim Edwards pointed out the changes made from the last hearing. The name of the plan has been changed from Holly Hills Construction to James B. Monahan; and the name of the road is Laurelcrest Drive. Location of the road access onto Route 13 (through the Bagley property Lot J-41) was changed slightly at the Bagleys' request. Non-disturbance easements have been added to lots 5,6, & 7. A fire pond easement has been added to the plan, and the fence has been removed. The proposed stump dump on the right has been moved slightly; and a 4 to 1 slope in the corridor area has been added. Conservation Commission Chairman Ken Turkington asked that the poorly drained soils on lot J-39-6 (area where 2 cart roads joined) be added to the plan.

Jim noted sheet 17 shows typical driveway construction. Rich mentioned clear-cutting of trees along the road. Jim Edwards said that tree cutting will only be done in the areas where road cuts are made (steep slopes) so the sides of the road can be properly sloped.

Road Agent Clarence Farwell reviewed the road profile plans. He noted the catch basins in the area of the fire pond, and said he preferred the open swale method of drainage as opposed to catch basins because of maintenance costs. Jim said they will work with Clarence on an alternative system to closed drainage. Jim Edwards said a fabric-lined ditch using graduated sized stone may work as an alternative. Randy Haight said the issues left to be resolved are:

- 1) The language for the dedication and/or easements to the town of the open space which will be reviewed by town counsel and the Brookline Conservation Commission.
- 2) Off-site Improvement Agreement with the selectmen. They have talked about an off-road parking area on Averill Road to access the conservation area on J-39.
- 3) Correct the drainage on Wallace Brook Road near Ray Tennant's property (Lot J33-33). Jim Monahan has spoken to Mr. Tennant who wishes to leave his driveway in the same location as it is now.
- 4) Shim-coating Averill Road from Muscatanipus Road to the paved area by James Krieger's at 39 Averill Road.

Peter requested Dennis LaBombard, who had reviewed the road plans at the Planning Board's request, to give a summary of his findings. Dennis referred to his 6/20/94 written report. Clarence said he preferred a 20 foot paved road because of maintenance costs. PB said they had agreed on a 22 foot width instead of the original design of 24.

Ken Turkington asked if the stump area on the right could be re-located on the back of the esker. Jim Edwards said that water comes down between the two proposed stump areas, and they don't want to divert this. Ken said the CC would like to maintain the integrity of the area, and was afraid the decomposing stumps would cause a slumping of the area.

Peter said the PB does not want them to go into the area of the ravine where the large pines are. Judy said that the ridge line on the right side in back of lot J-39-17 would be eradicated if the stump area were moved.

Rich asked where were they removing the gravel for the road? Jim Edwards said there is sand on the right of the wildlife corridor and gravel on the left. The sand can be relocated to the area of gravel removal to be used as fill in the area of the stump dump. Beginning at lot 15, up to lot 20 is the areas of excavation for gravel for the road.

Abutter Joe Kagenski said the plan doesn't show the potential gravel sites, and he suggested it be added to the plan. He asked what the reclamation statistics will be. He mentioned the two areas on Lot J-33-34 that were excavated for road construction. They have not been reclaimed and have not grown back in the last six years. He said the lot is technically an abandoned gravel pit.

Jim Monahan said he will use 1,500 feet of gravel on the left of the corridor to build the road connecting to Wallace Brook Road. He feels there may be enough gravel located on the right of the corridor to use on the road connecting to Route 13. He said he will not open up any more area than necessary since he will have to pay to reclaim it.

Libby Wehrle-Anderson asked if they didn't need to show the entire area of disturbance on State site specific plan for the permit. Jim Edwards said the request for permit shows all areas of disturbance.

Rich said a note should be added onto the plan describing the excavation plan and the reclamation measures. PB members agreed, asking them to detail both the excavation and reclamation specifics on the plans.

Judy asked why the Bagleys asked to have the road moved. Jim Edwards said it was at the request of their engineers who gave him a print of where they wanted it moved.

Dennis said the intersection with Wallace Brook Road should be sloped for the first 20 feet similar to the intersection at Route 13. The intersection with Route 13 will be where the "Tree Farm" sign is now located. Randy said the existing telephone pole there will be moved.

Ken Turkington said the Conservation Commission is asking to have a box culvert placed rather than a 30" culvert which he feels is not large enough. He would like to have data supporting the fact that the small animals would tend to use the smaller culvert with sloped sides.

Judy read from the letter from U.N.H. wildlife specialist Ellen Snyder saying there is not enough evidence that would suggest a box culvert would be preferable to small animals. Jim Monahan said he will get the name of the person who spoke at the seminar in Concord, N.H. and get a copy of the letter with the supporting data on the sloped-sided culvert.

Libby said the Conservation Commission feels the applicant has done an admirable job preparing the plans in keeping as much of the pond area preserved in its natural state. She said if no research data is available by the next meeting, the Conservation Commission will be agreeable with placing the culvert as designed on the plans presented tonight. Selectman Russ Heinselmann said the selectmen agree with this proposed plan. **Case continued till July 19, 1994**

**9:45 PM  
MOTION**

**Planning Board Business Meeting**

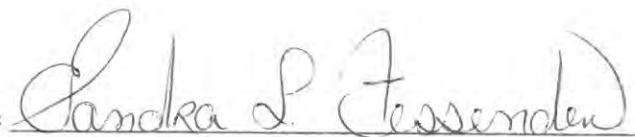

- a) Minutes of the June 7, 1994 PB were reviewed. Peter made a motion to accept the minutes as written. Rich seconded the motion. Vote was 5-0 yes to accept the minutes.
- b) PM members decided on July 5, 1994 as the work session.
- c) Jeremy gave PB members a memo and copies of site plan regulations from other towns. Members will review these for discussion at the July work session.

d) Joe said he had visited Taylor Road in the vicinity of the fire pond and said there was a lot of siltation in the construction areas. He asked if siltation fences were needed to correct this problem. PB will have this checked.

9:50 PM  
MOTION

Rich made a motion to adjourn the meeting. Margaret seconded the adjournment motion. A 5-0 yes vote was cast.

7:30 PM Planning Board Business Meeting

Donna Caruso of 1 Myopia Hill Road was present to discuss with PB members the issue of the wildlife corridor and the dredge and fill permits for the James Monahan/Holly Hills development. Donna explained that she is a former member of the Conservation Commission and has been contacted by Ken Turkington to make an evaluation of the proposed wildlife corridor in Jim Monahan's subdivision off Averill Road. She said this area is designated as a prime wetland, and this means the developer must prove to the State Wetlands Board that the development will not adversely impact the wetland. She asked that the PB do everything they could to see that this valuable prime wetland is protected.

Jeremy said the Wetlands Board is the agency who will make the final determination on the dredge and fill permits, hopefully with input from the town conservation commission. He noted that Ken had written a letter to the Wetlands Board and included information that this is a prime wetland.

Donna said that many problems the Conservation Commission noted were enforcement issues, and asked how the town can ensure that proper procedures are being followed.

Judy said the developer will be deeding all open space areas to the town rather than giving easements onto private land.

Donna said she has noticed siltation and erosion problems on all new road construction in town, mentioning the following three that she has personally seen problems with: Mosher Drive, Mountain Road, and Lakin Road.

Rich agreed and said there are siltation problems all over town. Dennis said it is his feeling that during the road construction phase most problems are caused by improper installation of siltation fences.

**Donna** said the driveways on Mountain Road were improperly installed, and frozen streams run down across the driveways. She felt the bumps at the beginning of Mountain Road are being caused by streams running underneath the roadway.

**Peter** asked what can be done to correct this problem. He said the PB can't address issues that the Conservation Commission should be acting upon. There is no basis in the law to allow this to happen. The Conservation Commission has the responsibility to review and comment on all dredge and fill permit requests sent to the state.

**Donna** said the townspeople had voted on designating certain areas as prime wetlands; and she felt they should receive proper attention when being impacted by new developments. PB members thanked her for coming, and said they would discuss a way in which the PB could offer guidance to the Conservation Commission's new members until they better understood the procedures to be followed with the town and state in order to implement local conservation ordinances.

7:55 PM  
MOTION

Members reviewed the minutes of the June 21, 1994 PB meeting. Peter made a motion to accept the minutes as written. Judy seconded the motion. Vote was 5-0 yes.

8:00 PM

#### Road Issues

Road agent Clarence Farwell was present to discuss some road issues with PB members.

**Hillside Drive Extension**- Clarence met on-site with Tom Enright and Dennis LaBombard regarding the remaining outstanding issues. Peter reviewed the June 27, 1994 letter from Selectman Russ Heinselmann (see attached). Dennis added the only way the road can be corrected properly is by shimming it with additional asphalt. Clarence said the bounds are set, the street sign is missing and he will order one. He said the amount in the escrow account would cover these items. The construction bond will be transferred to a 2 year maintenance bond unless PB waives the time frame.

**Jeremy** said easement descriptions will be discussed. Tom Enright should be able to provide them if needed.

**Talbot Road**-Clarence said he had not seen a problem with sedimentation control; but he felt the type of gravel being put on the road has too much silt-not enough granular. This can cause the road to heave.

8:03 PM

**Peter Weeks, Cuoco & Cormier, Inc.**- (Peter Webb recused himself from this case. Bob Chisholm took his place.) Mr. Weeks, Pat Berube, and Pam Austin were present to discuss a 3 lot subdivision of B-60. Area "C" will become Pat Berube's. Area "B", ten acres, will become Judy Lumbrina Ames's and be eligible for current use. Area "A" will become a conforming lot for the existing house on Lot B-60. This plan is being done to give

some of Willard Cummings's land to family members. Lot B-60 is more than 20 acres and there was discussion because the zoning ordinance requires lots over 20 acres to come under the open space zoning ordinance. Rich said this lot can be subdivided, and the PB cannot waive the wording of the ordinance. He suggested that lot B-60-1 and Parcel "C" be incorporated into 1 lot. PB members believe this plan is being done to divide a large lot between family members, but their concern was that it not violate the zoning ordinance. It was suggested to Mr. Weeks that he try re-working the lot lines to see if it was possible to have 80,000 square feet for Lot B-60; make Lot B-59 80,000 + the ten acres required for current use status; and combine the remaining acreage into Lot B-60-1. Jeremy said information on Parcel "A" as regards soils, septic, and well location should be added. The same should be included for lot B-60-1. Applicants will come back to PB when new plans are drawn.

8:25 PM

Ken Turkington, chairman of the Conservation Commission was present to discuss the siltation control measures on Taylor Road. He said in the area of the fire pond (lot G-61-3), road construction goes right up to the edge of the pond. Although there are hay bales present he feels that adequate measures are not being used. (Joe Kagenski had mentioned this same thing at the last PB meeting.) Peter suggested a letter be drafted to road inspector Bill Duncklee asking him to inspect the road as regards the hay bales and siltation fences to make sure they are in compliance with this phase of road construction. They should be restored according to the approved road construction plan.

8:45 PM

Holly Hills subdivision- Ken said there is a vernal pool important to the salamanders in the area of the wetlands which were not originally mapped (Lot J-39-16), but have now been added to the plan. He is still concerned the proposed culvert will not be as effective to wildlife crossing the road as a box culvert would be. As yet he does not have information Mr. Monahan said he would provide him regarding culverts designed for wildlife crossings. Peter said the PB has to have a basis of written information in order to make the decision as to whether a box culvert or an elliptical culvert with sloped sides should be used in this wildlife crossing area. Jeremy suggested that Ken contact the Wetlands Board to see if they could provide him the data he needs.

8:50 PM

**Planning Board By-Laws-** Jeremy said these are internal rules of procedure for the PB which do not require a public hearing to be adopted. He found according to RSA 673:5, that the term of office for the ex-officio PB member (selectman) must coincide with their term of office as selectman. It was suggested that the town counsel also be added to section VII-Staff & Finances. Jeremy will put the by-laws into final format, and the PB can review and vote on them at the next work session on August 2nd.

9:00 PM

**Site Plan Regulations from other towns-** Rich said he has established what he thinks should be some goals in revising Brookline's site plan regulations. He feels the PB should try to promote quality industrial growth in Brookline; prevent strip malls; minimize curb cuts along Route 13; promote the location of industrial sites back off of Route 13 (industrial parks); locate parking areas behind the buildings; define specific landscape standards; and reduce surface area coverage (minimize paved parking areas); and in general "Spiff-Up" the site plan regulations.

**Margaret** said her goals for future industrial and commercial development would allow for trees to be planted in the parking areas both for shade and aesthetic reasons; and to have sidewalks linking developments one to the other to afford pedestrians the opportunity to walk from one business site to another. Parking would be in the rear of the buildings. She mentioned that the Bedford regulations provide for islands of vegetation in the parking lots.

PB members decided a statement of principal should be added to the site plan regulations; checklists should be used; and older businesses that don't already have site plans on file with the town must provide them.

**Judy** said the PB should check all the definitions in the zoning ordinance and the regulations. She noted "forestry" had been added this past year; and feels it is important to add new definitions where necessary to make the zoning ordinance and regulations compatible with one another. This will allow for better enforcement of both regulations and zoning.

9:30 PM

**Planning Board General Business**

George Carkin's daughter Sally had inquired as to whether a sign could be placed in front of their home at 230 Route 13 North (Lot D-38). Mr. Carkin has operated an antique business out of his home for the past several years and would now like to put up a sign. He feels his business qualifies as a home business under the town's definition in the zoning ordinance.

Margaret's opinion is that it is excessive noise along with traffic issues that causes problems with home businesses in residential areas. It was suggested some clarification could be added to the zoning ordinance to give guidelines under which allowable home businesses can operate within the residential zone.

Jeremy said that some of the ideas presented in those site plan regulations from other towns could be applied to Brookline's rural setting which might make a more cohesive consolidation of our existing commercial area.

9:50 PM Rich made a motion to adjourn the meeting. Margaret  
MOTION seconded the adjournment motion. A 5-0 yes vote was cast.

Re: Hillside Drive, Wallace Brook Estates II

*Case #199*

Dear Members:

Enclosed is a copy of the minutes of the February 7, 1994 meeting with Tom Enright, Clarence Farwell and Peter Webb regarding the bond for the completion of Hillside Drive.

We have reviewed Tom Enright's letter dated June 20th and Dennis LaBombard's letter of June 16th. We recommend that we continue with the agreement stated in the minutes of the February 7th meeting. We will have the town road agent complete the necessary road work. When the road work and other items are complete, we will return the portion of the \$3,000 escrow account that has not been spent to Tom Enright.

Very truly yours,

Board of Selectmen

PLANNING BOARD MEETING

July 19, 1994

**PRESENT:** Peter Webb, Chairman, Voting (Abstained from voting on Grant  
Plastics)  
Joe Kagenski, Voting (Abstained from voting on Holly Hills)  
Judy Cook, Selectmen's Representative, Voting  
Dennis LaBombard, Alternate, Voting for Rich  
Bob Chisholm, Alternate, Voting for Chris  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Minutes of the July 7, 1994 PB were reviewed. On Page 2,  
8:00 PM, Road Issues, Hillside Drive Ext., Line 5, change to  
read: "Dennis added the easiest way the road can be  
corrected is by shimming it with additional asphalt." Peter  
**MOTION** made a motion to accept the minutes as amended. Joe  
seconded the motion. Vote was 5-0 yes to accept the minutes  
as amended above.

**7:35 PM** Potanipo Realty, Inc. N.R.S.P. Case #1994-2:6-52-2.  
(Peter Webb recused himself from the board. Joe Kagenski  
chaired the board for this case.)  
Attorney Peter Bennett representing the applicant was  
present with a Non-residential Site Plan to add a 16,000  
square foot (100' X 160') building to be used as a warehouse  
at the Grant Plastics, Inc. site at 86 Route 13.  
He said the new building will be used entirely for warehouse  
space. There are no plans at this time to increase the  
number of employees or the manufacturing capabilities.  
Randy Haight of Meridian Land Services reviewed the  
submitted plan with PB members. He said the new building  
will be added to the rear of the existing building; and an  
additional paved parking area will also be added. There  
will be 3 doors for the new loading dock. The old loading  
dock will be closed. The new addition will barely be  
visible from Route 13. Randy noted this site contains 13  
1/2 acres. There is a fire pond on site with a pumping  
chamber used for the sprinkler system. The new warehouse  
will also be equipped with sprinklers. The entrance will  
stay the same; and stone lined under-drains will be  
installed around the new building to collect clean water and  
direct it back into the fire pond.

Dennis questioned whether the septic system is adequate for the existing number of employees, since it is smaller in size than one which is required by today's standards.

Randy said the septic system could be enlarged if necessary using the same footprint by using an Elgin system.

Dennis said he would like to have something shown on the plan relative to the size and location of the existing septic system. He asked if there are any wetland soils on the location beside the fire pond area.

Randy answered no, there is only the seasonal run off of the stream. The property line is flagged.

Jeremy said the submitted plan meets the checklist in terms of the information provided.

Conservation Commission Chairman Ken Turkington questioned the location of the stream as shown on the locus plan.

Randy said the actual location is shown on the plan, differing from the locus which is taken from the tax map.

Ken said the CC had no issues with this site plan.

7:45 PM  
MOTION

Judy made a motion to accept the site plan for Grant Plastics as presented. Dennis seconded the motion. Acceptance vote was 4-0 yes.

**Abutters comments:** There were no abutters present.

Jeremy asked for clarification of the parking area in the rear of the new building. Randy explained the parking, and showed the access on the lower level that will be used to enter and exit the building with the forklifts. He said the new building will be basically similar to the existing building, but just a little bit higher in height.

Dennis asked to have an area shown on the plan for future location of a septic system.

7:55 PM  
MOTION

Dennis made a motion that the PB grant approval of the plan as submitted for the additional building, provided that:

- 1) A conceptual design for adding a leachfield which will conform to current regulations be included on the plan; and
- 2) All fees have been paid.

A yes 4-0 vote was taken to approve the plan with the above conditions met.

8:00 PM

**James Monahan/Holly Hills Construction Corp., Subdivision Case #1993-7:J-37,-38,-39,J-60, J-33-34 continued.**

(Joe Kagenski as a direct abutter recused himself from the board. Peter Webb chaired the board.)

Applicant James Monahan and Randy Haight of Meridian Land Services were present. Randy said the following changes had been made to the plan from the last hearing:

- 1) They met with Road Agent Clarence Farwell and removed the catch basins, replacing them with an open drainage system which Clarence prefers as a lower maintenance cost for the Town, and which he feels functions equally as well as a closed system.

- 2) They have removed 1 proposed stump dump area that Ken Turkington had recommended to maintain the integrity of the esker.
- 3) The 15" RCP culvert on Route 13 is now shown on the plan.
- 4) Revised the grading at the lot line of lot J-33-34 at Dennis's suggestion to help correct the water sheeting problem on Wallace Brook Road.
- 5) Added notes 18-22 concerning conservation easements, road construction progress, and the sequence of gravel removal to be used.
- 6) Added the boundary of the 100 year flood, and show the approximate location of the aquifer zone on the topographical sheets.

**Judy** questioned what the final appearance of lots J-39-22 and J-39-23 will be, noting this was formerly lot J-33-34 from which gravel had been removed for the road construction of Hillside Drive Extension. There has been no reclamation of this lot. She wants to make sure that somewhere on the plan it says these lots will be reclaimed when this subdivision is completed. Lot J-33-34 remained unsold and doesn't fit in with the surrounding properties. Randy referred to Pages P6 and P7 saying the reclamation area as shown is 50 to 100 feet wide in places. He assured her these lots will be reclaimed as soon as road construction has been completed in this area.

**Judy** also asked about lot J-39-47 which is labeled as non-buildable, and from which the Edfors' lot J-40 will have its access. **Peter** questioned whether this could be a problem with the subdivision regulations; noting that the PB is prohibited from creating a non-conforming lot. Is this allowable because it is not a building lot?

**Jeremy** said he does not feel this violates the wording of the subdivision regulations, and noted the PB has allowed such lots in other subdivisions as long as they are clearly labeled as non-building lots.

**Peter** asked what prevents a landowner from violating the areas of the non-disturbance easement, even though the subdivision plan clearly marks the boundaries?

**Ken** asked if the town has any influence over the wording of any of the easements? It was noted that town counsel will review all legal documents prior to final acceptance.

**Judy** said the non-disturbance areas need to be clearly defined on the plan. The deeds for those specific lots on which non-disturbance area is located should have this information included in them.

**Randy** said a document recorded at the Registry of Deeds along with the subdivision plan will spell out the location of the non-disturbance easement. In addition, the deed for each individual lot will have all encumbrances for that particular lot included in it.

Randy presented PB members with a proposed draft of the non-disturbance easement; and said Note #18 has been added to the subdivision plan so that in the event that the town does not accept the open space dedications of land, conservation easements will be written to protect these areas. This information should also be included in the individual lot deeds, with reference back to the recorded subdivision plan. Peter asked to whom the easements are conveyed—the Town or the Conservation Commission? It was determined the usual procedure is for the land to be dedicated to the Town under the management of the Conservation Commission. Jeremy noted that the fire pond is located in the open space to be dedicated to the town. In the event the town meeting does not vote to accept the land, a fire pond easement will have to be dedicated to the town. He said the Brookline School Board has not yet reviewed the plan and recommended any school bus stops.

8:45 PM

Applicant James Monahan said he is disturbed by the letter the Conservation Commission sent to the State Wetlands Board which is holding up the dredge and fill permits. PB members reviewed the 7/1/94 letter from the Conservation Commission to the State Wetlands Board. (see attached)

Peter asked Ken if there was any written documentation available for the PB to review tonight that would support the contention that a box culvert was a better solution than an elliptical culvert with sloped sides which is what is being proposed for the wildlife corridor crossing.

Ken said he did not have anything in writing at this time.

Peter then asked if there wasn't a compromise solution to the issue of the box culvert. He asked what the length of the culvert would be? Answer—78 feet in length.

Judy said water animals such as beaver and mink will use a 30' culvert, and feels the 4 to 1 slope is a good solution for other small animals. Larger animals wont use any size culvert. She also questioned the cost of replacing a 78' long box culvert when it becomes a Town maintenance expense.

Conservation Commission member Libby Wehrle-Anderson said Jim Bern of the State Wetlands Board suggested to her that a culvert sunk in the ground 5", with gravel placed in the bottom of it so that the animals can manoeuver more easily, was another solution to the problem. She noted this is a prime wetland used by many animals accessing into the Townsend State forest.

Peter asked the distance in elevation from the water level to the road's surface. Randy said it will be 9 feet.

Jim Monahan at this point said he was willing to increase the size of the culvert to 48"; and place gravel in the bottom if the Conservation Commission was agreeable to this.

Ken said he would agree to this, noting that this was the first development project in a prime wetland area, and the Conservation Commission is trying to find the best solution in this sensitive area.

Jim Monahan asked for a letter to be sent to the Wetlands Board by the Conservation Commission within the next few days to the effect they are satisfied with the road culvert design for the corridor as agreed upon at this meeting. Ken agreed to have something in writing to the Wetlands Board by Friday, July 22nd.

9:10 PM Jeremy brought up the question of whether gravel could be removed from town property for road construction work if the road is not completed by the time the town votes to accept the open space land at the March 1995 town meeting. Peter asked about the time frame for the conveyance of the open space to the town. Jeremy referenced Note #18 on the subdivision plan. After discussion between the applicant and the PB members, it was decided to establish a deadline for the transfer of the open space land to the Town of Brookline. Date to be 90 days following town meeting; or at the time of acceptance of the road, whichever date is later. Jeremy said all that remains to be resolved are the addition of notes and street numbers to the plan, minor road detail clarifications, and the State Dredge and Fill permits. He said the PB could grant conditional subdivision approval tonight if they wanted.

9:20 PM Peter made a motion to grant subdivision approval to the James Monahan/Holly Hills Construction Corp plan subject to the following conditions being met:

- 1) A note added to the recording plan regarding the non-disturbance easement and the lots affected by it. Language of the easement to be recorded at the Hillsborough County Registry of Deeds along with the subdivision plan.
- 2) A note added to the recording plan regarding the 90 day deadline from a Town Meeting vote or road acceptance (whichever is later) for the transfer of the open space land to the Town of Brookline.
- 3) Corrections to the road profile plan as suggested in Dennis La Bombard's report (details to A1 and D1).
- 4) Street numbers corrected.
- 5) A note regarding a snow fence to be placed along the non-disturbance easement line to be used as a reference during road and home construction.
- 6) Written easement to build the road across the Bagley land with underlying title to the road deeded to the Town of Brookline when road is accepted by the town.
- 7) A 48" culvert in the wildlife corridor replacing the 30" culvert.

- 8) Fire pond construction time-frame added to plan, to be concurrent with the road construction.
- 9) Add to the plan detail of the area of "Future parking" off Averill Road between lots J-39-43 and J-56, to be used for access to the open space.
- 10) Note added to the plan as to the method to be followed regarding road bonding.
- 11) All State approvals received.
- 12) All fees paid and recording mylars presented.

Dennis seconded the motion to grant conditional approval.  
Vote was 4-Yes, 0-No.

9:50 PM **Planning Board General Business**

- 1) PB members assigned to the James Monahan project will be Bob Chisholm and Judy Cook. Due to the sensitivity and scope of the project, the PB wished to have the road inspector available to frequently visit the site during all phases of the road construction. Therefore it was voted to have Dennis LaBombard replace Bill Duncklee as road inspector.
- 2) Dennis reported that he had visited two sites as road inspector. **Ben Farnsworth Road** upgrading to a class V road is completed for the Eddy Whitcomb subdivision. Most of the road issues involved the intersection with N. Mason Road. PB members suggested Dennis submit a written report of what he had found. **Mosher Drive** had the finish coat of pavement was put down on 7/18/94. Dennis said that a new well has been installed for Mr. Robert Weeks, and PB will ask for a letter from Mr. Weeks regarding the new well. Dennis will write up a report regarding his inspection.
- 3) Members discussed whether to hold a PB work session on August 2nd. Because of summer vacations and the slow work load, it was decided to forego the August 2nd meeting.

Next Planning Board meeting will be August 16, 1994.

10:00 PM Peter made a motion to adjourn the meeting. Dennis  
MOTION seconded the adjournment motion. A 5-0 yes vote was cast.

P.O. Box 2008  
Concord, N.H. 03301-2008

Re: Dredge & Fill Application, Holly Hills Development,  
P.B. Case #1993-7

Dear Mr. Downing,

The purpose of this letter is to follow up on our letter of intervention. This property has approximately 25 acres of open water designated as "Prime Wetlands #18" in 1991. The upland consists of sand & gravel with an esker surrounding one side of the wetland with a very steep slope, except at the location where a stream enters the wetland, and a hiking trail is next to the pond. This is an open space plan with the major wetland area being deeded to the Town of Brookline. Working with the applicant, we have preserved 70 feet on each side of a brook connecting the pond with the Townsend State Forest in Massachusetts. In our Prime Wetland ordinance, wetland #18 is the second most important wetland wildlife habitat and very high in the other important criteria.

The fire pond has been placed in the corridor but not in the wetland. The road crossing at station 47 has concerned us. To facilitate the wildlife's movement to the pond, we considered the use of a box culvert for this purpose. The state is currently building culverts with wildlife corridors within them for this purpose. We attempted and were unable to obtain enough research to make an informed decision. The applicant recommends modifying the slope to a 4-1.

At station 10+50 there is a wet ditch along a major highway. The wetlands appear to be accurately mapped and proper erosion control measures have been planned. We have no concerns at this station and we recommend acceptance of the Bagley dredge and fill. At station 76 there is a culvert crossing a seasonal stream through wetlands. We see no problem at this station.

Brookline Conservation  
Commission

Brookline, New Hampshire  
03033

N.H.W.B-Holly Hills Development  
Page 2

In our letter of intervention we addressed an unmapped wetland. The applicant has mapped this wetland and it is outside of all road construction. We request a 30 day extension. If these concerns are important in your opinion, we will attend a hearing if you request it.

Very truly yours,

A handwritten signature in cursive script that reads "Kenneth Turkington". The letters are fluid and connected, with a prominent loop at the end of the last name.

Kenneth Turkington, Chairman  
Brookline Conservation Commission

*Selectmen*

**TOWN OF  
BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

**PLANNING BOARD MEETING**

**August 16, 1994**

**PRESENT:** Peter Webb, Chairman, Voting (Arrived at 8:00 PM)  
Joe Kagenski, Voting Chaired beginning of meeting  
Judy Cook, Selectmen's Representative, Voting  
Dennis LaBombard, Alternate, Voting for Rich  
Bob Chisholm, Alternate, Voting for Chris  
Margaret Olson, Alternate, Voting for Peter  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Joe called the meeting to order. Minutes of the July 19, 1994 PB were reviewed. On Page 5, 9:20 PM, Line 1, change to read: "Peter made a motion to grant conditional subdivision approval to the....."  
**MOTION** Dennis made a motion to accept the minutes as amended. Joe seconded the motion. Vote was 5-0 yes to accept the minutes as amended above.

**7:45 PM** James Monahan, Subdivision Case #1993-7:J-37,-38,-39,J-60, J-33-34. Mr. Monahan was present to discuss a phasing program in which he would be willing to phase the building permits for his 44 lot subdivision over the next 4 years by building 8, 12, 12, and 12 homes each year. The entire length of the subdivision road will be built first. Joe said under the growth management ordinance there is no guarantee on the number of building permits given out to any one person. Only the aggregate number per year is governed. Dennis said Mr. Monahan would be putting further restriction on the number of building permits he could have with no guarantee that he would get them. As it was explained to him, the number of BP per year under the growth ordinance are given out on a first come first serve basis, with the minimum # per year being 10 permits. Mr. Monahan asked to have someone come out to flag the parking area on Averill Road (Lot J-39). Judy volunteered, and will ask Ken Turkington to go out also. Mr. Monahan told PB members the stump dump area has been flagged. The Conservation Comm. had asked to have the original stump dump area moved to save trees along the trail at the top of the hill; but Mr. Monahan said he would like to move the dump area back toward the north in order to save the steep embankment. This would mean cutting some of the trees, but they will die anyway if the banking erodes.

**PLANNING BOARD MEETING**  
**August 16, 1994 Page 2**

**8:20 PM MOTION** Margaret made a motion to relocate the stump dump area as indicated on the plan presented tonight. New subdivision plans will show this correctly. Judy seconded the motion. Vote was 5-0 yes to allow the moving of the stump dump area.

**8:25 PM** **Planning Board By-laws-** PB members reviewed the proposed by-laws. It was decided under SECTION IX, COMMITTEES to add the following sentence: **"This means including assignments to subdivision and site plan projects."**  
PB members discussed assigning members to existing site plans, and the following assignments were made:

Judy- Superior Steel Fabricators (new building)  
Margaret- Poly-Ject (Larry Thibeault, new building)  
Bob Chisholm- Kinney's Texaco Station (new building)  
Dennis LaBombard- Grant Plastics (new building)

It was also decided that a deadline and/or a completion date for each approved site plan project should be added into the Non-residential Site Plan Regulations.

**Site Plan Regulation Changes-** Jeremy will have a draft ready for PB review at the September 6, 1994 PB work session.

**Proposed Zoning Ordinance Changes-** Jeremy & PB members reviewed the first draft of the proposed driveway ordinance. **Page 2, D. REQUIREMENTS, 1. Design Features-**delete d. and #3. Change #3 to #4 and reword to read: **" On any road, the driveway shall be paved 15 feet....."** Reword the second paragraph to mandate a 3 month time limit for paving the 15 feet after April 1st for those permits drawn after October 1st of the previous year. Copies of the proposed ordinance will be given to Wes Whittier and Clarence Farwell for their review. The next draft will be discussed on Sept. 6th. Jeremy said Wes will provide him some information regarding a street numbering ordinance he would like to have adopted in preparation for the Enhanced 911 emergency system going into effect in 1995.

**8:40 PM** **Planning Board General Business**  
a) PB members discussed the dredge and fill application from Rolf and Randi Bremer. It was non clear that the access for lot D-26-4 should be coming from a proposed future roadway. Secretary will check PB records on the subdivision case.

- b) Peter reviewed the N.R.P.C.'s July bill. He expressed some concern that the PB might go over budget if the amount of time being allocated monthly to Conservation Commission issues continues for the remainder of the year. A letter will be sent to chairman Ken Turkington regarding this.
- c) Peter mentioned he had been at the Hollis PB meeting tonight and learned of Hollis's Town Center Survey Plan. He suggested it might be something Brookline might wish to explore. It deals with the placement of elderly housing on undeveloped property in the center of the township.
- d) The fall law lecture series is being held on the first, second, & third Tuesdays of October. It was voted to move the October Planning Board meetings to **Thursday, October 6th and Thursday, October 20th** in order for PB members to attend the seminars on Tuesday, October 4th and October 11th.
- e) Judy told PB members about Brookline's new cable access channel 16. Scheduled meetings and town functions have been entered onto it. With the arrival of a new character generator in the near future, many more options will be available for easier imputing of information. Requests for all public service announcements will be handled through the Town Hall office.

9:25 PM

Dennis made a motion to adjourn the meeting. Joe seconded the motion. Vote was in favor of adjournment 5-0.

**PLANNING BOARD MEETING**

**September 20, 1994**

**PRESENT:** Rich Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:45 PM Planning Board Business Meeting**

Rich called the meeting to order.

**Road Agent Clarence Farwell, Lot J-9-2-** Clarence was present for an informational meeting to discuss an excavation and reclamation plan for the removal of gravel from Tom Moran's lot J-9-2 on Averill Road for use on town road projects. He said Tom has given the Town the right to excavate 40,000 cubic yards of gravel over a 5 year period. Work is being done on Mason Road for which he has removed 1,500 c.y. of gravel. This project is all but finished and he will not be removing more gravel this year. Future projects include Mason Road, Bohanon Bridge Road, and Oak Hill Road. The Town may also decide to make some improvements on Rocky Pond Road.

Jeremy said RSA 155-E allows a municipality to be exempt from its own zoning ordinances. Town Counsel Bill Drescher was consulted. He agreed no permit is required for the Town to excavate gravel for use on construction, re-construction, or maintenance projects. Under RSA 155-E:2, IV, reclamation must comply with the reclamation standards, and a plan should be filed with the regulator (planning board).

Resident Pat Smith was concerned with the impact heavily loaded trucks would have traveling over Cleveland Hill Road.

**Judy** said the gravel is being used to build the road base, and the Town will not be hauling gravel every day.

Some residents expressed concern over operational hours and the amount of traffic in the Averill Road and Cleveland Hill Road area with many small children living in this area.

**Abutter's comments:**

John Ganos of Averill Road was concerned with safety issues as well as where the materials is going to be used. He would like a commitment from the Town that all excavated materials are going to be used for town road building projects. He said at the beginning of the operation, trees had been left hanging after the bases were cut. This has been cleaned up but he wanted to know how much excavation could be done before reclamation work began.

**Marilyn Dunton** questioned the setback distance from property lines. State law requires 10 feet from an approving abutter, and 50 feet from a disapproving abutter.

**John & Susan Laub** (Lot J-9-1) questioned what could be done in the conservation easement area which runs behind their lot onto J-9-2. Where are the boundaries of the easement area? Mrs. Laub was concerned about how the ridge of the esker will be left at their boundary line after the excavation is done.

**Rich** answered the plan shows the current and the finish grade.

**Mr. & Mrs. David Thatcher** (Lot J-9) were concerned about the intensity of the operation and the amount of traffic it would generate. Mrs. Thatcher asked who monitors the excavation for conformance to the plan?

**Rich** answered the Board of Selectmen are the enforcement agents of the Town and would oversee the project. In order to guarantee the excavation is not infringing on the wetland setbacks, Rich asked if the buffer area could be flagged.

**Clarence** answered that he would do this.

**Joe** said in reading the RSA 155-E, it exempts the Town from zoning but not from reclamation requirements.

**Rich** said because of the concerns expressed tonight, some agreement should be reached regarding setting the hours of operation and establishing a time frame for the reclamation of excavated areas. He asked that Clarence and the Selectmen present a plan on which the boundaries of the non-disturbance area would be shown. He explained to those present that although by state statues this excavation is allowable, how it is to be done is within the planning board's jurisdiction. He suggested the PB table this discussion until a public hearing can be held with a more formal presentation. Notice of the hearing will be published in the Milford Cabinet, and direct abutters will be notified by certified mailing.

Others present asked why this excavation was being conducted. Did the town save money by not having to purchase gravel? How much of would be saved? What were the advantages?

**Clarence** answered it would cost \$3.00/c.y. for unprocessed gravel; and \$12.00/c.y. for processed gravel. So 40,000 c.y. of unprocessed gravel would cost \$120,000. He estimated it will cost the town \$1.50/c.y. to excavate the gravel; and .25 to .50/c.y. for reclamation. Processing equipment may be used when necessary (1 to 2 weeks of crushing over the 5 years), and it will be rented. He can process 1,000 c.y. per day, and 1 week's total of 5,000 c.y. is sufficient to last the Town for approximately 2 years. He said gravel was excavated from a ridge twice as high on lot J-10 across the street; and was used when building Parker Road and Averill Road. The lot was reclaimed, and the house where Mr. Ganos lives was then built.

**Conservation Chairman Ken Turkington** said he needs to be notified whenever a timber cut involves a lot such as J-9-2 on which there is a conservation easement to make sure no timber is cut in the easement area.

**Clarence** said the rock maples along the road will be left uncut. He is leveling the ridge beginning from the road in. All he has left to do this year is level the bankings that he has already cut.

Tentative date for a public hearing on excavation of Lot J-9-2 will be Thursday, October 20, 1994. Notice will be published.

**8:30 PM Wyman Rockwood Associates, Wildwood Heights/Elevations Subdivision, Lorden Lane, Case #192.**

Fire Engineer Scott Knowles was present to discuss placement of a stone wall surrounding the fire pond access lane. On the left (south) side of the fire pond, two large rocks prevent two fire trucks from setting up side by side as it was originally designed. He said snow removal would be hindered and would make the access even narrower. After discussion, Alan Lorden agreed to move the two rocks in question back to make the access wider. Scott said this would be acceptable.

**8:35 PM Superior Steel Fabricators, 46 Route 13 South, Lot J-19-**

Owner John de Martin was present for a compliance hearing on his non-residential site plan. He said the oil drums in back have been removed. Scrap steel material is piled and awaiting pickup. Fabrication is being done in back of the building. Unloading is still done outside until the new building is constructed, hopefully before this winter. He said the conservation easement has not been finalized, and before it is, he would like to have the easement area flagged so he can make sure none of the new driveway will be in the easement.

**Abutter Ann Anderson** asked if there was a time frame for completion. She noted the trucks are still backing out onto Route 13 in order to turn around.

Mr. de Martin said he will build the driveway at the same time he does the site excavation for the new building.

**Rich** said there is no completion date specified in the site plan regulations. Another year could go by without any improvements being made, but the issues of approval can't go forward until they have built the new building.

**Joe** said another compliance hearing may be required to ensure the project that was approved has been done. If not, a new site plan review may be required by the PB.

Mr. de Martin indicated he would be seeking to obtain a building permit as soon as possible.

- 8:50 PM **Discuss draft of proposed Driveway Ordinance.**  
PB members and Clarence discussed the 9/20/94 draft of the driveway ordinance. Clarence said the only thing he really wanted changed was the 10 feet of paved area to 15 feet (Section D. Requirements, #3). He explained it was necessary to protect the edge of pavement on the town roads. Since this is the amount specified in the driveway permit for all subdivisions, he felt the ordinance should be the same length. PB members also decided to change the following to read:  
**Section c. PERMIT AND PENALTY, #1. "Anyone desiring to alter, (delete repair) or relocate a driveway....."**
- 9:00 PM Rich made a motion to adjourn the meeting. Joe seconded the motion. Vote was in favor of adjournment 3-0.

**Note-Planning Board Meetings for October will be held on  
Thursday, October 6th and Thursday, October 20th.**

**PLANNING BOARD MEETING**

October 6, 1994

**PRESENT:** Peter Webb, Chairman, Voting (Arrived at 8:30 PM)  
Dennis LaBombard, Alternate, Voting for Rich  
Margaret Olson, Alternate, Voting for Joe  
Judy Cook, Selectmen's Representative, Voting  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**

**MOTION** Peter called the meeting to order. Minutes of the September 6, 1994 PB meeting were reviewed. On a motion by Peter, seconded by Dennis, it was voted to accept the minutes as written by a 3-0-1 Abstention vote (Judy absent from the 9/6/94 meeting). Minutes of the 9/20/94 meeting were tabled till a later date because a quorum of members present at that meeting were not at this meeting.

**7:40 PM Review of 1994 update of Capital Improvement Plan.**

Jeremy and PB members reviewed the 10/6/94 draft of the 1994 CIP. He noted the changes he had made to the original draft on his memos of 9/19/94 and 9/22/94. PB members were in agreement with the final draft of the plan, and complemented Jeremy on providing the document in a time frame which allows the finance committee and the selectmen to have it available prior to the finance committee budget hearings on the 1995 town budgets. Peter suggested we wait until the next PB meeting October 20th when more PB members will be present before the PB votes to accept the 1994 CIP.

**8:00 PM Planning Board 1995 Budget**

PB members review the 1994 budget with expenses shown through 9/30/94. After discussion, it was decided to increase the Consulting Services by \$1,000.00 to \$6,000.; to eliminate a CIP for 1995; and to increase notices from \$700 to \$900. Total proposed budget for 1995 **\$22,000.00.**

**8:30 PM Planning Board General Business**

a) Due to conflicting schedules, PB members did not set a definite date at this meeting for a site walk of James Monahan's Laurelcrest Drive. Road Inspector Dennis La Bombard said he had to items to report to the PB regarding road construction on Laurelcrest Drive.

- 1.) Next Monday (10/10/94) Mr. Monahan plans to haul excess sand from the site because there is no on-site use for as much sand as they found during road construction.
- 2.) Mr. Monahan wishes to be relieved from the requirement for placing crushed gravel beneath the base coat of asphalt. He would like permission to screen the on-site excavated gravel and use it instead of crushed gravel. Dennis felt this would provide an acceptable base of gravel, and he will inspect to make sure of the quality being used.

PB members agreed to both of these items.

- 3.) Planning Board reviewed Road Inspector Bill Duncklee's letter of 8/29/94 regarding some field changes in the road grade on Mountain Road being requested. PB members were in agreement with Bill's letter recommending these changes, and will respond to him.

9:20 PM Peter made a motion to adjourn the meeting. Dennis seconded the motion. Vote was in favor of adjournment 4-0.

**7:30 PM Planning Board Business Meeting**  
Chairman Peter Webb called the meeting to order.

**David & Theresa Santuccio, 58 Old Milford Road, Non-Residential Site Plan Review, Case #1994-C:F-22-3**  
Mr. & Mrs. Santuccio were present with a plan to convert 1 stall of a 2-stall attached garage into a beauty salon. Mr. Santuccio said he will replace the garage door with a window and a door. The septic system was designed for a 4 bedroom house. There are 3 bedrooms. A sign no larger than 2' X 2' will be put at the end of the driveway. The water supply from the well is adequate for both the house and the salon.  
**Peter** read the zoning definition of "Home Business", and asked how many employees there will be. Mrs. Santuccio said she will be the only employee. No more than 2 clients will be present at a time. There is adequate parking for 8 cars at the bottom of the 360'-long driveway.  
**Abutters comments:** No abutters were present.

**MOTION** Peter made a motion to accept the plan as presented. Rich seconded the motion. Motion to accept the plan 5-0 yes. Dennis checked the septic design to make sure the system would handle the proposed use. He found the septic system size adequate for the proposed usage (3 bedroom house needs- 450/gpd; and the hair salon- 150/gpd).

**Judy** said to make sure the sign is totally on their property and won't block sight distance onto Old Milford Road.  
**MOTION** Judy made a motion to approve the site plan presented. Rich seconded the motion. Affirmative 5-0 vote for the site plan.

**7:50 PM** Minutes of the October 6, 1994 PB meeting were reviewed.  
**MOTION** Peter moved to accept the minutes as written. Dennis seconded the motion. Vote to accept was 3-Yes, 0-No, 2-Abstentions (Rich and Joe not at the 10/6/94 meeting).

**MOTION** Minutes of the September 20, 1994 meeting were reviewed. On a motion by Peter, seconded by Judy, it was a vote of 3-Yes, 0-No, 2-Abstentions (Peter and Dennis not at the 9/20/94 meeting) to accept the minutes as written.

**8:00PM**      **Public Hearing-Gravel Excavation by the Town of Brookline from Lot J-9-2, Averill Road.** Peter Webb opened the public hearing and read the published legal notice. He asked Jeremy Ginsberg of the Nashua Regional Planning Commission to give background information on the Town's excavation of gravel from lot J-9-2 for use on town road construction and maintenance projects. **Jeremy** said the Board of Selectmen had sought Town Counsel William Drescher's opinion before allowing Road Agent Clarence Farwell to begin gravel excavation for the town's road maintenance and construction project on Mason Road. The selectmen said it was Mr. Drescher's opinion that under RSA 155-E:2,IV, a municipality could excavate gravel without a permit. A copy of the pit agreement and a reclamation plan must be on file with the regulator (PB) and comply with the town's gravel operation regulations.

**Selectman Bennett Chandler** was present. He said the Town was given mineral rights to excavate gravel from Lot J-9-2, and began excavating gravel to be used on Mason Road.

**Road Agent Clarence Farwell** said he had finished using the gravel for Mason Road, and had made an agreement to exchange bank run gravel for crushed gravel with Tam-Char, Inc. who is building the road in the Birch Hill Estates, II subdivision. The selectmen had agreed to the exchange, and Tam-Char would crush the gravel needed for next year's town road projects.

**8:05 PM**      At this time, Peter said there could be a conflict of interest with Judy, as a selectman, voting on this issue. Judy recused herself from the PB voting on the excavation public hearing. Voting members were: Peter Webb, Chairman; Rich Napolitano, Vice-chairman, Joe Kagenski, and Alternate Dennis La Bombard. **Jeremy** said the Selectmen had placed voluntary restrictions concerning operational times, stressing caution and traffic safety. (see attached letters of Oct. 11 and Oct. 12).

**Abutter's comments:**

**Abutter John Laub** (Lot J-9-1) asked where the gravel now being hauled was going, and was it being used on a town road project? He questioned the town's bartering of the gravel; and said that for 6 days, 5 different trucking companies had been hauling gravel from the site.

**Judy** answered that she had followed some of the trucks to Mountain Road. Mr Laub wanted to know if Mountain Road was a town road. Judy said the section of Mountain Road now under construction is not yet a town road.

**Peter Webb** asked if there is a genuine economic benefit for the town derived from this operation.

**Ben Chandler** answered that it would cost the town between \$20,000. and \$30,000. for the same amount of crushed gravel they have bartered for. To crush 4,000 cubic yards of gravel will require a crushing operation of 3-4 days.

**Abutter Susan Laub** said the level of noise from the gravel excavation over the last 6 days is not acceptable to her; and asked if the gravel crusher will be located on lot J-9-2.

**Ben** answered yes, the gravel will be crushed on site. This will save the cost of hauling the gravel from the site to a crusher and back again.

Pat Smith of 63 Cleveland Hill Road asked if Peter would read the 2 letters sent to Clarence Farwell from the selectmen. Peter read the Oct. 11th and Oct 12th letters to the audience. Pat stated that she had spoken to one of the school bus drivers who was nearly involved in two separate accidents in front of the pit location. Pat questioned why the hours of operation had been changed and included those times when the school buses were operating?

**Judy** answered that the selectmen had set the initial time of operation until the PB could meet and establish hours of operation, taking into consideration the school bus schedule.

**Abutter J. Edwin Carter** asked if there were specific NH State regulations regarding permissible noise levels for excavation operations within a residential area? **Peter** said he was not aware of any state laws regarding decibel levels.

**Rich** said Clarence had said the frequency of rock crushing would only be 2-3 days per year over the next five years. Resident John Ganos of Averill Road said he had met with the selectmen and he had attended the Sept. 20th PB meeting. He reiterated that many people were unaware that this operation was going to be done. He questioned the town's need to conduct the gravel operation, and said the public's view was that the bartering of goods to a private company was not in the spirit of the regulation allowing the town's exemption from its zoning ordinance which prohibits excavation in a residential zone.

**Ben** and **Judy** explained that the exchange was a one-time agreement. No gravel is being sold, and the exchange of gravel for the crushing service was sanctioned by the selectmen in order to save tax dollars.

Mr. Carter asked if the crushing could be done at some other location. He said he and other abutters have real concerns regarding dust, traffic safety, hours of operation, and noise level. He said the PB should take into consideration the rights of the abutters and their concerns when regulating this operation. He restated his belief that there are state standards of noise levels which the PB should look into.

**Peter** then said he questioned whether the selectmen had the authority to enter into an exchange agreement.

Abutter John Laub said that after attending the Sept. 20th PB meeting, people were led to believe the gravel excavation was finished for this year. Then, beginning on October 10th, for the next 6 days between 200 and 250 loads of gravel were removed from the site.

John Ganos said bad feelings were caused by this, and there have been no assurances given to the residents that the town's excavation regulations have been followed.

- 8:35 PM** **Peter Webb** then referenced State Statute 155-E-2, IV. It was his opinion the town has to follow Sections a), b) and c) of this statute. He felt the town would need a variance from the ZBA in order to excavate gravel in a residential zone under Brookline's local zoning ordinance.
- Judy Cook** said town counsel had been consulted, and it was his opinion that the town would only be required to adhere to the excavation reclamation regulations.
- At this time, **Rich** suggested we table this hearing and seek a written opinion from town counsel regarding this issue.
- Joe** wanted the hearing adjourned rather than tabled so that if a new hearing is held, a public notice is published and direct abutters will again be notified by certified mail.
- Peter** said the gravel operation should be closed pending a written legal opinion from town counsel. If the determination is that the town needs a ZBA variance, the PB will have to wait for the ZBA's decision before acting upon operational and reclamation requirements.
- Judy** said the selectmen will ask Clarence to clean up the area that has been disturbed. She suggested having a joint meeting between the selectmen, planning board and town counsel.
- Peter** said he is uncomfortable with Mr. Drescher representing both the Selectmen (as applicants) and the Planning Board (as regulator). **Joe** said he is not opposed to such a meeting.
- 8:47 PM** **Peter** said no further excavation will be done at this site until the legal problem is resolved. He made a motion to postpone this hearing till a later date. **Rich** seconded the motion. No vote was taken. Clarence asked to poll the PB members.
- MOTION** **Joe** then amended the motion to adjourn this hearing to ensure that abutters are notified by certified mail and the hearing will be posted with a legal notice. **Peter** seconded the amended motion. Vote taken was 4-0 yes to adjourn this hearing pending a written opinion from town counsel.
- 8:55 PM** **James Monahan, Laurelcrest Drive, Subdivision Case #1993-7.** Mr. Monahan was present to inform the PB that he has sold the entire subdivision project to Starter Homes, Inc. He has retained the open space which will be dedicated to the Town of Brookline; and he will completely construct the road. It is his intention to have the entire road finished with the base coat, all culverts, ditch lines, fire pond (with access road cut in), and bounds in place this fall. He was delayed in getting state permits; and then ran into a large sand deposit in the area of the access into the open space area. This sand has to be removed from the site, and has delayed construction of the road. He asked PB permission to allow building permits to be drawn on the two ends of Laurelcrest Drive when they are at the subgrade level. He will bond for the completion of the entire road which he intends to have finished this year. He will bond the road and not place the finish coat for another 3 years, when home construction on the lots has been finished.

**Dennis** said this would create 2 dead-end roads, and would create a safety problem for emergency services.

Mr. Monahan said the road base will support all emergency vehicles, and the access road for fire pond will be in. He does not foresee a problem with access for the entire roadway.

**Joe** said the PB's requirement for a through road from Wallace Brook Road to Route 13 had been an issue when previously discussing the development of land adjoining the Wallace Brook subdivision. The PB has a 1,200 foot limit to single-ended roads for safety issues to access those houses furthest in.

**Peter** said if the road were completely bonded it would be a non-issue, with the Town being able to call the bond and finish the road if need be.

**Clarence** suggested the entire road be plowed this winter.

**Judy** asked if they would be getting building permits this year for any of the lots?

Mr. Monahan said they would probably begin building from the Route 13 end at Sta 36+50 to approximately the end of lots J-39-8 and J-39-41. At the Wallace Brook end, down to Sta 60+0 (lots J-39-30 and J-39-16). He asked to come back to the PB next month to report on the road construction, and to have an estimate amount for the road's completion in order to set a bond amount.

9:22 PM

**Mark Howarth, Fine Lines Auto Body, 194 Route 13 North, Lot C-38.** Mark was present to informally discuss a proposal to replace an existing shed and a tent with 2 new buildings. In order to do this, he would need to get a variance from the 30' rear setback (toward Quimby Road). He had pictures of the site, and said the new buildings would be much neater in appearance than the temporary structures he uses to shelter cars while they are being painted. He would have adequate parking, and would not reduce the front setback onto Route 13.

**Jeremy** said he had met on-site with Mark this morning. The triangular shape of the lot makes it difficult to develop. Jeremy noted that Fine Lines has maintained 2-30 foot setbacks, one on the front and one on the back. If a variance could be obtained for the rear setback, the proposed buildings could be added and both of the tent structures could be eliminated. There would be no increase in the number of employees and septic requirements.

**Dennis** reviewed the proposed plan and noted that the existing septic system would have to be moved to put in a new building because of the state requirement that the septic be a minimum of 5 feet from a building without a basement and underdrains.

**Rich** asked if the proposal conformed with the site coverage requirements in the non-residential regulations.

**Jeremy** said it would conform. Everything is out of the right-of way; and Mark has just worked with the State regarding 2 driveway permits.

Joe asked about a visual buffer along Route 13.

Mark said he wanted to plant trees, but the state said no because it would be a site barrier to traffic on Route 13.

Peter said the plan is generally favorable with the PB. He said Mark should first apply to the ZBA for a variance, and if granted return to the PB for the site plan review.

**9:50 PM Planning Board Business Meeting**

**c) Site Walk for Laurelcrest Drive-** PB members scheduled a site walk for **Sunday, October 30, 1994 at 2:00 PM.** Members to meet at the Wallace Brook End, next to Joe Kagenski's house.

**MOTION**

**d)** On a motion made by Dennis and seconded by Peter, PB members voted 5-0 to accept the 1994 update of the Capital Improvements Program. PB members thanked Jeremy for his hard work in preparing this document to be presented to the Board of Selectmen and the Finance Committee in time for the budget hearings in November.

**e) Review Site Plan Regulation Changes-** It was decided to table this item till the next meeting.

**9:55 PM  
MOTION**

Dennis made a motion to adjourn the meeting. Judy seconded this motion for adjournment. Vote was 5-0 to adjourn.

Re: Gravel Operation, J-9-2, Averill Road

Dear Clarence:

Until the planning board acts to set hours of operation and/or operating procedures, the following rules are to be in effect for the gravel operation at lot J-9-2 on Averill Road:

1. General hours of pit operations shall be Monday through Friday from 8:00 a.m. to 5:00 p.m.
2. Gravel trucks are permitted on Averill Road and Cleveland Hill Road Monday through Friday only between the hours of 8:30 a.m. until 2:30 p.m. and 4:00-5:00 p.m.
3. No crushing.

Very truly yours,

**7:30 PM Planning Board Business Meeting**  
Chairman Peter Webb called the meeting to order. Minutes of the October 20, 1994 PB meeting were reviewed. Amend Page 4, Line 1, to read: "**Peter said "Attorney Drescher is mistaken in his interpretation that the Town is exempt from its zoning as regards the gravel operation in a residential zone." He then referenced.....**" Peter made a motion to accept the minutes as amended. Dennis seconded the motion. Vote to accept the minutes as amended 4-0. (Joe not present)

**MOTION**

**7:45 PM Bob Bourassa, Talbot-Taylor Estates Partnership.** Bob was present to discuss with PB members acceptance of the second phase of Taylor Road. He had spoken with Road Inspector Bill Duncklee and Road Agent Clarence Farwell. Given the time of year both felt it would be better not to put down the second coat this fall. Bob asked if the road could be accepted by the town if everything but the second coat of asphalt was done this fall, and a bond was in place for the paving. He said any damage to the road during construction of houses would be repaired before the final coat of pavement was placed. The end result should be a much better road surface.  
**Dennis** said he was uncomfortable with town acceptance of the road until the road was entirely complete. Margaret agreed with Dennis. **Judy** pointed out that school buses would not pick up children on unaccepted roads; and the Post Office would not deliver mail until the town accepted the road.  
**Dennis** asked how the town would be protected against future road construction price increases, particularly in the event that an inadequate amount of bond was being held?  
**Margaret** said the PB has not in the past followed a policy of requiring all houses to be built before the top coat of paving

was done. She said she was not sure we could require all lots to be sold and built on in a specific time period; and she did not favor holding a bond for an indeterminate length of time. **Judy** said she thought the town would have less problems with road damage using this alternative method. She cited problems on Captain Seaver Road which had been damaged, and finally resulted in the top coat having to be patched.

**Margaret** said this is a new bond approach and the PB should look carefully into implementing it. She felt there should be a definite time limit set for the road completion. The bond should be adequate to cover any cost increases; and the PB should periodically review the bond with the ability to make adjustments, when needed, to the amount of bond being held.

**Judy** said it would only apply to the top coat of pavement. All other items associated with the road should be complete.

**MOTION**

**Margaret** made a motion to accept a finding that "PB members after some discussion found that in general the Town is better served by accepting roads prior to the final application of the top coat, with bonding for the top coat provided; rather than requiring developers to complete the road prior to acceptance. This will minimize damage to the road during house construction by allowing developers to receive benefits of having an accepted road as house construction proceeds. Only the top coat will be bonded in this manner. Depending on circumstances, the top coat bond will be for 1 year and extended by the PB on the recommendation of the road inspector and the road agent." **Judy** seconded the motion to accept this finding. Vote was 2-Yes (Judy and Margaret); and 3-No (Joe, Peter, and Dennis) Motion failed.

**8:25 PM**

**Review & Discuss proposed Site Plan Regulation changes**

**Judy** said in **Section 4.6.06, a)** There should be a statement added regarding the method of planting so that adequate space is left to accommodate both the root structure and canopy of those trees planted in the parking lot areas.

**Joe** said there should be wording added to ensure maintenance of the trees and shrubbery planted in the landscaped areas.

**Section 4.6.07**-change to read: "**Peripheral landscaping may be required along .....**" It was decided that existing trees may be used if they are of an adequate size and type.

**Jeremy** will make the suggested changes to the proposed site plan regulation changes. PB members decided to hold the public hearing on Tuesday, December 6, 1994.

**8:45 PM**

**Proposed Zoning Changes for March 1995 Town Meeting**

**Jeremy** said the driveway ordinance draft is ready for public hearing. He said he will be checking with **Bill Drescher** on the street numbering ordinance to see if it can be adopted by the selectmen after a public hearing; or if it has to be added to the zoning ordinance; or if it becomes part of the building

code. He has reviewed with Wes Whittier all the information regarding establishing a street numbering system for Brookline, to be used in conjunction with the enhanced 911 Emergency System which will be operational in 1995.

PB members reviewed the schedule for the required public hearing dates on zoning changes. It was decided to hold the first public hearing on Tuesday, December 6, 1994. This will allow for the possibility of 3 public hearing dates, if needed, before the deadline of February 6, 1995.

**9:00 PM Review Data for Article XVI, Growth Management Ordinance.**

Jeremy passed out copies of a memo regarding the growth ordinance. His data included the number of building permits issued through 10/31/94 (28) for new homes. He and PB members discussed his conclusions and recommendations for 1995. PB members felt that a public hearing date should be scheduled for the annual review of the ordinance. It was decided to hold this on Tuesday, December 6, 1994.

**9:15 PM Laurelcrest Drive site walk**

Dennis, Joe and Peter met on Sunday, October 30th, and reviewed the construction progress of Laurelcrest Drive. Margaret had been to the site at another time, and said the area of the wildlife crossing was wet and was not what she had anticipated it would be. Joe said the stump dump area was less than he thought it would be, unless there are more stumps to be moved there. He said that the Hollis Construction truck traffic was exiting out onto Wallace Brook Road, making a loop in (from Route 13) and out of the site while removing the excess sand. He said it was the PB's requirement that the road construction vehicles entered and exited from Route 13. Dennis said he will speak to the construction crew who may be unaware of this restriction.

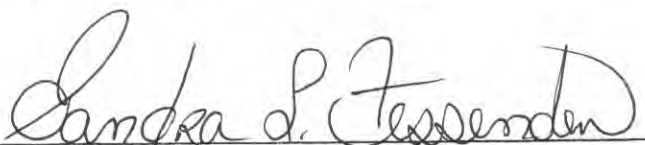

PB discussed some of the items they need to review with Mr. Monahan at the November 15th meeting:

- 1) The road easement across the Bagley property (J-41)
- 2) Conservation Easement
- 3) Open Space dedication
- 4) Fire Engineer's OK for the fire pond and access road.

**9:50 PM** Peter made a motion to adjourn the meeting. Joe seconded the motion. Vote was 5-0 yes to adjourn.

**Next Planning Board Meeting, Tuesday, November 15, 1994.**

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

*Debetman*

**PLANNING BOARD MEETING**

**September 6, 1994**

**PRESENT:** Peter Webb, Chairman, Voting (Arrived at 8:30 PM)  
Rich Napolitano, Vice-chairman, Chaired meeting  
Dennis LaBombard, Alternate, Voting for Rich  
Bob Chisholm, Alternate, Voting for Chris  
Margaret Olson, Alternate, Voting for Peter  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**  
Rich called the meeting to order. Minutes of the August 16, 1994 PB meeting were reviewed. On Page 1, 9:45 PM, Line 15, change to read: "**being 10 permits. Mr. Monahan then withdrew his plan for phasing.....**"

**MOTION** Dennis made a motion to accept the minutes as amended. Bob seconded the motion. Vote was 3-Yes, 0-No, 1 Abstention (Rich absent 8/16/94) to accept the minutes as amended.

**7:40 PM David & Theresa Santuccio, 58 Old Milford Road** were present to discuss plans to convert 1 stall in their garage to a hair salon for Mrs. Santuccio to operate a home business. Mr. Santuccio said they had designed the home and the septic system with this future use in mind. The septic system was designed for a 3 bedroom house and a 1 station hair salon (50 + gallons per minute capacity). Dennis said he would like to see the state septic approval. Rich said a formal non-residential site plan review should be done which would include notifying abutters, a copy of the septic design, state licenses, a sketch of the layout and the location and sign size. A public hearing will be scheduled for October 20th. Cost will be \$20.00 review fee, \$10.00 application fee, abutter mailing, and Jeremy's time.

**7:55 PM Daniel & Sandra Pelletier, Lot D-76, Route 13 North-**  
Mr. & Mrs. Pelletier met with PB members to discuss their new business located at Linda Holmes property. They are opening a wood and gas retail stove business. There will be no storage of fuel on site, and it is mainly a small inventory for display. There will be no warehousing. There will be 2 or 3 employees at peak times (Mr. & Mrs. Pelletier and a chimney sweep/repairman. The hours of operation will be 10:00 am till 5:00 pm (8:00 pm Thursdays) weekdays; 9:00 am to 5:00 pm Saturdays; and 12 noon till 5:00 pm Sundays. The only exterior change was done on the front (cultured stone) for cosmetic reasons.

Rich said a problem at this site has been the parking, with traffic spilling out into the state's right-of-way. Mr. & Mrs. Pelletier said they had been given a copy of the site plan which shows the approved parking areas. The new sign conforms to the ordinance, and they have checked with the state to make sure of the location for the setback. Margaret, Rich and Dennis all feel this is a better non-intensifying use of the site, and would not require a new site plan review at this time.

**8:10 PM Adoption of Brookline Planning Board By-laws update.**  
**MOTION** PB members reviewed the 9/6/94 draft of the planning board by-laws. Margaret made a motion to accept the Brookline Planning Board By-Laws dated 9/6/94. Dennis seconded the motion, which carried by a 4-0 yes vote.

**8:15 PM Site Plan Regulation Changes.**  
PB members reviewed the 9/6/94 draft of changes to the site plan regulations. It was suggested that 4.6.05 be changed to read: "**Parking areas shall be located between the rear or side of the principal structure. Parking.....**" Discussion focused on how to better phrase the landscaping and tree covering requirements. It could be worded to include "**with shade trees of two (2) inch diameter or eight (8) feet in height.**" It was also suggested that the existing section 4.7.08 of the site plan regulations be added to this section. **Section 4.9 Sidewalks**-Jeremy will check with the state to see about 4.9.02 (as regards right-of-way). It was decided to change 4.9.03 to read: "**The sidewalk's use and maintenance belong to the landowner.**" Section 4.9.04 change to read: "**....paved or gravel access ways shall be provided.....**"

**8:35 PM Proposed Zoning Ordinance Changes for March 1995 Town Meeting.**  
**a) Driveway Ordinance-** Jeremy handed out new revisions for PB to review. Road Agent Clarence Farwell and Building Inspector Wes Whittier have been given copies for their input. PB to further discuss this at the 9/20/94 meeting.  
**b)** Jeremy said he is checking to see about the street numbering system for the enhanced 911 system. It may be that a numbering requirement will be a part of the building code rather than a separate ordinance item.

**Planning Board General Business**

PB discussed briefly the problem being encountered by "future access roads" being used as driveways until the roads become built. It will be addressed at a later time.

Peter said he was still interested in exploring the concept of a town center survey and availability of elderly housing. A long range project may be to foster a new commercial area as well as a more central use of Main Street.

9:05 PM Dennis made a motion to adjourn the meeting. Joe seconded the motion. Vote was in favor of adjournment 5-0.

Brookline, NH 03033

**PLANNING BOARD MEETING**

November 15, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for Chris (arrived at  
9:15 PM)  
Margaret Olson, Alternate, Voting for Rich  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**

Chairman Peter Webb called the meeting to order. Minutes of the November 1, 1994 PB meeting were reviewed. Peter made a motion to accept the minutes as written. Judy seconded the motion. Vote was 4-0 yes.

**7:40 PM**

Peter told the other PB members present that Jeremy Ginsberg will be leaving the Nashua Regional Planning Commission to accept a new job in Darien Connecticut. Peter made a motion for the Brookline Planning Board members to publicly thank Jeremy for his patience, hard work, dedication and assistance to our board and other town boards over the last six and one half years. We formally thank him and wish him the best of luck in his new endeavor. He will be greatly missed. Margaret seconded the motion.

**MOTION**

Vote taken was 4-0 to draft a formal thank you to Jeremy.

**7:43 PM Road Bonding Discussion**

**a) James Monahan, Laurelcrest Drive-** Mr. Monahan was present to discuss a construction bond amount for Laurelcrest Drive. (Joe as an abutter recused himself) Joe asked what items are still left to do on the road.

Mr. Monahan listed the following outstanding items:

- 1) Final coat of asphalt is not done.
- 2) Seeding of the slopes will be done next spring.
- 3) Excess sand material-Sta. 36+50 to Sta. 62+00 is where fill is being removed. In another week he estimates half of the fill section will be done to grade. He will put the gravel on this section and then remove the other half of the sand. By Christmas, all the excess sand should be removed, and that section will be graveled. The road will be passable and will be plowable this winter. The base coat of asphalt will be put down next spring on this section.
- 4) Work will be started on the fire pond Monday 11/21/94.

- 5) Reclamation of the stump dump remains to be done.
- 6) Culverts are in except for 1 at the stump dump area.
- 7) Bounds are in on the Route 13 end. On 11/21/94 the remainder will be set on the Wallace Brook Rd. end.
- 8) Signs-street and stop signs will be ordered.

**Peter** asked about the conservation and open space easements. **Jeremy** asked if legal paperwork is forthcoming from the Bagleys for the portion of road that crosses their property. Mr. Monahan said he has a signed agreement with the Bagleys' attorney regarding the road. (see attached).

**Peter** asked about the access to John Edfors' land, Lot J-40 which does not have a defined access area across Lot J-39-47. Mr. Monahan said no deeded access now exists to this lot in any of the property deeds his attorneys have researched.

**Judy** read a portion of the 4/19/94 PB meeting minutes pertaining to Edfors' access (see attached). **Joe** said the Edfors have to have the ability to get onto their property.

Mr. Monahan said he has provided an ability for the Edfors to access their lot. They must negotiate with him as to a mutually agreeable access point from lot J-39-47 since he is not required to build an access road to their property line.

#### **New Concept of Road Acceptance**

**Peter** said he is open to the basic concept of having the road accepted by the town when all items are completed except for the top coat of asphalt, which must be bonded for.

Mr. Monahan said he will be bonding for the final coat of asphalt, with the bond to be reduced in the spring for the other outstanding items.

**Jeremy** suggested 2 bonds-1 a fixed bond for the second coat of paving and one for the other road construction items.

**Judy** said the bond for the top coat must be adequate to cover the cost of paving at a future date.

**Joe** said he would like "Private Road" signs placed per the regulations, since this is a private road. (PB members voted no to requiring "Private Road" signs.)

**Jeremy** asked if the making of a parking area next to lot J-56 as an off-site improvement has been done. The answer was yes. Mr. Monahan said Road Inspector Dennis La Bombard was working up estimates for the bond, and he had hoped Dennis would have them available for tonight's meeting.

- 9:20 PM b) **Bob Bourassa, Taylor Drive, Phase II**-Bob asked PB members if they have made a decision on the concept of road acceptance by the town for roads with only 1 coat of asphalt. He said there are 3 families living in the phase II area of Taylor Drive, and he would like to have the road accepted this fall. **Judy** and **Margaret** said they were in favor of the new concept. **Peter** said he is inclined to favor this new idea. **Judy** explained that school bus and mail delivery are unavailable to new homes until the road is accepted.

Road Agent Clarence Farwell was present, and was asked for his input on this new concept. Clarence said he doesn't totally agree with it because with only 1 coat of pavement damage is likely to occur from winter plowing. Clarence asked if all other items have been completed on Taylor Drive. He and Mr. Bourassa discussed some other items still remaining.

**Joe** made reference to the fact that the Town becomes liable for the road once it is accepted and open to public traffic. He noted there is construction debris left on Taylor Drive which can't be burned and should be removed. **Jeremy** said the town needs a written easement for the conservation area which is to be given to the town.

**Judy** said if the PB adopts this new concept of accepting roads the only thing that can be left to finish is the top coat of asphalt. It must be bonded for, and must have a definite date of completion specified in writing and approved by the PB.

**c) Alan Lorden, Steven Desmarais, Lorden Lane & Rockwood Road, Wildwood Heights/ "Elevations" subdivision.** Alan Lorden and Steve Desmarais were present to ask for road acceptance for Lorden Lane, Phase I (entrance off Route 13), and Rockwood Road, Phase II. He said there are 3 bounds to be placed and the top coat of pavement. Clarence in reviewing the plan noted that lot J-17-13 does not have 200' of paved road frontage. In order to get a building permit for this lot, they will have to bring the additional section of road up top the sub grade level and pave or bond for it. They want to get a bond amount set for the top coat so that they can get building permits for Lots J-17-13, -14, -15, -16. PB members agreed they will have to provide the required 200' of frontage for Lot J-17-13 before they can get a building permit. Steve said they don't as yet have a bond estimate from Road Inspector Bill Duncklee.

PB members said they would also need to have deeds for the roads to be accepted (first section of Lorden Land and for Rockwood Road); and they will need a bond estimate from Bill. Peter asked to have Bill at the 12/6/94 meeting to discuss road status.

Jeremy said he would recommend them getting 2 bond estimates- 1 for each phase.

**9:10 PM Bingham Lumber Co., Inc., Non-residential Site Plan Review N.R.S.P. Case #1994-E:H-90.** Don Bingham was present with a proposal to combine and expand an existing shed and building. He is expanding the sawmill and relocating the chip bin to make it larger and keep in under cover of a roof. He will be getting some additional equipment, but primarily it is the same operation with newer, more efficient equipment. The new saw makes less sawdust. They will get 10% to 15% more lumber per log. Don said the floor would be concrete with no drains. The saws are electrically powered with no oil or grease other than a lubricating oil. He will be adding new equipment-a re-saw, a board-edger and a chipper. There will be no change in

the hours of operation. There is no fuel exhaust (electric motors), less sawdust, and less noise even with another 6 saws running, because they will all be inside a building. He anticipates adding 4 or 5 more employees.

**Joe** asked about the existing septic system's capability. Don said they currently have portable toilets down back in the area of the sawmill; and permanent facilities in the office.

**Dennis** asked if it was a state approved system; and how many employees was it designed for?

Don said he has an approved septic design, but is unsure of its maximum capability. Originally he had 20 employees. There are now 42 (5 or 6 are in the office); but not all employees are on-site all the time (truck drivers often absent).

**Peter** asked if we have to determine the septic system issue for this site plan review? **Dennis** and **Joe** felt it was important to establish the existing septic system's capability if more employees were added and the business was increasing. Don asked if portable facilities would suffice until a new system could be built in the spring if necessary. PB members said conditional approval could be given with a compliance hearing for the septic scheduled as a follow-up.

9:30 PM  
MOTION

Peter made a motion to accept the plan as presented. Judy seconded the motion. Vote was 5-0 yes for plan acceptance.

Clarence asked if a conditional approval could be granted so building construction could begin this fall.

**Jeremy** said a building permit could be given with PB approval conditional for the septic issues.

**Joe** said a compliance hearing could be scheduled for either 6 or 9 months from now. This would allow time for an inspection of the existing septic design plans as well as an employee profile review. If the existing system is determined to be inadequate after reviewing the septic design, and the applicant agrees to make any change to the septic system necessary to comply with the current regulations; the PB could grant a conditional approval of the site plan.

9:35 PM

Judy made a motion to grant conditional approval to the Bingham site plan subject to the following:

- 1) On December 20, 1994 the applicant comes in with current septic plans and the number of employees.
- 2) Dennis will review the septic plans. If the system is in compliance with current state regulations, no further action is necessary. If the system is inadequate, a new state approved septic plan must be designed, and the new system must be built prior to the compliance hearing.
- 3) A compliance hearing will be scheduled 9 months from now (August 1995).

4) If the current septic system is inadequate, temporary portable toilet facilities will be installed until the new septic system is installed.

Peter seconded the motion. Vote was 4-Yes; 1-No (Margaret).

**9:50 PM** Alan Lorden and Steve Desmarais asked to readdress the PB. Alan said they need to be able to obtain building permits, and they were willing to post an additional \$40,000.00 bond with the town if this is acceptable to the PB. They will come back to the PB on 12/6/94 with a bond estimate. Steve says there is approximately \$4,000.00 left of work to do.

**MOTION** Margaret made a motion to accept a \$40,000.00 bond (letter of credit) for a 1 year time frame; with a letter from Road Inspector Bill Duncklee within 5 days from today agreeing to the amount. Permits will be allowed for lots in Phase II- J-17-14, J-17-15, and J-17-16. A building permit for lot J-17-13 will not be forthcoming until there is 200' of road frontage at sub grade level for this lot. Judy seconded the motion. Vote was 5-0 yes to accept the bonding agreement.

**10:00 PM** Jim Monahan asked to readdress the PB. He asked Dennis if he had worked out an estimate for his road bond. **Dennis** answered that he had an indeterminate amount of earth removal to factor into the estimate. Mr. Monahan said that there were 20,000 cu./yds. to be removed. Dennis said he had not been provided with the total calculations of earth materials by Meridian Land Services so that he could determine the amount remaining which must still be removed.

**Margaret** said the problem tonight is that figures aren't available to Dennis in order for him to make an accurate bond estimate for the remaining road work. **Peter** said the PB needs a responsible number to require for the bond.

**Jeremy** asked if the PB could defer to Dennis's opinion of an adequate estimate amount as a condition to setting the bond?

**Peter** questioned the time frame and if the information exists. **MOTION** Peter then made a motion to delegate to Dennis, if he agrees, the task of determining what percentage of road construction is now complete. Dennis will then factor a dollar value for completion of the road to be used as a bond estimate. An irrevocable letter of credit will be drafted for completion of Laurelcrest Drive for a 1 year period in the amount which is set by Dennis. (Dennis indicated this is agreeable to him). **Judy** seconded the motion. Affirmative vote was 4-0-1- Abstention (Dennis).

**10:20 PM** **Planning Board General Business**  
**Town Roads to be Accepted- 1) Hillside Drive Extension**  
Road Agent Clarence Farwell was present to report on the work he has done to Hillside Drive Extension this fall. He spent approximately \$1,500. of the \$3,000. escrowed amount to fix the road surface. He would like the town to retain the

remaining \$1,500. until next spring to rebuild the corner if necessary. He placed 30 tons of hot top to the 200' area in question, but feels this area may settle even more. He would like to re-evaluate this in the spring after another winter season to see if more defects in the pavement will develop.

PB noted that there is a maintenance bond on this project until 8/1/95. Road Inspector Dennis La Bombard will inspect the project to see that all the work has been completed prior to having the town accept the road.

10:25 PM 2) **Mosher Drive-** Road Inspector Dennis La Bombard had submitted a report indicating that all outstanding items have been completed on Mosher Drive. Clarence agreed. Deeds and as-built road plans have been filed with the town.

**MOTION** **Judy** made a motion to recommend to the Board of Selectmen that Mosher Drive be accepted as a town road; and that the construction bond be converted to a 2 year maintenance bond to be in effect until November 30, 1996. Margaret seconded the motion. Vote cast was 5-0 yes.

**Growth Ordinance data-** Jeremy passed out copies of a memo regarding his interpretation of the growth ordinance. He noted that the PB public hearing to determine the growth rate for 1995 will be held on December 6, 1994. He will also prepare the drafts of the proposed driveway ordinance and site plan regulation changes which will also be discussed at the 12/6/94 public hearing.

**ZBA hearing, Fine Lines Auto Body-** Joe reported that the ZBA held a hearing on November 9, 1994 which resulted in granting a variance to allow construction of a building within the 30' setback on Quimby Road. He said the plan presented indicated that the existing office building was not within the required sideline setback. He believed the ZBA may have acted incorrectly based on the information presented at that public hearing. The previous site plan approved by the PB did not include the shed and portable tents which the new building is replacing. Joe reasoned the activities that took place in the sheds are an expansion of use on a non-conforming lot; and the applicant does not have permission from either the ZBA or the Planning Board to cover these activities. Mr. Howarth should have come before the ZBA before because the ZBA now incorrectly assumed he had approval to expand his non-conforming use by adding the tent structures.

Joe suggested that the PB may wish to consider appealing the ZBA's decision on granting the variance. He said the lot size was determined to be less than 80,000 sq. feet instead of the 1.43 acres the town records showed. PB members discussed the appeals option and decided that as a board they did not wish to appeal the ZBA decision. After all zoning issues have been resolved with the ZBA, the applicant will still have to meet with the PB for a non-residential site plan review.

PLANNING BOARD MEETING  
November 15, 1994 Page 7

11:15 PM Margaret made a motion to adjourn the meeting. Dennis  
MOTION seconded the motion. Vote was 5-0 yes to adjourn.

Next Planning Board Meeting, Tuesday, December 6, 1994.

Planning Board  
Town Hall  
Brookline, NH 03033

Dear Planning Board Members:

I represent John and Laurence Bagley, the Trustees of the J & L Realty Trust who are the owners of a parcel of land located in Brookline, New Hampshire on Route 13 consisting of approximately 40 acres. This property is shown on a subdivision plan of land relative to the Laurel Crest Drive Subdivision entitled "Subdivison Plan of Land prepared for James B. Monahan, Brookline, NH" dated 3/22/94.

In accordance with your request, this is to advise you that the Trustees of the J & L Realty Trust and James B. Monahan, the owner of the parcels of land shown on said subdivision plan have executed a written agreement providing for the construction of a subdiddivision road to be known as Laurel Crest Drive to extend across James B. Monahan's land and J & L Realty Trust land from Wallace Brook Road to Townsend Road (Route 13).

Very truly yours,

April H. Babbitt

\ahb

cc. Mr. John Bagley  
Mr. Laurence Bagley

Made Part of the Nov. 15, 1994 PB minutes

(JCF)

on any wetland areas. Two stump dump areas have been shown on lot J-39 behind J-39-16 and J-39-15 on the back side of the knoll where gravel is to be taken for road construction. The new grade is to remain close to the existing grade. Land dedicated to open space are lots J-39, J-39-45, and J-39-46. By using the open space development concept, the design eliminates longer deeper lots and keeps construction closer to the road. The fire pond is shown on lot J-39 above lot J-39-46 (designated wildlife corridor). Ownership of the open space will either be conveyed to the owners of the lots in common ownership, or to the Town of Brookline. Peter said the PB had discussed having the pond come under the control of the Town of Brookline with some restrictions to be put in place for the type of use of the area.

**Abutters Comments:** Michael Beck asked if by owning the pond the town would increase everyone else's property tax?

Rich answered there should be no impact tax-wise on anyone else because buildable lots have a certain value according to information given the PB by the board of assessors.

Rick Van Deusen asked if there would be a buffer area along the pond and the area of gravel removal. He also wanted to know if a fence around the fire pond in the vicinity of the wildlife corridor would inhibit wildlife from using the crossing. Jim answered there would be a 100 foot setback limit- or no disturbance area around the pond. He said it would be very difficult to ascertain whether wildlife will continue crossing into the Townsend State Forest along the designated corridor, or would use other areas.

Russ Heinselman said the applicants should discuss with the fire engineers what they would recommend for fire protection for this subdivision. He noted there is already a fire pond in the Wallace Brook subdivision.

Rich asked if they could calculate the amount of gravel to be removed and make it a part of the plan. Jim said they will, and they will flag a line as a barrier limit. He said they were willing to include a no disturbance easement on the recording plan.

Michael Beck asked if this subdivision would be restricted as to how many lots could be developed per year. Could they be required to use Route 13 instead of Averill Road during the road construction period?

Randy said this subdivision comes under the new Growth Management Ordinance. Using Route 13 had been suggested by the PB, but they weren't restricted from using Averill Road.

Peter asked who owned the land at the Route 13 entrance.

Jim said John & Lawrence Bagley own lot J-41 and have agreed to permit a portion to be used for the road.

Peter said a written legal agreement would be needed giving rights to create the road as shown on the subdivision plan. He asked about the access to the Edfors' lot (J-40).

Jim said the applicant would retain ownership of lot J-39-47, the strip between the road and lot J-40. The Edfors would have access to their land anywhere along this strip. Rich said it has been PB policy to require access for lots such as the Edfors' so they don't become landlocked. Jim said they will have access to the lot, but there is an issue of grading to their property line to be considered. Peter said it appears that J-40 was becoming landlocked by this plan. He wants to be assured that some means of access is provided to lot J-40. He inquired about the Route 13 and new subdivision road intersection. Has state approval been granted? What is the speed limit on Route 13 at this intersection (55 mph)? Would a turning lane be beneficial? Randy said the N.H. Dept. of Transportation will make the determination regarding a turning lane. Permits have been applied for the intersection at Route 13 and for a wetlands crossing. The grade of the road at the intersection is low. Conservation Commission Chairman Ken Turkington asked if there would be an advantage to placing a box culvert under the road to provide a crossing for smaller animals in the wildlife corridor (lot J-39-46). Peter said this question should be posed to wildlife specialist Ellen Synder who has visited the site. He felt some guidance from her is needed to establish whether the PB should require this added cost for the applicant. Abutter Kathy Axel asked if the configuration of lots J-39-22 and J-39-23 provide enough buildable area on them. Jim answered that lot #22 was 2.2 Acres. The brook crossed over the back side it. The middle was large enough for the house, well, and septic. Lot #23 has 1.7 Acres, and the location of the house was shown toward the rear of the lot, but there was flexibility of location on this lot. Rich said the issue of well and septic locations become more stringent with open space development design. His concern was sighting the wells too close to the septic systems. Several abutters asked about the open space toward Hillside Drive (lot J-39-45). What would be done with it? Would the new road be a scenic road? Would there be underground utilities? Jim said overhead utilities are planned. Peter said the regulations require use of the open space to be of low impact. He said the town would have to vote at town meeting on the scenic road issue. Jim said the land's topography would not lend itself to much development because of its steepness. Peter said he would prefer not to have the road clear-cut back from the edge in a wide swath. Jim said that the cut would have to be at least 50 feet wide. The soils lend themselves to erosion, and they will have to clear back in the areas of drainage. Randy said the road profile the plan shows the limit of the cut. They can have it flagged on the ground as well.

*Selectmen*

**PLANNING BOARD MEETING**

November 22, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Rich Napolitano, Vice chairman, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for Joe  
Sandra Fessenden, PB Secretary

**7:00 PM Non-public Session**

PB members met with Selectmen Russ Heinselman and Ben Chandler and Town Counsel William Drescher in a non-public session.

**8:30 PM Planning Board Business Meeting**

Chairman Peter Webb called the meeting to order.

1) PB members reviewed the drafts of the driveway ordinance and site plan regulation changes; and growth management ordinance data for the public hearing 12/6/94. PB members discussed the 2 memos Jeremy had written regarding the number of building permits for 1995; and how to distribute unused 1994 building permits.

2) PB secretary reported that she had spoken with town counsel regarding a street numbering ordinance. According to Mr. Drescher a street numbering regulation can be passed by an act of the selectmen after a public hearing under RSA 131:133-a. Therefore, an zoning ordinance amendment is not necessary.

3) Road Acceptance, Hillside Drive Extension-PB secretary said she had spoken with Russ Heinselman regarding selectmen's minutes of their meeting with Tom Enright and Clarence when the escrow account was set up for road repairs and completion items to Hillside Drive. Dennis has done an inspection and submitted his report. PB members agreed that Hillside Drive can be recommended for town road acceptance; and that with a maintenance bond in place until 8/1/95, any further defects to the road can be corrected with the bond. It was suggested Clarence talk to the selectmen about retaining the remaining amount in the escrow account until next spring.

**PLANNING BOARD MEETING**  
**November 22, 1994 Page 2**

**9:25 PM** Rich made a motion to adjourn the meeting. Dennis seconded  
**MOTION** the motion. Vote was 4-0 to adjourn.

**Next Planning Board Meeting, Tuesday, December 6, 1994.**

MINUTES  
BROOKLINE PLANNING BOARD  
TUESDAY, DECEMBER 6, 1994

PRESENT: Chairman Peter Webb, Voting  
Vice Chairman Rich Napolitano, Voting  
Alternate Dennis LaBombard, Voting  
Selectmen's Representative Judy Cook, Voting  
Alternate Margaret Olson, Voting  
Alternate Bob Sykes

Also present from Nashua Regional Planning Commission were Executive Director Don Zizzi, Jeremy Ginsberg and Gregg Gaines.

Don Zizzi introduced Gregg Gaines as Jeremy's replacement for Brookline as of next week. Jeremy has worked with our planning board for over six years; the Board expressed their appreciation with gifts and a round of applause. Judy said she feels Brookline has gotten out of the reacting stage and into the planning stage with Jeremy's help. Don said Gregg has been with NRPC for about one year and has been involved in transportation issues.

**LORDEN LANE - ELEVATIONS SUBDIVISION**

Fire Chief Charlie Corey said the first fire pond at the bottom of Lorden Lane near Route 13 is about 2,600' from the furthest lot in the Elevations subdivision. He doesn't feel it's necessary to build the second fire pond as they have 3,000' of hose and it would save future maintenance costs. The planning board agreed to eliminate the second fire pond.

**MOUNTAIN ROAD**

Charlie said he had tried the catch basin on Mountain Road and it works well; he would like a post 4' from the catch basin so it can be located in the winter.

**APPROVAL OF MINUTES**

**November 15, 1994** - Peter moved, seconded by Dennis to approve the minutes as written. Unanimously voted yes.

**November 22, 1994** - Rich moved, seconded by Peter to approve the minutes as written. Unanimously voted yes.

MINUTES  
BROOKLINE PLANNING BOARD  
TUESDAY, DECEMBER 6, 1994, Pg. 2

**PUBLIC HEARING - PROPOSED ZONING ORDINANCES**

**Driveway Ordinance**

Jeremy explained the proposed ordinance is similar to what's required in the subdivision regulations in that on a paved road, 15' of the driveway would have to be paved to keep the edge of the pavement from eroding. The ordinance would apply to all driveways in town. If the driveway were built during the winter, they would not be required to pave the 15' until spring.

Rich asked what constitutes a "temporary" certificate of occupancy; Building Inspector Wes Whittier said safety issues would have to be complete, but items such as paving don't have to be done.

Peter noted the ordinance refers to a driveway inspector; Margaret said she feels it would be anyone the town designates as the inspector.

Clarence said the idea is to protect the town right-of-way. Conservation Commission Chairman Ken Turkington asked if there was a hole in the road by a driveway, would Clarence fix it or the property owner. Clarence said if it were an elderly person who was unable to fix it, he would probably repair it.

A minor change will be made under the Grandfather Clause that existing driveways are exempt from this ordinance.

Margaret moved, seconded by Judy to accept the proposed driveway ordinance as written. Voted yes 4-1 with Rich against the motion.

**Growth Ordinance**

Margaret asked if the number of 10 building permits has changed; it was noted there was no change.

Judy said she was comfortable with 10. Rich, Peter and Bob agreed. Peter asked the number of building lots. It was noted Laurelcrest has a total of 44 and P & C has 5.

Wes said as of the end of November, 32 new homes have been built this year. Of the 32, 14 have been on Mountain Road which was allowed 27 permits; 6 in Talbot-Taylor which was allowed 8; and 2 in Elevations which was allowed 7.

Peter asked about carryovers; of the three subdivisions named above that are phased in, 20 permits haven't been used. The number allowed in 1995 is 37, plus the carryover of 20, plus 10 would equal 67 for 1995.

Clarence asked if there were any restrictions for existing lots; the answer was no.

Wes reported 2 applications have just been received for the Laurelcrest subdivision. He said it's traditional to issue a 6 month extension if the foundation hasn't been started in the first 6 months. Margaret said she felt the carryover would be 8 if no more applications come in, plus 10 for 1995 would exceed the maximum number. Rich said we weren't trying to achieve a 3% growth rate but limit the number to 3%.

MINUTES  
BROOKLINE PLANNING BOARD  
TUESDAY, DECEMBER 6, 1994, Pg. 3

Judy said we need to decide tonight what the number is for next year. Jeremy noted the ordinance said we can carryover to the next year; the Board needs to decide if we will carryover.

Rich moved, seconded by Peter to approve 10 building permits for 1995 with no carryover for the balance not issued in 1994. Peter & Rich voted yes, Dennis, Judy and Margaret voted no. Motion defeated.

Margaret moved, seconded by Judy to approve 10 building permits for 1995, plus any remaining that haven't been issued in 1994 (carryover) for the new subdivisions. Voted yes 5-0.

Peter moved, seconded by Margaret to continue the growth ordinance for another year. Voted yes 5-0.

#### **Site Plan Regulations**

Proposal is to add off-street parking, landscaping, sidewalks and pedestrian access to the regulations. Clarence asked about section 4.60.05 that the parking shall be located to the rear or side of the structure and would that apply if he were building the bank now. Rich said this is a regulation and may be waived if not appropriate.

Margaret said her goal was to have the building close to the road to be seen and not have an acre of parking visible from the road. Judy said she was aiming toward having a nice looking building with a sign on the building and parking behind.

Clarence said he disagrees for security reasons. He also disagreed with section 4.9.03 that sidewalks shall be provided for access to the lots because you now have the problem of maintaining them.

Judy suggested adding a regulation on maintenance and upkeep of the sidewalks and access ways.

Margaret, Judy and Peter said they felt sidewalks are needed.

Clarence asked if Superior Steel would have to put sidewalks to build a third building; Peter noted they were an industrial use, not retail. Jeremy will work on the retail issue and will bring it forward to the next public hearing.

Dennis said he preferred parking in the rear. Margaret and Judy suggested leaving the proposed regulation as it is and the Board can waive the regulation if needed. Ended this discussion at 9:15 p.m.

MINUTES

BROOKLINE PLANNING BOARD

TUESDAY, DECEMBER 6, 1994, pg. 4

**TALBOT-TAYLOR ESTATES SUBDIVISION**

Bob Bourassa asked for the town to accept Taylor Drive. He said the guard rail is not in, no rear bounds, the road needs the top coat and about 200' of shoulder needs some loam and seed. Road Inspector Bill Duncklee submitted a letter stating \$49,930 should complete the project. Peter asked why the guard rail and rear bounds can't be done now. It was agreed Bob will finish these items and the selectmen will schedule the public hearing to accept the road.

**ELEVATIONS SUBDIVISION**

Alan Lorden and Steve Desmarais asked that the town accept Lorden Lane and Rockwood Road in Phase I and Phase II of the Elevations subdivision. Jeremy reported the items not completed from the last meeting was the top coat on Phase I and top coat and bounds on Phase II. Road Inspector Bill Duncklee submitted a letter stating the remaining work on Phase I is \$6,050 and Phase II is \$7,436. As the bond cannot go below 10% of the construction costs, Margaret moved, seconded by Rich to allow the bond to be lowered to \$25,000. Voted yes 5-0.

The meeting adjourned at 9:45 p.m.  
Submitted by Rena Duncklee.

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

**PLANNING BOARD MEETING**

December 20, 1994

**PRESENT:** Peter Webb, Chairman, Voting  
Russ Heinselman, Selectmen's Alternate, Voting  
Dennis La Bombard, Alternate, Voting for Joe  
Bob Chisholm, Alternate, Voting for Chris  
Margaret Olson, Alternate, Voting for Rich  
Greg Gaines, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**  
Chairman Peter Webb called the meeting to order. PB members reviewed the minutes of the December 6, 1994 meeting. Greg Gaines pointed out on Page 1, Lorden Lane, the minutes should be amended to add to line 6: **".....second fire pond. The Planning Board said the town would need a fire pond easement in lieu of the second fire pond."** PB members voted to amend page 4, Talbot-Taylor Estates Subdivision, to delete the last sentence beginning **"It was agreed Bob..."** and add new sentence to read: **"The Planning Board said to finish all the necessary items. Bob should come back to the Planning Board meeting on December 20th to further discuss road acceptance."**

**MOTION** Peter made a motion to accept the minutes as amended above. Dennis seconded the motion. Vote was 5-0 in the affirmative.

**7:40 PM Don Bingham, Bingham Lumber Co., Inc.** Don presented to PB members the approved design plans for the 2 septic systems he currently has. He said the 1973 approved plan for 18 people was located at the sawmill; and the 1976 approved plan for 18 people services the office building where 8 or 9 people work on a daily basis, for a total of 36 people. He also noted that he currently has portable service for the workers in the planer building area down in back. He has 40 employees, 6 of whom are drivers who are not on site during the day. **Dennis** reviewed the plans. He said by new NH State septic regulations these 2 systems would not handle 36 people. Today's regulations would require larger septic tanks and possibly larger leachfield areas. In terms of an expansion of the business, the question is whether the PB could require him

to add a new system; and whether the PB can grant site plan approval without knowing whether another system can be built at the same site.

Don said he is sure the soils (mostly sand) will support a new additional system which he would build in a different location, probably in the planer barn area.

**Dennis** said although Bingham's systems do not meet current regulations, he feels confident they could build a new system without problems. Don said he is willing to put in another new system in an area that will better serve his employees.

**Bob Chisholm** asked if Dennis could run the figures and calculate what they will need for current and expansion usage.

**Dennis** answered that the state will determine adequate septic design requirements based on the number of employees.

**Margaret** said PB approval could be granted contingent upon a new septic plan, approved by the state, and seen by the PB.

MOTION

Russ made a motion to grant non-residential site plan approval to Bingham Lumber for the proposed additions to the sawmill contingent upon the following:

- 1) **A septic design plan, approved by the State of NH W.S.P.C.C. which meets current town and state regulations designed for a minimum of 40 people.**
- 2) **System to be operational by August 1, 1995.**

Dennis seconded the motion. Vote was 5-0 yes to grant site plan approval conditional upon a new septic system being designed and installed by 8/1/95.

8:05 PM

**Non-residential Site Plan Review-Denise Dukelow, Denise's Daycare.** Mrs. Dukelow was present and said she is licensed by the state as a home-based day care for up to 6 children. Currently she cares for 3 children, two of whom are from the same family.

**Greg Gaines** outlined her proposed use, and said she basically meets the required checklist items. He asked about a sign. Mrs. Dukelow said she doesn't have or plan to have a sign. She presented a hand-drawn plan of the exterior of the house. The children's play area is to the side and rear of the house and utilizes the back entrance of a 3-season porch. The house has a finished playroom in the basement. She has passed state required safety checks done by the local health officer and fire chief. She showed PB members the septic design approved for a 2-bedroom house. There are 5 members in her family; and she takes care of 1 baby, 1 3-year old, and 1 5-year old.

**Dennis** said the septic design is sufficient for the residents' use, but is not sufficient for the additional daycare use. He noted that the PB has previously required proof that a site can support a larger system (Children's Creative Cottage) before granting approval of a site plan.

**Margaret** asked if it were possible to figure out what size would be necessary for use and make approval contingent upon a new system being installed.

Mrs. Dukelow said the children she currently cares for do not use the bathroom that much. One is in diapers. She has never had any problem with her septic system. She has operated the daycare for 9 years, and been licensed by the state 4 years.

**Dennis** said the state requires 10-15 gals/child/day.

**Russ** said he is supportive of looking at the site to see if the lot (2.3 Acres) would support a larger size system; and make the size a stipulation for a replacement system if it is necessary in the future to make a change.

**Dennis** said a 3-bedroom designed system would be more than adequate for residential use and the 6-child day care. This would allow for a maximum 150 gal/bedroom/day usage.

**Russ** said the house was in a recent subdivision (1983); and that subdivision approval testing for septic was probably calculated on a 4-bedroom house.

Mrs. Dukelow said there is adequate parking for 6 cars. There are usually no more than 2 in the driveway. Site distance on Mason Road is adequate to back cars out of the driveway.

MOTION

Margaret made a motion to accept the site plan as presented. Peter seconded the plan. 5-0 yes vote to accept the plan.

8:30 PM  
MOTION

Margaret made a motion to approve the non-residential site plan contingent upon the following requirement:

**When it becomes necessary to replace the existing septic system, the new approved system design shall be for a minimum 3-bedroom house (Currently 150/gal/day/bedroom).**

Russ seconded the motion. Vote was 5-0 to approve the plan.

8:30 PM

**Discussion of roads for acceptance by the selectmen.**

a) **Bob Bourassa**- Mr. Bourassa was not present for this meeting. Road Agent Clarence Farwell said he had recently visited the site and found that several items were still incomplete on Phase II of Taylor Drive. PB members discussed the need for all items to be finished other than the top coat of pavement before they would recommend road acceptance.

b) **Alan Lorden** was present to discuss Lorden Lane and Rockwood Road. He said the bounds have been set, and he will have the road deeds drawn up to present to the town. He said the seeding along the road edges has taken and the grass is now growing.

**Peter** asked if he has a final report from road inspector Bill Duncklee stating that all items are finished. Mr Lorden said he didn't. He will get in touch with Bill.

**Russ** said the selectmen have scheduled a public hearing on Thursday, December 29, 1994 at which time they will accept roads which are recommended by the PB and the road agent.

**Margaret** said the PB could delegate to the selectmen the duty to see that the road deeds and road inspector's report are presented to them prior to the public hearing.

**Peter** asked the amount of bond and what type-construction or maintenance bond- was the town holding for this project? PB members then discussed what type of bond should be required under this new system of recommending town acceptance of roads which have all items completed but the top coat placed at a later time after house construction has been completed.]

**Clarence** asked if any of the PB members had been up to Lorden Lane and Rockwood Road. Answer-No. No one had seen the roads recently. Clarence said he is concerned with settlement of the underlying road base which has resulted in some road bumps appearing at the top of the hill. Some work on the culverts may become necessary also because of the settling problem. Clarence said that he anticipates some changes to the road becoming evident after the winter. Mr. Lorden said he was aware of the problems at the top of the hill, and admitted that he was going to have to dig up and replace some of road in the area Clarence had mentioned.

Peter said he is concerned also with the underlying base soils and the problems with the engineering calculations during the subdivision review; and with the drainage problems during the initial road construction phase.

**Dennis** said he is opposed to the town's accepting any roads without the second coat of payment being in place. He sees it as a way for the developers to get the town to assume winter maintenance (snow plowing) costs.

**Russ** said he also feels the roads should be accepted only when they have been totally completed.

**Clarence** said some towns require 2 years of the developer maintaining the roads which don't have the top coat down.

**Russ** said he would not like to see the PB's policy of having the roads completed before acceptance changed because it could involve problems with the road bonding requirements also and lead to legal problems with the town owning the road and trying to enforce the developer's obligation to fund any road defects under the maintenance bond time frame.

8:50 PM  
MOTION

**Margaret** made a motion that the PB vote to recommend to the Board of Selectmen to accept Lorden Lane, Phase I and Rockwood Road contingent upon a letter from the road inspector saying the bounds are set, and the road deeds being presented to the town. The PB delegates to the Selectmen the authority to see that these requirements are met prior to the 12/29/94 public hearing to accept the roads.

Vote was 2-Yes (Peter and Margaret); 3-No (Dennis, Bob, and Russ) Motion was defeated.

The Planning Board will not recommend town acceptance of Lorden Lane and Rockwood Road at this time.

9:00 PM **David O'Hara** and attorney Bob Coakley representing the owner, O.T. Realty Trust, presented a conceptual open space concept design for Lot E-11. Dave said they had subdivided out 3 lots in 1988 from the 25.9 total lot. The existing lots have approved subdivision septic approval. He outlined the proposed lots in green, and said they would be serviced by a 1,150 foot road. They would not have to cross any wetlands to build the road as designed. They would be looking to have the PB grant a waiver of the minimum 35% open space required for open space development. The PB said this was a zoning issue, and could only be waived by the ZBA. They also wanted to know if they combined lots E-11-1, -2, and E-11-3 with E-11 (to gain the minimum acreage for open space development-20 acres), and re-subdivided the total, could they retain the rights to the building permits for those 3 lots under the growth ordinance because those lots were grand-fathered?  
PB members said they would lose the rights if they created new subdivision lots.  
Dave asked if they did a lot line adjustment to the 3 existing lots, would they lose building permit rights.  
**Dennis** and Bob said they had no problem with them doing a lot line adjustment plan and then a subdivision plan in order to retain the 3 building permits.  
**Peter** asked what open space goals would be served by this subdivision?  
**Russ** advised them that they must also design a conceptual conventional subdivision plan as a comparison-not just divide by the 80,000 sq. ft. minimum lot size.  
**Dennis** said they need a preliminary plan showing conventional subdivision. This sets the maximum number of lots they can get after taking out roads, slopes, and wet areas.  
**Margaret** said there were too many lots designed. She did not like the sharp bend as shown in the proposed road. It was not obvious to her that the land dedicated to open space will conform to both the ordinance and regulation requirements. PB members suggested they return when they have calculations and plans for both conventional and open space subdivision.

9:30 PM **Planning Board General Business**  
Margaret reported she is willing to draft a chart of the building permits granted yearly for the PB to use to calculate the number of building permits to allow under the growth management ordinance for the next year. PB members were supportive of her designing this type of chart to use.

Peter reported he had been told the McGraths on Spaulding Brook Road were operating a children's daycare, and asked if Russ (the Selectmen) could look into this for the PB.

Secretary reported she had spoken to Chris Hegarty regarding his membership on the Planning Board. Chris has been unable to attend many PB meetings because of business and family commitments. Chris would like to retain a position as an alternate.

PB members discussed who to appoint to the full member position. Margaret said although she would be willing to serve as a member, she was in favor of Dennis becoming a full member because of his technical knowledge which is very valuable to the PB.

Dennis said he was also interested in serving as a full member but pointed out that he also does private consulting work and would not like to compromise his position with the PB on any case, although he removes himself from voting on any issue that could be seen as a conflict of interest.

PB members were confident Dennis could serve in the position of Planning Board member, and will recommend to the Selectmen that he be appointed to fill out Chris's term of office.

**MOTION** Margaret made a motion to recommend Dennis La Bombard to the Board of Selectmen as a full Planning Board Member to replace Chris Hegarty. Bob seconded the motion. Vote cast was 4-0 in the affirmative; 1-Abstention (Dennis).

**9:35 PM** Russ made a motion to adjourn the meeting. Bob seconded the motion. Meeting was adjourned by a 5-0 yes vote.

Next Planning Board Meeting, Tuesday, January 3, 1995.

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

PLANNING BOARD MEETING

January 5, 1993

PRESENT: Peter Webb, Chairman, Voting  
Richard Napolitano, Vice Chairman, Voting  
Chris Hegarty, Voting  
Joe Kaganski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate  
Margaret Olson, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Peter called the meeting to order. Minutes of the December 15, 1992 PB meeting were reviewed. Peter made a motion to accept the minutes as written. Rich seconded the motion. Vote 4-0-1 Abstention (Joe absent from this meeting).

7:35 PM Road Issues  
1) Scabbard Mill Brook Road-Eddy Whitcomb had written a letter requesting the bond be reduced and the road accepted by the town at town meeting. Peter will contact Eddy. \*\*\*  
2) Lakin Road-Martin Ruggiero had requested the maintenance bond for Lakin Road be released based on Bill Duncklee's report dated 12/22/92. Judy made a motion to recommend to the selectmen that the maintenance bond be released. Rich seconded the motion. Vote 5-0 yes.

MOTION

MOTION

3) Maxwell Drive-On a motion by Joe seconded by Judy, it was voted 5-0 to recommend to the selectmen that the maintenance bond be released.  
4) Birch Hill Road, Phase I-Dennis had visited the site and reported a small area on Nightingale Road had developed potholes caused he thought by some buried boulders. He recommended that a small amount of money be withheld from the maintenance bond for repair of the paved area in the spring. He also noted that the silt fence should be fixed again in the spring; and that a stop sign had been knocked down. PB will ask Clarence to check into these items and give the PB an estimate of repair before the maintenance bond is released.

7:55 PM Rich said he had been looking into the feasibility of mailing out a flyer to all town residents regarding the proposed zoning changes for March town meeting. He found

out that it will be costly to do a bulk mailing. Peter said he personally would not like to spend a lot of money, and felt the PB should look for another method of getting information out to the town's people. It was suggested that an informational sheet might be placed in the Post Office, stores, and bank if possible. The majority of PB members said they would not like to expend funds to do a mailing.

7:58 PM 5) **Petersen Road**-Clarence Farwell was present to discuss the release of \$10,004.40 from the letter of credit to pay for the paving of Petersen Road. He asked the PB to consider lowering the bond below \$20,000.00 because the bank will not free up \$10,000. for the paving bill with a bond held for \$20,000.00. Clarence said the remaining items to be done on the project are the top coat of paving (\$6,000.00) and the cleanup. He also asked if the bank could issue the check to Continental Paving Co. Judy made a motion to recommend to the selectmen that the amount of the road construction bond be reduced by \$10,004.40; and the bond amount to be held is \$15,680.81. Rich seconded the motion. Vote 5-0 yes.

MOTION

8:05 PM **\*\*\*Scabbard Mill Brook**-(Eddy Whitcomb was now present) Peter asked what amount should be included in the bond to cover the reclamation of the gravel/loam area. Clarence said he estimated that \$1,200.00 would be sufficient. Judy asked that Eddy have the gravel/loam removed before the one year maintenance bond expired. Eddy said he should have all the loam and gravel removed by July 1, 1993.

MOTION

Peter made a motion to recommend to the board of selectmen that Scabbard Mill Brook Road be accepted by the town; and that the bond be changed from a construction bond to a maintenance bond in the amount of \$28,299.00. Judy seconded the motion. Yes vote 5-0 taken.

8:12 PM **Second Public Hearing on proposed changes to the Brookline Zoning and Land Use Ordinance.** Peter turned the meeting over to Jeremy Ginsberg of the Nashua Regional Planning Commission for explanation of the proposed changes. Jeremy explained that **Item #1** was a clerical change back to a previous 2 sentence wording. **Item #2-Accessory Dwelling Units**- Town resident Henry Anthony asked if "grandfathered" lots were subject to this new change. Judy answered yes, and that everyone must go to the ZBA for a special exception to create an accessory dwelling unit. James Krieger asked if this could apply to non-related persons such as a live-in nanny. Peter answered that this proposal does not limit the use of the A.C.U. to family members, but the item implies a non-commercial arrangement (no rent). There was discussion of the word "temporary" as applied to the special exception. Jeremy said "temporary" should be removed because the ZBA can't make the exception in terms of a specific occupant.

After some discussion, it was decided to change Section C, REQUIREMENTS, Paragraph 1, line 4 to read: "..... meets all of the following (Planning Board review is not required): " Russ Heinselman said the word "appearance " in Section C, #1 could cause an issue. It was decided to change #1 to read: ".....which does not alter the general appearance of the principal dwelling unit."

Rich said that he felt that this zoning change to allow Accessory Dwelling Units needed to have the following points clarified: 1) Add a statement about the rental situation.

2) Enforcement of the special exception- How does it get implemented by the Z.B.A.?

3) Further define "temporary" special exception

4) Add the wording "family unit" as defined in the zoning definition of family.

Rich said these 4 items needed to be addressed or the article establishing A.C.U.'s should be withdrawn.

Item #3-Definition of Family- No comments.

Item #4-Back lots-Change Article V., Section C.-Lot Requirements, #1- Frontage- add"" at least 200 feet of frontage; except for back lots."

Item #5-Open Space Development- Change last sentence of opening paragraph to read: ".....shall submit evidence at a public hearing to the Planning Board, documenting....."

Russ Heinselman felt the article as written is a mandate not an option to the developer. He understood it was intended to be an optional way to develop land. Peter said the PB's desire is to be able to have optional means of development. It was suggested that common wells and common septic systems be added to this article.

Item #6-Jeremy noted the following change should be added to 4-C-add to the sentence ".....the BOCA National Building Code, as recommended and maintained by the Building Officials and Code Administrators International, Inc. (1990) and CABO Building Codes (1992) shall be used as a standard."

Item #7 and Item #8- No changes

Item #9-Libby Wehrle-Anderson of the Conservation Commission was present to answer questions regarding the proposed 25 foot construction buffer around the Wetlands Conservation District. She said currently 50 out of the 250 N.H. towns have such buffers. Clarence Farwell asked about the method of relief from this ordinance. Joe Kagenski suggested clarify the wording of the ordinance so that the PB, in the review of subdivision and site plans, and the ZBA in existing situations, can grant a special exception. The Conservation Commission decided to amend Section 5, Special Provisions, new #3 to read: "No construction which requires a building permit shall occur within 25 feet of the Wetlands Conservation District."

10:10 PM Planning Board General Business

MOTION PB members discussed the proposed zoning changes in light of tonight's public hearing. It was decided on a motion by Chris seconded by Rich to delete **Item #2, Accessory Dwelling Units** from the list of proposed changes. Vote taken was 4-Yes, 1-No (Peter).

Jeremy handed out new copies of the draft for the Capital Improvement Plan update for PB members to read and be ready to discuss at the January 19th PB meeting.

10:30 PM Judy made a motion, seconded by Peter to adjourn the meeting. Yes vote to adjourn 5-0.

Next Planning Board Meeting Tuesday, January 19, 1993

Submitted by: Sandra L. Fessenden  
Sandra L. Fessenden, Secretary  
Brookline Planning Board

PLANNING BOARD MEETING

January 26, 1993

**PRESENT:** Peter Webb, Chairman, Voting  
Richard Napolitano, Vice Chairman, Voting  
Chris Hegarty, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
**MOTION** Peter called the meeting to order. Minutes of the January 19, 1993 PB meeting were reviewed. Rich made a motion to accept the minutes as written. Chris seconded the motion. Vote was 5-0 yes to accept the minutes.

**7:40 PM** Birch Hill Estates, Phase I, P.B. Case #154  
Clarence was present to discuss the two issues that Dennis LaBombard had addressed previously with the PB. Clarence said the siltation fence could easily be repaired in the spring. He believes the frost heaves on Nightingale Road are caused by a subgrade boulder or boulders. He said when the frost goes out in the spring the bumps will go down. To correct this problem would require the road surface to be dug up; and this might cause greater problems by allowing water to get under the pavement and erode it. He estimated it would be at least 10 years before it became a maintenance problem for the town. Chris made a motion to recommend to the selectmen that the maintenance bond be released. Joe seconded the motion. Yes vote 5-0.

**MOTION**

**8:00 PM** Public Hearing, Proposed Changes to the Zoning and Land Use Ordinance. Peter explained that this was the third hearing on proposed zoning changes. The PB could only make non-substantive clerical changes at this meeting; and then would vote to approve or disapprove the proposed items of change.

**MOTION**

Item #1-Amend Article V, Section B., USES PERMITTED-Rich made a motion to have the Planning Board approve Item #1. Joe seconded the motion. Yes vote 5-0.

**MOTION**

Item #2-Article VIII, DEFINITIONS, Subsection 8, delete existing wording and change to read: "Family-Cohabitants of a single household who jointly share in the use of an entire dwelling unit." Joe made a motion to have the PB approve Item #2. Rich seconded the motion. Yes vote 5-0.

MOTION

**Item #3-Article VIII, Definitions-Add definition of Back Lot, and add to Article V.,C. Lot Requirements to allow back lots. Amend Article V., C. 1. to change frontage requirements on back lots. Discussion:** Rich felt there were 2 negatives to this proposal-1) Common drives; and 2) it allows otherwise undevelopable land to be built on. Chris said back lots have the potential of keeping more open space available and there is less density of building lots. Peter made a motion to have the PB approve Item #3. Motion seconded by Judy. Vote-4 Yes; 0 No; 1 Abstention (Rich).

MOTION

**Item #4-Add new Article XVI, OPEN SPACE DEVELOPMENT OPTION and renumber all subsequent articles. Discussion:** Audience had the following questions: 1) Benefits of this type of development to Brookline; 2) Who decides on open space or conventional subdivision; 3) What is allowable in the dedicated "open space" land and who determines "low impact" development to it; 4) Is this an option to developers or a requirement? Peter answered that this type of development does not saturate a town with buildings and it preserves natural features of the open space land. The PB makes the decision on which type of subdivision it will be. Chris answered that a homeowner's association will set up by-laws (similar to covenants) which property owners will know of before they buy into the subdivision. During subdivision review, the developer and PB will work toward the best usage of the open space land. The PB will require that all developments over the minimum tract size of 20 acres to be presented to the PB with an open space design. Joe noted that on Page 4, Section E. Dimensional Requirements, Setbacks should be changed to read: "Setbacks; 15 front, rear (instead of back), and side per lot from the ....." to conform with existing "setback" wording in the ordinance. Rich made a motion to have the PB approve Item #4 with the clerical change. Judy seconded the motion. Yes vote 5-0.

MOTION

**Item #5-Amendments to the BROOKLINE BUILDING CODE-There was no discussion on this item. Rich made a motion, seconded by Joe to recommend that the PB approve Item #5. 5-0 yes vote.**

MOTION

**Item #6-Article VIII, Definitions-delete existing definition of home business and replace it with new wording. Joe noted that on Page 5, Item #6, in "Change to", Line 5 should be changed for grammatical conformity to read: "sold and exposed for sale; (delete or) no generation of excess traffic...."** Rich made a motion to recommend that the PB approve Item #6. Judy seconded the motion. Vote 5-0 yes.

MOTION

**Item #7-Amend Article XVI (Sign Ordinance) to add new subsection C.6. to add a maximum sign size. No discussion. Peter made a motion to recommend that the PB approve Item #7. Judy seconded the motion. Vote was 5-0 yes.**

Item #8-Article XIII-WETLANDS CONSERVATION DISTRICT, Section 4, Special Provisions, add new subsection 2.3 to establish a 25 foot wetlands construction buffer; and amend section 5, Special Exceptions to allow the PB or ZBA to grant special exceptions. Libby Wehrle-Anderson of the Conservation Commission explained the purpose was to protect the wetlands during any construction that required a building permit; and allow for some local enforcement. Discussion: Resident Charlie Corey said he felt this would penalize current property owners who would be directly affected by this change. He would support the change if existing lots could be grand-fathered, with inspections done before a building permit was issued as well as after. He asked how many properties would be affected by this and how many violations per year now occur. Libby did not have numbers. Chris said he feels this protects all the wetlands and all land owners. Peter said the special exception mechanism should work if the ordinance is passed. Joe said there should be a title added to sub-section 2.3-" Construction Buffer" (to match other sections). Joe made a motion to recommend the PB approve Item #8. Rich seconded the motion. Yes vote 5-0.

MOTION

Item #9-Amend Article XII (Board of Adjustment) Jeremy explained that this item clarified reference changes in Article IV, Industrial/Commercial District, Section B. Uses Permitted as a result of last year's zoning changes. Joe made a motion to recommend that the PB approve Item #9. Peter seconded the motion. 5-0 yes vote taken.

MOTION

9:30 PM A motion was made by Peter and seconded by Rich to close the public hearing portion of this meeting. Yes vote 5-0.

9:35 PM **Planning Board General Business**

School Board member Marcia Farwell and PB members discussed the population growth in Brookline and how it was going to impact the school population in the very near future. It was agreed that the PB should take into consideration during subdivision review the impact of large subdivisions on all existing community services.

9:45 PM Peter made a motion to adjourn the meeting. Joe seconded  
MOTION the motion. Yes vote to adjourn 5-0.

Dennis LaBombard, Alternate voting for Joe  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate, Voting for Chris  
Robert Sykes, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**

**MOTION**

Peter called the meeting to order. Minutes of the January 26, 1993 PB meeting were reviewed. Judy made a motion to accept the minutes, with Peter seconding the motion. Vote was 5-0 yes to accept the minutes as written.

**7:45 PM Wallace Brook Estates, II, P.B. Case #199**

**MOTION**

Thomas Enright was unable to be present at this meeting. Peter noted the absence of a construction or maintenance bond for this subdivision. He moved that the Planning Board instruct the building inspector to withhold the issuance of any building permits and/or certificates of occupancy on lots within this subdivision until an approved surety bond or letter of credit has been posted with the town of Brookline. Margaret seconded the motion. Vote to so instruct the building inspector was 5-0 yes.

**8:00 PM Subdivision Regulation Changes**

Jeremy referenced his memorandum on proposed subdivision regulation changes dated November 11, 1992. He said that the PB might want to wait until after March 9, 1993 town meeting vote on zoning before scheduling a public hearing on subdivision regulation changes, since if the open space zoning passes it will require some changes be made to the subdivision regulations such as lot definitions; legal data required; and the spelling out of options for this type of development. Jeremy will explore what information will be needed in the pre-conceptual stage of subdivision review. He will work up the proposed changes for discussion at the March 2, 1993 work session.

**8:15 PM Project Status**

a) P. & C. Realty- Jeremy said he had spoken with Jim Crowley of Maynard & Paquette regarding the labeling of lot F-18-1 as "A Non-Building Lot", since at this time it has no

road frontage on a town road, and therefore does not conform to Brookline's subdivision regulations.

Rich asked if we had the information from town counsel or the road agent that the PB members had requested. Secretary reported Clarence is researching the original road book; and town counsel has not yet responded to our phone call. The necessary information will be available for the 2/16/93 meeting. Rich also felt that the applicants should be made aware of the possibility of off-site improvement money being requested by the selectmen to upgrade Rocky Pond Road.

b) Review PB Cases and PB members assigned to each. PB members reviewed the 1/28/93 update list of approved and pending subdivisions and non-residential site plans as to their status for acceptance, member assignment, and bond types and expiration dates. There were no re-assignments at this time, although it was decided there were a few cases that could be deleted from this list.

**8:30 PM Planning Board General Business**

a) **Membership Status**—Alternates Robert Sykes and Margaret Olson, whose terms expire 3/31/93 agreed to be re-appointed. Joe Kaganski's term is up at this time also, but he was absent from this meeting. Rich reported that he has spoken with two people, but they have not given him a definite answer as yet.

**b) Planning Board projects for 1993.**

PB members were in agreement that Brookline is growing at a rapid rate in comparison to other neighboring towns. Jeremy reported that in 1992 we were fourth in line behind Nashua, Hudson and Merrimack in building permits for new homes. Brookline issued 63 permits for new houses in 1992. It was decided to make a growth control study of Brookline the main focus for 1993. With an eye to the growth potential of the school system along with the impact on the existing town services, a growth control ordinance or a building permit restriction will be looked into.

Rich also wanted the PB to look into other towns and their non-residential site plans and regulations. He would like to have an area in Brookline commercially zoned which would attract business growth which isn't dependent on having town water or sewerage provided them.

**9:10 PM  
MOTION**

Peter made a motion to adjourn the meeting. Judy seconded the motion. Yes vote to adjourn 5-0.

**Next Planning Board Meeting, Tuesday, February 16, 1993.**

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

PLANNING BOARD MEETING

February 23, 1993

**PRESENT:** Richard Napolitano, Vice Chairman, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate voting for Peter  
Margaret Olson, Alternate, Voting for Chris  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:35 PM** Planning Board Business Meeting

**MOTION** Rich chaired the meeting in Peter's absence and called the meeting to order. Minutes of the February 2, 1993 PB meeting were reviewed. Judy made a motion to accept the minutes as written. Margaret seconded the motion. Vote was 4-Yes, 0-No, 1-Abstention (Joe not at 2/2/93 meeting).

**7:40 PM** P. & C. Realty, Inc., Subdivision Case #1992-6:F-18, F-60 case continued. Applicant Paul Gavin and Richard Maynard of Maynard & Paquette, Inc. were present. Rich read the memo from PB secretary regarding her conversation with Town Counsel William Drescher on the status of Rocky Pond Road's being a town road (see attached). Jeremy noted the change made from the previous plan which added "Non-building lot" to lot F-18-1 in addition to Note #8. Jeremy recommended approval subject to a mylar being presented, fees being paid, and a letter sent to the Hollis Planning Board, whose approval was conditional on Brookline's approval.

Rich asked why access for the 83 acre Lot F-18-1 (parcel #2) is off Birch Hill Road, which would direct traffic onto Old Milford Road and Route 130 east. Richard Maynard said that the land area connecting lots F-18 and F-18-1 had 20 to 25% slopes and ledge; and there was no way a road could be built that would provide access from lot F-18-1 to Rocky Pond Rd.

**7:55 PM** Dennis made a motion to approve the plan subject to a mylar  
**MOTION** being presented with "Non-building lot" added to lot F-18-1; all fees paid; and a letter sent to the Hollis Planning Board indicating Brookline's approval of the plan. Margaret seconded the motion. Vote was 5-0 yes to approve the plan.

Rich said there were three points for the applicants to consider for further subdivision of this property:

- 1) This is a significantly large size development. Off-site improvements are usually sought from the developer on subdivisions of this magnitude.
- 2) They should be aware of the proposed new zoning changes and the possibility of the passage of the Open Space Development ordinance.
- 3) They may need to demonstrate why this subdivision should not be considered scattered and premature.

Mr. Gavin and Mr. Maynard were given copies of the proposed zoning changes. Joe said other developments on the outer edges of town have been viewed as possibly premature. Judy said from the Selectmen's point of view there was the issue of traffic safety on Old Milford Road at the junction of Steam Mill Hill, as well as safety concerns on Rocky Pond Road to be considered.

8:05 PM "Mountain Road Estates, I"-Maintenance bond release  
Clarence had visited the site and found no outstanding maintenance problems. Dennis said he had not recently been there, but he did not think there were any issues of concern. He will revisit the site in the spring.

8:10 PM Wallace Brook, II, Hillside Drive Extension, Case #199  
Thomas Enright was present to discuss with PB members the status on this subdivision. He said all outstanding road issues have been addressed and all that remains is to make sure that all bounds are in place and that the shoulder re-grading has been completed. There needs to be a final road inspection made and a report written, and he said he will have this done by May 1, 1993. He has posted a bond in the amount of \$16,500 to serve as a construction bond till final approval, and then to become a maintenance bond. PB members agreed with the amount posted for bond which was 10% of the original road construction estimate.

8:30 PM Rich made a motion to adjourn the meeting. Judy seconded  
MOTION the motion. Yes vote to adjourn 5-0.

February 16, 1993

MEMORANDUM

To: Planning Board Members  
From: Sandy Fessenden  
Re: Conversation with Town Counsel William Drescher regarding Rocky Pond Road

Dear Members,

I telephoned Bill Drescher with the question:

1) When does a road become a town road without explicit action from the Town to adopt it at town meeting or without any written documentation that the road was ever accepted?

His answer was the following:

- 1) If the town has maintained the road for 5 years or more
- or
- 2) If the road is continuously used by the general public

it is considered to be a town road. Given that the oldest records found indicate that it is a 2 rod road (33 feet wide), it is a presumption that it is a public road. If it came to court, the ruling would be in favor of the presumption.

He also said that under state statutes, the selectmen can layout and realign the road if it is deemed necessary. He said he has no doubt that Rocky Pond Road is a town road, since it was the principal route between Brookline and Hollis before Route 130 was built. On old town roads, if the town doesn't own the title fee, it in essence has an easement for the road.

## PLANNING BOARD MEETING

March 2, 1993

**PRESENT:** Peter Webb, Chairman, Voting  
Richard Napolitano, Vice Chairman, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for chris  
Margaret Olson, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
**MOTION** Peter called the meeting to order. Minutes of the February 23, 1993 PB meeting were reviewed. Judy made a motion to accept the minutes as written. Dennis seconded the motion. Vote 4-Yes, 0-No, 1-Abstention (Peter not at 2/23 meeting).

**7:35 PM** Robert Bramley, Mountain Road Estates, II and Birch Hill Estates, II-Discussion of Road Construction Phasing. Bob Bramley and Attorney Silas Little were present to discuss with PB members the construction phasing of the road system in Mountain Road and Birch Hill Estates, II. Bob said they were planning to first build either the extension of Mountain Road down to Birch Hill Road; or the other connection loop from Mountain Road to Westview Road, connecting to Birch Hill Road. He said the stumping and grubbing and the drainage for the entire project will be installed in the first phase. He hopes to have the first loop road finished in late spring or early summer 1993. The bank financing the road construction is concerned with the sale of lots. Bob and Attorney Little asked the PB if an arrangement such as the town has with Talbot-Taylor Estates could be worked out, where there would be recorded a list of lots restricted for sale and building permits on file at the Registry of Deeds until such time as the road were completed and accepted by the town or a road bond placed to guarantee the road's completion. They asked that the entire plan of both subdivisions be recorded with whatever covenants that the PB would require.  
PB members suggested that a notation be made on the cover sheet of the recording mylar listing the lots in each phase and notating that these lots can't be sold until such time as the road is completed or bonded. PB also felt that it

would be a good idea to discuss this at a public hearing with all abutters notified by certified mail of the final approval of the plan. Date of public hearing set for April 6, 1993. Secretary to provide Attorney Little with a copy of Talbot-Taylor's recorded agreement and a copy of the conditional approval conditions granted 7/17/90 (see attached). Bob and Attorney Little will come to the March 16, 1993 PB meeting with additional information regarding phasing, off-site improvement, and recreational agreements.

**8:00 PM Discussion of Population Growth Memorandum**

Jeremy informed PB members on some of his research into the area of how towns deal with rapid population growth. He said Milford's Master Plan update placed emphasis on fiscal impact to town services. Peter asked if the Brookline data is sufficient to allow the PB to address some type of growth control. Jeremy answered that with proper documentation figures, the PB can use any of the following tools to limit growth:

- 1) Impact Fees
- 2) Moratoriums
- 3) Building Permit limitations

He pointed out that growth control won't apply to already approved and recorded subdivisions.

Peter instructed Jeremy to gather and analyze the statistics and conditions in Brookline to determine if there is a basis to justify the actions the PB may be contemplating taking in the area of growth control. He said of major impact to the town is the cost of the school system and the need for new school buildings. He asked Jeremy to see if he could calculate the past 10 years of growth in the school system and see if he could obtain information from the school board on the next 10 years. Jeremy said he will look at the data and problem areas and will try to see if the school district has a five year plan available on enrollment growth and any planned building projects. He will have more information available for PB members at the March 16th meeting.

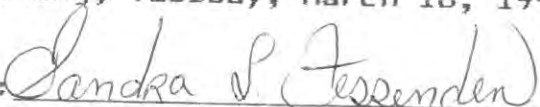

**8:25 PM Planning Board General Business**

Rich reported that he had contacted Kathy O'Sullivan of the Nashua Telegraph regarding a write-up on open space zoning development. He said Kathy Cleveland has done an article to be published in the March 3rd issue of the Milford Cabinet in which she interviewed developers regarding open space zoning. There was an article as well in "Our Place".

**8:40 PM MOTION** Rich made a motion to adjourn the meeting. Joe seconded the motion. Yes vote to adjourn 5-0.

Next Planning Board Meeting, Tuesday, March 16, 1993.

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

Made part of the 3/2/93 P.B. minutes  
JCF

Jeremy asked for time to review the plans which had been presented tonight. Allan asked that he complete his review within 10 days.

8:45 PM  
MOTION

Greg made a motion to grant conditional approval for "Mountain Road Estates, Phase II" with the following conditions to be met:

- 1) All State and Local permits have been received.
- 2) All fees paid.
- 3) Easements and deeds and recreation/open space payment agreement to Town in proper format.
- 4) Road bond in place
- 5) Off-site improvement agreement reached with Selectmen.

Robyn seconded the motion which passed with a 3-0 vote.

8:55 PM  
MOTION

Greg made a motion to grant conditional approval for "Birch Hill Estates, Phase II" with the following conditions to be met:

- 1) Woodman's access agreement, a copy to be on file with the Town within 10 days from today.
- 2) All State and Local permits have been received.
- 3) All fees paid.
- 4) Easements and deeds and recreation/open space payment agreement to Town in proper format.
- 5) Road bond in place
- 6) Off-site improvement agreement reached with Selectmen.

Robyn seconded the motion. Affirmative 3-0 vote cast.

9:00 PM

Planning Board General Business

PB members discussed the possibility of having no meeting in August since there are no cases to be continued. Since several members were to be away on vacation, it was decided not to meet during August. Jeremy said the upcoming Master Plan Committee meetings on July 31st & August 9th would hopefully complete the Master Plan update. As soon as copies are ready, he will make them available to PB members for their review.

NEXT PLANNING BOARD MEETINGS:

- 1) September 11, 1990- work session.
- 2) September 18, 1990- regular public hearing meeting.

7:45 PM Planning Board Business Meeting

**MOTION** Peter called the meeting to order. Minutes of the March 2, 1993 PB meeting were reviewed. Rich made a motion, seconded by Peter to accept the minutes as written. Yes vote 3-0.

7:47 PM Mountain Road Estates, II and Birch Hill Estates, II- Jeremy said the applicants were present to ask the PB to amend the subdivision approval conditions to allow them to build the eastern connector road (Westview Road) without a road bond. Bob Bramley and Attorney Silas Little presented PB members with copies of a stipulation agreement to be recorded at the Registry of Deeds restricting the sale of lots (calling out the lots by lot number); and issuance of building permits until the road has been built and accepted by the town. This document also the sequence of phased road construction and release of lot restrictions.

Jeremy said that the phasing agreement was outlined as follows:

- Phase 1) Eastern connector road
- Phase 2) Western connector road
- Phase 3) Cul-de-sacs

Rich suggested that town counsel review this document before the April 6, 1993 public hearing; and that a note be added to the subdivision cover sheet to the effect that a stipulation document is on file at the Registry of Deeds.

As regards the conditional approval item of deeded access to lot D-63, Mr. Little said a 25 foot access is to be provided to Tim and Sharon Woodman's lot D-63. Randy Haight has flagged the perimeter of the road easement shown on the plan between lots D-57-26 and D-57-27. They picked up the old wood's road as it originally enters the LVA soils (poorly drained) on lot D-63 so that no new state permit would be needed for the Woodman's to continue to use this road. A

copy of a letter sent to the Woodman's attorney Steve Bolton outlining the access easement and asking for a written release to any other access way into the property in favor of this deeded access was presented. Mr. Little said Attorney Bolton had replied the Woodmans were not in favor of a restriction not allowing them to bring in utilities to the lot. Mr. Little said that town zoning regulations would not allow this to become a building lot because it lacks road frontage on a town road. He also said that the "old woods road" access crossed a large wetlands area; and if the Woodman's were to upgrade the access road for any reason, they would need to obtain a State dredge and fill permit. Peter asked if lack of an access agreement could hold up the recording of the subdivision plans. Rich said it was a conditional approval item; and it is traditional for the PB to provide access to land-locked parcels. A public hearing for final approval is scheduled for Tuesday, April 6, 1993.

8:15 PM

**Bear Hill Estates**- Jeff Kevan of T.F. Moran, Inc., Attorney Gerald Prunier, and applicants Mike Maggio and Robert Pace of Grizzly Development Corp. were present to discuss an area of wetland on Mosher Drive nearest to Old Milford Road. This subdivision was approved in 1987, and Mr. Prunier said that a new State definition of wetlands adopted in 1990 presents a problem in applying to the State for renewal of expired permits. He said Libby Wehrle of the Brookline Conservation Commission had asked them to meet with the PB to have them grant a special exception for the new area of wetlands (see attached letter). Margaret and Dennis asked why a special exception was necessary at this point. Jeff Kevan said the applicants would like to work with the town, and felt they should come to the board in light of this new wetlands area. PB members were unsure that a special exception was needed because of a change in state definitions because the subdivision has already been approved and recorded. Libby was present. She stated that some of this wetland area would have been considered wetlands under the old regulations. She inquired if the PB still wants this road to be built. PB members asked what the length of the road (Bear Hill Road and Mosher Drive) would be without the connection to Old Milford Road. Jeff estimated it to be 3,500 ft. PB members said for emergency safety reasons this was too long a road to have only one entrance. Rich asked if we have seen a copy of a new soil scientist's review. Jeff had a letter date 3/4/93 from soil scientist R. W. Bond of the Merrimack Soils Consultants, Inc. (see attached). He

pointed out that the original dredge and fill of 85,000 sq. ft. had been modified down to 15,000 sq. ft. after the first S.C.S. mapping was done. He said this wetland is a seasonal wet meadow area. He said they would not like to have to wait until the snow cover is gone before beginning the process of reapplying to the state; and would like to have the recent soil scientist's review considered. After some discussion, PB members recommended that the applicants go to the ZBA for a special exception, since under the zoning ordinance, the PB has the authority to grant a special exception during subdivision or site plan review (Article XIII, WETLANDS CONSERVATION DISTRICT, Section 5, Special Exceptions); but in other matters the ZBA has jurisdiction.

- 9:15 PM **Population Growth Memorandum**- Jeremy said he is still compiling information for this, and hopes to have it ready for the next meeting. Rich said he would like to have an analysis of the tax assessments of houses being built now.
- 9:25 PM **Planning Board General Business**  
Jeremy reminded PB members of the March 23rd meeting with the Hollis PB and NRPC members for their information as to what the towns would like to include in this corridor study. NRPC is also conducting a training session on April 29th.
- 9:28 PM **Planning Board Membership**  
Rich reported that he had one candidate for the PB; and Margaret said she has thought of one person she thinks might be a good candidate as an alternate.
- 9:30 PM **MOTION**  
Rich made a motion to adjourn the meeting. Dennis seconded the motion. Yes vote to adjourn 4-0.

Re: Bear Hill Estates, Phase IV and a portion of Phase III

Dear Members,

We have been contacted by Jeff Kevan of T.F. Moran, Inc. as their client plans to complete phase IV of the subdivision which was approved in 1987. We did a brief site walk with Jeff Kevan when there was 18 inches of snow cover. There is a possible wetland area in the proposed Mosher Drive which would require 350 feet of fill, from Sta. 1.00 to Sta. 4.50 at the end nearest Old Milford Road. We have advised the firm that they need to obtain a special exception from the Planning Board to fill if the area is wetland. T.F. Moran, Inc. agreed to have the area mapped by a certified soil scientist, set up a hearing with the Planning Board, if needed, and explore other options for road placement.

Our concerns are as follows:

- 1) In view of the development which has taken place since 1987 on Old Milford Road, does the Planning Board still feel this road is necessary? Are there other options which would require less impact on the wetlands?
- 2) Do the lots created have valid septic permits? If not, can they meet present state and town regulations?
- 3) Since this possible wetland area was overlooked, are there others on this parcel?

We would like the opportunity to walk the entire parcel of Phase IV and the Mosher Drive portion of Phase III when the ground is not frozen and there is less than 6 inches of snow cover on the ground.

Sincerely yours,

Libby Wehrle-Anderson (S)

- Case #144

Re: Wetlands mapping on land of Bear Hill Associates, along Mosher Drive, Brookline NH.  
Field work performed March 4, 1993.

Dear Mr. Kevan

At your request I mapped the wetlands along Mosher Drive on March 4, 1993. Four wetlands were marked with numbered strips of red and white striped survey flagging. A sketch is enclosed showing the flagging pattern. I would strongly recommend that you have your surveyor locate the flags on the ground using appropriate surveying methods so that their exact location can be shown on future plans.

The wetlands were classified using the three parameter approach required by the Corp of Engineers and the State of New Hampshire Wetlands Board. This method is described in detail in the 1989 edition of the *Federal Manual* and is the generally accepted method of delineating wetlands in New Hampshire. Under this method a wetland must have hydric (wetland) soils, hydrophytic (wetland) vegetation and wetland hydrology all at the same time to be classified as a jurisdictional wetland. The wetland areas identified along Mosher Drive meet these criteria and as such are subject to both state, and local wetland ordinances.

The soils in the first three wetlands are Leicester very stony loan, a poorly drained soil developed in glacial till. The soils in the wetland marked with the 400 numbers are wetter. They are very poorly drained Scarboro or Whitman soils with a narrow border of poorly drained Leicester soils around the edges of the wetland. Vegetation observed in the wetland areas included red maple, high bush blueberries, cinnamon ferns, sensitive ferns, Yellow birch, gray birch, reed canary grass and sheep laurel. All of these plants are regarded as wetland indicator species.

If you have any questions feel free to call me.

Sincerely

Richard W Bond

April 6, 1993

**PRESENT:** Richard Napolitano, Vice Chairman, Chaired Meeting, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for Peter  
Margaret Olson, Alternate, (Joined meeting at 7:40 PM)  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Rich called the meeting to order. Minutes of the March 16, 1993 PB meeting were reviewed. It was voted to amend Page 1, 7:47 PM, Line 10 to read as follows: "This document also specified the sequence of phased road construction ....."  
**MOTION** Dennis made a motion, seconded by Rich to accept the minutes as amended. Vote to accept was 2-Yes, 0-No, 3-Abstentions (Judy, Joe, and Chris, not at the 3/16/93 meeting).

**7:35 PM** Fresh Pond Realty & Rock Ramond Estates Trust, "Birch Hill Estates, Phase II", Case 1989-7:D-56,-57,-58, D-60, and Millrock Realty, "Mountain Road Estates, II", Case 1989-8: D-20, D-25. General partner Bob Bramley, Randy Haight of Meridian Land Services, and Attorney Silas Little were present to discuss the items needed for final approval. Mr. Little said the access agreement with Timothy and Sharon Woodman was still outstanding. Mr. and Mrs. Woodman wanted the ability to bring utility lines into the lot; and Fresh Pond would agree to allow this if the utility lines were placed underground at the Woodman's expense. Mr. and Mrs. Woodman were present with their attorney Steven Bolton. Mr. Bolton said the Woodman's had deeded access to lot D-63 by way of an easement across the property being subdivided. He wished to assure that the Woodman's gave up none of their legal rights by signing an access agreement with Fresh Pond relinquishing rights to the former access easement (which had no metes and bounds but followed an old logging road in from Old Milford Road). Discussion ensued regarding whether lot D-63 could be used as a building lot under present town & state regulations.

Attorney Bolton said the Woodman's deed reserves an access to lot D-63, and this historic right of access means a legal right of access does exist. He doesn't wish to place the Woodman's in a self-created basis of hardship by signing an agreement which relinquishes their existing rights of access and could limit their ability to develop this land.

Attorney Little countered that development of lot D-63 would be precluded by lack of road frontage; and under current town and state regulations, the Woodman's would have to petition the court for a hardship variance to allow them to obtain a building permit. It also would not be possible to subdivide this property without frontage on a class 5 town road. He said in the deed references it is not clear that the woods road as it now exists is the original access way.

Rich said he wants to assure that the PB does not diminish the property's value if no agreement can be reached between the Woodman's and Fresh Pond Realty. He noted, however, that lot D-63 has no road frontage now, nor will it have any after the subdivision is approved. He asked what is wrong with the easement as proposed.

Judy asked if the easement could be widened to 30 or 50 feet which would allow for either a legal back lot, or for a town road to be built. It was noted that the developer was providing an access easement not a strip to be dedicated to the town for a road or to qualify for road frontage.

Mr. Little said there are wetlands located 25 to 30 feet from the property line of D-63, over which state law would now prohibit building a town road. His clients are giving a 25' access easement from Westview Road over Lots D-57-26, D-57-10 and D-57-9, following the original woods road access the Woodmans have been using. This was done so that a state permit would not be required for their continued use of the woods road which crosses the wetlands. He said his clients do not own an area of dry land abutting D-63 which could be dedicated for a road way. A wider easement would not give the lot road frontage in an area of dry land that a driveway or town road could be built on.

Rich then polled the PB members as to their opinions on this issue of conditional approval involving the access easement.

Judy said the Woodman's position is no different whether the PB approves or does not approve the plan. They would still

need to seek relief (a variance) from the zoning ordinance in order to build because they lack road frontage. She felt the developer has done what the PB asked for in providing an access to lot D-63; and it is up to the two parties to work out the legal paperwork.

Margaret said she does not see how the PB can do anything but approve the subdivision, but she would like to see the easement issue worked out between the two parties.

Joe felt the access agreement was a condition of approval, and would not like to give approval until this issue is resolved.

Chris asked what the proposed easement does not do in terms of access that the original deeded easement allows. He said they could now access their property over a road paved 1,000 to 2,000 feet closer to their property.

Jeremy mentioned that in the future when adjacent property is developed, there may be an area with drier land which the PB may look to provide as a permanent access to D-63. He alluded to the current problem with building Mosher Drive with newly defined wetlands located in the roadway. He said the proposed easement could serve as a temporary access to Lot D-63 until a future subdivision comes before the PB.

**MOTION**

Judy made a motion relative to the item of conditional approval regarding access to Woodman's lot D-63. She moved that the Planning Board resolve that the applicants have complied with the 7/17/90 condition of approval as imposed by the Planning Board by providing the 25 foot access easement as shown on the Birch Hill Estates, II subdivision plan to be recorded at the Registry of Deeds. Vote was Yes 5-0 on the motion.

Mr. Bolton was concerned that the Woodmans were being asked to sign a release of the easement rights they now have in favor of this new easement.

Judy replied that the PB's condition of approval did not specify the location of the access easement, and therefore does not need to be addressed in the PB motion.

Rich told Mr. & Mrs. Woodman he felt this subdivision had not diminished their property or access rights. He said it was not clear to him that they could exercise rights to build on or develop their land without obtaining a variance.

PB members and Mr. Little reviewed town counsel's suggested changes to the Recreation Agreement, and the Stipulation Agreement for road construction and lot sale restriction. Mr. Little agreed to make the changes to both documents.

**8:30 PM** Rich read the letter from Ernest Felzani into the minutes (see attached) regarding access to his lot D-24. PB members noted that a 50 foot access for future development has been provided on the Mountain Road Estates, II subdivision plan for this lot. Rich asked if all items of conditional approval had now been met, and if all State permits were current, and Randy Haight answered they were.

**Abutters Comments:**

David O'Sullivan expressed his concern with traffic on Old Milford Road. Randy said a traffic study had been done at the time of subdivision review, and an agreement for off-site improvements to Old Milford Road had been signed with the Selectmen. PB members told concerned abutters that parallel connector roads within the subdivision will help the traffic flow before it enters onto Old Milford Road. **Case continued for final approval till April 20, 1993.**

**9:00 PM** **Memorandums on Growth and Subdivision Regulation Changes**  
Jeremy handed out updated copies of both memos. PB members will review them and be prepared for discussion at the May 4, 1993 work session.

**9:10 PM** **Planning Board General Business**  
Jeremy reminded PB members of the April 29, 1993 training session N.R.P.C. is conducting at their Nashua office.

**9:25 PM** Margaret made a motion to adjourn the meeting. Rich  
**MOTION** seconded the motion. Vote was 5-0 to adjourn.

**Next Planning Board Meeting, Tuesday, April 20, 1993.**

PLANNING BOARD MEETING

May 4, 1993

PRESENT: Peter G. Webb, Chairman, Voting  
Richard Napolitano, Vice Chairman, Voting  
Joe Kaganski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate  
Margaret Olson, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Peter called the meeting to order. Minutes of the April 20, 1993 PB meeting were reviewed. It was voted to amend Page 1, Paragraph 1, Motion, Vote taken was "4-Yes, 0-No, 1-Abstention (Russ was not at the 4/6/93 meeting)"; and in Paragraph 2, Election of Officers, Lines 2 & 5, Change to read as follows: "Vote to elect Peter" and "Vote to elect Rich was unanimous."

MOTION Peter made a motion, seconded by Joe to accept the minutes as amended. Vote to accept was 4-Yes, 0-No, 1-Abstention (Judy not at the 4/20/93 meeting).

7:45 PM Discussion of Subdivision Regulation Changes  
PB members reviewed Jeremy's April 5th memo regarding changes to the subdivision regulations and recommended the following changes: Page 2, Paragraph 3, change to read: "This amount should not exceed 10%....."; and paragraph 5, change to read: "Letters of credit shall be self-calling."; Page 3, Paragraph 1, change to read: "Design Review plans for determining...."; Paragraph 2, change to read: ".....use a general 1 unit/ 2.5 acres guideline." Jeremy will rearrange new section 4.6.04 paragraphs and include 2 methods of calculation as examples. In new section 4.7.04, change the word should in line 2 to "shall" and would to "shall". Next paragraph add to new section 4.10 and change to read: "The 50 foot perimeter setback is a buffer between the open space subdivision and any adjacent parcels. This area shall include....." Section 4.10.03, amend to read: "..... or deed or homeowners association or otherwise." In section 4.10.04, separate wording will be used for conventional and open space development dedicated "open space" areas.

Delete section 4.10.03. Information is included in section 4.7.04. Page 4, last paragraph, change to read: "The Brookline School board shall be contacted for assistance." Jeremy will make the suggested changes and PB members will review them at the June 1, 1993 work session.

**8:40 PM Population Growth Memorandum**

Jeremy's third memorandum on population growth in Brookline focused on the current Brookline School District system and the possible plans for expansion in the near future. He will outline options to address the town's recent growth, and the impact it has had on all town services in his next memo to be discussed at the PB work session on June 1st.

**8:50 PM Planning Board General Business**

- 1) PB members discussed the 4/24/93 site walk at the Nightingale property on Old Milford Road. Because Old Milford Road is a narrow road and there are drainage problems at this location, it was the consensus of opinion of those on the walk that the PB should require a ten foot easement to allow the town to cut brush, fix drainage problems, and maintain slopes. No disturbance of the stone wall is to be made unless there is joint approval by the Board of Selectmen, Planning Board, and the property owner. There are two culverts not shown on the plan, and the well as shown is actually part of the septic. Jeremy will contact Randy Haight with this information.
- 2) Jeremy has spoken with Tom Mahoney about the information necessary for the site plan for his tire storage business. The information from the State regarding the need for an additional curb cut is not yet available.
- 3) Recording mylars, the Stipulation Agreement, and the Recreational Facility Cost Contribution Agreement for Birch Hill Estates, Phase II and Mountain Road Estates, Phase II were signed and are now ready to be recorded.

**9:15 PM MOTION** Margaret made a motion to adjourn the meeting. Joe seconded motion. Vote was 5-0 to adjourn.

Next Planning Board Meeting, Tuesday, May 18, 1993.

**7:30 PM** Planning Board Business Meeting  
Peter called the meeting to order. Minutes of the May 4, 1993 PB meeting were reviewed.

**MOTION** Peter made a motion, seconded by Dennis to accept the minutes as written. Vote to accept was 5-Yes.

**7:40 PM** Project Status Reports  
PB members reviewed Jeremy's list of current subdivision projects and the PB members assigned to them. Jeremy noted that the road construction bond on Petersen Road was coming due 7/4/93. PB will ask road inspector Clarence Farwell to check the project and the PB will write Mr. Petersen a letter regarding the outstanding items needing to be completed before the bond can be released.

**7:45 PM** Rocky Pond Road Study- Jeremy said surveys of traffic usage had been sent out to all residents in the area of Rocky Pond Road; and 5 traffic counters had been set out on Rocky Pond Road and Old Milford Road. Preliminary results show that 15% of the trips made over Rocky Pond Road are to Nashua. Jeremy said the study should be ready in late June or early July. Peter observed that the poor quality of some town roads such as Rocky Pond Road may deter people from using them now; but once the road is upgraded, he feels the traffic load will undoubtedly be increased.

**8:07 PM** Planning Board General Business  
a) Brookline School District- Marcia and Clarence Farwell were present to talk to the PB about the lot line adjustment for the Brookline Elementary School. (Randy Haight arrived at

this time) Marcia said the school district was purchasing land from the Emmerling's abutting lot F-81 so that the school will have additional land to give them the ability to add onto the septic system when it becomes necessary to expand the school. Randy had brought some preliminary plans to review. PB members agreed to waive all the fees for the lot line adjustment, and the case will be scheduled for the June 15, 1993 PB meeting.

8:15 PM **Nightingale Revocable Trusts, Subdivision Case #1993-1: D-55.** Randy Haight presented the plans. Changes made to the plan were as follows:

- 1) Show culvert on plan,
- 2) Add easement (Note #9),
- 3) Labeled the well.

Jeremy reminded PB members about the letter regarding open space, and that the PB should make findings regarding open space development with this subdivision.

**Findings for Open Space development:**

Margaret said this subdivision would not qualify for the open space zoning requirement since it was subdividing an existing house with 5 acres from the remaining 40.351 Acres which will remain unchanged in current use. There will be no increase in housing density due to this subdivision.

8:20 PM **MOTION** Peter made a motion to find that open space development is not required in this subdivision for the reasons stated above. Margaret seconded the motion. Vote taken was in the affirmative 5-0.

8:30 PM **MOTION** Margaret made a motion to approve the subdivision subject to any pending fees being paid and a recording mylar being presented. Rich seconded the motion. Vote was 4-Yes, 1-No. Dennis voted no, and his reason was he felt the easement as granted was too restrictive to allow the town to provide proper road maintenance when necessary.

8:50 PM **Planning Board General Business continued**  
b) Secretary asked PB members for direction for a Non-residential Site Plan for Willard Cumming's lot #B-60. Dan Bent had met with selectmen regarding a trailer of bagged bark mulch for sale on site. Selectmen had referred him to the PB for a N.R.S.P. It was unclear from a conversation with Mrs. Bent that this would qualify as a home business, and might therefore not be under the jurisdiction of the PB since the lot was in the Residential/Agricultural zone. After some discussion, it was decided on a motion by Rich to recommend to the selectmen that it was the PB's opinion that

this was not a home business, and that it should be referred back to the selectmen.

Joe noted that the Z.B.A. might be involved if it was determined a variance was needed to conduct a business in the R/A zone; or if the selectmen's decision was appealed (RSA676:5).

c) PB members discussed with Randy Haight the G.S.I. mapping proposal that Meridian Land Services had prepared for the town. Dave Ricard of Meridian is willing to give a demonstration of the computer program to any department and board members who are interested. He will be invited to the PB work session on June 1st.

9:15 PM  
MOTION

Margaret made a motion to adjourn the meeting. Joe seconded motion. Vote was 5-0 to adjourn.

Next Planning Board Meeting, Tuesday, June 1, 1993.

PLANNING BOARD MEETING

June 1, 1993

PRESENT: Peter G. Webb, Chairman, Voting  
Richard Napolitano, Vice Chairman, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for Joe  
Margaret Olson, Alternate  
Ben Chandler, Selectmen's Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Rich called the meeting to order. Minutes were not reviewed, and it was agreed to proceed with the G.I.S. map computer program demonstration.

7:35 PM Randy Haight and Dave Ricard of Meridian Land Services, Inc. were present to give PB members a demonstration of the G.I.S. mapping computer program and to explain how it could be implemented by several town departments sharing basically the same data base. Questions were asked as to how useful this system would be to the PB, and how difficult it would be to input all the information. Dave said the program would provide much information currently available on computer disks with the exception of topographical information which is not available at this time. It was discussed that some of the information the emergency services used was currently in place in the Hollis communication center. It was finally decided that this program should be demonstrated at a selectmen's meeting with different town department heads present.

8:50 PM Don Bingham, Bingham Lumber Co. Inc.  
Don Bingham was present to informally discuss how much information was necessary to present a site plan to add a 320 sq. ft. diesel fuel containment building. He said the federal government will be using a color coding system for diesel fuel; and he wants to separate the diesel fuel used for the over-the-road vehicles from those vehicles used only in the yard to keep track of the diesel users' fuel tax. They have an existing 20,000 gallon tank and are proposing

to add a new 6,000 fuel tank. They will be building a 320 square foot shed to house the diesel fuel pump. Rich said he would consider this an expansion of use and the PB should have a set of plans on file for whatever is on the site. Other members were in agreement. Mr. Bingham will present site plans so he can be on the 6/15/93 PB agenda.

**9:00 PM Robert Pace, "Grizzly Development Corp."**

Mr. Pace and Steve Patterson were present to discuss the bonding of Mosher Drive. Mr. Pace said he had a letter of commitment from the bank and expected to complete the entire road within an 8 week period. He questioned at what point could he obtain building permits, and would he have to post a bond if the road was to be completed in such a short period of time? Rich explained the bonding process, and suggested that they complete as much of the road as possible without placing a bond. The road must be at the sub grade level before a building permit can be issued by subdivision regulations. Road Inspector Dennis LaBomard would calculate the remaining cost to build the road at this phase, and a bond would have to be placed with the town for that amount. Dennis had reviewed the original bond estimate for Mosher Road and said that the figure of \$228,500 was still a good estimate. Mr. Pace will contact his bank with this information to secure a letter of credit for the road bond.

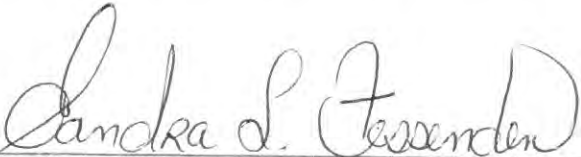

**9:15 PM Discussion of Population Growth Memorandum**

Jeremy had distributed his memo on population growth in Brookline which summarized the findings from his first three memos. PB members discussed two options- 1) Optional or mandatory phasing in of large subdivision developments; and/or 2) A growth control ordinance. Discussion centered around the possibility of restricting the number of building permit per year and how best to implement such a program. Further discussion will take place at the next work session on July 6, 1993.

**10:10 PM** Judy made a motion to adjourn the meeting. Rich seconded the motion. Yes vote to adjourn 5-0.

PLANNING BOARD MEETING

June 15, 1993

PRESENT: Peter G. Webb, Chairman, Voting (Joined meeting at 8:30 PM)  
Richard Napolitano, Vice Chairman, Voting (Joined meeting at 7:45 PM)  
Chris Hegarty, Voting, Chaired beginning of meeting  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for Joe  
Robert Sykes, Alternate, Voting for Peter ( )  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Chris acted as temporary chairman for Peter, and opened the meeting at 7:40 PM) Minutes of June 1, 1993 were reviewed, It was voted to amend page 2, line 2 to read:".....the diesel fuel pump and tank." Dennis made a motion to approve the minutes as amended. Judy seconded the motion. Vote was 3-yes, 0-no, 2-abstentions (Bob and Chris not at the 6/1/93 meeting).  
MOTION Minutes of the May 18, 1993 PB meeting were reviewed. Dennis made a motion to approve the minutes as written. Judy seconded the motion. Vote was 2-yes, 0-no, 2-Abstentions (Chris, and Bob not at the 5/18/93 meeting).

7:43 PM Brookline School District, Lot Line Adjustment Subdivision Case #1993-2:F-80  
Marcia Farwell, Chairman of the Brookline School Board, Edwin Emmerling owner of Lot F-81, and Randy Haight of Meridian Land Services were present with the plans for a lot line adjustment to add "Parcel A" containing 4.224 acres to Lot F-80, Brookline Elementary School from Lot F-81 owned by Edwin and Therese Emmerling. Randy explained this was the paperwork for the school's purchase of land, the funds having been approved at March 1993 school district meeting. Judy asked about the well radius of Emmerling's well and should it be shown on the plan? Randy agreed, and said it will be shown on the plan for state subdivision approval.  
7:55 PM Chris made a motion to accept the plan as presented. Dennis seconded the motion. Yes vote taken 5-0.

**Abutter's Comments:** Vincent Carney of 13 Springvale Avenue and Barbara Ansara of 15 Springvale Avenue were present, and expressed some concerns about the possible location of

buildings and septic and how it would affect their property. Mrs. Ansara was concerned about her well. Marcia explained that the state requires a certain amount of square footage of land per student, and the addition of this acreage would fulfill that requirement for future expansion of the school building. The septic system, when it needs to be enlarged, may be located on some of this land. Building additions would likely tie into the existing school building.

Rich explained to her that the Planning Board at this time was concerned only with the lot line adjustment; and that expansion of the school building or enlarging of the septic system would be done after hearings were held to raise monies for this purpose; and new site plans and septic plans would be required by town and state.

8:00 PM Dennis made a motion to approve the plan subject to receipt of state subdivision approval and a mylar for recording. Judy seconded the motion. Vote for approval was 5-0 yes.

8:05 PM Bingham Lumber Co. Inc., Non-residential Site Plan Review, Case #1993-A:H-90. Don Bingham was present with a site plan to add a 320 sq. ft. fuel containment building to house a fuel pump and a 6,000 gallon tank. The containment building will be similar in construction to the existing one on site; and will have a concrete containment pit adequate to handle 11,000 gallons in case of a fuel spill.

Dennis said he was concerned with congestion in this area, and asked Don if he had a master plan for future growth. Don said he had no overall future plans, but he could tie the existing buildings together, and rearrange the piles of green lumber stored outside to enlarge the business. Rich asked if the Brookline Fire Department had ever visited the site. Don answered yes, they had been there on the occasion of a small fire. Rich felt a letter sent to Ray Kecy, Fire Chief to inform him of the new plan might be helpful in terms of the fire department's checking for adequate fire truck access in case of emergency.

8:15 PM Chris made a motion to accept the plan as presented. Judy MOTION seconded the motion. Yes vote was taken 5-0. MOTION Chris made a motion to approve the plan, subject to fees being paid, an updated plan on file, and a letter sent to Fire Chief Ray Kecy. Judy seconded the motion. Vote for approval was 5-0 yes.

8:20 PM Tom Moran, "Mountain Road Estates, II" and "Birch Hill Estates, II"-Tom Moran and Road Inspector Bill Duncklee were present to request a change in the road profiles based on some field changes. Tom asked for a road grade change on Westview Road from Sta 1+50 to Sta 10+10 (650 of road) to an 8.75% grade because they encountered ledge at the top of the

hill going from Mountain Road onto Westview Road. For the first 150 feet, the road grade is 8%. They ran into ledge at Sta 6+50 through Sta 12+0. Some blasting will be required, but if the PB is willing to waive the 8% grade, much less blasting will be necessary. Some adjustments will be made at the intersections of Overlook and Summit Lanes. Rich asked for Bill Duncklee's opinion of the request. Bill said he has no problem with the change, and a great deal of blasting of ledge will be avoided. Rich said as long as the changes are vertical and there are no horizontal changes affecting any lot lines, it should not be a major problem. Tom said the blasting of ledge will reduce the top of the hill by 3 feet. His second request was regarding fill. The change of grade on Westview Road will reduce the amount of fill and he would like to use the fill on lots intersected by Westview Road and Summit Lane, which he felt would help by reducing the grade by four or five feet. Bill Duncklee had no comment on this requested change. Dennis said it looked all right to him. Chris said they are not creating any trenches since the land slopes away naturally anyway. Rich suggested adding a key to the plan so that someone looking at the road profiles will see the changes. Tom said the first 175 feet of Summit Lane will be less than a 3% road grade. Overlook Lane is not changing.

8:40 PM  
MOTION

Chris made a motion to approve these changes pending a revision block being modified on the subdivision plans. Judy seconded the motion. Vote was yes 5-0. (Judy left the meeting at this time).

8:45 PM

**Subdivision Regulation Changes-** (Peter chaired the meeting from this point on.) PB members agreed on July 6, 1993 as the date for a public hearing on changes to the subdivision regulations.

8:50 PM

**Open Space Development-Sample Review**

Jeremy had prepared a sample review of a preliminary plan for open space development. He chose the area on Averill Road where Blue Chip had prepared a plan for excavation. Following the guidelines in the open space zoning and the proposed subdivision regulation changes dealing with open space development, he drew up a plan showing how natural features (68 Acres of pond and wet area) and topography would affect subdivision development on this site. PB members made suggested changes to the regulations regarding section 4.6.04, Design Review plans for determining the number of allowable lots in an open space development.

- 9:45 PM **Planning Board General Business**  
Jeremy said the Rocky Pond Road study is completed. A joint meeting will be held by the Brookline Planning Board and the Hollis Planning Board at the Hollis Town Hall meeting room on July 13, 1993 at 7:30 PM.
- 9:50 PM Chris made a motion to adjourn the meeting. Rich seconded the motion. Yes vote to adjourn 4-0.

Chris Hegarty, Voting,  
Judy Cook, Selectmen's Representative, Voting  
Dennis La Bombard, Alternate, Voting for Peter  
Margaret Olson, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:40 PM** Planning Board Business Meeting  
Rich, acting as chairman in Peter's absence, opened the meeting. Minutes of June 15, 1993 were reviewed. Judy  
**MOTION** made a motion to approve the minutes as written.  
Chris seconded the motion. Vote was 4-yes, 0-no, 1-abstention (Joe not at the 6/15/93 meeting).

**7:55 PM** Public Hearing- Proposed Subdivision Regulation Changes-  
Rich explained that the proposed changes dealt mainly with clarification of the road bonding procedure (construction bonds and maintenance bonds); and changes that came about as a result of the zoning changes adopted at the March 1993 town meeting. Rich then turned the meeting over to Jeremy Ginsberg to run through the amended items. After discussion, it was decided to make the following changes:  
Page 1. the third line of **BONDING, Section 2.21** to read: "other improvements were constructed and installed....."  
Page 2. New **Section 4.9.06** Define "self-calling" in terms of the letter of credit.  
Page 3. **Section 4.6.04** It was decided to add an introductory paragraph to this section; and have two sub-sections (a & b) with the criteria necessary for each option listed beneath both sections. Soils data, amount of wetlands and non-wetlands, slopes, and floodplain data should be included in both options. Omit the word "alternately" from Option b) in the beginning sentence.  
**Section 4.7.04** Last sentence (A note should also....) should be expanded to give an explanation of type of notation to be added onto the recording plan.

Page 4. Section 4.12.03- Paragraph 1, line 3, Change to read: "allow the Planning Board to determine the maximum number of lots allowable in the proposed open space development." Paragraph 2, line 1, change to read: " This optional phase is the applicant's opportunity to demonstrate why an open space development may or may not be appropriate on this site."

Section 4.12.04 Line 1, change to read: "The 50-foot perimeter setback is a buffer between the structures in this open space development.....and any adjacent parcels." Line 4, change to read: "This buffer may include part of a house lot or the common open space."

Section 4.12.05 Line 1, change to read: ".....development shall be permanently protected through easement, deed, or homeowners association." (Add any necessary other criteria.)

Section 4.8.03 Change to read: "The road shall be posted "Private Way" until accepted by the town."

Section 5.4.02 Line 3 change to read: "All streets will, as far as practical, follow past practice of naming streets after long-time Brookline families, or residents, or geographical features."

Rich suggested that the checklist be revised to add Design of "Open Space". Since there were substantive changes made to the proposed amendments, a second public hearing was scheduled for Tuesday, August 3, 1993 at 8:00 PM.

9:05 PM

**Discussion of Population Growth-Brookline School Board**  
Brookline School Board members Marcia Farwell and Ernest Hudzic were present. Mr. Hudzic told PB members that he was serving on the school facility study committee for the co-op school district. He said Brookline is developing ed-specs and future building plans for the elementary school. Marcia said there are 15 classrooms at the elementary school at present; and the ten year plan after the last addition called for another addition of 4 more classrooms. She feels that they are pretty much on target with their forecast. A 4-room addition will allow for 3 classrooms for each grade level with 1 additional room for the readiness grade. She anticipates this next addition to be built in another 4 years. This would maximize the present site; and would bring the pupil population to 450. Ernie said there had been some discussion about combining the co-op school district from grades 1 through 12 with Hollis, but nothing has yet been definitely decided along those lines. This would mean long-range planning should be focusing on another site location for another elementary school facility.

Rich explained the PB has been focusing on the rapid growth in Brookline in the last few years and the possible need to try to phase in subdivision growth. Demographics indicate that a large proportion of people moving to town are within the child-bearing years; and this means the schools are more than likely to be directly impacted. He said it is hoped that if some kind of growth control mechanism is put into place it can help to avoid drastic growth spikes in all areas of town services. The PB is now putting together the data necessary to support such a growth control ordinance; and any information the school board or superintendent's office is able to give the PB in terms of long-range plans for the school system will be helpful.

9:50 PM Chris made a motion, supported by Judy to adjourn the  
MOTION meeting. Vote was 5-0 to adjourn.

Next meeting Tuesday, July 13, 1993 in Hollis.

**7:30 PM Planning Board Business Meeting**

PB members met in joint session with the Hollis Planning Board to listen to a presentation by members of the Nashua Regional Planning Commission staff of their findings in the road traffic study for Rocky Pond Road. Rich acted as chairman in Peter's absence.

Ray Guarino of the N.R.P.C. handed out copies of the "Rocky Pond Sub-area Planning Study- Findings and Preliminary Recommendations" and explained how the data had been collected. Traffic counts were taken on Old Milford Road, Routes 13 and 130 (Pepperell Road) and Rocky Pond Road. Assessment of the present road conditions involving construction and safety issues were also outlined. Estimates of future housing growth on this road were outlined, and a projection of traffic increase over a ten year period from 1993 until 2003 were given. Currently, 15% of the traffic from Old Milford Road heading east towards Nashua travels over Rocky Pond Road; 25% travels Route 13; and 35% travels east on Route 130 (Pepperell Road/Proctor Hill Road). There are currently two large subdivisions off Old Milford Road being developed which will add 85 new house lots; and a potential development on Rocky Pond Road which will add another approximately 50 house lots in Brookline.

Following the presentation, Ray and Greg Lantos answered questions and asked each planning board to give their input on how to proceed with a proposed plan based on the preliminary study's recommendations. PB members discussed joint efforts to upgrade Rocky Pond Road to a paved road with attention given to making certain portions better in terms of safer sight distance and better road base. It was the consensus of both PBs that a joint effort to upgrade the road was in the best interest of both towns. It would not

be of benefit for either town to act independently of the other in terms of upgrade without having an overall plan for the entire road.

Discussion also focused on a new road being built that would act as an access onto Route 130 for traffic going east into Nashua. It was decided that it would be less expensive to use the Rocky Pond Road which already exists rather than to lay out a new road.

Richard Walker of Hollis proposed that Hollis and Brookline proceed in a two-phase plan which would involve first evaluating the current road conditions; and then getting an estimate of cost for each town to bring the road up to a paved road status. Each PB independently voted on motions to proceed as follows:

8:45 PM  
MOTION

On a motion by Margaret Olson and seconded by Judy Cook, it was voted that Brookline proceed on a two-phase approach plan to up-grade Rocky Pond Road from a gravel to a paved road.

**Phase 1:** The current road base would be evaluated. The road would be widened where necessary; The base would be built up where needed; and A drainage system would be added.

**Phase 2:** When it was determined by each town that either the amount of traffic over Rocky Pond Road had sufficiently increased or that issues of safety warranted it, the road would be paved.

It was felt by both planning boards that this two-step plan would provide a means to up-grade the road in phases which would not be too costly for either town in any one year's road construction budget; and still provide a safer road when the housing development and traffic load dictated the need to improve the present road conditions.

The planning boards thanked the members of Nashua Regional Planning Commission, and will meet in a joint session again when the next report is ready.

Meeting was adjourned at 8:50 PM.

PLANNING BOARD MEETING

July 20, 1993

PRESENT: Peter Webb, Chairman, Voting (joined meeting at 8:15 PM)  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate, Voting for Joe  
Dennis LaBombard, Alternate, Voting for Rich  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:45 PM Planning Board Business Meeting  
MOTION The minutes of the July 6, 1993 were reviewed. Judy made a motion to accept the minutes as written. Chris seconded the motion. Vote was in the affirmative 3-Yes, 0-No. PB members tabled the minutes of the July 13th meeting as there was not a quorum of members present to vote on them. Chris chaired the meeting in the absence of Peter and Rich.

7:50 PM Catherine Whitcomb, Non-residential Site Plan Review, Case #1993-B:G-53-1. Cathy and Steve Whitcomb were present with a non-residential site plan proposing use of the former Barnside building as an antique shop on the second floor; and a craft shop on the right-side of the lower level. She has contacted the State of N.H. Dept. of Transportation and has their OK regarding curb cuts. She presented PB members with a diagram of the locations and the work the state recommended be done to clearly delineate the two driveways. Discussion focused on the current shared driveway between lot G-53-1 and the former Tunkel property, Lot G-54. (It was noted that a Non-residential Site Plan has been filed with the PB for a new building on that site). Chris said the plan should show parking spaces and asked about a sign. Jeremy said the site plan was presented showing the entire lot of 17 acres, and the 3-level building. At the present time, the Whitcombs said they plan only some minor interior renovations. A sign conforming to the Brookline sign ordinance will be placed for both businesses. Jeremy said there was ample parking spaces. He suggested they contact Larry Thibeault about a shared driveway easement between Lots G-53-1 & G-54. Jeremy said he will contact the State about the shared driveway, and suggested that a notation be added on both site plans if the driveway is shared. He said that site plan regulations call for 10 parking spaces on the

North and 10 on the South side of the graveled parking lot. There were no abutters present.

8:00 PM Chris made a motion to accept the plan as presented.

MOTION Margaret seconded the motion. Vote was 4-0 yes to accept. Chris asked that the Whitcomb's add a notation to the plan with the state driveway permit number when they receive it. He said the parking areas should also be shown on the plan. Case continued till August 17, 1993 for approval.

8:15 PM Discussion of Growth Control Options

(Peter joined the meeting at this time)

Jeremy referenced a discussion with Town Counsel Bill Drescher in which Mr. Drescher emphasized that compiling statistics to support a growth control ordinance is very important. He also said the ordinance should be a revisable ordinance which would be reviewed once each year by the planning board or their designee to see if there is a need for revision. Jeremy said Bill suggested other options to control growth might be:

- 1) Increase lot size
- 2) Implement back lot zoning
- 3) Phasing of subdivision
- 4) Limit number of building permits

Jeremy said the PB has to decide in which direction to proceed. Chris asked if we now have the necessary statistical information in the Master Plan? Jeremy answered no, but it may be possible to adopt a separate chapter as an appendix to the latest master plan, and he will look into the best way for inclusion. A capital improvement plan with school figures included is also necessary data.

Peter asked what other statistical information independent of the C.I.P. is consistent with the body of the current master plan? Jeremy will research this. Jeremy will also work on subdivision phasing for the next work session.

Margaret said she is willing to gather information from the school boards. Principal Rich Maghakian has information on the population at the elementary school; and the school board has growth projections which can be used. Discussion also centered on what information may be available from the Hollis/Brookline Co-operative school board on projected plans for the middle school and the high school.

Margie and Terry Sherlock were present and offered to write some articles on growth for publication. Terry said they will plan to have an article ready for the next issue of "Our Place" on the problems rapid growth in town has caused.

9:00 PM Chris made a motion to adjourn the meeting. Judy seconded  
MOTION the motion. A 5-0 yes vote to adjourn was taken.

PLANNING BOARD MEETING

August 3, 1993

PRESENT: Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate, Voting for Joe  
Dennis LaBombard, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:35 PM Planning Board Business Meeting  
MOTION Chairman Peter Webb opened the meeting. Minutes of the July 20, 1993 PB meeting were reviewed. Peter made a motion seconded by Chris to accept the minutes as written. Vote taken was 5-0 yes to accept the minutes as written.

MOTION Minutes of the July 13, 1993 were reviewed. Judy made a motion to accept the minutes as written. Rich seconded the motion. Vote was in the affirmative 3-Yes, 2-Abstentions (Peter and Chris not at the July 13th meeting).

7:40 PM Margie and Terry Sherlock were present with a draft of an article to appear in the next edition of "Our Place". PB members were to read it and make and suggestions for change to them by the end of this week.

7:45 PM PB members reviewed a letter sent by the Lincoln Institute of Land Policy in Cambridge, Mass. and drafted a response to the questionnaire enclosed.

Jeremy reminded PB members that the fall law lecture series is being planned. He will have more information on the topics and the dates in the near future.

Rich asked PB members to focus on some ideas for PB projects for 1994. He felt that commercial development and site plan reviews need to be examined.

8:00 PM Public Hearing-proposed Subdivision Regulation Changes  
Peter opened the public hearing portion of the meeting. There were no people present in the audience for this hearing. Jeremy reviewed the changes made from the first hearing. After discussion by PB members, it was voted to make the following changes to the 7/20/93 draft: Page 2, Section 4.9.06, Line 1657 change to read: "...- calling. The

language in the letter of credit shall provide that if all  
.....to be called. Without any further action....."

Page 3, Section 4.6.04, a) & b) add to requirements for both  
approaches: " -high intensity soil survey showing--major  
wetlands areas, steep slopes. Add sentence at end of list to  
read as follows: "A high intensity soil survey will be  
required for all plans to delineate soils."

Page 4, section 4.12.02, Line 1, change to read: "As noted  
in sections 3.1.23 and 4.6.04, it is strongly....."

Rich made a motion to make the above changes. Peter seconded  
the motion. Vote was 5-0 yes. It was noted that these  
were substantive changes and another public hearing on  
proposed subdivision regulation changes would have to be  
held. It was decided to have the hearing held on Tuesday,  
September 7, 1993.

**8:15 PM Planning Board General Business**

There was a discussion between PB members on whether it was  
feasible to have the test pits and septic system inspections  
done by a qualified person representing the Town of  
Brookline. Secretary to check with the Town of Hollis to see  
how they handle the sub-surface and test pit inspections.

**8:30 PM  
MOTION**

Chris made a motion to adjourn the meeting. Judy seconded  
the motion. A 5-0 yes vote to adjourn was taken.

Next Planning Board Meeting Tuesday, August 17, 1993

Submitted by: Sandra L. Fessenden  
Sandra L. Fessenden, Secretary  
Brookline Planning Board

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

**PLANNING BOARD MEETING**

**August 17, 1993**

**PRESENT:** Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting  
Judy Cook, Selectmen's Representative, Voting  
Dennis LaBombard, Alternate, Voting for Chris  
Margaret Olson, Alternate (joined meeting at 7:45 PM)  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**  
Chairman Peter Webb opened the meeting. Minutes of the August 3, 1993 PB meeting were tabled till later.

**7:30 PM Catherine Whitcomb, Non-residential Site Plan Review, Case #1993-B:G-53-1.** Cathy and Steve Whitcomb were present. Jeremy said the outstanding issues from the last meeting were: 1) Location of parking being shown on Plan  
2) State driveway permit in conjunction with lot G-54.

Cathy indicated she had submitted a copy of the plan showing parking areas for the lower level craft shop and main level antique shop. She has received her state driveway permit. Building Inspector Wes Whittier was present. He said he was interested in any renovation or construction that might require the building being brought up to present codes. Steve answered that all they were planning to do at this time was to remove the rug and replace a few windows. There would be no structural changes requiring a building permit. Fire Chief Ray Kecz asked if the antique shop would be used to hold auctions. If used as a place of assembly for 50 or more people, the building will have to be brought up to current life safety codes for the public assembly areas. These codes are more stringent.

Steve replied no auctions would be held. He did not anticipate more than 50 people present at any one time. Rich asked if a sprinkler system would be required and if the building itself is structurally sound. Cathy said sprinklers were necessary when they were talking about the kindergarten being there. Steve answered that the new portion of the building is sound; and if anything is found to be unsafe within the building, it will be fixed. Jeremy noted work was being done on the driveway entrances. Rich inquired if they would be sharing the driveway with the abutting lot, and if there were any landscaping plans.

Steve said not other than loaming and seeding. Cathy responded that they have talked to the abutting property owner (Larry Thibeault), and there is no problem with the shared drive. She will add it to the plan if the PB wants. Peter asked the about width of the shared driveway. Steve said it was about 75 to 80 feet at the entrance. Jeremy suggested that paving 25-30 feet of the drive might be a good idea to prevent soil erosion if the abutting driveway is being paved according to their plan. Peter and Dennis felt requiring Steve to pave his portion might not be warranted because the intensity of traffic to his location would not warrant it at this time. They could perhaps better define the entrance on their side.

7:45 PM Wes mentioned that there was a need to review the A.D.A. (American Disability Act) codes for any usage on the second floor; and he said that any commercial use open to public access must provide a handicap access. Peter said he had concerns about the third level being used because of safety issues. He wanted to restrict this site plan review to use of the lower level and first floor only. He asked about signs, lighting and hours of operation. Cathy said there were 2 outside lights there now, and there would be a sign on the building for each use conforming to the sign ordinance. She plans to have the craft shop open Wednesday through Sunday from 10:00 AM to 8:00 PM. She was not sure about the antique shop, but would anticipate it would be open during daytime hours. She would like PB permission to operate all 7 days of the week.

Abutters Comments: No comments were voiced.

7:50 PM Peter made a motion to grant conditional approval pending MOTION the following being done:

- 1) Define driveway on the north side to a 30 foot width either by paving or landscaping.
- 2) Restrict use of the building to the first and second floors.
- 3) Maximum capacity per business to be limited to 50 people or less.

Rich seconded the motion. Motion to grant conditional approval 5-0 yes.

7:55 PM Larry Thibeault, Non-residential Site Plan Review, Case #1993-C:G-54. Mr. Thibeault and Jim Edwards of Meridian Land Services, Inc. were present with a site plan proposal to build an 8,000 square foot industrial building on lot G-54. Jim said it would be a single story concrete block flat-roofed building. They would use existing access from Route 13, an existing well, and would place a new septic system. The proposed use is for a plastic injection molding business employing approximately 20 employees, with future expanded growth of up to 40 employees. When questioned about the number of parking spaces shown (18) Jim answered that he had followed the site plan regulations. There is room for more to be added if necessary. They are regrading the gravel drive to alleviate the area which exceeds an 8%

grade; and are planning to pave to make it easier for tractor/ trailers to access and exit the site. They propose leaving the north entrance as is; and are requesting they be allowed to retain the use of the last mobile home (north side) for a residential rental unit. They intend to install a drainage system with a detention area to catch the water flow from the roof drains and the down slope drains. There will be an inflow and outflow pipe to connect to a 24 inch culvert under the existing driveway and drain into a culvert crossing under Route 13. The septic system is designed to be placed to the front of the building; and they will retain the wooded area in front for a visual barrier. The building will be placed approximately 85 feet from the property line (120 feet from edge of Rte. 13 pavement). The use of the trailer for rental is not connected to the business. **Jeremy** had run the plan through the regulation checklist and had the following concerns:

- 1) Dual use of industrial building and a residential unit on a two acre site.
- 2) Zoning Article IV, B. USES PERMITTED, #12 specifically states: "Any use which does not offend by emission of smoke, dust, gas, noise, odor, or fumes."
- 3) Soils data required and steepness of property.
- 4) Artist's rendition of the site.

**Jim** said there are no wetlands on the site, and there is a gravelly canton complex mix of soils in the area in front of the building where the test pit was dug.

**Judy** asked if the 40 foot building to the left of the new proposed building would be left there. Answer-yes.

8:12 PM  
MOTION

**Rich** made a motion to accept the plan as presented. **Peter** seconded the motion. Yes vote to accept 5-0.

**Rich** said he would like the PB to visit the site.

**Abutters Comments:** **John Polidoro**, owner of lot H-22 stated he lives in an historical building (old railroad station) directly across the street. Some of his feelings and concerns are as follows:

- 1) Wrong place for an industrial building; and tree removal will spoil the view of the mountain.
- 2) Water runoff may be increased onto his property and the **Nadreau's** property next to his.
- 3) Three shift operation with interior and exterior lights on and machinery operating all night long.
- 4) Increased problem at the intersection of Bond Street and Route 13 with trailer trunks entering and exiting may result in traffic light installation for safety.
- 5) An expanded commercial use directly across from a residential area. Previous use has been residential-trailers with one or two bedrooms.

**Judy** also expressed concern with the amount of traffic and the type of vehicles entering and leaving the site.

**Mr. Thibeault** said to begin with there will only be 2 or 3 tractor trailers per week delivering plastic material to the site. The same amount of common

carrier trailers or U.P.S. trucks will pick up the finished product packed in boxes.

**Peter** said he wants as much vegetative growth left as possible for a visual barrier. He asked about the hours of operation, amount of noise, and any exhaust.

**Rich** said he had aesthetic concerns with an industrial operation in an otherwise commercial area.

**Mr. Thibeault** said he currently operates a 1 1/2 shift business in Amherst, and anticipates beginning a 2 shift schedule in Brookline with future expansion to 3 shifts. No noise will be discernable outside of the building.

**Judy** asked if there was any hazardous material.

**Mr. Thibeault** answered no. The plastic comes in pellets. Waste pellets can be ground up and re-molded. There are no solvents used; and no fumes are exhausted the outside. Heat is expressed outdoors with a normal HVAC system; and the molds are water cooled.

**Wes Whittier's** concerns were with the type of materials stored on site, and the building adhering to all necessary town, state, and federal requirements.

**Clarence Farwell** asked if the same type of sprinkler system would be installed in this building as Grant Plastic has. (This will be checked into.)

**Judy** asked about exterior lighting.

**Mr. Thibeault** said there will be 2 pole lights with one directed toward the building entrance. A wooden sign similar to Grant Plastics sign will be used.

**Judy** said both this plan and Cathy Whitcomb's plan should show the common driveway; and they should investigate whether a driveway easement is necessary.

**Margaret** said she was uncomfortable with the dual use (industrial and residential) on a 2 acre lot.

**Peter** said he would like to see the entrance onto Route 13 on the north side closed off.

**Judy** expressed concern with the increased traffic at the Bond Street intersection.

**Road agent Clarence Farwell** said the increase in the Route 13 traffic is more of a problem than entering and exiting traffic from this site.

**Jim Edwards** said the visual screening could be improved, but safe site distance onto Route 13 is also necessary.

**Joe Kagenski** said it is his feeling that the dual use of the lot does not comply with our zoning ordinance, and that approval of the plan as presented would need a variance approval of the Zoning Board of Adjustment.

**Jim** asked if final site plan approval could be contingent on the trailer being vacated prior to occupancy of the new building. This will be discussed at the next meeting.

Case continued till September 14, 1993.

Site walk scheduled Saturday, August 7, 1993, 9:00 AM.

9:00 PM Talbot-Taylor Estates Partnership, Case #1993-3:6-61  
Bob Bourassa and Randy Haight of Meridian Land Services, Inc were present with a plan to subdivide Log G-61 into 2 lots. **Jeremy** said that there were no issues with this subdivision.

Bob has reached agreement with the Selectmen regarding off-site improvements to Cleveland Hill Road.  
9:03 PM Joe made a motion to accept the plan as presented with Peter  
MOTION seconding the motion. Vote taken: 5-yes, 0-no.

**Abutters Comments:** Mr. & Mrs. Timothy Nye owners of lot G-61-23 were concerned about the house location on these lots.

MOTION Joe made a motion to approve the plan pending the following items being done:  
1) W.S.&P.C. Subdivision Approval #.  
2) All fees being paid  
3) Mylar presented  
4) Note #2 corrected to add " G-61-29"  
Rich seconded the motion. Yes vote 5-0 to approve plan.

9:05 PM **Planning Board General Business**  
Jeremy said he had a meeting with Mr. Courtemarche of D.C. Tire regarding site plan review for Lot K-77, 27 Route 13 South (R.W. Shop location). There is no current site plan for this lot. Mr. Courtemarche plans to convert part of the shop into a service bay. It was the consensus of PB members that he should come in to discuss this with the PB.

Judy asked if the PB would require a site plan for an agricultural business operation on Route 13 in the residential zone if it were deemed to be allowable. PB members felt site plans were required for any allowable business in either the residential or commercial zone.

9:20 PM PB members reviewed the minutes of the August 3, 1993 PB  
MOTION meeting. Peter made a motion to approve the minutes as written. Rich seconded the motion. Vote 5-0 yes.

Joe introduced Brian Kirschner as a prospective planning board member. Also present was Robert Chisholm. Both men are giving consideration to becoming alternate members.

9:35 PM Rich made a motion to adjourn the meeting. Dennis seconded the motion. Vote was 5-0 yes.

~~Next Planning Board Meeting~~ **September 7, 1993**

Submitted by: Sandra L. Fessenden  
Sandra L. Fessenden, Secretary  
Brookline Planning Board

**PLANNING BOARD MEETING**

September 7, 1993

**PRESENT:** Peter Webb, Chairman, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting (joined meeting at 7:40 PM)  
Dennis LaBombard, Alternate, Voting for Rich  
Margaret Olson, Alternate  
Bennett Chandler, Selectmen's Alternate, Voting  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting

**MOTION**

Chairman Peter Webb opened the meeting. Minutes of the August 17, 1993 meeting were reviewed. Peter made a motion to accept the minutes as written. Dennis seconded the motion. Yes vote 5-0.

**7:40 PM** David Bingham, Bingham Lumber Co.—Dave Bingham was present to discuss with PB members his application to the State of N.H. for a vehicle inspection license. He made application for the permit for the convenience of inspecting the company vehicles and does not intend to operate a public inspection facility. By state regulation, he must post a sign and an inspection fee. He has the right to choose the amount of the fee; and he will post one high enough (ex: \$50.00) so as not to encourage use by the general public. He will inspect diesel vehicles, and is qualified to inspect airbrakes. He will not be doing emission testing. The garage he will use is 400' to 500' feet back from Route 13. Since the sign has to be on the building where the inspection is conducted, it will not be visible from Route 13. He would have preferred to have a fleet inspection permit, but does not have the 15 vehicles required by the State for this type of license.

**MOTION**

After discussion by PB members as to whether this would constitute an expansion of use requiring a site plan review, on a motion by Margaret seconded by Peter, the Planning Board waived the requirement for site plan review for the following reasons:

- 1) The State of N.H. inspection sign will be on the inspection building only with no other signs posted.
- 2) There will be no inspection of vehicles belonging to the general public done; and
- 3) The Planning Board does not deem this an expansion or change of current use.

8:00 PM **Public Hearing-Proposed Subdivision Regulation Changes**  
PB members reviewed the changes from the second public hearing held August 3, 1993. Peter, for clarification, suggested the following wording for the second sentence on Page 2, section 4.9.06.: ".....shall provide that if, as of the day before expiration, the issuer has not been advised in writing by the Town of Brookline that all improvements guaranteed by the letter of credit have been satisfactorily completed, the letter of credit is automatically called." Sentence 3 to read as follows: "The language of the letter of credit shall provide that, in such an event, without any action on the part of the Town of Brookline, the Bank shall immediately forward a check to the Town of Brookline, payable to the Town of Brookline, in the amount of the letter of credit." Page 3, section 4.6.04, for clarification of meaning the following was suggested for the paragraph in section a) : " an open space development with the number of lots which the Planning Board deems acceptable under the above conventional plan." Section b) " The applicant may use a general 1 unit per 80,000 square foot calculation, subtracting out slopes greater than 25% and wetlands. For this calculation, the applicant must present a plan....."

Delete the last sentence in section 4.6.04..  
MOTION Margaret made a motion, seconded by Chris to accept the clarification changes Peter had suggested. Yes vote 5-0.  
MOTION Chris made a motion to accept the proposed subdivision regulation changes in the August 5, 1993 draft with the two clarification changes to sections 4.6.04 and 4.9.06 as noted above. Margaret seconded the motion which carried by a 5-0 affirmative vote.

8:25 PM **Planning Board General Business**  
a) Brian Kirschner and Robert Chisholm, Jr. were present to talk with PB members about becoming alternate members of the Planning Board. Brian and Bob both expressed an interest in serving on the PB because of a desire to get involved in their community and help to guide its growth. Peter made a motion to recommend to the selectmen the appointments of Brian Kirschner & Bob Chisholm as Planning Board Alternates. Margaret seconded the motion. Vote in the affirmative 5-0.

MOTION  
b) Joe reported that the site walk to Larry Thibeault's on Route 13 had taken place August 7th. They didn't have a design plan with them, and it was unclear where the area of the proposed leach field was and how many trees would be cut as there are two clumps of trees there now. There was some concern expressed about where the existing culvert as shown toward the Barnside building drains to. Dennis said there was a headwall 100 to 150 feet down the road. There is no existing swale; and they will need to extend the ditch from

the 24" culvert they are placing (according to the drainage plans) to this headwall. Peter said his concern is with the tractor trailers entering and leaving the site. He would prefer none of the screening trees be removed. Joe also noted that the north entrance is not good. It is steep and not necessary. If additional parking spaces are required, where would they go. Jeremy said he will talk to Jim Edwards regarding issues raised after the site walk. Jeremy also apprised PB members that Mr. Tom Mahoney has made no further contact with the PB regarding his tire operation at the Brookline Pizza property on Route 13 north. Ben said he will report this back to the selectmen. Jeremy said the final copies of the Rocky Pond Road study are available. Secretary to make copies for PB members.

8:47 PM

**Population Growth Memorandum Update**

PB members discussed the August 16, 1993 update memo Jeremy had prepared. Peter said he would like to have the increase over the last 5 to 10 years in the amount of road surface the town is now maintaining incorporated into this document. He said he also feels there are not enough recreational facilities in town. He asked if the growth impact on the transfer station over this same time period could be ascertained. PB members felt the addition of the number of car registrations, ambulance, police and fire calls could be added into the document. Jeremy will gather this data, and PB will discuss this at the next work session October 5th.

9:05 PM

**Talbot-Taylor Estates-** Robert Bourassa was present with a red-lined copy of the road profile changes regarding road width (22 feet) and the fire pond that the PB had approved. Jeremy noted that the road width change affects only the inside of the road and does not affect the drainage or lot lines. Chris made a motion to accept the plans. Margaret seconded the motion. Yes vote 5-0. Peter signed the plans. Bob said he would be getting a letter of credit before the next meeting on September 21st.; and asked what was needed to lift the lot sale restriction recorded at the Registry of Deeds for the loop portion of Taylor Road. PB members said he needs the following:

MOTION

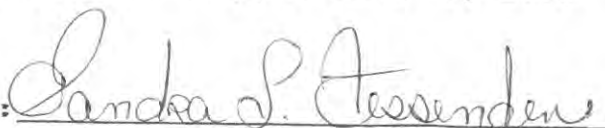

- 1) Bond estimate for road completion.
  - 2) Letter drafted by his attorney lifting the lot sale restriction with the placement of a road bond. To be signed by the PB and recorded at the Registry.
- Bob will have this done for the next meeting.

9:45 PM

Ben made a motion to adjourn the meeting. Dennis seconded the motion. Vote was 5-0 yes.

**Next Planning Board Meeting Tuesday, October 5, 1993**

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

MINUTES  
PLANNING BOARD MEETING  
SEPTEMBER 21, 1993

**PRESENT:** Peter Webb, Chairman, Voting  
Rich Napolitano, Vice Chairman, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Rep., Voting  
Joe Kagenski, Voting  
Bob Sykes, Alternate  
Dennis LaBombard, Alternate  
Jeremy Ginsberg, NRPC Representative  
Rena Duncklee, Acting PB Secretary

**7:30 PM Planning Board Business Meeting**  
Chairman Peter Webb opened the meeting. Minutes of the September 7, 1993 meeting were reviewed.

**MOTION** Peter moved to accept the minutes as written.  
Seconded by Dennis and voted yes 3-0 (Judy and Rich abstained as they were not at the meeting).

**Talbot-Taylor Estates Partnership, Case #195** - Jeremy reported that Phase I is almost complete. Bob Bourassa has received an estimate in the amount of \$164,350 from Road Inspector Bill Duncklee for the completion of Phase II in order to get a bond. Bob submitted a letter for release in the Registry of the restrictions for selling lots.

**MOTION** Rich moved to set the bond in the amount of \$164,350 and sign the letter releasing the restriction. Seconded by Judy and voted yes 5-0.

**7:40 PM Anna T. Kinney, Case #1993-4:F-11** - Lot F-11 containing 42.383 acres is being subdivided into a 12.119 acre lot with the existing house (lot F-11-4) and the remaining lot containing 30.264 acres (F-11). Jeremy reported minor changes are needed to the plan: locus map showing reference roads, correction of lot numbers, abutter lot #F-23-1 should be F-13-1. Randy Haight of Meridian Land Services arrived with the revised plan. Rich asked whether the wetlands delineated were from SCS or a field survey; Randy said they were from both.

Dennis asked how this subdivision fit in with open space development. Jeremy said because of the potential future development of the 12 acre parcel they will be asking for a waiver of the open space development ordinance. Randy explained that the people buying the house don't want all 42 acres which is the reason for this subdivision. Rich asked whether this could be a way to circumvent the open space development ordinance.

PLANNING BOARD MEETING  
SEPTEMBER 21, 1993, Pg. 2

**MOTION** Joe moved to accept the plan for consideration; seconded by Peter. Vote 5-0 yes to accept.

Peter read letter submitted by Anna & William Kinney to request approval and to consider this a minor subdivision as they have no plans for future subdivision of lot F-11-4. Abutter Tom Moran said the 12 acre parcel makes good sense; the intent is probably to keep 10 acres in current use. Judy said she sees no reason to delay taking action on this subdivision and asked Randy whether the Kinney's would consider a conservation easement along the brook. Randy said the last time the Kinney's gave land along the road in order to straighten a curve in the road and wouldn't want to encumber the land with a conservation easement. Dennis said he felt this subdivision circumvents the open space development ordinance; Chris said a 12 acre lot preserves open space.

**MOTION** Chris moved to approve the subdivision and waive the open space development requirement as it meets the intent of the ordinance and promotes the conservation of the natural environment. No second.

Peter said he's concerned with chipping away at small subdivisions. Joe said he feels the Board can regulate conditions in a future subdivision of this lot.

**MOTION** Rich moved that the Board finds that the open space development option should apply to lot F-11-4 even though this lot has less than the required 20 acres. Voted yes 5-0.

**MOTION** Rich moved, seconded by Judy to approve the subdivision pending fees being paid, a new mylar with a note on the plan referencing Article 16, Open Space Development apply to lot F-11-4 in the future even though this lot has less than the requirement of the minimum lot size of 20 acres. Voted yes 5-0.

**8:25 PM** **N.R.S.P. #1993-C:6-54 Case continued** - Jim Edwards of Meridian Land Services was present along with applicant Larry Thibeault. Jim said the changes have been made on the plan; the residences on the site will be vacated; the northernmost access will be closed; the septic design has been submitted to the state; added plantings for additional screening and the abutter across the street added.

PLANNING BOARD MEETING  
SEPTEMBER 21, 1993, Pg. 3

Rich said at the site walk there was a concern about the culvert. Jim said the proposed culvert under the driveway will be of considerable size and that the Dept. of Transportation has asked for a profile. Judy said she went to Grant Plastic and their parking area is larger than the building and feels more space needs to be designated for the large vehicles turning around. Jim said there is over 100' by the building. Judy asked where any expansion would take place if needed in the future; Jim said at the northern end.

Judy asked if a sprinkler system is needed for this type of building. Larry said his present facility in Amherst has no sprinkler system. Building Inspector Wes Whittier said he has talked to Fire Chief Ray Kocy and doesn't think a sprinkler system is required but the fire chief would have to make that determination. The fire engineers will be asked to come in to the next meeting.

Judy asked Emergency Management Director Wes Whittier about hazardous materials in this type of business. Wes said there are more hazardous materials in the gas stations nearby. He said New Hampshire is not an OSHA state. Abutter Jack Polidoro said he feels this is very toxic material; Wes said the material is not on the list of 100 most hazardous materials.

Larry said the building will be 8,000 sf; 2,000 sf for office, 2,000 sf for warehouse and the rest for plastics and machine shop.

Peter asked if there is any drainage from the building other than septic; Larry said there is none; pieces of plastic get reused.

Larry submitted drawings of the building showing the exterior of the building (14' high). Judy encouraged more screening by the northern driveway. Peter asked about noise and smell outside of the building. Larry said there is none outside the building; nothing is vented outside of the building. Judy said she went to Grant Plastics and noticed there is no noise until you go inside the building and there was no smell. Jeremy said he went to Larry's present site in Amherst and encouraged the planning board members to drive by. He said there was no noise or smell and he was about 30' from the building. Libby asked about the water used. Larry said the water is reused and doesn't leave the building.

PLANNING BOARD MEETING  
SEPTEMBER 21, 1993, Pg. 4

Judy asked how much vegetation would have to be cut for the building. Larry said about a 30' x 100' area. Jack Polidoro said large trees absorb a lot of water and the cutting of trees will affect the flow of water. Dennis asked if he had any numbers to back up that statement and said he felt there would be no effect on the flow of water. Conservation Commission Member Libby Wehrle-Anderson asked if there were any drainage calculations done; Jim Edwards said yes.

It was noted the existing trailers on the site would be removed and the area loamed and seeded. There would be 22 parking spaces. Sid Hall asked how many pickups there would be. Larry said about two (2) tractor trailers and two (2) UPS trucks per week. Jim said the driveway permit was in the process with the state. Peter encouraged anyone with concerns to visit the existing site in Amherst.

Peter said he was concerned with the visual effect of the building. Libby asked how such a building can fit into the rural new england atmosphere. Sid said he felt this type of building would be out of character with our rural, scenic, quaint atmosphere. Rachel Moran asked if the look of the front of the building could be made to fit in more with the rural character of the town. Peter said we have to determine whether it would be detrimental to the town; Judy said there are many other commercial activities that would be more detrimental. Marcia Farwell noted that the town voted to build a cinder block school building plus two additions to it. John Sojka said he was concerned with trailers being moved onto the property in the future for storage. It was noted they would have to come back to the planning board for any change. Larry suggested textured block on the front of the building; Judy suggested the side along Barnside also be included.

Peter asked them to make revisions commensurate with the comments and return on October 19th.

9:50 PM GENERAL BUSINESS - Judy said the selectmen ask that the planning board define forestry activities in the zoning ordinance and that town counsel has recommended we adopt our own definition instead of going with the state definition.

PLANNING BOARD MEETING  
SEPTEMBER 21, 1993, Pg. 5

Libby pleaded with the Board to do something about a growth ordinance because of traffic and increased taxes with the schools.

Donna Lang expressed concern with the noise from construction vehicles in new subdivisions at the northern end of Old Milford Road. It was noted the planning board is working on that with the East/West Corridor study of Rocky Pond Road.

Sid asked if there was any alternative for hot top on sidewalks. Clarence said that's the most economical; bricks and concrete are more expensive.

Tom Moran asked about reducing the width of the roads in the **Mountain Road Estates II and Birch Hill Estates II** subdivisions from 24' to 20'. Clarence said he was in favor of 20'. The planning board reviewed the subdivision plans for both subdivisions.

**MOTION**

Judy moved, seconded by Chris to amend the width requirement of the roads in the Mountain Road Estates II and Birch Hill Estates II subdivision to 20' and for Tom to submit a red lined plan. Voted yes 5-0.

Chris moved to adjourn the meeting at 10:15 p.m. Seconded by Judy and voted yes 5-0.

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

**PLANNING BOARD MEETING**

October 5, 1993

**PRESENT:** Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Dennis LaBombard, Alternate, Voting for Joe  
Margaret Olson, Alternate, Voting for Chris  
Judy Cook, Selectmen's Representative, Voting  
Bob Chisholm, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM Planning Board Business Meeting**

**MOTION** Chairman Peter Webb opened the meeting. Minutes of the September 21, 1993 meeting were reviewed. Peter made a motion to accept the minutes as written. Rich seconded the motion. Yes vote to accept the minutes was 5-0.

**7:40 PM Grizzly Development Corp.-Road Bond, Mosher Drive**

Robert Pace and Mike Maggio were present to discuss road construction bonding for Mosher Drive. Bob expressed his desire to bond the road in two portions so that he could obtain 3 building permits in the cul-de-sac area (Sta 14+75 to Sta. 25+9) as soon as possible. Plans are to have the entire road finished within the next three weeks, all but the second coat of paving which will be done next spring. They are still waiting approval from the State Attorney General's office. Road Inspector Dennis LaBombard had prepared a report of the work completed to date, and road bond estimates for PB members to review. Peter said he was not in favor of bonding the road in segments. He understands the financial realities for the developer, but he would rather err on the side of caution to avoid problems for the Town if the developer runs into financial difficulties and cannot complete the road. Judy said the Town needs this road to be completed for life safety reasons as another access onto Old Milford Road. She would be willing to allow partial bonding if all remaining lots on Mosher Drive were prohibited from sale by a restrictive document recorded at the Registry of Deeds. Margaret said she was not in favor of breaking our own rules to accommodate this particular case. She felt this was a variation of the same argument the PB has heard from other developers seeking to do the same type of bonding. After further discussion between PB members, Mr. Pace, Mr. Maggio and Road Inspector Dennis LaBombard about the amount

MOTION

needed to bond the entire road, Peter made a motion to temporarily reduce the amount held for engineering and contingency to \$5,000.; and set the total of the construction bond for Mosher Drive at \$122,000. The entire engineering & contingency amount (25% of the total remaining work) will be added back in when the first bond reduction is approved by the selectmen. Rich seconded the motion. Vote was 4-0-1 Abstention (Dennis).

**Mosher Drive-Grade Changes-** Dennis explained to PB members some grade changes to the road profiles the developers were asking the PB to approve. He said the road grade needs to be raised to avoid water and <sup>LEOSE</sup> ~~to match the existing grade at Sta. 7+50.~~ He indicated the areas they proposed the raise in grade were necessary partly because 1986 aerial topography maps used were incorrect. The changes will create more material on-site, but the new grade will not exceed our 8% maximum grade and will tie into the existing intersection. Rich asked if any additional wetlands were being filled in. Dennis answered no.

MOTION

Margaret made a motion to approve the road changes as presented on the red-line plan. Rich seconded the motion. Affirmative 5-0 vote to accept the road grade changes as shown for Mosher Drive.

8:20 PM

Marcia Farwell and Albert Valliere were present to ask if conceptually lot F-56 containing 7.62 acres could be subdivided into 2 lots. The lot on which Mr. Valliere's house is built (F-56) would become a 5 acre back lot. Jeremy had looked at the plan and said that because of the location of wetlands on the property, it would make for 2 odd-shaped lots in order to meet current zoning and subdivision requirements. PM members suggested to Mr. Valliere that he allow for a 30 foot parallel access to his existing driveway to meet the back lot access requirement. It was recommended he have an engineer look at his plan to make a determination as to whether the two lots would conform to all subdivision and zoning requirements.

8:30 PM

**Population Growth Memorandum Update**

Jeremy had prepared a proposed addendum to the Master Plan based on the statistical data he has been gathering on Brookline's growth. (This replaces pages 13 through 18 of the previous growth memo). He suggested PB members read it and be prepared to discuss it at the October 19th meeting. He said the criteria necessary for implementing a building permit restriction could be decided on at that time.

9:15 PM

**Zoning Changes for 1994 Town Meeting**

Jeremy said the following two items need to be discussed for proposed changes to the zoning ordinance:

- 1.) A change in the local floodplain ordinance because of new wording in the National Flood Insurance Program.
- 2.) A change in the Building Code section to allow for the adoption by reference of updates to the National Building Codes.

Amended  
10/19/93  
SUF

9:20 PM Planning Board General Business

1) PB members looked over the 1993 Planning Board budget and the 1993 expenses to date. It was decided to budget for an update of the C.I.P. (\$1,100.); and to increase the budget to allow for notices for a town-wide mailing to be done regarding zoning changes prior to the 1994 town meeting. Total 1994 Planning Board Budget was set at \$21,900.

2) Jeremy showed PB members the new hydric soils and wetlands maps prepared by NRPC. Visually they are a good aid in helping to locate wetland soil areas in Brookline.

3) PB members read the 9/17/93 selectmen's memo regarding the Non-residential site plan for Holmes/Swenson property on Route 13 north, Lot D-76. It was not clear that more than one vehicle had been advertised for sale on the property, and PB members felt a sale of one vehicle was not a problem. The location of storage buildings for display and sale might become a problem if the areas designated for parking on the site plan are not allowed for. A memo will be sent to the selectmen recommending they meet with Linda Holmes or the person renting her property and make sure they understand the limits of the approved site plan.

9:50 PM Rich made a motion to adjourn the meeting. Judy seconded the motion. Meeting was adjourned by a 5-0 yes vote.

Next Planning Board Meeting Tuesday, October 19, 1993

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

(603) 673-8855

TOWN OF  
**BROOKLINE, NEW HAMPSHIRE**

P.O. Box 360  
Brookline, NH 03033

PLANNING BOARD MEETING

October 19, 1993

**PRESENT:** Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Dennis LaBombard, Alternate, Voting for Joe  
Bob Chisholm, Alternate, Voting for Chris  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate (Joined meeting at 7:40)  
Bob Sykes, Alternate (Joined meeting at 7:40)  
Brian Kirschner, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

**7:30 PM** Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the October 5, 1993 meeting were reviewed. On page 2, Mosher Drive-Grade Changes, line 4, Change to read: "be raised to avoid water and ledge." Peter made a motion, seconded by Rich to accept the minutes as amended. Yes vote 5-0.

**MOTION**

**7:35 PM** Tom Moran-Mountain Road & Birch Hill Estates, II  
Tom Moran and Bob Bramley, General Partners were present to ask the Planning Board, in conjunction with the Board of Selectmen, to sign a letter of compliance to be recorded at the Hillsborough County Registry of Deeds releasing for sale those lots which are in the first phase of road construction. Tom said Westview Road has been completed, and within the next two weeks they will be finished setting the bounds, placing guard rails where required, and putting up signs. They will then come back to ask the PB to accept the road and set the amount to be held for a maintenance bond. He requested they be allowed to leave the final loaming and seeding of the side slopes till next spring because of the lateness of the season.  
Judy said the selectmen met with Tom last night, and are in agreement that they will sign the letter of compliance.  
Fire Chief Ray Kacy asked about the fire pond on Overlook Lane that would be used for the homes built on Westview Road. Tom answered that the fire pond on lot #D-20-6 on Overlook Lane was scheduled to be built in the next phase. Ray said the distance from the fire pond at the intersection of Old Milford & Mountain Roads (lot D-18-24) was 1.1 miles to the end of Westview Road. He expressed a concern about houses built that far away from a water supply.  
Tom assured PB members and Ray that the fire pond will be the first thing done in the spring; and will be completed by June 15, 1994.

In the meantime, there are existing ponds at the bottom of Mountain Road and on Birch Hill Road (lot D-93). Brian asked if there would be any houses built before spring. Tom said that no lots have as yet been sold. He will force lot sales toward either end of Westview Road near the existing fire ponds until the third pond is built.

Peter and Ray said they were comfortable with this plan until the Overlook Lane fire pond is operational. Dennis also suggested making the June 15, 1994 date for the fire pond completion a part of the maintenance bond.

7:55 PM **Larry Thibeault, Non-residential Site Plan Review**

Mr. Thibeault and architect Dave Ely were present with an artist's illustrative drawing of the building.

Jeremy said the changes from the last hearing are as follows:

- 1) Note on plan-North access is to be closed, loamed, seeded, and screening plants added.
- 2) Note on plan- Save existing trees and add more trees for visual screening.
- 3) Page 2, top- Swale changes per N.H.D.O.T.
- 4) Entrance way made larger per N.H.D.O.T.
- 5) Sprinkler system not necessary (see letter from Wes Whittier). (attached)
- 6) Building's look and style (artist's drawing).

Mr Ely said the building was cement block construction with split-faced blocks on the front. The building is 14 feet in height with a flat roof and no roof equipment. It will be plain with painted or colored blocks. The sides are not made of split-faced blocks but will match the front in color. Mr. Ely thought that making the building more colonial in style with a wood-frame structure would not be permitted under the fire codes without installing a sprinkler system. Ray Kegy said he would have to see the building plans before he could determine this.

Mr. Ely said the remaining trailer on the north side will be vacated and removed prior to occupancy of the new building.

Rich expressed a desire to have specifics of the plantings for the visual screening added onto the plan. He explained that the PB was sensitive on this issue because of past experiences. Judy suggested to create the maximum screening effect 2 or 3 varieties of trees could be planted.

Brian suggested 1 1/2" to 2" caliper mixed deciduous and conifer (nursery stock trees) would be reasonable starter size trees, and he suggested this be added onto the plan.

Jeremy recommended two changes which be added to the site plan: 1) A note regarding the size and type of trees; and 2) Remove the trailer and the shed from the plan.

8:15 PM  
MOTION

Judy made a motion to approve the plan with the following conditions:

- 1) Notes being added to the plan referencing the type, size and location of the trees being planted;

- 2) Delete the trailer and shed from the site plan drawing; and add note that their removal must precede the occupancy of the new building.
- 3) Permit from the N.H. Department of Transportation being received.
- 4) Water Supply and Pollution approval being granted.
- 5) All fees paid and a plan presented for signing.

**Bob Chisholm** seconded the motion.

**Rich** briefly spoke to the issue of approval of this project for those present at the meeting. He said it was subjective as to whether this was the best use of this property. When it comes to granting approval, however, the PB must look to see if it would present a threat to the health, welfare, and safety of the general public. The answer to all three is no. Is it permitted under current zoning? Does it meet current non-residential site plan regulations? The answer is yes to both. The Planning Board is then obligated to approve projects which meet these criteria; and must balance the rights of the property owner against the abutters' issues and concerns. He urged the PB to approve this plan. Motion to conditionally approve the plan was Yes 5-0.

**8:20 PM** PB went into a brief executive session.

**8:25 PM** **Shirley M. Johnson, Non-residential Site Plan Review**

Neil Johnson and John de Martin of Superior Steel Fabricators were present with a plan to add an 80' X 80' foot building with a 12' X 70' addition to the existing 40' X 80' building. Mr. de Martin said the business consisted of the cutting & welding of steel fabrications, currently employing 5 people. Because of a lack of space, they are doing assembly work outside. He would be looking to add up to 4 more employees, and do all work inside the building. Mr. Johnson said the site consisted of 3.8 Acres, with the brook being the back lot line. There was 680' along Route 13, and they were 730 feet from State Line Variety. The new building would be located 40 feet closer to the road than the present building.

**Abutters-** Carl and Ann Anderson asked if there would be additional trailer trucks entering and leaving the site. They noted there had been 4 delivery trucks entering the site today; and expressed their concern with traffic safety at the intersection of Routes 13 and 130. Mrs. Anderson said that cars park in front of the fence, and she was concerned with increased noise and traffic. She said she was hopeful of landscaping being done along the fence. Mr. and Mrs. James Normand of 8 Lorden Lane said they would like to see the area cleaned up and landscaping done. Mr. Anderson said the strip zoning of Route 13 and the further expansion of this property as an industrial site devalues his property across the street. Mrs. Anderson was concerned that the acetylene torches they used meet E.P.A. standards as because a lot of the work is done outside.

Conservation Commission Co-chairman Libby Wehrle-Anderson had written a letter to the PB (see attached), and had the following concerns:

- 1) Location is adjacent to 2 prime wetlands;
- 2) It is in a flood zone according to the town map;
- 3) It is in the Aquifer and Wetland Districts.
- 4) Septic System capabilities unknown.

Mr. Johnson said that Bibco had the septic system enlarged 7 years ago, and Bibco had 14 employees. He said the 10 or 12 drums of hydraulic & motor oil currently on-site will be removed, along with the vehicles Libby had noted. M.J.S. Metals will be removing the waste steel on the site. He did not feel there was a problem with flooding, and mentioned the flood of 1986 when the water rose no more than half-way up the banking which is 15 feet above normal water level. Rich said that the PB wants to see a plan similar to the Thibeault plan. The expansion of this project and the issues raised tonight would warrant this type of a plan. Brian noted that they were going from a 4,800 square foot to an 11,000 square foot work area.

Dennis said the plan should be drawn either by a land surveyor, professional engineer, or an architect.

Judy said a mixed planting of shrubbery and trees are needed for a visual screening barrier along the fence.

Mr. de Martin anticipated there would be 4 delivery trucks per week. Mr. Johnson said that his business (Bibco) at the same site generated more business than the present one; and he felt traffic safety was an issue more for the State Line Variety than for Mr. de Martin's business. He said he was willing to transplant some existing pines for a visual screen behind the fence. He stated they were currently cleaning up the outside storage area behind the building.

Judy asked if they could provide an area for the trailer trucks to turn around in so that they would not have to back out onto Route 13. Peter questioned the speed limit of the road at this location. It is 50 MPH. Mr de Martin said with the present layout it is not possible to provide a turn-around area for the tractor trailer trucks.

Judy asked how they presently get rid of any waste oil.

Neil said his son-in-law had a waste oil furnace. A company in Wilton will also pick it up. There is no waste oil generated now. The only oil used is a cutting oil for the saw blade, and it is recycled, not changed. They have a fork lift and 4 pick-up trucks. Maintenance work on the vehicles is done at a garage and not on the site.

Jeremy suggested a site walk be done as soon as new plans have been drawn.

Mr. Johnson said he would like to expedite the process to be in the new building before winter.

Abutter Carl Anderson asked that the outside storage area and landscaping plans be shown on the plan. Peter said the PB needs basic factual reliable data in order to make an informed decision. The right-of-way, parking areas, and storage areas need to be shown. PB will check with the police department as regards traffic accidents at the intersection of Routes 13 and 130. Case continued till November 16, 1993.

- 9:05 PM **Planning Board General Business**  
Jeremy briefly discussed the Valliere lot on Rocky Pond Road. He asked if the PB felt OK with 1 weird-shaped lot in order to subdivide lot F-56 into 2 lots, 1 being a back lot. PB members felt Mr. Valliere needs to contact a land surveyor to better make a judgement as to whether this subdivision will meet subdivision regulation requirements.
- 9:10 PM **Growth Management Ordinance memorandum.**  
Jeremy distributed copies of a draft of zoning changes for March 1994 town meeting, and a letter to town counsel William Drescher asking him to review the changes for legality issues. Jeremy noted the Growth Management Ordinance on Page 2, and PB members discussed the merits of a building permit pool and how it would work. Jeremy suggested that PB members read this over, and it will be discussed at the next work session on November 2, 1993.
- 9:15 PM Rich made a motion to adjourn the meeting. Dennis seconded the motion. Vote was 5-0 yes to adjourn.

Next Planning Board Meeting Tuesday, November 2, 1993

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

Made Part of the 10/19/93 P.Bd. minutes

ser

October 19, 1993

Brookline Planning Board  
Town Hall  
Main Street  
Brookline, N.H. 03033

Subject: Larry Thibeault, N.R.S.P. Review, Case #1993-C:G-54

Dear Members;

Mr. Thibeault delivered two attached MSDS's for the raw material used in his molding process. He did not, however, have a detailed interior building plan prepared at this stage in the process. Without this plan, Deputy State Fire Marshal Britton would not give his opinion regarding the necessity of a sprinkler system to meet the Life Safety Code. He referred Chief Keczy back to the jurisdiction of the BOCA Building Code.

In the 1990 BOCA National Building Code, Section 305.0, Table 305.2, a plastic products factory is categorized as Use Group F-1, Moderate Hazard. In Section 1002.0, Fire Suppression Systems, Item 1002.7, a sprinkler system is necessary:

1. Where fire area exceeds 12,000 square feet.
2. Where total combined area of fire areas on all floors exceeds 24,000 square feet.
3. Where fire area is more than 3 stories above grade.

Since Mr. Thibeault's proposed building is one-story at 8,000 square feet, it does not meet the requirements for a sprinkler system. He may still want to consider a sprinkler system to protect his investment, or to meet the requirements of his insurance carrier.

The MSDS's submitted for polypropylene and polyethylene raw materials do not indicate any great concern for potential exposure to the population outside the facility. During a fire, Mr. Thibeault's workers and any emergency responders entering the building would be exposed to toxic by-products of combustion. Many of these same by-products are resultant from any structure fire or from a motor vehicle fire.

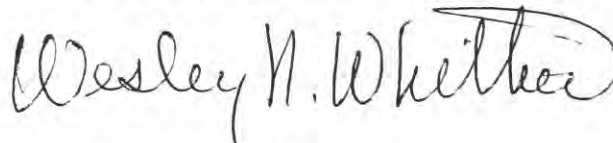

Page 2

Since Mr. Thibeault's facility may qualify under applicable OSHA regulations, he will have to evaluate the work-place hazards for compliance with employee safety. He may also have to comply with other applicable SARA & EPA regulations regarding hazardous materials storage, use, and disposal. He will be asked to submit all MSDS's for materials at his facility to the Brookline Emergency Manager for inclusion in the emergency response plan.

If there are further questions or concerns, please contact me.

Very truly yours,

*(SP)*

October 19, 1993

MEMORANDUM

TO: Brookline Planning Board  
Town Hall  
Brookline, N.H. 03033

FROM: Brookline Conservation Commission

RE: Shirley Johnson, 46 Route 13 South, Superior Steel  
Fabricators, NRSP Review, Case #1993-D:J-19.

Dear Members,

We have completed an on-site review of the proposed building addition on Lot J-19 for Shirley Johnson. The property is very important environmentally. It is located adjacent to Wallace Brook which moves water from Fresh Pond (on Averill Road) to the Nissitissit River. The soil appears to be very sandy- which means it does not have a high capacity to filter ground water.

The Conservation Commission advises that the Planning Board require the applicant to submit a more detailed map which should include the following:

- 1) Flood Zone A- 100 year boundary.
- 2) Aquifer Protection District boundary.
- 3) Wetland Conservation District boundary.

Our concerns about the proposed addition are:

1. The increased size of the facility will mean more employees. Are there adequate sewage facilities?
2. What sort of waste products are generated (oil, etc.); and how are they disposed of?

Despite the fact that this property is adjacent to a residential zone and along a major road, landscaping in front of the present building is non-existent. Could this be improved? Can landscaping be done on the north side of the property?

Page 2

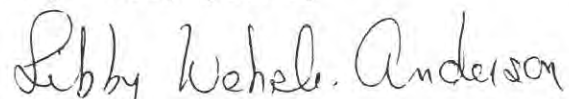

We also have concerns about the present conditions. On the west side of the present operation the area has possible potential environmental hazards. While we understand that businesses need a place to store material, these items are as close as 15 feet to the approximate boundary of the Brookline Wetlands Conservation District (W.C.D.).

There are also 10 50-gallon barrels of some substance. We guessed it to be used motor oil within 50 feet of the W.C.D. and probably in the Aquifer District Boundary.

Additional there are 2 unregistered vehicles. The opposite side of Wallace Brook is protected by a conservation easement. We would ask the applicant to consider similar protection to be added to his portion of the brook. The best way to accomplish this is to attend our next Conservation Commission meeting and discuss the options.

In summary, because this property is on the water course between prime wetland (Fresh Pond), and prime wetland (Nissitissit River/Campbell's Meadow), we would urge the Planning Board to review it with the utmost care.

Very truly yours,

Libby Wehrle-Anderson, Co-chairman  
Brookline Conservation Commission

cc: Shirley Johnson  
Superior Steel Fabricators

Selectmen

TOWN OF  
BROOKLINE, NEW HAMPSHIRE

P.O. Box 360

PLANNING BOARD MEETING

November 2, 1993

- PRESENT: Peter Webb, Chairman, Voting  
 Richard Napolitano, Vice-chairman, Voting  
 Joe Kagenski, Voting  
 Chris Hegarty, Voting  
 Judy Cook, Selectmen's Representative, Voting  
 Margaret Olson, Alternate  
 Jeremy Ginsberg, N.R.P.C. Representative  
 Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
 Chairman Peter Webb opened the meeting. Minutes of the  
 MOTION October 19, 1993 meeting were reviewed. Peter made a motion  
 seconded by Rich to approve the minutes as written. Vote  
 was 4-Yes, 1-No, 1-Abstention (Joe not at the 10/10/93  
 meeting).

7:35 PM Mr. & Mrs. Daniel Pelletier, owners of K-57-10, 5 Petersen  
 Road were present. They were concerned with a modular home  
 being placed on the lot next to theirs (K-57-9). They felt  
 it would devalue their property and questioned how a mobile  
 home could be placed in this location. Mr. Pelletier said  
 there were 1,800 sq. ft. homes currently built there. He  
 asked if mobile homes could be installed on the other 5 or 6  
 lots, or whether something could stop their placement.  
 Building Inspector Wes Whittier and Selectman Russ  
 Heinselmann were also present at this meeting.  
 Peter said he remembers the subdivision being approved in  
 1983, and Mr. Petersen's request to have it designated as a  
 mobile home district. Wes said he issued the building  
 permit based on the information that the area was a mobile  
 home district. He said the building meets the N.H. Energy  
 Code and has a full foundation and septic system. He had  
 done a foundation inspection on 10/25/93 but had not been  
 contacted for any other inspections. He had building plans  
 showing 2X6 framing on the outside walls. The plans meet the  
 CABO codes as specified as well as the N.H. Energy Code.  
 Rich read the minutes of the March 1983 Planning Board  
 meeting which indicated the plan had been submitted for and  
 approved as a mobile home district.  
 Judy said the Pelletier's problem was not with the town. The  
 approved plan can't be redistricted by the town.

Peter noted it was Planning Board approval at the developer's request (not a vote of the town) that established this mobile home district. If a change is to be made, Mr. Petersen would have to make it- possibly with restrictive covenants on the remaining lots.

Russ said he felt this was a civil matter between Mr. & Mrs. Pelletier, Mr. Petersen, and the realtor.

7:50 PM Tom Moran-Mountain Road Estates, II & Birch Hill Estates, II Tom Moran and Bob Bramley, General Partners of Millrock Realty were present to ask the Planning Board to recommend acceptance of Westview Road as a town road and set an amount for the maintenance bond. He presented PB members with a copy of the actual cost of road construction (\$369,000.) as well as the estimates prepared by Meridian Land Services (\$454,818.); and a recommendation of Road Inspector Bill Duncklee to hold \$5,000. for loaming and seeding to be done in spring of 1994.

Jeremy referenced the new subdivision regulations as regards the establishment of a maintenance bond amount based on actual road construction costs.

MOTION Chris made a motion to set the bond at \$40,000. Rich amended the motion to \$45,000. to add the \$5,000. for loaming and seeding which Bill Duncklee recommended. Peter seconded the motion to establish a \$45,000. one year maintenance bond to expire on March 14, 1995. Motion passed by a 5-0 yes vote.

Judy asked about the fire pond on Overlook Lane. Tom said he has no guarantee from the road contractor, but he will attempt to get him back within the next two weeks to finish up some work in other sections. If possible Tom said he will get the fire pond built this fall. He asked if the PB would consider releasing the 2-year maintenance bond on Rock Ramond Road after the March 1994 Town Meeting. This bond has been in place for the last 14 months. PB members agreed to consider this request next spring.

8:15 PM Pat McDermott of the Public Service Co.'s Economic Development Division and Sue Blothenberg of their Community Development and Relations Dept. were present to introduce their company's offer to help communities strategically plan for the future and attract new business. They presented PB members with a copy of an economic review of New Hampshire. Rich asked if there was some data available to determine the electric usage in Brookline. Mr. McDermott said he would be glad to get this information together. Peter introduced Jeremy and said some of their information might be useful to him in preparing the memorandum on growth in Brookline.

8:30 PM Project Status  
1) Mosher Drive-PB members reviewed Dennis LaBombard's project status report on the Mosher Drive (Bear Hill Subdivision) project; and his report on

2) Hillside Drive- (Wallace Brook Estates, II). PB members were concerned with some outstanding issues on Hillside Drive that prevent it from being accepted by the town. A letter will be drafted to Tom Enright asking for correction of these issues before the construction bond expires in February 1994.

Judy said Clarence should check this project and write a letter regarding the winter maintenance of this project.

MOTION

3) Muscatanipus Road- PB members reviewed Road Inspector Bill Duncklee's 10/29/93 report on his final inspection. Rich made a motion to recommend the selectmen release the maintenance bond. Margaret seconded the motion. Vote was in the affirmative 5-0.

9:00 PM

**Planning Board General Business**

PB members reviewed Jeremy's draft of the proposed zoning changes for March 1994 town meeting. Tom Moran and Bob Bramley were present to ask where the PB was in their thinking regarding building permit restrictions. Their concern was that once the ordinance changes were posted for public hearing, those changes if voted in March would be retroactive to the date of first posting. PB members said they would be discussing the proposed changes at the November 16, 1993 PB meeting; and the date of the first public hearing would be Tuesday, December 7, 1993.

9:45 PM

Rich made a motion to adjourn the meeting, seconded by Margaret. Vote to adjourn was 5-0 yes.

**Next Planning Board Meeting Tuesday, November 16, 1993**

Submitted by:

Sandra L. Fessenden, Secretary  
Brookline Planning Board

(603) 673-8855

TOWN OF  
BROOKLINE, NEW HAMPSHIRE

P.O. Box 360  
Brookline, NH 03033

PLANNING BOARD MEETING

November 16, 1993

PRESENT: Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate (joined meeting at 8:00 PM)  
Dennis LaBombard, Alternate  
Bob Chisholm, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the  
MOTION November 2, 1993 meeting were reviewed. Joe made a motion  
seconded by Peter to approve the minutes as written. Vote  
was 5-0 Yes.

7:32 PM Shirley M. Johnson, N.R.S.P. Case #1993-D:J-19, Case Cont.  
Neil Johnson and John de Martin were present with new plans.  
MOTION Jeremy said all items needed for acceptance were included.  
Peter made a motion to accept the plan as presented. Rich  
seconded the motion. Vote was in the affirmative 5-0.

Jeremy said there were three issues that he would like to address: 1) Existing State driveway permit-He has spoken with Mr. Johnson regarding the State's requirement for a vehicle turn-around so that trucks won't be backing onto Route 13; 2) Note on plan if there is to be a designated outside storage area; 3) There were no wetlands issues. Wetlands soils was located along the brook. The boundary of the wetland soils were shown on the plan and a proposed conservation easement was outlined. Judy suggested there could be two entrances onto Route 13 with a circular driveway going around the buildings. Peter asked about any on-site equipment such as forklifts and welding equipment. Mr. de Martin said there was 1 fork lift and acetylene welding equipment. When questioned about the septic capabilities Neil said that in 1986 when he added a second building, he had enlarged the leach field area. The septic tank was not changed. He employed 15 people and never had any trouble with the septic system.

Rich said he wanted specific details shown on the plan as regards the tree planted for a visual barrier. He said they need to be closer together for better screening. Neil said there were pines and maples that could be relocated, and he is willing to add better details to the plan.

Rich said he also would like a note on the plan stating there is to be no storage of materials in the existing paved area. Applicant and PB should agree on the area allowable for storage and note this on the plan. All materials will be stored in back of the buildings.

Peter asked if any of the fabrication work or spot welding is done outdoors? Neil said currently there is work being done outside; and the reason for adding a new building is so that the majority of work can be done inside. Mr. de Martin said there is a fork lift moving and stacking material outside. Peter said the boundaries of the fabrication area should be identified on the plan. He asked what the new building would look like. Mr de Martin said it was a steel building similar to the existing one-25 feet in height with a slightly pitched roof.

**Abutters:** John Ganos, Carl and Ann Anderson, and Mr. & Mrs. Normand of 8 Lorden Lane were present. Mr. Anderson spoke against the expansion of this business directly across the road from his home. He stated that he had put his home up for sale and could not sell it because of the industrial use across the road. He took issue with the town re-zoning his property from commercial to residential last year since he felt it could be sold more easily as a commercial property. Judy addressed this issue, saying that the majority of property on South Main Street (including the Anderson's) was removed from the Industrial/Commercial zone last year primarily because it was already residentially developed. Carl asked if the PB is concerned with the rights of the abutters? Peter said yes, the PB must balance the rights of the property owner with the concerns of the abutters. He noted that Mr. Johnson's property was zoned for the existing use he was proposing to now expand. Carl said he was an early proponent of zoning, but feels the commercial area should be broken down into commercial, light commercial, and industrial use. The industrial use should be removed from the areas of residential development. Mrs. Anderson asked who monitors the industrial sites for conformity to the site plan? Judy answered the Planning Board, Board of Selectmen; and the Zoning Board of Adjustment if necessary.

Peter asked abutter John Ganos if he noticed much noise associated with Mr. de Martin's business? Mr. Ganos, owner of the Route 13 State Line Convenience Mart next door, said he not only operates a business but has lived there as well for the past 6 years. He stated there has always been a fair amount of noise associated with the business next door that can be heard inside his house with the doors and windows closed. He noted that Superior Steel does not have air conditioning and their doors are open. From time to time there is noise from the loud speakers of the intercom as well as the noise associated with the steel fabrication.

He asked what precedent was there for how much noise a business could generate? He said he has learned to live with the noise. They operate during normal business hours. He said he hasn't noticed much difference in noise intensity from when Bibco operated the business 5 years ago. Mr. Normand said they heard noise from the site usually beginning at 6:30 or 7:00 AM on the weekdays and Saturdays. The noise of the forklift and dropping of steel material was what they most noticed. He said they would be concerned if the expansion of the business warranted more hours-perhaps a second shift. Mr. de Martin said they operate from 7:00 AM to 6:00 PM weekdays, and 7:00 AM till noon on Saturdays. He does not anticipate increasing the hours. Judy suggested adding a note to the plan regarding the hours of operation. Peter asked if the new building would have a concrete floor (answer yes) and floor drains (answer no). There is a 500 gallon fuel tank for the furnace, and a dumpster is located on the site. It was suggested that their locations be shown on the plan. Neil said the scrap metal steel would be picked up by Merrimack metals. If the State would not allow a second entrance onto Route 13, they would make a turn-around area. Trees may have to be removed and might include part of the proposed conservation easement area. Neil asked for PB approval tonight so that construction of the new building could start before winter weather came. PB will check with Ray Keyce to see if he has any concerns regarding fire safety issues.

8:10 PM  
MOTION

Judy felt there was enough information presented for the PB to grant a conditional approval. She made a motion to grant conditional approval pending the following items being done:

- 1) Driveway issue resolved with the State
- 2) Specifics of the plantings noted on the plan
- 3) Location of dumpster and fuel tank shown
- 4) Extension of chain link fence shown
- 5) Hours of operation noted on plan.

Joe said that the PB doesn't have knowledge of what the state will require and how the plan may have to be modified to show the driveway and turnaround locations.

Motion died for a lack of a second.

Case to be continued till December 14, 1993.

8:30 PM

**P & C. Realty, Inc., Subdivision Case #1993-5:F-60.**  
Paul Gavin of P & C Realty, Inc. and Randy Haight of Meridian Land Services were present with a plan for a 5 lot subdivision of Lot F-60 on Rocky Pond Road. Chairman Peter Webb excused himself from this case. Vice-Chairman Rich Napolitano chaired the meeting with Dennis La Bombard voting for Peter. Randy said this 13.268 Acre parcel of land was located on the South side of Rocky Pond Road adjacent to the Hollis Town line. The lower portions along the back of these lots are in wetlands.

Jeremy said the plan meets the checklist requirements for submission to the Planning Board for acceptance. He said he

has spoken to Fire Chief Ray Keczy regarding fire protection for this area. Ray has concerns about Rocky Pond Road because the closest fire pond is located on Birch Hill, more than 2,500 feet away from the nearest water supply. Rich questioned how this subdivision complies with the open space development requirement. He said he would like to have town counsel's opinion, since this lot and the lot across the street (F-18) are under common ownership. Abutter Nancy Quick asked if this lot being subdivided was pulled off of the larger parcel they own.

Rich noted that P.& C. had previously done a boundary line subdivision plan of their land in Brookline and Hollis, approved in February 1993, which established the boundaries of lots F-60 and F-18 in Brookline, and 3 lots in Hollis. This current plan was a new subdivision of lot F-60.

Dennis felt this property is a 13 Acre piece, physically separated from their other land by Rocky Pond Road and not subject to open space development by virtue of its size. Dennis made a motion to accept the plan as presented. Chris seconded the motion. Motion to accept 5-0 yes.

8:45 PM  
MOTION

**Abutters' comments:** Nancy Quick stated she had no objections to having houses built near hers, but pointed out that Rocky Pond Road is minimally maintained and the town needs to address upgrading the road and adding a drainage system. Water puddles up onto Rocky Pond Road, and the road has a poor washboard-like surface. She said there was a large drop-off of 4 to 6 feet opposite her house where drainage is needed. She was also concerned with the fire pond issue. She felt that when more houses are built on Rocky Pond Road, more people will be using it to go to Hollis and Nashua. She commented that it is fairly busy now despite the poor condition of the road and pointed out that once you cross the town line into Hollis the road is better but the sight distance is very poor. She considers it a very dangerous road to travel-particularly for younger inexperienced drivers.

Judy asked if this subdivision should be considered for regional impact. Should we be speaking to the Town of Hollis again on plans to upgrade Rocky Pond Road. Jeremy explained the state requirements if the town deems the subdivision to be of regional impact and the PB votes on that. Margaret was in agreement that Hollis should be notified. Judy read the notice from the Hollis Planning Board of the 5 lot subdivision in Hollis of Tax Map 22, Lot 53. Jeremy noted that Hollis has not accepted the plan as yet. He read the requirements of RSA 36:55, Definition of subdivision "development of regional impact."

MOTION

Judy made a motion to find that the subdivision of lot F-60 into 5 lots on Rocky Pond Road, Brookline, is of regional impact. Chris seconded this motion. Vote was in the affirmative, 5-0 yes.

Mr. Paul Gavin stated to the PB members and others present that at this time he intends to develop only these 5 lots. He has no development plans in the near future for the other side of the road which requires a road system (lot F-18).

His subdivision of Map 22, Lot 53 in Hollis will be for 4 lots. He has the remainder of land in Hollis up for sale. Nancy Quick said both towns need to address the road and road drainage issues on Rocky Pond Road, and pointed out that there was another 2 lot subdivision before the PB tonight on Rocky Pond Road.

Road agent Clarence Farwell said he would like to see two items addressed: 1) A dedicated easement for a turn-around for the town trucks at the Hollis town line on the North side of Rocky Pond Road. 2) Off site improvements for Rocky Pond Road.

Rich said the outstanding issues for this subdivision are:

- 1) Open Space development-does this subdivision need to comply ?
- 2) Implement the requirements for a subdivision of regional impact;
- 3) Traffic issues on Rocky Pond Road
- 4) Off site improvements to Rocky Pond Road
- 5) Fire Pond issue for this area
- 6) Correct locus map on subdivision plan
- 7) Determine if this subdivision could be considered scattered and premature.

PB scheduled a site walk for Saturday, November 20, 1993 at 1:00 PM.

9:05 PM **Albert Valliere, 36 Rocky Pond Road, Subdivision case #1993-6:F-56.** Mr. Valliere and Andy Johnson of Allan Swanson's were present with plans for a 2 lot subdivision of lot F-56. The back lot (lot F-56) will continue to use the deeded access from a private road and will not access from the 30 feet of frontage from the road necessary for a back lot. Jeremy said all the information necessary for acceptance of the plan was included. He mentioned the fire pond for Rocky Pond Road as an issue for this subdivision as well. PB members questioned whether a variance was necessary because the back lot was not using the road frontage for access as required by the Brookline Zoning and Land Use Ordinance (Article VIII, DEFINITIONS, #13-Frontage). Andy said that access from the 30 frontage was not possible because of a wetlands crossing. Peter said the access point is a zoning variance issue which must be addressed by the Z.B.A. He suggested another alternative might be a dredge and fill permit to construct a driveway across the wetlands area. Mr. Valliere felt he would prefer to continue to use his present deeded access driveway to the lot if possible. PB recommended he apply to the Zoning Board of Adjustment for a variance.

9:20 PM **Tom Moran-Discuss proposed Growth Management Ordinance.** Tom, Bob Bramley, and attorney Silas Little were present to discuss the ramifications of the posting of a zoning change that would limit the annual number of building permits that could be issued for new residences. Tom presented PB members with a letter (see attached); and questioned

whether under RSA 674:39--"Four Year Exemption" they would be exempt. He also felt that the criteria allowing a growth control ordinance could not be adopted simultaneously with the adoption of a new chapter to the Brookline Master Plan. He stated the PB had not held public meetings at which they had input from residents on the CIP or the Master Plan; and the current CIP does not address issues that would indicate the necessity for a growth ordinance. He wanted to know if the proposed ordinance would be effective with the posting of the zoning changes on November 24, 1993. PB members discussed the items in his letter, and reached a decision to send both a copy of the proposed zoning changes and Tom's letter to town counsel for his opinion. On a motion by Rich seconded by Judy, it was decided to make the effective date of this growth ordinance January 1, 1994. Vote was 5-0 yes. First public hearing on the Master Plan update and proposed changes to the zoning ordinance will be held December 7, 1993.

9:45 PM  
MOTION

9:55 PM

**Robert Bourassa, Talbot-Taylor Estates, Phase II**  
Mr. Bourassa and PB members reviewed the subdivision plan which was approved with access to lots G-61-5 and G-61-6 coming for the "future access road" and not Taylor Drive. Rich and Joe had been members of the PB when this subdivision was approved, and noted that the requirement for frontage along the road from which the lot took its access had been a requirement of the subdivision regulations and not part of the zoning. As such, the PB could waive the regulation and allow access from a common shared driveway on an area to be dedicated as a future roadway. Bob explained that access to these two lots had been discussed, since there were areas of wetlands along Taylor Drive that would preclude placement of driveways there. PB members felt that it had to be clearly understood by the buyers of these lots that possibly at a future date they would be required to relocate their driveways when the roadway was constructed. The Town would not be held liable for the necessity and expense of relocating private driveways when the roadway was extended. The new owners of lot G-61-6 were present and said they were aware of the situation. Jeremy voiced his opposition to this waiver because of past experience where driveways to lots in other subdivisions had been placed in future road accesses; and when the road was to be extended, the owners of the lots claimed they knew nothing of the situation and objected to the town for allowing their driveways to be built where they would have to be moved. Joe made a motion to give Building Inspector Wes Whittier a directive to issue building permits to lots G-61-5 and G-61-6 with driveways located on the future access road.

10:10 PM  
MOTION

- 10:15 PM **Planning Board General Business**  
Joe read from a recent law lecture series a definition of home business, and suggested we modify the one in our zoning ordinance to be consistent with the state. He made a motion, seconded by Chris to amend Article VIII, DEFINITIONS #14-Home Business to read as follows: "A secondary use of a dwelling....."
- 10:20 PM PB members and Brookline School Board Member Marcia Farwell discussed the figures used for student enrollment and projection figures for the Brookline Elementary School. Marcia said that the school board is going to propose a 6 room addition for the Elementary School at the March 1994 school district meeting.
- 10:25 PM Chris made a motion to adjourn the meeting, seconded by Joe. Vote to adjourn was 5-0 yes.

Next Planning Board Meeting Tuesday, December 7, 1993

November 16, 1993

Planning Board  
Town of Brookline  
Brookline NH 03033

Ref: Proposed Growth Control Ordinance

Dear Members of the Planning Board,

In the rush to adopt a growth control ordinance, there appear to be serious flaws in the program that you seem to be following. To the extent that information on the proposed ordinance has become public knowledge, it has already caused considerable damage to the efforts of Millrock Realty to market its lots in the Mountain Road Estates and Birch Hill Estates Subdivisions. We have several questions, particularly with respect to the Board's position on the statutes governing this proposed ordinance, and would like the opportunity to further discuss the proposed ordinance while there is still time to make changes before posting:

1. What effect does the Board give RSA 674:39 - "Four Year Exemption"?
  - 1a. Has the Board taken a position on exempting subdivisions that meet the criteria of RSA 674:39 from the proposed ordinance?
  - 1b. What is that position?
2. The Board recites RSA 674:21 - "Innovative Land Use" as its authority for the proposed growth management ordinance. My reading indicates that the content of the ordinance does not meet this criteria. What is the Board's rationale for citing this authority?
3. The proposed ordinance deals exclusively with the timing of permits. That authority derives from RSA 674:22 - "Growth Management; Timing of Development". This statute clearly states that "Any ordinance imposing such a control may be adopted only after preparation and adoption by the Planning Board of a master plan and a capital improvements program.....". Since neither the master plan nor the capital improvements program have been adopted, nor can they be until after public hearings are held, how can the Board justly post the growth control ordinance on November 24, 1993?
4. Please explain the Board's position that a posting of the growth control ordinance on November 24, 1993 (or on any date that does not come after adoption of a master plan and capital improvement program) will be a "legal" posting under the provisions of RSA 676:12?

Robert G. Bramley, General Partner  
Mason Road, Brookline, NH 03033  
(603)889-5209 Fax: (603)889-5597

Thomas F. Moran, General Partner  
PO Box 129, Brookline, NH 03033  
(603)673-5555 Fax: (603)672-6626

5. RSA 674.22 goes on further to state that adoption of an ordinance under this provision "shall be based upon a growth management process intended to assess and balance community development needs and consider regional development needs". It seems to me that the Board is looking only at one community need - schools. To this point, at least, the Board has pointedly ignored other 'community development needs', and has completely failed to address 'regional needs'.
6. Has Town Counsel reviewed the proposed master plan update and growth control ordinance and responded to the Board?
  - 6a. If not, when do you expect a response - before or after posting?
  - 6b. If so, what is Counsel's response?

We hope to have a good discussion on the Master Plan update and growth control ordinance following your response to the above questions.

Sincerely,

  
\_\_\_\_\_  
Thomas F. Moran, General Partner

PLANNING BOARD MEETING

December 7, 1993

PRESENT: Peter Webb, Chairman, Voting  
Richard Napolitano, Vice-chairman, Voting  
Joe Kagenski, Voting  
Chris Hegarty, Voting  
Judy Cook, Selectmen's Representative, Voting  
Margaret Olson, Alternate  
Dennis LaBombard, Alternate  
Bob Sykes, Alternate  
Jeremy Ginsberg, N.R.P.C. Representative  
Sandra Fessenden, PB Secretary

7:30 PM Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the  
MOTION November 16, 1993 meeting were reviewed. Rich made a motion  
seconded by Peter to approve the minutes as written.  
An affirmative vote of 5-0 was cast.

7:35 PM Public Hearing, Discussion relative to adoption of Chapter  
IX, Recent Growth Trends, to the 1990 Brookline Master Plan.  
Peter gave an overview of the Master Plan and its context to  
those in the audience. He then turned the meeting over to  
Jeremy Ginsberg to explain the text of the proposed Chapter  
IX which gives statistical data on Brookline's growth from  
1990 to 1993 when the last master plan update was done; and  
the impact to the Town from that growth.  
Rich explained that the recent increase in building permits  
for new homes triggered the Planning Board to study the  
rapid growth rate and how it will potentially impact all  
Town services.  
Suggestions and Comments: Peter Bennett asked if the method  
of updating the master plan by adding a chapter has been  
used by other communities. Jeremy answered yes, some towns  
have done it this way. He said he used standard compilation  
data in drafting this chapter on recent growth trends.  
Tom Moran said State statutes say a Master Plan must be  
presented for discussion and adopted prior to any proposed  
zoning changes based on the data in the Master Plan. He  
noted that the public hearing on the proposed growth  
ordinance which would restrict the number of building  
permits for new homes is being held tonight. He asked why  
Mason was included in some but not all of the tables. He  
questioned the length of the time span on regional issues  
and how long a time frame was examined-the focus seeming to  
be on a 3 year period. Tom reiterated that he felt the PB  
had not looked at enough data to justify a building permit  
restriction. The base was too narrow.

Bob Parodi asked if the PB had addressed commercial or industrial growth issues. Answer no, not this year. Warren Welch said it is his feeling that there were more children per house in the past than in recent years. He feels the spike in building permits in November 1993 was not indicative of rapid growth, but rather a reaction to the possible building permit restriction. Clarence Farwell questioned whether by state regulations there must be a real or a perceived crisis (such as over population of students) before the Town can adopt a growth ordinance. Answer: To impose a building moratorium there must be proof of a crisis. This is a growth ordinance meant to slow the number of new homes built-not completely restrict growth. Discussion then focused on how the figures used to compile the data were arrived at. Peter said there was a lot of information to be read. a second public hearing on the adoption of Chapter IX will be held on Tuesday, January 4, 1994.

8:50 PM Public Hearing on proposed Changes to the Brookline Zoning and Land Use Ordinance.  
Jeremy outlined the 5 proposed items of zoning change. Those present focused the discussion on number 3-Growth Management Ordinance adoption. Although most of those present seemed to be in agreement that Brookline was experiencing a rapid rate of new home growth, much controversy centered on how to implement an ordinance to better control the rate of growth. Peter Bennett asked for a definition of "developer". Answer: Anyone owning more than one lot. Question: Could you transfer the right to obtain a building permit with the sale of a lot? Answer: No, not as the ordinance was currently drafted. Warren Welch expressed his opinion that the total number of building permits for the year 1994 would be taken the first available day in January. Rolf Bremer questioned how the Planning Board can approve the lots and then not allow the owner to use them. He said "REQUIREMENTS #3" is unclear. PB members agreed. This will be deleted. Alan Lorden stated that in Hollis where he lives and also builds homes, there are building rights which the developer knows of when he develops the land. Bob Bramley said he believes existing approved subdivisions are exempted for a 4 year period of time from zoning changes by State statutes. Tom Moran asked for an answer to the letter he submitted at the November 16th PB meeting requesting a legal opinion from town counsel regarding RSA 674:39-Four year exemption. Peter Webb answered that this is being discussed with town counsel.

Bob Parodi said the tax base will regulate growth. If the tax rate and assessments are high enough, it will discourage new building in Brookline. He feels this growth ordinance is discriminatory against the people who own the land.

Libby Wehrle-Anderson said she speaks for the ordinance. As a taxpayer, she would like to see a more controlled level of growth for Brookline.

Jack Flanagan, member of the Co/Op School Board, said there are plans to propose a \$750,000. addition to the Elementary School; and future plans are being made for a new Hollis/Brookline High School costing approximately 15 million dollars. He felt a growth ordinance would help the taxpayer. He said the Town needs to look at the problem of growth. He is also concerned with the safety hazard of open foundations left uncapped for extended periods of time.

Rich Napolitano said the PB could use a realistic analysis from the developers for the number of lots they plan to develop over the next two years. The PB could then consider creating a transition pool for a two year period.

Tom Moran said he planned to develop 21 lots over a two year period in Birch Hill and Mountain Road Estates, II-16 in 1994 and 15 in 1995. He questioned some of the projected growth figures of the school population, and while acknowledging the unusual growth in Brookline, he did not feel that it would necessarily continue at the same rate.

He stated that to give out building permits on a first come first served basis was unfair to developers who had subdivisions partly developed. It should be applied to any future subdivisions being approved by the PB.

He said people are concerned with the tax rate. He suggested the PB do the following: work on the Master Plan, develop a CIP identifying capital costs; develop a growth plan; check the equalized evaluation of surrounding towns.

Peter Bennett suggested adding a third pool for existing lot owners to draw building permits from.

Eric Rodgers said the developers represented here tonight have expended monies based on the current regulations only to find the rules have changed after the investment was made.

Peter thanked those present for their input. The next public hearing on proposed zoning changes will be held on Tuesday, January 4, 1994.

9:55 PM

#### Planning Board General Business

##### Report on Site Walks-

- 1) Shirley Johnson, Superior Steel Fabricators, 46 Route 13 South- Margaret reported she had visited the site and found barrels of oil and water which had not been removed as promised. She remarked on the proximity of the barrels to the water; and said the site also contained trash such as old car chassis. She

wanted the PB to require specific visual screening- giving specific instructions as to its placement along the fence line inside and out. She said she anticipated the outside storage area for materials would be noisy. She inquired why this company is not being held to the same standards as the new plastic business. It was noted that the back corner of the new addition (N.W. corner) was located almost in the conservation easement, close to the wetlands. It was suggested that curbing be placed on the outside of the building where the driveway was close to the parking area.

2) P & C Realty, Inc., Rocky Pond Road- It was agreed that the condition of Rocky Pond Road was the biggest problem with this subdivision, which might be deemed to be scattered and premature.

- 7:30 PM Planning Board Business Meeting  
Chairman Peter Webb opened the meeting. Minutes of the  
MOTION December 7, 1993 meeting were reviewed. Peter made a motion  
seconded by Rich to approve the minutes as written.  
An affirmative vote of 5-0 was cast.
- 7:35 PM Robert Bourassa, Talbot-Taylor Estates, Case #195- Bob was  
present with a letter dated 12/13/93 from road inspector  
William Duncklee (see attached) stating that Talbot Road and  
Taylor Drive from Sta 0+00 to Sta 30+00 have been completed  
except for the following items:  
1) Street Name Signs  
2) Guardrail  
3) Some stone bounds  
4) Minor landscaping  
Bob was requesting that these two roads be added to the list  
of roads to be accepted at the March 1994 Town Meeting. He  
indicated that items 1,2 and 3 would be complete before Jan.  
1, 1994; and #4, the minor landscaping would be finished in  
the spring. He wished to have the road construction bond  
reduced and changed to a maintenance bond.
- MOTION Peter made a motion to accept Talbot Road and Taylor Drive,  
Sta 0+00 to Sta 30+00 subject to the completion of items  
1,2,and 3 satisfactory to road inspector Bill Duncklee. Rich  
seconded the motion. A vote of 5-0 yes was cast.
- MOTION Judy made a motion to change the bond from a construction  
bond to a 1 year maintenance bond in the amount of \$30,000.  
to expire on March 14, 1995. Rich seconded the motion.  
Vote was 5-0 in the affirmative.

7:45 PM Shirley M. Johnson, Non-residential Site Plan Review, Case #1993-D:J-19. Neil Johnson and John de Martin of Superior Steel Fabricators were present. Jeremy noted the changes made from the last meeting. Notes 14 through 18 were added. The new driveway was shown. The State permit is still pending, but applicants will upgrade the existing driveway. The outside storage area, dumpster and oil tank now show on the plan. Neil said the chain link fence will be placed on both sides of the new driveway. Jeremy noted the letter received from abutters to this property (see attached). Abutter Carl Anderson requested that the new building be insulated for noise reduction. Mr. de Martin said it will be insulated for heat loss. Peter asked how much of the operation will still be done outside. Mr de Martin said that the fork lift will be used to move the materials on the site. Abutter George Dixon spoke to the welding being done outside at night with no protection from the light from the welding torches. Abutters Ann and Carl Anderson asked if the midnight and after deliveries could be confined to the daytime hours of operation; and noted that trucks are arriving at 2:00 and 3:00 AM with steel materials. Dennis said usually truck delivery times are uncontrolled by the business owner. Drivers will arrive at odd hours leaving the truck engines running and wait until the business opens. Peter asked if at all possible that deliveries be confined to the hours of operation. Mr de Martin said he would ask. Margaret said she would prefer to have no fabrication work done outside. Neil felt that the placement of a visual barrier of trees to screen the site would help to reduce the noise. After discussion, PB members made it a condition that no fabrication work would be allowed in front. The existing trailer would be removed from the rear existing metal building, and any outside work would be confined to this area. Hours of operation will include any deliveries and pickups. Added to the plan will be six legal holidays when the business will be closed.

Abutters expressed their concerns about compliance with the site plan approval conditions. Joe suggested that as an approval condition, the PB hold a public hearing in nine months to ensure that compliance with the conditions of approval are being met. Jeremy had spoken with Libby Wehrle of the Conservation Commission regarding the final wording on the conservation easement. She would like it worded similar to the one in the Lorden easement (Lot J-17). Neil will work this out with her.

**MOTION**

Peter made a motion to approve the plan as presented with the following conditions being noted on the site plan:

- 1) Deliveries and pickups will be included in the hours of daytime operation.
- 2) Business will be closed on the following six legal holidays: January 1, Memorial Day, July 4th, Labor Day, Thanksgiving, and Christmas.

\* Amended  
12/21/93

- 3) All outside fabrication work will be confined to the area in back of the existing rear metal building. No outside work will be done in front of the buildings.
  - 4) Removal of any trash, barrels of oil and water, and scrap steel to be completed before final approval.
  - 5) Wording for Conservation Easement to be worked out with the Conservation Commission.
  - 6) State driveway permit received.
  - 7) All Fees paid.
  - \*8) Compliance hearing scheduled for September 20, 1994
- Rich seconded the motion for conditional approval. Vote was 5-0 yes to grant conditional approval.

8:20 PM P & C Realty, Inc. Subdivision Case #1993-5:F-60, case continued. (Peter excused himself from this case. Rich chaired the meeting, with Dennis voting for Peter.) Paul and Ann Gavin, and Jim Edwards of Meridian Land Services were present. Rich said the PB had visited the site on November 20th. His feeling was that the quality of Rocky Pond Road in the area of this subdivision, as well as the concerns of Fire Chief Ray Key regarding lack of an adequate water supply for fire safety in this area may lead the PB board to deem this subdivision premature & scattered. Jim Edwards said he met with Jeremy and road agent Clarence Farwell this morning and had discussed the road. Jim and the applicants agree that something should be done to improve the road. They are willing to make a contribution to upgrading a portion of Rocky Pond Road. Jim said a traffic count on Rocky Pond Road had been taken at the peak traffic hours, and they logged 17 vehicles in one hour. Joe said he felt this may be scattered and premature because the five lots will be adding traffic to this road with its present poor road surface. It was mentioned that this time of year Rocky Pond Road is not as heavily traveled as in the better weather months of the year. Rich noted the poor site distance entering into Hollis from lot F-60 (it should have 200 feet of safe site distance); and referenced Jeremy's memo (see attached) which deals with road safety as well as fire safety concerns. Margaret said her concerns were with getting emergency vehicles to the site in the wintertime. Judy mentioned a winter ambulance call when the ambulance was unable to reach a car accident from either Brookline or Hollis because of the poor road conditions; and a 4-wheel drive vehicle had to bring them to the accident scene. PB will check with Wes Whittier regarding ambulance safety on calls on Rocky Pond Road at this location. Jim said there is a small watershed in this location, and he would not recommend placing a fire pond there. He said it is a seasonal water table; and placing a cistern could be a maintenance problem. Jim said the applicant was willing to look at an alternative measure such as a contribution to improve some other part of the Fire Dept. infrastructure. Jeremy recommending holding back on this issue until the Fire Engineers have made a decision on the options at this site and have reported back to the PB.

Chris said the PB could not compromise on safety issues— either fire or road. Prior to allowing development in this area, these two items need resolving. Rich noted there is a 3,000 foot unpaved section on Rocky Pond Road in Brookline. Joe said the PB would rather find an alternative solution to the fire & road safety issues than to disapprove the subdivision plan as scattered and premature.  
**Case continued till January 18, 1994.**

**8:50 PM Holly Hills Construction—Case #1993-7:J-37,-38,-39,-60, J-33-34** (Being an abutter, Joe excused himself tonight from any consideration on this case.) Jim Edwards of Meridian Land Services, Inc. was present with 3 conceptual plans to subdivide 185 acres of land off Averill Road. Plan "A" using standard subdivision regulations would create 44 lots. 66 Acres would be dedicated to open space. Plan "B" is an open space development concept, and would create 46 lots. Plan "C", also an open space concept, would create 44 lots. He said this subdivision would tie in with Wallace Brook Road. Rich and Joe advised him that the PB, in previous discussions with Tom Enright regarding subdividing this property, would require having an access onto Route 13. Rich said this was an area which would lend itself to an open space development design; with the dedicated space being available for passive recreational facilities. He said the developer should meet with the selectmen to discuss off site improvements. Jim stated for the record that they will be using some of the gravel material in the area of lots 19, 20, and 21 for road construction. After removal, the area will be re-graded, loamed and seeded. Judy referenced the subdivision regulations and how the open space area should be left. Jeremy recommended the applicant come to be PB with a design review January 18, 1994; and the PB should do a site walk of the area. Margaret asked that the access to the open space area be marked.

**9:00 PM Planning Board General Business**  
**1) Project Status Reports—** PB members discussed the roads to be accepted by the Town at March 1994 Town Meeting. Road Inspector Clarence Farwell had written a report on Petersen Road stating all items have been taken care of and recommending that the \$8,700. construction bond be held for a one year maintenance bond to expire on March 14, 1995.

**MOTION** Peter made a motion seconded by Joe to recommend acceptance of Petersen Road and establish a maintenance bond for one year in the amount of \$8,700. Vote cast 5-0 yes.

**9:20 PM 2) Discussion of proposed zoning changes for March 1994 Town Meeting; and Master Plan update changes.**  
Jeremy said that he had revised some of the data for compilation of Chapter IX of the Master Plan based on the recommendations from the public hearing. He said that he

had checked the number of outstanding vacant approved lots, and had come up with a figure of 160. Margaret said the main issue for discussion from the public hearing seemed to be establishing building rights instead of a first come first served basis for building permits. Chris referenced RSA 674:39, Four year exemption, and expressed his view that currently approved lots should not come under the building permit restriction; but that any new subdivisions coming before the PB would be restricted. Joe felt that a date for PB review should be added to the sunset clause based on the comments from the public hearing. Jeremy suggested the wording in Article XVI, GROWTH MANAGEMENT ORDINANCE, APPLICATION be changed to read: "Application- This article only applies to those lots shown on subdivision plans accepted by the Planning Board after November 24, 1993." Jeremy said that existing subdivisions would be exempt, and he had asked for phasing plans from the 3 developers currently building in approved subdivisions. Rich said if the PB could come to a reasonable agreement with the developers on voluntary phasing, this would leave room for other people to obtain building permits. Then the number for the remainder of building permits to be issued annually would be adjusted accordingly. Alan Lorden said he would phase over the next 3 years- 4 houses in 1994; 6 in 1995, and 6 in 1996. Bob Bourassa has 21 lots left in Talbot-Taylor Estates. He would agree to build 7 lots per year for the next 3 years. Bob Bramley said there are 67 lots in Mountain Road and Birch Hill Estates, II. He mentioned all three developers had come to the PB previously for approval of phasing plans for road construction and bonding. After discussion on how to establish an equitable growth formula, it was then decided to change Requirements, #4., line #8 to read: "and to meet the other purposes of this article, only 10 building permits can be issued annually." It was decided to change Sunset Clause, Line #3 to read: "An annual November review by the Planning Board....."

10:50 PM Peter made a motion to adjourn the meeting. Joe seconded the motion. Meeting was adjourned by a 5-0 yes vote.

Next public hearing on proposed zoning changes will be held on Tuesday, January 4, 1994.

RE: Talbot/Taylor Estates (Case #195)

**FILE COPY**

Dear Peter,

As requested by Bob Bourassa I have I have inspected Taylor Drive station to 30+00 and Talbot Rd. Complete for it's status relative final completion. The following items are not complete at this time:

1. Street name signs
2. Guard rail
3. Some bounds
4. Minor landscape work.

All other work is substantially complete.

Very truly yours  
William W. Ducklee  
road inspector.

Dec. 10, 1993

N.R.S.P. - Case # 1993-D:T-19

To The Brookline Planning Board,

Please refer to Article IV, Industrial Commercial district, Section B, Uses Permitted # 12. Any use which does not offend by emission of smoke, dust, noise, odor or fumes

The noise coming from Superior Steel Fabrications is loud and offensive.

We, the neighbors, who live around this business, are concerned over the noise and ask that the Planning Board please consider in their decision of expansion, how in which Superior Steel Fabrications must operate  
Example - Mon thru Fri. 7<sup>AM</sup> to 6<sup>PM</sup> Sat. 8<sup>AM</sup> to 12<sup>AM</sup>,  
Sundays and all legal Holidays closed. Also any middle of the night operations such as what took place Dec. 8, 93 at 1 AM must stop.

Sincerely,  
Concerned neighbors,

Amy Anderson  
Carl Anderson  
Lorraine C Dixon  
George E. Ding  
Ed Dini  
Marion Jewin  
D. Knudsen

Donna Thomas  
Katherine L Thomas  
Ralph Dini  
Ann Marie Davis  
Christina Thomas
